Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Organ. May be repeated for credit.—F, W, S. (F, W, S.)

**131E. Applied Study of Music: Advanced (Individual); Violin (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Violin. May be repeated for credit.—F, W, S. (F, W, S.)

**131F. Applied Study of Music: Advanced (Individual); Viola (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: open to Music majors only; admission by audition and consent of instructor. Individual instruction in Viola. May be repeated for credit.—F, W, S. (F, W, S.)

**131G. Applied Study of Music: Advanced (Individual); Cello (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Cello. May be repeated for credit.—F, W, S. (F, W, S.)

**131H. Applied Study of Music: Advanced (Individual); Double Bass (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Double Bass. May be repeated for credit.—F, W, S. (F, W, S.)

**131I. Applied Study of Music: Advanced (Individual); Flute (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Flute. May be repeated for credit.—F, W, S. (F, W, S.)

**131J. Applied Study of Music: Advanced (Individual); Oboe (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: admission by audition. Individual instruction in Oboe. May be repeated for credit.—F, W, S. (F, W, S.)

**131K. Applied Study of Music: Advanced (Individual); Clarinet (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Clarinet. May be repeated for credit.—F, W, S. (F, W, S.)

**131L. Applied Study of Music: Advanced (Individual); Bassoon (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Bassoon. May be repeated for credit.—F, W, S. (F, W, S.)

**131M. Applied Study of Music: Advanced (Individual); French Horn (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in French Horn. May be repeated for credit.—F, W, S. (F, W, S.)

**131N. Applied Study of Music: Advanced (Individual); Trumpet (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Trumpet. May be repeated for credit.—F, W, S. (F, W, S.)

**131O. Applied Study of Music: Advanced (Individual); Trombone (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Trombone. May be repeated for credit.—F, W, S. (F, W, S.)

**131P. Applied Study of Music: Advanced (Individual); Tuba (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Tuba. May be repeated for credit.—F, W, S. (F, W, S.)

**131Q. Applied Study of Music: Advanced (Individual); Percussion (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Percussion. May be repeated for credit.—F, W, S. (F, W, S.)

**131R. Applied Study of Music: Advanced (Individual); Classical Guitar (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Classical Guitar. May be repeated for credit.—F, W, S. (F, W, S.)

**140. University Jazz Band (2)**

Rehearsal—4 hours. Prerequisite: consent of instructor. Open to students in any major. Rehearsal, study, and performance of jazz band music and full variety of jazz band styles, including swing, be-bop, and contemporary jazz styles. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.) Griffith

**141. University Symphony (2)**

Rehearsal—4 hours. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University whose proficiency meets the requirements of concert performance. Sight-reading, rehearsal and performance of music from the orchestral literature. May be repeated for credit. (P/NP grading only.) GE credit: AH.—F, W, S. (F, W, S.)

**142. University Chamber Singers (2)**

Rehearsal—3 hours. Prerequisite: admission subject to audition before first class meeting. Rehearsal and performance of works for small choral group. May be repeated for credit. (P/NP grading only.) GE credit: AH.—F, W, S. (F, W, S.)

**143. University Concert Band (2)**

Rehearsal—4 hours. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University whose proficiency meets the requirements of concert performance. Rehearsal and performance of music for band. May be repeated for credit. (P/NP grading only.) GE credit: AH.—F, W, S. (F, W, S.) Nowlen

**144. University Chorus (2)**

Rehearsal—4 hours. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University. Rehearsal and performance

of choral music. May be repeated for credit. (P/NP grading only.) GE credit: AH.—F, W, S. (F, W, S.) Thomas

**145. Early Music Ensemble (2)**

Rehearsal—4 hours. Prerequisite: consent of instructor; admission by audition. Rehearsal and performance of Medieval, Renaissance, and Baroque music for vocal ensemble and historical instruments. May be repeated for credit. (P/NP grading only.) GE credit: AH.—F, W, S. (F, W, S.)

**146. Chamber Music Ensemble (1)**

Rehearsal—2 hours; student practice—1 hour. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University whose proficiency meets the requirements of concert performance. Study, rehearsal, and performance of ensemble music for strings, winds, voice, piano, harpsichord, and organ. May be repeated for credit. (P/NP grading only.) GE credit: AH.—F, W, S. (F, W, S.) Baldini

**147. University Wind Ensemble (2)**

Rehearsal—4 hours. Prerequisite: consent of instructor. Rehearsal, study, and performance of a full variety of wind ensemble music; and to have students share their work in public performances. May be repeated for credit. (P/NP grading only.) GE credit: AH.—F, (F.) Nowlen

**148. Hindustani Vocal Ensemble (2)**

Rehearsal—2 hours. Prerequisite: consent of instructor. Basics of Hindustani music through theory and practice. Fundamentals of raga (mode) and tala (rhythms) with special emphasis on improvisation, a central feature of khyal (singing style). Five ragas each quarter. May be repeated up to six times for credit. (P/NP grading only.) GE credit: AH.—W, S. (W, S.) Sahai

**149. Indonesian Gamelan Ensemble (2)**

Rehearsal—2 hours. Prerequisite: consent of instructor. Indonesian music practice. Basic instrumental technique and repertory. Focus on two styles of Sundanese gamelan (tuned percussion orchestras): salendro and degung. May be repeated for credit. (P/NP grading only.) GE credit: AH.—F, W, S. (F, W, S.) Spiller

**150. Brasilian Samba School (2)**

Rehearsal—2 hours. Prerequisite: consent of instructor. Practice of Brasilian music. Basic instrumental technique and repertory. Focus on the percussion traditions of Rio de Janeiro and Bahia. May be repeated up to six times for credit. (P/NP grading only.) GE credit: ArtHum | AH.—F, W, S. (F, W, S.) Roh

**151. Korean Percussion Ensemble (2)**

Rehearsal—2 hours; listening—2 hours; practice—2 hours. Prerequisite: consent of instructor. Class size limited to 20 students. Practice of Korean percussion styles. Basic instrumental technique and repertory. Focus on the percussion traditions of samulnori and basic concepts of p'ungmul. (P/NP grading only) May be repeated six times for credit. GE credit: AH.—F, W, S. (F, W, S.) Lee

**192. Internship in Music (1-4)**

Internship—3-12 hours. Prerequisite: consent of instructor or academic adviser. Student must submit a written proposal to an appropriate Music Department instructor. Internship outside the university related to music. May be repeated up to eight units of credit. (P/NP grading only.) GE credit: AH.—F, W, S, Su. (F, W, S, Su.)

**194HA. Special Study for Honors Students (2-4)**

Independent study—6-12 hours. Prerequisite: courses 7C and 123. Open only to students who qualify for the honors program and admission to music Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of music. (Deferred grading only, pending completion of sequence.) GE credit: ArtHum | AH.—F, W, S. (F, W, S.)

### **194HB. Special Study for Honors Students (2-4)**

Independent study—6-12 hours. Prerequisite: completion of course 194HA; consent of instructor. Open only to students who qualify for honors program and admission to Music Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of music. (Deferred grading only, pending completion of sequence.) GE credit: ArtHum | AH.—F, W, S. (F, W, S.)

### **195. Senior Project (2)**

Project—6 hours. Prerequisite: completion of course 7C and 123; consent of instructor. Preparation of a senior project in music composition (public presentation of a new work), in music performance (a public recital), or in music history and theory (public presentation of research results). GE credit: ArtHum | AH.—F, W, S. (F, W, S.)

### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: AH.—F, W, S. (F, W, S.)

### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.) GE credit: AH.—F, W, S. (F, W, S.)

## **Graduate**

### **202. Notation (4)**

Seminar—3 hours; term paper. Open to graduate students in music; advanced undergraduates with consent of instructor. Study of musical notation; investigation of techniques for editing Medieval and Renaissance music. Offered in alternate years.—F, W, S. (F, W, S.) Berger

### **203. Music Composition (4)**

Seminar—3 hours; term paper. Open to graduate students in music; advanced undergraduates with consent of instructor. Technical projects that explore compositional problems, the skill and techniques with which to solve them, and free composition. May be repeated for credit.—F, W, S. (F, W, S.) Bauer, Nichols, Ortiz, Pelo, Rohde, San Martin

### **204. Advanced Conducting (3)**

Tutorial—2 hours; practice. Prerequisite: consent of instructor. Open to graduate students in conducting. This course covers the technical aspects of conducting and the broader issues in music history and analysis that conductors must face before leading a rehearsal or performance. May be repeated for credit.—F, W, S. (F, W, S.) Baldini, Thomas

### **207. Advanced Electronic and Computer Music (4)**

Seminar—2 hours. Prerequisite: consent of instructor. Advanced composition of computer and electronic music.

### **210A. Proseminar in Music (Theory and Analysis) (4)**

Seminar—3 hours; term paper. Open to graduate students in music; advanced undergraduates with consent of instructor. Voice-leading analysis of tonal music derived from Schenker and pitchclass set theory. Recent work on compositional design, generalizations of the concept of interval, psychologically oriented music theory, and theories of durational structure and timbre.—W. (W.) San Martin

### **210B. Proseminar in Music (Musicology and Criticism) (4)**

Seminar—3 hours; term paper. Open to graduate students in music; advanced undergraduates with consent of instructor. Issues and concepts of music history, including performance practice questions for specific repertoires and periods; principles, aims, and methods of archival study; historical theory; evolution of musical styles; philosophical debates about goals and aims of the discipline in general.—F. (F.) Owens

### **210C. Proseminar in Music (Ethnomusicology) (4)**

Seminar—3 hours; term paper. Open to graduate students in music; advanced undergraduates with consent of instructor. Introduction to ethnomusicology

through its intellectual history, theoretical approaches, analytical techniques, and methodologies.—S. (S.) Lee

### **212. Ethics of Musical Ethnography (4)**

Seminar—3 hours; fieldwork. Open to graduate students in music. Advanced undergraduates with consent of instructor. The role, methodology, perception, and assumptions of the ethnomusicologist in ethnographic scholarship. Examination of complex ethical and political questions in relation to practical fieldwork techniques. Offered in alternate years.—W. (W.) Lee

### **213. Transcription and Notation (4)**

Seminar—3 hours; project. Prerequisite: Open to graduate students in music. Advanced undergraduates with consent of instructor. Practical instruction in the transcription and analysis of primarily non-Western musics. Analytical and theoretical issues, the politics of representation, and the cultural values and ideologies implicit in notation. Offered in alternate years.—S. (S.) Spiller

### **214. Recent Issues in Ethnomusicology (4)**

Seminar—3 hours; term paper. Open to graduate students in music; advanced undergraduates with consent of instructor. Issues, schools of thought, and basic literature in ethnomusicology from the 1980s to present. Emphasis on theory and methodology. Offered in alternate years.

### **221. Topics in Music History (4)**

Seminar—3 hours. Open to graduate students in music; advanced undergraduates with consent of instructor. Studies in selected areas of music history and theory. May be repeated for credit.—F, W, S. (F, W, S.)

### **222. Techniques of Analysis (4)**

Seminar—3 hours. Open to graduate students in music; advanced undergraduates with consent of instructor. Analysis and analytical techniques as applied to music of all historical style periods. May be repeated for credit.—F, S. (F, S.)

### **223. Topics in Ethnomusicology (4)**

Seminar—4 hours. Prerequisite: open to graduate students in music; advanced undergraduates with consent of instructor. Intended for graduate students in Music; Anthropology students may enroll with consent of instructor. In-depth ethnomusicological studies of selected cultures and their musics; study of historical, theoretical, contextual, and cultural features.—W. (W.)

### **299. Individual Study (1-12)**

(S/U grading only.)

## **Native American Studies**

(College of Letters and Science)

Martha J. Macri, Ph.D., Professor Emeritus  
Victor D. Montejo, Ph.D., Professor Emeritus  
Stefano Varese, Ph.D., Professor Emeritus

## **The Major Program**

Native American Studies provides a multi-disciplinary introduction to the indigenous cultures of North, Central, and South America. It challenges students to consider issues of cultural diversity, sovereignty, and indigenous knowledge systems in preparation for living in a world of constantly increasing social and cultural complexity.

**The Program.** Students electing a major in Native American Studies may complete Plan I, Plan II, or Plan III. Plan I enables students to concentrate chiefly upon the Native experience in North America (north of Mexico). Plan II encourages interested students to focus upon Meso-America with some course work integrating Meso-America with North America and South America. Plan III focuses upon South America with some course work integrating that region with areas to the north.

**Career Alternatives.** Native American Studies is excellent preparation for a scholarly career or professional career such as teaching, law, human services, health, tribal administration, social work, and inter-ethnic relations. Graduate schools and agencies in these and related areas are looking for students with broad interdisciplinary preparation and who possess knowledge and sensitivity relating to ethnic issues and cultural diversity.

### **A.B. Major Requirements:**

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>16-24</b>

Native American Studies 1; 10 or 12..... 8

One or two courses from: Native American Studies 5, 12, 32, 33, 34..... 4-8

One or two courses from: African American and African Studies 12, 52, Anthropology 2, 20, 24, Asian American Studies 1, 2, 4, Chicana/o Studies 10, 21, 23, Comparative Literature 25, Community and Regional Development 2, Environmental Science and Policy 10, History 7A, 7B, 7C 17A, Linguistics 1, Religious Studies 90, Technocultural Studies 2 ..... 4-8

**Depth Subject Matter .....** 24

Native American Studies 130A, 130B or 130C, 157, and 180 or 135..... 12

Three course from: Native American Studies 101, 107, 108, 115, 119, 122, 125, 130A, 130B, 130C, 133A, 133B, 135, 146, 161, 162, 180, 181A, 181B, 181C, 185, 188, 191 ..... 12

Note: If a course is counted for either Plans I, II, or III (below), it cannot also be counted as part of the 24 units of Depth Subject Matter.

### **Areas of Specialization (complete one plan)**

#### **Plan I—North American Emphasis ..... 20**

Native American Studies 107 or 108..... 4

Two courses from: Native American Studies 101, 115, 119, 122, 125, 130A, 130B, 130C, 135, 146, 161, 162, 181A, 181B, 181C, 185, 188, 191 ..... 8

One course from: American Studies 100, Anthropology 103, 136, 172, 173, 175, 176, African American and African Studies 100, 107B, 145B, 152, 153, 163, 172, 176, 181, Asian American Studies 102, 112, 115, 121, Chicana/o Studies 100, 110, Sociology 128, Women's Studies

102, 160, 162, 170, 178F, 180, 182 .... 4

One other upper division Native American Studies course, selected in consultation with adviser ..... 4

#### **Plan II—Mexico-Central America Emphasis ..... 20**

Native American Studies 107, 133 or 133B..... 8

Two courses from: American Studies 100, History 110A, 160, 165, 166A, 166B, African American and African Studies 107A, 180, Anthropology 144, Chicana/o Studies 111, 112, 125S, 130, 135S, 147S, Native American Studies 122, 133A, 184 (Study

Abroad), 185, Political Science 143B, Sociology 158, Spanish 177 ..... 8  
 One course from: Art History 151, Native American Studies 181B, 181C, or, if student's work is specifically focused upon a Meso-American language or topic, from Native American Studies 188, 191 ..... 4

**Plan III—South American Emphasis ..... 20**

Two courses from Native American Studies 107, 110A, 110B, 110C, 110D, 120 (Study Abroad) ..... 8  
 Two courses from: African American and African Studies 107A, 155A, 163, 180, Anthropology 103, 144, 175, History 162, 165, Political Science 143A, Sociology 104, Spanish 170 170S, 171, 171S (Summer Abroad) ..... 8  
 One course from History 163B, 164, 167, Political Science 143A ..... 4

**Total Units for the Major ..... 60-68**

**Major Adviser.** Z. Mendoza

**Major Advising.** All new and prospective Native American Studies majors are encouraged to see the Student Affairs Officer individually, once per year, at minimum.

**Minor Program Requirements:**

The Native American Studies minor provides an interdisciplinary introduction to the Native experience in the Americas through coursework in history, literature, art, performance, languages, values, philosophy, religion, current events, political economy, and environment.

**UNITS**

**Native American Studies ..... 24**

One lower division course in Native American Studies ..... 4  
 Five upper division courses in Native American Studies ..... 20  
*Ethno-History:* Native American Studies 130A, 130B, 130C, or 133B,  
*Philosophy and Values:* Native American Studies 107, 108, 110A, 110B, 110C, 110D, 157, 180.  
*Politics and Current Affairs:* Native American Studies 115, 118, 119, 120, 122, 161, 162, 191.  
*Art and Literature:* Native American Studies 101, 125, 181A, 181B, 181C, 184, 185.  
 One other upper division course selected in consultation with adviser.

**Study Off Campus.** Majors have the option of spending one to three quarters elsewhere in the Americas or on or near a reservation as part of the fulfillment of the Area of Specialization. Each student's plan must be approved by the student's adviser and by the chairperson and may fulfill from 12 to 20 of the 28 units required for the emphasis. The courses or field internship taken elsewhere must be focused upon indigenous peoples or indigenous languages and the institution of study shall be located in an area with substantial indigenous population. Students must have upper division standing and, for Plan I, course 107 or the equivalent should have been completed; for Plan II, courses 107 and 133 should have been completed; and for Plan III, courses 107 and 120 should have been completed prior to departure. Several options may be used for receiving academic credit, including course 195. The department strongly encourages students to participate in the UC Education Abroad Program or Short-Term Programs Abroad.

**Graduate Study.** The Department offers a program of study leading to the M.A. and Ph.D. degrees in Native American Studies, as well as a designated emphasis in Native American Studies for graduate students in approved programs. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies.

**Graduate Advisers.** Elisabeth Rose Middleton

**Courses in Native American Studies (NAS)**

**Lower Division**

**1. Introduction to Native American Studies (4)**

Lecture—3 hours; discussion—1 hour. Introduction to Native American Studies with emphasis upon basic concepts relating to Native American historical and political development. GE credit: SocSci, Div | ACGH, DD, SS, WC, WE.—F, W, S. Crum, Middleton

**5. Introduction to Native American Literature (4)**

Lecture/discussion—4 hours. Prerequisite: completion of Subject A requirement. Intensive focus on analysis of Native American literary texts, with frequent writing assignments to develop critical thinking and composition skills. GE credit: ArtHum, Div, Wrt | AH, DD, OL, WE.—F, W, S, Su.

**7. Indigenous and Minority Languages (4)**

Lecture—3 hours; discussion—1 hour. Survey of the status of indigenous, immigrant, and other minority languages in the Americas and around the world. Topics include linguistic diversity, language endangerment and revitalization, heritage language maintenance in immigrant communities, and language change due to transcultural interactions. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, DD, WC, WE.—F. (F) Spence

**10. Native American Experience (4)**

Lecture—3 hours; discussion—1 hour. Introduction to the diverse cultures of Native American peoples from North, Central, and South America. Emphasis on Native American voices in the expression of cultural views and in the experience of conflicting values. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, DD, WC, WE.—F, W, S, Su. Hernandez-Avila, Mendoza

**12. Native American/Indigenous Film (4)**

Lecture—3 hours; film viewing; discussion—1 hour. Survey and analysis of the visual colonization of Native American peoples and the contemporary responses by Native American/Indigenous filmmakers claiming visual sovereignty. Examines a range of filmic genres including documentary, features, shorts, festivals, tv and internet screening. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, VL, WC, WE.—Tsinhnahjinnie

**32. Native American Music and Dance (4)**

Lecture/discussion—4 hours. Introduction to the music and dance of the native peoples of the Americas. Students will study secular native music and dance from a cross-section of regions and tribes. GE credit: Div.—F.

**33. Introduction to Native American Art (4)**

Lecture—4 hours. Introduction to Native American Art from throughout North America, inclusive of traditional forms, techniques and designs in a range of media including ceramics, basketry, fiberwork, carving, painting, sculpture and photography within a context of social and political history. GE credit: ArtHum, Div | ACGH, AH or SS, DD, OL, VL, WE.—F. Tsinhnahjinnie

**34. Native American Art Studio (4)**

Lecture—2 hours; studio—6 hours. Limited enrollment. Studio projects to be influenced by contemporary and traditional Native American arts. Examples of designs and media presented in lectures will be of indigenous origin. Introduction and familiarized with various materials and techniques. GE credit: ArtHum | ACGH, AH, DD, OL, VL, WC.—Tsinhnahjinnie

**46. Orientation to Research in Native American Studies (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Native American Studies major or minor, or consent of instructor. Limited enrollment. Introduces students to basic research resources pertinent to Native American subjects available in the region, including libraries, archives, museums, etc. Empha-

sis is upon learning to use documentary resources or other collections of data. Students will carry out individual projects. GE credit: SocSci, Div, Wrt.

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division**

**101. Contemporary Native American Art (4)**

Lecture—3 hours; extensive writing. Examination of contemporary artworks by selected Native American and Indigenous Master artists, in a wide range of media, including ceramics, metal arts, photography, video, painting, installation and performance within a context of political and social histories. Offered in alternate years. GE credit: ArtHum, Div | ACGH, AH or SS, DD, OL, VL, WE.—Tsinhnahjinnie

**107. Special Topics in Native American Languages (4)**

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Investigation of various subjects in contemporary and historical Native American language studies. May be repeated for credit when a different topic is studied. GE credit: Div.—W, S. Mendoza, Spence

**108. Indigenous Languages of California (4)**

Lecture/discussion—3 hours; term paper. Survey of the indigenous languages of the California region: linguistic prehistory, languages at first European contact, subsequent language loss, current efforts at language and cultural revitalization, indigenous languages of recent immigrants to California. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, WE.—W. Spence

**110A. Quechua Language and Society, Beginning Level 1 (4)**

Lecture/discussion—4 hours. Not open to students who took course 107 in the Fall quarter of 2007. Introduction to Quechua language and society emphasizing the practical use of the language. Provides the student with some basic Quechua communication skills and with an initial knowledge about contemporary Andean society and the status of Quechua language today. GE credit: SocSci | SS.—Mendoza

**110B. Quechua Language and Society, Beginning Level 2 (4)**

Lecture/discussion—4 hours. Prerequisite: course 110A. Second Level of the teaching of Quechua language and society. Emphasis on development of conversational and reading skills. Continuation of the study of aspects of contemporary Andean society and the status of Quechua language today. Offered in alternate years. GE credit: SocSci | SS.—W. Mendoza

**110C. Quechua Language and Society, Intermediate Level 1 (4)**

Lecture/discussion—4 hours. Prerequisite: courses 110A and B. Third level of the teaching of Quechua language and society. Emphasis on development of conversational and reading skills. Introduction to more complex grammatical structures. Continuing the study of contemporary Andean society and the status of Quechua language today. Offered in alternate years. GE credit: SocSci | SS.—W. Mendoza

**110D. Quechua Language and Society, Intermediate Level 2 (4)**

Lecture/discussion—4 hours. Prerequisite: course 110A, B and C. Fourth level of the teaching of Quechua language and society. Emphasis on complex structural patterns while emphasizing conversational skills and improving reading competence. Study of different sociopolitical processes that have affected Andean identity and the status of Quechua language. Offered in alternate years. GE credit: SocSci | SS.—S. Mendoza

**115. Native Americans in the Contemporary World (4)**

Lecture/discussion—4 hours. Prerequisite: upper division standing or consent of instructor. Important issues facing Native Americans in the contemporary world. Focus primarily on the diverse ways of life, histories and realities of indigenous people throughout the Americas as they develop their own cultural and political institutions. GE credit: ArtHum or SocSci, Div | AH or SS, ACGH, DD, OL, WE.—W. Crum

**116. Native American Traditional Governments (4)**

Lecture—4 hours. Prerequisite: course 1; Anthropology 2. Study of selected Native American Tribal Governments, confederations, leagues, and alliance systems. Offered in alternate years. GE credit: SocSci, Div.

**117. Native American Governmental Decision Making (4)**

Lecture—4 hours. Prerequisite: course 116, Political Science 2; Anthropology 123 recommended. Native American governmental and community decision making with emphasis on federal and state programs, tribal sovereignty, current political trends and funding for tribal services. Offered in alternate years. GE credit: SocSci, Div.

**118. Native American Politics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing or consent of instructor. Examination of the various interest groups and movements found among Native people and how they relate to the determination of Indian affairs. Study of political action available to Native groups, and local communities, along with relevant theory relating to underdevelopment. Offered in alternate years. GE credit: SocSci | ACGH, DD, SS, WC, WE.—Crum

**119. Introduction to Federal Indian Law (4)**

Lecture—3 hours; term paper. Introduction to the foundational cases and statutes of federal Indian law, from European Contact through the 20th century. GE credit: SocSci | ACGH, SS, WE.—S. Middleton

**120. Ethnopolitics of South American Indians (4)**

Lecture/discussion—4 hours. Prerequisite: course 1, 10 or 55. Social, political, cultural movements of indigenous South Americans in response to establishment, expansion of European colonialism, post-colonial nation-states. Ethnopolitical processes developed through interactions between Indians, Euroamericans. Socioethnographic analysis of main indigenous areas and the development of national societies. GE credit: SocSci, Div, Wrt.

**121. Corporate Colonialism (4)**

Lecture/discussion—4 hours. Prerequisite: course 1, 10 or 12 encouraged, but not required. Price of progress and modernity for native and non-native people. History of the corporation and neoliberalism, military and intelligence agencies, debt, Taylorism, education institutions, media, and law. Discussion of alternatives advocated by contemporary and indigenous social movements. GE credit: SocSci | ACGH, DD, SS, WC, WE.—W. (W.) Granda

**122. Native American Community Development (4)**

Lecture—4 hours. Prerequisite: course 1 or 10. Application of community development theory and techniques to the development problems of Native American communities. (Former course 161.) Offered in alternate years. GE credit: ACGH, DD, OL, SS, WE.

**123. Native Foods and Farming of the Americas (4)**

Lecture/discussion—2 hours. Prerequisite: course 7A concurrently; completion of course 16C or demonstrate required proficiency level on diagnostic exam. Crop domestication, agrobiodiversity, and cuisines of the Americas. Cultural and social history of native American foods like maize, potatoes, quinoa, chocolate, peppers, beans, avocados, etc. Discussion of socio-economic, environmental, legal challenges fac-

ing indigenous and peasant farmers today. Offered in alternate years. GE credit: SciEng or SocSci, Wrt | DD, OL, SE or SS, WC.—S. (S.) Grandia

**125. Performance and Culture Among Native Americans (4)**

Lecture—3 hours; film viewing—3 hours. Prerequisite: upper division standing in division of humanities or social sciences or consent of instructor. Interdisciplinary study of public expressive forms among Native Americans. Comparison and analysis of music, dances, rituals, and dramas from throughout North, Central, and South America in their social and cultural contexts. Not open for credit to students who have completed Music 125. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.—Mendoza

**130A. Native American Ethno-Historical Development (4)**

Lecture—4 hours. Prerequisite: upper division standing or consent of instructor. Study of Native American ethno-history in North America before 1770s. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WC, WE.—F. Crum

**130B. Native American Ethno-Historical Development (4)**

Lecture/discussion—4 hours. Prerequisite: upper division standing or consent of instructor. Study of Native American ethno-history in North America, 1770-1890. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.—W. Crum

**130C. Native American Ethno-Historical Development (4)**

Lecture/discussion—4 hours. Prerequisite: upper division standing or consent of instructor. Study of Native American ethno-history in North America after 1890. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.—S. Crum

**133. Ethnohistory of Native People of Mexico and Central America (4)**

Lecture/discussion—4 hours. Prerequisite: course 1, 10 or 55. Ethnohistorical development of pre-colonial, colonial, post-colonial Mexican and Central American indigenous people; the impact of economic and political factors on the process of cultural adaptation. Attention is given to the questions of nation-building, forced assimilation, indigenous resistance, organized political responses. GE credit: SocSci, Div.

**133A. Ethnohistory of Native Peoples of Mexico and Central America to 1500 (4)**

Lecture/discussion—4 hours; term paper. Prerequisite: course 1 or course 10 or consent of instructor. Ethnohistorical development of the indigenous peoples of Mexico and Central America up to and including the earliest period of European contact. Focus is on indigenous written historical records of the Maya, Mixtec, and Nahuaatl peoples. May be repeated one time for credit. This course can be repeated provided the student chooses a new topic for the term paper/project and for the PowerPoint presentations. The material is so extensive that more than one exposure to it can be very beneficial to students wanting to focus on ancient Mesoamerica. GE credit: ArtHum or SocSci, Div | AH or SS, VL, WC, WE.—S.

**133B. Ethnohistory of Native Peoples of Mexico and Central America 1500 to 2000 (4)**

Lecture/discussion—4 hours; term paper. Prerequisite: course 1 or 10, or consent of instructor. Ethnohistory of indigenous peoples of Mexico and Central America from 1500 to contemporary times. Focus on social and cultural dynamics, particularly the role of indigenous people in the process of nation-state building in Mexico and Central America. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH, OL, SS, WE.

**134. Race, Culture, and Nation (4)**

Lecture—4 hours. Prerequisite: upper division standing or consent of instructor. Exploration of complexities of Native American racial, cultural and national identities and alliances. Study of tribal and federal citizenship, mixed descent and diasporic people(s),

claims to resources, ethnic fraud and contemporary movements of cultural resurgence and political sovereignty and self-determination. Offered in alternate years. GE credit: SocSci | ACGH, DD, SS, WE.—W. (W.) Perea

**135. Gender Construction in Native Societies (4)**

Lecture—4 hours. Prerequisite: upper division standing or consent of instructor. Historical and traditional Native American constructions of feminine and masculine genders as well as third, fourth, and fifth genders. Examines gender roles and statuses. Addresses the problems with contemporary terminologies and impacts of colonization on contemporary constructions of gender identities. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, DD, OL, WE.—Perea

**146. Orientation to Research in Native American Studies (4)**

Lecture/discussion—4 hours; term paper. Prerequisite: Native American Studies major or minor, or consent of instructor. Limited enrollment. Introduction to basic research resources pertinent to Native American subjects available in the region, including libraries, archives, museums, etc. Emphasis on learning to use documentary resources or other collections of data. Students will carry out individual projects. GE credit: SocSci | ACGH, DD, SS, WE.—W. Crum

**157. Native American Religion and Philosophy (4)**

Lecture/discussion—4 hours. Religious and philosophical traditions of Native American/indigenous peoples of the Americas. Offered in alternate years. GE credit: ArtHum, Div | AH, OL, WE.—Hernández-Avila

**161. California Indian Environmental Policy I (4)**

Lecture/discussion—4 hours; term paper. Prerequisite: course 1 or course 10 or consent of instructor. Contemporary California Indian environmental policy issues, with a focus on water, minerals, contamination, and alliance-building. Issues will be placed within historical and political context, drawing on theories of Native environmental ethics, environmental justice, and Federal Indian law. Offered in alternate years. GE credit: ACGH, DD, SS, WE.—Middleton

**162. California Indian Environmental Policy II (4)**

Lecture/discussion—4 hours; term paper. Contemporary California Indian environmental policy issues, with a focus on planning, site protection, and collaborative structures. Issues will be placed within historical and political context, drawing on theories of Native environmental ethics, environmental justice, and Federal Indian law. Offered in alternate years. GE credit: SocSci | ACGH, DD, SS, WE.—Middleton

**180. Native American Women (4)**

Lecture/discussion—4 hours. Prerequisite: course 1, 10, or Women's Studies 50. Native American women's life experiences, cross-cultural comparisons of gender roles, and Native women's contemporary feminist thought. Utilizes texts from literature, social science, and autobiography/biography. GE credit: ArtHum or SocSci | AH or SS, DD, OL, WE.—W.

**181A. Native American Literature (4)**

Lecture/discussion—4 hours. Prerequisite: one from course 5, English 3, Comparative Literature 1, 2, 3. Works of fiction (short story, novel) by contemporary Native American authors, with an emphasis on writers from the United States. Offered in alternate years. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, OL, WE.—Hernández-Avila

**181B. Native American Literature (4)**

Lecture/discussion—4 hours. Prerequisite: one from course 5, English 3, Comparative Literature 1, 2, 3. Works by or about Native Americans including non-fiction novels, biographies and autobiographies. Explore ways Native Americans create and recreate their culture through the creative process in literature. Examine from a critical perspective autobiographies

and testimonial literature. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, DD, OL, WE.—Hernández-Avila

### **181C. Contemporary Native American Poetry (4)**

Lecture—4 hours. Works of poetry by contemporary Native American/indigenous poets, with some attention to traditional cultural poetic expressions. GE credit: ArtHum, Div, Wrt | AH, DD, OL, WE.—F, W, S. Hernández-Avila

### **184. Contemporary Indigenous Literature of Mexico (4)**

Lecture/discussion—4 hours. Prerequisite: course 1 or 10; course 181A or 181C recommended; reading knowledge of Spanish required. Contemporary indigenous literature of Mexico, with a focus on the genres (poetry, fiction, drama, essay); analysis of cultural, historical, and spiritual themes, imagery, styles and performances; biographies of and influences on the Native writers themselves. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, OL, WC.—Su. Hernández-Avila

### **185. Native American Literature in Performance (4)**

Performance instruction—4 hours. Prerequisite: consent of instructor. Performance of contemporary Native American literature onstage, through adaptations of selected literature as well as the creation of original pieces. May be repeated up to four units for credit. Offered in alternate years. GE credit: ArtHum or SocSci | AH, DD, OL, WC.—Hernández-Avila

### **188. Special Topics in Native American Literary Studies (4)**

Lecture/discussion—4 hours; term paper. Prerequisite: upper division standing and one of the following recommended: course 5, 10, 181A, 181C. Special topics drawn from Native American literature. May be repeated for credit when topic differs. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, DD, OL, WE.—S, Su. Hernández-Avila

### **190. Seminar in Native American Studies (2)**

Discussion—2 hours. Prerequisite: senior standing. Seminar of critical issues faced by Native American people. (P/NP grading only.)

### **191. Topics in Native American Studies (4)**

Lecture/discussion—4 hours. Prerequisite: upper division standing. Selected topics in Native American Studies related to indigenous knowledges and worldviews from a historical, cultural, hemispheric perspective. May be repeated for credit when topic differs and/or when offered by a different instructor. Offered irregularly. GE credit: ArtHum or SocSci. Div | AH or SS, DD, OL, WE.—F, W, S. Hernandez-Avila

### **192. Internship (1-12)**

Internship—1 hour. Prerequisite: enrollment dependent on availability of intern position in Native American Studies or the CN Gorman Museum, with priority to Native American Studies minors/majors; consent of instructor. Restricted to upper division standing. Supervised internship in the CN Gorman Museum, community, and institutional settings related to Native American concerns. May be repeated up to 12 units for credit including 192 and other internships taken in other departments and institutions. (P/NP grading only.) GE credit: ArtHum | AH.—F, W, S, Su. Tsinhnahjinnie

### **194HA. Special Studies for Honors Students (4)**

Independent study—12 hours. Prerequisite: senior qualifying for honors. Directed reading, research and writing culminating in the completion of a senior honors thesis or project under direction of faculty adviser. (Deferred grading only, pending completion of sequence.)

### **194HB. Special Studies for Honors Students (4)**

Independent study—12 hours. Prerequisite: senior qualifying for honors. Directed reading, research and writing culminating in the completion of a senior

honors thesis or project under direction of faculty adviser. (Deferred grading only, pending completion of sequence.)

### **195. Field Experience in Native American Studies (12)**

Field work—36 hours. Prerequisite: senior standing and major in Native American Studies, completion of lower division major requirements, and course 161. Field work with governmental and community groups, under supervision of faculty adviser and sponsor. Knowledge acquired in other courses to be applied in field work. (P/NP grading only.)—F, W, S.

### **196. Senior Project in Native American Studies (4)**

Discussion—1 hour; independent study—3 hours. Prerequisite: senior standing and major in Native American Studies, course 195 (may be taken concurrently), and consent of instructor. Guided research project that enables student to apply the theory and research principles from major course work. Final product is to be a major senior project or thesis. (P/NP grading only.)—F, W, S.

### **197TC. Community Tutoring in Native American Studies (1-5)**

Tutorial—3-15 hours. Prerequisite: consent of major committee; upper division standing with major in Native American Studies. Supervise tutoring in community. (P/NP grading only.)—F, W, S.

### **198. Directed Group Study (1-5)**

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

## **Graduate**

### **200. Basic Concepts in Native American Studies (4)**

Seminar—4 hours. Prerequisite: graduate standing and consent of instructor. Analysis of the characteristics of the discipline of Native American Studies. Concentration is on both traditional and contemporary native scholarship and thought as well as the theoretical and methodological consequences derived from application of these ideas. Offered in alternate years.—Crum, Hernández-Avila, Middleton

### **202. Advanced Topics in Native American Studies (4)**

Seminar—4 hours. Prerequisite: graduate standing. Advanced study of selected topics or themes relevant to the field of Native American studies. Topics will be announced at the time of offering. May be repeated for credit when topic differs.—W, S. Hernández-Avila, Perea

### **207. Leadership Skills and Strategies in California Language Documentation & Revitalization (4)**

Seminar—3 hours; term paper. Introduction to the indigenous languages of the Americas, with a focus on California; an examination of how contemporary Native communities document and revitalize their heritage languages. Learn to assist and administer language programs.—S. Spence

### **212. Community Development for Sovereignty and Autonomy (4)**

Seminar—4 hours. Prerequisite: graduate standing and consent of instructor. Examines a sample of contemporary indigenous communities from south, central and north America with the goal of understanding and evaluating the strategies adopted by Native American communities to develop and implement forms of sovereignty or autonomous self-management. Offered in alternate years.—Grandia

### **213. Native Criminality and Deviance (4)**

Seminar—4 hours. Prerequisite: graduate standing. Examination of “deviance” in Native communities with focus on Native criminality in North America. Analysis of the concept of deviance from several dif-

ferent world views. Readings from a range of theories to incorporate varying theoretical perspective on criminality and deviance.

### **217. Public Law 83-280: Colonial Termination (4)**

Seminar—4 hours. Prerequisite: graduate standing, including school of law students. Examination of the signature law of the Termination Era, Public Law 83-280. Discussions to include termination, societal conformity, political consent, jurisdiction, self-determination & decolonization, and colonial relationship between Native Peoples and the United States.—F, W, S. Crum

### **220. Colonialism, Neoliberalism, and Indigenous Self-Determination (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. History, political economy and legacies of imperial/colonial systems. Continuities and discontinuities with corporate globalization and neoliberalism. Focus on resistance and self-determination of indigenous peoples, but with comparison to other groups. Offered in alternate years.—Grandia

### **224. Performance in the Americas (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Ethnomusicological and anthropological approaches to study of public performance in the Americas. New ways of looking at music, dance, rituals and other forms of public expressive forms normally called “folklore” or “popular culture.” Not open for credit to students who have completed Music 224. (Former course Music 224).—Mendoza

### **233. Visual Sovereignty (4)**

Seminar—3 hours; film viewing—2 hours; term paper. Extensively examine the field of contemporary Native American and Indigenous photography, film and performance through research of artworks, writings by artists, theorists, and material in museum collections. May be repeated two times for credit when topic differs. Offered in alternate years.—Tsinhnahjinnie

### **237. Native American Art Collections and Museums (4)**

Seminar—3 hours; term paper. Research and examination of regional Native American art held in museums and other public institutions, as well as privately-held collections. Includes onsite viewing and research of museum collections and archives. Offered in alternate years.—Tsinhnahjinnie

### **240. Native American Public Health: Topics and Issues (4)**

Seminar—3 hours; term paper. Introduction to Native American public health issues and contributing causal factors (including environmental justice and historical trauma); the dimensions of cultural competency in diagnosis and service provision; the structure of Native health care institutions; and debates in Native treatment modalities.—W. Middleton

### **246. Native American/Indigenous Research Methodologies (4)**

Seminar—3 hours; term paper. Introduction to advanced methodologies currently influencing research in Native American Studies and amongst Indigenous communities. Students will develop an original project and course assignments will guide them through the process of research design and implementation. Offered in alternate years.—W. (W) Perea

### **250. Indigenous Critique of Classic Maya Ethnographies (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Construction of the Maya world through ethnographic writing during the present century. Deconstruction of ethnographies about the Mayans considering the modern theories and social/anthropological critiques of modern ethnographies. Offered in alternate years.

### **280. Ethnohistorical Theory and Method (4)**

Seminar—3 hours; term paper. Discussion of the ethnohistorical method; the utilization of diverse types of data, especially documentary sources, to reconstruct socio-cultural history. Particular attention to the

applied area of ethnohistory in the solution of contemporary social problems. Offered in alternate years.—Crum

### **298. Group Study for Graduate Students (1-5)**

Prerequisite: graduate standing, consent of instructor. (S/U grading only.)

### **299. Special Study for Graduate Students (1-12)**

Prerequisite: graduate standing, consent of instructor. (S/U grading only.)

### **Professional**

#### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S.

## **Natural Sciences**

See **Earth and Planetary Sciences**, on page 237.

## **Nematology**

Please see the department of **Entomology and Nematology**, on page 320, for further information.

(College of Agricultural and Environmental Sciences)

Steve Nadler, Ph.D., Chairperson of the Department

Joanna Chiu, Ph.D., Vice Chairperson of the Department

**Department Office.** 367 Briggs; 530-752-0300

### **Faculty**

Edward P. Caswell-Chen, Ph.D., Professor

Edwin E. Lewis, Professor

Steven A. Nadler, Ph.D., Professor

Harry K. Kaya, Ph.D., Professor Emeritus

(*Entomology*)

### **Minor Program Requirements:**

UNITS

#### **Nematology ..... 18-20**

Nematology 100, 110, and Soil Science 100 ..... 10

Two or three courses from one of the following areas: ..... 8-10

- (a) *Plant Science*: Microbiology 102; Entomology 100, 135, 153, 156, 156L; Evolution and Ecology 112; Plant Pathology 120, 148; Plant Biology 121; Soil Science 111, 112
- (b) *Entomology*: One upper division Entomology course; Evolution and Ecology 112; Microbiology 102; Plant Biology 121; Plant Pathology 120, 148; Soil Science 102, 111, 112

**Minor Adviser.** S. Nadler

**Graduate Study.** Graduate degrees specializing in Nematology are offered through the Departments of Entomology and Plant Pathology, and through various Graduate Groups (Biochemistry, Ecology, Genetics, Plant Protection and Pest Management). Refer also to the Graduate Studies chapter of this catalog.

### **Courses in Nematology (NEM)**

**Related Courses.** See **Entomology and Nematology**, on page 320.

### **Lower Division**

#### **10V. General Biology (4)**

Web virtual lecture—3 hours; web electronic discussion—1 hour. Concepts and issues in biology. Emphasis on composition and structure of organisms; regulation and signaling; heredity, evolution and the interaction and interdependence among life forms and their environments. Significant writing is required. Designed for students not specializing in biology. Not open for credit to students who have completed course Biological Sciences 1A, 1B, 1C, 2A, 2B, 2C, 10 or 10V. GE credit: SciEng, Wrt | SE, SL, WE.—S. (S.) Westerdahl

### **Upper Division**

#### **100. General Plant Nematology (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1B or 10. An introduction to the classification, morphology, biology, and control of the nematodes attacking cultivated crops. GE credit: SciEng | SE.—F. (F.)

#### **110. Introduction to Nematology (2)**

Lecture—2 hours. Prerequisite: Biological Sciences 1B or the equivalent or consent of instructor. The relationship of nematodes to human environment. Classification, morphology, ecology, distribution, and importance of nematodes occurring in water and soil as parasites of plants and animals. GE credit: SciEng | SE.—W. (W.) Caswell-Chen, Nadler

#### **150. Revising Scientific Prose (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one course in English composition; understanding of English grammar and parts of speech; upper division standing in a science major; or consent of the instructor. Class size limited to 15 students. Principles of detailed revision; close analysis of writing styles in research papers, popular scientific articles, and other scientific reports; use of verb-based and noun-based writing styles. GE credit: Wrt.—W. (W.) Jaffee

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

### **Graduate**

#### **201. Molecular and Physiological Plant Nematology (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: Biological Sciences 101; Plant Pathology 120, course 100 or 110. Molecular biology and physiology of nematodes using *Caenorhabditis elegans* as a model, but with emphasis on plant-parasitic species. Plant responses to nematodes. Discussion of current literature emphasized. Offered in alternate years.—W.

#### **203. Ecology of Parasitic Nematodes (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: course 100 or 110 or Entomology 156; Evolution and Ecology 101 or Plant Biology 117. Major concepts in population and community ecology of animal- and plant-parasitic nematodes. Current advances in techniques, theory, and basic information about nematode-host dynamics, and application to management of nematode diseases. Offered in alternate years.—(S.) Caswell-Chen

#### **204. Management of Plant-Parasitic Nematodes (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 100 or 110. Theory, foundation, principles and practices of nematode management. Techniques and equipment used to manage nematodes and methods used to analyze their effectiveness. Offered in alternate years.—S. Westerdahl

#### **205. Insect Nematology and Biological Control (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: courses 100 and 110, Entomology 100 or 110. The biology of insect-parasitic nematodes, their effect on the host, and their potential as biological control agents of insect and other invertebrate pests. Appli-

cation of ecological theory in classical and augmented biological control. Offered in alternate years.—(F.) Lewis

#### **206. Nematode Systematics and Evolution (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 100 or 110 or Entomology 156; Evolution and Ecology 100 recommended. Nematode diversity as revealed by morphological and molecular evidence. Laboratory experience focuses on structural features used in taxonomy. Phylogenetic relationships based on morphological and molecular data used to consider patterns of character change among taxa. Offered in alternate years.—(F.) Nadler

#### **210. Molecular Phylogenetic Analysis (3)**

Lecture—2 hours; laboratory—3 hours. Theory and practice of inferring phylogenetic trees using molecular sequence data. Practical techniques for obtaining sequence data, advantages and disadvantages of common approaches for inferring trees, statistical methods for comparing alternative hypotheses. (Same course as Evolution and Ecology 210.) Offered in alternate years.—(F.) Nadler

#### **245. Field Nematology (1)**

Fieldwork—6 days. Prerequisite: course 100. Six-day demonstration and field study in applied nematology including diagnosis and prediction of nematode field problem strategies for control field plot design, and establishment in association with diverse California crops. (S/U grading only.)—F. (F.)

#### **290. Seminar (1)**

Seminar—1 hour. (S/U grading only.)—F, S. (F, S.)

#### **290C. Advanced Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Planning and results of research programs, proposals, and experiments. Discussion and critical evaluation of original research being conducted by the group. Discussion led by individual research instructors for research group. (S/U grading only.)

#### **298. Group Study (1-5)**

(S/U grading only.)

#### **299. Research (1-12)**

(S/U grading only.)

 Edmund M. Bernauer, Ph.D., Professor Emeritus  
 James M. Boda, Ph.D., Professor Emeritus  
 Leo M. Chalupa, Ph.D., Distinguished Professor Emeritus (*Ophthalmology & Vision Science*)  
 Ernest Chang, Ph.D., Professor Emeritus (*Animal Science*)  
 Jack M. Goldberg, Ph.D., Senior Lecturer Emeritus  
 Robert G. Holly, Ph.D., Senior Lecturer Emeritus  
 John M. Horowitz, Ph.D., Professor Emeritus Academic Senate Distinguished Teaching Award  
 Williard S. Lotter, Ph.D., Senior Lecturer Emeritus  
 Verne E. Mendel, Ph.D., Professor Emeritus  
 Alexander I. Mogilner, Ph.D., Professor Emeritus (*Mathematics*)  
 Brian C. Mulloney, Ph.D., Distinguished Professor Emeritus  
 Pamela A. Pappone, Ph.D., Professor, Emerita  
 E. Dean Ryan, Ed.D., Professor Emeritus  
 W. Jeff Weidner, Ph.D., Professor Emeritus  
 Keith R. Williams, Ph.D., Senior Lecturer Emeritus  
 Martin C. Wilson, Ph.D., Professor Emeritus  
 Dorothy E. Woolley, Ph.D., Professor Emerita

## Affiliated Faculty

Erwin A. Bautista, Ph.D., Lecturer  
 Gretchen Casazza, Ph.D., Assistant Adjunct Professor (*Sports Medicine Program*)  
 Ann V. Hedrick, Ph.D., Adjunct Professor  
 Lauren C. Liets, Ph.D., Lecturer  
 Paul B. Salitsky, Ph.D., Lecturer  
 James D. Shaffrazi, M.D., Lecturer  
 Marilyn Ramenofsky, Ph.D., Adjunct Professor  
 Grace L. Rosenquist, Ph.D., Assistant Adjunct Professor

## The Neurobiology, Physiology, and Behavior Major Program

Neurobiology, Physiology, and Behavior is a major that emphasizes the understanding of vital functions common to all animals. All animals perform certain basic functions—they grow, reproduce, move, respond to stimuli, and maintain homeostasis. The physiological mechanisms upon which these functions depend are precisely regulated and highly integrated. Actions of the nervous and endocrine systems determine behavior and the interaction between organisms and their physical and social environments. Students in this major study functional mechanisms; the control, regulation, and integration of these mechanisms; and the behavior that relates to those mechanisms. They do so at the level of the cell, the organ system, and the organism.

**The Program.** In the freshman and sophomore years, students majoring in Neurobiology, Physiology, and Behavior build a broad scientific background, taking courses in chemistry, biology, physics, and mathematics. As juniors or seniors, students can enroll in a variety of Neurobiology, Physiology, and Behavior courses and related upper division courses. The NPB major contains three tracks: the Neurobiology track, the Physiology track, and the Organism-Environmental Interactions track. If you wish to propose an alternative to these tracks for yourself, please meet with your master adviser who can approve such individualized plans. Students can also participate in a number of advanced laboratory courses or may design an individual, independent project guided by a member of the faculty.

**Career Alternatives.** Completion of the Neurobiology, Physiology, and Behavior major provides the foundation for advanced study leading to careers in high school teaching, college level teaching or research. It also serves as the basis for further training in the health professions, including but not limited to human and veterinary medicine, medical technology, physical therapy, pharmacy, nursing, dentistry and optometry. The major is also appropriate for those intending to seek careers in biotechnology or other biologically related industries.

## B.S. Major Requirements:

	UNITS
<b>Preparatory Subject Matter.....</b>	<b>56-66</b>
Biological Sciences 2A-2B-2C .....	15
Chemistry 2A-2B-2C .....	15
Chemistry 8A-8B or 118A-118B-118C .....	6-12
Mathematics 17A-17B-17C or 21A-21B (21C recommended) .....	8-12
Physics 7A-7B-7C .....	12

## Depth Subject Matter ..... 44-49

Biological Sciences 101, 105 (or 102+103), 7-10	
Neurobiology, Physiology, and Behavior 110A-110B-110C .....	15
Three units of laboratory course work from the following track-specific list shown below:.... 3	
<i>Neurobiology track:</i> Neurobiology, Physiology, and Behavior 100L	
<i>Physiology track:</i> Neurobiology, Physiology, and Behavior 101L	
<i>Organism-Environmental Interactions track:</i> Neurobiology, Physiology, and Behavior 101L	
Statistics 100 .....	4
Additional Neurobiology, Physiology, and Behavior track-specific depth unit requirement from the following list:..... 12	
<i>Neurobiology track:</i> Neurobiology, Physiology, and Behavior 124/Psychology 124; Neurobiology, Physiology, and Behavior 160/Neuroscience 160;	
<i>Physiology track:</i> Neurobiology, Physiology, and Behavior 100Q, 101L, 106, 107, 112, 161, 162, 163, 164, 165, 166, 167, 168, 169; Psychology 130, 135, 137	
<i>Physiology track: Animal Science</i> 123; Exercise Biology 106/Cell Biology and Human Anatomy 101; Exercise Biology 106L/Cell Biology and Human Anatomy 101; Exercise Biology 101, 103, 104L, 110, 124; Medical Microbiology and Immunology 188; Pathology, Microbiology and Immunology 126, 126L; Molecular and Cellular Biology 150; Neurobiology, Physiology, and Behavior 123/Anatomy, Physiology, and Cell Biology 100;	
<i>Neurobiology, Physiology, and Behavior</i> 152/Psychology 123; Neurobiology, Physiology, and Behavior 106, 107, 111L, 113, 114, 121, 121L, 128, 130, 132, 139, 140, 141, 141P, 142	
<i>Organism-Environmental Interactions track:</i> Animal Science 104, 106, 123; Evolution and Ecology 105, 106, 107, 110, 147; Neurobiology, Physiology, and Behavior	

123/Anatomy Physiology, and Cell Biology 100; Neurobiology, Physiology, and Behavior 150/Psychology 122; Neurobiology, Physiology, and Behavior 152/Psychology 123; Neurobiology, Physiology, and Behavior 100L, 102, 106, 111L, 117, 126, 128, 132, 140, 141, 141P, 142, 159, 162; Wildlife, Fish, and Conservation Biology 130, 141, 153 One additional Neurobiology, Physiology, and Behavior depth unit requirement or Biological Sciences 104..... 3-5

All other Neurobiology, Physiology, and Behavior courses not used in satisfaction of any other requirement; or Anthropology 154A, 154C; or Entomology 104; or Exercise Biology 101, 102, 111. Courses 192, 197T, 199 may not be used to satisfy the depth unit requirement.

**Total Units for Major ..... 100-115**

## Minor Program Requirements:

UNITS

## Exercise Biology..... 18

At least 15 upper division units in exercise biology from the following courses: Exercise Biology 101, 102, 103, 110, 111, 112, 113, 115, 117, 124, 126..... 15  
 Exercise Biology or other approved course: An additional three upper division units from either the previous list of Exercise Biology courses OR the following courses: Exercise Biology 106; Neurobiology, Physiology, and Behavior 101; Biological Sciences, 101, 104, 105..... 3

**Master Adviser.** Paul Salitsky for the Exercise Biology Major and Exercise Biology Minor

## Human Physiology ..... 20

Exercise Biology 101 ..... 4  
 Neurobiology, Physiology, & Behavior 101 ..... 5  
 One course from: Exercise Biology 102, 110, 111, 113, 116, 117, 125  
 One course from: Neurobiology, Physiology, & Behavior 112, 113, 114, 122, 130, 132, 168  
 One course from: two of the following areas:  
   *Functional Anatomy: Cell Biology and Human Anatomy* 101; *Anthropology* 156  
   *Genetics And Development: Anthropology* 153; *Human Development* 100C, 101, 117; *Molecular and Cellular Biology* 162  
   *Immunology: Medical Microbiology* 188  
   *Nutrition: Nutrition* 111B

## Neuroscience ..... 18

Neurobiology, Physiology, & Behavior 100..... 4

Choose a minimum of 14 units from the following:

Neurobiology, Physiology, & Behavior 100L, 107, 112, 124, 126, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169  
 One of the following may be completed to reach the unit requirement:  
 Psychology 113, 121, 135, 137;  
 Linguistics 175; Philosophy 103; Human Development 163  
 The following courses are cross-listed and either offering can be used to fulfill the course requirement: Neurobiology, Physiology, & Behavior 124/Psychology 124, Neurobiology, Physiology, & Behavior 160/Neuroscience 160

**Master Adviser.** Dr. Hwai-Jong Cheng, M.D., Ph.D.

**Advising Center.** Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; <http://basc.ucdavis.edu/>

**Graduate Study.** Information on graduate study in neuroscience, physiology or behavior may be obtained by writing the Graduate Adviser, College of Biological Sciences, Graduate Academic Pro-

grams. See also the graduate course offerings listed under *Animal Behavior* (A Graduate Group), on page 159; *Molecular, Cellular, and Integrative Physiology* (A Graduate Group), on page 466; *Neuroscience*, on page 484 and *Physiology*, on page 509. See also *Graduate Studies*, on page 120.

## Courses in Exercise Biology (EXB)

### Lower Division

#### 10. Exercise and Fitness: Principles and Practice (3)

Lecture—3 hours. Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan. Not open for credit to students who have completed an upper division Exercise Biology course. GE credit: SciEng, Div | SE, SL—W. (W.) Barr, Salitsky, Shaffrath

#### 90C. Research Conference (1)

Discussion—1 hour. Prerequisite: lower division standing in Exercise Biology or related biological science and consent of instructor; concurrent enrollment in course 99. Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

#### 90X. Lower Division Seminar (1-2)

Lecture—1-2 hours. Prerequisite: lower division standing and consent of instructor. Gives freshman or sophomore level students the opportunity to study a special topic in the general area of Exercise Biology in a small class setting. GE credit: SciEng | SE.

#### 92. Exercise Biology Internship (1-5)

Internship—3-15 hours. Prerequisite: consent of instructor, dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated one time for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

#### 97T. Tutoring in Exercise Biology (1-5)

Tutorial—3-15 hours. Prerequisite: lower division standing and consent of instructor. Assisting the professor by tutoring students in exercise biology course-related projects. May be repeated for credit for 10 units including courses 97TC, 197T and 197TC. No tutorial units will be counted towards the Exercise Biology major. (P/NP grading only.)—F, W, S. (F, W, S.)

#### 97TC. Tutoring Exercise Biology in the Community (1-5)

Tutorial—3-15 hours. Prerequisite: consent of instructor and chairperson. Tutoring in the community in exercise biology related projects under the guidance of the faculty. May be repeated one time for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

#### 98. Directed Group Study

Prerequisite: consent of instructor and chairperson. (P/NP grading only.)—F, W, S. (F, W, S.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

### Upper Division

#### 101. Exercise Physiology (4)

Lecture—4 hours. Prerequisite: Neurobiology, Physiology, and Behavior 101. Physiologic responses to acute exercise, and physiologic adaptations to both chronic exercise (training) and selected environmental stresses. Emphasis on the muscular, metabolic, cardiovascular, respiratory and renal responses and adaptations to exercise. Only 1 unit of credit allowed to students who have completed Exercise Science 101. Only 3 units of credit allowed to students who have completed Exercise Science 102. Not open for credit to students who have completed Exercise Science 101 and 102 (Former Exercise Science 101 and 102). GE credit: SciEng | SE, SL—F, S. (F, S.) Bodine, Shaffrath

#### 102. Introduction to Motor Learning and the Psychology of Sport and Exercise (4)

Lecture—4 hours. Prerequisite: Psychology 1 recommended. Theoretical and practical issues in motor learning, sport psychology, and exercise psychology. Emphasis on how motor skills are acquired and retained, and on the application of social psychology and human motivation studies to human performance. Only 2 units of credit allowed to students who have completed Exercise Science 104. Only 2 units of credit allowed to students who have completed Exercise Science 105. Not open for credit to students who have completed Exercise Science 104 and 105. (Former Exercise Science 104 and 105.) GE credit: SocSci | SS—W. (W.) Salitsky

#### 103. Analysis and Control of Human Movement (4)

Lecture—4 hours. Prerequisite: Cell Biology and Human Anatomy 101 and 101L, Physics 7A and 7B. Neurobiology, Physiology, and Behavior 101 recommended. Introduction to functional anatomy, neurophysiological basis of motor control, and biomechanics of human movement. Human movement understood in the context of body structures, basic principles of physics, and functional characteristics of nerve and muscle. Only 1 unit of credit allowed to students who have completed Exercise Science 103. Only 3 units of credit allowed to students who have completed Exercise Science 104. Not open for credit to students who have completed Exercise Science 103 and 104. (Former Exercise Science 103 and 104.) GE credit: SciEng | QL, SE—S. (S.) Hawkins

#### 104L. Exercise Biology Laboratory (3)

Laboratory—3 hours; lecture—1 hour; discussion—1 hour. Prerequisite: course 101, 102, 103 (the last course may be taken concurrently). Principles and analytical procedures for assessing fundamental physiological, biomechanical, motor learning and motor control factors which underlie human movement and performance. Only 1 unit of credit allowed to students who have completed Exercise Science 101L. Only 1 unit of credit allowed to students who have completed Exercise Science 103. Not open for credit to students who have completed Exercise Science 101 and 103. GE credit: SciEng, Wrt | SE, WE—F, S. (F, S.) Shaffrath

#### 106. Human Gross Anatomy (4)

Lecture—4 hours. Prerequisite: Biological Sciences 2A; concurrent enrollment in course 106L or Cell Biology and Human Anatomy 101L strongly recommended. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major. Detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions. (Same course as Cell Biology and Human Anatomy 101.) GE credit: SciEng | SE—W. (W.) Gross

#### 106L. Human Gross Anatomy Laboratory (3)

Laboratory—9 hours. Prerequisite: Biological Sciences 2A; must take course 106 or Cell Biology and Human Anatomy 101 concurrently (or have already completed). Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major; mandatory attendance on first day of lab. Detailed study of dissected human cadavers in small group format with extensive hands-on experience. (Same course as Cell Biology and Human Anatomy 101L.) GE credit: SciEng | SE—W. (W.) Gross

#### 110. Exercise Metabolism (3)

Lecture—3 hours. Prerequisite: course 101 or Neurobiology, Physiology and Behavior 101. Exercise metabolism, with emphasis on skeletal muscle and cardiac muscle metabolism during activity and inactivity. Basics of bioenergetics, substrate utilization, and cell signaling; mechanisms that regulate these

properties, and differences between skeletal muscle and cardiac muscle metabolism. GE credit: SciEng | SE—S. (S.) Gomes

#### 111. Environmental Effects on Physical Performance (3)

Lecture—2 hours; discussion/laboratory—3 hours. Prerequisite: courses 101 or consent of instructor. The effects of thermal, barometric and gravitational conditions on physiological function and physical performance of humans. Acute and chronic effects, emphasizing physiological adaptations and limitations, will be studied. GE credit: SciEng | QL, SE—W. (W.) Shaffrath

#### 112. Clinical Exercise Physiology (4)

Lecture—3 hours; laboratory/discussion—3 hours. Prerequisite: courses 101 or consent of instructor. Physical activity as a therapeutic modality in normal and diseased populations (cardiovascular, pulmonary, diabetic). Effects of exercise and inactivity in terms of normal physiology, pathophysiology, and therapeutic benefit. Exercise fitness and disease assessment methods. GE credit: SciEng | SE, SL—W. (W.) Shaffrath

#### 115. Biomechanical Bases of Movement (3)

Lecture—2 hours; laboratory—3 hours to alternate weekly with discussion—1 hour. Prerequisite: course 103 or consent of instructor. Biomechanical bases of human movement investigated; topics include musculo-skeletal mechanics, tissue mechanics, electromyography, and measurement and analysis techniques. Application made to sport, clinical, and work environments, including extensive analysis of locomotion. GE credit: SciEng | QL, SE, VL, WE—F. (F.) Liets

#### 116. Nutrition for Physically Active Persons (3)

Lecture—3 hours. Prerequisite: course 101, Neurobiology, Physiology, and Behavior 101. The role of nutrition and exercise in modifying metabolism, body composition, performance and health of humans. Offered irregularly. GE credit: SciEng | SE.

#### 117. Exercise and Aging in Health and Disease (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: course 101 or 113 (concurrently). Etiology of and standard therapy for various diseases associated with aging (e.g., cardiovascular, pulmonary, and renal diseases, diabetes, obesity, lipemias, etc.). Exercise will then be considered as a protective and/or therapeutic modality. GE credit: SciEng | SE—S. (S.) Shaffrath

#### 120. Sport in American Society (3)

Lecture—3 hours. Sociological approaches to the study of sport and contemporary American culture, including sport interaction with politics, economics, religion, gender, race, media and ethics. Socialization factors involving youth, scholastic, collegiate, and Olympic sport. (Same course as Physical Education 120.) GE credit: SocSci, Div | SS—F, S. (F, S.)

#### 121. Advanced Sport Psychology (3)

Lecture—3 hours. Prerequisite: course 102; Psychology 1 recommended. Advanced study and consideration of major theoretical and practical issues in sport psychology. Emphasis on practical application to sport and human performance.—Salitsky

#### 122. Psychological Effects of Physical Activity (3)

Lecture—3 hours. Prerequisite: Psychology 1; upper division standing. Physical activity is evaluated in terms of its ability to enhance the quality of life. Topics studied include: individual factors (self concept, type A); special populations (elderly, cardiovascular); and mental health changes (depression, anxiety).—S. (S.) Salitsky

#### 124. Physiology of Maximal Human Performance (4)

Lecture—3 hours; practice—4 hours. Prerequisite: course 101 or permission of instructor; Biological Sciences 101, 102, and 103 recommended. Molecular mechanisms underlying adaptation to training. Learn how to exercise to maximize their own performance as well as learning how the frequency, inten-

sity and timing of exercise and nutrition affect the molecular signals that underlie performance. GE credit: SciEng | SE. —S. (S.)

### **125. Neuromuscular and Behavioral Aspects of Motor Control (3)**

Lecture—2 hours; lecture/discussion—2 hours. Prerequisite: course 101. Factors which affect control of movement from neuropsychological, physiological, behavioral, and mechanical viewpoints. Topics include central vs. peripheral control mechanisms, open and closed loop theories, motor programming, cognitive learning strategies, and the effects of biochemical and biomechanical influences. Offered irregularly. GE credit: SciEng | SE.

### **126. Tissue Mechanics (3)**

Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: course 103 or Engineering 45 or consent of instructor. Structural and mechanical properties of biological tissues including bone, cartilage, ligaments, tendons, nerves, and skeletal muscle. (Same course as Biomedical Engineering 126.) GE credit: SciEng | QL, SE, SL, WE. —W. (W.) Hawkins

### **148. Theory and Practice of Exercise Testing (1)**

Lecture/discussion—1 hour. Prerequisite: course 112 (may be taken concurrently). Theory and practice of exercise testing applied to older adult populations. Physiological responses to and limitations of exercise testing. Application of exercise testing and training to healthy and diseased populations. (P/NP grading only.) Offered irregularly. GE credit: SE. —Casazza

### **148L. Adult Fitness Testing Laboratory (1)**

Laboratory—3 hours. Prerequisite: courses 148 (concurrently). Testing symptomatic and asymptomatic older adults for functional aerobic capacity, body composition, blood lipids, pulmonary function, and cardiovascular disease risk. Counseling adults in appropriate exercise programs and lifestyle modifications. Two quarters minimum; third quarter permitted. May be repeated two times for credit. (Former course Physical Education 148L) (P/NP grading only.) Offered irregularly. GE credit: QL, SE. —Casazza

### **179. Frontiers in Exercise Biology (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: courses 101, 102 and 103 (may be taken concurrently); 104L recommended. Lectures by leading authorities and discussion of the latest research in newly emerging areas in exercise biology. Offered every fourth year. GE credit: SciEng | SE. —S.

### **189. International Perspectives in Exercise Biology (4)**

Lecture—4 hours. Prerequisite: course 10 or upper division standing in Exercise Biology; consent of instructor: students will be accepted based upon academic merit, personal experience, and academic discipline in order to provide multidisciplinary perspectives. Restricted to 22 students. Compare and contrast exercise science issues between the US and an international location. Identify political, economic, cultural, technological and environmental issues that impact human exercise, physical activity, wellness, and sport from a global perspective. Offered irregularly.

### **190C. Research Conference (1)**

Discussion—1 hour. Prerequisite: upper division standing in Exercise Biology or related biological science and consent of instructor; concurrent enrollment in course 199. Restricted to upper division students. Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) —F, W, S. (F, W, S.)

### **192. Exercise Biology Internship (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor; enrollment dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under program faculty supervision. Written report required. May be repeated up to 15 units of credit, including course 92. (P/NP grading only.) —F, W, S. (F, W, S.)

### **194H. Research Honors (2)**

Independent study—6 hours. Prerequisite: senior standing, minimum of 6 units of course 199, 3.500 GPA or greater in major courses, consent of honors thesis adviser. Completion of individual honors research project in Exercise Biology, under the guidance of an Exercise Biology faculty adviser, culminating in written honors thesis. (P/NP grading only.) GE credit: SE. —F, W, S. (F, W, S.)

### **197T. Tutoring in Exercise Biology (1-5)**

Tutorial—3-15 hours. Prerequisite: upper division standing and consent of instructor. Assisting the instructor by tutoring students in exercise biology course-related projects. May be repeated up to 10 units of credit including courses 97T, 97TC and 197TC. No tutorial units will be counted towards the Exercise Biology major. (P/NP grading only.) —F, W, S. (F, W, S.)

### **197TC. Tutoring Exercise Biology in the Community (1-5)**

Tutorial—3-15 hours. Prerequisite: consent of instructor and chairperson. Tutoring in the community in exercise biology related projects under the guidance of the faculty. May be repeated up to 10 units of credit including courses 97T, 97TC, 197T. (P/NP grading only.) —F, W, S. (F, W, S.)

### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor and chairperson. (P/NP grading only.) GE credit: SE. —F, W, S. (F, W, S.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of chairperson. (P/NP grading only.) —F, W, S. (F, W, S.)

## **Courses in Neurobiology, Physiology, and Behavior (NPB)**

### **Lower Division**

#### **10. Elementary Human Physiology (3)**

Lecture—3 hours. Introduction to physiology for non-science majors. Includes basic cell physiology and survey of major organ systems and how they function in homeostasis and human health. Not open for credit to students who have completed course 101. GE credit: SciEng | SE. —W. (W.) Bautista

#### **12. The Human Brain and Disease (3)**

Lecture—3 hours. Normal function and diseases of the human brain and nervous system. Diseases discussed include Parkinson's, Alzheimer's, leprosy, amnesia and schizophrenia. Intended for non-science majors. Not open for credit to students who have completed courses 100, 101, 112, or Psychology 121. GE credit: SciEng. —F. (F.) Cheng, Fioravante, Recanzone

#### **14. Illusions: Fooling the Brain (3)**

Lecture—3 hours. Introduction to perceptual processing in the human nervous system; illusions. GE credit: SciEng | QL, SE, SL. —W. (W.) Ditterich

#### **15. The Biology and Physiology of Aging (4)**

Lecture—3 hours; discussion—1 hour. Broad examination of age-associated changes in body functions. Includes basic cell physiology, a survey of major organ systems and the age-induced alterations in system function. Some age-associated diseases will also be examined. Not open for credit to students who have completed course 15V. Offered irregularly. GE credit: SciEng | SE.

#### **15V. The Biology and Physiology of Aging (4)**

Web virtual lecture—3 hours; web electronic discussion—1 hour. Broad examination of the biological and physiological basis of aging in animals and plants. Concepts in demographic, evolutionary, genetic, and cell aging. Major human organ systems, age-related alterations in system function, and age-related diseases. Intended for non-science majors. Not open for credit to students who have completed course 15. Offered irregularly. GE credit: SciEng | SE, SL. —S. (S.)

### **17. The Path to Cyborgs: Introduction to Prostheses and Human Machine Interfaces (3)**

Lecture—3 hours. Interface of biology and technology. Mind-controlled prosthetic limbs, artificial organs, and implantable devices. Emphasis on basic physiological functions and how they can be replaced by devices. Suitable for majors and non-majors. GE credit: SciEng | SE, SL. —W. (W.) Sutter

### **68. Biology of Drug Addiction and Abuse (3)**

Lecture—3 hours. Broad examination of addictive substances and their use/abuse. Topics include historical perspective, physiological effects, etiology, neurobiology of addiction and the impact of drugs on contemporary society. Intended for non-science majors. Not open for credit to students having completed course 168. GE credit: SciEng. —(S.) Bautista

### **90A. Lower Division Seminar: Issues in Body Weight Regulation (2)**

Seminar—2 hours. Prerequisite: lower division standing, consent of instructor. Limited enrollment. Critical examination of issues in body weight regulation through shared readings, discussions, written assignments, debates and oral presentations. —C. Warden

### **90B. Human Color Perception (2)**

Seminar—2 hours; term paper. Prerequisite: lower division standing. Class size limited to 15 students with lower division standing. Neural determinants of color appearance, and why we see the world in the way we do. Discussions center around demonstrations of color phenomena and what they tell us about the human brain. —Werner

### **90C. Current Issues in Animal Behavior (2)**

Seminar—2 hours. Prerequisite: lower division standing. Limited enrollment. The mechanisms and outcomes of sexual selection (mate choice and mate competition). Theory, current models and evidence that supports or refutes the models. —W. (W.) Herrick

### **90D. Lower Division Seminar: Current Issues in Reproductive Endocrinology (2)**

Seminar—2 hours. Prerequisite: lower division standing. The integrative roles of reproductive hormones in mammalian reproduction and health. Current theory and models regarding hormone function and use in reproductive health and contraception, and evidence that supports or refutes the models. Offered irregularly.

### **90E. Biology of Aging (2)**

Seminar—2 hours. Prerequisite: freshman standing. Current theories on the biology of aging covering genetic, biochemical, and physiological aspects. Emphasis on critical evaluation of controversial and contemporary issues. Offered irregularly.

### **90F. Visual Impairment and Blindness: A World Wide Problem (2)**

Seminar—2 hours. Prerequisite: lower division standing. Examination of various abnormalities of the eye and the important geographic and cultural factors that influence the epidemiology of those abnormalities. Offered irregularly.

### **91C. Research Conference (1)**

Discussion—1 hour. Prerequisite: lower division standing in Neurobiology, Physiology and Behavior or related biological science and consent of instructor; concurrent enrollment in course 99. Restricted to lower division students. Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by faculty and students. (P/NP grading only.) —F, W, S. (F, W, S.)

### **92. Internship (1-12)**

Internship—3-36 hours. Prerequisite: lower division standing; consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Neurobiology, Physiology, and Behavior. Internships supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) —F, W, S. (F, W, S.)

**98. Directed Group Study (1-5)**

Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

**Upper Division****100. Neurobiology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1AB or 2ABC; Physics 9 ABC or 7ABC. Brains and nervous systems, neurons and neural circuits. Coordination of movement. Development of nervous systems. Vision, hearing, and feature extraction by the central nervous system. The cell biology of learning and memory. Not open for credit to students who have completed course 112, 160, 161 or 162, or Neuroscience 221 or 222. GE credit: QL.—F, W, S. (F, W, S.)

**100L. Neurobiology Laboratory (3)**

Lecture—1 hour; laboratory—3 hours; extensive writing or discussion. Prerequisite: course 100 (may be taken concurrently). Experimental basis of neurobiology principles discussed in course 100. Topics include neurophysiology, sensory systems, motor systems, cellular neuroscience, cognitive neuroscience, and quantitative data analysis and modeling techniques. GE credit: SciEng | SE.—S. (S.) Goldman

**100Q. Quantitative Foundations of Neurobiology (1)**

Autotutorial—1.5 hours; extensive problem solving—1.5 hours. Prerequisite: course 100 (may be taken concurrently). Computational methods and mathematical models used to study phenomena in neurobiology. Offered irregularly. GE credit: QL, VL.—Mogilner, Sutter

**101. Systemic Physiology (5)**

Lecture—5 hours. Prerequisite: Biological Sciences 1A, or 2A and Chemistry 2B; Physics 1B or 7C strongly recommended. Systemic physiology with emphasis on aspects of human physiology. Functions of major organ systems, with the structure of those systems described as basis for understanding the functions. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**101D. Systemic Physiology Discussion (1)**

Discussion—1 hour. Prerequisite: course 101 (concurrently); consent of instructor. Discussion and problem solving related to fundamental principles of systemic physiology as presented in course 101. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**101L. Systemic Physiology Laboratory (3)**

Laboratory—3 hours; discussion—2 hours; term paper. Prerequisite: course 101. Selected experiments to illustrate functional characteristics of organ systems discussed in course 101.—F, W, S. (F, W, S.) Bautista, Liets

**102. Animal Behavior (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C. Basic principles of behavioral organization in vertebrate and invertebrate animals. Underlying physiological and ethological mechanisms. The evolution of behavior, with special emphasis on behavior under natural conditions. Not open for credit to students who have completed course 155. (Former course 155.) GE credit: SL.—F, S. (F, S.) Britten, Hahn, Nevitt

**102Q. Quantitative Topics in Animal Behavior (1)**

Autotutorial—1.5 hours; extensive problem solving—1.5 hours. Prerequisite: Mathematics 16B; course 102 (may be taken concurrently). Study of the quantitative concepts and exemplar models used in animal behavior. Offered irregularly. GE credit: SciEng.—Hahn

**103. Cellular Physiology/Neurobiology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 103 or 105, and 104; Physics 7C recommended. Cellular physiology with emphasis on membrane transport processes and neuronal physiology. Fundamental physical-chemical and biological mechanisms of membrane transport will be considered in relation to cytoplasmic homeostasis, communication

between cells, and the cellular mechanisms of sensory and motor transduction. Not open for credit to students who have completed course 100B (Former course 100B.) Offered irregularly.

**104L. Cellular Physiology/Neurobiology Laboratory (4)**

Lecture—1 hour; laboratory—3 hours; discussion—1 hour; term paper or discussion. Prerequisite: courses 101 and 101L; Biological Sciences 103 or 105. Experiments in the physical and chemical processes of cells and tissues. Offered irregularly. GE credit: Wrt.—Liets

**105. Introduction to Computer Models (4)**

Lecture—3 hours; lecture/laboratory—1 hour. Prerequisite: Mathematics 16C or the equivalent, Physics 7C, Chemistry 2C, and course 100 or 101. Introduction to the ideas, mathematical techniques and computer tools required for developing models of cellular processes in physiology and neurobiology. Applications include membrane transport, ionic channels, action potentials,  $\text{Ca}^{2+}$  oscillations, respiration, and muscle contraction. Offered irregularly.

**106. Experiments in Neurobiology, Physiology, and Behavior: Design and Execution (3)**

Laboratory—7.5 hours; discussion—0.5 hours. Prerequisite: course 100 or 101 or 102, and 199 and consent of instructor. Design and execution of experiments in neurobiology, physiology, and/or behavior. Students choose and design a project in consultation with the sponsoring faculty member. May be repeated one time for credit to complete the project, with consent of instructor. An additional repeat is permitted for a different project under the guidance of another faculty member. (P/NP grading only.) GE credit: OL, QL, VL, WE.—F, W, S. (F, W, S.) Rosenquist

**107. Cell Signaling in Health and Disease (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 102 or 105. Basics of cell signaling pathways, their disruption in disease, and their current utility and future potential as therapeutic targets. Focus is on signaling pathways specific to nervous, endocrine and immune systems, and those fundamental to all cells. GE credit: SL.—S. (S.) Trimmer

**110A. Foundations 1: From Molecules to Individuals (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: Biological Sciences 2A, 2B and 2C, Chemistry 2A and 2B, Physics 7A, 7B, and 7C at least concurrent. Pass One restricted to majors in Neurobiology, Physiology and Behavior. Major concepts in cell biology with special emphasis on connections between cell biology and behavior. Includes: cellular metabolism, cellular sensing and signaling, membrane structure-function, molecular switches, electrical and chemical signaling, endocrine signaling, cell cycle and differentiation, cytoskeleton, and integrative examples. Credit limited to 3 units for students who have taken Biological Sciences 104. GE credit: SciEng | SE.—F, S. (F, S.) Gomes, Hahn

**110B. Foundations 2: Neurobiology (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: Physics 7C and course 110A completed with a grade of C- or above. Open to declared NPB majors only. Core concepts of neurobiology including single-neuron biophysics, synapses and transmitters, neuronal development, motor systems, central pattern generation, neuronal circuits, intracellular signal transduction, sensory processing, multisensory integration, autonomic nervous system, neuromodulation, learning and memory, and higher cognition and disease. Credit limited to 2 units for students who have taken course 100. GE credit: SciEng | SE.—F, W. (F, W.) Britten, Sutter

**110C. Foundations 3: Physiology (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: course 110B completed with a grade of C- or above. Open to declared NPB majors only. Focuses on the structure, function, and interactions of animal organ systems in homeostasis and reproduction, and the response to perturbations of homeostasis; neural

and endocrine signaling; skeletal muscle and movement; cardiovascular and respiratory systems; renal, digestive, immune, and reproductive physiology. Credit limited to two units for students who have taken course 101. GE credit: SciEng | SE.—W, S. (W, S.) Furlow, Usrey

**111C. Advanced Systemic Physiology Laboratory (3)**

Lecture—1 hour; laboratory—6 hours. Prerequisite: courses 101, 101L, Statistics 13; course 112, 113, or 114 recommended. Interfacing physiological recording equipment with microcomputers; data acquisition and analysis using the microcomputer; data interpretation within the framework of physiological concepts. Offered irregularly. GE credit: QL, VL, WE.

**111L. Advanced Systemic Physiology Laboratory (4)**

Lecture—1 hour; discussion—2 hours; laboratory—6 hours; term paper. Prerequisite: courses 101 and 101L. Selected comprehensive experiments in the autonomic nervous system and the cardiovascular, respiratory, and neuromuscular systems. Emphasis on conceptual and methodological approaches in demonstrating the physiology of organ systems. GE credit: Wrt.—W. (W.) Liets

**112. Neuroscience (3)**

Lecture—3 hours. Prerequisite: course 100 or 101. Presentation of concepts in neuroscience including sensory systems, motor systems, and higher neural integration. Emphasis on mammalian nervous system. Offered irregularly. GE credit: SL.

**113. Cardiovascular, Respiratory, and Renal Physiology (4)**

Lecture—4 hours. Prerequisite: course 101; Chemistry 7B, Physics 7B and 7C recommended. An intense and advanced presentation of concepts in cardiovascular, respiratory, and renal physiology including discussion of acid-base balance.

**114. Gastrointestinal Physiology (3)**

Lecture—3 hours. Prerequisite: course 101; Biological Sciences 105 or 103 recommended, 105 preferred. Gastrointestinal anatomy and physiology. Digestion, secretion, absorption, motility, comparative physiology and pathology. Strong emphasis on neural and hormonal regulation and on cellular mechanisms of secretion and absorption.—F. (F.) Bautista, Horwitz

**117. Avian Physiology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1B, or 2A and 2B and Chemistry 2B; course 101 strongly recommended. Physiology of the various systems of birds with emphasis on digestion, respiration, excretion, and endocrine systems.—S. (S.) Hahn, Klasing

**121. Physiology of Reproduction (4)**

Lecture—4 hours. Prerequisite: course 101. Physiological mechanisms related to reproduction, breeding efficiency and fertility, with special reference to domestic animals. GE credit: QL, SL.—W. (W.) Berger

**121L. Physiology of Reproduction Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 121 recommended (may be taken concurrently). Experiments on the reproductive systems of domestic animals including male and female gametes. (P/NP grading only.)—W. (W.) Berger

**122. Developmental Endocrinology (3)**

Lecture—3 hours. Prerequisite: course 101. Restricted to upper division standing. Hormonal control of development, maturation and senescence from the cellular to organismal level, with emphasis on the human. Prenatal and neonatal life, childhood and adolescence, adulthood and pregnancy, as well as the endocrinology of aging. Offered irregularly.

**123. Comparative Vertebrate Organology (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Science 1A and 1B or 2A and 2B. Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross

level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions. (Same course as Anatomy, Physiology and Cell Biology 100.) —W. Ginotos

#### **124. Comparative Neuroanatomy (4)**

Lecture—3 hours; laboratory—2 hours. Prerequisite: Psychology 101, or course 100 or 101. Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Psychology 124.) GE credit: SL. —W. (W.) Krubitzer, Recanzone

#### **125. Comparative Physiology: Neurointegrative Mechanisms (3)**

Lecture—3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: neurointegrative mechanisms of integration including aspects of phylogenetic development at both neuronal and systemic levels. Offered irregularly.

#### **126. Comparative Physiology: Sensory Systems (3)**

Lecture—3 hours. Prerequisite: course 100 or 101. Basic physiological mechanisms involved in sensory systems. Comparative approach to considerations of mechanosensitive systems (audition, lateral lines, touch, echolocation, equilibrium), chemosensitive systems (olfaction, taste, pheromones), photosensitive systems (vision, infrared detection, UV detection), electoreception, and pain. Emphasis on receptors. Offered irregularly.

#### **127. Comparative Physiology: Circulation (3)**

Lecture—3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: circulation. Comparative approach to cardiovascular function in vertebrates and invertebrates. Offered irregularly. GE credit: SL, VL.

#### **128. Comparative Physiology: Endocrinology (3)**

Lecture—3 hours. Prerequisite: course 101. Comparison of physiological functions in the animal kingdom: animal hormones and their functions. —W. (W.)

#### **130. Physiology of the Endocrine Glands (4)**

Lecture—4 hours. Prerequisite: course 101. Advanced presentation of concepts in endocrinology with emphasis on the role of hormones in reproduction, metabolism, and disease. GE credit: VL. —F. (F.)

#### **132. Nature vs. Nurture: Physiological Interactions Among Genes, Nutrients and Health (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A or 2A or consent of the instructor. Biochemical, physiological, genetic, and nutritional causes of important medical problems such as obesity, anorexia, heart disease and diabetes. One unit of credit allowed to students who have completed course 131. GE credit: SciEng. —F. (F.) Phinney, Warden

#### **139. Frontiers in Physiology (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: courses 100 and 101; 102 (may be taken concurrently). Lectures by leading authorities and discussion of the latest research in newly emerging areas in physiology. Offered every fourth year. Offered irregularly. GE credit: SciEng | QL, SE.

#### **140. Principles of Environmental Physiology (3)**

Lecture—3 hours. Prerequisite: course 101; Biological Sciences 102 recommended. Physiological aspects of interactions of organisms and environmental, cellular, system, and organismal levels. Emphasis on regulatory responses/mechanisms to thermal, pressure, gravity and light environmental variables. Not open for credit to students who have completed course 148. (Former course 148.) GE credit: WE. —W. Fuller

#### **141. Physiological Adaptation of Marine Organisms (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: upper division standing; consent of the instructor; residence at Bodega Marine Laboratory required. Students must submit application available at <http://www.bml.ucdavis.edu>. Physiological adaptation to the environment among organisms in marine and estuarine habitats. GE credit: QL, VL, WE. —S. (S.) Cheng, Cherr

#### **141P. Physiological Adaptation of Marine Organisms/Advanced Laboratory Topics (5)**

Laboratory—12 hours; discussion—1 hour. Prerequisite: course 141 concurrently; residence at Bodega Marine Laboratory required. Students must submit application available at <http://www.bml.ucdavis.edu>. Training in scientific research from hypothesis to publication, including methods of library research. Research related to a topic covered in course 141. GE credit: VL, WE. —S. (S.) Cherr

#### **142. Environmental Endocrinology: Mechanisms for Life Cycles (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 2A, 2B, 2C. Effects of environmental factors on endocrine responses that affect vertebrate life history and fitness. Introduction to finite state machine theory and allostatic in life histories and coping strategies. Focus on life history stages including non-breeding, hibernation, reproduction, migration and moult. GE credit: SciEng | SE, WE. —W. (W.) Wingfield

#### **150. Advanced Animal Behavior (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 102 or Psychology 101. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free-living animals. (Same course as Psychology 122.) Offered irregularly. —Hahn

#### **152. Hormones and Behavior (3)**

Lecture—3 hours. Prerequisite: course 101, and either course 102 or Psychology 101. Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as Psychology 123.) —S. (S.) Bales, Furlow, Hahn, Trainor, Wingfield

#### **159. Frontiers in Behavior (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: courses 100, 101, 102. Lectures by leading authorities and discussion of the latest research in newly emerging areas in behavioral biology. Offered every fourth year. Offered irregularly. GE credit: SciEng | QL, SE.

#### **160. Molecular and Cellular Neurobiology (3)**

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: course 100, Biological Sciences 101 and consent of instructor. Selected topics in neurobiology. Topics include channel biophysics, action potential propagation, intracellular signal transduction pathways, synaptic physiology and quantal analysis, cellular mechanisms of synaptic plasticity, and neuromodulation of synaptic circuitry. (Same course as Neuroscience 160.) Offered irregularly. GE credit: VL.

#### **160L. Advanced Cellular Neurobiology Laboratory (4)**

Laboratory—12 hours. Prerequisite: course 160, Physics 7C recommended. Students will learn to record neural activity, to interpret their recordings, and to label neurons with antibodies against neurotransmitters. Offered irregularly.

#### **161. Developmental Neurobiology (3)**

Lecture—3 hours. Prerequisite: course 100 or 101. Issues, theoretical concepts, and methodologies in developmental neurobiology. Topics include prenatal and postnatal differentiation of neurons, and plas-

ticity in the mature and aging brain. Integration of neurochemical, structural, physiological and behavioral perspectives. GE credit: SciEng | SE. —W. (W.) McAllister, Zito

#### **162. Neural Mechanisms of Behavior (3)**

Lecture—3 hours. Prerequisite: course 100 or 101. The relationship between brain and behavior. Identification and analysis of the relevant neural circuits involved. Examples of systems to be considered are birdsong, locomotion, echolocation. —S. (S.) Britten

#### **163. Systems Neuroscience (3)**

Lecture—3 hours. Prerequisite: course 100 or equivalent basic neuroscience training with consent of instructor. Concepts and techniques in systems neuroscience: e.g., measuring and manipulating neural activity, structure of neocortex, sensory processing, motor control, short-term and long-term storage of information, neural codes, neural mechanisms underlying cognitive functions. GE credit: SE. —S. (S.) Ditterich

#### **164. Mammalian Vision (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100, 112, or Psychology 101. Structure and function of the mammalian visual system, from the formation of images on the retina through visually guided behavior and perception. Emphasis on biological mechanisms underlying vision. —W. (W.) Britten, Werner

#### **165. Neurobiology of Speech Perception (3)**

Lecture—3 hours. Prerequisite: course 100 or 101, or consent of instructor. Interdisciplinary approach to speech perception with emphasis on functional neuroanatomy and behavior. Topics include auditory processing in time and space, intelligibility in noisy environments, visual speech, evolution of vocal communication, models of speech perception, development, and hearing impairment. GE credit: SL. —S. (S.) Miller

#### **166. Math Tools for Neuroscience (4)**

Lecture—4 hours. Prerequisite: course 100 or permission of instructor; Math 16A, B, C or equivalent; Physics 7C strongly recommended. Introduction to mathematics techniques used in neuroscience. Applications to neuroscience of differential equations, linear algebra, Fourier transforms, correlation and convolution, and probability theory. Offered irregularly. GE credit: QL. —Goldman

#### **167. Computational Neuroscience (5)**

Lecture—4 hours; lecture/laboratory—3 hours. Prerequisite: course 100 or permission of instructor; Math 17A, 17B, 17C, or equivalent; Physics 7A, B, C or equivalent strongly recommended; consent of instructor. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. Offered irregularly. GE credit: SciEng | SE, QL. —Goldman

#### **168. Neurobiology of Addictive Drugs (4)**

Lecture/discussion—4 hours. Prerequisite: course 100 or 101 or the equivalent. Neurobiological basis for the effects and mechanisms of action of drugs with addictive potential, including opiates (morphine, heroin, methadone), amphetamines, cocaine, nicotine, marijuana (cannabinoids), alcohol, caffeine, and mind-altering drugs such as LSD and anti-depressants. GE credit: SL, VL. —S. (S.) Liets

#### **169. Frontiers in Neurobiology (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: courses 100 and 101, course 102 (may be taken concurrently). Lectures by leading authorities and discussion of the latest research in newly emerging areas in neurobiology. Offered every fourth year. Offered irregularly. GE credit: QL.

#### **190C. Research Conference (1)**

Discussion—1 hour. Prerequisite: upper division standing in Neurobiology, Physiology, and Behavior or related biological science and consent of instructor; concurrent enrollment in course 199. Research findings and methods in neurobiology, physiology,

and/or behavior. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

### **192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in neurobiology, physiology, & behavior. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

### **194HA. Neurobiology, Physiology, and Behavior-Honors (1)**

Laboratory—3-12 hours. Prerequisite: senior standing; minimum 3.500 GPA in courses counted toward major; approval by the Master Adviser. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.)—F, W, S. (F, W, S.)

### **194HB. Neurobiology, Physiology, and Behavior-Honors (1-4-2)**

Laboratory—12 hours. Prerequisite: senior standing; minimum 3.500 GPA in courses counted toward major; approval by the Master Adviser. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.)—F, W, S. (F, W, S.)

### **194HC. Neurobiology, Physiology, and Behavior-Honors (2)**

Laboratory—3-12 hours. Prerequisite: senior standing; minimum 3.500 GPA in courses counted toward major; approval by the Master Adviser. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.)—F, W, S. (F, W, S.)

### **197T. Tutoring in Neurobiology, Physiology, and Behavior (1-5)**

Discussion—2-6 hours. Prerequisite: upper division standing and consent of instructor. Assisting the instructor by tutoring students in one of the Department's regular courses. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

### **198. Directed Group Study (1-5)**

(P/NP grading only.)—F, W, S. (F, W, S.)

### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)—F, W, S. (F, W, S.)

## **Graduate**

### **211. Advanced Topics in Neuroimaging (2)**

Seminar—2 hours. Prerequisite: Psychology 210 or consent of instructor. Restricted to 16 students. Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG. (Same course as Neuroscience 211 and Psychology 211.) May be repeated for credit. (S/U grading only.)—W. (W.) Miller

### **212. Light and Fluorescence Microscopy (2)**

Lecture—2 hours. Prerequisite: consent of instructor. Restricted to maximum 16 students. Theory and practical application of light and fluorescence microscopy in the biological sciences. (S/U grading only.)—W. (W.) Zito

### **217. Advanced Avian Physiology (1)**

Project—1 hour. Prerequisite: graduate standing and concurrent enrollment in course 117; consent of instructor. Study in depth of a topic in avian physiol-

ogy through development of a lecture with associated instructional materials such as lesson plan, readings, presentation, and evaluation aids.—S. (S.) Millam

### **221. Cellular Neuroscience (4)**

Lecture—3 hours; discussion—1.5 hours. Advanced course on cellular and subcellular organization of the nervous system. Membrane channels, sensory transduction, synaptic transmission and cellular aspects of development and learning.—F. (F.) Burns, McAllister, Trimmer, Zito

### **222. Systems Neuroscience (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Integrative and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory. (Same course as Neuroscience 222.)—W. (W.) DeBello, Ditterich, Usrey

### **245. Computational Models of Cellular Signaling (3)**

Lecture—3 hours. Prerequisite: consent of instructor. Computational and mathematical techniques in modeling of regulatory and signaling phenomena in neurobiology and cell physiology, focusing on linear and nonlinear ordinary differential equation models. Applications include ion channel kinetics, electrical activity, signal transduction, calcium oscillations, and simple neural circuits. Offered irregularly.

### **247. Topics in Functional Neurogenomics (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (Same course as Neuroscience 247.)

### **261A. Topics in Vision: Eyes and Retinal Mechanisms (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing, course 100 or 112 or the equivalent. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as Neuroscience 261A and Molecular, Cellular, and Integrative Physiology 261A.) (S/U grading only.)—(F.) Ishida

### **261B. Topics in Vision: Systems, Psychophysics, Computational Models (2)**

Lecture/discussion—2 hours. Prerequisite: consent of instructor, course 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as Neuroscience, Physiology, and Behavior 261B and Molecular, Cellular, and Integrative Physiology 261B.) (S/U grading only.) Offered in alternate years.—(W.) Britten

### **261C. Topics in Vision: Clinical Vision Science (2)**

Lecture/discussion—2 hours. Prerequisite: courses 261A and 261B or consent of instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as Neuroscience 261C and Molecular, Cellular, and Integrative Physiology 261C.) Offered irregularly. (S/U grading only.)—(S.) Werner

### **263. Modeling in Systems Neuroscience (4)**

Lecture—3 hours; lecture/laboratory—1 hour. Prerequisite: consent of instructor. Modeling as a tool in systems neuroscience. Mathematical techniques will be introduced and used to explore advanced topics in echolocation, sound localization, electrorecep-

tion, communications, and motor systems. Other topics include transforms, modeling assumptions, scales and linearity. Offered in alternate years.

### **267. Computational Neuroscience (5)**

Lecture—4 hours; lecture/laboratory—3 hours. Prerequisite: one course in general neuroscience at the level of course 100; one year college-level Calculus at level of Math 16A, B, C; one year Physics at the level of Physics 7A, B, C, strongly recommended; students from other departments should contact the instructor. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single-neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. Offered in alternate years. (Same course as Neuroscience 267.)—(F.) Goldman

### **270. How to Write a Fundable Grant Proposal in the Biomedical Sciences (2)**

Lecture/discussion—2 hours. Prerequisite: consent of instructor. Restricted to members of the Neuroscience and BMCDB graduate groups; graduate students in other biomedical programs may enroll with instructor permission. Teaches the do's and don'ts of writing grants in the biomedical sciences and the mechanisms of the review process. Offered in alternate years. May be repeated for credit. (Same course as Neurobiology, Physiology and Behavior 270.)—(S.) Burns

### **285. Literature in Visual Neuroscience (2)**

Seminar—2 hours. Literature in Visual Neuroscience. (Same course as Neuroscience 285.) May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.) Britten, Ditterich, Goldman, Usrey

### **287A. Topics in Theoretical Neuroscience (2)**

Seminar—2 hours. Prerequisite: consent of instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. Offered in alternate years. May be repeated for credit. (Same course as Neuroscience 287A.) (S/U grading only.)—F. Ditterich, Goldman

### **287B. Topics in Theoretical Neuroscience (2)**

Seminar—2 hours. Prerequisite: consent of instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. May be repeated for credit. (Same Course as Neuroscience 287B.) (S/U grading only.)—S. Ditterich, Goldman

### **291. Auditory Neuroscience (1)**

Seminar—0.5 hours; discussion—0.5 hours. Prerequisite: course 100 or 112 or Neuroscience 222 or the equivalent. Exploration of various important aspects of auditory physiology, behavior and psychophysics through review of original literature. New topic each quarter. May be repeated for credit with consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.) Recanzone, Sutter

## Faculty

Leonard J. Abbeduto, Ph.D., Professor  
*(Psychiatry and Behavioral Sciences)*  
 David Amaral, Ph.D., Professor  
*(Psychiatry and Behavioral Sciences)*  
 Robert Berman, Ph.D., Professor  
*(Neurological Surgery)*  
 Laura Borodinsky, Ph.D., Assistant Professor  
*(Physiology and Membrane Biology)*  
 Kenneth H. Britten, Ph.D., Professor  
*(Neurobiology, Physiology, and Behavior)*  
 Marie Burns, Ph.D., Professor  
*(Ophthalmology and Vision Science)*  
 Earl E. Carstens, Ph.D., Professor  
*(Neurobiology, Physiology, and Behavior)*  
 Cameron Carter, M.D., Professor  
*(Psychiatry and Behavioral Sciences)*  
 Tsung-Yu Chen, M.D., Ph.D., Professor  
*(Neurology)*  
 Hwai-Jong Cheng, M.D., Ph.D., Professor  
*(Neurobiology, Physiology, and Behavior)*  
 Gino Cortopassi, Ph.D., Professor  
*(Molecular Biosciences)*  
 Jacqueline Crawley, Ph.D., Professor  
*(Psychiatry and Behavioral Sciences)*  
 William DeBello, Ph.D., Associate Professor  
*(Neurobiology, Physiology, and Behavior)*  
 Charles DeCarli, M.D., Professor *(Neurology)*  
 Wenbin Deng, Ph.D., Associate Professor  
*(Biochemistry and Molecular Medicine)*  
 Elva Diaz, Ph.D., Associate Professor  
*(Pharmacology)*  
 Jochen Ditterich, Ph.D., Associate Professor  
*(Neurobiology, Physiology, and Behavior)*  
 Arne Ekstrom, Ph.D., Associate Professor  
*(Psychology)*  
 Michael Ferns, Ph.D., Professor  
*(Anesthesiology and Pain Medicine)*  
 Joy Geng, Ph.D., Associate Professor *(Psychology)*  
 Mark Goldman, Associate Professor  
*(Neurobiology, Physiology and Behavior)*  
 Qizhi Gong, Ph.D., Associate Professor  
*(Cell Biology and Human Anatomy)*  
 Fredric Gorin, M.D., Ph.D., Professor *(Neurology)*  
 John Gray, M.D., Ph.D., Assistant Professor  
*(Neurology)*  
 Randi Hagerman, M.D., Professor *(Pediatrics)*  
 Hanks, Tim, Ph.D., Assistant Professor *(Neurology)*  
 Johannes Hell, Ph.D., Professor *(Pharmacology)*  
 Andrew T. Ishida, Ph.D., Professor  
*(Neurobiology, Physiology, and Behavior)*  
 Li-En Jao, Ph.D., Assistant Professor  
*(Cell Biology and Human Anatomy)*  
 Petr Janata, Ph.D., Professor *(Psychology)*  
 Lee-Way Jin, Ph.D., Professor  
*(Pathology and Laboratory Medicine)*  
 Paul S. Knoepfle, Ph.D., Associate Professor  
*(Cell Biology and Human Anatomy)*  
 Leah Krubitzer, Ph.D., Professor *(Psychology)*  
 Janine LaSalle, Ph.D., Professor  
*(Medical Microbiology and Immunology)*  
 Pamela Lein, Ph.D., Professor  
*(Molecular Biosciences)*  
 Steven Luck, Ph.D., Professor *(Psychology)*  
 Bruce Lyeth, Ph.D., Professor  
*(Neurological Surgery)*  
 G. R. Mangun, Ph.D., Professor *(Psychology)*  
 Martinez-Cerdeno, Veronica, Ph.D., Assistant Professor  
*(Pathology and Laboratory Medicine)*  
 Kimberley A. McAllister, Ph.D., Professor *(Neurology & Neurobiology, Physiology, and Behavior)*  
 Lee Miller, Ph.D., Associate Professor  
*(Neurobiology, Physiology, and Behavior)*  
 John Morrison, Ph.D. *(Neurology)*  
 Stephen Noctor, Ph.D., Assistant Professor  
*(Psychiatry and Behavioral Sciences)*

Alex Nord, Ph.D., Assistant Professor  
*(Neurobiology, Physiology, and Behavior)*  
 Christine Nordahl, Assistant Professor  
*(Psychiatry and Behavioral Sciences)*  
 John Olichney, M.D., Professor  
*(Neurology)*  
 Isaac N. Pessah, Ph.D., Professor  
*(Molecular Biosciences)*  
 David Pleasure, M.D., Professor  
*(Neurology and Pediatrics)*  
 Edward N. Pugh, Ph.D., Professor  
*(Cell Biology and Human Anatomy)*  
 J. Daniel Ragland, Ph.D., Professor  
*(Psychiatry and Behavioral Sciences)*  
 Charan Ranganath, Ph.D., Professor *(Psychology)*  
 Gregg H. Recanzone, Ph.D., Professor  
*(Neurobiology, Physiology, and Behavior)*  
 David Richman, M.D. Professor *(Neurology)*  
 Susan Rivera, Ph.D., Professor *(Psychology)*  
 Michael Rogawski, M.D., Ph.D., Professor  
*(Neurology)*  
 Karen Ryan, Ph.D., Assistant Professor  
*(Neurobiology, Physiology, and Behavior)*  
 Julie Schweiter, Ph.D., Professor  
*(Psychiatry and Behavioral Sciences)*  
 Kiarash Shahaie, M.D., Ph.D., Assistant Professor  
*(Neurological Surgery)*  
 Frank Sharp, M.D., Professor *(Neurology)*  
 Jill Silverman, Ph.D., Assistant Professor  
*(Psychiatry and Behavioral Sciences)*  
 Sergi Simo, Ph.D., Assistant Professor  
*(Cell Biology and Human Anatomy)*  
 Tony Simon, Ph.D., Professor  
*(Psychiatry and Behavioral Sciences)*  
 Danielle Stolzenberg, Ph.D., Assistant Professor  
*(Psychology)*  
 Mitchell L. Sutler, Ph.D., Professor  
*(Neurobiology, Physiology, and Behavior)*  
 Diane Swick, Ph.D., Associate Adjunct Professor  
*(Neurology)*  
 Lin Tian, Ph.D., Assistant Professor  
*(Biochemistry and Molecular Medicine)*  
 Brian Trainor, Ph.D., Associate Professor  
*(Psychology)*  
 James Trimmer, Ph.D., Professor  
*(Neurobiology, Physiology, and Behavior)*  
 W. Martin Usrey, Ph.D., Professor *(Neurology & Neurobiology, Physiology, and Behavior)*  
 John S. Werner, Ph.D., Professor  
*(Ophthalmology and Vision Science)*  
 Brian Wiltgen, Ph.D., Associate Professor  
*(Psychology)*  
 Yang (Kevin) Xiang, Ph.D., Associate Professor  
*(Pharmacology)*  
 Andrew Yonelinas, Ph.D., Professor *(Psychology)*  
 Konstantinos Zarbalis, Ph.D., Assistant Professor  
*(Pathology)*  
 Min Zhao, M.D., Ph.D., Professor  
*(Dermatology)*  
 Chengji Zhou, Ph.D., Associate Professor  
*(Cell Biology and Human Anatomy)*  
 Karen Zito, Ph.D., Associate Professor  
*(Neurobiology, Physiology, and Behavior)*

## Emeriti Faculty

Leo M. Chalupa, Ph.D., Professor  
*(Neurobiology, Physiology, and Behavior)*  
 Edward G. Jones, M.D., Ph.D., Professor *(Psychiatry)*  
 Brian Mulloney, Ph.D., Professor  
*(Neurobiology, Physiology, and Behavior)*  
 Karen Sigvardt, Ph.D., Adjunct Professor  
*(Neurology)*  
 David Woods, Ph.D., Adjunct Professor  
*(Neurology)*  
**Graduate Study.** The Graduate Group in Neuroscience offers programs of study leading to the Ph.D. degree. Neuroscience is a broad, interdepartmental program with faculty interests ranging from molecular biophysics of channels to cortical organization and cognition. A major goal of the program is to prepare students for careers as research scientists. Details of the program may be obtained from the Group office.  
**Graduate Advisers.** R. Berman *(Neurological Surgery)*, E. Diaz *(Pharmacology)*, A. Ishida *(Neuro-*

*biology, Physiology, and Behavior)*, W.M. Usrey *(Neurobiology, Physiology, and Behavior)*, B. Wiltgen *(Psychology)*

## Courses in Neuroscience (NSC)

### Upper Division

#### 160. Molecular and Cellular Neurobiology (3)

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: Neurobiology, Physiology, and Behavior 100, Biological Sciences 101 and consent of instructor. Selected topics in neurobiology. Topics include channel biophysics, action potential propagation, intracellular signal transduction pathways, synaptic physiology and quantal analysis, cellular mechanisms of synaptic plasticity, and neuromodulation of synaptic circuitry. (Same course as Neurobiology, Physiology, and Behavior 160.) GE credit: VL—S. (S.) Burns

### Graduate

#### 200LA. Laboratory Methods in Neurobiology (6)

Laboratory—18 hours. Prerequisite: graduate standing in the Neuroscience Graduate Group. Individual research in the laboratory of a faculty member. Research problems emphasize the use of contemporary methods and good experimental design. May be repeated three times for credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### 200LB. Laboratory Methods in Neurobiology (3)

Laboratory—9 hours. Prerequisite: graduate standing in the Neuroscience Graduate Group. Individual research in the laboratory of a faculty member. Research problems emphasize the use of contemporary methods and good experimental design. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### 201. Neuroanatomy (3)

Lecture—2 hours; laboratory/discussion—1 hour. Prerequisite: consent of instructor. Limited enrollment. Mix of lectures, demonstrations, and dissections, emphasizing functional significance of neuroanatomy from a biological perspective, with comparisons between human and non-human brains. Emphasis placed on functional anatomy of the nervous system, integrated with cellular, molecular, cognitive, and developmental concepts.—F. (F.) Amaral

#### 211. Advanced Topics in Neuroimaging (2)

Seminar—2 hours. Prerequisite: Psychology 210 or consent of instructor. Restricted to 16 students. Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG. (Same course as Neurobiology, Physiology, and Behavior 211 and Psychology 211.) (S/U grading only.)—W. (W.) Miller

#### 220. How to Give a Scientific Seminar (3)

Lecture/discussion—3 hours. Prerequisite: consent of instructor. Presentation of effective seminars. Student presentations of selected neuroscience topics in seminar format. Must be taken in two consecutive quarters. Offered in alternate years.—F, S. (F, S.) DeBello, McAllister

#### 221. Cellular Neurophysiology (4)

Lecture—4.5 hours. Prerequisite: graduate standing or consent of instructor. Physiological aspects of cellular and subcellular organization of the nervous system. Neuronal cell biology, the structure and function of ion channels, electrical excitability, signaling cascades, sensory transduction and, mechanisms of synaptic transmission, and the cellular basis of learning and memory.—F. (F.) Burns, Chen

#### 222. Systems Neuroscience (5)

Lecture—4 hours; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Integrative and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory. (Same course as Neurobiology, Physiology, and Behavior 222.)—W. (W.) DeBello, Ditterich, Usrey

**Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;**

**ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience**

**Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience**

**Quarter Offered:** F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses

**223. Cognitive Neuroscience (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate student standing in Psychology or Neuroscience or consent of instructor. Graduate core course for neuroscience. Neurobiological bases of higher mental function including attention, memory, language. One of three in three-quarter sequence. (Same course as Psychology 261.)—S. (S.) Swaab

**224A. Molecular and Developmental Neurobiology (2)**

Lecture/discussion—2 hours. Prerequisite: consent of instructor. Key issues in developmental and molecular neurobiology. Discussion emphasis on critical evaluation of the experiments and methods described in research papers. Readings of seminal, primary research papers, reviews, and book chapters. Reading materials will be distributed one week in advance.—W. (W.) Cheng, Diaz

**224B. Molecular and Developmental Neurobiology (2)**

Lecture/discussion—2 hours. Prerequisite: course 224A or consent of instructor. Continuation of course 224A. Key issues in developmental and molecular neurobiology, focusing on developmental topics. Discussion emphasis on critical evaluation of experiments and methods described in associated literature. Offered in alternate years.—S. Cheng, Diaz

**225. Translational Research in the Neurobiology of Disease (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: Past or concurrent enrollment in Neuroscience courses 221, 222, 223, or permission of instructor; restricted to current graduate student enrollment or permission of instructor. This course will provide an overview of major neuropsychiatric and neurological disorders from both the clinical and fundamental science perspectives. Offered in alternate years.—W. Carter, McAllister

**226. Molecular and Developmental Neurobiology (4)**

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Introduction to molecular and developmental neurobiology. Topics range from neurulation to development of sensory systems and include modern molecular methods and their application in developmental neuroscience.—W. (W.) McAllister

**243. Topics in Cellular and Behavioral Neurobiology (2)**

Discussion—1 hour; seminar—1 hour. Prerequisite: consent of instructor. An advanced examination of several current problems in neurobiology. Topics will vary in different years; may be repeated for credit. (S/U grading only.)—S. (S.) Ishida

**247. Topics in Functional Neurogenomics (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (Same course as Neurobiology, Physiology, and Behavior 247.) Offered in alternate years.—W. Choudary

**250. Biology of Neuroglia (2)**

Lecture/discussion—1.5 hours. Prerequisite: consent of instructor. The properties and functions of non-neuronal or neuroglial cells in the mammalian central nervous system with relevance to neuronal development, physiology and injury response. Offered in alternate years. (S/U grading only.)—S.

**261A. Topics in Vision: Eyes and Retinal Mechanisms (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing, Neurobiology, Physiology, and Behavior 100 or 112 or the equivalent. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as Neurobiology, Physiology, and Behavior 261A and Molecular, Cellular, and Integrative Physiology 261A.) (S/U grading only.) Offered in alternate years.—F. Ishida

**261B. Topics in Vision: Systems, Psychophysics, Computational Models (2)**

Lecture/discussion—2 hours. Prerequisite: consent of instructor, course 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as Neurobiology, Physiology, and Behavior 261B and Molecular, Cellular, and Integrative Physiology 261B.) (S/U grading only.) Offered in alternate years.—W. Britten

**261C. Topics in Vision: Clinical Vision Science (2)**

Lecture/discussion—2 hours. Prerequisite: courses 261A and 261B, or consent of instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as Neurobiology, Physiology, and Behavior 261C and Molecular, Cellular, and Integrative Physiology 261C.) (S/U grading only.) Offered in alternate years.—S. Werner

**267. Computational Neuroscience (5)**

Lecture—4 hours; lecture/laboratory—3 hours. Prerequisite: one course in general neuroscience at the level of course 100; one year college-level Calculus at level of Math 16A, B, C; one year Physics at the level of Physics 7A, B, C, strongly recommended; students from other departments should contact the instructor. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single-neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. Offered in alternate years. (Same course as Neurobiology, Physiology & Behavior 267.)—(F.) Goldman

**283. Neurobiological Literature (1)**

Seminar—1 hour. Prerequisite: consent of instructor. Critical presentation and analysis of recent journal articles in neurobiology. May be repeated for credit. (S/U grading only.)—F. W. S. (F, W, S.)

**284. Development of Sensory Systems (1)**

Seminar—1 hour. Prerequisite: consent of instructor. Presentation and discussion of recent literature on the development of sensory systems. May be repeated for credit. (S/U grading only.)—F. S. (F, S.) Cheng

**285. Literature in Visual Neuroscience (2)**

Seminar—2 hours. Critical presentation and discussion of current literature in visual neuroscience. (Same course as Neurobiology, Physiology, and Behavior 285.) May be repeated for credit if topic differs. (S/U grading only.)—F. W. S. (F, W, S.) Britten, Goldman, Usrey

**287A. Topics in Theoretical Neuroscience (2)**

Seminar—2 hours. Prerequisite: consent of instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. May be repeated for credit. (Same course as Neurobiology, Physiology & Behavior 287A.) (S/U grading only.)—(F.) Ditterich, Goldman

**287B. Topics in Theoretical Neuroscience (2)**

Seminar—2 hours. Prerequisite: consent of instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. May be repeated for credit. (Same Course as Neurobiology, Physiology & Behavior 287B.) (S/U grading only.)—S. (S.) Ditterich, Goldman

**289. Topics in Molecular and Developmental Neurobiology (2)**

Seminar—2 hours. Analysis and discussion of seminal and current research papers in molecular and developmental neurobiology. Different topics will be covered each quarter. In the past topics have included, "Synaptic vesicle dynamics," "Neuronal polarity," and "Glutamate receptors." May be repeated ten times for credit when topic differs. (S/U grading only.)—F. S. (F, S.) Diaz, Zito

**290C. Research Conference in Neurobiology (1)**

Discussion—1 hour. Prerequisite: graduate standing in Neuroscience or consent of instructor; course 299 (concurrently). Presentation and discussion of faculty and graduate student research in neurobiology. May be repeated for credit. (S/U grading only.)—F. W. S. (F, W, S.)

**292. Cortical Plasticity and Perception (2)**

Lecture/discussion—2 hours. Prerequisite: Neurobiology, Physiology, and Behavior 100 or 112 or equivalent or consent of instructor. Examination of research articles on cortical plasticity and changes in perception. Examples drawn from studies of the somatosensory, visual, auditory, and motor cortex. Offered in alternate years. (S/U grading only.)—(W.)

**298. Group Study (1-5)**

(S/U grading only.)

**299. Research (1-12)**

(S/U grading only.)

## Nursing, Betty Irene Moore School of

Heather M. Young, Ph.D., R.N., F.A.A.N.; Associate Vice Chancellor for Nursing, UC Davis, and Dean, Betty Irene Moore School of Nursing

Theresa A. Harvath, Ph.D., R.N., F.A.A.N.; Associate Dean for Academics, Director for Clinical Education and Clinical Professor

Jill G. Joseph, M.D., Ph.D., M.P.H.; Associate Dean for Research and Professor

4610 X St., Suite 4202  
Sacramento, CA 95817  
916-734-2145; <http://nursing.ucdavis.edu>

**Mission Statement**

The Betty Irene Moore School of Nursing at UC Davis cultivates academic excellence through immersive, interprofessional and interdisciplinary education and research in partnership with the communities served. Faculty, staff and students discover and disseminate knowledge to advance health, improve quality of care and shape policy.

## Nursing Science and Health-Care Leadership Graduate Degree Program

Hosted by the Betty Irene Moore School of Nursing at UC Davis, the Nursing Science and Health-Care Leadership Graduate Degree Programs prepare nurse leaders, physician assistants, nurse practitioners, researchers and faculty in a unique interdisciplinary and interprofessional environment. The full-time, academic, doctoral program prepares gradu-

ates as leaders in health care, health policy and nurse faculty/researchers at the university level. The master's-degree Physician Assistant Studies program prepares graduates to deliver care as physician assistants. Graduates of the professional master's-degree leadership program are prepared for healthcare leadership roles in a variety of organizations and as nurse faculty at the community college and prelicensure education levels. Graduates of the master's-degree Nurse Practitioner Program are prepared to deliver care as nurse practitioners.

## Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health System and other UC Davis schools, colleges and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, biostatistics, public health and other fields. For a complete list of faculty, see <http://nursing.ucdavis.edu>.

## Courses in Nursing (NRS)

Doctoral and master's-degree leadership core courses are listed below.

**Core Courses.** For a current listing of courses offered through the School of Nursing, please see <http://nursing.ucdavis.edu>.

## Graduate

### 201. Health Status and Care Systems (4)

Lecture/discussion—3 hours; laboratory/discussion; project. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Comparative health status data, major current health issues globally, nationally, regionally. Theoretical perspectives on social, political, economic determinants of health. Health-care systems examined, linked to data, and evaluated in regards to outcomes. Aging, rural, ethnic minority populations highlighted. —F. (F.)

### 202. Implementation Science (4)

Lecture/discussion—4 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Change processes in health care from political, historic, economic and sociologic frameworks. Historic and current examples of transformative change in the health-care system. Skills for system transformation through health policy, practice, research and education are emphasized. —S. (S.)

### 203. Leadership in Health Care (4)

Lecture/discussion—3 hours; fieldwork. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Critical examination of leadership from a variety of theoretical and philosophical perspectives and focuses on specific challenges in health care and leadership at various levels, e.g., patient, organizational, and policy levels. —W. (W.)

### 204. Research Skills for Nursing Science and Health-Care Leadership (4)

Lecture/discussion—3 hours; laboratory/discussion—1 hour. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Foundation for analyzing research, health, and systems data to answer clinical, systems, or policy questions. Use and examine multiple sources of data and information as a basis for planned change and transformation in health care. —F. (F.)

### 205. Research Design in Nursing and Health Care (4)

Lecture/discussion—4 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Major types of quantitative and qualitative research design and their application to nursing and health-care research. Implications of choosing alternative research designs and critical analysis of philo-

sophical underpinnings. Evaluation of control and validity, sampling, instruments to measure health concepts. —W. (W.)

### 205A. Overview of Research in Nursing Science and Health Care (2)

Lecture—2 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Provides an overview of quantitative and qualitative paradigms in scientific inquiry and the major designs related to each paradigm. First of a three-course series on research design and methods in nursing science and healthcare research. —F. (F.)

### 205B. Quantitative Research in Nursing Science and Health Care (4)

Lecture—4 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Introduces principles of quantitative data collection and analysis as applied to major study designs in nursing and health-care research. Provides a basic foundation for producing, interpreting, and applying quantitative research findings to answer clinical, system, and policy questions. —W. (W.)

### 205C. Qualitative Research in Nursing Science and Health Care (4)

Lecture—4 hours. Prerequisite: consent of instructor. Restricted to current Ph.D. students in NSHL program or consent of instructor. Introduces principles of qualitative data collection and analysis as applied to major study designs in nursing and health-care research. Provides a basic foundation for producing, interpreting, and applying qualitative research findings to answer clinical, system, and policy questions. —S. (S.)

### 206. Community Connections (2-5)

Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Open to NSHL MS students only. Community-based learning and experiences including community participation, assessment, data collection and analysis using multiple approaches, community health improvement projects, collaborative leadership practice, all with the guidance of community members and nursing faculty. May be repeated for credit. —F, W, S. (F, W, S.)

### 210Y. Applied Health Informatics (4)

Lecture/discussion—1 hour; web virtual lecture—3 hours. Prerequisite: consent of instructor. Open to current student in NSHL graduate programs or consent of instructor. Within the conceptual framework of the Foundation of Knowledge model, this course integrates nursing science, information science, computer science and cognitive science to acquire, process, generate and disseminate knowledge. —W. (W.)

### 211Y. Rural Health (2-3)

Lecture/discussion—2 hours; fieldwork. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Interprofessional graduate course provides an introduction to rural health theory, research, policy, and practice, with an emphasis on rural health assets and disparities. —F. (F.)

### 220. Social, Cultural, and Behavioral Determinants of Health (2)

Lecture/discussion—2 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Effects of globalization, political systems, local and global economies, culture, race, class, gender, and sexuality on population health. —Su. (Su.)

### 221. Biophysical Concepts in Nursing (3)

Lecture/discussion—3 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Pathophysiological processes that contribute to different disease

states across the lifespan; case studies; selective clinical decisions using current, reliable sources of pathophysiology information. —Su. (Su.)

### 242A. Implementation Science for Clinicians (2)

Lecture/discussion—2 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course focuses on identification of relevant research or improvement questions specific to patient care and evaluating the pertinent research literature related to the implementation of evidence based care. The course is 1st of a 3-course series. —F. (F.)

### 242B. Implementation Science for Clinicians (2)

Lecture/discussion—2 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course is a continuation of course 242A, Implementation Science for Clinicians, with a focus on implementing and evaluating a change. —W. (W.)

### 242C. Implementation Science for Clinicians (2)

Lecture/discussion—2 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Advanced skills in application of implementation science into systems based practice and incorporating quality improvement and patient safety knowledge with particular focus on prevention of medical errors. —S. (S.)

### 243A. Leadership in Professional Practice (2)

Lecture/discussion—2 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course is a critical examination of leadership using theoretical and philosophical perspectives with an applied approach applicable to clinical practice. The 3 course series is conducted across three quarters in the 1st, 3rd and 8th quarters. —Su. (Su.)

### 243B. Leadership in Professional Practice (1)

Lecture/discussion—1 hour. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces professional role topics including history of the profession, the role in interprofessional teams and the health care system, transitioning to the role from other health professions, scope of practice, certification and licensure and professional organizations. —W. (W.)

### 243C. Leadership in Professional Practice (1)

Lecture/discussion—1 hour. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course expands upon the leadership role as it relates to their clinical practice and professional role. Professional role topics including: transitioning from student to practicing professional, scope of practice, the physician relationship, and more advanced concepts in ethics. —S. (S.)

### 250. Foundations of Primary Health Care (7)

Lecture/discussion—6 hours; laboratory—3 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course is designed to promote the understanding and clinical application of human anatomy, physiology, histology, immunology and pathology. —Su. (Su.)

### 251A. Primary Health Care (8)

Lecture/discussion—8 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate

Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. Module content will focus on various organ systems and specialty areas. —F. (F.)

### **251B. Foundations of Primary Health Care (8)**

Lecture/discussion—8 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. —W. (W.)

### **251C. Primary Health Care (8)**

Lecture/discussion—8 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. —S. (S.)

### **251D. Primary Health Care (6)**

Lecture/discussion—6 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. —Su. (Su.)

### **260. Foundations of Behavioral Health (1)**

Lecture/discussion—1 hour. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course focuses on the spectrum of normal psychological development over the lifespan for children, adults and elders. Theories of stress and coping mechanism are presented as a framework for the assessment of individuals. —Su. (Su.)

### **270. Foundations of Pharmacology (2)**

Lecture/discussion—1 hour; laboratory—3 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces the student to the major concepts in pharmacology and relevant human physiology related to pharmacotherapeutics and toxicology. —Su. (Su.)

### **271A. Pharmacology (2)**

Lecture/discussion—1 hour; laboratory—3 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems. —F. (F.)

### **271B. Pharmacology (2)**

Lecture/discussion—1 hour; laboratory—3 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems. —W. (W.)

### **271C. Pharmacology (2)**

Lecture/discussion—1 hour; laboratory—3 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems. —S. (S.)

### **272. Foundations of Pharmacology (2)**

Lecture/discussion—2 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Theoretical background to providing safe and effective care related to drugs and natural products. —Su. (Su.)

### **273. Pharmacology Concepts in Nursing (2)**

Lecture/discussion—2 hours. Prerequisite: courses 221, 272, 420, 421; consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Application of principles for safe and effective use of medications and natural products; use of current, reliable information to make clinical decisions. —F. (F.)

### **290. Master's Seminar (2)**

Discussion—2 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Open to NSHL MS students only or by consent of course instructor. Subject varies from quarter to quarter. Current knowledge and issues relevant to one of two fields of emphasis: population health or health systems. May be repeated 10 times for credit. —F, W, S. (F, W, S.)

### **291. Doctoral Seminar (2)**

Discussion—2 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Focus on the theory, research and knowledge relevant to one of two fields of emphasis: population health or health systems. Emphasis placed on reading, critique and synthesis of classic and cutting-edge research in nursing and health care. May be repeated 10 times for credit. —F, W, S. (F, W, S.)

### **291D. Doctoral Seminar (2)**

Discussion—2 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Focus on the theory, research and knowledge relevant to one of two fields of emphasis: population health or health systems. Emphasis placed on reading, critique and synthesis of classic and cutting-edge research in nursing and health care. May be repeated 10 times for credit. —F, W, S. (F, W, S.)

### **298. Special Topics in Nursing Science and Health-Care Leadership (1-4)**

Lecture/discussion—1-2 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. In-depth study of topics in Nursing Science and Health-Care Leadership, selected from: policy and politics in health care, health-care disparities, current issues in health care, approaches to the conduct of science, or other related areas, with year to year variation. May be repeated for credit. Offered irregularly. —F, W, S. (F, W, S.)

### **298V. Online Special Topics in Nursing Science and Health-Care Leadership (1-4)**

Web virtual lecture—1-4 hours; web electronic discussion—1-4 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. In-depth study of topics in Nursing Science and Health-Care Leadership, selected from: policy and politics in health care, health-care disparities, current issues in health care, approaches to the conduct of science, or other related areas, with year to year variation. May be repeated for credit. Offered irregularly. —F, W, S. (F, W, S.)

### **299. Research and Writing (1-12)**

Extensive writing or discussion—3-36 hours. Prerequisite: consent of instructor. Students in the Nursing Science and Health-Care Leadership graduate programs conduct research and writing under the supervision of a faculty member. May be repeated for credit. (S/U grading only.) —F, W, S, Su. (F, W, S, Su.)

### **299D. Dissertation Research and Writing (1-12)**

Extensive writing or discussion—3-36 hours. Prerequisite: consent of instructor. Students in the Nursing Science and Health-Care Leadership graduate programs conduct dissertation research and writing under the supervision of a faculty member. May be repeated for credit. (S/U grading only.) —F, W, S. (F, W, S.)

### **Professional**

#### **301. Learner Centered Teaching (3-4)**

Lecture/discussion—3 hours; practice—1 hour. Open to current students in the Nursing Science and Health-Care Leadership graduate programs; outside students with prior educational or work experience in education may register for this class with the consent of instructor. Students will explore best practices in learner-centered teaching, performance-based curriculum models, instructional design, and assessing/evaluating student learning. Students will have experience in planning learner-centered activities that are engaging and effective in achieving desired student performance. —W, S. (W, S.)

#### **302. Teaching Methods—Use of Emerging Technologies to Improve Student Learning (4)**

Lecture/discussion—3 hours; practice—1 hour. Open to current students in the Nursing Science and Health-Care Leadership graduate programs; outside students with prior educational or work experience in education may register for this class with the consent of instructor. Students will examine, design and develop instructional strategies that use innovative and emerging technologies to promote motivation, performance and learning in health professions education. Research findings associated with use of various emerging technologies will be examined. —F, S. (F, S.)

#### **303. Professional Role Formation (2-4)**

Lecture/discussion—2 hours; Laboratory—2 hours. Exploration of the educator role. Open to current students in the Nursing Science and Health-Care Leadership graduate programs; outside students with prior educational or work experience in education may register for this class with the consent of instructor. Exploration of the educator role. Topics include Role Expectations, Legal and Regulatory Issues, Professional Ethics, Educational Scholarship, Individual Differences, Learning Environments, and Lifelong Learning. Placements for the optional practicum are arranged in a wide variety of settings. —F, W. (F, W.)

### **Professional**

#### **400. Basic Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Instruction and practice of the fundamental clinical skills necessary for patient care comprise this course with a primary focus on principles of effective communication in establishing the therapeutic provider-patient relationship. —Su. (Su.)

#### **401. Basic Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content. —F, W, S, Su. (F, W, S, Su.)

#### **410A. Advanced Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content. —F. (F.)

#### **410B. Advanced Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems. —W. (W.)

#### **410C. Advanced Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor.

Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems.—S. (S.)

#### **410D. Advanced Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems.—Su. (Su.)

#### **410E. Advanced Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems.—F. (F.)

#### **410F. Advanced Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems.—W. (W.)

#### **410G. Advanced Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified specialty systems.—S. (S.)

#### **420. Foundations of Clinical Nursing Practice (3)**

Clinical activity—9 hours. Prerequisite: consent of the instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Foundational course introduces students to core concepts of clinical nursing, including clinical reasoning, professional ethics, therapeutic communication and activities of daily living. Develop skills for the provision of safe, high quality, culturally-sensitive, person-centered care across the lifespan.—Su. (Su.)

#### **421. Health Assessment Across the Lifespan (3)**

Lecture/discussion—1 hour; clinical activity—6 hours. Prerequisite: consent of the instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Prepares students to conduct a health history assessment using developmentally and culturally appropriate approaches for individuals across the lifespan. Acquire the knowledge, understanding, and skills needed to perform, interpret and communicate a health history.—Su. (Su.)

#### **422. Care of Adults with Chronic Conditions (6)**

Lecture/discussion—3 hours; clinical activity—9 hours. Prerequisite: courses 221, 272, 420, and 421; consent of the instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Learn concepts central to the effective management of a variety of common chronic illness and disabling conditions across the lifespan in a variety of different settings. Practice conducting in-depth health assessments of individuals with chronic conditions.—F. (F.)

#### **423. Psychosocial Wellness & Illness (5)**

Lecture/discussion—3 hours; clinical activity—6 hours. Prerequisite: courses 221, 272, 420, and 421; consent of the instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Explore the biological, psychological, cultural, societal, and environmental factors that affect psychological wellness and illness. Practice provid-

ing care to individuals and families experiencing disruptions in mental health secondary to physical or psychiatric illness, trauma or loss.—F. (F.)

#### **424. Nursing Care of Older Adults (3)**

Lecture/discussion—2 hours; clinical activity—3 hours. Prerequisite: courses 221, 272, 420, 421, 273, 422, 423, 425, 223, and 426; consent of the instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Build skills for situations involving older adults, such as in the management of complex clinical and administering and interpreting standardized assessment tools. Develop plans of care for older adults experiencing a variety of geriatric syndromes.—Su. (Su.)

#### **425. Family Focused Nursing (9)**

Lecture/discussion—5 hours; clinical activity—12 hours. Prerequisite: courses 221, 272, 420, 421, 273, 422, and 423; consent of the instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Focuses on family as the unit of nursing and interprofessional care. Includes influences of family on health and illness, reproductive and gender/sexuality issues, pregnancy, birth and child-rearing, and the health and illness in children and youth.—W. (W.)

#### **426. Nursing Care of Adults with Complex Illness or Injury (8)**

Lecture/discussion—4 hours; clinical activity—12 hours. Prerequisite: courses 221, 272, 420, 421, 273, 422, 423 and 425; consent of the instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Prepares students to provide comprehensive, patient-centered nursing care for patients with acute or complex illness and injury. Theory portion focuses on concepts associated with complex physiological alterations.—S. (S.)

#### **427. Fostering Healthy Communities (7)**

Lecture/discussion—4 hours; clinical activity—9 hours. Prerequisite: consent of the instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Focuses on populations & communities, and emphasizes working with diverse communities in providing health promotion, chronic disease management, transitional support and crisis intervention. Develop skills to critically analyze and shape health policy and develop accessible community resources.—Su. (Su.)

#### **428. Capstone Clinical Nursing Practicum (8)**

Clinical activity—24 hours. Prerequisite: courses 220, 221, 222A, 272, 420, 421, 429A, 222B, 273, 422, 423, 429B, 203, 212, 425, 429C, 202, 223, 426, 429D, 224, 424, 427, and 429E; consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Practicum experience is designed to facilitate transition to professional practice. Opportunity to choose a clinical practice area of interest and to work with a preceptor with expertise in that area.—F. (F.)

#### **429A. Collaborative Practice A (1)**

Clinical activity—3 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism.—Su. (Su.)

#### **429B. Collaborative Practice B (1)**

Clinical activity—3 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies.

Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism.—F. (F.)

#### **429C. Collaborative Practice C (1)**

Clinical activity—3 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism.—W. (W.)

#### **429D. Collaborative Practice D (1)**

Clinical activity—3 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism.—S. (S.)

#### **429E. Collaborative Practice E (1)**

Clinical activity—3 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism.—S. (S.)

#### **429F. Collaborative Practice F (1)**

Clinical activity—3 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism.—F. (F.)

#### **440. Preparation for Clinical Practice (1-3)**

Clinical Activity—3-9 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Students are placed in clinical settings and/or clinical simulation laboratories to observe and practice the integration of clinical skills with direct supervision by faculty.—S. (S.)

#### **450A. Supervised Clinical Practice-Primary Health Care (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **450B. Supervised Clinical Practice-Primary Health Care (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate com-

munity-based primary care provider per accreditation requirements. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **450C. Supervised Clinical Practice-Primary Health Care (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **450D. Supervised Clinical Practice-Primary Health Care (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **450E. Supervised Clinical Practice-Primary Health Care (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **451. Supervised Clinical Practice-Pediatrics (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based Pediatric Medicine provider per accreditation requirements. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **452. Supervised Clinical Practice-Women's Health (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based women's health and prenatal care provider per accreditation requirements. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **453. Supervised Clinical Practice-Mental Health (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based psychiatrist, psychiatric/mental health provider per accreditation requirements. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **454. Supervised Clinical Practice-Emergency Medicine (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate Emergency Medicine provider per accreditation requirements. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **455. Supervised Clinical Practice-Inpatient Surgery (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical experience under the supervision of an appropriate surgical provider per accreditation requirements. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **456. Supervised Clinical Practice-Inpatient Medicine (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate inpatient provider per accreditation requirements. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **459. Supervised Clinical Practice-Other Specialties (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Two four-week selective rotations are available to accommodate student interest and/or accommodate a student's clinical deficits identified by the program. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **470. Health Care Ethics (3-9)**

Lecture/discussion—2 hours; laboratory/discussion—1 hour. Prerequisite: consent of instructor. Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Participation in ethics rounds. (Same course as General Medicine 470.) (S/U grading only.)—F, W, S, Su. (F, W, S, Su.) Loewy

#### **471. Supervised Clinical Practice-Geriatrics (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based Geriatric Medicine provider per accreditation requirements. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **475. Supervised Clinical Practice-Acute Care (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Two-to-four-week rotation focus on providing acute care in inpatient settings. Students will work directly with specific inpatient units. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **480. Supervised Clinical Practice-Rural Health (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Rural health rotations focus on providing care in medically underserved rural sites. Students will experience care across the continuum in ambulatory, inpatient, and community based settings. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **490. Supervised Clinical Practice-Quality and Safety (1-16)**

Clinical activity—48 hours. Prerequisite: consent of instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Clinical rotation that allow students to work directly with patient safety and quality improvement committees in a various organizations. May be repeated five times for credit.—F, W, S, Su. (F, W, S, Su.)

#### **493A. Improving Quality in Health Care (4)**

Lecture/discussion—4 hours. Open to Nursing Science and Health-Care Leadership Students and/or consent of instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (S/U grading only; deferred grading only, pending completion of sequence.)—F. (F.)

#### **493B. Improving Quality in Health Care (4)**

Lecture/discussion—4 hours. Open to Nursing Science and Health-Care Leadership Students and/or consent of instructor. Working in interdisciplinary teams, will explore advanced theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience (S/U grading only; deferred grading only, pending completion of sequence.)—W. (W.)

#### **493C. Enhancing Patient Safety in Health Care (3)**

Seminar—1 hour; clinical activity—1 hour; discussion—1 hour. Prerequisite: Nursing Science and Health-Care Leadership graduate students; consent of instructor. Inter-professional module is designed to explore the theory and practical methods being employed to improve patient safety in health care while providing an opportunity for inter-professional educational experience. (Same course as Medical Sciences 493QC.) (S/U grading only.)—S. (S.)

### **Courses in Physicians Assistant Studies (PAS)**

#### **Graduate**

#### **299. Research and Writing (1-4)**

Extensive writing or discussion—3-12 hours. Prerequisite: consent of instructor. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Students in the Nursing Science and Health-Care Leadership graduate programs conduct research and writing under the supervision of a faculty member. Students may repeat this course for credit in different quarters, depending on the length of their program of study to complete their Master's Degree. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **Professional**

#### **400. Basic Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Instruction and practice of the fundamental clinical skills necessary for patient care comprise this course with a primary focus on principles of effective communication in establishing the therapeutic provider-patient relationship.—Su. (Su.)

#### **401. Basic Clinical Skills (1-4)**

Lecture/discussion—1-4 hours. Prerequisite: consent of instructor. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content.—F, W, S, Su. (F, W, S, Su.)

#### **410A. Advanced Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content.—F. (F.)

#### **410B. Advanced Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor.

Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified systems. —W. (W.)

#### **410C. Advanced Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified systems. —S. (S.)

#### **410D. Advanced Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified systems. —Su. (Su.)

#### **410E. Advanced Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified systems. —F. (F.)

#### **410F. Advanced Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified systems. —W. (W.)

#### **410G. Advanced Clinical Skills (1-4)**

Lecture/laboratory—1-4 hours. Prerequisite: consent of instructor. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified systems. —F, W, S, Su. (F, W, S, Su.)

#### **440. Preparation for Clinical Practice (1-3)**

Clinical activity—36 hours. Prerequisite: consent of instructor. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Students are placed in clinical settings and/or clinical simulation laboratories to observe and practice the integration of clinical skills with direct supervision by faculty. —S. (S.)

Kevin Laufer, Ph.D., Associate Adjunct Professor  
Louise Lanoue, Ph.D., Associate Project Scientist  
Roy Martin, Ph.D., Adjunct Professor  
John Newman, Ph.D., Associate Adjunct Professor  
Charles Stephensen, Ph.D., Adjunct Professor  
Marilyn S. Townsend, Ph.D., R.D., Specialist in Cooperative Extension  
Janet Uriu-Adams, Ph.D., Associate Research Nutritionist  
Marta Van Loan, Ph.D., Adjunct Professor  
Sheri Zidenberg-Cherr, Ph.D., Specialist in Cooperative Extension  
Susan Zunino, Ph.D., Associate Adjunct Professor

**Major Programs.** See the majors in **Clinical Nutrition**, on page 216 and **Nutrition Science**, on page 494.

#### **Minor Program Requirements:**

The Department of Nutrition offers four minor programs open to students majoring in other disciplines who wish to complement their study programs with a concentration in the area of food and nutrition.

Note: If the student's major program requires the same course in biochemistry and physiology, only one of the courses may duplicate credit toward the minor. Each program below lists replacement courses to fulfill the minimum unit requirement.

UNITS

#### **Community Nutrition ..... 20**

**Preparation.** Plan in advance to include the required course prerequisites.  
Nutrition 111AY and 111B ..... 5  
Nutrition 118, 192 (2 units) ..... 6  
Nutrition 120AN or 120BN ..... 4

Neurobiology, Physiology, and Behavior  
101 ..... 5  
Replacement courses; see note above:  
Nutrition 114, 116A-116B, 116AL-116BL.

#### **Food Service Management ..... 25**

**Preparation.** Plan in advance to include the required course prerequisites.  
Food Science and Technology 100A-100B, 101A-101B ..... 12  
Food Service Management 120, 120L, 122 ..... 9  
Agricultural and Resource Economics 112 ..... 4  
Replacement courses; see note above:  
Nutrition 10, 111AY, 111B, 114, 116A-116B, 120AN, or 120BN, Economics 1A-1B.

#### **Nutrition and Food ..... 22**

**Preparation.** Plan in advance to include the required course prerequisites.  
Nutrition 111AY and 111B ..... 5  
Nutrition 120AN or 120BN ..... 4  
Food Science and Technology 100A, 100B ..... 8  
Neurobiology, Physiology, and Behavior 101 ..... 5  
Replacement courses; see note above:  
Nutrition 114, 116A-116B, 116AL-116BL.

#### **Nutrition Science ..... 20**

**Preparation.** Plan in advance to include the required course prerequisites.  
Animal Biology 102 and 103, Biological Sciences 102 and 103 and Nutrition 111AY and 111B ..... 11-15  
Neurobiology, Physiology, and Behavior 101 ..... 5  
Replacement courses; see note above:  
Nutrition 114, 115, 116A-116B, 117, 120AN or 120BN, 122, 123, 124, 201, 204.

**Minor Adviser.** 3202 Meyer Hall 530-752-2512

**Graduate Study.** Programs of study leading to the M.S. and Ph.D. degrees are available in Nutrition. For information on graduate study contact the Nutrition Graduate Group.

## Courses in Nutrition (NUT)

### Lower Division

#### **10. Discoveries and Concepts in Nutrition (3)**

Lecture—3 hours. Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. GE credit: SciEng | SE, SL.—F, W, S, Su. (F, W, S, Su.) Applegate

#### **11. Current Topics and Controversies in Nutrition (2)**

Discussion—1.5 hours; term paper. Exploration of current applications and controversies in nutrition. Students read scientific journal articles and write summaries, as well as give brief oral presentations. Topics change to reflect current interests and issues. GE credit: SciEng, Wrt | OL, SE, WE.—F, W, S, Su. (F, W, S, Su.)

#### **99. Individual Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

### Upper Division

#### **104. Environmental & Nutritional Factors in Cellular Regulation and Nutritional Toxicants (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 101; Biological Sciences 103 or Animal Biology 103. Cellular regulation from nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction pathways, role of specific organelles in organization/regulation of metabolic transformations, major cofactor functions, principles of pharmacology/toxicology

important to understanding nutrient/toxicant metabolism. (Same course as Environmental Toxicology 104.) GE credit: SciEng | OL, SE, SL.—S. (S.) Haj, Oteiza

### **105. Nutrition and Aging (3)**

Lecture—3 hours. Prerequisite: course 111AV or 111AY and Animal Biology 103 or the equivalent. Role of nutrition in the aging process from both an organismal/cell perspective, including demographics, theories of aging, nutrition and evolution, nutritional manipulation and life-span extension, and nutrition's impact on the diseases of aging. GE credit: SciEng | SE.—S. (S.)

### **111B. Recommendations and Standards for Human Nutrition (2)**

Lecture—2 hours. Prerequisite: Chemistry 8B; Neurology, Physiology, and Behavior 101 or the equivalent, course 111AV or 111AY. Critical analysis of the development of nutritional recommendations for humans. Topics include history of modern recommendations, development of the Recommended Dietary Allowance (RDA) and other food guides; the Dietary Reference Intakes (DRI); administrative structure of regulatory agencies pertinent to nutrition recommendations; introduction to scientific methods used to determine the recommendations; food labeling laws; nutrition recommendations in other countries and cultures. Not open for credit to students who have completed course 111.—S. (S.) Zidenberg-Cherr

### **111AY. Introduction to Nutrition and Metabolism (3)**

Web virtual lecture—3 hours; lecture/discussion—1 hour. Prerequisite: Chemistry 8B; Neurology, Physiology, and Behavior 101 or the equivalent. Restricted to upper division or graduate level students only. Introduction to metabolism of protein, fat and carbohydrate: the biological role of vitamins and minerals; nutrient requirements during the life cycle; assessment of dietary intake and nutritional status. Not open for credit to students who have completed course 101 or 111AV. GE credit: SciEng | SE.—W. (W.)

### **112. Nutritional Assessment (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Animal Biology 102 and 103 or course 101, Nutrition 111AV or 111AY, Statistics 13. Restricted to upper division or graduate level Nutrition students only. Methods of human nutritional assessment, including dietary, anthropometric, biochemical methods. Principles of precision, accuracy, and interpretation of results for individuals and populations. GE credit: SciEng | QL, SE.—S. (S.) Satre, Stewart

### **113. Principles of Epidemiology in Nutrition (4)**

Lecture/discussion—4 hours. Prerequisite: Plant Sciences 120 or equivalent. Introduction to epidemiology as it relates to the field of nutrition, including study design, principles of epidemiologic inference, criteria for causality, and interpreting measures of disease risk. GE credit: SciEng | QL, SE.—F. (F.) Stewart

### **114. Developmental Nutrition (4)**

Lecture—4 hours. Prerequisite: Animal Biology 102 and 103; course 111AV or 111AY, 111B. Role of nutritional factors in embryonic and postnatal development. GE credit: SciEng, Wrt | SE.—W. (W.) Keen

### **115. Animal Nutrition (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 8B or 118B or consent of instructor. Comparative differences among animals in digestion and metabolism of nutrients. Nutrient composition of feeds, digestive systems, digestion, absorption, feeding strategies. GE credit: SciEng, Wrt | OL, QL, SE, SL, VL, WE.—W. (W.) DePeters

### **116A. Clinical Nutrition (3)**

Lecture—3 hours. Prerequisite: course 111AV or 111AY, 111B, 112; Neurobiology, Physiology, and Behavior 101 or the equivalent. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions. GE credit: SciEng | SE.—F. (F.) Steinberg

### **116AL. Clinical Nutrition Practicum (3)**

Lecture—1 hour; laboratory—3 hours; discussion—1 hour. Prerequisite: course 116A (may be taken concurrently). Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116A. GE credit: SciEng | SE.—F. (F.) Frank

### **116B. Clinical Nutrition (3)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 111AV or 111AY, 111B, 112; Neurobiology, Physiology, and Behavior 101 or the equivalent. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions. GE credit: SciEng | SE.—W. (W.) Zivkovic

### **116BL. Clinical Nutrition Practicum (3)**

Lecture—1 hour; laboratory—3 hours; discussion—1 hour. Prerequisite: course 116AL, and 116B (may be taken concurrently). Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116B. Continuation of course 116AL. GE credit: SciEng | SE.—W. (W.)

### **117. Experimental Nutrition (6)**

Lecture—3 hours; laboratory—6 hours; extensive writing. Prerequisite: course 111AV or 111AY, 111B, 112, Biological Sciences 102, 103; Molecular and Cellular Biology 120L or other laboratory course in biochemistry is recommended. Methods of assessing nutritional status. Application of chemical, microbiological, chromatographic and enzymatic techniques to current problems in nutrition. GE credit: SciEng, Wrt | SE, WE.—F. (F.) Gaikwad

### **118. Community Nutrition (4)**

Lecture—4 hours. Prerequisite: course 111AV or 111AY, 111B, and 116A. Nutrition problems in contemporary communities and of selected target groups in the United States and in developing countries. Nutrition programs and policy, principles of nutrition education. GE credit: SciEng | SE, SL.—W. (W.) Heinig

### **119A. International Community-Based Nutritional Assessment (1)**

Lecture/discussion—1 hour. Prerequisite: course 112 (may be taken concurrently) and consent of instructor. Issues and problems related to community-based nutritional assessment in a low-income country, major nutritional problems in low-income countries; ethical issues in human investigation; survey design, data collection techniques, and data analysis; preparation for international travel; cross-cultural communication, health, and safety while living abroad.

### **119B. International Community-Based Nutritional Assessment (6)**

Lecture—2 hours; fieldwork—12 hours. Prerequisite: course 119A and consent of instructor. Restricted to upper division students in Clinical Nutrition, Community Nutrition, Dietetics, and Nutrition Science. A six-week summer course in Peru. Implementation of a community-based nutritional assessment survey, including development of the survey instrument, selection of the study sample, collection and verification of data, and analysis and interpretation of the results; the project will be carried out by paired participation of students and faculty members of UC Davis and the collaborating foreign institution.

### **120AN. Nutritional Anthropology (4)**

Lecture—3 hours, discussion—1 hour. Prerequisite: course 10 and Anthropology 2 recommended. Nutritional anthropology from historical and contemporary perspectives; the anthropological approach to food and diet; field work methods; case histories that explore food patterns and their nutritional implications. GE credit: SciEng or SocSci, Div | SE, SS.—Su. (Su.) Kurtz

### **120BN. Nutritional Geography (4)**

Lecture—3 hours; discussion—1 hour. Nutritional geography from historical and contemporary perspectives; the geographical approach to food and diet; cultural and environmental factors that influence dietary practices; food-related landscapes and patterns. GE credit: SciEng or SocSci, Div | SE, SS.

### **122. Ruminant Nutrition and Digestive Physiology (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Sciences 2A, 2B, 2C; Animal Biology 103 or Biological Sciences 103; Animal Science 100 or Neurobiology, Physiology, and Behavior 101 or consent of instructor; Mathematics 16B recommended. Study of nutrient utilization as influenced by the unique aspects of digestion and fermentation in ruminants, both domestic and wild. Laboratories include comparative anatomy, feed evaluation, digestion kinetics using fistulated cows, computer modeling, and microbial exercises. GE credit: SciEng | QL, SE.—S. (S.) Fadel

### **123. Comparative Animal Nutrition (3)**

Lecture—3 hours. Prerequisite: Animal Biology 103 or Biological Sciences 103. Restricted to upper division and graduate level students. Comparative nutrition of animals; including laboratory, companion, zoo, and wild, animals. Digestion and metabolic adaptations required for animal species to consume diverse diets. Relation of nutrition to metabolic adaptations and physiological states, including growth, reproduction, and diseases. GE credit: SciEng | SE.—S. (S.) Klasing

### **123L. Comparative Animal Nutrition Laboratory (1)**

Laboratory—3 hours. Prerequisite: Animal Biology 103 or Biological Sciences 103. Laboratory exercises leading to written reports on establishment of nutritional requirements and formulation of complete diets for laboratory, companion, zoo and wild animals.—S. (S.) Klasing

### **124. Nutrition and Feeding of Finfishes (3)**

Lecture—3 hours. Prerequisite: Animal Biology 103 or Biological Sciences 103. Principles of nutrition and feeding of fishes under commercial situations; implication of fish nutrition to the environment and conservation of endangered species. GE credit: SciEng | QL, SE, SL

### **127. Environmental Stress and Development in Marine Organisms (10)**

Lecture—4 hours; laboratory—12 hours; discussion—2 hours. Prerequisite: Environmental Toxicology 101 or Biological Sciences 102 or 104 or the equivalent; Environmental Toxicology 114A or course 114 recommended. Course taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods. (Same course as Environmental Toxicology 127.) GE credit: SciEng | OL, QL, SE, SL, VL, WE.—Su. (Su.) Cherr

### **129. Journalistic Practicum in Nutrition (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 111AV or 111AY, 111B; a course in written or oral expression or consent of instructor. Critical analysis and discussion of current, controversial issues in nutrition; the use of journalistic techniques to interpret scientific findings for the lay public. Students will be required to write several articles for campus media. Course may be repeated one time for credit. GE credit: SciEng | OL, SE, SL, WE.

### **130. Experiments in Nutrition: Design and Execution (2)**

Laboratory—6 hours. Prerequisite: consent of instructor; course 111AV, 111AY, 111B or 114 recommended. Experiments in current nutritional problems. Experimental design: students choose project and, independently or in groups of two-three, design a protocol, complete the project, and report findings. May be repeated for credit up to six times (three times per instructor) with consent of instructor. GE credit: SciEng | SE.—F, W, S, Su. (F, W, S, Su.)

### **190. Proseminar in Nutrition (1)**

Seminar—1 hour. Prerequisite: course 111AV or 111AY, 111B. Restricted to senior standing. Discussion of human nutrition problems. Each term will involve a different emphasis among experimental, clinical, and dietary problems of community, national and international scope. May be repeated

two times for credit with consent of instructor. GE credit: SciEng | OL, SE, VL – F, W, S. (F, W, S.) Zidenberg-Cherr

### **190C. Nutrition Research Conference (1)**

Discussion—1 hour. Prerequisite: upper division standing in Nutrition or related biological science; consent of instructor. Introduction to research findings and methods in nutrition. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) GE credit: SE, –F, W, S. (F, W, S.)

### **192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: one upper division course in nutrition and consent of instructor. Work experience on or off campus in practical application of nutrition, supervised by a faculty member. (P/NP grading only.)

### **197T. Tutoring in Nutrition (1-2)**

Discussion/laboratory—3 or 6 hours. Prerequisite: Nutrition Science, Clinical Nutrition or related major; consent of instructor. Tutoring of students in nutrition courses, assistance with discussion groups or laboratory sections, weekly conference with instructor in charge of course: written evaluations. May be repeated if tutoring a different course. (P/NP grading only.) –F, W, S. (F, W, S.)

### **198. Directed Group Study (1-5)**

(P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.) GE credit: SE.

## **Graduate**

### **201. Vitamin and Cofactor Metabolism (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: one upper division nutritional biochemistry and physiology course. Review of studies and relationships involving the metabolic functions of vitamins. Comparative nutritional aspects and the metabolism and chemistry of vitamins and vitamin-like compounds.

### **203. Advanced Protein and Amino Acid Nutrition (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: one upper division nutritional biochemistry and physiology course. Nutritional significance of protein and amino acids, including studies of the influence of dietary protein on digestion, absorption, metabolism, resistance to disease, and food intake. Study of dietary requirements and interrelationships among amino acids.

### **204. Mineral Metabolism (2)**

Lecture—2 hours. Prerequisite: upper division nutrition or biochemistry course. Studies of metabolic functions and nutritional interrelationships involving minerals.

### **219A. International Nutrition (3)**

Lecture—3 hours. Prerequisite: graduate standing; undergraduates only admitted with consent of instructor after completion of course 111AV. Epidemiology, etiology, and consequences of undernutrition, with particular focus on the nutritional problems of children and women in low income populations. Offered in alternate years. –(W.) Dewey

### **219B. International Nutrition (3)**

Lecture—3 hours. Prerequisite: course 219A. Intervention programs to prevent or ameliorate nutritional problems in low-income populations. Planning, implementing, and evaluating nutrition intervention programs. Offered in alternate years. –(S.) Dewey

### **230. Experiments in Nutrition: Design and Execution (2)**

Laboratory—6 hours. Prerequisite: consent of instructor; courses 201, 202, 203, 204, or the equivalent recommended. Student selected projects to enhance laboratory skills. Independently, or in groups of two-three students, design a protocol, carry out the project, analyze the results and report the findings. May be repeated for credit up to six times (limit of three times per instructor) with consent of instructor. –F, W, S. (F, W, S.)

### **250. Metabolic Homeostasis (3)**

Lecture—2 hours; discussion—1.5 hours. Prerequisite: passing the Nutrition Graduate Group Preliminary Examination or consent of instructor. Preference given to students with advanced standing in the Nutrition Graduate Group. Regulatory mechanisms of carbohydrate, lipid, and protein homeostasis; mechanisms of metabolic enzyme regulation and of the metabolic hormones; homeostatic mechanisms and interactions; fuel-fuel interactions; nutrition energy balance.

### **251. Nutrition and Immunity (2)**

Lecture/discussion—2 hours. Prerequisite: Pathology, Microbiology, and Immunology 126, Medical Microbiology 107 or the equivalent, Animal Biology 102. Cellular and molecular mechanisms underlying interactions of nutrition and immune function, including modulation of immunocompetence by diet and effects of immune responses on nutritional needs. Lectures and discussion explore implications for resistance to infection, autoimmunity and cancer. Offered in alternate years. –W. Klasing, Erickson, Stephensen

### **252. Nutrition and Development (3)**

Lecture—3 hours. Prerequisite: courses 201, 202, 203, 204. Relationship of nutrition to prenatal and early postnatal development. –W. (W.) Keen, Oteiza

### **253. Control of Energy Balance and Body Weight (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 210A or 210B or consent of instructor. Comprehensive study of the biochemical, nutritional and physiological mechanisms controlling food intake, body composition and energy expenditure. Subject matter will be approached through lectures and discussions where students and staff will critically evaluate the literature.

### **254. Applications of Systems Analysis in Nutrition (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 202, Physiological Sciences 205A-205B or the equivalent. Quantitative aspects of digestion and metabolism; principles of systems analysis. Evolution of models of energy metabolism as applied in current feeding systems. Critical evaluations of mechanistic models used analytically in support of nutritional research.

### **257. Selected Topics in Nutritional and Hormonal Control of Nitrogen Metabolism (2)**

Lecture—2 hours. Prerequisite: courses 201 through 204; Physiological Sciences 205A-205B or the equivalent. Quantitative and qualitative aspects of nitrogen metabolism; critical evaluation of dietary intake, hormones and diet-hormone interactions which affect nitrogen metabolism, including protein synthesis-degradation, amino acid synthesis-catabolism, nitrogen transport-excretion, depending on current literature.

### **258. Field Research Methods in International Nutrition (3)**

Lecture/discussion—3 hours. Prerequisite: graduate standing or consent of instructor. Issues and problems related to implementation of nutrition field research in less-developed countries, including ethics; relationships with local governments, communities, and scientists; data collection techniques and quality assurance; field logistics; research budgets; and other administrative and personal issues. Offered in alternate years. –W. Dewey

### **259. Nutrition and Aging (2)**

Lecture—2 hours. Prerequisite: three of courses 201, 202, 203 and 204. Interaction between nutrition and aging. Topics include physiological/biochemical basis of aging, age-related changes affecting nutritional requirements, nutrition and mortality rate, assessment of nutritional status in the elderly, and relationship between developmental nutrition and the rate of aging.

### **260. Nutrition During Pregnancy (6)**

Lecture—5 hours; term paper. Prerequisite: acceptance into the Master's Degree program of Advanced Studies in Maternal and Child Nutrition. Overview of the anatomical, physiological and biochemical changes that occur during pregnancy and early development. Discussion and evaluation of nutritional/lifestyle factors associated with pregnancy outcomes and nutrition programs/interventions for pregnant women. –F. (F.) Heinig

### **261. Lactation and Infant Nutrition (6)**

Lecture—5 hours; discussion—1 hour. Prerequisite: course 260. Restricted to students enrolled in the MAS program; Nutrition graduate students by consent of instructor. Overview of the physiological and biochemical processes underlying human lactation and nutritional needs of both mother and infant. Development of skills in assessment, nutrition counseling, education and support of new mothers and their families. –W. (W.) Heinig

### **262. Child and Adolescent Nutrition (6)**

Lecture—5 hours; discussion—1 hour. Prerequisite: course 261. Restricted to students enrolled in the MAS program; Nutrition graduate students by consent of instructor. Relationships among nutrition, growth, and development during childhood and adolescence. Nutritional assessment for normal and high risk groups; psychological, social, and economic factors contributing to nutritional status. Nutritional needs and interventions for special groups, including obese children/adolescents, athletes, and eating disordered. –S. (S.) Heinig

### **263. Applied Research Methods in Maternal and Child Nutrition (4)**

Lecture—3 hours; term paper. Prerequisite: graduate standing. Restricted to students enrolled in the MAS program; Nutrition graduate students by consent of instructor. Application of epidemiological principles to the study of maternal and child nutrition. Topics include quantitative and qualitative study procedures, including study design, data collection, and related analytical techniques. –(F.) Heinig

### **264A. Current Topics in Maternal and Child Nutrition: Principles of Adult Education (2)**

Seminar—2 hours. Prerequisite: graduate standing. Restricted to students enrolled in the MAS program; Nutrition graduate students by consent of instructor. Current scientific literature related to Maternal and Child Nutrition in adult education settings. Topics include methods and theories of adult education and critical thinking skills related to research evaluation. Offered in alternate years. –(W.) Heinig

### **264B. Current Topics in Maternal and Child Nutrition: Epidemiology and Evidence-Based Practice (2)**

Seminar—2 hours. Prerequisite: graduate standing. Restricted to students enrolled in the MAS program; Nutrition graduate students by consent of instructor. Current scientific literature related to Maternal and Child Nutrition. Topics include epidemiology, evidence-based practice, breast feeding promotion, and nutritional assessment of populations. Offered in alternate years. –(W.) Heinig

### **264C. Current Topics in Maternal and Child Nutrition: Public Policy Development and Implementation (2)**

Seminar—2 hours. Prerequisite: graduate standing. Restricted to students enrolled in the MAS program; Nutrition graduate students by consent of instructor. Current scientific literature related to Maternal and Child Nutrition. Topics include nutrition surveillance and monitoring, as well as public policy development and implementation. Offered in alternate years. –(S.) Heinig

### **270. Scientific Ethics in Biomedical Studies: Emphasis on Nutrition (3)**

Lecture—1 hour; discussion—1 hour; term paper. Restricted to graduate standing or consent of instructor. Scientific ethics in biomedical studies, especially nutrition. Discussion and case study presentations on scientific integrity, fraud, misconduct, conflict of interest.

est, human and animal research protections. Not open for credit to students who have completed course 492B.—Steinberg

### **290. Beginning Nutrition Seminar (2)**

Lecture/discussion—1 hour; seminar—1 hour. Prerequisite: first year graduate standing. Discussion and critical evaluation of topics in nutrition with emphasis on literature review and evaluation in this field. Students give oral presentations on relevant topics.—F. (F.)

### **290C. Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Major professors lead research discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion style. (S/U grading only.)—F. (F.)

### **291. Advanced Nutrition Seminar (1)**

Seminar—1 hour. Prerequisite: second-year graduate standing. Advanced topics in nutrition research. Multiple sections may be taken concurrently for credit. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **293A. Current Topics in Obesity, Food Intake and Energy Balance (3)**

Lecture—1 hour; seminar—1 hour; discussion—1 hour. Prerequisite: graduate standing or course 129. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. Current research and its evaluation. Principles of experimental design and scientific background for given article. Articles summarized for posting on Internet for use by healthcare professionals. May be repeated for credit with consent of instructor.

### **293B. Current Topics in Obesity, Food Intake, and Energy Balance with Special Topics (3)**

Lecture—1 hour; seminar—1 hour; discussion—1 hour. Prerequisite: graduate standing or course 129. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. A continuation of course 293A, with additional special topics. May be repeated for credit up to 3 times with consent of instructor.

### **294A. Current Topics in Developmental Nutrition (2)**

Seminar—2 hours. Prerequisite: course 114 or 252 or consent of instructor. Restricted to graduate standing or consent of instructor. Effects of nutrition on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit when topic differs.—F. (F.)

### **297T. Supervised Teaching in Nutrition (1-3)**

Teaching under faculty supervision—3-9 hours. Prerequisite: graduate standing in nutrition or consent of instructor. Practical experience in teaching nutrition at the university level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work. (S/U grading only.)—F, W, S. (F, W, S.)

### **298. Group Study (1-5)**

F, W, S. (F, W, S.)

### **299. Research (1-12)**

(S/U grading only.)—F, W, S. (F, W, S.)

## **Professional**

### **492A. Professionalism: An Academic Perspective (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing. For graduate students in their initial quarter of residence. Professionalism topics are presented and examples drawn from both the biological and social sciences.

### **492C. Grant Writing (3)**

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: graduate standing in Nutrition or consent of instructor. Preparation of grants for governmental agencies (particularly NIH and USDA) and private foundations. Students will write a research grant or

fellowship application. May be repeated one time for credit with consent of instructor. Offered in alternate years.

## **Nutritional Biology (A Graduate Group)**

Carolyn Slupsky, Ph.D., Chairperson of the Group

**Graduate Group Office.** 1249 Meyer Hall

### **Faculty**

Lindsay H. Allen, Ph.D., RD, Professor (*Nutrition*)  
Lars Berglund, Ph.D., Professor (*Endocrinology*)  
Kenneth H. Brown, M.D., Professor (*Nutrition*)  
C. Christopher Calvert, Ph.D., Professor (*Animal Science*)  
Edward J. DePeters, Ph.D., Professor (*Animal Science*)  
Kathryn G. Dewey, Ph.D., Professor (*Nutrition*)  
Kent L. Erickson, Ph.D., Professor (*Cell Biology and Human Anatomy*)  
James G. Fadel, Ph.D., Professor (*Animal Science*)  
Andrea J. Faseltti, D.V.M, Ph.D., Associate Professor (*Molecular Biosciences*)  
Nilesh W. Gaikwad, Ph.D., Associate Professor (*Nutrition, Environmental Toxicology*)  
J. Bruce German, Ph.D., Professor (*Food Science and Technology*)  
M. Eric Gershwin, M.D., Professor (*Internal Medicine*)  
Ralph Green, M.D., Professor (*Pathology*)  
Ian J. Griffin, M.D., Associate Professor (*Pediatrics*)  
Jean-Xavier Guinard, Ph.D., Professor (*Food Science and Technology*)  
Robert M. Hackman, Ph.D., Research Nutritionist (*Nutrition*)  
Fawaz G. Haj, Ph.D., Assistant Professor (*Nutrition*)  
Peter J. Havel, Ph.D., Professor (*School of Veterinary Medicine*)  
Liping Huang, Ph.D., Adjunct Professor (*USDA, WHNRC*)  
Daniel Hwang, Ph.D., Adjunct Professor (*USDA, WHNRC*)  
Lucia Kaiser, Ph.D., Professor (*Nutrition*)  
Sidika E. Kasim-Karakas, M.D., Professor (*Internal Medicine*)  
George A. Kaysen, M.D., Ph.D., Professor (*Internal Medicine*)  
Carl L. Keen, Ph.D., Distinguished Professor (*Nutrition, Internal Medicine*)  
Nancy L. Keim, Ph.D., Associate Adjunct Professor (*USDA, WHNRC*)  
Darshan S. Kelley, Ph.D., Adjunct Professor (*Nutrition*)  
Janet C. King, Ph.D., R.D. Professor (*Nutrition*)  
Kirk C. Klasing, Ph.D., Professor (*Animal Science*)  
Jennifer A. Larsen, Ph.D., Assistant Professor of Clinical Nutrition (*Molecular Biosciences*)  
Kevin D. Laugero, Ph.D., Assistant Adjunct Professor (*USDA, WHNRC*)  
Bo L. Lönnadal, Ph.D., Professor (*Nutrition, Internal Medicine*)  
Stanley L. Marks, B.V.Sc., Ph.D., Associate Professor (*Medicine and Epidemiology*)  
Valentina Medici, M.D., Assistant Professor (*Internal Medicine*)  
John W. Newman, Ph.D., Associate Professor (*Nutrition*)  
James W. Oltjen, Ph.D., Professor (*Animal Science*)  
Patricia Oteiza, Ph.D., Professor (*Nutrition, Environmental Toxicology*)  
Anthony F. Philippi, M.D., Professor (*Pediatrics*)  
Jon J. Ramsey, Ph.D., Associate Professor (*Molecular Biosciences*)  
Helen E. Raybould, Ph.D., Professor (*Anatomy, Physiology and Cell Biology*)  
Heidi A. Rossow, Ph.D., Associate Professor (*School of Veterinary Medicine*)  
John C. Rutledge, Ph.D., Professor (*Endocrinology*)  
Karen Ryan, Ph.D., Assistant Professor (*Neurobiology*)

Carolyn M. Slupsky, Ph.D., Professor (*Nutrition/Food Science*)

Charles Stebbins, Ph.D., Professor (*Cardiovascular Medicine*)  
Francene M. Steinberg, Ph.D., R.D., Professor (*Nutrition*)

Charles B. Stephensen, Ph.D., Adjunct Professor (*USDA, WHNRC*)  
Christine P. Stewart, Ph.D., Assistant Professor (*Nutrition*)  
Amer Y. Taha, Ph.D., Assistant Professor (*Food Science*)

Natalie Torok, Ph.D., Associate Professor (*Gastroenterology & Hepatology*)  
Marta Van Loan, Ph.D., Adjunct Professor (*Nutrition/USDA, WHNRC*)

Craig H. Warden, Ph.D., Associate Professor (*Neurobiology, Physiology, and Behavior*)  
Carl K. Winter, Ph.D. (*Extension Food Toxicologist*)

Heather M. Young, R.N., Ph.D., M.S.N., Associate Vice Chancellor and Dean (*Betty Irene Moore School of Nursing*)  
Sheri A. Zidenberg-Cherr, Ph.D., Professor (*Nutrition*)  
Angela M. Zivkovic, Ph.D., Assistant Professor (*Nutrition*)  
Susan Zunino, Ph.D., Adjunct Associate Professor (*Nutrition*)

### **Emeriti Faculty**

Betty Burri, Ph.D., Associate Adjunct Professor (*Nutrition*)  
Andrew Clifford, Ph.D., Distinguished Professor Emeritus (*Nutrition*)

Harry W. Colvin, Jr., Ph.D., Professor Emeritus  
Douglas E. Conklin, Ph.D., Professor Emeritus (*Animal Science*)  
Paul Davis, Ph.D., Research Professor Emeritus (*Animal Science*)

Richard A. Freedland, Ph.D., Professor Emeritus  
William N. Garrett, Ph.D., Professor Emeritus  
Dorothy W. Gietzen, Ph.D., Professor Emeritus  
M.R.C. Greenwood, Ph.D., Distinguished Professor Emerita (*Nutrition*)  
Louis Grivetti, Ph.D., Professor Emeritus

Charles H. Halsted, M.D., Professor Emeritus  
Robert J. Hansen, Ph.D., Professor Emeritus  
Patricia R. Johnson, Ph.D., Emerita (*Nutrition*)  
Amy Block Joy, Ph.D., Specialist in Cooperative Extension  
Jiro J. Kaneko, D.V.M., Ph.D., D.V.Sc. (hc), Professor Emeritus

Janet King, Ph.D., Professor Emeritus  
Verne E. Mendel, Ph.D., Professor Emeritus  
Roy L. Martin, Ph.D., Adjunct Professor (*Nutrition*)  
Judith S. Stern, Sc.D., R.D., Distinguished Professor (*Nutrition, Internal Medicine*)

Vincent A. Ziboh, Ph.D., Professor (*Dermatology, Biological Chemistry*)  
Roger McDonald, Professor Emeritus (*Nutrition*)  
Verne E. Mendel (*Neurobiology/Nutrition*)  
James G. Morris, Ph.D., Professor Emeritus  
Ernesto Pollitt, Ph.D., Professor Emeritus  
Robert B. Rucker, Ph.D., Professor Emeritus (*Nutrition*)

Barbara O. Schneeman, Ph.D., Professor Emeritus  
Howard G. Schutz, Ph.D., Professor Emeritus  
Donal A. Walsh, Ph.D., Professor  
Bruce M. Wolfe, M.D., Professor Emeritus  
Judith S. Stern, Sc.D., R.D., Distinguished Professor (*Nutrition, Internal Medicine*)

**Graduate Study.** The Graduate Group in Nutritional Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. The great diversity of research interests represented by the faculty members allows students to choose from a wide variety of themes: nutritional biochemistry, animal nutrition, nutrition and development, nutrient bioavailability, human/clinical nutrition, nutrition and behavior, nutritional energetics, community nutrition, community health, maternal and child nutrition, nutrition and endocrinology, international nutrition, obe-

sity/body composition, physiology of digestion, nutrition and chronic disease, culture and nutrition, nutrition and gene expression, nutrition and aging, food preferences, nutrition and immunity, diet and exercise, dietary assessment, protein and lipid metabolism, food intake regulation, nutrition education, and more.

**Graduate Advisers.** Consult the Nutritional Biology Graduate Group office.

## Courses in Nutritional Biology (NUB)

### Graduate

#### 210A. Advanced Nutrition I: Nutrition and Metabolism, Macronutrients (5)

Lecture—4 hours; discussion—1 hour. Prerequisite: admission to the Nutritional Biology Graduate Group or consent of instructor. Class size limited to 30 students. Advanced general nutritional concepts. Integrating nutrition with biological systems, population nutrition issues, and research approaches. Advanced concepts on lipid and protein metabolism.—F. (F.) Oteiza

#### 210B. Advanced Nutrition II: Nutrition and Cell Biology, Micronutrients (5)

Lecture—4 hours; discussion—1 hour. Prerequisite: admission to the Nutritional Biology Graduate Group or consent of instructor. Class size limited to 30 students. Effects of nutrients at the cellular level. Principles of cell signaling and signaling modulation by nutrients. Advanced concepts of mineral and vitamin metabolism. Mineral and vitamin deficiencies and associated pathologies.—W. (W.) Haj

#### 210C. Advanced Nutrition III: Nutrition in Health and Disease (5)

Lecture—4 hours; discussion—1 hour. Prerequisite: admission to the Nutritional Biology Graduate Group or consent of instructor. Class size limited to 30 students. Integration of biochemical, physiological, and genetic aspects of nutrition in the context of clinical and epidemiological observations related to health and disease, including obesity and diabetes, cancer, vascular and neurodegenerative diseases, osteoporosis, and birth defects. Review and consideration of governmental.—S. (S.) Slupsky

#### 290C. Research Group Conference (1)

Discussion—1 hour. Prerequisite: graduate standing. Weekly conference on research problems, progress and techniques in animal sciences. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### 298. Directed Group Study (1-5)

Prerequisite: graduate standing in Nutritional Biology Graduate Group, or consent of instructor. May be repeated three times for credit when topics differs and consent of instructor.—F, W, S. (F, W, S.)

#### 299. Research (1-12)

Prerequisite: consent of instructor. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## Nutrition Science

(College of Agricultural and Environmental Sciences)

### Faculty

See the Department of [Nutrition](#), on page 490.

### The Major Program

The study of nutrition encompasses all aspects of the consumption and utilization of food and its constituents. Key areas of study include: the biochemical reactions important to the utilization of nutrients and food constituents; the impact of diet on health and disease; and, nutrition-related policy and public health issues. The nutrition science major includes two options for studying these areas: *nutritional biology* and *nutrition in public health*.

**The Program.** Nutrition as it is taught on the Davis campus is a biological science and requires a complete background in chemistry and biology, along with calculus and physics (nutritional biology option)

or economics (nutrition in public health option). These courses are generally completed during the first two years, and along with biochemistry, must be completed before most nutrition classes can be taken. During their junior and senior years, students in the nutritional biology option take additional course work in biochemistry, physiology, and toxicology. Students in the nutrition in public health option take additional course work in social and health-related sciences.

**Career Alternatives.** Both options are excellent preparation for professional or graduate training in medicine, public health, or other health sciences. The nutritional biology option also provides preparation for technical work in nutrition in the animal, food, and pharmaceutical industries. The nutrition in public health option prepares students for jobs in administrative, teaching, or public health/public service positions.

### B.S. Major Requirements:

UNITS  
**Preparatory Subject Matter.....63-66**

Biological Sciences 2A, 2B & 2C .....	15
Chemistry 2A-2B-2C and 8A-8B, or 118A-118B, or 128A-128B and 129A .....	21-23
Nutrition 10 .....	3
Plant Sciences 120 .....	4
Sociology 46A or Psychology 41 .....	4
The remaining preparatory subject matter is based on which major option you choose.	

*Nutritional Biology option:*

Anthropology 2 or Psychology 1 or Sociology 1 or 3 .....	4-5
Mathematics 16A-16B .....	6
Physics 1A-1B .....	6

*Nutrition in Public Health option:*

Anthropology 2 or Sociology 1 or 3 .....	4-5
Economics 1A-1B .....	8
Psychology 1 .....	4

**Depth Subject Matter .....77-82**

Biological Sciences 101 .....	4
Food Science and Technology 100A and 100B .....	8
Microbiology 102 and 103L .....	5
Neurobiology, Physiology, and Behavior 101, 101L .....	8
Nutrition 111AY, 111B, 112, 116A .....	12
The remaining depth subject matter is based on which major option you chose when completing your preparatory courses.	

*Nutritional Biology option:*

Biological Sciences 102, 103 .....	6
Molecular and Cellular Biology 120L .....	6
Neurobiology, Physiology, and Behavior 114 .....	3
Nutrition 104, 117 .....	10
Nutrition Restricted Electives .....	15-20

Selection of courses must be made in consultation with a faculty adviser prior to or upon reaching the 120 unit level:

Exercise Biology 110; Nutrition 99, 105, 113, 114, 115, 116B, 118, 120AN, 120BN, 122, 123, 124, 127, 130, 190, 192, 199	
---	--

<i>Nutrition in Public Health option:</i>	
Animal Biology 102, 103 .....	10
Exercise Biology 110 .....	3
Nutrition 118 .....	4
Nutrition Restricted Electives .....	15-20

Selection of courses must be made in consultation with a faculty adviser prior to or upon reaching the 120 unit level:

Food Service Management 120, 122; Nutrition 99, 104, 105, 113, 114, 116B, 117, 120AN, 120BN, 129, 130, 190, 192, 199	
--	--

Restricted Electives .....

Choose one of the following areas to complete the restricted elective units in:

#### Agricultural and Health Policy:

Agricultural & Resource Economics 15, 120, Public Health Sciences 175W, or

Political Science 109

### Cultural Diversity & Community Change:

African American and African Studies 100, American Studies 55, Agricultural and Resource Economics 112, Communication 136, Community & Regional Development 2, 152, 176, International Agricultural Development 10, 103, Science and Society 130, or Sociology 181

### Community Health and Education:

Communication 165, Education 110, 120, 153, Psychology 126, 130 or Sociology 154

### Natural and Applied Sciences:

Chicano Studies 140A, Community & Regional Development 20, Environmental Toxicology 101, 128, Exercise Biology 101, 102, 113, 117, Human Development 100A, 100B, 100C, Neurobiology, Physiology & Behavior 132, Philosophy 15, Plant Sciences 151, Science and Society 2, 15, 90C, or 90F

**Total Units for the Degree.....140-148**

**Major Adviser.** Niles Gaikwad

**Advising Center** for the major is located in 3202 Meyer Hall 530-752-2512.

**Dietetics Internship.** To fulfill the academic requirements for an internship in Dietetics, students are strongly advised to declare the Clinical Nutrition major. Within the Nutrition in Public Health option, students should also take: English 3 or University Writing Program 1 and Communication 1. The following courses must also be added (some of which may meet restricted elective requirements): Agricultural and Resource Economics 112; Nutrition 116B, 116AL-BL; Food Service Management 120, 120L, 122. Students intending to apply for admission to a dietetic internship should contact the Advising Center no later than the first quarter of the junior year for information on procedures.

**Graduate Study.** The Department of Nutrition offers programs of study and research leading to the M.S. and Ph.D. degrees in Nutrition. For information on graduate study contact the graduate adviser. See [Graduate Studies](#), on page 120.

## Obstetrics and Gynecology

See [Medicine, School of](#), on page 427.

## Oceanography

(College of Letters and Science)

Oceanography is the study of the earth's oceans, investigating connections between geological, biological, chemical and physical processes in the marine realm, and the interactions between the Earth's ocean/atmosphere system. The interdisciplinary minor in oceanography is for students with backgrounds in any of these fields, as well as those interested in marine policy and conservation. The curriculum reflects the integrative nature of oceanography, with core courses covering the major disciplines in oceanography and elective courses that allow students to cater the minor to their interests. The oceanography minor includes courses taught at the Davis campus and courses offered at Bodega Marine Laboratory.

The minor is sponsored by the Department of Earth and Planetary Sciences in 2119 Earth and Physical Sciences Building.

### Minor Program Requirements:

UNITS
<b>Oceanography.....22-24</b>
Geology 150A/Environmental Science and Policy 150A .....

4

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;

ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience

Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience

Quarter Offered: F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses

Geology 150B/Environmental Science and Policy 150B.....3  
 Geology 150C/Environmental Science and Policy 150C .....4  
 Environmental Science and Policy 152 ....3  
 An electives sequence, with one course from group (a) and one to two additional electives from either groups (a) or (b):.....8-10  
 (a) Geology 116N/Environmental Science and Policy 116N, Atmospheric Science 158, Wildlife, Fish, and Conservation Biology 120, 157, Environmental Toxicology 120, Evolution and Ecology 112, 115;  
 (b) Atmospheric Science 121A, 121B, Geology 108, 109, 152, Evolution and Ecology 106, 114, Environmental Science and Policy 124, Environmental Toxicology 127

**Note.** Courses Geology 150C, Environmental Science and Policy 150C, Environmental Science and Policy 124, 152, Environmental Toxicology 127, and Evolution and Ecology 106 and 114 are taught at Bodega Marine Laboratory.

**Minor Adviser.** T. M. Hill (*Earth and Planetary Sciences*)

## Performance Studies (A Graduate Group)

Joe Dumit, Director

Marian Bilheimer, Graduate Coordinator

**Arts Group Graduate Office.** 216B Art Building; 530-754-6973; [mbilheimer@ucdavis.edu](mailto:mbilheimer@ucdavis.edu)  
<http://performancesstudies.ucdavis.edu/>

**Faculty.** Executive: Maxine Craig (*Women and Gender Studies*), Joseph Dumit (*Science and Technology Studies, Anthropology*), Peter Lichtenfels (*Theatre and Dance*), Halifu Osumare (*African American and African Studies*)

There are over 45 affiliated faculty in departments throughout HARCS and other faculty, all of whom offer courses relevant to the discipline.

**Graduate Study.** The Ph.D. in Performance Studies is a four-year program. In the first two years of study, students develop an understanding of performance by drawing from a range of regular course offerings in the field to identify, explore, and define a field or fields of research. Students are required to complete four core courses out of five in performance studies, and one colloquium course. Each individual program is then built from seminar and/or practice as research courses, as well as independent or group studies, developing one or more of the four strands of the program: Comparative Medias, Embodiments, Cultures/Ecologies, and History/Text. A wide range of affiliated faculty offer courses throughout the HARCS faculty, and Designated Emphases are available in Studies in Performance and Practice, African American and African Studies, Critical Theory, Feminist Theory and Research, Native American Studies, and Writing, Rhetoric and Composition Studies. Students are required to complete a minimum of 60 units before taking the qualifying examination. No more than 12 units may be taken below the graduate level unless specifically approved by the Ph.D. graduate program adviser.

**Main Program Adviser.** Lynette Hunter (*Theatre and Dance*)

**Graduate Advisers.** Emily Albu (*Spanish & Classics*), Susan Avila (*Design*), Seeta Chaganti (*English*), Maxine Craig (*Women and Gender Studies*), Halifu Osumare (*African American and African Studies*), Kriss Ravetto (*Cinema and Technocultural Studies*), Henry Spiller (*Music*), Archana Venkatesan (*Comparative Literature, Religious Studies*), Hegnar Watengaugh (*Art, Art History*)

### Courses in Performance Studies (PFS)

#### Graduate

##### 200. Methods and Materials in Theatre Research (4)

Seminar—3 hours; term paper. Essential research tools in theatre and related fields; bibliographies, primary sources; methods of evaluating and presenting evidence; delineating research areas in the field.—F. (F.)

### 259. Topics in Contemporary Theatre and Performance (4)

Seminar—3 hours; term paper. Special topics designed to study in depth aspects of contemporary performance including performance analysis, cultural and historical context, modes of production, theoretical and political entailments, and issues of spectatorship; e.g., "Brecht and After," "British Theater," "Race and Gender in Performance." May be repeated five times for credit.—F, W, S. (F, W, S.)

### 265A. Performance Studies: Modes of Production (4)

Seminar—3 hours; term paper. Introduction to the literature of performance production in a variety of media: theatre, dance, film, video, computer-based, looking at cultural, aesthetic, rhetorical and political theory. May be repeated three times for credit when topic differs. Offered in alternate years.

### 265B. Performance Studies: Signification and the Body (4)

Seminar—3 hours; term paper. Introduction to analysis of the body in performance, drawing on theoretical models from several fields. May be repeated three times for credit when topic differs. Offered in alternate years.

### 265C. Performance Studies: Performance and Society (4)

Seminar—3 hours; term paper. Introduction to the role of performance (broadly defined), in everyday life, sociopolitical negotiation, identity, social movements, the media, and the state. May be repeated three times for credit when topic differs. Offered in alternate years.

### 265D. Performance Studies: Theory, History, Criticism (4)

Seminar—3 hours; term paper. Introduction to the theory, history and criticism, informing performance studies. May be repeated three times for credit when topic differs. Offered in alternate years.

### 270A. Individually Guided Research in Performance Studies (4)

Discussion—1 hour; independent study; extensive writing. Prerequisite: course 200; one from course 265A, B, C, or D; consent of instructor. Restricted to students in the Graduate Group PhD in Performance Studies. Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus.

### 270B. Individually Guided Research in Performance Studies (4)

Discussion—1 hour; independent study; extensive writing. Prerequisite: course 200; one of courses 265A, B, C, or D; consent of instructor. Restricted to students in the Graduate Group PhD in Performance Studies. Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student's proposed dissertation project, to produce a dissertation prospectus.

### 270C. Individually Guided Research in Performance Studies (4)

Discussion/laboratory—2 hours; fieldwork; term paper. Prerequisite: course 200; one of courses 265A, B, C, or D; consent of instructor. Restricted to students in the Graduate Group PhD in Performance Studies. Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus.

### 290. Colloquia in Performance Studies (4)

Lecture/discussion—2 hours; discussion/laboratory—1 hour; term paper. Prerequisite: registration in Performance Studies Graduate Group and prior to Qualifying Examination. Designed to provide cohort identity and faculty exchange. Opportunity to present papers, hear guest lecturers, and see faculty presentations, gather for organizational and administrative new, exchange of information and make announcements. Course must be taken every year that a Performance Studies graduate is registered, prior to taking the Qualifying Examination. May be repeated four times for credit. Limited to four units per year. (S/U grading only.)—S. (S.)

**298. Group Study (1-5)**

Independent study—1.5 hours. Prerequisite: consent of instructor.—F, W, S. (F, W, S.)

**299. Individual Study (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

**299D. Dissertation Research (1-12)**

Prerequisite: consent of instructor and Advancement to Candidacy. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**Professional****459. Approaches to Theatre and Dance (4)**

Seminar—3 hours; term paper; project. Prerequisite: consent of instructor; advanced graduate students. Work on approaches to theatre, dance, film/video, design and performance, with a focus on methodology and professional development. May be repeated five times for credit. Offered irregularly.

## Pharmacology and Toxicology

See Medical Pharmacology and Toxicology (PHA), on page 443; Molecular Biosciences (VMB), on page 582; and Pharmacology and Toxicology (A Graduate Group), on page 496.

## Pharmacology and Toxicology (A Graduate Group)

Kermit L. Carraway, Chairperson of the Group

**Group Office.** 4117 Meyer Hall (Department of Environmental Toxicology 530-752-4516; <http://ptx.ucdavis.edu/>)

**Faculty.** The more than 90 faculty in the graduate group represent at least 25 academic departments and organized research units within the College of Agricultural and Environmental Sciences, the College of Biological Sciences, the School of Medicine and the School of Veterinary Medicine.

**Graduate Study.** The program, which offers both the M.S. and Ph.D. degree, emphasizes an interdisciplinary approach that combines coursework and experimental training in modern approaches to pharmacological and toxicological problems. Areas of research span fundamental and translational research in a broad spectrum of areas within pharmacology and toxicology, including cardiovascular pharmacology, cancer therapeutics, neuropharmacology, drug discovery and design, neurotoxicology, pulmonary toxicology and environmental toxicology. Students complete core courses in pharmacology and toxicology and carry out research rotations during their first year of study. All Ph.D. students receive financial support. For detailed information on the program, contact the Group office, graduate advisers, or the Group chairperson.

**Graduate Advisers.** K. Carraway (Biochemistry & Molecular Medicine), A. Gelli (Pharmacology), R. Harper (Pulmonary Medicine), P. Henderson (Hematology & Oncology), Mary Horne (Pharmacology), H. Knych (Molecular Biosciences), J.A. Last (Pulmonary Medicine), P. Lein (Molecular Biosciences), L. Miller (Anatomy, Physiology & Cell Biology), K. Pinkerton (Center for Health and Environment), B. Puschner (Molecular Biosciences), H. Wulff (Pharmacology)

## Courses in Pharmacology and Toxicology (PTX)

Additional courses that satisfy the breadth and depth requirements of the program are taught under departments of faculty in the group.

**Graduate****201. Principles of Pharmacology and Toxicology I (5)**

Lecture—5 hours. Prerequisite: Biological Sciences 102 and Neurobiology, Physiology, and Behavior 101. First of three courses presenting fundamental principles of pharmacology and toxicology. Introductory overview of basic concepts in pharmacology/toxicology, followed by in-depth blocks on fate processes of chemicals in the body, fate processes in tissue selective responses, selective toxicity employed therapeutically.—F. (F) Puschner, Knych

**202. Principles of Pharmacology and Toxicology II (4)**

Lecture—4 hours. Prerequisite: course 201. The second of three courses presenting fundamental principles of pharmacology and toxicology. Principles of pharmacodynamics and mechanisms of drug/toxicant actions.—W. (W.) Angelastro, Eiserich

**203. Principles of Pharmacology and Toxicology III (4)**

Lecture—4 hours. Prerequisite: courses 201 and 202. Integrated physiological systems, cardiovascular and nervous systems and how drugs and toxicants act to perturb function.—S. (S.) Berman, Gelli

**215. Electrophysiology Techniques and Applications (3)**

Lecture—1.5 hours; discussion—1.5 hours. Broad scope of topics in electrophysiology techniques and applications. (Same course as Molecular, Cellular and Integrative Physiology 215.) (S/U grading only.)—S. (S.) Chen

**230. Advanced Topics in Pharmacology and Toxicology (1-3)**

Lecture/discussion/seminar—1 hour each (course format can vary at option of instructor). Prerequisite: course 201 and consent of instructor. In-depth coverage of selected topics for graduate students in Pharmacology-Toxicology and related disciplines. Topics determined by instructor in charge for each quarter.—F, W, S. (F, W, S.)

**277. Molecular Mechanisms in Cancer and other Diseases (3)**

Lecture/discussion—2 hours; project. Prerequisite: undergraduate or graduate introductory course in cell biology (such as Biological Sciences 104), and general biochemistry (Molecular & Cellular Biology 121 or 122) required; course 202 recommended. Restricted to graduate standing or consent of instructor. Exploration of cutting edge investigations on the underlying mechanisms of cancer biology, cancer therapy and other diseases. Current medical research in Cancer and other diseases, as it spans the bench to bedside.—S. (S.) Goldkorn

**290. Seminar (1)**

Current topics in pharmacology and toxicology. (S/U grading only.)—F, W, S. (F, W, S.)

**290C. Advanced Research Conference (1)**

Lecture/discussion. Provide credit for participation in and attendance at research conferences. May be repeated three times for credit. (S/U grading only.)—F, W, S. (F, W, S.) Puschner

**299. Research (1-12)**

(S/U grading only.)

## Philosophy

(College of Letters and Science)

James Griesemer, Ph.D., Chairperson of the Department

**Department Office.** 101 Young Hall  
[philadvising@ucdavis.edu](mailto:philadvising@ucdavis.edu);  
<http://philosophy.ucdavis.edu>

**Faculty**

David Copp, Ph.D., Distinguished Professor  
 Zoe Drayson, Ph.D., Assistant Professor  
 Cody Gilmore, Ph.D., Associate Professor  
 James R. Griesemer, Ph.D., Professor  
 Elaine M. Landry, Ph.D., Professor  
 Hanti Lin, Ph.D., Assistant Professor  
 George J. Matthey II, Ph.D., Senior Lecturer  
 Robert May, Ph.D., Professor  
 Roberta Millstein, Ph.D., Professor  
 Bernard Molyneux, Ph.D., Associate Professor  
 Alyssa Ney, Ph.D., Associate Professor  
 Marina A. L. Oshana, Ph.D., Professor  
 Christina Rulli, Ph.D., Assistant Professor  
 Adam Sennet, Ph.D., Associate Professor  
 Jan Szafir, Ph.D., Professor

**Emeriti Faculty**

William H. Bossart, Ph.D., Professor Emeritus  
 Robert C. Cummins, Ph.D., Professor Emeritus  
 Gerald Dworkin, Ph.D., Distinguished Professor Emeritus  
 Joel I. Friedman, Ph.D., Professor Emeritus  
 Neal W. Gilbert, Ph.D., Professor Emeritus  
 Michael Jubien, Ph.D., Professor Emeritus  
 John F. Malcolm, Ph.D., Professor Emeritus  
 Paul Teller, Ph.D., Professor Emeritus  
 Michael V. Wedin, Ph.D., Professor Emeritus  
 George Wilson, Ph.D., Professor Emeritus

**The Major Program**

Philosophy addresses problems and questions that arise in all areas of human thought and experience and in all disciplines. Recurring questions about the nature of value, the good life, right conduct, knowledge, truth, language, mind, and reality are central to philosophical study. Philosophy also investigates the methodologies and assumptions of the major disciplines in the university in order to deepen our understanding of the sciences, of mathematics, art, literature, and history, and of religion and morality. It leads us to address issues about the nature of these subjects, about the methods of reasoning characteristic of them, and about the contributions they make to our understanding of ourselves and our world.

Philosophy contributes to the liberal education of its students. The department emphasizes an analytic approach to philosophical questions, which trains students to understand and evaluate arguments and to think and write precisely and clearly. These skills are of immense value in a variety of careers.

**The Program.** The Department of Philosophy offers its majors a choice among three options. The General Emphasis provides a broad view of the field of philosophy. It includes a breadth requirement at the lower division level while providing students wide choice in more advanced courses. The Pre-Law and Pre-Med Emphases include courses that provide philosophical perspective on law and medicine respectively and that also provide important preparation for professional school.

The Department offers courses in most areas of contemporary analytic philosophy including the theory of knowledge, metaphysics, logic, ethics, and political philosophy. In addition, upper division courses are offered in moral and political philosophy, and aesthetics, and in the philosophy of religion, of mind, of language, of mathematics, of law, and of the physical, biological and social sciences. The problems of philosophy have important roots in past. The history of philosophy is important not only as part of the heritage of educated persons, but also because it is relevant to contemporary issues. For these reasons, the department places great emphasis

on the history of philosophy, providing courses on the major figures and traditions of western philosophy.

**Career Alternatives.** Students of philosophy learn to understand and evaluate arguments and to think and write precisely and clearly. These analytical skills are assets in any career. Many of our majors have pursued graduate study in philosophy and have become philosophers in their own right. Others have pursued academic careers in related disciplines in the humanities and social sciences. Philosophy majors are well prepared for law, business, or other professional schools and have found careers in computer programming, government service, teaching, the ministry, and social work. Those wishing to attend law school or medical school should consider pursuing the Pre-Law and Pre-Med emphases, respectively.

## A.B. Major Requirements:

### General Emphasis

#### UNITS

#### Preparatory Subject Matter.....16

One course from any three of the following areas.....12

- (a) General Philosophy: Philosophy 1
- (b) Ancient Philosophy: Philosophy 21
- (c) Early Modern Philosophy: Philosophy 22
- (d) Philosophy of Mind: Philosophy 13G
- (e) Ethics: Philosophy 14, 15 or 24
- (f) Philosophy of Science: Philosophy 30, 31, 32 or 38
- (g) Philosophy of Language: Philosophy 17
- (h) Metaphysics: Philosophy 101
- (i) Theory of Knowledge: Philosophy 102

Philosophy 12.....4

#### Depth Subject Matter .....36

Upper division units in Philosophy .....36

Note: Philosophy 101 and 102 may not be counted toward both preparatory and depth subject matter units.

#### Total Units for the Major .....52

### Pre-Law Emphasis

#### UNITS

#### Preparatory Subject Matter.....16

One course from any of the following three:.....4

Philosophy 14, 15, or 16

Philosophy 5.....4

Philosophy 12.....4

Philosophy 24.....4

#### Depth Subject Matter .....36

Any three courses from the following six:.....12

Philosophy 102, 116, 118, 128, 189C, or 189F

Philosophy 112.....4

Philosophy 119.....4

Additional upper division elective units in philosophy .....

16

#### Total Units for the Major .....52

### Pre-Med Emphasis

#### UNITS

#### Preparatory Subject Matter.....16

One course from any of the following four:.....4

Philosophy 24, 30, 31, or 32

Philosophy 12.....4

Philosophy 15.....4

Philosophy 38.....4

#### Depth Subject Matter .....36

One course from any of the following four:.....4

Philosophy 107, 108, 128, 189I

Philosophy 112.....4

Philosophy 121.....4

Additional upper division elective units in philosophy .....

24

### Total Units for the Major .....52

Note: Admission to medical schools requires additional coursework not included in the Pre-Med Emphasis.

**Major Advisers.** G.J. Mattey, M. Oshana  
**Advising Office.** 101 Young Hall

### Minor Program Requirements:

Students wishing to minor in Philosophy may choose a general minor or a minor specializing in logic.

There are no specific courses required for the general minor, so students may create a program to suit their own interests. The range of choice in the logic specialization is limited to the courses listed.

#### UNITS

#### Philosophy—General .....20

Twenty upper division units in philosophy.

Philosophy 12 may be substituted for four of the upper division units.

#### Philosophy—Logic .....20

Philosophy 12 or Mathematics 108.....4

Philosophy 112.....4

Select units from Philosophy 113, 131, 134, 135, 189K.....12

**Minor Advisers.** G.J. Mattey, M. Oshana

**Honors Program.** The department offers an honors program, which gives qualifying majors the opportunity to work closely with faculty and graduate students.

**Courses for Non-Majors.** Students majoring in most disciplines in the university will find courses relevant to their educational or career goals. Philosophy 1 is the introductory course for non-majors. Philosophy 5 teaches critical thinking. The following courses are recommended:

(1) *Pre-law:* 12, 14, 24, 30, 102, 112, 115, 116, 118 and, especially, 119;

(2) *Pre-medical:* 14, 15, 30, 38, 108, 114, 115, 116;

(3) *Business:* 14, 102, 112, 114, 115, 116, 117, 118, 119;

(4) *Social Policy:* 14, 24, 101, 102, 114, 115, 116, 117, 118, 119, 120;

(5) *Social Sciences:* 12, 30, 31, 32, 101, 102, 103, 109, 118, 131;

(6) *Physical Sciences:* 12, 30, 31, 32, 101, 102, 107, 112, 131;

(7) *Biological Sciences:* 30, 31, 32, 38, 101, 102, 108, 120;

(8) *Humanities and the Arts:* 14, 21, 22, 24, 101, 102, 103, 105, 114, 116, 118, 123, 141 through 175;

(9) *Agricultural and Environmental Science and Policy:* 5, 14, 24, 30, 31, 114, 115, 116, 118, 120.

**Department Activities.** The Philosophy department sponsors a lecture series with well-known philosophers who present papers in their fields of expertise. The department also operates ongoing faculty and graduate student workshops. Undergraduate students are welcome to attend and join these discussions. Information can be obtained in the Department office.

**Graduate Study.** The Department of Philosophy offers programs of study leading to the M.A. and Ph.D. degrees. Detailed information may be obtained by writing to the Graduate Adviser.

**Graduate Adviser.** C. Gilmore

### Courses in Philosophy (PHI)

#### Lower Division

##### 1. Introduction to Philosophy (4)

Lecture—3 hours; discussion—1 hour. Problems of philosophy through major writings from various periods.

Problems are drawn from political, aesthetic, religious, metaphysical, and epistemological concerns of philosophy. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

### 5. Critical Reasoning (4)

Lecture—3 hours; discussion—1 hour. Criteria of good reasoning in everyday life and in science. Topics to be covered may include basic principles of deduction and induction; fallacies in reasoning; techniques and aids to reasoning; principles of scientific investigation; aids to clarity. Not open for credit to students who have completed course 6. GE credit: Wrt | WE.

### 7. Philosophical Perspectives on Sexuality (3)

Lecture—3 hours. Philosophical issues related to sexuality, including, but not limited to, ethical and social issues regarding sexual practice, orientation, classification and identity. GE credit: ArtHum | AH. —W. (W.) Sennet

### 7Y. Philosophical Perspectives on Sexuality (3)

Web virtual lecture—1.5 hours; discussion—1 hour. Philosophical issues related to sexuality, including, but not limited to, ethical and social issues regarding sexual practice, orientation, classification and identity. Not open for credit to students who have completed course 7. GE credit: ArtHum | AH, DD. —W. (W.) Sennet

### 10. Introduction to Cognitive Science (4)

Lecture/discussion—4 hours. Introduction to the interdisciplinary cognitive scientific approach to the study of mind, drawing concepts and methods from psychology, philosophy, linguistics, artificial intelligence, and other disciplines. GE credit: SciEng | SE, SL. —F. (F.) Molyneux

### 11. Asian Philosophy (4)

Lecture—3 hours; discussion—1 hour. Survey of the main philosophical systems of south and east Asia: Hinduism, Buddhism, Confucianism, and Taoism. Topics include the nature of reality, including God, the universe and the human self, human knowledge, and the proper conduct of human life. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE. —F. Mattey

### 12. Introduction to Symbolic Logic (4)

Lecture—3 hours; discussion—1 hour. Syntax and semantics of the symbolic language sentence logic. Syntax and semantics of the symbolic language sentence logic. Symbols of sentence logic. Translation between sentence logic and English. Truth table interpretation of sentence logic. Proof techniques. Application of truth tables and proof techniques to arguments in English. Not open for credit to students who have taken course 112, 113, 134, or 135 and passed with a grade of C or better. GE credit: AH. —F, Su. (F, Su.) Antonelli, Gilmore, Landry, Mattey

### 13. Minds, Brains, and Computers (3)

Lecture—3 hours. Computational theories of the nature of the mind. The mind as a computer process. The possibility of machine intelligence, consciousness, and mentality. Not open for credit for students who have completed course 13G for four units. GE credit: SciEng or SocSci | SE or SS, SL. —S. (S.) Molyneux

### 13G. Minds, Brains, and Computers with Discussion (4)

Lecture—3 hours; discussion—1 hour. Computational theories of the nature of the mind. The mind as a computer process. The possibility of machine intelligence, consciousness, and mentality. Not open for credit for students who have completed course 13. GE credit: ArtHum or SciEng | AH or SE, SL, WE. —S. (S.) Molyneux

### 14. Ethical and Social Problems in Contemporary Society (4)

Lecture—3 hours; discussion—1 hour. Philosophical issues and positions involved in contemporary moral and social problems. Possible topics include civil disobedience and revolution, racial and sex discrimination, environment, population control, technology and human values, sexual morality, freedom in society. GE credit: ArtHum, Div, Wrt | AH, WE.

**15. Introduction to Bioethics (4)**

Lecture—3 hours; discussion—1 hour. Critical analysis of normative issues raised by contemporary medicine and biology. Possible topics include euthanasia, abortion, reproductive technologies, genetic engineering, practitioner/patient relationships, allocation of medical resources, experimentation on human subjects. GE credit: ArtHum, Wrt | AH, WE.—Rulli

**16. Philosophical Foundations of American Democracy (4)**

Lecture—3 hours; discussion—1 hour. The philosophical underpinnings of democratic government and the tension between the goals of providing security and of preserving democracy and civil liberties. Illustration of the tension through focus on issues related to war and terrorism. GE credit: ACGH, AH, WE.—F. Copp

**17. Language, Thought, and World (4)**

Lecture—3 hours; discussion—1 hour. Puzzles in the philosophy of language, such as what language is, how language conveys thoughts, whether we each speak our own private language, and what we can learn about the world by studying language. GE credit: SocSci, Wrt | SS, WE.—May

**21. History of Philosophy: Ancient (4)**

Lecture—3 hours; discussion—1 hour. Survey of Greek philosophy with special attention to the Pre-Socratics, Plato, and Aristotle. GE credit: ArtHum, Wrt | WE.—Szaif

**22. History of Philosophy: Early Modern (4)**

Lecture—3 hours; discussion—1 hour. Survey of major figures in philosophy of the seventeenth and eighteenth centuries, with emphasis on Descartes, Hume, and Kant. GE credit: ArtHum, Wrt | WC.—W. (W.) Matthey

**24. Introduction to Ethics (4)**

Lecture—3 hours; discussion—1 hour. Reading of historical and contemporary philosophical works in ethics. Topics include the nature of morality, the justification of moral claims, and major ethical theories, such as consequentialist, deontological, and virtue theories. GE credit: ArtHum, Wrt | AH, WE.—S. (S.) Matthey, Oshana

**30. Introduction to Philosophy of Science (4)**

Lecture—3 hours; discussion—1 hour. Basic problems in the philosophy of science, common to the physical, biological, and social sciences. Analysis of explanation, confirmation theory, observational and theoretical terms, the nature of theories, operationalism and behaviorism, realism, reduction. Not open for credit to students who have taken course 104. GE credit: ArtHum or SciEng, Wrt | AH or SE, SL, WE.—Landry, Millstein

**31. Appraising Scientific Reasoning (4)**

Lecture—3 hours; discussion—1 hour. Introduction to scientific hypotheses and the kinds of reasoning used to justify such hypotheses. Emphasis on adequate justification, criteria, and strategies for distinguishing scientific from pseudoscientific theories. Concrete historical and contemporary cases. GE credit: ArtHum or SciEng | AH or SE, SL, WE.—Griesemer

**32. Understanding Scientific Change (4)**

Lecture—3 hours; discussion—1 hour. Concepts of scientific change in historical and philosophical perspective. Survey of models of growth of knowledge, 17th century to present. Relationship between logic of theories and theory choice. Kuhn's revolution model. Examples from various sciences. GE credit: ArtHum or SciEng, Wrt | AH or SE, WE.—Griesemer

**38. Introduction to Philosophy of Biology (4)**

Lecture—3 hours; discussion—1 hour. Non-technical introduction to philosophical, social, and scientific ideas, methods and technologies in contemporary biological fields such as evolution, genetics, molecular biology, ecology, behavior. Philosophical consideration of determinism, reductionism, explanation, theory, modeling, observation,

experimentation. Evaluation of scientific explanations of human nature. GE credit: ArtHum, Wrt | AH or SE, SL, WE.—Griesemer, Millstein

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division**

(Certain upper division courses may not be offered every year.)

**101. Metaphysics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy recommended. Theories of being. Such topics as reality, substance, universals, space, time, causality, becoming, body, experience, persons, freedom, and determinism. Views of the nature and method of metaphysics. Anti-metaphysical arguments. GE credit: ArtHum, Wrt | AH, WE.—Gilmore

**102. Theory of Knowledge (4)**

Lecture—3 hours; extensive writing; discussion. Prerequisite: one course in philosophy recommended. Analysis of the concept of knowledge. The relation between knowledge, belief and truth. Development of foundationalist, coherentist and externalist theories of justified belief. Examination of skepticism. GE credit: ArtHum, Wrt | AH, WE.—F. (F.) Matthey

**103. Philosophy of Mind (4)**

Lecture/discussion—3 hours; term paper. The relation between mind and body, our knowledge of other minds, and the explanation of mental acts. Discussion of such concepts as action, intention, and causation. GE credit: ArtHum, Wrt | AH, WE.—Molyneux

**104. The Evolution of Mind (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one previous course in Philosophy recommended. The interpretation of human thought and behavior through the lens of evolutionary theory. Topics include the nature/nurture debate concerning cognitive and other mental capacities and traits, and the interaction between evolution, learning and development. GE credit: SocSci | SS, WE.—S. (S.) Matthey

**105. Philosophy of Religion (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy recommended. Logical, metaphysical, epistemological, and existential aspects of selected religious concepts and problems. GE credit: ArtHum, Wrt | AH, WE.—Gilmore, Szaif

**107. Philosophy of the Physical Sciences (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one philosophy course or a science background recommended. Nature of testability and confirmation of scientific hypotheses; nature of scientific laws, theories, explanations, and models. Problems of causality, determinism, induction, and probability; the structure of scientific revolutions. GE credit: ArtHum or SciEng, Wrt | AH or SE, WE.—Landry, Molyneux

**108. Philosophy of the Biological Sciences (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in biology or one course in philosophy recommended. Nature of biological theories, explanations, and models. Problems of evolutionary theory, ecology, genetics, and sociobiology. Science and human values. GE credit: ArtHum or SciEng, Wrt | AH or SE, SL, WE.—Griesemer, Millstein

**109. Philosophy of the Social Sciences (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy or a social science recommended. The nature of the social sciences, their subject matter and methods. Similarities to and differences from natural and life sciences. Predicting and explaining human behavior. Behaviorism. Reduction, holism, and individualism. Related moral issues. The social sciences and philosophy. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.

**111. Philosophy of Space and Time (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one upper division philosophy course recommended. Philosophical problems of space and time. The philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include the nature of geometry, conventionalism, absolutist versus relationist views of space and time, philosophical impact of relativity theory. Offered in alternate years. GE credit: AH, WE.—W. (W.) Gilmore

**112. Intermediate Symbolic Logic (4)**

Lecture/discussion—4 hours. Prerequisite: course 12 or consent of instructor. Predicate logic syntax and semantics. Transcription between predicate logic and English. Proof techniques. Identity, functions, and definite descriptions. Introduction to concepts of metatheory. GE credit: AH.—W. (W.) Landry, Matthey

**113. Metalogic (4)**

Lecture/discussion—4 hours. Prerequisite: course 112, Mathematics 108, or the equivalent. The metalogic of classical propositional and first-order predicate logic. Consistency, soundness and completeness of both propositional and predicate logic. The Löwenheim-Skolem theorem for predicate logic. Undecidability of predicate logic. GE credit: AH.—(S.) Antonelli

**114. History of Ethics (4)**

Lecture/discussion—4 hours. Prerequisite: one previous philosophy course recommended. Study of some classic texts from the history of philosophical writing on central problems of ethics, taking the form either of a survey or concentrated examination of selected historical figures. Readings from such philosophers as Aristotle, Butler, Hume, Kant, Mill. GE credit: ArtHum, Wrt | WC.—Matthey, Oshana

**115. Problems in Normative Ethics (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one previous course in philosophy recommended. Moral philosophy studied through examination of moral problems and the moral principles and common sense intuitions that bear on them. Problems discussed may include: animal rights, fetal rights, euthanasia, justice and health care, war, nuclear deterrence, world hunger, environmental protection. GE credit: ArtHum, Wrt | AH, WE.—S. (S.) Millstein

**116. Ethical Theories (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one course in ethics recommended. Study of fundamental concepts and problems in ethical theory through an examination of classical and contemporary philosophical theories of ethics. Among the theories that may be discussed are utilitarianism, virtue theory, theories of natural rights, Kantian ethical theory, and contractarianism. GE credit: AH, WE.—W. (W.) Copp

**117. Foundations of Ethics (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 114, 115, 116, 101, or 137 recommended. Advanced investigation of questions about the nature and foundations of morality. Among the topics that may be discussed are moral realism and anti-realism, cognitivism and non-cognitivism, types of relativism, moral skepticism, normative language and normative belief. GE credit: AH, WE.—Copp

**118. Political Philosophy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy. Intensive examination of some central concepts of political thought such as the state, sovereignty, rights, obligation, freedom, law, authority, and responsibility. GE credit: SocSci, Div, Wrt | AH, WE.—Oshana

**119. Philosophy of Law (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy or consent of instructor. Philosophical theories of the nature of law, legal obligation, the relation of law and morals. Problems for law involving liberty and justice: freedom of expression, privacy, rights, discrimination and fairness, responsibility, and punishment. GE credit: SocSci, Div, Wrt | AH, WE.—Oshana

**120. Environmental Ethics (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in philosophy recommended. Conceptual and ethical issues concerning the environment. Extension of ethical theory to animals, all life, and ecosystem wholes. Topics may include contemporary environmental issues such as global warming, sustainability and biodiversity. Not open for credit for students who have completed course 115 prior to Fall 2011. GE credit: ArtHum | AH, WE.—Millstein

**121. Bioethics (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 15 recommended. In-depth coverage of topics in bioethics including resource allocation, measures of health and disease/disability, public health, and ethical issues related to research on human subjects and emerging technologies. GE credit: AH, WE.—Rulli

**123. Aesthetics (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy recommended. Nature of art, of artistic creation, of the work of art, and of aesthetic experience; nature and validity of criticism; relations of art to its environment. GE credit: ArtHum, Wrt | AH, WE.

**125. Theory of Action (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: one course in Philosophy recommended. Survey of prominent contemporary approaches to leading problems in action theory. Problems include issues about the nature of intentional action and the conceptual character of explanations of actions in terms of the agent's reasons. GE credit: ArtHum, Wrt | AH, WE.—Oshana

**128. Rationality (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in philosophy recommended. Philosophical issues concerning rationality in its various forms. Focus is on theoretical and practical reasoning and conditions for rational belief, choice, and action. Possible additional topics include rationality and human limitations; paradoxes of rationality; varieties of irrationality; rationality and objectivity. GE credit: AH.—Lin

**129. Knowledge and the A Priori (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in philosophy recommended. Self-evidence, intuition, the (in)fallibility and (in)defeasibility of priori methods. Analytic, formalist and Kantian accounts of how knowledge can be acquired through reasoning and intuition alone, without recourse to empirical methods. Offered in alternate years. GE credit: AH, WE.—S. Molyneux

**131. Philosophy of Logic and Mathematics (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 12 or one course for credit in mathematics. Nature of formal systems and mathematical theories. Selected topics include logical and semantic paradoxes; foundations of mathematics; set theory; type theory, and intuitionistic theory; philosophy of geometry; philosophical implications of Gödel's incompleteness results. GE credit: AH, WE.—Landry

**134. Modal Logic (4)**

Lecture/discussion—4 hours. Prerequisite: course 112 or Mathematics 108 or the equivalent. Survey of the main systems of modal logic, including Lewis systems S4 and S5. "Possible worlds" semantics and formal proofs. Applications to epistemology, ethics, or temporality. GE credit: AH.—Antonelli

**135. Alternative Logics (4)**

Lecture/discussion—4 hours. Prerequisite: course 12, Mathematics 108, or the equivalent. Alternatives to standard truth-functional logic, including many-valued logics, intuitionist logics, relevance logics, and non-monotonic logics. GE credit: AH.—Antonelli

**136. Formal Epistemology (4)**

Lecture/discussion—4 hours. Prerequisite: course 12. Formal (mathematical) approaches to belief revision, knowledge and deduction, meta-knowledge,

(multi-agent) epistemic logic, Bayesian confirmation, Bayes nets, epistemic and probabilistic paradoxes. Offered irregularly. GE credit: AH.—F. Molyneux

**137A. Philosophy of Language: Theory of Reference (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in philosophy or linguistics recommended. Survey of issues and views concerning reference, or how words refer to things. Topics include names and descriptions, the distinction between sense and reference, the puzzle of non-referring terms, causal theories of reference, and possibility and necessity. Only two units of credit for students who have completed course 137. GE credit: AH, WE.—May, Sennet

**137B. Philosophy of Language: Truth and Meaning (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in philosophy or linguistics recommended. Comparative treatment of theories about the relationship between truth and meaning. Topics include: the identification of meaning with truth conditions, the nature of propositions, theories of linguistic understanding, the roles of mind and world in determining meaning. Only two units of credit for students who have completed course 137. GE credit: AH, WE.—May, Sennet

**137C. Philosophy of Language: Semantics and Pragmatics (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in philosophy or linguistics recommended. Philosophical issues and positions concerning the meaning and use of language. Topics include the distinction between meaning and implication, the roles of context and convention in language use, speaker meaning versus linguistic meaning and speech act theory. Only two units of credit for students who have completed course 137. GE credit: AH, WE.—May, Sennet

**141. Socrates and the Socratic Dialogue (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 21 recommended. The philosophy of Socrates as found in the Socratic dialogues of Plato. Topics include the Socratic practice of refutation, its method, epistemological foundation, and moral purpose; Socratic eudaimonism and Socratic virtue theory; the paradoxes of Socratic intellectualism. GE credit: AH, WE.—Szaif

**143. Hellenistic Philosophy (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 21 recommended. Positions and arguments of the major philosophical schools of the Hellenistic period: Stoicism, Epicureanism, and Scepticism. Focus is on ethical, epistemological and metaphysical questions and their interconnectedness. GE credit: AH, WE.—Szaif

**145. Medieval Philosophy (4)**

Lecture/discussion—4 hours. Prerequisite: course 21 recommended. Major philosophers in the medieval Christian, Islamic, and Jewish traditions. Offered in alternate years. GE credit: AH, WC.—Szaif

**151. Nineteenth Century European Philosophy (4)**

Lecture/discussion—4 hours. Prerequisite: course 22 recommended. Survey of the main movements in nineteenth century philosophy on the European continent. Idealism in Schopenhauer and Hegel, dialectical materialism in Marx, irrationalism in Kierkegaard, Nietzsche and Dostoevsky. Offered irregularly. GE credit: ArtHum | AH, WE.—W. (W.) Matthey

**156. Contemporary Analytic Philosophy (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy recommended. Consideration of central issues such as meaning/reference, analytic/synthetic, reductionism, formal and ordinary language, essential properties, ontological commitment, possible world semantics; influential works by philosophers such as Russell, Moore, Wittgenstein, Austin, Carnap, Quine, Putnam, Kripke, van Fraassen. GE credit: AH, WE.

**157. Twentieth Century European Philosophy (4)**

Lecture/discussion—4 hours. Prerequisite: one course in philosophy recommended. Survey of the main movements in twentieth century philosophy on the European continent, including phenomenology, existentialism, post-structuralism and post-modernism. Philosophers covered are Husserl, Heidegger, Sartre, Foucault, Derrida. GE credit: ArtHum | AH, WE.—Matthey

**160. Pre-Socratics (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 21 recommended. Study of the metaphysical views of such pre-Socratic figures as the Milesians, the Pythagoreans, Heraclitus, Parmenides, Empedocles, Anaxagoras, and the atomists. GE credit: AH, WE.—Szaif

**161. Plato (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 21 recommended. Examines Plato's most important contributions in metaphysics, epistemology, psychology, cosmology, ethics and political philosophy. Dialogues will be selected from Plato's middle and later writings. Offered in alternate years. GE credit: AH, WE.—Szaif

**162. Aristotle (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 21 recommended. An overview of Aristotle's most central and influential writings. Topics selected from fields such as metaphysics, physics, ethics, logic, and psychology. GE credit: AH, WE.—Szaif

**168. Descartes (4)**

Lecture/discussion—4 hours. Prerequisite: course 22 recommended. The philosophical writings of René Descartes. Topics include the refutation of skepticism, the nature and existence of mind and body, the existence of God, and the foundations of science. Offered irregularly. GE credit: AH, WE.—Matthey

**170. Spinoza and Leibniz (4)**

Lecture/discussion—4 hours. Prerequisite: course 22 recommended. Seventeenth-century philosophical writings of Spinoza and Leibniz. Topics drawn from both philosophers include: the nature and existence of God, the nature of mind, the relation between mind and body, human freedom, metaphysical monism vs. pluralism. Offered in alternate years. GE credit: ArtHum | AH, WE.—F. Matthey

**172. Locke and Berkeley (4)**

Lecture/discussion—4 hours. Prerequisite: course 22 recommended. Principal metaphysical works of John Locke and George Berkeley. Topics include abstract ideas, existence of matter, primary and secondary qualities, essence, substance, the existence of God, and the nature of scientific knowledge. May be repeated for credit. Offered irregularly. GE credit: AH, WE.—W. (W.) Matthey

**174. Hume (4)**

Lecture/discussion—4 hours. Prerequisite: course 22 recommended. David Hume's *Treatise of Human Nature* and related writings. Topics include empiricism, space, causality, belief, skepticism, the passions, and morality. Offered irregularly. GE credit: AH, WE.—Matthey

**175. Kant (4)**

Lecture/discussion—4 hours. Prerequisite: course 22 recommended. Immanuel Kant's *Critique of Pure Reason* and related writings. Topics include the nature of human cognition, space and time, *a priori* concepts, substance, causality, human freedom, and the existence of God. Offered irregularly. GE credit: AH, WE.—S. (S.) Matthey

**178. Frege (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one upper-division course in philosophy recommended; consent of instructor. Development of Gottlob Frege's views about language and logic. Formulation of his grand mathematical idea known as logicism and how it led to the philosophy of language. GE credit: AH, WE.—May

**189A. Special Topics in Philosophy; History of Philosophy (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic recommended. Special topics in History of Philosophy. May be repeated up to eight units of credit. GE credit: ArtHum | AH, WE.—Mattey, Szafir

**189B. Special Topics in Philosophy (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic recommended. Special topics in Metaphysics. May be repeated up to eight units of credit. GE credit: ArtHum | AH, WE.—W. (W.) Gilmore

**189C. Special Topics in Philosophy; Theory of Knowledge (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic recommended. Special topics in Theory of Knowledge. May be repeated up to eight units of credit. GE credit: WE.—S. (S.) Mattey, Molyneux

**189D. Special Topics in Philosophy; Ethics (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic recommended. Special topics in Ethics. May be repeated up to eight units of credit. GE credit: ArtHum | AH, WE.—Copp, Oshana

**189E. Special Topics in Philosophy; Political Philosophy (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic recommended. Special topics in Political Philosophy. May be repeated up to eight units of credit. GE credit: ArtHum | AH, WE.—Oshana

**189F. Special Topics in Philosophy; Philosophy of Law (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic recommended. Special topics in Philosophy of Law. May be repeated up to eight units of credit. GE credit: ArtHum | AH, WE.—Oshana

**189G. Special Topics in Philosophy; Aesthetics (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic recommended. Aesthetics. May be repeated up to eight units of credit. GE credit: ArtHum | AH, WE.

**189H. Special Topics in Philosophy; Philosophy of Mind (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic recommended. Special topics in Philosophy of Mind. May be repeated up to eight units of credit. GE credit: ArtHum | AH, WE.—Molyneux

**189I. Special Topics in Philosophy; Philosophy of Science (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic recommended. Special topics in Philosophy of Science. May be repeated up to eight units of credit. GE credit: ArtHum or SocSci | AH or SE, WE.—Griesemer, Landry, Millstein

**189J. Special Topics in Philosophy; Philosophy of Language (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic recommended. Special topics in Philosophy of Language. May be repeated up to eight units of credit. GE credit: ArtHum | AH.—May, Sennet

**189K. Special Topics in Philosophy; Logic (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic recommended. Special topics in Logic. May be repeated up to eight units of credit. GE credit: ArtHum | AH.—S. (S.)

**194HA. Honors Research Project (4)**

Tutoring—3 hours; term paper. Prerequisite: consent of instructor; open to students who are members of the honors program in Philosophy. Completion of honors research project under direction of an instruc-

tor. Consult departmental major adviser for list of instructors available in a given quarter.—F, W, S. (F, W, S.)

**194HB. Honors Research Project (4)**

Tutoring—3 hours; term paper. Prerequisite: consent of instructor; open to students who are members of the honors program in Philosophy. Completion of honors research project under direction of an instructor. Consult departmental major adviser for list of instructors available in a given quarter.—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate****200A. Proseminar I (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Open only to students in their first quarter of the Philosophy Ph.D. program. Intensive study of core works in a selected area of philosophy. Intensive experience in philosophical writing, discussion, and presentation of written work.—F. (F.)

**200B. Proseminar II (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Limited enrollment. Open only for students in their first quarter of Philosophy Ph.D. program. Intensive study of core works in a selected area of philosophy. Intensive experience in philosophical writing, discussion, and presentation of written work.—F. (F.)

**201. Metaphysics (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics vary from quarter to quarter and may include the following: What are things? Do names refer to things? If so, how? Do things have essential properties? What is the nature of necessity? May be repeated for credit when topic differs and with consent of instructor.—Gilmore

**202. Theory of Knowledge (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing in philosophy or consent of instructor. Topics vary from quarter to quarter. Sample topics include belief, skepticism, justification, externalism, naturalized epistemology. May be repeated for credit with consent of instructor.—Mattey, Molyneux

**203. Philosophy of Mind (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics in the philosophy of mind such as the mind-body problem, mental representation, consciousness, intentionality. May be repeated for credit with consent of instructor.—Molyneux

**203P. Philosophy of Mind Practicum (4)**

Practicum—12 hours. Prerequisite: consent of instructor. Specific research conducted and prepared for publication by advanced students in a team setting. Topics include knowledge representation and learning in neural networks, the nature and formal properties of mental representation. May be repeated for credit when topic differs and with consent of instructor. (S/U grading only.)

**207. Philosophy of Physics (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing in Philosophy or consent of instructor. Intensive treatment of one (or more) topic(s) in the philosophy of physics, such as foundations of space-time theories, the interpretation of quantum mechanics, or foundations of statistical mechanics. May be repeated for credit when topic differs and with consent of instructor.—Landry

**208. Philosophy of Biology (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Intensive treatment of one (or more) topic(s) in the philosophy of biology, such as foundations of evolutionary theories, reductionism in biology, sociobiology and cul-

tural evolution. May be repeated for credit when topic differs and with consent of instructor.—Griesemer, Millstein

**210. Philosophy of Science (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Treatment of one or more general topics of current interest in philosophy of science. Topics may include scientific explanation, theories of confirmation, scientific realism, reduction in physics and biology. May be repeated for credit when topic differs and with consent of instructor.—Griesemer, Landry, Millstein

**212. Philosophy of Logic and Mathematics (4)**

Seminar—3 hours; term paper. Prerequisite: course 112 or 113 or Mathematics 108 or 125 or the equivalent. Philosophical issues in logic and math. Topics may include nature of logical and mathematical truth or knowledge, correctness of logical systems, foundations of mathematics, metaphysical and epistemological presuppositions, applications to philosophical problems and formalization of philosophical theories. May be repeated for credit when topic differs and with consent of instructor.—Antonelli, Landry

**213. Advanced Logic for Graduate Students (4)**

Lecture/discussion—3 hours; extensive problem solving. Prerequisite: graduate standing in Philosophy. Enrollment in the Philosophy Ph.D. program. Intensive study of advanced logic, including set theory, metatheory of predicate logic, and modal logic. May be repeated two times for credit when topic differs.—F. (F.) Antonelli, Mattey

**214. Ethics (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing in philosophy or consent of instructor. Topics may include morality and motivation, objectivity in ethics, the relationship between the factual and the moral. Topics vary from quarter to quarter. May be repeated for credit when topic differs and with consent of instructor.—Copp, Oshana

**217. Political Philosophy (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Advanced studies in political philosophy. Topics vary but may include distributive justice, enforcement of morality by the state, equality, obligation to obey the law, social contract theory. May be repeated for credit when topic differs and with consent of instructor.—Copp, Oshana

**220. Environmental Ethics (4)**

Lecture—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Intensive treatment of one or more topic(s) in environmental ethics, such as biodiversity, sustainability, composition of the moral community, invasive species, endangered species, applications of ethical theories to contemporary environmental issues.—Millstein

**237. Philosophy of Language (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of philosophical issues raised by language, such as the nature of semantic content, proper semantics for verbs of propositional attitude, feasibility and limitations of formal semantics and pragmatics for natural languages. May be repeated for credit when topic differs and with consent of instructor.—May, Sennet

**238. Philosophy of Language Workshop (4)**

Seminar—3 hours; extensive writing. Open to graduate students only. Discussion of recently published, unpublished and in-progress research in philosophy of language, including work on the relation of language and mind, of language and logic, and linguistic theory. May be repeated for credit when topic differs.—May

**261. Plato (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Advanced seminar designed for analysis of arguments, doctrines, and texts from Plato's works. Methods of argumenta-

tion and interpretation are especially stressed. Topics vary according to instructor. May be repeated for credit with consent of instructor.—Szaif

#### **262. Aristotle (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Advanced seminar designed for analysis of arguments, doctrines, and texts from Aristotle's works. Methods of argumentation and interpretation are especially stressed. Topics vary according to instructor. May be repeated for credit with consent of instructor.—Szaif

#### **275. Kant (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing in philosophy or consent of instructor. Intensive study of a topic in the philosophy of Kant, in such areas as metaphysics, theory of knowledge, ethics. May be repeated for credit with consent of instructor.—Mattey

#### **290. History of Philosophy (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics in the history of philosophy. Topics vary according to instructor from quarter to quarter. May be repeated for credit when topic differs with consent of instructor.—Mattey, Szaif

#### **298. Group Study (1-5)**

#### **299. Research (1-12)**

(S/U grading only.)

#### **Professional**

#### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## **Physical Education**

(College of Letters and Science)

Barbara Jahn, M.S., Program Director

**Program Office.** 264 Hickey Gymnasium  
530-752-1111

#### **Committee in Charge**

Keith Baar, Ph.D.  
(*Neurobiology, Physiology, and Behavior*)

Sue Bodine, Ph.D.  
(*Neurobiology, Physiology, and Behavior*)

Barbara A. Jahn, M.S. (*Physical Education*)  
Susan Kauzlarich, Ph.D. (*Chemistry*)

Academic Senate Distinguished Graduate  
Mentoring Award

Tonya Kuhl, Ph.D. (*Chemical Engineering and  
Materials Science*)

Ronald Manara, M.S. (*Physical Education*)  
Dwayne Shaffer, M.A.  
(*Physical Education/Intercollegiate Athletics*)

Kevin Nosek, M.S., Lecturer/Coach  
Maryclare Robinson, M.S., Lecturer  
Dwayne Shaffer, M.A., Lecturer/Coach  
Sandy Simpson, M.S., Lecturer  
Eric Steidlmayer, J.D., Lecturer/Coach  
Anna Temple, B.A., Lecturer/Coach  
Lisa Varnum, B.S., Athletic Trainer/Lecturer  
Matt Vaughn, M.A., Lecturer/Coach  
Cy Williams, M.A.T., Lecturer/Coach  
Jamey Wright, J.D., Lecturer/Coach  
Karen Yoder, M.A., Lecturer/Coach  
Karen Zufelt, Ph.D., Lecturer

#### **The Program of Study**

The Program in Physical Education facilitates the development and offering of non-major courses related to physical activities and education, fitness and health, athletic training, teacher education, and organized sport. The Program is available as part of a student's general educational experience to enhance and broaden the understanding and experience of physical activity in the maintenance of lifetime health and fitness.

The basic activities series includes Physical Education 1, fitness, lifetime, and sports skills. The PE 1 activity courses are instructional in nature, designed to introduce new skills to beginners or to improve existing skills. Physical Education 6 is offered for students participating in intercollegiate athletics. Additional lower division courses include those in special skill areas, such as life-saving and water safety, health and fitness, and athletic training. Upper division courses include advanced classes in coaching, sociology of sports, and a series of courses that meet the mandated requirements for students pursuing teacher preparation and certification.

**Teaching Credential Subject Representative.**  
Barbara Jahn

**Class and Recreational Use of Facilities.** The incidental fee payable by all students at the time of registration entitles students to the use of the gymnasium, pool, showers, tennis courts, and athletic fields. Fines are imposed for each formal transaction necessitated by failure of the student to comply with the regulations of the program.

#### **Courses in Physical Education (PHE)**

#### **Lower Division**

#### **1. Physical Activities (0.5)**

Laboratory—2 hours. Physical Education Activities classes offered in the following areas: aquatics, personal fitness, martial arts, individual sports, and team sports. These academic classes are instructional rather than recreational and are intended to improve activity specific skills and knowledge. May be repeated, along with course 6, for a combined total of 6 units. Credit limited to 6 units in combination with course 6. (P/NP grading only.)—F, W, S. (F, W, S.)

#### **6. Preparation and Participation in ICA Competition (1)**

Practice—3 hours. Prerequisite: consent of instructor (head coach). Classes offered in all UC Davis inter-collegiate athletic sports and are restricted to student-athletes who are members. May be repeated, along with course 1, for a combined total of 6 units. (P/NP grading only.)—F, W, S. (F, W, S.)

#### **7. Professional Physical Education Activities: Men and Women (1)**

Lecture—1 hour; or laboratory—2 hours. Fundamental skills for: (a) coaching competitive athletics; (b) classroom teaching and coaching, and (c) classroom teaching and officiating. May be repeated for a total of six units.—F, W. (F, W.)

#### **8. Student-Athlete Life Skills (1)**

Lecture—1 hour. Prerequisite: consent of instructor. Open to intercollegiate student-athletes only. For intercollegiate student-athletes. Balancing academic and athletic demands. Academic, psychological, and sociocultural issues which influence success as a college student-athlete. (P/NP grading only.)—F, W. (F, W.)

#### **15. Administration of Intramural Sports (2)**

Lecture—2 hours. Planning and administering intramural sports programs at the high school and college level.

#### **25. Theory of Lifesaving and Water Safety (2)**

Lecture—1 hour; laboratory—2 hours. Prerequisite: sound physical condition, and no physical handicap that would render student unable to perform the required skills and ability to pass preliminary swimming test. Provides the student with the knowledge, organizational procedures, and skill development necessary to provide for water safety and save his/her own life or the life of another in an aquatic emergency. (American Red Cross Advanced Lifesaving Certificate awarded upon successful completion of necessary requirements.)—S. (S.) Jahn

#### **27. Training Course for Water Safety Instructors (2)**

Lecture—1 hour; laboratory—2 hours. Prerequisite: advanced swimming (course 1) or consent of instructor; course 5 and current Advanced Life-Saving Certificate. Theoretical knowledge and practical experience necessary for the organization and teaching of swimming and lifesaving classes. (American Red Cross Water Safety Instructor's Certificate awarded upon successful completion of necessary requirements.)—S. (S.) Jahn

#### **40. Drugs and Society (2)**

Lecture—2 hours; fieldwork—2 hours total; film-viewing—5 hours total. Pharmacology, methods of use, and effects of use of psychoactive and performance-enhancing drugs. Historical overview of drug use. Identification of behavior of "at-risk" and "user" populations. (P/NP grading only.)—W, Su. (W, Su.) Manara, Simpson

#### **44. Principles of Healthful Living (2)**

Lecture—2 hours. Application of scientific and empirical knowledge to personal, family, and community health problems. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.) Adams, Bronzan, Manara, Wright

#### **92. Physical Education Internship (1-5)**

Internship—3-15 hours; written project proposal and evaluation. Prerequisite: consent of instructor; enrollment dependent on availability of intern positions, with priority given to Exercise Biology majors. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated for credit once but no internship units will be counted toward Exercise Biology major. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **97T. Tutoring in Physical Education (1-5)**

Tutorial—1-5 hours. Prerequisite: lower division standing and consent of Program Director. Tutoring of students in lower division physical activity courses. Weekly meetings with instructor in charge of courses. Written reports on methods and materials required. May be repeated one time for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

#### **97TC. Tutoring in the Community (1-5)**

Tutorial—2-15 hours; discussion—1 hour. Prerequisite: lower division standing and consent of Program Director. Tutoring in the community in physical activity related projects under the guidance of the Physical Education faculty. Regular meetings with instructor in charge and written report required. May be repeated one time for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

#### **98. Directed Group Study (1-5)**

Prerequisite: consent of instructor and Program Director. (P/NP grading only.)—F, W, S. (F, W, S.)

**99. Special Study for Undergraduates (1-5)**  
(P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

## Upper Division

### 100. Field Experience in Teaching Physical Education (2)

Lecture—1 hour; fieldwork—4 hours. Prerequisite: upper division standing and appropriate course 1 or 7. Tutoring or teacher's aide in physical education activities, including athletic coaching, in public schools under the guidance of a regular teacher with supervision by a departmental faculty person. May be repeated one time for credit. (P/NP grading only.)—F. (F.)

### 120. Sport in American Society (3)

Lecture—3 hours. Sociological approaches to the study of sport and contemporary American culture, including sport interaction with politics, economics, religion, gender, race, media and ethics. Socialization factors involving youth, scholastic, collegiate, and Olympic sport. (Same course as Exercise Biology 120.) GE credit: SocSci, Div I SS. —F, W, S, Su. (F, W, S, Su.) Adams, Bronzan, Doten, Simpson

### 131. Physical Activity and the Disabled (4)

Lecture—3 hours; laboratory—3 hours. The study of the diverse and complex nature of individuals with disabilities and how they adapt to their disabilities in daily living. Integration of individuals with disabilities into the community, schools, and physical activity and recreational programs. Not open for credit to students who have completed Exercise Biology 131.

### 133. Prevention and Care of Sports Injuries (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Cell Biology and Human Anatomy 101 (may be taken concurrently). Prevention, care, and rehabilitation of injuries incurred by athletes. Laboratory on anatomy, emergency care, physical therapy methods, and taping techniques. Not open for credit to students who have completed Exercise Biology 133.—Su. (Su.)

### 135. Advanced Procedures in Evaluation and Management of Athletic Injuries (3)

Lecture—3 hours. Prerequisite: course 133 or Exercise Biology 133, Cell Biology and Human Anatomy 101, consent of instructor. Advanced study of the evaluation and management of athletic injuries, including mechanism of injury, biomechanics and pathophysiology. Current topics in athletic training. Not open for credit to students who have completed Exercise Biology 135.—Su. (Su.)

### 141. Coaching Principles and Methods (3)

Lecture/discussion—3 hours. Prerequisite: upper-division standing; course 143. Technical, tactical, and strategic aspects of coaching. Methods for organizing and delivering effective information in coaching. Biomechanical basis of motor skills and motor learning principles applied to coaching. Classroom development of coaching skills and outside observations of coaching required.—S. (S.) Bronzan, Jackson, Motekaitis

### 142. Physical Education in the Public Schools (3)

Lecture—3 hours. Analysis and study of the principles and methods basic to teaching physical education at the elementary and secondary levels.

### 143. Coaching Effectiveness (3)

Lecture—3 hours. Prerequisite: upper division standing; 3 units of courses 1 and 6 combined. Synthesis and application of basic components of sport psychology, sport pedagogy, and sport physiology and basic management and administration of athletics in public high schools. (P/NP grading only.)—F. (F.) Bronzan

### 144. Principles of Health Education (2)

Lecture—2 hours. Prerequisite: course 44 and upper division standing or consent of instructor. Principles of teaching health education in the public schools. (P/NP grading only.)—S. (S.)

### 150. Recreation in the Community (3)

Lecture—2 hours; discussion—1 hour; two Saturday field trips—8 hours. The nature and scope of community recreation programs in California emphasizing low income, highly populated areas, and poor rural communities.

### 192. Physical Education Internship (1-12)

Internship—3-36 hours; written project proposal and evaluation. Prerequisite: upper division standing and consent of instructor; enrollment dependent on availability of intern positions, with priority given to Exercise Science majors. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated for a total of 12 units (including course 92) but no internship units will be counted toward Exercise Science major. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.) Adams, Bronzan, Doten, Simpson

### 197T. Tutoring in Physical Education (1-5)

Tutorial—1-5 hours. Prerequisite: consent of chairperson. Tutoring of students in lower division physical activity courses. Written reports on methods and materials required. May be repeated one time for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

### 197TC. Tutoring in the Community (1-5)

Tutorial—2-15 hours; discussion—1 hour. Prerequisite: upper division standing and consent of Department Chairperson. Tutoring in the community in physical education related projects under the guidance of the Physical Education faculty. Regular meetings with instructor in charge and written report required. May be repeated one time for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor and Department Chairperson. (P/NP grading only.)—F, W, S. (F, W, S.)

### 199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

## Professional

### 300. The Elementary Physical Education Program (2)

Lecture—1 hour; laboratory—2 hours. Prerequisite: consent of instructor. Restricted to senior standing or credential student. Introduction to principles, theories, material, and practices of elementary school physical education program.—S. (S.) Bronzan, Jackson, Motekaitis

### 380. Methods of Teaching Physical Education (3)

Lecture—1 hour; laboratory—6 hours. Prerequisite: course 142 and six units of course 7; or consent of instructor. The methods of teaching group and individual activities for grades K-12; program planning, class management, organization, and evaluation. (P/NP grading only.)—W. (W.)

Harry B. Radousky, Ph.D., Adjunct Professor

Ramona Vogt, Ph.D., Adjunct Professor

Tom Weideman, Ph.D., Lecturer

Dina Zhabinskaya, Ph.D., Lecturer

## The Major Program

From the smallest subatomic particles to atoms, molecules, stars, and galaxies, the study of physics is the study of what makes the universe work. Knowledge gained using atomic-scale microscopes and high-energy particle accelerators and nuclear reactors teaches us not only what holds the atomic nucleus together but also how proteins function and why stars shine.

**The Program.** The Department of Physics offers a Bachelor of Arts in Physics and two Bachelor of Science degree programs: in Physics (which also offers an emphasis in Astrophysics), and in Applied Physics. The A.B. degree provides a broad coverage of classical and modern physics while permitting a broader liberal arts education than is possible with the other two programs. The B.S. degree in either Physics or Applied Physics should be followed by the student who plans to enter physics as a profession, and also provides excellent training for a wide variety of technical career options. The B.S. in Applied Physics provides the student with a solid introduction to a particular applied physics specialty. For the student who plans to enter the job market upon completing a B.S. degree, the applied physics orientation would be an asset. Either B.S. program provides a solid foundation in physics for the student interested in graduate work in either pure or applied physics.

**Career Alternatives.** Careers in physics and applied physics include research and development, either in universities, government laboratories, or industry; teaching in high schools, junior colleges, and universities; management and administration in industrial laboratories and in government agencies; and in production and sales in industry. A major in physics also provides a strong base for graduate-level work in such interdisciplinary areas as chemical physics, biophysics and medical physics, geophysics and environmental physics, astrophysics and astronomy, computer science, and materials science.

## Physics

### A.B. Major Requirements:

#### UNITS Preparatory Subject Matter.....41-47

Physics 9A, 9B, 9C, 9D or 9HA, 9HB,  
9HC, 9HD, 9HE ..... 19-25  
Mathematics 21A, 21B, 21C, 21D, 22A,  
22B ..... 22

#### Depth Subject Matter .....35-37

Physics 104A, 105A, 110A, 110B, 112,  
115A, 122A or 122B ..... 28  
At least one course from: 129A, 130A,  
140A, 151, 152, or 153 ..... 4  
Physics 102 (1 unit) waived if 104B  
taken ..... 0-1  
At least one additional fixed-unit upper  
division Physics course excluding 160 ... 3-4

#### Total Units for the Major .....76-84

### B.S. Major Requirements:

#### UNITS Preparatory Subject Matter.....50-56

Physics 9A, 9B, 9C, 9D or 9HA, 9HB,  
9HC, 9HD, 9HE ..... 19-25  
Mathematics 21A, 21B, 21C, 21D,  
22A, 22B ..... 22  
Computer Science Engineering 30 (or  
equivalent programming course) ..... 4  
Chemistry 2A or 2HA (2B-2C or  
2HB-2HC highly recommended) ..... 5

#### Depth Subject Matter .....56-64

Physics 104A, 105A, 105B, 110A,  
110B, 110C, 112, 115A, 115B ..... 36  
Physics 102 (1 unit) or 104B ..... 1-4  
Laboratory Requirement ..... 4-12  
Physics 122A or 122B or 116A, B and C  
Concentration Courses ..... 12  
Two courses from one specialty (General  
Relativity/Astrophysical Applications,  
Condensed Matter, or Nuclear/Particle

Physics) and one course from a different specialty. Lists of courses in each specialty are available from the department

Additional upper division Physics courses excluding 160, for a total of 15 upper division Physics courses of three or more units each. With prior departmental approval, one course from mathematics, engineering, or natural science may be used to meet this requirement. May include only one course from: 194H, 195, 198, 199 ..... 0-9

#### Total Units for the Major .....109-118

## Astrophysics Emphasis

#### UNITS Preparatory Subject Matter.....50-56

Physics 9A, 9B, 9C, 9D or 9HA, 9HB,  
9HC, 9HD, 9HE ..... 19-25  
Mathematics 21A, 21B, 21C, 21D,  
22A, 22B ..... 22  
Computer Science Engineering 30 (or  
equivalent programming course) ..... 4  
Chemistry 2A or 2HA (2B-2C or 2HB-2HC  
highly recommended) ..... 5

#### Depth Subject Matter .....59-65

Physics 104A, 105A, 108, 108L, 110A,  
110B, 112, 115A, 115B ..... 32  
Physics 102 or 104B ..... 1-4  
Laboratory Requirement ..... 4

Physics 122A or 122B or 157

Physics 151, 152, 153, 156 ..... 16  
Two elective courses from: Physics 105B,  
110C, 116A, 129A, 130A, 130B, 150 (only  
with an astrophysics topic and prior  
departmental approval), 154, 155, Geology  
163; may include only one course from:  
Physics 194H, 195, or 199 ..... 6-9

#### Total Units for the Major .....109-121

## Recommended

Computer Science Engineering 40;  
Astronomy 25

## Applied Physics—Atmospheric Physics Concentration

### B.S. Major Requirements:

#### UNITS Preparatory Subject Matter.....50-56

Physics 9A, 9B, 9C, 9D or 9HA, 9HB,  
9HC, 9HD, 9HE ..... 19-25  
Mathematics 21A, 21B, 21C, 21D, 22A,  
22B ..... 22  
Computer Science Engineering 30 (or  
equivalent programming course) ..... 4  
Chemistry 2A or 2HA ..... 5

#### Depth Subject Matter .....61-65

Physics 104A, 105A, 110A, 110B, 112,  
115A, 116A, 116B ..... 32  
Physics 102 (1 unit) or 104B ..... 1-4  
Laboratory Requirement ..... 4  
Physics 116C or 122A or 122B  
Concentration Courses (complete all of the  
following) ..... 20  
Physics 105C; Atmospheric Science 120,  
121A, 121B; Geology 150A  
Additional Electives (choose one from  
following) ..... 4  
Physics 104B or 116C; Geology 116N;  
Atmospheric Science 128; Mathematics  
118A or 118B

#### Total Units for the Major .....111-120

**Program Variance.** Similar courses from other departments may be substituted for courses in the depth subject matter requirements by obtaining prior written permission from the Undergraduate Curriculum Committee Chairperson.

## Applied Physics—Chemical Physics Concentration

### B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter .....60-66

Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC,  
9HD, 9HE ..... 19-25  
Mathematics 21A, 21B, 21C, 21D, 22A,  
22B ..... 22  
Computer Science Engineering 30 (or  
equivalent programming course) ..... 4  
Chemistry 2A, 2B, 2C ..... 15

#### Depth Subject Matter .....47

Physics 102, 104A, 105A, 110A, 110B,  
112, 115A, 116A, 116B ..... 32  
Laboratory Requirement ..... 4  
Physics 122A or 122B or 116C  
Concentration Courses ..... 11  
Physics 115B, 140A; Chemistry 124A

#### Total Units for the Major .....107-113

**Program Variance.** Similar courses from other departments may be substituted for courses in the depth subject matter requirements by obtaining prior written permission from the Undergraduate Curriculum Committee Chairperson.

## Applied Physics—Computational Physics Concentration

### B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter .....49-55

Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC,  
9HD, 9HE ..... 19-25  
Mathematics 21A, 21B, 21C, 21D, 22A,  
22B ..... 22  
Computer Science Engineering 30, 40 ..... 8

#### Depth Subject Matter .....72

Physics 104A, 105A, 110A, 110B, 112,  
115A, 116A, 116B ..... 32  
Concentration Courses ..... 16  
Physics 104B, 116C; Computer Science  
Engineering 60, 122A  
Additional Electives (choose three from the  
following) ..... 24  
Computer Science Engineering 120 or  
122B or 130; Mathematics 128A or 128B  
or 128C; Physics 105C or 115B or 140A

#### Total Units for the Major .....122-127

**Program Variance.** Similar courses from other departments may be substituted for courses in the depth subject matter requirements by obtaining prior written permission from the Undergraduate Curriculum Committee Chairperson.

## Applied Physics—Physical Electronics Concentration

### B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter .....49-55

Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC,  
9HD, 9HE ..... 19-25  
Mathematics 21A, 21B, 21C, 21D, 22A,  
22B ..... 22  
Computer Science Engineering 30 (or  
equivalent programming course) ..... 4  
Engineering 17 ..... 4

#### Depth Subject Matter .....61

Physics 102, 104A, 105A, 110A, 110B,  
112, 115A ..... 28  
Laboratory Requirement ..... 4  
Physics 122A or 122B  
Concentration Courses ..... 13  
Physics 110C, 140A; Electrical and  
Computer Engineering 100  
Additional Concentration Electives (choose  
four from the following) ..... 16  
Electrical and Computer Engineering 110A,  
110B, 140A, 140B, 150A, or 150B

**Total Units for the Major ..... 110-116**

**Program Variance.** Similar courses from other departments may be substituted for courses in the depth subject matter requirements by obtaining prior written permission from the Undergraduate Curriculum Committee Chairperson.

**Applied Physics—Geophysics Concentration****B.S. Major Requirements:**

UNITS

**Preparatory Subject Matter ..... 50-56**

Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC, 9HD, 9HE .....	19-25
Mathematics 21A, 21B, 21C, 21D, 22A, 22B .....	22
Computer Science Engineering 30 (or equivalent programming course) .....	4
Chemistry 2A or 2HA .....	5

**Depth Subject Matter ..... 60-61**

Physics 104A, 105A, 110A, 110B, 112, 115A, 116A, 116B .....	32
Laboratory Requirement .....	4
Physics 122A or 122B or 116C	
Concentration Courses .....	13
Physics 104B; Geology 161, 162 (courses offered in alternating years)	
Additional Electives (choose three from the following) .....	11-12
Physics 105B or 116C or 151; Geology 146 or 163; Atmospheric Science 120 or 121A or 121B	

**Total Units for the Major ..... 110-117**

**Program Variance.** Similar courses from other departments may be substituted for courses in the depth subject matter requirements by obtaining prior written permission from the Undergraduate Curriculum Committee Chairperson.

**Applied Physics—Materials Science Concentration****B.S. Major Requirements:**

UNITS

**Preparatory Subject Matter ..... 50-56**

Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC, 9HD, 9HE .....	19-25
Mathematics 21A, 21B, 21C, 21D, 22A, 22B .....	22
Computer Science Engineering 30 (or equivalent programming course) .....	4
Chemistry 2A or 2HA .....	5

**Depth Subject Matter ..... 57-60**

Physics 102, 104A, 105A, 110A, 110B, 112, 115A, 116A, 116B .....	32
Physics 102 (1 unit) or 104B .....	1-4
Laboratory Requirement .....	4
Physics 122A or 122B or 116C	
Concentration Courses .....	20
Physics 115B, 140A, 140B .....	12
Material Science and Engineering 174, 180 .....	8

**Total Units for the Major ..... 107-116**

**Program Variance.** Similar courses from other departments may be substituted for courses in the depth subject matter requirements by obtaining prior written permission from the Undergraduate Curriculum Committee Chairperson.

**Applied Physics—Physical Oceanography Concentration****B.S. Major Requirements:**

UNITS

**Preparatory Subject Matter ..... 50-56**

Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC, 9HD, 9HE .....	19-25
Mathematics 21A, 21B, 21C, 21D, 22A, 22B .....	22
Computer Science Engineering 30 (or equivalent programming course) .....	4

Chemistry 2A or 2HA .....

**25. Introduction to Modern Astronomy and Astrophysics (4)**

Lecture—3 hours; lecture/discussion—2.5 hours.

Prerequisite: good facility in high school physics and mathematics (algebra and trigonometry). Description and interpretation of astronomical phenomena using the laws of modern physics and observations by modern astronomical instruments. Gravity, relativity, electromagnetic radiation, atomic and nuclear processes in relation to the structure and evolution of stars, galaxies and the universe. Not open to students who have received credit for course 2, 10G, or 10L. GE credit: SciEng | SE, SL, VL.—F. (F.) Fassnacht, Lubin

**Courses in Physics (PHY)**

**Physics 10** is primarily a concept-oriented one-quarter lecture/discussion course requiring relatively little mathematical background.

**Physics 1** is a two-quarter sequence requiring some mathematics (trigonometry). Either 1A alone or both quarters may be taken. The sequence is not intended to satisfy entrance requirements of a year of physics for professional schools, but will satisfy requirements of 3 or 6 units of physics.

**Physics 7** is a one-year (three-quarter) introductory physics course with laboratory intended for students majoring in the biological sciences. It has a calculus prerequisite. If you don't want a full year of introductory physics, you should take one or two quarters of Physics 1 instead. Read the following information carefully if you are using Physics 7 to complete an introductory course you have already begun.

The sequence of material in Physics 7 is different from that in most traditionally taught introductory physics courses. Physics 7B is most like the first quarter or semester of traditionally taught courses which treat classical mechanics. Physics 7C is most like the last quarter or semester which, in traditionally taught courses, treats optics, electricity and magnetism, and modern physics. The content and sequence of Physics 7A is unlike that of most other traditionally taught courses.

If you have completed one introductory quarter or semester of a traditionally taught physics course and want to continue with Physics 7, you should first take (and will receive full credit for) Physics 7A. Then, either skip 7B, but self-study the last three weeks of material, or take 7B and receive reduced credit. Finally, take 7C for full credit.

If you have taken two quarters of a year-long introductory physics course and have not had extensive work in optics, electricity and magnetism, and modern physics, you should take Physics 7C. In no case should you take Physics 7B without first taking Physics 7A. All other situations should be discussed directly with a Physics 7 instructor.

Students not intending to take the entire sequence should instead take Physics 1.

**Physics 9** is a four-quarter sequence using calculus throughout and including laboratory work as an integral component. The course is primarily for students in the physical sciences and engineering.

**Physics 9H** is a five-quarter honors physics sequence, which may be taken instead of Physics 9. It is intended primarily for first-year students with a strong interest in physics and with advanced placement in mathematics to Mathematics 21B. Students who plan to major in physics, and also motivated non-majors, should take Physics 9H instead of Physics 9 if they are ready to begin MAT21B in fall quarter. In course requirements and prerequisites, Physics 9HA-9HE can be substituted for Physics 9A-9D. Students may not switch between the 9H and 9 series beyond 9HA or 9A.

**Lower Division****1A. Principles of Physics (3)**

Lecture—3 hours. Prerequisite: trigonometry or consent of instructor. Mechanics. Introduction to general principles and analytical methods used in physics with emphasis on applications in applied agricul-

tural and biological sciences and in physical education. Not open to students who have received credit for course 7B or 9A. GE credit: SciEng | SE. —F, W. (F, W.)

### **1B. Principles of Physics (3)**

Lecture—3 hours. Prerequisite: course 1A or 9A. Continuation of course 1A. Heat, optics, electricity, modern physics. Not open for credit to students who have received credit for course 7A, 7B, 7C, 9B, 9C, or 9D. GE credit: SciEng | SE. —W. (W.)

### **7A. General Physics (4)**

Lecture—1.5 hours; discussion/laboratory—5 hours. Prerequisite: completion or concurrent enrollment in Mathematics 16B, 17B, or 21B. Introduction to general principles and analytical methods used in physics for students majoring in a biological science. Only two units of credit allowed to students who have completed course 1B or 9B. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **7B. General Physics (4)**

Lecture—1.5 hours; discussion/laboratory—5 hours. Prerequisite: course 7A. Continuation of course 7A. Only two units of credit allowed to students who have completed course 9A, or 1A. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **7C. General Physics (4)**

Lecture—1.5 hours; discussion/laboratory—5 hours. Prerequisite: course 7B. Continuation of course 7B. Only two units of credit allowed to students who have completed course 9C or 5C. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **9A. Classical Physics (5)**

Lecture—3 hours; laboratory—2.5 hours; discussion—1 hour. Prerequisite: Mathematics 21B. Introduction to general principles and analytical methods used in physics for physical science and engineering majors. Classical mechanics. Only 2 units of credit to students who have completed course 1A or 7B. Not open for credit to students who have completed course 9HA. GE credit: SciEng | SE. —F, S. (F, S.)

### **9B. Classical Physics (5)**

Lecture—3 hours; laboratory—2.5 hours; discussion—1 hour. Prerequisite: course 9A, Mathematics 21C, 21D (may be taken concurrently). Continuation of course 9A. Fluid mechanics, thermodynamics, wave phenomena, optics. Only two units of credit for students who have completed course 7A; not open for credit to students who have completed course 9HB, 9HC, or Engineering 105. GE credit: SciEng | SE. —F, W. (F, W.)

### **9C. Classical Physics (5)**

Lecture—3 hours; laboratory—2.5 hours; discussion—1 hour. Prerequisite: course 9B, Mathematics 21D, 22A (may be taken concurrently). Electricity and magnetism including circuits and Maxwell's equations. Only 3 units of credit to students who have completed course 7C. Not open for credit to students who have completed course 9HD. GE credit: SciEng | SE. —F, S. (F, S.)

### **9D. Modern Physics (4)**

Lecture—3 hours; discussion—1.5 hours. Prerequisite: course 9C and Mathematics 22A; Mathematics 22B recommended (may be taken concurrently). Introduction to physics concepts developed since 1900. Special relativity, quantum mechanics, atoms, molecules, condensed matter, nuclear and particle physics. Not open for credit to students who have completed course 9HB, 9HC, or 9HE. GE credit: SciEng | SE. —F, S. (F, S.)

### **9HA. Honors Physics (5)**

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: Mathematics 21B (may be taken concurrently) or consent of instructor. Classical mechanics. Same material as course 9A in greater depth. For students in physical sciences, mathematics, and engineering. Only 2 units of credit to students who have completed course 7B. Not open for credit to students who have completed course 9A. GE credit: SciEng | SE. —F. (F.)

### **9HB. Honors Physics (5)**

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: Physics 9HA or 9A, Mathematics 21C (may be taken concurrently). Special relativity, thermal physics. Continuation of course 9HA. Only 2 units of credit to students who have completed course 7A. Not open for credit to students who have completed course 9B or 9D. GE credit: SciEng | SE. —W. (W.)

### **9HC. Honors Physics (5)**

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 9HB and Mathematics 21D (may be taken concurrently). Waves, sound, optics, quantum physics. Continuation of Physics 9HB. Only 2 units of credit to students who have completed course 7C. Not open for credit to students who have completed course 9B or 9D. GE credit: SciEng | SE. —S. (S.)

### **9HD. Honors Physics (5)**

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 9HC and Mathematics 21D. Electricity and magnetism. Continuation of Physics 9HC. Not open for credit to students who have completed course 9C. GE credit: SciEng | SE. —F. (F.)

### **9HE. Honors Physics (5)**

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 9HD and Mathematics 22B (may be taken concurrently). Application of quantum mechanics. Not open for credit to students who have completed course 9D. GE credit: SciEng | SE. —W. (W.)

### **10. Topics in Physics for Nonscientists (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: high school algebra. Emphasis varies: survey of basic principles or a deeper exploration of some particular branch. Past topics included black holes, space time, and relativity; physics of music; history and philosophy; energy and the environment; and natural phenomena. Check with the Department office for the current emphasis. No units of credit allowed if taken after any other physics course. GE credit: SciEng | SE, Wrt | SE.

### **10C. Physics of California (3)**

Lecture—3 hours. Atmospheric phenomena common in CA, local weather patterns and microclimes. Applications to CA energy, water, and resource management policies. Physics underlying regional sports in CA. Not open for credit to students who have completed any quarter of Physics 9 or 9H, or any upper division physics course. GE credit: SciEng | SE, VL, SL. —F. (F.) Bradac

### **12. Visualization in Science (3)**

Lecture—3 hours. Class size limited to 20-50 students. Production, interpretation, and use of images in physics, astronomy, biology, and chemistry as scientific evidence and for communication of research results. Offered irregularly. GE credit: SciEng | SE, VL. —S. (S.) Terning

### **30. Fractals, Chaos and Complexity (3)**

Lecture/discussion—3 hours. Prerequisite: Mathematics 16A or 21A. Modern ideas about the underlying ideas of fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture. Offered in alternate years. (Same course as Geology 30.) GE credit: SciEng | QL, SE. —W. Rundle

### **49. Supplementary Work in Lower Division Physics (1-3)**

Students with partial credit in lower division physics courses may, with consent of instructor, complete the credit under this heading. May be repeated for credit. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **90X. Lower Division Seminar (2)**

Seminar—2 hours. Prerequisite: lower division standing; consent of instructor. Limited enrollment. Examination of a special topic in Physics through shared readings, discussions, written assignments, or special activities such as laboratory work. May be repeated for credit. GE credit: SciEng | SE.

### **98. Directed Group Study (1-5)**

Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only.) GE credit: SE.

### **99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.

### **Upper Division**

#### **102. Computational Laboratory in Physics (1)**

Laboratory—4 hours. Prerequisite: Mathematics 21D, 22AB; Computer Science Engineering 30; course 9D or 9HD; course 104A concurrently. Introduction to computational physics and to the computational resources in the physics department.

Preparation for brief programming assignments required in other upper division physics classes. Not open to students who have completed course 104B or 105AL. GE credit: S SciEng | E. —F. (F.) Scalettar

#### **104A. Introductory Methods of Mathematical Physics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: courses 9B, 9C, 9D and Mathematics 21D, 22A, and 22B with grade C- or better or consent of instructor. Introduction to the mathematics used in upper-division physics courses, including applications of vector spaces, Fourier analysis, partial differential equations. —F. (F.)

#### **104B. Computational Methods of Mathematical Physics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 104A with grade C- or better and course 105AL or consent of instructor. Introduction to the use of computational techniques to solve the mathematical problems that arise in advanced physics courses, complementing the analytical approaches emphasized in course 104A. GE credit: SciEng | SE. —W. (W.)

#### **104C. Intermediate Methods of Mathematical Physics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 104A with grade C- or better or consent of instructor. Applications of complex analysis, conditional probability, integral transformations and other advanced topics. Offered in alternate years. —S. (S.) Cheng, Kaloper

#### **105A. Analytical Mechanics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: courses 9B, 9C, 9D and Mathematics 21D, 22A, and 22B passed with grade C- or better; or consent of department; course 104A and 105A passed with a grade C- or better or consent of department required for 105B. Principles and applications of Newtonian mechanics; introduction to Lagrange's and Hamilton's equations. GE credit: SciEng | SE. —F. (F.) Svoboda

#### **105B. Analytical Mechanics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: courses 9B, 9C, 9D and Mathematics 21D, 22A, and 22B passed with grade C- or better; or consent of department; course 104A and 105A passed with a grade C- or better or consent of department required for 105B. Principles and applications of Newtonian mechanics; introduction to Lagrange's and Hamilton's equations. GE credit: SciEng | SE. —W. (W.) Conway

#### **105C. Continuum Mechanics (4)**

Lecture—3 hours. Prerequisite: 104A and 105A passed with a grade of C- or better, or consent of department. The continuum hypothesis and limitations, tensors, isotropic constitutive equations, and wave propagation. Applications such as elastic solids, heat flow, aerodynamics, and ocean waves. Offered irregularly. GE credit: SciEng | SE. —S. (S.) Zieve

#### **108. Optics (3)**

Lecture—3 hours. Prerequisite: course 9 or 7 sequence and Mathematics 21 sequence or consent of instructor. The phenomena of diffraction, interference, and polarization of light, with applications to current problems in astrophysics, material science,

and atmospheric science. Study of modern optical instrumentation. Open to non-majors. GE credit: SciEng | SE. —S. Zhu

### **108L. Optics Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 108 concurrently. The laboratory will consist of one major project pursued throughout the quarter, based on modern applications of optical techniques. GE credit: SciEng | SE. —S. (S.) Zhu

### **110A. Electricity and Magnetism (4)**

Lecture—3 hours. Prerequisite: courses 9B, 9C, 9D and Mathematics 21D, 22A, and 22B with grade C- or better, or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves. GE credit: SciEng | SE. —W. (W.) Yu

### **110B. Electricity and Magnetism (4)**

Lecture—3 hours. Prerequisite: courses 110A and 104A with a grade of C- or better or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves. GE credit: SciEng | SE. —S. (S.) Yu

### **110C. Electricity and Magnetism (4)**

Lecture—3 hours. Prerequisite: course 110B with a grade of C- or better, or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves. GE credit: SciEng | SE. —F. (F.) Yu

### **112. Thermodynamics and Statistical Mechanics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A or the equivalent. Introduction to classical and quantum statistical mechanics and their connections with thermodynamics. The theory is developed for the ideal gas model and simple magnetic models and then extended to studies of solids, quantum fluids, and chemical equilibria. GE credit: SciEng | SE. —F. (F.)

### **115A. Foundation of Quantum Mechanics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: courses 104A and 105A passed with a grade of C- or better, or consent of department. Introduction to the methods of quantum mechanics with applications to atomic, molecular, solid state, nuclear and elementary particle physics. Extensive problem solving. GE credit: SciEng | SE. —S. (S.) Carlip, Curro

### **115B. Applications of Quantum Mechanics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A passed with a grade of C- or better, or consent of department. Angular momentum and spin; hydrogen atom and atomic spectra; perturbation theory; scattering theory. GE credit: SciEng | SE. —F. (F.) Curro, Scalettar

### **116A. Electronic Instrumentation (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 9C and Math 22B or consent of instructor. Experimental and theoretical study of important analog electronic circuits. Linear circuits, transmission lines, input impedance, feedback, amplifiers, oscillators, noise. GE credit: SciEng | SE, VL. —F. (F.) Cebra

### **116B. Electronic Instrumentation (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 9C or 9HD or consent of instructor. Continuation of course 116A. Introduction to the use of digital electronics and microcomputers in experimental physics. Nonlinear electronics, integrated circuits, analog-to-digital and digital-to-analog converters, transducers, actuators. GE credit: SciEng | SE. —W. (W.) Tripathi

### **116C. Introduction to Computer-Based Experiments in Physics (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 9D or 9HD, 116B, Mathematics 22B or consent of instructor. Introduction to techniques for making physical measurements using computer-based instrumentation. GE credit: SciEng | SE, WE. —S. (S.) Mulhearn

### **122A. Advanced Laboratory in Condensed Matter Physics (4)**

Laboratory—8 hours. Prerequisite: course 104A, 105A, 110B, 115A and 112 (may be taken concurrently) or consent of the department. Experimental techniques and measurements in solid-state physics. Student performs three to six experiments depending on difficulty. Individual work is stressed. Thorough write-ups of the experiments are required. GE credit: SciEng | SE, WE. —W. (W.) Tyson, Zhu

### **122B. Advanced Laboratory in Particle Physics (4)**

Laboratory—8 hours. Prerequisite: course 104A, 105A, 110B, 115A and 112 (may be taken concurrently) or consent of the department. Experimental techniques and measurements in nuclear and particle physics. Students perform three to six experiments depending on difficulty. Individual work is stressed. Thorough write-ups of the experiments are required. GE credit: SciEng | SE, WE. —W. (W.) Pantic, Tyson, Zhu

### **123. Signals and Noise in Physics (4)**

Lecture—3 hours; project—1 hour. Prerequisite: courses 9A, B, C, D and 104A, or consent of instructor. Techniques of measurement and analysis designed to avoid systematic error and maximize signal/noise ratio. Illustrative examples of optimal filters ranging from condensed matter to cosmology. Not open to students who have completed this course previously as course 198. Offered in alternate years. GE credit: SciEng | SE. —S. Tyson

### **129A. Introduction to Nuclear Physics (4)**

Lecture—3 hours. Prerequisite: course 115A passed with a grade of C- or better or consent of instructor. Survey of basic nuclear properties and concepts requiring introductory knowledge of quantum mechanics: nuclear models and forces, radioactive decay and detecting nuclear radiation and nuclear reaction products, alpha, beta and gamma decay. GE credit: SciEng | SE. —S. (S.) Ferenc

### **129B. Nuclear Physics, Extensions and Applications (4)**

Lecture—3 hours; term paper. Prerequisite: course 129A. Continuation of course 129A. Nuclear reactions, neutrons, fission, fusion accelerators, introduction to meson and particle physics, nuclear astrophysics, and applications of nuclear physics and techniques to mass spectrometry, nuclear medicine, trace element analysis. GE credit: SciEng | SE.

### **130A. Elementary Particle Physics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A passed with a grade of C- or better or consent of instructor. Properties and classification of elementary particles and their interactions. Experimental techniques. Conservation laws and symmetries. Strong, electromagnetic, and weak interactions. Introduction to Feynman calculus. GE credit: SciEng | SE. —W. (W.) Chertok

### **130B. Elementary Particle Physics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A passed with a grade of C- or better or consent of instructor. Properties and classification of elementary particles and their interactions. Experimental techniques. Conservation laws and symmetries. Strong, electromagnetic, and weak interactions. Introduction to Feynman calculus. GE credit: SciEng | SE. —S. (S.) Svboda

### **140A. Introduction to Solid State Physics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A or the equivalent passed with a grade of C- or better or consent of instructor. Survey of fundamental ideas in the physics of solids, with selected device applications. Crystal structure, x-ray and neutron diffraction, phonons, simple metals, energy bands and Fermi surfaces, semiconductors, optical properties, magnetism, superconductivity. GE credit: SciEng | SE. —W. (W.) Fadley, Pickett, Zieve, Zimanyi

### **140B. Introduction to Solid State Physics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A or the equivalent passed with a grade of C- or better or consent of instructor. Survey of fundamental ideas in the physics of solids, with

selected device applications. Crystal structure, x-ray and neutron diffraction, phonons, simple metals, energy bands and Fermi surfaces, semiconductors, optical properties, magnetism, superconductivity. GE credit: SciEng | SE. —S. (S.) Fadley, Pickett, Zieve, Zimanyi

### **150. Special Topics in Physics (4)**

Lecture—3 hours; project. Prerequisite: courses 9A, B, C, D or 9HA, HB, HC, HD, HE or consent of instructor. Topics vary, covering areas of contemporary research in physics. May be repeated for credit. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **151. Stellar Structure and Evolution (4)**

Lecture—3 hours; project. Prerequisite: courses 9A, B, C, D or consent of instructor. The chemical composition, structure, energy sources and evolutionary history of stars, with equal emphasis on both the observational data and theoretical models, including black holes, neutron stars and white dwarfs and the formation of substellar masses. Offered in alternate years. GE credit: SciEng | SE. —(F) Becker, Boeshaar

### **152. Galactic Structure and the Interstellar Medium (4)**

Lecture—3 hours; project. Prerequisite: courses 9A, B, C, D and 105A concurrently or consent of instructor. The structure, contents, and formation of our Milky Way galaxy, viz. its shape and size, the nature of the interstellar medium, stellar populations, rotation curves, mass determination and evidence of dark matter. Offered in alternate years. GE credit: SciEng | SE. —F Boeshaar, Knox

### **153. Extragalactic Astrophysics (4)**

Lecture—3 hours; project. Prerequisite: courses 9A, B, C, D, 104A and 105A or consent of instructor. Structure and evolution of galaxies and clusters of galaxies, including distance and mass determination, galaxy types and environments, active galactic nuclei and quasars, gravitational lensing and dark matter, global cosmological properties. Not open to students who have completed course 127. Offered in alternate years. GE credit: SciEng | SE. —(W.) Fassnacht, Wittman

### **154. Astrophysical Applications of Physics (4)**

Lecture—3 hours; project. Prerequisite: course 105AB, 110A; 110B and 115A concurrently; 112 or consent of instructor. Applications of classical and quantum mechanics, thermodynamics, statistical mechanics, and electricity and magnetism to astrophysical settings such as the Big Bang, degenerate white dwarf and neutron stars, and solar neutrinos. Not open to students who have completed this course previously as course 198. Offered in alternate years. GE credit: SciEng | SE. —(S.) Bradac, Knox

### **155. General Relativity (4)**

Lecture—3 hours; project. Prerequisite: course 104A and 105A; 105B and 110A or consent of instructor. Definition of the mathematical frame work for the description of the gravitational field, introduction of the dynamical equations of Einstein governing its evolution and review of the key solutions, including black holes and expanding universes. Offered in alternate years. GE credit: SciEng | SE. —W. (W.) Kaloper, Wittman

### **156. Introduction to Cosmology (4)**

Lecture—3 hours; project. Prerequisite: courses 9A, B, C, D and 105A concurrently or consent of instructor. Contemporary knowledge regarding the origin of the universe, including the Big Bang and nucleosynthesis, microwave background radiation, formation of cosmic structure, cosmic inflation, cosmic acceleration and dark energy. Offered in alternate years. Not open to students who have completed course 126. GE credit: SciEng | SE. —W. Knox

### **157. Astronomy Instrumentation and Data Analysis Laboratory (4)**

Laboratory—8 hours. Prerequisite: course 104A, 105A, 110A; 115A and 110B may be taken concurrently; consent of instructor. Open to Astrophysics Specialization majors. Experimental techniques, data acquisition and analysis involving laboratory astrophysics plus stellar, nebular and galaxy digital

imaging, photometry and/or spectroscopy. Students perform three experiments. Individual work stressed. Minimum 10-15 page journal style articles of two experiments are required. Offered in alternate years. GE credit: SciEng | SE, WE.—S. (S.) Boeshaar, Tyson

### **160. Environmental Physics and Society (3)**

Lecture—3 hours. Prerequisite: course 9D or 7C; or course 10 or 1B and Mathematics 16B or the equivalent. Impact of humankind on the environment will be discussed from the point of view of the physical sciences. Calculations based on physical principles will be made, and the resulting policy implications will be considered. (Same course as Engineering 160.) GE credit: SciEng or SocSci | SE, SL.—S. (S.) Cox

### **185. Alumni Seminar Series (1)**

Seminar—1 hour. Weekly guest speakers (usually a physics alumnus or alumna) tell students about their careers. Speakers use their experience to give students valuable perspectives on life after a degree in physics. May be repeated two times for credit. (P/NP grading only.) GE credit: SciEng | SE.—S. (S.) Knox

### **190. Careers in Physics (1)**

Seminar—2 hours. Restricted to Physics and Applied Physics majors only. Overview of important research areas in physics, discussions of research opportunities and internships, strategies for graduate school and industrial careers, the fellowship and assistantship selection process, preparation of resumes, personal statements, and letters of recommendation. (P/NP grading only.) GE credit: SE.—F. (F.) F.

### **194HA. Special Study for Honors Students (4)**

Independent study—12 hours. Prerequisite: consent of instructor required. Open only to Physics and Applied Physics majors who satisfy the College of Letters and Science requirements for entrance into the Honors Program. Independent research project at a level significantly beyond that defined by the normal physics curriculum. (Deferred grading only, pending completion of sequence). GE credit: SciEng | SE, F, W, S. (F, W, S.)

### **194HB. Special Study for Honors Students (4)**

Independent study—12 hours. Prerequisite: consent of instructor required. Open only to Physics and Applied Physics majors who satisfy the College of Letters and Science requirements for entrance into the Honors Program. Independent research project at a level significantly beyond that defined by the normal physics curriculum. (Deferred grading only, pending completion of sequence). GE credit: SciEng | SE, F, W, S. (F, W, S.)

### **195. Senior Thesis (5)**

Independent study—15 hours. Prerequisite: consent of instructor required. Open only to Physics and Applied Physics majors with senior standing. Preparation of a senior thesis on a topic selected by the student with approval of the department. May be repeated for a total of 15 units. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

### **197T. Tutoring in Physics and Astronomy (1-5)**

Tutoring of students in lower division courses. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. Weekly meeting with instructor. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

## **Graduate**

### **200A. Theory of Mechanics and Electromagnetics (4)**

Lecture—3 hours; independent study—1 hour. Prerequisite: courses 104B, 105B, and 110C or the equivalent; course 204A concurrently. Theoretical approaches in classical mechanics including the use of generalized coordinates and virtual work; variational calculus; Lagrange equations; symmetries, conservation laws, and Noether theorem; Lagrangian density; Hamilton formalism; canonical transformations; Poisson brackets; and Hamilton-Jacobi equations.—F. (F.) Knox

### **200B. Theory of Mechanics and Electromagnetics (4)**

Lecture—3 hours; independent study—1 hour. Prerequisite: course 200A, and course 204B concurrently. Theoretical approaches in electromagnetics including static electromagnetic fields; Maxwell's equations; plane waves in various media; magnetohydrodynamics; diffraction theory; radiating systems; and special relativity.—W. (W.) Chiang

### **200C. Theory of Mechanics and Electromagnetics (4)**

Lecture—3 hours; independent study—1 hour. Prerequisite: course 200A, and course 204B concurrently. Theoretical approaches in electromagnetics including static electromagnetic fields; Maxwell's equations; plane waves in various media; magnetohydrodynamics; diffraction theory; radiating systems; and special relativity.—S. (S.) Knox, Scalettar

### **204A. Methods of Mathematical Physics (4)**

Lecture—3 hours; independent study—1 hour. Prerequisite: course 104A or the equivalent. Linear vector spaces, operators and their spectral analysis, complete sets of functions, complex variables, functional analysis, Green's functions, calculus of variations, introduction to numerical analysis.—F. (F.) Kaloper, Zieve

### **204B. Methods of Mathematical Physics (4)**

Lecture—3 hours; independent study—1 hour. Prerequisite: courses 104A and 104B or the equivalent. Linear vector spaces, operators and their spectral analysis, complete sets of functions, complex variables, functional analysis, Green's functions, calculus of variations, introduction to numerical analysis.—W. (W.) Kaloper, Zieve

### **210. Computational Physics (3)**

Lecture—3 hours. Prerequisite: knowledge of Fortran or C. Analytic techniques to solve differential equations and eigenvalue problems. Physics content of course will be self-contained, and adjusted according to background of students. Offered irregularly.

### **215A. Quantum Mechanics (4)**

Lecture—3 hours; independent study—1 hour. Prerequisite: course 115B or the equivalent. Formal development and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-state problems; brief introduction to relativistic quantum mechanics and the Dirac equation.—F. (F.) Cheng

### **215B. Quantum Mechanics (4)**

Lecture—3 hours; independent study—1 hour. Prerequisite: course 115B or the equivalent. Formal development and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-state problems; brief introduction to relativistic quantum mechanics and the Dirac equation.—W. (W.) Cheng

### **215C. Quantum Mechanics (4)**

Lecture—3 hours; independent study—1 hour. Prerequisite: course 115B or the equivalent. Formal development and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-state problems; brief introduction to relativistic quantum mechanics and the Dirac equation.—S. (S.) Fong

### **219A. Statistical Mechanics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 215B or the equivalent. Foundations of thermodynamics and classical and quantum statisti-

cal mechanics with simple applications to properties of solids, real gases, nuclear matter, etc. and a brief introduction to phase transitions.—S. (S.) Savrasov

### **219B. Statistical Mechanics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 219A. Further applications of thermodynamics and classical and quantum statistical mechanics. The modern theory of fluctuations about the equilibrium state, phase transitions and critical phenomena.—F. (F.) Singh

### **223A. Group Theoretical Methods of Physics—Condensed Matter (3)**

Lecture—3 hours. Prerequisite: courses 215A, 215B (215C is corequisite) or consent of instructor. Theory of groups and their representations with applications in condensed matter. Offered irregularly.

### **223B. Group Theoretical Methods of Physics—Elementary Particles (3)**

Lecture—3 hours. Prerequisite: courses 215A, 215B (215C is corequisite) or consent of instructor. Theory of groups and their representations with applications in elementary particle physics. Offered irregularly.

### **224A. Nuclear Physics (3)**

Lecture—3 hours. Prerequisite: course 215B. Comprehensive study of the nucleon-nucleon interaction including the deuteron, nucleon-nucleon scattering, polarization, determination of real parameters of S-matrix, and related topics. Offered irregularly.

### **224B. Nuclear Physics (3)**

Lecture—3 hours. Prerequisite: course 224A. Study of nuclear models, including shell model, collective model, unified model. Energy level spectra, static momenta, and electromagnetic transition rates. Offered irregularly.

### **224C. Nuclear Physics (3)**

Lecture—3 hours. Prerequisite: course 224B. Study of nuclear scattering and reactions including the optical model and direct interactions. Beta decay and an introduction to weak interactions. Offered irregularly.

### **229A. Advanced Nuclear Theory (3)**

Lecture—3 hours. Prerequisite: course 224C. Advanced topics in nuclear theory; theory of quantum-mechanical scattering processes. Exact formal theory and models for two-body scattering. Offered irregularly.

### **229B. Advanced Nuclear Theory (3)**

Lecture—3 hours. Prerequisite: course 229A. Advanced topics in nuclear theory; theory of quantum-mechanical scattering processes. Exact formal theory and models for three-body scattering. Offered irregularly.

### **230A. Quantum Theory of Fields (3)**

Lecture—3 hours. Prerequisite: course 215C. Relativistic quantum mechanics of particles; techniques and applications of second quantization; Feynman diagrams; renormalization.—S. (S.) Luty

### **230B. Quantum Theory of Fields (3)**

Lecture—3 hours. Prerequisite: course 230A. Continuation of 230A, with selected advanced topics, such as S-matrix theory, dispersion relations, axiomatic formulations.—F. (F.) Luty

### **230C. Quantum Theory of Fields (3)**

Lecture—3 hours. Prerequisite: course 230A and B, or consent of instructor. Renormalization theory and applications, including dimensional regularization, Ward identities, renormalization group equations, coupling constant unification, and precision electroweak calculations. May be repeated for credit with consent of instructor.—W. (W.) Gunion

### **240A. Condensed Matter Physics A (3)**

Lecture—3 hours. Prerequisite: course 215C, 219A; course 140AB or equivalent recommended. Topics in condensed matter physics: Crystal structure; one-electron theory; transport and optical properties of semiconductors; phonons, electron-phonon scattering.—F. (F.) Pickett

**240B. Condensed Matter Physics B (3)**

Lecture—3 hours. Prerequisite: course 240A. Topics in condensed matter physics: transport and optical properties of metals and quantum structures; experimental measurement the Fermi surface and of phonon spectra.—W. (W.) Pickett

**240C. Condensed Matter Physics (3)**

Lecture—3 hours. Prerequisite: course 240AB. Review of second quantization. Interacting electron gas, electron-phonon interaction and effects, including instabilities of electronic systems. Topics in the theory of superconductivity and magnetism.—S. (S.) Zimanyi

**241. Advanced Topics in Magnetism (3)**

Lecture—3 hours. Prerequisite: courses 240A-240B and 240C-240D, or consent of instructor. Topics chosen from areas of current research interest. Offered irregularly.

**242. Advanced Topics in Superconductivity (3)**

Lecture—3 hours. Prerequisite: courses 240A-240B and 240C-240D, or consent of instructor. Topics chosen from areas of current research interest. Offered irregularly.

**243A. Surface Physics of Materials (3)**

Lecture—3 hours. Prerequisite: courses 140A-140B, 115A-115B or the equivalents; courses 215A, 240A, or the equivalents recommended. Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes. Offered irregularly.

**243B. Surface Physics of Materials (3)**

Lecture—3 hours. Prerequisite: courses 140A-140B, 115A-115B or the equivalents; courses 215A, 240A, or the equivalents recommended. Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes. Offered irregularly.

**243C. Surface Physics of Materials (3)**

Lecture—3 hours. Prerequisite: courses 140A-140B, 115A-115B or the equivalents; courses 215A, 240A, or the equivalents recommended. Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes. Offered irregularly.

**245A. High-Energy Physics (3)**

Lecture—3 hours. Prerequisite: course 230A. Phenomenology and systematics of strong, electromagnetic, and weak interactions of hadrons and leptons; determination of quantum numbers; quarks and quarkonia; deep inelastic scattering; the quark parton model; experiments at hadron colliders and electron-positron colliders.—F. (F.) Chertok

**245B. High-Energy Physics (3)**

Lecture—3 hours. Prerequisite: course 245A. Electroweak interactions; phenomenology of the Standard Model of SU(2) $\times$ U(1); weak interaction experiments; properties of and experiments with W and Z vector bosons; Glashow-Weinberg-Salam model and the Higgs boson; introduction to supersymmetry and other speculations.—W. (W.) Cheng

**245C. Collider Physics (3)**

Lecture—3 hours. Prerequisite: course 245A; course 252B taken previously or concurrently; or consent of instructor. Collider physics. Topics include quark and gluon distribution functions and the computation of cross sections; Large Hadron Collider and International Linear Collider phenomenology; collider and detector characteristics; extracting models from

data; software tools for analyzing experimental data. May be repeated for credit with consent of instructor.—S. (S.) Mulhearn

**246A. Supersymmetry: Theory and Phenomenology (3)**

Lecture—3 hours. Prerequisite: courses 230A-230B, 245A-245B recommended, or consent of instructor. Construction of supersymmetric models of particle physics; superfields; supersymmetry breaking the minimal supersymmetric standard model; supergravity. Collider phenomenology of supersymmetry. Dark matter phenomenology. Offered irregularly.—S. (S.) Terning

**246B. Advanced Supersymmetry (3)**

Lecture—3 hours. Prerequisite: course 246A. Advanced topics in supersymmetry. Topics include holomorphy, the Affleck-Dine-Seiberg superpotential, Seiberg duality for SUSY QCD, dynamical SUSY breaking, Seiberg-Witten theory, superconformal field theories, supergravity, anomaly and gaugino mediation, and the AdS/CFT correspondence. Not offered every year.—S. (S.) Terning

**250. Special Topics in Physics (3)**

Lecture—3 hours. Prerequisite: consent of instructor. Topic varies. May be repeated for credit. Not offered every quarter.—F, W, S. (F, W, S.)

**252A. Techniques of Experimental Physics (3)**

Lecture—3 hours. Introduction to techniques and methods of designing and executing experiments. Problems and examples from condensed matter research will be utilized. Offered irregularly.

**252B. Techniques of Experimental Physics (3)**

Lecture—3 hours. Introduction to techniques and methods of designing and executing experiments. Problems and examples from nuclear and particle research will be utilized.—F. (F.) Erbacher

**252C. Statistics and Data Analysis for Particle Physics (3)**

Lecture—3 hours. Introduction to statistical data analysis methods in particle physics. Theoretical lectures combined with practical computer laboratory work.—W. (W.) Calderon, Conway

**253. Signals and Noise in Physics (3)**

Lecture—3 hours. Techniques for extracting signals from noise, systematic error. Offered irregularly.—W. (W.)

**256. Natural Computation and Self-Organization: The Physics of Information Processing in Complex Systems (3)**

Lecture—3 hours. Prerequisite: course 200A or Mathematics 119A/B or Mathematics 219, course 204A or Mathematics 119A/B or Mathematics 219; course 219A or Mathematics 135A/B or Mathematics 235A. Explores intrinsic unpredictability (deterministic chaos) and the emergence of structure in natural complex systems. Using statistical mechanics, information theory, and computation theory, the course develops a systematic framework for analyzing dynamical and stochastic processes in terms of their causal architecture.—W. (W.) Crutchfield

**260. Introduction to General Relativity (3)**

Lecture—3 hours. Prerequisite: courses 200A, 200B. An introduction to general relativity. Differential geometry and curved spacetime; the Einstein field equations; gravitational fields of stars and black holes; weak fields and gravitational radiation; experimental tests; Big Bang cosmology.—F. (F.)

**262. Early Universe Cosmology (3)**

Lecture—3 hours. Prerequisite: second year standing in Physics graduate program or consent of instructor. Introduction to early universe cosmology: the Big Bang, inflation, primordial nucleosynthesis, dark matter, dark energy, and other topics of current interest.—W. (W.)

**263. Cosmic Structure Formation (3)**

Lecture—3 hours. Prerequisite: course 260. Growth of structure from small density inhomogeneities in the early universe to the diverse structures observable

today. Use of observable properties (cosmic microwave background, gravitational lensing, peculiar velocities, number density, etc.) to constrain models of structure formation and fundamental physics.—S. (S.)

**265. High Energy Astrophysics and Radiative Processes (3)**

Lecture—3 hours. Prerequisite: graduate standing in physics or consent of instructor. Survey course covering galactic and extragalactic X-ray and gamma-ray astronomy, radiative processes, and techniques of high-energy astrophysics. Offered irregularly.

**266. Data Analysis for Astrophysics (3)**

Lecture—3 hours. Prerequisite: graduate standing in physics or consent of instructor. Survey course covering measurement and signal analysis techniques for astrophysics and cosmology throughout the electromagnetic spectrum.—F. (F.)

**267. Observational Extragalactic Astronomy & Cosmology (3)**

Lecture—3 hours. Prerequisite: graduate standing in physics or consent of the instructor. Survey course covering current areas of research on extragalactic objects, their physical properties, origin, evolution, and distribution in space.—W. (W.)

**270. Current Topics in Physics Research (3)**

Lecture/discussion—3 hours. Prerequisite: graduate standing in Physics or consent of instructor. Reading and discussion to help physics graduate students develop and maintain familiarity with the current and past literature in their immediate field of research and related areas. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**280. Seminar in Ethics for Scientists (2)**

Seminar—2 hours. Restricted to 20 students; graduate standing in any department of science or engineering. Studies of topical and historical issues in the ethics of science, possibly including issues such as proper authorship, peer review, fraud, plagiarism, responsible collaboration, and conflict of interest. (Same course as Chemistry 280 and Chemical Engineering and Materials Science 280.) (S/U grading only.)—S. (S.)

**285. Careers in Physics (1)**

Seminar—1.5 hours. Prerequisite: graduate standing in Physics. Designed to give Physics graduate students an in-depth appreciation of career opportunities with a graduate degree in physics. Professional physicists, mainly from outside academia, will give seminars describing both research and career insights. May be repeated for credit. Offered irregularly. (S/U grading only.)—S. (S.) Knox

**290. Seminar in Physics (1)**

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in physics. Topics will vary weekly and will cover a broad spectrum of the active fields of physics research at a level accessible to all physics graduate students. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**291. Seminar in Nuclear Physics (1)**

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in nuclear physics. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**292A. Seminar in Elementary Particle Physics (1)**

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in elementary particle physics. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**292B. High Energy Frontier Initiative And Cosmology Theory Seminar (1)**

Seminar—1 hour. Prerequisite: Physics graduate students. May be repeated five times for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **293. Seminar in Condensed Matter Physics (1)**

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in condensed matter physics. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **294. Seminar in Cosmology (1)**

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in Cosmology. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **295. Introduction to Departmental Research (1)**

Seminar—1 hour. Seminar to introduce first- and second-year physics graduate students to the fields of specialty and research of the Physics staff. (S/U grading only.)—W. (W.)

### **297. Research on the Teaching and Learning of Physics (3)**

Seminar—3 hours. Prerequisite: graduate standing in Physics or consent of instructor. Discussion and analysis of recent research in how students construct understanding of physics and other science concepts and the implications of this research for instruction. Offered irregularly.

### **298. Group Study (1-5)**

Prerequisite: consent of instructor. (S/U grading only.)

### **299. Research (1-12)**

(S/U grading only.)

## **Professional**

### **371. Teaching in an Active-Engagement Physics Discussion/Lab Setting (1)**

Lecture/discussion—1 hour. Prerequisite: course 9D or equivalent; consent of instructor. Open to graduate students only. Analysis of recent research on science/physics teaching and learning and its implications for teaching labs, discussions, and discussion/labs with an emphasis on differences between conventional and active-engagement instructional settings. The appropriate role of the instructor in specific instructional settings. May be repeated two times for credit. F, W, S. (F, W, S.)

### **390. Methods of Teaching Physics (1)**

Lecture/discussion—1 hour. Prerequisite: graduate standing in Physics; consent of instructor. Practical experience in methods and problems related to teaching physics laboratories at the university level, including discussion of teaching techniques, analysis of quizzes and laboratory reports and related topics. Required of all Physics Teaching Assistants. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## **Physiology**

See **Anatomy, Physiology and Cell Biology (APC), on page 581; Human Physiology (HPH), on page 437; Molecular, Cellular, and Integrative Physiology (A Graduate Group), on page 466; and Neurobiology, Physiology, and Behavior, on page 478.**

## **Plant Biology**

See **Environmental Horticulture, on page 323; Plant Biology, on page 509; and Plant Biology (A Graduate Group), on page 511.**

## **Plant Biology**

(College of Biological Sciences)

William J. Lucas, Ph.D., Chairperson of the Department

Anne B. Britt, Ph.D., Vice Chairperson of the Department

**Graduate Program.** See **Plant Biology (A Graduate Group), on page 511.**

### **Committee in Charge of the Major**

Bo Liu, Ph.D.

Anne Britt, Ph.D.

Steven Theg, Ph.D

## **Faculty**

Faculty includes members of the Departments of Plant Biology, Molecular and Cellular Biology, and Evolution and Ecology in the College of Biological Sciences.

### **Primary Department Members**

Siobhan Brady, Associate Professor

Anne Britt, Ph.D., Professor

Luca Comai, Ph.D., Professor

S. P. Dinesh-Kumar, Professor

John J. Harada, Ph.D., Professor

*Academic Senate Distinguished Teaching Award*

Stacey Harmer, Ph.D., Professor

Bo Liu, Ph.D., Professor

William J. Lucas, Ph.D., Professor

Julin Malof, Ph.D., Professor

Sharman O'Neill, Ph.D., Professor

Neelima Sinha, Ph.D., Professor

Venkatesan Sundaresan, Ph.D., Professor

Steven M. Theg, Ph.D., Professor

### **Secondary Department Members**

Judy Callis, Ph.D., Professor

*Academic Senate Distinguished Teaching Award*

James A. Doyle, Ph.D., Professor

Marilynn E. Etzler, Ph.D., Professor

Charles S. Gasser, Ph.D., Professor

J. Clark Lagarias, Ph.D., Professor

Marcel Rejmanek, Ph.D., Professor

Raymond L. Rodriguez, Ph.D., Professor

Irwin Segel, Ph.D., Professor

## **Emeriti Faculty**

Michael Barbour, Ph.D., Professor Emeritus

David E. Bayer, Ph.D., Professor Emeritus

Deborah Canington, Ph.D., Lecturer

*Academic Federation Excellence in Teaching Award*

Paul A. Castelfranco, Ph.D., Professor Emeritus

Deborah P. Delmer, Ph.D., Professor Emerita

Emanuel Epstein, Ph.D., Professor Emeritus

Richard H. Falk, Ph.D., Professor Emeritus

Donald W. Kyhos, Ph.D., Professor Emeritus

Terence M. Murphy, Ph.D., Professor Emeritus

Thomas L. Rost, Ph.D., Professor Emeritus

*Academic Senate Distinguished Teaching Award*

Alan J. Stemler, Ph.D., Professor Emeritus

Kenneth Wells, Ph.D., Professor Emeritus

## **Affiliated Faculty**

John L. Bowman, Ph.D., Professor

Andrew Groover, Ph.D., Adjunct Associate Professor

Joel Ledford, Ph.D., Academic Coordinator

## **The Major Program**

As organisms that sequester carbon and convert solar energy to usable forms, plants are the primary source of food on the planet as well as important buffers against climate change. The Plant Biology major focuses on fundamental aspects of how plants function as organisms and interact with their environment. A wide variety of scientific disciplines are integrated within the Plant Biology major, including physiology, cell and molecular biology, development, genetics and genomics.

**The Program.** The plant biology major consists of a Biosciences core covering the general principles of biology plus four plant-specific classes dealing with advanced aspects of plant biology including physiology, development, and anatomy. Two required electives allow students to tailor the degree to suit their interests. Independent research in a laboratory setting is a requirement, and majors in Plant Biology are guaranteed this opportunity. Because of the value of plants as a model system for research in molecular genetics, cell biology, and biochemistry, Plant Biology makes an excellent minor or second major for student in these fields.

**Career Alternatives.** A degree in Plant Biology serves as an excellent launching point for a wide range of career options, including domestic and international opportunities in business, research and teaching in both governmental and private sectors. The program is excellent preparation for students wishing to enter graduate or other professional schools, including medicine, law (particularly environmental or patent law) or journalism. Plant biologists can work in the laboratory, in the field, in the forest, in botanical gardens or nurseries, in agricultural companies, or in biotechnology, pharmaceutical, energy or chemical industries, or in the area of environmental protection.

### **A.B. Major Requirements:**

UNITS

#### **Preparatory Subject Matter .....** 34

Biological Sciences 2A-2B-2C.....	14
Chemistry 2A-2B, 8A-8B .....	16
Statistics 13 or 100 or 102 (or Plant Sciences 120) .....	4

#### **Depth Subject Matter..... 41-42**

Biological Sciences 101 .....	4
Plant Biology 102 or 108 .....	5
Evolution and Ecology 140 or Plant Biology 116 .....	4.5
Plant Biology 105, 111, 112, 117 .....	15
Additional upper division units in Plant Biology or related natural science courses .....	13

#### **Total Units for the Major..... 75-76**

### **Recommended**

Chemistry 2C, Evolution and Ecology 100, and Plant Biology 148.

For students with interests in specialized areas of plant biology (e.g. agricultural botany, ecology, systematics and evolution, morphology, plant physiology, etc.), certain substitutions, including courses in other departments, may be allowed upon prior consultation with a Plant Biology major adviser.

### **B.S. Major Requirements:**

UNITS

#### **Preparatory Subject Matter ..... 55-65**

Biological Sciences 2A-2B-2C.....	14
Chemistry 2A-2B-2C.....	15
Chemistry 8A-8B or 118A-118B-118C .....	6-12
Mathematics 17A-17B-17C or 21A-21B (21C recommended).....	8-12
Physics 7A-7B-7C.....	12

### **Recommended**

Biological Sciences 20Q

#### **Depth Subject Matter..... 43-46**

Biological Sciences 101, 105 (or 102+103), 104 or equivalent .....	10-13
--	-------

Statistics 100 or 102 .....	4
Plant Biology 105, 111, 112.....	11
Research internship: Plant Biology 92, 99, 189, 192, 199 or equivalent.....	3
Restricted electives.....	15
Upper division courses in plant biology or other fields relevant to the student's interest chosen from the lists below. The student's academic adviser may approve additional courses as "restricted electives" at their discretion.	

**Total Units for the Major ..... 98-111**

### Course Lists

#### Ecology

Environmental Science and Policy 121, 123, 124, 150C, 151, 151L, 155, 155L; Evolution and Ecology 101, 131, 138; Hydrologic Science 124; Plant Biology 117, 119; Plant Pathology 150; Plant Sciences 112, 130, 131, 134, 135, 142, 144.

#### Evolution and Diversity

Evolution and Ecology 100, 102, 108, 140, 149; Plant Biology 102, 108, 116, 143, 148.

#### Plant Genetics

Evolution and Ecology 100, 102; Molecular and Cellular Biology 161, 164; Plant Biology 113; Plant Pathology 123; Plant Sciences 152.

#### Plant Physiology, Development, and Molecular Biology

Biotechnology 160, 161A, 161B; Molecular and Cellular Biology 126; Plant Biology 113, 126; Plant Pathology 123, 130; Plant Sciences 153, 157, 158.

**Master Adviser.** Siobhan Brady, Plant Biology Department office in 2251 Life Sciences

### Minor Program Requirements:

#### UNITS

#### Minor Requirements ..... 18

Upper division units, including at least one course from each of the following four groups ..... 18  
 (a) Anatomy and Morphology:  
     Evolution and Ecology 140; Plant Biology 105, 116  
 (b) Physiology and Development:  
     Plant Biology 111, 112, 123; Plant Pathology 130  
 (c) Evolution and Ecology:  
     Evolution and Ecology 100; Plant Biology 102, 108, 117, 143  
 (d) Biochemistry and Molecular Genetics:  
     Biotechnology 160; Plant Biology 113, 126; Plant Sciences 152, 154, 171, 172

**Minor Adviser.** Same as for major above.

**Honors and Honors Programs.** Students on the honors list may elect to include a maximum of 5 units of 194H in their major programs. Refer to the Academic Information chapter and the appropriate College section for Dean's Honors List information.

**Graduate Study.** Consult the Plant Biology Graduate Group listing.

### Courses in Plant Biology (PLB)

#### Lower Division

##### 10. Plant Biology (3)

Lecture—3 hours. The social and natural science of plants. Cultural history and socioeconomic importance of plants. Biology of plants reproduction, including flowers, seeds and fruits. Historical, cultural, religious and medicinal uses of plants. Plants in the visual arts, music and literature. GE credit: SciEng | SE, SL.—W, S. (W, S.) O'Neill

##### 90X. Plant Science Seminar (1-4)

Prerequisite: consent of instructor. Examination of a special topic in a small group setting. Not open for credit to students who have completed course Plant Sciences 90X. (Former course Plant Sciences 90X.)

##### 92. Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Technical and/or professional experience on or off campus. Supervised by a member of the Plant Biology faculty. (P/NP grading only.)

##### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

##### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division

For questions about courses numbered 102 through 126, see the Plant Biology Department office in 1002 Life Sciences. For questions concerning courses numbered 1, 12, 140 through 188 and 196, see the Plant Science Advising Center in 1220 Plant and Environmental Sciences.

##### 102. California Floristics (5)

Lecture—3 hours; laboratory—8 hours. Prerequisite: Plant Sciences 2, Biological Sciences 1C, 2C, or equivalent course in Plant Science. Survey of the flora of California, emphasizing recognition of important vascular plant families and genera and use of taxonomic keys for species identification. Current understanding of relationships among families. Principles of plant taxonomy and phylogenetic systematics. One Saturday field trip. (Same course as Plant Sciences 102.) GE credit: SciEng | SE, VL.—S. (S.) Potter

##### 105. Developmental Plant Anatomy (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: Biological Sciences 2C or other similar preparation in plant biology. Restricted to 50 students; split equally into two lab groups. Structural anatomy of vascular plants. Training in basic tissue sectioning, staining, and use of the compound microscope. GE credit: SciEng | SE.—F. (F.) O'Neill

##### 108. Systematics and Evolution of Angiosperms (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C. Diversity and classification of angiosperms (flowering plants) on a world scale, and current understanding of the origin of angiosperms and evolutionary relationships and trends within them based on morphological and molecular evidence. (Same course as Evolution and Ecology 108.) GE credit: SciEng.—S. (S.) Doyle

##### 111. Plant Physiology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 2A, 2B, and 2C; Chemistry 118B or 8B and Physics 7C (either may be taken concurrently); Plant Biology 105 recommended. The plant cell as a functional unit. The processes of absorption, movement, and utilization of water and minerals. Water loss, translocation, photosynthesis, respiration.—F. (F.) Dehesh, Lucas

##### 111D. Problems in Plant Physiology (1)

Discussion—1 hour. Prerequisite: course 111 concurrently. Discussion of problems and applications relating to principles presented in course 111. Students will be assigned problems each week showing novel applications of principles described in course 111 and will prepare answers to be delivered orally during the class period. (P/NP grading only.)—F. (F.) Lucas, Dehesh

##### 112. Plant Growth and Development (3)

Lecture—3 hours. Prerequisite: Sciences 2A, 2B, and 2C; Chemistry 118B or 8B; Biological Sciences 101. Introduction to the mechanisms and control systems that govern plant growth and development and the responses of plants to the environment. Strong emphasis on vegetative development of flowering plants. GE credit: SciEng | QL, SE, SL.—W. (W.) Harada, Sundaresan

##### 112D. Problems in Plant Growth and Development (1)

Discussion—1 hour. Prerequisite: course 112 concurrently. Discussion of problems and applications relating to principles presented in course 112. Students

will be assigned problems each week showing novel applications of the principles described in course 112 and will prepare answers to be delivered orally during class period. (P/NP grading only.)—W. (W.) Harada, Sundaresan

##### 113. Molecular and Cellular Biology of Plants (3)

Lecture—3 hours. Prerequisite: Biological Sciences 2A, 2B, 2C; Biological Sciences 101. Molecular and cellular aspects of the growth and development of plants and their response to biological and environmental stresses. Primary focus on processes unique to plants. Experimental approaches will be emphasized. GE credit: QL, SL, VL.—S. (S.) Harada

##### 113D. Problems in Molecular and Cellular Biology of Plants (1)

Discussion—1 hour. Prerequisite: course 113 concurrently. Discussion of topics and applications related to principles presented in course 113. Assigned topics each week show novel applications of the principles described in course 113; discussion of topics during class period. (P/NP grading only.)—S. (S.) Harada

##### 116. Plant Morphology and Evolution (5)

Lecture—3 hours; laboratory—4 hours. Prerequisite: introductory plant biology (e.g., Biological Sciences 2C, Plant Sciences 2). Introduction to the form, development and evolution of vascular plants. Emphasis given to the form and development of reproductive structures in ferns and seed-producing plants as a basis for determining evolutionary relationships. Not open for credit to students who have completed Plant Sciences 116. (Same course as Plant Sciences 116.) GE credit: SciEng | SE, VL.—W. (W.) Jernstedt

##### 117. Plant Ecology (4)

Lecture—3 hours; fieldwork—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C; Plant Biology 111 recommended. The study of the interactions between plants, plant populations or vegetation types and their physical and biological environment. Special emphasis on California. Four full-day field trips and brief write-up of class project required. (Same course as Evolution and Ecology 117.)—F. (F.)

##### 119. Population Biology of Invasive Plants and Weeds (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C; introductory statistics recommended. Origin and evolution of invasive plant species and weeds, reproduction and dispersal, seed ecology, modeling of population dynamics, interactions between invasive species, native species, and crops, biological control. Laboratories emphasize design of competition experiments and identification of weedy species. (Same course as Evolution and Ecology 119.) GE credit: SciEng | SE.—S. (S.) Rejmankov

##### 123. Plant-Virus-Vector Interaction (3)

Lecture—3 hours. Prerequisite: Biological Sciences 2A, Biological Sciences 101; course 105, Plant Pathology 120, and Entomology 100 recommended. Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement. (Same course as Entomology 123 and Plant Pathology 123.) Offered in alternate years. GE credit: SE, SL, WE.—F. (F.) Lucas, Gilbertson, Ullman

##### 126. Plant Biochemistry (3)

Lecture—3 hours. Prerequisite: Biological Sciences 103 or 105. The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including use of transgenic plants. (Same course as Molecular and Cellular Biology 126.) GE credit: SciEng | SE, SL.—W. (W.) Callis, Tian

##### 143. Evolution of Crop Plants (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Plant Sciences 2 or Biological Sciences 1C or 2C. Origins of crops and agriculture, including main

methodological approaches, centers of crop biodiversity, dispersal of crops, genetic and physiological differences between crops and their wild progenitors, agriculture practiced by other organisms, and role and ownership of crop biodiversity. GE credit: SciEng or SocSci, Div, Wrt | SE or SS, SL, WE. —S. (S.) Gepts

#### **148. Introductory Mycology (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Limited enrollment. Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans. (Same course as Plant Pathology 148.) GE credit: SE. —F. McDonald, Rizzo

#### **189. Experiments in Plant Biology: Design and Execution (3)**

Laboratory/discussion—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C, or the equivalent courses in Plant Sciences, and consent of the instructor. Provides an opportunity for undergraduate students to formulate experimental approaches to current questions in plant biology and to carry out their proposed experiments. May be repeated for credit for a total of 12 units. (P/NP grading only.)—F, W, S. (F, W, S.)

#### **190C. Research Conference in Plant Biology (1)**

Discussion—1 hour. Prerequisite: upper division standing in Plant Biology or related discipline; consent of instructor. Introduction to research methods in plant biology. Design of field or laboratory research projects, survey of appropriate literature, and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

#### **192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Technical and/or professional experience on or off campus. Supervised by a member of the Plant Biology Department faculty. May be repeated for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **194H. Special Study for Honors Students (1-5)**

Prerequisite: open only to majors of senior standing on honors list. Independent study of selected topics under the direction of a member or members of the staff. Completion will involve the writing of a senior thesis. (P/NP grading only.)

#### **197T. Tutoring in Plant Biology (1-5)**

Discussion—2-6 hours. Prerequisite: upper division standing and consent of instructor. Assisting the instructor by tutoring students in one of the Department's regular courses. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

#### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

### **Professional**

#### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing; consent of instructor. Practical experience in acting as teaching assistant in Plant Biology courses. Learning activity: hands on experience in preparing for and conducting discussions, guiding student laboratory work, and the formulation of questions and topics for examinations. May be repeated for credit. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

## **Plant Biology (A Graduate Group)**

Neelima Sinha, Ph.D., Chairperson of the Group

Thomas Tai, Ph.D., Associate in the Agricultural  
Experiment (*Plant Sciences*)

Allen Van Deynze, Ph.D., Professional Researcher  
(*Plant Sciences*)

**Graduate Study.** The Graduate Group in Plant Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. The program prepares students for careers in teaching and research at universities and colleges, government and industrial laboratories. The graduate curriculum provides both a breadth in the discipline and in-depth study and research in one of four areas of specialization: cell and developmental biology; environmental and integrative biology; molecular biology, biochemistry and genomics; and systematics and evolutionary biology. These areas of specialization permit individual study and research into diverse aspects of plant biology, including anatomy, biochemistry, biotechnology, cell biology, cytology, developmental biology, ecology, genetics, genomics, molecular biology, morphology, paleo-botany, physiology, population biology, systematics, and weed science. The graduate adviser, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

**Preparation.** For both the M.S. and Ph.D. programs, a level of scholastic development equivalent to a Bachelor's degree in biological sciences from a recognized college or university is required. Courses in the following areas are considered to be prerequisite to the advanced degrees in Plant Biology: biology, inorganic chemistry, organic chemistry, introductory physics, genetics, plant development and structure, biochemistry, introductory plant physiology, calculus, introductory statistics, ecology/systematics/evolution, and cell/molecular biology. Limited deficiencies can be made up after admission.

**Graduate Adviser.** Contact the Group office.

**Courses in Plant Biology (PBI)****Graduate****200A. PBGG Core Course Series—Fall quarter (5)**

Lecture—3 hours; discussion—2 hours. Prerequisite: graduate standing; a broad background of undergraduate-level coursework in Plant Biology is recommended. The first of three PBGG graduate core courses. Coverage includes (1) plant genes, (2) biotechnology, (3) genomes and gene flow, (4) principles of plant systematics, and (5) the evolution of flowering plants.—F. (F.) Comai, Gepts, Jernstedt, Potter

**200B. PBGG Core Course Series—Winter quarter (5)**

Lecture—3 hours; discussion—2 hours. Prerequisite: course 200A. The second of three PBGG graduate core courses. Coverage includes (1) embryo development, (2) cytoskeleton and vesicle trafficking, (3) cell walls, (4) cell growth, (5) secondary metabolism, (6) plastids and (7) senescence.—W. (W.) Bradford, Drakakaki, Gilchrist, Harada, Inoue, Labavitch, Sundaresan, Tian

**200C. PBGG Core Course Series—Spring quarter (5)**

Lecture—3 hours; discussion—2 hours. Prerequisite: course 200A and 200B. The third of three PBGG graduate core courses. Coverage includes (1) plant water relations, (2) cellular & long distance transport processes, (3) mineral nutrition, (4) environmental impacts on growth & development, (5) stress perception & responses, (6) canopy processes, and (7) plant interactions with other organisms.—S. (S.) Blumwald, Brown, Cook, DeJong, Gilbert, Shackel

**203N. Biology of the Plant Cell (4)**

Lecture—3 hours; discussion/laboratory—2 hours. Prerequisite: Plant Biology 111 or Biological Sciences 104, or the equivalent. Open to senior undergraduate students in Plant Biology major. Recent progresses in plant cell biology. Intracellular motility in plant cells. Common techniques associated with the progress of plant cell biology. Offered irregularly. (S/U grading only.)—Liu

**210. Plant Ecophysiology (3)**

Lecture—3 hours. Prerequisite: Plant Biology 111, 112, 117. Study of the mechanisms of physiological adaptation of plants to their environment. Offered in alternate years.—W.

**212. Physiology of Herbicidal Action (3)**

Lecture—3 hours. Prerequisite: Plant Biology 112, 122. Study of the fundamental processes involved in the physiological action of herbicides. Detailed consideration of the fate of herbicides in plants. Offered in alternate years.—S.

**214. Higher Plant Cell Walls (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: Plant Biology 112, and a course in biochemistry. Lectures focus on the structure, analysis, synthesis, and development-related metabolism of cell walls. Discussions center on analysis of scientific papers related to lecture topics. Offered in alternate years.—F. Drakakaki, Labavitch

**220. Plant Developmental Biology (4)**

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: plant anatomy, physiology, and biochemistry. A survey of the concepts of plant development and organization. Examines plant cells, tissues, and organs with special emphasis on experimental evidence for mechanisms regulating developmental processes. Offered in alternate years.—Sinha

**223. Special Topics in Scientific Method (2)**

Discussion—2 hours. Examine the historical and philosophical background of the scientific method. Analyze the rational, perceptual, causal, creative and social aspects of scientific knowledge. Clarify the roles of reason, experimentation and creativity in scientific research. (S/U grading only.)—F. (F.) Bradford

**227. Plant Molecular Biology (4)**

Lecture/discussion—4 hours. Prerequisite: Molecular and Cellular Biology 121 or 161. Molecular aspects of higher plant biology with emphasis on gene expression. Plant nuclear and organelle genome organization, gene structure, mechanisms of gene regulation, gene transfer, and special topics related to development and response to biological and environmental stimuli. Offered in alternate years.—Britt, Sinha

**229. Molecular Biology of Plant Reproduction (3)**

Lecture—3 hours. Molecular genetic basis of plant reproduction. Emphasis on understanding developmentally regulated gene expression as it relates to the major changes that occur during plant reproduction and on the genetic control of flowering. Offered in alternate years.—O'Neill

**290A. Faculty Seminar (1)**

Discussion—1 hour. Restricted to Plant Biology (PBGG) graduate students. Discussion of research area of seminar speakers in Plant Biology Graduate Group Seminar Series. May be repeated six times for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**290B. Seminar (1)**

Seminar—1 hour. Seminars presented by visiting scientists on research topics of current interest. (S/U grading only.)—F, W, S. (F, W, S.)

**290C. Research Conference in Botany (1)**

Discussion—1 hour. Prerequisite: graduate standing and/or consent of instructor. Presentation and discussion by faculty and graduate students of research projects in botany. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**291. Graduate Student Seminar in Plant Biology (1)**

Seminar—1 hour. Prerequisite: graduate student standing. Student-given seminars on topics in plant biology, with critiques by instructor and peers. How to give a seminar, including preparation of visual and other teaching aids. Topic determined by instructor in charge. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**292. Seminars in Plant Biology (1)**

Seminar—1 hour. Prerequisite: consent of instructor. Review of current literature in botanical disciplines. Disciplines and special subjects to be announced quarterly. Students present and analyze assigned topics. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**293. Seminar in Postharvest Biology (1)**

Discussion—1 hour. Prerequisite: consent of instructor; open to advanced undergraduates. Intensive study of selected topics in the postharvest biology of fruits, vegetables, and ornamentals. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**297T. Tutoring in Plant Biology (1–5)**

Tutorial—3–15 hours. Offers graduate students, particularly those not serving as teaching assistants, the opportunity to gain teaching experience. (S/U grading only.)

**298. Group Study (1–5)**

May be repeated up to four times for credit. (S/U grading only.)

**299. Research (1–12)**

Prerequisite: graduate standing. (S/U grading only.)

**Professional****390. The Teaching of Plant Biology (2)**

Discussion—2 hours. Prerequisite: graduate standing; concurrent appointment as a teaching assistant in Plant Biology. Consideration of the problems of teaching botany, especially of preparing for and conducting discussions, guiding student laboratory work, and the formulation of questions and topics for examinations. (S/U grading only.)—F, W, S. (F, W, S.)

**Plant Pathology**

**Related Major Program.** See the major in Plant Biology, on page 509.

**Graduate Study.** The Department of Plant Pathology offers programs of study and research leading to the M.S. and Ph.D. degrees. Information can be obtained from the graduate adviser. See also the Graduate Studies, on page 120.

**Graduate Advisers.** L. Epstein, G.L. Coaker, R.M. Bostock

**Courses in Plant Pathology (PLP)****Lower Division****40. Edible Mushroom Cultivation (2)**

Lecture—1 hour; laboratory/discussion—3 hours. Prerequisite: Biological Sciences 10 or Microbiology 20 recommended. Principles and practices of growing edible mushrooms, including culture maintenance, basic mushroom substrate preparation, composting, spawn generation techniques, inoculation methods, harvesting, and pests and pest management.—W. (W.)

**90. Introduction to Global Disease Biology****(1)**

Seminar—1 hour. Introduction to the Global Disease Biology major, research and internship opportunities, and potential career paths in human, animal, and plant health. Communication, ethics and the nature of science. (P/NP grading only.)—F. (F.) Rizzo

**Upper Division****101. Epidemiology (4)**

Lecture—2 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: Science and Society 13; Biological Science 2A, 2B, 2C; Statistics 13, 100 or Plant Sciences 120. Principles and practice of epidemiology as applied to human, animal, and plant populations and the environment in which these populations co-exist. Quantitative analysis of both infectious and non-infectious disease. Inter-dependence between epidemiological analysis, decision-making and policy formulation will be highlighted. GE credit: SciEng | QL, SE.—W. (W.) McRoberts, Papageorgiou

**102. Disease Intervention and Policy (4)**

Lecture—3 hours; discussion—1 hour; project. Prerequisite: course 101; Science and Society 13; Biological Sciences 2A, 2B, 2C; Pathology, Microbiology and Immunology 129Y; Medicine and Epidemiology 158. Examination of the prevention and treatment of diseases affecting humans, animals, and plants. Case studies will illustrate the merits of a unified approach to promoting health at local, regional, and global scales. GE credit: SciEng | OL, SE, SL.—S. (S.) Rizzo

**103. The Microbiome of People, Animals, and Plants (3)**

Lecture—3 hours. Prerequisite: Biological Science 2A, 2B, 2C. Examination of the structure and function of microbial communities that live inside and on host organisms. Introduction to general concepts of the microbiome and microbiota, and their relationship to host health and disease. GE credit: SciEng | QL, SE.—F. (F.) Cook, Leveau

**120. Introduction to Plant Pathology (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1C; Microbiology 102 recommended. The nature, cause, and control of plant diseases.—F, S. (F, S.) Casteel, Epstein

**123. Plant-Virus-Vector Interaction (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 2A, Biological Sciences 101; Plant Biology 105, course 120, and Entomology 100 recommended. Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement. (Same course as Entomology 123 and Plant Biology 123.) Offered in alternate years. GE credit: SE, SL, WE.—F. Lucas, Gilbertson, Ullman

**130. Fungal Biotechnology and Biochemistry (3)**

Lecture—3 hours. Prerequisite: Plant Biology 119, Biological Sciences 103. How fundamental physiological and biochemical activities of fungi impact the destructive and beneficial roles of these organisms in nature. Utilization and manipulation of fungi for biotechnological and industrial applications.—W. (S.) Stergiopolous

**135. Field Identification of Mushrooms (1)**

Field work; three-day mandatory field trip. Prerequisite: introductory course in biological sciences; course in mycology recommended. Collection and identification of mushrooms and other fleshy fungi based on macro and microscopic features. (P/NP grading only.)—W. (W.)

**140. Agricultural Biotechnology and Public Policy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: high school level biology, including genetics; Biological Sciences 10 recommended. Examination of the development and deployment of agricultural biotechnologies, particularly transgenic crop plants, micro-

organisms and animals, with consideration of conventional agriculture, public perceptions of technologies, food safety, environmental impact, public policies and regulations. GE credit: SciEng, Wrt | SL.—S. (S.) Cook

**148. Introductory Mycology (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Limited enrollment. Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans. (Same course as Plant Biology 148.) GE credit: SE.—F. Rizzo

**150. Fungal Ecology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1C or equivalent. The ecological roles of fungi as saprobes, mutualists and parasites in native and managed ecosystems. Physiological and reproductive strategies associated with adaptations to diverse habitats.—W. (W.) Gordon

**185. Advanced Mushroom Taxonomy (2)**

Laboratory/discussion—3 hours; fieldwork—1 hour. Prerequisite: course 135 or 148, and Biological Sciences 101 or the equivalent. Class size limited to 12 students. Microscopic and molecular methods used in the identification of mushroom species; molecular characterization including PCR-amplification of ribosomal nuclear DNA, digestion of the product with restriction enzymes, and DNA sequencing; a one-day field trip is required. Offered in alternate years.—F.

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: course 120 and consent of instructor. Work experience off and on campus, supervised by a member of the faculty. (P/NP grading only.)

**198. Directed Group Study (1-5)**

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate****201A. Impacts, Mechanisms and Control of Plant Disease (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 120, graduate student status in the Plant Pathology Graduate Program, or consent of instructor. A case-studies approach to analysis of plant diseases caused by bacteria, fungi, oomycetes, and viruses, including impacts, etiology, pathogen taxonomy and epidemiology, biochemical and genetic aspects of pathogen-host interactions, virulence and resistance, and approaches to disease control.—W. (W.) Leveau

**201B. Impacts, Mechanisms and Control of Plant Disease (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 120, course 201A, and graduate student status in the Plant Pathology Graduate Program, or consent of instructor. A case-studies approach to analysis of plant diseases, including emerging diseases, caused by bacteria, fungi, nematodes, and oomycetes: impacts, etiology, pathogen taxonomy, epidemiology, biochemical and genetic aspects of pathogen-host interactions, virulence, resistance, disease control and statistical analysis. Offered in alternate years.—S. (S.) McRoberts

**205A. Diseases of Vegetable and Field Crops (3)**

Lecture/discussion—3 hours; fieldwork—3 hours. Prerequisite: course 120. Clinical study of diseases of vegetable and field crops with emphasis on etiology, epidemiology, diagnosis, and control. Field trips required. Offered in alternate years.—S. Gilbertson

**205B. Diseases of Vegetable and Field Crops—Summer Field Trip (1)**

Fieldwork—3 hours. Prerequisite: courses 120 and 205A. Continuation of course 205A—four-day field trip investigating diseases of vegetable and field crops (Deferred grading only, pending completion of sequence. S/U grading only.)—Su. (Su.) Gilbertson

**206A. Diseases of Fruit, Nut, and Vine Crops (3)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 120; Plant Biology 119. Course 205 may be taken concurrently. Clinical study of fruit, nut, and vine crops diseases with emphasis on etiology, epidemiology, diagnosis, and control. (Deferred grading only, pending completion of sequence.) Offered in alternate years.—S. (S.) Kirkpatrick

**206B. Diseases of Fruit, Nut, and Vine Crops (1)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 120; Plant Biology 119. Course 205 may be taken concurrently. Clinical study of fruit, nut, and vine crops diseases with emphasis on etiology, epidemiology, diagnosis, and control. Offered in alternate years. (Deferred grading only, pending completion of sequence.)—Su. (Su.)

**210. Biochemistry and Molecular Biology of Plant-Microbe Interaction (4)**

Lecture/discussion—4 hours. Prerequisite: Biological Sciences 101, 102, 103, and 104, or the equivalent. Discussion of plant-microbe interactions, focused on the underlying cellular, biochemical, and molecular events that determine the diseased state.—W. (W.) Bostock, Coaker

**217. Molecular Genetics of Fungi (3)**

Lecture—3 hours. Prerequisite: graduate standing in a biological science, Biological Sciences 101, 103, Molecular and Cellular Biology 161, Plant Biology 119, courses 130, 215X; Microbiology 215 recommended. Advanced treatment of molecular biology and genetics of filamentous fungi and yeasts, including gene structure, organization and regulation; plant pathogenesis; secretion; control of reproduction; molecular evolution; transformation; and gene manipulation. (Same course as Biological Chemistry 217.) Offered in alternate years.—W.

**224. Advanced Mycology (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 148 or Plant Biology 148 or consent of instructor. Systematics, evolution, and ecology of the fungi. Topics include modern techniques and theories on classification of fungi, species concepts, sexual compatibility and vegetative compatibility. Laboratories emphasize various approaches to fungal identification. Offered in alternate years.—S. Epstein, Rizzo

**228. Plant Bacteriology (5)**

Lecture—2 hours; laboratory—9 hours. Prerequisite: course 120; Microbiology 2 or the equivalent; Biological Sciences 102, 103. Study of bacteria which have a saprophytic, symbiotic, or parasitic association with higher and lower plants. Clinical and molecular methods for identification and classification of these bacteria. Offered in alternate years.—(F.) Kirkpatrick, Gilbertson

**230. Plant Virology (3)**

Lecture—3 hours. Prerequisite: upper division or graduate course in molecular biology or graduate student in plant pathology. Viruses as causal agents of plant disease and as tools for manipulating plants; structures of virus particles; mechanisms of transmission, replication, and spread in the plant; cytology and molecular biology in susceptible and resistant reactions to virus infection; virus disease control. Only 2 units of credit to students who have completed Microbiology 262. Not open for credit to students who have completed course 226. Offered in alternate years.—W. Bruening, Falk

**290. Seminar (1)**

Seminar—1 hour. Review and evaluation of current research in plant pathology. (S/U grading only.)—F, W, S. (F, W, S.)

**290C. Advanced Research Conference (1)**

Seminar—1 hour. Prerequisite: course 120 or consent of instructor. Presentation, evaluation, and critical discussions of research activities in the area of advanced plant pathology; primarily designed for graduate students. (S/U grading only.)—F, W, S. (F, W, S.)

**291. Seminar in Molecular Plant Pathology (1)**

Seminar—1 hour. Prerequisite: course 120 or consent of instructor. Review and evaluation of current literature and research in biochemistry and molecular biology of plant-microbe interactions. May be repeated for credit. (S/U grading only.)—F, W. (F, W.) Bostock, Coaker, Cook, Gilchrist, Van Alfen

**295. Seminar in Mycology (1)**

Seminar—1 hour. Review and evaluation of current literature and research in mycology. May be repeated for credit. (S/U grading only.)—S. (S.) Rizzo

**298. Special Group Study (1-5)****299. Research (1-12)**

(S/U grading only.)

## Plant Physiology

**See Plant Biology, on page 509; and Plant Biology (A Graduate Group), on page 511.**

## Plant Sciences

Allen Van Deynze, Ph.D., Lecturer and Researcher

**Major Programs.** See Biotechnology, on page 196, Ecological Management and Restoration, on page 250, Environmental Horticulture and Urban Forestry, on page 324.

**Related Courses.** See the Biotechnology, Environmental Horticulture, Horticulture and Agronomy, and Plant Biology course listings.

**Graduate Study.** For related graduate study, see the M.S. degree program in International Agricultural Development, and the M.S. and Ph.D. degree programs in the graduate groups of Horticulture and Agronomy, Plant Biology, Ecology, Genetics, Geography, and Soils and Biogeochemistry. See also Graduate Studies, on page 120.

**The Major Program**

The Plant Sciences major is designed for students who are interested in a scientific understanding of how plants grow and develop in managed agricultural ecosystems and how plant products are utilized for food, fiber and environmental enhancement. Advances in science and technology have provided new insights and options for using plants to address the issues associated with providing renewable food, fiber and energy resources for a growing global population while minimizing adverse impacts on the natural environment. Graduates in Plant Sciences are able to apply their skills and knowledge to a diverse range of agricultural and environmental goals or pursue advanced degrees in plant sciences.

**The Program.** The curriculum provides depth in the biological and physical sciences and a sound understanding of how plants obtain and utilize resources from their environment to sustain their growth and development. The influences of genetics, management systems and environmental inputs on crop development and productivity are emphasized along with the postharvest preservation and marketing of plant products. Students will develop an area of specialization with options in Crop Production,

Plant Genetics and Breeding, or Postharvest Biology and Technology. An Individual option is also available to match specific subject matter or career goal interests in the plant sciences. All students gain practical experience through a combination of practical laboratory courses and internships. Students may also pursue an Honors thesis in their senior year.

**Career Alternatives.** Graduates from this program are prepared to pursue a wide range of careers, including various technical and management positions in agricultural and business enterprises, farming, or consulting; public, private, and non-profit agencies; Cooperative Extension; international development; teaching; or agricultural and environmental journalism and communication services. Graduates are qualified to pursue graduate studies in the natural and agricultural sciences, such as plant biology, genetics, breeding, horticulture, agronomy, biotechnology, ecology, environmental studies, pest management, education, or business management.

### B.S. Major Requirements:

	UNITS
--	-------

#### Preparatory Subject Matter.....51-68

Biological Sciences 2A, 2B .....	10
Plant Sciences 2 .....	4
Chemistry 2A, 2B, 2C .....	15
Chemistry 8A, 8B or 118A, 118B, 118C .....	6-12
Physics 1A, 1B or 7A, 7B, 7C .....	6-12
Mathematics 16A, 16B, or 17A, 17B....	6-8
Plant Sciences 120.....	4
Applied Biological Systems Technology 49 or Plant Sciences 49 (recommended) .....	2-3

#### Depth Subject Matter .....36-39

Plant Sciences 100A, 100B, 100C .....	9
Plant Sciences 100AL, 100BL, 100CL.....	6
Plant Sciences 152.....	4
Evolution and Ecology 100 or Plant Biology 102 or 108 or 143 .....	3-5
Plant Biology 117 or Plant Sciences 147 and 147L or Plant Sciences 150 or Environmental Horticulture 160 and 160L.....	4
Plant Pathology 120or Entomology 110or Nematology 100or Plant Sciences 105 or 176.....	3-5
Plant Sciences 101 .....	3
Internship or research, must be approved by master adviser .....	3

#### Areas of Specialization (choose one)

#### Crop Production Option .....23-28

Complete two courses in pest management not completed for the depth subject matter: Plant Pathology 120, Entomology 110, Nematology 100or Plant Sciences 105 or 176, Viticulture and Enology 118 .....	6-9
Soil Science 100.....	5
Plant Sciences 171 .....	4
Agricultural and Resource Economics 15 or Economics 1A.....	4
Select two courses from: Plant Sciences 110A, 110B, 110C, 112, 113, 114, 170A, 170B, Environmental Horticulture 125... .	4-6

#### Plant Breeding and Genetics

#### Option.....23-28

Biological Sciences 101 .....	4
Plant Sciences 154.....	4
Biotechnology 160.....	3
Biotechnology 161B.....	4
Plant Sciences 171 .....	4
Restricted Electives.....	4-9
Select two courses from: Plant Sciences 110A, 110C, 112, 113, 114, 141, 158, 170A, 170B, Environmental Horticulture 125, 150, International Agricultural Development 170, Agricultural and Resource Economics 100A, 130, 138, Biotechnology 150, Hydrology 124	4-6

#### Postharvest Biology and Technology

#### Option.....23

Plant Sciences 172 .....	4
Plant Sciences 173 .....	4

Plant Sciences 174.....	3
Plant Sciences 196 .....	3
Restricted Electives .....	9
Select from: Agricultural and Resource Economics 100A, 130, Food Science and Technology 107, 109, 131, Plant Sciences 212	212

#### Individual Option.....23

Select a minimum of 25 upper division units, with approval from a faculty adviser, to form a coherent program of study resulting in expertise and competence in a sub-discipline of plant sciences.

#### Total Units for the Major .....110-135

**Major Adviser.** Daniel Potter

**Advising Center** for the major is located in 1220 Plant and Environmental Sciences 530-752-1715.

### Courses in Plant Sciences (PLS)

(Formerly courses in Agricultural Management and Rangeland Resources, Agronomy, Crop Science and Management, Plant Biology, Pomology, Range Science and Vegetable Crops.)

#### Lower Division

##### 1. Agriculture, Nature and Society (3)

Lecture—2 hours; discussion/laboratory—1 hour. Multiple perspectives and connections between natural sciences, social sciences, and agriculture. Emphasizes agriculture's central position between nature and society and its key role in our search for a productive, lasting and hospitable environment. Several full-period field trips provide hands-on learning. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 1. (Former Course Agricultural Management and Rangeland Resources 1.) GE credit: SciEng | SE.—F. (F.) Gradziel

##### 2. Botany and Physiology of Cultivated Plants (4)

Lecture—3 hours; discussion/laboratory—3 hours. Prerequisite: high school course in biology and chemistry recommended. A holistic introduction to the underlying botanical and physiological principles of cultivated plants and their response to the environment. Includes concepts behind plant selection, cultivation, and utilization. Laboratories include discussion and interactive demonstrations. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 2. (Former course Agricultural Management and Rangeland Resources 2.) GE credit: SciEng | SE, SL.—W. (W.) Marrush, Zakharov

##### 5. Plants for Garden, Orchard and Landscape (2)

Lecture—1 hour; laboratory—3 hours. Prerequisite: for non-majors. Hands-on experience with plants cultivated for food, environmental enhancement and personal satisfaction. Topics include establishing a vegetable garden, pruning and propagation activities, growing flowers and ornamental plants, and the role of plants in human health and well-being. Not open for credit to students who have completed Plant Biology 1 or Plant Sciences 2. (Former course Plant Biology 1.) GE credit: SE.—F, S. (F, S.) Marrush

##### 6. Flower Power—Art and Science of Flowers and Their Uses (2)

Lecture/discussion—2 hours. Prerequisite: high school biology. Introduction to the art and science of using and growing flowers to harness the power that is represented by their aesthetic beauty. Handling, production, arranging, breeding and marketing of flowers. Emphasis on potted plants and cut-flowers. (P/NP grading only.)—S. (S.) Lieth

##### 12. Plants and Society (4)

Lecture—3 hours; extensive writing—3 hours. Prerequisite: high school biology. Dependence of human societies on plant and plant products. Plants as resources for food, fiber, health, enjoyment and environmental services. Sustainable uses of plants for food production, raw materials, bioenergy, and environmental conservation. Global population growth and future food supplies. Not open for credit

to students who have complete Plant Biology 12. (Former course Plant Biology 12.) [Same course as Science and Society 12.] GE credit: SciEng or SocSci, Div, Wrt | SE or SS, WE.—F, W, S. (F, W, S.) Drakakaki, Fischer, Jasieniuk, Tian

#### 14. Introduction to Current Topics in Plant Biology (4)

Discussion—3 hours; term paper. Introduction to scientific methods and current understanding of genetics, metabolism, and cellular structure in plants, with special emphasis on topics related to societal issues, such as herbal medicines and genetically modified organisms. Designed for students not specializing in biology. Not open for credit to students who have completed Plant Biology 11. GE credit: SciEng, Wrt | SE, SL.

#### 15. Introduction to Sustainable Agriculture (4)

Lecture—3 hours; laboratory—3 hours. Multidisciplinary introduction to agricultural sustainability with a natural sciences emphasis. Sustainability concepts and perspectives. Agricultural evolution, history, resources and functions. Diverse agricultural systems and practices and their relative sustainability. Laboratories provide direct experience with selected agricultural practices and systems. GE credit: SciEng | SE.—S. (S.) Van Horn, Williams

#### 21. Application of Computers in Technology (3)

Lecture—2 hours; laboratory/discussion—2 hours. Prerequisite: high school algebra. Concepts of computing and applications using personal computers, spreadsheets, database management, word processing and communications. Not open for students who have completed Agricultural Management and Rangeland Resources 21. (Former course Agricultural Management and Rangeland Resources 21.) GE credit: SciEng | SE, VL.—F, W, S. (F, W, S.) Frank

#### 49. Organic Crop Production Practices (3)

Lecture—1 hour; discussion—1 hour; laboratory—3 hours. Principles and practices of organic production of annual crops. Including organic crops, soil, and pest management, cover cropping, composting, seeding, transplanting, irrigation, harvesting and marketing. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 49. (Former course Agricultural Management and Rangeland Resources 49.) (P/NP grading only.) GE credit: SE.—F, S. (F, S.) Van Horn

#### 92. Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience on or off campus in subject areas pertaining to plant and environmental sciences. Internship supervised by faculty member. May be repeated for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

#### Upper Division

##### 100A. Metabolic Processes of Cultivated Plants (3)

Lecture—3 hours. Prerequisite: course 2 or Biological Sciences 1C or consent of instructor. Principles of energy capture and photosynthesis, water use, and nutrient cycling. Conversion of these resources into products (carbohydrates, proteins, lipids, and other chemicals) by plants. Emphasis on the relationships between environmental resources, plant metabolism and plant growth. GE credit: SciEng | SE.—F. (F.) Gilbert

##### 100AL. Metabolic Processes of Cultivated Plants Laboratory (2)

Laboratory/discussion—3 hours. Prerequisite: course 100A or the equivalent (may be taken concurrently). Techniques and instruments used to study plant metabolic processes, including water relations,

respiration, photosynthesis, enzyme kinetics, microscopy, immunochemistry, and nitrogen fixation. Quantitative methods, problem solving, and practical applications are emphasized. GE credit: SciEng | SE. —F. (F.) Blumwald, Drakakaki, Gilbert

### **100B. Growth and Yield of Cultivated Plants (3)**

Lecture—3 hours. Prerequisite: course 100A or consent of instructor. Principles of the cellular mechanisms and hormonal regulation underlying plant growth, development, and reproduction. Emphasis on how these processes contribute to the harvestable yield of cultivated plants and can be managed to increase crop productivity and quality. GE credit: SciEng | SE. —W. (W.) Bradford, Melotto

### **100BL. Growth and Yield of Cultivated Plants Laboratory (2)**

Laboratory/discussion—3 hours. Prerequisite: course 100B or equivalent (may be taken concurrently). Laboratory exercises in plant growth and development and their regulation, including photomorphogenesis, plant growth regulators, plant anatomy, seed germination, fruit ripening and senescence. Includes field trips to illustrate relationships to cropping and marketing systems. GE credit: SciEng | SE. —(W.) Bradford

### **100C. Environmental Interactions of Cultivated Plants (3)**

Lecture—3 hours. Prerequisite: course 100A or consent of instructor. Principles of plant interactions with their physical and biological environments and their acquisition of the resources needed for growth and reproduction. Emphasis on how management practices and environmental conditions affect crop productivity. GE credit: SciEng | SE. —S. (S.) Brown

### **100CL. Environmental Interactions of Cultivated Plants Laboratory (2)**

Laboratory/discussion—3 hours. Prerequisite: course 100C (may be taken concurrently). Techniques and instruments used to study plant interactions with their physical and biological environments, including light responses, transpiration, microclimatology, nutrient availability and utilization, biomass accumulation. Quantitative methods and modeling are emphasized. GE credit: SciEng | SE. —S. (S.) Shackel

### **101. Agriculture and the Environment (3)**

Lecture—3 hours. Prerequisite: course 2 or consent of instructor. Interaction between agriculture and the environment. Focus on the interaction between agriculture and the environment to address the principles required to analyze conflict and develop solutions to complex problems facing society. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 101. (Former course Agricultural Management and Rangeland Resources 101.) GE credit: SciEng | SE, SL. —W. (W.) Van Kessel

### **102. California Floristics (5)**

Lecture—3 hours; laboratory—8 hours. Prerequisite: course 2, Biological Sciences 1C, 2C, or equivalent course in Plant Science. Survey of the flora of California, emphasizing recognition of important vascular plant families and genera and use of taxonomic keys for species identification. Current understanding of relationships among families. Principles of plant taxonomy and phylogenetic systematics. One Saturday field trip. (Same course as Plant Biology 102.) GE credit: SciEng | SE, VL. —S. (S.) Potter

### **105. Concepts in Pest Management (3)**

Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: Biological Sciences 1C or course 2, Chemistry 8B. Introduction to the ecological principles of integrated pest management, biology of different classes of pests and the types of losses they cause, population assessment, evaluation of advantages and disadvantages of different techniques used for pest management, IPM programs. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 105. (Former course Agricultural Management and Rangeland Resources 105.) GE credit: SciEng | SE. —F. (F.) Al-Khatib

### **110A. Principles of Agronomic Crop Production in Temperate and Tropical Systems (3)**

Lecture—3 hours. Prerequisite: course in general botany or course 2 recommended. Fundamentals of field crop production in temperate and tropical climates. Resource utilization and economic, political and social problems are considered in relation to technological problems and their influences on agricultural development. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 110A. (Former course Agricultural Management and Rangeland Resources 110A.) —F. (F.) Mitchell

### **110C. Crop Management Systems for Vegetable Production (4)**

Lecture—2 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 2; course 110A recommended. Horticultural principles applied to production and management systems for vegetable crops. Laboratory and discussion will illustrate efficient field management and resource use practices. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 110C. (Former course Agricultural Management and Rangeland Resources 110C.) —F. Mitchell

### **110L. Principles of Agronomy Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 110B (may be taken concurrently). Field-oriented introduction to principles of agronomic crop production. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 110L. (Former course Agricultural Management and Rangeland Resources 110L.) —F. (F.) Mitchell

### **112. Forage Crop Ecology (3)**

Lecture—3 hours. Prerequisite: course 2, Biological Sciences 1C, 2C, or consent of instructor. Forages as a world resource in food production. Ecological principles governing the adaptation, establishment, growth and management of perennial and annual forages, including pastures, rangelands and hay; aspects of forage quality which affect feeding value to livestock. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 112. (Former course Agricultural Management and Rangeland Resources 112.) GE credit: SciEng | SE. —W. (W.) Brummer

### **113. Biological Applications in Fruit Tree Management (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 2, Biological Sciences 1C, 2C or equivalent. Physiology, growth, development and environmental requirements of fruit trees and the cultural practices used to maintain them. Emphasis on the application of biological principles in the culture of commercially important temperate zone fruit tree species. Not open for credit to students that have completed Plant Biology 173. (Former course Plant Biology 173.) GE credit: SciEng | SE. —W. (W.) DeJong

### **114. Biological Applications in Fruit Production (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 2, Biological Sciences 1C or 2C; course 113. Reproductive biology of tree crop species. Biological principles of fruit production, tree nutrition and orchard management for optimizing cropping. Laboratories emphasize hands-on work with orchard tree systems that are done specifically to produce the crop. Not open for credit to students who have completed Plant Biology 174. (Former course Plant Biology 174.) GE credit: SciEng | SE. —S. (S.) DeJong

### **116. Plant Morphology and Evolution (5)**

Lecture—3 hours; laboratory—4 hours. Prerequisite: introductory plant biology (e.g., Biological Sciences 2C, Plant Sciences 2). Introduction to the form, development, and evolution of vascular plants. Emphasis given to the form and development of reproductive structures in ferns and seed-producing plants as a basis for determining evolutionary relationships. Not open for credit to students who have

completed Plant Biology 116. (Same course as Plant Biology 116.) GE credit: SciEng | SE, VL. —W. (W.) Jernstedt

### **120. Applied Statistics in Agricultural Science (4)**

Lecture—3 hours; discussion/laboratory—3 hours. Prerequisite: upper division standing. Application of statistical methods to design and analysis of research trials for plant, animal, behavioral, nutritional, and consumer sciences. Basic concepts and statistical methods are presented in lectures, laboratories emphasize data processing techniques, problem solving, and interpretation in specialized fields. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 120. (Former course Agricultural Management and Rangeland Resources 120.) GE credit: SciEng | QL. —F. (F.) Laca, Medrano

### **130. Rangelands: Ecology, Conservation and Restoration (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1C; introductory ecology course and junior standing recommended. Introduction to the ecological principles and processes important for an understanding of the dynamics of range ecosystems. Emphasis on ecological and evolutionary concepts underlying management strategies for conserving biological diversity and environmental quality in rangelands. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 130. (Former course Agricultural Management and Rangeland Resources 130.) Offered in alternate years. GE credit: SE. —(W.) Tate

### **131. Identification and Ecology of Grasses (2)**

Lecture—7.5 hours; laboratory—20 hours; discussion—5 hours. Prerequisite: Biological Sciences 1C or course 2; Plant Biology 102 and junior standing recommended. Taxonomy and identification of western grasses. Development of skills in using plant identification keys. Ecology and evolution of grasses in grazing ecosystems. Given the week following spring quarter. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 131. (Former course Agricultural Management and Rangeland Resources 131.) Offered in alternate years. GE credit: SciEng | SE, VL. —S. DiTomaso

### **135. Ecology and Community Structure of Grassland and Savannah Herbivores (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A or 1B and course 2, or Biological Sciences 1C; general ecology course (Environmental Science and Policy 100) recommended. Feeding ecology of grassland herbivores and its importance in evolution of herbivore communities and social systems. Optimal foraging, interspecific interactions, and primary productivity are considered as factors structuring natural and managed grassland and savannah systems. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 135. (Former course Agricultural Management and Rangeland Resources 135.)

### **141. Ethnobotany (4)**

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: course 2, Biological Sciences 1C or 2C. Relationships and interactions between plants and people, including human perceptions, management, and uses of plants, influences of plants on human cultures, and effects of human activity on plant ecology and evolution. Concepts, questions, methods, and ethical considerations in ethnobotanical research. Not open for credit to students who have completed Plant Biology 141. (Former course Plant Biology 141.) Offered in alternate years. GE credit: SciEng or SocSci, Wrt | OL, SE or SS, WE. —W. Potter

### **144. Trees and Forests (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Plant Sciences 2 or Biological Sciences 1C or 2C. Biological structure and function of trees as organisms; understanding of forests as communities and as ecosystems; use of forests by humans; tree phenology, photosynthesis, respiration, soil processes, life

histories, dormancy, forest biodiversity, and agroforestry. (Same course as Environmental Science and Management 144.) Not open for credit to students who have completed Plant Biology 144 or Environmental Horticulture 144 or Environmental and Resource Science 144. (Former course Plant Biology/Environmental Horticulture/Environmental and Resource Science 144.) GE credit: SciEng | SE, VL, —F. (F.) Dahlgren, Latimer, Zwieniecki

#### **147. California Plant Communities (3)**

Lecture/discussion—3 hours. Prerequisite: course 2 or Biological Sciences 2C. Ecology, distribution, and species of California's plant communities. Environmental forces that determine these communities, the threats they face, and their conservation and restoration opportunities. Not open for credit to student who have completed Plant Biology 147. (Former course Plant Biology 147.) GE credit: SciEng | SE, VL, —S. (S.) Young

#### **147L. California Plant Communities Field Study (1)**

Discussion/laboratory—3 hours. Prerequisite: course 2 or Biological Sciences 2C, and concurrent or previous enrollment in course 147. Visits to many of northern California's plant communities, from the north coast to the Central Valley to the Sierras. Discussion of community ecology and hands-on identification of species. Two Saturday and two three-day field trips required. Not open for credit to students who have completed Plant Biology 147. (Former course Plant Biology 147.) GE credit: SciEng | SE, VL, —S. (S.) Young

#### **150. Sustainability and Agroecosystem Management (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Soil Science 10, Chemistry 2A, and Plant Sciences 2, Biological Sciences 1C or 2C. Interdisciplinary analysis of agricultural production and food systems with primary emphasis on biophysical processes. General concepts governing the functioning of temperate and tropical agroecosystems in relation to resource availability, ecological sustainability, and socio-economic viability. Comparative ecological analyses of agroecosystems. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 150. (Former course Agricultural Management and Rangeland Resources 150.) GE credit: SciEng | OL, SE, SL, —S. (S.) Gaudin

#### **152. Plant Genetics (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: Biological Sciences 1A or 2A or consent of instructor. Basic principles of transmission genetics, cytogenetics, population and quantitative genetics, and molecular genetics. Practical aspects of genetic crosses and analysis of segregating populations. Not open to students who have completed Plant Biology 152. (Former course Plant Biology 152.) GE credit: SciEng | SE, —F. (F.) Beckles

#### **153. Plant, Cell, Tissue and Organ Culture (4)**

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: course 2 or Biological Sciences 1C or 2C. Basic and applied aspects of plant tissue culture including media preparation, micropropagation, organogenesis, embryogenesis, anther culture, protoplast culture and transformation. Not open for credit to students who have completed Plant Biology 153. (Former course Plant Biology 153.) GE credit: SciEng | SE.

#### **154. Introduction to Plant Breeding (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 152, Biological Sciences 101 or consent of instructor. Principles, methods and applications of plant breeding and genetics to the improvement of crop plants. Illustration of how plant breeding is a dynamic, multidisciplinary, constantly-evolving science. Laboratory emphasizes hands-on experience in the basics of breeding through experiments. Not open for credit to students who have completed Plant Biology 154. (Former course Plant Biology 154.) GE credit: SciEng | SE, —W. (W.) St. Clair

#### **157. Physiology of Environmental Stresses in Plants (4)**

Lecture—2 hours; discussion—2 hours. Prerequisite: course 100C or Plant Biology 111 or 112 or Environmental Horticulture 102 or Viticulture and Enology 110. Stress concepts and principles; molecular, physiological, developmental and morphological characteristics enabling plants to avoid or tolerate environmental stresses; stress acclimation and adaptation processes; responses of wild and cultivated species to drought, flooding, nutrient deficiencies, salinity, toxic ions, extreme temperatures, etc. Not open for credit to students who have completed Plant Biology 157. (Former course Plant Biology 157.) GE credit: SciEng | SE.

#### **158. Mineral Nutrition of Plants (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 100A or Plant Biology 111 or Environmental Horticulture 102 or Viticulture and Enology 110. Evolution and scope of plant nutrition; essential elements; mechanisms of absorption and membrane transporters; translocation and allocation processes; mineral metabolism; deficiencies and toxicities; genetic variation in plant nutrition; applications to management and understanding ecological effects of nutrient availability or deficiency. Not open for credit to students who have completed Plant Biology 158. (Former course Plant Biology 158.) Offered in alternate years. GE credit: SciEng | SE, —S. Brown

#### **160. Agroforestry: Global and Local Perspectives (3)**

Lecture/discussion—3 hours. Prerequisite: course 2 or Biological Sciences 1C or 2C; course 142 or 150 or Biological Sciences 2B or a general ecology course. Traditional and evolving use of trees in agricultural ecosystems; their multiple roles in environmental stabilization and production of food, fuel, and fiber; and socioeconomic barriers to the adoption and implementation of agroforestry practices. Not open for credit to students who have previously taken Agricultural Management and Rangeland Resources 160. (Former course Agricultural Management and Rangeland Resources 160.) Offered in alternate years. GE credit: SciEng | SE, —F. (F.) Gradziel

#### **162. Urban Ecology (3)**

Lecture/discussion—3 hours. Prerequisite: course in general or plant ecology (course 142, Plant Biology 117 Environmental Science and Policy 100, or Evolution and Ecology 101). Application of fundamental concepts and approaches in landscape and ecosystem ecology to urban ecosystems. Ecological and social drivers and responses. Landscape heterogeneity, nutrient dynamics, invasive species, altered hydrology and climate, and pollution. Discussion of primary literature. Discussion of primary literature. GE credit: SciEng | SE, SL, —W. (W.) Cadenasso

#### **163. Ecosystem and Landscape Ecology (4)**

Lecture/discussion—4 hours. Prerequisite: course in general, plant, or soil ecology; Evolution and Ecology 117, Plant Biology 117, Environmental Science and Policy 100, Evolution and Ecology 101, Soil Science 112. Integration of concepts to understand and manage ecosystems in a complex and changing world. Emphasis on interactions among biotic, abiotic and human factors and changes over space/time. Local to global controls over water, carbon and nutrients across ecosystems/landscapes. Not open for credit to students who have completed Ecology 201.—W. (W.) Cadenasso, Eviner

#### **164. Practicum in Ecological Restoration (1)**

Fieldwork—3 hours. Prerequisite: Environmental Horticulture 160 recommended. Hands-on field course that exposes students to various aspects of ecological restoration throughout the seasonal restoration cycle with real-world practitioners. Emphasis on grassland/rangeland, riparian, and oak woodland communities. May be repeated three times for credit. —F, W, S. (F, W, S.) Young

#### **170A. Fruit and Nut Cropping Systems (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 2, Biological Sciences 1C, or consent of instructor. Overview of production and handling systems of major pomological crops, analysis of current

cultural and harvesting problems and concerns associated with commercial fruit growing. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 170A. (Former course Agricultural Management and Rangeland Resources 170A.) Offered in alternate years. GE credit: SciEng | SE, —(F.) Gradziel

#### **170B. Fruit and Nut Cropping Systems (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 2, Biological Sciences 1C, or consent of instructor. Overview of production and handling systems of major pomological crops, including analysis of current cultural and harvesting problems and concerns associated with commercial fruit growing. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 170B. (Former course Agricultural Management and Rangeland Resources 170B.) Offered in alternate years. GE credit: SciEng | SE, —(S.) Gradziel

#### **171. Principles and Practices of Plant Propagation (4)**

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: course 2, Biological Sciences 1C or 2C. Principles and practices of propagating plants covering anatomical, physiological, and practical aspects. Not open for credit to students who have completed Plant Biology 171. (Former course Plant Biology 171.) GE credit: SciEng | SE, —S. (S.) Evans

#### **172. Postharvest Physiology and Technology (4)**

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: general plant science background (e.g., courses 2, 12); course 196 recommended. Overview of physiological processes related to maturation and senescence of plant products and their responses to postharvest stresses. Targeted approaches and technologies to maintain product quality and limit postharvest disorders. Not open for credit to students who have completed Plant Biology 172. (Former course Plant Biology 172.) GE credit: SciEng | SE, —F. (F.) Saltveit

#### **173. Molecular and Cellular Aspects of Postharvest Biology (3)**

Lecture/discussion—3 hours. Prerequisite: course 2, Biological Sciences 1C, 2C or equivalent. Basic concepts and current knowledge of issues relevant to postharvest biology. Mechanisms of fruit ripening, senescence, programmed cell death. Metabolism and functions of phytohormones, carbohydrates, lipids, pigments, flavor compounds, and phytonutrients at molecular and cellular levels. Offered in alternate years. GE credit: SciEng | SE, —(S.) Zakharov

#### **174. Microbiology and Safety of Fresh Fruits and Vegetables (3)**

Lecture—3 hours. Prerequisite: course 2 or Biological Sciences 1C or 2C or equivalent. Overview of microorganisms on fresh produce, pre- and postharvest factors influencing risk of microbial contamination, attachment of microorganisms to produce, multiplication during postharvest handling and storage, and methods of detection. Mock outbreak trial and presentation of science-based forensic discovery. GE credit: SciEng | SE, —F. (F.) Melotto

#### **176. Introduction to Weed Science (4)**

Lecture—2 hours; laboratory/discussion—4 hours. Prerequisite: course 2 or Biological Sciences 1C or 2C. Weed biology and ecology, methods of weed management, biological control, herbicides and herbicide resistance. Weed control in managed and natural ecosystems; invasive species. Laws and regulations. Application of herbicides. Sight and soft-ware-assisted identification of common weeds. Not open for credit to students who have completed Plant Biology 176. (Former course Plant Biology 176.) GE credit: SciEng | VL, SE, —W. (W.) Al-Khatib, DiTomaso

#### **178. Biology and Management of Aquatic Plants (3)**

Lecture—3 hours. Prerequisite: course 2, Biological Sciences 1C or 2C; Chemistry 8B or 118B; course 100C, Plant Biology 111, Environmental Horticulture 102, or Hydrologic Science 122 recom-

mended. Brief survey of common and invasive fresh water plants and macroalgae, their reproductive modes, physiology, growth (photosynthesis, nutrient utilization), development (hormonal interactions), ecology, modes and impacts of invasion, and management. Two Saturday field trips required. Not open for credit to students who have completed former course Plant Biology 178. (Former course Plant Biology 178.) Offered in alternate years. GE credit: SciEng | SE. —F. Anderson

### **188. Undergraduate Research Proposal (3)**

Lecture/discussion—3 hours. Prerequisite: upper division standing. Preparation and review of a scientific proposal. Problem definition, identification of objectives, literature survey, hypothesis generation, design of experiments, data analysis planning, proposal outline and preparation. (Same course as Biotechnology 188.) GE credit: SciEng, Wrt | OL, SE, WE. —S. (S.) Kliebenstein

### **189L. Laboratory Research in Plant Sciences (2-5)**

Laboratory—3-12 hours; discussion—1 hour. Prerequisite: course 188 and consent of instructor. Formulating experimental approaches to current questions in Plant Sciences; performance of proposed experiments. May be repeated up to 12 units for credit. (P/NP grading only.) —F, W, S. (F, W, S.)

### **190. Seminar on Alternatives in Agriculture (2)**

Seminar—1 hour; discussion—1 hour. Prerequisite: upper division standing or consent of instructor. Seminar on topics related to alternative theories, practices and systems of agriculture and the relationship of agriculture to the environment and society. Scientific, technological, social, political and economic perspectives. May be repeated for two times for credit for a total of three times. GE credit: SciEng | SE. —W. (W.) Van Horn

### **190C. Research Group Conference (1)**

Discussion—1 hour. Prerequisite: advanced standing; consent of instructor. Weekly conference on research problems, progress and techniques in the plant sciences. May be repeated for credit. (P/NP grading only.) —F, W, S. (F, W, S.)

### **192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience on or off campus in subject areas pertaining to plant and environmental sciences. Internship supervised by a faculty member. (P/NP grading only.) —F, W, S, Su. (F, W, S, Su.)

### **193. Garden and Farm-Based Experiential Education Methods (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: upper division standing or consent of instructor. Methods of teaching children and youth about fruit and vegetable production and consumption. Lesson and activity planning for garden and farm field trips. Basic biology, ecology, plant science, and crop management practices. Mentorship in experiential learning. Preparation of garden site. (P/NP grading only.) GE credit: SciEng | OL, SE. —W. (W.) Van Horn

### **194H. Senior Honors Thesis (1-2)**

Independent study—3-6 hours. Prerequisite: senior standing; overall GPA of 3.250 or higher and consent of master adviser. Independent study of selected topics under the direction of a member or members of the staff. Completion will involve the writing of a senior thesis. (P/NP grading only.) GE credit: SE, WE. —F, W, S, Su. (F, W, S, Su.)

### **196. Postharvest Technology of Horticultural Crops (3)**

Lecture/discussion—45 hours; fieldwork—45 hours. Prerequisite: upper division or graduate student standing. Intensive study of postharvest considerations and current procedures and challenges in postharvest handling for fruits, nuts, vegetables, and ornamentals in California. Scheduled first two weeks immediately following last day of spring quarter. Not open for credit to students who have completed Plant Biology 196. (Former course Plant Biology 196.) (P/NP grading only.) GE credit: SE. —S. (S.) Mitcham

### **197T. Tutoring in Plant Sciences (1-5)**

Tutorial—1-5 hours. Prerequisite: upper division standing, completion of course being tutored or the equivalent; consent of instructor. Leading small voluntary discussion or lab groups affiliated with one of the department's regular courses. May be repeated for up to eight units of credit. (P/NP grading only.) —F, W, S, Su. (F, W, S, Su.)

### **198. Directed Group Study (1-5)**

(P/NP grading only.) —F, W, S, Su. (F, W, S, Su.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) —F, W, S, Su. (F, W, S, Su.)

### **Graduate**

### **205. Experimental Design and Analysis (5)**

Lecture—3 hours; discussion/laboratory—2 hours. Prerequisite: course 120 or equivalent. Introduction to the research process and statistical methods to plan, conduct and interpret experiments. Not open for credit to students who have completed Agronomy 205. (Former course Agronomy 205.) —W. (W.) Dubcovsky, Runcie

### **206. Applied Multivariate Modeling in Agricultural and Environmental Sciences (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one of course 120, Statistics 106, 108, course 205 or equivalent. Multivariate linear and nonlinear models. Model selection and parameter estimation. Analysis of manipulative and observational agroecological experiments. Discriminant, principal component, and path analyses. Logistic and biased regression. Bootstrapping. Exercises based on actual research by UC Davis students. Not open for credit to students who have completed Agronomy 206. (Former course Agronomy 206.) —F. (F.) Laca

### **212. Postharvest Biology and Biotechnology of Fruits and Nuts (3)**

Lecture—3 hours. Prerequisite: course 172. Review of postharvest biology of fruits and nuts and biotechnological approaches to address postharvest challenges. Morphology, biology and postharvest handling of fruits and nuts are presented along with current research, including biotechnology, and discussion of future research needs and approaches. Not open for credit to students who have completed Pomology 212. Offered in alternate years. —S. (S.) Crisosto, Mitcham, Zakharov

### **213. Postharvest Physiology of Vegetables (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 172 or course 100B or Plant Biology 112. Comparative physiology of harvest vegetables; emphasis on maturation, senescence, compositional changes, physiological disorders and effects of environmental factors. Concepts and research procedures. Not open for credit to students who have completed Vegetable Crops 212. (Former course Vegetable Crops 212.) Offered in alternate years. —(S.) Saltveit

### **220. Genomics and Biotechnology of Plant Improvement (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101 or the equivalent. Integration of modern biotechnology and classical plant breeding including the impact of structural, comparative and functional genomics on gene discovery, characterization and exploitation. Also covers molecular markers, plant transformation, hybrid production, disease resistance, and novel output traits. Not open for credit to students who have completed Vegetable Crops 220. (Former course Vegetable Crops 220.) (Same course as Genetics 220.)

### **221. Genomics and Breeding of Vegetable Crops (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101 or equivalent. Preview of genome structure, mapping, gene tagging and development of other genetic resources applied to improvement of major vegetables. For graduate students contemplating a career in modern vegetable breeding and biotech-

nology. Not open for credit to students who have completed Vegetable Crops 221. (Former course Vegetable Crops 221.)

### **222. Advanced Plant Breeding (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 154 and 205; Genetics 201D or Animal Genetics 107 recommended. Philosophy, methods, and problems in developing improved plant species. Topics include: inbreeding, heterosis, progeny testing, breeding methodology, index selection, germplasm conservation, and breeding for stress resistance. Laboratories include tours of breeding facilities and calculation and interpretation of quantitative data. —S. (S.) Brummer

### **230. Forest Biology (4)**

Lecture—3 hours; seminar—1 hour. Prerequisite: graduate standing or advanced undergraduate with consent of instructor. Cross-disciplinary review of forest biology, including physiology, genetics, pathology, ecology, and silviculture. —S. (S.) Neale, North, Richards, Rizzo, Schwartz

### **290. Seminar (1-2)**

Seminar—1-2 hours. Topics of current interest related to Plant Sciences. (S/U grading only.) —F, W, S. (F, W, S.)

### **290C. Research Conference (1)**

Discussion—1 hour. Prerequisite: consent of instructor. (S/U grading only.) —F, W, S. (F, W, S.)

### **297T. Tutoring in Plant Science (1-5)**

Tutoring—1-5 hours. Prerequisite: graduate standing; consent of instructor; completion of course to be tutored or the equivalent. Designed for graduate students who desire teaching experience but are not teaching assistants. May be repeated for credit for a total of five units. Same course may not be tutored more than once. (S/U grading only.)

### **298. Group Study (1-5)**

### **299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.) —F, W, S, Su. (F, W, S, Su.)

### **Professional**

### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: consent of instructor; graduate standing. (S/U grading only.) —F, W, S, Su. (F, W, S, Su.)

Stuart L. Hill, Ph.D., Lecturer
John R. Owens, Ph.D., Professor Emeritus
Randolph M. Siverson, Ph.D., Research Professor and Professor Emeritus
Larry L. Wade, Ph.D., Professor Emeritus
Geoffrey A. Wandesforde-Smith, Ph.D., Professor Emeritus

## The Political Science Major Program

Political science is the study of politics and political systems at the local, national, and international levels. It concerns not only the institutions of government but also the analysis of such phenomena as political behavior, political values, political change and stability, parties, pressure groups, bureaucracies, administrative behavior, justice, national security, and international affairs.

**The Program.** The Department of Political Science offers two major programs: political science and political science-public service. The political science major aims to provide the student with a broad understanding of political concepts, political institutions, political behavior, and political processes. The political science-public service major is for students who desire opportunities for practical hands-on experience in their major. It differs in particular from the political science major in its internship requirement and its focus on the American political system.

**Internships and Career Alternatives.** Both the proximity of UC Davis to the state capitol and the programs offered by the UC Center Sacramento and the UC Washington Center afford exceptional internship possibilities in local, state, and national government offices, providing students with actual experience in politics and government service while still attending school. A student who majors in political science acquires research and analytic skills relevant to many professional fields. Consequently, the majors offered in political science are valuable not only in providing students with a better understanding of politics and political systems, but also as a first step toward careers in teaching, law, management, government, urban planning, journalism, politics, administration, or for graduate studies in numerous fields.

## Political Science

### A.B. Major Requirements:

UNITS
Preparatory Subject Matter.....20
Four lower division Political Science courses from: 1, 2, 3, 4, 5 .....16
Political Science 51 (required course) .....4
Statistics 13 or 32 .....4

### Depth Subject Matter .....44-45

Four courses in one of the fields of concentration listed below .....16
Three courses in another field of concentration listed below .....12
Two courses in another field of concentration listed below .....8
Two other upper division courses in Political Science. Only five units of Political Science 192 may be counted toward the depth subject matter. .....8-9

### Fields of Concentration

<i>American Politics (courses with Political Science 1 are recommended): Political Science 126, 140A-140E, 142A-142C, 143A-143B, 144A-144B, 146A-146B, 147A-147D, 148A-148C, 179, 196B.</i>
<i>Comparative Politics (courses with Political Science 2 are recommended): Political Science 126, 140A-140E, 142A-142B, 143A-143B, 144A-144B, 146A-146B, 147A-147D, 148A-148C, 179, 196B.</i>
<i>International Relations (course with Political Science 3 are recommended): Political Science 120-124, 126, 129, 130-132, 134-137, 139, 190, 196C, International Relations 131.</i>
<i>Political Theory (courses with Political Science 4 as a prerequisite): Political Science 110, 112-117, 118A-118C, 119, 187, 196D</i>

### Total Units for the Major .....64-65

## Political Science—Public Service

### A.B. Major Requirements:

UNITS
Preparatory Subject Matter.....24

Political Science 1 .....4
Three courses from: Political Science 2, 3, 4, 5 or 7 .....12
Statistics 13 (or equivalent) .....4
Political Science 51 (required course) .....4

### Depth Subject Matter .....44-46

Core program .....12
Three courses chosen from Political Science 100, 102, 104, 105, 106, 108, 109, 113, 114, 180.
Internship, Political Science 192A, 192B, or 192W .....6
Research paper, Political Science 193 .....2-4
Fields of concentration .....24
Select six upper division courses from two or three fields of concentration listed below with at least two courses in each field selected; at least 16 of the units must be in political science; Core Program courses may not be counted toward this requirement.

### Fields of Concentration

<i>Field (1) Policy Process: Political Science 100, 102, 104, 105, 106, 108, 109, 140A, 160, 162, 163, 164, 165, 166, 168, 170, 171, 172, 174, 175, 180, 183, 187, 195; Economics 130, 131</i>
<i>Field (2) Policy Interpretation (public/pre-law): Political Science 119, 150, 151, 152, 153, 155</i>
<i>Field (3) State &amp; Local Policy: Political Science 100, 102, 104; Environmental Science and Policy 173; Sociology 143A</i>
<i>Field (4) Foreign Policy: Political Science 122, 130, 131, 132, 134, 139</i>
<i>Field (5) Environmental Policy: Political Science 107; Environmental Science and Policy 160, 161, 162, 166, 168A, 168B, 169, 171, 172, 173, 179</i>

<i>Field (6) Economic Policy: Economics 100, 130, 131, 151A, 151B</i>
<i>Field (7) Social Policy: Sociology 104, 124, 141, 150, 151, 154, 155, 175, 181</i>
<i>Field (8) Policy Analysis Tools: Economics 102, 140; Political Science 114</i>
<i>Field (9) Political Science 194HA, 194HB</i>

### Total Units for the Major .....68-70

**Major Advisers.** Consult Department office.

### Minor Program Requirements:

UNITS

### Political Science .....24

Six upper division Political Science courses.

**Public Affairs Internship Program.** This program is open to upper division students in any major who want to obtain an internship in the area of government and public service. Information and applications are available from the Political Science Department in 467 Kerr Hall.

**Graduate Study.** The Department of Political Science offers a program of graduate study and research leading to a Ph.D. degree or an M.A./J.D. joint degree. The M.A./J.D. joint degree is done only in conjunction with UC Davis School of Law. Information concerning admission to these programs and requirements for completion are available in the Graduate Program Coordinator office.

**Graduate Adviser.** Consult Graduate Program Coordinator office.

**American History and Institutions.** This University requirement may be satisfied by passing any one of the following Political Science courses: 1, 5, 100, 102, 104, 105, 106, 108, 109, 113, 130, 131, 160, 163; see also under University requirements.

## The International Relations Major Program

Ethan Scheiner, Ph.D., Program Director

**Program Office.** 464 Kerr Hall 530-754-8098

Problems of security, development, ethnic conflict, human rights, health, and the environment are increasingly confronted at a global rather than a national level. With its theoretical models and real-world application, the study of international relations is an exciting and highly relevant interdisciplinary major.

**The Program.** Graduation with a major in international relations requires completion of introductory courses in political science, economics, statistics, and history. The major also requires fluency in English and a working knowledge (approximately 24 to 30 units of course credits or equivalent fluency) of one other modern language. Students choose one of four tracks that encompass major topical areas in combination with an area studies emphasis:

- (1) World Trade and Development;
- (2) Peace and Security;
- (3) Global Environment, Health, and Natural Resources;
- (4) Peoples and Nationalities. Upper division course work for Tracks I, II and III is composed of twelve courses. Students choosing Track IV, Peoples and Nationalities, are required to study or work abroad for a minimum of one quarter; upper division course work is reduced to nine classes in recognition of the experience gained through education abroad.

**Programs, Internships, and Career Alternatives.** One program of special interest to international relations majors is the Education Abroad Program, which provides insights into the life and culture of other countries. At UC Davis, the Internship and Career Center assists students in obtaining legislative, legal, and business internships. In addition, the UC Davis Washington Center and UC Center Sacramento arrange internships and run full-credit academic program in Washington, D.C. and Sacramento respectively with a full range of opportunities for International Relations majors (see also UC Washington Center (UCDC), on page 576). International relations graduates are prepared for employment in government agencies (such as the Foreign Service), state agencies, international or non-governmental organizations (such as the United Nations),

163, Spanish 149, 151N, 153, 154, 155, 156, 157, 158, 160, 170, 172

#### Russian and East/Central Europe

*History:* History 138B, 138C, 143

*Social Analysis:* Political Science 144A, 144B

*Culture and Literature:* Russian 123, 124, 129, 130, 133, 150

#### Western Europe

*History:* History 140, 141, 142A, 144B,

145, 146A, 146B, 147B, 147C, 151D

*Social Analysis:* African American and African Studies 107C, Community and Regional Development 153B, Political

Science 137, 147A, 147B, 147C, 147D, 161

*Culture and Literature:* Studies 121, 176A,

176B, French 108, 120, 121, 133,

143, 168, 185, Italian 107, 108, 120A,

120B, Spanish 137N, 138N, 139, 140N,

141, 142, 148, 157, 170

**Total units for the major ..... 64-102**

**Major Adviser.** Daniel Kono (*Political Science*)

### Courses in International Relations (IRE)

#### Lower Division

##### 1. Global Interdependence (4)

Lecture—3 hours; discussion—1 hour. Development of the concept of global interdependence along its political, economic, demographic, cultural, technological, and environmental dimensions. Focus on the ways societies and states interact. Course provides the foundation for upper division multidisciplinary work in international relations. GE credit: SocSci | SS, WE. –W. (W.)

##### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

##### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### Upper Division

##### 104. California State Government and Politics (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: Sociology 1, 2, 3, or 4 recommended. The California political system. Political culture, constitution, elections and parties, direct democracy, legislature, governor, executive branch, courts, finances, state-local relations and policy issues. Offered irregularly. GE credit: SocSci, Wrt | ACGH, SS, WE.

##### 190. Topics in International Relations (4)

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Selected topics in international relations. Variable content. May be repeated for credit when topic differs. GE credit: WE.

##### 192. International Relations Internship (1-12)

Internship—3-36 hours (to be arranged). Prerequisite: upper division standing and consent of instructor. Work experience in international relations, with term paper summarizing the practical experience of the student. (P/NP grading only.) GE credit: SS, WE.

##### 194HA-194HB. Special Study for Honors Students (4-4)

Seminar—2 hours; term paper. Prerequisite: open only to majors of senior standing who qualify for honors program. Directed reading, research, and writing on topics selected by students and instructor culminating in preparation of a senior honors thesis under direction of faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: SocSci | OL, SS, WE. –F, S. (F, S.)

##### 198. Directed Group Study (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

##### 199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

### Courses in Political Science (POL)

#### Lower Division

##### 1. American National Government (4)

Lecture—3 hours; discussion—1 hour. Survey of American national government, including the constitutional system, political culture, parties, elections, the presidency, Congress, and the courts. GE credit: SocSci, Wrt | ACGH, SS, WE.

##### 2. Introduction to Comparative Politics (4)

Lecture—3 hours; discussion—1 hour. Introduction to basic concepts in political analysis and application of them in comparative studies of selected countries. Coverage is given to cultural and other informal dimensions of politics as well as to more formal political and governmental structures. GE credit: SocSci, Wrt | SS, WC, WE.

##### 3. International Relations (4)

Lecture—3 hours; discussion—1 hour. International conflict and cooperation, including the Cold War, nuclear weapons, and new techniques for understanding international politics. GE credit: SocSci, SocSci, Wrt | SS, WC, WE.

##### 4. Basic Concepts in Political Theory (4)

Lecture—3 hours; discussion—1 hour. Analysis of such concepts as the individual, community, liberty, equality, justice, and natural law as developed in the works of the major political philosophers. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

##### 5. Contemporary Problems of the American Political System (4)

Lecture—3 hours; discussion—1 hour. In-depth treatment of selected problems and issues of American politics, governmental institutions, and policies. GE credit: SocSci, Wrt | ACGH, SS, WE.

##### 7. Contemporary Issues in Law and Politics (4)

Seminar—4 hours. Limited enrollment; open to students having no more than 40.1 units. Seminar focusing on the political dimensions of American law and institutions. Examines the role of courts in resolving contemporary issues of law and politics including abortion, capital punishment, and civil rights. Offered irregularly. GE credit: SocSci, Wrt | ACGH, SS, WE.

##### 12Y. Data Visualization in the Social Sciences (4)

Lecture—2 hours; laboratory—1.5 hours; web virtual lecture—1.5 hours. Introduction to quantitative data across the social sciences (Communications, Political Science, Psychology, Sociology, and other disciplines). Transforming data, describing data, producing graphs, visual reasoning, and interpretations. (Same course as Communications 12Y, Sociology 12Y, Psychology 12Y.) GE credit: QL, VL—F, W, S. (F, W, S.) Cross

##### 51. Scientific Study of Politics (4)

Lecture—3 hours; discussion—1 hour. Introduction to the basic principles of the scientific study of politics. Research design and empirical analysis of data with applications to different methodological approaches and different substantive areas in political science. GE credit: ArtHum or SocSci | AH or SS, QL, SE, VL, WE.

##### 90X. Lower Division Seminar (4)

Seminar—4 hours. Prerequisite: lower division standing and consent of instructor. Limited enrollment. Examines fundamental issues and concepts that shape the study and practice of politics. Students will read, discuss and write about some of the most significant texts in political science in order to develop a foundation for the study of politics.

##### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### Upper Division

##### 100. Local Government and Politics (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Politics and government of local communities in the United States, including cities, counties and special districts. Emphasizes sources and varieties of community conflict, legislative and executive patterns, expertise, decision making and the politics of structure. Observation of local governing boards. Offered irregularly. GE credit: SocSci, Wrt | ACGH, SS, WE.

##### 102. Urban Public Policy (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended; consent of instructor. Political and economic relationships among central cities, suburbs, and regional, state, and federal governments. Focuses upon policy areas such as poverty, transportation, welfare, and housing, and upon who governs and who benefits from the policies in these areas. Offered irregularly. GE credit: SocSci, Wrt | ACGH, DD, QL, SS, WE.

##### 104. California State Government and Politics (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended; consent of instructor. The California political system. Political culture, constitution, elections and parties, direct democracy, legislature, governor, executive branch, courts, finances, state-local relations and policy issues. Offered irregularly. GE credit: SocSci, Wrt | ACGH, SS, WE.

##### 105. The Legislative Process (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. The legislative process with emphasis on the United States Congress; legislative organization and procedures, legislative leadership and policy making, legislators and constituents, relations between Congress and other agencies. Offered irregularly. GE credit: SocSci, Wrt | ACGH, SS, WE.

##### 106. The Presidency (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. The American presidencies origins and development; presidential power and influence as manifest in relationships with Congress, courts, parties, and the public in the formulation and administration of foreign and domestic policy; nominations, campaigns, and elections. Offered irregularly. GE credit: SocSci, Wrt | ACGH, SS, WE.

##### 107. Environmental Politics and Administration (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 recommended. Introduction to the environment as a political issue in the United States and to the development of administrative mechanisms for handling environmental problems. Changing role of Congress, the presidency, the bureaucracy, and the courts in environmental policy formulation and implementation. Offered irregularly. GE credit: SocSci, Wrt | ACGH, QL, SS, WE.

##### 108. Policy Making in the Public Sector (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended; consent of instructor. Theoretical rationale for governmental activity, program evaluation, PPBS, positive theories of policy making, the quantitative study of policy determinants, implementation, and proposals for improved decision making. GE credit: SocSci, Wrt | ACGH, QL, SS, WE.

##### 109. Public Policy and the Governmental Process (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. The processes of formulating public policy, including individual and collective decision making, political exchange, competition, bargaining, coalition formation and the allocation of public goods, resources and opportunities. Offered irregularly. GE credit: SocSci, Wrt | ACGH, QL, SS, WE.

**110. The Strategy of Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Introduction to game theory. Explanation of the behavior of individuals in strategic interaction. Rational and behavioral approaches. Applications to political science and other fields. Offered irregularly. GE credit: SocSci, Wrt | QL, SS, WE.

**112. Contemporary Democratic Theory (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4 recommended. Major contemporary attempts to reformulate traditional democratic theory, attempts to replace traditional theory by conceptual models derived from modern social science findings. Offered irregularly. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.

**113. American Political Thought (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4 recommended. Origins and nature of American political thought. Principles of American thought as they emerge from the founding period to the present. Offered irregularly. GE credit: ArtHum or SocSci, Wrt | ACGH, AH or SS, WE.

**114. Quantitative Analysis of Political Data (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 51 recommended. Logic and methods of analyzing quantitative political data. Topics covered include central tendency, probability, correlation, and non-parametric statistics. Particular emphasis will be placed on understanding the use of statistics in political science research. Offered irregularly. GE credit: ArtHum or SocSci, Wrt | AH or SS or SE, QL, VL, WE.

**115. Medieval Political Thought (4)**

Lecture—3 hours; term paper. Prerequisite: course 4 recommended. Examination of the ideas central to medieval political thinking. Emphasis will be upon the thoughts of the major political thinkers of the period, rather than upon political history. Offered irregularly. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.

**116. Foundations of Political Thought (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4 recommended. Analysis and evaluation of the seminal works of a major political philosopher or of a major problem in political philosophy. May be repeated one time for credit when topic differs. Offered irregularly. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

**117. Topics in the History of Political Thought (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4 recommended. The political thought of a specific historical period. Topics may include: Ancient Athens, the Italian Renaissance, the Enlightenment, or Nineteenth Century Germany. May be repeated once for credit. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

**118A. History of Political Theory: Ancient (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4 recommended. Critical analyses of classical and medieval political philosophers such as Plato, Aristotle, Cicero and St. Thomas. Offered irregularly. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

**118B. History of Political Theory: Early Modern (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4 recommended. Critical analyses of the works of late modern political philosophers such as Rousseau, Kant, Hegel, Tocqueville, Mill, Marx and Nietzsche. Offered irregularly. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

**118C. History of Political Theory: Late Modern (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4 recommended. Critical analyses of the works of late modern political philoso-

phers such as Rousseau, Kant, Hegel, Tocqueville, Mill, Marx and Nietzsche. Offered irregularly. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

**119. Contemporary Political Thought (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4 recommended. Contemporary political thought from the end of the nineteenth century to the present. Emphasis upon an individual philosopher, concept, or philosophical movement; e.g., Nietzsche, Continental political thought, Rawls and critics, theories of distributive justice, feminist theory. Offered irregularly. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

**120. Theories of International Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 3 recommended; consent of instructor. Major contemporary approaches to the study of international politics, including balance of power, game theory, Marxist-Leninist theory, systems theory, and decision-making analysis. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

**121. Scientific Study of War (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 3 recommended. An analysis of political processes involved in the initiation, conduct and termination of modern interstate warfare. Offered irregularly. GE credit: SocSci, Wrt | QL, SS, WE.

**122. International Law (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 3 recommended. Selected topics in international law; territory, sovereign immunity, responsibility, the peaceful settlement or nonsettlement of international disputes. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

**123. The Politics of Interdependence (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 3 recommended; consent of instructor. In the past several decades, growing economic interdependence has generated new problems in international relations. Course deals with difficulties in managing complex interdependence and its implication on national policies and politics. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

**124. The Politics of Global Inequality (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 3 recommended. Analysis of current economic and political international relations resulting from a long standing division of the global system into rich and poor regions. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**126. Ethnic Self-Determination and International Conflict (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 3 recommended. Compares the claims of the state and ethnic peoples in countries undergoing internal conflicts; e.g., South Africa, Northern Ireland. Analyzes the role of the international community in facilitating the peaceful resolution of conflicts. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**129. Special Studies in International Politics (4)**

Lecture—3 hours; term paper. Prerequisite: course 3 recommended. Intensive examination of one or more special problems in international politics. May be repeated one time for credit when different topic is studied. Offered irregularly. GE credit: SocSci, Wrt | SS, WE. —W.

**130. Recent U.S. Foreign Policy (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 3 recommended; consent of instructor. Broad survey of the development of U.S. foreign policy in twentieth century with emphasis on transformation of policy during and after World War II, and the introduction to analytic tools and concepts useful for understanding of current foreign policy issues. Offered irregularly. GE credit: SocSci, Wrt | ACGH, SS, WE.

**131. Analysis of U.S. Foreign Policy (4)**

Lecture—3 hours; term paper. Prerequisite: course 3 recommended; consent of instructor. Detailed presentation and examination of the formulation of execution of U.S. foreign policy. Survey of numerous factors influencing policy outcomes and how such determinants vary according to policy issue areas. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

**132. National Security Policy (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 3 recommended. Development of national security policies since 1945. Analysis of deterrence and assumptions upon which it is based. Effects of nuclear weapons upon conduct of war, alliance systems, and the international system. Prospects of security and stability through arms control. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

**134. Africa and U.S. Foreign Policy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 recommended; consent of instructor. Overview of American foreign policy toward Africa. Relationship to global adversaries. Legacies of colonialism. Challenge of national self-determination and white racism. Policies on non-alignment, producer cartels, multinational corporations, continental integration and trade and aid relations. Offered irregularly.

**135. International Politics of the Middle East (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 3 recommended; consent of instructor. Restricted to upper division standing. International politics of the Middle East as a microcosm of world politics. The Middle East as a regional system. Domestic and International Politics in the Middle East. Changing Political Structures in the Middle East. Superpower involvement in the Middle East. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

**136. The Arab-Israeli Conflict (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 3 recommended. Causes, course, and implications of Arab-Israeli conflict. Competing Israeli and Arab narratives, politics of force, diplomacy. Domestic politics and A-I conflict, the superpowers and the A-I conflict, A-I conflict and world politics, potential solutions. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

**137. International Relations in Western Europe (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 3 recommended. Analysis of European unity, problems of the Atlantic alliance, Atlantic political economy, East-West relations, communism in Western Europe and the relationship between domestic politics and foreign policy. Offered irregularly. GE credit: SocSci, Wrt | SS, WC, WE.

**139. Special Studies in Foreign Policy (4)**

Lecture—3 hours; term paper. Prerequisite: course 3 recommended; consent of instructor. Extensive examination of one or more special problems in foreign policy. May be repeated one time for credit. Offered irregularly.

**140A. Comparative Political Institutions: Electoral Systems (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended. Workings of electoral institutions, focusing on systems used to elect presidents and assemblies, pass laws, and generally make decisions. Examples from systems throughout the world, including cases from both the advanced industrial and developing worlds. Offered irregularly. GE credit: SocSci, Wrt | QL, SS, WE.

**140B. Comparative Political Institutions: Parties (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended; consent of instructor. The factors shaping political parties and their role in democratic representation. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WE.

**140C. Comparative Political Institutions: Legislatures (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended; consent of instructor. Examination of legislatures from a comparative perspective. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

**140D. When Institutions Fail (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended. Examination of factors contributing to the success and failure of political institutions. Offered in alternate years. GE credit: QL, SS, WE.—F, S. (F, S.)

**140E. Policy-Making Processes (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended. Comparative analysis of policy-making in the U.S. and other countries. Offered irregularly. GE credit: QL, SS, WE.—F, S. (F, S.)

**142A. Comparative Development: Political Development in Modernizing Societies (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended; consent of instructor. Nature and sequence of political development; its economic and social concomitants; role of elites, military, bureaucracy, and party systems; social stratification and group politics; social mobilization and political participation; instability, violence, and the politics of integration. Offered irregularly. GE credit: SocSci, Wrt | SS, WC, WE.

**142B. Comparative Development: Politics and Inequality (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended; consent of instructor. Linkages between politics and the distribution of social and economic goods. Impact of civil rights legislation, the politics of welfare states, and the effects of political participation on the distribution of goods. Offered irregularly. GE credit: SocSci, Wrt | SS, WC, WE.

**142C. Comparative Political Development: Democracy and Democratization (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended. Examination of conditions promoting democratization and democratic stability. Offered irregularly. GE credit: SS, WE.—F, S. (F, S.)

**143A. Latin American Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended. Issues related to democratic consolidation in Latin America, with a regional focus on South America. Topics include transitions to democracy, the role of the military, political economy, and political behavior. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**143B. Mexican Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended. Introduction to the politics of contemporary Mexico. Focus on rise, fall, and aftermath of Mexico's one-party dominant system. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**144A. Politics of Post-Communist Countries: East European Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended. Post-war democratization, state-building and economic reform in East European states. Offered irregularly. GE credit: SocSci, Wrt | SS, WC, WE.

**144B. Politics of Post-Communist Countries: Russia (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended. Democratization, state-building and economic reform; creation of new institutions; impacts of Soviet rule. Offered irregularly. GE credit: SocSci, Wrt | SS, WC, WE.

**146A. Politics of Africa: Issues in Contemporary African Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended. African politics since the end of the Cold War. Topics include: Strategic Security Approach, Democratization, Human Rights, HIV/AIDS, African Peacekeeping, Terrorism, Religious and Ethnic Conflict, Debt and Stalled Development. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

Security Approach, Democratization, Human Rights, HIV/AIDS, African Peacekeeping, Terrorism, Religious and Ethnic Conflict, Debt and Stalled Development. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**146B. Politics of Africa: Development in Africa (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended. Political and economic development within Sub-Saharan Africa. States and institutions, democracy, party systems, military coups/rule, bureaucracy/corruption, race/ethnicity, national/regional integrations, trade unions, economic development strategies, class formation, and women's roles and ideology. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**147A. West European Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended; consent of instructor. The evolution, politics, and contemporary problems of selected political systems of Western Europe. Offered irregularly. GE credit: SocSci, Wrt | SS, WC, WE.

**147B. West European Politics: British Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended; consent of instructor. The evolution, politics, and contemporary problems of Britain's political system. Offered irregularly. GE credit: SocSci, Wrt | SS, WC, WE.

**147C. West European Politics: French Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended; consent of instructor. The evolution, politics and contemporary problems of France's political system. Offered irregularly. GE credit: SocSci, Wrt | SS, WC, WE.

**147D. West European Politics: German Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended. Political Science & International Relations Majors. Evolution, politics and contemporary problems of Germany's political system. Offered irregularly. GE credit: SocSci, Wrt | SS, WC, WE.

**148A. Government and Politics of East Asia: China (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended. Evolution of political institutions and political culture in China with emphasis on the post-1949 period. Primary attention to nationalism, modernization and political efficacy. Offered irregularly. GE credit: SocSci, Wrt | SS, WC, WE.

**148B. Government and Politics in East Asia: Japan (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended. Japanese politics, with an emphasis on the postwar period. Particular emphasis on political parties, elections, political economy, and social problems. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**148C. Government and Politics in East Asia: Southeast Asia (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended. Evolution of political institutions and economy of selected nations in Southeast Asia. Emphasis on imperialist legacy, nation building in multi-ethnic communities, and contrasts in economic performance. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**150. Judicial Politics and Constitutional Interpretation (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Politics of judicial policy making, issues surrounding constitutional interpretation and decision making, prerequisite for courses on the politics of constitutional law. Offered irregularly. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

**151. The Constitutional Politics of the First Amendment and the Right to Privacy (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. The constitutional politics surrounding such issues as the right to free expression, associational rights, the right to free exercise of religious beliefs and the right to privacy. Offered irregularly. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

**152. The Constitutional Politics of Equality (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Constitutional politics of equality in the American political system; issues surrounding constitutional doctrine and judicial policymaking; special attention on racial and sexual equality. Offered irregularly. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

**153. The Constitutional Politics of the Justice System (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Constitutional politics of the American criminal justice system. Issues surrounding constitutional doctrine and judicial policymaking on issues such as search and seizure, arrest, trial, incarceration and other issues of due process. Offered irregularly. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

**154. Legal Philosophy (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Analysis of the nature and functions of law; law as an instrument of social control and the relationship between law and morality. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

**155. Judicial Process and Behavior (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Analysis of the behavior of judges and courts in the political process. Techniques of judicial decision making. Relationships among courts and other decisionmaking bodies. Offered irregularly. GE credit: SocSci, Wrt | ACGH, SS, WE.

**160. American Political Parties (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Analysis of the structured operations of the party system in the United States; party functions and organizations, nomination processes, campaigns and elections, party trends and reforms. Offered irregularly. GE credit: SocSci, Wrt | ACGH, DD, QL, SS, WE.

**162. Elections and Voting Behavior (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Analysis of American elections and partisan behavior; political socialization, political participation, partisanship and individual and group determinants of voting. Offered irregularly. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

**163. Group Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Groups, institutions and individuals, especially in American politics. Historical and analytical treatment of group theories as applied to interest groups (especially labor, business, agriculture, science, military); to racial, ethnic and sectional groups; to parties, public and legislative groups, bureaucracies. Offered irregularly. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

**164. Public Opinion (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended; consent of instructor. Nature of public opinion in America as it is supposed to be and as it is. Distribution of opinions among different publics and the significance of that distribution for system stability and institutions. Opinion polling and its problems. Offered irregularly. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

**165. Mass Media and Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Organization of and decision making within the media; media

audiences and the effect of the media on attitudes and behavior; the relationship of the government to the media (censorship, secrecy, freedom of the press, government regulation); the media in election campaigns. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

#### **166. Women in Politics (4)**

Lecture—3 hours; discussion—1 hour or seminar—1 hour. Prerequisite: course 1 recommended. The role of women in American politics. Historical experiences; contemporary organizations and strategies; areas of legislative concern; the impact of differences in social class, race, and ethnicity upon the involvement of women in politics. Offered irregularly. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

#### **168. Chicano Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Political aspects of Chicano life in America; examines the Chicanos political role as it has been historically defined by different groups in society and the Chicanos responses to his/her political environment. Offered irregularly. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

#### **170. Political Psychology (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Overview to the growing literature on political psychology. Introduction to how psychological concepts (personality, attitudes, stereotypes, heuristics, affect, identity, group dynamics) help us understand how citizens think about politics. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

#### **171. The Politics of Energy (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Nature and performance of political processes for making energy choices at the international, national and state levels. Interaction of energy policy with other political goals and the ability of governmental institutions to overcome constraints on policy innovation. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

#### **172. American Political Development (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Systematic analysis of contemporary issues in American political development: historical determinants of political change; the timing and character of institutional development; conditions for successful political action. Democratization, cultural change, party formation, state-building, constitutionalism, race relations. Offered irregularly. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

#### **174. Government and the Economy (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Political basis of economic policy (taxation, spending and regulation); impact of prices, employment and growth on political demands; elite responses to economic conditions; policy alternatives and the public interest. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

#### **175. Science, Technology, and Policy (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended; consent of instructor. Analysis of policymaking for science and the use of scientific expertise for making decisions about technology. Topics include funding of basic research, relationship of science to technological development, science and military policy, technological risks, technology assessment and scientists and politics. Offered irregularly. GE credit: SocSci, Wrt | QL, SS, WE.

#### **176. Racial Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. Race, racial attitudes and racial policies in the United States with a specific emphasis on African Americans. Offered irregularly. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.

#### **179. Special Studies in Comparative Politics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2 recommended; consent of instructor. Intensive examination of one or more special problems appropriate to comparative politics. Coverage is given to formal and informal political institutions, economically developing and developed countries, and non-democratic, democratic, and democratizing countries. May be repeated one time for credit. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

#### **180. Bureaucracy in Modern Society (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 or course 2 recommended; consent of instructor. Role of bureaucracy in a complex society, with emphasis upon changing relationships between government and the economy; consequences of rapid technological and social change for bureaucratic structures and processes; the problems of reconciling expertise and democracy and increasing the responsiveness of public bureaucracy. Offered irregularly. GE credit: SocSci, Wrt | ACGH, SS, WE.

#### **183. Administrative Behavior (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1 recommended. The implications for American public administration of evolving concepts about behavior in organizations. Offered irregularly. GE credit: SocSci, Wrt | ACGH, SS, WE.

#### **187. Administrative Theory (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 4 recommended. Historical and critical analysis of the principal theories of organization and management of public agencies in light of such concepts as decision making, bureaucracy, authority and power, communication and control; examination of role of government bureaucracies in the total society. Offered irregularly. GE credit: SocSci, Wrt | SS, WE.

#### **190. International Relations (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 3 recommended; consent of instructor. Analysis and evaluation of substantive issues in contemporary international relations. Readings drawn from current academic and non-academic periodicals. GE credit: SocSci, Wrt | SS, WE.

#### **192A. Internship in Public Affairs (5)**

Prerequisite: enrollment dependent on availability of intern positions with highest priority assigned to students with Political Science—Public Service major; upper division standing. Supervised internship and study in political, governmental, or related organizations. (P/NP grading only.) GE credit: ACGH, SS, WE.

#### **192B. Internship in Public Affairs (5)**

Prerequisite: course 192A; enrollment dependent on availability of intern positions with highest priority assigned to students with Political Science—Public Service major; upper division standing. Supervised internship and study in political, governmental, or related organizations. (P/NP grading only.) GE credit: ACGH, SS, WE.

#### **193. Research in Practical Politics (2)**

Research project—6 hours. Prerequisite: courses 192A, 192B; open only to Political Science—Public Service majors, for whom it is required. Supervised preparation of an extensive paper relating internship experience to concepts, literature, and theory of political science. GE credit: SocSci | SS, WE.

#### **193W. Washington Center Research Seminar (4)**

Lecture/discussion—1 hour; independent study—3 hours; tutorial—0.5 hour. Prerequisite: course 192W concurrently. Core academic component of Washington Program. Topics coordinated with internships. Research draws on resources uniquely available in Washington, DC. Supervised preparation of extensive paper. (Same course as UC Davis Washington Center 193.) GE credit: SocSci, Wrt | OL, SS, WE.

#### **194HA. Special Study for Honors Students (4)**

Seminar—2 hours; independent study—2 hours. Prerequisite: major in Political Science with upper division standing and a GPA of 3.500 in the major. Directed reading, research and writing culminating in preparation of a senior honors thesis under the direction of faculty adviser. (Deferred grading only, pending completion of sequence.) Offered irregularly. GE credit: SocSci | OL, SS, VL, WE.

#### **194HB. Special Study for Honors Students (4)**

Seminar—2 hours; independent study—2 hours. Prerequisite: major in Political Science with upper division standing and a GPA of 3.500 in the major. Directed reading, research and writing culminating in preparation of a senior honors thesis under the direction of faculty adviser. (Deferred grading only, pending completion of sequence.) Offered irregularly. GE credit: SocSci | OL, SS, VL, WE.

#### **195. Special Studies in American Politics (4)**

Seminar—4 hours. Prerequisite: consent of instructor and upper division standing. Intensive examination of one or more special problems appropriate to American politics. May be repeated one time for credit when topic differs. GE credit: SocSci | ACGH, SS, WE.

#### **196A. Seminar in American Politics (4)**

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in American politics. Topics may include Congress, the Presidency, the Supreme Court, federalism, voting behavior, interest groups, ethnic groups or other topics with a more specialized content than normal course offerings. May be repeated one time for credit when topic differs. GE credit: SocSci | ACGH, SS, WE.—F, W, S.

#### **196B. Seminar in Comparative Politics (4)**

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in comparative politics. Topics may include one country or geographical area, political institutions or behavior across countries, political development, or other topics that are more specialized than normal course offerings. May be repeated one time for credit when topic differs. GE credit: SocSci | SS, WE.

#### **196C. Seminar in International Relations (4)**

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in international relations including study of international political institutions (UN, EU, or NATO) or interstate relations (war, trade, immigration) and other topics with more specialized content than normal course offerings. May be repeated one time for credit when topic differs. GE credit: SocSci | SS, WE.

#### **196D. Seminar in Political Theory (4)**

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in political theory. Topics may include study of a single political thinker, a group of related thinkers, development of political concepts, or other topics with more specialized content than normal course offerings. May be repeated one time for credit when topic differs. GE credit: SocSci | SS, WE.

#### **196E. Seminar in Research Methods (4)**

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, and writing in selected topics in research methods such as research design, statistics, game theory. May be repeated one time for credit when topic differs. GE credit: SocSci | QL, SS, VL, WE.

#### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate**

**201. Urban Government and Politics (4)**

Seminar—4 hours. Survey and analysis of the literature in the field of local government and politics in the United States. Approaches to the study of political reform, local autonomy, community power, representation, expertise, service delivery, policymaking and political change. Offered in alternate years.

**202. American State Government and Politics (4)**

Seminar—4 hours. Survey and analysis of the literature in the field of state government, politics, and policy. Approaches to the study of the American states as political systems, including their governing institutions and processes and their role in the Federal system. Offered in alternate years.

**203A. American Government: The Presidency (4)**

Seminar—3 hours; term paper. Restricted to graduate students only. Thorough overview of the current research on political executives, with particular emphasis on the American presidency. Two principal goals: the development of important and innovative student research programs; and adequate preparation for qualifying examinations.

**203B. American Government: Congress (4)**

Seminar—3 hours; term paper. Restricted to graduate students only. Thorough overview of the current research on Congress, with particular emphasis on political representation. Two principal goals: the development of important and innovative student research programs; and adequate preparation for qualifying examinations.

**203C. American Government: Courts (4)**

Seminar—4 hours. Survey and analysis of the literature in the field of American government with a focus on courts. Emphasis on the development and testing of theories of behavior and processes.

**207. Environmental Public Policy (4)**

Seminar—4 hours. Analysis of the interface between the world of academic reflection about ecological and environmental problems and the world of political action. Evaluation of alternative approaches to policy analysis and recommendation. Individual research, including field research, will parallel discussion of the literature.

**208. Policy Analysis (4)**

Seminar—4 hours. Social science techniques applied to public policy formation and evaluation.

**209. The American Political System (4)**

Seminar—3 hours; term paper. Restricted to graduate students only. Analysis of selected theoretical and empirical issues posed by contemporary research in American government and politics.

**210. Research Design in Political Science (4)**

Seminar—3 hours; discussion/laboratory—1 hour. Prerequisite: graduate standing. Introduction to philosophy of science and research design for political science. Topics include: logic of empirical research, overview of research design approaches for political science research.

**211. Research Methods in Political Science (4)**

Seminar—3 hours; laboratory/discussion—1 hour. Prerequisite: graduate standing. Pass One open to graduate majors; Pass Two open to graduate students. Introductory seminar on the foundations of probability theory and mathematical statistics that are critical to empirical investigations in political science. —F. (F.) Joyce

**212. Quantitative Analysis in Political Science I (4)**

Seminar—3 hours; laboratory/discussion—1 hour. Prerequisite: course 211. Pass One open to graduate majors; Pass Two open to graduate students. Seminar provides students with an introduction to the linear regression model. Students who complete the

course will have a working knowledge of basic regression techniques and problems. —W. (W.) Huckfeldt

**213. Quantitative Analysis in Political Science II (4)**

Seminar—3 hours; term paper. Prerequisite: courses 211, 212. Pass One open to graduate majors; pass 2 open to graduate students. More advanced topics in the use of statistical methods, with emphasis on political applications. Topics include: properties of least squares estimates, problems in multiple regression, and advanced topics (probit analysis, simultaneous models, time-series analysis, etc.).

**214A. Research in Political Science (4)**

Discussion—2 hours; lecture—1 hour; term paper. Prerequisite: course 213. Advanced level graduate students in the Department of Political Science only. Research seminar sequence required of all Ph.D. students. Design, execution, and defense of an original piece of research in political science, culminating in a paper of publishable quality. (Deferred grading only, pending completion of sequence.)

**214B. Research in Political Science (4)**

Discussion—2 hours; lecture—1 hour; term paper. Prerequisite: courses 212 and 214A. Advanced level graduate students in the Department of Political Science only. Research seminar sequence required of all Ph.D. students. Design, execution, and defense of an original piece of research in political science, culminating in a paper of publishable quality. (Deferred grading only, pending completion of sequence.)

**215. Introduction to Modeling Political Behavior (4)**

Seminar—3 hours; term paper. Prerequisite: courses 211, 212. Pass One open to graduate majors; pass 2 open to graduate students. Introduction to formal and game theoretic analyses of politics. Students will learn basic game theory and modeling skills. We examine the benefits of modeling, and look at examples of formal analysis in a variety of political science subfields.

**216. Qualitative Research Methods (4)**

Seminar—3 hours; term paper. Methodology for utilizing theoretically-oriented case studies and controlled comparison of a small number of cases to develop and test theories. Examination of how the case study method complements experimental, statistical and deductive modes of research. Offered in alternate years.

**217. Social Choice Theory and Spatial Modeling (4)**

Seminar—4 hours. Introduction to social choice theory and formal spatial modeling including Arrow's Theorem, the paradox of voting, cycling and agenda control. Focus on mastering modeling techniques as well as interpretation of classic works. Offered in alternate years.

**218. Topics in Political Theory (4)**

Seminar—3 hours; term paper. Topics vary and may be the work of a single theorist, time period, or political concept, such as justice. May be repeated three times for credit when topic differs.

**219A. Political Theory Sequence (4)**

Seminar—3 hours; term paper. Survey of the great works in ancient and medieval political theory including such writers as Plato, Aristotle, Cicero, St. Augustine, Aquinas, Alfarabi and Marsilius. Discussion of various interpretations of these authors. Offered in alternate years.

**219B. Political Theory Sequence (4)**

Seminar—3 hours; term paper. Survey of the great works in early modern to contemporary political theory including such writers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, Nietzsche, and Rawls. Discussion of various interpretations of these authors. Offered in alternate years.

**219C. Contemporary Political Theory (4)**

Seminar—3 hours; term paper. Survey of important works in contemporary political theory including such writers as Nietzsche, Heidegger, Arendt, Rawls, Nozick, Sandel. May be repeated for credit if topic differs.

**220. Seminar in Political Theory (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Open to graduate students only. Introduction to political theory and current debates over its study. Readings from and textual interpretations of political theory including the Federalist Papers and major works by thinkers such as Plato, Aristotle, Machiavelli, Hobbes, Locke, Rousseau, and Rawls. Other readings addressing issues of textual interpretation.

**223. International Relations (4)**

Seminar—3 hours; term paper.

**225. The International System (4)**

Seminar—3 hours; term paper. Analysis of the international system by means of theory formulation and integration; critique of research designs; use of various techniques of data generation and analysis.

**226. Seminar in International Political Economy (4)**

Seminar—3 hours; term paper. Restricted to graduate students. Research in international political economy. Structure of the global economy, as well as specific dimensions of international economic relations, including trade, capital flows, global production structures, and migration. Offered in alternate years.

**230. American Foreign Policy (4)**

Seminar—3 hours; term paper.

**231. U.S. Political Culture and Foreign Relations (4)**

Seminar—3 hours; term paper. Relates U.S. political culture to formulation of foreign policy. Analyzes American ideological preferences in historical perspective, contemporary public opinion, decision making and implementation. Concludes by examining linkages between foreign policy behavior and democratic process. Offered in alternate years.

**241. Communist Political Systems (4)**

Seminar—4 hours. Prerequisite: course 141 or the equivalent, or consent of instructor. Systematic analysis of selected topics dealing with the political process of communist political systems.

**242. Seminar in Comparative Politics (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Systematic survey of theories and methods used in the study of comparative politics.

**243. Comparative Institutional Change (4)**

Seminar—3 hours; term paper. Restricted to graduate students. Comparison of institutional changes in countries of the former Soviet Union and Eastern Europe during the period of transition to democracy. Special attention to institutions of mass representation—electoral and party systems and national legislatures. Offered in alternate years.

**246. Policymaking in Third-World Societies (4)**

Seminar—3 hours. Prerequisite: graduate standing or consent of instructor. Included in an analysis of policymaking process in Third-World countries are such topics as political resources, institutional resources, decision making, resource allocations, planning, and budgeting, implementation, and distribution of world resources. Offered in alternate years.

**250. Policy Development and Impact in U.S. Courts (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Thorough overview of the literature regarding courts as policymaking institutions of government, with emphasis on the formation and implementation of judicial policy. Differences and similarities across the judicial, congressional, and executive branch policy processes. Offered in alternate years.

**260. Political Parties (4)**

Seminar—3 hours; term paper. Survey of selected topics in American and comparative parties.

**261. Political Behavior (4)**

Seminar—3 hours; term paper. Survey of selected topics in political behavior and public opinion. May be repeated three times for credit when topic differs.

**274. Political Economy (4)**

Seminar—3 hours; term paper. Restricted to graduate students. Politics of economic policy as reflected in taxation, spending and regulation; impact of prices, employment, and growth on political demands; government responses to economic conditions; electoral politics and the political business cycle. Offered in alternate years.

**279. Political Networks: Methods and Applications (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Structure of political networks, socio-matrices and affiliation networks; general networks characteristics: density, centralization, polarization, interdependence, dyadic and triadic characteristics; structural and role equivalence; subsets of networks: cliques, blocks and bloc modeling; characteristics of individuals in networks: centrality and prestige.

**280. Bayesian Methods: for Social and Behavioral Sciences (4)**

Seminar—3 hours; term paper. Prerequisite: course 212 or equivalent. Pass One open to graduate majors only; Pass Two open to graduate students. Methodology seminar introducing Bayesian quantitative methods to issues and problems in political science and other social and behavioral sciences. Offered in alternate years.

**281. Statistical Computing Issues in Political Science (4)**

Seminar—3 hours; discussion/laboratory—1 hour. Prerequisite: course 213 or equivalent. Restricted to graduate standing. Methodology seminar introducing computing issues in empirical models for political science and other social and behavioral sciences. Offered in alternate years.

**282. Advanced Modeling of Political Behavior (4)**

Seminar—3 hours; term paper. Prerequisite: course 215 or equivalent. Restricted to graduate standing or with instructors permission. Applications of formal theory to political science. Review of relevant contributions in other social sciences. Consideration of advanced techniques in game theory. Rational and behavioral approaches.

**283. Organizational Behavior (4)**

Seminar—4 hours. Organizational behavior as it relates to public sector decision making.

**284. Advanced Network Analysis (4)**

Seminar—3 hours; term paper. Prerequisite: course 211, 212, 279. Exponential Random Graph Models (ERGMS) of networks, game theoretic models of network formation and network dynamics, diffusion processes, shocks and network collapse, percolation, cross-network spillover processes, social and political applications of advanced network models. Offered in alternate years.—Maoz, Zeev

**290A. Research in American Government and Public Policy (4)**

Seminar—3 hours; term paper. Restricted to graduate students. Special research seminar on problems and issues in the study of American government and public policy. May be repeated up to 6 times for credit if topic differs.

**290B. Research in Political Theory (4)**

Lecture—3 hours; term paper. Restricted to graduate students only. Special research seminar on problems and issues in the study of political theory. May be repeated six times for credit if topic varies.

**290C. Research in International Relations (4)**

Lecture—3 hours; term paper. Restricted to graduate students only. Special research seminar on select problems and issues in the study of international relations. May be repeated six times for credit if topic varies.

**290D. Research in Judicial Politics (4)**

Seminar—4 hours. Prerequisite: graduate standing in political science or consent of instructor. Contemporary research on judicial politics, judicial institutions, jurisprudence, and judicial behavior.

**290E. Research in Political Parties, Politics, and Political Behavior (4)**

Seminar—4 hours. Special research seminar on selected problems and issues in the study of political parties, politics, and political behavior.

**290F. Research in Comparative Government and Policy (4)**

Lecture—3 hours; term paper. Restricted to graduate students only. Special research seminar on select problems and issues in the study of comparative government and policy. May be repeated six times for credit if topic varies.

**290G. Research in Methodology (4)**

Lecture—3 hours; term paper. Prerequisite: course 212. Special research seminar on selected problems and issues in methods in political science. May be repeated three times for credit if topic varies.

**297. Internships in Political Science (2)**

Seminar—2 hours. Prerequisite: open only to persons who have internships or other positions in governmental agencies, political parties, etc. Application and evaluation of theoretical concepts through work experience or systematic observation in public and political agencies. May be repeated for credit. (S/U grading only.)

**298. Group Study (1-5)**

(S/U grading only.)

**299. Research (1-12)**

(S/U grading only.)

**299D. Directed Reading (1-12)**

(S/U grading only.)

**Professional****390. The Teaching of Political Science (1)**

Seminar—1 hour. Prerequisite: graduate student standing in Political Science. Methods and problems of teaching political science at the undergraduate level. (S/U grading only.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

**Graduate Study.** The Graduate Group in Population Biology emphasizes programs of study and research leading to the Ph.D. degree. The Group concentrates on population biology as the broad discipline that blends ecology, evolution, population genetics and systematics into a unified field. The course curriculum consists of first-year core courses offered by the Group faculty, seminars, and advanced courses in population biology, and related disciplines, chosen in consultation with a guiding committee.

**Graduate Adviser.** Consult the Population Biology Graduate Group office or website.

## Courses in Population Biology (PBG)

### Graduate

#### 200A. Principles of Population Biology (5)

Lecture—3 hours; discussion—2 hours. Prerequisite: course 231 concurrently and consent of instructor. Principles of single-species ecology and evolution. Topics include ecology of individuals, population growth models, structured populations, life history strategies, stochastic populations, basic population genetics theory, deleterious alleles in natural populations, and molecular population genetics. —F. (F.)

#### 200B. Principles of Population Biology (6)

Lecture—5 hours; discussion—1 hour. Prerequisite: course 200A, 231. Principles of multi-species communities. Topics include competition, mutualism, metapopulations, food webs and trophic cascades, interactions between simple ecological communities, island biogeography, succession, and large-scale patterns. —W. (W.)

#### 200C. Principles of Population Biology (6)

Lecture—5 hours; discussion—1 hour. Prerequisite: course 200B. Principles of microevolution and macroevolution. Topics include evolutionary quantitative genetics, analysis of hybrid zones, speciation, the fossil record, biogeography, and phylogeny reconstruction. —S. (S.)

#### 203. Advanced Evolution (3)

Lecture—1 hour; discussion—2 hours. Prerequisite: graduate standing. Adaptation and speciation, and biochemical and morphological evolution in plants and animals with emphasis on the appropriateness of different methods of analysis. Offered in alternate years.

#### 206. Ecology of Insect Parasitoids (4)

Lecture—3 hours; seminar—1 hour. Prerequisite: introductory animal ecology or behavior. Insect parasitoids will be investigated as model systems to address current topics in behavioral, population, and evolutionary ecology. Theory will be synthesized and critical empirical tests of ecological hypotheses emphasized. Offered in alternate years.

#### 207. Plant Population Biology (3)

Lecture—2 hours; laboratory/discussion—1 hour. Prerequisite: advanced undergraduate ecology course (e.g., Environmental Science and Policy 100, Evolution and Ecology 101, Entomology 104, Plant Biology 117), and advanced undergraduate course in genetics and/or evolution (e.g., Biological Sciences 101 or Evolution and Ecology 100). Introduction to theoretical and empirical research in plant population biology. Emphasis placed on linking ecological and genetic approaches to plant population biology. (Same course as Ecology 207.) Offered in alternate years. —W. (W.)

#### 212. Topics in Invertebrate Evolution (2)

Seminar—2 hours. Prerequisite: graduate standing or consent of instructor and Evolution and Ecology 112-112L; courses in evolutionary biology, systematics, and ecology highly recommended. Advanced seminar that critically examines problems relevant to evolutionary patterns among the invertebrates. May be repeated for credit when topic differs. (S/U grading only.)—(S.) Grosberg

#### 221. Animal Behavior, Ecology and Evolution (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 102, Evolution and Ecology 100, 101 or the equivalent, graduate standing, and consent of instructor. Interface between animal behavior, ecology and evolution. New developments in behavioral ecology and development and testing of hypotheses in this discipline. (Same course as Animal Behavior 221.)

#### 224. Field Reconnaissance for Population Biologists (2)

Fieldwork—6 hours. Prerequisite: graduate student in Population Biology, or consent of instructor. Biweekly field trips to acquaint students with plant and animal communities, biodiversity, and ecological and evolutionary research opportunities in northern and central California. May be repeated for credit. (S/U grading only.)

#### 225. Terrestrial Field Ecology (4)

Seminar—1 hour; field work—12 hours. Prerequisite: introductory ecology and introductory statistics, or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and written and oral presentation of results will be stressed. (Same course as Ecology/Entomology 225.)—S. (S.) Karban

#### 231. Mathematical Methods in Population Biology (3)

Lecture—3 hours. Prerequisite: Mathematics 16C or 21C or the equivalent. Mathematical methods used in population biology. Linear and nonlinear difference equation and differential equation models are studied, using stability analysis and qualitative methods. Partial differential equation models are introduced. Applications to population biology models are stressed. (Same course as Ecology 231.)—F. (F.) Hastings

#### 233. Computational Methods in Population Biology (3)

Lecture/laboratory—2 hours; discussion/laboratory—1 hour. Prerequisite: a course in theoretical ecology (e.g., Ecology 231 or an equivalent to Environmental Science and Policy 121 from your undergraduate institution) or consent of instructor; no programming experience required. Numerical methods for simulating population dynamics using the computational software package R. Emphasis placed on model formulation and development, theoretical concepts and philosophical principles to guide simulation efforts, model parameterization, and implementing simulations with R. (Same course as Ecology 233.) (S/U grading only.) Offered in alternate years. —(W.) Baskett, Schreiber

#### 250A. Interdisciplinary Approaches to Biological Invasions (4)

Lecture/discussion—4 hours. Prerequisite: graduate standing. An integrative consideration of biological invasions, including an overview of concepts from ecology, ecological theory, evolution, genetics, philosophy, and other areas. Emphasis on potential contributions of each area for interdisciplinary problem solving. —S. (S.)

#### 250B. Interdisciplinary Approaches to Biological Invasions (4)

Lecture/discussion—4 hours. Prerequisite: graduate standing. An integrative consideration of biological invasions, including an overview of concepts from history, sociology, communications, law, policy, management, and other areas. Emphasis on potential contributions of each area for interdisciplinary problem solving. —W. (W.)

#### 251. Collaborative Project in Biological Invasions (3)

Project; discussion—1 hour. Prerequisite: course 250A, 250B, or equivalent; and consent of instructor. A year-long interdisciplinary collaborative project focusing on biological invasions, resulting in a paper or other suitable product presented at a sym-

posium at the conclusion of the project. May be repeated up to five times. (S/U grading only.)—F, W, S. (F, W, S.)

#### 270. Research Conference in Evolutionary Biology (1)

Seminar—1 hour. Prerequisite: consent of instructor. Critical presentation and evaluation of current literature and ongoing research in evolutionary biology. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### 271. Research Conference in Ecology (1)

Seminar—1 hour. Prerequisite: consent of instructor. Critical presentation and evaluation of current literature and ongoing research in ecology. Requirements include active participation in weekly discussions and the presentation of a paper or chapter once per quarter. May be repeated for credit. (S/U grading only.)—W. (W.) Schoener, Schreiber

#### 287. Advanced Animal Behavior (2)

Seminar—2 hours. Prerequisite: graduate standing and consent of instructor, courses in animal behavior (Neurobiology, Physiology, and Behavior 102 or the equivalent), and either evolution (Evolution and Ecology 100 or the equivalent) or ecology (Evolution and Ecology 101 or the equivalent). Reading, reports and discussion on current topics in animal behavior, with a focus on topics that lie at the interface between animal behavior, ecology and evolution. (Same course as Animal Behavior 287.) May be repeated two times for credit.

#### 290. Seminar (1)

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Seminars presented by visiting lecturers, UC Davis graduate students and faculty. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### 290C. Research Conference in Population Biology (1)

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor; concurrent enrollment in course 299. Presentation and discussion of faculty and graduate student research in population biology. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### 292. Topics in Ecology and Evolution (1)

Seminar—1 hour. Prerequisite: graduate standing. Seminar presented by visiting lecturers, UC Davis faculty and graduate students. May be repeated for credit. (Same course as Ecology 296.) (S/U grading only.)—F, W, S. (F, W, S.)

#### 296. Seminar in Geographical Ecology (2)

Seminar—2 hours. Prerequisite: Evolution and Ecology 100 or 101 or consent of instructor. Recent developments in theoretical and experimental biogeography, historical biogeography and related themes in systematics, the biology of colonizing species, and related topics. (Same course as Geography 214.) (S/U grading only.)—S. (S.) Shapiro

#### 298. Group Study (1-5)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

#### 299. Research (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

## Population Health and Reproduction

See Veterinary Medicine, School of, on page 581.

## Precision Agriculture

(College of Agricultural and Environmental Sciences)

The Department of Biological and Agricultural Engineering offers a minor in Precision Agriculture, the latest farming concept that optimizes fertilizer, pesti-

cide and water use, while minimizing environmental concerns.

### Minor Program Requirements:

This minor acquaints students with recent developments and their applications to agriculture, in geographic information systems (GIS), global positioning systems (GPS), variable rate technologies (VRT), crop and soil sensors, and remote sensing. The minor prepares students for challenging positions in site-specific crop management as we enter the "information age" in agriculture.

UNITS

#### Precision Agriculture ..... 18

Applied Biological Systems Technology/  
Landscape Architecture 150 and  
Environmental remote Sensing 186 and  
186L.....9  
Select 9 or more units from Applied Biological  
Systems Technology 181N, 182, Plant  
Sciences 100A, 100AL, 100B, 100BL,  
100C, 100CL, 110A, 110B, 110BL, 110C,  
Plant Sciences 120 or Statistics 100,  
Environmental and Resource Sciences 186,  
Soil Science 109 .....9

**Minor Advisers.** S.K. Upadhyaya, D.K. Giles

## Preventive Veterinary Medicine

See Veterinary Medicine, School of, on page 581.

## Psychiatry

See Medicine, School of, on page 427.

## Psychology

(College of Letters and Science)

Paul Hastings, Ph.D., Chairperson of the Department

Joanna E. Scheib, Ph.D., Associate Adjunct  
Professor

### The Major Programs

The psychology program at UC Davis is broad and includes students and faculty with a variety of interests. The department has developed around five major areas of emphasis:

*Perception, Cognition, and Cognitive Neuroscience (PCCN)* involves the study of awareness and thought, and includes such topics as perception, learning, memory, language and cognition.

*Biological Psychology* covers a broad spectrum of topics including evolutionary, neurobiological, and molecular mechanisms of behavior.

*Social-Personality Psychology* involves the study of the individual in his or her social environment and includes such topics as personality and individual differences, emotions, stereotyping and prejudice, intergroup relations, the psychology of religion and psychological health and dysfunction.

*Developmental Psychology* involves the study of changes in behavioral, cognitive, emotional, and social abilities that occur throughout the lifespan. Typical and atypical development are examined using a variety of methods including behavioral, neuroimaging, and physiological assessments.

*Quantitative Psychology* involves the study of linear and nonlinear models, psychometrics, mixed-effects models, and dynamic models, including experimental design, analysis of variance, regression, multivariate analysis, latent growth models, time series models, and factor analytic models.

The department offers the Bachelor of Arts (A.B.) program for students interested in the liberal arts and the Bachelor of Science (B.S.) program geared for students with an interest in either biology or mathe-

matics. The main objective of both programs is a broad introduction to the scope of contemporary psychology. In addition to completing a number of common core courses for their degree, students may take approved elective courses from a wide range of topics including Educational Psychology, Interpersonal Communication, and Psychological Anthropology, to name a few. The department strongly encourages students to become involved in individual research projects under the direction of faculty members and to participate in our internship program to broaden experience and understanding of the field of psychology.

**Preparatory Requirements.** Before declaring a major in Psychology, students must complete the following two courses with a combined grade point average of at least 2.500. Both courses must be taken for a letter grade.

UNITS

#### Psychology 1, 41 ..... 8

If a 2.500 GPA is not attained in these two courses, a 2.000 GPA in a minimum of three upper division Psychology courses is also acceptable for major declaration.

**Career Alternatives.** A degree in psychology provides broad intellectual foundations which are useful to the graduate for the development of careers in a variety of areas, including social work, teaching, business, management and counseling. An undergraduate education in psychology also provides excellent preparation for graduate study. Individuals with degrees in psychology may enter graduate programs to prepare for teaching, research, or clinical/counseling careers in psychology, or may go on to professional schools for training in veterinary and human medicine, law, and many other professions.

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter ..... 17-20

Psychology 1 or the equivalent ..... 4  
Psychology 41 ..... 4  
Statistics 13 or 100 ..... 4  
Strongly recommended that Psychology 41 and Statistics 13 or 100 be completed in the first year.

Biological Sciences 2A; or a combination of Biological Sciences 10 and one course from: Anthropology 1, Molecular and Cellular Biology 10, or Neurobiology, Physiology, and Behavior 10 ..... 5 or 7-8

#### Depth Subject Matter ..... 40

Two courses from two of the following four groups and one course from the remaining two groups: ..... 23-24

Group A: Psychology 100 or 100Y, 130, 131, 132, 135, 136

Group B: Psychology 101, 113, 121, 122 (same course as Neurobiology, Physiology, and Behavior 150), 123 (same course as NPB 152), 124 (same course as Neurobiology, Physiology, and Behavior 124), 125, 126, 137, 159

Group C: Psychology 151, 152, 154, 158, 161, 162, 168

Group D: Psychology 140; (or Human Development 100A or 100B\*), Psychology 141 (same course as Human Development 101), Psychology 142 (same course as Human Development 102), 143, 146, 148

Approved Electives ..... 16-18  
Additional units chosen among Psychology courses and/or approved electives to achieve a total of 40 upper division units.

See list of approved electives below.

#### Total Units for the Major ..... 57-60

### Biological Emphasis

#### B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter ..... 53-61

Psychology 1 or the equivalent ..... 4

Psychology 41 .....	4
Statistics 13 or 100 .....	4
Strongly recommended that Psychology 41 and Statistics 13 or 100 be completed in the first year.	
Mathematics 16A-16B or 17A-17B or 21A-21B.....	6-8
Physics 10 or 10C or 7A-7B.....	3-8
Biological Sciences 2A, 2B, 2C 15 Chemistry 2A, 2B.....	10
Chemistry 8A-8B or 118A-118B or 128A-128B.....	6-8
<b>Depth Subject Matter .....</b>	<b>49</b>
Seven Psychology courses distributed as specified:	
Group A: Two courses from: Psychology 100 or 100Y, 130, 131, 132, 135, 136.....	8
Group B: Three courses from: Psychology 101, 113, 121, 122 (same course as Neurobiology, Physiology, and Behavior 150), 123 (same course as Neurobiology, Physiology, and Behavior 152), 124 (same course as NPB 124), 125, 126, 137, 159 . 10-12	
Group C: One course from: Psychology 151, 152, 154, 158, 161, 162, 168.....	4
Group D: One course from: Psychology 140 (or Human Development 100A or 100B*), Psychology 141 (same course as Human Development 101), Psychology 142 (same course as Human Development 102), 143, 146, 148.....	4
Approved Electives.....	12-14
Additional units to achieve 40 upper division units chosen from Psychology courses and/or approved electives. See list of approved electives below.	
Biological Sciences 101 .....	4
Neurobiology, Physiology, and Behavior 101 .....	5
<b>Total Units for the Major .....</b>	<b>102-110</b>

**Recommended**

Psychology 180B, 199, on a Biological Psychology topic, Anthropology 154A, Environmental Science and Policy 110, Evolution and Ecology 100, 101.

**Quantitative Emphasis****B.S. Major Requirements:**

	UNITS
<b>Preparatory Subject Matter.....</b>	<b>41-54</b>
Psychology 1 or the equivalent.....	4
Psychology 41 .....	4
Statistics 13 or 100 .....	4
Strongly recommended that Psychology 41 and Statistics 13 or 100 be completed in the first year.	
Mathematics 21A, 21B, 21C .....	12
Computer Science Engineering 30 or Computer Science Engineering 10 .....	4
Chemistry 10 or 2A-2B or 2AH-2BH....	4-10
Physics 10 or 10C or 7A-7B.....	3-8
Biological Sciences 2A; or a combination of Biological Sciences 10 and one course from: Anthropology 1, Molecular and Cellular Biology 10, or Neurobiology, Physiology, and Behavior 10.....	5-8
<b>Depth Subject Matter .....</b>	<b>49</b>

Five Psychology courses, distributed as specified:

- Group A: Two courses from: 100 or 100Y, 130, 131, 132, 135, 136..... 8
- Group B: Two courses from: Psychology 101, 113, 121, 122/Neurobiology, Physiology, and Behavior 150, 123/ Neurobiology, Physiology, and Behavior 152, 124/Neurobiology, Physiology, and

Behavior 124, 125, 126, 127, 137, 159 6-8	
Group C: One course from: Psychology 151, 152, 154, 158, 161, 162, 168 or .....	
Group D: One course from: Psychology 140 (or Human Development 100A or 100B*), Psychology 141/Human Development 101, Psychology 142/Human Development 102, Psychology 143, 146, 148 .....	4
Psychology 103A.....	5
One course from: Psychology 103B, 104, or the equivalent.....	4-5
Approved Electives.....	10-13
Additional units to achieve 40 upper division units chosen from Psychology courses and/or approved electives. See list of approved electives below.	
One course sequence from: Statistics 106-108; 130A-130B; or 131A-131B .....	8

**Total Units for the Major .....****90-103**

**Recommended for All Majors.** Students who plan to do graduate work in any area of psychology are strongly encouraged to gain experience through research and internship activities.

**Major Advisers.** See staff advisers in 101 Young Hall; [psychadvising@ucdavis.edu](mailto:psychadvising@ucdavis.edu)

<http://psychology.ucdavis.edu/undergraduate/advising>

\* Students who have completed Human Development 100A or 100B prior to Psychology 140 will receive 2 units of credit for Psychology 140.

**Minor Program Requirements:**

	UNITS
<b>Psychology .....</b>	<b>24</b>

Psychology 41 (Please note that Psychology 1 is a prerequisite for Psychology 41 and all upper division Psychology courses)..... 4
One course from each of the following four groups..... 15-16
Group A: Psychology 100 or 100Y, 130, 131, 132, 135, 136
Group B: Psychology 101, 113, 121, 122/NPB 150, 123/NPB 152, 124/NPB 124, 125, 126, 127, 137, 159
Group C: Psychology 151, 152, 154, 158, 161, 162, 168
Group D: Human Development 100A, 100B, Psychology 140, 141/Human Development 101, 142/Human Development 102, 143, 146, 148
Approved Electives .....
Additional units to achieve 20 upper division units chosen from Psychology courses and/or approved electives. See list of approved electives below.

**Approved Electives:**

Any Psychology courses inside or outside Core Groups:	
AAS 141—Psychology of African American Experience .....	3
ANT 132—Psychological Anthropology....	4
CHI 120—Chicana/o Psychology.....	4
CHI 121—Chicana/o Community Mental Health .....	4
CHI 122—Psychological Perspectives on Chicana/o and Latina/o Family .....	4
CHI 123—Psychological Perspectives on Chicana/o and Latina/o Family Children and Adolescents .....	4
CMN 120—Interpersonal Communication	4
CMN 122—Nonverbal Communication ...	4
CNS 100—Consumer Behavior .....	3
EDU 110—Educational Psychology .....	4
EXB 102—Introduction to Motor Learning and the Psychology of Sport and Exercise.....	4
HDE 100A—Infancy and Early Development .....	4
HDE 100B—Middle Childhood and Adolescence .....	4

HDE 100C—Adulthood and Aging .....	4
HDE 117—Longevity (Same course as ENT 117).....	4
HDE 163—Cognitive Neuropsychology in Adulthood and Aging .....	4
LIN 171—Introduction to Psycholinguistics .....	4
NPB 102—Animal Behavior.....	3
NPB 168—Neurobiology of Addictive Drugs .....	4
POL 170—Political Psychology .....	4
SOC 126—Social Interaction .....	4
SOC 135—Social Relationships .....	4
SOC 152—Juvenile Delinquency .....	4
SOC 171—Sociology of Violence and Inequality .....	4

**Honors and Honors Program.** In order to be eligible for high or highest honors in Psychology, the student must both meet the college criteria for honors and complete a research project involving a minimum of six units of course work over at least two quarters which represents an original analysis of data on psychological phenomena. Course 194HA-194HB or other approved courses can be used to satisfy the unit requirement. This project is to be written in thesis form and approved by the department. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

**Graduate Study.** The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained on our website.

**Graduate Adviser.** See <http://psychology.ucdavis.edu/graduate>.

**Courses in Psychology (PSC)****Lower Division****1. General Psychology (4)**

Lecture—4 hours. Introduction emphasizing empirical approaches. Focus on perception, cognition, personality and social psychology, and biological aspects of behavior. Only two units allowed to those who have taken course 15 or 16; no credit allowed to those who have taken both courses 15 and 16. GE credit: SocSci | SS.—F, W, S. (F, W, S.) Simonson, Thompson, Traxler

**12Y. Data Visualization in the Social Sciences (4)**

Lecture—2 hours; laboratory—1.5 hours; web virtual lecture—1.5 hours. Introduction to quantitative data across the social sciences (Communications, Political Science, Psychology, Sociology, and other disciplines). Transforming data, describing data, producing graphs, visual reasoning, and interpretations. (Same course as Communications 12Y, Sociology 12Y, Political Science 12Y.) GE credit: QL, VL.—F, W, S. (F, W, S.) Cross

**20. Freshman Psychology Seminar (4)**

Seminar—4 hours. Prerequisite: freshman standing. Instructor will acquaint students with his or her program of research, the development of scientific questions from the literature, and the application of research methods to examine these questions. Critical thinking will be encouraged via expository writing and brief presentations.

**41. Research Methods in Psychology (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 1 or the equivalent; completion of Statistics 13 or 102 strongly recommended. Introduction to experimental design, interviews, questionnaires, field and observational methods, reliability, and statistical inference. GE credit: QL.—F, W, S. (F, W, S.) Cross, Vazire

**41S. Research Methods in Psychology (4)**

Lecture/laboratory—10 hours; web virtual lecture—10 hours. Prerequisite: course 1 or equivalent. Class size limited to 100 students. Introduction to experimental design, interviews, questionnaires, observational research, qualitative approaches, case studies, content analysis, sampling, descriptive statistics,

tics, and statistical inference. Not open for credit to students who have taken course 41. Offered irregularly.

### **90X. Lower Division Seminar (1-2)**

Seminar—1-2 hours. Prerequisite: lower division standing; consent of instructor. Limited enrollment. Examination of a special topic in Psychology through shared readings, discussions, written assignments, or special activities such as fieldwork or laboratory work. May not be repeated for credit. Offered irregularly.

### **98. Directed Group Study (1-5)**

Primarily for lower division students. (P/NP grading only.)

### **99. Special Study for Lower Division Students (1-5)**

(P/NP grading only.)

## **Upper Division**

### **100. Introduction to Cognitive Psychology (4)**

Lecture—4 hours. Prerequisite: courses 1 and 41. Introduction to human information processing, mental representation and transformation, imagery, attention, memory, language processing, concept formation, problem solving, and computer simulation. Not open for credit to students who have completed former course 136.—F, W, S. (F, W, S.) Ekstrom, Ferreira, Henderson, Long, Luck

### **100Y. Introduction to Cognitive Psychology (4)**

Web virtual lecture—4 hours; discussion—1 hour; lecture—1 hour. Prerequisite: courses 1 and 41. Introduction to human information processing, mental representation and transformation, imagery, attention, memory, language processing, concept formation, problem solving, and computer simulation. Not open for credit to students who have completed former course 136 or current course 100.—F, S. (F, S.) Luck

### **101. Introduction to Biological Psychology (4)**

Lecture—4 hours. Prerequisite: courses 1, 41. Pass One open to majors. Survey and integration of the relationships between behavior and biological processes, including physiology, genes, development, ecology, and evolution. Two units of credit for those students who have completed Neurobiology, Physiology and Behavior 100.—F, W, S. (F, W, S.) Krubitzer, Stolzenberg, Trainor

### **103A. Statistical Analysis of Psychological Data (5)**

Lecture—4 hours; laboratory—2 hours; term paper. Prerequisite: course 1, 41 and Statistics 13 or 102. Pass One open to Psychology majors. Design and statistical analysis of psychological investigations and the interpretation of quantitative data in psychology. Not open for credit to students who have completed course 103. GE credit: QL—F, W. (F, W.) Blozis

### **103B. Statistical Analysis of Psychological Data (5)**

Lecture—4 hours; laboratory—2 hours. Prerequisite: course 103A; Statistics 13 or 102. Pass One open to Psychology majors. Probability theory, sampling distributions, statistical inference, and hypothesis testing using standard parametric and correlational approaches. Simple regression analysis, multiple regression analysis, non-parametric statistics, introduction to multivariate statistics, with applications in psychology. Not open for credit to students who have completed course 105. GE credit: QL—F, S. (F, S.) Blozis, Ferrer

### **104. Applied Psychometrics: An Introduction to Measurement Theory (4)**

Lecture—4 hours. Prerequisite: upper division standing in Psychology, courses 41 and 103, Statistics 13. Examination of the basic principles and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis and latent trait theory. Offered irregularly. GE credit: QL

### **107. Questionnaire and Survey Research Methods (4)**

Lecture/discussion—2 hours; laboratory/discussion—2 hours. Prerequisite: consent of instructor; course 1; course 41 or an equivalent course on social or behavioral research methods. Limited enrollment. Introduction to survey and questionnaire research methods with emphasis on how to ask questions. Social and psychological factors that influence survey response. Practical aspects of fielding survey and questionnaire research. Offered irregularly. GE credit: QL—Herek

### **113. Developmental Psychobiology (4)**

Lecture—3 hours; laboratory—2 hours. Prerequisite: course 101. The biology of behavioral development; survey and integration of the organicistic and environmental processes that regulate the development of behavior.—F, W, S. (F, W, S.) Schank

### **120. Agent-Based Modeling (4)**

Lecture/laboratory—4 hours. Prerequisite: course 100 or 101. Class size limited to 24 students. Introduction to agent-based computer simulation and analysis with emphasis on learning how to model animals, including humans, to achieve insight into social and group behavior. GE credit: QL—S. (S.) Schank

### **121. Physiological Psychology (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 1, 41, 101. Pass One open to Psychology majors. Relationship of brain structure and function to behavior, motivation, emotion, language, and learning in humans and other animals. Methodology of physiological psychology and neuroscience. Not open for credit to students who have completed course 108. (Former course 108.)—F, W, S. (F, W, S.) Bales, Krubitzer

### **122. Advanced Animal Behavior (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 101 or Neurobiology, Physiology, and Behavior 102. Pass One open to Psychology majors. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free living animals. (Same course as Neurobiology, Physiology, and Behavior 150.) Not open for credit to students who have completed course 150. (Former course 150.) Offered irregularly.

### **123. Hormones and Behavior (3)**

Lecture—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 101 and either course 101 or Neurobiology, Physiology, and Behavior 102. Pass One open to Psychology majors. Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as Neurobiology, Physiology, and Behavior 152.) Not open for credit to students who have completed course 152. (Former course 152.)—S. (S.) Bales, Trainor

### **124. Comparative Neuroanatomy (4)**

Lecture—3 hours; laboratory—2 hours. Prerequisite: course 101 or Neurobiology, Physiology, and Behavior 100 or 101. Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Neurobiology, Physiology, and Behavior 124.) GE credit: SL—W. (W.) Krubitzer, Recanzone

### **125. Behavioral Epigenetics (4)**

Lecture—4 hours. Prerequisite: course 101. Review of basic principles in genetics and epigenetics with emphasis on behavior. Introduction to the use of modern molecular methods in understanding the complex relationships between genes, environment, and behavior.—W, S. (W, S.) Stolzenberg, Trainor

### **126. Health Psychology (4)**

Lecture—4 hours. Prerequisite: course 1, 41, 101. Pass One open to Psychology majors only. Psychological factors influencing health and illness. Topics include stress and coping, personality and health, symptom perception and reporting, heart disease, cancer, compliance, and health maintenance and promotion. Not open for credit to students who have completed former course 160.—W, S. (W, S.) Emmons

### **130. Human Learning and Memory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1, 41, and either Statistics 13 or 100; or consent of instructor. Consideration of major theories of human learning and memory with critical examination of relevant experimental data.—F, W, S. (F, W, S.) Ranganath, Yonelinas

### **131. Perception (4)**

Lecture—3 hours; independent library work. Prerequisite: courses 1, 41 and 100 or 135. Cognitive organizations related to measurable physical energy changes mediated through sensory channels. Perception of objects, space, motion, events.—F, W, S. (F, W, S.) Geng, Henderson

### **132. Language and Cognition (4)**

Lecture—3 hours; term paper. Prerequisite: courses 1, 41, and either 100 or 135; or consent of instructor. Introduction to the cognitive processes involved in language comprehension and production. Topics include the biological foundations of language, speech perception, word recognition, syntax, reading ability, and pragmatics. GE credit: WE—F, W, S. (F, W, S.) Ferreira, Long, Swaab, Traxler

### **135. Cognitive Neuroscience: The Biological Foundations of the Mind (4)**

Lecture—4 hours;. Prerequisite: course 1, 41, or consent of instructor; course 101, 121, or 129 recommended. Neuroscientific foundations of higher mental processes including attention, memory, language, higher-level perceptual and motor processes, and consciousness. Emphasis on the neural mechanisms which form the substrates of human cognition and the relationship of mind to brain.—F, W, S. (F, W, S.) Ekstrom, Geng, Janata, Mangun, Ranganath

### **136. Psychology of Music (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: courses 1, 41, and either 100 or 135 or Music 6C; or consent of instructor. Introduction to the mental and neural representations of musical structures and processes involved in perceiving, remembering, and performing music. Music and emotion. GE credit: WE—F. (F.) Janata

### **137. Neurobiology of Learning & Memory (4)**

Lecture—4 hours. Prerequisite: courses 1, 41, 101. Overview of the neural basis of learning and memory focusing on modern behavioral neuroscience research with animals. Topics include consolidation, neural plasticity, cellular competition for memory storage, and the role of neurogenesis in learning.—F, S. (F, S.) Wiltgen

### **140. Developmental Psychology (4)**

Lecture—4 hours. Prerequisite: courses 1, 41. Pass One open to Psychology majors. Ontogenetic account of human behavior through adolescence with emphasis on motor skills, mental abilities, motivation, and social interaction. Two units of credit allowed to students who have completed Human Development 100A or 100B. Not open for credit to students who have completed course 112. (Former course 112.)—F, W, S. (F, W, S.) Cross, Ghetti, Goodman, Graf Estes, Lagattuta, Oakes

### **141. Cognitive Development (4)**

Lecture—3 hours; term paper. Prerequisite: Human Development 100A or 100B or course 140. Pass One restricted to Human Development or Psychology majors. Theories, methods, evidence, and debates in the field of cognitive development, such as nature/nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language.

(Same course as Human Development 101.) GE credit: Wrt | WE.—F, W, S. (F, W, S.) Chen, Cross, Ghetti, Goodman, Graf Estes, Lagattuta, Rivera

#### **142. Social and Personality Development (4)**

Lecture—3 hours; term paper. Prerequisite: Human Development 100A or 100B or course 140. Pass One open to Human Development or Psychology majors. Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors. (Same course as Human Development 102.) GE credit: SocSci, Wrt | SS, WE.—F, W, S. (F, W, S.) Belsky, Hastings, Thompson

#### **143. Infant Development (4)**

Lecture—3 hours; extensive writing. Prerequisite: courses 1 and 41, and either course 140 or Human Development 100A. Psychological development in infancy. Topics include physical and motor development, sensory and nervous system development, and memory and cognitive development. Emphasis will be on evaluating theories, empirical research, and experimental methods for understanding infant development. GE credit: WE.—F. (F.) Oakes

#### **146. The Development of Memory (4)**

Lecture—3 hours; term paper. Prerequisite: courses 1, 41. Pass One open to Psychology majors. Theory and research on memory development with focus on infancy and childhood. Not open for credit to students who have completed course 133. (Former course 133.) GE credit: WE.—S. (S.) Ghetti, Rivera

#### **148. Developmental Disorders (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: courses 1, 41, and either 140 or 141 or Human Development 100A or 100B. Current scientific knowledge of the influences of biological, cognitive, and environmental factors on the emergence of disorders with onset in childhood. Examples include autism spectrum, ADD/ADHD, dyslexia and dyscalculia. Emphasis placed on understanding these disorders, their causes and their treatments.—F, S. (F, S.) Rivera

#### **151. Social Psychology (4)**

Lecture—4 hours. Prerequisite: courses 1, 41. Pass One open to Psychology majors. Behavior of the individual in the group. Examination of basic psychological processes in social situations, surveying various problems of social interaction; group tensions, norm-development, attitudes, values, public opinion, status. Not open for credit to students who have completed course 145. (Former course 145.)—F, W, S. (F, W, S.) Ledgerwood, Pickett, Sherman

#### **152. Social Cognition (4)**

Lecture—4 hours. Prerequisite: courses 1 and 41. Examines how social factors influence how we attend to, encode, and process information and how these mental processes affect subsequent judgments and behavior.—S. (S.) Pickett, Sherman

#### **153. Psychology and Law (4)**

Prerequisite: courses 1, 41. Prerequisite: courses 1, 41. Pass One open to Psychology majors. Current theoretical and empirical issues in the study of psychology and law. Topics include eyewitness testimony, child abuse, jury decision making, juvenile delinquency and criminology, prediction of violence, insanity defense, and memory for traumatic events. Not open for credit to students who have completed course 115. (Former course 115.) Offered in alternate years.—S. Goodman

#### **154. Psychology of Emotion (4)**

Lecture—4 hours. Prerequisite: course 1, 41. Pass One open to Psychology majors. Introduction to current theories and research on emotion and bodily feelings with special reference to self-knowledge. Not open for credit to students who have completed course 143. (Former course 143.)—F, S. (F, S.)

#### **157. Stereotyping, Prejudice, and Stigma (4)**

Lecture/discussion—4 hours. Prerequisite: courses 1 and 41. Social psychological underpinnings of stereotyping, prejudice, and stigma from sociocultural, motivational, and cognitive perspectives. Topics include: origins, maintenance, change, effects on person perception and memory, and the automaticity/controllability of stereotyping and prejudice. GE credit: DD—W. (W.) Sherman

#### **158. Sexual Orientation and Prejudice (4)**

Lecture/discussion—4 hours. Prerequisite: courses 1, 41. Pass One open to Psychology majors. Current scientific knowledge about sexual orientation and prejudice based on sexual orientation. Emphasis on learning the skills necessary for a critical understanding of science and public policy issues relevant to sexuality. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.—W. (W.) Herek

#### **159. Gender and Human Reproduction (4)**

Lecture—4 hours. Prerequisite: course 1, 41. Pass One open to Psychology majors. Psychology of reproduction. Reproductive events over the course of an individual's life, including sexual development, mate choice, relationships, and reproduction. Biological and social psychological explanations at the levels of mechanism and evolutionary function. Not open for credit to students who have completed former course 149. (Formerly course 149.)—S. (S.) Scheib

#### **161. Psychology of the Self (4)**

Lecture—4 hours. Prerequisite: courses 1 and 41. Psychological theory and research on the self. Topics include: self-knowledge, self-esteem, self-regulation, self-presentation, cognitive and emotional aspects of the self, and the role of the self in shaping social interaction.—F. (F.) Pickett

#### **162. Introduction to Personality Psychology (4)**

Lecture—3 hours; term paper. Prerequisite: course 1, 41. Pass One open to Psychology majors. Scientific study of personality. Methods of personality research. Overview of current research and theory in the field of personality psychology. Not open for credit to students who have completed former course 147. GE credit: SocSci, Wrt | SS.—F, S. (F, S.) Robbins

#### **165. Introduction to Clinical Psychology (4)**

Lecture—4 hours. Prerequisite: courses 1, 41, 168, and either 140 or 151. Major theoretical formulations in the history of clinical psychology, from classical psychoanalysis to contemporary existentialism and behavior modification. A survey, based on lectures, films, and tapes, of what clinical psychologists do, including methods of appraisal, professional roles, and approaches to treatment.—S. (S.) Zane

#### **168. Abnormal Psychology (4)**

Lecture—4 hours. Prerequisite: courses 1, 41. Descriptive and functional account of behavioral disorders, with primary consideration given to neurotic and psychotic behavior. GE credit: SocSci | SS.—F, W, S. (F, W, S.) Schepeler, Zane

#### **170. Psychology of Religion (4)**

Lecture—4 hours. Prerequisite: courses 1 and 41. Major theories, issues, data, and research methodologies of the psychology of religion. Religious experience and expression; religious development in childhood, adolescence, and adulthood; conversion; religious influences on physical and mental health; cross-cultural perspectives. GE credit: Div, Wrt | WE.—S. (S.) Emmons

#### **175. Genius, Creativity, and Leadership (4)**

Lecture—3 hours; term paper. Prerequisite: course 1 and 41 or the equivalent or consent of instructor. The phenomenon of genius examined from a diversity of theoretical, methodological, and disciplinary perspectives, with an emphasis on outstanding creativity and leadership in art, music, literature, philosophy, science, war, and politics. GE credit: SocSci, Wrt | SS, WE.—F, S. (F, S.) Simonton

#### **180A. Research in Cognitive and Perceptual Psychology (4)**

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 41, and four upper division Psychology courses and consent of instructor. Empirical research on selected topics in general experimental psychology (general research design and analysis, perception, cognition, cognitive development, etc.). Specific content will vary from quarter to quarter. May be repeated one time for credit when content differs. Offered irregularly.

#### **180B. Research in Psychobiology (4)**

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 101, three additional upper division courses in Psychology, and consent of instructor. Empirical research on selected topics in psychobiology (animal learning, animal behavior, physiological and sensory psychology, developmental psychobiology, computer modeling of neural systems). Content varies. May be repeated one time for credit when content differs. Offered irregularly.

#### **180C. Research in Personality and Social Psychology (4)**

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 41, and four upper division Psychology courses and consent of instructor. Empirical research on selected topics in personality and social psychology (personality, social psychology, organizational psychology, etc.). Content will vary from quarter to quarter. May be repeated one time for credit when specific content differs. Offered irregularly.

#### **185. History of Psychology (4)**

Lecture—3 hours; term paper. Prerequisite: courses 1, 41, upper division standing or consent of instructor. Pass One open to Psychology majors. Development of psychological thought and research in context of history of philosophy and science. Not open for credit to students who have completed course 120. (Former course 120.) GE credit: SocSci, Wrt | SS, WE.—F. (F.) Simonton

#### **190. Seminar in Psychology (4)**

Seminar—4 hours. Prerequisite: junior or senior standing; major in psychology or consent of instructor. Intensive treatment of a special topic or problem of psychological interest. May be repeated for credit in different subject area.—F, W, S. (F, W, S.)

#### **190X. Upper Division Seminar (1-2)**

Seminar—1-2 hours. Prerequisite: upper division standing and consent of instructor. Limited enrollment. In-depth examination at an upper division level of a special topic in Psychology. Emphasis on student participation in learning. May not be repeated for credit. Offered irregularly.—F, W, S. (F, W, S.)

#### **192. Fieldwork in Psychology (1-6)**

Fieldwork—1-6 hours. Prerequisite: upper division standing in psychology and consent of instructor. Limited enrollment. Supervised internship off and on campus, in community and institutional settings. Maximum of four units may be used towards satisfaction of upper division major requirement. May be repeated one time for credit. (P/NP grading only.)

#### **194HA. Special Study for Honors Students (3)**

Independent study—9 hours. Prerequisite: senior standing in Psychology and qualifications for admission into college honors program, and consent of instructor; at least one course from 180A, 180B, 180C or 199 strongly recommended. Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor. (Deferred grading only, pending completion of sequence.) GE credit: WE.—F, W, S. (F, W, S.)

#### **194HB. Special Study for Honors Students (3)**

Independent study—9 hours. Prerequisite: senior standing in Psychology and qualifications for admission into college honors program, and consent of instructor; at least one course from 180A, 180B, 180C or 199 strongly recommended. Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis

under the direction of faculty sponsor. (Deferred grading only, pending completion of sequence.) GE credit: WE.—F, W, S. (F, W, S.)

### 197T. Tutoring in Psychology (1-3)

Tutoring—1-3 hours. Prerequisite: upper division standing and consent of instructor. Intended for advanced undergraduate students who will lead discussion sections in Psychology courses. May be repeated for credit for a total of 8 units. (P/NP grading only.)—F, W, S. (F, W, S.)

### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)—F, W, S. (F, W, S.)

## Graduate

### 200. Proseminar in Psychology (3)

Seminar—2 hours; independent study—1 hour. Prerequisite: graduate standing in Psychology or consent of instructor. Introduces matriculating graduate students to research activities of departmental faculty. (S/U grading only.)—F. (F.)

### 201. Research Preceptorship (4)

Laboratory—3-4 hours; discussion—3-5 hours. Prerequisite: consent of instructor. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### 202. Research Seminar (1)

Seminar—1 hour. Prerequisite: graduate standing in psychology. Presentation of graduate research to program faculty and graduate students. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### 204A. Statistical Analysis of Psychological Experiments (5)

Lecture—4 hours; laboratory—2 hours. Prerequisite: Statistics 102 or equivalent; graduate standing in Psychology or consent of instructor. Probability theory, sampling distributions, statistical inference, and hypothesis testing using standard parametric and correlational approaches. Analysis of variance, factorial and repeated measures, and tests of trends. Not open for credit to students who have completed course 206.—F. (F.) Ferrer

### 204B. Causal Modeling of Correlational Data (5)

Lecture—4 hours; laboratory—2 hours. Prerequisite: course 204A or the equivalent and graduate standing in Psychology or consent of instructor. Examination of how to make causal inferences from correlational data in the behavioral sciences. Emphasis is on testing rival causal models using correlations among observed variables. Beginning with multiple regression analysis, discussion advances to path analysis and related techniques. Not open for credit to students who have completed course 207A.—W. (W.) Simonton

### 204D. Advanced Statistical Inference from Psychological Experiments (5)

Lecture—4 hours; laboratory—2 hours. Prerequisite: course 204A or the equivalent; graduate standing in Psychology or consent of instructor. Advanced topics in statistical inference, which may include probability theory, sampling distributions, statistical inference and hypothesis testing, nonparametric statistics, Bayesian approaches, and advanced issues in analysis of variance. Not open for credit to students who have completed course 205.—S. (S.) Blozis

### 205A. Applied Multivariate Analysis of Psychological Data (4)

Lecture—4 hours. Prerequisite: three courses from 204A, 204B, 204C, 204D or the equivalents, or consent of instructor. Review of the major methods of multivariate data analysis for psychological data. Statistical routines using a linear algebra-based computing language. Topics include multivariate analysis of variance, discriminant analysis, canonical analysis, factor analysis, and component analysis. Not open for credit to students who have completed course 207B. (Former course 207B.) Offered in alternate years.—W. (W.) Ferrer

### 205B. Factor Analysis (4)

Lecture—3 hours; term paper. Prerequisite: graduate standing, course 204A and 204B or equivalents or consent of instructor. Theory and methods of factor analysis, including exploratory factor analysis, confirmatory factor analysis, and principal component analysis. Offered in alternate years.—W. (W.)

### 205C. Structural Equation Modeling (4)

Lecture—3 hours; term paper. Prerequisite: graduate standing; course 204A and 204B or the equivalent or consent of instructor. Theory and methods of structural equation modeling, including path analysis, confirmatory factor analysis, multiple-group modeling and latent growth curve modeling. Offered in alternate years.—Ferrer

### 205D. Multilevel Models (4)

Lecture—4 hours. Prerequisite: course 204A, graduate standing or consent of instructor. Introduction to statistical techniques for the analysis of normal, hierarchically structured data, such as cross-sectional clustered data or repeated-measures data. Topics include hierarchical linear models, latent growth curve models, and how these methods handle unbalanced and/or missing data.—W. (W.) Blozis

### 205E. Applied Psychometrics and Measurement Theory (4)

Lecture—4 hours. Prerequisite: course 204A or equivalent; graduate standing in Psychology or consent of instructor. Examination of the basic principles and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis, and latent trait theory. Not open for credit to students who have completed course 204 or 204C. Offered in alternate years.—S. (S.)

### 205F. Item Response Theory (4)

Lecture—3 hours; term paper. Prerequisite: course 204A or the equivalent; graduate standing in Psychology or consent of instructor. Item response theory allows for the creation of precise measurement instruments in psychological testing. Review Classical Test Theory, and then cover basic IRT models through advanced applications. Offered in alternate years.—S. (S.)

### 205G. Applied Longitudinal Data Analysis (4)

Lecture—3 hours; term paper. Prerequisite: course 204A and graduate standing in Psychology or consent of instructor. Modeling and understanding of intraindividual change and interindividual differences in change. Reviews conventional methods and introduces contemporary techniques for modeling intraindividual change. Offered in alternate years.—F. (F.) Ferrer

### 206A. Theoretical Foundations: Research Methods in Psychology (4)

Lecture/discussion—3 hours; term paper. Restricted to graduate student status. Examines the philosophy and research practices underlying experimental psychology. Topics to be covered include philosophy of science/epistemology, research design, inference and bias in research, theory development, validity, the social context of research, and critical thinking about research. Offered irregularly.—S. (S.) Pickett, Sherman

### 206B. Research Methods in Psychology: Applications in Social-Personality Research (4)

Lecture/discussion—3 hours; term paper. Restricted to graduate student status. Overview of the research designs, assessment methods, and statistical procedure used by social-personality psychologists. Focus on the practical issues that arise when using each method in specific research contexts. Offered in alternate years.—(W.) Robins

### 207. Survey and Questionnaire Research Methods (4)

Lecture/discussion—4 hours. Prerequisite: completion of a course on social or behavioral research methods, graduate standing. Survey and questionnaire research methods with emphasis on how to ask questions. Cognitive, motivational, and social processes that influence how respondents answer ques-

tions; sampling techniques; Internet resources; practical aspects of fielding survey and questionnaire research. Offered irregularly.—F. Herek

### 208. Physiological Psychology (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. A conceptual analysis of the contributions of neuroanatomy, neurophysiology and neurochemistry to an understanding of animal and human behavior.—S. Bales

### 208A. Fundamentals of Human Electrophysiology (4)

Lecture/discussion—1.5 hours; laboratory—3 hours; extensive problem solving—1.5 hours.; project—3 hours. Prerequisite: consent of instructor. Restricted to 15 students. In-depth introduction and hands-on experience with the event-related potential (ERP) method in the study of attention, executive control, memory, language and social cognitive neuroscience.—W. (W.) Luck, Swaab

### 209A. Introduction to Programming: Matlab (4)

Lecture/laboratory—3 hours. Prerequisite: graduate standing or consent of instructor. The Matlab programming environment as a means of organizing, analyzing, and visualizing scientific data. Basic programming concepts such as variables, loops, conditional branching, and efficient programming techniques will be emphasized. Offered irregularly.—Janata

### 210. Fundamentals of Cognitive Neuroimaging (3)

Lecture/discussion—3 hours. Prerequisite: basic knowledge of inferential statistics and experimental psychology. Introduction to empirical foundations and methodology of neuroimaging, emphasizing pragmatics of functional magnetic resonance imaging (fMRI) to study cognition. Topics include MR physics, the relationship between neural activity and the BOLD response, experimental design, and analysis of fMRI data.—Ranganath

### 211. Advanced Topics in Neuroimaging (2)

Seminar—2 hours. Prerequisite: course 210 or consent of instructor. Restricted to 16 students. Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG. (Same course as Neuroscience 211 and Neurobiology, Physiology, and Behavior 211.) (S/U grading only.)—W. (W.) Miller

### 212A. Developmental Psychology: Cognitive and Perceptual Development (4)

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor, completion of undergraduate or graduate course on developmental psychology or human development. Theories and empirical findings concerning human cognitive and perceptual development. Development of perception, memory, concepts (e.g., theory of mind, concepts about number), problem solving, and language from infancy to adolescence.—F. Ghetti, Goodman, Graf Estes, Lagattuta, Rivera

### 212B. Developmental Psychology: Social, Emotional, and Personality Development (4)

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor, completion of an undergraduate or graduate course on developmental psychology or human development. Theories and empirical findings concerning human social, emotional, and personality development. Development of emotions, moral reasoning and behavior, personality, self-concept, and social cognition from infancy to adolescence (may include adulthood).—Thompson

### 217. Behavioral Genetics (4)

Lecture—3 hours; laboratory/discussion—1 hours; term paper. Prerequisite: graduate standing. Restricted to 20 students. Review basic principles in genetics and select topics in molecular genetics with emphasis on behavior. Use of modern molecular methods to outline complex relationships between genes, environment, and behavior. Not open for credit to students who have completed course 251.—W. (W.) Trainor

**218A. Fundamentals of Animal Behavior (5)**

Lecture/discussion—4 hours; discussion—1 hour. Prerequisite: consent of instructor; upper-division undergraduate introduction to the biology of behavior, such as course 101, 122, 123, Neurobiology, Physiology, and Behavior 102, 150, 152, Wildlife, Fish, and Conservation Biology 141, Entomology 104, or Animal Science 105. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science. (Same course as Animal Behavior 218A.)—F. (F.) Sih

**218B. Fundamentals of Animal Behavior (5)**

Lecture/discussion—4 hours; discussion—1 hour. Prerequisite: consent of instructor; course 209A. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science. (Same course as Animal Behavior 218B.)—W. (W.) Sih

**220. History of Psychology (4)**

Lecture—2 hours; seminar—2 hours. Prerequisite: graduate standing in psychology or consent of instructor. A lecture-seminar on the history of psychology and on the applicability of early psychological theory and research to contemporary investigations. Offered in alternate years.—Simonton

**221. Academic Writing in Psychology (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Class size limited to 10 students. Strategies for developing and honing academic writing skills and writing productivity, with a particular focus on how to write a clear and compelling empirical journal article in psychology. May be repeated four times for credit with consent of instructor if student chooses to focus on a substantially different writing project. Offered irregularly.—F. Ledgerwood

**230. Cognitive Psychology (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Analysis of the mental processes by which knowledge is acquired, manipulated, stored, retrieved and used. Offered in alternate years.—F. Long, Mangun

**231. Sensation and Perception (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Analysis of the role of sensory processes and perception in experience and their effects on behavior. Offered in alternate years.—S.

**241. Attitudes and Social Influence (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Survey of theory and research in the field of attitudes and social influence. Topics include attitude definition and measurement, major theories of attitude formation and change, the relationship between attitudes and behavior, and recent directions and controversies. Offered irregularly.—Ledgerwood

**243. Social Cognition (4)**

Lecture/discussion—3 hours, term paper. Prerequisite: consent of instructor. Processes underlying the perception, memory, and judgment of social stimuli, the effects of social and affective factors on cognition, and the interpersonal consequences of those processes. Topics include automaticity/control, motivated cognition, person perception, stereotyping, attitudes, and persuasion. Offered irregularly.—Pickett, Sherman

**244. Stereotyping, Prejudice, and Stigma (4)**

Lecture/discussion—3 hours, term paper. Prerequisite: consent of instructor. This course examines the social psychological underpinnings of stereotyping, prejudice, and stigma, including sociocultural, motivational, and cognitive factors. Offered irregularly.—Herek, Sherman

**245. Social Psychology (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in social psychology.—S. (S.) Pickett, Robins

**247. Personality (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in human personality.—W. (W.) Robins

**251. Topics in Genetic Correlates of Behavior (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and experiment in the genetic contributions to animal and human behavior. May be repeated for credit when topic differs. Offered in alternate years.

**252. Topics in Psychobiology (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Critical study in a selected area of psychobiology. May be repeated for credit when content differs. Offered in alternate years.

**261. Cognitive Neuroscience (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate student standing in Psychology or Neuroscience or consent of instructor. Graduate core course for neuroscience. Neurobiological bases of higher mental function including attention, memory, language. One of three in three-quarter sequence. (Same course as Neuroscience 223.)—S. (S.) Ranganath, Swaab

**263. Topics in Cognitive Psychology (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Selected topics in language processing, memory, perception, problem solving, and thinking, with an emphasis on the common underlying cognitive processes. May be repeated for credit when content differs. Offered in alternate years.

**264. Topics in Psycholinguistics (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Discussion of fundamental issues in the psychology of language. May be repeated for credit when content differs. Offered in alternate years.

**270. Topics in Personality and Social Psychology (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Critical study of a selected area of personality or social psychology. May be repeated for credit when topic differs.—F. (F.)

**272. Topics in Developmental Psychology (4)**

Seminar—4 hours. Prerequisite: graduate standing in Psychology or consent of instructor. Selected topics in developmental psychology, including developmental neuroscience, memory development, infancy, cognitive development, social development, child maltreatment, children and law, perceptual development, emotional development, children at risk, and adolescence, with emphasis on developmental processes and developmental theory. May be repeated for credit. Offered irregularly.

**289A. Current Research in Psychology (2)**

Seminar—2 hours. Prerequisite: graduate standing in Psychology or consent of instructor. Contemporary theory and empirical research in specialized topics in psychology. Topics include developmental attachment, social neuroscience, mental health, emotion, sexual orientation and identity. May be repeated for credit if topic differs. (Deferred grading only, pending completion of sequence.)

**289B. Current Research in Psychology (2)**

Discussion—2 hours. Prerequisite: course 289A; graduate standing in Psychology or consent of instructor. Intensive examination of contemporary theory and empirical research on a specialized topic in psychology. Sample topics include developmental attachment, social neuroscience, culture and mental health, electrophysiology and cognitive neuroscience, emotion, implicit cognitive processes, sexual

orientation and identity, and attention. May be repeated for credit if content differs. (Deferred grading only, pending completion of sequence.)

**290. Seminar (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Seminar devoted to a highly specific research topic in any area of basic psychology. Special topic selected for a quarter will vary depending on interests of instructor and students.—F, W, S. (F, W, S.)

**298. Group Study (1-5)**

(S/U grading only.)—F, W, S. (F, W, S.)

**299. Research (2-9)**

(S/U grading only.)—F, W, S. (F, W, S.)

**299D. Dissertation Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**Professional****390A. The Teaching of Psychology (6)**

Discussion—6 hours; lecture—6 hours; practice—6 hours. Prerequisite: advanced graduate standing in psychology or a closely related discipline and consent of instructor. Methods and problems of teaching psychology at the undergraduate and graduate levels; curriculum design and evaluation. Practical experience in the preparation and presentation of material. (S/U grading only; deferred grading only, pending completion of sequence.)—W, S. (W, S.) Simonton

**390B. The Teaching of Psychology (6)**

Discussion—6 hours; lecture—4 hours; practice—2 hours. Prerequisite: advanced graduate standing in psychology or a closely related discipline and consent of instructor. Methods and problems of teaching psychology at the undergraduate and graduate levels; curriculum design and evaluation. Practical experience in the preparation and presentation of material. (S/U grading only; deferred grading only, pending completion of sequence.)—W, S. (W, S.) Simonton

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**Quantitative Biology and Bioinformatics**

(College of Biological Sciences)

The interdisciplinary minor in Quantitative Biology and Bioinformatics is an integrative program that introduces students to the quantitative and computational approaches that are redefining all disciplines in the biological sciences, from molecular and cell biology, through genetics and physiology, to ecology and evolutionary biology. Students in this minor will learn research tools that apply mathematical and computational methods, increase their insight into the strengths and limitations of quantitative approaches, and develop the interdisciplinary perspective that is now the foundation of modern biological research and training.

The minor in Quantitative Biology and Bioinformatics is open to all undergraduates regardless of major and is sponsored by the College of Biological Sciences.

**Minor Program Requirements:**

UNITS

**Quantitative Biology and Bioinformatics ..... 18-24**

Core Courses .....	8-12
Programming: Computer Science	
Engineering 10 or 30 or the equivalent* .....	4
Quantitative Biology: Biological Sciences 132 or Mathematics 124 .....	4
Bioinformatics: Computer Science Engineering 124 or 129 .....	4

Quantitative and Computational Preparation.....	4
Complete one course from the following:	
Applied Science Engineering 115;	
Biomedical Engineering 105; Computer Science Engineering 122, 130;	
Mathematics 128A, 128B, 128C, 135A;	
Statistics 130A, 131A, 141A	
*The programming requirement may be satisfied by previous experience and therefore may not entail college course credit. Please see your minor adviser for this determination and its possible impact on your unit requirements for the minor.	
Restricted Electives.....	6-8
Complete two or more courses from the following list to achieve a total of 18-24 units: Biological Sciences 134, 180L, 181, 183; Biomedical Engineering 102, 117, 140, 141, 151; Biotechnology 150; Computer Science Engineering 165A, 166; Evolution and Ecology 102, 103, 104, 175; Microbiology 105; Molecular and Cellular Biology 123, 143, 182; Neurobiology, Physiology, and Behavior 166, 167; one course from: Environmental Science and Policy 121 or Wildlife, Fish, and Conservation Biology 122	

**Restrictions.** No more than two upper division courses from a single department may be offered in satisfaction of the minor requirements. Only one course used to satisfy a requirement for the minor may be applied toward a student's major.

**Minor Adviser.** Consult the Biology Academic Success Center (BASC), 1023 Sciences Laboratory Building; 530-752-0410; <http://basc.ucdavis.edu/>

## Radiation Oncology

See Medicine, School of, on page 427.

## Radiology

See Medicine, School of, on page 427.

## Range Science

(College of Agricultural and Environmental Sciences)

**Faculty.** See Plant Sciences, on page 514.

**Related Program.** See Ecological Management and Restoration, on page 250.

**Related Courses.** See Plant Sciences 101, 112, 130, 131, 135; Nutrition 115; Soil Science 105, 120; Wildlife, Fish, and Conservation Biology 151.

## Religious Studies

(College of Letters and Science)

Archana Venkatesan, Ph.D., Chair

**Program Office.** 213 Sproul Hall  
530-752-1219; <http://religions.ucdavis.edu>

### Faculty

Allison Coudert, Ph.D., Professor	
Mark Elmore, Ph.D., Assistant Professor	
Naomi Janowitz, Ph.D., Professor	
Meaghan O'Keefe, Ph.D., Assistant Professor	
W. Flagg Miller, Ph.D., Professor	
Eva Mroczek, Ph.D., Assistant Professor	
Seth Sanders, Ph.D., Professor	
Mairaj U. Syed, Ph.D., Assistant Professor	
Archana Venkatesan, Ph.D., Associate Professor	
Keith Watengaugh, Ph.D., Professor	

### Emeriti Faculty

Whalen W. Lai, Ph.D., Professor Emeritus

### The Major Program

Religion is a major force in human experience. It has shaped the world's history, literature, art, culture, politics, ethics, and economics. In addition to offering courses in all the major religious traditions (Judaism, Christianity, Islam, and Hinduism), the Religious Studies Program has developed cross-cultural courses dealing with religious symbols, myths, and rituals in written texts, art, theater, and film, and the Internet, as well as, thematic courses dealing with such topics as religion and the body, the rise of fundamentalism, religion and science, religion and ethics, and religion and violence.

**The Program.** The major introduces students to the academic study of religion. Students can choose from a broad range of courses both in the program itself and in other departments and programs-history, philosophy, psychology, sociology, anthropology, American studies, classics, and medieval studies. In addition to studying religious thought per se, students in the major can also study the way religion has shaped human behavior in such matters as family life, gender roles, ethics, artistic life, concepts of individual freedom, the pursuit of science, and economics. For some students, Religious Studies is an appropriate second major and combines well with anything from philosophy to international agricultural development, political science, and the physical sciences.

**Career Alternatives.** Because of the program's focus on developing critical thinking, writing, and reading skills, students who major in Religious Studies are well prepared to enter a variety of careers, including teaching, the health professions, law, business, and government. In an increasingly global society, knowledge of the world's religious traditions and practices has become an essential part of a student's education.

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter..... 20

(A) One course from the Religious Studies 1 series .....	4
(B) Four courses from other Religious Studies lower division offerings .....	16

#### Depth Subject Matter ..... 40

Religious Studies 100 .....	4
Nine upper division Religious Studies courses* .....	36
* Four of these courses may be upper division courses related to religion that are offered by other departments and taken with the approval of a Religious Studies adviser.	

#### Total Units for the Major ..... 60

**Recommended.** A reading knowledge of a foreign language is highly recommended.

**Course Equivalents.** The major advisers have a list of lower and upper division courses that can be substituted for courses suggested above.

**Major Advisers.** Consult the Program office.

### Minor Program Requirements:

UNITS

#### Religious Studies ..... 20

Lower division course.....	4
Upper division courses.....	16
Religious Studies 100 required. Some substitutions from other departments or programs allowed with consent of adviser.	

**Minor Advisers.** Same as major advisers.

**Honors and Honors Program.** A student becomes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters and Science. Upon successful completion of the additional requirements of the College of Letters and Science Honors Program, individual students may be recommended

by the program for graduation with high honors or highest honors on the basis of an evaluation of their academic achievements in the major.

### Education Abroad Program.

The Religious Studies program encourages students to study in the Summer Abroad program, the Quarter Abroad program, or the Education Abroad program. With the approval of a major adviser, applicable courses taken abroad may be accepted in the major or minor programs.

### Teaching Credential Subject Representative.

See the Teaching Credential/M.A. Program on page 124.

**Hebrew.** Students interested in Hebrew courses should see <http://classics.ucdavis.edu/hebrew>.

**Human Rights Minor.** Students interested in the Human Rights minor should see <http://humanrightsminor.ucdavis.edu>.

**Jewish Studies.** Students interested in Jewish Studies should see <http://jewishstudies.ucdavis.edu>.

### Courses in Religious Studies (RST)

#### Lower Division

##### 1. Survey of Religion (4)

Lecture—3 hours; discussion—1 hour. Basic concepts introduced through readings of the primary religious literature. Discussion of central ideas (creation, history, law, prophecy, suffering, mysticism, asceticism, karma, reincarnation, moksha, etc.); readings from the Bible, Bhagavad Gita, the Koran, selections from Plato and early Buddhist writings. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, OL, VL, WE.

##### 1A. Pilgrimage (4)

Lecture—3 hours; discussion—1 hour. Introduction to comparative religion, focusing on the theme of pilgrimage in different religious traditions. Not open to students who have taken course 3A. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

##### 1B. Death and Afterlife (4)

Lecture—3 hours; discussion—1 hour. Introduction to comparative religion, focusing on the theme of death and the afterlife in different religious traditions. Not open to students who have taken course 3B. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.

##### 1C. Sacrifice (4)

Lecture—3 hours; discussion—1 hour. Introduction to comparative religion, focusing on the theme of sacrifice in different religious traditions. Not available to those who have taken course 3C. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—Coudert

##### 1D. Conversion (4)

Lecture—3 hours; discussion—1 hour. Introduction to comparative religion, focusing on the theme of conversion in different religious traditions. Not available to those who have taken course 3D. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

##### 1E. Fundamentalism (4)

Lecture—3 hours; discussion—1 hour. Introduction to comparative religion, focusing on the idea of fundamentalism in different religious traditions. Not available to those who have taken course 3E. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, OL, VL, WE.—Miller, Watengaugh

##### 1F. Religion Today (4)

Lecture—3 hours; discussion—1 hour. Introduction to comparative religion, focusing on different religious traditions in the contemporary world. GE credit: ArtHum, Div, Wrt | AH, DD, WC, WE.—Miller

##### 1G. Myth, Ritual, and Symbolism (4)

Lecture—3 hours; discussion—1 hour. Myths, rituals and religious symbols found in a variety of religious traditions including examples from ancient and contemporary religious life. Variety of religious phenomena; validity of different approaches to the study of religion. Not open to students who have taken and received unit credit for course 2. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—F. W. (F. W.) Janowitz

**1H. Sex, Marriage, and Divorce in Medieval and Modern Society (4)**

Lecture—3 hours; discussion—1 hour. Methods used in the study of religion, focusing on a particular theme in a number of religious traditions. GE credit: ArtHum | AH, OL, WC, WE.—Syed

**1J. Music, Voice, and the Word (4)**

Lecture—3 hours; discussion—1 hour. Exploration of relation between religion and musical traditions in various cultures. Investigation of ways music, vocal performance and sound production reflect and shape modern religious sensibilities. Special attention to gender, ethnicity, race, class, nationalism, secularism and mass media. GE credit: ArtHum | AH, WC.—Venkatesan

**10. Contemporary Ethical Issues (2)**

Lecture—2 hours. Presents challenging, contemporary ethical issues from a multicultural perspective. Rotating topics will include Ethical Eating, Capital Punishment, Euthanasia, Poverty, and Animal Rights. May be repeated for credit. GE credit: ArtHum, Wrt | AH, WE.—Coudert, Janowitz, O'Keefe

**10A. Contemporary Ethical Issues (2)**

Discussion—1 hour; extensive writing. Prerequisite: Concurrent enrollment in course 10 required; GE topical breadth and diversity credit only with concurrent enrollment in course 10. Restricted to students enrolled in course 10. Discussion of the readings assigned for course 10 and completion of a major research paper. May be repeated for credit. GE credit: ArtHum, Div, Wrt | AH, WE.—Coudert, Janowitz, O'Keefe

**11. Ethical Eating (4)**

Lecture—3 hours; term paper or discussion—1 hour. Introduction to the complex and varied ethical, religious, and cultural meanings that food has had across the centuries and globe. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—Coudert

**12. The Emergence of Judaism, Christianity and Islam (4)**

Lecture—3 hours; discussion—1 hour. History of religion in the ancient Near East and Mediterranean, from the Persian period through the rise of Islam. Emphasis on historical and social contexts of the formation of new traditions, in particular Judaism, Christianity, and Islam. GE credit: ArtHum, Div, Wrt | AH, OL, WC, WE.

**15Y. Reading War/Fighting War (4)**

Lecture—2 hours; web electronic discussion—1 hour; extensive writing. Introduction to both classic religious texts about war and a set of actual scenarios drawn from the experience and training of soldiers in recent military conflicts. GE credit: ArtHum, Div, Wrt | ACDH, AH, DD, OL, VL, WC, WE.—Janowitz

**21. Hebrew Scriptures (4)**

Lecture—3 hours; term paper or discussion. Selected texts from the Hebrew Scriptures (Genesis II Chronicles) and review of modern scholarship on the texts from a variety of perspectives (historical, literary, sociological, psychological). Course work is based on an English translation and no knowledge of Hebrew is required. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

**23. Introduction to Judaism (4)**

Lecture/discussion—3 hours; term paper. Introduction to the study of religion using examples from the rituals, art and holy texts of Judaism. No prior knowledge of either Judaism or the study of religion is necessary. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, WC, WE.

**30. Religions of South Asia (4)**

Lecture—3 hours; discussion—1 hour. Introduction to South Asian religions, including Hinduism, Buddhism, Islam, Jainism and Sikhism. Traces historical developments from Vedic texts and their ascetic reformulation by sages such as Yajnavalkya, Siddhartha Gautama, and Mahavira into our global present. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Elmore, Venkatesan

**40. New Testament (4)**

Lecture—3 hours; discussion—1 hour. New Testament literature from critical, historical, and theological perspectives. GE credit: ArtHum, Wrt | AH, WC, WE.

**42. Religion and Science Fiction (4)**

Lecture—3 hours; term paper. Representations of actual and fictional religious movements in science fiction and fantasy writing and film. Examination of: the characteristics of religion and religiosity in fictional religious movements; the relationship between religion, science, and technology in modern speculative fiction. GE credit: ArtHum, Div, Wrt | AH, VL, WE.

**45. Christianity (4)**

Lecture/discussion—3 hours; term paper or discussion. Major concepts and practices in the Christian tradition. Survey of the history of Christianity and Christian expansion from antiquity to modern times. Course pays particular attention to Christianity in China, India, Africa, the Middle East, and Latin America. GE credit: ArtHum | AH, VL, WC, WE.

**60. Introduction to Islam (4)**

Lecture/discussion—3 hours; term paper or discussion—1 hour. Introduction to topics central to the Islamic tradition. Muhammad, the Qur'an, Islamic law, theology, philosophy, cosmology, worship, and mysticism. Race and gender in Islam, Islamic revival, and varying experiences of Islam in different historical and cultural settings. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VL, WC, WE.—Syed

**65C. The Qur'an and Its Interpretation (4)**

Lecture/discussion—3 hours; extensive writing. The Qur'an, its history, its various functions in the lives of Muslims, and its different interpretations. Quranic themes such as God and humankind, nature and revelation, eschatology and Satan. Islam and other religions; women, gender, and sexuality. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Syed

**67. Modern Hinduism (4)**

Lecture—3 hours; term paper. Historical survey of modern Hinduism from the early nineteenth century to the present. Topics include Rammohun Roy, Sir William Jones, and Mahatma Gandhi, nationalism, post-colonialism and diasporic religion. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VL, WC, WE.—Elmore, Venkatesan

**68. Hinduism (4)**

Lecture—3 hours; writing. Hindu tradition from ancient to modern times. Multiplicity of religious forms within Hinduism with mention of Jainism, Buddhism, and Sikhism and their relation to the mainstream of Hindu religion. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Elmore, Venkatesan

**69. Introduction to Hindu Mythology (4)**

Lecture/discussion—3 hours; term paper or discussion—1 hour. Survey of the major narrative traditions within Hinduism, including epic literature and local stories in oral, textual, visual and performative forms. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Venkatesan

**70. Religion and Language (4)**

Lecture/discussion—3 hours; term paper. Basic toolkit for studying religious discourse in a variety of traditions. Concentration on the sacred and profane, the wondrous and ordinary, and the mystical and reasonable. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Miller, O'Keefe

**75. Introduction to Chinese Philosophy (4)**

Lecture/discussion—4 hours. Introduction to Chinese philosophy from classical pre-modern times; emphasis on basic concepts and their impact on social conduct; the Age of Philosophers, the Han synthesis, the medieval Buddhist contribution.

**80. Religion, Gender, Sexuality (4)**

Lecture/discussion—3 hours; term paper. Constructions of gender and sexuality within one or more religious traditions, pre-modern and modern. Emphasis on the interaction between religious, medical, and ethical definitions of the human body and sexual behavior. GE credit: ArtHum, Div, Wrt | AH, WE.—Coudert

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only.)—F, W, S. (F, W, S.)

**99. Special Study for Lower Division Undergraduates (1-5)**

(P/NP grading only.)—F, W, S. (F, W, S.)

**Upper Division****100. Study of Religion: Issues and Methods (4)**

Lecture—3 hours; term paper. Principal issues and methods of Religious Studies and associated fields. GE credit: ArtHum or SocSci | AH or SS, WC, WE.—Janowitz

**102. Christian Origins (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Development of Christianity from the end of the first century through the major controversies of the fifth century. Emphasis on the relationship between the new religious movement and the Roman Empire, and issues of early Christian identity and diversity. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

**103. Medieval and Byzantine Christianity (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Christianity in Europe and the Near East from the year 600 to 1450. Focus on the development of Catholic and Orthodox traditions in ritual, art, and thought, with attention to interactions between regional groups, and Christian interaction with Islam. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

**104. Christianity 1450-1700 (4)**

Lecture/discussion—3 hours; term paper. History of Reformation conflicts over the authority of scripture, the nature of man and the universe, and the basis of morality with the goal of understanding how these conflicts laid the foundation for the modern world. GE credit: ArtHum, Div, Wrt.—Coudert

**105. Christianity and Modernity, 1700-1920 (4)**

Lecture—3 hours; term paper. Reaction of Christian critics and apologists to the profound cultural and scientific transformations resulting from the Scientific Revolution, the Enlightenment, and the advent of the modern critical study of religion. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—Coudert

**106. Christianity in the Contemporary World (4)**

Lecture—3 hours; term paper. Christianity in the 20th and 21st centuries. Relationship of Christianity to globalization, industrialization, mass media, and the contemporary secular state. Focus on Christianity in America and developing nations, and on the relationship of established Christian institutions to new Christian movements. GE credit: ArtHum, Div, Wrt | ACGH, AH, WC, WE.—Coudert, O'Keefe

**110. Life, Meaning and Identity (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing. Study of religious lives, the quest for meaning and for personal identity; how religions frame the problems of life; how cultural and personal crises affect youthful identity; the nature and structure of dreams, myths, and ideals. GE credit: AH, WE.—Elmore, Janowitz

**111. Persuasion and Conviction in Religious Tradition (4)**

Lecture/discussion—4 hours; term paper. Selected topics in religious argument. Familiarizes students with the discourse structures of religious persuasion and enables them to perform analysis of such texts. Covers argument styles and structures used in ethics, theology, and preaching. GE credit: ArtHum | ACGH, AH, OL, WC, WE.—Miller, O'Keefe, Syed

**115. Mysticism (4)**

Lecture—3 hours; term paper. Prerequisite: one lower division Religious Studies course. Historical and descriptive analysis of selected key figures in

mystical traditions and readings of representative mystical texts. Analytic term paper. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.

#### **120. Religion, Magic and Science (4)**

Lecture—3 hours; extensive writing. Religion, magic, and science from the middle ages to the present. Contrast between modern scientific methodology and religious and magical thinking. (Same course as Science and Technology Studies 120.) GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—Coudert

#### **122. Studies in Biblical Texts (4)**

Lecture—3 hours; term paper. Prerequisite: course 21. Study of a book from the Prophets or writings from critical, historical, and religious perspectives. May be repeated one time for credit in different subject area. GE credit: ArtHum | AH, WE.—Janowitz

#### **124. Topics in Judaism (4)**

Lecture—3 hours; term paper. Prerequisite: course 21, 23. Examination of selected aspects of Jewish life, religion, or literature. Potential topics include: Jewish Perspectives on Jesus; The Golem: History and Legend; Sexuality and Gender in Late Antique Judaism and Early Christianity. May be repeated for credit when topic differs.—Janowitz

#### **125. Dead Sea Scrolls, Apocrypha, and Pseudepigrapha (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 21 or consent of instructor. Survey of the Dead Sea Scrolls, apocryphal and pseudepigraphical writings of Judaism and Christianity and their historical, social, and religious importance. GE credit: ArtHum, Wrt | AH, WC, WE.—Janowitz

#### **126. The Formation of the Rabbinic Tradition (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: courses 21, 23, 40 or 125. Survey of the classical rabbinic Jewish texts such as the Talmud and of the social and historical contexts of their production in Palestine and Babylonia. GE credit: Wrt | WC.

#### **130. Topics in Religious Studies (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one from course 1, 2, 3A, 3B, or 3C or consent of instructor. Thematic study of a phenomenon in more than one religious tradition or of the relationship between religion and another cultural phenomenon. Topics may include archeology and the Bible, women and religion, religion and violence. May be repeated for credit when topic differs. GE credit: WC, WE.

#### **131. Genocide (4)**

Lecture/discussion—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing. Comparative and critical study of the modern phenomenon of genocide from religious, ethical and historical perspectives. (Same course as Human Rights 131.) GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VL, WC, WE.—W. (W.) Watenpaugh

#### **132. Topics in Mediterranean Ancient Religion (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 21, 40 or consent of instructor. Thematic study of specific sociological, literary or theological theme across the religious traditions of the ancient Mediterranean/Near East: Greek and Roman religions, Judaism, Christianity, Zoroastrianism, Manichaeism, etc. Topics may include creation, sacrifice, priesthoods, prophecies, holy books, the afterlife. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, WC, WE.

#### **134. Human Rights (4)**

Lecture/discussion—3 hours; term paper or discussion—1 hour. Introduction to the interdisciplinary study of the origins, evolution, denial and protection of Human Rights. No credit for students who have completed Religious Studies 90. (Same course as Human Rights 134.) GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—F. (F.) Watenpaugh

#### **135. The Bible and Film (4)**

Lecture—2 hours; term paper; film-viewing—3 hours. Prerequisite: Humanities 10 recommended. Examination of the uses of the Judeo-Christian scrip-

tures in film. Topics include dramatic depictions of biblical stories, the tension between science and religion, allegorical treatments of biblical themes, and the problems of religious conviction.

#### **138. Human Rights, Gender, and Sexuality (4)**

Lecture/discussion—3 hours; term paper. Gender and sexuality in the context of human rights. Topics include women's participation in the public sphere, the right to change gender, the right for family privacy, and the right to marriage. (Same course as Human Rights 138.) GE credit: ArtHum | AH, WC, WE.—F, W, S, Su. (F, W, S, Su.) O'Keefe

#### **140. Christian Theology (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Historical and systematic introduction to Christian doctrine, with attention to divergent traditions and the problem of orthodoxy and heresy. GE credit: ArtHum | AH, WC, WE.

#### **141A. New Testament Literature: Synoptic Gospels (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Life and thought of the early Church as reflected by the Synoptic Tradition—Matthew, Mark, Luke and Acts. Offered every third year to alternate with 141B, 141C. GE credit: ArtHum, Wrt | AH, WC, WE.

#### **141B. New Testament Literature: John (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Life and thought of the early Church as reflected by the Johannine Tradition; the Gospel and letters of John. Offered every third year to alternate with courses 141A and 141C. GE credit: ArtHum, Wrt | AH, WC, WE.

#### **141C. New Testament Literature: Paul (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Life and thought of the early Church as reflected by the Pauline tradition—the letters of Paul. Offered every third year to alternate with 141A, 141B. GE credit: ArtHum, Wrt | AH, WC, WE.

#### **143. New Testament Apocrypha (4)**

Lecture—3 hours; term paper. Prerequisite: consent of instructor. Extra-canonical Christian writings and their reception, from antiquity to the present. Emphasis on the importance of New Testament figures both as literary characters and as authors within different Christian traditions. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

#### **144. History of the Bible (4)**

Lecture—3 hours; term paper. Prerequisite: course 21 or 40. History of the formation of the Christian biblical canon, with emphasis on differences between Christian traditions; survey of translations and adaptations of biblical narrative in Christianity, Judaism, and Islam, as well as in contemporary culture. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

#### **145. Contemporary American Religion (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 40 and History 17B recommended. Examination of several major movements and phenomena in twentieth-century American religion. GE credit: ArtHum | ACGH, AH, DD, WE.

#### **150. Religious Ethics (4)**

Lecture/discussion—3 hours; term paper or discussion. Prerequisite: course 10 recommended. Study of the religious bases of ethics through examination of ethical problems that arise in different religious cultures around the world and in nations where multiple religious cultures face similar issues. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—O'Keefe, Syed

#### **154. The Hindu Temple (4)**

Lecture—3 hours; term paper. Comparative history of architecture and symbolism of the Hindu Temple in India, Southeast Asia and the United States. Attention to the temple as expression of religious knowledge, political authority, and cultural heritage through the lens of colonialism and postcolonialism. (Same course as Art History 154.) GE credit: ArtHum or SocSci | AH or SS, VL, WC, WE.—Venkatesan

#### **156. Religion and the Performing Arts in India (4)**

Lecture—3 hours; term paper. Prerequisite: course 30, 68, or consent of the instructor. Survey of religion and performing arts in India. Emphasis on the influence of colonialism, nationalism, and regionalism on the history of Indian performing arts. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Venkatesan

#### **157. Hindu Women and Goddesses (4)**

Lecture—3 hours; term paper. Prerequisite: course 10 recommended. Hindu goddesses and the religious lives of Hindu women in India and the diaspora. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Venkatesan

#### **158. The Ramayana (4)**

Lecture—3 hours; term paper. Exploration of the Indian epic, Ramayana, through the lens of literature, performance, and visual art. Emphasis on the text's diversity and its contemporary global relevance. Topics include Ramayanas in Southeast Asia, and in various South Asian diaspora communities. (Same course as Comparative Literature 156.) GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Venkatesan

#### **160. Introduction to Islamic Thought (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 60 recommended. The development of Islamic thought from the first centuries of Islam to the eighteenth century. Theology, philosophy, ethics, Sufism, historiography, political theory, fundamentalism, al-Farabi, al-Ghazzali, Ibn Rushd, Tusi, Ibn al-Arabi, Rumi, Molla Sadra, Ibn Khaldun, Ibn Abd al-Wahhab. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH, WC, WE.—Syed

#### **161. Modern Islam (4)**

Lecture/discussion—3 hours; term paper. The response of Islam to modernity: secularism, reformism, fundamentalism. Islam and imperialism, women, media and immigration. Islamic modernism, political Islam, Islam in Europe and America. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Miller, Watenpaugh

#### **161B. Modern Islam: Authority and Tradition In Process (4)**

Lecture/discussion—3 hours; term paper. Survey of Islamic thought, social organization, politics from eighteenth century through present. Focus on changing notations of moral authority and tradition. Concentration on Middle East and South Asia with sustained treatment of North American engagements with the Islamic world. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, OL, WC, WE.—Miller

#### **162. Introduction to Islamic Law (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 60 recommended. The development of Islamic law in the formative centuries of Islam, ca. 600-1000, as well as its adaptation to changing economic, social, and political conditions in subsequent periods. Legal schools, legal theory, the Shari'a, reformist movements, human rights. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH, WC, WE.—Syed

#### **163. The Social Life of Islam (4)**

Lecture—3 hours; term paper. Prerequisite: course 60 or History 6 recommended. Introduction to culture and social life in Muslim societies. Focus on the plurality of traditions in Muslim faith, reason, and everyday practice. Special attention to Muslim rituals, ethical values, verbal genres, family life, sexuality and veiling, and youth culture. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, OL, WC, WE.—Miller

#### **165. Islam in Asia (4)**

Lecture/discussion—3 hours; extensive writing. Islam as a lived religion in the Indian sub-continent, Central Asia, China, and Southeast Asia. Emphasis is on primary sources studied comparatively and historically. GE credit: ArtHum, Div, Wrt.

**166. Religion and Media in Arab World (4)**

Lecture—4 hours. Exploration of the role and experience of media technologies in the Arab world. Study of digital and electronic media as well as alternative media practices. Investigation of new trends in political activism and identity formation. (Same course as Middle East/South Asian Studies 131C.) GE credit: SocSci | OL, SS, VL, WC, WE.—Miller

**167. Iraq (4)**

Seminar—3 hours; term paper. Origins, causes and ethical challenges of conditions in Iraq; larger historical, cultural and ethical dimensions of mass violence, war, liberation, neocolonialism, terrorism and resistance.—Watenpaugh

**170. Buddhism (4)**

Lecture—3 hours; term paper. Buddhism in its pan-Asian manifestations, from its beginning in India to its development in Sri Lanka and Southeast Asia, Central Asia, China and Japan; teachings and practices, socio-political and cultural impact. GE credit: ArtHum | AH, VL, WC.—Elmore

**172. Ch'an (Zen) Buddhism (4)**

Lecture/discussion—3 hours; term paper. Doctrines and methods of the Ch'an Buddhism, both ancient and modern. Review of ritual techniques, including meditation.

**175A. Chinese Intellectual Traditions: Daoist Traditions (4)**

Lecture/discussion—4 hours. Prerequisite: a course in Chinese history recommended. English-language survey of key Daoist texts and scholarship. Topics include Daoist concepts of the cosmos, the natural world, scripture, the body, and immortality; Daoist divinities; Daoism and the state. (Same course as Chinese 100A) GE credit: ArtHum, Div, Wrt | AH, WC.—Halperin

**189. Senior Colloquium (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Primarily for seniors in Religious Studies. Discussion in depth of a problem in religion which requires the methods of several disciplines and is important in the encounter between religions.

**190. Seminar (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor; required of all Religious Studies majors. Allows majors to integrate their disciplined study of the field. Emphasis on current scholarly debate about the methods for analyzing and comparing diverse religious traditions.

**194HA. Special Study for Honors Students (1-5)**

Independent study. Prerequisite: consent of instructor. Open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a religious studies topic. (P/NP grading only.)

**194HB. Special Study for Honors Students (1-5)**

Independent study. Prerequisite: consent of instructor. Open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a religious studies topic. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate****201. Methods and Issues in Religious Studies (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Focuses on controversies in the study of comparative religion. How is religion best defined? Are there methods unique to the study of religion? What does the study of religion contribute to the

study of society in general? May be repeated two times for credit when topic differs.—Coudert, Sanders

**205. Religion and Media (4)**

Lecture/discussion—3 hours; term paper. Many communities are finding global media technologies useful for religious practice. This course examines how religious revitalization is historically situated. A phenomenological approach will enable students to situate media and religion within the social and material world of practitioners.—Miller

**210. Religion and Postcoloniality, or Savages, Civilization, and Spirituality (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. This course examines relations between religion and colonialisms. Using specific historical situations it explores some of our thorniest theoretical problems. Students acquire a solid understanding of postcolonial theory and the historical tools to critically engage religion in the present.—Elmore

**212. Religion and Violence (4)**

Seminar—3 hours; term paper. Comparative and critical study of the ideological, cultural, and theological relationship between forms of violence and religion and religious practice.—Watenpaugh

**215. Topics in the History of Christianity (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Selected topics in the history of Christianity. Intended for graduate students seeking to do advanced work in the study of Christianity. May cover issues in Christian thought from antiquity, the middle ages, the early modern or modern period. May be repeated for credit when topic differs.—Coudert

**299. Directed Research (1-12)**

(S/U grading only.)

**Professional****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Russian

(College of Letters and Science)

Jaimey Fisher, Ph.D., Chairperson of the Department

**Program Office.** 213 Sproul Hall  
530-752-1219; <http://russian.ucdavis.edu>

**Committee in Charge**

Carlee Arnett, Ph.D. (*German and Russian*)  
Jenny Kaminer, Ph.D. (*German and Russian*)  
Elisabeth Krimmer, Ph.D. (*German and Russian*)  
Olga Stuchebrukhov, Ph.D. (*German and Russian*)

**Faculty**

Jenny Kaminer, Ph.D. (*German and Russian*)  
Olga Stuchebrukhov, Ph.D. (*German and Russian*)

**Affiliated Faculty**

James Gallant, Ph.D., Lecturer Emeritus  
Daniel Rancour-Laferriere, Ph.D., Professor Emeritus  
Valerie A. Tumins, Ph.D., Professor Emerita

**Emeriti Faculty**

Liliana Avramenko, Lecturer

**The Major Program**

The Russian major introduces students to a culture rich in art, music, theater, film, language, and literature. The major offers an opportunity to learn skills needed to enter the fields of foreign affairs, world politics, and international trade, or to begin graduate work in literature, history, cultural studies and international relations.

**The Program.** The major program instructs students in speaking, understanding, reading, and writing the Russian language. The program also acquaints students with the intellectual and cultural

contributions of the Russian world through the study of its literature, traditions, and institutions.

**Internships and Career Alternatives.** Russian majors may participate in internships where they can serve as translators and interpreters for schools and business firms throughout Northern California. Upon graduation, many Russian majors enter the business world or enter graduate programs in Slavic studies and international relations. The program encourages students to supplement their Russian studies with courses in related fields such as international relations, political science, computer science, cultural studies, or economics in order to maximize their career possibilities.

**A. B. Major Requirements:**

UNITS

**Preparatory Subject Matter .....** **0-27**

Russian 1-6; or the equivalent ..... 0-27

**Depth Subject Matter .....** **36**

Russian 101A, 101B, 101C ..... 12

Russian 102 or 103 or 104 or 105 ..... 4

Additional upper division units chosen in consultation with adviser from the following selection of Literature and Culture courses taught in Russian and English ..... 20

Russian 122, 124, 126, 127, 129, 130,

133, 139, 140, 141, 142, 143, 150

The elective upper-division courses in English can be satisfied in part by one or more courses in History, Political Science, Comparative Literature and other departments after consultation with, and prior approval of, the major adviser.

The total of 36 upper-division units may include units earned in the Education Abroad Program.

**Total Units for the Major..... 36-63**

**Major Adviser.** Olga Stuchebrukhov

**Minor Program Requirements:**

UNITS

**Russian .....** **20**

Russian 101A, 101B, 101C ..... 12

Other upper division Russian courses ..... 8

**Honors and Honors Program.** The honors program comprises at least one quarter of study under course 194H, which will include a research paper. For details consult the major adviser.

**Study Abroad.** Students who have completed one or two years of Russian language study can participate in the Education Abroad Program (EAP) in Moscow. Many of our students also participate in summer, semester, and year-long programs sponsored by CIEE and ACTR in St. Petersburg and Moscow.

**Prerequisite Credit.** Credit normally will not be given for a course if that course is the prerequisite for a course already completed.

**Courses in Russian (RUS)****Lower Division**

**Course Placement.** Students who have learned Russian at home must consult the department for placement instructions. Students with two years of Russian in high school normally continue in Russian 2; those with three years, Russian 3; those with four years, Russian 4.

**1. Elementary Russian (5)**

Discussion—5 hours; laboratory—1 hour. Introduction to Russian grammar and development of all language skills in a cultural context with special emphasis on communication. (Students who have successfully completed Russian 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.) GE credit: ArtHum | AH, WC.—F. (F.)

**1A. Accelerated Intensive Elementary Russian (15)**

Lecture/discussion—15 hours. Special 12 week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to Russian grammar and development of all language skills in a cultural context with emphasis on communication. Not open to students who have completed course 1, 2, or 3—*Su.* (*Su.*) Arnett

**2. Elementary Russian (5)**

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1. Continuation of grammar and language skills developed in course 1. GE credit: ArtHum | AH, WC.—W. (*W.*)

**3. Elementary Russian (5)**

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 2. Continuation of grammar and language skills developed in course 2. GE credit: ArtHum | AH, OL, WC.—S. (*S.*)

**4. Intermediate Russian (4)**

Laboratory/discussion—4 hours. Prerequisite: course 3. Grammar review and conversational practice in Russian. GE credit: ArtHum | AH, OL, WC.—F. (*F.*)

**5. Intermediate Russian (4)**

Discussion—4 hours; laboratory—1 hour. Prerequisite: course 4. Grammar review. Introduction to literature in its sociopolitical context. Conversational practice. GE credit: ArtHum | AH, OL, WC.—W. (*W.*)

**6. Intermediate Russian (4)**

Discussion—4 hours; laboratory—1 hour. Prerequisite: course 5. Grammar review. Intermediate conversation and continued reading of literature. Social and cultural practices in contemporary Russia; introduction to Russian history. GE credit: ArtHum | AH, OL, WC.—S. (*S.*)

**98. Directed Group Study (1-5)**

Discussion—1-5 hours. (P/NP grading only.)—F, W, S. (*F, W, S.*)

**99. Special Study for Undergraduates (1-5)**

(P/NP grading only.)—F, W, S. (*F, W, S.*)

**Upper Division****101A. Advanced Russian (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 6 or consent of instructor. Topics in Russian. Grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversation exercises utilizing literary and colloquial variants of current Russian speech. GE credit: ArtHum | AH, WC.—F. (*F.*) Avramenko

**101B. Advanced Russian (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 101A or consent of instructor. Continuation of course 101A. Topics in Russian grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversation exercises utilizing literary and colloquial variants of current Russian speech. GE credit: ArtHum | AH, WC.—W. (*W.*) Avramenko

**101C. Advanced Russian (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 101B. Continuation of course 101B. Topics in Russian grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversation exercises utilizing literary and colloquial variants of current Russian speech. GE credit: ArtHum | AH, WC.—S. (*S.*) Avramenko

**102. Russian Composition (4)**

Lecture/discussion—3 hours; tutorial—1 hour. Prerequisite: course 6 or consent of instructor. Practice in writing Russian. One composition on a different topic each week. Topics include history, geography, politics, and literature of Russia; comparison of Russian and American lifestyles; current events. Conducted in Russian. GE credit: ArtHum | AH, WC, WE.

**103. Literary Translation (4)**

Discussion—3 hours. Prerequisite: course 101C. Translation of Russian literary texts into stylistically equivalent idiomatic English.

**105. Advanced Russian Conversation (4)**

Discussion—3 hours; practice—1 hour. Prerequisite: course 6. Intensive conversational practice and discussion based on current events and contemporary texts. GE credit: ArtHum | AH, OL, WC.

**122. 19th-Century Russian Literature (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 101C when the course offered in Russian; no prerequisite when offered in English. Not open to students who have taken course 121 and 127. Study of Russian literature (prose fiction, drama, poetry) from the period between 1800 and the end of the 19th century. May include authors like Pushkin, Lermontov, Gogol, Turgenev, Dostoevsky, Tolstoy, Chekhov. Offered alternately in English or Russian. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE.—Stuchebrukhov

**124. Twentieth-Century Russian Literature (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 101C when offered in Russian; no prerequisite when offered in English. Study of Russian literature (prose, drama, poetry) from the period between 1900 and the end of the 20th century. Authors like Y. Olesha, M. Bulgakov, D. Kharms, and I. Petrushevskia. Taught in Russian. Not open for credit to students who have taken courses 123 or 128. GE credit: ArtHum | AH, OL, VL, WC, WE.—Kaminer

**126. The Russian Theater (4)**

Lecture—3 hours; term paper. Prerequisite: course 101C or consent of instructor. The main works of Russian dramatists from Fonvizin to the present, including Gogol, Turgenev, Tolstoy, Ostrovsky, Chekhov, Blok, Mayakovsky, Kharms. Conducted in Russian. GE credit: ArtHum | AH, WC, WE.—Kaminer

**129. Russian Film (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: completion of Subject A requirement. History of Russian film; film and social revolution, the cult of Stalin, dissident visions; film and the collapse of the Soviet empire; gender and the nation in Russian film. Course taught in English; films are in Russian with English subtitles. (Same course as Film Studies 129.) GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.

**130. Contemporary Russian Culture (4)**

Lecture—3 hours; term paper. Prerequisite: consent of instructor. Current trends in Russian culture and the relationship between artists and the government. Topics include recent changes in the cultural scene, postmodernist trends in literature, visual art, film, and theater. Offered in alternate years. GE credit: ArtHum | AH, OL, WC, WE.—S. (*S.*)

**133. Post-Soviet Literature (4)**

Lecture/discussion—3 hours; term paper. Major authors and trends in Russian literature in post-1991 period. Discussion of impact of economic, social, and cultural turmoil of post-Soviet period on literary marketplace. Analysis of development of literary postmodernism in Russia. GE credit: ArtHum, Wrt | AH, WC, WE.—F. (*F.*) Kaminer

**139. Pushkin (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 101C or consent of instructor. Three major periods of Pushkin's poetical works: his early lyceum verse; his poetry of the early 1820s; and the mature period. Further study of Pushkin's prose fiction, drama, and journalism. GE credit: ArtHum, Div | AH, OL, WC, WE.—Stuchebrukhov

**140. Dostoevsky (in English) (4)**

Lecture—3 hours. Reading and analysis of Dostoevsky's principal works such as Crime and Punishment, The Idiot, The Brothers Karamazov, and The Diary. Study of social and political views as reflected in Dostoevsky's works. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Stuchebrukhov

**141. Tolstoy (in English) (4)**

Lecture—3 hours; term paper. Study of Leo Tolstoy's literary evolution and moral quest. Readings include his Confession, a major novel such as War and Peace or Anna Karenina, and representative shorter fiction. GE credit: ArtHum, Div, Wrt | AH, OL, WE.—Stuchebrukhov

**142. Women in Russian Culture (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: any introductory course in literature. Study of the representation of (and by) women in contemporary Russian fiction and film. Exploration of issues such as family dynamics/motherhood, sexuality, work, and women's relationship to the state. Offered in English. GE credit: ArtHum | AH, WC, WE.—Kaminer

**143. Chekhov (in English) (4)**

Lecture/discussion—3 hours; extensive writing. Examination of Chekhov's short stories and major plays, such as The Seagull, Uncle Vanya, The Three Sisters, The Cherry Orchard, and Ivanov, in the broader cultural context of European and Russian fin de siècle. GE credit: ArtHum, Div, Wrt | AH, OL, WC, WE.—Stuchebrukhov

**150. Russian Culture (4)**

Discussion—3 hours; term paper. Knowledge of Russian not required. Study of Russian culture in nineteenth and twentieth centuries. Brief introduction of the beginnings up to nineteenth century. Russian art, music, philosophy, church, traditions, and daily life. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

**192. Research Essay (2)**

Prerequisite: a Russian literature course (may be taken concurrently). A research essay, based on primary and secondary sources, dealing in depth with a topic arising from or related to the prerequisite literature course. May be repeated for credit. GE credit: ArtHum | AH, WC, WE.

**194H. Special Study for Honors Students (4)**

Independent study—4 hours. Prerequisite: open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Russian studies.

**195H. Honors Thesis (4)**

Independent study—4 hours. Prerequisite: course 194H. Writing an honors thesis, under the direction of a faculty member, on a topic in Russian studies.

**197T. Tutoring in Russian (1-4)**

Seminar—1-2 hours; laboratory—1-2 hours. Prerequisite: upper division standing; consent of instructor. Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated six times for credit. (P/NP grading only.)

**198. Directed Group Study (1-5)**

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate****299. Individual Study (1-12)**

Prerequisite: graduate standing. Restricted to graduate students. May be repeated for credit. (S/U grading only)

**Professional****396. Teaching Assistant Training Practicum (1-4)**

May be repeated for credit. (S/U grading only.)

**Science and Society**

**The Program.** Science and Society is an interdepartmental teaching program administered by the College of Agricultural and Environmental Sciences that offers students throughout the campus the opportunity to discover the connections that link the social, biological, and physical sciences with societal issues and cultural discourses. Course work examines discovery processes in relation to societal values, public policy and ethics, including issues associated with cultural diversity. Whenever possible, opportunities outside the classroom are included as part of the learning experience.

The Science and Society teaching program serves students of all majors and interests. It can allow lower division students who have not yet declared a major a meaningful context for exploring diverse subject matters. The minor for the program includes, in addition to Science and Society courses, upper division courses from both the College of Agricultural and Environmental Sciences and the College of Letters and Science in the areas of history and philosophy of science, policy and decision making, communication of science, and culture, ethics and applications.

**Minor Program Requirements:**

UNITS

**Science and Society** ..... 22-27  
 Science and Society 1 ..... 4  
 Science and Society 2, 5, 15, 20, 30 ... 2-4  
 One course from each of the four following areas:

*History and Philosophy of Science:* Community and Regional Development 118, 162, History 185A, 185B, History and Philosophy of Science 150, Nature and Culture 100, Philosophy 107, 108, or 109 ..... 4  
*Policy and Decision Making:* Agricultural and Resource Economics 120, 147, 150, Consumer Science 100, Environmental Science and Policy 160, 165, Political Science 175, Sociology 155, or 181 ..... 3-4  
*Communication of Science:* Agricultural Education 172, Agricultural Management and Rangeland Resources 122, Anthropology 120, Communication 115, 130, 135, 138, 140, Community and Regional Development 174, Linguistics 163, Political Science 165 ..... 3-4  
*Culture, Ethics and Applications:* Agricultural Management and Rangeland Resources 101, Community and Regional Development 142, Environmental Science and Policy 126, 164, Fiber and Polymer Science 110, International Agricultural Development 104, Plant Biology 151, Plant Pathology 140, or Sociology 144 ..... 3-4  
 Science and Society 120 ..... 3

**Minor Adviser.** D.M. Rizzo

**Related Courses.** See Agricultural and Resource Economics 120, 147, Agricultural Management and Rangeland Resources 1, 101, 122, Communication 115, 140, Community and Regional Development 118, 142, 162, 174, Avian Sciences 13, Environmental Science and Policy 126, 160, 164, 165, Fiber and Polymer Science 110, History 185A, 185B, History and Philosophy of Science 150, Nature and Culture 100, Plant Biology 12, Plant Pathology 140, Political Science 175, Wildlife, Fish, and Conservation Biology 10.

**Courses in Science and Society (SAS)****Lower Division****1. Critical Inquiry into Contemporary Issues (4)**

Lecture/discussion—3 hours; discussion—1 hour. Open to first year and new transfer students only. Contemporary issues, including global population trends, economic and environmental changes, cultural diversity and biodiversity, nutrition and food safety, fiber and textiles, changing consumer cultures. Inquiry processes emphasize ethics, multiple disciplines, and multiple perspectives. GE credit: SciEng or SocSci, Div, Wrt | SE or SS, WE.—F. (F.) Caswell-Chen

**2. Feeding the Planet: Influences on the Global Food Supply (3)**

Lecture/discussion—3 hours. Scientific principles and dynamic interactions involved in food production, food processing, nutrition, shelf life and marketing from differing viewpoints. Physical, biological and social science issues influencing the availability and safety of the food supply worldwide. GE credit: SciEng or SocSci, Wrt | SE or SS, SL.—W. (W.) Bostock, Davis

**3. Science, Technology and Society (4)**

Lecture—4 hours. Impact of developments in science and technology on the individual in society and how economics, politics, culture and values affect technological development. Not open for credit to students who have completed former course Applied Behavioral Sciences 18. Offered irregularly. GE credit: SciEng or SocSci, Wrt | SE or SS.

**4. Water in Popular Culture (3)**

Film viewing—2 hours; discussion—1 hour; lecture—1 hour. Importance of water in many aspects of society as revealed through a survey of its depictions in film. GE credit: SciEng or SocSci, Wrt | SE or SS, SL.—F. (F.) Pasternack

**5. Pathways to Discovery: Science and Society (3)**

Lecture/discussion—3 hours. Highlights a current issue and/or controversy found in contemporary society and looks at how this problem impacts and is affected by the physical, social and biological sciences. Course varies with topic offered. May be repeated two times for credit. GE credit: SciEng or SocSci, Wrt | SE or SS.

**7. Terrorism and War (4)**

Lecture—3 hours; discussion—1 hour; term paper. Exploration of terrorism and war from science and social sciences perspectives. Terrorist cells and groups; biological, chemical, nuclear, and environmental terrorism; intelligence gathering and espionage; military strategy; genocide; epochal wars; clash of civilizations; nation building; and future global scenarios. GE credit: SciEng or SocSci, Div, Wrt | SE or SS, WE.—S. (S.) Carey

**7V. Terrorism and War (4)**

Web Virtual Lecture—3 hours, autotutorial—5 hours, web electronic discussion—1 hour, extensive writing; term paper or discussion. Prerequisite: consent of instructor. Terrorism and war from science and social sciences perspectives: terrorism (terrorist cells, WMD's, religious extremism), warfare (military strategy, genocide), and statecraft (diplomacy, clash of civilizations, epochal wars). GE credit: SocSci, Wrt | SS, WC, WE.—Carey

**8. Water Quality at Risk (3)**

Lecture—2 hours; discussion—1 hour. Natural and human threats to water quality. Balance of science and policy in all aspects of attaining, maintaining, and managing water quality, water contamination. Decoding popular media coverage of water quality and water contamination. (Same course as Environmental Science and Management 8.) Not open to students who have successfully completed Environmental and Resource Sciences 8. (Formerly Environmental and Resource Sciences 8.) GE credit: SciEng or SocSci, Wrt | SE or SS, SL, WE.—W. (W.) Herenes

**9. Crisis in the Environment (3)**

Lecture—3 hours. Explores contemporary environmental issues by examining the causes, effects and solutions to a wide range of environmental problems facing the global ecosystem. Integrated discussion of political, societal and economic impact linkages with environmental problems. GE credit: SciEng or SocSci, Wrt | SE or SS, WE.—S. (S.) Dahlgren, Houlton

**10. Water, Power, Society (3)**

Lecture—2 hours; discussion—1 hour. Water resources issues. How water has been used to gain and wield socio-political power. Water resources development in California as related to current and future sustainability of water quantity and quality. Roles of science and policy in solving water problems. (Same course as Hydrologic Science 10.) GE credit: SciEng or SocSci, Wrt | SE or SS, SL.—S. (S.) Fogg

**11. California Geography (3)**

Lecture—2 hours; discussion—1 hour; term paper. Introduction to cultural/societal patterns of California and their relationship to natural resources, biomes, geomorphology, and physiography. Focus on diversity of California's environments and their impacts on and alterations by human activities. Environmental issues in the State. GE credit: SciEng or SocSci, Wrt | SE or SS, WE.—F. (F.) Richards

**12. Plants and Society (4)**

Lecture—3 hours; extensive writing—3 hours. Prerequisite: high school biology. Dependence of human societies on plant and plant products. Plants as resources for food, fiber, health, enjoyment and environmental services. Sustainable uses of plants for food production, raw materials, bioenergy, and environmental conservation. Global population growth and future food supplies. Not open for credit to students who have complete Plant Biology 12. (Former course Plant Biology 12.) (Same course as Plant Sciences 12.) GE credit: SciEng or SocSci, Div, Wrt | SE, SS.—F, W, S. (F, W, S.) Fischer, Jasieniuk, Nevins, Tian

**13. Disease and Society (3)**

Lecture—3 hours. Limited enrollment. Introduction to the concept of disease, the societal and personal impacts of past, present and future diseases, and the science behind disease discoveries, causes, evolution, diagnosis, treatment, and prevention. GE credit: SciEng or SocSci | SE or SS, SL.—W. (W.) Leveau

**15. AIDS and Society (4)**

Lecture—3 hours; discussion—1 hour. Biology of HIV transmission and AIDS and how a biological agent acts on and influences the structure of contemporary society. Includes the psychology of risk and stigma, gender issues, changes in social relationships and public policy, global implications. GE credit: SciEng or SocSci, Div, Wrt | SE or SS.—S. (S.) Radke

**18. GIS and Society (3)**

Lecture—2 hours; Laboratory—3 hours; term paper or discussion—0.3 hours. Geographic Information Systems (GIS) as a spatial technology and a tool for change in society. Evaluate physical, biological and social impact of GIS in the context of case studies such as land, water and community planning. GE credit: SciEng or SocSci, Wrt | QL, SE or SS, SL, VL—S. (S.) Wallender

**20. Genetics and Society (4)**

Lecture—3 hours; discussion—1 hour. Not open for credit to students who have completed course 140. Basic concepts of genetics, modern methods of biotechnology, the process of scientific discovery and the public perception of the process; present and future impact of genetics on society. GE credit: SciEng or SocSci, Wrt | OL, SE or SS, SL, WE.—F, W. (F, W.) Coaker, Cook, Epstein, Ronald

**25. Global Climate Change: Convergence of Biological, Geophysical, & Social Sciences (3)**

Lecture—2 hours; discussion—1 hour. Causes of global climate change and the biological, geophysical, and social consequences of such change. Methods used by different scientists for predicting future events. Complexity of global affairs. Decision making under uncertainty. GE credit: SciEng or SocSci, Div, Wrt | OL, QL, SE or SS, SL, VL, WC, WE.—W. (W.) Bloom

**25V. Global Climate Change: Convergence of Biological, Geophysical, & Social Sciences (3)**

Web virtual lecture; web electronic discussion—2 hours; autotutorial—5 hours; extensive writing—2 hours. Causes of global climate change and the biological, geophysical, and social consequences of such change. Methods used by different scientists for predicting future events. Complexity of global affairs. Decision making under uncertainty. Students cannot take both course 025 and 025V for credit. GE credit: SciEng or SocSci | SE or SS, DD, OL, QL, SL, VL, WC, WE.—F, W, S. (F, W, S.) Bloom

**30. Mushrooms, Molds, and Society (3)**

Lecture/discussion—3 hours. Fungi as organisms with which humans interact daily, societal issues arising from these interactions. Fungi in medicine, religion, agriculture, and industry, as well as cultural perceptions of fungi. GE credit: SciEng or SocSci, Wrt | SE or SS.—F, W. (F, W.) Gilchrist, Gordon, Rizzo

**40. Photography: Bridging Art and Science (3)**

Lecture/discussion—2 hours; studio—3 hours. Photography is used to explore the common ground between art and science. Photographic processes, creativity and aesthetics, chaos and order, principles of space, time and light. Photographic interpretation and documentation of the natural world. GE credit: ArtHum or SciEng or SocSci, Div, Wrt | AH or SE or SS, SL, VL, WE.—S. (S.) Nathan

**41. Understanding Performance: Appreciation of Modern Theatre, Dance, Film and Performance Art for the Humanities and Sciences (4)**

Lecture/discussion—3 hours; laboratory/discussion—1 hour. Relevance of theatre and performance to modern culture, science and society. Approaches

to theatre/dance/media/performance art, integrated into Mondavi Centre for the Arts and Theatre and Dance Department programs. (Same course as Dramatic Art 5.) GE credit: ArtHum, Div | AH, DD, OL, VL, WC, WE.—F, W, S. (F, W, S.)

**42. Earth, Water, Science, Song (3)**

Lecture—2 hours; studio—3 hours. Fusion of water and soil science with performing arts. Creative communication of scientific concepts and facts through exercises in song writing and poetry. Design, discuss and conduct public performances related to the functioning of the natural world. GE credit: ArtHum or SciEng | AH or SE, OL.—W. (W.) Silk

**70A. Genetic Engineering in Medicine, Agriculture, and Law (5)**

Lecture—5 hours. Not open to students who have taken Biological Sciences 1A, Biological Sciences 2A or equivalent, or course 20; concurrent enrollment in Plant Biology 98 required. Historical and scientific study of the impact of genetic engineering in medicine, agriculture, and law, including examination of social, ethical, and legal issues raised. Offered in a distance-learning format. GE credit: SciEng or SocSci | SE or SS, SL.—W. (W.) Harada

**90A. Issues in Environmental and Resource Sciences (2)**

Seminar—2 hours; two Saturday field trips. Prerequisite: limited to lower division students. Discussion of historical and current issues in environmental and resource sciences. Lectures, reading and field trips will provide background for selected topics.—F, W. (F, W.)

**90B. Observing and Writing in Biology (2)**

Seminar—1 hour; laboratory—1 hour; term paper. Students will observe the interactions between microscopic organisms, conduct simple laboratory experiments, describe and analyze observations and discuss scientific observations and writing.

**90C. Herbal Medicine: Relevance for the 21st Century (2)**

Seminar—2 hours. Medicinal usage of plants from biological, historical, and cultural perspectives. Broad contexts of holistic and scientific paradigms for understanding herbal medicine. Saturday field trip to teach herb identification.—W. (W.)

**90D. Saving Endangered Plant Species: Problems and Prospects (2)**

Seminar—2 hours. Endangered plant species illustrate the value of conservation biology. Topics include societal issues and plant germplasm conservation, comparisons to animal conservation issues, and the economics of and justification for preserving endangered plants.—F. (F.) Parfitt

**90E. Biotechnology—a New Era, a New Struggle (2)**

Seminar—2 hours. Animal biotechnology and its applications. Discussion topics include potential societal impacts of various technologies, factors shaping public opinion, and ethical and moral questions arising from new biotechnology applications.—F. (F.) Murray

**90F. Food Distribution in a Hungry World (2)**

Seminar—2 hours. Class size limited to 15 students. The biological, technological, environmental, and socioeconomic factors related to food distribution systems at local, regional, national, and international levels. The potential for increasing world food supply by reducing losses between harvest and consumption.—F. (F.)

**90G. Science, Society and the Environment (2)**

Seminar—2 hours. Contemporary environmental issues, scientific approaches to addressing these issues, and accompanying societal and ethical considerations.—W. (W.) Wilson

**90X. Lower Division Seminar (1-4)**

Seminar—1-4 hours. Prerequisite: lower division standing; consent of instructor. Limited enrollment. Examination of a special topic in Science and Society through shared readings, discussions, written

assignments, or special activities such as fieldwork, laboratory work, etc. May be repeated for credit.—F, W, S. (F, W, S.)

**91A. Explorations in Science and Society: Cultures and Identities (2)**

Seminar—1 hour; extensive writing or discussion—1 hour. Prerequisite: participation in the summer Special Transitional Enrichment Program (STEP) or consent of instructor; course 1 concurrently. Exploration of linkages among identity and culture, multi-disciplinary inquiry, and agricultural and environmental science issues.—F. (F.)

**91B. Explorations in Science and Society: Leadership and Collaboration (2)**

Seminar—1 hour; extensive writing or discussion—1 hour. Prerequisite: course 91A or consent of instructor. Extends understanding of culture and identity to issues of leadership, collaboration, and social action in science and society. Includes a mandatory two and half day retreat.—W. (W.)

**91C. Explorations in Science and Society: Engagement (2)**

Seminar—1 hour; internship—3 hours. Prerequisite: course 91B or consent of instructor. Explorations of the concept of engagement in science and society from philosophical and practical perspectives. Exploration of the concept of engagement based on lectures, self reflection, discussions and three hours of K-12 school internships per week.—S. (S.)

**92. Internship in Science and Society (1-12)**

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Supervised internship on and off campus, in the community, or in institutional settings. (P/NP grading only.)

**97T. Tutoring in Science and Society (2-3)**

Discussion/lecture—6-9 hours. Prerequisite: lower division standing; completion of course being tutored; consent of instructor. Tutoring in undergraduate Science and Society courses. Assisting with leading discussion groups under supervision of instructor(s) and teaching assistants. Acting as liaison between the students and course instructor(s) to foster effective communication and interaction. May not be repeated. (P/NP grading only.)

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Discussion—3-15 hours. Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)

**Upper Division****110. Applications of Evolution in Medicine, Human Behavior, and Agriculture (4)**

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: Biological Sciences 2A, 2B, and 2C. Class size limited to 60 students. Applications of evolutionary biology in medicine, human behavior, and agriculture. Examination of the imprint of evolution on the human life cycle from conception to death. GE credit: SciEng | SE, SL, WE.—S. (S.) Rosenheim

**120. Science and Contemporary Societal Issues (3)**

Lecture/discussion—3 hours. Prerequisite: upper division standing. Study of a contemporary societal issue/problem emphasizing critical thinking with information drawn from several disciplines. Multiple instructors illustrate the necessity of an interdisciplinary and cooperative approach in solving important issues. Topic will vary. May be repeated one time for credit. Offered irregularly. GE credit: SciEng or SocSci, Wrt | SE or SS.—S. (S.)

**121. Global Poverty: Critical Thinking and Taking Action (4)**

Lecture—3 hours; discussion—1 hour. Social science and engineering analysis of causes and effects of world poverty and of policies to reduce it via economic growth, foreign aid, and community-level interventions, e.g., in potable water, sanitation, light-

ing, small scale energy, irrigation, health and micro-finance. GE credit: SocSci | SS, WC. —W. (W.) Jarvis, Kornbluth

### 130. Contemporary Leadership (4)

Lecture—3 hours; seminar—1 hour. Prerequisite: consent of instructor. Class size limited to 40 students. Leadership, including issues, skills, and practices as they relate to individuals, organizations, diverse social settings and communities. Written and verbal communications, personality styles for collaborative work, and ethics. GE credit: OL—F, S. (F, S.) King

### 135S. Biodiversity and Society in South Africa (4)

Lecture/discussion—3 hours; term paper or discussion—2 hours; fieldwork—2 hours. Prerequisite: acceptance into the Quarter Abroad Program "Biodiversity & Conservation in South Africa" and attendance in South Africa. Biodiversity in social context of South Africa; race, politics and conservation; use of indigenous plants and animals; weeds; water issues; ecotourism. Weekend and other field trips. Offered irregularly. GE credit: SciEng or SocSci, Div, Wrt | SE or SS. —W. Cranston, Gullan

### 140. Genetics and Social Issues (4)

Lecture/discussion—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1A, 1B, 1C. Social issues arising from the development and use of modern methods of biotechnology. Presentation, evaluation, and critical discussions of the present and future impact of genetics on society. Not open for credit to students who have completed course 20. GE credit: SocSci, Wrt. —W. (W.) Epstein

### 190X. Science & Society Seminar (1-4)

Seminar—1-4 hours. Prerequisite: upper division standing; consent of instructor. Class size limited to 20 students. In-depth examination at an upper division level of a special topic in Science and Society. Emphasis upon student participation in learning. Emphasis upon student participation in learning. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

### 192. Internship in Science and Society (1-12)

Internship—3-36 hours. Prerequisite: upper division standing and consent of instructor. Supervised internship on or off campus, in the community, or in institutional settings. (P/NP grading only.)

### 197T. Tutoring in Science and Society (1-5)

Tutoring—3-15 hours. Prerequisite: upper division standing; completion of course being tutored or the equivalent. Tutoring of students in Science and Society courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring another Science and Society course. (P/NP grading only.)

### 198. Directed Group Study (1-5)

Prerequisite: upper division standing; consent of instructor. Restricted to Sustainable Agriculture and Food Systems major or with consent of instructor. Group study on focused topics in Sustainable Agriculture and Food Systems. Varies according to instructor. Course plan is adapted to student need and interest in conjunction with the expertise of the instructor. May be repeated for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

### 199. Special Study in Science and Society (1-5)

Independent study—3-15 hours. Prerequisite: upper division standing; consent of instructor. Under faculty supervision, advanced students pursue a special or individualized course of study related to Sustainable Agriculture and Food Systems. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

### Graduate

#### 298. Group Study (1-5)

Prerequisite: consent of instructor. May be repeated for credit when topic differs. (S/U grading only.)

#### 299. Graduate Research (1-12)

Prerequisite: graduate student and consent of instructor. May be repeated for credit. (S/U grading only.)

### Professional

#### 390. Teaching Methods in Science and Society (1)

Discussion—1 hour. Prerequisite: graduate level and consent of instructor. Practical experience in methods and problems related to teaching Science and Society courses. Discussion of critical pedagogies specific to teaching of science-societal issues, preparing for and conducting discussion sessions, analyses of texts and supporting material, formulation of assignments, exams. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

Kriss Ravetto-Biagioli, Ph.D. (*Cinema and Digital Media, Science and Technology Studies*)

Daniel Stolzenberg, Ph.D. (*History*)

### The Major Program

The Science and Technology Studies (STS) major brings the perspectives of the humanities and social sciences to bear on the analysis and synthesis of science, technology, and medicine. It considers science, technology, and medicine, in tandem with their social, political, economic, and cultural contexts and implications. The major draws on the research programs of faculty in a wide range of departments, including American Studies, Anthropology, Economics, Environmental Science and Policy, History, Philosophy, Political Science, Science and Technology Studies, and Sociology. The major is suitable for students pursuing a broader understanding of science than is available within a traditional science major and for students in the social sciences interested in interpreting science, technology and medicine as part of society and culture.

**The Program.** Graduation with a degree in Science and Technology Studies requires completion of introductory courses in the social sciences and humanities, in the natural sciences, and introductory, laboratory and seminar courses in STS. Upper division work includes twelve units from each of two different, complementing areas of concentration ("modules") and twelve units (plus prerequisites) providing depth, concentration and field work opportunities in the sciences. The modules are: (1) Cultural Studies of Science and Technology; (2) Ethics, Values, and Science Policy; (3) History and Philosophy of Science; IV. Medicine, Society, and Culture.

Courses in the modules require careful selection to make the best use of the STS major. Prerequisites for courses in the sciences can be extensive and require substantial advance planning for timely completion. Students are encouraged to take advantage of faculty and staff advising to plan their course of study.

**Career Alternatives.** The STS major will create an opportunity to analyze science and allied prac-

tices from historical, philosophical, sociological, political, anthropological, and cultural perspectives. STS prepares students for careers that must address the broader social, cultural and political ramifications of science, technology and medicine such as law, journalism, public policy, economics, government, and science education. Careers that students of STS from many universities nationwide have pursued, in addition to academic careers in STS, include employment in: systems engineering, website design, science museums, non-profit health organizations, government service, libraries, law, medicine, veterinary medicine, dentistry, nursing, teaching, public health administration, media companies, management consultant practice, and the Peace Corps.

### A.B. Major Requirements

UNITS

#### Preparatory Subject Matter ..... 16

Science and Technology Studies 1 .....	4
Science and Technology Studies 20 .....	4
Eight units selected from American Studies 1A, 1E, 5; Environmental Studies 1;	
Humanities 3; Philosophy 30, 31, 32;	
Science and Society 1, 2, 3, 5; Science and Technology Studies 32; Lower-division science courses from the Approved Science Electives list below .....	8

#### Depth Subject Matter ..... 44

Twelve units each from two of the following four modules: .....

(1) Cultural Studies of Science and Technology: American Studies 101G, 158; Community and Regional Development 118, 162; History 139A, 139B; Science and Technology Studies 108, 109, 120, 130A, 131, 150, 160, 162, 165, 173, 176; Sociology 150, 175.....	12
(2) Ethics, Values, and Science Policy: Agricultural and Resource Economics 120, 147; American Studies 125; Communication 170; Computer Science 188; Environmental Science and Policy 165; History 185B; Philosophy 116, 120; Physics 137, 160; Plant Pathology 140; Political Science 171, 175; Science and Technology Studies 108, 120, 162, 164; Veterinary Medicine 170 .....	12
(3) History and Philosophy of Science: History 135A, 135B, 136, 185A, 185B; Philosophy 104, 108, 109; Science and Technology Studies 120, 130A, 130B, 131, 160, 161, 163, 164.....	12
(4) Medicine, Society, and Culture: American Studies 101G; Communication 165; Public Health Sciences 101, 160; History 139A, 139B; Science and Technology Studies 109, 120, 121; Sociology 154.....	12

Note: Although a course may be listed in more than one module, that course may satisfy only one requirement.

Science and Technology Studies 175 .....

Science and Technology Studies 180 or

190 .....

Science Electives: Select twelve units, at least

eight of which must be from upper division courses, from the Approved Science Electives list below. (Unit totals will vary with required prerequisites.) .....

Note: Students are strongly advised to choose science elective courses in consultation with faculty or staff advisers. Some courses in some areas may require prerequisites too extensive to be used for the STS major.

#### Total Units for the Major ..... 60-80

**Approved Science Electives.** Courses may be drawn from any of the following approved subject areas:

Aeronautical Science and Engineering; Animal Genetics; Animal Science; Anthropology; Applied Behavioral Sciences;

Applied Biological Systems Technology; Atmospheric Science; Avian Sciences; Biological Chemistry; Biological Sciences; Cell Biology and Human Anatomy; Chemistry; Earth & Planetary Sciences; Engineering; Engineering: Applied Science; Engineering: Biological Systems; Engineering: Chemical; Engineering: Civil and Environmental; Engineering: Computer Science; Engineering: Electrical and Computer; Engineering: Mechanical; Entomology; Environmental and Resource Sciences; Environmental Horticulture; Environmental Science and Policy; Environmental Toxicology; Evolution and Ecology; Exercise Biology; Fiber and Polymer Science; Food Science and Technology; Geology; Hydrology; Material Science and Engineering; Medical Microbiology; Medical Pharmacology and Toxicology; Microbiology; Molecular and Cellular Biology; Nematology; Neurobiology, Physiology, and Behavior; Nutrition; Pathology; Microbiology, and Immunology; Physics; Plant Biology; Plant Pathology; Population Health and Reproduction; Psychology; Soil Science; Wildlife, Fish, and Conservation Biology.

**Major Adviser.** J. Dumit

## Courses in Science and Technology Studies (STS)

### Lower Division

#### 1. Introduction to Science, Technology and Medicine Studies (4)

Lecture—3 hours; discussion—1 hour. History, philosophy, sociology, politics, and cultural studies of science, technology, and medicine. Emphasis on a broad range of perspectives. GE credit: SciEng or SocSci | SS, WE.—Carroll

#### 20. Methods in Science, Technology and Medicine Studies (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 recommended. Methodological issues concerning the historical, philosophical, sociological, ethical, and political analysis of science, technology, and medicine. Detailed case studies to illustrate different methods of analysis. GE credit: SciEng or SocSci, Wrt | SS, WE.—Carroll

#### 32. Drugs, Science and Culture (4)

Lecture—3 hours; discussion—1 hour. Drugs, politics, science, society in a cultural perspective: emphasis on roles of science, government and the media in shifting attitudes toward alcohol, marijuana, Prozac and other pharmaceuticals; drug laws, war on drugs and global trade in sugar, opium, cocaine. (Same course as Anthropology 32.) GE credit: SocSci, Div, Wrt | SS, VL.—Dumit

#### 40A. Media History 1, Gutenberg to Oppenheimer (4)

Lecture—3 hours; discussion—1 hour; film viewing—2 hours; extensive writing. History of Media to 1945, with particular focus on mechanically reproduced mass media technologies including the printing press, the newspaper, photography, cinema, radio and early computing technology. Analysis of inter-related cultural and political topics. (Same course as Cinema and Technocultural Studies 40A.) GE credit: ArtHum or SocSci | AH or SS, OL, VL, WE.—F. (F.)

#### 40B. Media History 2 1945-Present (4)

Lecture—3 hours; discussion—1 hour; film viewing—2 hours; extensive writing. Prerequisite: course 40A. History of media from 1945 to present, with particular focus on the development of the computer, digital network and internet technologies in the context of other media infrastructures like radio, television and satellite networks. Analysis of inter-related cultural/political topics. (Same course as Cinema & Technocultural Studies 040B.) GE credit: ArtHum or SocSci | AH or SS, OL, VL, WE.—F. (F.)

#### 50. Ancient Science (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 16A or the equivalent. Study of science in ancient Greece and Rome; consideration of its social context; concentration on the basic concepts of physics, the world of medicine and biology, the history of mathematics, and the practices of astronomy, astrology and meteorology. (Same course as Classics 50.) Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE.—Webster

#### 51. Ancient Medicine (4)

Lecture—3 hours; discussion—1 hour. Medicine in ancient Greece and Rome; physiological conceptions of the body within scientific and social frameworks; exploration of sanitation technology and health in antiquity; medical treatment of the female body; medicine and the economy. (Same course as Classics 51.) Offered in alternate years. GE credit: AH, WC, WE.—Webster

#### 92. Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience off and on campus in all subject areas offered in the program in Science & Technology Studies under the supervision of a member of the faculty. May be repeated up to 12 units for credit. (P/NP grading only.)

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor (P/NP grading only.) GE credit: SS.

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor (P/NP grading only.)

### Upper Division

#### 108. Intellectual Property in Science (4)

Lecture/discussion—4 hours. Prerequisite: course 1, or other Social Science or Humanities writing course. Historical and conceptual framework for contemporary debates about intellectual property and science. Topics include US patent system and copyright law, interaction between patents and industrial policy, credit in academic and industrial science, role of IP in global knowledge. GE credit: SocSci, Wrt | ACGH, SS, WE.—Biagioli

#### 109. Visualization in Science (4)

Lecture—3 hours; extensive writing or discussion—1 hour. course 1 or 20 or Anthropology 2 recommended. Anthropological approaches to scientific visualization techniques, informatics, simulations. Examination of different visualization techniques toward understanding the work involved in producing them, critical assessment of their power and limits, especially when visualizations are used socially to make claims. (Same course as Anthropology 109.) Offered in alternate years. GE credit: SocSci, Wrt | SS, VL, WE.—Dumit

#### 120. Religion, Magic and Science (4)

Lecture—3 hours; extensive writing. Religion, magic, and science from the middle ages to the present. Contrast between modern scientific methodology and religious and magical thinking. (Same course as Religious Studies 120.) Offered in alternate years. GE credit: GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—Coudert

#### 121. Special Topics in Medical Anthropology (4)

Lecture/discussion—4 hours. Prerequisite: Anthropology 2 recommended. Introduction to critical medical anthropology. Topics include anthropological analysis of bio-medicine, psychiatry, systems of knowledge and healing, the body, emotions, and clinical encounters in a cross-cultural perspective. (Same course as Anthropology 121.) GE credit: SocSci, Div, Wrt | SS, WC, WE.—Giordano

#### 129. Health and Medicine in a Global Context (4)

Lecture/discussion—4 hours; term paper. Prerequisite: Anthropology 2 recommended. Recent works in medical anthropology and the science studies of medicine dealing with global health issues such as AIDS, pandemics, clinical trials, cultural differences in illnesses, diabetes, organ trafficking, medical

technology and delivery, illness narratives, and others. (Same course as Anthropology 129.) GE credit: SocSci, Div, Wrt | SS.—Dumit

#### 130A. From Natural History to the History of Nature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: History 135A recommended. Evolution and demise of natural history as a discipline from Aristotle to Linnaeus. Considers ancient views of nature and its Renaissance rediscovery; the emergence of biology, botany, geology, and zoology; the history of taxonomy and classification. Offered in alternate years. GE credit: ArtHum or SciEng, Wrt | AH or SE, WE.

#### 130B. History of Modern Biology (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 130A recommended. Development of modern biology from pre-Darwinian roots to the present. Considers emergence of modern biological specialities and consolidation of biological theory around evolutionary ideas. History of allied fields such as genetics, paleontology, embryology, ecology, systematics and molecular biology. GE credit: ArtHum or SciEng, Wrt | AH or SE, WE.

#### 131. Darwin (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Students will explore the life and times of Charles Darwin and will trace the development of evolutionary thinking before and after the *Origin of Species* to appreciate its place in Victorian society and in the corpus of Darwin's thought. GE credit: ArtHum or SciEng, Wrt | AH or SE, WE.—Griesemer

#### 150. Gender and Science (4)

Lecture/discussion—3 hours; term paper. An interdisciplinary approach to the relations between gender and science. Topics include the biological and cultural construction of sexual difference, the role of women as practitioners of science, and feminist approaches to science. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.

#### 151. Media Theory (5)

Lecture—2 hours; discussion—1 hour; film viewing—3 hours; extensive writing. Critical and theoretical approaches to the emergence of new technologies since the invention of photography. Examine various approaches to media (formalist, semiotic, structuralist, Frankfurt School, cybernetics, visual and game theory). (Same course as Cinema and Technocultural Studies 150.) GE credit: AH or SS, OL, VL, WE.

#### 160. Ghosts of the Machine: How Technology Rewires our Senses (4)

Lecture—3 hours; extensive writing or discussion—1 hour. Historical, aesthetic and critical approaches to how information technologies produced ghost effects or a sense of terror in response to new media like the photograph, gramophone, film, typewriter, computer, Turing Machine. Focus on technological media transforms sense perception. Offered in alternate years. (Same course as Technocultural Studies 160.) GE credit: ArtHum or SocSci | ACGH, AH or SS, VL, WE.—Ravetto-Biagioli

#### 161. Time: Mechanism and Measurement (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 1. Cultural concepts of time; units and instruments of time measurement; historical differences in the social organization of time; and time measurement in twentieth-century science. GE credit: SocSci, Wrt | SS, WE.

#### 162. Surveillance Technologies and Social Media (4)

Lecture—3 hours; film viewing—3 hours; term paper. Prerequisite: Technocultural Studies 1 or course 20. Study of the ubiquitous presence of CCTV, face recognition software, global tracking systems, biosensors, and data mining practices that have made surveillance part of our daily life. Exploration of the boundary between security and control, information and spying. (Same course as Cinema &

Technocultural Studies 162.) Offered in alternate years. GE credit: ACGH, AH or SS, OL, VL, WE.—Ravetto

### 163. History of Communication Technologies (4)

Lecture/discussion—3 hours; term paper. History of communication technologies from the late Middle Ages to the 20th century. Questions of technology, knowledge, power and culture. Particular attention to questions about information and truth. Offered in alternate years. GE credit: SocSci | SS, WE.

### 164. Writing Science (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: English 3 or course 1, or equivalent. Texts and writing practices in the production of scientific knowledge. Surveys the literary structure of scientific arguments; history of scientific genres; rhetoric and semiotics in scientific culture; graphical systems in the experimental laboratory; narratives of science, including science fiction. (Same course as English 164.) Offered in alternate years. GE credit: ArtHum, Wrt | AH, SL, WE.—Milburn

### 165. Built Environments (4)

Lecture—3 hours; extensive writing. Built environments, which are designed to support forms of life. Their role as carriers of cultural memory and in turning knowledge of nature into social assets. Historical constellations of knowledge, social order, and power. Offered in alternate years. GE credit: SocSci, Wrt | SS.

### 172. Video Games and Culture (4)

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 1 or Technocultural Studies 1 or English 3 or equivalent. Critical approaches to the study of video games, focusing on formal, historical, and cultural modes of analysis. History of software and hardware in North American and global contexts. Relations of games to society, politics, economics, literature, media, and the arts. (Same course as Cinema and Technocultural Studies 172 and English 172.) GE credit: ArtHum or SocSci | ACGH, AH or SS, VL.

### 173. Science Fiction (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or equivalent. Literary modes and methods of science fiction. Representative texts, authors, and themes of the genre—e.g., time travel, alternative universes, and utopias. Relations of science fiction to science, philosophy, and culture. (Same course as English 173.) GE credit: ArtHum, Wrt | AH, WE.

### 175. Laboratory Studies Lab (4)

Lecture/discussion—4 hours. Prerequisite: upper division standing or consent of instructor. Hands-on training in Science and Technology Studies fieldwork, interviewing, archival research and data analysis. Review of laboratory studies literature, informed consent procedures, ethics, and care of the data. Individual and group projects possible. GE credit: SocSci | SS, WE.

### 176. Sociology of Knowledge, Science, and Scientific Knowledge (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: Sociology 1, 2, or 3 recommended. Social, cultural, and historical dimensions of knowledge, especially scientific knowledge. Problems, methods, and theory in sociology of scientific knowledge. Laboratory and historical case studies. Scientific and technical knowledge in institutional and organizational contexts. (Same course as Sociology 176.) GE credit: SocSci | SS.—Carroll

### 180. Topics in History and Philosophy of Science (4)

Seminar—3 hours; term paper. Prerequisite: course in History and Philosophy of Science or other coursework relevant to topic. In depth treatment of selected topics in the history and philosophy of science. Possible topics include history of modern physics, history of molecular biology, science and society, science and power, scientific explanation, technology and culture, theory testing. May be repeated for credit with consent of instructor.

### 190. Seminar in Science, Technology and Medicine Studies (4)

Lecture/discussion—3 hours; term paper. Prerequisite: open to junior and senior Science and Technology Studies majors only. Intensive reading, discussion, research and writing by small groups in selected topics of science, technology, and medicine studies scholarship. Emphasis on individual research projects.

### 192. Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience off and on campus in all subject areas offered in the program in Science & Technology Studies under the supervision of a member of the faculty. May be repeated three times for up to 12 units for credit. (P/NP grading only.)

### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

### 199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

### 200. Theories and Methods in Science & Technology Studies (4)

Seminar—3 hours; term paper. Theories and methods of Science & Technology Studies as a field of critical and empirical scholarship, and examination of various contexts in which STS has emerged worldwide. May be repeated one time for credit with consent of instructor.

### 298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

### 299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Professional

### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Sexuality Studies

(College of Letters and Science)

<http://gsws.ucdavis.edu/sexualitystudies>

The interdisciplinary minor in Sexuality Studies offers students a unique opportunity to study the human-made aspects of sexual identities, desires, and practices, which differ across cultures and historical moments, and are not reducible to biology or anatomy. The minor in Sexuality Studies core and elective courses have sexuality at their center. Additional courses invite students to integrate their study of sexuality with issues of gender; race and ethnicity; class; politics and activism; literature and popular culture; law; and other domains.

The minor is sponsored by the Program in Gender, Sexuality and Women's Studies.

## Minor Program Requirements:

UNITS

### Sexuality Studies ..... 18-20

One Core Course:

Women and Gender Studies 170..... 4

Two Elective courses from the following:

Anthropology 139 BN, English 186,

Epidemiology and Preventative Medicine 163, History 184, Human Development

12, Psychology 158, Science and Society

15, Women and Gender Studies 70... 7-8

Two Elective courses from Field B (below) or

seminars/individual study by petition to

achieve a total of 18-20 units:

American Studies 115, Asian American

Studies 112, Chicana/o Studies 160,

English 166, German 145, History 132, Political Science 152, Sociology 120, Women and Gender Studies 140, Women and Gender Studies 179 ..... 8

## Restrictions.

(A) Students may take no more than one lower division course to satisfy requirements for the minor.

(B) To satisfy the interdisciplinary component of the minor, students must either split their coursework roughly equally between two programs/departments or take coursework in at least three programs/departments.

(C) Students may petition the minor adviser to accept Special Topics courses and Capstone/Senior Seminars as additional courses, as long as their course of study follows the minor's lower-division restriction and interdisciplinary requirements.

(D) Students may petition the minor adviser to accept up to four units of registered individual study, group study or internship towards the minor program, as long as their course of study follows the minor's lower-division restriction and interdisciplinary requirements.

**Advising.** Program in Gender, Sexuality and Women's Studies, 1200 Hart Hall 530-752-6429

## Social and Ethnic Relations

(College of Letters and Science)

The interdisciplinary minor in Social and Ethnic Relations explores the racial, ethnic, class and gender aspects of human relations in the modern world. Students study human societies and cultures from a multi-ethnic perspective and across established academic departmental lines. The minor is jointly sponsored by African American and African Studies, Asian American Studies, Native American Studies, and Women and Gender Studies.

## Minor Program Requirements:

UNITS

### Social and Ethnic Relations ..... 24

Select one course from each of the following six groups to total 24 units:

(A) African American and African Studies

100; Anthropology/Native American

Studies 134; Women's Studies 102

(B) African American and African Studies

123, 133, 145A

(C) Asian American Studies 1, 2, 100,

110, 130

(D) Chicana/o Studies 130, 132

(E) Native American Studies 1, 10, 115,

119, 130A, 130B, 130C, 157, 180

(F) Women's Studies 103, 104, 180

**Restrictions.** (A) Courses applied toward the satisfaction of a major may not also be offered in satisfaction of the minor. (B) No more than four units (one course) may be lower division.

**Advising.** Contact the Program in Asian American Studies, 3131 Hart Hall, [ethnicstudiessao@ucdavis.edu](mailto:ethnicstudiessao@ucdavis.edu).

## Social Sciences

(College of Letters and Science)

**Program Office.** 469 Kerr Hall; 530-752-0741

## Committee in Charge

Michael Kurlaender, Ph.D. (*School of Education*)

Dina Okamoto, Ph.D. (*Sociology*)

Marianne Page, Ph.D. (*Economics*)

Heather Rose, Ph.D. (*School of Education*)

Kimberlee Shauman, Ph.D. (*Sociology*)

Ann Stevens, Ph.D. (*Economics*)

## Emeriti Faculty

Nigel Allan, Ph.D., Professor Emeritus  
 Dennis J. Dingemans, Ph.D., Senior Lecturer Emeritus  
 Howard F. Gregor, Ph.D., Professor Emeritus  
 Frederick J. Simoons, Ph.D., Professor Emeritus  
 Kenneth Thompson, Ph.D., Professor Emeritus

## The Program of Study

The Program in Social Sciences promotes the development of innovative curricular initiatives across the social sciences, including offering broadly conceived, integrative undergraduate-level and graduate-level courses. Faculty affiliated with the program are often engaged in interdepartmental teaching and research.

# Social Theory and Comparative History

(College of Letters and Science)

This designated emphasis was disestablished effective September 19, 2011.

**Program Office.** Center for History, Society, and Culture, 5211 Social Sciences and Humanities Building 530-752-3046

## Courses in Social Theory and Comparative History (STH) Graduate

### 250. Research in Social Theory and Comparative History (4)

Seminar—3 hours; term paper. Prerequisite: admission to Social Theory and Comparative History Designated Emphasis. Theoretically informed research in comparative history. Students read exemplary works and learn to frame their own research projects. Presentations include Center for History, Society, and Culture faculty and visitors discussing current research.—S. (S.)

### 290. Advanced Topics in Social Theory and Comparative History (4)

Seminar—3 hours; term paper. Prerequisite: consent of instructor and History 204 or Sociology 242A. Interdisciplinary study of particular substantive problems in social theory and comparative history. Topics vary.—F, W, S. (F, W, S.)

### 295. Advanced Group Research in Social Theory and Comparative History (1)

Discussion—1 hour. Prerequisite: consent of instructor. Participation in research workshops sponsored by the Center for Comparative Research for History, Society, and Culture. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### 296. Theory and Society Journal Editorial Workshop (1-4)

Workshop—1 hour; independent study—3 hours. Reading and offering workshop critiques of papers submitted for publication. Reading and discussion of other relevant work in history and the social sciences. May be repeated for credit up to 36 units or with consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.) Gouldner

# Sociology

(College of Letters and Science)

Vicki Smith, Ph.D., Chairperson of the Department

**Department Office.** 1283 Social Sciences and Humanities Building  
 530-752-0782; <http://sociology.ucdavis.edu>

## Faculty

Thomas D. Beamish, Ph.D., Professor  
 Patrick Carroll, Ph.D., Associate Professor  
 Robert Faris, Ph.D., Associate Professor  
 Ryan Finnigan, Ph.D., Assistant Professor  
 T. Ryken Grattet, Ph.D., Professor

Laura Grindstaff, Ph.D., Professor  
 Drew Halfmann, Ph.D., Associate Professor  
 Erin R. Hamilton, Ph.D., Associate Professor  
 Bruce D. Haynes, Ph.D., Associate Professor  
 Jacob Hibel, Ph.D., Associate Professor  
 David J. Kyle, Ph.D., Associate Professor  
 Ming-Cheng Lo, Ph.D., Professor  
 Bill McCarthy, Ph.D., Professor  
 David McCourt, Ph.D., Assistant Professor  
 Stephanie L. Mudge, Ph.D., Assistant Professor  
 Caitlin Patler, Ph.D., Assistant Professor  
 Kimberlee A. Shauman, Ph.D., Professor  
 Xiaoling Shu, Ph.D., Professor  
 Chris Smith, Ph.D., Assistant Professor  
 Vicki Smith, Ph.D., Professor  
 Eddy U, Ph.D., Associate Professor  
 Diane L. Wolf, Ph.D., Professor

## Emeriti Faculty

Fred Block, Ph.D., Research Professor and Professor Emeritus  
 Lawrence E. Cohen, Ph.D., Professor Emeritus  
 James C. Cramer, Ph.D., Professor Emeritus  
 Diane H. Felmlee, Ph.D., Professor Emerita  
 John R. Hall, Ph.D., Professor Emeritus  
 Carole E. Joffe, Ph.D., Professor Emerita  
 Carl C. Jorgensen, Ph.D., Professor Emeritus  
 John F. Lofland, Ph.D., Professor Emeritus  
 Lyn H. Lofland, Ph.D., Research Professor and Professor Emerita  
 John T. Walton, Ph.D., Professor Emeritus

## Affiliated Faculty

Lalia Kiburi, Ph.D., Lecturer

## The Major Programs

Sociology is the study of human society in all its manifestations. Its aim is to discover the process and structure of human interaction, to identify the main forces that sustain or weaken social groups, and to determine the conditions that transform social life. Sociology, like any science, is a disciplined, intellectual quest for knowledge about the fundamental nature of things.

**The Program.** The Department of Sociology offers two major programs, Sociology and Sociology–Organizational Studies. Students selecting the Sociology major may choose from four options in the major. The General Sociology emphasis allows students to obtain a broad understanding of the concepts, methods, and theories of sociology. Students with a special interest in the areas of Law and Society or Social Services may choose a more specialized program of courses and practical experience within the sociology major. The Comparative Studies and World Development emphasis provides a sociological perspective on social and economic changes throughout the world, with a stress on relationships between "developed" and "developing" societies. In their junior year, students are encouraged to consider the Education Abroad Program—especially one in a developing country.

The Sociology–Organizational Studies major develops a broad understanding of the political, social, and economic organizations that comprise modern society. This major emphasizes a sociological perspective, but incorporates a multidisciplinary field of study. The major introduces students to a range of theories and methods that social scientists use in the analysis of organizations.

**Career Opportunities.** In the Sociology major, the General option is for students desiring a solid liberal arts education as well as those interested in graduate work in the social sciences. Options in Law and Society or Social Services prepare students for careers in such areas as law, corrections, social work or counseling. The Comparative Studies and World Development emphasis prepares students for graduate training leading to careers in international fields.

The Organizational Studies (OS) major is designed to provide a broad understanding of the political, social, and economic organizations that make up modern society. Whether thinking about the structure

of government bureaucracies, legal systems, economic markets, educational systems, or workplaces, OS offers an interdisciplinary view from which to understand the contemporary world in which complex and formal organizations are ubiquitous. Formal organizations influence how we feel, what we think, and what we can accomplish. As such, the OS major provides both a basic understanding of the field as well as enhancing your ability to pursue their more specialized career interests.

At the upper-division level, you can chose one of four specialized tracks, any one of which will help to better identify and inform your career goals—whether that be in postgraduate education or a specific type of job—and pursue them after graduation. Whether you select the "Business and Society," "Public Policy and Social Welfare," "Nonprofit and Social Change Organizations" or the "Student-Initiated Theme" track, once completed you will have a unique and valuable area of expertise.

Students who plan to enroll in graduate programs in business, public policy, public administration, and education are advised to develop proficiencies in statistics and calculus (such as the Math 16 series).

**Track 1:** The Business and Society track is for students who hold an interest in or wish to pursue careers in management or corporate professions and who are interested in economic institutions and commerce, management and administration, work and workplaces, and labor markets. Courses in this cluster analyze businesses, firms, corporations, and markets—nationally and globally—and their place in society, historically and in the present, from a critical perspective. The BAS examines the origins of business corporations and economic markets (and relations); the power relations, inequalities, and stratification associated with contemporary business organizations (firms and corporations); why business organizations rely on particular organizational structures to increase their efficiencies and effectiveness; and overviews of the role business and regulatory organizations play in the economy.

Postgraduate training and careers that follow from this cluster:

- Professional training: MBA programs; mediation programs; law; public policy.
- Graduate training: sociology; economics; Ph.D. business school programs (with concentrations in organizational behavior, entrepreneurship, industrial relations, economic analysis, policy analysis, labor relations).
- Career paths: managers, human resources professionals, project managers, diversity personnel, corporate social responsibility personnel, lobbyists, business entrepreneur, labor relations specialists, creative professionals, research staff at policy institutes such as Economic Policy Institute, Urban InstituteE2.

### Track 2: Public Policy and Social Welfare (PPSW)

The PPSW track is for students who hold an interest in or plan to pursue careers in government and/or social welfare organizations. Courses in this track emphasize how formal organizations and institutions emerge to address key social problems and the policies they generate and utilize to solve them; the unique challenges that government and other policy oriented organizations confront in addressing and managing public problems and promoting the common good; and the dynamics and special circumstances that specific organizational/institutional policy fields such as education, health care, and social welfare confront in seeking to fulfill their charge.

Postgraduate training and careers that follow from this track:

- Professional training: programs in public policy, public administration, government, social welfare, counseling, public affairs, law, leadership institutes, community psychology.

- Graduate training: Ph.D. programs in sociology, political science, public administration, education, educational leadership.
- Career paths: consultants, social service workers and administrators, staff at policy institutes and think tanks, program evaluation and development, nonprofit administrators, lawyers, teachers, research staff at policy institutes and think tanks, leadership positions in education, including higher education, counselors.

#### Track 3: Nonprofit and social movement organizations (NSMO):

The NSMO track is for students who wish to contribute to local, national, and global transformation(s), to social justice, and/or who plan to pursue a career in the non-profit sector focusing on addressing specific causes and fulfilling social agendas. Students in this cluster may have particular interest in understanding the role that informal and formal organizations—from well-organized and mature non-profits to emergent social movement organizations—play in responding to and affecting social change. This cluster familiarizes students with the unique capacity of organizations to change the world but simultaneously, the barriers, limitations, and challenges to doing so.

Postgraduate training and careers that follow from this track:

- Professional training: programs in community development, regional development, urban development, public policy, public administration, Master's programs in social change, law and social change, business programs with a concentration in corporate responsibility.
- Graduate training: programs sociology, history, labor studies, development, international relations, political science.
- Career paths: working in nongovernmental organizations around the world (NGO's), joining the Peace Corps or Teach America; teaching in other countries; jobs in any number of areas that are the focus of social change and social justice efforts (energy, housing, labor, community and regional development, health, corporate social responsibility); working in for-profit companies in the areas of energy, corporate social responsibility, work/family support programs, research staff at policy institutes and think tanks.

Track 4: Student-Initiated Track: Select a combination of five courses from any of the above 3 themes (at least three courses should be from SOC). Students choosing this track must meet with a SOC undergraduate adviser to obtain approval of selected courses.

## Sociology

### A.B. Degree Requirements: General emphasis:

	UNITS
<b>Preparatory Subject Matter.....</b>	<b>29-30</b>
Sociology 1; 46A, and 46B .....	14
Sociology 2, 3, 4, 5, 11, 25, 30A, or 30B .....	3-4
Anthropology 2 or 20 .....	4
Select from History 4A, 4B, 4C, 6, 7A, 7B, 7C, 8, 9A, 9B, 10C, 15, 17A, 17B.....	4
Select from Philosophy 5, 14, 24 .....	4

### Depth Subject Matter.....

- (A) Sociology 100.....4

- (B) Select one course from each of the

following four categories:

- Individual, Culture and Society:* Sociology 125, 126, 135.....4
- Stratification and Social Differentiation:* Sociology 130, 132, 140.....4
- Organizations and Institutions:* Sociology 118, 131, 146, 180A.....4
- Social Dynamics:* Sociology 104, 141, 143A, 170.....4

(C) Select three upper division courses from one of the following clusters, not counting courses taken to fulfill requirement B.....12

(1) *Individual, Culture and Society:*

- Sociology 102, 120, 122, 125, 126, 128, 129, 131, 132, 134, 135, 137, 143B, 148, 150, 152, 153, 172, 173, 174, 175, 176

(2) *Stratification and Social Differentiation:*

- Sociology 118, 128, 129, 130, 132, 133, 134, 140, 145A, 145B, 171, 172, 185, 185Y, 188, and not more than one of the following courses: African American and African Studies 123; Asian American Studies 100; Chicana/o Studies 110; or Native American Studies 115

(3) *Organizations and Institutions:*

- Sociology 118, 124, 131, 133, 139, 146, 149, 150, 151, 154, 155, 159, 160, 180A, 180B, 181, 182, 183, 185, 185Y

(4) *Social Dynamics:* Sociology 104, 123, 125, 138, 141, 143A, 145A, 145B, 147, 148, 156, 157, 158, 170

(5) *Student-Initiated Thematic Cluster:* developed with a faculty adviser and approved by the Sociology Undergraduate Curriculum Committee

(D) Eight units of Sociology beyond courses taken to fulfill above requirements, and outside of the course cluster used to fulfill requirement C.....8

(E) One additional elective upper division Sociology course not already used to fulfill other major requirements. May use Sociology 190X, 191, 192/193, 194H, 195.....4

### Total Units for the Major .....73-74

### Law and Society emphasis:

### Preparatory Subject Matter.....30

Sociology 1; 3, 4, or 11; 46A & 46B ....18

Select from Anthropology 2, 20; Political

Science 1, 3, 4, 7 .....

Select from History 4A, 4B, 4C, 6, 7A, 7B,

7C, 8, 9A, 9B, 10C, 15, 17A, 17B.....4

Philosophy 5, 14, or 24.....4

### Depth Subject Matter .....43-44

Sociology 100 and 155 .....

Select courses from the following categories:

(1) *Individual Culture and Society:* Sociology 125, 126, 135.....4

(2) *Stratification and Social Differentiation:* Sociology 130, 132, 140.....4

(3) *Organizations and Institutions:* Sociology 118, 131, 146, 160, 180A .....

(4) *Crime and Social Dynamics:* Sociology 120, 150, 151, 152, 171.....12

(5) *Stratifications and Social Dynamics:* Sociology 118, 137, 148, 156, 157, 158;

African American and African Studies 123,

145A, 145B; Chicana/o Studies 130,

132; Native American Studies 117,

118.....4

(6) *Legal Studies:* Asian American Studies 155;

Chicana/o Studies 182; English 107;

Environmental Science and Policy 161;

Environmental Toxicology 138; Hydrology

150; Philosophy 119; Political Science

122, 150, 151, 152, 154; Psychology

153; Women's Studies 140.....3-4

One additional elective upper division

Sociology course not already used to fulfill

other major requirements. May use

Sociology 190X, 191, 192/193, 194H,

195.....4

### Total Units for the Major .....73-74

### Social Services emphasis:

### Preparatory Subject Matter.....28-30

Sociology 1; choose one course from: 2 or 3;

46A and 46B .....

Psychology 1 .....

Select two courses from: African American and African Studies 10, 15; Asian American

Studies 1, 2; Chicana/o Studies 10, 50; Native American Studies 1, 10; Sociology 4, 11, 30A, or 30B .....

### Depth Subject Matter ..... 44

Sociology 100, 131, 140, and 185 or

185Y .....

Psychology 140, 142, 151, or 168 .....

Select courses from the following categories:

(1) *Social Issues (choose two):* Sociology 104,

120, 122, 124, 139, 143A, 146, 149,

150, 153, 154, 155, 156, 160, 170,

171.....

(2) *Social Interaction (choose one):* Sociology

126, 127, 128, 143B, 148, 157 .....

(3) *Race and Ethnicity (choose one):* African

American and African Studies 100; Asian

American Studies 102, 131, 150; 150B,

150C, 150D, 150E; Chicana/o Studies

110; Community and Regional

Development 176; Native American

Studies 115; Sociology 129, 130, 134,

137, 172.....

(4) *Gender (choose one):* Sociology 132, 133,

145B, 172.....

(5) *Organizational Behavior (choose one):*

Sociology 139, 146, 151, 154, 159,

180A, 180B, 181, 182, 183 .....

### Total Units for the Major.....72-74

### Comparative Studies and World Development emphasis:

### Preparatory Subject Matter ..... 30-60

Sociology 1; 5; 46A and 46B .....

Economics 1B .....

Anthropology 2 or 20 .....

History 10C or Political Science 2 .....

Course work in one modern foreign language at the two-year level or provide proof of proficiency .....

27-30

### Depth Subject Matter ..... 48

Sociology 100, 104, 141, 145A,

170 .....

Anthropology 126A, 126B, or Economics

115A .....

Anthropology 127; Sociology 118, 130,

131, 143A, 144, 145B, 156, 158 .....

12

Regional focus, three courses from one of the following groups .....

(1) *Africa:* African American and African

Studies 110, 111, 162; Anthropology

140A, 140B; History 115A, 115B, 115C,

116; Political Science 134, 149

(2) *Latin America:* African American and

African Studies 107A, 180; Anthropology

144, 146; History 159, 161A, 161B, 162,

163A, 163B, 164, 165, 166A, 166B,

167, 168; Native American Studies 120,

133; Political Science 143; Sociology 158;

Spanish 170, 172, 173

(3) *Middle East:* Anthropology 142; History

112A, 112B, 113, 190A, 190C,

193A, 193B; Jewish Studies (see an

adviser); Middle Eastern Studies (see an

adviser); Religious Studies 162; Women's

Studies 184

(4) *Asia-China & Japan:* African American and African Studies 107C; Anthropology

148A, 148B, 148C, 149A, 149B; East

Asian Studies 113; Economics 171; History

191 (series), 194A, 194B, 194C; Political

Science 148A, 148B; Religious Studies

165, 170, 172; Sociology 147, 188

(5) *Southeast Asia/Pacific:* Anthropology

143A, 143B, 145, 147; Economics 171;

History 191 (series), 195B, 196A, 196B;

Political Science 148B, 148C; Religious

Studies 165, 170, 172

### Total Units for the Major.....78-108

**Sociology—Organizational Studies****A.B. Degree Requirements:**

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>30</b>
Sociology 1; 2; 4, 5 or 11; 46A & 46B .....	22
Economics 1A and 1B .....	8

Track 4: Student-Initiated Track: Select a combination of five courses from any of the above 3 themes (at least three courses should be from SOC). Students choosing this track must meet with a SOC undergraduate adviser to obtain approval of selected courses.	
Select one course from: Sociology 128, 130, 132, 134, 140, 145A, 145B, 172.....4	
One additional elective upper division Sociology course not already used to fulfill other major requirements. May use Sociology 192/194H, 195.....4	

**Total Units for the Major..... 75**

**Major Advisers.** Consult the Departmental Advising office in 1282 Social Sciences and Humanities Building.

**Minor Program Requirements:****UNITS****Sociology .....** 20

Choose any five upper division courses in  
Sociology, except the following: SOC190X,  
191, 192/193, 194H, 195, 197T, 198,  
199

**Minor Advisers.** Consult the departmental Advising office in 1282 Social Sciences and Humanities Building.

**Honors Program.** An Honors Program is available to Sociology and Sociology-Organizational Studies majors who have demonstrated excellence in their field of study. To be eligible for the program, students must have a grade-point average of 3.500 in the major and the recommendation of a faculty sponsor familiar with their work. In addition to meeting the standard major requirements, students are encouraged to take a 199 course with their sponsor in the spring of their third year, prior to the seminar courses. Honors students write an honors thesis and take two quarters (8 units) of Honors coursework (SOC194H). Successful completion of the Honors Program, when combined with College GPA require-

ments, enables the student to graduate with High or Highest Honors. Students should apply for the program before they begin their fourth year.

**Graduate Study.** The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in sociology. Further information regarding graduate study may be obtained at the Department office or on our website.

Graduate students in Sociology have the opportunity to pursue designated emphases in Critical Theory, Social Theory and Comparative History, Native American Studies, Economy, Justice and Society, or Feminist Theory and Research. See these headings for further details on these interdisciplinary programs.

**Graduate Advisers.** Consult the Graduate Program Coordinator in 327 Young Hall.

**Courses in Sociology (SOC)****Lower Division****1. Introduction to Sociology (5)**

Lecture—4 hours; discussion—1 hour. Principles and basic concepts of sociology. The study of groups, culture, collective behavior, classes and caste, community and ecology, role, status, and personality. GE credit: SocSci | ACGH, DD, SS.—F, W, S. (F, W, S.)

**2. Self and Society (4)**

Lecture—3 hours; discussion—1 hour. Exploration of how self and identity are formed and transformed by socialization and social interaction in relation to roles, groups, institutions, power, and social change. Consideration of how people make decisions, fall in love, and come to blows. GE credit: SocSci, Wrt | ACGH, DD, SS.—F, W, S. (F, W, S.)

**3. Social Problems (4)**

Lecture—3 hours; discussion—1 hour. General sociological consideration of contemporary social problems in relation to sociocultural change and programs for improvement. GE credit: SocSci, Wrt | ACGH, DD, SS.—F, W, S. (F, W, S.)

**4. Immigration and Opportunity (4)**

Lecture—3 hours; discussion—1 hour or term paper. Social and demographic analysis of immigration: motives and experiences of immigrants; immigration and social mobility; immigration, assimilation, and social change; multicultural societies. Detailed study of immigration into the U.S., with comparative studies of Europe, Australia, and other host countries. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WC.

**5. Global Social Change: An Introduction to Macrosociology (4)**

Lecture—3 hours; discussion—1 hour. An introduction to change and diversity in world history, including the United States. Examines population and family, technological change and economic development, power and status, culture and identity. GE credit: SocSci, Div, Wrt | ACGH, SS, WC.

**11. Sociology of Labor and Employment (4)**

Lecture—3 hours; discussion—1 hour. Labor and employment issues in the contemporary United States with some use of historical and comparative materials. Topics will include strategies pursued by employers and employees, labor market discrimination and the role of social policies in shaping labor markets. GE credit: SocSci, Wrt | SS.

**12Y. Data Visualization in the Social Sciences (4)**

Lecture—2 hours; laboratory—1.5 hours; web virtual lecture—1.5 hours. Introduction to quantitative data across the social sciences (Communications, Political Science, Psychology, Sociology, and other disciplines). Transforming data, describing data, producing graphs, visual reasoning, and interpretations. (Same course as Communications 12Y, Sociology 12Y, Political Science 12Y) GE credit: QL, VL.—F, W, S. (F, W, S.) Cross

**25. Sociology of Popular Culture (4)**

Lecture—3 hours; discussion—1 hour. Social mechanisms that shape modern popular culture. High, folk, and mass culture: historical emergence of popular

culture. Mass media, commercialization, ideology and cultural styles. Theories and methods for analyzing cultural expressions in pop music, street art, film, television, and advertising. GE credit: SocSci, Wrt | SS, VL.

**30A. Intercultural Relations in Multicultural Societies (3)**

Lecture—1.5 hours; discussion—1.5 hours. Macrostructural analysis of contemporary multicultural societies; immigration and assimilation in comparative perspective; social construction of racial and ethnic group identities; ethnicity and gender; group conflict and cooperation; controversies surrounding multiculturalism. First course in a two-course Multicultural Immersion Program. GE credit: SocSci, Div | ACGH, DD, SS.

**30B. Intercultural Relations in Multicultural Societies (3)**

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: course 30A or consent of instructor. Social-psychological analysis of personal experiences living in a multicultural society; conforming to or rejecting group identity or stereotypes; managing and reducing conflict; cross-cultural communication; promises and problems of diversity at UC Davis. Second course in a two-course Multicultural Immersion Program. GE credit: SocSci, Div | ACGH, DD, SS.

**46A. Introduction to Social Research (4)**

Lecture—3 hours; discussion—1 hour; term paper. Examination of the methodological problems of social research. Selection and definition of problems of investigation, data-gathering techniques, and sampling. GE credit: SocSci | SS.

**46B. Introduction to Social Research (5)**

Lecture—4 hours; discussion—1 hour. Data-analysis techniques, measurement, scaling, multivariate analysis, and quantitative measures of association. GE credit: SocSci | QL, SS.

**90X. Lower Division Seminar (1-2)**

Seminar—1-2 hours. Prerequisite: lower division standing; consent of instructor. Limited enrollment. Examination of a special topic in sociology through shared readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc. May not be repeated for credit. Offered irregularly. GE credit: SocSci | SS.

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Primarily intended for lower division students. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division****100. Origins of Modern Sociological Theory (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. The origins of modern sociological thought. Special emphasis on three major theorists from the classical tradition of nineteenth century European social thought: Karl Marx, Max Weber, and Emile Durkheim. GE credit: SocSci | SS.

**102. Society and Culture of California (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. California's distinctive society and culture; sociological analyses of topical issues concerning diversity, environment, cities. Offered irregularly. GE credit: SocSci | ACGH, DD, SS.

**103. Evaluation Research Methods (4)**

Lecture—3 hours; discussion—1 hour; term paper; project. Prerequisite: course 1 or 2 or 3 recommended; course 46A and 46B recommended. Surveys applications of research methods to the evaluation of social programs, primarily emphasizing methodological issues, e.g., research design and data collection; uses of evaluation research are also discussed and placed in theoretical context. Participation in an evaluation project. Offered irregularly. GE credit: SocSci | SL, SS.

**104. The Political Economy of International Migration (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, 3, or 4 recommended. Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation. [Same course as International Relations 104]. GE credit: SocSci | SS, WC.

**106. Intermediate Social Statistics (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: course 46B or consent of instructor. Intermediate level course in statistical analysis of social data, emphasizing the logic and use of statistical measures, procedures, and mathematical models especially relevant to sociological analysis. GE credit: SocSci | QL, SL, SS.

**118. Political Sociology (4)**

Lecture—3 hours; term paper or discussion—1 hour; project. Prerequisite: course 1, 2, or 3 recommended. Relation of social cleavages and social cohesion to the functioning of political institutions; the social bases of local and national power structures; social sources of political movement, analysis of concepts of alienation, revolution, ideology, ruling class, and elite. GE credit: SocSci | SS.

**120. Deviance (4)**

Lecture—3 hours; term paper or discussion. Prerequisite: course 1, 2, or 3 recommended. Social structural sources, institutional practices and microprocesses associated with illegality, evil, disease, immorality, disability, racial and class differences, citizenship, and the body. Special emphasis on expert knowledge and the production and management of social difference. GE credit: SocSci, Wrt | SS.

**122. Sociology of Adolescence (4)**

Lecture—3 hours; term paper or discussion—1 hour; project. Prerequisite: course 1, 2, or 3 recommended. Chronological age and social status; analysis of social processes bearing upon the socialization of children and adolescents. The emergence of youth cultures. Generational succession as a cultural problem. GE credit: SocSci | SS.

**123. American Society (4)**

Lecture—3 hours; discussion—1 hour; term paper; project. The demographic and social structure of American society and population, with emphasis on ethnic and class groups as bases for political and economic interest. Attention to selected current social controversies. Offered irregularly. GE credit: SocSci | ACGH, DD, SS.

**124. Education and Inequality in the U.S. (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Functions of schooling in contemporary U.S. society. Racial, ethnic, social class, and gender inequalities in student outcomes. Consideration of classic and current controversies in the sociology of education and education policy. GE credit: SocSci | SS.

**125. Sociology of Culture (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 1, 2, or 3 recommended. Sociological approaches to study of historical and contemporary culture and mass media, and their structuring in relation to social actors, institutions, stratification, power, the production of culture, audiences, and the significance of culture in processes of change. GE credit: SocSci | SS.

**126. Social Interaction (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Every day interaction in natural settings; ethnographic approaches to the understanding of social meanings, situations, personal identity and human relationships. Particular attention to the work of Erving Goffman and to principles of field observation and qualitative analysis. GE credit: SocSci, Wrt | SS.

**128. Interracial Interpersonal Dynamics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Analysis of the influences of cultural differences and racial stratification on interpersonal interaction in instrumental settings (e.g., work, education, political action) and intimate settings (e.g., friendship, love, marriage, family). Minority/majority relationships. Offered irregularly. GE credit: SocSci, Div, Wrt | SS.

**129. Sociology of Black Experience in America (4)**

Lecture—3 hours; discussion—1 hour; term paper; project. Prerequisite: course 1, 2, or 3 recommended. Survey of historical and contemporary theoretical sociological perspectives on the Black experience in United States. Emphasis on comparisons of Black sociological perspectives and mainstream perspectives of specific sociologists. GE credit: SocSci, Div | ACGH, DD, SS.

**130. Race Relations (4)**

Lecture—3 hours; term paper or discussion—1 hour. Functions of the social definitions of race and racial groups. Analysis of racial conflict, oppression, and other forms of ethnic stratification. Models of ethnic interaction and social change. Emphasis on racial relationships within the U.S. GE credit: SocSci, Div | ACGH, DD, SS.

**131. The Family (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Contemporary family life in historical and cross-cultural perspective. How different family forms arose, their significance today and prospects for further family change. Attention to power relations within and beyond the family and to the social implications of family transformation. GE credit: SocSci, Div, Wrt | ACGH, DD, SS.

**132. The Sociology of Gender (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Analysis of biological, psychological, cultural and structural conditions underlying the status and roles of men and women in contemporary society, drawing on a historical and comparative perspective. GE credit: SocSci, Div | ACGH, DD, SS.

**133. Sexual Stratification and Politics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended; consent of instructor. Analysis of origins, dynamics, and social implications of sexual stratification. Examination of classical and contemporary theorists such as Engels, Freud, J.S. Mill, de Beauvoir, Juliet Mitchell, D. Dinnerstein. Attention to selected issues in social movements for and against sexual equality. Offered irregularly. GE credit: SocSci, Div | SS.

**134. Sociology of Racial Ethnic Families (4)**

Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 1, 2, or 3 recommended. Asian American, Black, Chicano, and Native American family life in comparative historical perspective. Family structure and gender roles are considered in relation to socio-historical dynamics. Offered irregularly. GE credit: SocSci, Div, Wrt | ACGH, DD, SS.

**135. Social Relationships (4)**

Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 1, 2, or 3 recommended. Social and cultural factors influencing friendships and intimate relationships. Topics include relationship development, relationship maintenance, and relationship loss. GE credit: Div, SocSci, Wrt | SS.

**137. African American Society and Culture 1790-1990 (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Restricted to upper division standing. Political and social transformations of African American communities between 1790 and 1990, as seen through film, literature, and music. Topics include: Black consciousness, Afro-Slave culture, The Harlem Renaissance, and contemporary Hip Hop. Offered irregularly. GE credit: SocSci | ACGH, DD, SS.

**138. Economic Sociology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Overview of the rapidly growing field of economic sociology. Focus on variations in the ways that markets are organized. The relationship between individual and collective rationality will also be emphasized. GE credit: SocSci | ACGH, SS, WC.

**139. Corporations and Society (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Study of the history and power of the modern corporation; corporate organization; politics, the state, and the corporation; labor unions and the labor process; competition, regulation and international markets; the multinational and conglomerate corporation; and mass markets and consumerism. GE credit: SocSci | ACGH, SS.

**140. Social Stratification (4)**

Lecture—3 hours; term paper or discussion—1 hour; project. Prerequisite: course 1, 2, or 3 recommended. Systems of social ranking, theories of stratification; power, prestige, culture, and styles of life of various social classes; social mobility and its consequences for social structure. GE credit: SocSci | ACGH, DD, SS.

**141. Industrialization and Social Change (4)**

Lecture—3 hours; term paper or discussion—1 hour; project. Prerequisite: course 1, 2, or 3 recommended. Selected technological and social factors. Preconditions of economic development and industrialization. Social, political, and cultural issues at various levels of economic development. Major historical differences and major current trends. Emphasis either on highly industrialized countries or on less developed countries. Offered irregularly. GE credit: SocSci, Wrt | SS.

**143A. Urban Society (4)**

Lecture—3 hours; discussion—1 hour; term paper; project. Prerequisite: course 1, 2, or 3 recommended. Theories of city origins. Analysis of the historic process of urbanization and of varying city types. Comparison of American and European experience of metropolitanization, counterurbanization, and neighborhood change. Consideration of competing theories of urban growth and change and competing visions of the urban future. GE credit: SocSci | SS.

**143B. Sociology of City Life (4)**

Lecture—3 hours; discussion—1 hour; term paper; project. Prerequisite: course 1, 2, or 3 recommended. Critical dissection of the "loss of community" issue. Analysis of the organization of primary ties in the city, of the culture of urban public life and of the learning of city skills. GE credit: SocSci, Wrt | SS.

**145A. Sociology of Third World Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Introduction to theories and contemporary issues in the sociology of development. Topics such as urbanization, rural/agrarian change, class, status groups, international division of labor, sectoral shifts, international capital, informal economy, gender, and political processes are analyzed within a comparative-historical framework. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC.

**145B. Gender and Rural Development in the Third World (4)**

Seminar—4 hours. Prerequisite: course 1, 2, or 3 recommended. Political-economic analysis of women and work during the process of socioeconomic change in the world with particular attention to the family/household context. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC.

**146. Sociology of Religion (4)**

Lecture—3 hours; discussion—1 hour; term paper; project. Prerequisite: course 1, 2, or 3 recommended. Relationship between social structures and religions. The social setting of the major world religions. Religious innovators and institutionalization

(churches, sects, cults). Secularization in the modern world and the rise of secular ideologies. Offered irregularly. GE credit: SocSci, Div, Wrt | SS.

#### **147. Sociological Perspectives on East Asia (4)**

Lecture—3 hours; discussion—1 hour; term paper; project. Prerequisite: course 1, 2, or 3 recommended. Sociological theories and concepts applied toward understanding East Asian society. Emphasis on the political structure, stratification, and economy in China and Japan. Analysis of historical and contemporary similarities and differences. Offered irregularly. GE credit: SocSci | SS, WC.

#### **148. Collective Behavior (4)**

Lecture—3 hours; discussion—1 hour; term paper or discussion. Prerequisite: course 1, 2, or 3 recommended. Study of behavior of human crowds and masses in extraordinary circumstances, including crowd panics, mass scares, collective protests, riots, revolutionary situations, ecstatic and revivalist gatherings, crazes, fads, and fashions. GE credit: SocSci | SS.

#### **149. Religion and American Society (4)**

Lecture—3 hours; project. Prerequisite: course 1, 2, or 3 recommended. Historical, contemporary survey of religious traditions and organizations and their relation to U.S. social and cultural patterns. Civil religion, religious pluralism, minority and deviant communities, religious migration, U.S. religion as a social institution, and religion, politics, and social stratification. Offered irregularly. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WC.

#### **150. Criminology (4)**

Lecture—3 hours; term paper or discussion—1 hour; project. Prerequisite: course 1, 2, or 3 recommended. Sociological analysis of criminal behavior in relation to social structure and the criminalization process. GE credit: SocSci | SS.

#### **151. The Criminal Justice System (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Sociological analysis of the different components of the criminal justice system including the emergence and interpretation of criminal laws, the contemporary roles and functions of the police, criminal courts and correctional institutions. GE credit: SocSci | SS.

#### **152. Juvenile Delinquency (4)**

Lecture—3 hours; term paper or discussion—1 hour; project. Prerequisite: course 1, 2, or 3 recommended. Study of juvenile delinquency in relation to the family, peer groups, community, and institutional structures. Consideration of processing of the delinquent by formal agencies of control. GE credit: SocSci | SS.

#### **153. The Sociology of Childhood (4)**

Lecture—3 hours; term paper. Prerequisite: course 1, 2, or 3 recommended. Contemporary childhood in historical, cross-cultural, and global perspectives. Examine changes in understanding of the nature of childhood and "best interests of the child" by class, race, gender, geographic region, and historical period. Offered irregularly. GE credit: SocSci | ACGH, DD, SS, WC.

#### **154. Health and Illness (4)**

Lecture—3 hours; term paper or discussion—1 hour; project. Prerequisite: course 1, 2, or 3 recommended. Theoretical tools for understanding the social determinants of health and health care, including such topics as health policy, social sources of illness, social construction of illness, medicalization, social disparities in health, and the illness experience. GE credit: SocSci | SS.

#### **155. Sociology of Law (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Law considered as social control; relation of legal institutions to society as affecting judicial decision making and administration of justice. Lawyers as an occupational group. Legal reform. GE credit: SocSci | SS.

#### **156. Social Movements (4)**

Lecture—3 hours; discussion—1 hour; term paper; project. Prerequisite: course 1, 2, or 3 recommended. Analysis of several aspects of social movements: mobilization, forms of organization, ideology, recruitment, leadership, strategies and tactics, development, effects. Frequent use of sound and film materials. GE credit: SocSci | SS.

#### **157. Social Conflict (4)**

Lecture—3 hours; discussion—1 hour; term paper; project. Prerequisite: course 1, 2, or 3 recommended. Analysis of the causes, dynamics, and regulation of social conflict within and between various kinds of social groupings with particular reference to nonviolent methods of waging and regulating conflict. Offered irregularly. GE credit: SocSci | SS.

#### **158. Women's Social Movements in Latin America (4)**

Lecture—3 hours; term paper. Prerequisite: course 1, 2, or 3 recommended. Contemporary women's social movements in Latin America, focusing on Honduras, El Salvador, Brazil, and Nicaragua. Examination of exploitation and oppression in Latin America. Offered irregularly. GE credit: SocSci | DD, SS, WC.

#### **159. Work, Employment, and Careers in the 21st Century (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Historical and contemporary overview of employment, work, and occupations in American society. Study of authority and power relations, labor markets, control systems, stratification, and corporate structures, and how these factors shape work in diverse or organizational and employment setting. GE credit: SocSci | SS.

#### **160. Sociology of the Environment (4)**

Lecture—3 hours; term paper. Prerequisite: course 1, 2, or 3 recommended. Production, consumption, and urban expansion. Basic social logics surrounding current problems of resource scarcity (environmental extractions) and excess wastes (environmental additions). Ways that society can change and re-organize itself to become more environmentally conscious and hence ecologically sustainable. GE credit: SocSci | ACGH, DD, SS, WC, — Beamish

#### **161. The Civil Justice System (4)**

Lecture—3 hours; term paper. Prerequisite: course 1, 2, or 3 recommended. Empirical studies of the different aspects of the civil justice system in the United States and Global Society including the litigation, juries, civil rights, and international laws relating to trade, the environment, and human rights. Offered irregularly.

#### **170. Population (4)**

Lecture—3 hours; discussion—1 hour; term paper; project. Prerequisite: course 1, 2, or 3 recommended. Introduction to the study of human population, including theories and statistical measures; social causes and consequences of population trends; changes in population structure; geographical distribution, migration, socio-psychological factors affecting fertility. GE credit: SocSci | QL, SS.

#### **171. Sociology of Violence and Inequality (4)**

Lecture/discussion—4 hours. Prerequisite: course 1, 2, or 3 recommended. How systems of social inequality organize the practice of violence. Definitions of violence and issues affecting the social capacity for violence. Analysis and comparison of different forms of violence associated with race, class, gender relations and social organization. Offered irregularly. GE credit: SocSci | SS.

#### **172. Ideology of Class, Race and Gender (4)**

Lecture—4 hours. Prerequisite: course 1, 2, or 3 recommended. Examination of popular belief systems that accompany relations between social classes, whites and blacks, and men and women in the United States. How do dominant groups attempt to justify each relationship, and is there ideological conflict or consensus between groups. Offered irregularly. GE credit: SocSci, Div, Wrt | ACGH, DD, SS.

#### **173. Sociology Through Literature (4)**

Lecture—3 hours; discussion—1 hour; term paper; project. Prerequisite: course 1, 2, or 3 recommended. Introduction to analysis of literature as sociological data. Reading of numerous works on American and other societies by authors such as Steinbeck, Lewis, Dreiser, Schulberg, Orwell, etc. Offered irregularly. GE credit: SocSci | QL, SS.

#### **174. American Jewish Identities and Communities (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Sociology of Jewish life, analyzing challenges to Jewish identity and community in the diaspora. Diversity within the Jewish community, Americanization, women, new immigrants, post-Holocaust Jewish identity, and LGBT Jews. Offered irregularly. GE credit: SocSci | SS.

#### **175. Mass Communication (4)**

Lecture—3 hours; term paper. Prerequisite: course 1, 2, or 3 recommended. Examines the relationship between the media and social structures. History of media-state relations. Media as reflector and shaper of values. Emphasis on current European and Marxist and pluralist theories rather than on content analysis. Offered irregularly. GE credit: SocSci | SS.

#### **176. Sociology of Knowledge, Science, and Scientific Knowledge (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Social, cultural, and historical dimensions of knowledge, especially scientific knowledge. Problems, methods, and theory in sociology of scientific knowledge. Laboratory and historical case studies. Scientific and technical knowledge in institutional and organizational contexts. (Same course as Science and Technology Studies 176.) Offered irregularly. GE credit: SocSci | SS.

#### **180A. Complex Organizations (4)**

Lecture—3 hours; discussion—1 hour; term paper; project. Prerequisite: course 1, 2, or 3 recommended. Develops a sociological approach to organizations theory. Designed to introduce sociological concepts, address the alternative psychological and economic models, and involve students in the practice of organizational analysis. GE credit: SocSci | SS.

#### **180B. Complex Organizations (4)**

Lecture—3 hours; discussion—1 hour; term paper; project. Prerequisite: course 1, 2, or 3 recommended; consent of instructor. Builds on concepts and skills developed in course 180A. Deals with the issues of organizational decision making, design, and survival. Emphasis on relations between organizations and the effects of those relations in both the public and private sectors. Offered irregularly. GE credit: SocSci | SS.

#### **181. Social Change Organizations (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Analysis of organizations with social change and improvement goals and programs, emphasizing voluntary associations and grassroots citizen groups. Topics treated include formation, decision making and leadership, strategies and tactics, factionalism and coalitions, effectiveness. Offered irregularly. GE credit: SocSci, Wrt | SS.

#### **182. Utopian Communal Groups and Movements (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Formations, structures, and social life of historical and contemporary countercultural, utopian, dystopian, intentional, and religious communal settlements and movements, including comparison with other small settlement forms such as monasteries, villages, neighborhoods, encampments, and communities. Offered irregularly. GE credit: SocSci | SS.

#### **183. Comparative Organizations (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 1, 2, or 3 recommended; course 180A recommended. Examination of the economic, cultural, and political organization of major industrial

and developing nations. Discussion of patterns and practices, alternative theoretical models of explanation, and case studies of organizations. Societies may include Japan, Germany, Egypt, China, and the U.S. Offered irregularly. GE credit: SocSci | ACGH, SS, WC.

### **185. Social Policy (4)**

Lecture—3 hours; term paper or discussion—1 hour; project. Prerequisite: course 1, 2, or 3 recommended. Examination of social policies that affect the well-being of individuals, families and groups, including such policies as old-age pensions, health insurance, and aid to the poor. Students may not take both course 185 and 185Y for credit. GE credit: SocSci | SS.

### **185Y. Social Policy (Hybrid Version) (4)**

Web virtual lecture—1.5 hours; lecture—1.5 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Examination of social policies that affect the well-being of individuals, families and groups, including such policies as old-age pensions, health insurance, and aid to the poor. Students may not take both courses 185 and 185Y for credit. Offered irregularly. GE credit: SocSci | SS, WE.

### **188. Markets, Culture and Inequality in China (4)**

Lecture—3 hours; term paper. Prerequisite: course 1, 2, or 3 recommended. Economic and political systems and patterns of social interaction and inequality in China. State and corporate structures and practices, market and consumer behaviors, social mobility and stratification, protest and resistance. Offered irregularly. GE credit: SocSci | SS, WC. —F.

### **189. Social Science Writing (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1, 2, or 3 recommended. Improved analytic writing and methods for reporting social science research to a wider public. Sociological analysis of the conditions of good and bad writing. GE credit: SocSci | SS.

### **190X. Seminar in Sociological Analysis (4)**

Seminar—3 hours; term paper. Prerequisite: upper division standing; course 100 (former course 165A). Limited enrollment. In-depth examination at an upper division level of a special topic in Sociology. Emphasis on student participation in learning. May not be repeated for credit. Offered irregularly.

### **191. Workshop in Contemporary Sociological Theory (4)**

Lecture—2 hours; workshop—1 hour; term paper. Prerequisite: course 100 (former 165A); senior standing. Workshop in contemporary sociological theory that allows students to explore the uses of theory in empirical inquiry on problems of interest to students. Contemporary theory considered in relation to classical and modern influences, concept formation, theory construction, and explanation. Not open for credit to students who have received credit for course 165B. Offered irregularly. GE credit: SocSci | SS.

### **192. Internship and Research Practicum (2-6)**

Internship—6-18 hours. Prerequisite: course 46A; upper division standing, approval of proposed internship and consent of instructor. Supervised internship and study in an agency, organization, or institution; application of sociological concepts to the work experience. Maximum of four units may be counted toward the major. May be repeated for credit with consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

### **193. Workshop in Field Research (2)**

Lecture/discussion—2 hours. Prerequisite: course 46A, course 192 or 199 concurrently for two-four units, senior standing. Overview of the process of collecting, recording, analyzing, and reporting qualitative social data. Emphasis on application of principles; each participant completes an original research project. Not open for credit to students who have completed course 194HA. Offered irregularly. GE credit: SocSci | SS, WE.

### **194H. Special Study for Honors Students (1-5)**

Prerequisite: consent of instructor. Open to Sociology majors of senior standing who qualify for the Honors program. Independent study of a sociological problem involving the writing of an Honors thesis. May be repeated up to eight units for credit. (P/NP grading only; deferred grading only, pending completion of sequence) GE credit: WE.—F, W. (F, W.)

### **194HA. Special Studies for Honors Students (4)**

Independent study—12 hours. Prerequisite: senior qualifying for honors. Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) Offered irregularly. GE credit: SciEng | SE. —F. (F.)

### **194HB. Special Studies for Honors Students (4)**

Independent study—12 hours. Prerequisite: senior qualifying for honors. Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) Offered irregularly. GE credit: SciEng | SE. —W. (W.)

### **195. Special Topics in Sociological Analysis (4)**

Seminar—3 hours; term paper. Prerequisite: course 1, 2, or 3 recommended. In-depth examination of topics in sociology. Emphasis on student research and writing. May be repeated for credit when topic differs. GE credit: SocSci | SS.

### **197T. Tutoring in Sociology (1-4)**

Tutorial—3-12 hours. Prerequisite: upper division standing; completion of appropriate course with distinction. Activities vary depending on the nature of the course assignment. May include (but not limited to) tutoring on course material, advising on projects and papers, and leading discussion groups. (P/NP grading only.)

### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: open to seniors only. (P/NP grading only.)

### **Graduate**

#### **201. Social Research (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative survey of sociological inquiry, taught as a practicum. Philosophy of social science; values and research; research agendas and research problem formulations; research process; explanations; interpretation; study design; concept formation, measure, sampling, data acquisition, inference; rhetoric and presentation of findings.—F. (F.)

#### **206. Quantitative Analysis in Sociology (4)**

Lecture—4 hours. Prerequisite: course 106. Survey of the statistical models and methods that serve as a foundation for quantitative research in sociology, with an emphasis on multivariate regression analysis, as well as measurement theory and time series analysis. (S/U grading only.)—W. (W.)

#### **207A. Methods of Quantitative Research (4)**

Lecture—3 hours; term paper. Prerequisite: course 106 or the equivalent. Principles of study design, examination of measurement, survey research methods and multivariate analysis. Course will stress actual practice of techniques. Students will carry out quantitative data analysis using packaged computer programs. May be repeated eight times for credit with instructor approval.

### **208. Topics in Advanced Quantitative Methods in Social Science (4)**

Seminar—3 hours; term paper. Prerequisite: course 206 or the equivalent and graduate standing; major graduate student. Analysis of the logic and application of an advanced statistical model; the particular model chosen may vary. Emphasis on the model's assumptions, its strengths and weaknesses, its application for social science inquiry, and the relationship between methods and social theory. May be repeated up to 12 units for credit. Offered irregularly.

### **215. Economy, Polity, and Society (4)**

Seminar—3 hours; paper. Prerequisite: consent of instructor. Open to graduate students in sociology and related disciplines. Course introduces students to topics and selected issues in the related fields of economic and political sociology and political economy. Offered irregularly.

### **220. Deviance, Law, and Social Control (4)**

Seminar—3 hours; projects. Prerequisite: course 120 or consent of instructor. Report and discussions of literature on selected forms of deviance in relation to law and formal social control. Agency contacts and exploratory research projects. Offered irregularly.

### **224. Sociology of Education (4)**

Seminar—3 hours; term paper. Prerequisite: course 206 or the equivalent recommended. Overview of sociological theories accounting for the form, role, and evolution of educational systems. Emphasis on empirical research on education and social stratification and application to educational policy. Topics include tracking, racial/ethnic achievement inequalities, school organization, and the immigrant experience. Offered irregularly.

### **225. Cultural Sociology (4)**

Seminar—3 hours, term paper. Explores the varied ways in which culture is understood in the social sciences and the research questions that follow from contrasting viewpoints. The approach is historically informed and focused on changing cultural forms in relation to industrialization and post-modernism. Offered irregularly.

### **226. Sociological Social Psychology (4)**

Seminar—3 hours; seminar paper—1 hour. Prerequisite: graduate standing or consent of instructor. Advanced study of the varying approaches, methods, issues and topical concerns of sociological social psychology. Analysis of central and representative historical and contemporary works. Offered irregularly.

### **227. Sociology of Reproduction (4)**

Lecture—3 hours; discussion—1 hour. Recent social science scholarship in such areas as teenage pregnancy, family planning, abortion, adoption, AIDS, and new reproductive technologies; focus on the current situation in the United States. Offered irregularly.

### **230. Ethnic (Race) Relations (4)**

Lecture—3 hours; term paper. Advanced study of the determinants of ethnic groupings and their interrelationships. Major theme will be the patterns of ethnic stratification and causes of ethnic conflict. Specific focus upon dominance and resistance to dominance. Influence of social science research. Offered irregularly.

### **233. Gender, Culture, and Local/Global Transformation (4)**

Seminar—3 hours; term paper. Focus on critical approach to women and development; analyze local transformations with global connections within specific cultural contexts. Course covers theory, methodological issues, and relationship between theory and practice. Offered irregularly.

### **234. Gender, Family, and Society (4)**

Seminar—3 hours; seminar paper. Prerequisite: graduate standing or consent of instructor. The major theoretical traditions and concerns in family sociology and sociology of gender. Analysis of selected classical and contemporary works representative of functionalist, Marxist, psychoanalytic, feminist and

critical theoretical approaches to these subjects (e.g., Engels, Parsons, Freud, Horkheimer, Goode, Lasch, Mitchell). Emphasis on macro and historical questions. Offered irregularly.

#### **242A. Methodologies of Sociohistorical Inquiries (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor not required for graduate students in the Social Sciences Division or the Humanities, Arts, and Cultural Studies Division; required for undergraduates and students from other divisions or colleges. Introduction to comparative and case methodological approaches to sociohistorical inquiry, theoretical and practical issues, and substantive research agendas ranging from study of large-scale social transformations to close microhistories, including research agendas being developed by students in the course. Offered irregularly.

#### **243. Urban Society (4)**

Seminar—3 hours; term paper. Broad overview of the issues and concerns of the field of urban sociology. Special emphasis on the human experience of urban living in contemporary, cross-cultural or historical settings. Offered irregularly.

#### **245. Developing Societies (4)**

Seminar—3 hours; term paper or project. Prerequisite: graduate student status or familiarity with problems of developing societies. Analysis of social and economic problems of developing societies from the standpoint of theory and research on modernization and underdevelopment. Nature of third world dependency and interdependence in the global political economy. Offered irregularly.

#### **248. Social Movements (4)**

Seminar—3 hours; term paper. Analysis of current issues in and contributions to the study of collective behavior and social movements; particular focus upon the strategies and tactics of social movements. Offered irregularly.

#### **254. Sociological Issues in Health Care (4)**

Seminar—3 hours; term paper. Prerequisite: open to graduate or professional students. Sociological perspectives and methods directed to health care issues. Students select topics for supervised research. The course will have a theme (described in advance) each time it is offered. Paper on research will be required. Offered irregularly. (S/U grading only.)

#### **255. Sociology of Law (4)**

Seminar—4 hours. Prerequisite: consent of instructor. Analysis of the nature of the legal process and its impact on social behavior. Will consider (1) nature and functions of law, (2) the organization and administration of law, and (3) the capacity of law to affect social behavior. Offered irregularly.

#### **265A. Classical Sociological Theory (4)**

Lecture—3 hours; discussion—1 hour. Introduces graduate students to the work of the main classical thinkers in the tradition of social theory, such as Marx, Durkheim, Weber, Simmel, Freud, G.H. Mead, and Parsons, locating them within the historical, cultural, and philosophical milieu in which their ideas originated.

#### **265B. Theory in Contemporary Sociology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 265A. Explores the uses of theories in contemporary sociology by tracing their connections with classical sociological writings and their relations to broader theoretical concerns of contemporary social thought, with particular emphasis on relevance to the current historical, cultural and social milieu.

#### **270. Social Demography (4)**

Seminar—4 hours. Prerequisite: course 170 or consent of instructor. How social institutions affect and are affected by the level and variation of mortality, migration, and fertility. Special emphases on the determinants of fertility-related attitudes and behavior, on less-developed countries, and on contemporary empirical studies. Offered irregularly.

#### **280. Organizations and Institutions (4)**

Seminar—4 hours. Theory of formal organizations and bureaucracy. Methods of research in organizational and institutional studies. Historical and comparative analysis of political, religious, educational, military, and economic structure. Offered irregularly.

#### **288. Integrative Research Practicum (4)**

Seminar—6 hours; extensive writing; term paper. Prerequisite: courses 207A, 242A, 292A; consent of instructor. Continuing training in field, quantitative, and/or comparative-historical methods. Emphasis on students' research projects and applications of principles related to research design, concept and theory construction causality and interpretation, and data and measurement. Completion of research paper is required. —S. (S.) Grindstaff, Hall, Lo, Shumann, Shu, Wolf

#### **290. Seminar (4)**

Seminar—3 hours; term paper. (S/U grading only.) Offered irregularly.

#### **292A. Field Research (4)**

Seminar—3 hours; fieldwork. Prerequisite: graduate standing in Sociology or consent of instructor. Introduction to the logic, methods, and practices of field research, with particular emphasis on the ethnographic tradition of participant observation. Interviewing and other qualitative techniques will also be covered. Students will develop original research projects based on their own fieldwork.

#### **293. Proseminar in Sociology (2)**

Seminar—2 hours. Prerequisite: first-year Sociology graduate students only. Introduction to graduate training in sociology. A seminar designed to introduce students entering graduate work in the department to its ongoing research activities. (S/U grading only.) Offered irregularly.

#### **295. Special Topics Seminar. (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Research topics in Sociology. Specific topic will vary according to faculty interest and student demand. May be repeated for credit when topic differs. Offered irregularly.

#### **298. Group Study (1-5)**

Prerequisite: consent of instructor. (S/U grading only.) Offered irregularly.

#### **299. Individual Study (1-12)**

(S/U grading only.) Offered irregularly.

#### **Professional**

#### **390A. The Teaching of Sociology (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing; required for first-time teaching assistants. Practical instruction in teaching methods for qualitative and quantitative courses. Pedagogical issues involved in critical sociological analysis. (S/U grading only.) Offered irregularly.

#### **390B. The Teaching of Sociology (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing. Practical instruction in devising course syllabi, lectures and assignments for Associate-Instructors and others interested in college teaching. Discussion of pedagogical methods of teaching qualitative and quantitative courses. (S/U grading only.) Offered irregularly.

#### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) Offered irregularly.

#### **Professional**

#### **466. Research Paper Workshop (2)**

Workshop—1.5 hours; discussion—0.5 hours. Prerequisite: Master of Arts standing. A workshop to assist advanced graduate students in the preparation of an original research paper. Students present their research papers and discuss issues in theory, research design, data, empirical inference, and verbal and written presentation of a professional research paper. (S/U grading only.) Offered irregularly.

## **Soil and Water Science**

(College of Agricultural and Environmental Sciences)

This major has been discontinued as of Fall 2008; see [Environmental Science and Management](#), on page 325.

## **Soil Science**

See [Earth and Planetary Sciences](#), on page 237; [Soil Science](#), on page 551; and [Soils and Biogeochemistry \(A Graduate Group\)](#), on page 552.

## **Soil Science**

(College of Agricultural and Environmental Sciences)

**Faculty.** See [Land, Air and Water Resources](#), on page 391.

**Major Programs.** See the Soils and Biogeochemistry track in [Environmental Science and Management](#), on page 325.

#### **Minor Program Requirements:**

The Department of Land, Air and Water Resources, Soils and Biogeochemistry Program, offers a minor program in soil science. The minor is especially geared toward students in the environmental sciences including Hydrologic Science, Environmental Science and Management, Environmental Toxicology, Ecological Management and Restoration, International Agricultural Development, Crop Science and Management, Environmental Horticulture and Urban Forestry, Geology, and Plant Biology.

UNITS

<b>Soil Science .....</b>	<b>21</b>
Soil Science 100 .....	5
Courses selected from Soil Science 102, 105, 107, 109, 111, 118, 120, Plant Sciences 158, Hydrologic Science 124, 134 .....	16

**Minor Adviser.** R.J. Southard ([Land, Air and Water Resources](#))

**Graduate Study.** Programs of study leading to the M.S. and Ph.D. degrees in Soils and Biogeochemistry are available. Information regarding these programs can be obtained from the graduate advisers, at <http://soils.ucdavis.edu/> and in the Graduate Announcement. See also [Graduate Studies](#), on page 120.

**Graduate Advisers.** Randy Dahlgren and Sanjai Parikh ([Land, Air and Water Resources](#))

#### **Courses in Soil Science (SSC)**

Questions pertaining to the following courses should be directed to the instructor, to the Resource Sciences Teaching Center in 1150 Plant and Environmental Sciences Building 530-752-1603, or see undergraduate and graduate Soils and Biogeochemistry courses at [http://lawr.ucdavis.edu/undergrad\\_esm.htm](http://lawr.ucdavis.edu/undergrad_esm.htm) or [http://lawr.ucdavis.edu/graduate\\_sbg.htm](http://lawr.ucdavis.edu/graduate_sbg.htm).

#### **Lower Division**

#### **10. Soils in Our Environment (3)**

Lecture—3 hours; independent study. Class size limited to 90 students. Soils in our global ecosystem; soils as natural bodies formed by interactive environmental processes; soil response to use and management; sustainable use of soil resources; role of soils in agricultural and environmental issues; role of soils in our daily lives. GE credit: SciEng | QL, SE, SL. —F. (F.) Dahlgren

**92. Soil Science Internship (1-12)**

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in soil science. Internship supervised by a member of the faculty. (P/NP grading only.)—F, W, S. (F, W, S.)

**Upper Division****100. Principles of Soil Science (5)**

Lecture—3 hours; laboratory—3 hours; term paper. Prerequisite: Chemistry 2A-2B, Physics 1A-1B, Biological Sciences 1A; Geology 50, Biological Sciences 1C recommended. Soil as part of natural and managed ecosystems and landscapes. Solid, liquid, and gas phases and their interactions in the soil. Water, gas and heat movement in soil. Soil biology. Plant nutrient acquisition and use. Soil development, management and use. GE credit: SciEng | QL, SE, SL, VL.—F. (F.) Scow, Southard

**102. Environmental Soil Chemistry (3)**

Lecture—3 hours. Prerequisite: course 100 or the equivalent; general chemistry. Soil chemistry processes related to the fate and transport of contaminants in soil. Soil minerals, natural organic matter, surface charge, soil solution chemistry, redox reactions in soil, and sorption of inorganic and organic contaminants. GE credit: SciEng | QL, SE, SL.—W. (W.) Parikh

**105. Field Studies of Soils in California Ecosystems (5)**

Prerequisite: courses 100 and 120, or equivalent recommended. Class size limited to a minimum of 10 and a maximum of 24 students. Field-based studies of soils in California ecosystems, away from campus, throughout California. Emphasis on description and classification of soils; relationships among soils, vegetation, geology, and climate; physical, chemical, and biological processes in soils on the landscape; and the role of soils in land use. May be repeated one time for credit. GE credit: SciEng | QL, SE, SL, VL, WE.—Su. (Su.) Amundson, Dahlgren, O'Geen, Southard

**107. Soil Physics (5)**

Lecture—3 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 100, Environmental and Resource Sciences 100, Mathematics 16A, or the equivalent. Physical properties of soil. Principles of water, gas, heat, and solute movement in soil with selected examples related to soil and water management. Influence of soil properties on transfer processes. GE credit: SE.—F. (F.) Hopmans

**109. Sustainable Nutrient Management (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 100 or the equivalent. Availability of nutrients in organic and conventional agricultural, vineyard, orchard and plantation forest soils; management of fertilizers, cover crops, compost, sewage sludge and manures for crop production and to prevent loss to the environment is emphasized. GE credit: SciEng | OL, QL, SE, SL, VL, WE.—S. (S.) Horwath

**111. Soil Microbiology (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 1C and Biological Sciences 1C. Major groups of microorganisms in soil, their interrelationships, and their responses to environmental variables. Role of microorganisms in cycling of nutrients. Plant-microbe relationships. Transformations of organic and inorganic pollutants. GE credit: SciEng | QL, SE, SL, WE.—W. (W.) Scow

**118. Soils in Land Use and the Environment (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or consent of instructor. Soils are considered as elements in land use planning and environmental quality. Topics include: soil survey reports, remote sensing, land capability classification, soil erosion/conservation, waste disposal on soils and soil reclamation. One one-day field trip. GE credit: SciEng | SE, SL.—S. (S.) O'Geen

**120. Soil Genesis, Morphology, and Classification (5)**

Lecture—4 hours; laboratory—3 hours (includes five one-day weekend field trips). Prerequisite: course 100; Geology 50 recommended. Recognition and description of soils; chemical, biological and physical processes of soil formation. Factors of soil formation. Interactions of soils with diverse ecosystems. Introduction to soil classification. Practice using soil taxonomy. Practical experience describing soil properties in the field. GE credit: SciEng | QL, SE, SL, VL.—S. (S.) Southard

**192. Soil Science Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in soil science. Internship supervised by a member of the faculty. (P/NP grading only.)—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

(P/NP grading only.)—F, W, S. (F, W, S.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)—F, W, S. (F, W, S.)

**Graduate****202. Topics in Advanced Soil Chemistry (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: undergraduate course in soil chemistry, water chemistry or consent of the instructor. Restricted to 18 students. Reviews of current research in soil chemistry. Topics include double layer theory; clay mineral and oxide surface chemistry; adsorption on soil surfaces; speciation and modeling of solution ions; solubility and mineral stability diagrams. May be repeated one time for credit if topic differs.—W. (W.) Parikh

**205. Field Studies of Soils in California Ecosystems (5)**

Fieldwork—50 hours; discussion—15 hours; lecture—5 hours. Prerequisite: courses 100 and 120 or equivalent recommended. Class size limited to 24 students. Field-based soil studies in California ecosystems. Description and classification of soils; relationships among soils, vegetation, geology, and climate; physical, chemical, and biological processes; their role in land use. Similar to course 105; requires additional work for graduate credit. May be repeated one time for credit if geographic locale changes. Offered irregularly.—Su. (Su.) Amundson, Dahlgren, O'Geen, Southard

**208. Soil-Plant Interrelationships (3)**

Lecture—3 hours. Prerequisite: course 100, Plant Biology 111B or consent of instructor. Plant needs, occurrence and reactions of water and mineral nutrients in soils; root systems and their growth in soils; mass flow and diffusion mechanisms in nutrient acquisition; models relating nutrient uptake to soil and plant characteristics; nutrient assimilation and crop quality. Offered in alternate years.—W. (W.) Parikh

**211. Advanced Soil Microbiology (3)**

Lecture—3 hours. Prerequisite: Chemistry 8A-8B; course 111; Biological Sciences 102, 103 or an equivalent course recommended. Microbial metabolism of organic chemicals in soil, both natural and xenobiotic. Decomposition of organic matter. Kinetics of microbial processes in soil. Offered in alternate years.—F. Scow

**219. Ecosystem Biogeochemistry (4)**

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: introductory courses in ecology/biology and soils recommended; undergraduates accepted with consent of instructor. Multidisciplinary analysis of energy and nutrient transfers within terrestrial ecosystems. Examination of processes and inter- and intra-system interactions between the atmosphere, biosphere, lithosphere and hydrosphere. Laboratory section uses biogeochemical simulation models to examine case studies. (Same course as Ecology 219.)—S. (S.) Houlton

**220. Pedology (3)**

Lecture—3 hours. Prerequisite: consent of instructor; course 120 recommended. Topics selected from studies of soil-forming processes, soil-geomorphic relations, mineral weathering, new developments in

soil classification, and development of pedologic theory. Topics vary from year to year. May be repeated one time for credit. Offered in alternate years.—(W.) Southard

**222. Global Carbon Cycle (3)**

Lecture—3 hours. Prerequisite: Chemistry 8A, 8B, Mathematics 16A, 16B, course 100 or the equivalent. Global carbon cycle from Phanerozoic epoch to modern times. Examination of long and short-term carbon cycles. Transfer of carbon among ocean, land and life with emphasis on humic substance formation, methods of characterization, reactions with organics and soil carbon stabilization. Offered in alternate years.—W. (W.) Horwath

**290. Special Topics in Soil Science (1-4)**

Seminar—1-4 hours. Prerequisite: graduate standing. Seminars and critical review of problems, issues, and research in soil science. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**298. Group Study (1-5)**

Prerequisite: consent of instructor. May be repeated for credit when topic differs. (S/U grading only.)—F, W, S. (F, W, S.)

**299. Research (1-12)**

(S/U grading only.)—F, W, S. (F, W, S.)

**Professional****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**Soils and Biogeochemistry (A Graduate Group)**

A. Toby O'Geen, Ph.D., Chairperson of the Group

**Group Office.** 1152 Plant & Environmental Sciences Building  
530-752-1669; <http://soils.ucdavis.edu/>; [http://lawr.ucdavis.edu/graduate\\_sbg.htm](http://lawr.ucdavis.edu/graduate_sbg.htm)

**Faculty**

Patrick Brown, Ph.D., Professor (*Plant Sciences*)  
William Casey, Ph.D., Professor (*Chemistry*)  
Randy Dahlgren, Ph.D., Professor  
*Academic Senate Distinguished Teaching Award*  
Helen Dahlke, Ph.D., Assistant Professor  
Valerie Eviner, Ph.D., Assistant Professor  
(*Plant Sciences*)  
Graham Fogg, Ph.D., Professor  
Mark Grismer, Ph.D., Professor  
Rebecca Renee Hernandez, Ph.D., Assistant Professor  
Peter Hernes, Ph.D., Professor  
Jan Hopmans, Ph.D., Professor  
William Horwath, Ph.D., Professor  
Ben Houlton, Ph.D., Associate Professor  
Louise Jackson, Ph.D., Professor  
Sanjai Parikh, Ph.D., Associate Professor  
Eliska Rejmankova, Ph.D., Professor  
(*Environmental Science and Policy*)  
Jorge Rodrigues, Ph.D., Professor  
Kate Scow, Ph.D., Professor  
David Smart, Ph.D., Professor  
(*Viticulture and Enology*)  
Randal Southard, Ph.D., Professor  
Kerri Steenwerth, Ph.D., Adjunct Assistant Professor  
(*Viticulture and Enology*)  
Susan Ustin, Ph.D., Professor  
Chris van Kessel, Ph.D., Professor (*Plant Sciences*)

**Emeriti Faculty**

Caroline Bledsoe, Ph.D., Professor Emeritus  
André Läuchli, Ph.D., Professor Emeritus  
Roland Meyer, Ph.D., Cooperative Extension Specialist Emeritus  
G. Stuart Pettygrove, Ph.D., Soils Specialist Emeritus  
Wendy Silk, Ph.D., Professor Emeritus  
Michael Singer, Ph.D., Professor Emeritus

**Affiliated Faculty**

Victor Claassen, Ph.D., Associate Researcher  
 Stephen Grattan, Ph.D., Water Relations Specialist  
 Daniel Geisseler, Ph.D., Cooperative Extension Specialist  
 Elise Gornish, Ph.D., Cooperative Extension Specialist  
 Stephen Grattan, Ph.D., Water Relations Specialist  
 Peter Green Professional Research Engineer (*Civil & Environmental Engineering*)  
 Stephen Kaffka, Ph.D., Cooperative Extension Specialist (*Plant Science*)  
 Jeffrey P. Mitchell, Ph.D., Cooperative Extension Specialist (*Plant Sciences*)  
 A. Toby O'Geen, Ph.D., Cooperative Extension Specialist  
 Ken Tate, Ph.D., Cooperative Extension Specialist (*Plant Sciences*)

**Graduate Study.** The Soils and Biogeochemistry Graduate Group offers programs of study and research leading to the M.S. and Ph.D. degrees. The focus of Soils and Biogeochemistry is on the physical, chemical and biological processes occurring in soils of different landforms and ecosystems. The goal is to understand the complex processes of mass and energy flow that control agricultural and natural ecosystem functions, productivity, and sustainability. Investigations assess impacts and implications of natural processes and anthropogenic effects, such as climate change, on soil and ecosystem behavior and development. Examples include: fate and emission of greenhouse gases; soil carbon sequestration; fate and transport of native and applied chemicals; soil microbial ecology; nutrient uptake and management; nutrient cycling in managed and wildland ecosystems; pesticide and trace element adsorption on surfaces; mineral weathering; organic agriculture; bioavailability of toxics; soil erosion; conservation; ecosystem productivity and sustainability; and the study of soil evolution on the landscape. These studies are carried out within a framework of integrating applied chemical, physical, mathematical, and biological sciences.

**Graduate Advisers.** Randy Dahlgren, Ph.D.; Sanjai Parikh, Ph.D.

**Graduate Admissions Officer.** A. Toby O'Geen, Ph.D.

## Spanish and Portuguese

(College of Letters and Science)

Cecilia Colombi, Ph.D., Chairperson of the Department

Fabián A. Samaniego, M.A., Senior Lecturer

Emeritus

Hugo J. Verani, Ph.D., Professor Emeritus

**Affiliated Faculty**

Charles Oriel, Ph.D., Lecturer

**The Major Program**

The Spanish major program assures proficiency in all four language skills-speaking, understanding, reading, and writing-and acquaints students with the intellectual and cultural contributions of the Spanish-speaking world through a study of its language, literature, and cultural productions.

**The Program.** The department's lower division program gives students a solid foundation in the Spanish language, either through the traditional elementary and intermediate language series or through an accelerated three-course sequence of Spanish for native speakers. At the upper division level, students receive a broad introduction to basic concepts and the practice of literary and cultural criticism and to the four areas of study represented in the department's curriculum: Spanish linguistics, Spanish literature and culture, Latin-American literature and culture, and Latino literatures and cultures in the United States. Students are encouraged to work closely with the department's academic advisers in designing a program of studies tailored to their individual needs and interests. Many students combine the Spanish major with another major in the humanities or social sciences.

**Student Learning Outcomes.** Educational Objectives:

- **Linguistics.** Demonstrate knowledge of the Spanish speaking world's linguistic diversity through the comprehension of Spanish in a variety of situations, discursive modes and historical, regional or social variations. Demonstrates analytic, interpretative, and critical thinking skills; Spanish 111N, 113, 115/S, 116, 117, 118, 180.
- **Literature.** Demonstrate analytic, interpretative and critical thinking skills with respect to literary texts from Latin America, Spain, the United States and other countries in which there is a literary production in Spanish; Spanish 100/S, 130, 131N, 134A/B, 142 (Spain); 150N, 151, 157, 159/S (Latin America); 117, 174, 176, 177 (United States).
- **Culture.** Demonstrate cultural awareness with respect to the diversity of cultural products and manifestations produced in the Spanish speaking world (Latin America, Spain, the United States and other countries in which there is a cultural production in Spanish; Spanish 100/S, 141/S, 170/S, 174).
- **Film and Art.** Demonstrate analytic interpretative and critical thinking skills with respect to linguistics, literature and cultural studies.

**Career Alternatives.** The program, alone or in combination with other major programs, may lead to advanced study of the language or literature and culture of Spain and Spanish America, and to careers not only in teaching, but also in other professions such as library science, law, medicine, and in government, social service, business, or international relations.

**A.B. Major Requirements:**

UNITS

**Preparatory Subject Matter.....37**

Spanish 1, 2, 3, 21 or 21S, 22 or 22S, 23 or 23S, and 24 or 24S.....0.33  
 or Spanish 31, 32, 33.....0.15  
 Linguistics 1 .....4

**Depth Subject Matter .....41-44**

One course in each of the following five areas: .....19-20  
 Spanish 100, 100S, 141, 141S, 170 or 170S .....4  
 Spanish 111N, 115, or 116 .....3-4

Spanish 130, 131N, 134A or 142 .....4  
 Spanish 150N, 151, 157, 159 or 159S .....4  
 Spanish 117, 174, 176, or 177 .....4  
 Students planning to take Spanish 110 should do so at the beginning of the upper division sequence or concurrently with Spanish 100, 100S, 141, 141S, 170 or 170S.

Six elective courses to be chosen in consultation with the student's major adviser .....22-24

Students may, with the approval of their adviser, take up to two elective courses outside the Spanish department in such programs as:

*African American and African Studies:*  
*African American and African Studies*  
 107A, 180  
*Anthropology: Anthropology* 144  
*Art History: Art History* 151  
*Chicana/o Studies: Chicana/o Studies*  
 154, 155, 156, 160, 170, 171  
*Comparative Literature: Comparative Literature* 152, 165/S  
*Education: Education* 151, 152  
*History: History* 159, 160, 161A, 161B,  
 164, 165, 166A, 166B, 167, 168,  
 169A, 169B  
*Linguistics: Linguistics* 166  
*Native American Studies: Native American Studies* 120, 133A/B, 184  
 A maximum of six units of course 199 may be counted toward the major.  
 Course 199 cannot be used to replace regular departmental courses.

**Total Units for the Major .....45-81**

**Major Advisers.** Student Affairs Officer/Undergraduate Academic Coordinator; Laura Barrera, [ljbarerra@ucdavis.edu](mailto:ljbarerra@ucdavis.edu).

**Advising.** Given the great flexibility in the Spanish major, it is important that students design their programs in close consultation with their major adviser. This is especially important for students who intend to use their major as preparation for graduate study, for those who are planning a teaching career, and for those who wish to take advantage of our Education Abroad Program options.

**Minor Program Requirements:**

UNITS

**Spanish .....23-24**

One course in each of the following five areas:

Spanish 100, 100S, 141, 141S, 170, or 170S .....4  
 Spanish 111N, 115, or 116 .....3-4  
 Spanish 130, 131N, 134A, or 142 .....4  
 Spanish 150N, 151, 157, 159 or 159S .....4  
 Spanish 117, 174, 176, or 177 .....4  
 One upper division elective in Spanish .....4  
 Consult a departmental adviser if any of these courses are to be taken abroad.

**Honors Program.** Candidates for high or highest honors in Spanish must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in at least six units of Spanish 194H distributed over two quarters. Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of their junior year (135 units), have attained a cumulative GPA of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in Spanish are in addition to the regular requirements for the major in Spanish.

**Education Abroad Program Options.** The department encourages its majors to consider study in a Spanish-speaking country with our Education Abroad Program (EAP). It is now possible for our stu-

dents to complete significant portions of the Spanish major in the EAP centers at both the lower (Preparatory Subject Matter) and upper division levels through newly introduced options.

**UC Davis Quarter Abroad.** The Quarter Abroad Program offers programs in Mendoza, Argentina (fall quarter) and in Madrid, Spain (spring quarter). These programs aim at providing students with opportunities to increase their knowledge of the Spanish language and cultures by experiencing the life-learning challenges of living and studying abroad.

Students may earn 15-22 UC Davis units toward the Spanish major, minor, or foreign language requirement. Each program may offer an upper division course taught by the UC Davis Program Director focusing on history, culture and society.

For more information, contact C. Colombi or C. Martínez-Carazo or see <http://studyabroad.ucdavis.edu/programs/quarterabroad/>.

**Teaching Credential Subject Representative.** C. Colombi; see the Teaching Credential/M.A. Program on page 124.

**Graduate Study.** The Department offers courses leading to the M.A. degree in Spanish to students who have completed with distinction the A.B. degree in Spanish, or the equivalent. Candidates will be recommended for admission to graduate studies in Spanish provided they meet the requirements of the Graduate Studies office and the Department of Spanish. The Department also offers programs of study and research leading to the Ph.D. degree. Detailed information may be obtained by writing to the Chairperson or the Graduate Director of the Spanish Department.

**Graduate Adviser.** Mandy Bachman, [mlbachman@ucdavis.edu](mailto:mlbachman@ucdavis.edu).

**Prerequisite Credit.** Credit normally will not be given for a course if that course is the prerequisite of a course already successfully completed. Exceptions can be made by the Department Chairperson only.

## Courses in Portuguese (POR)

### Lower Division

#### 1. Elementary Portuguese (5)

Lecture/discussion—5 hours; laboratory—1 hour. Introduction to Portuguese grammar and development of all language skills in a cultural context with special emphasis on communication. Students who have successfully completed Portuguese 2 or 3 in the 10th or higher grade of high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed. GE credit: WC.—F. (F.)

#### 1A. Accelerated Intensive Elementary Portuguese (15)

Lecture/discussion—15 hours. Not open to students who have completed courses 1, 2 or 3. Intended for students who wish to complete three quarters of Portuguese 1, 2, and 3. GE credit: WC.

#### 2. Elementary Portuguese (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 1. Continuation of course 1 in the areas of grammar and development of all basic language skills in cultural context with special emphasis on communication. GE credit: WC.—W. (W.)

#### 3. Elementary Portuguese (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 2. Continuation of course 2 in the areas of grammar and development of all basic language skills in cultural context with special emphasis on communication. GE credit: WC.—S. (S.)

#### 8. Elementary Portuguese Conversation (2)

Discussion—3 hours. Prerequisite: course 3. Not open to native speakers or upper division students. Designed to develop oral communication skills.

Emphasis on increasing vocabulary, improving listening comprehension, pronunciation, accuracy and grammar control. Practice of everyday situations. GE credit: WC.—W, S, Su. (W, S, Su.)

#### 21. Intermediate Portuguese (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 3. Review and develop the grammar, vocabulary, and composition acquired in first year Portuguese through exercises and reading of modern texts. GE credit: WC.—F. (F.) Bernucci

#### 22. Intermediate Portuguese (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 21. Continuation of course 21. Focus on more difficult grammar concepts and further composition practice. Development of all language skills through exercises and reading of modern texts. GE credit: WC.—W. (W.)

#### 23. Portuguese Composition I (4)

Lecture—3 hours; extensive writing. Prerequisite: course 22. Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Class activities include composition, journals, letters, individual and group projects. GE credit: WC, WE.—S. (S.)

#### 28. Intermediate Portuguese Conversation (2)

Discussion—3 hours. Prerequisite: course 8. Continuation of course 8. Designed to develop oral communication skills at a more advanced level. Practice in more complex situations.—W, Su. (W, Su.)

#### 31. Intermediate Portuguese for Spanish Speakers (4)

Lecture/discussion—3 hours; laboratory—1 hour. Development of linguistic and learning skills required for Spanish-speaking students in upper-division courses in Portuguese.

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor and Department Chairperson. Directed group study primarily for lower division students.—F, W, S. (F, W, S.)

### Upper Division

#### 100. Principles of Luso-Brazilian Literature and Criticism (4)

Lecture—3 hours; term paper. Prerequisite: course 22 or 23 or consent of instructor. Principles of literary criticism applied to the study of fiction, poetry, and essays of major literary writers of the Luso-Brazilian world. GE credit: ArtHum | AH, WC, WE.—F. (F.) Bernucci, Newcomb

#### 111. The Structure of Portuguese: Sounds and Words (3)

Lecture/discussion—3 hours. Prerequisite: consent of instructor. Linguistic description of sound patterns of Portuguese and how those sounds can be used to form larger units, such as morphemes and words. Theoretical and practical comparisons with English and with other Romance languages. GE credit: SS.

#### 130. Survey of Luso-Brazilian Literature: 1500-1800 (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 22 or 23; 100. Overview of Luso-Brazilian literature, covering three major literary periods: Renaissance, Baroque, and Enlightenment. Attention to the concept of imitation and nativism. GE credit: AH, WC.—W. (W.)

#### 132. Portuguese Literature: Medieval and Renaissance (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Overview of the origins of the Portuguese literature, spanning from the 13th C to the 16th C. Studies of lyrical and epic poetry, drama, and travel narratives. GE credit: AH, WC.

#### 134. Luis de Camões (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 22 or 31; 100. Overview of the greatest Renaissance Portuguese poet, Luis de Camões. Study his famous epic poem, Os Lusíadas, and a series of sonnets written by him. GE credit: AH, WC.

#### 141. Introduction to Luso-Brazilian Culture (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 100 or consent of instructor. Introduction to history, geography, and culture of Portugal and Brazil. Art, history of ideas, and everyday cultural manifestations. Introduction to critical reading and textual analysis. Taught in Portuguese. GE credit: ArtHum, Div, Wrt | AH, WC.

#### 159. Special Topics in Luso-Brazilian Literature and Culture (4)

Lecture—3 hours; term paper. Prerequisite: course 3 or Spanish 24, 24S or 33. Special Topics in Luso-Brazilian Literature and Culture. May be repeated one time for credit. GE credit: ArtHum | AH, WC, WE.—Bernucci, Newcomb

#### 161. Luso-Brazilian Literature and Culture (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Colonial Brazilian literature survey. Readings include 16th-18th centuries manuscripts and books of cultural importance in a society dominated by censorship and with no printing presses. Study of the role literary Academies played in the so called "culture of manuscripts." GE credit: ArtHum | AH, WC, WE.—Bernucci, Newcomb

#### 162. Introduction to Brazilian Literature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 3, 31 or 31G. Narrative and poetic texts of the 19th and 20th centuries in Brazil. In-depth and comparative study of Romantic and (Neo) Naturalist movements as a forum for discussion about literary tradition and modernity in Latin America. GE credit: ArtHum | AH, WE.—Bernucci, Newcomb

#### 163. 20th C Masters in Brazilian Literature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Overview of modern Brazilian literature from early 20th C to the poetry by João Cabral de Melo Neto and the Concretists (1960s), including European avant-garde movements and literary and cultural manifestos leading to a revolutionary body of literature. GE credit: ArtHum | AH, WC, WE.—Bernucci, Newcomb

#### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor and Department Chairperson. (P/NP grading only.) GE credit: AH, WC, WE.—F, W. (F, W.) Bernucci

#### 199. Special Study for Advanced Undergraduates (1-5)

Independent study with professor for advanced undergraduate students, or honor thesis students. (P/NP grading only) Offered irregularly. GE credit: AH.

### Courses in Spanish (SPA)

**Course placement.** Students with two years of high school Spanish normally take Spanish 2, those with three years take Spanish 3, and those with four years take Spanish 21. It is recommended that transfer students who have successfully completed a two-year sequence at the junior college level continue their study by taking Spanish 24, 24S, 100, 100S, 141, 141S, 170, or 170S. Consult a departmental adviser.

### Lower Division

#### 1. Elementary Spanish (5)

Lecture/discussion—5 hours. Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication. Not open for credit for students who have completed equivalent course 1S. Students who have successfully completed Spanish 2 or 3 in the 10th or higher grade of high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed. GE credit: ArtHum | AH, WC.—F, W, S, Su. (F, W, S, Su.)

**1A. Accelerated Intensive Elementary Spanish (15)**

Lecture/discussion—15 hours. Introduction to Spanish grammar and development of all language skills in a cultural context with emphasis on communication. Special 12-week accelerated, intensive summer session course combining the work of courses 1, 2 and 3. Not open to students who have completed equivalent courses 1, 1S, 2, 2S, 2V, 2Y, 3, 3S, 3V or 3Y. GE credit: ArtHum | WC.—Su. (Su.)

**15. Elementary Spanish (5)**

Lecture/discussion—5 hours; laboratory—1 hour. Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication. Offered in a Spanish speaking country under the supervision of a UC Davis faculty/lecturer. Not open for credit to students who have completed course 1. GE credit: WC.—F, S. (F, S.)

**2. Elementary Spanish (5)**

Lecture/discussion—5 hours. Prerequisite: course 1 or 1S or the equivalent. Continuation of courses 1 and 1S in the areas of grammar and basic language skills. Not open for credit for students who have completed equivalent course 2S, 2V or 2Y. GE credit: ArtHum | AH, WC.—F, W, S, Su. (F, W, S, Su.)

**25. Elementary Spanish (5)**

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 1 or 1S. Continuation of Spanish 1 in the areas of grammar and basic language skills. Offered in a Spanish speaking country under the supervision of UC Davis faculty/lecturer. Not open for credit to students who have completed course 2. GE credit: WC.—S. (F, S.)

**2V. Elementary Spanish (5)**

Web virtual lecture—3 hours; web electronic discussion—2 hours. Prerequisite: course 1 or 1S; or the equivalent. Continuation of course 1, 1S, or previous high school experience in the areas of grammar and basic language skills. Online format combining synchronous chatting with technologically based materials. Not open for credit to students who have taken equivalent course 2, 2S, 2Y, or higher. GE credit: ArtHum | AH, WC.—F, W, S, Su. (F, W, S, Su.)

**2Y. Elementary Spanish (5)**

Lecture/discussion—3 hours; web electronic discussion—2 hours. Prerequisite: course 1 or 1S. Continuation of course 1 or 1S in the areas of grammar and basic language skills. Hybrid format combining classroom instruction with technologically based materials. Not open for credit to students who have taken equivalent course 2, 2S, or 2V. GE credit: ArtHum | AH, WC.—F, W, S, Su. (F, W, S, Su.)

**3. Elementary Spanish (5)**

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 2, 2S, 2V or 2Y. Completion of grammar sequence and continuing practice of all language skills using cultural texts. Not open for credit to students who have completed course 3S. GE credit: WC.—F, W, S, Su. (F, W, S, Su.)

**35. Elementary Spanish (5)**

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 2, 2S, 2V, or 2Y. Completion of grammar sequence and continuing practice of all language skills using cultural texts. Offered in a Spanish speaking country under the supervision of UC Davis faculty. Not open for credit to students who have completed course 3. GE credit: WC.—F, S. (F, S.)

**3V. Elementary Spanish (5)**

Web virtual lecture—3 hours; web electronic discussion—2 hours. Prerequisite: course 2, 2S, 2V, or 2Y. Continuation of course 2, 2S, 2V or 2Y. Online format combining synchronous chatting with technologically based materials. Not open to students who have taken equivalent course 3, 3S, 3Y, or higher. GE credit: ArtHum | AH, WC.—W, Su. (W, Su.)

**3Y. Elementary Spanish (5)**

Lecture/discussion—3 hours; web electronic discussion—2 hours. Prerequisite: course 2, 2S, 2V or 2Y. Completion of grammar sequence and continuing

practice of all language skills using cultural texts. Hybrid format combining classroom instruction with technologically based materials. Not open to students who have taken equivalent course 3, 3S, or 3V. GE credit: ArtHum | AH, WC.—F, W, S. (F, W, S.)

**8. Elementary Spanish Conversation (2)**

Discussion—3 hours. Prerequisite: course 3; course 21 (concurrently) recommended. Not open to native speakers or upper division students. Designed to develop oral communication skills. Emphasis on increasing vocabulary, improving listening comprehension, pronunciation, accuracy and grammar control. Practice of everyday situations. GE credit: OL, WC.

**21. Intermediate Spanish (5)**

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 3 or 3S. Review and develop the grammar, vocabulary and composition acquired in the first year through exercises and reading of modern texts. Students transferring from other institutions are recommended to start the second year program at this point. Not open for credit to students who have completed course 21S. GE credit: WC.—F, W, S. (F, W, S.)

**21S. Intermediate Spanish (5)**

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 3, 3S, 3V or 3Y. Review and develop the grammar, vocabulary and composition acquired in the first year through exercises and reading of modern texts. Students transferring from other institutions are recommended to start the second year program at this point. Not open for credit to students who have completed course 21. GE credit: WC.—F. (F.)

**21V. Intermediate Spanish (5)**

Web Virtual Lecture—3 hours; web electronic discussion—2 hours. Prerequisite: course 3, 3Y, 3V or the equivalent from previous high school language experience. Continuation of course 3, 3V, 3Y, 3S, or previous high school experience in the areas of grammar and intermediate language skills. Online format combining synchronous chatting with technologically based materials. Not open for credit to students who have taken equivalent course 21, 21Y or 21S. GE credit: AH, OL, WC, WE.

**21Y. Intermediate Spanish (5)**

Lecture/discussion—3 hours; web electronic discussion—2 hours. Prerequisite: course 3, 3S, 3V or 3Y. Continuation of courses 3 or 3V in the areas of grammar and basic language skills. Hybrid format combining classroom instruction with technologically based materials where learning takes place both face-to-face and online. Not open to students who have taken course 21 or 21S. GE credit: WC.—F, W, S. (F, W, S.)

**22. Intermediate Spanish (5)**

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 21 or 21S or 21V or 21Y. Continuation of course 21 and 21S. Focus on more difficult grammar concepts and further practice on composition. Development of all language skills through exercises and reading of modern texts. Not open for credit to students who have completed course 22S. GE credit: WC.—F, W, S. (F, W, S.)

**22S. Intermediate Spanish (5)**

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 021, 021S, 021V or 021Y. Continuation of course 21 and 21S. Focus on more difficult grammar concepts and further practice on composition. Development of all language skills through exercises and reading of modern texts. Offered in a Spanish speaking country under the supervision of UC Davis faculty. Not open for credit to students who have completed course 22. GE credit: WC.—F. (F.)

**22V. Intermediate Spanish (5)**

Lecture/discussion—3 hours; web electronic discussion—2 hours. Prerequisite: course 21, 21Y, 21S, 21V or equivalent from previous high school language experience. Continuation of course 21, 21S, or 21V in the areas of grammar and basic language skills. Online format combining synchronous chatting

with technologically-based materials. Not open to students who have taken course 22 or 22S. Offered irregularly. GE credit: WC.—F, W, S, Su. (F, W, S, Su.)

**22Y. Intermediate Spanish (5)**

Lecture/discussion—3 hours; web electronic discussion—2 hours. Prerequisite: course 21, 21S, 21V or 21Y. Continuation of course 21, 21S, or 21V in the areas of grammar and basic language skills. Online format combining synchronous chatting with technologically-based materials. Not open to students who have taken equivalent course 22, 22S or 22V. Offered irregularly. GE credit: ArtHum | AH, WC.—F, W, S. (F, W, S.)

**23. Spanish Composition I (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 22, 22S, 22V or 22Y. Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Composition, journals, individual and group projects. Not open for credit to students who have completed 23S. GE credit: ArtHum | AH, WC, WE.—F, W, S, Su. (F, W, S, Su.) Colombi

**23S. Spanish Composition I (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 22, 22S, 22V or 22Y. Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Composition, journals, individual and group projects. Course is taught in a Spanish speaking country. Not open for credit to students who have completed equivalent course 23. GE credit: ArtHum | AH, WC, WE.—F. (F.) Colombi

**24. Spanish Composition II (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 23 or 23S. Development of advanced level writing skills, with emphasis on how to write argumentative prose, essays, and research papers. Introduction to the analysis of literary genres. Compositions, journals, individual and group projects. Not open for credit for students who have completed equivalent course 24S. GE credit: ArtHum | AH, WC, WE.—F, W, S. (F, W, S.) Colombi

**24S. Spanish Composition II (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 23 or 23S. Development of advanced level writing skills, with emphasis on how to write argumentative prose, essays, and research papers. Introduction to the analysis of literary genres. Compositions, journals, individual and group projects. Not open for credit to students who have completed equivalent course 24. GE credit: ArtHum | AH, WC, WE.—F. (F.) Colombi

**28. Intermediate Spanish Conversation (2)**

Discussion—3 hours. Prerequisite: course 8 or 22. Continuation of course 8. Designed to develop oral communication skills at a more advanced level. Practice in more complex situations. (Former course 9.) GE credit: OL, WC.

**31. Intermediate Spanish for Native Speakers I (5)**

Lecture/discussion—3 hours; tutorial—1 hour; extensive writing. Prerequisite: course 3 or the equivalent or consent of instructor. First course of a three-quarter series designed to provide bilingual students whose native language is Spanish with the linguistic and learning skills required for successfully completing upper division courses in Spanish. Intensive review of grammar and composition. GE credit: ArtHum | AH, OL, WC, WE.—F. (F.)

**32. Intermediate Spanish for Native Speakers II (5)**

Lecture/discussion—3 hours; tutorial—1 hour; extensive writing. Prerequisite: course 31; consent of instructor. Continuation of Spanish 31, intensive review of grammar and composition. Development of all language skills through reading of modern texts, presentation/discussion of major ideas, vocabulary expansion, and writing essays on topics discussed.

cussed. Designed for students whose native language is Spanish. GE credit: ArtHum | AH, OL, WC, WE.—W. (W.)

### **33. Intermediate Spanish for Native Speakers III (5)**

Lecture/discussion—3 hours; tutorial—1 hour; extensive writing. Prerequisite: course 32; consent of instructor. Development of writing skills, with emphasis on experimenting with various writing styles: analytical, argumentative, and creative. Analytical review of literary genres. Written essays will be assigned. Students will develop a research paper. Designed for students whose native language is Spanish. GE credit: ArtHum | AH, OL, WC, WE.—S. (S.)

### **98. Directed Group Study (1-5)**

Prerequisite: consent of instructor and Department Chairperson. Primarily for lower division students. (P/NP grading only.)—F, W, S. (F, W, S.)

### **99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

## **Upper Division**

### **100. Principles of Hispanic Literature and Criticism (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 24S or 33. Principles of literary criticism applied to the study of fiction, drama, poetry, and essay of major literary writers of the Hispanic world. Not open for credit to students who have completed course 100S. GE credit: ArtHum | AH, OL, WC, WE.—F, W, S. (F, W, S.)

### **100S. Principles of Hispanic Literature and Criticism (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 33. Principles of literary criticism applied to the study of fiction, drama, poetry and essay of major literary writers of the Hispanic world. Offered in a Spanish speaking country under the supervision of a UC Davis faculty/lecturer. Not open for credit to students who have completed course 100. GE credit: ArtHum | AH, OL, WC, WE.—S.

### **110. Advanced Spanish Composition (4)**

Lecture—3 hours; frequent writing assignments. Prerequisite: course 24 or 33. Practice in expository writing with emphasis on clarity and idiomatic expression. Practical application and review of selected grammar topics. (Part of former courses 110A and 110B.) GE credit: WE.

### **111N. The Structure of Spanish: Sounds and Words (3)**

Lecture—3 hours. Prerequisite: course 24 or 33, or consent of instructor; Linguistics 1 recommended. Linguistic description of the sound patterns of Spanish and how those sounds can be used to form larger units, such as morphemes and words. Theoretical and practical comparisons with English and with other Romance languages. (Former course 132.) GE credit: SocSci | SS.—F, W, S. (F, W, S.) Bradley

### **112N. The Structure of Spanish: Words and Phrases (3)**

Lecture—3 hours. Prerequisite: course 111N or consent of instructor. A study of Spanish word and phrase structure, with special emphasis on the constituent structure of noun and verb phrases. Theoretical and practical comparisons with English and with other Romance languages. (Former course 131.) GE credit: SocSci | SS.—Blake, Colombi

### **113. Spanish Pronunciation (4)**

Lecture—3 hours; term paper. Prerequisite: course 24 or 33, or consent of instructor; Linguistics 1 recommended. The sound structure of modern Spanish; theoretical analysis of selected problems in pronunciation. Strongly recommended for prospective teachers of Spanish. GE credit: SocSci | SS.—F, W, S. (F, W, S.) Bradley

### **114N. Contrastive Analysis of English and Spanish (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 24 or 33, or consent of instructor; course 111N and course 112N recommended. Contrastive analysis of English and Spanish, error analysis, introduction to structuralist and transformational linguistics. Individual and group conferences. (Former course 137.) GE credit: SocSci | SS.—Colombi

### **115. History of the Spanish Language (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 33, or consent of instructor; Linguistics 1 recommended. The Spanish language from its roots in spoken Latin to modernity. Emphasis on the close relationship between historical events and language change, and the role that literature plays in language standardization. Not open for credit to students who have completed course 115S. GE credit: ArtHum or SocSci | AH or SS.—Blake

### **115S. History of the Spanish Language (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 33, or consent of instructor; Linguistics 1 recommended. The Spanish language from its roots in spoken Latin to modernity. Emphasis on the close relationship between historical events and language change, and the role that literature plays in language standardization. Offered in a Spanish-speaking country under the supervision of a UC Davis faculty/lecturer. Not open for credit to students who have completed course 115. GE credit: ArtHum or SocSci | AH or SS.

### **116. Applied Spanish Linguistics (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 33, or consent of instructor; Linguistics 1 recommended. Exploration of the major theoretical and practical issues concerning learning Spanish as a second language. For students interested in teaching Spanish as a career. Not open to students who have taken course 116S. GE credit: SocSci | SS.—Blake, Colombi, Sánchez Gutiérrez

### **116S. Applied Spanish Linguistics (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 33, or consent of instructor; Linguistics 1 recommended. Exploration of the major theoretical and practical issues concerning learning Spanish as a second language. For students interested in teaching Spanish as a career. Offered in a Spanish speaking country, in Spanish, under the supervision of UC Davis faculty. Not open to students who have taken course 116. GE credit: SocSci | SS.—F. (F.) Colombi

### **117. Teaching Spanish as a Native Tongue in the U.S.: Praxis and Theory (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 24 or 33, or consent of instructor; Linguistics 1 recommended. Designed for students interested in teaching Spanish to native speakers. Focus on cultural diversity of the Spanish speaking population in the United States; applied language teaching methodologies in the context of teaching Spanish to native speakers at different levels. GE credit: OL.—Colombi

### **118. Topics in Spanish Linguistics (4)**

Lecture—3 hours; term paper. Prerequisite: course 111N or consent of instructor. A study of specialized topics in Spanish linguistics, for example: language and use; text and context; language and society; bilingualism; Spanish dialectology; syntax and semantics. May be repeated one time for credit when topic differs. GE credit: SocSci | SS.—F, W, S. (F, W, S.)

### **123. Creative Writing in Spanish (4)**

Discussion—4 hours. Prerequisite: course 24 or 33 or consent of instructor. Intensive writing of poetry or fiction in Spanish or in a bilingual (Spanish/English) format. Students will write both in prescribed forms and in experimental forms of their own choosing. GE credit: WE.

### **130. Survey of Spanish Literature to 1700 (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Survey of Spanish literature (narrative, poetry and drama) to 1700. Emphasis on the multicultural birth of the Spanish culture, the formation and growth of the Spanish language and letters through its written records and the literature of the early period. GE credit: ArtHum | AH, WC.—Martín

### **131N. Survey of Spanish Literature: 1700 to Present (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Survey of modern Spanish literature, providing an overview of main literary movements (romanticism, realism, naturalism, modernism, avant-garde). Emphasis on the philosophical and historical background and on the European context for modern Spanish literature. (Part of former courses 104A and 104B.) GE credit: SocSci | AH, WC.

### **132. Golden Age Drama and Performance (4)**

Lecture—1.5 hours; performance instruction—1.5 hours. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Limited enrollment. Golden Age drama: text and performance. Study of Spanish Baroque drama as performance art. Close reading of plays and related aspects of seventeenth-century theater: theatrical spaces, staging, performance, actors, public, language, costumes. Final project is performance of a play. May be repeated two times for credit. Offered in alternate years. GE credit: ArtHum | AH, VL, WC.—Martín, Slater

### **133N. Golden Age Literature of Spain (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Introduction to the study of the principal authors and literary movements of 16th and 17th-century Spain and Spanish American colonial literature. May be repeated three times for credit with consent of instructor. GE credit: ArtHum | AH, OL, WC, WE.—Martín, Slater

### **134A. Don Quijote I (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Critical interpretation of Don Quijote Part One by Cervantes. Focused study of key elements within the socio-cultural context of Golden Age Spain. Don Quijote as prototype for the modern novel. GE credit: ArtHum | AH, WC, WE.—Martín

### **134B. Don Quijote II (4)**

Lecture—3 hours; term paper. Prerequisite: course 134A. Critical interpretation of Don Quijote Part Two by Cervantes. Focused study of key elements within the socio-cultural context of Golden Age Spain. Don Quijote as prototype for the modern novel. GE credit: ArtHum | AH, WC, WE.—Martín

### **135N. Spanish Romanticism (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Romanticism as a philosophical concept, and as a literary movement in Spain, with emphasis on its distinctive, specific "romantic" qualities and its literary expression in five leading authors of the early nineteenth century. (Former course 114.) GE credit: ArtHum | AH, WC.

### **136N. The Spanish Novel of the 19th Century (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Literary realism in Spain, focusing on Leopoldo Alas (Clarín), Emilia Pardo Bazán and Benito Pérez Galdós unique characteristics of Spanish realism and its historical roots in Cervantes and the picaresque. GE credit: ArtHum | AH, WC, WE.

### **137N. Twentieth-Century Spanish Fiction (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Study of the main literary trends and authors of the modern Span-

ish novel and short story. Selected works by Unamuno, Valle-Inclán, Sender, Cela, Matute, Ayala and others. GE credit: ArtHum | AH, WC, WE.

### **138N. Modern and Contemporary Spanish Poetry (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Study of the main literary trends and authors of modern and contemporary Spanish poetry. Selected works by Machado, Juan Ramón Jiménez, García Lorca, Guillén, Aleixandre, Hernández Hierro and others. (Former course 120C.) Offered in alternate years. GE credit: ArtHum | AH, OL, WC.

### **139. Modern Spanish Theater (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Study of the main dramatic trends and playwrights of modern Spanish theater. Selected works by Valle Inclán, García-Lorca, Mihura, Buero-Vallejo, Arribal and others. Offered in alternate years. GE credit: ArtHum, Div | AH, WC.

### **140N. Modern Spanish Essay (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Ortega, Unamuno and the modern Spanish essay. Their concept of Spain and their relations with other movements and thinkers. GE credit: ArtHum | AH, WC, WE.

### **141. Introduction to Spanish Culture (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24, 24S, or 33. Introduction to history, geography and culture of Spain. Art, history of ideas, and everyday cultural manifestations. Introduction to critical reading and textual analysis. Not open for credit to students who have completed course 141S. GE credit: ArtHum, Div | AH, VL, WC.—González, Martínez-Carazo

### **141S. Introduction to Spanish Culture (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24, 24S, or 33. Introduction to history, geography and culture of Spain. Art, history of ideas, and everyday cultural manifestations. Introduction to critical reading and textual analysis. Offered in a Spanish speaking country under the supervision of UC Davis faculty. Not open for credit to students who have completed course 141. GE credit: ArtHum, Div | AH, VL, WC.—S. (S.) Martínez-Carazo

### **142. Special Topics in Spanish Cultural and Literary Studies (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Special topics in the study of Spanish literature and culture. May be repeated two times for credit. GE credit: ArtHum | AH, OL, WC, WE.—González, Martín, Martínez-Carazo, Slater

### **143. Spanish Art (4)**

Lecture—3 hours; term paper or discussion—1 hour. Spanish art and the different historical, sociological and political manifestations that frame it. History of art, including Paleolithic, Roman, Visigothic, Romanesque, Goth, Renaissance, Baroque, Neoclassic and Contemporary art. GE credit: ArtHum | AH, VL, WC.—S. (S., Su.) Martínez-Carazo

### **144. Topics in Spanish Cultural Studies (4)**

Lecture—3 hours; project. Prerequisite: course 24, 24S, or 33. Study of specific historical tendencies in Spanish culture(s) from the Romans to the present. Sources studied may include literature, film, art, journalism, and performance. Approaches to material may address issues of aesthetics, politics, identity, and globalization. May be repeated one time for credit. GE credit: ArtHum | AH, WC.—González, Martínez-Carazo

### **147. Anglos, Latinos and the Spanish Black Legend: The Origins and Educational Implications of Anti-Hispanic Prejudice (4)**

Lecture—3 hours; field work; term paper. Examination of Anti-Hispanic prejudice in the United States focusing on the "Black Legend," a 16th Century anti-Spanish myth underpinning the doctrine of "Manifest Destiny." Exploration of the Legend's presence in

contemporary American society through interviews and analysis of school textbooks. (Same course as Education 147.) GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, WE.—González

### **148. Cinema in the Spanish-Speaking World in Translation (4)**

Lecture—3 hours; film viewing—3 hours. Prerequisite: course 24 or 24S or 33. Analysis of the culture of the Spanish-speaking world through film in translation. Emphasis on the cultural information illustrated by the films; no prior knowledge of cinematography required. Films with subtitles. Not open for credit to students who have completed Spanish 148S. GE credit: ArtHum, Div | AH, VL, WC.—Martínez-Carazo

### **148S. Cinema in the Spanish-Speaking World in Translation (4)**

Lecture—3 hours; film viewing—3 hours. Prerequisite: course 24 or 33. Analysis of the culture of the Spanish-speaking world through film in translation. Emphasis on the cultural information illustrated by the films; no prior knowledge of cinematography required. Films with subtitles. Offered in a Spanish speaking country, in Spanish, under the supervision of UC Davis faculty. Not open for credit to students who have completed course 148. GE credit: ArtHum, Div | AH, VL, WC.—F. S. (F, S.)

### **149. Latin-American Literature in Translation (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: English 3 or the equivalent. Reading, lectures and discussions in English of works by Borges, Cortázar, Fuentes, García Márquez, Paz and others. May not be counted toward the major in Spanish. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Newcomb

### **150N. Survey of Latin American Literature to 1900 (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Latin American literature from preconquest texts and the chronicles of the Conquest to romanticism and modernism. Reading selections include fiction, poetry, drama and essays. GE credit: ArtHum | AH, WC.—Bernucci

### **151. Survey of Latin American Literature 1900 to Present (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Latin American literature from 1900 to the present. Reading selections include fiction, poetry, drama, essays, testimonio, etc. GE credit: ArtHum | AH, WC.—Bejel, Irwin, Lazzara, Peluffo

### **151N. Survey of Spanish-American Literature 1900 to Present (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100. Spanish-American literature from Modernism to the present. Reading selections include fiction, poetry, drama, and essays. (Former course 105B.) GE credit: ArtHum | AH, WC.—Bejel

### **153. Latin American Short Story (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. The evolution of the Latin American short story from the 19th century to the present. Emphasis on the contemporary period. GE credit: ArtHum | AH, WC.—Peluffo

### **154. Latin American Novel (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Evolution of the Latin American novel from the 19th century to the present. Emphasis on significant contemporary works. GE credit: ArtHum | AH, WC.—(W.) Bejel, Bernucci, Newcomb

### **155. Mexican Novel (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Evolution of the Mexican novel from the 19th century to the present. Emphasis on the narrative of the Revolution and significant contemporary works. GE credit: ArtHum | AH, WC.

### **156. Latin American Literature of the Turn of the 20th Century (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Modernism as an authentic expression of Latin American literature and its influence on 20th-century poetry and prose. In depth analysis of the works of Dávila and other major writers of the era. GE credit: ArtHum | AH, WC.—Peluffo

### **157. Great Works of Latin American Literature/Culture (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Study of major works of Latin American literature/culture and their cultural and literary milieus. May include novels, poetry, film, etc. Works may be analyzed in terms of style, influence, cultural significance, political importance, and/or commercial success. GE credit: ArtHum | AH, WC.—Bejel, Bernucci, Irwin, Lazzara, Peluffo

### **158. Latin American Poetry: From Vanguardism to Surrealism and Beyond (4)**

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Study of vanguardism, surrealism, and more recent movements of Latin American poetry. An in-depth analysis of the works of such major poets as Neruda, Vallejo, and Paz. GE credit: ArtHum | AH, WC.—Bejel, Bernucci

### **159. Special Topics in Latin American Literature and Culture (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: any one of the following: course 100, 100S, 141, 141S, 170 or 170S. Special topics in the study of Latin American literature and culture. May be repeated one time for credit when topic or subject differs; students may take any SPA 159 course two times total in combination. GE credit: ArtHum | AH, WC.—Peluffo

### **159S. Special Topics in Latin American Literature and Culture (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: any one of the following: course 100, 100S, 141, 141S, 170 or 170S. Special topics in the study of Latin American literature and culture. Offered in a Spanish speaking country under the supervision of UC Davis faculty. May be repeated one time for credit when topic or subject differs; students may take any SPA 159 course two times total in combination. GE credit: ArtHum | AH, WC.—F.

### **159Y. Special Topics in Latin American Literature and Culture (4)**

Web virtual lecture—3 hours; lecture/discussion—1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Special topics in the study of Latin American literature and culture. Hybrid format combining classroom instruction with technologically based materials. May be repeated one time for credit when topic or subject differs; students may take any Spanish 159 course two times total in combination. GE credit: ArtHum | AH, WC.—F, W, S, Su. (F, W, S, Su.) Bejel, Bernucci, Egan, Irwin, Lazzara, Peluffo, Lazarra

### **160. Latin American Women Writers in Translation (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Latin American women writers from the 19th and 20th centuries. Recent theoretical approaches to literature by women in Latin America. Discussions in English of works by Matto de Turner, Avellaneda, Storni, Ocampo, Agustini, Mistral, Castellanos, and others. GE credit: ArtHum, Div, Wrt | AH, WC.—Peluffo

### **170. Introduction to Latin American Culture (4)**

Lecture—3 hours; term paper. Prerequisite: course 24, 24S or 33. Introduction to history, geography and culture of Latin America. Multiple genres of cultural production and representation, with a focus on cultural diversity and regional difference. Introduction to critical reading and textual analysis. Not

open for credit for students who have completed course 170S. GE credit: ArtHum, Div | AH, VL, WC, WE.—F. (F.) Bejel, Irwin, Lazzara, Peluffo

### **170S. Introduction to Latin American Culture (4)**

Lecture—3 hours; project. Prerequisite: course 24, 24S or 33. Introduction to history, geography and culture of Latin America. Multiple genres of cultural production and representation, with a focus on cultural diversity and regional difference. Introduction to critical reading and textual analysis. Not open for credit for students who have completed course 170. GE credit: ArtHum, Div | AH, VL, WC, WE.—F. (F.) Colombi

### **171. Music from Latin America (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Examination of music from Latin America. Characteristic music (i.e. tango, bossa nova, salsa, musica motena, musica andina) as well as its implications in other musical genres. Taught in Spanish. Not open to students who taken course 171S or Music 127. (Same course as Music 127) May be repeated one time for credit when content differs. GE credit: ArtHum | AH, WC.—Irwin, Ortiz

### **171S. Music from Latin America (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Examination of music from Latin America. Characteristic music (i.e. tango, bossa nova, salsa, musica motena, musica andina) as well as its implications in other musical genres. Taught in Spanish and in a Spanish speaking country under the supervision of UC Davis faculty. Not open to students who have taken course 171 or Music 127. GE credit: ArtHum | AH, WC.

### **172. Mexican Culture (4)**

Lecture—3 hours; term paper or discussion—1 hour or term paper. Prerequisite: course 24, 24S or 33. Study of Mexican culture through a diversity of cultural expression, including elite, popular and mass media culture. Focus on national icons and archetypes, multiculturalism, transnationalism. May be repeated once for credit. GE credit: ArtHum, Div | AH, VL, WC.—Irwin

### **173. Cinema and Latin American Culture (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 24, 24S, or 33. Understanding Latin American cultures through cinema. History and critical analysis of Latin American film. Focus on a national cinematic tradition. Comparative experiences in different parts of Latin America and/or a particular era. Conducted entirely in Spanish. May be repeated one time for credit. GE credit: ArtHum, Div | AH, VL, WC.—Irwin

### **174. Chicano Culture (4)**

Lecture—3 hours; term paper/discussion—1 hour. Prerequisite: course 24 or 33. An interdisciplinary survey of Chicano culture. Topics include literature, art, folklore, oral tradition, music, politics, as well as everyday cultural manifestations. Conducted in Spanish. (Former course 124.) GE credit: ArtHum, Div | ACGH, AH, DD.

### **175. Topics in Spanish American Cultural Studies (4)**

Lecture—3 hours; project—1 hour. Prerequisite: course 24, 24S, or 33. Specific historical tendencies and issues in Latin American culture(s) from pre-columbian times to present. Studies of literature, film, art, journalism and performance. Focus on issues of aesthetics, politics, identity, and globalization. May be repeated once for credit if content differs. GE credit: ArtHum, Div | AH, VL, WC, WE.—Bejel, Irwin, Peluffo, Lazzara

### **176. Literature in Spanish Written in the United States (4)**

Lecture—3 hours; term paper. Prerequisite: course 24 or 33. Survey of the literary and cultural contributions of the main Spanish-speaking populations present in the U.S.: Chicanos, Puerto Ricans, Cuban-Americans, Central Americans, and other Latinos. GE credit: ArtHum, Div | ACGH, AH, DD.—Alarcón

### **177. California and Latin America (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 24, 24S or 33. Interdisciplinary survey on the relationship between California and Latin America (1500s-present). Latin American representations of California and Californian representations of Latin America, as well as borderlands texts, with a special focus on Mexican-American perspectives. Conducted in Spanish. GE credit: ACGH, DD.—Irwin

### **178A. Spanish for the Professions (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 24, 24S or 33. For students with an advanced level of Spanish interested in the use of Spanish in the health care, legal and law enforcement and marketing and business professions. Field trips documenting the use of Spanish in the public context. GE credit: ArtHum or SocSci | AH or SS, DD, OL, WE.—Colombi

### **179. Science and Politics of the Human Body in the Spanish-Speaking World (4)**

Lecture—3 hours; term paper or discussion—1 hour. Interaction between the interpretations of scientific ideas, philosophical issues, and politics concerning the human body in the Spanish-speaking world through different historical periods. Not open to students who have taken equivalent course 179Y. GE credit: ArtHum or SciEng or SocSci | AH or SE or SS.—F, W, S. (F, W, S.) Bejel, Slater

### **179Y. Science and Politics of the Human Body in the Spanish-Speaking World (4)**

Web virtual lecture—2 hours; discussion—2 hours. Interaction between the interpretations of scientific ideas, philosophical issues, and politics concerning the human body in the Spanish-speaking world through different historical periods. Not open to students who have taken equivalent course 179. GE credit: ArtHum or SciEng or SocSci | AH or SE or SS.—F, W, S. (F, W, S.) Bejel, Slater

### **180. Senior Seminar in Spanish Linguistics (4)**

Seminar—3 hours; term paper. Prerequisite: senior standing; a major in Spanish or consent of instructor. Limited enrollment. Group study of a special topic drawn from Spanish linguistics. May be repeated one time for credit. GE credit: ArtHum or SocSci | AH or SS, OL, WE.—Blake, Bradley, Colombi

### **181. Senior Seminar in Spanish Literature/Culture (4)**

Seminar—3 hours; term paper—1 hour. Prerequisite: senior standing; a major in Spanish or consent of instructor. Limited enrollment. Group study of a special topic drawn from Spanish literary or cultural studies. Independent research project. May be repeated one time for credit if content differs. GE credit: ArtHum | AH, OL, WE.—González, Martin, Martínez-Carazo, Slater

### **182. Senior Seminar in Latin American Literature/Culture (4)**

Seminar—3 hours; term paper—1 hour. Prerequisite: senior standing; a major in Spanish or consent of instructor. Limited enrollment. Group study of a special topic drawn from Latin American literary or cultural studies. Independent research project. May be repeated one time for credit if content differs. GE credit: ArtHum | AH, OL, WC, WE.—Bejel, Irwin, Lazzara, Peluffo

### **192I. Internship in Spanish (1-12)**

Independent study—3-36 hours. Prerequisite: course 23; junior standing; major in Spanish, Chicano Studies, or a related field; consent of instructor. Internships in fields where Spanish language skills can be used and perfected (teaching, counseling, translating-interpreting). May be repeated up to 8 units for credit. Units will not count toward the Spanish major. (P/NP grading only.)—F, W, S. (F, W, S.)

### **194H. Special Study for Honors Students (1-5)**

Independent Study—3-15 hours. Prerequisite: Senior standing and qualification for the Spanish honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on

a topic in Spanish literature, civilization, or language studies. May be repeated for up to 8 units of credit. (P/NP grading only.) GE credit: AH, WC, WE.—F, W, S. (F, W, S.)

### **197T. Tutoring in Spanish (1-4)**

Tutorial—1-4 hours. Prerequisite: upper division standing and permission of the chair. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)—F, W, S. (F, W, S.)

### **197TC. Tutoring in the Community (2-4)**

Tutorial—2-4 hours. Prerequisite: upper division standing and permission of the chair. Tutoring in public schools under the guidance of a regular teacher and supervision by a departmental faculty member. May be repeated for credit for a total of 6 units. (P/NP grading only.)—F, W, S. (F, W, S.)

### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor and Department Chairperson. (P/NP grading only.) GE credit: AH, WC, WE.—F, W, S. (F, W, S.)

### **199. Special Study for Advanced Undergraduates (1-5)**

May be repeated for up to 6 units of credit (P/NP grading only.) GE credit: AH, WC, WE.—F, W, S. (F, W, S.)

## **Graduate**

### **201. Literary Theory I (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Basic theories and practical approaches to modern and contemporary Hispanic literature. Emphasis on formalism, poststructuralism, socio-cultural discourses, and ideologies.—Bejel

### **202. Literary Theory II (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Major contemporary critical theories including recent, innovative approaches to Hispanic literature and culture. Readings from Semiotics and Deconstructionism to Psychological and Socio-ideological approaches. Emphasis on Postmodern and Neo-colonial discourse.—Bejel, Martín

### **203. Research Methodologies (1)**

Seminar—2 hour. Introduction to the range of scholarly research methodologies currently being realized in Spanish linguistics, literary and cultural studies: archival research, textual analysis, discourse analysis, statistics for linguistics, etc.; introduction to scholarly writing (MLA style) and scholarly publishing. (S/U grading only.)—Bejel, Bernucci, Blake, Carazo, Colombi, Irwin, Martín, Martinez-Lazzara, Newcomb, Peluffo

### **205. Spanish Phonology (4)**

Seminar—3 hours; term paper. Prerequisite: some knowledge of phonetics is required and consent of instructor; Linguistics 109 and 139 highly recommended. Analyzes the sound patterns of Spanish from both linear and non-linear perspectives. Students will develop a clear understanding of what phonology is and the nature of Spanish phonology, as defined by modern linguistic analysis.—Bradley

### **206. Spanish Syntax (4)**

Seminar—3 hours; term paper. Prerequisite: Linguistics 140 and 165. An examination of Spanish word order within the framework of general linguistic theory. The student will investigate how to write a grammar of Spanish with particular attention to the structure of noun and verb clauses.—Blake

### **207. History of the Spanish Language (4)**

Seminar—3 hours; term paper. Prerequisite: Latin 1. (Former course 220A.)—Blake

### **208. Old Spanish Texts (4)**

Seminar—3 hours; term paper. Prerequisite: course 207. An in-depth linguistic examination of Old Spanish texts from the 12th to the 15th centuries, with particular attention to the significance of orthographic changes.—Blake

**211. Hispanic Dialectology (4)**

Seminar—3 hours; term paper. Prerequisite: course 220 or consent of instructor. Descriptive and historical study of the distinctive features of Peninsular and American Spanish dialects. (Former course 221.)

**212. Applied Linguistics (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing and courses 215 and 216 recommended. Focuses on the relevant linguistic aspects of teaching Spanish. Designed for graduate students who have an interest in second-language learning and teaching.—Blake, Colombe

**215. Special Topics in Hispanic Linguistics (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor; courses 205 and 206 recommended. Specialized topics in Hispanic linguistics (e.g., pragmatics, sociolinguistics, topics in syntax, semantics, or diachronic studies). May be repeated for credit when topic differs.—Blake, Bradley, Colombe, Sánchez Gutiérrez

**220. Catalan Language and Culture (4)**

Lecture/discussion—3 hours; laboratory—1 hour. Prerequisite: good command of Spanish, Portuguese, French or Italian and graduate level of studies in any of these languages; consent of instructor. Open to advanced undergraduate students, with notions of Catalan, can be admitted with consent of instructor; designed for graduate students. Foundation for the acquisition of Catalan oral, reading and elementary writing level skills for students of Spanish (Iberianists or Hispanists), with the capacity to interpret educated written language. Emphasis on weekly review of grammar and all language skills.

**222. Critical Approaches to Spanish Literature I: Prose and Essay (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Critical approaches to Spanish narrative and essay. May be repeated two times for credit when topic differs.—Martín

**223. Critical Approaches to Spanish Literature II: Poetry and Drama (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Critical approaches to Spanish poetry and drama. May be repeated two times for credit when topic differs.—Martín

**224. Studies of a Major Writer, Period, or Genre in Spanish Literature (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Artistic development of a major Spanish writer and his/her intellectual and literary milieu or study of a special topic, period, or genre. May be repeated for credit with consent of instructor.—Slater

**231. Interamerican Studies (4)**

Seminar—3 hours; term paper. Survey of methodologies of investigation for crosscultural or comparative projects in the geographical context of the Americas. Focus on particular problems of language, discipline, national definitions, and global hierarchies of knowledge that complicate such projects. Readings of interamerican cultural texts.—Irwin

**252. Medieval Spanish Literature: Prose (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. An exploration of the major genres of Medieval Spanish prose from its origins to 1450.

**253. Medieval Spanish Literature: Epic (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Medieval Spanish epic narratives. Major theoretical perspectives on the genesis, diffusion, and character of the Medieval epic. Relationship of epic to ballad literature.

**254. Medieval Hispanic Lyric (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Analysis of the most representative lyric poetry in the various Peninsular languages and in Provencal, troubadour poetry, kharijas, villancicos, cantigas de amigo, and courtly lyric.

**255. Spanish Literature of the Early Renaissance (4)**

Seminar—3 hours; term paper. Spanish Literature, 1450-1550, with emphasis on *La Celestina*. (Former course 229.)—Martín

**256. Spanish Literature of the Renaissance and Golden Age: Poetry (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Extensive critical study of the main currents of Renaissance and Baroque Spanish poetry through its language structures, styles ("Culturismo-Conceptismo"), rhetorical devices, myths, and themes (love, death, time).—Martín

**257. Spanish Literature of the Renaissance and Golden Age: Drama (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. An exploration of major 16th and 17th century literary and cultural developments through the study of selected dramas.—Martín

**258. Spanish Literature of the Renaissance and Golden Age: Prose (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. The origins and development of the Spanish novel during the Renaissance and the Spanish Golden Age.—Martín, Slater

**259. Cervantes and the Novel (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. The narrative works of Miguel de Cervantes with special emphasis on *Don Quijote*.—Martín

**260. Modern Spanish Literature (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics of Spanish literature, from 1700-1920.

**261. Contemporary Spanish Literature: Poetry (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Critical analysis of modern Spanish poetry from a wide spectrum of poetic currents.

**262. Contemporary Spanish Literature: Narrative (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of the 20th-century novel and short story with emphasis on the avant-garde, existentialism, social realism, and postmodern trends. May be repeated two times for credit when topic differs and with consent of instructor.—Martínez-Carazo

**263. Contemporary Spanish Literature: Drama (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. The Spanish theatrical production of the last 70 years.

**264. Contemporary Spanish Literature: Essay (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Major thinkers from Ganivet to Unamuno and Ortega y Gasset. Emphasis will be placed on the relationships between Spanish thought and European philosophical currents.

**265. Women Writers of Spain (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Introduction to the development of a feminine consciousness in the Spanish contemporary literary scene. Selected texts represent particularly innovative typologies of feminine discourse in the realm of the historical, psychoanalytical, and metafictional, erotic, and allegorical fiction.

**272. Critical Approaches to Latin American Literature: Narrative (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Development of Latin American literary periods and currents in narrative (novel, short story, and essay), from early colonial times to the present. May be repeated two times for credit, if material changes.—F. Bejel, Bernucci, Lazzara, Peluffo

**273. Critical Approaches to Latin American Literature: Poetry and Drama (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Development of Latin American literary periods and currents in poetry and drama, from early Colonial times to the present. May be repeated two times for credit when topic differs.—Bejel, Bernucci, Egan

**274. Studies of a Major Writer, Period, or Genre in Latin American Literature (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Artistic development of a major Latin American writer and his/her intellectual and literary milieu or study of a special topic, period, or genre. May be repeated for credit.—Bejel, Bernucci, Irwin, Lazzara, Peluffo

**275. Colonial Literature (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing and consent of instructor. An examination of pre-Hispanic and Colonial narrative, poetry and theatre. Emphasis on historical, anthropological, and ethnographic approaches to Colonial discourse.

**276. Twentieth-Century Latin American Drama (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Major Latin American dramatists from Florencio Sánchez to the present. (Former course 240.)

**277. Latin American Novel, 1900-1950 (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of main trends and key authors in Latin America in the first half of the 20th century. (Former course 241A.)—Bernucci

**278. New Trends in Latin American Fiction (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Recent developments in Latin American narrative. Emphasis on innovative language and structure. (Former course 241B.)—Lazzara

**279. Mexican Narrative (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of the evolution of Mexican narrative. Emphasis on the narrative of the Revolution and significant contemporary works.

**280. Latin American Short Story (4)**

Seminar—3 hours; term paper. Works by major writers with emphasis on 20th-century authors such as Quiroga, Borges, García Márquez, Cortázar, and Rulfo. (Former course 243.)—Bernucci

**281. Latin American Women Writers (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of feminist critical theories, gender construction, and self-representation within the history of socio-cultural changes in Latin America.—Peluffo

**282. Dario and Modernism (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of poetry and prose of Spanish-American Modernism (1880-1916). (Former course 245.)

**283. New Directions in Latin American Poetry (4)**

Seminar—3 hours; term paper. New trends in Latin American poetry. Offered in alternate years.—(S.) Egan

**284. The Latin American Essay (4)**

Seminar—3 hours; term paper. Major Latin American essayists from Sarmiento to contemporary essayists.

**285. Multicultural Approaches to Cuban Literature and Culture (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of main trends in Cuban literature. Emphasis on historical, geographic, social and cultural context (including music and film). Course taught in English with some readings in Spanish.—Bejel

**291. Foreign Language Learning in the Classroom (4)**

Seminar—3 hours; project. Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in classroom practices across commonly taught foreign languages. (Same course as French 291 and German 291.)—Blake, Bradley, Colombi

**298. Group Study (1-5)**

Prerequisite: graduate standing and consent of instructor. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**299. Research (1-12)**

(S/U grading only.)—F, W, S. (F, W, S.)

**Professional****300. The Teaching of Spanish (3)**

Lecture—3 hours. Prerequisite: senior or graduate standing; a major or minor in Spanish.

**390. The Teaching of Spanish in College (4)**

Lecture—2 hours; discussion—2 hours. Prerequisite: graduate standing. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of graduate teaching assistants.

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## Statistics

(College of Letters and Science)

Thomas Lee, Ph.D., Chairperson of the Department

**Department Office.** 4118 Mathematical Sciences Building  
530-752-2361; <http://www.stat.ucdavis.edu>

**Faculty**

Ethan Anderes, Ph.D., Associate Professor

Alexander Aue, Ph.D., Associate Professor

Prabir Burman, Ph.D., Professor

Hao Chen, Ph. D, Assistant Professor

Christiana Drake, Ph.D., Professor

Cho-Jui Hsieh, Ph.D., Assistant Professor

Fushing Hsieh, Ph.D., Professor

Jiming Jiang, Ph.D., Professor

Thomas Lee, Ph.D., Professor

Miles Lopes, Ph.D., Assistant Professor

Xiaodong Li, Ph.D., Assistant Professor

Hans-Georg Müller, M.D., Ph.D., Professor

Debashis Paul, Ph.D., Associate Professor

Jie Peng, Ph.D., Professor

Wolfgang Polonik, Ph.D., Professor

James Sharpnack, Ph.D., Assistant Professor

Duncan Temple Lang, Ph.D., Professor

Jane-Ling Wang, Ph.D., Professor

**Emeriti Faculty**

Rudolph Beran, Ph.D., Professor Emeritus

P.K. Bhattacharya, Ph.D., Professor Emeritus

Yue-Pok (Ed) Mack, Ph.D., Professor Emeritus

George G. Roussas, Ph.D., Professor Emeritus

Francisco J. Samaniego, Ph.D., Professor Emeritus

Robert H. Shumway, Ph.D., Professor Emeritus

Alvin D. Wiggins, Ph.D., Professor Emeritus

**Affiliated Faculty**

Rahman Azari, Ph.D., Lecturer

**The Major Program**

Statistics enables us to make inferences about entire populations, based on samples extracted from those populations. Statistical methods can be applied to problems from almost every discipline and they are vitally important to researchers in agricultural, biological, environmental, social, engineering, and medical sciences.

**The Program.** Statistics majors may receive either a Bachelor of Arts or a Bachelor of Science degree. The B.S. degree program has three options: General

Option, Applied Statistics Option, and Computational Statistics Option. Both the A.B. and the B.S. programs require theoretical and applied course work and underscore the strong interdependence of statistical theory and the applications of statistics.

**B.S. in Statistics-General Option** emphasizes statistical theory and is especially recommended as preparation for graduate study in statistics.

**B.S. in Statistics-Applied Statistics Option** emphasizes statistical applications. This major is recommended for students who do not plan to pursue graduate studies in statistics and those who are interested in combining the statistics study with a second major or minor program in the social and life sciences.

**B.S. in Statistic-Computational Statistics Option**

Option emphasizes computing. This major is recommended for students interested in the computational and data management aspects of statistical analysis.

**A.B. in Statistics-Applied Statistics Option** emphasizes statistical applications. This major is recommended for students who do not plan to pursue graduate studies in statistics and those who are interested in combining the statistics study with a second major or minor program in the social sciences or who wish to pursue a Bachelor of Arts degree.

**Career Alternatives.** Probability models and statistical methods are used in great many fields, including the biological and social sciences, business and engineering. The wide applicability of statistics has created in both the public and private sectors a strong demand for graduates with statistical training. Employment opportunities include careers in data and policy analysis in government, financial management, quality control, insurance and health care industry, actuarial work, engineering, public health, biological and pharmaceutical research, law, and education. Some students have entered advanced studies in statistics, economics, psychology, medicine and other professional school programs.

**A.B. Major Requirements:****Preparatory Subject Matter .....19-23**

Mathematics 16A, 16B, 16C; or 17A, 17B, 17C; or 21A, 21B, 21C.....	9-12
Mathematics 22A.....	3
Computer Science Engineering 30 or Computer Science Engineering 40 (or the equivalent) .....	4
Statistics 32 .....	3-4

**Depth Subject Matter .....45-48**

Statistics 106, 108, 138 or the equivalent .....	12
Statistics 130A, 130B.....	8
Statistics 137 or 141 .....	4
Three courses from: Statistics 104, 135, 137, 141, 142, 144, 145 .....	12
Related elective courses .....	9-12

Three upper division courses approved by major adviser; they should follow a coherent sequence in a single discipline in the social sciences where statistical methods and models are applied and should cover the quantitative aspects of the discipline.

**Total Units for the Major .....64-71****B.S. Major Requirements:****General Statistics Track****Preparatory Subject Matter .....30-32**

Mathematics 21A, 21B, 21C, 21D .....	16
Mathematics 22A or 67 .....	3-4
Mathematics 25 .....	4
Computer Science Engineering 30 or Computer Science Engineering 40 (or the equivalent) .....	4
Any one introductory statistics course except Statistics 10 .....	3-4

**Depth Subject Matter .....51-52**

Statistics 106, 108, 138 .....	12
Statistics 131A, 131B, 131C .....	12
Three courses from: Statistics 104, 135, 137, 141, 142, 144, 145 .....	12
Mathematics 125A, 108 or 125B, and 167 .....	12
Related elective courses .....	3-4

One upper division course approved by major adviser; it should be in mathematics, computer science or in quantitative aspects of a substantive discipline.

**Total Units for the Major .....81-84****Applied Statistics Track****Preparatory Subject Matter .....26-31**

Mathematics 16A, 16B, 16C; or 17A, 17B, 17C; or 21A, 21B, 21C (21 series recommended).....	9-12
Mathematics 22A .....	3
Computer Science Engineering 30 or Computer Science Engineering 40 (or the equivalent) .....	4
Two introductory courses serving as the prerequisites to upper division courses in a chosen discipline to which statistics is applied.....	7-8
Any one introductory statistics course except Statistics 10.....	3-4

**Depth Subject Matter .....51-56**

Statistics 106, 108, 138, 141 .....	16
Statistics 130A, 130B.....	8
Three courses selected from Statistics 104, 135, 137, 142, 144, 145 .....	12
Five upper division elective courses outside of Statistics.....	15-20
Electives are chosen with and must be approved by the major adviser. Electives should follow a coherent sequence in one single discipline where statistical methods and models are applied: at least three of them should cover the quantitative aspects of the discipline.	

**Total Units for the Major .....77-87****Computational Statistics Track****Preparatory Subject Matter .....30-31**

Mathematics 21A, 21B, 21C, 21D .....	16
Mathematics 22A .....	3
Computer Science Engineering 30 and 40 .....	8
Any one introductory statistics course except Statistics 10.....	3-4

**Depth Subject Matter .....52**

Statistics 106, 108, 141 .....	12
Statistics 131A, 131B .....	8
Two courses from: Statistics 104, 135, 137, 138, 142, 144, 145 .....	8
Programming, Data Management & Data Technologies: Computer Science Engineering 130 or 145; and 165A or 166 .....	8
Two courses on Scientific Computational Algorithm and Visualization from: Computer Science Engineering 122A, 129, 140A, 158, 163 .....	8
Two courses from: Mathematics 124, 128A, 128B, 129, 145, 148, 160, 165, 167, 168 .....	8

**Total Units for the Major .....82-83****Major Adviser.** A. Aue

Students are encouraged to meet with an adviser to plan a program as early as possible. Sometime before or during the first quarter of the junior year, students planning to major in Statistics should consult with a faculty adviser to plan the remainder of their undergraduate programs.

**Minor Program Requirements:**

The Department offers a minor program in Statistics that consists of five upper division level courses focusing on the fundamentals of mathematical statis-

tics and of the most widely used applied statistical methods.

## UNITS

**Statistics.....20**

Statistics 106, 108, and 130A-130B or 131A-131B .....16

One course from: Statistics 104, 135, 137, 138, 141, 142, 144, 145 .....4

**Preparation.** Statistics 13 or 32 or 100 or 102.

**Graduate Study.** The Graduate Program in Statistics offers study and research leading to the M.S. and Ph.D. degrees in Statistics, including a Ph.D. in Statistics with a Biostatistics Track. Detailed information concerning these degree programs, as well as information on admissions and on financial support, is available from the Department of Statistics.

**Graduate Adviser.** Debasish Paul

**Statistical Consulting.** The Department provides a consulting service for researchers on campus. For more information, call the Statistical Laboratory office 530-752-6096.

**Integrated B.S./M.S. Degree****Program**

The Department offers undergraduate majors a path into the Statistics M.S. program through the Integrated Degree Program (I.D.P.). This program is intended for students who seek to be employed as statisticians in government or industry. The minimum major GPA requirement is 3.200 at the end of the junior year, although students with demonstrated excellence in academic work (with a major GPA of 3.500 or above) are most likely to be admitted. Before moving into the graduate phase, I.D.P. students must satisfy all requirements of the B.S. degree.

To apply for the I.D.P., undergraduate students must submit the Statistics I.D.P. form along with supporting documents during the last quarter of their junior year, to enter the I.D.P. in the first quarter of their senior year. In addition, applicants must submit an application to the M.S. program during the senior year, prior to the deadline of the MS application. Students with a major GPA of 3.500 or above may waive the GRE requirement in the M.S. application. Before applying to the I.D.P., students are strongly advised to consult with both the undergraduate and graduate advisers.

Once a student enters the graduate phase of the I.D.P., they follow the course requirements for the Master's degree (36 units, 18 of which are graduate level). A maximum of 6 units taken in the undergraduate phase can be transferred to the M.S. provided they have not been used to satisfy any requirements of the B.S. degree.

**Courses in Statistics (STA)****Lower Division****10. Statistical Thinking (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: two years of high school algebra. Statistics and probability in daily life. Examines principles of collecting, presenting and interpreting data in order to critically assess results reported in the media; emphasis is on understanding polls, unemployment rates, health studies; understanding probability, risk and odds. GE credit: SciEng or SocSci, Wrt | QL, SE.—F. (F.)

**12. Introduction to Discrete Probability (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: two years of high school algebra. Random experiments; countable sample spaces; elementary probability axioms; counting formulas; conditional probability; independence; Bayes theorem; expectation; gambling problems; binomial, hypergeometric, Poisson, geometric, negative binomial and multinomial models; limiting distributions; Markov chains. Applications in the social, biological, and engineering sciences. Offered in alternate years. GE credit: SciEng | QL, SE.

**13. Elementary Statistics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: two years of high school algebra or Mathematics D. Descriptive statistics; basic probability concepts; binomial, normal, Student's t, and chi-square distributions. Hypothesis testing and confidence intervals for one and two means and proportions. Regression. Not open for credit to students who have completed course 13V or higher. GE credit: SciEng | QL, SE.—F, W, S, Su. (F, W, S, Su.)

**13Y. Elementary Statistics (4)**

Lecture—1.5 hours; web virtual lecture—5 hours. Prerequisite: two years of high school algebra or Mathematics D. Descriptive statistics; basic probability concepts; binomial, normal, Student's t, and chi-square distributions. Hypothesis testing and confidence intervals for one and two means and proportions. Regression. Not open for credit for students who have completed course 13, or higher. GE credit: SciEng | QL, SE.

**32. Introductory Statistical Analysis Through Computers (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: Mathematics 16B or 17C or 21B; ability to program in a high-level programming language. Probability concepts: Events and sample spaces; random variables; mass, density and distribution functions; parametric families; parameter estimation and confidence intervals; hypothesis testing; Central Limit Theorem. Recommended as alternative to course 13 for students with a background in calculus and programming. Only two units of credit allowed to students who have taken course 13, or 102; not open for credit to students who have taken course 100. GE credit: SciEng | QL, SE.—W, S. (W, S.)

**90X. Seminar (1-2)**

Seminar—1-2 hours. Prerequisite: high school algebra and consent of instructor. Examination of a special topic in a small group setting.

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division****100. Applied Statistics for Biological Sciences (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: Mathematics 16B or 17C or 21B. Descriptive statistics, probability, sampling distributions, estimation, hypothesis testing, contingency tables, ANOVA, regression; implementation of statistical methods using computer package. Only two units credit allowed to students who have taken courses 13, 32 or 103; not open for credit to students who have taken course 102. GE credit: SciEng | QL, SE.—F, W, S, Su. (F, W, S, Su.)

**101. Advanced Applied Statistics for the Biological Sciences (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 100. Basic experimental designs, two-factor ANOVA without interactions, repeated measures ANOVA, ANCOVA, random effects vs. fixed effects, multiple regression, basic model building, resampling methods, multiple comparisons, multivariate methods, generalized linear models, Monte Carlo simulations. GE credit: SciEng | SE, QL.—S. (S.)

**103. Applied Statistics for Business and Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 13, 32, or 100; and Mathematics 16B or 17C or 21B. Descriptive statistics; probability; random variables; expectation; binomial, normal, Poisson, other univariate distributions; joint distributions; sampling distributions, central limit theorem; properties of estimators; linear combinations of random variables; testing and estimation; Minitab computing package. Two units credit given to students who have completed course 100. GE credit: SciEng | QL, SE.—F, W, S, Su. (F, W, S, Su.)

**104. Applied Statistical Methods:****Nonparametric Statistics (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 13, 32, or 100. Sign and Wilcoxon tests, Walsh averages. Two-sample procedures. Inferences concerning scale. Kruskal-Wallis test. Measures of association. Chi square and Kolmogorov-Smirnov tests. Offered in alternate years. GE credit: SciEng | QL, SE.—S. (S.)

**106. Applied Statistical Methods: Analysis of Variance (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 13 or 32 or 100. Basics of experimental design. One-way and two-way fixed effects analysis of variance models. Randomized complete and incomplete block design. Multiple comparisons procedures. One-way random effects model. GE credit: SciEng | SE.—F, W, S, Su. (F, W, S, Su.)

**108. Applied Statistical Methods: Regression Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 13, 32, or 100. Simple linear regression, variable selection techniques, stepwise regression, analysis of covariance, influence measures, computing packages. GE credit: SciEng | QL, SE, SL.—F, W, S, Su. (F, W, S, Su.)

**130A. Mathematical Statistics: Brief Course (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 16B or 17C or 21B. Basic probability, densities and distributions, mean, variance, covariance, Chebychev's inequality, some special distributions, sampling distributions, central limit theorem and law of large numbers, point estimation, some methods of estimation, interval estimation, confidence intervals for certain quantities, computing sample sizes. Only 2 units of credit allowed to students who have taken course 131A. GE credit: SciEng | QL, SE.—F. (F.)

**130B. Mathematical Statistics: Brief Course (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 130A or 131A or Mathematics 135A. Transformed random variables, large sample properties of estimates. Basic ideas of hypotheses testing, likelihood ratio tests, goodness-of-fit tests. General linear model, least squares estimates, Gauss-Markov theorem. Analysis of variance, F-test. Regression and correlation, multiple regression. Selected topics. GE credit: SciEng | QL, SE.—W. (W.)

**131A. Introduction to Probability Theory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 21B, 21C and 22A. Fundamental concepts of probability theory, discrete and continuous random variables, standard distributions, moments and moment-generating functions, laws of large numbers and the central limit theorem. Not open for credit to students who have completed Mathematics 135A. GE credit: SciEng | QL, SE.—F, S. (F, S.)

**131B. Introduction to Mathematical Statistics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 131A or consent of the instructor. Sampling, methods of estimation, sampling distributions, confidence intervals, testing hypotheses, linear regression, analysis of variance, elements of large sample theory and nonparametric inference. GE credit: SciEng | QL, SE.—W. (W.)

**131C. Introduction to Mathematical Statistics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 131B or consent of the instructor. Sampling, methods of estimation, sampling distributions, confidence intervals, testing hypotheses, linear regression, analysis of variance, elements of large sample theory and nonparametric inference. GE credit: SciEng | SE, QL.—S. (S.)

**135. Multivariate Data Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 130B or 131B; and Mathematics 22A or 67. Multivariate normal distribution; Mahalanobis distance; sampling distributions of the mean vector and

covariance matrix; Hotelling's T<sup>2</sup>; simultaneous inference; one-way MANOVA; discriminant analysis; principal components; canonical correlation; factor analysis. Intensive use of computer analyses and real data sets. GE credit: SciEng | QL, SE. —W, S. (W, S.)

### **137. Applied Time Series Analysis (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 108. Time series relationships; univariate time series models: trend, seasonality, correlated errors; regression with correlated errors; autoregressive models; autoregressive moving average models; spectral analysis: cyclical behavior and periodicity, measures of periodicity, periodogram; linear filtering; prediction of time series; transfer function models. GE credit: SciEng | QL, SE. —F, W. (F, W.)

### **138. Analysis of Categorical Data (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 130B or 131B, or courses 106 and 108. Varieties of categorical data, cross-classifications, contingency tables, tests for independence. Multidimensional tables and log-linear models, maximum likelihood estimation; tests of goodness-of-fit. Logit models, linear logistic models. Analysis of incomplete tables. Packaged computer programs, analysis of real data. GE credit: SciEng | QL, SE. —F, W. (F, W.)

### **141. Statistical Computing (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: one introductory class in Statistics (such as 13, 32, 100, or 102), or the equivalent. Organization of computations to access, transform, explore, analyze data and produce results. Concepts and vocabulary of statistical/scientific computing. GE credit: SciEng | QL, SE. —F. (F.)

### **141A. Fundamentals of Statistical Data Science (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or course 13 or course 32 or course 100. Introduction to computing for data analysis and visualization, and simulation, using a high-level language (e.g., R). Computational reasoning, computationally intensive statistical methods, reading tabular and non-standard data. open for credit to students who have taken course 141 or course 242. —F. (F.)

### **141B. Data & Web Technologies for Data Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 141A or Engineering: Computer Science 145. Essentials of using relational databases and SQL. Processing data in blocks. Scraping Web pages and using Web services/APIs. Basics of text mining. Interactive data visualization with Web technologies. Computational data workflow and best practices. Statistical methods. —W. (W.)

### **141C. Big Data & High Performance Statistical Computing (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 141A or Engineering: Computer Science 40. High-performance computing in high-level data analysis languages; different computational approaches and paradigms for efficient analysis of big data; interfaces to compiled languages; R and Python programming languages; high-level parallel computing; MapReduce; parallel algorithms and reasoning. —S. (S.)

### **144. Sampling Theory of Surveys (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 130B or 131B; or courses 106 and 108. Simple random, stratified random, cluster, and systematic sampling plans; mean, proportion, total, ratio, and regression estimators for these plans; sample survey design, absolute and relative error, sample size selection, strata construction; sampling and nonsampling sources of error. Offered in alternate years. GE credit: SciEng | QL, SE. —S.

### **145. Bayesian Statistical Inference (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: courses 130B or 131B. Subjective probability, Bayes Theorem, conjugate priors, non-informative priors, estimation, testing, prediction, empirical Bayes methods, properties of Bayesian procedures, comparisons with classical procedures, approxima-

tion techniques, Gibbs sampling, hierarchical Bayesian analysis, applications, computer implemented data analysis. Offered in alternate years. GE credit: SciEng | QL, SE. —W. S. (W, S.)

### **160. Practice in Statistical Data Science (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 106; course 108; course 130B or course 131B; course 141 or course 141A. Principles and practice of interdisciplinary, collaborative data analysis; complete case study review and team data analysis project. GE credit: SciEng | QL, SE. —S. (S.)

### **190X. Seminar (1-2)**

Seminar—1-2 hours. Prerequisite: course 13, 32, 100, or 103. In-depth examination of a special topic in a small group setting. —F, W, S. (F, W, S.)

### **192. Internship in Statistics (1-12)**

Internship—3-36 hours; term paper. Prerequisite: upper division standing and consent of instructor. Work experience in statistics. (P/NP grading only.)

### **194HA-194HB. Special Studies for Honors Students (4-4)**

Independent study—12 hours. Prerequisite: senior qualifying for honors. Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.

### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

### **Graduate**

#### **200A. Introduction to Probability Theory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 21A, 21B, 21C, and 22A; consent of instructor. Fundamental concepts of probability theory, discrete and continuous random variables, standard distributions, moments and moment-generating functions, laws of large numbers and the central limit theorem. No credit to students who have taken course 131A. GE credit: SciEng | QL, SE. —F, W, S. (F, W, S.)

#### **200B. Introduction to Mathematical Statistics I (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A or the consent of the instructor. Sampling, methods of estimation, bias-variance decomposition, sampling distributions, Fisher information, confidence intervals, and some elements of hypothesis testing. No credit to students who have taken course 131B. GE credit: SciEng | SE. —W, S. (W, S.)

#### **200C. Introduction to Mathematical Statistics II (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200B or consent of the instructor. Testing theory, tools and applications from probability theory, Linear model theory, ANOVA, goodness-of-fit. GE credit: No credit to students who have taken course 131C. SciEng | SE. —S. (S.)

#### **201. SAS Programming for Statistical Analysis (3)**

Lecture—2 hours; discussion/laboratory—1 hour. Prerequisite: introductory, upper-division Statistics course; some knowledge of vectors and matrices; courses 106 or 108 or the equivalent suggested. Introductory SAS language, data management, statistical applications, methods. Includes basics, graphics, summary statistics, data sets, variables and functions, linear models, repetitive code, simple macros, GLIM and GAM, formatting output, correspondence analysis, bootstrap. Prepare SAS base programmer certification exam. —S. (S.)

#### **205. Statistical Methods for Research with SAS (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: introductory upper division statistics course and some knowledge of vectors and matrices; courses

course 100, or 102, or 103 suggested or the equivalent. Focus on linear statistical models widely used in scientific research. Emphasis on concepts, methods and data analysis using SAS. Topics include simple and multiple linear regression, polynomial regression, diagnostics, model selection, variable transformation, factorial designs and ANCOVA. —S. (S.)

### **206. Statistical Methods for Research—I (4)**

Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: introductory statistics course; some knowledge of vectors and matrices. Focus on linear statistical models. Emphasis on concepts, method and data analysis; formal mathematics kept to minimum. Topics include simple and multiple linear regression, polynomial regression, diagnostics, model selection, factorial designs and analysis of covariance. Use of professional level software. —F. (F.)

### **207. Statistical Methods for Research—II (4)**

Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: course 206; knowledge of vectors and matrices. Linear and nonlinear statistical models emphasis on concepts, methods/data analysis using professional level software; formal mathematics kept to minimum. Topics include linear mixed models, repeated measures, generalized linear models, model selection, analysis of missing data, and multiple testing procedures. —F. (F.)

### **208. Statistical Methods in Machine Learning (4)**

Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: course 206, 207 and 135, or their equivalents. Focus on linear and nonlinear statistical models. Emphasis on concepts, methods, and data analysis; formal mathematics kept to minimum. Topics include resampling methods, regularization techniques in regression and modern classification, cluster analysis and dimension reduction techniques. Use professional level software. —S. (S.)

### **222. Biostatistics: Survival Analysis (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 131C. Incomplete data; life tables; nonparametric methods; parametric methods; accelerated failure time models; proportional hazards models; partial likelihood; advanced topics. (Same course as Biostatistics 222.) —F. (F.)

### **223. Biostatistics: Generalized Linear Models (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 131C. Likelihood and linear regression; generalized linear model; Binomial regression; case-control studies; dose-response and bioassay; Poisson regression; Gamma regression; quasi-likelihood models; estimating equations; multivariate GLMs. (Same course as Biostatistics 223.) —W. (W.)

### **224. Analysis of Longitudinal Data (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course/Biostatistics 222, 223 and course 232B or consent of instructor. Standard and advanced methodology, theory, algorithms, and applications relevant for analysis of repeated measurements and longitudinal data in biostatistical and statistical settings. (Same course as Biostatistics 224.) —S. (S.)

### **225. Clinical Trials (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course/Biostatistics 223 or consent of instructor. Basic statistical principles of clinical designs, including bias, randomization, blocking, and masking. Practical applications of widely-used designs, including dose-finding, comparative and cluster randomization designs. Advanced statistical procedures for analysis of data collected in clinical trials. (Same course as Biostatistics 225.) Offered in alternate years. —S.

### **226. Statistical Methods for Bioinformatics (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 131C or consent of instructor; data analysis experience recommended. Standard and advanced statistical methodology, theory, algo-

rithms, and applications relevant to the analysis of omics data. (Same course as Biostatistics 226.) Offered in alternate years.—(W.)

### **231A. Mathematical Statistics I (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 131A-C, Mathematics 25 and Mathematics 125A or equivalent. First part of three-quarter sequence on mathematical statistics. Emphasizes foundations. Topics include basic concepts in asymptotic theory, decision theory, and an overview of methods of point estimation.—F. (F.)

### **231B. Mathematical Statistics II (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 231A. Second part of a three-quarter sequence on mathematical statistics. Emphasizes hypothesis testing (including multiple testing) as well as theory for linear models.—W. (W.)

### **231C. Mathematical Statistics III (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 231A, 231B. Third part of three-quarter sequence on mathematical statistics. Emphasizes large sample theory and their applications. Topics include statistical functionals, smoothing methods and optimization techniques relevant for statistics.—S. (S.)

### **232A. Applied Statistics I (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: courses 106, 108, 131A, 131B, 131C, and Mathematics 167. Estimation and testing for the general linear model, regression, analysis of designed experiments, and missing data techniques.—F. (F.)

### **232B. Applied Statistics II (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: courses 106, 108, 131A, 131B, 131C, 232A and Mathematics 167. Alternative approaches to regression, model selection, nonparametric methods amenable to linear model framework and their applications.—W. (W.)

### **232C. Applied Statistics III (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: courses 106, 108, 131C, 232B and Mathematics 167. Multivariate analysis: multivariate distributions, multivariate linear models, data analytic methods including principal component, factor, discriminant, canonical correlation and cluster analysis.—W. (W.)

### **233. Design of Experiments (3)**

Lecture—3 hours. Prerequisite: course 131C. Topics from balanced and partially balanced incomplete block designs, fractional factorials, and response surfaces. Offered in alternate years.—(S.)

### **235A. Probability Theory (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: Mathematics 125B and 135A or course 131A or consent of instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from martingales, Markov chains, ergodic theory. (Same course as Mathematics 235A.)—F. (F.)

### **235B. Probability Theory (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: Mathematics 235A/course 235A or consent of instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from martingales, Markov chains, ergodic theory. (Same course as Mathematics 235B.)—W. (W.)

### **235C. Probability Theory (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: 235A—course/Mathematics 235B or consent of instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional

expectation. Topics selected from martingales, Markov chains, ergodic theory. (Same course as Mathematics 235C.)—S. (S.)

### **237A. Time Series Analysis (4)**

Lecture—3 hours; term paper. Prerequisite: course 131B or the equivalent. Advanced topics in time series analysis and applications. Models for experimental data, measures of dependence, large-sample theory, statistical estimation and inference. Univariate and multivariate spectral analysis, regression, ARIMA models, state-space models, Kalman filtering. Offered in alternate years.—(F.)

### **237B. Time Series Analysis (4)**

Lecture—3 hours; term paper. Prerequisite: course 131B or the equivalent. Advanced topics in time series analysis and applications. Models for experimental data, measures of dependence, large-sample theory, statistical estimation and inference. Univariate and multivariate spectral analysis, regression, ARIMA models, state-space models, Kalman filtering. Offered in alternate years.—(W.)

### **238. Theory of Multivariate Analysis (4)**

Lecture—3 hours; term paper. Prerequisite: courses 131B and 135. Multivariate normal and Wishart distributions, Hotelling's T-Squared, simultaneous inference, likelihood ratio and union intersection tests, Bayesian methods, discriminant analysis, principal component and factor analysis, multivariate clustering, multivariate regression and analysis of variance, application to data. Offered in alternate years.—W.

### **240A. Nonparametric Inference (4)**

Lecture—3 hours; term paper. Prerequisite: course 231C; courses 235A-235B-235C recommended. Comprehensive treatment of nonparametric statistical inference, including the most basic materials from classical nonparametrics, robustness, nonparametric estimation of a distribution function from incomplete data, curve estimation, and theory of resampling methodology. Offered in alternate years.—(W.)

### **240B. Nonparametric Inference (4)**

Lecture—3 hours; term paper. Prerequisite: course 231C; courses 235A-235B-235C recommended. Comprehensive treatment of nonparametric statistical inference, including the most basic materials from classical nonparametrics, robustness, nonparametric estimation of a distribution function from incomplete data, curve estimation, and theory of resampling methodology. Offered in alternate years.—(S.)

### **241. Asymptotic Theory of Statistics (4)**

Lecture—3 hours; term paper. Prerequisite: course 231C; courses 235A-235B-235C desirable. Topics in asymptotic theory of statistics chosen from weak convergence, contiguity, empirical processes, Edgeworth expansion, and semiparametric inference. Offered in alternate years.—(S.)

### **242. Introduction to Statistical Programming (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: courses 130A and 130B or equivalent. Essentials of statistical computing using a general-purpose statistical language. Topics include algorithms; design; debugging and efficiency; object-oriented concepts; model specification and fitting; statistical visualization; data and text processing; databases; computer systems and platforms; comparison of scientific programming languages. Offered in alternate years.—W.

### **243. Computational Statistics (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: courses 130A and 130B or equivalent, and Mathematics 167 or Mathematics 67 or equivalent. Numerical analysis; random number generation; computer experiments and resampling techniques (bootstrap, cross validation); numerical optimization; matrix decompositions and linear algebra computations; algorithms (markov chain monte carlo, expectation-maximization); algorithm design and efficiency; parallel and distributed computing. Offered in alternate years.—W.

### **250. Topics in Applied and Computational Statistics (4)**

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: course 131A; course 232A recommended, not required. Resampling, nonparametric and semiparametric methods, incomplete data analysis, diagnostics, multivariate and time series analysis, applied Bayesian methods, sequential analysis and quality control, categorical data analysis, spatial and image analysis, computational biology, functional data analysis, models for correlated data, learning theory. May be repeated for credit with consent of graduate adviser. Offered irregularly.—F, W, S.

### **251. Topics in Statistical Methods and Models (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 231B or equivalent. Topics may include Bayesian analysis, nonparametric and semiparametric regression, sequential analysis, bootstrap, statistical methods in high dimensions, reliability, spatial processes, inference for stochastic process, stochastic methods in finance, empirical processes, change-point problems, asymptotics for parametric, nonparametric and semiparametric models, nonlinear time series, robustness. May be repeated if topics differ; only with consent of the graduate adviser. Offered irregularly.—F, W, S. (F, W, S.)

### **252. Advanced Topics in Biostatistics (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course/Biostatistics 222 and course/ Biostatistics 223. Biostatistical methods and models selected from the following: genetics, bioinformatics and genomics; longitudinal or functional data; clinical trials and experimental design; analysis of environmental data; dose-response, nutrition and toxicology; survival analysis; observational studies and epidemiology; computer-intensive or Bayesian methods in biostatistics. May be repeated for credit with consent of adviser when topic differs. (Same course as Biostatistics 252.) Offered in alternate years.—S.

### **260. Statistical Practice and Data Analysis (3)**

Lecture/discussion—3 hours. Prerequisite: working knowledge of advanced statistical software and completion of at least one of course 207 or 232B or the equivalent. Open to students enrolled in the graduate program in Statistics or Biostatistics, as the class also serves to provide professional service to clients and collaborators who work with the students. Principles and practice of interdisciplinary collaboration in statistics, statistical consulting, ethical aspects, and basics of data analysis and study design. Emphasis on practical consulting and collaboration of statisticians with clients and scientists under instructor supervision. May be repeated one time for credit.—F, W, S. (F, W, S.)

### **280. Orientation to Statistical Research (2)**

Seminar—2 hours. Prerequisite: consent of instructor. Guided orientation to original statistical research papers, and oral presentations in class of such papers by students under the supervision of a faculty member. May be repeated one time for credit. (S/U grading only.)—S. (S.)

### **290. Seminar in Statistics (1-6)**

Prerequisite: consent of instructor. Seminar on advanced topics in probability and statistics. (S/U grading only.)—F, W, S. (F, W, S.)

### **292. Graduate Group in Statistics Seminar (1-2)**

Seminar—1-2 hours. Prerequisite: graduate standing. Advanced study in various fields of statistics with emphasis in applied topics, presented by members of the Graduate Group in Statistics and other guest speakers. (S/U grading only.)—S. (S.)

### **298. Directed Group Study (1-5)**

Prerequisite: graduate standing, consent of instructor.

### **299. Individual Study (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**299D. Dissertation Research (1-12)**

Prerequisite: advancement to candidacy for Ph.D., consent of instructor. (S/U grading only.)

**Professional****390. Methods of Teaching Statistics (2)**

Lecture/discussion—1 hour; laboratory—1 hour. Prerequisite: graduate standing. Practical experience in methods/problems of teaching statistics at university undergraduate level. Lecturing techniques, analysis of tests and supporting material, preparation and grading of examinations, and use of statistical software. Emphasis on practical training. May be repeated for credit. (S/U grading only.)—F. (F.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: consent of instructor; graduate standing. (S/U grading only.)—F, W, S. (F, W, S.)

**Professional****401. Methods in Statistical Consulting (3)**

Lecture—3 hours; discussion—1 hour. Students must be enrolled in the graduate program in Statistics or Biostatistics. Introduction to consulting, in-class consulting as a group, statistical consulting with clients, and in-class discussion of consulting problems. Clients are drawn from a pool of University clients. May be repeated for credit with consent of graduate adviser. Offered irregularly. (S/U grading only.)—F, W, S. (F, W, S.)

## Statistics (A Graduate Program)

Thomas (C.M.) Lee, Ph.D., Chairperson of the Program

Jie Peng, Ph.D., Vice Chairperson for Graduate Affairs

**Program Office.** 4118 Mathematical Sciences Building 530-692-5194;  
<http://www.stat.ucdavis.edu>

**Faculty**

Ethan Anderes, Ph.D., Associate Professor (*Statistics*)  
Alexander Aue, Ph.D., Associate Professor (*Statistics*)

Laurel Beckett, Ph.D., Professor (*Public Health Sciences*)

Paul Baines, Ph.D., Assistant Professor (*Statistics*)

Prabir Burman, Ph.D., Professor (*Statistics*)

Colin Cameron, Ph.D., Professor (*Economics*)

Hao Chen, Ph.D., Assistant Professor (*Statistics*)

Christiana Drake, Ph.D., Professor (*Statistics*)

Cho-Jui Hsieh, Ph.D., Assistant Professor (*Statistics*)

Fushing Hsieh, Ph.D., Professor (*Statistics*)

Jiming Jiang, Ph.D., Professor (*Statistics*)

Oscar Jorda, Ph.D., Professor (*Economics*)

Thomas Lee, Ph.D., Professor (*Statistics*)

Xiaodong Li, Ph.D., Assistant Professor (*Statistics*)

Miles Lopes, Ph.D., Assistant Professor (*Statistics*)

Hans-Georg Müller, M.D., Ph.D., Professor (*Statistics*)

Debashis Paul, Ph.D., Associate Professor (*Statistics*)

Jie Peng, Ph.D., Professor (*Statistics*)

Wolfgang Polonik, Ph.D., Professor (*Statistics*)

David Rocke, Ph.D., Professor (*Public Health Sciences*)

Naoki Saito, Ph.D., Professor (*Mathematics*)

James Sharpnack, Ph.D., Assistant Professor (*Statistics*)

Duncan Temple Lang, Ph.D., Professor (*Statistics*)

Chih-Ling Tsai, Ph.D., Professor (*Graduate School of Management*)

Jane-Ling Wang, Ph.D., Professor (*Statistics*)

**Emeriti Faculty**

Rudolph Beran, Ph.D., Professor Emeritus

P.K. Bhattacharya, Ph.D., Professor Emeritus

Thomas B. Farver, Ph.D., Professor (*Population Health and Reproduction*)

George G. Roussas, Ph.D., Professor Emeritus

Yue-Pok [Ed] Mack, Ph.D., Professor Emeritus

Francisco J. Samaniego, Ph.D., Professor Emeritus

Robert H. Shumway, Ph.D., Professor Emeritus

Alvin D. Wiggins, Ph.D., Professor Emeritus

**Affiliated Faculty**

Rahman Azari, Ph.D., Lecturer (*Statistics*)

**Graduate Study.** The Graduate Program in Statistics offers programs of study and research leading to the M.S. and Ph.D. degrees. The M.S. gives students a strong foundation in the theory of statistics as well as substantial familiarity with the most widely used statistical methods. Facility in computer programming is essential for some of the course work. The supervised statistical consulting required of all M.S. students has proven to be a valuable educational experience. The Ph.D. program combines advanced course work in statistics and probability with the opportunity for in-depth concurrent study in an applied field. For detailed information contact the Chairperson of the Program or the Graduate Adviser.

**Preparation.** Preparation for the graduate program requires a year of calculus, a course in linear algebra, facility with a programming language and upper division coursework in mathematics and/or statistics. For admission to the Ph.D. program, course work requirements for the master's degree, and at least one semester/two quarters of advanced calculus must be completed.

**Graduate Adviser.** Debasish Paul (*Statistics*)

## Study of Religion (A Graduate Group)

Flagg Miller, Ph.D., Chairperson of the Group

**Program Office.** 216 Sproul Hall

Catherine Chin, Ph.D., Professor (*Religious Studies*)

Allison Couder, Ph.D., Professor (*Religious Studies*)

Mark K. Elmore, Ph.D., Professor (*Religious Studies*)

Elizabeth Freeman, Ph.D., Professor (*English*)

Cody Gilmore, Ph.D., Professor (*Philosophy*)

John R. Hall, Ph.D., Professor Emeritus (*Sociology*)

Mark Halperin, Ph.D., Professor (*East Asian Languages*)

A. Katie Harris, Ph.D., Professor (*History*)

Million F. Harrison, Ph.D., Lecturer (*African American & African Studies*)

Inés Hernández-Avila, Ph.D., Professor (*Native American Studies*)

Naomi Janowitz, Ph.D., Professor (*Religious Studies*)

Suad Joseph, Ph.D., Professor (*Anthropology and Women & Gender Studies*)

Flagg Miller, Ph.D., Professor (*Religious Studies*)

Eva Mroczek, Ph.D., Professor (*Religious Studies*)

Jessie Ann Owens, Ph.D., Professor (*Music*)

Meaghan O'Keefe, Ph.D., Professor (*Religious Studies*)

Lynn Roller, Ph.D., Professor (*Art History*)

Seth Sanders, Ph.D., Professor (*Religious Studies*)

Jocelyn Sharlet, Ph.D., Professor (*Comparative Literature*)

John Smolenski, Ph.D., Professor (*History*)

Henry Spiller, Ph.D., Professor (*Music*)

Smriti Srinivas, Ph.D., Professor (*Anthropology*)

Daniel Stolzenberg, Ph.D., Professor (*History*)

Mairaj Syed, Ph.D., Professor (*Religious Studies*)

Jan Szaić, Ph.D., Professor (*Philosophy*)

Baki Tezcan, Ph.D., Professor (*History & Religious Studies*)

Archana Venkatesan, Ph.D., Professor (*Comparative Literature & Religious Studies*)

Heghnar Watenpaugh, Ph.D., Professor (*Art History*)

Keith Watenpaugh, Ph.D., Professor (*Religious Studies*)

Diane Wolf, Ph.D., Professor (*Sociology*)

Michael Ziser, Ph.D., Professor (*English*)

**Graduate Study (A Graduate Program)**

The Graduate Group in the Study of Religion offers students classical training in the literatures of particular religious traditions, and they are encouraged to understand these traditions at the intersection of contemporary thematic and regional phenomena.

Students have the opportunity to concentrate primarily on one of three regional specializations: American religious cultures, Mediterranean religions, and Asian religions. An additional regional specialization typically serves as a secondary area of competence. Students further shape their scholarship through intensive engagement in one of the following thematic specializations: Values, Ethics, and Human Rights; Modernity, Science, and Secularism; Visual Culture, Media, and Technology; Language, Rhetoric, and Performance; Body and Praxis; Theory and Method.

This curriculum guides students through a rigorous course of study, providing the breadth and depth necessary to produce exciting, rigorous scholarship at forefront of the field of Religious Studies. Graduate Group training prepares students for careers in academia as well as in the government and the private sector.

**Preparation.** Admission to the Graduate Group requires a Bachelor's or Master's degree in a discipline relevant to the study of religion, as well as preparation in at least one language relevant to the intended area of primary research. The group requires three letters of recommendation and a sample of recent written work. The general GRE is also required.

**Graduate Adviser.** Contact the Group office.

### Courses in Study of Religion (REL) Graduate

#### 200A. Historical Roots of the Study of Religion (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Consideration of the historical and philosophical formation of religion as a concept. Treats the emergence of religion as a category of analysis and understanding from the Reformation through the Enlightenment.—F. (F.) Couder, Janowitz, Stolzenberg

#### 200B. Foundational Theories of Religion (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Survey of classical 19th and 20th century approaches to the study of religion.—W. (W.) Couder, Janowitz, Syed

#### 200C. Contemporary Approaches to the Study of Religion (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Consideration of major themes, issues and methods in the contemporary study of religion. Perspectives from diverse cultural settings employed to consider modern historical, philosophical, and social contexts that inform understandings of religion.—S. (S.) Couder, Janowitz, Miller, Syed

#### 200D. Field Profile Seminar I and II (1-2)

Project. Prerequisite: graduate standing or consent of instructor. Individually guided research to survey the field of study, under the supervision of a faculty member. Four units total over two or more quarters are required by the end of the second year. May be repeated for credit.—F, W, S. (F, W, S.)

#### 210A. Special Topics in American Religious Cultures (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of specific topics in American religious cultures. May be repeated for credit when topic differs. Offered irregularly.

#### 210B. Special Topics in Asian Religious Cultures (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of specific topics in Asian religious cultures. May be repeated for credit when topic differs. Offered irregularly.

**210C. Special Topics in Mediterranean Religious Cultures (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of specific topics in Mediterranean religious cultures. May be repeated for credit when topic differs. Offered irregularly.

**230A. Thematic Topics—Body and Praxis (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to the body and praxis. May be repeated for credit when topic differs. Offered irregularly.

**230B. Thematic Topics—Language, Rhetoric, and Performance (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to language, rhetoric, and performance. May be repeated for credit when topic differs. Offered irregularly.

**230C. Thematic Topics—Modernity, Science, and Secularism (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to modernity, science, and secularism. May be repeated for credit when topic differs. Offered irregularly.

**230D. Thematic Topics—Theory and Method (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to theory and method. May be repeated for credit when topic differs. Offered irregularly.

**230E. Thematic Topics—Values, Ethics, and Human Rights (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to values, ethics, and human rights. May be repeated for credit when topic differs. Offered irregularly.

**230F. Thematic Topics—Visual Culture, Media, and Technology (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to visual culture, media, and technology. May be repeated for credit when topic differs. Offered irregularly.

**231B. Theories of Language (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Restricted to graduate students. Focuses on historical theories of language that precede and accompany post-structuralist theory. Intended to introduce graduate students to the context of modern theory formation. May cover structuralism, integrationism, and grammaticalization. Offered irregularly.—F, W, S. (F, W, S.) O'Keefe

**231E. History, Theory and Criticism of Human Rights (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Restricted to graduate students. Introduces the advanced study of Human Rights and the theoretical and practical elaboration of the international Human Rights system. Seminar will engage with criticism of Human Rights and develop research and teaching within disciplinary and interdisciplinary frameworks. (Same course as Human Rights 200A.) Offered in alternate years.—W. (W.) Waterpaugh

**298. Group Study (1-5)**

Prerequisite: graduate standing or consent of instructor. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**299. Research (1-12)**

Prerequisite: graduate standing or consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

**299D. Dissertation Writing (1-12)**

Prerequisite: advanced to candidacy for the Ph.D. program; consent of instructor. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## Surgery

## Surgical and Radiological Sciences

**See Veterinary Medicine, School of, on page 581.**

## Sustainable Agriculture and Food Systems

(College of Agriculture and Environmental Sciences)

Sustainable Agriculture and Food Systems is an interdisciplinary major hosted by the Department of Human Ecology.

Ryan Galt, Ph.D., Major Adviser

**Program Office.** 143 Robbins Hall;  
530-752-3915; <http://asi.ucdavis.edu>

**Committee in Charge**

Richard Sexton, Ph.D.

*(Agricultural & Resource Economics)*

Anita Oberbauer, Ph.D. *(Animal Science)*

Michael Parrella, Ph.D.

*(Entomology and Nematology)*

Susan Handy, Ph.D.

*(Environmental Science & Policy)*

Patsy Eubanks Owens, M.L.A.

*(Human Ecology)*

David Campbell, Ph.D. *(Human Ecology)*

Randal Southard, Ph.D.

*(Land, Air & Water Resources)*

David Rizzo, Ph.D. *(Plant Pathology)*

Chris van Kessel, Ph.D. *(Plant Sciences)*

**The Major Program**

The Sustainable Agriculture and Food Systems (SA&FS) major serves students interested in improving the sustainability of agriculture and food systems. This major prepares graduates to understand the interdisciplinary and systems-based aspects of sustainability and provides them with the knowledge, leadership skills and experiences required to excel in agricultural and food systems professions.

**The Program**

This program is designed to develop students' competencies for addressing the environmental, social, and economic challenges and opportunities associated with agricultural and food systems sustainability. The program emphasizes an experiential learning approach to sustainability education, allowing students to choose between three tracks within the major. Students in the Agriculture and Ecology track focus on crop and animal production systems, ecology, and practices that mitigate negative impacts while producing environmental and social benefits. Students in the Food and Society track focus on issues related to the social, cultural, political and community development aspects of agriculture and food systems. Students in the Economics and Policy track focus on issues related to agricultural and resource economics, policy and management.

The program provides students with practical experiences through courses with on- and off-campus field-work and through internship placements at sites related to students' interests and focus of study.

**Internships and Career Alternatives**

Sustainable Agriculture and Food Systems students are required to complete an internship in the field before graduation. Internships have been arranged with local, county, and state agricultural agencies, production farms and commercial processors and retailers, domestic and international non-governmental organizations, and rural and urban community development programs. Graduates are prepared to pursue a broad range of careers related to agricultural production and food system management, rural and urban community services, education and development, and agricultural and environmental sciences, as well as careers in agricultural, environmental, and economic policy and analysis. Positions may be in private industry, government and public service agencies and in the non-profit sector, nationally and internationally. The major also prepares students for graduate studies in a wide range of fields related to agriculture and food systems.

**B.S. Major Requirements:**

UNITS

**English Composition Requirement.....4-8**

See College requirement, must include Communications 1.

**Core Courses .....24-26**

Plant Sciences 15 .....	4
Community and Regional Development 20 .....	4
Plant Sciences 150 .....	4
Agricultural and Resource Economics 121 .....	4
Plant Sciences 190 .....	2-4
Environmental Science and Policy 191A, 191B .....	6

**Internship Requirement.....12**

Students must complete at least 12 units of internship, eight of which must be completed off campus.

**Applied Production .....6-9**

Select 1 course from: Plant Sciences 49, Plant Pathology 40, Viticulture and Enology 101A, 101B, 101C, Environmental Horticulture 120, Plant Science 131 .....	2-3
Select 1 course from: Animal Science 49AJ, Animal Science 41L .....	2-3
Select 1 course from: Applied Biological Systems Technology 49, 52, 101, 142 ..	2-3

**Track I: Agriculture and Ecology**

Focuses on crop and animal production systems, ecology, and practices that mitigate negative impacts while producing environmental and social benefits.

**Track I Adviser.** W. Horwath, Ph.D.**Preparatory Subject Matter .....60-61**

Mathematics 16A, 16B .....	6
Plant Sciences 120 or Statistics 100 .....	4
Chemistry 2A, 2B .....	10
Physics 1A .....	3
Biological Sciences 2A, 2B .....	10
Plant Sciences 2 .....	4
Animal Sciences 1 or 2 .....	4
Food Science 1 .....	3
Economics 1A .....	4
Community and Regional Development 1 ..	4
Select one course from: Philosophy 14, 15, 24 .....	4
Select one course from: Anthropology 2, Political Science 4, Sociology 1, Sociology 3 .....	4-5

**Depth Subject Matter.....34-38**

Agricultural and Resource Economics 120 or 147 .....	3-4
Environmental Science and Policy 161 or 169 .....	3-4
Soil Science 100 or Soil Science 109 .....	4-5

Select one course from: Animal Science 129, Environmental Horticulture 160 or, Environmental Science and Policy 100, Evolution and Ecology 101, Plant Sciences 105, 142, Wildlife, Fish, and Conservation Biology 154 ..... 4.5  
Additional upper-division restricted electives chosen in consultation with the track faculty adviser..... 20

**Track II: Food and Society**

Focuses on issues related to the social, cultural, political and community development aspects of agriculture and food systems.

**Track II Adviser.** R. Galt, Ph.D.

**Preparatory Subject Matter.....57-64**

Philosophy 5 or 31.....	4
Select one course from: Philosophy 14, 15, 24.....	4
Sociology 46B or Statistics 13 .....	4
Select at least one course from: Community and Regional Development 151, Applied Biological Systems Technology 180, Landscape Architecture 150, Statistics 103, Sociology 106 .....	3-6
Chemistry 2A .....	5
Biological Sciences 2A or 10 .....	5
Plant Sciences 2 .....	4
Select one course from: Evolution and Ecology 2 or Biological Sciences 2B or Environmental Science and Policy 1 or 30 or Wildlife, Fish, and Conservation Biology 10 or 11 .....	3-5
Food Science 1 .....	3
Soil Science 10.....	3
Economics 1A.....	4
Political Science 4 .....	4
Select one course from: Anthropology 2, Sociology 1, Sociology 3 .....	4.5
Community and Regional Development 1, 2 .....	8

**Depth Subject Matter .....43-44**

Agricultural and Resource Economics 112 or 150.....	4
Select 1 course from: Agricultural and Resource Economics 147, 176, Environmental Science and Policy 160, 161, 169, 172, 179 .....	3-4
Choose 12 units from: Anthropology 101, 102, Community and Regional Development 142, 152, Sociology 139, 144, 145A, 145B.....	12
Select 1 course from: American Studies 101C, 155, History 172 or Philosophy 109.....	4
Additional upper-division restricted electives chosen in consultation with the track faculty adviser.....	20

**Track III: Economics and Policy**

Focuses on issues related to agricultural and resource economics, policy and management.

**Track III Adviser.** T. Tomich, Ph.D.

**Preparatory Subject Matter.....60-64**

Mathematics 16A, 16B .....	6
Sociology 46B or Statistics 13 .....	4
Select 1 course from: Agricultural and Resource Economics 106, Statistics 103, Sociology 106 .....	4
Chemistry 2A .....	5
Biological Sciences 2A or 10 .....	5
Plant Sciences 2 .....	4
Select 1 course from: Evolution and Ecology 2, Biological Sciences 2B, Environmental Science and Policy 1, 30, Wildlife, Fish, and Conservation Biology 10, 11 .....	3-5
Food Science 1 .....	3
Soil Science 10.....	3
Economics 1A, 1B.....	8
Political Science 4 .....	4
Select 1 course from: Anthropology 2, Sociology 1, Sociology 3 .....	4.5
Community and Regional Development 1 ..	4

Select 1 course from: Philosophy 14, 15, 24..... 4

**Depth Subject Matter .....43-44**

Select one course from: Agricultural and Resource Economics 112, 150, 157 .....	4
Select 11-12 units from: Agricultural and Resource Economics 120, 130, 147, 176, Environmental Science and Policy 160, 161, 169, 172, 179 .....	11-12
Select 8 units from: Anthropology 101, 102, Community and Regional Development 142, 152, Sociology 139, 144, 145A, 145B... 8	
Additional restricted electives chosen in consultation with an adviser .....	20

**Total units for the major.....140-163**

**Major Adviser.** R. Galt (*Human Ecology*); **Track I Adviser.** W. Horwath (*Land, Air & Water Resources*); **Track II Adviser.** R. Galt (*Human Ecology*); **Track III Adviser.** T. Tomich (*Human Ecology, Environmental Science & Policy*)

**Advising Center** for the major is located in 1303 Hart Hall, Department of Human Ecology 530-752-2244.

**Courses in Sustainable Agriculture and Food Systems (SAF)****Lower Division****90X. SA&FS Portfolio (1-4)**

Workshop—3-12 hours. Prerequisite: consent of instructor. Restricted to Sustainable Agriculture and Food Systems majors with lower-division standing or consent of instructor. SA&FS Portfolios are designed to complement interdisciplinary, academic coursework by supporting student development of each of the SA&FS Student Learning Outcomes: Systems Thinking, Experimentation & Inquiry, Understanding Values, Interpersonal Communication, Strategic Management, Civic Engagement and Personal Development. May be repeated for credit. Offered irregularly. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**92. Internship (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor. Restricted to Sustainable Agriculture and Food Systems majors or with consent of instructor. Lower-division internship for students enrolled in the Sustainable Agriculture and Food Systems program of study. Enrollment for non-majors by consent of instructor. May be repeated up to 12 units for credit with consent of instructor. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Restricted to Sustainable Agriculture and Food Systems major or with consent of instructor. Group study on focused topics in Sustainable Agriculture and Food Systems. Varies according to instructor. Course plan is adapted to student need and interest in conjunction with the expertise of the instructor. Offered irregularly. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**99. Special Study for Undergraduates (1-5)**

Independent study—3-15 hours. Prerequisite: consent of instructor. Under faculty supervision, students pursue a special or individualized course of study related to Sustainable Agriculture and Food Systems. May be repeated for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**Upper Division****192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: upper-division standing; consent of instructor. Restricted to Sustainable Agriculture and Food Systems majors or non-majors by consent of instructor. Upper-division internship for students enrolled in the Sustainable Agriculture and Food Systems program of study. May be repeated up to 12 units for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**197T. Tutoring in Sustainable Agriculture and Food Systems (1-5)**

Tutorial—3-15 hours. Prerequisite: upper division standing; consent of instructor. Undergraduates assist the instructor by tutoring students in regularly scheduled courses that fulfill SA&FS major requirements. May be repeated for credit. Offered irregularly. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**197TC. SA&FS Tutoring in the Community (1-5)**

Tutorial—3-15 hours. Prerequisite: upper division standing; consent of instructor. Undergraduates assist the instructor by tutoring in the community in settings related to Sustainable Agriculture and Food Systems. May be repeated for credit. Offered irregularly. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**198. Directed Group Study (1-5)**

Prerequisite: upper division standing; consent of instructor. Restricted to Sustainable Agriculture and Food Systems major or with consent of instructor. Group study on focused topics in Sustainable Agriculture and Food Systems. Varies according to instructor. Course plan is adapted to student need and interest in conjunction with the expertise of the instructor. May be repeated for credit. Offered irregularly. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**199. Special Study for Advanced Undergraduates (1-5)**

Independent study—3-15 hours. Prerequisite: upper division standing; consent of instructor. Under faculty supervision, advanced students pursue a special or individualized course of study related to Sustainable Agriculture and Food Systems. May be repeated for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**Sustainable Environmental Design**

(College of Agriculture and Environmental Sciences)  
(Department of Human Ecology)

Steven E. Greco, Ph.D., Chairperson, Landscape Architecture and Environmental Design Program

**Program Office.** 131 Hunt Hall;  
530-752-3907; [http://humanecology.ucdavis.edu/ida/academic\\_programs/sed](http://humanecology.ucdavis.edu/ida/academic_programs/sed)

**Faculty**

Elizabeth Boultis, MLA Continuing Lecturer

David de la Pena, Ph.D., Assistant Professor

Steven E. Greco, Ph.D., Professor

Eric Larsen, Ph.D., Associate Research Scientist

Jeff Loux, Ph.D., Associate Adjunct Professor

Brett Milligan, M.L.A., Assistant Professor

N. Claire Napawan, M.L.A., Assistant Professor

Lorence Oki, Ph.D., Associate Specialist in Cooperative Extension

Patsy Eubanks Owens, M.L.A., Professor

Michael Rios, Ph.D., Associate Professor

Sheryl-Ann Simpson, M.L.A., Assistant Professor

Stephen Wheeler, Ph.D., Professor

**The Major Program**

The Sustainable Environmental Design major is intended to build student understanding and skills related to creation of sustainable communities and landscapes. Coursework emphasizes urban and environmental design, sustainable development theory and practice, green building, local government planning and decision-making, community dynamics and organizations, and written, graphic, and oral presentation of sustainability strategies.

**The Program**

The Sustainable Environmental Design major is particularly suited for students who are interested in the

physical form and design of communities and related public and private processes. It is focused on the physical environment of communities and the process of designing, planning for, and regulating the built landscape and the place-making considerations involved in creating sustainable communities.

### Career Alternatives

Graduates will choose to pursue work in government, community organizations, education, or the private sector. They will also be well-positioned to pursue graduate education in city and regional planning, landscape architecture, architecture, public policy, public administration, law, real estate, and related fields.

### B.S. Major Requirements:

UNITS

**Preparatory Subject Matter ..... 64**

English Writing/Oral Communication .....	8
Biological Sciences 2A, 2B.....	10
One course each in Statistics, Economics, Political Science, Physical Sciences, and Sociology.....	20
Landscape Architecture 1, 2, 3, 21, 30, 50, 70.....	26

**Depth Subject Matter ..... 21**

Landscape Architecture 140, 141, 142 .....	14
Environmental Science and Policy 171.....	4
Landscape Architecture 190 (three quarters).....	3

**Restricted Electives ..... 20-25**

Select 20 units of upper division courses chosen from courses related to community sustainability .....	20
Internship: Recommended.....	5

**Total units for the major ..... 105-110**

**Major Adviser.** Stephen Wheeler

**Advising Center.** See Sharla Cheney, 135 Hunt Hall, 530-754-8628, [scheneyc@ucdavis.edu](mailto:scheneyc@ucdavis.edu).

## Technocultural Studies

See Cinema and Digital Media, on page 207.

## Textile Arts and Costume Design

See Design, on page 233.

## Textile Science

See Fiber and Polymer Science, on page 338.

## Textiles (A Graduate Group)

Ning Pan, Ph.D., Chairperson of the Group

**Group Office.** 129 Everson Hall

### Faculty

Susan Avila, M.F.A. Professor (*Design*)  
Colin A. Carter, Ph.D., Distinguished Professor (*Agricultural and Resource Economics*)  
James Chalfant, Ph.D., Professor (*Agricultural & Resource Economics*)  
Hidergarde Heymann, Ph.D., Distinguished Professor (*Viticulture and Enology*)

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;

ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience

Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience  
Quarter Offered: F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses

You-Lo Hsieh, Ph.D., Distinguished Professor (*Textiles and Clothing*)  
Susan B. Kaiser, Ph.D., Professor (*Textiles and Clothing, Women and Gender Studies*)  
Helen Koo, Assistant Professor (*Design*)  
Ning Pan, Ph.D., Professor (*Textiles and Clothing, Biological and Agricultural Engineering*)  
Tingrui Pan, Ph.D., Associate Professor (*Biomedical Engineering*)  
Diana Strazdes, Associate Professor (*Art History*)  
Gang Sun, Ph.D., Professor (*Textiles and Clothing*)  
Susan Verba, M.F.A., Associate Professor (*Design Program*)

### Emeriti Faculty

Stephen Jett, Ph.D., Professor Emeritus (*Textiles and Clothing, Geography*)  
Joel T. Johnson, Professor (*Psychology*)  
Gyongy Laky, M.A., Professor Emeritus (*Textiles and Clothing*)  
Margaret H. Rucker, Ph.D., Professor Emeritus (*Textiles and Clothing*)  
Howard G. Schutz, Ph.D., Professor Emeritus (*Consumer Science*)  
James F. Shackelford, Ph.D., Professor Emeritus (*Chemical Engineering and Materials Science*)  
Charles F. Shoemaker, Ph.D., Professor Emeritus (*Food Science and Technology*)  
Jo Ann C. Stabb, M.A., Senior Lecturer Emeritus (*Design*)  
S. Haig Zeronian, Ph.D., Professor Emeritus (*Textiles and Clothing*)

**Graduate Study.** The Graduate Group in Textiles offers a program of study and research leading to the M.S. degree. Students in the program use an interdisciplinary approach emphasizing the physical and behavioral science aspects of textiles. Research areas include chemical, physical, biochemical, and mechanical properties of fibers and polymers as well as fibrous assemblies, including composites, paper, and nonwovens; and psychological and sociological factors relating to perception and consumption of textiles and apparel. Extensive specialized fiber, polymer, and textiles research facilities and a behavioral research laboratory are available. For detailed information regarding the program, address the Chairperson of the Group.

**Graduate Advisers.** Y.L. Hsieh, N. Pan

## Textiles and Clothing

(College of Agricultural and Environmental Sciences)

You-Lo Hsieh, Ph.D., Chairperson of the Division

**Division Office.** 129 Everson Hall  
530-752-6650; <http://textiles.ucdavis.edu>

### Faculty

You-Lo Hsieh, Ph.D., Professor  
Susan B. Kaiser, Ph.D., Professor (*Women and Gender Studies*)  
Ning Pan, Ph.D., Professor  
Gang Sun, Ph.D., Professor

### Emeriti Faculty

Stephen C. Jett, Ph.D., Professor Emeritus  
Gyongy Laky, M.A., Professor Emeritus  
Mary Ann Morris, Ph.D., Professor Emeritus  
Margaret H. Rucker, Ph.D., Professor Emeritus  
S. Haig Zeronian, Ph.D., D.Sc., Professor Emeritus

### The Major Program

The textiles and clothing major emphasizes the connections among (a) the physical characteristics of textile products, (b) human perceptions of and behavior toward these products, and (c) global economic trends affecting the textile/apparel marketplace. An integrative knowledge base links textile products with people and processes, to focus on the production, distribution, and consumer use of textiles and apparel; see also *Fiber and Polymer Science*, on page 338.

**The Program.** The textiles and clothing major offers two options: textile science and marketing/economics. The Textile Science option provides students with a broad knowledge base in both the social and physical sciences. This base includes production, end-use applications and care of textiles and apparel, physical and chemical properties of textiles, and social-psychological and economic aspects of textiles and clothing. The Marketing/Economics option emphasizes social science and business course work, while also providing students with an awareness of the physical nature of textile products.

**Internships and Career Alternatives.** Textiles and clothing majors can pursue internships and careers in apparel production and merchandising, retail management, international marketing, textile testing and conservation, and textiles journalism. The majority of textiles and clothing graduates accept entry-level management and technical positions within the textile and apparel industry or in related fields; e.g., merchandising and marketing, production, research and development, technical service and design. Students may also pursue graduate studies in textiles, business, and other areas depending on their specific selections of restricted elective course work.

### B.S. Major Requirements:

UNITS

**Preparatory Subject Matter ..... 42-44**

Plant Sciences 21 or Computer Science	
Engineering 15 or 30 .....	3-4
Economics 1A-1B .....	8
Anthropology 2, Science and Society 1, Art History 1A, 1B, 1C, or 1D .....	4
Physics 1A or 10.....	3-4
Psychology 1 .....	4
Sociology 2 .....	4
Statistics 13 .....	4
Textiles and Clothing 6, 7, 8.....	12

Select one of the following two options:

### Marketing/Economics option

**Additional Preparatory Subject Matter for the option ..... 18-19**

Management 11A-11B .....	8
Chemistry 10 or 2A.....	4-5
Mathematics 16A-16B .....	6

**Depth Subject Matter ..... 56-57**

Agricultural and Resource Economics 100A-100B, 106, 136 .....	16
Statistics 103 .....	4
Psychology 151 or Consumer Science 100.....	3-4
Fiber and Polymer Science 110, Textiles and Clothing 107, 162, 162L, 163, 163L, 164, 165, 171, 173, 174.....	33

**Restricted Electives ..... 12**

Courses selected from the following:  
Agricultural and Resource Economics 18, 112, 142, 155, 157, 171A, 171B, Anthropology 122A, 126A, Consumer Science 100, Design 77, 107, 143, Economics 101, 121A, 121B, 134, 162, and other relevant course work, Foreign language units may be used to satisfy any or all of the required 12 units, Mathematics 16C, Psychology 151, Sociology 123, 126, 140, 141, 145, Textiles and Clothing 180A, 180B, 230, 293, with consent of instructor, and a maximum of five units in either Textiles and Clothing 192 or 199.

### Textile Science option

**Additional Preparatory Subject Matter for the option ..... 19**

Chemistry 2A, 2B, 8A, 8B .....	16
Mathematics 16A.....	3

**Depth Subject Matter ..... 51-52**

Agricultural and Resource Economics 112, 113.....	8
Design 143 .....	4

Psychology 151 or Consumer Science 100.....	3-4
Fiber and Polymer Science 100, 161, 161L, Textiles and Clothing 107, 162, 162L, 163, 163L, 164, 165, 171, 173, 174 .....	36
<b>Restricted Electives.....</b>	<b>16</b>

Courses selected from the following:  
 Agricultural and Resource Economics 18, 141, 142, 155, 171A, 171B, Plant Sciences 120, Chemistry 2C, 128A, 128B, 128C, Communication 42, 130, 136, 140, Community and Regional Development 162, Consumer Science 100, Design 77, 107, 142A, 142B, 160A, 160B, 160C, 170A, 170B, 170C, Economics 100, 101, 121A, 121B, 134, Fiber and Polymer Science 110, Foreign Language units may be used to satisfy any or all of the required 16 units, Management 11A, 11B, Mathematics 16B, 16C, Psychology 151, Sociology 25, 123, 126, 140, 148, 159, 175, Statistics 106, 108; Textiles and Clothing 180A, 180B, 230, 293, with consent of instructor, and a maximum of five units in either Textiles and Clothing 192 or 199.

### Total Units for the Major ..... 128-132

#### Major Adviser. S. Kaiser

**Advising Center** for the major is located in 1204 RMI south 530-752-3250 or 129B Everson Hall 530-754-8368.

#### Minor Program Requirements:

The Division of Textiles and Clothing offers a minor program for non-majors interested in satisfying secondary career objectives. For acceptance into the program see the staff adviser in 129B Everson Hall.

#### UNITS

### Textiles and Clothing ..... 18

Textiles and Clothing 6, 7, or 8.....	4
Courses selected from: Fiber and Polymer Science 100, 110, 161, 161L, Textiles and Clothing 107, 162-162L, 163-163L, 164, 165, 171, 173, 174.....	14

#### Minor Adviser. G. Sun

### Courses in Textiles and Clothing (TXC)

Questions pertaining to the following courses should be directed to the instructor or to the Division of Textiles and Clothing. See also courses in *Fiber and Polymer Science*, on page 338.

#### Lower Division

##### 6. Introduction to Textiles (4)

Lecture—3 hours; laboratory—3 hours. Introduction to the structure and properties of textiles. Consumer use and fabric characteristics are emphasized. GE credit: SciEng | SE, SL, VL.—F. (F.) Sun

##### 7. Style and Cultural Studies (4)

Lecture/discussion—3 hours; discussion/laboratory—1 hour. The multiple and overlapping influences of gender, sexuality, ethnicity, and class on constructions of identity and community are explored through the study of style in popular culture and everyday life. Continuity and change in clothing and appearance styles are interpreted. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VL, WC, WE.—W. (W.) Kaiser

##### 8. The Textile and Apparel Industries (4)

Lecture—4 hours. Textile and apparel industries including fashion theory, production, distribution, and consumption of textile goods. GE credit: SocSci, Div | SS.

##### 92. Internship in Textiles and Clothing (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience off campus in a textiles or clothing-related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.)

##### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

##### 99. Special Study for Lower Division Students (1-5)

(P/NP grading only.)

#### Upper Division

##### 107. Social and Psychological Aspects of Clothing (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Sociology 2. Social and cognitive factors influencing management and perception of personal appearance in everyday life. Concepts and methods appropriate to the study of meaning of clothes in social and cultural contexts. GE credit: SocSci, Div, Wrt | SS, VL, WE.—F. (F.)

##### 162. Textile Fabrics (3)

Lecture—3 hours. Prerequisite: course 6. Properties of fabrics as related to serviceability, comfort, and appearance. GE credit: SciEng | SE, VL.—W. (W.) Pan

##### 162L. Textile Fabrics Laboratory (1)

Laboratory—3 hours. Prerequisite: course 162 (may be taken concurrently). Laboratory methods and procedures employed in studying properties of textile fabrics as related to serviceability, comfort, and appearance. GE credit: SciEng | QL, SE, VL, WE.—W. (W.) Pan

##### 163. Textile Coloration and Finishing (3)

Lecture—3 hours. Prerequisite: course 6, Fiber and Polymer Science 110, or Chemistry 8B. Basic principles of textile dyeing, printing, and finishing; color theory; structure, properties, and application of dyes and finishes; factors affecting application and fastness; maintenance of dyed and finished textiles. GE credit: SciEng | SE, VL.—S. (S.) Sun

##### 163L. Textile Coloration and Finishing Laboratory (1)

Laboratory—3 hours. Prerequisite: course 163 (may be taken concurrently). Demonstrates various aspects of dyeing, printing, and finishing of textile substrates including the effect of fiber and finish type, and physical and chemical variables on dyeing and finishing processes and on the properties of the resultant textile. GE credit: SciEng | QL, SE, SL, WE.—S. (S.) Sun

##### 164. Principles of Apparel Production (3)

Lecture—3 hours. Prerequisite: course 6 or 8. Overview of characteristics, technology, processes, and research in apparel manufacturing industries including study of government statistics, material utilization and fabrication, mechanization, management, and production engineering. GE credit: SocSci | OL, SS, VL.

##### 165. Textile Processes (3)

Lecture/discussion—3 hours. Prerequisite: course 6. Physical processes involved in the production of textiles from the individual fiber to the finished fabric. Includes spinning, texturing, yarn formation, weaving preparation, weaving and knitting, tufting and fabric finishing. GE credit: SciEng | SE.

##### 171. Clothing Materials Science (4)

Lecture—3 hours; laboratory/discussion—3 hours. Prerequisite: course 6, 8, and senior standing. The properties, characterization, and performance evaluation of clothing materials and structures for specific functional applications. Principles and methods related to wetting and transport properties, fabric hand and aesthetic properties, clothing comfort, and material and assembly technology. GE credit: SciEng | SE, VL.—W. (W.) Hsieh

##### 173. Principles of Fashion Marketing (3)

Lecture—3 hours. Prerequisite: course 8, Economics 1A, Agricultural and Resource Economics 113 or 136. Study of basic elements of fashion marketing including philosophy and objectives, organization, merchandising, pricing, promotion and personnel. Offered in alternate years. GE credit: SocSci | SS, VL.—S.

##### 174. Introduction to World Trade in Textiles and Clothing (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 8. Structure of the global fiber/textile/apparel complex and its distribution patterns with an overview of political, economic and technological factors that are changing these industries and their markets. GE credit: SocSci, Div | SS, WC.—W. (W.)

##### 180A-180B. Introduction to Research in Textiles (2-2)

Laboratory—6 hours. Prerequisite: senior standing with textile-related major, and consent of instructor. Senior thesis on independent problems. Research begun in course 180A will be continued and completed in course 180B. (Deferred grading only, pending completion of sequence.) GE credit: SocSci | SS, WE.—F, W, S. (F, W, S.)

##### 192. Internship in Textiles and Clothing (1-12)

laboratory—3-36 hours. Prerequisite: consent of instructor. Work-learn experience off campus in a textiles or clothing-related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.)

##### 197. Tutoring in Textiles and Clothing (1-5)

Discussion/laboratory—3-15 hours. Prerequisite: upper division textiles-related major and consent of instructor. Tutoring of students in Textiles and Clothing courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring another textiles course. (P/NP grading only.)

##### 198. Directed Group Study (1-5)

(P/NP grading only.)

##### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

#### Graduate

##### 230. Behavioral Science Concepts in Textiles (3)

Lecture—3 hours. Prerequisite: course 107, upper division or graduate course in statistics (e.g., Agricultural Management and Rangeland Resources 120) and one in a behavioral science (e.g., Psychology 145). Examination of theories and research concerning relationships between clothing and human behavior with emphasis on research techniques, including methods of measuring clothing variables. Offered in alternate years. —Kaiser

##### 290. Seminar (1)

Seminar—1 hour. Critical review of selected topics of current interest in textiles. (S/U grading only.)—F, W. (F, W.)

##### 290C. Research Conference (1)

Discussion—1 hour. Prerequisite: graduate standing; consent of instructor. Individual faculty members meet with their graduate students. Critical presentations of original research are made by graduate students. Research activities are planned. Discussions are led by major professors for their research groups. (S/U grading only.)—F, W, S. (F, W, S.)

##### 293. Recent Advances in Textiles (3)

Lecture—3 hours. Prerequisite: two upper division courses in Textiles and Clothing or consent of instructor. Critical reading and evaluation on selected topics of current interest in textiles. Multidisciplinary aspects of the topics selected will be stressed. May be repeated for credit. —(W.)

##### 298. Group Study (1-5)

##### 299. Research (1-12)

(S/U grading only.)

#### Professional

##### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## Theatre and Dance

(College of Letters and Science)

David Grenke, Chairperson of the Department

**Department Office.** 101 Art Building

530-752-0888; Fax 530-752-8818

<http://arts.ucdavis.edu/theatre-dance>

### Faculty

Lawrence Bogad, Ph.D., Associate Professor

David Grenke, Professor

Lynette Hunter, Ph.D., Distinguished Professor

John Iacovelli, M.F.A., Professor

Peter Lichtenfels, Professor

Maggie Morgan, M.F.A., Professor

Jon D. Rossini, Ph.D., Associate Professor

### Emeriti Faculty

Bobbie J. Bolden, M.A., Senior Lecturer Emerita

Harry C. Johnson, M.A., Professor Emeritus

William E. Kleb, D.F.A., Professor Emeritus

### The Theatre and Dance Major Program

The Department of Theatre and dance facilities are complemented by an excellent faculty and production staff three times a year, as well as the Granada Artist-in-Residence program, which brings a major director, choreographer or playwright to the department three times a year. The faculty includes a group of distinguished scholars in history, theory and criticism whose research and teaching focuses on social engagement and activism. Students, both majors and non-majors, can audition for department productions or apply to the Institute for Exploration in Theatre, Dance and Performance to do related work.

The A.B. degree in Theatre and Dance provides students with an appreciation for an understanding of performance and its role in culture and society. The program offers a strong foundation in all aspects of drama, theatre, dance performance, and production. Students build significant skills in specific areas (including acting, directing, choreography, design, playwriting and devising, production skills and management) as well as achieving a broad knowledge of theatre and dance.

**Productions and Facilities.** Each year's schedule includes opportunities to work with professional directors and choreographers in three Granada Artists-in-Residence productions; the Main Stage Dance/Theatre Productions; Film Festival at UC Davis; projects generated through the Institute for Exploration in Theatre, Dance and Performance; and workshops and performance projects developed by M.F.A and Ph.D. students. These productions are staged in our proscenium (Main), thrust (Wyatt), black box (Arend), performance studio (Della Davidson Performance Studio)) and intimate laboratory theatre (Lab A), as well as in the Mondavi Center's Vanderhoef Studio Theatre and Jackson Hall. These productions are part of the academic program of the department and serve an important purpose in the study of theatre and dance. Participation is open to all students.

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter ..... 24

Choose four units from Dramatic Art 21A, 40A, 40B, 42A, 42B.....4  
Dramatic Art 28, 55, 56A, 56B, 56C....20

#### Depth Subject Matter ..... 42

Two courses from Dramatic Art 142, 150, 155, 155A, 156A, 156B, 156C, 156D, 158, 159.....8  
One course from: Dramatic Art 124A, 124B, 124C, 124D, 124E, 126.....4  
One course from: Dramatic Art 120, 141, 144A, 146A .....,4  
One course from: Dramatic Art 127A, 140A, 160A .....,4  
Choose 6 units from at least 2 of: Dramatic Art 145, 180A, 180B, 180C .....,6  
Dramatic Art 180D.....4  
Choose 2 units from: Dramatic Art 180E, 180F, 180G .....,2  
Choose 16 additional units from: Dramatic Art 114, 115, 116, 120, 121A, 121B, 121C, 122A, 122B, 122C, 124A, 124B, 124C, 124D, 124E, 125, 126, 127A, 127B, 130, 135, 140A, 140B, 140C, 141, 142, 143, 144A, 144B, 145, 150, 154, 155A, 156A, 156B, 156C, 156D, 158, 159, 160A, 160B, 170 .....,16

At least 8 of these units must be in a specific area determined in consultation with a faculty adviser and reflecting preparation for the honors project.  
Dramatic Art 194A and 194B.....6  
Dramatic Art 195.....2

#### Total Units for the Major ..... 66

### A.B. with Honors Major Requirements:

UNITS

#### Preparatory Subject Matter ..... 24

Dramatic Art 28, 55, 56A, 56B, 56C ....20  
Choose 4 units from: Dramatic Art 21A, 40A, 40B, 42A, 42B .....,4

#### Depth Subject Matter ..... 56

Two courses from: Dramatic Art 142, 150, 155, 155A, 156A, 156B, 156C, 156D, 158, 159 .....,8  
One course from: Dramatic Art 124A, 124B, 124C, 124D, 124E, 126 .....,4  
One course from Dramatic Art 120, 141, 144A, 146A .....,4  
Once course from: Dramatic Art 127A, 140A, 160A .....,4  
Choose 6 units from at least 2 of: Dramatic Art 145, 180A, 180B, 180C .....,6  
Dramatic Art 180D.....4  
Choose 2 units from: Dramatic Art 180E, 180F, 180G .....,2  
Choose 16 additional units from: Dramatic Art 114, 115, 116, 120, 121A, 121B, 121C, 122A, 122B, 122C, 124A, 124B, 124C, 124D, 124E, 125, 126, 127A, 127B, 130, 135, 140A, 140B, 140C, 141, 142, 143, 144A, 144B, 145, 150, 154, 155A, 156A, 156B, 156C, 156D, 158, 159, 160A, 160B, 170 .....,16

At least 8 of these units must be in a specific area determined in consultation with a faculty adviser and reflecting preparation for the honors project.  
Dramatic Art 194A and 194B.....6  
Dramatic Art 195.....2

#### Total Units for the Major With Honors ... 80

**Major Adviser.** Consult Department office.

### Minor Program Requirements:

UNITS

#### Dramatic Art ..... 22

Two courses chosen from: Dramatic Art 142, 150, 155, 155A, 156A, 156B, 156C, 156D, 158, 159.....8  
Choose 8 additional units from: Dramatic Art 114, 115, 116, 120, 121A, 121B, 121C, 122A, 122B, 122C, 124A, 124B, 124C, 124D, 124E, 125, 126, 127A, 127B, 130, 140A, 140B, 140C, 141, 142, 143, 144A, 144B, 145, 150, 154, 155, 155A, 156A, 156B, 156C, 156D, 158, 159, 160A, 160B, 170 .....,8  
Dramatic Art 180D.....2  
Choose 4 units from: Dramatic Art 145, 180A, 180B, 180C, 180E, 180F, 180G...4

**Transfer Students.** As described above, all students completing a major in Theatre and Dance must participate in dramatic productions, including work in at least two of the following three areas: acting/dance; design (scenic, costume, lighting, painting, props, sound); directing/playwriting/stage management as well as crew assignments for a minimum of two productions while in residence at UC Davis.

Transfer students should see the major adviser for an evaluation of your previous experience.

**Guest Artists.** The Granada Visiting Artists Program brings distinguished professional artists to the campus each year, to be in residence for a quarter. These working professional artists interact closely with students in the classroom and rehearsal halls and provide them excellent pre-professional experiences of theater practice.

**Graduate Study.** The Department of Theatre and Dance offers programs of study and research leading to the M.F.A. in Theatre and Dance (the interdisciplinary weaving of acting, directing, design, choreography and practice and research) and contributing to the Graduate Group Ph.D. in Performance Studies. Detailed information may be obtained by contacting the Graduate Program Administrators: for the M.F.A. in Theatre and Dance 530-752-8710 and for the Graduate Group in Performance Studies 530-754-6973.

### Courses in Dramatic Art (DRA)

#### Lower Division

##### 1. Theatre, Performance and Culture (4)

Lecture—3 hours; discussion—1 hour. Introductory investigation of the nature of performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, performance art, dance, sports, rituals, political and religious events, and other "occasions." Not open to students who have completed course 1S. GE credit: ArtHum, Div, Wrt | AH, DD, VL, WE.—S. Bogad

##### 1S. Theatre, Performance and Culture (4)

Lecture—3 hours; discussion—1 hour. Introductory investigation of the nature of performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, performance art, dance, sports, rituals, political and religious events, and other "occasions." For Short Term Programs Abroad. Not open to students who have completed course 1. Offered irregularly. GE credit: ArtHum, Div, Wrt.

##### 2. Acting: The Basics: History and Practice (4)

Lecture—3 hours; discussion—1 hour. Introduction to the historical evolution of the actor—from ancient Greece & Asia to the Hollywood icon & postdramatic performer—and the practical foundations of acting for stage and screen. Onstage opportunities within lecture course structure. GE credit: AH, OL, VL.

##### 5. Understanding Performance: Appreciation of Modern Theatre, Dance, Film and Performance Art for the Humanities and Sciences (4)

Lecture/discussion—3 hours; laboratory/discussion—1 hour. Relevance of theatre and performance to modern culture, science and society. Approaches to theatre/dance/media/performance art, integrated into Mondavi Centre for the Arts and Theatre and Dance Department programs. (Same course as Science and Society 41.) GE credit: ArtHum, Div | AH, DD, OL, VL, WC, WE.

##### 10. Introduction to Acting (4)

Laboratory/discussion—4 hours. Fundamentals of movement, speech, theatre games, and improvisation. Selected reading and viewing of theatre productions. Intended for students not specializing in Dramatic Art. GE credit: OL, VL.

##### 11. Introduction to Presentation Skills (2)

Lecture/laboratory—4 hours. Class size limited to 20 students. Development of clear oral and physical communication skills that build confidence, presentational style and clarity for students whose command of English is at a basic level.

##### 14. Introduction to Contemporary Dance (4)

Lecture—3 hours; laboratory—3 hours. Introduction to basic issues and methods in contemporary dance. Focus on preparing the student for dancing and

dance-making through basic techniques of improvisation and composition. Consideration of dance as a cultural practice. GE credit: VL.

#### **20. Introduction to Dramatic Art (4)**

Lecture—3 hours; discussion—1 hour. Understanding and appreciation of both the distinctive and collaborative contributions of playwright, actor, director, and designer to the total work of dramatic art. Study of plays from the major periods of dramatic art in their cultural contexts. GE credit: ArtHum | AH, VL, WC, WE.

#### **21A. Fundamentals of Acting (4)**

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 20. Open to students planning to major in Theatre and Dance. Physical and psychological resources of the actor. Experience in individual and group contact and communication, theatre games, advanced improvisation, sound and movement dynamics. Viewing of theatre productions. GE credit: OL, VL.—Leavy, Merlin

#### **24. Visual Aspects of Dramatic Art (4)**

Laboratory/discussion—4 hours. Understanding and appreciation of the visual aspects of dramatic art: theatre architecture, scenery, lighting, costume, and makeup. GE credit: ArtHum | AH, VL.—Iacovelli, Morgan, Munn

#### **25. Technical Aspects of Dramatic Production (3)**

Lecture—3 hours. Technical principles of dramatic production emphasizing the three areas of scenic, costume and lighting studios. Subjects covered include basic tools, materials and equipment, production practices; and the interdisciplinary and collaborative nature of dramatic production.

#### **26. Performing Arts Production Management (3)**

Lecture—3 hours. Theoretical study of performing arts administration and backstage operations from audition through performance. Techniques of scheduling, production management, stage management, technical direction, audience control, box office, promotion, safety, accommodations for persons with disabilities and emergency procedures.

#### **28. Entertainment Engineering and Management: Stagecraft to Stage (4)**

Lecture/discussion—4 hours. Introduction to technical production and management in theatre and dance. Topics include stage management, theatrical mechanics, backstage protocols, scenic construction, properties, lighting, basic shop tools, costume shop use and construction, basic make-up, sound equipment, graphics and robotics for theatre. GE credit: ArtHum | AH.—S. (S.)

#### **30. Theatre Laboratory (1-5)**

Prerequisite: consent of instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated for credit up to 11 units.—F, W, S. (F, W, S.)

#### **40A. Beginning Modern Dance (2)**

Laboratory/discussion—4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of modern dance focusing primarily on the development of techniques and creative problem solving. Basic anatomy, dance terminology, and a general overview of modern dance history. May be repeated two times for credit. Non-dance majors can only repeat the course once. Dance majors may apply to the dance faculty adviser for permission to repeat more times. Dance is a repetitive practice that involves constant reiteration and demands this for improvement and better understanding of the somatic and proprioceptive skills. GE credit: AH, VL.

#### **40B. Intermediate Modern Dance (2)**

Laboratory/discussion—4 hours. Prerequisite: course 40A or consent of instructor. Open to students who have completed course 14 and 40A, unless with consent of instructor. Modern dance techniques. Basic anatomy, dance terminology and a general overview of modern dance history. May be

repeated one time for credit. For Dance majors, further repeats negotiated with faculty adviser in dance. GE credit: ArtHum | AH, VL.

#### **41A. Beginning Jazz Dance (2)**

Laboratory/discussion—4 hours. Prerequisite: consent of instructor. Fundamentals of jazz dance; includes warm-ups, dance techniques and combinations. Basic anatomy, dance terminology and general overview of jazz dance history. May be repeated one time for credit with consent of instructor.

#### **41B. Intermediate Jazz Dance (2)**

Laboratory/discussion—4 hours. Prerequisite: course 41A or consent of instructor. Warm-ups, dance techniques and combinations at the intermediate level. Basic anatomy, dance terminology and a general overview of jazz styles of historically significant jazz choreographers and leading contemporary jazz choreographers. May be repeated one time for credit with consent of instructor.

#### **42A. Beginning Ballet (2)**

Laboratory/discussion—4 hours. Fundamentals of ballet, focusing on the development of technique through proper alignment, quality, and rhythm. Basic anatomy, ballet terminology, and dance history. May be repeated for credit with consent of instructor. GE credit: AH, VL.

#### **42B. Intermediate Ballet (2)**

Laboratory/discussion—4 hours. Prerequisite: courses 42A or consent of instructor. Barre and center work at the intermediate level. Development and refinement of technique through proper alignment, rhythmic, and qualitative understanding. Anatomy, ballet terminology, and dance history. May be repeated for credit with consent of instructor. GE credit: AH, VL.

#### **43A. Contact Improvisation Dance (2)**

Lecture/laboratory—4 hours. Fundamentals of contact improvisation and its applications to all forms of dance, performance, sports, physical safety and health. Solo improvisation, safety, communication, alignment, basic lifting and weight-sharing, intuition, developing relaxed readiness and personal expression. May be repeated two times for credit. Offered irregularly. GE credit: AH, VL.

#### **43B. Intermediate Contact Improvisation (2)**

Lecture/laboratory—4 hours. Prerequisite: course 43A or consent of instructor. Building on the fundamentals. Reviewing basics, extended improvising, skillfully working with partners of different sizes and abilities, advanced lifting, advanced safety practices, embracing risk and disorientation, subtle nuances of communication. May be repeated two times for credit. GE credit: ArtHum | AH, VL.

#### **44A. Beginning Hip Hop Dance (2)**

Laboratory/discussion—4 hours. Fundamentals of Hip Hop dance focusing on developing a fluid movement vocabulary, facility in body isolations, intricate rhythmic patterning, quick shifts of weight and mastering dance combinations. Discussions on Hip Hop dance history, styles and terminology. May be repeated one time for credit.

#### **44B. Intermediate Hip Hop Dance (2)**

Laboratory/discussion—4 hours. Prerequisite: course 44A or consent of instructor. Expansion of Hip Hop dance vocabulary by focusing on mastering body isolations and intricate rhythmic techniques, complex dance combinations, advanced across the floor sequences. May be repeated one time for credit.

#### **55. Contemporary Local, National and Global Theatre, Dance and Performance (4)**

Lecture/discussion—4 hours. Introduction a range of contemporary theatre, dance and performance in local, national and international settings. Training in critical approaches to and aesthetic appreciation of these forms. Emphasis varies based on instructor. GE credit: ArtHum | AH, DD, VL, WC.

#### **56A. History of Theatre and Dance I: Myth, Magic and Madness (4)**

Lecture/discussion—4 hours. Exploration of aesthetic movements in various disciplines of theatre and dance from the origins to 1550. Examination of Greek, Roman, Sanskrit, Kathakali, Chinese, Japanese, Mesoamerican, Medieval European, and Indigenous theatre and dance including oral, ritual and shamanic performance. Offered once a year. GE credit: ArtHum | AH, VL, WC.

#### **56B. History of Theatre and Dance II: Romance, Revenge and Rebellion (4)**

Lecture/discussion—4 hours. Exploration of aesthetic movements in various disciplines of theatre and dance from 1550 to 1850. Examination of genres related to romance, revenge and rebellion using European, North and South American, and Asian examples. Offered once a year. GE credit: ArtHum | AH, VL, WC.

#### **56C. History of Theatre and Dance III: Sex, Society and the State (4)**

Lecture/discussion—4 hours. Exploration of aesthetic movements in various disciplines of theatre and dance from 1850-1968. Examination of melodrama, popular theatre, naturalism, psychological realism, and the avant-garde using European, North and South American, Asian, and African examples. Offered once a year. GE credit: ArtHum | AH, VL, WC.—F, W, S. (F, W, S.)

#### **92. Internship in Dramatic Art (1-12)**

Prerequisite: consent of instructor and department chairperson. Restricted to lower division students with less than 84 units completed. Internship outside the Department of Theatre and Dance enabling students to practice their skills. May be repeated up to 12 units for credit. (P/NP grading only.)

#### **98. Directed Group Study (1-5)**

Primarily for lower division students. (P/NP grading only.)

#### **99. Special Study for Undergraduates (1-5)**

(P/NP grading only.)

#### **Upper Division**

#### **111. Advanced Presentation Skills (2)**

Lecture/laboratory—4 hours. Class size limited to 20 students. Development of clear oral and physical communication skills that build confidence, presentational style and clarity for students whose command of English is at a competent to fluent level. GE credit: OL.

#### **111S. Representation and Identity in Culture and Cinema (4)**

Lecture/discussion—2 hours; film viewing—4 hours. Issues of personal and collective identity via study of film narratives from different cultures. Reflection of dominant cultural identities in film. Taught in Australia. GE credit: ArtHum, Div, Wrt.

#### **114. Theatre on Film (4)**

Lecture/discussion—3 hours; film viewing—2 hours; term paper. Prerequisite: consent of instructor. Study of six/eight plays on film, using mixed casts and raising issues of diversity. Focus: sociohistorical context for production and reception, interpretation and analysis of topics (gender, ethnicity, age, politics, philosophy), and filming, screenwriting, design, and acting/directing for film. GE credit: ArtHum or SocSci, Div, Wrt | Ah or SS, VL.

#### **115. Advanced Study of Major Film Makers (4)**

Lecture/discussion—3 hours; film viewing—2 hours. Analysis of the contribution of some outstanding film creators. Study of diverse aesthetic theories of the cinema and their application to selected films. May be repeated for credit when different film creator studied, or studied with a different methodological approach. GE credit: VL.

#### **116. Design on Screen (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Analysis of the contribution of outstanding designers for cinema, television and filmed entertainment. Study of diverse aesthetic theories of production design and art direction, costume design, or cinema-

tography. Introductory principles and practice, history. May be repeated two times for credit when topic differs. (Same course as Cinema and Technocultural Studies 116.) Offered irregularly. GE credit: ArtHum | AH, VL.—Iacovelli, Morgan

#### **120. Intermediate Acting/Gateway: The Actor's Toolkit (4)**

Lecture/laboratory—6 hours. Prerequisite: course 21A or consent of instructor. Limited enrollment. Implementation of acting tools drawn predominantly from Stanislavsky's 'system'. Gateway into the Advanced Acting courses. GE credit: OL, VL.—Leavy, Merlin

#### **121A. Advanced Acting: Scene Study and Script Analysis (4)**

Lecture/laboratory—6 hours. Prerequisite: course 120 and consent of instructor. Limited enrollment. In-depth study, analysis and performance of texts from different eras, genres and styles. Implementation of tools to undertake independent preparation of character creation. May be repeated up to eight units for credit. Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. New scripts and scenes must be undertaken in the repetition. Offered in alternate years. GE credit: OL, VL.

#### **121B. Advanced Acting: Rehearsal Processes and Practices (4)**

Lecture/laboratory—6 hours. Prerequisite: course 120 and consent of instructor. Limited enrollment. Development of rehearsal practice and etiquette, using a variety of scenes from different eras and genres. May be repeated up to eight units for credit. The course has been established to enable visiting artists in residence to undertake the instruction, as well as faculty. Therefore, this course may be taken twice, as students will be exposed to different professional practitioners' working processes. New etudes, scripts and scenes must be undertaken in the repetition. Offered irregularly. GE credit: OL, VL.

#### **121C. Advanced Acting: Character and Style (4)**

Lecture/laboratory—6 hours. Prerequisite: course 120 and consent of instructor. Limited enrollment. Study of psycho-physical techniques to create characters with an emphasis on non-realistic styles. May be repeated up to eight units for credit. Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. New scripts and scenes must be undertaken in the repetition. Offered in alternate years. GE credit: ArtHum | OL, VL.

#### **122A. Advanced Acting: Devising and Collaboration (4)**

Lecture/laboratory—6 hours. Prerequisite: course 120 and consent of instructor. Limited enrollment. Study and practice of various devising techniques, to collaborate on and produce a series of short etudes and dramatic scenes/short plays. May be repeated up to eight units for credit. Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. New scripts and scenes must be undertaken in the repetition. GE credit: OL, VL.—Lichtenfels

#### **122B. Advanced Acting: Shakespeare and His Contemporaries (4)**

Lecture/laboratory—6 hours. Prerequisite: course 120 and consent of instructor. Limited enrollment. Study and performance of classical texts (monologues and dialogues), with a focus on Shakespeare and the Elizabethan world view. May be repeated up to eight units for credit. Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. New monologues and scenes must be undertaken in the repetition. Offered in alternate years. GE credit: OL, VL.—Lichtenfels

#### **122C. Advanced Acting: Special Topics in Acting (4)**

Lecture/laboratory—6 hours. Prerequisite: course 120 and consent of instructor. Restricted to Theatre and Dance majors; limited enrollment. Intensive study and practical exploration of a specialized

area; for example, World Theatre, Social Theatre, Physical Theatre, Musical Theatre, the Ancient Greeks, etc. May be repeated up to eight units for credit. Offered irregularly. GE credit: AH, OL, VL.

#### **124A. Principles of Theatrical Design: Scenery (4)**

Lecture/discussion—4 hours. Prerequisite: course 24 or consent of instructor. Pass One restricted to Theatre and Dance majors. Scene design processes, working drawings, sketching techniques, scale models, methods and materials of scenery construction. GE credit: ArtHum | AH, VL.—Iacovelli

#### **124B. Principles of Theatrical Design: Scenery (4)**

Lecture/discussion—4 hours. Prerequisite: course 24 or consent of instructor. Pass One restricted to Theatre and Dance majors. Analysis of plays in terms of scene design, elements of design, execution of designs for modern and period plays. GE credit: ArtHum | AH, VL.—Iacovelli

#### **124C. Principles of Theatrical Design: Lighting (4)**

Lecture/discussion—4 hours. Prerequisite: course 24 or consent of instructor. Pass One restricted to Theatre and Dance majors. Theories of lighting the stage, equipment and control systems, execution of lighting plots. GE credit: ArtHum | AH, VL.

#### **124D. Principles of Theatrical Design: Costume (4)**

Lecture/discussion—4 hours. Prerequisite: course 24 or consent of instructor. Pass one restricted to Theatre and Dance majors. Source materials for theatrical costuming, selecting fabrics, elements of design, analysis of plays in terms of costume design, execution of designs for modern and period plays. GE credit: ArtHum | AH, OL, VL.—Morgan

#### **124E. Costume Design for Film (4)**

Lecture/discussion—4 hours. Prerequisite: for Dramatic Art majors; course 24 or 124D or consent of instructor. Theory and practice of the art and business of film costume design. Script analysis, costume research, developing design concepts, budgeting, and current production practices and methods. Execution of designs for period and contemporary films. Viewing of current films. (Same course as Cinema and Technocultural Studies 124E.) GE credit: ArtHum | AH, OL, VL.—Morgan

#### **125. Scenic Painting: Studio (4)**

Lecture—2 hours; studio—1 hour; laboratory—3 hours. Prerequisite: upper division standing in Theatre and Dance, Art Studio, or Design; or course 24 or 28 or consent of instructor. Scene painting techniques, practices and materials including color mixing and matching, wood graining, faux painting techniques, glazing, creating foliage, stone and brick. May be repeated one time with consent of instructor. Offered irregularly. GE credit: ArtHum | AH, VL.—Iacovelli

#### **126. Principles of Performing Arts Stage Management (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Stage management principles for theatre, dance, musical theatre, music, and concerts. The dynamical role of the stage manager in the performing arts, upper-management team.

#### **127A. Principles of Directing (4)**

Lecture—2 hours; laboratory—4 hours. Prerequisite: consent of instructor. Director's creative approach to the play and to its staging. GE credit: VL.—Lichtenfels

#### **127B. Principles of Directing (4)**

Lecture—2 hours; laboratory—4 hours; rehearsal. Prerequisite: course 127A or consent of instructor. Director's creative approach to the actor. GE credit: VL.—Lichtenfels

#### **128. Principles of Theatre Sound (3)**

Lecture/discussion—2 hours; laboratory—3 hours. Fundamentals of sound, sound equipment, and sound design as used in modern theatre and other performance venues. Assembly, set-up, and operation of basic theatre sound reinforcement system, recording system, and theatrical playback system.

#### **130. Approaches to Theatrical Design: Practice and Theory (4)**

Seminar—2 hours; studio—4 hours. Prerequisite: upper division standing in Theatre and Dance, Art Studio or Design; any class from course 124 series or consent of instructor. Advanced design study in specific areas including but not limited to: research, design styles and concepts, new materials and techniques, scenery, lighting, costume, makeup, photography, projections, computer technology, spectacle and special effects, and alternative theatre forms and genres. May be repeated three times for credit when topic differs; when instructor differs. Offered irregularly. GE credit: ArtHum | AH, VL.—Iacovelli, Morgan

#### **135. Voice in Performance (2)**

Performance instruction—4 hours. Prerequisite: course 21B or consent of instructor. Progression of exercises to free, develop and strengthen the voice, as a human and then as an actor's instrument with emphasis on how the voice works, to freeing the channel for sound, to interpersonal communication. May be repeated two times for credit.

#### **140A. Dance Composition (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 40A or 41A or 42A or consent of instructor. Introduction to the craft of choreography. Compose phrases and present movement studies based on the elements of choreography: motivation, space, time, force/energy. GE credit: VL.—Grenke

#### **140B. Dance Composition (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 140A. Continuation of the study of choreography, focusing on the development of group choreography: duets, trios, quartets and group work, form, and accompaniment.—Grenke

#### **140C. Dance Composition (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 140A, 140B. Continuation of study of choreography focusing on sequencing movements for groups. The relation between dance and allied mediums of music, sets, costumes and lighting. Students conceptualize a choreographic issue and explore it through creation of short dance studies.—Grenke

#### **141. Introduction to the Fundamentals of Movement (4)**

Lecture/discussion—4 hours. Introduction to fundamentals of movement that combines intellectual and kinesthetic understanding of the body's skeletal and muscular systems. Explorations based on theories of various body mind specialists including Laban, Feldenkrais, Bartenieff and Sweigard as well as the eastern discipline of Yoga. GE credit: VL.

#### **142. History of Modern Dance (4)**

Lecture/discussion—4 hours. Modern Dance tradition, focusing on its theorizations of individual and social identity. Students will write and choreograph analyses of principle dances in this tradition. Offered in alternate years. GE credit: ArtHum | AH, VL, WE.—Grenke

#### **143. Dance and Movement Studio (1-4)**

Laboratory/discussion—2-8 hours. Prerequisite: consent of instructor. Special studies in dance and movement such as African, Balinese, Baroque, Chinese, European, and stage combat. Offered as needed for stage productions. May be repeated up to eight units for credit. GE credit: AH, VL.

#### **144. Introduction to Traditional Chinese Physical Culture (4)**

Lecture/discussion—4 hours. Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications. GE credit: ArtHum or SocSci, DIV | AH, SS.—Hunter

#### **144A. Introduction to Traditional Chinese Embodied Culture (4)**

Laboratory/discussion—4 hours. Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of

practice with conceptual analysis; contemporary social, educational and artistic applications. GE credit: AH or SS, DD, VL, WC.—Hunter

#### **144B. Traditional Chinese Physical Culture (4)**

Lecture/discussion—4 hours. Prerequisite: course 144A. Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications. May be repeated two times for credit when content and instructor varies and if student progression is required. GE credit: ArtHum or SocSci, Div | AH or SS, DD, VL, WC.—Hunter

#### **144C. Daoist Philosophy in Traditional Chinese Movement Culture (4)**

Lecture/discussion—4 hours. Prerequisite: course 144B. Daoist practices of movement and their relation to daoist philosophy, explored through work in dance laboratory conditions. Integration of practice with conceptual analysis, and critical philosophy around values and ethical action. May be repeated two times for credit when content or instructor varies and if student progression is required. GE credit: ArtHum | AH, DD, VL, WC.—Hunter

#### **145. Directed Choreography Projects (4)**

Lecture/laboratory—6 hours. Prerequisite: courses 140A, 140B, 140C or consent of instructor. Conceptualization, creation, casting, rehearsing, and concert presentation of complete dances, with students integrating elements of stagecraft and directing the on-stage rehearsals.—Grenke

#### **146A. Professional Track Modern Dance I (4)**

Lecture/laboratory—6 hours. Prerequisite: course 146A; consent of instructor. Professionally oriented performance training. Rigorous, consistent training regimen based on traditional modern dance technique. Breath and voice, skeletal and muscular placement, moving from the spine, contraction technique, movement intention. May be repeated two times for credit. GE credit: VL.—Grenke

#### **146B. Professional Track Modern Dance II (4)**

Lecture/laboratory—6 hours. Prerequisite: courses 40B and 146A; consent of instructor. Continuation of course 146A. Body and space relationships in solos, duets and group work; stylistic variations of Graham technique; works of Paul Taylor. May be repeated one time for credit. GE credit: VL.—Grenke

#### **146C. Professional Track Modern Dance III (4)**

Lecture/laboratory—6 hours. Prerequisite: courses 40B, 146A and 146B; consent of instructor. Continuation of course 146B. Time as a theatrical device, sustaining movement and non-movement, phrasing, musicality. May be repeated one time for credit. Offered irregularly. GE credit: VL.—Grenke

#### **150. American Theatre and Drama (4)**

Lecture—4 hours. The history of the theatre from Colonial times to the present. Readings of selected plays. Offered in alternate years. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, VL, WE.

#### **151S. Australian Performance and Culture (4)**

Lecture/discussion—2 hours; seminar—2 hours. Australian performance and theatre practices as a product of its culture of origin. Relationships between art and society. Taught in Australia. GE credit: ArtHum.

#### **154. Asian Theatre and Drama: Contexts and Forms (4)**

Lecture/discussion—4 hours. Selected Asian plays and performance forms in their cultural and artistic contexts; myth, ritual and the theatre; performance training, visual presentation of the text; political theatre; intercultural performance—the fusion of Asian and Western traditions. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

#### **155. Representing Race in Performance (4)**

Lecture—4 hours. Representation and performance of "race" in American culture featuring different sub-headings such as "African American Theatre" or "Asian-Americans on Stage." May be repeated one time for credit when topic differs. GE credit: ArtHum, Div, Wrt | AH, DD, WE.—Rossini

#### **155A. African American Dance and Culture in the United States, Brazil and the Caribbean (4)**

Lecture/discussion—4 hours. Comparative study of the African American dance forms in the U.S.A., Brazil, Haiti, Cuba, Jamaica, Barbados, and Trinidad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms. (Same course as African American and African Studies 155A.) Offered in alternate years. GE credit: ArtHum | AH, VL, WC.

#### **155B. Ancient and Contemporary Greek Theatre and Dance (6)**

Discussion/laboratory—10 hours; performance instruction—10 hours; seminar—13 hours. Origins of early theatres and the first actors, playwrights and dancers and their powerful influence on western performance and thought up to present day. Offered in Greece. GE credit: ArtHum | AH.

#### **156AN. Performance Analysis (4)**

Lecture—3 hours; discussion—1 hour. Performance on the stage, in the street, in everyday life, ritual, and in politics. Satire, irony, creative protest and performance. Social movements, the state, and performance as tactical intervention. GE credit: ArtHum, Div, Wrt | AH, DD, WE.—Bogad

#### **156B. Theatre in History and Place: Local, National and Global Conditions for Production (4)**

Lecture—3 hours; discussion—1 hour. Exploration of local, national and global issues in theatre production, with special attention to historical changes in social and political contexts for performance. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Hunter

#### **156C. Modern Aesthetic Movements in Performance (4)**

Laboratory/discussion—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Important movements in performance, especially theatre and dance, from realism to the present. Primary emphasis on Western traditions though others may be studied. GE credit: ArtHum, Div, Wrt | AH, WE.

#### **156D. Theatre History through Shakespeare (4)**

Lecture—4 hours; extensive writing. Shakespeare's plays, theatre history, and theatre today. European contexts from 1590-2004 and international theatre from 20th century. Stagecraft, different media (print, stage, film), social/political environments, design, and cultural change (gender, sexuality and ethnicity). May be repeated one time for credit. ArtHum, Div, Wrt | AH, OL, WC, WE.

#### **158. Performance Studies Undergraduate Seminar (4)**

Seminar—4 hours. Prerequisite: course 156AN recommended; consent of instructor. Focused inquiry into a particular genre, period, movement, artist, or theme in performance. Philosophical and aesthetic issues as well as historical and cultural performance contexts. In-depth research projects in relationship to the subject of inquiry. May be repeated for credit. Offered irregularly. GE credit: Wrt.—Bogad

#### **159. Contemporary Experimental Performance, Theatre and Drama (4)**

Lecture/discussion—3 hours; extensive writing. Evaluation and examination of the "New Theatre;" its experimental and innovative nature since the 1960s. Dance, film, stage, performance art and public acts of a performative nature. May be repeated three times for credit when topic differs. GE credit: AH, DD, VL, WC, WE.

#### **159S. Contemporary Experimental Performance, Theatre and Drama (4)**

Lecture/discussion—4 hours. Evaluation and examination of the "New Theatre" – its experimental and innovative nature since the 1960s. Dance, film, stage, performance art and public acts of a performative nature. May be repeated up to 12 units for credit if instructor or content varies. Offered irregularly. GE credit: ArtHum | AH, WE.—Su.

#### **160A. Principles of Playwriting (4)**

Lecture/discussion—4 hours. Prerequisite: two courses in Theatre and Dance or related courses in other departments; consent of instructor. Analysis of dramatic structure; preparation of scenarios; the composition of plays. GE credit: WE.—Rossini

#### **160B. Principles of Playwriting (4)**

Lecture—4 hours. Prerequisite: course 160A; consent of instructor. Analysis of dramatic structure; preparation of scenarios; the composition of plays. GE credit: WE.—Rossini

#### **170. Media Theatre (4)**

Lecture—1 hour; rehearsal—2 hours; performance instruction—1 hour. Prerequisite: consent of instructor. New media and application of in theatre devising and performance. Emphasis on collaborative process in relationship to integration of emerging technologies and formation of new theatrical works. Development of collaborative performance through lecture, demonstration, improvisation and experimentation. May be repeated one time for credit. GE credit: ArtHum | AH, VL.

#### **174. Acting for Camera (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: consent of instructor. Analysis and practice of acting skills required for camera work and digital media. May be repeated eight times for credit when instructor differs. (Same course as Cinema & Technocultural Studies 174.)

#### **175. Small Scale Film Production (4)**

Lecture/laboratory—6 hours. Prerequisite: consent of instructor. Lecture and intensive workshop teaching small-scale film production. Appointments as a(n) director, director of photography, actor, writer, lighting designer, sound designer and other critical positions are used to produce and submit a short film to a film festival. (Same course as Technocultural Studies 175.) May be repeated two times for credit.

#### **180. Theatre Laboratory (1-5)**

Prerequisite: consent of instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated for credit.—F, W, S. (F, W, S.)

#### **180A. Theatre Laboratory: Performance (1-5)**

Rehearsals—12 hours. Prerequisite: consent of instructor. Limited enrollment. Rehearsals and performance of a production directed or choreographed by visiting Granada Artists-in-Residence and/or faculty, and/or the UG Edge Festival. May be repeated for credit. Since each production involves different scripts, directions, challenges of rehearsal practices and performance processes, it is possible for students to appear in a variety of productions in the course of their education. Admission by audition.

#### **180B. Theatre Laboratory: Design (1-4)**

Prerequisite: consent of instructor. Design-related participation in theatre and dance productions involves research, creation and implementation of design concept in collaboration with the director and other members of the production team. May be repeated for credit. Because each theatrical piece is conceived and produced afresh with new source material, scripts, and production style the challenges and assignments for the designers will be new each and every time they design a show. GE credit: ArtHum | AH, VL.

#### **180C. Theatre Laboratory: Management, Directing, other Production Team (1-5)**

Prerequisite: consent of instructor. Participation in theatre and dance production in management, direction, choreography, dramaturgy, writing or other

production related role; research, creation and implementation of production concept in collaboration with members of the production team and cast. May repeat multiple times but only for a total of five units. Permission to repeat is required from the Dramatic Art department. GE credit: ArtHum | AH, VL.

#### **180D. Theatre Laboratory: Crew (2-4)**

Laboratory—6-12 hours. Prerequisite: consent of instructor. Participation in theatre and dance productions as backstage running crew which will involve skill development, rehearsal and execution of performance. May be repeated for credit.

#### **180E. Theatre Laboratory: Scenic (1-4)**

Laboratory—3-12 hours. Prerequisite: consent of instructor. Practical experience working on scenery and properties for theatre and dance department productions. Study and execution of basic scenery and prop engineering, construction, painting, rigging. Study of techniques, materials, tools, and equipment use. Skill development, professional etiquette. Safety training requirement. May be repeated for credit.

#### **180F. Theatre Laboratory: Costume (1-4)**

Laboratory—3-12 hours. Prerequisite: consent of instructor. Practical experience working on costumes for theatre and dance department productions. Study and execution of basic costume construction techniques and materials, tools, and equipment use. Skills development, professional etiquette. Safety training requirement. May be repeated for credit. —F, W, S. (F, W, S.)

#### **180G. Theatre Laboratory: Lighting/Sound/Projection (1-4)**

Laboratory—3-12 hours. Prerequisite: consent of instructor. Practical experience working on lighting, sound or projections for theatre and dance department productions. Study and execution of basic techniques, materials, tools, and equipment use. Skill development, professional etiquette. Safety training requirement. May be repeated for credit.

#### **192. Internships in Theatre and Dance (1-12)**

Internship—3-36 hours. Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or theatre/dance/physical theatre companies. May be repeated for credit for a total of 12 units. Not open to students who have completed course 192S. (P/NP grading only.)

#### **192S. Internships in Theatre and Dance (1-12)**

Internship—3-36 hours. Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or theatre/dance/physical theatre companies. This course is offered in Sydney, Australia. May be repeated for credit for a total of 12 units. Not open to students who have completed course 192. Offered irregularly. (P/NP grading only.)

#### **194HA. Special Study for Honors Students (3)**

Independent study—9 hours. Prerequisite: qualification for Letters and Science Honors Program and admission to Theatre and Dance Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of Dramatic Art. (Deferred grading only, pending completion of sequence).

#### **194HB. Special Study for Honors Students (3)**

Independent study—9 hours. Prerequisite: qualification for Letters and Science Honors Program and admission to Theatre and Dance Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of Dramatic Art. (Deferred grading only, pending completion of sequence).

#### **195. Senior Capstone Experience (2)**

Project; lecture/discussion—1 hour. Open to Theatre and Dance Majors who have completed 135 or more units. Capstone experience for majors. Examination, reflection and synthesis on development. Discussion of professional development and translatable skills. Individual project and development of portfolio. (P/NP grading only.) GE credit: ArtHum | AH, VL.

#### **197T. Tutoring in Dramatic Art (1-5)**

Tutoring—1-5 hours. Prerequisite: upper division or graduate standing with major in Theatre and Dance; consent of department chairperson. Leading of small voluntary groups affiliated with one of the department's regular courses. May be repeated for credit. (P/NP grading only.) —F, W, S. (F, W, S.)

#### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **Graduate**

#### **200. Methods and Materials in Theatre Research (4)**

Seminar—3 hours; term paper. Essential research tools in theatre and related fields; bibliographies, primary sources; methods of evaluating and presenting evidence; delineating research areas in the field.

#### **211. Advanced Voice and Speech (3)**

Lecture/discussion—2 hours; laboratory—2 hours. Prerequisite: consent of instructor. Open only to Dramatic Arts Students and Ph.D. students with an emphasis in Performance and Theatre. Review a progression of exercises to free, develop and strengthen the voice, first as a human instrument, and then as an actor's instrument using various texts such as Shakespeare, Ibsen and contemporary plays. Required for the M.F.A. degree in Acting. May be repeated two times for credit.

#### **212. Advanced Stage Movement (3)**

Laboratory—6 hours. Prerequisite: consent of instructor; graduate standing in the MFA program. Open to advanced undergraduates by consent of instructor. Application of modes of exploration, breath placement, and the use of imagery as well as Laban's effort/shape system as a method of analysis in classic and modern plays. May be repeated for credit.

#### **221. Special Problems in Advanced Acting (4)**

Seminar—2 hours; laboratory—4 hours. Prerequisite: consent of instructor. Advanced acting problems arising from differences in the type and style of plays selected from Greece to the present. May be repeated for credit.

#### **224A. Seminar in Theatrical Design: Ancient Worlds—Early 17th Century (4)**

Seminar—2 hours; project—2 hours. Prerequisite: consent of instructor. Group study while focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Greek, Medieval, Renaissance, Shakespearean, Jacobean, early 17th century. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.

#### **224B. Seminar in Theatrical Design: Mid 17th Century to 1900 (4)**

Seminar—2 hours; project—2 hours. Prerequisite: consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Cavalier, Restoration 17th century opera and ballet, 19th century drama. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.

#### **224C. Seminar in Theatrical Design: the 20th Century (4)**

Seminar—2 hours; project—2 hours. Prerequisite: consent of instructor. Group study focusing primarily on one discipline—scenic, costume or lighting design.

20th century genres covered: Realism, Brecht, Musicals, Contemporary Dance, short narrative film. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.

#### **224D. Seminar in Theatrical Design: Contemporary Concepts (4)**

Seminar—2 hours; project—2 hours. Prerequisite: consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on contemporary design concepts for new works and classics: Shakespeare, modern dance, concept plays and musicals. Script and character analysis for design in performance, research, design projects.

#### **224E. Seminar in Theatrical Design: Advanced Concepts (4)**

Seminar—2 hours; project—2 hours. Prerequisite: consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on special issues in contemporary design concepts for new works and classics. Script and character analysis for design in performance, research, design projects.

#### **225. Performance Design Studio: Techniques and Media (2)**

Studio—2 hours. Prerequisite: consent of instructor. Exploration and development of techniques and skills in the performance design process. Drafting, model building, drawing, painting and rendering, costume drawing, color theory, lighting techniques, design portfolio preparation and presentation. May be repeated up to five times for credit.

#### **228. Seminar in Directing Theory: Non-Realism (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Modern directing theory as it applies to non-realistic theatre; development of directorial concepts for production of selected non-realistic plays—Greek to the present; emphasis on textual analysis.

#### **229. Special Problems in Directing (4)**

Seminar—2 hours; laboratory—2 hours; rehearsal—4 hours. Prerequisite: consent of instructor. Projects in directing scenes selected from plays from ancient Greece to the present. May be repeated two times for credit.

#### **230. Advanced Problems in Choreography and Performance (2)**

Laboratory/discussion—2 hours. Prerequisite: consent of instructor. Explores contemporary issues of choreography and performance in depth and how those issues pertain to performance work. Focus will include contemporary thought on representation, legibility, new forms, and cultural attitudes. May be repeated six times for credit.

#### **244. Critical Approaches to Traditional Systems of Body Movement (4)**

Discussion/laboratory—6 hours; project; term paper. Prerequisite: consent of instructor. Introduction to traditional systems for body movement, development of critical approaches to them, and experiments in how they inform training and practice in theatre, dance, and performance. May be repeated five times for credit. Offered irregularly.

#### **250. Modern Theatre (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. The theatre of Europe and America, 1860-1940, with emphasis on the relationship of the dramas of the period to the physical circumstances under which they were produced.

#### **251. Scoring and Scripting in Performance (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: consent of instructor. Process of weaving together various performance elements brought into play by the artists in their respective disciplines. The "script" is the thread from which the artists' "scores" will layer and transform the "script" into performance for specific time, place, spectators. Offered in alternate years.

**252. Performance: Concepts of Space, Place, and Time (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: consent of instructor. Innovative theories of creating performance spaces, establishing a sense of place, and communicating the concept of time explored through collaborative interaction. Research includes traditional principles, site-specific spaces and consideration of various tempi from music and movement. Offered in alternate years.

**253. Approaches to Collaboration (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: consent of instructor. Exploration of different approaches to collaboration among artists in different media and their influence on the creative process.

**254. Performing Identities/Personae (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: consent of instructor. Historical and contemporary theories of constructing stage identities. Discussion and project collaborations based on theories. Questions of identity related to ethnicity, gender or sexual orientation. Offered in alternate years.—S. (S.)

**255. Composition in the Arts (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: consent of instructor. Examine manner in which specific elements utilized by actors, dancers, directors, choreographers, and designers are combined or related to form a whole in space and time, as well as methods of sequencing used by each discipline to produce artistic products. May be repeated one time for credit.

**256. Visual Language for Performance (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Restricted to graduate students. Exploration of different approaches and methods to the visual elements of performance. Focus on design and style for different media and genres, storytelling through visual elements of performance. Offered in alternate years.—Morgan

**257. Interdisciplinary Seminar in Theatre, Dance and Performance (1)**

Seminar—1.5 hours; project—1.5 hours. Prerequisite: consent of instructor. Restricted to students enrolled in the MFA in Dramatic Art; students taking the PhD in Performance Studies or the DE in Studies in Performance and Practice may apply to enroll. Interdisciplinary seminar for first and second year MFA students in Dramatic Art. Topics range from current practice in dance, theatre, film and performance, to leading edge developments by outstanding practitioners in the field. May be repeated two times for credit.

**259. Topics in Contemporary Theatre and Performance (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Special topics designed to study in depth aspects of contemporary performance including performance analysis, cultural and historical context, modes of production, theoretical and political entailments, and issues of spectatorship (e.g., "Brecht and After," "British Theater," "Race and Gender in Performance.") May be repeated five times for credit.—F, W, S. (F, W, S.)

**260. Topics in Contemporary Theatre and Performance (4)**

Seminar—3 hours; term paper; project. Prerequisite: admission to any graduate program in the University; consent of instructor. Preference to students enrolled in the Designated Emphasis in Studies in Performance and Practice. Instruction is offered a variety of disciplinary approaches and methodologies in Performance and Practice, with a focus is on cross-disciplinary learning and research. Usually offered each quarter. Maybe repeated for credit when content differs. Offered irregularly.

**265A. Performance Studies: Modes of Production (4)**

Seminar—3 hours; term paper; project. Prerequisite: consent of instructor. Introduces students to the literature of performance production in a variety of media: theatre, dance, film, video, computer-based,

looking at cultural, aesthetic, rhetorical and political theory. May be repeated three times for credit when topic differs. Offered in alternate years.

**265B. Performance Studies: Signification and the Body (4)**

Seminar—3 hours; term paper; project. Prerequisite: consent of instructor. Introduces students to analysis of the body in performance, drawing on theoretical models from several fields. May be repeated three times for credit when topic differs. Offered in alternate years.

**265C. Performance Studies: Performance and Society (4)**

Seminar—3 hours; term paper; project. Prerequisite: consent of instructor. Introduces students to the role of performance (broadly defined), in everyday life, sociopolitical negotiation, identity, social movements, the media, and the state. May be repeated three times for credit when topic differs. Offered in alternate years.—W, S. (W, S.)

**265D. Performance Studies: Theory, History, Criticism (4)**

Seminar—3 hours; term paper; project. Prerequisite: consent of instructor. Introduction to the theory, history and criticism, informing performance studies. May be repeated three times for credit when topic differs. Offered in alternate years.

**280. Theatre Laboratory (1-12)**

Prerequisite: consent of instructor. Advanced practice in acting, designing, directing, playwriting, and technical theatre. May be repeated for credit.

**298. Group Study (1-5)**

Prerequisite: consent of instructor.

**299. Individual Study (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**299D. Dissertation Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**Professional****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: consent of instructor. May be repeated for credit. (S/U grading only.)

**Professional****413. Stage Make-up (1)**

Lecture/laboratory—2 hours. Prerequisite: consent of instructor. Approved for graduate degree credit. Lectures, demonstrations, and practical work in aspects of theatrical make-up.

## Transportation Technology and Policy (A Graduate Group)

Susan Handy, Ph.D., Chairperson of the Group

**Group Office.** 1605 Tilia, Suite 100  
530-752-0247; <http://www.its.ucdavis.edu>

**Faculty**

Gwen Arnold, Ph.D., Assistant Professor  
(Environmental Science and Policy)

Francis Assadian, Ph.D., Professor  
(Mechanical and Aerospace Engineering)

David Bunch, Ph.D., Professor  
(Graduate School of Management)

Paul Erickson, Ph.D., Associate Professor  
(Mechanical and Aerospace Engineering)

Yueyue Fan, Ph.D., Associate Professor  
(Civil and Environmental Engineering)

Y. Hosseini Farzin, Ph.D., Professor  
(Agricultural and Resource Economics)

Susan Handy, Ph.D., Professor  
(Environmental Science and Policy)

John T. Harvey, Ph.D., Professor  
(Civil and Environmental Engineering)

Miguel Jaller, Ph.D., Assistant Professor  
(Civil and Environmental Engineering)

Bryan Jenkins, Ph.D., Professor  
(Biological and Agricultural Engineering)

Alissa Kendall, Ph.D., Associate Professor  
(Civil and Environmental Engineering)

Cynthia Lin Lawell, Ph.D., Associate Professor  
(Agricultural and Resources Economics)

Frank Loge, Ph.D., Professor  
(Civil and Environmental Engineering)

Mark Lubell, Ph.D., Professor  
(Environmental Science and Policy)

Erich Muehlegger, Assistant Professor  
(Economics)

Debbie A. Niemeier, Ph.D., Professor  
(Civil and Environmental Engineering)

Joan Ogden, Ph.D., Professor  
(Environmental Science and Policy)

David Rapson, Ph.D., Assistant Professor  
(Economics)

Simon Sadler, Ph.D., Professor (Design)

Daniel Sperling, Ph.D., Professor (Civil and Environmental Engineering, Environmental Science and Policy)

Stephen M. Wheeler, Ph.D., Associate Professor  
(Landscape Architecture)

Michael Zhang, Ph.D., Professor  
(Civil and Environmental Engineering)

**Emeriti Faculty**

Thomas Cahill, Ph.D., Professor Emeritus  
(Atmospheric Science and Physics)

Dan Chang, Ph.D., Professor Emeritus  
(Civil and Environmental Engineering)

Harry Dwyer, Ph.D., Professor Emeritus  
(Mechanical and Aerospace Engineering)

Mark Francis, M.L.A., Professor  
(Landscape Architecture)

Andrew A. Frank, Ph.D., Professor Emeritus  
(Mechanical and Aerospace Engineering)

Robert Johnston, Ph.D., Professor Emeritus  
(Environmental Science and Policy)

Patricia L. Mokhtarian, Ph.D., Professor Emeritus  
(Civil and Environmental Engineering)

**Affiliated Faculty**

Rahman Azari, Ph.D., Lecturer (Statistics)

Andrew F. Burke, Ph.D., Research Engineer  
(Institute of Transportation Studies)

Steven S. Cliff, Ph.D., Research Engineer  
(Applied Science)

Kenneth S. Kurani, Ph.D., Research Engineer  
(Institute of Transportation Studies)

Alan Meier, Ph.D., Professional Researcher  
(Institute of Transportation Studies)

Gian-Claudia Sciarra, Ph.D., Assistant Professional Researcher (Institute of Transportation Studies)

Gil Tal, Ph.D., Assistant Professional Researcher  
(Institute of Transportation Studies)

Thomas Turrentine, Ph.D., Research Anthropologist  
(Institute of Transportation Studies)

Christopher Yang, Ph.D., Research Scientist  
(Institute of Transportation Studies)

Sonia Yeh, Ph.D., Research Scientist  
(Institute of Transportation Studies)

**Graduate Study.** The Graduate Group in Transportation Technology and Policy offers the M.S. (Plan I—thesis; and Plan II—exam), and Ph.D. degrees in two areas of specialization: Transportation Technology; and Transportation Planning and Policy. The technology track is for students trained in engineering and the physical sciences and interested in systems-level planning, analysis, management and design of advanced technologies (emphasizing vehicle propulsion and "intelligent transportation system" technologies) focusing on energy and environmental issues. The planning and policy track is aimed at students from a wider range of disciplines interested in the broader public policy issues concerning transportation systems. The curriculum for both tracks includes courses in civil, mechanical, and environmental engineering, economics, policy sciences, statistics, travel behavior, management, technology assessment and environmental studies.

**Preparation.** Applicants will normally be expected to have completed two courses in calculus, one course in linear algebra, and one course each in calculus level statistics and microeconomics. Additionally, students entering the technology track will need either to have an appropriate technical background or make up a relatively large number of prerequisite courses in order to be able to take the approved courses in that track.

**Program of Study.** Students will have the option of following either a technology or policy/management track. M.S. students complete 6 core courses plus electives. Ph.D. students take 7 courses from the same core, 3 additional courses from their chosen track, one more in the alternate track, plus electives. Master's degrees require a minimum of 36 quarter units and doctoral degrees require a minimum of 54 units. M.S. Plan I students may replace up to 6 units of regular course work with research (course 299) units. At least two thirds of all credits must be at the graduate level.

**Graduate Advisers.** YueYue Fan and Alissa Kendall

## Curriculum

**Core Courses.** Students in each track are required to take courses in a common set of core competencies, as well as (for Ph.D. students) some courses in the other track.

**Knowledge areas core courses:** M.S. and Ph.D. students take Transportation Technology (TP 210), Transportation Policy (ECI 252 or TTP 220), and Transportation Systems (ECI 251).

**Skill areas core courses:** M.S. and Ph.D. students take one in the area of Research Design from the following: Transportation Survey Methods (TPP 200), Research Methods in Environmental Policy (ESP 278), Survey and Questionnaire Research Methods (PSY 207), Design and Analysis of Engineering Experiments (EBS 265), Experimental Design and Analysis (PLS 205), Engineering Experimentation and Uncertainty Analysis (MAE 207), or Statistical Methods for Research (STA 205);

M.S. students take one and Ph.D. students take two in the area of Transportation Models and Quantitative Methods from the following: Applied Linear Programming (ARE 252), Optimization Techniques with Economic Applications (ARE 253), Dynamic Optimization Techniques with Economic Applications (ARE 254), Applied Econometrics (ARE 256), Probabilistic Design and Optimization (ECI 249), Dynamic Programming and Multistage Decision Processes (ECI 253), Discrete Choice Analysis of Travel Demand (ECI 254), Urban Traffic Management and Control (ECI 256), Transportation-Air Quality: Theory and Practice (ECI 269), Quantitative Geography (GEO 200CN), Numerical Optimization (MAT 258A), Variational Analysis (MAT 258B), Applied Statistical Methods: Regression Analysis (STA 108), Applied Statistical Methods: Analysis of Variance (STA 106), Analysis of Categorical Data (STA 138), Design and Analysis of Engineering Experiments (EBS 265), Multivariate Systems and Modeling (PLS 206), or Psychological Data (PSC 204A, B, C, or D);

**Integration and Breadth core courses:** M.S. and Ph.D. students take ITS Seminars (TPP 281), Transportation Orientation Seminar (TPP 282), and Research (TPP 299).

**Planning and Policy Courses.** Approved courses in this area include the following; additional courses may be added upon approval by the Chairperson:

Agricultural and Resource Economics, 100B, 130, 136, 144, 175, 176, 204, 275, 276  
 Anthropology 104N, 127, 211, 222  
 Civil and Environmental Engineering, 165, 244A, 252, 258, 268, 269  
 Civil and Environmental Engineering/  
 Environmental Science and Policy 163, 289A  
 Communication 170  
 Community and Regional Development 162, 171, 240, 245  
 Ecology 213  
 Economics 101, 200D  
 Education 222  
 Engineering 250  
 Environmental Horticulture 110  
 Environmental Science and Policy 163, 167, 168A, 171, 179 212A  
 Geography 155  
 History 172  
 Landscape Architecture 180G, 180L, 180M, 181M, 201, 205, 220  
 Management 240, 251, 293  
 Political Science 175, 187, 208, 279  
 Psychology 155  
 Sociology 141, 143A, 143B, 160  
 Transportation Technology and Policy 200, 210, 220, 281, 282, 289A

**Technology Courses.** Approved courses in this area include the following; additional courses may be added upon approval by the Chairperson:

Applied Biological Systems Technology 180, 181N, 182  
 Atmospheric Science 116, 270  
 Applied Science Engineering 116, 220A, 220B  
 Biological Systems Engineering 216  
 Civil and Environmental Engineering 143, 149, 161, 162, 179, 242, 244, 250, 253, 256, 257, 269, 282  
 Computer Science Engineering 168  
 Environmental and Resource Sciences 131, 186  
 Electrical and Computer Engineering 207  
 Geography, 200CN  
 Landscape Architecture 150  
 Mechanical Engineering 134, 161, 163, 188, 216, 217, 218, 226, 234, 236, 258, 269

**Other Courses.** Approved courses in this area include the following; additional courses may be added upon approval by the Chairperson:

Agricultural and Resource Economics 106, 155, 252, 253, 254, 255, 256  
 Anthropology 138  
 Biological Systems Engineering 265  
 Civil and Environmental Engineering 153, 249, 254  
 Community and Regional Development 151, 151L  
 Economics 140, 240A, 240B, 240C, 256  
 Engineering, Applied Science 115  
 Engineering, Biological Sciences 265  
 Environmental Science and Policy 278  
 Graduate School of Management 249  
 Mathematics 108, 227, 258A, 258B  
 Mechanical and Aeronautical Engineering 207  
 Nutrition 492A  
 Plant Sciences 205, 206  
 Psychology 204A, 204B, 204C, 204D, 205A, 205B, 205C  
 Sociology 298  
 Statistics 106, 108, 130, 131A, 131B, 131C, 135, 137, 138, 140, 142, 144, 205, 222, 223  
 Transportation Technology and Policy 200

## Courses in Transportation Technology and Policy (TTP)

### Graduate

#### 200. Transportation Survey Methods (4)

Lecture—4 hours. Prerequisite: Statistics 13; Civil and Environmental Engineering 251 recommended. Description of types of surveys commonly used in transportation demand modeling, including travel and activity diaries, attitudinal, panel, computer, and stated-response surveys. Discussion of sampling, experimental design, and survey design issues. Analysis methods, including factor, discriminant and cluster analysis. Not open for credit to students who have taken Civil and Environmental Engineering 255. (Same course as Geography 281.)—W. (W.)

#### 210. Fundamentals of Transportation Technology (4)

Lecture—2 hours; discussion—2 hours. Prerequisite: consent of instructor; Mathematics 21A, 21B, 22A; graduate or junior/senior undergraduate as a technical elective. Limited enrollment. Fundamentals of Transportation Technology is a course designed to prepare students in the basics of thermodynamics, fluid mechanics and heat transfer as they relate to transportation. Not open for credit to students who have completed course 289. (Former course 289.)—F. (F.)

#### 220. Transportation Planning and Policy (4)

Lecture/discussion—4 hours. Limited enrollment. Transportation planning process at the regional level, including the role of federal policy in shaping regional transportation planning, tools and techniques used in regional transportation planning, issues facing regional transportation planning agencies, pros and cons of potential solutions and strategies. Students having taken this course previously as course 289 cannot repeat it for credit; having taken other course 289 offerings does not preclude taking this course for credit. (Same course as Geography 236.) Offered in alternate years.—S. Handy

#### 281. ITS Transportation Seminar Series (1)

Seminar—1.5 hours. Transportation seminars by guest speakers, on varied topics. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.) Handy, Sperling

#### 282. Transportation Orientation Seminar (1)

Seminar—1 hour. Ten weeks of seminars, introducing various topics in transportation research and education, focusing on topics of particular interest at UC Davis. May be repeated for credit. (S/U grading only.)—F. (F.) Handy

#### 283. Professionalism, Leadership, and Ethics (1)

Seminar—2 hours. Speakers from industry, government, academia, and NGOs will lead discussions about succeeding and performing in the professional world. They will address leadership, ethics, and other workplace issues. May be repeated for credit. (S/U grading only.)—S. (S.) Sperling

#### 289A. Selected Topics in Transportation Technology and Policy (1-5)

Lecture and/or laboratory. Prerequisite: consent of instructor. Directed group study of special topics with instruction carried out through lecture or laboratory, or a combination of both. May be repeated for credit. —F, W, S. (F, W, S.)

#### 289B. Selected Topics in Transportation Technology and Policy (1-5)

Lecture and/or laboratory. Prerequisite: consent of instructor. Directed group study of special topics with instruction carried out lecture or laboratory, or a combination of both. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### 290C. Graduate Research Group Conference (1)

Discussion—1 hour. Prerequisite: consent of instructor. Research problems, progress, and techniques in transportation. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## **292. Internship in Transportation Technology and Policy (1-5)**

Prerequisite: second year standing; approval of project prior to period of internship. Supervised work experience in transportation studies. May be repeated for credit if topic differs. (S/U grading only.)—F, W, S. (F, W, S.)

## **298. Group Study (1-5)**

Discussion—1-5 hours. Prerequisite: consent of instructor. (S/U grading only.)

## **299. Research (1-12)**

Discussion—1-12 hours. Prerequisite: consent of instructor. (S/U grading only.)

## **Professional**

### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## **UC Davis Study Abroad**

Aliki Dragona, Ph.D., Fadi Fathallah, Ph.D., Faculty Directors

UC Davis Study Abroad  
International Center, Suite 1120  
530-297-4633; Fax 530-297-4695;  
[studyabroad@ucdavis.edu](mailto:studyabroad@ucdavis.edu);  
<http://studyabroad.ucdavis.edu/>

The opportunity to study abroad is one of the richest educational experiences a student can have. When students return from study abroad in places like Italy or Hong Kong, they describe their time abroad as an experience that changed their lives. Students study abroad to pursue their academic interests in a global context, to learn a language, to gain practical field work, internship or lab experience, to prepare for a job in the global economy and to add distinction to an application for graduate or professional school.

UC Davis Study Abroad can help students decide which program is best for them, whether to study abroad for a summer, quarter, semester or full year and when to go abroad (freshman through senior years). UC Davis Study Abroad Coordinators also participate in freshman seminars, offer financial aid workshops and can advise on programs that have internship opportunities. UC Davis Study Abroad also administers the Global and International Studies (GIS) minor, which is sponsored by the Humanities Program in the College of Letters and Science.

UC Davis Study Abroad is home to UC Davis Quarter Abroad, UC Davis Summer Abroad, UC Davis Internships Abroad, UC Davis Seminars Abroad and the University of California Education Abroad Program (UCEAP). UC Davis Study Abroad also provides advising for students interested in non-UC “independent” programs and administers the Non-UC Study Abroad leave program. Finally, UC Davis Study Abroad advises and provides student services for international UCEAP Reciprocity students.

## **UC Education Abroad Program (UCEAP)**

Fadi Fathallah, Ph.D., Faculty Director  
UC Davis Study Abroad  
International Center, Suite 1120  
530-297-4633; Fax 530-297-4695;  
<http://studyabroad.ucdavis.edu/programs/uceap/>

The UC Education Abroad Program (UCEAP) is one of the premiere study abroad programs in the nation. UCEAP offers international study programs in association with nearly 140 host universities and institutions in some 32 countries around the world. Participating students remain registered at UC while studying abroad and receive full academic credit for their work. UCEAP students maintain their financial aid and scholarship eligibility while abroad. UCEAP has study abroad opportunities for undergraduates

at all class levels as well as for qualified graduate students who have completed at least one full year of graduate work and have the support of their graduate program and graduate dean.

UCEAP offers year, semester, quarter, and summer programs for all majors. Over 50% of the programs are offered in English, while several programs allow students to learn a language while experiencing the culture first hand. Some programs include the possibility of internships or field research. In most cases, students attend courses taught by the faculty of the host institution.

UC faculty members serve as directors at most Study Centers abroad, providing in-country academic advising to students during their program. Full UC credit is granted for courses satisfactorily completed, and courses and grades are recorded on official UC transcripts. With careful planning, most UCEAP students make normal progress toward their UC degrees, even those students who study abroad for a full year. With approval of their major or college advisers, students may earn credit towards their major, minor and general education requirements.

**Graduation Requirements.** II prospective applicants, particularly students who intend to study abroad during their senior year, should carefully plan their course programs for Davis and abroad in order to satisfy university, college, and major/minor requirements for their degree.

Although units and grade points earned while studying abroad through UCEAP are incorporated into the University transcript and GPA, departments and majors retain the right to determine which UCEAP courses will be accepted in satisfaction of major and minor requirements.

All degree candidates must meet the University residence requirement. Recognizing the special value of study abroad, the faculty have approved two exceptions to the usual residence requirement for students participating in the Education Abroad Program:

- Students planning to graduate immediately upon completion of their UCEAP program may satisfy the University residence requirement by completing at least 35 of their final 45 units on the Davis campus preceding entry into the EAP,

**or**

- Students who have not finished all of their degree requirements following completion of their UCEAP program may satisfy the University residence requirement by completing at least 35 units, including at least 12 units after returning from UCEAP, on the Davis campus within the final 90 units earned toward the degree. With this option, as many as 55 units taken abroad may be applied toward the unit requirement for graduation.

Students should consult with their college Dean's office early during the UCEAP planning process for information on the university residence requirement. Students may satisfy GE requirements while on UCEAP, but should consult with the Education Abroad Center UC Davis Study Abroad and their college Dean's office prior to departure for information on the certification process.

Students may participate in UCEAP provided that (1) they will not exceed 225 units prior to their departure and (2) that all their degree requirements have been fulfilled either before they leave campus or during their time on UCEAP study abroad program. Participants may only return to campus from UCEAP to complete any outstanding degree requirements provided that they can do so within 225 units.

Participants in programs that conclude in May or June who satisfy all degree requirements while abroad and expect to graduate upon completion of the year abroad should file for candidacy to receive their degree in September; candidacy filing dates are established by the Office of the University Registrar. In most cases, transcripts from abroad may not be received in time to be posted on the student's Davis transcript for UCEAP returnees to be included

on the June degree list. Such returning students may register to participate in the June commencement ceremony; however, their graduation date will be in September. Participants in programs that conclude in November or December should file for candidacy to receive their degree in March. Such returning students may be able to register to participate in either the December or subsequent June commencement ceremony. Their graduation date will be in March.

## **UC Davis Faculty-Led Programs Abroad**

Aliki Dragona, Ph.D., Faculty Director  
UC Davis Study Abroad  
International Center, Suite 1120  
530-297-4633; Fax 530-297-4695;  
<http://studyabroad.ucdavis.edu/>

UC Davis Study Abroad offers a number of faculty-led programs abroad, including UC Davis Quarter Abroad, UC Davis Summer Abroad, UC Davis Internships Abroad, and UC Davis Seminars Abroad. These programs enable students to study abroad in small program cohorts taught by UC Davis faculty in over 30 countries around the world. Programs are specifically tailored to UC Davis disciplines and provide unique opportunities for study, internships, field or lab work, research, and language learning in intimate and engaging environments.

Participants remain registered UC Davis students while abroad and receive UC Davis units for their academic work. Open to students from any major, these programs allow students to choose courses from a wide range of specializations.

Programs range from two-week seminars to four-week summer offerings to quarter-long options. All programs allow students to experience the host country's unique culture through co-curricular activities, such as day-trips to surrounding areas, museum tours, and theatre visits. Many also include field work, internship, or service learning opportunities.

Financial aid and scholarships apply. Students may participate in UC Davis faculty-led programs as early as their freshman year, or as late as their senior year. Applicants must have a 2.000 GPA, be in good academic and disciplinary standing, and must fulfill any prerequisites specific to the program courses.

In preparation for UC Davis Quarter Abroad, UC Davis Summer Abroad, and/or UC Davis Seminars Abroad, students are urged to take Education Abroad Program (EAP) 90X or 190X.

## **UC Davis Quarter Abroad**

Aliki Dragona, Ph.D., Faculty Director  
International Center, Suite 1120  
530-297-4633; Fax 530-297-4695;  
[quarterabroad@ucdavis.edu](mailto:quarterabroad@ucdavis.edu);  
<http://quarterabroad.ucdavis.edu/>

**Academic Focus.** Students can earn 12-28 UC Davis quarter units through 3-6 courses taught abroad. Academic focus varies by program and may include subject area courses, language learning, lab work, internship/field work, and/or practical training experience. Programs range in length from 10 to 16 weeks. UC Davis faculty leaders teach one or more of the courses of the program, while other courses may be taught or co-taught by adjunct faculty of the host country, under supervision by UC Davis faculty. Students may be able to apply earned units towards their major, minor, language, or general education requirements.

## **UC Davis Summer Abroad**

Aliki Dragona, Ph.D., Faculty Director  
International Center, Suite 1120  
530-757-8308; Fax 530-297-7142;  
[summer-abroad@ucdavis.edu](mailto:summer-abroad@ucdavis.edu);  
<http://summer-abroad.ucdavis.edu>

**Academic Focus.** Students earn 8 UC Davis quarter units through two courses taught abroad. All courses are taught by UC Davis faculty, sometimes with select supplemental lectures provided by local

experts. Planned group activities and field trips enhance classroom instruction. Students may be able to apply earned units towards their major, minor, or general education requirements. Programs allow students to complete coursework in English in a wide variety of non-English-speaking locations.

### **UC Davis Internships Abroad**

Aliki Dragona, Ph.D., Faculty Director  
International Center, Suite 1120  
530-757-8308; Fax 530-297-7142;  
<http://studyabroad.ucdavis.edu/>

**Academic Focus.** Students earn 6 or more UC Davis units for internship hours and supplemental instruction. Internship programs are structured around thematic areas of study such as Global Health, Engineering, Business and Communication. Placements are a collaboration between international organizations, UC Davis Study Abroad and the UC Davis Internship and Career Center to ensure the internships meet requirements for credit and relevance to the subject area. In addition to internship hours worked, students will take an online course taught by UC Davis faculty that places their internship in a broader social and cultural context. Planned group activities and field trips enhance the formal internship work. Students may be able to apply earned units towards their major, minor, or general education requirements. Most placements are in English-speaking environments; some programs require language proficiency.

### **UC Davis Seminars Abroad**

Aliki Dragona, Ph.D., Faculty Director  
International Center, Suite 1120  
530-297-4633; Fax 530-297-4695;  
<http://studyabroad.ucdavis.edu/>

**Academic Focus.** Students earn 2-6 UC Davis quarter units through one or more courses taught abroad. These short courses are taught by UC Davis faculty and may be offered as stand-alone programs abroad, or as an international component to a course taught during a regular term on campus. A heavy focus on field trips, onsite projects and group activities enhance classroom instruction. Students may be able to apply earned units toward their major, minor, or general education requirements. Programs are typically offered in September, June, or during the winter break.

### **Courses in Education Abroad Program (EAP)**

#### **Lower Division**

##### **90X. International Education Seminar (1)**

Seminar—1 hour. Prerequisite: open to lower division applicants for EAP or UC Davis study abroad and international internship programs. Seminar examines the academic, cultural, and personal issues of study abroad, including academic programs abroad, country-specific history and culture, cross-cultural experiences, culture shock, racial and gender issues. May be repeated for credit. (P/NP grading only.)—F, S. (F, S.)

#### **Upper Division**

##### **180. Education Abroad: Special Topics (1-12)**

Lecture/discussion—3-12 hours; laboratory/discussion—3 hours. Prerequisite: minimum GPA requirement for each study abroad program as specified in the written agreement between UC Davis and the host institution; prerequisites for language courses may also apply. Students who participate in approved international programs take this course up to 12 units while studying abroad. May be repeated for credit; credits will be reviewed by departments and Dean's Office to determine how they fulfill UC Davis requirements. Offered irregularly.—F, W, S, Su. (F, W, S, Su.)

##### **190X. International Education Seminar (1)**

Seminar—1 hour. Prerequisite: open to upper division applicants for EAP or UC Davis study abroad and international internship programs. Seminar

examines the academic, cultural, and personal issues of study abroad, including academic programs abroad, country-specific history and culture, cross-cultural experiences, culture shock, racial and gender issues. May be repeated for credit. (P/NP grading only.)—F, S. (F, S.)

##### **192. Internship in Education Abroad (1-4)**

Internship—3-12 hours. Prerequisite: participation in a study abroad program. Internship related to education abroad. May take place at or away from the university. May be repeated for up to 12 units of credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

## **UC Washington Center (UCDC)**

**Campus Program Office.** The Grove (Surge III), Room 1350; 530-752-6652;  
<http://washingtonprogram.ucdavis.edu>

**Residential Program Location.** 1608 Rhode Island Avenue, NW, Washington, D.C. 20036

The University of California hosts a system-wide academic and residential program for undergraduate students attending from each of the UC campuses. Housed within the UC Washington Center (UCDC), an 11-story, state of the art facility, convenient to public transportation and located in downtown D.C., the programs provide undergraduates opportunity to enrich their education while in residence for one quarter in the nation's capital. The program's principal activities include enrollment in credit-bearing courses, participation in academic internships, and opportunity to explore the many educational, cultural and historical activities in the Washington area.

#### **Program of Study**

UCDC is open to undergraduates from all majors who will have upper-division standing by the start of the quarter in which they plan to participate although not required. A GPA of at least 3.000 is recommended for admission although not required. Applicants are also evaluated based on overall relevant employment, internship, and volunteer experiences, written statement, and letter(s) of recommendation (only one is required).

**Academic Year Component (11 weeks).** Students earn academic credit and continue to be registered as full-time UC Davis students during the quarter in which they participate.

• **Internship (Mandatory).** Students work from 3-4 days per week as interns in think-tanks, museums, Congress, federal agencies, interest groups, trade associations, research institutions, media corporations, or in other organizations related to the interests and objectives of individual students.

• **Research Seminar (Mandatory).** Each student writes a research paper in consultation with Washington Program faculty and graduate fellows. To complete the assignment, students take advantage of the many unique research resources in Washington, DC.

• **Elective Seminar Course (Optional).** Each student may optionally enroll in one elective upper division seminar course taught at UCDC. These courses vary each quarter from among offerings that typically include international relations, history, political science, public policy and other social sciences; the arts and humanities; and science policy. In addition to regular instruction, seminars often include guest speakers, observations of congressional committees and federal agencies, and other relevant Washington experiences.

Courses are taught by UCDC faculty appointed by the various UC campuses, or visiting faculty from the Washington area.

Financial aid eligibility and awards as determined by the home campus is maintained while enrolled in

the program, and the aid package can be adjusted to reflect the additional costs of the program.

**Summer Component (10 weeks).** UCDC also offers a 10-week Summer Program with a credit or non-credit option. The credit option allows students to enroll in courses in addition to working at an internship. Students pay the summer sessions rate per credit hour plus an application fee. The non-credit option (internship only) has no enrollment fee. Both options allow students to participate in many educational, cultural, historical and social activities.

#### **University Graduation Requirements**

- All prospective applicants should carefully plan their course programs in order to satisfy university, college, and major/minor requirements for their degree.
- Although units and grade points earned at UCDC are incorporated into the University transcript and GPA calculation, departments and programs retain the right to determine which UCDC courses will be accepted in satisfaction of major and minor requirements.
- All degree candidates must meet the University residence requirement. Students should consult with their college Dean's office early during the UCDC planning process for information on the university residence requirement, particularly students who intend to study abroad or participate in UCDC during their senior year.

Recognizing the special value of UCDC, the faculty has approved two exceptions to the usual residence requirement for students participating in the Washington Program:

- Students planning to graduate immediately upon completion of participation in UCDC may satisfy the University residence requirement by completing at least 35 of their final 45 units on the Davis campus immediately preceding entry into UCDC.
- Students who have not finished all of their degree requirements following completion of their participation in the UCDC program may satisfy the University residence requirement by completing at least 35 units, including at least 12 units after returning from UCDC, on the Davis campus within the final 90 units earned toward the degree.

Students who will not meet the residency requirements outlined may petition their Dean's office requesting an exception to policy.

- Students may satisfy GE requirements while at UCDC but should consult with their college Dean's office prior to departure for information on the certification process.
- Students with a large number of units may participate in the UCDC program provided that (1) they will not exceed 225 units prior to their departure and (2) that all their degree requirements have been fulfilled either before they leave campus or during their time at UCDC. Participants may only return to campus from UCDC to complete any outstanding degree requirements provided that they can do so within the 225 unit restriction.

### **Courses in UC Washington Center (WAS)**

Optional elective courses listed at <http://www.ucdc.edu/academic/courses>.

#### **Upper Division**

##### **175. Health Policy and Health Politics (4)**

Seminar—3 hours; extensive writing or discussion—1 hour. Restricted to students attending UC Washington Center program. Following the model of a Congressional subcommittee, identification of four salient health policy issues for study, research, and development of model policies to address them.

(Same course as Public Health Sciences 175W.) GE credit: SocSci, Wrt | ACGH, OL, SS, WE.

**187. Gun Violence (4)**

Lecture/discussion—4 hours. Restricted to students attending UC Washington Center program. Gun violence, viewed from the perspectives of criminology and public health. Topics include personal and societal contributing factors and critical assessment of potential solutions. Offered in alternate years.

**192. Internship in the UC Davis Washington Program (8)**

Internship—32 hours. Prerequisite: junior or senior standing, admission in the UC Davis Washington Program, and course 193 concurrently. Internship in Washington, DC with associated, supervised research project. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**193. Washington Center Research Seminar (4)**

Lecture/discussion—1 hour; independent study—3 hours; tutorial—0.5 hour. Prerequisite: course 192 concurrently. Core academic component of Washington Program. Topics coordinated with internships. Research draws on resources uniquely available in Washington, DC. Supervised preparation of extensive paper. (Same course as Political Science 193W.) GE credit: SocSci, Wrt | OL, SS, WE.—F, W, S, Su. (F, W, S, Su.)

## University Honors Program

David Furlow, Ph.D., Director

Eddy Ruiz, Ph.D., Associate Director

**Program Office.** 1350 The Grove (formerly Surge 3) 530-752-3225;  
<http://honors.ucdavis.edu/>

**Faculty**

Includes members from various departments across colleges.

**The Program of Study**

The honors course of study is designed to enhance the undergraduate experience of highly motivated students in all academic pathways. The University Honors Program (UHP) is an interdisciplinary, campus-wide honors program for top students interested in enhancing their education through special courses, close contact with faculty, and dynamic interaction with academic peers.

General Education Honors courses, seminars, and special study opportunities constitute the course offerings of the University Honors Program. First-year and second-year students in the UHP take six General Education honors courses during their first and second year. Upper division and transfer students complete a variety of research projects and service learning opportunities. All students who successfully complete the program receive transcript notation.

UHP courses and seminars are designed to foster critical thinking and analytic interpretation, improve oral, written and technical communication skills, enhance research skills, and provide experience with group dynamics and collaborative exploration of problems. Course enrollment is generally limited to 25 students.

Updated program information is available at the UHP website. A complete list of these courses, with course registration numbers, is made available to admitted students through the UHP office.

Only University Honors Program students may register for the courses in University Honors Program (HNR).

**Courses in Davis Honors Challenge (HNR)****Lower Division****90X. Honors Discussion Section (1)**

Discussion—1 hour. Prerequisite: open only to students in the Davis Honors Challenge. Examination of special topics in selected lower division courses through additional readings, discussions, term papers, collaborative work, or special activities, including projects, field and laboratory experiences, computer simulations, creative works. May be repeated for credit.

**92. Internship (1-12)**

Internship—3-36 hours. Prerequisite: open only to students in the Davis Honors Challenge. Supervised work experience under the auspices of the Davis Honors Challenge. May be repeated for credit for a total of 12 units. (P/NP grading only.)

**94. Honors Seminar (4)**

Seminar—4 hours. Open to students in the Davis Honors Challenge. Collaborative, multidisciplinary exploration of complex contemporary problem. Focus on critical thinking and analytical interpretation, on oral and written communication, and on the use of electronic media in gathering information. May be repeated for credit. GE credit: Wrt | WE.—F, W, S. (F, W, S.)

**98. Directed Group Study (1-5)**

Discussion—1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Independent study—1-5 hours. Prerequisite: student in the Davis Honors Challenge. (P/NP grading only.)

**Upper Division****190X. Honors Contract (1)**

Independent study or discussion—3 hours. Prerequisite: open only to students in the Davis Honors Challenge. In-depth examination of material in an upper division course as defined in an Honors Contract. Proposal submitted by the student. Contract must be approved by the instructor and the Honors Council of the Academic Senate. May be repeated for credit.

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: open only to students in the Davis Honors Challenge. Supervised work experience under the auspices of the Davis Honors Challenge. May be repeated for credit for a total of 12 units. (P/NP grading only.)

**194. Honors Seminar (3)**

Seminar—3 hours. Prerequisite: consent of instructor. Open only to students in the Davis Honors Challenge. Team-based work on actual problems drawn from the public or private sector. Focus on critical thinking and analytical interpretation, oral and written communication skills, and development of practical solutions to real-world problems. GE credit: Wrt.—F, S. (F, S.)

**195. Honors Thesis/Honors Project (1-3)**

Independent Study—3-9 hours. Prerequisite: Open only to students in the Davis Honors Challenge. Guided independent study of a selected topic leading to the presentation of an honors thesis/honors project. May be repeated for credit up to 9 units.

**198. Directed Group Study (1-5)**

Discussion—1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Independent study—1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)

**University Honors Program****579****Courses in Integrated Studies (IST)****Lower Division****8. Colloquium (1)**

Discussion—1 hour. Lectures, films, and readings on the interrelation between the arts and sciences. May be repeated for credit. (P/NP grading only.)—F. (F.)

**8A. Special Topics in Natural Science and Mathematics (4)**

Lecture—3 hours; discussion—1 hour. Limited enrollment. Group study of a special topic in natural sciences and mathematics. Course varies with topic offered. May be repeated for credit. GE credit: SciEng, Wrt | SE, SL.—F, W, S. (F, W, S.)

**8B. Special Topics in Humanities (4)**

Lecture—3 hours; discussion—1 hour. Limited enrollment. Group study of a special topic in humanities. Course varies with topic offered. May be repeated for credit. GE credit: ArtHum, Wrt | AH.—F, W, S. (F, W, S.)

**8C. Special Topics in the Social Sciences (4)**

Lecture—3 hours; discussion—1 hour. Limited enrollment. Group study of a special topic in social sciences. Course varies with topic offered. May be repeated for credit. GE credit: SocSci, Wrt | SS.—F, W, S. (F, W, S.)

**9. Seminar (1)**

Lecture—1 hour. Preparation of a research report. Normally taken with course 8. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

**90. Seminar (1)**

Seminar—1 hour. Prerequisite: course 9; consent of instructor; completion of 45 units with a minimum GPA of 3.250. Limited to sophomores who participated in the Integrated Studies Honors Program during their freshman year and transfer students by consent of instructor. Interrelation between the arts and sciences, focusing on a special topic. (P/NP grading only.)—F. (F.)

**94. Seminar (1)**

Seminar—1 hour. Prerequisite: course 9, consent of instructor and completion of 45 units with a minimum GPA of 3.500. Restricted to sophomores who participated in the Integrated Studies Honors Program during their freshman year and other students by consent of instructor. The nature of research at the undergraduate level. (P/NP grading only.)

**Upper Division****190. Topics in Integrated Studies (1)**

Seminar—1 hour. Prerequisite: course 9. Discussion of the integration of the arts and sciences, focusing on a special topic. May be repeated three times for credit when topic differs. (P/NP grading only.)

**194HA. Special Study for Honors Students (4)**

Independent study—3 hours; seminar—1 hour. Prerequisite: course 9, consent of instructor and completion of 90 units with a minimum GPA of 3.500. A program of research culminating in the writing of a junior honors thesis under the direction of a faculty adviser. May be repeated one time for credit. (Deferred grading only, pending completion of sequence.)—F. (F.)

**194HB. Special Study for Honors Students (4)**

Independent study—3 hours; seminar—1 hour. Prerequisite: course 9, consent of instructor and completion of 90 units with a minimum GPA of 3.500. A program of research culminating in the writing of a junior honors thesis under the direction of a faculty adviser. May be repeated one time for credit. (Deferred grading only, pending completion of sequence.)—W. (W.)

**197T. Tutoring in Integrated Studies (1-4)**

Tutorial—1 hour. Prerequisite: consent of Director of Integrated Studies Honors Program. Open to students in the Integrated Studies Program only. Tutoring in Integrated Studies courses, usually in small discussion groups. Weekly discussions with the instructor on the subject matter of the course being

tutored and on the art and craft of teaching. May be repeated eight times for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

### The Program

The University Writing Program (UWP) offers writing courses and seeks to improve writing instruction across campus through a variety of programs. The UWP coordinates first year, intermediate, and advanced writing courses that satisfy college composition requirements and offers courses in writing across the curriculum, writing in specific disciplines, and writing in the professions. The Professional Writing Minor serves students from all majors who are planning careers as professional writers or editors, as well as those whose academic and professional careers demand advanced writing skills. The Program offers graduate courses in the teaching of writing and in composition theory, history, and research.

The Designated Emphasis in Writing, Rhetoric, and Composition Studies offers Ph.D. students in affiliated programs the opportunity to prepare for leadership roles in writing research, teaching, and program administration. The UWP also administers the English Composition Examination, an alternative way to satisfy the advanced writing requirement. The UWP publishes an annual anthology of exemplary student writing, *Prized Writing*, and a journal for writing instructors, *Writing on the Edge*. The Writing in the Disciplines Workshop Program presents workshops on teaching writing for faculty and TAs and workshops on writing for students. The Writing Ambassadors Program trains advanced undergraduates and places them as interns in K-12 classrooms to improve writing instruction.

### Minor Program Requirements:

UNITS

#### Professional Writing ..... 20

One course from each of the following four groups:

**Group A:** English 100NF, University Writing Program 101, 102A, 102B, 102C, 102D, 102E, 102F, 102G, 102H, 102I, 102J, 102K, 102L, 102M

**Group B:** University Writing Program 104A, 104B, 104C, 104D, 104E, 104F,

104I, 104J, 104T, 110, 111A, 111B, 111C

**Group C:** Anthropology 110, 120, Classics 110, Communication 101, 105, 152, Design 145, 149, English 105, English/Linguistics/UWP 106, English/Science and Technology Studies 164, History 101, Philosophy 137A, 137B, 137C, Technocultural Studies 191, University Writing Program 100, 112A, 120, 121

**Group D:** University Writing Program 192 (or equivalent)

Additional units to achieve a total of 20 upper division units ..... 4

One additional course from Groups A, B, or C above.

Note: At least twelve units must be from University Writing Program courses.

### Courses in University Writing Program (UWP)

#### Lower Division

##### 1. Expository Writing (4)

Lecture/discussion—4 hours. Prerequisite: completion of Entry-Level Writing Requirement. Composition, the essay, paragraph structure, diction, and related topics. Frequent writing assignments. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. Su. (F, W, S.)

##### 1V. Expository Writing (4)

Web virtual lecture—2 hours; web electronic discussion—2 hours. Prerequisite: completion of Entry-Level Writing Requirement. Composition, the essay, paragraph structure, diction, and related topics. Frequent writing assignments. Not open to students who have taken course 1 or 1V. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. Su. (F, W, S.)

##### 1Y. Expository Writing (4)

Lecture/discussion—2 hours; web electronic discussion—2 hours. Prerequisite: completion of Entry-Level Writing Requirement. Composition, the essay, paragraph structure, diction, and related topics. Frequent writing assignments. Not open to students who have taken course 1 or 1V. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. Su. (F, W, S.)

##### 10. Introduction to Professional Writing Studies (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or the equivalent. Introduction to writing as an object of study and to theories and research in the field. Survey of how writing is created, disseminated, and used in private, public, and academic contexts. GE credit: ArtHum | AH, WE.—F. (F.)

### 11. Popular Science and Technology Writing (4)

Lecture/discussion—3 hours; discussion—1 hour. Positioning of science and technology in society as reflected and constructed in popular texts. Topics include genre theory, demarcation, rhetorical figures, forms of qualitative and quantitative reasoning, and the epistemic role of popularization in science. GE credit: ArtHum | AH, WE.—W. (W.)

### 12. Writing and Visual Rhetoric (4)

Lecture/discussion—3 hours; discussion—1 hour. Introduction to writing needs, conventions, and genres in design contexts. Emphasis on applying critical reading, analysis, and writing skills to designed products, such as graphics, visual communications, and clothes, and designed spaces, such as exhibitions and interior architecture. GE credit: ArtHum | AH, VL, WE.—F, W, S. (F, W, S.)

### 18. Style in the Essay (4)

Lecture/discussion—4 hours. Prerequisite: course 1 or English 3 or the equivalent. Style, language, and structure in the essay. Analyzing style, developing a voice in writing, revising sentences, developing effective paragraphs and arguments, and writing with force and clarity. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

### 19. Writing Research Papers (4)

Lecture/discussion—4 hours. Prerequisite: course 1 or English 3 or the equivalent. Critical reading, analysis, documentation, and writing research-based assignments. Formulation of research topics and development of effective arguments. Reading and writing assignments may focus on a single theme. GE credit: ArtHum, Wrt | AH, WE.—F, W. (F, W.)

### 21. Introduction to Academic Reading and Writing for Multilingual Students (4)

Lecture/discussion—4 hours. Pass One placed in the course via the English Language Placement Examination (ELPE) offered by the UWP; students receiving scores below 70 are placed in course 21, the first course in the sequence. Reading and writing paragraphs and short multi-paragraph texts for academic purposes. Suitable for students whose primary home language was not English. —F, W, S. (F, W, S.)

### 22. Intermediate Academic Reading and Writing for Multilingual Students (4)

Lecture/discussion—4 hours. Prerequisite: Pass One passed course 21 with C- or better OR a score of 70-79 on the English Language Placement Examination (ELPE) offered by the UWP. Reading and writing short multi-paragraph texts for academic purposes. Suitable for students whose primary home language was not English. —F, W, S. (F, W, S.)

### 23. Advanced Academic Reading and Writing for Multilingual Students (4)

Lecture/discussion—4 hours. Prerequisite: course 22. Pass One passed course 22 with a C- or better OR a score of 80-89 on the English Language Placement Examination (ELPE) offered by the UWP. Reading and writing source/research-based texts for academic purposes. Suitable for students whose primary home language was not English. (P/NP grading only.)—F, W, S. (F, W, S.)

### 27. Persuasive Writing for Multilingual Students (4)

Lecture/discussion—4 hours. Prerequisite: course 1 or equivalent. Not open to students with C- (P) or better in courses 101, 102, and 104; class size limited to 18 students. Instruction in analyzing style of persuasive texts, using appropriate vocabulary, and applying English grammatical structures for argumentative purposes. Suitable for multilingual students desiring additional instruction in the linguistic and rhetorical features of persuasive English writing for academic purposes. GE credit: WE.—F, W, S. Su. (F, W, S., Su.)

### 92. Internship in Writing (1-12)

Internship—3-36 hours. Prerequisite: course 1 or English 3. Internships in fields where students can practice their skills. May be repeated for credit for a total of 12 units. (P/NP grading only.)

**98. Directed Group Study (1-5)**

Prerequisite: course 1 or English 3 or the equivalent; consent of instructor. May be repeated two times for credit. (P/NP grading only.) GE credit: AH, WE.

**99. Special Study for Undergraduates (1-5)**

Prerequisite: course 1 or English 3 or the equivalent; consent of instructor. (P/NP grading only.) GE credit: AH, WE.

**Upper Division****100. Genre Theory and Professional Writing (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 1 or the equivalent; course 10. Introduction to discipline of professional writing. Examination of writing as a social practice, using genre theory as a conceptual framework. Analysis of how genres function rhetorically in specific contexts and how social systems both shape and are shaped by genres. GE credit: AH, WE.—W. (W.)

**101. Advanced Composition (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Instruction in advanced principles of expository writing. Writing tasks within and beyond the University. Different writing modes, including narrative, analysis, explanation, argument, critique. GE credit: ArtHum, Wrt | AH, WE.—F, W, S, Su. (F, W, S, Su.)

**102A. Writing in the Disciplines: Special Topics (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors or to students concurrently enrolled in an upper division course in a specific academic discipline or interdisciplinary field. Advanced instruction in writing in that discipline and practice in effective styles of communication. May be repeated one time for credit if taken in conjunction with a different subject-matter course. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

**102B. Writing in the Disciplines: Biology (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in a biological science or to students concurrently enrolled in an upper division biological science course. Advanced instruction in writing in biology. Not open for credit to students who have completed English 102B. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

**102C. Writing in the Disciplines: History (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in history or to students concurrently enrolled in an upper division course accepted for the history major.

Advanced instruction in writing in history. GE credit: ArtHum, Wrt | AH, WE.—W. (W.)

**102D. Writing in the Disciplines: International Relations (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in international relations or to students concurrently enrolled in an upper division course accepted for the major.

Advanced instruction in writing in international relations. GE credit: ArtHum, Wrt | AH, WE.—W. (W.)

**102E. Writing in the Disciplines: Engineering (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to upper division students in the College of Engineering and to students enrolled in an upper division engineering or computer science course for the major. Advanced instruction in writing in engineering. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

**102F. Writing in the Disciplines: Food Science and Technology (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in food sci-

ence and technology and to students concurrently enrolled in an upper division course in food science and technology. Advanced instruction in writing in food science and technology. GE credit: ArtHum, Wrt | AH, WE.—S. (S.)

**102G. Writing in the Disciplines: Environmental Writing (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to students with upper division coursework with an environmental focus. Advanced instruction in writing and practice in effective styles of communication in the fields of environmental study, policy, or advocacy. Not open for credit to students who have completed course 102A in the same academic field. GE credit: ArtHum, Wrt | AH, WE.—S. (S.)

**102H. Writing in the Disciplines: Human Development and Psychology (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors or to students concurrently enrolled in an upper division course in Human Development or Psychology. Advanced instruction in writing and practice in effective styles of communication in Human Development and Psychology. Not open for credit to students who have completed course 102A in the same academic field. GE credit: ArtHum, Wrt | AH, WE.—F. (F.)

**102I. Writing in the Disciplines: Ethnic Studies (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors in ethnic studies, or students with upper division coursework focusing on race and ethnicity. Advanced instruction in cross-disciplinary writing about race and ethnicity and practice in effective styles of communication. Not open for credit to students who have completed. GE credit: ArtHum, Wrt | AH, WE.—F. (F.)

**102J. Writing in the Disciplines: Fine Arts (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors or to students concurrently enrolled in an upper division course in Art History, Art Studio, Design, Music, or Theater and Dance. Advanced instruction in writing about the arts and practice in effective styles of communication. Not open for credit to students who have completed course 102A in the same academic field. GE credit: ArtHum, Wrt | AH, WE.—F, S. (F, S.)

**102K. Writing in the Disciplines: Sociology (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors in Sociology or to students concurrently enrolled in an upper division Sociology course. Advanced instruction in writing and practice in effective styles of communication in Sociology and related academic and professional fields. Not open for credit to students who have completed course 102A in the same academic field. GE credit: ArtHum, Wrt | AH, WE.—S. (S.)

**102L. Writing in the Disciplines: Film Studies (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors or to students concurrently enrolled in an upper division course in Film Studies, Technocultural Studies, English, American Studies, or any other upper division course that includes the analysis and understanding of film as a medium. Advanced instruction in writing about film and practice in effective styles of communication. Not open for credit to students who have completed course 102A in the same academic field. GE credit: ArtHum, Wrt | AH, WE.—W. (W.)

**102M. Writing in the Disciplines: Community and Regional Development (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or the equivalent. Open to upper division Community and Regional Development majors and minors or upper division students concurrently enrolled in an upper division Community and Regional Development course. Advanced instruction in writing in the Community and Regional Development discipline and practice in effective styles of communication. GE credit: ArtHum | ACGH, AH, WE.—S. (S.)

**104A. Writing in the Professions: Business Writing (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Effective communication in and for organizations, including businesses (corporations), government agencies, and non-profit organizations. Suitable for students entering careers that require substantial communications, such as management, public relations, and grant writing. GE credit: ArtHum | AH, WE.—F, W, S. (F, W, S.)

**104B. Writing in the Professions: Law (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Advanced principles of critical thinking, argumentation, and style, with special emphasis on their application in the legal profession. Suitable for students planning careers in law, business, administration, or management. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

**104C. Writing in the Professions: Journalism (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Non-fiction for magazines and newspapers, with attention to style and language. Emphasis on research, interviewing, market analysis, and query letters. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

**104D. Writing in the Professions: Elementary and Secondary Education (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Advanced expository writing in the contemporary American classroom. Strongly recommended for teaching credential candidates. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

**104E. Writing in the Professions: Science (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing or enrollment in a graduate science curriculum. Writing abstracts, research proposals, scientific papers, other forms of scientific communication. Presenting data graphically. Primarily for students engaged in or planning careers in basic or applied research. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

**104F. Writing in the Professions: Health (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Advanced expository writing common in the health professions, emphasizing effective communication between the writer and different audiences. Topics relate to health, disability, and disease. Suitable for students planning careers in professions such as medicine, dentistry, physical therapy, optometry. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

**104FY. Writing in the Professions: Health (4)**

Lecture/discussion—1.5 hours; web electronic discussion—1.5 hours; extensive writing. Prerequisite: course 1 or the equivalent; upper division standing. Advanced expository writing common in the health professions, emphasizing effective communication between the writer and different audiences. Topics relate to health, disability, and disease. Suitable for students planning careers in professions such as medicine, dentistry, physical therapy, optometry. Not

open to students who have taken course 104F. GE credit: ArtHum | AH, WE.—F, W, S, Su. (F, W, S, Su.)

#### **104I. Writing in the Professions: Internships (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to students concurrently enrolled in an internship and to Contemporary Leadership minors. Advanced instruction in writing in the workplace, including public and private sectors, government agencies, profit and non-profit organizations. Collaborative work and practice in effective styles of communication. Not open for credit to students who have completed course 102A. Offered irregularly. GE credit: ArtHum, Wrt | AH, WE.—S. (S.)

#### **104J. Writing in the Professions: Writing for Social Justice (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or the equivalent; upper-division standing. Advanced instruction in writing for Social Justice, using an interdisciplinary approach combining feminist, critical race, ethnic, cultural, and transnational studies; practice in techniques of research and styles of communication for diverse audiences. Suitable for activists in community organizing, nonprofits, politics. GE credit: ArtHum | AH, WE.—W. (W.)

#### **104T. Writing in the Professions: Technical Writing (4)**

Lecture/discussion—3 hours; extensive writing. Communicating effectively about technology and other technical subjects to varied audiences for varied purposes. Suitable for students entering professions that require communicating technical information to subject matter experts, managers, technicians, and non-specialists. Not open for credit to students who have taken course 104A prior to Fall 2012. GE credit: ArtHum | AH, WE.—F, W, S. (F, W, S.)

#### **106. English Grammar (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or English 3 or Linguistics 1 or consent of instructor. Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English. (Same course as English 106 and Linguistics 106.) GE credit: ArtHum | AH.

#### **110. Specialized Genres in Professional Writing (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students who have satisfied the upper-division writing requirement. Counts toward the writing minor. Instruction in the elements and practices of professional writing in specialized genres. May be repeated two times for credit when topic differs. Offered irregularly. GE credit: ArtHum, Wrt | AH, WE.

#### **111A. Specialized Topics in Journalism (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students with a strong interest in journalism. Counts toward the writing minor. Instruction in the elements and practices of advanced journalism. May be repeated one time for credit if specialized journalism topic for each course differs. Offered irregularly. GE credit: ArtHum, Wrt | AH, WE.

#### **111B. Specialized Topics in Journalism: Investigative Journalism (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students with a strong interest in journalism; counts toward the writing minor. Instruction in the elements and practices of in-depth investigative journalism. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WE.—(W.)

#### **111C. Specialized Topics in Journalism: Science Journalism (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students with a strong interest in journalism. Counts toward the writing minor. Instruction in the elements and practices of science journalism. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WE.—W.

#### **112A. Introduction to Professional Editing (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students who have satisfied the upper-division writing requirement; counts toward the writing minor, Group C: Theory, History, and Design. Introduction to general editing practices and principles, with an emphasis on professional editing in organizational contexts, including academia and the workplace. Extensive practice in copy, comprehensive, and collaborative editing. Offered irregularly. GE credit: ArtHum, Wrt | AH, VL, WE.

#### **120. Rhetorical Approaches to Scientific and Technological Issues (4)**

Lecture/discussion—3 hours; extensive writing. Restricted to upper-division standing. Application of rhetorical theories to scientific issues. Topics include: Rhetorical dimensions of scientific knowledge-making; scientific voice; rhetorical figures in science; incommensurability and demarcation; epistemology, definition, and classification; science wars; models of scientific literacy and accommodation, and implications for risk communication. Offered in alternate years. GE credit: ArtHum or SciEng | AH or SE, WE.—W.

#### **121. History of Scientific Writing (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: upper division standing. History of scientific writing from the 17th century to the present; origins and evolution of scientific genres; role of scientific writing in producing scientific knowledge; discursive differences between disciplines; emergence of English as a global language of science. Offered in alternate years. GE credit: ArtHum or SciEng | AH or SE, SL, WE.—(S.) Andersen, Perrault, Whithaus

#### **190. Capstone Portfolio Seminar (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 100. Open to majors who have completed 135 units. Capstone course for majors. Synthesis and application of rhetorical concepts learned in the major. Development of professional digital and print portfolio for graduate school and career applications. GE credit: WC.—S. (S.)

#### **192. Internship in Writing (1-12)**

Internship—3-36 hours. Prerequisite: course 1 or English 3 or the equivalent; consent of instructor. Internships in fields where students can practice their skills. May be repeated up to 12 units for credit. (P/NP grading only.) GE credit: AH.

#### **197T. Tutoring in Writing (1-5)**

Tutoring—1-5 hours. Prerequisite: upper division standing; consent of instructor. Tutoring one-on-one or leading small voluntary discussion groups affiliated with a writing course. May be repeated up to 10 units for credit. (P/NP grading only.) GE credit: AH.

#### **197TC. Community Tutoring in Writing (1-4)**

Tutoring—1-4 hours. Prerequisite: upper division standing; consent of instructor. Field experience, with individuals or in K-12 classroom instruction, focusing on reading- and writing-to-learn strategies in any subject area. May be repeated up to 10 units for credit. (P/NP grading only.) GE credit: AH.

#### **198. Directed Group Study (1-5)**

Prerequisite: course 1 or English 3 or the equivalent; consent of instructor. May be repeated up to 10 units for credit. (P/NP grading only.) GE credit: AH, WE.

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: AH, WE.

#### **Graduate**

#### **220. Rhetorical Approaches to Genre Study (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: graduate standing or consent of instructor. Using genre theory and methods of analysis to understand and prepare to do research on different types of writing in varying academic and professional contexts. Emphasis on problems in organizational, professional, and/or interdisciplinary communication. Offered in alternate years.—F, W. (F, W.) Andersen, Ferris, Perrault, Thaiss, Whithaus

#### **250. Writing Assessment (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: graduate standing or consent of instructor. Examines key testing and measurement concepts; the history of writing assessment; and relationships among writing tests and methods of teaching writing; the impacts of Information and Communication Technology (ICT), and how educational policies both drive and respond to writing assessments. Offered in alternate years.—(W.) Whithaus

#### **253. Writing Program Administration (4)**

Lecture/discussion—3 hours; extensive writing. Theories, models, and procedures of writing programs, primarily in higher education. Developmental, first-year, and advanced writing programs, writing centers, writing-across-the-curriculum programs, writing minors and majors, and graduate programs in rhetoric and composition. Offered in alternate years.—Ferris, Thaiss, Whithaus

#### **255. Theory and Research in Response to Student Writing (4)**

Discussion—3 hours; extensive writing: extensive writing or discussion; project. Restricted to graduate standing. Intensive focus on the critical topic of response or feedback to student writers. Coverage of philosophy, theory, and empirical research on teacher written feedback, teacher-student writing conferences, peer response, and error correction. Offered in alternate years.—W. (W.) Ferris

#### **270. Literacy and Technology (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: graduate standing or consent of instructor. Examines how the physical qualities of texts offer different affordances during production and reception; grounds these discussions in the development of literacy practices and writing technologies from ancient to contemporary; creates frameworks for research into literacy, teaching, and textual technologies. Offered in alternate years.—(W.) Andersen, Whithaus

#### **271. Second Language Writing (4)**

Seminar—3 hours; extensive writing; project. Prerequisite: graduate standing. Restricted to graduate standing. Traces the history of second language writing theory and research on second language writers in a variety of academic and professional contexts. Emphasis on writer characteristics, texts, and contexts. Offered irregularly.—F, S. (F, S.) Ferris

#### **280. Journal Editing Workshop: Writing on the Edge (2)**

Seminar—2 hours. Reading and critiquing manuscript submissions. Discussing relevant work in the field of writing studies. Applying principles of professional editing. Developmental editing, copy-editing, and typesetting of accepted manuscripts. Soliciting articles and communicating with contributors. Students encouraged to enroll both quarters. May be repeated for credit. (S/U grading only.)—F, W. (F, W.) Masiel

#### **298. Directed Group Study (1-5)**

Prerequisite: graduate standing; consent of instructor. (S/U grading only.)

#### **299. Individual Study (1-12)**

Prerequisite: consent of instructor; graduate standing. (S/U grading only.)

**Professional****390. Theory and Practice of Teaching University-Level Composition (4)**

Seminar—3 hours; extensive writing. Open to graduate students teaching course 1 in the fall quarter following this course. Examination of current theories and practices in teaching of writing. Practical application to undergraduate writing courses. Emphasis on designing assignments and class sequences, and responding to student writing. Examination of impact of cultural, technological and theoretical changes on composition pedagogy.—W. (W.) Ferris

**392. Teaching Expository Writing (2)**

Discussion—2 hours. Prerequisite: graduate standing, appointment as Teaching Assistant in the Composition Program; completion of course 390 or the equivalent. Discussion of problems related to teaching expository writing at the university level, with special emphasis on teaching reading and writing skills and responding to student papers. (S/U grading only.)—F. (F.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing; consent of instructor. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **Departmental Courses**

#### **Anatomy, Physiology and Cell Biology (APC)**

##### **Lower Division**

**92. Internship (1-12)**

Internship—3-36 hours. Prerequisite: lower division standing; consent of instructor. Internship experience off and on campus in all subject areas offered in the

Department of Anatomy, Physiology & Cell Biology. Internships are supervised by a member of the faculty. Offered irregularly. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

### **Upper Division**

**100. Comparative Vertebrate Organology (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Science 1A and 1B or 2A and 2B. Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions. (Same course as Neurobiology, Physiology, and Behavior 123.)—F. (F.) Genetos

**192. Internship (1-15)**

Internship—3-45 hours. Prerequisite: upper division standing, approval of internship. Internship experience off and on campus in all subject areas offered in the Department of Anatomy, Physiology and Cell Biology. Internships are supervised by a member of the faculty. May be repeated for credit if topic differs. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

### **Graduate**

**286. Basics of Microscopy and Cellular Imaging (2)**

Lecture—1 hour; laboratory—2 hours. Prerequisite: graduate standing; consent of instructor. Class size limited to 20 students. Practical applications of basic microscope techniques used to image cells and tissues with the goal of using these techniques to generate publication quality images. Principles of light, epifluorescent, confocal and electron microscopy, their applications and limitations. Offered in alternate years.—S. Van Winkle

**290. Seminar (1)**

Seminar—1 hour. Discussion and critical evaluation of advanced topics and current trends in research. (P/NP grading only.)—F, W, S. (F, W, S.) Van Winkle

**291. Topics in Biology of Respiratory System (1)**

Seminar—1 hour. Prerequisite: graduate standing; consent of instructor. Topics concerning structure and function of respiratory system. Possible topics include: lung growth, pulmonary reaction to toxicants, pulmonary inflammation, lung metabolism, biology of lung cells, tracheobronchial epithelium, nasal cavity structure and function. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.) Pinkerton, Wu

**298. Group Study (1-5)**

Laboratory—6-15 hours. Prerequisite: consent of instructor.—F, W, S. (F, W, S.) Genetos, Meyers

**299. Research (1-12)**

Laboratory—6-36 hours. Prerequisite: consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

### **Medicine and Epidemiology (VME)**

#### **Upper Division**

**158. Infectious Disease in Ecology and Conservation (3)**

Lecture—3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or Veterinary Medicine 409 or equivalent. Introduction to the dynamics and control of infectious disease in wildlife, including zoonotic diseases and those threatening endangered species. Basic epidemiological models and application to field data. Scientists' role in developing disease control policies.—W. (W.) Foley

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—W. (W.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)—F, W, S. (F, W, S.)

### **Graduate**

**201. Emerging Issues at the Interface of Ecosystem, Animal and Human Health (3)**

Lecture—1 hour; discussion—2 hours. Prerequisite: Active student status in MPVM, Master of Public Health programs or graduate groups in Epidemiology, Ecology, Public Health, Comparative Pathology, or consent of instructor. Restricted to 20 students. Principles of one health with emphasis on the relationships and interdependence of environmental, animal and human health. Exploration of critical data gaps needed to achieve sustainability in ecosystems and disease prevention.—F. (F.) Johnson

**217. Evaluation and Use of Diagnostic Tests (2)**

Lecture—14 sessions; laboratory—6 sessions; discussion—3 sessions. Prerequisite: Preventive Veterinary Medicine 205 or Epidemiology 205; consent of instructor. Class size limited to 30 students. Clinical and epidemiologic properties and application of diagnostic tests for disease, with emphasis on selecting tests; validating, evaluating, and interpreting new tests individually and in aggregate; determining cutoff values; and developing testing strategies. Offered in alternate years.—(S.) Hill

**225. Retroviral Pathogenesis Seminar/Journal Club (1)**

Discussion—1 hour. Prerequisite: graduate student status in the Comparative Pathology, Microbiology or Immunology graduate groups. Participatory seminar addressing the mechanisms of retroviral pathogenesis in a journal club format. Focus on the review of current scientific journal papers concerning viral pathogenesis, immunology and virology with a special focus on retroviruses. May be repeated 12 times for credit. (S/U grading only.)—F, W, S. (F, W, S.) Murphy, Sparger

**258. Infectious Disease in Ecology and Conservation (1)**

Discussion—2 hours. Prerequisite: course 158 (must be taken concurrently). Presentation, analysis and discussion of primary literature on the dynamics and control of infectious disease in wildlife, including zoonotic diseases and those threatening endangered species. Multidisciplinary approach combines perspectives of ecology and veterinary medicine. (S/U grading only.)—W. (W.) Foley

**298. Group Study (1-5)**

Prerequisite: student in School of Veterinary Medicine or consent of instructor. Group study in selected areas of the clinical sciences. (S/U grading only.)—F, W, S. (F, W, S.) Martinez

**299. Research (1-12)**

(S/U grading only.)—F, W, S. (F, W, S.)

### **Molecular Biosciences (VMB)**

#### **Lower Division**

**92. Internship (1-12)**

Internship—3-36 hours. Prerequisite: lower division standing; consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Molecular Biosciences. Internships supervised by a member of the faculty. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**101Y. Principles of Pharmacology and Toxicology (3)**

Laboratory/discussion—1.5 hours; web virtual lecture—1.5 hours; web electronic discussion—0.5 hour; autotutorial—5 hours. Prerequisite: upper division standing in a science major; Chemistry through organic chemistry and general biology, or consent from instructor; good standing with university; computing capability using MS Word, Excel, and PowerPoint; menu driven software programs, SmartSite; computer, or ready access to a computer, with

broadband Internet access. Restricted to upper division undergraduate students in good standing with school and fulfill course prerequisites. Hybrid course provides training in core concepts of pharmacological and toxicological sciences. Develop higher-order problem solving and critical thinking skills. GE credit: OL, SE, SL.—S. (S.) Puschne

## Upper Division

### 192. Internship (1-12)

Internship—3-36 hours. Prerequisite: completion of 84 units; consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Molecular Biosciences. Internships supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)—F, W, S. (F, W, S.)

## Graduate

### 234. Current Topics in Neurotoxicology (3)

Lecture—3 hours. Prerequisite: core courses in one of the following graduate programs: Pharmacology and Toxicology, Agricultural and Environmental Chemistry, Biochemistry and Molecular Biology, Cell and Developmental Biology, Immunology, Molecular Cellular and Integrative Physiology or Neuroscience. Restricted to upper level undergraduate students must obtain permission from the course coordinator. General principles of neurotoxicology, the cell and molecular mechanisms and health impacts of specific neurotoxicants and the contribution of neurotoxic compounds to complex neurodevelopmental disorders and neurodegenerative diseases. (Same course as Environmental Toxicology 234 and Molecular, Cellular, and Integrative Physiology 234.)—S. (S.) Lein

### 253. Metabolism of Toxicants and Drugs (2)

Lecture—2 hours. Prerequisite: Pharmacology and Toxicology 201, 202, 203, general biochemistry or consent of instructor. Significance/chemical pathways of toxicants and drug metabolism, enzymology and molecular aspects of P450 and flavin monooxygenases, hydrolases and phase 2 transferases and experimental approaches for metabolism studies. Offered in alternate years. —(W.) Yu

### 254. Toxicology of the Respiratory System (3)

Lecture—3 hours; discussion. Prerequisite: Pharmacology and Toxicology 201, 202, 203, or consent of instructor. Survey of structure and function of the respiratory system, the pathophysiology of major lung diseases, the interactions of toxicants with the lung and response of this organ to injury. Offered in alternate years. —(W.) Pinkerton

### 255. Pharmacokinetics and Biopharmaceuticals (2)

Lecture—16 sessions; discussion—4 sessions. In-depth study of pharmacokinetics, including the fundamentals of pharmacokinetics, how to design a pharmacokinetic study and how to use both compartmental and non-compartmental analysis to interpret the data. Offered in alternate years. —W. Knych

### 290. Seminar (1)

Seminar—1 hour. Prerequisite: graduate standing; consent of instructor. Topics in nutrition, pharmacology/toxicology, and biochemistry. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### 297T. Tutoring in Graduate Molecular Biosciences (1-5)

Prerequisite: graduate or professional student standing and consent of instructor. Assist in preparation and teaching of courses in Nutrition, Pharmacology and Toxicology, or other courses offered by the department under direct supervision of the instructor. Designed for graduate or professional students who desire teaching experience in graduate courses. May be repeated up to 5 units of credit. (S/U grading only.)—F, W, S. (F, W, S.)

### 298. Group Study (1-5)

(S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

### 299. Research (1-12)

(S/U grading only.)—F, W, S. (F, W, S.)

## Professional

### 397T. Tutoring in Molecular Biosciences (1-5)

Discussion—1.5 hours. Prerequisite: graduate or professional standing; consent of instructor. Experience in professional curriculum for graduate or professional students, not teaching assistants, under direct supervision of instructor. May be repeated up to 5 units of credit (S/U grading only.)—F, W, S. (F, W, S.)

## Pathology, Microbiology, and Immunology (PMI)

### Lower Division

### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

## Upper Division

### 126. Fundamentals of Immunology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102 or the equivalent or consent of instructor. Overview of immunology including components of the immune system, initiation and regulation of the immune response, infection and immunity, hypersensitivity and immune dysfunction. Clinical immunologic techniques, immunodeficiency and vaccination. —W. (W.) Stott

### 126L. Immunology Laboratory (2)

Laboratory—6 hours. Prerequisite: course 126 or the equivalent (may be taken concurrently). Laboratory procedures in clinical immunology. Cells of the innate and adaptive systems. Quantitative and qualitative characterization of the immune response. —W. (W.) Stott

### 127. Medical Bacteria and Fungi (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: any Microbiology course with lab; Immunology strongly recommended. Introduction to the bacterial and mycotic pathogens of man and animals, with emphasis on pathogenic mechanisms and ecologic aspects of infectious disease. —S. (S.) LeFebvre

### 128. Biology of Animal Viruses (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102. Fundamental physical and chemical properties of animal viruses; methods of propagation, purification and assay. Mechanisms of viral replication and pathogenesis of viral infections in man and animals. Immunity to virus diseases and oncogenic properties of animal viruses. Two units of credit to students who have completed Microbiology 162. —S. (S.) Miller

### 129Y. One Health: Human, Animal & Environment Interfaces (3)

Lecture/discussion—3 hours; web electronic discussion. Class size limited to upper division undergraduate students in good standing with the school and who fulfill the course prerequisites below; enrollment limited to 100 students/term. Introduction to fundamentals, challenges, and opportunities in One Health using local and global health case studies. Animal, human, and environmental health problems, along with tools and transdisciplinary approaches, will be introduced to foster innovative thinking that addresses complex issues. GE credit: SciEng or SocSci | OL, SE or SS, SL.—S. (S.) Smith

### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

## Graduate

### 201. Integrative Pathobiology Core I (5)

Lecture—3 hours; discussion—2 hours. Overview of molecular biology techniques, tissue structure and function, cell membrane pathology and cellular mechanisms of disease including cellular responses and adaptations to stress, cell cycle, cell death, cell biomechanics, vascular disturbances, and mechanisms of neoplasia and tumorigenesis. —W. (W.)

### 202. Integrative Pathobiology Core II (4)

Lecture—2 hours; discussion—2 hours. The second required core course in the graduate group with topics in inflammation, host-pathogen interaction, regenerative medicine, integrative pathology and population and ecosystem health. —S. (S.) Foley

### 203. Experimental Design and Data Analysis in Pathobiology (2)

Lecture—1 hours; lecture/laboratory—2 hours. Follows two required core courses in, courses 201 and 202, for Ph.D. and M.S. students. Goal is to bridge gap between statistics and real-world pathobiology to increase students' skills and independence in experiment design and data analysis. —F. (F.)

### 214. Vector-borne Infectious Diseases: Changing Patterns (2)

Lecture/discussion—2 hours. Prerequisite: graduate student standing (PhD or MS). Restricted to 10 students. Vector-borne infectious diseases especially as they relate to changing patterns associated with climatic changes, trade and population movement. Prerequisite: consent of instructor. (S/U grading only.)—F. (F.) Coffey, Lanzaro

### 221. Topics in Virus Research (1)

Discussion—1 hour. Prerequisite: graduate student standing (Ph.D. or M.S.). Restricted to 10 students. Discussion-based seminar covering graduate student virology research. Informal presentations and discussion of technical problems in research design and experimentation are encouraged. Current stage of the research project is not important. May be repeated four times for credit. (S/U grading only.)—F. (F.) Murphy

### 270. Advanced Immunology (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Introductory course in immunology. Restricted to graduate student status in the Comparative Pathology Graduate Group; all other students require consent of instructor. Current concepts of immunology with an emphasis on interactions between the host, the environment and the pathogen. These interactions will include those that are protective and successful for the host as well as those that are deleterious. —W. (W.) Stott

### 290. Seminar (1)

Seminar—1 hour. Prerequisite: graduate level standing. Topics in pathology, microbiology or immunology. May be repeated for credit. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

### 291A. Seminar in Immunology (1)

Seminar—1 hour. Prerequisite: course 126 or the equivalent. Students choose topic for each quarter. Individual or pairs of students choose a paper for all to read and present a seminar based on the subject of the paper. All students participate in discussion. May be repeated for credit. (S/U grading only.)—F, S. (F, S.) Gershwin

### 293A. Seminar in Infectious Diseases (1)

Seminar—1 hour. Prerequisite: current enrollment in health science professional school or graduate standing in biological sciences. Discussion of current topics and cases of infectious diseases. May be repeated one time for credit if topic differs. (S/U grading only.)—F. (F.) Byrne

### 298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

### 299. Research (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

## Population Health and Reproduction (PHR)

### Lower Division

#### 92. Internship in Veterinary Science (1-4)

Discussion/laboratory—1-4 hours; clinic—3-36 hours; final report. Prerequisite: approval of project prior to period of internship by faculty sponsor. Supervised work experience in reproduction. (P/NP grading only.)—F, W, S. (F, W, S.)

### Upper Division

#### 106. Human-Animal Interactions: Benefits and Issues (2)

Lecture—18 sessions; fieldwork—1 session. Prerequisite: upper division standing or consent of instructor. The contributions of animals to human society, including historic, anthropologic, developmental, human health and therapeutic perspectives, as well as effects of humans on animals. One field trip required. —W. (W.) Hart

#### 192. Internship in Veterinary Science (1-12)

Discussion/laboratory—1-12 hours; clinic—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in Reproduction. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

#### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)—F, W, S. (F, W, S.)

### Graduate

#### 202. Sampling in Health-Related Research (3)

Lecture—3 hours. Prerequisite: Preventive Veterinary Medicine 403 or the equivalent; consent of instructor. A very thorough coverage of simple random sampling, stratified sampling, cluster sampling, systematic sampling and other sampling methods applied extensively in epidemiology and other health-related disciplines. Emphasis on application of the sampling methods. Offered in alternate years. —W. (W.)

#### 203. Multivariate Biostatistics (3)

Lecture—3 hours. Prerequisite: Preventive Veterinary Medicine 403 and 404, or the equivalent; consent of instructor. Multivariate procedures covered are principal component analysis, factor analysis, Two-group and k-group multivariate ANOVA, multivariate regression, Two-group and k-group discriminant analysis and repeated measures analysis, cluster analysis, and canonical analysis. Emphasis is on application of procedures. Offered in alternate years. —W.

#### 210. Epidemiological Approaches to Waterborne Zoonotic Pathogens (1)

Lecture—1 hour. Waterborne zoonotic diseases remain a significant cause of human illness. Review key waterborne pathogens; their biology, fate and transport in aquatic systems; on-farm management practices for reducing microbial contamination of California's fresh and marine aquatic resources from livestock production systems. (S/U grading only.)—W. (W.) Atwill

#### 212. Epidemiology of the Zoonoses (4)

Lecture—35 sessions; discussion—5 sessions. Prerequisite: graduate standing or third-year standing in the School of Veterinary Medicine or consent of instructor. Epidemiological, biological and ecological features of some major infections shared by humans and other animals. Wildlife and domestic animals zoonoses of major health and economic significance are presented to illustrate how knowledge of zoonoses epidemiology is essential for implementing control measures. Offered in alternate years. —W. Chomel

#### 241. Advanced Topics in Canine Genetics and Genomics (2)

Discussion—2 hours. Prerequisite: Genetics 201A, 201C (or equivalents, with consent of instructor). Limited enrollment. In-depth study of topics in canine genomics and genetics. Topics will vary annually, but can include positional cloning, whole genome association, complex traits and linkage disequilibrium. Students will lead discussions on assigned readings. May be repeated for credit when topic differs. Offered in alternate years. —S. Bannasch

#### 242. Ecological Genetics: Applied Genetics for Ecology, Health, and Conservation of Natural Populations (3)

Lecture—2 hours; discussion—0.5 hours; laboratory—0.5 hours. Prerequisite: undergraduate genetics and ecology/conservation biology courses recommended. Class size limited to 20 students; graduate students, 2nd or 3rd year veterinary students; advanced undergraduate students with consent of instructor. Introduction to the field of applied ecological genetics to include applications in conservation ecology, population genetics, population biology, wildlife health and disease ecology. (Same course as Ecology 242.)—F. (F.) Ernest

#### 243. Advanced Topics in Conservation Genetics (2)

Discussion—18 sessions; lecture—2 sessions. Prerequisite: undergraduate genetics and ecology or consent of instructor. Restricted to 16 students. In-depth study of topics related to the application of genetic tools to wildlife conservation. Topics will vary annually, but may include use of non-invasive methods of genetic assessment and monitoring of wildlife populations. Students will lead discussions on assigned readings. May be repeated for credit when topic differs. (S/U grading only.)—F. (F.) Sacks

#### 266. Applied Analytic Epidemiology (3)

Lecture—2 hours; laboratory—2 hours. Prerequisite: Preventive Veterinary Medicine 404 or consent of instructor. Principles and applications in analysis of epidemiologic data. Methods of analyzing stratified and matched data, logistic regression for cohort and case-control studies, Poisson regression, survival-time methods. (Same course as Master of Public Health 266.)—S. (S.) Kass

#### 277. Mathematical Models in Epidemiology (3)

Lecture/discussion—2 hours; laboratory—2 hours. Prerequisite: Preventive Veterinary Medicine 403 and Medicine & Epidemiology 405; consent of instructor; although not required, students are encouraged to refresh their knowledge of high school calculus and differential equations. Class size limited to 30 students. Theory of epidemics and mathematical modeling concepts for infectious diseases to include discrete and continuous time models, their use to explore disease dynamics and investigate prevention and control strategies for human and veterinary infectious diseases. (Same course as Epidemiology 277.)—S. (S.) Aly

#### 290. Seminar (1)

Seminar—1 hour. Presentation and discussion of advanced and current topics in population health and reproduction. (S/U grading only.)—F, W, S. (F, W, S.)

#### 298. Group Study (1-5)

Prerequisite: consent of instructor.—F, W, S, Su. (F, W, S, Su.)

#### 299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

## Surgical and Radiological Sciences (VSR)

### Lower Division

#### 99. Special Study for Undergraduates (1-5)

(P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

### Upper Division

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

### Graduate

#### 298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

#### 299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

## Viticulture and Enology

(College of Agricultural and Environmental Sciences)

David E. Block, Ph.D., Chairperson of the Department

Jennifer L. Nelson, Ph.D., Assistant Adjunct Professor

Anita Oberholster, Ph.D., Assistant Specialist in Cooperative Extension

Kerri L. Steenwerth, Ph.D., Assistant Adjunct Professor

### The Major Program

The Viticulture and Enology major provides an interdisciplinary education in the biological and physical principles underlying grape and wine production as well as practical knowledge of grape growing (viticulture) and wine making (oenology). This program provides the knowledge base for problem-solving and decision-making in commercial grape and wine production.

**Preparatory Requirements.** Before transferring into the Viticulture and Enology major, students must complete the following courses with a grade of C- or better and with a combined grade point average of at least 2.500 at the University of California (at least

3.000 for similar courses taken at community college) for these and all other preparatory courses. In addition, students' overall UC GPA must be 2.250 or higher. All courses must be taken for a letter grade.

## UNITS

Biological Sciences 1A or 2A .....	4-5
Chemistry 2A, 2B, 2C, 8A .....	17
Mathematics 16A.....	3
Physics 1A, 1B or 7A.....	4-6

**Recommendations.** Completion of UC Davis equivalents of the following preparatory courses for the major are not required for entry but are highly recommended. Failure to complete these will delay entry into required upper division courses and may thus delay graduation. Some courses may be available at UC Davis during Summer Session:

## UNITS

Chemistry 8B .....	4
Mathematics 16B .....	3
Biological Sciences 1C or Plant Sciences 2.....	4-5
Biological Sciences 102.....	3

**The Program.** The curriculum builds upon a foundation of biology, chemistry, biochemistry and mathematics with specialized courses related to grape and wine production. To complete the program, students may choose to place particular emphasis on viticulture, enology or economics. Credit may also be earned for foreign language study and internships.

**Career Alternatives.** Graduates are qualified for a variety of vineyard and winery positions, including production management, quality control and research. Additionally they may work in related fields such as pest management, nursery production and analytical services.

**B.S. Major Requirements:**

## UNITS

**Preparatory Subject Matter ..... 44-51**

Biological Sciences 1A or 2A and 1C or Plant Sciences 2 .....	8-10
Chemistry 2A-2B-2C .....	15
Chemistry 8A, 8B .....	6
Plant Sciences 21 or equivalent and adviser approval .....	0-3
Mathematics 16A-16B .....	6
Physics 1A, 1B or 7A.....	4-6
Viticulture and Enology 2, 3 .....	5

**Depth Subject Matter ..... 48-54**

Biological Sciences 102, 103 or 105 ....	3-6
Microbiology 102, 102L or 101 .....	5-7
Plant Sciences 120 or Statistics 106 .....	4
Viticulture and Enology 101A, 101B, 101C, 110, 118 .....	15
Viticulture and Enology 123, 124, 125, 126, 128, 135 and in consultation with the adviser, choose 3 of the following courses: 123L, 124L, 125L, 126L, 128L. If more than 3 are taken, the extra courses will count as restricted electives in Area B .....	21-22

**Restricted Electives ..... 28**

In consultation with adviser, choose 28 units from three of the following five areas. At least 12 units must be from one of the following areas: (A) Plant Science, (B) Food Science and Microbiology, or (C) Economics and Business.

(A) **Plant Science area:** Applied Biological Systems Technology 142, 145, 147, 175, 180, Atmospheric Science 133, Biological Sciences 101, Biotechnology 160, Entomology 110, Hydrologic Science 110, 124, Molecular and Cellular Biology 126, Nematology 100, Plant Biology 111, 112, 123, 143, 172, 172L, Plant Pathology 120, Plant Sciences 142, 146, 154, 157, 158, 171, 176, Soil Science 100, 102, 109, 118, Viticulture and Enology 111. (B) **Food Science and Microbiology area:** Biological Sciences 101, Food Science and Technology 102A, 102B, 104, 104L, 108, 109, 110A, 110B, 127, Microbiology

140, 150, 155L, Viticulture and Enology 140.

(C) **Economics and Business area:**

Agricultural and Resource Economics 100A, 112, 113, 118, 130, 140, 150,

Economics 1A, 1B, Management 11A, 11B, Viticulture and Enology 111, 130

(D) **Language area:** Maximum 12 units, not counting course 1, of one of the following languages: French, German, Italian, Portuguese or Spanish. At least one course must be Intermediate or Conversational; qualifying Intermediate or Conversational courses are listed below:

French 8, 21, 22, 23, 38, German 6, 11, 20, 21, 22, Italian 4, 5, Spanish 8, 21, 22, 28, 31, 32, 33.

Courses taught in English will not count as restricted electives in this major.

(E) **Internship area:** A maximum of eight units of Viticulture and Enology 190X, 192, 198, 199, 290 or 298 may be counted as restricted electives by prior arrangement with adviser. May be increased to 12 units in exceptional circumstances.

**Total Units for the Major ..... 120-133****Major Adviser.** L. Bisson, A. Walker**Related Major Programs.** Food Science and Technology, and Plant Sciences.

**Graduate Study.** Several graduate groups offer programs of study leading to advanced degrees in the fields of viticulture and enology. For the M.S. or Ph.D. degree, see *Agricultural and Environmental Chemistry* (A Graduate Group), on page 151, *Engineering: Chemical Engineering*, on page 276, *Ecology* (A Graduate Group), on page 250, *Food Science* (A Graduate Group), on page 340, *Integrative Genetics and Genomics* (A Graduate Group), on page 380, *Horticulture and Agronomy* (A Graduate Group), on page 369, *Microbiology* (A Graduate Group), on page 458, *Plant Biology* (A Graduate Group), on page 511, *Plant Pathology*, on page 513, *Soils and Biogeochemistry* (A Graduate Group), on page 552, and *Viticulture and Enology* (A Graduate Group), on page 586.

**Courses in Viticulture and Enology (VEN)****Lower Division****2. Introduction to Viticulture (2)**

Lecture—2 hours. Fundamental principles of biology and culture of the grapevine including taxonomy, morphology, physiology, distribution, domestication, utilization, propagation, production systems, harvesting, and storage and processing of grapes. Successful completion of the course should prepare students for upper division courses in viticulture. GE credit: SE.—F. (F.) Cantu

**3. Introduction to Winemaking (3)**

Lecture—3 hours. Overview of the history of wine, viticulture, fermentation, winery operations, the physiology of wine consumption, wines produced in California and other major wine-producing regions and the sensory evaluation of wine. GE credit: SE, SS.—F, W, S. (F, W, S.) Heymann, Waterhouse

**90X. Lower Division Seminar (2)**

Seminar—1 hour; term paper (required)/discussion. Prerequisite: lower division standing and consent of instructor. Introduction to current issues surrounding wine and health as they relate to diet, nutrition, and toxicology. May not be repeated for credit. GE credit: Wrt.

**99. Special Study for Undergraduates (1-5) (P/NP grading only.)****Upper Division****101A. Viticultural Practices (3)**

Lecture—1.5 hours; discussion/laboratory—3.5 hours. Prerequisite: course 2. Identification, cultivation, and use of the major wine, table, raisin, and rootstock cultivars. Includes practices specific to the

fall such as fruit contracts, maturity sampling, harvesting, cover crops, and soil-pests. One field trip required. GE credit: SE.—F. (F.) Walker

**101B. Viticultural Practices (3)**

Lecture—1.5 hours; discussion/laboratory—3.5 hours. Prerequisite: course 2. Theory, principles, and practices of pruning and grapevine propagation. Plant materials and the certification process, weed control and weed identification, wood diseases, and frost protection. One field trip required. GE credit: SE.—W. (W.) Walker

**101C. Viticultural Practices (3)**

Lecture—1.5 hours; discussion/laboratory—3.5 hours. Prerequisite: course 2. Field oriented experience in the principles and practices of grapevine production, including vineyard establishment, vine training, trellising, canopy management practices, irrigation and water management, and methods of crop adjustment for improvement of fruit quality. One field trip required. GE credit: SciEng | SE.—S. (S.) Smart

**110. Grapevine Growth and Physiology (3)**

Lecture—3 hours. Prerequisite: course 2. Botanical aspects including morphology and domestication will precede lectures covering flower development and energy budget concepts. Impact of physiological variables such as photosynthesis translocation, mineral nutrition, and water relations on fruit ripening and composition will be covered. GE credit: SciEng | SE.—W. (W.) Matthews

**111. World Viticulture (3)**

Lecture—3 hours. Prerequisite: upper division standing. Study of the diversity of viticulture, both geographical and historical. History of grape growing and its spread throughout the world will be covered, along with discussions of current viticultural practices in different parts of the world, including California. GE credit: SciEng | OL, SE, WE.—S. (S.) Heymann

**111L. Critical Evaluation of Wines of the World (1)**

Laboratory/discussion—3 hours. Prerequisite: course 111 (must be taken concurrently), course 125 with a grade of C or better. Critical analysis of wines produced in different parts of the world with emphasis on the relationship between sensory properties of the wines and factors associated with their place of origin. (P/NP grading only.) GE credit: SE.—S. (S.) Heymann

**115. Raisin and Table Grape Production (2)**

Lecture—2 hours. Prerequisite: course 2. Overview of the raisin and table grape industries in California and other production areas of the world. Cultural practices associated with raisin and table grape production will also be discussed. GE credit: SciEng | SE.—S. (S.) Williams

**118. Grapevine Pests, Diseases and Disorders (3)**

Lecture—3 hours. Prerequisite: course 2. Various pests and diseases of vineyards throughout California. Pest/disease identification and control methods (to include sampling techniques) also will be discussed. Integrated management approach to pest control methods will be emphasized. GE credit: SciEng | SE.—F. (F.) Cantu

**123. Analysis of Musts and Wines (2)**

Lecture—2 hours. Prerequisite: Chemistry 2C and 8B or equivalent; Agricultural Management and Rangeland Resources 21 or equivalent. Students enrolled in the lecture only portion of the course will be required to enroll in 1 unit of course 199/299. Fundamental principles of analytical chemistry as they relate to specific methods used in winemaking. GE credit: SciEng | SE.—F. (F.) Waterhouse

**123L. Analysis of Musts & Wines Laboratory (2)**

Lab—3 hours; independent study—3 hours. Prerequisite: Chemistry 2C and 8B, or equivalent, Agricultural Management and Rangeland Resources 21, and course 123 (course 123 may be taken concurrently). Restricted to upper division and graduate students in Viticulture & Enology; others by approval of instructor. Fundamental principles of analytical chem-

istry as they relate to specific methods used in wine-making. Laboratory exercises demonstrating various chemical, physical and biochemical methods. Data will be analyzed and results interpreted in weekly lab reports; includes student-designed independent project and written report. GE credit: SciEng, Wrt | QL, SE, VL, WE.—F. (F.) Waterhouse

#### **124. Wine Production (2)**

Lecture—2 hours. Prerequisite: course 3, 123 (may be taken concurrently), Biological Sciences 102. Principles and practices of making standard types of wines, with special reference to grape varieties used and methods of vinification. SciEng | GE credit: SE, WE.—F. (F.) Bisson

#### **124L. Wine Production Laboratory (3)**

Laboratory—3 hours; independent study—3 hours; term paper. Prerequisite: course 124 (may be taken concurrently). Restricted to undergraduate students in fermentation science, viticulture and enology, biotechnology, microbiology, food science and applied plant biology or graduate students in food science, agricultural and environmental chemistry and horticulture. Current technologies used in production of California table wines; analysis and monitoring of impact of fermentation variables on microbial performance and product quality; student-designed independent research project. GE credit: SciEng | OL, SE, WE.—F. (F.) Bisson

#### **125. Wine Types and Sensory Evaluation (2)**

Lecture—2 hours. Prerequisite: course 124; Plant Sciences 120 or Statistics 106. Open to upper division and graduate students in Viticulture & Enology; others by approval of instructor. Principles of sensory evaluation and application to wines. Factors influencing wine flavor, data from sensory analysis of model solutions. GE credit: SciEng | QL, SE.—S. (S.) Heymann

#### **125L. Sensory Evaluation of Wine Laboratory (2)**

Laboratory—3 hours; term paper. Prerequisite: course 125 (may be taken concurrently). Restricted to upper division majors in fermentation science or viticulture and enology or graduate students in food science. Sensory evaluation of wines and model systems using discrimination tests, ranking, descriptive analysis and time-intensity analysis. Data analyzed by appropriate statistical tests and results interpreted in extensive weekly lab reports. GE credit: SciEng | QL, SE, VL, WE.—S. (S.) Heymann

#### **126. Wine Stability (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 124. Restricted to students in viticulture and enology, fermentation science, applied plant biology majors, or graduate students in food science, microbiology, horticulture, and horticulture and agronomy. Principles of equilibria and rates of physical and chemical reactions in wines; treatment of unstable components in wines by absorption, ion exchange, refrigeration, filtration, and membrane processes; and protein, polysaccharide, tartrate, oxidative, and color stabilities. GE credit: SciEng | SE.—W. (W.) Runnebaum

#### **126L. Wine Stability Laboratory (2)**

Laboratory—3 hours; independent study—3 hours. Prerequisite: course 126 (may be taken concurrently); consent of instructor. Restricted to upper division fermentation science, viticulture and enology majors, or graduate students in food science, agricultural and environmental chemistry, microbiology or by consent of instructor. Practical application of principles of equilibria and rates of physical and chemical reactions to wine stability. GE credit: SciEng | SE, WE.—W. (W.) Runnebaum

#### **128. Wine Microbiology (2)**

Lecture—2 hours. Prerequisite: courses 123 and 124; Microbiology 102 and 102L, or Food Science and Technology 104 and 104L; courses 125 and 126 recommended. Nature, development, physiology, biochemistry, and control of yeasts and bacteria involved in the making, aging and spoilage of wine. GE credit: SciEng | SE.—W. (W.) Bisson

#### **128L. Wine Microbiology Laboratory (2)**

Laboratory—6 hours. Prerequisite: course 123, 124, and 128 (may be taken concurrently), Microbiology 102L or Food Science and Technology 104 and 104L; course 125 and 126 recommended.

Restricted to upper division students in fermentation science, viticulture and enology or graduate students in food science. Nature, development, physiology, biochemistry and control of yeasts and bacteria involved in the making, aging and spoilage of wine. GE credit: SciEng | SE, VL, WE.—W. (W.) Bisson

#### **135. Wine Technology and Winery Systems (5)**

Lecture—3 hours; discussion/laboratory—2 hours. Prerequisite: course 124. Process technologies and process systems that are used in modern commercial wineries. Lectures, demonstrations, problem solving sessions, and possible field trips. Includes grape preparation and fermentation equipment; post-fermentation processing equipment; winery utilities, cleaning systems, and waste treatment. GE credit: SciEng | SE.—S. (S.) Block

#### **140. Distilled Beverage Technology (3)**

Lecture—3 hours. Prerequisite: Chemistry 8B; Food Science and Technology 110A. Distillation principles and practices; production technology of brandy, whiskey, rum, vodka, gin, and other distilled beverages; characteristics of raw materials, fermentation, distillation, and aging. Offered in alternate years. GE credit: SciEng | QL, SE.—(S.) Boulton

#### **181. Readings in Enology (1)**

Discussion—1 hour. Prerequisite: course 3. Critical evaluation of selected monographs in enology. Discussion leadership rotates among the students. May be repeated three times for credit. (P/NP grading only.) GE credit: SE.—S. (S.) Matthews

#### **190X. Winemaking Seminar (1)**

Seminar—1 hour; discussion—1 hour. Prerequisite: course 3. Open to Viticulture and Enology majors and graduate students. Outside speakers on a specific winemaking topic chosen for the quarter. Discussion with the speaker hosted by the faculty member(s) in charge. May be repeated three times for credit. (P/NP grading only.) GE credit: SE.—S. (S.)

#### **192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units. Work experience related to Fermentation Science (Enology) or Plant Science (Viticulture) majors. Internships must be approved and supervised by a member of the department or major faculty, but are arranged by the student. (P/NP grading only.) GE credit: SE.

#### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

#### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.) GE credit: SE.

#### **Graduate**

#### **200. Introduction to Scientific Methods (2)**

Lecture/discussion—1 hour; term paper. Prerequisite: graduate standing or consent of instructor. Processes involved in conducting scientific research. Topics include conducting literature review, formulating hypotheses, and analyzing and reporting results. Annotated bibliography and written and oral research proposal.

#### **210. Grape Development and Composition (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 102 and 103, or 105. Anatomy, physiology and biochemistry of grape berry development, with emphasis on the development of grape composition relevant to winemaking. Offered in alternate years.—S. Adams, Polito

#### **213. Flavor Chemistry of Foods and Beverages (3)**

Lecture/discussion—3 hours. Prerequisite: Chemistry 8B, course 123, course 123L or Food Science and Technology 103 or consent of instructors. Students

will become familiar with basic principles of flavor chemistry, analysis, and formation in fresh and processed foods. Students will be required to read and critically evaluate flavor chemistry literature. (Same course as Food Science and Technology 213).—S. (S.) Ebeler, Heymann

#### **215. Sensometrics (3)**

Lecture—3 hours. Prerequisite: Food Science and Technology 117 or the equivalent, course 125 and 125L or Food Science and Technology 107A or 107B. Experimental design and statistical analysis, including multivariate analysis, for both sensory and instrumental data in enology and food-related studies.—F. (F.) Heymann

#### **216. Sustainable Vineyard Development (5)**

Lecture/discussion—3 hours; fieldwork—3 hours; term paper. Prerequisite: course 101A, 101B, 101C, and one of courses 115 and 118 or consent of instructor; course 110, Soil Science 100, Atmospheric Science 133 and Agricultural and Resource Economics 140 recommended. Application of plant, meteorological, soil, water, GIS, and economic sciences to sustainable vineyard development. Preparation of a comprehensive study to determine the viticultural and economic feasibility of a given site for raisin, table, or wine grape production.—F. (F.) Smart

#### **217. Field and GIS Evaluation of Soils (3)**

Lecture/laboratory—4 hours; fieldwork—3 hours. Prerequisite: Plant Sciences 120, 205 or 206; Soil Science 100, 105, or 107; course 101C; Applied Biotechnology 180 are recommended; consent of Instructor. Principles and practices used to evaluate agricultural soils in the field, including soil pits, soil cores, electrical conductivity meters, ground penetrating radar, geomorphology and surface terrain analysis. Use of geographic information sciences, soil databases, digital elevation models and geostatistics. Offered in alternate years.—(W.) Smart

#### **219. Natural Products of Wine (3)**

Lecture—3 hours. Prerequisite: courses 123 and 124, or natural products background and consent of instructor. Structure, occurrence, and changes due to wine production to the natural products found in wine. Chemicals with a sensory impact will be emphasized, including flavonoids and other phenolics, terpenes and norisoprenoids, pyrazines, oak volatiles and other wine constituents.—F. (F.) Waterhouse

#### **223. Instrumental Analysis of Must and Wine (4)**

Lecture—2 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 123 or Food Science and Technology 103 required. Biological Sciences 102 and 103 or Biological Sciences 105, Chemistry 107B or Chemistry 115 recommended. Open to upper division students in Viticulture & Enology, Food Science and Technology; students in Food Science, Ag & Environmental Chemistry and Viticulture & Enology graduate groups. Theory and practice of instrumental analysis of wines and musts. Emphasis on the principles of analytical techniques (e.g., CE, GC, HPLC, Mass Spectrometry) and factors determining correct choice of instrumental method.—S. (S.) Ebeler

#### **224. Advances in the Science of Winemaking (3)**

Lecture—3 hours. Prerequisite: course 125, 126 and graduate standing or consent of instructor. Selected topics in the science and technology of winemaking. Topics drawn from current research of participating faculty. Critical analysis of the technical content of published material.—S. (S.)

#### **225. Advanced Sensory Analysis of Wines (3)**

Lecture/discussion—2 hours; laboratory—4 hours. Prerequisite: courses 124 and 125 (or Food Science and Technology 107) and Agricultural Management and Rangeland Resources 120 or the equivalent. Sensory descriptive analysis experiments will be designed and conducted using standard sensory science methods. Data will be analyzed by analyses of

variance, principal component analyses and generalized Procrustes analysis to evaluate the judge's performance and interpret the significance of the results. —S. Heymann

### **235. Winery Design (4)**

Lecture—2 hours; discussion—1 hour; independent study. Prerequisite: course 124, 135 or consent of instructor. Design of wineries. Includes process calculations, equipment selection, process layout and building choice and siting. Project scheduling, capital costs, and ten-year cash flow analysis for the winery. One field trip required. Offered in alternate years. —W. Boulton

### **270. Critical Evaluation of Scientific Literature (2)**

Discussion—2 hours. Prerequisite: consent of instructor. Contemporary research topics in biological sciences. Discussion of recent research articles in a special topic area. Intended to develop skills in critical evaluation of scientific publications. May be repeated for credit. (S/U grading only.)—F, S. (F, S.) Bisson

### **290. Seminar (1)**

Seminar—1 hour. Prerequisite: consent of instructor. (S/U grading only.)—F, S. (F, S.)

### **290C. Advanced Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Planning and results of research programs, proposals, and experiments. Discussion and critical evaluation of original research being conducted by the group. Discussion led by individual research instructors for research group. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **291. Advanced Viticulture (2)**

Lecture/discussion—2 hours. Prerequisite: course 110, 116, 124, 125; course 210 recommended.

Critical evaluation of scientific and popular literature on selected topics of current interest that relate viticulture to fruit or wine sensory attributes or quality. May be repeated one time for credit. Offered in alternate years. —(W.) Matthews

### **292. Advanced Internship (1-15)**

Internship—3-45 hours. Prerequisite: courses 123, 123L, 124, 124L, 125, 125L, 126, 126L, 128, 128L; consent of instructor. Restricted to Viticulture & Enology Graduate Group graduate students. Work experience related to Fermentation Science (Enology) or Plant Science (Viticulture) majors. Internships must be approved and supervised by a graduate group faculty member or students major professor, but are arranged by the student. May be repeated 15 units for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **297T. Tutoring in Viticulture and Enology (1-5)**

Prerequisite: graduate standing and consent of instructor. Designed for graduate students who desire teaching experience, but are not teaching assistants. Student contact primarily in laboratory or discussion sections, and under direction of a faculty member. (S/U grading only.)

### **298. Group Study (1-5)**

(S/U grading only.)

### **299. Research (1-12)**

(S/U grading only.)

## **Professional**

### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) F, W, S. (F, W, S.)

## **Viticulture and Enology (A Graduate Group)**

Andrew L. Waterhouse, Ph.D., Chairperson of the Group

**Group Office.** 1204 RMI South  
530-752-1852; Fax 530-7582-032;  
<http://vengg.ucdavis.edu>

## **Faculty**

Douglas O. Adams, Ph.D., Professor (*Viticulture and Enology*)  
Charles W. Bamforth, Ph.D., Professor (*Food Science and Technology*)  
Linda F. Bisson, Ph.D., Professor (*Viticulture and Enology*)  
David E. Block, Ph.D., Professor (*Viticulture and Enology, Chemical Engineering*, Academic Senate Distinguished Teaching Award)  
Roger B. Boulton, Ph.D., Professor (*Viticulture and Enology, Chemical Engineering*)  
Dario Cantú, Ph.D., Associate Professor (*Viticulture and Enology*)  
Susan E. Ebeler, Ph.D., Professor (*Viticulture and Enology*)  
Jean-Xavier Guinard, Ph.D., Professor (*Food Science and Technology*)  
Hildegarde Heymann, Ph.D., Professor (*Viticulture and Enology*)  
Maria Marco, Ph.D., Associate Professor (*Food Science and Technology*)  
Mark A. Matthews, Ph.D., Professor (*Viticulture and Enology*)  
David A. Mills, Ph.D., Professor (*Viticulture and Enology, Food Science and Technology*)  
Kenneth A. Shackel, Ph.D., Professor (*Plant Sciences*)  
David R. Smart, Ph.D., Professor (*Viticulture and Enology*)  
Li Tian, Ph.D., Associate Professor (*Plant Sciences*)  
M. Andrew Walker, Ph.D., Professor (*Viticulture and Enology*)  
Andrew L. Waterhouse, Ph.D., Professor (*Viticulture and Enology*)  
Larry E. Williams, Ph.D., Professor (*Viticulture and Enology*)

## **Affiliated Faculty**

Matthew W. Fidelibus, Ph.D., Associate Specialist in Cooperative Extension (*Viticulture and Enology*)  
W. Douglas Gubler, Ph.D., Specialist in Cooperative Extension (*Plant Pathology*)  
Andrew J. McElrone, Ph.D., Assistant Adjunct Professor (*Viticulture and Enology*)  
Jean-Jacques Lambert, Ph.D., Assistant Research Soil Scientist (*Viticulture & Enology*)  
Anita Oberholster, Ph.D., Assistant Specialist in Cooperative Extension (*Viticulture and Enology*)  
Kerri L. Steenwerth, Ph.D., Assistant Adjunct Professor (*Viticulture and Enology*)

**Graduate Study.** The M.S. program offers advanced studies in viticulture and enology, ranging from the genetics, physiology and biochemistry of grapevines to the chemistry, microbiology and sensory science of wines and the chemical engineering of winemaking. Applications must be submitted online by January 15.

Ph.D. studies are not offered by the Graduate Program in Viticulture and Enology.

**Preparation.** Applicants to the program are required to have a level of competence equivalent to that of a strong science undergraduate program. This includes coursework in biology, general chemistry, organic chemistry, calculus, statistics (analysis of variance), biochemistry, microbiology, and economics.

Specific requirements are outlined in detail and may be obtained by visiting <http://vengg.ucdavis.edu>.

**Graduate Advisers.** L.F. Bisson, D. Cantú

## **War-Peace Studies**

(College of Letters and Science)

The interdisciplinary minor in War-Peace Studies examines the causes and dynamics of intra- and international wars and efforts to prevent and settle such conflicts.

Students in the minor are encouraged to participate in the educational activities of the Davis Program of the UC Institute on Global Conflict and Cooperation (IGCC).

The minor is sponsored by the International Relations Program.

## **Minor Program Requirements:**

UNITS

**War-Peace Studies ..... 19-20**

One or two courses from each of the following areas:

**Approaches:** Anthropology 123AN, 126B, Comparative Literature 157, Philosophy 115, 118, Political Science 121, 123, 124, 132, 176, Sociology 157, Women's Studies 102

**Northern and Western Regions:** History 134A, 138C, 142A, 143, 144A, 144B, 145, 170B, 171B, 174B, Native American Studies 130B, Political Science 130, 131

**Southern and Eastern Regions:** Anthropology 142, 143A, 143B, 144, History 165, 191F, 194C, Native American Studies 120, Political Science 142A

**Restriction.** No more than two courses from a single department may be offered in satisfaction of the minor requirements.

**Advising.** International Relations Program 530-754-8098

## **Water Science**

See **Hydrologic Sciences (A Graduate Group), on page 375; Hydrology, on page 376; and Soil and Water Science, on page 551.**

## **Wildlife, Fish, and Conservation Biology**

(College of Agricultural and Environmental Sciences)

John M. Eadie, Ph.D., Chairperson of the Department

**Department Office.** 1086 Academic Surge 530-754-9796; <http://wfcb.ucdavis.edu>

## **Faculty**

Louis W. Botsford, Ph.D., Professor  
Tim Caro, Ph.D., Professor  
John M. Eadie, Ph.D., Professor  
Nann A. Fangue, Ph.D., Associate Professor  
Douglas A. Kelt, Ph.D., Professor  
Brian D. Todd, Ph.D., Associate Professor  
Dirk H. Van Vuren, Ph.D., Professor

## **Emeriti Faculty**

Daniel W. Anderson, Ph.D., Professor Emeritus  
Joseph J. Cech, Jr., Ph.D., Professor Emeritus  
Christopher M. Dewees, Ph.D., Specialist in Cooperative Extension Emeritus  
Deborah L. Elliott-Fisk, Ph.D., Senior Lecturer Emerita  
Don C. Erman, Ph.D., Professor Emeritus  
Nancy A. Erman, M.S., Specialist Emerita  
E. Lee Fitzhugh, Ph.D., Specialist in Cooperative Extension Emeritus  
Walter E. Howard, Ph.D., Professor Emeritus  
Rex E. Marsh, A.B., Specialist Emeritus

Peter B. Moyle, Ph.D., Distinguished Professor  
Emeritus  
Terrell P. Salmon, Ph.D., Specialist in Cooperative Extension Emeritus

### Affiliated Faculty

Roger A. Baldwin, Ph.D., Associate Specialist in Cooperative Extension  
A. Peter Klimley, Ph.D., Adjunct Professor  
A. Keith Miles, Ph.D., Adjunct Professor

### The Major Program

The Wildlife, Fish, and Conservation Biology major deals with the relationships between the requirements of wildlife and the needs of people. Understanding these relationships is vital for the maintenance of ecological diversity, recreational resources, and food supplies. Students completing the major possess a broad knowledge of ecology and natural history, but with the quantitative skills to use this knowledge in critical thinking and decision-making.

**The Program.** The major emphasizes broad training in biological sciences, with specialization in one of four areas. The major is designed primarily for students interested in becoming professionals in the diverse fields of wildlife, fish, and conservation biology, including veterinary and wildlife health sciences. The breadth of course requirements, when combined with electives, also make this an excellent preparatory major for secondary school teaching. Certification by professional societies such as The Wildlife Society, American Fisheries Society, or the Ecological Society of America, or preparation for graduate studies may also be achieved by careful planning of electives with a faculty adviser.

**Career Alternatives.** The major prepares students to excel in the dynamic fields of environmental and conservation biology, emphasizing vertebrate animals—both native and invasive—in their natural environments, as well as resolution of conflicts between humans and wild animals. Positions now held by graduates of this major include wildlife biology, fisheries biology, wildlife damage management, and resource biologists and managers with local, state, and federal agencies, biologists or consultants with private industries such as environmental consulting firms, commercial fishing businesses, electrical utilities, sporting clubs or businesses, and aquaculture operations, as well as veterinarians, medical physicians, and professors/researchers who teach and/or conduct research in academic institutions.

### B.S. Major Requirements:

UNITS

#### Written/Oral Expression ..... 7-8

University Writing Program 1 ..... 4  
Communication 1, 3 or Dramatic  
Art 10 ..... 3-4  
Completing University Writing Program 1 and Communication 1 will simultaneously satisfy the College requirements.

#### Preparatory Subject Matter ..... 50-51

Biological Sciences 2A, 2B, 2C ..... 15  
Chemistry 2A, 2B, 8A, 8B ..... 16  
Mathematics 16A, 16B ..... 6  
Physics 1A, 1B ..... 6  
Statistics 100, 102, or Plant Sciences 120 ..... 4  
Wildlife, Fish, and Conservation Biology 10, 11, or 50 ..... 3-4

#### Depth Subject Matter ..... 45-50

Students graduating with this major are required to attain at least a C average (2.000) in all courses taken at the university in depth and area of specialization subject matter.  
Environmental Science and Policy 100 or Evolution and Ecology 101 ..... 4  
Evolution and Ecology 100 ..... 4  
Biological Sciences 101 ..... 4

Wildlife, Fish, and Conservation Biology 121 or 130.....	4
Neurobiology, Physiology, and Behavior 102 or Wildlife, Fish, and Conservation Biology 141.....	3-4
Wildlife, Fish, and Conservation Biology 122.....	4
Wildlife, Fish, and Conservation Biology 154.....	4
Choose three lecture courses and two (laboratory) courses from: Wildlife, Fish, and Conservation Biology 110, (110L), 111, (111L), 120, (120L), or 134, (134L). 14-15	
Wildlife, Fish, and Conservation Biology 100, or 101 & 101L, or 102 & 102L....	4-7
Strongly recommended, but not required, Statistics 104, 106, or 108 .....	4
Strongly recommended, but not required, Landscape Architecture 150 .....	3
Strongly recommended, but not required, Anatomy, Physiology and Cell Biology 100.....	4

#### Restricted Electives ..... 12-24

Choose one from the four Areas of Specialization shown below. No course can be used to simultaneously satisfy the Depth Subject Matter and the Area of Specialization.

#### Areas of Specialization

(1) *Wildlife and Conservation Biology:* Complete Wildlife, Fish, and Conservation Biology 151.

Choose one course from: Plant Sciences 102, 131, 144, 147 & 147L, 178, Plant Biology 102, 108, 117, 119, 148.

Choose one course from: Wildlife, Fish, and Conservation Biology 110, 111, 120, 134, 136, 141, 144, 152, 155 & 155L, 156, 157 or 160.

Choose one course from: Animal Science 103, 104, 170, Environmental Horticulture 160, Entomology 156, Environmental Science and Policy 121, 127, 155, 161, 162, 166N, 170, 171, Evolution and Ecology 107, 115, 138, 147, Environmental Toxicology 101, Plant Sciences 130, 135, or 162.

Note: Students interested in certification as a Wildlife Biologist from The Wildlife Society should consider additional courses in plant sciences.

(2) *Fish Biology:* Complete Wildlife, Fish, and Conservation Biology 120 & 120L.

Choose one course from: Entomology 116, Evolution and Ecology 112 & 112L or 114. Choose three courses including at least one course from each of the following two groups:

(a) Aquatic Systems  
Animal Science 118, Environmental Science and Policy 116N, 150C, 151, 151L, 152, 155, Evolution and Ecology 115, Environmental Science and Management 100, Hydrology 143, Wildlife, Fish, and Conservation Biology 144, 155 & 155L, 157, or 160.

(b) Water Policy/Law  
Choose one course from: Hydrology 150, Environmental Science and Policy 161, 162, 166N or 169.

(3) *Wildlife Health:* Complete Wildlife, Fish, and Conservation Biology 151.

Complete either Biological Sciences 102 and 103 or Animal Biology 102 and 103.

Choose one course from: Wildlife, Fish, and Conservation Biology 110, 111, 120, 134, 136, 141, 144, 152, 155 & 155L or 160. Choose one course from: Animal Science 103, 104, 170, Anatomy, Physiology, and Cell Biology 100, Microbiology 101, 104 Molecular and Cell Biology 150, Neurobiology, Physiology, and Behavior 101, 140, or Veterinary Medicine and Epidemiology 158.

Note that this AOS recommends additional preparatory courses; prerequisites for admission to Veterinary Medicine vary

among schools and students should confirm the specific requirements of the school(s) to which they wish to apply.

Additional Preparatory (recommended, not required): Chemistry 2C, 118A, 118B, 118C, Physics 7A, 7B, 7C.

(4) *Individualized:* Students may, with prior approval of their adviser and the curriculum committee, design their own individualized specialization within the major. The specialization will consist of at least four upper division courses with a common theme.

#### Total Units for the Degree ..... 114-133

#### Major Adviser. N.A. Fangue

Students transferring to UC Davis from another institution or new students declaring the major of Wildlife, Fish, and Conservation Biology must consult the Master Adviser so that their program can be evaluated and a faculty adviser assigned. Contact the Department in 1086 Academic Surge Building or telephone 530-754-9796.

#### Minor Program Requirements:

The minor in Wildlife, Fish, and Conservation Biology is designed for students interested in basic training and understanding of the ecology and conservation of wild terrestrial and aquatic vertebrates, emphasizing birds, mammals, amphibians, reptiles, and fish, but with relevance and application to all life forms.

UNITS

#### Wildlife, Fish, and Conservation Biology ..... 20-31

Wildlife, Fish, and Conservation Biology 100, 151, and 154, and one course from: 110, 111, 120 or 134..... 15  
Two to four upper division elective courses chosen from the Wildlife, Fish, and Conservation Biology curriculum, excluding Wildlife, Fish, and Conservation Biology 190, 191, 192, 195, 197T, 198, & 199 ..... 5-16

#### Minor Adviser. N.A. Fangue

**Graduate Study.** Faculty in Wildlife, Fish, and Conservation Biology are active members of several graduate programs, including the Ecology, Population Biology, Genetics, Animal Behavior, and Avian Science graduate groups. Students interested in graduate studies should see [Graduate Studies](#), on page 120.

#### Courses in Wildlife, Fish, and Conservation Biology (WFC)

##### Lower Division

###### 10. Wildlife Ecology and Conservation (4)

Lecture—3 hours; discussion—1 hour. Introduction to the ecology and conservation of vertebrates. Complexity and severity of world problems in conserving biological diversity. GE credit: SciEng, Div, Wrt | SE, Sl, WE.—F. S. (F. S.) Fangue, Kelt

###### 11. Introduction to Conservation Biology (3)

Lecture—3 hours. Introduction to conservation biology and background to the biological issues and controversies surrounding loss of species and habitats for students with no background in biological sciences. Offered in alternate years. GE credit: SciEng, Wrt | SE, Sl, WE.—S. Caro

###### 50. Natural History of California's Wild Vertebrates (3)

Lecture—2 hours; discussion—1 hour. Examination of the natural history of California's wild vertebrates (fish, amphibians, reptiles, birds, and mammals), including their biogeography, systematics, ecology and conservation status. GE credit: SciEng, Wrt | SE, Sl, WE.—W. (W.)

###### 51. Introduction to Conservation Biology (3)

Lecture—3 hours. Introduction to conservation biology including both biological and social issues related to the loss of species and habitats. Intended for students with no background in biological sciences. GE credit: SciEng, Wrt | SE, Sl, WE.—S. (S.) Caro

**92. Internship (1-6)**

Internship—3-18 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the department. Internships supervised by a member of the faculty. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. Special study for undergraduates. (P/NP grading only.)—F, W, S. (F, W, S.)

**Upper Division****100. Field Methods in Wildlife, Fish, and Conservation Biology (4)**

Lecture—2 hours; laboratory—3 hours; fieldwork—3 hours. Prerequisite: Biological Sciences 2A-2C; Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course (can be taken concurrently) and consent of instructor. Introduction to field methods for monitoring and studying wild vertebrates and their habitats, with an emphasis on ecology and conservation. Required weekend field trips. GE credit: SciEng | SE.—S. (S.) Eadie, Kelt, Van Vuren

**101. Field Research in Wildlife Ecology (2)**

Lecture/discussion—2 hours. Prerequisite: consent of instructor, and one upper division course in each of ecology, statistics, and either ornithology, mammalogy, or herpetology. Field research in ecology of wild vertebrates in terrestrial environments; formulation of testable hypotheses, study design, introduction to research methodology, oral and written presentation of results. Offered in alternate years. GE credit: SciEng | Wrt | SE, VL, WE.—F. Eadie, Kelt, Todd, Van Vuren

**101L. Field Research in Wildlife Ecology: Laboratory (4)**

Lecture/discussion—2 hours; field work—15 hours. Prerequisite: course 101 (may be taken concurrently) and consent of instructor. Limited enrollment. Field research in ecology of wild vertebrates in terrestrial environments; testing ecological hypotheses through field research, application of research methodology, supervised independent research projects. Held between Labor Day and fall quarter. Offered in alternate years.—F. Eadie, Kelt, Todd, Van Vuren

**102. Field Studies in Fish Biology (1)**

Lecture/discussion—1 hour. Prerequisite: upper division course in each of ecology, aquatic biology, fish biology, and statistics, and consent of instructor. Emphasis on theory of quantitative fish capture methods and design of individual research projects on ecology, behavior, physiology or population biology of fishes. Offered irregularly.—S. (S.)

**102L. Field Studies in Fish Biology: Laboratory (6)**

Fieldwork—15 hours; laboratory—12 hours; discussion/laboratory—3 hours. Prerequisite: course 102 (may be taken concurrently) and consent of instructor. Field investigations of fish biology are emphasized including quantitative capture methods and individual research projects on ecology, behavior, physiology or population biology of fishes at the field site in relation to their habitats. Offered irregularly. (Deferred grading only, pending completion of projects.) GE credit: SciEng, Wrt | SE, WE.—S. (S.)

**110. Biology and Conservation of Wild Mammals (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 2A-2C; Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course, can be taken concurrently. Origins, evolution, diversification, and geographical and ecological distributions of mammals. Morphological, physiological, reproductive, and behavioral adaptations of mammals to their environment.—S. (S.) Kelt

**110L. Laboratory in Biology and Conservation of Wild Mammals (3)**

Laboratory—6 hours. Prerequisite: course 110 (can be concurrent) and consent of instructor. Limited enrollment. Laboratory exercises in the morphology,

systematics, species identification, anatomy, and adaptations of wild mammals to different habitats.—S. (S.) Kelt

**111. Biology and Conservation of Wild Birds (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 2A-2C; upper division ecology course recommended. Phylogeny, distribution, migration, reproduction, population dynamics, behavior and physiological ecology of wild birds. Emphasis on adaptations to environments, species interactions, management, and conservation. GE credit: SciEng | SE.—F. (F.) Eadie

**111L. Laboratory in Biology and Conservation of Wild Birds (3)**

Laboratory—6 hours; fieldwork—3 hours. Prerequisite: course 111 (can be concurrent); consent of instructor. Limited enrollment. Laboratory exercises in bird species identification, anatomy, molts, age and sex, specialized adaptations, behavior, research, with emphasis on conservation of wild birds. Several weekend field trips, after class bird walks, and independent bird study are required.—F. (F.) Eadie

**120. Biology and Conservation of Fishes (3)**

Lecture—3 hours. Prerequisite: Biological Sciences Biological Sciences 2A, 2B, 2C; upper division ecology course recommended. Evolution, ecology, and conservation of marine and freshwater fishes.—F. (F.)

**120L. Laboratory in Biology and Conservation of Fishes (2)**

Laboratory—3 hours. Prerequisite: course 120 (can be concurrent); consent of instructor. Limited enrollment. Morphology, taxonomy, conservation, and identification of marine and freshwater fishes with emphasis on California species.—F. (F.)

**121. Physiology of Fishes (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: upper division courses in nutrition and physiology or consent of instructor. Comparative physiology, growth, reproduction, behavior, and energy relations of fishes. Offered irregularly. GE credit: SciEng, Wrt | SE, WE.

**122. Population Dynamics and Estimation (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Mathematics 16A-16B; Statistics 13 or the equivalent; an upper division course in ecology. Description of bird, mammal and fish population dynamics, modeling philosophy, techniques for estimation of animal abundance (e.g., mark-recapture, change-in-ratio, etc.), mathematical models of populations (e.g., Leslie matrix, logistic, dynamic pool, stock-recruitment); case histories.—S. (S.) Botsford

**130. Physiological Ecology of Wildlife (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course. Principles of physiological ecology, emphasizing vertebrates. Ecological, evolutionary, and behavioral perspectives on physiological mechanisms used by animals to adapt to their environment, including consideration of climate-change and other threats to biodiversity. Tropical, temperate, and polar ecosystems are highlighted. GE credit: SciEng | SE.—W. (W.) Fangue

**134. Herpetology (3)**

Lecture—2 hours; term paper. Prerequisite: Biological Sciences 2A, 2B, 2C; Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent upper division course recommended. Evolution and ecology of the world's diverse reptiles and amphibians. Emphasis on adaptations to environments, species interactions, management, and conservation. Offered in alternate years.—W. Todd

**134L. Herpetology Laboratory (3)**

Laboratory—6 hours. Prerequisite: Biological Sciences 2A, 2B, 2C; Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent upper division course recommended; course 134 concurrently; consent of instructor. Diagnostic characteristics and functional attributes of amphibians and reptiles, emphasizing ecological, bio-geo-

graphic and phylogenetic patterns. Field experience with common species of reptiles and amphibians in the Davis area. Offered in alternate years.—W. Todd

**136. Ecology of Waterfowl and Game Birds (4)**

Lecture—3 hours; laboratory—3 hours; fieldwork—1 hour. Prerequisite: course 111, 111L or the equivalent, or consent of instructor. Detailed examination of distribution, behavior, population dynamics, and management of waterfowl and upland game birds. Offered in alternate years.—(W.) Eadie

**141. Behavioral Ecology (4)**

Lecture—3 hours; film viewing—1 hour. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course. Basic theories underlying the functional and evolutionary significance of behavior, and the role of ecological constraints. Supporting empirical evidence taken mainly from studies of wild vertebrates. Offered in alternate years. GE credit: SciEng | SE.—(W.) Caro

**144. Marine Conservation Science (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course in introductory ecology. Class size limited to 30 students. Key differences between marine and terrestrial ecosystems, major stressors of marine ecosystems (e.g., fisheries, pollution, bioinvasions, climate change and habitat destruction) and their consequences. Laws and agencies responsible for addressing problems, and the policies used. Offered in alternate years.—(F.) Botsford

**150. Urban Wildlife Ecology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 2A, 2B, 2C, or the equivalent. Introduction to the behavior, ecology, and evolution of wild animals in urban environments. Effects of urbanization on disease, fitness, and dynamics of animal populations. Conservation and conflict management efforts in urban settings. Offered in alternate years.—W.

**151. Wildlife Ecology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 2A, 2B, 2C or equivalent. Ecology of wild vertebrates, including habitat selection, spatial organization, demography, population dynamics, competition, predation, herbivory, energetics, and community dynamics, set in the context of human-caused degradation of environments in North America.—F. (F.) Van Vuren

**152. Ecology of Human-Wildlife Conflicts (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 2A, 2B, 2C, or the equivalent. Ecological approaches to managing wild vertebrates that come into conflict with agriculture, public health, or the conservation of biodiversity. Offered in alternate years.—W. Van Vuren

**153. Wildlife Ecotoxicology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: introductory courses in organic chemistry, ecology, and physiology, or consent of instructor; Environmental Toxicology 101 recommended. Various forms of environmental pollution in relation to fish and wildlife, the effects and mechanisms of pollutants, effects on individuals and systems, laboratory and field ecotoxicology, examples/case histories, philosophical/management considerations. Offered irregularly. GE credit: SciEng, Wrt | SE, WE.

**154. Conservation Biology (4)**

Lecture—3 hours; term paper. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or the equivalent. Introduction to conservation biology and background to the biological issues and controversies surrounding loss of species and habitats. Review of species' recovery plan. GE credit: SciEng | SE, WE.—F. (F.) Todd

**155. Habitat Conservation and Restoration (3)**

Lecture—3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course; course 154 and Environmental Horticulture 160 recommended. Analysis of the

characteristics of wildlife and fish habitats, the conservation of habitats, and restoration. GE credit: SciEng, Wrt | SE, VL, WE. –W. (W.)

### **155L. Habitat Conservation and Restoration Laboratory (2)**

Fieldwork—3 hours; laboratory—3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course; course 155 (may be taken concurrently). Analysis of the characteristics of wildlife and fish habitats, application of restoration methods, and evaluation of conservation and restoration projects in the field. Students will also participate during the term in a restoration project. –W. (W.)

### **156. Plant Geography (4)**

Lecture—3 hours; laboratory—3 hours; term paper. Field trips will be substituted for some in-lab activities. Prerequisite: Environmental Science and Policy 100 or Evolution and Ecology 101; Plant Biology 102 or 108 strongly recommended. Survey of the geographical distribution of vegetation types and habitats, with consideration of the environmental and historical factors that determine these patterns. Conservation and management approaches. Analytical field and lab techniques introduced. Offered irregularly. GE credit: SciEng, Wrt | SE, VL, WE.

### **157. Coastal Ecosystems (4)**

Lecture—3 hours; laboratory—3 hours; fieldwork—3 hours. Prerequisite: Environmental Studies 100 or Evolution and Ecology 101; course work in organismal biology, physical geography, and geology recommended. Overview of coastal ecosystems, physical and biological elements and processes, and coastal zone dynamics, including sandy, rocky and muddy shorelines, estuaries, dunes and coastal watersheds. Discussion of the role of historical factors and conservation, restoration, and management approaches. Offered irregularly. GE credit: SciEng | SE, VL.

### **158. Infectious Disease in Ecology and Conservation (3)**

Lecture—3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or Veterinary Medicine 409 or the equivalent. Introduction to the dynamics and control of infectious disease in wildlife, including zoonotic diseases and those threatening endangered species. Basic epidemiological models and their applications. Role of scientists in developing disease control policies. Offered irregularly.

### **160. Animal Coloration (3)**

Lecture/discussion—3 hours. Prerequisite: Biological Sciences 2A, 2B, 2C. Evolutionary and ecological significance of coloration in mammals, birds, reptiles, amphibians, fish, cephalopods, crustaceans, spiders, insects, humans as well as color in fashion, plants and the military. Topics include history, protective coloration, warning coloration, mimicry, sexual dichromatism and color change. Offered in alternate years. –(W.) Caro

### **190. Departmental Research Seminar (1)**

Seminar—1 hour. Prerequisite: upper division standing in the biological sciences. Reports and discussions of recent advances related to wildlife and fisheries biology. May be repeated for credit up to 3 times. (P/NP grading only.)—F, W, S. (F, W, S.)

### **191. Museum Science (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: upper division standing and consent of instructor. Principles and methods required to preserve and present biological specimens for research, teaching collections, and museums. (P/NP grading only.) Offered in alternate years. –W. (W.) Engilis

### **192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the department. Internships supervised by a member of the faculty. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

### **195. Field and Laboratory Research (3)**

Laboratory—6 hours; discussion—1 hour. Prerequisite: course 110L, 111L, or 120L; 121 or 130; Evolution and Ecology 101 or the equivalent; and consent of instructor. Critique and practice of research methods applied to field and/or laboratory environments of wild vertebrates. Students work independently or in small groups to design experimental protocol, analyze data, and report their findings. May be repeated two times for credit. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

### **197T. Tutoring in Wildlife and Fisheries (1-5)**

Prerequisite: major in Wildlife, Fish, and Conservation Biology and consent of instructor. Experience in teaching under guidance of faculty member. (P/NP grading only.)—F, W, S. (F, W, S.)

### **198. Directed Group Study (1-5)**

(P/NP grading only.)—F, W, S. (F, W, S.)

### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)—F, W, S. (F, W, S.)

### **Graduate**

#### **223. Conservation Biology and Animal Behavior (3)**

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: Ecology 208 or Animal Behavior 221. Influences of concepts of animal behavior (functional, evolutionary, developmental, mechanistic, and methodological issues) on conservation biology theory and practice. Offered in alternate years. (S.)—Caro

#### **230. Advanced Physiological Ecology of Wildlife (4)**

Lecture—3 hours; discussion—1 hour. Advanced principles of physiological ecology. Ecological, evolutionary and behavioral perspectives on physiological mechanisms used by animals to adapt to their environment in the context of climate change and other threats to biodiversity. Primary literature will form the basis of discussion. –W. (W.) Fangue

#### **223. Conservation Biology and Animal Behavior (3)**

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: Ecology 208 or Animal Behavior 221; consent of instructor. Influences of concepts of animal behavior (functional, evolutionary, developmental, mechanistic, and methodological issues) on conservation biology theory and practice. Offered in alternate years. —(S.) Caro

#### **262. Advanced Population Dynamics (3)**

Lecture—3 hours. Prerequisite: graduate standing; advanced course in ecology (e.g., Evolution and Ecology 101), population dynamics (e.g., course 122), and one year of calculus; familiarity with matrix algebra and partial differential equations recommended. Logical basis for population models, evaluation of simple ecological models, current population models with age, size, and stage structure, theoretical basis for management and exemplary case histories. Emphasis on development and use of realistic population models in ecological research. (Same course as Ecology 262.) Offered irregularly. –W. (W.) Botsford

#### **290. Seminar (1-3)**

Seminar—1-3 hours. Prerequisite: consent of instructor. Seminar devoted to a highly specific research topic in any area of wildlife or fisheries biology. Special topic selected for a quarter will vary depending on interests of instructor and students. (S/U grading only.)—F, W, S. (F, W, S.)

#### **290C. Research Group Conference (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Weekly conference on research problems, progress and techniques in wildlife and fishery sciences. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **291. Seminar in Aquatic Ecology (2)**

Seminar—2 hours. Prerequisite: graduate standing in biology. Presentation and analysis of assigned topics in aquatic ecology emphasizing fish, fisheries and aquatic conservation. Offered in alternate years. (S/U grading only.)—S. (S.)

### **292. Physiology of Fishes Seminar (1)**

Seminar—1 hour. Prerequisite: graduate standing and at least two courses in physiology; consent of instructor. Seminar devoted to current topics concerning the physiological functioning of fishes. May be repeated two times for credit. Offered irregularly. (S/U grading only.)—F. (F.)

### **294. Behavioral Ecology of Predators and Prey (3)**

Seminar—2 hours. Prerequisite: graduate standing. Presentation and analysis of research papers on social and foraging behavior of predatory animals, antipredator strategies of prey species, co-evolution of predators and prey, and ecology of predator-prey interactions. May be repeated two times for credit. (Same course as Animal Behavior 294.) Offered in alternate years. –W. Caro

### **295. Seminar in Wildlife Ecotoxicology (3)**

Seminar—2 hours; term paper. Prerequisite: graduate standing in biology. Presentation and analysis of assigned research papers on transport, exposure, and effects of environmental contaminants on wildlife-associated ecosystem components, especially at individual/population levels. Specific subjects vary each offering. Offered irregularly. (S/U grading only.)

### **297T. Supervised Teaching in Wildlife and Fisheries Biology (1-3)**

Tutorial—3-9 hours. Prerequisite: meet qualifications for teaching assistant; graduate standing; and consent of instructor. Tutoring and teaching students in undergraduate courses in Wildlife, Fish, and Conservation Biology. Weekly conferences with instructor; evaluations of teaching; preparing for and conducting demonstrations, laboratories, and discussions; preparing and grading examinations. May be repeated for a total of 6 units when a different course is tutored. (S/U grading only.)—F, W, S. (F, W, S.)

### **298. Group Study (1-5)**

F, W, S. (F, W, S.)

### **299. Research (1-12)**

(S/U grading only.)—F, W, S. (F, W, S.)

Students transferring to UC Davis from another institution or new students declaring the major of Wildlife, Fish, and Conservation Biology must consult the Master Adviser so that their program can be evaluated and a faculty adviser assigned. Contact the Department in 1086 Academic Surge Building or telephone 530-754-9796.

GENERAL EDUCATION OPTIONS/COURSES

## NEW GENERAL EDUCATION COURSES; FALL 2011 AND ON

The following section pertains to students who matriculated to UC Davis for the first time in Fall 2011 or later. Students who matriculated prior to Fall 2011 should refer to the [Former General Education Courses; Pre-Fall 2011](#), on page 616.

For the most up-to-date General Education courses, use the class search tool at <http://classes.ucdavis.edu/>.

### TOPICAL BREADTH

These courses satisfy the GE requirement for Topical Breadth.

## FORMER GENERAL EDUCATION COURSES; PRE-FALL 2011

The following section pertains to students who matriculated to UC Davis prior to Fall 2011. Students who matriculated for the first time in Fall 2011 or later should refer to the [New General Education Courses; Fall 2011 and On, on page 592](#).

For the most up-to-date General Education courses, use the class search tool at <http://classes.ucdavis.edu/>.

### TOPICAL BREADTH

These courses provide GE credit for topical breadth. Many of these courses also satisfy the GE requirement for social-cultural diversity (indicated by **D**) and/or provide GE credit for writing experience (indicated by **W**). Complete lists of the courses that satisfy the social-cultural diversity requirement and the courses that provide writing experience credit follow this list.

\* This course may not be used to satisfy a college or university composition requirement and GE writing experience simultaneously.

† Also assigned to another area of topical breadth.

# Credit for writing experience allowed if co-course taken concurrently (see writing experience list).

## SOCIAL-CULTURAL DIVERSITY (DIV)

These courses satisfy the GE requirement for social-cultural diversity. Many of these courses also provide GE credit for topical breadth or writing experience. Refer to the topical breadth and writing experience course lists to determine if any additional GE credit applies.

International Relations  
Linguistics  
Managerial Economics  
Middle East/South Asia Studies  
Political Science  
Political Science—Public Service Psychology (A.B. degree)  
Science & Tech Studies  
Sociology  
Sociology—Organizational Studies  
Textiles & Clothing

#### **Minors**

Aging and Adult Development  
Anthropology (General emphasis)  
Anthropology (Sociocultural emphasis)  
Arab Studies  
Coaching Principles and Methods  
Community Development  
Contemporary Leadership  
East Asian Studies  
Economics  
Education  
Energy Policy  
Environmental Policy Analysis  
Global and International Studies (Social Science emphasis)  
History & Philosophy of Science  
Human Development  
India and South Asia Studies  
International Agricultural Development Latin American and Hemispheric Studies  
Iran and Persian Studies  
Linguistics  
Linguistics for Language Teachers  
Managerial Economics  
Middle East/South Asia Studies  
Political Science  
Psychology  
Science and Society  
Sociology  
Technology Management  
Textiles & Clothing  
War-Peace Studies

\* This course may not be used to satisfy a college or university composition requirement and GE writing experience simultaneously.

† Also assigned to another area of topical breadth.

# Credit for writing experience allowed if co-course taken concurrently (see writing experience list).

## GENERAL EDUCATION THEME OPTIONS

The following section only pertains to students who matriculated to UC Davis prior to Fall 2011.

General Education theme options are sets of GE courses sharing a common intellectual theme. These GE theme options are not a separate element of the GE requirement, but a way of selecting your GE courses so that you may benefit from a coherent focus of study while completing the GE requirement. Completion of a theme satisfies the GE requirement for students with majors assigned to the GE topical breadth area of Arts and Humanities. Students with majors assigned to the topical breadth area of either Science and Engineering or Social Science will need to complete additional GE courses in Arts and Humanities to satisfy the campus GE requirement.

### Global Population and Environmental Issues

For centuries, there have been concerns and predictions about population growth and its potential effects on the environment and the quality of life. Perspectives on population and environmental issues often vary based on such factors as gender, social class, culture, nation, race/ethnicity, and religion. In this group of courses, students will learn about the complex interplay among environmental, economic, and ethical issues through the study of global population patterns. They will learn how science addresses the use of natural resources by humans, along with the fundamentals of environmental impacts such as global warming. This option group of courses explores diverse perspectives on global population and environmental issues by examining biological, physical, and social processes that influence the everyday lives of people around the world.

Topics might include the social, economic, and environmental challenges of population growth; and the ethics and dilemmas of natural resource use.

#### Global Population

Atmospheric Science 5 [or 10]	SciEng, Wrt
Human Development 117	SciEng, Wrt
Agricultural and Resource Economics 15	SocSci, Div, Wrt
Science and Society 1 [or Fiber and Polymer Science 110]	SciEng or SocSci, Div, Wrt SciEng or SocSci, Wrt]
International Agricultural Development 10, SocSci, Div, Wrt [or Community & Regional Development 1]	SocSci, Div, Wrt

### Biodiversity and Cultural Diversity

The nations with the greatest biodiversity often have tremendous ethnic and cultural diversity. This option examines diversity in many interrelated contexts: biological diversity and the impact of contemporary humans; values and cultural practices in regard to production and consumption; the clothes people wear; creation and use of social spaces; and the preservation of genetic resources for food, fiber, and pharmaceuticals.

Topics might include conservation biology; integration of human and natural systems; cultural expression through clothing and appearance; and discussion of what are cultural and social rights.

#### Biodiversity and Cultural Diversity

Wildlife, Fish and Conservation Biology 10	SciEng, Div, Wrt
Plant Biology 11	SciEng, Wrt
Textiles and Clothing 7	SocSci, Div, Wrt
Community and Regional Development 2	SocSci, Div, Wrt
Landscape Architecture 2	SocSci, Wrt

### Food and Fiber

This option focuses on food and fiber systems, from their plant, animal, or synthetic sources to their ultimate use by humans for health, safety, communication, and pleasure. Understanding these systems enables students to see the connections between the food and clothes that are part of our everyday lives and the scientific, social, and cultural issues that make them so significant to society as a whole.

Topics might include food and clothing safety, quality, and availability; media and consumer perceptions; and cultural histories, values, and meanings.

#### Food and Fiber

Animal Science 1 [or Plant Biology 12]	SciEng, Wrt SciEng, Div, Wrt]
Nutrition 10 and Nutrition 11 [or Food Science and Technology 10]	SciEng SciEng, Wrt SciEng or SocSci]
Textiles and Clothing 6	SciEng
Textiles and Clothing 7 or 107	SocSci, Div, Wrt
Science and Society 1	SciEng or SocSci, Div, Wrt
Viticulture and Enology 3	SciEng or SocSci

### Changing Agriculture

Changing demographics, environmental issues, and social-political trends in California all play a role in public perceptions and policies related to our food and fiber systems, natural resources, and community values. These perceptions, policies, and values need to be critically examined in the context of larger global economic trends and environmental health and safety. In this group of courses, students can explore a range of challenging issues related to the complex interplay between rural and urban needs and values.

Topics might include holistic approaches to agriculture; international migration and agricultural development; and how plants and animals influence the course of history.

#### Changing Agriculture Theme Option

Animal Science 1	SciEng, Wrt
Entomology 110	SciEng, Wrt
Plant Biology 12	SciEng, Div, Wrt
Agricultural and Resource Economics 15	SocSci, Div, Wrt
Environmental & Resource Sciences 121*	SciEng, Wrt
Science and Society 2	SciEng or SocSci, Wrt

\* This course may not be used to satisfy a college or university composition requirement and GE writing experience simultaneously.

† Also assigned to another area of topical breadth.

# Credit for writing experience allowed if co-course taken concurrently (see writing experience list).

# UC DAVIS CAMPUS FACILITIES MAP LEGEND

<b>Athletics</b>	
A Street Field .....	I-3
Aggie Field .....	V-2
Aggie Field Hockey Facility .....	A-3
Aggie Stadium .....	V-2
Dobbin's Baseball Complex .....	A-3
Hickey Gym .....	I-1
Howard Field .....	I-1
Hutchison Field .....	A-2
La Rue Field .....	A-1
Mary Welch Tennis Center .....	I-1
Schaal Aquatics Center .....	A-3
Russell Field .....	I-1
The Pavilion .....	A-2
Toomey Field .....	I-1
Solano Field .....	S-3
<b>Buildings</b>	
3rd & A .....	I-1
Academic Surge .....	V-3
Activities and Recreation Center .....	A-2
Advanced Materials Research Laboratory .....	V-4
Aggie Village .....	S-2
Agriculture Field Station .....	A-2
Arboretum Headquarters .....	V-4
Arboretum Teaching Nursery .....	A-4
ARC Pavilion .....	A-2
Art Annex .....	I-3
Art Building .....	I-2
Asmundson Hall .....	V-2
Bainer Hall .....	V-3
Bargain Barn .....	V-3
Bike Barn .....	I-2
Book Store .....	I-2
Bowley Plant Science Teaching Facility .....	A-3
Briggs Hall .....	V-2
Center for Child and Family Studies .....	S-2
Center for Companion Animal Health .....	A-4
Chancellor's Residence .....	I-1
Chemistry .....	I-3
Chemistry Annex .....	I-3
Cole Facility .....	V-4
Conference and Event Services .....	S-2
Conference Center .....	I-3
Cowell Building .....	V-1
Cruess Hall .....	V-1
Cuarto Residence Halls .....	A-1
Dairy Cattle Facility .....	D-3
Domes .....	A-1
Dutton Hall .....	I-2
Earth and Physical Sciences .....	I-3
Educational Opportunity Program .....	I-2
Ecology Laboratory .....	I-2
Environmental Horticulture .....	I-3
Equestrian Center Covered Arena .....	D-5
Everson Hall .....	I-2
Facilities Services .....	I-3
Fire & Police Building .....	V-1
Fleet Services .....	V-4
Food Science & Technology .....	V-2
