## **WELCOME TO UC DAVIS**

We're delighted you've chosen our campus to pursue your academic goals. All of us—faculty, staff, campus leadership and alumni—are committed to helping you succeed.

In your time at UC Davis, you will acquire knowledge and skills that will help you shape the rest of your life. In whatever program you study, you will receive an exceptional education and a degree respected by graduate schools and employers worldwide.

Our philosophy of learning, discovery and engagement ensures you will graduate with a strong academic foundation and an understanding of how your learning is relevant to the greater world.

UC Davis has a century of commitment to public service and seeking solutions to society's critical issues. We encourage you to integrate these goals into your education.

Your passion, intellectual curiosity and vision give our campus the energy and inspiration that make UC Davis special and your time here meaningful.

We are extremely proud of UC Davis. Our alumni have made significant and lasting contributions to society as leaders in government, business, technology, media and the arts. They share their knowledge and resources with the campus and help students build social and career networks before they graduate.

Members of our faculty have won MacArthur genius grants, Pulitzer prizes, Fulbright scholarships and election to the nation's top academies of the arts and sciences. They connect with students in the classroom, during first-year seminars and through research, arts and honors activities.

UC Davis continues to grow and offer new and exciting opportunities to learn and progress. We're looking forward to completion of the spectacular new Manetti Shrem Museum of Art and Ann E. Pitzer Center, as well as the renovation of our historic student union. Our new International Complex, scheduled for opening in the fall of 2016, will be a welcoming environment for collaboration among students and scholars from around the world.

Together, we are building a community that honors our diversity as individuals and reflects our belief in a shared set of values and mutual respect. We encourage you to explore together all that UC Davis has to offer.

Congratulations on becoming an Aggie!

Carolyn Thomas  
Vice Provost & Dean for  
Undergraduate Education

Elias Lopez  
University Registrar

## THE BOARD OF REGENTS

Governance of the University of California is entrusted to a corporation called the Board of Regents. Of the individuals composing the board, eighteen are California citizens appointed by the governor, and seven, including the president of the University and the governor of California, serve ex officio. A Student Regent is selected each year from a list of names submitted to the board by the Student Body Presidents' Council.

The Regents delegate authority in academic matters to the Academic Senate of the faculty, which determines academic policy and supervises the instructional activities of the entire University. All of the permanent faculty, as well as key administrators, are members of the Senate.

The Regents delegate authority for the organization of the University to the president. Janet Napolitano is President and head of the Universitywide administration. Authority for the administration of each campus is delegated to a chancellor.

## THE REGENTS OF THE UNIVERSITY OF CALIFORNIA

### Ex Officio Regents

Jerry Brown  
*Governor of California and President of the Regents*

Gavin Newsom  
*Lieutenant Governor of California*

Anthony Rendon

Michael D. Lairmore, D.V.M., Ph.D., Dean  
 John R. Pascoe, B.V.Sc., Ph.D., Executive Associate Dean  
 Patricia A. Conrad, D.V.M., Ph.D., Associate Dean—Global Programs  
 Jan E. Ilkiw, B.V.Sc., Ph.D., Associate Dean—Academic Programs  
 Sean Owens, D.V.M., Associate Dean—Admissions and Student Programs  
 Isaac Pessah, Ph.D., Associate Dean—Research and Graduate Education  
 Jane Sykes, B.V.Sc., Ph.D., Interim Associate Dean—Clinical Programs and Director—Veterinary Medical Teaching Hospital

**UC Davis Extension**

Paul M. McNeil, Ph.D., Dean  
 Rita Bunch, M.B.A., Assistant Dean, Chief Operating Officer

**UC Davis Health System Leadership; Medical Center, School of Medicine, Betty Irene Moore School of Nursing**

Claire Pomeroy, M.D., M.B.A., Vice Chancellor—Human Health Sciences and Dean  
 Heather Young, Ph.D., R.N., F.A.A.N., Associate Vice Chancellor—Nursing  
 Thomas S. Nesbitt, M.D., M.P.H., Associate Vice Chancellor—Strategic Technologies and Alliances  
 Ann Madden Rice, Chief Executive Officer—UC Davis Medical Center  
 Fred Meyers, M.D., M.A.C.P., Executive Associate Dean  
 Michael Minear, Chief Information Officer  
 Timothy Maurice, M.B.A., Chief Financial Officer  
 James Goodnight, M.D., Ph.D., Associate Dean—Clinical Affairs and Director—Practice Management Board  
 Shelton J. Duruisseau, Ph.D., Associate Vice Chancellor—Diversity and Inclusion and Chief External Affairs Officer  
 Anna Orlowski, J.D., Chief Legal Counsel  
 Teresa Porter, Chief Compliance Officer  
 Allan D. Sieffkin, M.D., Chief Medical Officer—UC Davis Medical Center  
 Vincent L. Johnson, Chief Operating Officer—UC Davis Medical Center  
 Carol Robinson, R.N., M.P.A., N.E.A.-B.C., F.A.A.N., Chief Nursing Officer and Chief Patient Care Services Officer—UC Davis Medical Center  
 J. Douglas Kirk, M.D., F.A.C.E.P., Associate Chief Medical Officer—UC Davis Medical Center

## DEGREES OFFERED BY UC DAVIS

Undergraduate majors are administered by the colleges of Agricultural and Environmental Sciences (A&ES), Biological Sciences (CBS), Letters and Science (L&S), and Engineering. Professional studies are administered by the schools indicated. All graduate programs are administered by the Office of Graduate Studies. The list below indicates the major or discipline, the degree(s) offered and the school or college offering the major.

Degrees offered: A.B.–Bachelor of Arts, B.S.–Bachelor of Science, Certificate, Credential, M.A.–Master of Arts, M.A.S.–Master of Advanced Studies, M.B.A.–Master of Business Administration, M.Ed.–Master of Education, M.Engr–Master of Engineering, M.F.A.–Master of Fine Arts, M.H.S–Master of Health Services, M.P.H.–Master of Public Health, M.P.V.M.–Master of Preventive Veterinary Medicine, M.S.–Master of Science, M.S.N.–Master of Science in Nursing, Ed.D.–Doctorate in Education, D. Engr.–Doctor of Engineering, Ph.D.–Doctor of Philosophy, J.D.–Doctor of Jurisprudence, LL.M.–Master of Laws, M.D.–Doctor of Medicine, D.V.M.–Doctor of Veterinary Medicine. \* Admissions suspended Fall 2012. \*\* Master's degree offered only en route to Ph.D. \*\*\* Master's degree only offered under special circumstances. † Fall 2012 admissions closed to freshman applicants; open to transfer applicants; Fall 2013 admissions open to undergraduate applicants at all levels. §§ As of Fall 2014, the Exercise Biology A.B. and B.S. were closed to admissions and changes into the major.

### Aerospace Science and Engineering

B.S. .... Engineering

### African American and African Studies

A.B. .... L&S

### Agricultural and Environmental Chemistry

M.S., Ph.D. .... A&ES

### Agricultural and Resource Economics

M.S., M.S./M.B.A., Ph.D. .... A&ES

### Agricultural and Environmental Education

B.S. .... A&ES

## MINOR PROGRAMS OFFERED BY UC DAVIS

Minor programs are offered by the Colleges of Agricultural and Environmental Sciences (A&ES), Biological Sciences (CBS), Engineering (ENGR), and Letters and Science (L&S). The School of Education (SOE) and the Graduate School of Management (GSM) each offer one undergraduate minor. The list below indicates the minor program, the offering department (if the department name is different than the name of the minor) and the college offering the minor.

African American and African Studies . . . . .	L&S	Environmental Geology (Geology) . . . . .	L&S	Linguistics for Language Teachers . . . . .	L&S
Aging and Adult Development (Human & Community Development) . . . . .	A&ES	Environmental Horticulture (Plant Sciences) . . . . .	A&ES	Luso-Brazilian Studies (Spanish and Portuguese) . . . . .	L&S
Agricultural Pest Management . . . . .	A&ES	Environmental Policy Analysis & Planning (Environmental Science and Policy) . . . . .	A&ES	Managerial Economics (Agricultural and Resource Economics) . . . . .	A&ES
Agricultural Systems and Environment (Plant Sciences) . . . . .	A&ES	Environmental Toxicology . . . . .	A&ES	Materials Science (Materials Science and Engineering) . . . . .	ENGR
American Studies . . . . .	L&S	Evolution, Ecology and Biodiversity . . . . .	CBS	Mathematics . . . . .	L&S
Animal Science—Animal Biology . . . . .	A&ES	Exercise Biology (Neurobiology, Physiology, and Behavior) . . . . .	CBS	Medical-Veterinary Entomology (Entomology) . . . . .	A&ES
Animal Science—Animal Genetics . . . . .	A&ES	Fiber and Polymer Science (Textiles and Clothing) . . . . .	A&ES	Medieval and Early Modern Studies . . . . .	L&S
Animal Science—Aquaculture . . . . .	A&ES	Film Studies . . . . .	L&S	Middle East/South Asia Studies . . . . .	L&S
Animal Science—Dairy/Livestock . . . . .	A&ES	Food Service Management (Nutrition) . . . . .	A&ES	Music . . . . .	L&S
Animal Science—Equine . . . . .	A&ES	Forensic Entomology (Entomology) . . . . .	A&ES	Native American Studies . . . . .	L&S
Anthropology . . . . .	L&S	French . . . . .	L&S	Nematology . . . . .	A&ES
Applied Computing & Information Systems (Plant Sciences) . . . . .	A&ES	Fungal Biology and Ecology (Plant Pathology) . . . . .	A&ES	Neuroscience (Neurobiology, Physiology, and Behavior) . . . . .	CBS
Arab Studies . . . . .	L&S	Geographic Information Systems (Biological & Agricultural Engineering) . . . . .	A&ES	Nutrition and Food (Nutrition) . . . . .	A&ES
Art History . . . . .	L&S	Geographic Studies (Environmental Design) . . . . .	A&ES	Nutrition Science (Nutrition) . . . . .	A&ES
Art Studio . . . . .	L&S	Geology . . . . .	L&S	Oceanography (Geology) . . . . .	L&S
Asian American Studies . . . . .	L&S	Geophysics (Geology) . . . . .	L&S	Philosophy . . . . .	L&S
Atmospheric Science (Land, Air, and Water Resources) . . . . .	A&ES	German . . . . .	L&S	Physics . . . . .	L&S
Avian Sciences (Animal Science) . . . . .	A&ES	Global and International Studies (Humanities) . . . . .	L&S	Plant Biology . . . . .	CBS
Biological Sciences . . . . .	CBS	Global Disease Biology . . . . .	A&ES	Political Science . . . . .	L&S
Biomedical Engineering . . . . .	ENGR	Greek (Classics) . . . . .	L&S	Precision Agriculture (Biological and Agricultural Engineering) . . . . .	A&ES
Chemistry . . . . .	L&S	History . . . . .	L&S	Professional Writing (University Writing Program) . . . . .	L&S
Chicana/Chicano Studies . . . . .	L&S	History and Philosophy of Science (Science & Technology Studies) . . . . .	L&S	Psychology . . . . .	L&S
Chinese (East Asian Languages and Cultures) . . . . .	L&S	Human Development (Human & Community Development) . . . . .	A&ES	Quantitative Biology and Bioinformatics (Biological Sciences) . . . . .	CBS
Classical Civilization (Classics) . . . . .	L&S	Human Physiology (Neurobiology, Physiology, and Behavior) . . . . .	CBS	Religious Studies . . . . .	L&S
Coaching Principles and Methods . . . . .	L&S	Human Rights (Religious Studies) . . . . .	L&S	Russian . . . . .	L&S
Communication . . . . .	L&S	Hydrology (Land, Air, and Water Resources) . . . . .	A&ES	Science and Society . . . . .	A&ES
Community Development (Human & Community Development) . . . . .	A&ES	India and South Asia Studies . . . . .	L&S	Sexuality Studies . . . . .	L&S
Community Nutrition (Nutrition) . . . . .	A&ES	Insect Biology (Entomology) . . . . .	A&ES	Social and Ethnic Relations (African American and African Studies, Asian American Studies, Native American Studies, Women and Gender Studies) . . . . .	L&S
Comparative Literature . . . . .	L&S	Insect Ecology and Evolution (Entomology) . . . . .	A&ES	Sociology . . . . .	L&S
Computational Biology (Computer Science) . . . . .	ENGR	International Agricultural Development (Human & Community Development) . . . . .	A&ES	Soil Science (Land, Air, and Water Resources) . . . . .	A&ES
Computer Science . . . . .	L&S	International Science Studies (Land, Air, and Water Resources) . . . . .	A&ES	Spanish . . . . .	L&S
Construction Engineering and Management (Civil and Environmental Engineering) . . . . .	ENGR	Iran and Persian Studies . . . . .	L&S	Statistics . . . . .	L&S
Contemporary Leadership . . . . .	A&ES	Italian . . . . .	L&S	Sustainability in the Built Environment (Civil and Environmental Engineering) . . . . .	ENGR
Dramatic Art (Theatre and Dance) . . . . .	L&S	Japanese (East Asian Languages and Cultures) . . . . .	L&S	Technology Management . . . . .	GSM
East Asian Studies . . . . .	L&S	Jewish Studies (Humanities) . . . . .	L&S	Textiles and Clothing . . . . .	A&ES
Economics . . . . .	L&S	Landscape Restoration (Plant Sciences) . . . . .	A&ES	War-Peace Studies (International Relations) . . . . .	L&S
Education . . . . .	SOE	Latin (Classics) . . . . .	L&S	Watershed Science (Land, Air, and Water Resources) . . . . .	A&ES
Electrical Engineering (Electrical and Computer Engineering) . . . . .	ENGR	Latin American and Hemispheric Studies . . . . .	L&S	Wildlife, Fish and Conservation Biology . . . . .	A&ES
Energy Efficiency (Biological and Agricultural Engineering) . . . . .	ENGR	Linguistics . . . . .	L&S	Gender, Sexuality and Women's Studies . . . . .	L&S
Energy Science & Technology (Biological and Agricultural Engineering) . . . . .	ENGR				
Energy Policy (Biological and Agricultural Engineering) . . . . .	ENGR				
English . . . . .	L&S				

## INTRODUCTION

## INTRODUCTION

As one of the world's leading institutions of higher education, the University of California at Davis is committed to serving a student population as diverse as society at large through the advancement of knowledge and discovery.

Founded as the University Farm in 1905, UC Davis has grown from an agricultural college into a comprehensive research university. It was formally designated an independent UC campus in 1959.

In 2016, *U.S. News & World Report* ranked UC Davis eleventh among public universities nationally, and the campus is among only 62 universities admitted into the prestigious Association of American Universities.

UC Davis is home to a diverse student body of more than 34,000 students from across California, the nation and the world.

### Advancing Knowledge

UC Davis offers 104 undergraduate majors and 96 graduate and professional degrees across four colleges and six professional schools. In 2010, the National Research Council ranked one third of UC Davis' 51 doctoral programs in the top 25 percent of their fields, with six of them placing in the top 5 percent.

In the QS World University Rankings for 2016, UC Davis held its standing as the world's best university for veterinary medicine and came out among the top two universities in agriculture and forestry for the fourth consecutive year.

The campus' reputation has attracted a distinguished faculty of scholars and scientists. Faculty honors include 8 U.S. Presidential Awards, more than 280 National Academy memberships, 52 Fulbright Scholars and two Pulitzer Prizes.

### A Place for Discovery

UC Davis researchers work toward solving the world's most difficult problems and support California's economic, intellectual and social development. Over the past decade, annual research funding increased by 45 percent, from \$542 million to \$786 million.

Researchers explore the intellectual frontiers across the sciences, humanities and arts, with exceptional global leadership in agricultural science, food science and environmental sustainability.

Research is integral to teaching at UC Davis. Faculty members share their research findings in the classroom, and students learn first-hand about discovery while working with professors in the laboratory and field. Several undergraduate research programs offer students the opportunity to work on a research project in a faculty laboratory, in some cases as early as their freshman year.

### Leader in Public Service

In the tradition of land-grant universities, UC Davis uses knowledge and discovery in addressing the needs of the region, state, nation and world.

The UC Davis Health System serves 6 million people in 33 counties across northern and central California. It operates the Sacramento Valley's only Level 1 trauma center as well as a National Cancer Institute-designated cancer center, a comprehensive children's hospital and a world-renowned telemedicine network.

The School of Veterinary Medicine is involved in more than 30 nations, and its teaching hospital cares for more than 51,000 small and large animals each year. The School of Law offers community support in immigration, prison law, civil rights litigation and family protection.

The School of Education has prepared nearly 6,000 teachers for California classrooms since its inception in 2002.

The Betty Irene Moore School of Nursing, founded in 2009, is dedicated to improving patient safety and creating inter-professional opportunities for nurse leaders.

### Life at UC Davis

Students enjoy sports, community internships, public service, outdoor activities, concerts and clubs.

UC Davis is known for its student-run services. The Coffee House (CoHo), the radio station KDVS, Outdoor Adventures and the Unitrans bus service provide paying jobs to hundreds of students each year. Some 70 percent of UC Davis students gain work experiences through the Internship and Career Center, one of the largest programs of its kind in the nation.

The Robert and Margrit Mondavi Center for the Performing Arts features internationally renowned artists and speakers and showcases students' music, theater and dance performances.

Museums and galleries range from the Bohart Museum of Entomology's insects to contemporary Native American art at the C.N. Gorman Museum. The university will soon showcase its art collections in the Jan Shrem and Maria Manetti Shrem Art Museum, which is scheduled to open in November 2016.

In 2007, UC Davis transitioned to Division I of the National Collegiate Athletic Association. The university sponsors 13 varsity sports for women and 9 for men. The campus also fields nearly 40 student-organized intercollegiate sports clubs that compete against area colleges. Thousands of students also have fun playing with fellow Aggies in more than 30 men's, women's and coed sports, from flag football to ultimate Frisbee.

A city of more than 65,000 people, Davis is known as an environmentally aware, physically fit and socially innovative community. Davis has more bike-community residents per person than any other city in the U.S., with more than 100 miles of dedicated bike lanes and paths. Davis' proximity to the state capital and the San Francisco Bay Area make it easy to take advantage of big-city attractions while enjoying the lifestyle of a university town.

## THE UNIVERSITY OF CALIFORNIA

UC Davis is one of 10 campuses of the University of California, which was chartered as a land grant college in 1868 and has become the country's premier system of public higher education. Together, the campuses have an enrollment of more than 240,000 students and more than 1.7 million alumni living around the world. Some 150 laboratories, extension centers, research and field stations strengthen teaching and research while providing public service to California and the nation. The collections of the more than 100 UC campus libraries are surpassed in size in the U.S. only by that of the Library of Congress.

## VISITING THE CAMPUS

UC Davis Welcome Center  
530-752-8111; <http://visit.ucdavis.edu/>

Welcome Center operating hours are 8:00 a.m.-5:00 p.m. (PT), Monday-Friday and 9:00 a.m.-3:00 p.m. (PT) Saturday. Closed Sunday except for March 15-April 30. Monday-Friday campus tours are offered at 9:00 a.m. and 1 p.m. (PT) Saturday (and Sunday from March 15-April 30) tours are offered at 11:00 a.m. (PT). Over-the-counter admissions advising is offered during operating hours at the Welcome Center. To register for a tour, see <http://visit.ucdavis.edu> or call 530-752-8111. If you have questions regarding application procedures or entrance requirements, write or visit the UC Davis Welcome Center at 550 Alumni Lane, Davis, CA 95616.

## ACCREDITATION

The University of California, Davis is accredited by WASC Senior College and University Commission (WSCUC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501 510-748-9001, a regional institutional accrediting body recognized by the Council for Higher Education and the U.S. Department of Education.

UC Davis is also accredited by the Accreditation Board for Engineering and Technology, Accreditation Council for Graduate Medical Education, Accreditation Review Commission on Education for the Physician Assistant (ARC-PA), American Association for Accreditation of Laboratory Animal Care, American Bar Association, American Chemical Society, American Dietetic Association, American Psychological Association, American Society of Crime Lab Directors Laboratory Accreditation Board (ASCLD/LAB); American Society of Landscape Architects, Association of American Law Schools, Association of American Medical Colleges, Association to Advance Collegiate Schools of Business, Commission on Collegiate Nursing Education; Commission on Teacher Credentialing, Computer Science Accreditation Commission, Council on Education and Public Health, the Council on Education of the American Veterinary Medical Association, Intersocietal Commission for the Accreditation of Vascular Laboratories (ICAVL), and the Liaison Committee on Medical Education.

Students interested in reviewing WSCUC accreditation documents may do so at <http://wasc.ucdavis.edu>. Those interested in reviewing profession-specific accreditation documents should contact the relevant dean's office.

## THE UNDERGRADUATE COLLEGES

### The College of Agricultural and Environmental Sciences

College Office  
150 Mrak Hall  
530-752-0108; <http://www.caes.ucdavis.edu>

The College of Agricultural and Environmental Sciences offers a diverse program of majors and courses and is committed to education that emphasizes a spirit of discovery. Based on the premise that tomorrow's citizens will need to anticipate, understand and solve emerging societal problems and contribute to the discovery and application of new knowledge, the college fosters:

- Critical thinking and an appreciation for diversity in thought and approaches to problem solving
- An ethos of lifelong learning—of teaching oneself and others while confronting challenges and solving problems
- An ability to move beyond either/or thinking and to pursue innovative and integrative understanding of the agricultural sciences, environmental sciences and human sciences
- Intellectual skills that prepare individuals to secure a life-affirming physical and cultural environment based on sound, respectful management of resources
- A commitment to serve the public with informed and open-minded dedication to understanding, critiquing and addressing complex societal needs and interests

The college is proud of its rich agricultural history. From this foundation, it has expanded its educational offerings to encompass programs that highlight interconnections among the environment, plant and animal sciences, biological sciences and human sciences. Through a wide array of major programs, the college prepares high-potential students for advanced studies in diverse disciplines and leadership in such arenas as public policy; research and development; managerial and natural resource economics; agricultural systems; environmental protection, safety and design; human nutrition, health and development; and the food, fiber, textile and apparel industries.

Undergraduate students enjoy early contact with faculty advisers, graduate students and postgraduate researchers, enriching and broadening the educational experience of all.

Several levels of academic advising are available that are designed to enhance your undergraduate experience. Advisers help you plan your courses, meet degree requirements and take maximum advantage of the resources available at UC Davis. You are encouraged to meet regularly with your assigned faculty adviser and with the Advising Associates and departmental peer advisers. Through a shared commitment to education for service to society, college faculty, staff and students work together to improve the relationship between humanity and the natural world.

## University of California, Davis Principles of Community

**T**HE UNIVERSITY OF CALIFORNIA, DAVIS, is first and foremost an institution of learning and teaching, committed to serving the needs of society. Our campus community reflects and is a part of a society comprising all races, creeds, and social circumstances. The successful conduct of the University's affairs requires that every member of the University community acknowledge and practice the following basic principles:

**W**E AFFIRM THE DIGNITY inherent in all of us, and we strive to maintain a climate of justice marked by respect for each other. We acknowledge that our society carries within it historical and deep-rooted misunderstandings and biases, and therefore we will endeavor to foster mutual understanding among the many parts of our whole.

**W**E AFFIRM THE RIGHT of freedom of expression within our community and also affirm our commitment to the highest standards of civility and decency towards all. We recognize the right of every individual to think and speak as dictated by personal belief, to express any idea, and to disagree with or counter another's point of view, limited only by University regulations governing time, place, and manner. We promote open expression of our individuality and our diversity within the bounds of courtesy, sensitivity, and respect.

**W**E CONFRONT AND REJECT all manifestations of discrimination, including those based on race, ethnicity, gender, age, disability, sexual orientation, religious or political beliefs, status within or outside the University, or any of the other differences among people which have been excuses for misunderstanding, dissension, or hatred. We recognize and cherish the richness contributed to our lives by our diversity. We take pride in our various achievements, and we celebrate our differences.

**W**E RECOGNIZE that each of us has an obligation to the community of which we have chosen to be a part. We will strive to build a true community of spirit and purpose based on mutual respect and caring.

The "Principles of Community" were prepared and adopted after extensive discussion within the campus community about the need for a statement that reflects UC Davis' commitment to a learning environment characterized by diversity, understanding and the acceptance of all people. This statement of common principles was published on April 20, 1990, carrying the endorsement of Chancellor Theodore L. Hullar and the leadership of the Davis Division of the Academic Senate, the Academic Staff Organization, the UC Davis Staff Assembly, the UC Davis Medical Center Staff Assembly, the Associated Students of UC Davis (ASUCD), and the Graduate Student Association.

## Educational Objectives for Students

The UC Davis Educational Objectives for Undergraduate Students were adopted by the Academic Senate in April 2002 to:

- Articulate what we aspire for student learning.
- Help to establish campus priorities and guide decision making related to student development.
- Guide academic programs in the review of how their classes and course requirements interact with the goals to demonstrate educational effectiveness.

The objectives for undergraduate education at UC Davis are that all students

- Develop effective communication skills:  
Written, oral, interpersonal, group.
- Develop higher cognitive skills:  
Critical thinking, creativity, analytical ability.
- Cultivate the virtues:  
Ethics, responsibility, honor, tolerance, respect for others, empathy.
- Develop focus and depth in one or more disciplines.
- Develop leadership skills:  
Ability to stimulate and direct collaborative learning and collaborative action.
- Develop a global perspective:  
Broad intellectual and cultural experience through active engagement, an understanding of the interactions among the individual, society, and the natural world.
- Prepare for lifelong learning:  
Independent thinking and learning, learning to find information, asking the right questions.

**Mission Statement:**

# Philosophy of Purpose

The core purpose of UC Davis as a comprehensive research university is the generation, advancement, dissemination and application of knowledge. To that end, UC Davis is committed to offering leading programs throughout the academic disciplines and in its professional schools. These programs integrate three purposes: teaching students as a partnership between faculty mentors and young scholars; advancing knowledge and pioneering studies through creative research and scholarship; and applying that knowledge to address the needs of the region, state, nation and globe. UC Davis is committed to the land-grant tradition on which it was founded, which holds that the broad purpose of a university is service to people and society.

UC Davis offers its undergraduates an experience which comprises the central elements of a liberal education—a broad general education with specialization in a scholarly discipline—and opportunities for personal development and academic enrichment through undergraduate research, work-learn experiences and extracurricular student life. To its post-baccalaureate students, UC Davis offers an array of programs which draw upon its wide range of specialized academic fields. By stimulating cross-disciplinary approaches and using its distinctive graduate groups, UC Davis continues to follow and redefine the mandate of a major research university.

The campus is committed to advancing teaching and scholarly work in the arts, humanities and the social sciences – studies that enrich the life of each person and society as a whole, and infuse the pursuit of careers in education, law, management and medicine. UC Davis' prominence in the STEM fields, including distinguished programs in agricultural and environmental sciences, make the campus a leader in solving critical issues in local, state, national and global health and sustainability.

UC Davis extends service to the region, state, nation and the world in many forms, such as cooperative extension to agriculture and education; medical services to central California and beyond through the multifaceted UC Davis Health System in Sacramento; University Extension programs that share knowledge with the region; the emerging work of the World Food Center; voluntary contributions of faculty, staff and students; and athletic and cultural programs for the campus and community at large.

UC Davis is surrounded by vibrant, local communities and its proximity to the state capital gives this outreach urgency and opportunity. Collaborative studies and cooperation between UC Davis and state agencies and the Legislature are both a special responsibility and a unique opportunity. UC Davis is characterized by a distinguished faculty, a dedicated and high-achieving staff and students of great potential and accomplishment. As we move forward, we recognize that our continued excellence is dependent upon our ability to diversify our university community, consonant with the citizenry of California.

## The College of Biological Sciences

Biology Academic Success Center  
1023 Sciences Laboratory Building  
530-752-0410; <http://basc.ucdavis.edu>

The mission of the College of Biological Sciences is to prepare students to fully engage and actively participate in all areas of the exciting and rapidly expanding field of biology. Courses offered by the college span the basic biological disciplines of biochemistry, behavior, cell biology, evolution, ecology, genetics, physiology and neurobiology and apply these concepts to the study of microbes, plants and animals ranging from genetic model organisms to humans. Recent additions to the curriculum, including courses in genomics, bioinformatics and computational biology, reflect the profound changes sweeping biology as new technologies enable new areas of research.

Coursework in the college's majors is rich in hands-on laboratory instruction as well as lectures and seminars. Every department in the College offers laboratory courses in the Sciences Laboratory Building—a state-of-the-art facility featuring advanced instrumentation and a student-friendly environment. In addition, many students in the college participate in laboratory research and internships that enable them to bridge classroom experiences to life beyond the university.

Biology is integral to a multitude of career options. Whether interested in a professional career in the health sciences, research, education, environmental work, business, law, administration, pharmaceutical sales or communications, students in the College of Biological Sciences receive the attention and preparation they need to excel in their chosen field.

To learn more about the nine majors offered through the College of Biological Sciences, see <http://basc.ucdavis.edu>, select *Students*, then *Current Students*, and then select *Learn about the majors offered*.

## The College of Engineering

Dean's Office  
1042 Kemper Hall  
530-752-7642;  
<http://engineering.ucdavis.edu>  
<http://www.facebook.com/UCDEngineering>

The College of Engineering at UC Davis is among the top engineering colleges in the nation.

With a strong record of academic excellence, a rich tradition of interdisciplinary research and a diverse and distinguished faculty, the College's undergraduate program has earned a place among our nation's top twenty public undergraduate colleges of engineering and among the top twenty public university graduate engineering programs.

With an enrollment of 4,445 undergraduates and 1,005 graduate students, the College is one of the largest undergraduate engineering colleges in the University of California system.

We have 206 engineering faculty, with 21 current and emeriti members named to the National Academies of Engineering, Science and Medicine.

The Engineering Accreditation Commission of ABET (<http://www.abet.org>) accredits the following ten programs:

- Aerospace Science and Engineering
- Biochemical Engineering

- Biological Systems Engineering
- Biomedical Engineering
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Electrical Engineering
- Materials Science and Engineering
- Mechanical Engineering

The Engineering Accreditation Commission and the Computing Accreditation Commission of ABET accredit the following program:

- Computer Science and Engineering

The College maintains a long-standing commitment to undergraduate students, preparing them to contribute to the engineering professions as well as ongoing engineering research. To that end, our academic programs balance the fundamentals of engineering theory with practice, visionary research with practical application—preparing students for entry into engineering practice and graduate-level research.

Undergraduate research experiences and mentoring services smooth the transition from undergraduate to graduate study at UC Davis. Undergraduates are able to interact with faculty and graduate students from nine graduate engineering programs as well as researchers from a broad spectrum of disciplines university-wide. Award-winning faculty researchers strive to develop more effective, real world solutions to society's most complex problems in the uniquely friendly, open society of collaborative, cross-disciplinary and rigorous scholarship for which UC Davis is widely known. Undergraduates have opportunities to be contributing members of this rich learning environment.

In the proud tradition of America's great land-grant research universities, the UC Davis College of Engineering integrates teaching, research and service to society. While advancing the leading edge of engineering knowledge, the College trains the next generation of engineers who will make a difference in our world.

**The Department of Biological and Agricultural Engineering** combines study in engineering with instruction in the biological sciences to solve challenging environmental and technical problems.

**The Department of Biomedical Engineering** educates students in a highly interdisciplinary combination of the biological sciences and engineering as this combination applies to medicine.

**The Department of Chemical Engineering** offers curricula integrating knowledge of chemistry, biological sciences and engineering that enable students to solve problems in current and future chemical, biochemical and manufacturing technologies.

**The Department of Civil and Environmental Engineering** educates students to plan and design safe and sustainable infrastructure systems that have a direct impact on the quality of human life and on health and human productivity.

**The Department of Computer Science** offers programs in all aspects of the design and use of computer hardware and software systems. The department also plays a significant service role for programs throughout the campus.

**The Department of Electrical and Computer Engineering** offers programs in research and education crucial for the continued success of high technology industries in California and the nation, preparing students to design, analyze and use electronic and computer systems effectively.

**The Department of Materials Science and Engineering** offers curricula integrating knowledge of physics, chemistry, mathematics, micro-level structure, thermodynamics, and kinetics that enables students to select engineering materials and solve design problems in both current and future technologies or to analyze the nanostructure-properties relationships and behavior of materials.

**The Department of Mechanical and Aerospace Engineering** educates students in the design and manufacture of complex engineering systems for transport, industry or energy and in the design, manufacture and operation of aircraft and aerospace structures.

Every effort has been made to provide engineering students with the maximum flexibility consistent with rigorous professional education standards. The key to flexibility is academic advising. As an incoming student, you will be given the name and office hours of your departmental staff adviser; you should arrange to meet with your adviser before you register for courses for the first time.

Undergraduate education in engineering at UC Davis serves as a sound basis for beginning professional practice in engineering design and development, as a preparation for careers in corporate or governmental operations and as a foundation for graduate study. To these ends, the college emphasizes fundamental sciences to give students the maximum postgraduate flexibility. In order to remain relevant in a quickly changing technical world, engineering education must be based on fundamentals or rapidly become obsolete.

Engineers will continue to face new challenges in the race to improve the quality of life for everyone and keep our state and nation competitive in the global marketplace.

As part of one of the nation's 76 land-grant institutions, UC Davis Engineering's mission is to help maintain the United States' technical leadership and advance technology for the benefit of everyone.

## The College of Letters and Science

Undergraduate Education and Advising Office  
200 Social Sciences and Humanities Building  
530-752-0392; <http://www.ls.ucdavis.edu>

The College of Letters and Science provides students with the opportunity to actively engage the central academic disciplines of the university. Founded in 1951, the College of Letters and Science is the largest of the schools and colleges at UC Davis, the University of California's most comprehensive university. The college is comprised of three divisions encompassing the broadest offering of disciplines at UC Davis: Humanities, Arts and Cultural Studies; Mathematical and Physical Sciences; and Social Sciences. The college's 650+ faculty members teach the core curriculum for virtually all 23,000 undergraduate students in the university as well as mentoring thousands of graduate students pursuing more than 50 fields of interest in the college. The college confers Bachelor of Arts (A.B.), Bachelor of Science (B.S.) and Bachelor of Arts and Science (B.A.S.) degrees.

The College of Letters and Science is a community of scholars and students sharing a commitment to liberal education rather than to specialized, vocationally-oriented training. The college exposes you to the worlds of human experience, of ideas, of artistic accomplishments and of matter and things. Within this curriculum you are able to explore a variety of academic fields, engage in the pursuit of fundamental knowledge and gain the capacity for independent study and thought. By learning to think carefully and critically, you will be able to continue the ongoing process of education that begins in the classroom but continues over a lifetime. You will have learned how to learn—the ultimate objective of a liberal arts education.

The educational goals of the college are reflected in the three primary groups of requirements established by the faculty: the English Composition Requirement, the Foreign Language and Area Requirements and the Major Requirements.

The **English Composition Requirement** ensures that you are well versed in written communication skills.

The **Foreign Language and Area Requirements** provide you with a broad background of knowledge, guide you in an exploration of the interdependencies of knowledge and acquaint you with other cultures.

The College of Letters and Science acknowledges the value of language learning and encourages students to acquire proficiency in a foreign language before graduating from UC Davis. The goals of language learning are the following: communicating complex ideas in the target language; acquiring understanding of a variety of cultural perspectives and differences; fostering intercultural communicative competence; gaining access to cultural production from another time and place; enhancing knowledge of other disciplines through the target language; recognizing the nature and structure of languages, including one's own; and developing the capacity to participate actively in multilingual communities both at home and abroad.

The **Major Requirements** provide you with intellectual depth and competence in a selected area of study.

The college has a well-developed system of faculty advisers, professional staff advisers and student peer advisers who are available for individual consultations with undergraduates in a variety of settings, from the college undergraduate education and advising office to departmental offices to campus residence halls.

The strength of the college lies in the faculty's commitment to advancing the frontiers of human knowledge through research, artistic expression and other creative endeavors and to the effective communication and application of that knowledge through teaching and public service. Together, faculty and students in the College of Letters and Science create a climate that enables students to achieve their highest potential.

## GRADUATE STUDY

Office of Graduate Studies  
250 Mrak Hall  
530-752-0650; <https://gradstudies.ucdavis.edu>

Graduate students at UC Davis have the opportunity to work with and learn from accomplished faculty, recognized for their contributions to research in their fields. The Office of Graduate Studies oversees nearly 100 graduate programs leading to master's and doctoral degrees, which together enroll approximately 4,800 graduate students. Many graduate programs are offered through gradu-

ate groups, an interdisciplinary concept that allows students to study and work with faculty in interrelated areas to broaden their intellectual experiences; see [Graduate Studies, on page 119](#).

## PROFESSIONAL STUDY

UC Davis has six professional schools—the School of Law (J.D.), the School of Medicine (M.D.), the School of Veterinary Medicine (D.V.M., M.P.V.M.), the School of Education (M.A., Ph.D., Ed.D.), the Betty Irene Moore School of Nursing (M.H.S., M.S., Ph.D.), and the Graduate School of Management (M.B.A., M.P.A.c.). These schools and programs are described in later chapters.

Students interested in reviewing WASC accreditation documents may do so at <http://wasc.ucdavis.edu>. Those interested in reviewing profession-specific accreditation documents should contact the relevant Dean's office.

## ACADEMIC RESOURCES

### The University Library

530-752-8792; <http://www.lib.ucdavis.edu>

The University Library is an integral part of the University of California, Davis, and one of the top research university libraries in the U.S. It also participates in and benefits from the collective activities of the University of California's system of libraries and the California Digital Library. The Library's omnidisciplinary and highly regarded collections and research services have long supported the faculty, students and researchers of the university, the health care professionals of the UC Davis Health System, and the citizens of California.

The Library's vision is to be the academic hub of UC Davis, advancing research, education, and innovation in a networked world. The Library is an interdisciplinary resource for the entire community that enables transformative research and education through its provision of critical scholarship, tools, and services.

The University Library is comprised of four facilities: the Peter J. Shields Library, the Physical Sciences & Engineering Library, the Loren D. Carlson Health Sciences Library, and the F. William Blaisdell Medical Library in Sacramento. The combined physical collections of the University Library total more than 4 million volumes. An extensive variety of journal titles, government documents, maps, microfilms, media, and other formats are also part of the collection. The law library, administered by the School of Law, is located in King Hall. The Library also has extensive digital holdings, such as e-journals and e-books and digital materials collected from the UC Davis community. These online collections are available anytime from anywhere, to support the needs of 21st Century scholars. The campus wireless network is available within all libraries and connects authorized users to library and campus resources and services.

Library services and resources information is available at <http://www.lib.ucdavis.edu>. In addition, the Library's online catalogs identify library collections at UC Davis and at the other nine UC campuses. The Library provides classes on the use of modern online tools for finding and using digital content, as well as subject specific electronic journals and databases. Subject specialist and teaching librarians and digital scholarship experts are available for consultation to identify and use information resources for research, and to use those resources for new types of scholarship.

## UC Davis Arboretum and Public Garden

Arboretum and Public Garden Headquarters  
530-752-4880; <http://arboretum.ucdavis.edu>

UC Davis—already known for its heritage trees and park-like atmosphere—elevated the profile of its outdoor spaces by launching the UC Davis Arboretum and Public Garden in 2011. Through close partnerships with students, academic departments, and community members, the UC Davis Arboretum and Public Garden seeks to provide a visitor-friendly, living museum complete with educational and sustainable landscapes that showcase our campus's academically-diverse expertise hand-in-hand with programs that allow for a wide-range of community participation including student internships, volunteer opportunities, and all-ages programming highlighting environmental sustainability, the arts and sciences.

One of the gems of the campus landscape is the 103-acre UC Davis Arboretum, founded in 1936, which contains a documented collection of more than 50,000 trees, shrubs and perennials from Mediterranean-climate areas throughout the world. Here visitors enjoy winding paths for walking, jogging, and bicycling, benches for enjoying the views, and picnic tables for casual gatherings. Demonstration gardens of drought-tolerant flowering perennials and collections of California native plants, oaks, acacias, conifers, and eucalyptus are resources for teaching and research; these landscapes also serve as a backdrop for a diverse array of events in addition to operating as an outdoor gallery for student and community-created art.

Students are integral to the Arboretum and Public Garden's vision for transforming our campus grounds into an engaging outdoor experience. Through its Learning by Leading Program, students participate in internships where they gain environmental leadership skills in sustainable horticulture, edible landscaping, nursery management, naturalized land management, and education and outreach. In addition, students, as well as community members, are also invited to volunteer for short-term projects ranging from event management to garden planting.

Although still in its infancy, the UC Davis Arboretum and Public Garden is gaining national attention for its sustainable landscape management as well as its practice of harnessing community collaboration to enhance the visitor experience.

## Information and Educational Technology

Information and Educational Technology (IET) provides a wide range of services and support to undergraduate and graduate students. For more information, see <http://iet.ucdavis.edu/student/index.html>.

A good place to get more information about IET's services is [itcatalog.ucdavis.edu](http://itcatalog.ucdavis.edu).

For answers to your campus technology questions, you can find the IT Knowledge Base at <http://kb.ucdavis.edu>.

For campus IT help, contact the IT Express Service Desk at 530-754-HELP (4357); [ithelp@ucdavis.edu](mailto:ithelp@ucdavis.edu).

## Taking Care of Business Online

- Enroll in classes, add or drop courses, view and print your class schedule
- Access course grades

- View and print your unofficial academic record
- Check balances, view bills, make payments, and manage your student account
- Apply for and view financial aid awards
- Plan your class schedule and pre-check your registration status with Schedule Builder
- Make campus bookstore purchases; see <http://ucdavisstores.com>

### **Learning and Teaching with Technology**

- **The campus has two Learning Management Systems (LMS) in 2016-17: SmartSite, which is being retired, and UC Davis Canvas, which is being phased in.** Talk with your instructors to see which LMS they are using for your courses during 2016-17. You can use the LMS to communicate with your instructors and fellow students; work together on papers and projects; manage assignments, study, and more. See <http://movetocanvas.ucdavis.edu/> for information about UC Davis Canvas, and <http://smartsite.ucdavis.edu> for information about SmartSite
- **Searchable electronic databases.** Find them at Shields Library. You'll have free, easy access from on- or off-campus; see <http://www.lib.ucdavis.edu>
- **iTunes, YouTube and podcasting.** Digital audio recording equipment is installed in several lecture halls, and portable digital recorders are available for rental from IET-Academic Technology Services (Surge II). Audio and video podcasting services are available to all instructors and campus groups; see [&](http://podcasting.ucdavis.edu) <http://itunes.ucdavis.edu>
- **Classroom technology.** All 128 general assignment classrooms have audio, network and projection capabilities, and include a projector, CD player, DVD player, VCR, built-in microphone and laptop hook-up. Classrooms with more than 50 seats also have assistive hearing systems; see <http://registrar.ucdavis.edu/faculty-staff/classroom/>
- **Lecture Capture.** Academic Technology Services is working with the Office of the University Registrar to provide automated lecture capture technology in 20 of our General Assignment classrooms. These lecture-capture rooms have the ability to record video, audio and lecture content and automatically publish these recordings to the instructors SmartSite for viewing by students. For more information, contact [ats@ucdavis.edu](mailto:ats@ucdavis.edu); see <https://video.ucdavis.edu>

### **The Essentials: Computers, Email, Software, Labs**

- **Email.** Every student has a free Gmail-based email account; see <http://itcatalog.ucdavis.edu/service/davismail>
- **Computer purchases.** Our recommendations can help guide your purchases. Financial aid is available for qualified applicants; see <http://computerownership.ucdavis.edu>. To buy computers and accessories at the campus bookstore, see <http://ucdavisstores.com>
- **Software.** Various programs are available free of charge or at a discount; see <http://software.ucdavis.edu>
- **The Virtual Lab** lets you remotely log on to software in IET's computer labs after hours; see <http://virtuallab.ucdavis.edu>
- **Multimedia.** You'll want to check out the video, audio, and graphic design software, as well as printers, scanners, etc., in the IET Media Lab; see <http://ietmedialab.ucdavis.edu/>

• **Computer rooms.** Computer classrooms and labs distributed around the campus provide access to PCs, Macs and printers. Some labs have both Mac and PC computers, and many have extended hours during the week; see <http://ats.ucdavis.edu/services/computer-rooms/>

- **Printing.** All computer rooms are equipped with printers; see <http://clm.ucdavis.edu/rooms/printing>. You can also send a print job from your computer to any printer in five locations; see <http://wirelessprinting.ucdavis.edu>

### **Networking**

- **Wireless Internet.** Eduroam is the campus wireless network. For access requirements and instructions, see <http://itcatalog.ucdavis.edu/service/wireless-guest-access>
- **Wired Internet.** Students living on campus can also connect to the Internet by using ResNet, the high-speed residence hall network. Each residence hall also has a computer center with computers, printers, and scanners; see <http://www.housing.ucdavis.edu/computers/>

### **Security**

**Computer security.** Blocking computer viruses and preventing unauthorized access to computing systems are important parts of campus computing life; see more information at <http://security.ucdavis.edu>.

### **Technical Support**

**IT Express.** Free computing help with almost anything related to campus tech. Call 530-754-HELP (4357) or see <http://kb.ucdavis.edu>, <http://itexpress.ucdavis.edu>, or <https://www.facebook.com/ucditx>.

All information above is current as of spring 2016. News about campus technology is distributed via TechNews at <http://technews.ucdavis.edu>.

## **RESEARCH PROGRAMS AND RESOURCES**

### **Organized Research Units**

Organized Research Units (ORUs) are campus-wide interdisciplinary research programs that further the university's missions of teaching, research and public service, but do not offer courses of instruction. Members of an ORU come from more than one department and normally from more than one school, college division.

### **Air Quality Research Center (AQRC)**

3050 Bainer Hall 530-754-6558  
Anthony Wexler, Director; [aswexler@ucdavis.edu](mailto:aswexler@ucdavis.edu)  
<http://airquality.ucdavis.edu/>

The Air Quality Research Center provides support for teams of collaborative researchers to conduct scientific, engineering, health, social and economic research to inform planning and regulations for air quality and climate change. The AQRC educates through conferences, outreach, scholarly publications, and training grants. Researchers at UC Davis employ theoretical approaches, mathematical models, measurements in the field and in laboratories, and policy analysis to tackle state, federal and intercontinental air quality problems. The center is composed of over 60 faculty and

research staff members from six schools and colleges across campus. This breadth of expertise allows us to take a broad, interdisciplinary approach to air-quality problem solving.

### Bodega Marine Laboratory and Reserve

Bodega Marine Laboratory  
P.O. Box 247  
Bodega Bay, CA 94923  
707-875-2211; Fax 707-875-2009  
[ucdbml@ucdavis.edu](mailto:ucdbml@ucdavis.edu); <http://bml.ucdavis.edu>

The Bodega Marine Laboratory is dedicated to research and teaching in marine science. Research areas include: **Ecology and Evolution**—invasive species, biodiversity, community ecology, etc., **Coastal Oceanography**—upwelling, estuaries and land runoff, nearshore hydrodynamics, ocean observing, **Ocean Health**—developmental and reproductive toxicology, shellfish health, environmental assessment, **Physiology**—comparative physiology and biochemistry, reproductive physiology, seagrass and seaweed physiological ecology, **Conservation**—fisheries management, marine protected areas, endangered species restoration, **Climate Change**—ecological impacts, ocean acidification, paleoceanography. Well-equipped facilities feature running seawater in two classrooms and many laboratories, a marine science library, lecture hall, housing facilities, computer labs, state of the art microscopy imaging facility, experimental climate change facility, greenhouses, experimental freshwater system for anadromous/estuarine invertebrate and fish studies, network of automated environmental sensors on marine and terrestrial habitats, 42-foot research vessel and various small boats, and a dive locker and air station. Faculty teach a number of undergraduate and graduate courses during the academic year and summer session. The laboratory is located in Bodega Bay, Sonoma County, 100 miles west of Davis.

The Bodega Marine Reserve, part of the UC Natural Reserve System, is 362 acres of remarkably diverse habitats, including an excellent rocky intertidal zone, sand beaches, saltmarsh, lagoon tidal flats, freshwater marsh, coastal prairie and dunes. The reserve also administers adjacent subtidal sand and rock habitats in a marine life refuge. Areas of research include a broad spectrum of field studies of plants and animals in coastal marine, intertidal and terrestrial ecosystems.

### California National Primate Research Center

Primate Center  
530-752-0447; <http://www.cnprc.ucdavis.edu>

The California National Primate Research Center (CNPRC) is a local, regional, and national resource to furthering scientific discovery, using biomedical research to make breakthroughs in health and science, leading to new diagnostics, therapeutics, and clinical procedures that enhance quality of life for both humans and animals. The CNPRC is an Organized Research Unit of the University of California, Davis and part of the National Primate Research Centers Program at the National Institutes of Health.

Under the direction of UC Davis faculty, the CNPRC is comprised of four research units that emphasize translational studies in Brain, Mind and Behavior, Infectious Diseases, Reproductive Sciences and Regenerative Medicine, and Respiratory Diseases. Research projects using nonhuman primates contribute in substantial ways to health care and are developing a better understanding of, and new treatments for, a wide range of human health problems

including asthma, HIV/AIDS, childhood illnesses, Alzheimer's disease, emerging infectious diseases, and environmental toxins that impact our health.

The CNPRC supports self-sustaining, genetically characterized breeding colonies of rhesus macaques and titi monkeys that are also studied for natural behaviors and spontaneously occurring disorders. Educational experiences at the CNPRC are available for undergraduate and graduate students, as well as veterinary residents.

### Center for Health and the Environment

530-752-1340; <http://che.ucdavis.edu>

The Center for Health and the Environment (CHE) coordinates and engages in interdisciplinary research on environmental agents, including chemicals and radiation, and health outcomes in humans, animals and other organisms. Researchers conduct epidemiologic studies in human populations, as well as experiments in whole animals, organisms, cells and molecules. Research on the development of agents for population control of humans and wildlife seek to mitigate the adverse effects of overabundance on the environment. Studies on toxic, radioactive, mutagenic, carcinogenic and teratogenic compounds are carried out in special animal holding facilities. Laboratories are equipped for studies in analytical chemistry, biochemical toxicology, cell and molecular biology, endocrinology, inhalation toxicology, morphology and reproductive and developmental biology. The Center houses a major university-wide program and federally funded center in occupational and agricultural medicine, nanotechnology and, a School of Medicine program in reproductive biology.

### Crocker Nuclear Laboratory

530-752-1460; <http://crocker.ucdavis.edu>

The Crocker Nuclear Laboratory is an interdepartmental laboratory for the application of nuclear science to a variety of disciplines, including air pollution and visibility, nuclear physics and chemistry, medical therapy with proton beams, material damage studies, and the effect of background and extraterrestrial radiation on electronic components.

### Institute for Data Analysis and Visualization

2343 Academic Surge 530-752-0481  
Kenneth Joy, Director; [kijoy@ucdavis.edu](mailto:kijoy@ucdavis.edu)  
<http://idav.ucdavis.edu>

The mission of the Institute is the integration of research efforts at UC Davis in data analysis and visualization. The Institute draws students and faculty from a variety of departments and colleges, allowing researchers to work together on real-world, applied problems that deal with the massive data analysis and visualization problems encountered in science, engineering, and other fields. The integration of the two fields, especially in biological applications of high throughput biological assay data such as gene expression arrays, proteomics, metabolomics and NMR spectroscopy, produce methods that impact a substantial number of scientific fields. In neuroscience, computer science, computational science, computational physics, and engineering applications, the Institute contributes data exploration and problem-solving methods through visualization, computer graphics, data analysis, and expressive interfaces that enable discovery and analysis from massive information streams. The collaborative efforts of the faculty

and students of the Institute enable the University to address a wide-variety of application areas and contribute methods that enable scientists and engineers to make decisions from their data.

### Institute of Governmental Affairs

360 Shields Library  
530-752-0966; Fax 530-752-8666; <http://www.iga.ucdavis.edu>

The Institute of Governmental Affairs (IGA) serves as a research base for social science faculty at UC Davis. IGA serves approximately 60 faculty from 10 campus departments as well as scholars visiting from throughout the United States and around the world.

Located in the core of the UC Davis campus, IGA houses eight formal research programs: Center for International Data; Center for State and Local Taxation; Center for the Evolution of the Global Economy; Conflict Processes Group; Economy, Justice and Society (EJS); Migration Dialogue; the Network Sciences Group; the Public Opinion Workshop, and the Rural Economies of the Americas Program (REAP).

Specialized services include grant advising, preparation and administration; research program development; library and data services; social science computing, programming and statistical consulting; seminar, workshop and conference organization; and much more. The institute sponsors an active public affairs program and enhances the education of students by providing research opportunities. IGA serves as the UC Davis liaison to the system-wide program, Institute on Global Conflict and Cooperation (IGCC) and the All-UC Group in Economic History.

### Institute of Transportation Studies

West Village, 1605 Tilia St, Suite 100; 530-752-6548  
Dan Sperling, Director; [dsperling@ucdavis.edu](mailto:dsperling@ucdavis.edu)  
<http://www.its.ucdavis.edu>

The Institute of Transportation Studies conducts multidisciplinary research on complex problems related to the transportation system and disseminates research results to the broader academic and professional community. Research priorities are travel behavior, alternative-fueled vehicle technology and policy, energy and environmental projects and advanced vehicle and highway systems. About 60 faculty members and 130 graduate students from more than 13 academic disciplines, including four Engineering departments, Economics, Environmental Science and Policy, Ecology, Agricultural and Resource Economics, and the Graduate School of Management, participate in the research activities of the Institute. The Institute administers a graduate program in Transportation Technology and Policy, and a number of research centers, including the National Center for Sustainable Transportation, the UC Davis Energy Efficiency Center (EEC), the UC Davis Plug-In Hybrid Electric Vehicle (PH&EV) Center, the Sustainable Transportation Energy Pathways (NextSTEPS) program, the UC Davis Western Cooling Efficiency Center (WCEC), the China Center for Energy and Transportation (C-CET).

### John Muir Institute of the Environment

Mark Schwartz, Director 530-754-9135

The John Muir Institute of the Environment (JMIE) supports innovation and discovery aimed at solving real-world environmental problems. The Institute's faculty are committed to strengthening the scientific foundation for environmental decision making through collective entrepreneurship, a team-oriented approach

that recognizes the complexities of environmental problems and the societal context in which they occur. JMIE champions science and technological innovation, provides campus-wide leadership, hosts centers and projects, and seeds research and educational initiatives to solve real-world environmental problems. Focal areas include water quantity and quality, impacts of particulates in human health, climate change and natural resource management. The Institute links science and technology to policy by providing the intellectual setting for interactions between researchers, regulatory agencies, policy-makers and the public.

### Nanomaterials in the Environment, Agriculture and Technology (NEAT)

4415 Chemistry Annex 530-752-3292  
Alexandra Navrotsky, Director; [anavrotsky@ucdavis.edu](mailto:anavrotsky@ucdavis.edu)  
<http://neat.ucdavis.edu>

NEAT is a multidisciplinary research and education program linking the fundamental physics, chemistry, and engineering of small particles and nanomaterials to several challenging areas of investigation, including applications in ceramic, chemical, electronic, environmental, and agricultural technology; environmental transport and transformation and the resulting factors of environmental pollution and remediation; and interactions with the biosphere, especially microorganisms and the consequential effects on health.

### Program in International and Community Nutrition

Kathryn G. Dewey  
3253 Meyer Hall  
530-752-1992; Fax 530-752-3406; [kgdewey@ucdavis.edu](mailto:kgdewey@ucdavis.edu)  
<http://picn.ucdavis.edu>

Faculty members of the Program in International and Community Nutrition are studying the epidemiology and causal mechanisms of the major nutritional problems of human populations in low-income countries and in disadvantaged ethnic minority groups in the United States, with the ultimate objective of planning, implementing and evaluating programs to ameliorate these problems. Current areas of research include maternal and child nutrition, control of micronutrient deficiencies, determinants of food intake, nutrition and infection, nutritional assessment, and food and nutrition programs and policy.

### ADDITIONAL RESEARCH CENTERS AND RESOURCES

#### Adult Fitness Program

UC Davis Sports Medicine Program  
916-734-6805

The UC Davis Adult Fitness Program is designed to help individuals improve their health and physical fitness to prevent disease and improve quality of life. Our team of exercise specialists includes sports medicine physicians, exercise physiologists and nutritionists trained by UC Davis Sports Medicine, Exercise Biology and Nutrition Faculty in exercise testing and prescription and sports nutrition. This program exists to provide a public health service to the university and surrounding communities; to provide clinical learning opportunities for UC Davis students; to provide opportunities to study the benefit of exercise and proper nutrition in the prevention of disease and assist individuals in evaluating their progress through discounted repeat testing and evaluation.

## **Advanced Highway Maintenance & Construction Technology (AHMCT) Research Center**

Academic Surge 1003 530-752-5981  
 Steve Velinsky, Director; [savelinsky@ucdavis.edu](mailto:savelinsky@ucdavis.edu)  
 Bahram Ravani, Director; [bravani@ucdavis.edu](mailto:bravani@ucdavis.edu)  
<http://www.ahmct.ucdavis.edu/>

In cooperation with state, federal, and private agencies as well as private industry, the Center for Advanced Highway Maintenance and Construction performs applied and basic research to develop innovative technologies in the areas of highway and civil infrastructure construction, maintenance, and operations. Our ultimate goal is the deployment of these technologies. Our efforts center on safety, mobility, lean operations, reliability, and the minimization of environmental impacts. To achieve these aims, we combine and leverage advanced automation and robotics, information technology, sensing and mechatronics, design and sustainability, life-cycle analysis, and advanced communication and computer technologies.

The Center works directly with California Department of Transportation (CALTRANS) also helps them access university and industry research, maintain a leadership position in maintenance and construction technology, access federal and pooled funds for research, test and evaluate new technologies, improve the Caltrans public image as a technology-oriented organization, and train students and professionals in transportation operations and technology.

## **Advanced Materials Characterization and Testing Laboratory (AMCaT)**

Kemper Hall; lower level  
 Lab Manager: Fred Hayes; [fahayes@ucdavis.edu](mailto:fahayes@ucdavis.edu)  
<http://chms.engineering.ucdavis.edu/research/amcat/index.html>

The AMCaT labs place their major emphasis on analytical electron microscopy (micro analysis) in the material sciences. The vision and goal of AMCaT is to embrace and support a multi-disciplinary user base of students (undergraduate and graduate), post doctoral fellows, and faculty researchers at UC Davis. The facility also offers its users a variety of sample preparation equipment, a light microscopy lab with image analysis, an x-ray lab, and a materials testing lab. AMCaT supports numerous lab classes in engineering.

## **Advanced Transportation Infrastructure Research Center Facility (ATIRC)**

West Campus  
 John Harvey, Director (UCPRC); [jtharvey@ucdavis.edu](mailto:jtharvey@ucdavis.edu)

The UC Davis Advanced Transportation Infrastructure Research Center (ATIRC) project provides a facility for two research programs: the UC Pavement Research Center (UCPRC) and the Advanced Highway Maintenance and Construction Technology Research Center (AHMCT). Research at the UCPRC at ATIRC includes accelerated pavement testing of new types of materials and pavement structures using the Heavy Vehicle Simulators, laboratory specimen preparation and testing, and analyses. ATIRC houses the UC Davis staff of the UCPRC.

## **Agricultural Sustainability Institute**

Thomas P. Tomich, Director  
 143 Robbins Hall  
 530-752-3915; Fax 530-752-2829; [asi@ucdavis.edu](mailto:asi@ucdavis.edu)  
<http://asi.ucdavis.edu/>

The Agricultural Sustainability Institute (ASI) is a hub linking research, education, and outreach in sustainable agriculture and food systems across all divisions of the College of Agricultural and Environmental Sciences at UC Davis, across the University of California, and with other partners across the state, nation, and planet. ASI includes:

- Advising and internship coordination for the UC Davis undergraduate major in Sustainable Agriculture and Food Systems.
- UC Davis Student Farm.
- UC Davis Russell Ranch Sustainable Agriculture Facility.
- UC ANR statewide Sustainable Agriculture Research & Education Program (SAREP).
- The Inter-institutional Network on Food, Agriculture and Sustainability (INFAS), a national academic network.

## **California Agricultural Experiment Station**

College of Agricultural and Environmental Sciences  
 530-752-1610

The California Agricultural Experiment Station has branches on the UC Davis, UC Riverside and UC Berkeley campuses. The UC Davis branch includes approximately 400 faculty and CE Specialists, mostly in the College of Agricultural and Environmental Sciences, but also in the College of Biological Sciences and the School of Veterinary Medicine. In addition to laboratory facilities, it has approximately 3,000 acres devoted to field research in the environmental and crop sciences, as well as facilities to support animal and long-term experimental research. The Experiment Station supports faculty in research involving agricultural production, food processing, nutrition, animal care and disease prevention, consumer sciences and community development and in natural resources and ecosystem science management, with an emphasis on maintaining and improving environmental quality of both natural and managed ecosystems.

## **Center for Advanced Laboratory Fusion Science and Engineering (CALFUSE)**

3001 Ghausi Hall 530-754-9069  
 Neville Luhmann, Director; [ncluhmann@ucdavis.edu](mailto:ncluhmann@ucdavis.edu)  
 David Hwang, Director; [dqhwang@ucdavis.edu](mailto:dqhwang@ucdavis.edu)  
<http://calfuse.ucdavis.edu/>

The purpose of Center for Advanced Laboratory Fusion Science and Engineering (CALFUSE) is to promote interaction between research and educational entities within the University and among the University, the national laboratories, and industrial laboratories. Fusion research is an extremely broad field, encompassing topics that cut across numerous engineering, science, and policy disciplines. The initial set of topics includes plasma accelerators, high-energy particle accelerators, plasma diagnostics (specifically, millimeter wave and Terahertz technology developments), advanced computing, advanced materials, and energy policy. The Center invites participation from all fields that may have relevance to fusion education and research.

## Center for Biophotonics (C4B)

2700 Stockton Blvd., Suite 1400  
 Sacramento, CA 95817 916-734-8600  
 Dennis Matthews, Director; [dmatthews@ucdavis.edu](mailto:dmatthews@ucdavis.edu)  
<http://cbst.ucdavis.edu/>

The Center for Biophotonics applies biophotonics—the science of light interaction with biological matter—to solve problems in biology and medicine. Work at C4B advances the research, development, and application of new optical/photonics tools and technologies in medicine and the life sciences, enabling engineers to collaborate with basic scientists and physicians at the UC Davis Medical Center to translate new technologies from the benchtop to the bedside. Center projects are highly diverse and include superresolution optical microscopies, advanced imaging and manipulation of living cells and other biological systems, engineered fluorescent proteins, label-free cell analysis by Raman spectroscopy and second harmonic generation, molecular sensors and assays, *in vitro* and *in vivo* devices and assays for diagnosis, monitoring and treatment of disease.

C4B is the successor of the NSF Center for Biophotonics Science and Technology, which was funded by the National Science Foundation and participating institutions between 2002-2013.

## Center for Child and Family Studies

Center for Child and Family Studies (main office in West House)  
 530-752-2888; <http://ccfs.ucdavis.edu>

The Center for Child and Family Studies (CCFS) houses the Early Childhood Laboratory (ECL), a research, teaching and demonstration laboratory of the Division of Human Development and Family Studies in the Department of Human Ecology. At the ECL, students enrolled in human development courses learn observational techniques and participate with peers, children, parents and professionals in developmental programs for infants through preschoolers. Students study early development in a naturalistic setting, linking research and theory to principles of interaction, and learning about developmental differences. Selected undergraduate students participate in faculty and graduate student research at the laboratory. The CCFS also houses several research and outreach facilities, including the Eichhorn Family House.

## Center for Geotechnical Modeling

2655 Brooks Road 530-752-7929  
 Ross W. Boulanger, Director; [rwboulanger@ucdavis.edu](mailto:rwboulanger@ucdavis.edu)  
<http://cgm.engineering.ucdavis.edu/>

The Center performs research in the broad area of geotechnical engineering, with a focus on earthquake engineering problems such as dynamic site response, liquefaction, ground failure, and soil-foundation-structure interaction for buildings, bridges, dams, tunnels, and port facilities. The Center emphasizes physical modeling using one of the world's largest and most advanced geotechnical centrifuge facilities, but also performs numerical simulations using advanced computational tools, develops design procedures, and develops new techniques for site characterization. The centrifuge is available for shared use by researchers from around the country and is supported by NSF's National Hazards Engineering Research Infrastructure program.

## Center for Information Technology in the Interest of Society (CITRIS)

2101 Academic Surge Building  
 Bahram Ravani, Director and Professor of Mechanical & Aerospace Engineering;  
<http://ucdavis.citrис-uc.org>

The Center for Information Technology Research in the Interest of Society (CITRIS) is one of the California Institutes of Science and Innovations with a mission of investigating information technology solutions for society's most pressing challenges. The Center involves a partnership among four UC campuses: UC Davis, UC Berkeley, UC Merced and UC Santa Cruz and operates within the greater ecosystem of the University of California and the innovative and entrepreneurial spirit of northern California.

CITRIS was created to "shorten the pipeline" between world-class laboratory research and the creation of start-ups, larger companies, and whole industries.

CITRIS facilitates partnerships and collaborations involving faculty members and students from numerous departments at the four UC campuses with industrial and other collaborators. Current CITRIS initiatives include Sustainable Infrastructures (pursuing research in cyber-infrastructure of a sustainable society); Connected Communities (supporting collaborative discovery, design, and governance through new technologies that enhance education, creative work, and public engagement); People and Robots (addressing approaches and challenges in Cloud Robotics, Deep Learning, Human-Centric Automation, and Bio-Inspired Robotics in the interest of the society); and Health (developing innovative technologies in telehealth, sensors, analytics and mobile devices to improve health outcomes and access to cost-effective healthcare).

## Center for Mind and Brain

267 Cousteau Place, Davis, CA 95618 530-297-4651  
 Steven J. Luck, Director;  
<http://mindbrain.ucdavis.edu/>

The Center for Mind and Brain is an interdisciplinary research center that is dedicated to understanding the nature of the human mind. Our scientists probe the mind using state-of-the-art approaches from the social, biological, engineering, and medical sciences. Our core research areas include attention, development and aging, memory, multisensory integration, music, and disorders of mind and brain. We focus on both discovering the fundamental principles of the healthy human mind and understanding and treating conditions such as autism, schizophrenia, and Alzheimer's disease.

## Center for Molecular Genomic Imaging (CMGI)

451 Health Sciences Drive 530-754-8960  
 Simon Cherry, Director; [srcherry@ucdavis.edu](mailto:srcherry@ucdavis.edu)  
<http://imaging.bme.ucdavis.edu/>

The Center for Molecular Genomic Imaging (CMGI) offers the research community dedicated, state-of-the-art imaging technologies for *in vivo* and biospecimen imaging. Imaging modalities include PET, SPECT, CT, MRI, ultrasound, autoradiography, and optical imaging (fluorescence and bioluminescence). CMGI also operates a biomedical cyclotron and radiochemistry facility for synthesis of radiotracers. The CMGI has become a core facility serving a wide range of campus investigators and is integrated into many major centers, programs, and institutes.

Imaging studies can provide new insights in many areas of biomedical research, including oncology, cardiology, neuroscience and pharmacology. Molecular and genomic imaging can play an important role in advancing basic science investigations and in the development of new diagnostic and therapeutic approaches for use in the clinical setting. CMGI staff provide services that include consultation, protocol planning and experimental design, animal handling and physiologic monitoring, injection of contrast agents and radiopharmaceuticals, scanning, data reconstruction and visualization, image analysis and data backup. CMGI facilities are open to all researchers at UC Davis, and are also open, on a space-available basis, to external researchers.

## **Center for Nano and Micromanufacturing**

West Wing Kemper Hall; Office: 1125 Kemper Hall;  
530-574-7138  
Corey Wolin, Manager; [cdwolin@ucdavis.edu](mailto:cdwolin@ucdavis.edu)  
<http://ncnc.engineering.ucdavis.edu/>

The Center for Nano and Micromanufacturing (CNM2) includes a 10,000 square-foot Class 100 cleanroom, offering a broad line of lithography tools with resolution capabilities down to 50nm, metal and dielectric thin-film deposition, dry etching, as well as numerous characterization tools to support device manufacturing for a variety of industries and applications. The facility has capabilities to accommodate a wide variety of substrate materials including: Si, SiO<sub>2</sub>, borosilicate glass, InP, GaAS as well as biocompatible polymer materials such as PDMS. External to the cleanroom we have an additional 5000+ square feet of research space which houses both a high-resolution SEM and FIB system used for sample characterization and TEM sample preparation. The staff is available from 9:00 a.m.-5:00 p.m. (PT) to assist internal and external users with process development and training to help streamline research projects.

## **Center for Neuroscience**

Cameron Carter, Director  
1544 Newton Ct., Davis, CA 95618  
530-757-8708; Fax 530-757-8827;  
<http://neuroscience.ucdavis.edu>

The Center for Neuroscience is an interdisciplinary unit that serves as the focal point for the study of the neurosciences at UC Davis. Faculty affiliated with the Center are from 13 departments and sections. The center sponsors a seminar series, conferences and symposia, provides research space for center members and supports graduate students, postdoctoral scholars and distinguished visitors.

Faculty and students are engaged in the study of brain mechanisms responsible for normal human cognitive and perceptual processes and in the study of fundamental aspects of nerve cell function and development. A core group of cognitive neuroscientists uses various imaging techniques and electrophysiological techniques to study both the normal and lesioned cerebral cortex to understand how the normal brain controls behavior. Other faculty members use either animal models to understand how information is processed in the brain or simple systems to study the fundamental biology of nerve function and development and disorders affecting them.

## **Center for Population Biology**

Storer Hall 530-752-1274  
Artyom Kopp, Director; [akopp@ucdavis.edu](mailto:akopp@ucdavis.edu)  
<http://cpb.ucdavis.edu>

The UC Davis Center for Population Biology (CPB) aims to advance understanding of the fundamental ecological and evolutionary processes that control the origins and maintenance of biological diversity, at all levels of organization ranging from molecules to ecosystems. Our activities promote integrative, multidisciplinary research in population biology through collaborations, mentorships, workshops and meetings. Faculty in the Center are drawn from nine academic departments and three colleges; Biological Sciences, Agricultural and Environmental Sciences, and Letters and Science.

## **Center for Science and Innovation Studies**

1246 Social Sciences and Humanities Building & 1127 King Hall  
Mario Biagioli, Ph.D., Program Director  
[http://innovation.ucdavis.edu/](http://innovation.ucdavis.edu)

The Center for Science and Innovation Studies (CSIS) studies the many dimensions of the process of technoscientific innovation. We focus predominantly on the upstream spectrum of innovation—from the design, articulation, and funding of research programs to the patenting and publication of their outcomes—paying particular attention to the process, practices, instruments, and techniques of innovation and to the conceptual and practical problems of knowledge transfer. Through detailed case studies (contemporary as well as historical), CSIS analyzes the role that training, cultural background, and cross-disciplinary mobility play in the emergence of innovation, as well as the new institutional, technical, and social arrangements that sustain it (from innovative laboratory architecture and university-industry configurations, to distributed and cyberinfrastructure-based collaborations, to alternative systems of publication and new metrics of quality and performance assessment). Intellectual property (both traditional regimes and more recent platforms like free software, open source, science commons, and norm-based reward systems) is a central focus of CSIS, as are issues pertaining to bioprospecting and the access to and reward of traditional knowledge.

## **Coastal and Marine Sciences Institute**

Storer Hall 530-752-1274  
Rick Grosberg, Founding Director; [rkgrosberg@ucdavis.edu](mailto:rkgrosberg@ucdavis.edu)  
<http://cmsi.ucdavis.edu>

The UC Davis Coastal and Marine Sciences Institute (CMSI) aims to catalyze and foster innovative partnerships for discovering, understanding, and communicating science for effective stewardship of ocean and coastal environments in California and beyond. We especially strive to build collaborations with diverse stakeholders, including private-sector organizations and corporations that have significant economic, social, and environmental interests in the coastal ocean and at the land-sea interface. We believe that such partnerships can lead to the development of sustainable policies that protect biodiversity, nurture ecosystems, and enhance beneficial uses of the ocean in parallel with socio-economic development. With its focus on humans and the coastal oceans, the institute assembles globally-recognized experts from more than 20 academic units on the main campus and Bodega Marine Laboratory. CMSI also coordinates research and academic programs cross campus, including a new major in Marine and Coastal Sciences, as well as emerging graduate and professional programs.

## Computer Security Laboratory

2063 Kemper Hall; [seclab-contact@cs.ucdavis.edu](mailto:seclab-contact@cs.ucdavis.edu)

Matt Bishop, Hao Chen, Karl Levitt, Felix Wu, Directors;  
[bishop@ucdavis.edu](mailto:bishop@ucdavis.edu), [hchen@ucdavis.edu](mailto:hchen@ucdavis.edu), [levitt@ucdavis.edu](mailto:levitt@ucdavis.edu), [wu@ucdavis.edu](mailto:wu@ucdavis.edu);  
<http://seclab.cs.ucdavis.edu/>

The mission of the UC Davis Computer Security Laboratory is to improve the current state of computer and information security and assurance through research and teaching. The Security Lab investigates security problems in the network infrastructure, in computer security, and in information assurance in general. Current projects include research into data sanitization, vulnerabilities analysis, social links, the provision of a secure programming clinic, forensic logging and auditing, e-voting and the process of holding an election, biology-inspired security techniques, and security of mobile networks and smartphones. The Security Laboratory also researches and detects malicious code (viruses, worms, time bombs, etc.) in programs and detects attempts to penetrate or misuse computer systems. Research projects are supported by corporate and government organizations.

## Genome Center

4303 Genome and Biomedical Sciences Facility 530-754-9648

Richard Michelmore, Director; [rwmichelmore@ucdavis.edu](mailto:rwmichelmore@ucdavis.edu)  
<http://genomecenter.ucdavis.edu>

The UC Davis Genome Center integrates experimental and computational approaches to address questions at the forefront of genomics and bioinformatics. The Center is housed in a purpose-built research building with state-of-the-art computational and laboratory facilities. The Center has resident and non-resident research faculty and established five technology cores that serve the whole campus. The five service cores are DNA Technologies, Expression Analysis, Proteomics, Metabolomics, and Bioinformatics. These technology service cores have been established to provide researchers with access to the latest technologies on an at-cost, as-needed basis. Further details are available from the website.

## Health Sciences Research Laboratory—Animal Surgery

Buildings H and J; Center for Laboratory Animal Science  
 530-752-7756; [latalken@ucdavis.edu](mailto:latalken@ucdavis.edu), [wtferrier@ucdavis.edu](mailto:wtferrier@ucdavis.edu)

This unit is a surgical research facility in compliance with NIH, AAALAC and USDA standards. Instruction in surgical techniques is available including multiple training stations for larger groups. Surgical instruments, drapes, anesthesia machines, scrub suits, and equipment for monitoring vital signs and physiologic parameters are available. Assistance with animal procurement is available. Staff are available to perform or assist with both survival and non-survival surgical procedures depending on the investigator's requirements. Staff are also available for post-operative care, data and sample collection as required, and assistance with preparation of the IACUC Protocol for Animal Care and Use.

## Human Performance Laboratory

164 Hickey Gym  
 530-752-0965

The Human Performance Laboratory (HPL) was founded in 1963 and has a long history of basic and applied research and outreach in exercise physiology, biomechanics and sports psychology. The HPL has been involved in a variety of research areas since its

inception including metabolism, heat stress, fluid balance, injury prevention, body composition and health benefits of physical activity and fitness. The HPL is represented by full-time and adjunct faculty members with varying research backgrounds and scientific interests. The HPL facilities allow measurement of a comprehensive list of human performance characteristics. Investigators have access to advanced data acquisition systems for evaluation in the areas of biomechanics, motor learning, environmental physiology, cardiopulmonary and thermoregulatory physiology, human nutrition and exercise and muscle metabolism. Specific technologies and capabilities include extensive computing facilities, high speed 3-D video motion analysis, ground reaction force measurement, ultrasound imaging, a temperature and humidity controlled environmental chamber and systems for measurement of oxygen consumption, body composition and psychomotor performance. The HPL meets the needs of today's creative researcher and has the capacity to assist in answering tomorrow's research questions.

## Humanities Institute

David Biale, Director

Molly McCarthy, Associate Director  
 227 Voorhies Hall 530-752-1254; Fax 530-752-4263

The UC Davis Humanities Institute (DHI) is an interdisciplinary research center that fosters intellectual collaborations and facilitates access to resources for faculty and graduate students who are actively engaged in research and teaching in the humanities, the arts, cultural studies and the humanistically oriented social sciences. It advocates for the humanities within the UC Davis community and works with funding agencies to secure individual and programmatic resources for faculty. To explore emerging research areas and provide collaborative opportunities for faculty and graduate students, the Institute sponsors faculty and graduate research fellowships, interdisciplinary research clusters, and administers the Mellon Research Initiatives in the Humanities and the Mellon Public Scholars Program. The Institute also organizes conferences, workshops and lectures and provides partial funding for events that serve humanities scholars at UC Davis.

## Mann Laboratory

105 Mann Laboratory

Trevor Suslow, Faculty Contact

Lee Ann Richmond, Facility Manager and Safety Officer  
 530-754-8313; Fax 530-752-4554

Plant scientists in the Louis K. Mann Laboratory study the physiology, biochemistry, microbiology and molecular biology of pre-harvest and harvested fruits, ornamentals, and vegetables to improve and maintain their quality and safety during harvest, storage, processing, distribution and marketing. Four current faculty and two Emeritus Faculty are located or affiliated with this facility and are members of the Department of Plant Sciences. One USDA/ARS research scientist is also housed in the Mann Lab. Research and extension activities are supported by students, postdoctoral researchers and visiting scientists. Research includes basic plant molecular biology, plant physiology, applied postharvest biology and technology, produce safety microbiology, and practical storage technologies for horticultural crops, including whole and lightly processed products. Results are of interest to other researchers in the plant sciences and food science as well as to growers, shippers, transportation and logistics providers, marketers and consumers of fresh fruit and vegetables. This Special Postharvest Facility is a CAES resource and is equipped with 18 controlled-temperature

rooms, eight research laboratories, specialized postharvest analytical equipment, advanced rapid test equipment for human pathogens, and a small conference room for up to 25 with a 60" wall-mounted flat-screen monitor.

## Natural Reserve System

John Wingfield, Director  
 Virginia Boucher, Associate Director  
 The Barn  
 530-754-7990;  
<http://nrs.ucdavis.edu>; <http://nrs.ucop.edu>

The UC Davis campus administers five reserves that are available for teaching and research.

- Bodega Marine Reserve, located at Bodega Bay, 100 miles west of campus, consists of both terrestrial and coastal marine habitats including grasslands, dunes, freshwater and brackish marshes, mudflats, sandy beaches, rocky intertidal and subtidal areas. There are facilities for overnight and longer stays.
- Jepson Prairie Reserve, located in Solano County 13 miles south of Dixon, consists of native California bunchgrass grasslands, vernal pools, playa lakes and freshwater sloughs.
- Donald and Sylvia McLaughlin Reserve, located near Clear Lake about 70 miles northwest of campus, consists of Inner Coast Range habitat with a mix of serpentine and non-serpentine soils. The reserve has a facility for overnight and longer stays and a camping area for class groups.
- Quail Ridge Reserve consists of Inner Coast Range habitat located about 30 miles west of campus on a peninsula jutting into Lake Berryessa. The reserve has facilities for overnight and longer stays and tent cabins for class groups.
- Stebbins Cold Canyon Reserve, located about 24 miles west of campus, has representative populations of several different plant communities found in California's Inner and Outer Coast Ranges. A five mile loop trail is popular with recreational hikers.

The University of California maintains 39 reserves throughout the state, many of which are available for teaching and research.

## Nuclear Magnetic Resonance Facility

Medical Sciences 1D  
 530-752-7677;  
<http://www.nmr.ucdavis.edu>

The Nuclear Magnetic Resonance Facility provides access to state-of-the-art NMR instrumentation for spectroscopy and imaging to researchers in the biological, medical and physical sciences. At present, the facility operates ten spectrometers of varying purposes and capabilities at field strengths from 300 to 800 MHz. Applications include structural characterization of organic molecules, determination of protein structure and dynamics, metabolomics, imaging and *in vivo* spectroscopy of small animals, plants, and materials, and spectroscopy of solids. The Facility also has workstations for off-line data processing. Three full-time staff members are available to assist campus researchers in utilizing the instrumentation. A training course, Biological Chemistry 230, is offered in the fall quarter.

## UC Pavement Research Center

2001 Ghausi Hall;  
 530-754-6409  
 John Harvey, Director, UC Davis Site; [jtharvey@ucdavis.edu](mailto:jtharvey@ucdavis.edu)  
<http://www.ucprc.ucdavis.edu>

The UC Pavement Research Center (UCPRC) uses innovative research and sound engineering principles to improve pavement structures, materials and technologies. Work at the UCPRC focuses on asphalt and concrete pavements, including design, materials, rehabilitation, life cycle, maintenance and reconstruction; pavement cost analysis and strategy selection; the effects of pavement activities on traffic in urban areas; pavement performance modeling; and environmental life-cycle assessment for pavements.

## Social Science Data Service

105 Social Sciences and Humanities Building  
 530-752-4009; <http://www.ssds.ucdavis.edu>

The Social Science Data Service (SSDS) is a unit in the Division of Social Sciences. SSDS provides quantitative computing and consulting services in support of faculty and graduate students involved in social science research on the UC Davis campus. SSDS provides consulting services for the wide range of software used by social scientists and assists with questions regarding the use of SSDS computers and statistical and data-related programming. SSDS manages a UNIX system and a PC research lab used for quantitative social science computing.

## Sustainable Transportation Energy Pathways (STEPS)

Institute of Transportation Studies, UC Davis  
 Joan Ogden, Director; [jmogden@ucdavis.edu](mailto:jmogden@ucdavis.edu)  
 Paul Gruber, Manager; [pwgruber@ucdavis.edu](mailto:pwgruber@ucdavis.edu)  
<http://steps.ucdavis.edu>

STEPS is an ongoing research consortium, started in 2007, that addresses the technical, operational, logistical, and strategic issues related to the transition to an alternative fuel-based economy. The program comprises 100+ interdisciplinary research projects addressing the potential transportation energy pathways: electricity, hydrogen, biofuels, and fossil fuels. These pathways are analyzed and compared across program threads: consumer demand and travel behavior; innovation and business strategy; infrastructure system analysis; environmental, energy and cost analysis; vehicle technology evaluation; policy analysis; and integrative scenarios and transition strategies.

The overarching program goal of STEPS is to generate new insights about the transitions to a sustainable transportation energy future and disseminate that knowledge to decision-makers in the private sector and governmental agencies so that they can make informed technology, investment, and policy choices.

## Tahoe Environmental Research Center (TERC)

UC Davis Administration Office; Watershed Sciences Building;  
 530-754-8372  
 TERC site Laboratories in Incline Village, NV 775-881-7560  
 Geoffrey Schladow, Director; [gschladow@ucdavis.edu](mailto:gschladow@ucdavis.edu)  
<http://terc.ucdavis.edu>/

The Tahoe Environmental Research Center is dedicated to research, education and public outreach on lakes and their surrounding watersheds and airsheds. Lake ecosystems include the physical, biogeochemical and human environments, along with

the interactions among them. The Center is committed to providing objective scientific information for the restoration and sustainable use of the Lake Tahoe Basin and for freshwater ecosystems worldwide. Two public education centers in the Tahoe basin provide information and organize programs for K-12 and adult audiences throughout the year.

## **UC Agricultural Issues Center**

252 Hunt Hall;  
530-752-2320; [agissues@ucdavis.edu](mailto:agissues@ucdavis.edu)  
<http://www.aic.ucdavis.edu>

The UC Agricultural Issues Center is a university-wide research and outreach unit with core competencies in economics while drawing on expertise from many disciplines. The Center focuses on California's agricultural issues related to science and technology, international trade and markets, agribusiness trends, rural-urban issues, natural resources and the environment, human resources and agricultural policy.

## **UC Davis Center for Plant Diversity**

Formerly the UC Davis Herbarium  
Dr. Dan Potter, Director; Ellen Dean, Curator  
1026 Sciences Laboratory Building, Department of Plant Sciences  
530-752-1091; <http://herbarium.ucdavis.edu>

The UC Davis Center for Plant Diversity provides information on the names, uses, toxicity and distribution of plants. Anyone can visit the Herbarium to use its dried plant collections (300,000 specimens), botanical library and microscopes, but a phone call is suggested to make sure staff will be available to assist you. The collections are used most commonly to check plant identifications, but they are also used by campus faculty and students for teaching and research in plant systematics and ecology. Herbarium staff answer hundreds of public service requests each year (especially identification of weeds and poisonous plants). Collections include vascular plants, bryophytes, lichens and algae. The majority of these specimens are angiosperms (flowering plants), mainly from California, but the collections are worldwide in scope, with strong holdings from North America, Ecuador, Baja California and regions with Mediterranean climate regimes. The Herbarium is well known for its collection of weeds and poisonous plants, although it also has world-class collections of grasses, oaks and spurge. The Herbarium's support group, the Davis Botanical Society, hosts a wide range of botanical events, workshops and trips each year.

## **UC Davis Energy Institute**

West Village, 1605 Tilia St, Suite 100; 530-752-4909  
Dan Sperling, Director; [energy@ucdavis.edu](mailto:energy@ucdavis.edu)  
<http://energy.ucdavis.edu>

The Energy Institute at UC Davis is home to energy research and education programs of the University of California, Davis. It was established to accelerate the global transformation to a sustainable energy future and is structured to coordinate the world-class strengths of UC Davis in energy research, education and outreach to foster new innovations, expand public service and inform decision-making about new energy solutions. The Energy Institute encompasses critical areas of energy research at UC Davis—

including renewable and sustainable energy systems, energy efficiency, fuels and transportation, infrastructure, environment, and economics. The Institute actively targets the demand for well-trained energy professionals.

## **UC Davis J. Amorocho Hydraulics Laboratory (JAHL)**

Dept. of Civil and Environmental Engineering;  
530-752-2385  
M. Levent Kavvas, Director; [mlkavvas@ucdavis.edu](mailto:mlkavvas@ucdavis.edu)  
Kara J. Carr, Co-Manager; [kjcarr@ucdavis.edu](mailto:kjcarr@ucdavis.edu)  
Ali Ercan, Co-Manager; [aercan@ucdavis.edu](mailto:aercan@ucdavis.edu)  
<http://jahl.engr.ucdavis.edu>

The research areas at the UC Davis J. Amorocho Hydraulics Laboratory include engineering hydraulics, fisheries protection, and ecological and environmental hydraulics. UC Davis JAHL was built to perform hydraulic modeling studies for the California State Water Project and has been conducting hydraulic investigations through scaled physical, prototype and numerical models to provide modeling services to federal, state, and local water agencies and private entities. With the recently constructed large flume, which has a circulation capacity of 200 cfs, it is now possible to perform prototype physical modeling studies at the laboratory, including dam removal and sediment transport studies without scaling the sediment and fluid properties. Recent research projects have included the assessment of hydraulics, fish behavior, and swimming, near unscreened diversions; studies of sturgeon passage; and investigations of the effects of California riparian vegetation on flow, roughness, and erosion. With the help of the state and federal agencies, researchers have actively participated in the development of solutions to fish protection for the Bay Delta river system and are developing a better understanding of the hydraulic and biological issues in the Sacramento River and Bay Delta system. Fish biologists, hydraulic engineers and other UC Davis JAHL researchers have many years of experience in testing Sacramento River and Bay Delta fish species under various hydraulic and environmental conditions and in handling invasive water plant species that occur in the Delta fish facilities.

## **X-Ray Crystallographic Laboratory**

James C. Fettinger, Ph.D.  
Department of Chemistry  
530-754-7822

The X-Ray Crystallographic Laboratory, located in the Department of Chemistry, provides crystal structure determinations for researchers. Single crystals from all branches of chemistry are studied. The laboratory is equipped with three single crystal Bruker X-ray diffractometers, a Kappa Photon 4-circle with both Cu and Mo micro-sources, an APEX Duo equipped with both a Cu micro-source and Mo sealed tube anode sources, and an APEXII Mo source system. The lab also has a Bruker Eco Advance Powder X-ray diffractometer with 9 position sample changer. The laboratory also possesses a stereo-microscope. All single crystal instruments have variable low temperature systems including one with the added capability of cooling the crystal to 5K. Consultation and collaboration on a variety of single crystal related projects can be arranged.

### Average Yearly Salary Offered to Graduates With Bachelor's, Master's, and Doctorate Degrees<sup>1</sup>

Field of Study:	Bachelor's	Average Yearly Salary	Master's	Doctorate
Engineering	\$62,564		\$68,100	Not reported
Humanities/Social Sciences	\$38,045		\$49,100	Not reported
Health Sciences/Life Sciences	\$47,050		\$61,500	Not reported
Physical Sciences	\$45,400		\$57,950	Not reported

### Average Salaries by Discipline

#### Bachelor's Degree

Broad Category	2016 Average Salary	Responses
Engineering	\$64,891	499
Computer Science	\$61,321	205
Math & Sciences	\$55,087	83
Agriculture & Natural Resources	\$48,729	24
Social Sciences	\$46,585	69
Humanities	\$46,065	46

#### Master's Degree

Engineering	\$73,871	224
Computer Science	\$72,080	87
Business	\$71,663	221
Math & Sciences	\$67,891	38
Social Sciences	\$52,333	9

#### Doctorate Degree

Computer Science	\$101,324	17
Math & Sciences	\$98,693	16
Engineering	\$95,055	62

<sup>2</sup>Fields of Study are groups of related undergraduate majors as organized into UC Davis colleges or divisions.

## Retention Data and Graduation Rates at UC Davis

### Freshmen\*

Retention and graduation rates through Summer 2014 for all undergraduates entering UC Davis as freshmen.

Fall Quarter of Initial Enrollment:	Number of Students**	Percent Returned for Second Year	Percent Graduating in Four Years	Percent Graduating in Five Years	Percent Graduating in Six Years
1999	3789	91%	42%	75%	80%
2000	4290	91%	43%	76%	81%
2001	4360	91%	43%	74%	80%
2002	4613	91%	48%	77%	82%
2003	4737	91%	50%	75%	80%
2004	4259	91%	51%	78%	82%
2005	4374	90%	51%	77%	82%
2006	5504	90%	52%	77%	81%
2007	4950	90%	51%	76%	81%
2008	4967	92%	53%	79%	83%

### Transfer Students

Retention and graduation rates through Summer 2014 for all undergraduates transferring to UC Davis from California community colleges.

Fall Quarter of Initial Enrollment:	Number of Students**	Percent Returned for Second Year	Percent Graduating in Two Years	Percent Graduating in Three Years	Percent Graduating in Four Years
2001	1607	89%	40%	75%	83%
2002	1669	90%	46%	78%	84%
2003	1582	90%	47%	78%	83%
2004	1734	89%	48%	78%	85%
2005	1588	88%	53%	79%	84%
2006	1617	90%	49%	80%	85%
2007	1650	88%	48%	77%	84%
2008	1703	90%	49%	80%	86%
2009	1990	89%	48%	79%	85%
2010	2529	90%	50%	80%	85%

Retention is defined as enrollment at the third week census point of the fall term one year from initial fall term.

Graduation is defined as having received a degree from UC Davis (does not include students who transferred to another institution to complete their degree).

\* Retention and graduation tracking limited to students enrolled full-time in their initial term of enrollment.

\*\* Students excluded from these counts include those who are now deceased or participated in any of the following: Military Service, Foreign Service, Religious Mission.

 550 Alumni Lane  
 Walk-in Advising: Monday-Friday, 8 a.m.-5 p.m. (PT); Saturday, 9 a.m.-3 p.m. (PT)

## APPLYING TO UC DAVIS

Apply for admission at <http://universityofcalifornia.edu/apply>.

The initial filing periods to apply for undergraduate admission and scholarships at UC Davis are:

Quarter	Initial Filing Period (prior year)
Fall	November 1-30
Winter*	July 1-31
Spring*	October 1-31

\*UC Davis is rarely open to applicants for winter and spring quarters.

For up-to-date details regarding winter and spring quarter admission, and tips on completing the UC application and writing your personal statement, see <https://www.ucdavis.edu/admissions/undergraduate/apply>.

After applying, transfer students are required to update their grades and course records online using the UC Transfer Academic Update (TAU). This ensures that campuses have current academic information. For details and deadlines, see <http://admission.universityofcalifornia.edu/how-to-apply/after-you-apply/update-transfer-application>.

## APPLICATION FEES

The domestic filing fee for each University of California campus is \$70. For international applicants, the filing fee is \$80 per campus.

Fee waivers are available to students who meet strict eligibility guidelines based on household size and family income. When you apply online, you can fill out the fee waiver form included with the online application. If, after review by UC staff, you are not eligible for a fee waiver, you will be billed for all application fees. For current information on application fees and waivers, see <http://admission.universityofcalifornia.edu/how-to-apply/application-fees>.

## ADMISSION AS A FRESHMAN

### UC Freshman Applicant Definition

The University of California defines a freshman applicant as one who is either currently enrolled in, or has graduated from, a high school and has not registered in a regular session at any collegiate-level institution since high school graduation. An applicant who has completed college courses while in high school or in a summer session immediately following high school graduation is considered a freshman applicant.

### UC Freshman Admission Requirements

To be considered for admission to UC Davis, freshman applicants must earn a high school diploma or equivalent\* and satisfy the fol-

lowing UC admission requirements:

1. Subject Requirement,
2. Scholarship Requirement, and
3. Examination Requirement

\* The University of California will accept the California High School Proficiency Examination or the General Education Development (GED) Certificate awarded by any state's Department of Education in lieu of a regular high school diploma. However, you must also meet all other university entrance requirements: subject, scholarship and examination.

#### 1. Subject Requirement: "a-g"

Subject requirement courses must be completed with a C grade or better and, for California residents, must be on your high school's UC-approved course list. See your school's UC-approved course list at . At least 11 of the 15 units (one unit equals one year of study) defined by the "a-g" requirements must be taken prior to your senior year.

- a. History/Social Science—2 years required
- b. English (or Language of Instruction)—4 years required
- c. Mathematics—3 years required; 4 years recommended
- d. Laboratory Science—2 years required; 3 years recommended
- e. Language other than English (LOTE)—2 years required; 3 years recommended
- f. Visual and Performing Arts (VPA)—1 year required
- g. College Preparatory Electives—1 year required

#### 2. Scholarship Requirement

The Scholarship Requirement is satisfied if you earn a GPA of 3.000 or higher. All courses must be completed with a C grade or higher. Out-of-state applicants must earn a GPA of 3.400 or higher in the 15 college-preparatory "a-g" courses with no grade lower than a C.

#### 3. Examination Requirement

Freshman applicants are required to take the:

- ACT With Writing

OR

- SAT Reasoning Test

Highest scores from one sitting will be used.

SAT Subject Tests are no longer required and UC Davis will consider SAT Subject Tests only if they benefit the applicant; some UC campuses recommend that applicants take certain SAT Subject Tests.

Applicants for fall must take the required test no later than December of the previous year—official scores must be received by the end of January. You are responsible for making sure that testing agencies send your scores to the University of California.

Make arrangements to take the required ACT Plus Writing exam with your high school or at the ACT website at <http://act.org>. The UC Davis ACT code is 0454. You may make arrangements to take the required SAT Reasoning Test or optional SAT Subject Tests through the College Board website at <http://collegeboard.org>. The UC Davis College Board code is 004834.

## UC Pathways for California Residents

For the highest-achieving California applicants, UC has two paths:

- Statewide Path.
- Local Path, also known as Eligibility in the Local Context (ELC).

Learn more at <http://admission.universityofcalifornia.edu/freshman/california-residents>.

## UC Freshman Admission Requirements for Out-of-State Applicants

For additional information, see  
<http://admission.universityofcalifornia.edu/freshman/out-of-state>.

## Campus Selection vs. UC Admission Requirements

The University of California, Davis is a highly selective public research university with a strong reputation around the world. To prepare for admission and the academic rigor necessary to be successful at our campus, make sure you meet or exceed the UC admission requirements. Simply meeting these requirements does not guarantee admission to UC Davis—applicants who are admitted typically exceed them by a considerable margin. The selection criteria that UC Davis considers as part of its comprehensive review process for each UC applicant are available at [http://admissions.ucdavis.edu/admission/freshmen/fr\\_selection\\_process.cfm](http://admissions.ucdavis.edu/admission/freshmen/fr_selection_process.cfm).

## Transfer Credit for College Courses

Freshman applicants taking UC-transferable college courses while in high school may receive transfer credit upon receipt of an official final college transcript.

## Advanced Placement (AP) Examinations

Transfer credit is granted for each College Board Advanced Placement (AP) examination completed with an official score of 3, 4 or 5. The credit will be part of the minimum 180 quarter units you need in order to receive a bachelor's degree. Credit from AP examinations may also be used to satisfy specific degree requirements.

To learn how many units you may receive for an AP examination, see [College Board Advanced Placement \(AP\) Examination Credit, on page 40](#)—under the column heading, *Credit Toward Degree*. How those units will be applied toward specific degree requirements in each college is explained for each exam category. Please note that the courses for which AP credit has been granted may not be used as a substitute for courses required as part of the UC Davis General Education Requirement; see [General Education Requirement, on page 107](#).

In general, you may not earn university credit for college courses or International Baccalaureate (IB) transfer credits that duplicate credits already earned through AP. There are, however, a few exceptions to this general rule. Since it is often difficult to know exactly which UC Davis course you should take when you have earned AP credit, you should speak with an academic adviser in your major department, dean's office, or the Biology Academic Success Center before selecting and enrolling in classes.

## A Guide for Students with Advanced Placement (AP) Credit for a UC Davis Course

In general, you may not earn university credit for college courses duplicating credit already earned through Advanced Placement (AP). However, there are a few exceptions to this general rule, as the chart indicates in [College Board Advanced Placement \(AP\) Examination Credit](#), on page 40 and summarized here.

If you have AP credit for the following UC Davis course:	Can you take the same course at UC Davis?
Art History (AHI) 1A, 1B, 1C	No
Art Studio (ART) 2	No
Biological Sciences (BIS) 10	No
Chemistry (CHE) 2A	Yes
Chemistry (CHE) 10	No
Economics (ECN) 1A, 1B	No
Engineering: Computer Science (ECS) 30	No
English (ENL) 3	No
Environmental Science and Policy (ESP) 10	No
French (FRE) 3, 21, 22	No
German (GER) 3, 20, 21	No
History (HIS) 4A, 4B	Yes
History (HIS) 4C	No
History (HIS) 17A, 17B	Yes
Italian (ITA) 5, 4, 3	No
Latin (LAT) 2	No
Mathematics (MAT) 12	No
Mathematics (MAT) 16A, 17A, 21A	Yes
Mathematics (MAT) 16B, 17B, 21B	Yes
Music (MUS) 3A, 10	No
Physics (PHY) 1A, 1B	No
Political Science (POL) 1, 2*	No
Psychology (PSC) 1	No
Spanish (SPA) 21, 22, 23, 24	No
Statistics (STA) 13	Yes
University Writing Program (UWP) 1	No

\* Effective with the May 2015 AP exam, no UC Davis course credit will be issued for Political Science (Pol) 1, 2.

**NOTE:** Courses for which AP credit has been granted may not be used as substitutes for courses required as part of the UC Davis General Education Requirement.

## International Baccalaureate (IB) Examinations

UC Davis recognizes the International Baccalaureate (IB) examinations for college credit. Higher Level examinations presented with official scores of 5, 6 or 7 receive 8 quarter units (5.3 semester units) of degree credit and, in specific instances, are deemed comparable to various lower-division courses. Students completing the International Baccalaureate (IB) diploma with a score of 30 or above will receive a maximum of 30 quarter units (20 semester units). The credit will apply toward the minimum 180 quarter units needed to receive a bachelor's degree.

**Note: This is not a comprehensive list. If your exam is not listed, credit will be determined in consultation with an adviser.**

- <sup>1</sup> Students who take the Calculus BC exam and earn a sub-score of 3 or higher on the Calculus AB portion will receive credit for the Calculus AB exam, even if they do not receive a score of 3 or higher on the BC exam. The Calculus BC/AB sub-score satisfies IGETC Area 2A.
- <sup>2</sup> Examinations
- <sup>3</sup> IGETC Area
- <sup>4</sup> Duplicate Credit Allowance for Coursework Exams

Last test administration for discontinued exams:  
 May 2009—Computer Science AB, French literature, Italian literature  
 May 2011—French language, German language, Italian language, Italian literature  
 May 2012—Spanish literature, Latin [Virgil]  
 May 2013—Spanish language  
 May 2014—Physics B

**2 UC Transfer Admission Eligibility Area**

- UC-B=Behavioral and Social Sciences, UC-E=English, UC-H=Humanities, UC-M=Math, UC-S=Biological and Physical Sciences
- UC-E: If English AP test score of 3, 4, 5 was achieved prior to completing any transferable English composition course(s), 8 quarter units of transfer credit are awarded for the AP exam, and one of two English Composition requirements [UC-E] satisfied. UC Davis articulates AP English Language and Composition, and English literature and Composition, with scores of 4 or 5 as UWPs 1 and English 3; therefore we will not allow transfer credit for any duplicated English courses.
- For details regarding IGETC certification, see your California community college adviser and Help Topics: IGETC at [www.assist.org](http://www.assist.org). Students with partial IGETC certification should contact their dean's office.

**3 IGETC Area**

- Each AP exam may be applied to one IGETC area as satisfying one course requirement, with the exception of language other than English [LOTE].
- There is no equivalent AP exam for the Area 1B—Critical Thinking/Composition requirement.
- For details regarding IGETC certification, see your California community college adviser and Help Topics: IGETC at [www.assist.org](http://www.assist.org). Students with partial IGETC certification should contact their dean's office.

**4 Duplicate Credit Allowance for Coursework Exams**

- The university does not generally award full credit for college courses that duplicate college credit already earned through AP exams, whether taken before or during enrollment at the university. Exceptions to this policy are indicated in this column. We encourage students who have AP credit to speak with an academic adviser in their major department, undergraduate advising in your college dean's office or Biology Academic Success Center to determine which courses will provide the greatest benefit.

**5 UC Davis College Area Requirements**

- a. Partially satisfies area (breadth) requirements for the A.B. degree.
- b. Allows 4 units of credit toward Natural Sciences credit or preparatory coursework for science majors in each Natural Sciences exam passed and 8 units of credit allowed for Mathematics BC and Physics B exams.
- c. Satisfies 4 lower-division units of the English Composition requirement.
- d. Satisfies first course toward English Composition requirement.
- e. Exam awards units toward the Unrestricted Electives requirement.
- f. Language exams, except any Latin exam, satisfy the foreign language requirement.

**UC Davis Pattern of General Education**

- Courses for which AP credit has been granted may not be used as a substitute for courses required as part of the UC Davis GE requirement: see Advanced Placement [AP] examinations on page 39 and page 49.

Biological Sciences						-	-	-
Agricultural and Environmental Sciences						-	-	-

**Note:** This is not a comprehensive list. If your exam is not listed, credit will be determined in consultation with an adviser.

- 1 Examination

- Beginning in 2012, Language A1 exams were eliminated and three separate tracks formed—Language A: Language and literature, Language A: Literature, Language A: Literature and Performance [S1]. English A1 was first offered in 2012 and the name changed to English literature beginning in 2013.
  - All Language A2 exams were eliminated as of May 2012: English A2, German A2, French A2, Italian A2, Portuguese A2, Spanish A2.
  - History of Europe and History of the Islamic World are no longer offered; see History of Europe and the Islamic World, and History of Europe and the Middle East.
  - History of South Asia and the Middle East is no longer offered.

**2 | GETC Area** For details regarding IGETC certification, see your California community college's office or the Bixbyon Academic Success Center.

3 IUC Davis Course Equivalencies and Credit Allowance for Duplicate Coursework / [Events](#)

**UC Davis course equivalents and credit allowances for duplicate exams**

Students are advised that college courses taken before or after attending UC may duplicate AP, IB and/or A Level examinations. Additionally, exams may duplicate each other (for example, an AP or IB exam in the same subject area). If the student duplicates an exam with another exam of the same subject area or with a college course, we will award credit or once. Exceptions to this policy are indicated in this column. We encourage students who have IB credit to speak with an academic adviser in their major department, undergraduate advising in the college deans' office or an adviser in the Biology Academic Success Center to determine any restrictions and which courses will provide the greatest benefit.

<sup>4</sup> UC Davis College Area Requirements

- 2. Satisfies first half of English Composition requirement
  - 3. Satisfies 4 lower-division units of the English Composition requirement
  - 4. Satisfies first course toward English Composition requirement
  - 5. Foreign Language requirement (A.B. degree) satisfied by the following exams—
    - French A.1, A2, B; German A. A1, A2, B; Italian A. A1; Portuguese B;
    - Spanish A. Literature, A1
  - 6. Music exam partially satisfies Area [Breadth] requirement for A.B. degree
  - 7. Provides 4 units of credit toward Natural Sciences
  - 8. Credit or preparatory coursework awarded to science majors for each Natural Sciences exam passed, with the following exception: 8 units of credit allowed for Mathematics and Physics exams

HC Bayes Pattern of General Education

- Courses for which IB credit has been granted may not be used as a substitute for courses required as part of the UC Davis GE requirement; see International Baccalaureate (IB) Examinations on page 39 and page 42.

To learn how many units you may receive for an acceptable IB examination, see [International Baccalaureate \(IB\) Higher Level Examination Credit, on page 44](#)—under the column heading *Credit Toward Degree*. The chart also specifies which UC Davis lower-division course an IB examination is comparable to. Please note that the courses for which IB credit have been granted may not substitute courses required as part of the UC Davis General Education Requirement; see [General Education Requirement, on page 107](#).

In general, you may not earn university credit for college courses that duplicate credit earned through IB. There are, however, a few exceptions as the chart indicates in [International Baccalaureate \(IB\) Higher Level Examination Credit, on page 44](#). Similarly, students will not receive duplicate credit for comparable AP examinations if granted IB transfer credit. Each college may have special restrictions on the use of IB examinations. Please check with your dean's office, department adviser or the Biology Academic Success Center to determine any restriction in the use of IB examinations toward breadth requirements and lower-division major course requirements before selecting and enrolling in classes.

## ADMISSION AS A TRANSFER STUDENT

### UC Transfer Applicant Definition

The University of California defines a transfer applicant as a student who has been a registered student in a regular term at a college, university or in college-level extension classes since graduating from high school. Summer session attended immediately following high school graduation is excluded in this determination. If you are a transfer applicant, you may not disregard any of your college records and apply for admission as a freshman.

### Campus Selection and Priority

UC Davis gives highest priority to junior-level transfer applicants from California community colleges. To apply to majors in the Colleges of Biological Sciences, Engineering and Letters and Science, students must be junior-level applicants with a minimum of 90 quarter units (60 semester units) of UC-transferable coursework, including courses in progress or planned. In the College of Agricultural and Environmental Sciences, junior-level applicants will be given highest priority, but lower-division applicants may be considered if space allows.

Meeting transfer admission requirements for the University of California does not guarantee admission to UC Davis. Due to limited enrollment space, transfer applicants who are admitted generally well exceed UC admission criteria. Foremost is the applicant's academic performance and preparation for the selected college and major. To be competitive, you must maintain a GPA of 2.800 or higher. In some cases, personal characteristics, experiences and circumstances will also be considered.

Applications far exceed the number of spaces available in majors such as biotechnology, computer science, psychology, viticulture and enology and all majors in the Colleges of Biological Sciences and Engineering. Applicants must complete specific lower-division major preparation courses with a specific GPA in the major and an overall required GPA.

To view our selective majors and their specific requirements for admission, see <https://ucdavis.edu/admissions/undergraduate/transfer/selective-major-requirements>.

### UC Transfer Admission Requirements for California Residents

To be eligible for admission to UC as a junior transfer student, you must fulfill both of the following criteria:

1. Complete 90 quarter units (60 semester units) of UC-transferable credit with a minimum 2.400\* GPA. No more than 21 quarter units (14 semester units) may be taken Pass/No Pass.
2. Complete the following seven UC-transferable college courses, earning a grade of C or better in each course:
  - Two courses in English composition;
  - One course in mathematical concepts and quantitative reasoning;
  - Four courses chosen from at least two of these subject areas: arts and humanities, social and behavioral sciences, and physical and biological sciences.

Each course must be worth at least 4-5 quarter (3 semester) units. Completing the Intersegmental General Education Transfer Curriculum (IGETC) before transferring to UC may satisfy the required seven-course pattern for UC admission, depending on the courses you take. For more information, see <http://www.assist.org>.

\* Please note that meeting UC admission requirements does not guarantee admission to UC Davis. To be a competitive candidate for admission, you must have an overall GPA of 2.800 or higher.

### Alternatives for Satisfying UC Transfer Admission Requirements

If you were eligible for admission to UC when you graduated from high school—meaning you satisfied the subject, scholarship and examination requirement—or were identified by UC during your senior year as Eligible in the Local Context (ELC) and completed the Subject and Examination Requirements by your senior year, you are eligible to transfer with a minimum C (2.000)\* average in your UC-transferable college coursework.

If you met the Scholarship Requirement in high school, but did not satisfy the 15-course Subject Requirement, you must take UC-transferable college courses in the missing subjects, earn a C or better in each required course and maintain a 2.000 GPA to be eligible to transfer.

\*Please note that meeting UC admission requirements does not guarantee admission to UC Davis. To be a competitive candidate for admission, you must have an overall GPA of 2.800 or higher.

## UC Transfer Admission Requirements for Out-of-State Applicants

The UC transfer admission requirements for transfer applicants from out-of-state are very similar to those for California residents. Applicants must have a GPA of 2.800\* or higher in all UC-transferable college coursework.

\* Please note that meeting UC admission requirements does not guarantee admission to UC Davis. To be a competitive candidate for admission, you must have an overall GPA of 2.800 or higher.

## Transfer Credit

Coursework from other colleges and universities is considered UC-transferable if the applicant completed the course at an institution that is recognized by the University of California. In addition, the coursework must be comparable to courses and levels offered within the University of California.

A total of 105 quarter (70 semester) UC-transferable units toward a university degree may be earned for lower-division coursework completed at any institution or combination of institutions. Lower- or upper-division units earned at UC (Extension, summer, cross/concurrent, UC-EAP and regular academic year enrollment) are added to the maximum lower-division credit allowed and might put applicants at risk of being denied admission due to excessive units. For more information, see <http://admission.universityofcalifornia.edu/counselors/files/uc-transfer-maximum-limitation-policy-chart.pdf>. You can find information about transferable credit from California community colleges at <http://assist.org>. Only subject credit will be granted for courses taken in excess of this amount.

If, after applying UC lower-division unit limitations and exclusions, you have completed 120 quarter units (80 semester units) or more of UC-transferable units, your admission is subject to approval by the respective dean for majors in the Colleges of Agricultural and Environmental Sciences, Biological Sciences and College of Letters and Science.

## Advanced Placement (AP) Examinations

Transfer credit is granted for each College Board Advanced Placement (AP) examination completed with an official score of 3, 4 or 5. To learn more, see [Advanced Placement \(AP\) Examinations, on page 39](#).

## International Baccalaureate (IB) Examinations

UC Davis recognizes the International Baccalaureate (IB) examinations for college credit. Higher Level examinations presented with official scores of 5, 6 or 7 receive 8 quarter (5.3 semester) units of degree credit and in specific instances are deemed comparable to various lower-division courses. Students completing the International Baccalaureate (IB) diploma with a score of 30 or above will receive a maximum of 30 quarter units (20 semester units). The credit will apply toward the minimum 180 quarter units needed to receive a bachelor's degree. To learn more, see [International Baccalaureate \(IB\) Examinations, on page 39](#) and [International Baccalaureate \(IB\) Higher Level Examination Credit, on page 44](#).

## Limited Status

Students in limited status are those whose special achievements qualify them to take certain university courses toward a definite and limited objective.

Currently the Colleges of Agricultural and Environmental Sciences, Biological Sciences, Engineering and Letters and Science do not consider limited status applicants. As an alternative, you may wish to consider enrolling in our UC Davis Extension Open Campus program.

## Second Baccalaureate

Only the College of Engineering considers applications from students who already have a bachelor's degree. Second baccalaureate applications to the College of Engineering will only be considered if the applicant's first degree is not in engineering and if the lower division engineering selective major criteria has been completed at a California community college. You must submit the University of California undergraduate application for admission and scholarships, at <https://admissions.ucdavis.edu/apply/>, during the appropriate filing periods.

After your application receives a full evaluation for meeting college, UC and UC Davis selection and admission criteria, it will be reviewed by the dean of the college and the executive director for Undergraduate Admissions for admission consideration based on superior academic record, clear evidence of a change in objective, and enrollment space available in the applied major.

## UC Intercampus Transfer

If you are an undergraduate student who is currently or was previously registered at another UC campus and have not since registered at a non-UC institution, you may apply for transfer to the UC Davis campus. Filing dates, application, fees and admission and selection requirements are the same as those listed for new transfer applicants. Current UC students who wish to attend UC Davis as intercampus visitors and plan to return to their home UC campus should refer to the [Intercampus Visitor Program, on page 89](#).

## ADMISSION AS AN INTERNATIONAL STUDENT

International students and researchers from countries around the world are part of the UC Davis community. During the 2014 academic year, the campus community represented more than 100 countries, including 3,000+ international students and nearly 2,100 international scholars.

## International Freshman Applicants

Non-immigrants studying in the United States must meet the same requirements as domestic California and non-California residents. Students studying outside the United States must complete secondary school, earn superior marks in academic subjects, sit for the UC-required exam and may be required to demonstrate English proficiency. For more information, see <https://www.ucdavis.edu/admissions/undergraduate/international>.

## International Transfer Applicants

International students applying to transfer to UC Davis from California or U.S. colleges or universities are considered for admission using the same transfer admission criteria as domestic students. Applicants who have attended international colleges or a combination of international and domestic colleges and universities will be evaluated using courses and grades from both institutions.

Priority admission consideration is given to prospective California community college transfer students, including international students, who are prepared to begin their junior or third year of study. Coursework from other colleges and universities is considered UC-transferable if the applicant completed the course at an institution that is recognized by the University of California and when the coursework is comparable to courses offered within the University of California. For more information, see <https://www.ucdavis.edu/admissions/undergraduate/international>.

## Required International Academic Records

International students are responsible for providing UC Davis with official academic transcripts and/or certificates beginning with secondary school records. College and university records should indicate subjects taken; grades or marks earned; rank in class; number of academic terms per year; number of weeks in each academic term; and number of hours per week devoted to lecture and laboratory. Certifications must be provided for any university or government examinations the student has undertaken. Note: It is not possible to disregard any college or university coursework undertaken within the United States or abroad.

## English Proficiency

Applicants must demonstrate English proficiency if they have been studying in the United States for less than two years, English is not their native language, and/or the language of instruction prior to study in the United States was not English. Applicants may demonstrate proficiency in one of the following ways:

- Complete two UC-transferable college courses (3 semester or 4–5 quarter units each) in English composition with C grades or better at an accredited U.S. college or university.
- Achieve a minimum score of 550 on the paper-based Test of English as a Foreign Language (TOEFL) or 80 on the Internet-based TOEFL. For more information, see <http://toefl.org>.
- Achieve a minimum score of 7 (academic module) on the International English Language Testing System (IELTS).
- Achieve a minimum score of 560 on the Writing component of the SAT Reasoning Test.

## AFTER YOU APPLY FOR ADMISSION

A few weeks after you apply, the University of California will notify you that your application has been received and processed. UC Davis will also notify you once the application has been received at our campus. At this time, you can create a MyAdmissions account at <http://myadmissions.ucdavis.edu>, using your UC Davis Student ID. You will be able to use this secure website to check your application and admission status at the UC Davis campus.

Students admitted to UC Davis can use MyAdmissions to view upcoming events for admitted students, check deadlines and complete pre-enrollment tasks, review their financial aid and scholarship awards (MyAwards), submit a student housing application, register for orientation and accept our offer of admission. Admitted students who wish to officially accept our offer of admission must submit their Statement of Intent to Register (SIR) and complete all pre-enrollment tasks related to:

- MyAwards—Financial Aid Notice and Scholarships
- Student Housing
- Orientation (fall admits only)
- Statement of Legal Residence (SLR)
- High School Transcripts
- College/University Transcripts
- AP/IB Examination Results
- Test Scores
- Requests for I-20 or DS-2019
- International Records
- Accommodation for a Disability (if applicable)
- Health Insurance Requirement
- Hepatitis B Statement

After applying, transfer students are required to update their grades and course records using the online UC Transfer Academic Update (TAU) to ensure that the campuses have the most current academic information before making admission decisions. For details and deadlines, see <http://admission.universityofcalifornia.edu>.

## Required Academic Records for All Students

You must accurately report all examination scores, as well as high school and any college/university work undertaken within the United States or abroad.

If you are admitted to UC Davis, you are expected to arrange to have all of your official final transcripts sent to Undergraduate Admissions by deadlines indicated on MyAdmissions. You do not need to submit official transcripts before this time, unless requested. All students must provide official final:

- High school transcripts
- College transcripts

All students completing the following examinations will be required to submit official scores:

- Advanced Placement (AP)
- International Baccalaureate (IB)

International applicants will be required to submit official scores for the following examination:

- TOEFL  
OR
- IELTS

Freshman applicants are also required to submit official scores for the following examinations:

- ACT With Writing  
OR
- SAT Reasoning Test  
and
- SAT Subject Tests (if taken)

For more information regarding ACT, see <http://act.org>; the UC Davis ACT code is 0454. For more information regarding SAT, see <http://collegeboard.org>; UC Davis College Board code is 004834.

Submit official documents and test scores to:

Undergraduate Admissions  
University of California  
One Shields Avenue  
Davis, CA 95616-8507

## SPECIAL PROGRAMS

### Deferred Enrollment

The deferred enrollment program allows newly admitted undergraduate students to postpone their initial enrollment at UC Davis for up to one year. The purpose is to allow time to pursue other non-academic activities and opportunities that will assist students in clarifying their educational goals; e.g., travel, job opportunities, non-collegiate experience, time to resolve personal or medical problems. Students are not allowed to enroll in any coursework at another college or university during this time.

To be eligible for deferred enrollment, you must submit your Statement of Intent to Register (SIR) and deposit by the stated deadline, satisfy all university admission and entrance requirements and provide all official transcripts and examination scores. After submitting the SIR, you can browse our deferred enrollment FAQs and apply for deferred enrollment through the MyAdmissions website. You must also submit a \$70 processing fee within seven days of submitting your deferred enrollment application.

FEES, EXPENSES AND FINANCIAL AID

## FEES AND EXPENSES

Give careful consideration to the total financing of your university education. If you will need funds beyond those that you and your family can provide, you should apply for financial aid well in advance of enrollment. The deadlines for applying for financial aid (grants, loans, Work Study and scholarships) are listed on the following pages.

The most up-to-date student fee information is available at <http://budget.ucdavis.edu/studentfees>. Every student must pay the quarterly fees, and any amounts charged to the student account, in full by the fee payment deadline listed in the Fees and Billing calendar at <http://registrar.ucdavis.edu/calendar/>. A Deferred Payment Plan (DPP), which allows students to pay quarterly student and housing fees in three monthly installments, or semester fees in four monthly installments, is available.

### Course Materials and Services Fees

Students may be charged fees in some courses for the use, rental or consumption of materials, tools or equipment, or for the costs of materials or services necessary to provide a special supplemental educational experience. For example, course materials fees may cover the purchase of chemicals and glassware for a science laboratory or art supplies for an art studio class. They might also cover film rentals, field trips, or the purchase or rental of specific equipment. Courses that may be subject to the course materials fee are listed in the Class Schedule at <http://registrar.ucdavis.edu/faculty-staff/>.

### Part-Time Students

Students approved for enrollment on a part-time basis pay the same fees as full-time students, but pay only one-half of Tuition. Part-time nonresidents pay one-half of the Nonresident Supplemental Tuition. The Part-Time Petition should be submitted through the Office of the University Registrar's website at <http://registrar.ucdavis.edu/registration/part-time.cfm>. The petitions must be submitted on or before the 10th day of instruction for the term in which the reduction is to be applied.

### UC Employee-Student Fees

Reduced fees are available to UC career employees and certain UC retirees who are qualified for admission to the university. The employee-student must file a petition, the Employee-Student Reduced Fee Authorization Form, with the Office of the University Registrar in 3100 Dutton Hall for the reduction of fees. The form must be filed on or before the 10th day of instruction for the term in which the reduction is to be applied. Employee-students pay one-third of the full-time Registration Fee and one-third of the full-time Tuition. Employee-students also pay the Memorial Union Fee and the Student Facilities Safety Fee.

Employee students may enroll for up to nine units or three courses per quarter or semester, whichever is greater. The reduced fee program does not apply to courses taken in self-supporting degree programs at UC Davis. Information is in Personnel Policies for Staff Members (section 51) at <http://manuals.ucdavis.edu/spp/pps51.pdf>. Petitions are also available on the Office of the University Registrar's website at <https://registrar.ucdavis.edu/tuition/staff-reduced-fee.cfm>.

### Vehicle Parking Permit and Bicycle Licensing Fees

For parking permit information and rates please visit the TAPS website at <http://taps.ucdavis.edu> or call 530-752-8277.

A California State bicycle license sticker is required on all bicycles operated on campus (new license, \$10.00; renewals, \$5.00—both valid through December 31 of the second year after purchase). For more information, see TAPS at <http://taps.ucdavis.edu> or call 530-752-2453.

### Costs for a Year at UC Davis

Cost of living expenses are adjusted annually and fees are subject to change without notice. For the most recent Cost of Attendance figures, please refer to the Financial Aid and Scholarships Office's website for undergraduate or graduate and professional students at <http://financialaid.ucdavis.edu>.

### International Student Expenses

International students are responsible for all of their expenses while studying at UC Davis. The expenses include nonresident supplemental tuition, systemwide tuition and fees, campus-based fees, room and board, books and a modest amount for personal expenses. For the 2015-16 academic year, costs for international undergraduates living on campus were \$56,916. For the latest costs, see <http://financialaid.ucdavis.edu/undergraduate/cost.html>.

During the admission process, most international undergraduate students are required to complete the "Confidential Financial Statement" form certifying that support funds are available for nine months. It is very important that students have adequate, reliable and continuing financial support for the whole time they are here. After students arrive in the United States, it is extremely difficult to obtain additional funding. The university does not offer grants or financial aid to international undergraduate students.

It is extremely important that you arrive on campus with sufficient funds for the entire academic year to cover all fees, tuition and expenses such as room and board, health insurance, books, supplies, transportation and other miscellaneous expenses. Careful budgeting is essential for international students.

## Estimated Student Fees\*

The estimated quarterly fees for Fall, Winter and Spring the 2016-17 academic year fees are not yet available at the time of publication. For up-to-date fee information, see <http://budget.ucdavis.edu/studentfees/>. Unless otherwise noted, these are the estimated quarterly fees from the Fall, Winter and Spring the 2015-16 academic year. The tuition, fees, and charges posted here are estimates based on currently approved amounts. Actual tuition, fees, and charges are subject to change by the Regents of the University of California and could be affected by State funding reductions. Accordingly, final approved levels (and thus a student's final balance due) may differ from the amounts shown. Programs and courses may have fees that are not listed here, check with your adviser.

\* All new Undergraduate, Graduate Academic, and Graduate Professional students admitted will be charged a one-time, life-time document fee of \$150.00. Graduate students in the strictly professional degrees (M.D., D.V.M., and M.B.A.) are excluded and will continue with pay-per-service charges. More information about the document fee is available at [https://registrars.ucdavis.edu/local\\_resources/docs/doc-fees/](https://registrars.ucdavis.edu/local_resources/docs/doc-fees/).

<sup>1</sup> The Disability Insurance Fee is assessed annually fall quarter at \$41.00. This fee applies only to medical students, not interns, residents or health science academics.

<sup>2</sup> A course materials and services fee may apply to some undergraduate and graduate courses; see <http://budget.ucdavis.edu/students/documents/course-materials-fee.pdf>.

<sup>3</sup> The fees above exclude students enrolled in self-supported degree programs. Students enrolled in self-supporting degree programs pay a program fee in lieu of the fees above. Fees for self-supporting programs are available at <http://budget.ucdavis.edu/students/fees/>.

<sup>4</sup> The Law School operates on the semester system. Nonresident Law students pay a Professional Degree Supplemental Tuition of \$15,594.00 per semester.

<sup>5</sup> Student in these programs must attend the summer quarter and pay fees the summer. For fee information, see <http://budget.ucdavis.edu/students/fees/current/index.html>.

<sup>6</sup> The fees above reflect fees for students in the Graduate School of Management (GSM) full-time MBA program. Graduate students in the GSM part-time MBA programs (Bay Area MBA and Sacramento MBA) and Master of Professional Accountancy (MPAc) programs are self-supporting programs and students pay a program fee in lieu of the fees above. For fee information, see <http://budget.ucdavis.edu/students/fees/current/index.html>.

<sup>7</sup> Full-time MBA students are only required to pay the quarterly course materials and services fee in their first year of instruction.

<sup>8</sup> School of Veterinary Medicine operates on the semester system. 4th year Veterinary Medicine D.V.M. students also attend during summer and pay fees the summer prior to their final academic year. For more fee information, see <http://budget.ucdavis.edu/students/fees/current/index.html>.

<sup>9</sup> Nonresident Master of Public Health students pay a Professional Degree Supplemental Tuition of \$2,629.00 per quarter and nonresident Master of Preventive Veterinary Medicine students pay a Professional Degree Supplemental Tuition of \$1,117.00 per quarter.

<sup>10</sup> The Betty Irene Moore School of Nursing at UC Davis offers a Nursing or Nurse Practitioner degree program. The students in this M.S. Nurse Practitioner track must attend the summer quarter and pay additional summer fees. For fee information, see <http://budget.ucdavis.edu/students/fees/current/index.html>.

<sup>11</sup> Undergraduate and Graduate students are automatically in the Student Health Insurance Plan (SHIP) unless they are able to prove comparable coverage under another insurance plan. For more information, see <http://shk.s.ucdavis.edu/insurance>.

## FEE REFUNDS

### Cancellation, Withdrawal and Fee Refunds

To cancel your registration before the first day of instruction or to withdraw from the university on or after the first day of instruction, you must submit a Cancellation/Withdrawal Form. If you do not submit a Cancellation/Withdrawal Form, you will be liable for tuition and student fees according to university policy (below). No exceptions will be made to this policy.

If you are enrolled in classes, you will be dropped from all of your courses automatically when the Cancellation/ Withdrawal Form is processed.

For students who pay fees and then cancel or withdraw with official approval before the end of any quarter, fees may be refunded according to the [Schedule of Refunds, on page 55](#).

The effective date for determining a refund of fees is the date you submit a Cancellation/Withdrawal Form with the Office of the University Registrar and it is presumed that no university services will be provided to you after that date. The percentage of tuition and student fees that may be refunded is determined by the number of calendar days (not school days) elapsed, beginning with the first day of instruction.

If you are enrolled but have not paid fees in full by the tenth day of instruction, you will be administratively withdrawn and fees for the first 10 days of instruction will be charged to your account.

### New Undergraduate Students

The nonrefundable \$100 deposit paid when you accepted admission and returned your Statement of Intent to Register (SIR) is withheld from tuition and the Schedule of Refunds is applied to the balance of tuition and student fees assessed.

Therefore, on or before the first day of instruction, tuition and student fees paid are refunded in full minus \$100. After the first day of instruction, the nonrefundable \$100 deposit is withheld from tuition and the Schedule of Refunds is applied to the balance of tuition and student fees assessed.

### All Continuing Students, Readmitted Students and New Graduate Students

*On or before the first day of instruction, registration fees are refunded in full minus a \$10 service charge for cancellation/withdrawal.*

*After the first day of instruction, the Schedule of Refunds is applied to tuition and student fees. The Schedule of Refunds does not apply to the Health Insurance Fee.*

### Planned Educational Leave Program (PELP)

The Schedule of Refunds also applies to students who participate in the Planned Educational Leave Program (PELP). Thus, for a full refund of tuition and student fees paid, you must file a completed approved PELP Form with the Office of the University Registrar before or on the first day of instruction; see [Leave of Absence: Planned Educational Leave Program \(PELP\), on page 96](#).

### Schedule of Refunds

The Schedule of Refunds, at <https://registrar.ucdavis.edu/registration/leave/refunds.cfm>, applies to all new, continuing and readmitted students who do not receive federal financial aid.\*

The Schedule of Refunds refers to calendar days—not school days—beginning with the first day of instruction. The number of days elapsed is determined from the date the completed Cancellation/Withdrawal Form, PELP Form, or Filing Fee Form (graduate students) is returned to the Office of the University Registrar. Percentages listed will be applied respectively to Tuition, Nonresident Supplemental Tuition, and all student fees except the Health Insurance Fee.

#### For students enrolled in a quarter terms:

Elapsed Calendar Days	Percentage of Fees Refunded
0–1	100% less \$10.00
2–7 days	90%
8–18 days	50%
19–35 days	25%
36 days and over	0%

#### For students enrolled in a semester terms:

Elapsed Calendar Days	Percentage of Fees Refunded
0–1	100% less \$10.00
2–11 days	90%
12–27 days	50%
28–53 days	25%
54 days and over	0%

\*New students who receive federal financial aid and withdraw during their first academic term may be refunded fees according to a Modified Fee Refund Schedule, available at the Financial Aid Office; see <http://financialaid.ucdavis.edu/consumer/r2t4.html>.

### UC Davis Student Health Insurance Plan (Davis SHIP) Coverage and Refund of Davis SHIP Fees

The University of California requires that all students have health insurance. To help students meet this requirement, UC Davis automatically enrolls all registered students in the UC Davis Student Health Insurance Plan (Davis SHIP). Fees for Davis SHIP coverage are automatically charged to the student's account each term along with registration fees for:

- Students who want to be enrolled in Davis SHIP, enrollment is automatic-no action is required.
- Students with comparable insurance, who do not want to be enrolled in Davis SHIP, must submit a Davis SHIP waiver application at <http://shcs.ucdavis.edu/insurance> by the published deadline; see the [Academic Calendar, on page 1](#). If a waiver is approved, Davis SHIP enrollment will be waived through the end of the academic year. An approved waiver is effective for the duration of the current academic year only. Waiver applications must be filed each academic year.

On campus medical and mental health care is available to all students at SHCS, even if Davis SHIP is waived.

More waiver information or information regarding benefits, eligibility, deadlines, or insurance coverage if your registration status changes, can be found at <http://shcs.ucdavis.edu/insurance> or by visiting the SHCS Insurance Services office at the Student Health & Wellness Center.

## RESIDENCE FOR TUITION INFORMATION

### Policy Governing Residence

The determination of residence for tuition purposes at the University of California is governed by the UC Residence Policy and Guidelines. Under the UC Residence Policy, adult students and parents must have the legal ability to establish a permanent domicile in the United States, meaning that you must be a U.S. citizen or permanent resident of the United States or hold a valid, qualifying nonimmigrant visa or legal status. There are particular rules that apply to the residence classification of minors and that establish exemptions. All UC Residence requirements must be met by the residence determination date (generally the first day of instruction) of the term for which a resident classification is sought. Documentary evidence may be required and all relevant indications will be considered in determining residence classifications.

You are cautioned that this summary is not a complete explanation of the regulations regarding residence. Please note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date.

### Office of the General Counsel

Requirements for Resident Classification, Rules Applying to Minors and Exemptions from Nonresident Supplemental Tuition can be found published as the "UC Residence Policy and Guidelines" available at the Office of the General Counsel website.

Read the full text of UC Residence Policy-Residency Guidelines for Purposes of Tuition and Fees at <http://ucop.edu/residency/>.

### Nonresident Supplemental Tuition Fee for Nonresident Students

If you have not met all of the UC requirements for residency prior to the Residence Determination Date each term in which you propose to attend the University, you must pay Nonresident Supplemental Tuition in addition to all other fees.

### Resident Determination Process

California residence for tuition purposes is determined for each student under the UC Residence Policy and Guidelines based on information provided to a campus Residence Deputy on the Statement of Legal Residence. Additional information and documentation in support of your claim of resident status for tuition purposes may be requested as needed. Applicants and students are responsible for submitting ALL RELEVANT DOCUMENTATION AND INFORMATION to the campus Residence Deputy in support of their in-state residency request. Information or documents

requested but not made available to the Residence Deputy will NOT be considered or reviewed on appeal.

### Incorrect Classification

If you were incorrectly classified as a resident, you are subject to reclassification and to payment of all Nonresident Supplemental Tuition not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to University discipline. Resident students who become nonresidents must immediately notify the campus Residence Deputy.

### Appeals

Any student, following a final decision on their residence classification by the Residence Deputy may apply for an appeal with the Office of the General Counsel within 30 days of notification of the Residence Deputy's final decision so long as the appeal meets specific requirements. Disagreement with the residence determination alone is insufficient grounds for an appeal and will not be accepted.

All inquiries regarding the appeal process should be addressed to the Office of the General Counsel at [Residency.Appeal@ucop.edu](mailto:Residency.Appeal@ucop.edu).

### Petitions for Classification to Resident Status

Nonresident students may apply for a change of classification to resident status once all the requirements have been met. Petitions for Classification to Resident Status from continuing UC Davis students classified as nonresident for tuition purposes in a prior quarter must be filed during the filing period and no later than the published deadline for the term they wish to classify as a Resident. Deadline exceptions will only be made in the cases of a documented medical illness, death in the immediate family, or an administrative error on the part of the university. Petition supporting documents will not be accepted after the 12th day of instruction unless an extension has been granted by a Residence Deputy.

### Inquiries

Inquiries regarding residence requirements, determination, classification and recognized exceptions should be directed to Residence Deputy, Office of the University Registrar, One Shields Avenue, Davis, California 95616 or [residencedeputy@ucdavis.edu](mailto:residencedeputy@ucdavis.edu).

Inquiries regarding the UC Residence Policy and Guidelines or appeals, should be directed to Office of the General Counsel at [Residency.Appeal@ucop.edu](mailto:Residency.Appeal@ucop.edu).

RESIDENCE DEPUTIES ARE THE ONLY AUTHORIZED UNIVERSITY PERSONNEL TO PROVIDE INFORMATION REGARDING RESIDENCE REQUIREMENTS.

## FINANCIAL AID

Financial Aid and Scholarships  
1100 Dutton Hall  
530-752-2390 530-754-6073 (Hearing Impaired)  
<http://financialaid.ucdavis.edu>

The Financial Aid and Scholarships Office provides financial assistance in the form of grants, scholarships, loans, and work-study employment. To apply, undergraduates and graduate students are required to annually file the Free Application for Federal Student Aid (FAFSA), available at <http://www.fafsa.gov> or the California Dream Act Application at <http://dream.csac.ca.gov>.

**The priority-filing deadline is March 2 each year;** however, students are encouraged to apply even if the deadline has passed. Although state and university funding may be depleted, Federal Pell Grants and Direct Loans are available throughout the year for eligible applicants.

### UC Education Finance Policy for Undergraduates

UC Davis uses the University of California Education Financing Model to determine financial aid awards for undergraduates. The policy looks at four factors to choose the type and amount of aid for each student:

1. Cost of Attendance
2. Expected Family Contribution (EFC) as determined by the information on your application
3. Federal, State, and University grant eligibility
4. Undergraduate Self-Help and Loan Contribution, which is the amount that undergraduates are expected to contribute toward their cost of education at UC Davis

The Financial Aid and Scholarships Office can assist students with dependents or child care costs that exceed the standard student budgets.

Undergraduates with outstanding academic records are encouraged to apply for scholarships. For information about scholarship application process, see [Undergraduate Scholarships and Awards, on page 59](#).

### Graduate Student Funding

Graduate students and students in the professional schools at UC Davis (Medicine, Law, Veterinary Medicine and the School of Management) apply for financial aid by completing the Free Application for Federal Student Aid (FAFSA), available at <http://www.fafsa.gov> or the California Dream Act Application at <http://dream.csac.ca.gov>. Financial need is based on the information provided on your application. FAFSA applicants will receive a Student Aid Report (SAR) with the Student Contribution (SC) assigned by the federal processor, while Dream Act applicants will receive their SC from CSAC. The SC is subtracted from the UC Davis Cost of Attendance (for the student's graduate program) to determine need-based eligibility. Graduate scholarships, fellowships and teaching and research assistantships are administered through the Office of Graduate Studies.

### Satisfactory Academic Progress

Federal regulations require that undergraduate and graduate student financial aid recipients meet the published Standards

for Satisfactory Academic Progress (SAP) for Financial Aid concerning units and maximum quarters of attendance allowed to obtain a degree. A copy of our SAP standards is available at <http://financialaid.ucdavis.edu/consumer/sap/standards.html>. Review the policy in detail and discuss it with your academic adviser.

For more information, contact your respective Financial Aid Office at <http://financialaid.ucdavis.edu/contact.html>. Regulations and deadlines are subject to change.

### Types of Financial Aid

#### Grants

A grant is an award that does not have to be repaid as long as the student remains eligible. Whenever criteria and funding levels permit, a student's financial aid award includes grants.

**Federal Pell Grants.** All undergraduate financial aid applicants are required to apply for a Federal Pell Grant each year by filing the FAFSA. Recipients must be enrolled at full time to receive the full amount of awarded Pell Grant and must maintain good academic standing and make satisfactory academic progress. Eligibility is determined by the federal government according to a formula developed by the Department of Education and approved annually by Congress. The UC Davis electronic financial aid notice (MyAwards) informs the student of the Pell Grant award amount.

**Cal Grants.** All undergraduate financial aid applicants who are California residents are encouraged to apply for a Cal Grant by submitting the FAFSA or California Dream Act Application and a GPA Verification form before March 2. Cal Grants are awarded by the California Student Aid Commission (CSAC) and may be renewed each year for four years, see <http://www.csac.ca.gov>.

- **Cal Grant A Awards** are based on financial need and academic achievement and can be extended for one year for students entering a teaching credential program. Cal Grant A pays partial registration fees.
- **Cal Grant B Awards** are based on financial need and are for undergraduate students primarily from low-income backgrounds. Recipients are required to complete at least 12 units each quarter. Cal Grant B pays a quarterly stipend for living expenses for first-year students and a portion of the registration fees plus a quarterly stipend for living expenses for students in their second through fourth years.

Cal Grant A and B recipients who plan to enroll in a Teaching Credential Program (TCP) may be eligible to renew their Cal Grant award for an additional year. The additional year of payment is provided to students who are seeking an initial teaching credential and cannot be used for other graduate level courses of study.

**University Grants (UC Grant).** The university determines grant eligibility for undergraduates by subtracting a student and parent contribution, any federal or state resources the student receives, and a standard work and loan contribution from the cost of attendance. Any remaining eligibility would be funded with UC Grant. UC Grant funding for graduate students is awarded by the Office of Graduate Studies. Students in the professional schools and the School of Education are awarded grant by their academic departments.

## Loans

Financial aid almost always includes a long-term loan. Awards are dependent on available funding. Some loan fund sources do not receive allocations each year. Repayment of these loans (with the exception of Federal Direct PLUS loans) begins after graduation or withdrawal from school. Students are encouraged to work as much as possible (while remaining full-time students) and to develop modest personal budgets to keep final loan indebtedness within a manageable range.

**Health Profession Student Loans (HPSL)** are awarded to students in the School of Veterinary Medicine who demonstrate financial need. Parental income information is required for HPSL applicants regardless of age and dependency status.

- \$2,500 plus fees maximum
- 5% interest
- Repayment begins twelve months after receipt of the degree or withdrawal

### Federal Direct Subsidized and Unsubsidized Student Loans

**(Direct Loans)** are available through the Financial Aid Office. Subsidized loans are based on financial need and interest accrued while the student is in school is paid by the federal government. Unsubsidized loans are available to students regardless of income and assets, and there is no interest subsidy.

- Undergraduates may borrow up to annual maximums of \$3,500 subsidized plus \$2,000 unsubsidized = \$3,500 for freshmen, \$4,500 subsidized plus \$2,000 unsubsidized = \$6,500 for sophomore, and \$5,500 subsidized plus \$2,000 unsubsidized = \$7,500 for juniors and seniors, up to a maximum aggregate indebtedness of \$23,000 for subsidized loan and \$31,000 in combined subsidized and unsubsidized loan
- Independent undergraduates may borrow unsubsidized Direct Loans up to annual maximums of \$9,500 for freshmen, \$10,500 sophomores, and \$12,500 for juniors and seniors, up to a maximum aggregate amount of \$57,500, of which \$23,000 can consist of subsidized loans
- Graduate and professional students may borrow unsubsidized Direct Loans up to an annual maximum of \$20,500. Health professions students may borrow higher amounts dependent on the length of their academic year
- For the most current interest rates on Direct Loans, see <https://studentloans.gov>
- A minimal loan fee is charged on all Direct Loans, which varies by loan type. The fee is deducted proportionately from each disbursement
- For Direct Loans, repayment begins six months after graduation or withdrawal from school

**Federal Direct Parent Loans for Students (Direct PLUS)** are government-insured loans that are made to parents of dependent students.

- Direct PLUS loans are available up to the cost of education minus other financial aid received during the years if the dependent student is an undergraduate
- There is no interest subsidy for this loan
- A loan fee is charged and deducted proportionately from each disbursement
- For the most current interest rate and loan fee information, see <https://studentloans.gov>

- Repayment begins within 60 days after loan disbursement

**Direct Grad PLUS Loans.** The Grad PLUS Loan is provided by the William D. Ford Direct Loan Program.

- Credit checks are required to be eligible for the Grad PLUS. Students who do not meet the credit requirements for a Grad PLUS may still obtain the loan with an endorser who does meet the credit requirements
- An origination fee is deducted from the loan amount
- For the most current interest rate and loan fee information, see <https://studentloans.gov>
- Repayment period begins 60 days after loan disbursement

**Federal Perkins Loans** are for U.S. citizens or permanent U.S. residents. Loans may be limited to a percentage of student's need because of demand and limited funds. This is a subsidized loan, which means the federal government pays the interest on the loan while the student is enrolled in school. Repayment starts nine months after graduation or withdrawal from school and may be extended over 10 years. Additional deferments are possible for temporary total disability or volunteer service in a private, non-profit organization, VISTA or the Peace Corps. Some teachers of students from low-income families and full-time teachers of handicapped children may also qualify for partial loan cancellation.

#### Annual Federal Perkins Loan Limits

- \$4,000 for undergraduate students
- \$6,000 for graduate/professional students

#### Aggregate (Maximum) Loan Limits

- \$8,000 for a student who has not completed the first two years of undergraduate work and for programs that are less than two years in length
- \$20,000 for a student who has successfully completed two years of a program of education leading to a bachelor's degree but who has not completed degree work
- \$40,000 for a graduate/professional student (includes loans borrowed at the undergraduate level)

UC Davis offers many affordable university loan programs to its students. While a majority of campus-based loans have a need component as demonstrated by the FAFSA or Dream Act application, most students can apply for other loan opportunities such as the emergency, short-term and assistant loan program.

**Emergency, Short-Term and Assistant Loans** meet temporary or emergency financial needs of currently enrolled students. Please visit the financial aid website for requirements, instructions and the online application. Loan funds are provided by UC Davis alumni, ASUCD, the Cal Aggie Foundation, the Regents of the University of California and private donors.

- **Emergency Loans.** \$500 maximum. The maximum repayment period is 30 days
- **Short-Term or Assistant Loans.** \$501 or higher. Assistant Loans are available to graduate students who are in the teaching assistant, research assistant, readership, associate-instructor or post-graduate researcher classifications can apply for a maximum of one month's salary. The maximum repayment period for both loan types is six months or the end of the academic year, whichever occurs first

For applications and more information about applying, see <http://financialaid.ucdavis.edu/loans/short-term.html>.

## Work-Study

1100 Dutton Hall  
530-752-0520; [sec@ucdavis.edu](mailto:sec@ucdavis.edu)

### Undergraduate Work-Study

Work-Study allows students to earn part of their financial aid through part-time employment. Federal Work-Study is available for students eligible to complete the Free Application for Federal Student Aid Form (FAFSA), and the FAFSA must be completed by March 2 annually to be considered. Institutional Work-Study is available to international and AB 540 students who are eligible to work and is also based on need. For AB 540 students that are also undocumented, need is determined by the California Dream Act Application, which must be completed by March 2 annually to be considered. Dream Act applicants must also meet Deferred Action for Childhood Arrivals (DACA) requirements to be eligible. International and other AB 540 students must complete a separate application to be considered for Institutional Work-Study. Please see our office for details. Work-Study awards offer both money for education and work experience.

**Community Service.** A wide variety of community service jobs are available for students who apply for Work-Study funding. These jobs provide educational and rewarding work experience and help students connect with the community at large. Students applying for community service jobs also receive priority consideration for Work-Study funding.

### Work-Study for Graduate Students

Work-Study funds for graduate students are allocated directly to the chairpersons of the graduate programs. Graduate students seeking Work-Study funding should contact their respective departments for further information. Students must file a FAFSA or California Dream Act application and have financial need to be considered for Work-Study funding.

## Undergraduate Scholarships and Awards

Undergraduate and Prestigious Scholarships Office:  
2128 Dutton Hall  
530-752-2804; [scholarships@ucdavis.edu](mailto:scholarships@ucdavis.edu);  
<http://scholarships.ucdavis.edu/>

Mailing address:  
Undergraduate and Prestigious Scholarships Office  
University of California  
One Shields Avenue  
Davis, CA 95616-8696

UC Davis recognizes outstanding students with scholarships awarded on the basis of academic excellence and exceptional promise. The Scholarship Office administers approximately 220 different undergraduate scholarships. Many more scholarships are handled through outside agencies.

Committees made up of faculty and staff determine scholarship eligibility. In addition to academic records (a minimum grade point average of 3.250 is required), selection may be based on letters of recommendation, test scores and a personal essay in which your university goals and objectives are stated. Some awards are limited to students in specific majors or colleges, residents of certain geographical areas, students of a particular class standing, or students with demonstrated financial need. Most scholarships are not renewable and you must reapply each year for scholarship aid.

Students applying to the university are considered for scholarships using the same forms completed for admission purposes. The undergraduate scholarship application for continuing students becomes available online in October and is due in early January. See the Scholarship Office website for instructions and the application. Scholarship recipients will be notified beginning in April and continue through late summer.

**Regents Scholarships**, among the highest honors that undergraduates at the university can receive, are granted to exceptionally promising freshmen or juniors enrolling in the fall quarter. Awards may be honorary (honorarium) or may be accompanied by a stipend (for students demonstrating financial need), which generally covers the difference between family resources and yearly educational costs. These scholarships are renewable as long as students maintain a 3.250 cumulative grade point average.

- 2-year and 4-year renewable scholarships

**Prestigious Scholarships and Fellowships** are highly competitive, merit-based awards open to all UC Davis students. These awards have an extensive application process, and our office is available to assist you. Please visit the Undergraduate or Graduate Prestigious Scholarships & Fellowships section of our website for more details.

**Special Prizes** at UC Davis recognize outstanding performance, achievement and promise in special programs or majors. The most prestigious prize is the University Medal, presented to the most outstanding graduating senior.

- Plaques or certificates and cash awards
- College and school medals to outstanding graduates

**Alumni Scholarships** provided by the Alumni Association in cooperation with the university, are based primarily upon leadership and scholastic achievement. Your financial need and extracurricular activities may also be considered. For more information, see <http://alumni.ucdavis.edu/about-us/scholarships>.

- \$1,000 minimum
- New undergraduates only
- Selection by local alumni association chapters

**Military Scholarships** are awarded to outstanding high school seniors without regard to financial need, as well as to UC Davis students who have demonstrated exceptional leadership and scholastic achievement during their freshman and/or sophomore years. Eligible high school seniors apply for the full 4-year scholarship and must file applications by November. UC Davis scholarship students participate in the Military Science (ROTC) Program. Information and applications are available from the Department of Military Science in 125 Hickey Gymnasium 530-752-5211.

- Full fees, books and supplies
- \$1,000 per year for miscellaneous expenses
- 1-, 2-, 3- or 4-year scholarships

**Other Scholarships** are made possible by individual donors, private corporations and various agencies. Many organizations and groups conduct their own scholarship programs. In most cases, you apply directly to these sponsoring groups. Information on available outside scholarships and scholarship search services is available at <http://financialaid.ucdavis.edu/scholarships/outside.html>.

- Graduate students are also eligible for various scholarships and fellowships; see Fellowships, Assistantships and Loans, on page 122.

STUDENT LIFE

## STUDENT LIFE

As a UC Davis student, you are part of a diverse student community that fosters academic and career exploration as well as personal growth. The campus offers assistance with the practicalities of student life, such as finding housing, staying healthy and affording a university education. Faculty members, staff and peer advisers are available to support your academic goals by helping you master concepts, study effectively, manage time and apply classroom material to careers. Whatever your academic and career aspirations, you'll find opportunities to enrich your student experience through internships, research, community service, student clubs and study abroad. UC Davis students also enjoy myriad recreational choices, from impromptu Quidditch games on the Quad to intercollegiate athletics, craft classes, backpacking trips and more.

## LIVING AT DAVIS

### On-Campus Housing

Student Housing Office  
530-752-2033; [studenthousing@ucdavis.edu](mailto:studenthousing@ucdavis.edu); <http://housing.ucdavis.edu>

Living on campus adds a measure of convenience to your life and helps familiarize students with the campus. Over 9,000 students live in Student Housing each year, including over 94 percent of incoming freshman students.

All incoming fall quarter freshmen and transfer students are guaranteed housing in Student Housing, provided they meet eligibility requirements and all Student Housing and university deadlines. Freshmen and Transfer students are guaranteed one year of housing. See the Student Housing website for more information about the housing guarantee. All other students should contact Student Housing to inquire about their housing options.

### Residence Halls

There are many residence halls at UC Davis, located in three different Student Housing areas: Segundo, Tercero, and Cuarto. In each of the residence hall complexes, students and staff create and maintain an environment conducive to personal growth and educational achievement. Academic and social events are held many times throughout the year. An Academic Advising Center, a Computer Center, convenience store and a dining hall (dining commons) are located in each area.

Rooms are furnished with a bed and mattress, desk and chair, bookcase, chest of drawers, closet or wardrobe, study lamp, and wastebasket and recycling basket for each resident. Furnished common rooms in each residence hall are available for studying, relaxing and hanging out with friends.

Cost is based on room occupancy (single, double, or triple) and meal plan choice. Rates are available at <http://housing.ucdavis.edu/fees>. Each year's rates are subject to approval by the UC Regents, are typically finalized in May, and are effective for the following academic year.

Incoming first-year freshmen students are eligible to live in the residence halls. Some years, as space allows, incoming first-year transfer students may also live in the residence halls. Housing online applications will be available to incoming freshmen stu-

dents after they submit their Statement of Intent to Register (SIR). All other students are encouraged to call Student Housing to inquire about housing availability.

Students who require a special accommodation or consideration, including a medical condition, disability, dietary requirement or other circumstance will be able to submit their request and supporting documentation as a part of the residence hall application process.

Visit the Student Housing website to learn more about the residence halls and how and when to apply for housing. Call or email Student Housing with any questions.

### Apartments

There are several apartment properties on the UC Davis campus that provide housing to students with families, graduate and professional students, and undergraduate students. Multiple housing projects will bring many new apartments to the UC Davis campus with an emphasis on graduate students and students with families in the next two-three years.

### **Student Housing Apartments (SHA)—Transfer Student Communities**

Student Housing created a special community for transfer students called "Student Housing Apartments," or SHA. SHA is comprised of multiple apartment complexes both on and very close to campus. SHA residents have access to academic support and tutoring, as well as access to on-campus computer centers and optional dining plans.

Rooms are furnished with a bed and mattress, desk and chair, bookcase, chest of drawers, closet, study lamp, and wastebasket and recycling basket for each resident. Living and dining rooms are also furnished, and all apartments feature full kitchens.

Cost is based on room occupancy and meal plan choice. Rates are available at <http://housing.ucdavis.edu/fees>. Each year's rates are subject to approval by the UC Regents, are typically finalized in May, and are effective for the following academic year.

Incoming first-year transfer students are eligible to live in SHA. Housing online applications will be available to incoming transfer students after they submit their Statement of Intent to Register (SIR).

Students who require a special accommodation or consideration, including a medical condition, disability, dietary requirement or other circumstance will be able to submit their request and supporting documentation as a part of the Student Housing Apartments application process.

Visit the Student Housing website to learn more about SHA and how and when to apply for housing. Call or email Student Housing with any questions.

### **Solano Park Apartments**

Solano Park offers over 270 university-operated, unfurnished one- and two-bedroom apartments surrounded by green lawns and shade trees that create a serene family-friendly atmosphere. Priority is given to students with families, and then to graduate students, but all UC Davis students are eligible to live at Solano Park.

Students may submit an application to live at Solano Park before being admitted to UC Davis, and should apply for housing several months in advance to ensure housing is available. Solano Park rates are available at <http://housing.ucdavis.edu/fees>. Each year's rates are subject to approval by the UC Regents, are typically finalized in May, become available after approval, and are effective on August 1.

Students who require a special accommodation or consideration, including a medical condition, disability, dietary requirement or other circumstance will be able to submit their request and supporting documentation as a part of the application process.

Visit the Student Housing website to learn more about Solano Park Apartments and how and when to apply for housing. Call or email Student Housing with any questions.

### **8th & Wake Apartments**

8th & Wake is a new privately-owned and managed on-campus complex for graduate students. For more information, call 8th & Wake at 530-298-7777.

### **The Atriums at La Rue**

The Atriums offers studio and two-bedroom unfurnished units for single graduate students. The Atriums is a privately-owned and managed on-campus complex. For more information, call The Atriums at 530-753-7322.

### **Russell Park Apartments**

Russell Park offers one-, two-, and three-bedroom unfurnished units for students with families. Russell Park is a privately-owned and managed on-campus complex. For more information, call Russell Park at 530-753-7322.

### **West Village**

West Village is a neighborhood featuring three apartment complexes as well as a park, retail and dining space, a community college, and coming soon, single family homes. The apartment complexes offer housing for UC Davis students, as well as faculty and staff. West Village is a privately-owned and managed on-campus complex. For more information, call the West Village Leasing Center at 530-759-0661.

### **Cooperatives**

Cooperatives present unique and independent living opportunities to their residents. Communities share daily chores, including cooking, cleaning, and gardening, and host a variety of dinner parties and events. There are two Cooperatives at UC Davis: the Tri-Cooperatives and The Baggins End Domes, privately-owned and managed by SCHA.

For more information about the Tri-Cooperatives and Baggins End, see the Solar Community Housing Association website at <http://schadavis.org>.

### **Off-Campus Housing**

The majority of UC Davis students live off campus. The City of Davis has ample apartments for rent, from one-person studio apartments to five- or six-person suites. Townhouses, duplexes

and houses throughout the city are also available for student rental. ASUCD maintains a list of available community housing at <http://chl.ucdavis.edu>. And early every year ASUCD hosts "Housing Day," an event that brings dozens of local housing managers to campus to introduce their communities to UC Davis students.

## **TRANSPORTATION AND PARKING**

Transportation Services (TAPS)  
Located on North Dairy Road  
Office hours: M-F, 7:30 a.m.-4 p.m. (PT)  
Enforcement hours: 7 a.m.-10 p.m. (PT)  
530-752-8277; <http://taps.ucdavis.edu>  
Motorist Assistance Program: 530-752-8277  
Bicycle Program: 530-752-BIKE (2453)

The central campus is closed to unauthorized motor vehicles. Walking and bicycling are the most common ways to traverse the campus.

**Bicycles.** All bicycles ridden or parked on campus must have a current California state bicycle license. You may buy a license or renewal tag at TAPS. Bicycle traffic and parking regulations are strictly enforced. Bikes may be parked only in designated parking areas and may only be secured to bike racks. The Bicycle Program rents bicycle lockers on a quarterly or annual basis for storage of bicycles only. TAPS provides complimentary bike lock cutting service for campus cyclists who have lost their keys or whose locks are not working. The locked bike must have a current registration; unregistered bikes may be registered at the time of the lock removal. The ASUCD Bike Barn, at the Silo, offers repairs and rentals, and sells new and used bikes, bicycle parts and accessories.

**Parking.** Vehicles (including motorcycles and mopeds) parked on campus are required to display a valid UC Davis parking permit or pay for time at a meter. Parking is permitted in marked spaces only. Permits must be displayed so all information is visible through the front window. All permit types may be purchased at TAPS and many are available at <http://taps.ucdavis.edu>. Daily visitor permits may also be purchased from permit dispensers located at entrances to most visitor parking lots. Visitor permits are valid in areas posted for visitor or "C" permits. After 5 p.m. (PT), they are also honored in "A" permit areas and at meters.

**Motorist Assistance Services.** TAPS provides complimentary on-campus motorist assistance services including vehicle lock-outs, battery jumps, gasoline retrieval and tire inflation services.

**Alternative Transportation.** UC Davis encourages the use of alternative transportation options through the goClub. The goClub offers discounted transit passes and provides incentives for those who carpool, vanpool, walk, bike, or ride the train or bus to campus on a regular basis. For more information, see <http://goclub.ucdavis.edu> or call 530-752-6453.

The UC Davis/UC Davis Medical Center Shuttle provides hourly service Monday through Friday between the UC Davis campus and the medical center in Sacramento. The shuttle is available to all members of the UC Davis community. You may purchase shuttle passes at Transportation Services or the Cashier's Office (cash or check only).

The Davis/Berkeley Shuttle provides transportation between the UC Davis campus and the UC Berkeley campus for university employees, registered students and other university affiliates. Advanced reservations are required. For schedule information and reservations, visit Fleet Services at <http://fleet.ucdavis.edu> or call 530-752-8287.

## Buses

Unitrans  
5 South Hall  
530-752-BUSS; <http://www.unitrans.com>

Unitrans provides year round public transit service on 16 lines on the UC Davis campus and the City of Davis. Unlimited access is provided to undergraduate students with a valid UC Davis registration card; others may ride by paying the single-ride cash fare or by purchasing discounted multi-ride passes from TAPS or at the Unitrans business office. Full service is provided each UC Davis school day (Monday-Friday; 7:00 a.m.-8:30 p.m. (PT)) and at night (Monday-Thursday; 8:30 p.m.-11:00 p.m. (PT)) during the regular school year. Reduced schedule service operates during the summer, finals week, and all academic break periods. Unitrans operates seven of its primary lines on Saturdays, Sundays, and designated holidays. Schedules are available at the MU Campus Information Center, bus terminals, Davis City Hall, the Unitrans office and at <http://www.unitrans.com>. Real-time bus location information is available by phone, text, and website via the Nextbus automated system.

## STUDENT EMPLOYMENT

Student Employment is a resource for UC Davis students seeking employment opportunities to fund their educational expenses. The Student Employment website provides a means by which UC Davis students and employers can meet their employment needs. Full-time or part-time students, students on PELP, and students with a letter of acceptance for the following quarter who have not yet registered are eligible. There are also a wide variety of community service jobs, which can be both educational and personally rewarding. With support from the Internship and Career Center, students have easy access to both UC and non-UC student employment as well as internship and career opportunities. To research available jobs, see <http://iccweb.ucdavis.edu/students/jobsandcareers.htm>.

## WORKLIFE AND WELLNESS

Heitman Staff Learning Center  
530-754-8791; [worklife@ucdavis.edu](mailto:worklife@ucdavis.edu); <http://worklife-wellness.ucdavis.edu>

WorkLife and Wellness is the principal resource on campus for referrals, outreach, education and programming that enable students, faculty and staff to meet commitments and pursue interests both in and outside of the university. Services address child care, elder care, breastfeeding support, health and wellness, community involvement, and workplace flexibility. The unit serves as the university's liaison with the on-campus child development centers and administers the Student Parent Child Care Grant Program.

### On-Campus Child Care Programs and Resources

- **Hutchison Child Development Center** 530-752-3455; [hutchison@brighthorizons.com](mailto:hutchison@brighthorizons.com); <http://child-care-preschool.brighthorizons.com/CA/Davis/hutchison/>
- **LaRue Park Child Development Center** 530-753-8716; [laruecdc@ucdavis.edu](mailto:laruecdc@ucdavis.edu); <http://www.davischildcare.org/>
- **Russell Park Child Development Center** 530-753-2487; [russellcdc@ucdavis.edu](mailto:russellcdc@ucdavis.edu); <http://www.davischildcare.org/>

All three centers are privately owned and operated with university oversight, serving infants through preschoolers. Nationally-accredited.

- **Early Childhood Lab School at The Center for Child and Family Studies** 530-752-2888; [mloganj@ucdavis.edu](mailto:mloganj@ucdavis.edu) <http://ccfs.ucdavis.edu/EarlyChildhoodLaboratory.html>

A teaching and research laboratory for the Department of Human Ecology, offers part-time programs for infants through preschoolers. Children are selected from a waiting list according to criteria designed to meet academic goals.

- **Student Parent Child Care Grant Program** 530-754-8716; [worklife@ucdavis.edu](mailto:worklife@ucdavis.edu); [http://worklife-wellness.ucdavis.edu/family\\_care/children/childdaresub.html](http://worklife-wellness.ucdavis.edu/family_care/children/childdaresub.html)

Community Based Care Grant is a financial need-based grant available to undergraduate, graduate and professional students. Graduate Student Child Care Grant is a financial need-blind grant for graduate and professional students.

- **The UC Davis Breastfeeding Support Program** 530-754-8791; [worklife@ucdavis.edu](mailto:worklife@ucdavis.edu); <http://worklife-wellness.ucdavis.edu/breastfeedingsupport/index.html>

Quarterly classes; monthly support group meetings; lactation consultations; hospital-grade breast pumps in designated lactation sites; lactation accommodation policy.

- **Aggie Job Link** 530-752-2855; [ajlhelp@ucdavis.edu](mailto:ajlhelp@ucdavis.edu) <https://icc.ucdavis.edu/employer/ajl.htm>

Browse and post positions for child care providers.

### Community Child Care Programs

Children's Home Society; 530-723-5225  
1100 Main Street, Suite 230, Woodland, CA 95695  
[CHSYoloCounty@chs-ca.org](mailto:CHSYoloCounty@chs-ca.org)

**Child Care Resource & Referral Program**  
<http://www.chs-ca.org/child-care/ccrrp/>.

**Child Care Assistance Programs** (subsidized care)  
<http://www.chs-ca.org/child-care/ccap/>.

## HEALTH AND COUNSELING SERVICES

### Student Health and Counseling Services (SHCS)

Services are provided at two primary locations: Student Health and Wellness Center and 219 North Hall.  
Make an appointment: 530-752-2349  
General information: 530-752-2300  
<http://shcs.ucdavis.edu>

*What medical services are available on campus if I get sick or injured?*

Student Health and Counseling Services (SHCS) provides wellness resources and cost-sensitive medical care that is tailored to the unique and diverse needs of students at UC Davis. All registered students are assigned a primary care provider (PCP) who will coordinate their wellness care and treatment needs. SHCS staff include physicians, nurse practitioners, registered nurses, physical therapists, dietitians and health educators. Pharmacy, lab, and x-ray services are also available. Medical care is provided at the Student Health and Wellness Center, conveniently located on the west side of campus. Services are available to all registered students regardless of insurance coverage. When the Student Health and Wellness Center is closed, students can speak with an after-hours advice nurse at 530-752-2349.

**What mental health services are available for students?**

SHCS offers a variety of resources to help students reach academic and personal goals while at UC Davis. SHCS mental health providers are a multicultural and educationally diverse group of experienced mental health professionals, doctoral interns and postdoctoral residents. They provide short-term counseling at no cost to registered UC Davis students. Counseling Services, including initial consultations, individual and group therapy, and workshops are provided in both 219 North Hall and the Student Health and Wellness Center. When Counseling Services is closed, students may call 530-752-2349 and follow the prompts to speak with a mental health help-line provider.

**What if I have a hold on my registration because I have to submit my immunization status for Hepatitis B?**

The state requires that all first-time enrollees age 18 or younger provide a statement of immunization status for the Hepatitis B virus. Students who have not completed this requirement may have a hold placed on their registration, which may affect their ability to register for classes. Students can submit their information or request more time to complete this requirement by using the Hepatitis B Immunity Statement through the MyAdmissions website.

**Are there charges for medical services?**

Primary care, urgent care and specialty medical services (including psychiatry) have a small fee. Counseling services, advice nurse services and most health promotion resources are free. In general, a primary care visit costs \$15 and both urgent care and specialty care visits cost \$20, with additional fees for treatment supplies and medications as needed. All SHCS charges are billed directly to your student account each month. The amount can be viewed and paid using MyBill; however, detailed information about your visit is not viewable through MyBill. Detailed information can be found by logging into Health-e-Messaging, which is a secure system accessible only through your student login. More information about services, costs and billing is available on the SHCS website.

## **Student Health Insurance**

**What is the UC Student Health Insurance Plan (UC SHIP) and how do I enroll?**

The University of California (UC) requires that all students have health insurance. To ensure this requirement is met, all UC students are automatically enrolled in UC SHIP and fees for coverage are charged to your student account each term. UC SHIP includes medical, dental and vision benefits. Students with comparable health insurance can apply for a UC SHIP waiver. More information is available at <http://shcs.ucdavis.edu/insurance>.

**I already have a comparable health insurance plan. How do I waive out of UC SHIP?**

Students may apply for a student health insurance waiver at the SHCS website or may visit the SHCS Insurance Office at the Student Health and Wellness Center.

**Do I need to submit a student health insurance waiver application each quarter?**

No, student health insurance must be waived at the beginning of each academic year; however, an approved waiver is good for the duration of that academic year. Students who have waived UC SHIP and later need health insurance coverage may visit the SHCS Insurance Office to enroll at any time.

**Are Student Health and Counseling Services fees different if I am not enrolled in UC SHIP?**

No, all students have the same level of access to SHCS medical services and pay the same rates for care regardless of insurance coverage or carrier. However, when SHCS provides Affordable Care Act approved prevention and wellness services (immunizations, screening, contraception) to UC SHIP enrollees, UC SHIP covers SHCS fees. Most important, UC SHIP covers healthcare services not available at SHCS and only available off campus; e.g., emergency room visits, surgical care, MRIs, subspecialist care. More information is available on the SHCS website.

## **SHCS Counseling Services**

219 North Hall  
530-752-0871; Appointments: 530-752-2349  
<http://shcs.ucdavis.edu/>

SHCS Counseling Services offers short term counseling services to all registered students with liaison to off campus community resources. Students often seek individual or group counseling for issues such as depression, anxiety, stress, relationships, isolation, academic issues, life stressors, family problems, cultural issues, and many others. Additionally, staff can assist with educational concerns such as coping with university life, academic performance, test anxiety and reentry adjustment.

To make a counseling appointment, you can either make an appointment in-person at 219 North Hall or call 530-752-2349 during normal hours of operation and speak with one of our appointment desk staff.

- Be sure to have your class and work schedule with you before calling.
- Please check in 15 minutes prior to your scheduled appointment time.
- Registration stations are located in each waiting area.
- If you are late for your scheduled appointment time, you may be asked to re-schedule. Please keep this in mind when scheduling your appointment.
- If you cannot make your appointment, please call our appointment cancellation message line at 530-752-8821 to cancel your appointment.

**For 24-Hour Consultation.** After normal hours of operation call SHCS Counseling Services at 530-752-0871 and follow the prompts to reach a mental health counselor (press 55).

Students, faculty or staff who are concerned about a student or desire consultation or assistance in making a referral are encouraged to contact SHCS Counseling Services at 530-752-2349. Parents who are concerned about their UC Davis student's emotional reactions or behavior can also call to discuss their concerns.

## Mind Spa

A service of UC Davis Student Health and Counseling Services  
132 North Hall and Student Health and Wellness Center  
<http://shcs.ucdavis.edu/services/mindspa.html>

The Mind Spa is a great place on campus to relax and recharge or de-stress before that big exam. Resources are free to students and include a biofeedback program that provides you with essential skills for controlling your body's stress levels, massaging recliners, a conquering insomnia program, a mindful relaxation space to listen to guided meditation and relaxation audio files, light therapy and yoga sessions.

The Mind Spa frequently partners with campus organizations to offer events that focus on reducing the stigma around mental health, increasing awareness about wellness resources and providing stress-reducing activities.

The Mind Spa Wellness Ambassador program is a professionally supervised mental health program. The program's volunteer student wellness ambassadors and coordinators offer individualized peer-advocacy services and workshops that help students acquire a better understanding of campus mental health resources and the self-help skills that improve emotional wellbeing.

The Mind Spa has two locations on campus, 132 North Hall and on the second floor of the Student Health and Wellness Center. Both locations offer a safe and comfortable environment for students. No appointment is necessary and services are offered on a drop-in basis Monday–Friday, 9:00 a.m.–4:00 p.m. (PT) during fall, winter and spring quarters. The Mind Spa is closed during the summer and quarter breaks.

## Health Education and Promotion

**A Department of Student Health and Counseling Services**  
UC Davis Student Health and Wellness Center  
530-752-9652; <http://shcs.ucdavis.edu/hep>

Health Education and Promotion (HEP) helps students stay healthy, thrive and enhance their academic and personal success through the creation of health-promoting campus and community environments and student-centered health education. HEP focuses on promotion of healthy eating, physical activity, sexual health, alcohol, tobacco, other drug risk reduction, wellness, sleep, and other wellness issues.

**Anonymous HIV Counseling and Antibody Testing Program.** In partnership with the LGBTQIA Resource Center, HEP facilitates anonymous HIV counseling and antibody testing to registered UC Davis students. Free, oral, rapid testing is available weekly during the academic year at the LGBTQIA Resource Center; for more information, see <http://shcs.ucdavis.edu/services/hiv-testing.html>.

Sexual health services also include the "Love Lab" mobile cart offering safer sex supplies and educational information at no charge to students. More sexual health resources can be found at <http://shcs.ucdavis.edu/hep/sh/index.html>.

**Alcohol, Tobacco and Other Drug (ATOD) Risk Reduction** oversees the Safe Party Initiative and provides educational programs and implements environmental management strategies to reduce unwanted negative consequence resulting from the use of alcohol. For more information, see <http://safeparty.ucdavis.edu>.

**UC Davis Farmers Market 530-752-9652.** HEP is one of several co-sponsors of the campus farmers market offered during fall and spring quarters. Fresh fruits, vegetables, nuts, and flowers are available. For more information, see <http://farmersmarket.ucdavis.edu/>.

**Wellness Portal.** The online portal assists students, staff and faculty in locating resources related to the various aspects of wellness. This "one stop shop" for wellness includes campus resources, as well those in the City of Davis and the larger Web community; see <http://mywellness.ucdavis.edu>.

**Outreach Presentations 530-752-9652.** Peer Health Educators and professional staff are available to facilitate small and large group presentations and workshops for residence halls, fraternities, sororities and other student organizations. For a complete list of programs offered or to schedule a program, see <http://shcs.ucdavis.edu/hep/presentations.html>.

**Student Positions.** HEP offers paid and volunteer opportunities for students. The positions provide an excellent opportunity to develop skills in: conducting group presentations, changing health-related policies and influencing media. Transcript notation and/or academic credit are available. All positions require a three quarter commitment. See our website beginning winter quarter regarding student opportunities at <http://shcs.ucdavis.edu/about/employment-hep.html>.

## EXTRACURRICULAR ACTIVITIES

By participating in extracurricular activities at UC Davis, you can benefit from numerous opportunities for educational, personal, cultural and social enrichment. In general, registered and enrolled UC Davis students may participate in extracurricular activities sponsored by the campus. Some activities have additional eligibility criteria, so you are encouraged to inquire about the particular requirements of the groups and programs that interest you.

## CAMPUS RECREATION AND UNIONS

### The Department of Campus Recreation and Unions

The Activities and Recreation Center (ARC)  
232 ARC, One Shields Ave, Davis CA 95616  
530-752-1730; <http://cru.ucdavis.edu>

The UC Davis Department of Campus Recreation and Unions manages the following programs and facilities, which serve the campus by creating opportunities to build community, cultivate friendships and enhance learning.

These programs complement the academic mission of the university and enhance the quality of life for the campus.

The following facilities are managed through the Department of Campus Recreation and Unions:

- Activities and Recreation Center (ARC)
- Craft Center
- Equestrian Center
- Hickey Pool
- Memorial Union
- Memorial Union Games Area
- Outdoor Adventures Center
- Pavilion

- Putah Creek Lodge
- Recreation Fields
- Recreation Pool
- UCDHS Student Fitness Center

The following programs are offered through the Department of Campus Recreation and Unions:

## Campus Recreation and Unions Memberships, Informal Recreation and Fitness & Wellness Programs

Activities and Recreation Center (ARC)  
530-752-1730; <http://cru.ucdavis.edu/arc>;  
<http://cru.ucdavis.edu/fitnessandwellness>

The ARC, the region's premier full-service fitness facility, offers a variety of features, such as four indoor basketball courts (convertible to volleyball and badminton), eight four-wall courts, a multi-use activity center (MAC), an indoor track, large fitness/weight areas, and an indoor climbing wall. In addition, the complex includes group exercise, dance and martial arts studios, a student lounge with computer terminals and wireless access points, a large ballroom, a small conferencing center, a full-service Starbucks, and a Pro Shop. Currently enrolled UC Davis students may use the ARC at no additional cost. Programming within the ARC—including group exercise, dance classes, martial arts classes, personal training, rock climbing, and intramural sports—may require an additional fee. UC Davis faculty, staff, alumni, and retirees may enjoy the ARC by purchasing an affordable membership. For more information on the ARC, see <http://cru.ucdavis.edu>.

## Cal Aggie Marching Band

Activities and Recreation Center (ARC)  
530-752-6569; <http://cru.ucdavis.edu/calaggiemarchingband>

The California Aggie Marching Band is a student-run volunteer organization dedicated to providing support for UC Davis and is committed to student development and camaraderie through excellence in musical entertainment and the embodiment of Aggie Pride. Known by many as the "Band Uh!," the band celebrates campus traditions and entertains participants and spectators at athletic, campus and community events.

## Aquatics

### Recreation Pool

Corner of La Rue Road and Hutchison Drive  
530-752-1730; <http://cru.ucdavis.edu/aquatics>

Located near the ARC, the Recreation Pool's distinctive shape allows for a wide variety of water activities. The pool includes lap lanes, diving boards, an island, a large grass area for sunbathing and a shallow wading pool. Picnic tables and a barbecue are also available on a first-come, first-served basis. The Rec Pool also offers swim lessons for all ages. The pool opens for the season in mid-April and closes on the last day in September.

### Hickey Pool

Hickey Gymnasium Building courtyard; central campus  
530-752-1730; <http://cru.ucdavis.edu/aquatics>

Hickey Pool is a seven-lane, 33-and-1/3 yard pool with a movable bulkhead previously used as the competitive pool on campus, housing six intercollegiate athletic teams, as well as physical edu-

cation classes, intramural sports, sport clubs, and University Extension classes. Today, the heated Hickey Pool is available to students and ARC members for lap swimming hours during the year.

## Craft Center

South Silo  
530-752-1475/1730; <http://cru.ucdavis.edu/craftcenter>

The Craft Center is an ideal place to channel your creative energy, offering more than 90 affordable and fun classes each quarter. The center's 10 well-equipped studios are available for informal use on a daily or quarterly basis. Workshops and classes are offered each quarter in woodworking, weaving, jewelry making, art and graphics, computer imaging, ceramics, photography, silk-screen printing, welding, leather working, stained glass and other crafts.

## Equestrian Programs

Garrod Drive; southwest of Veterinary Medical Teaching Hospital  
530-752-2372; <http://cru.ucdavis.edu/equestriancenter>

The 25-acre Equestrian Center is open year round, offering horse riding instruction in both English and Western riding. Group lessons are available for beginning through advanced levels, along with training in horse care and stable management. The Equestrian Center sponsors clinics, horse shows, and special events. The center is also home to the UC Davis Equestrian Club.

## Intramural Sports and Sport Clubs

Activities and Recreation Center (ARC)  
530-752-1730;  
<http://cru.ucdavis.edu/intramuralsports>  
<http://cru.ucdavis.edu/content.cfm?contentID=79>

Campus Recreation and Unions' Competitive Sports program provides UC Davis students, faculty and staff the opportunity to participate in a variety of competitive and recreational sports on campus.

The Intramural Sports program offers numerous sports leagues, tournaments, and events throughout the year, including soccer, badminton, softball, flag football, ultimate, and volleyball. The Sport Club program promotes student participation in a wide variety of athletic activities, provides opportunity for student competition at various levels of play, and fosters the development of student leadership. Sport clubs are comprised of students, faculty and staff of the university.

## Memorial Union (MU)

Guest Services Desk  
530-752-2222; <http://cru.ucdavis.edu/memorialunion>

The MU Complex is a central gathering place for all UC Davis Students. It houses a variety of student services and activities, including the ASUCD student government offices, Center for Student Involvement (CSI) Office, Coffee House, UC Davis Store, Games Area, Transfer Reentry Veterans Center, and the suite of MUII meeting/conference facilities. In addition, the MU lounge spaces serve as a comfortable space for studying and getting together with friends.

## Memorial Union Games Area

Games Area; located below the UC Davis Bookstore 530-752-2580; 530-752-1730; <http://cru.ucdavis.edu/gamesarea>  
The Games Area features bowling lanes, billiards, video game consoles, lounge space and storage lockers. Bowling leagues, classes, clinics and tournaments are offered for all ages from beginning through advanced skill levels. The facility is fully accessible to those with disabilities.

## Outdoor Adventures

Located between the Colleges at La Rue Apartments and the Recreation Pool on La Rue and Hutchison Barn; corner of California and Hutchison 530-752-1995; <http://cru.ucdavis.edu/outdooradventures>

Outdoor Adventures will help you develop your outdoor skills and plan your outdoor excursion. You can rent professional quality equipment and arrange custom-designed trips. An up-to-date library contains topographic maps, trail guides and other materials. Outdoor Adventures offers classes, excursions and clinics for backpacking, rock-climbing, whitewater rafting, sea kayaking, mountaineering, cross-country skiing and more. Outdoor Adventurers also offers health care training classes in wilderness first aid, EMT, CPR, and AED and swift water rescue.

## The Buzz

530-752-2027; <http://studentlife.ucdavis.edu/thebuzz>

The campus kicks off the school year on the first Friday of Fall Quarter with The Buzz, a festival filling the entire Quad. Part of Fall Welcome week, The Buzz welcomes new and returning students to campus with a night of live entertainment, games, prizes, free food and campus resources.

## UC DAVIS STORES

530-752-6846; <http://ucdavisstores.com>

The UC Davis Stores are full-service stores owned and operated by the university. They provide goods and services for the campus community to support the university's academic mission, as well as UC Davis-branded apparel, general merchandise and gifts.

## SILO UNION

The Silo Union houses food services, study space and the campus pub. Silo food services include both quick, popular and familiar fast food, such as Taco Bell, Carl's Jr. and Pizza Hut, as well as a large selection of fresh and healthy prepared items, Starbucks Coffee and a custom sandwich line. Located in the South Silo are the African Diaspora Center for Student Success, Craft Center, and Graduate Student Association.

## THE UC DAVIS ACTIVITIES AND RECREATION CENTER (ARC)

530-752-1730; <http://cru.ucdavis.edu/arc>

The Activities and Recreation Center (ARC) hosts many recreational activities for the UC Davis community. The building itself has four indoor basketball courts (convertible to volleyball and badminton), eight four-wall courts, a multi-use activity center (MAC), an indoor track, large fitness/weight areas and an indoor climbing wall. In addition, the complex includes group exercise,

dance and martial arts studios, student lounges with computer terminals and wireless access points, a large ballroom, a small conferencing center, a full-service Starbucks, and a Pro Shop. The building is separated into three distinct areas: the controlled area, the conference and event area and The Pavilion. All fitness related activities comprise the controlled area that is open to all students with a valid UC Davis identification card. Faculty, staff, alumni, retirees and others may purchase membership to the ARC for an annual or monthly fee. The conference area is accessible through the main entrance to ARC or through a smaller corridor on the Northeast side of the building that leads into the conferencing area.

The UC Davis Pavilion, formerly Recreation Hall, hosts athletic competitions, concerts, trade shows, conferences and miscellaneous spectator events each year. The Pavilion houses approximately 149,000 square feet of space and encompasses the home court of the UC Davis Aggies volleyball team, gymnastics team, and men's and women's basketball teams. The Pavilion hours and access vary depending upon the event being hosted. More information regarding the ARC can be found at the ARC website, calling the number listed or by stopping by the ARC member services desk located in the lobby area.

## UC DAVIS INTRAMURAL SPORTS AND SPORT CLUBS

530-752-1730;  
<http://cru.ucdavis.edu/intramuralsports>  
<http://cru.ucdavis.edu/content.cfm?contentID=79>

The UC Davis Intramural Sports and Sport Clubs programs offer many different competitive sports activities ranging from the traditional team sports like football, basketball and soccer to individual or dual sports such as racquetball, table tennis and golf. Additionally, we offer some non-traditional activities like inner tube water polo, floor hockey and dodgeball. All UC Davis students are eligible to participate in intramural activities. Our Sport Clubs program offers many opportunities for intercollegiate competition. Each club is formed, developed, directed and controlled by its members within University guidelines. Stop by the office or see our website for a complete list of clubs.

## INTERCOLLEGIATE ATHLETICS

264 Hickey Gymnasium  
530-752-1111

The Intercollegiate Athletics (ICA) program is an integral part of the total educational process and a vital part of the human development of young men and women.

Intercollegiate athletics attempts to strengthen the integration of its objectives with the academic and developmental objectives of the university while maintaining a program of academic and athletic excellence; where students are supported in their efforts to reach the highest level of performance by providing them with adequate to outstanding facilities, quality coaching, appropriate support of health and wellness needs, and competitive opportunities with students from similar institutions.

Currently, the program consists of varsity teams in 14 women's and 9 men's sports. UC Davis is an active member of Division I. A majority of the varsity sports compete in the Big West Conference. Approximately 600 students compete on varsity teams each year.

## ARTS

Whether you want to participate, be entertained or be inspired, an abundance of musical, theater, art, design and dance offerings take place on campus all year long.

### **Robert and Margrit Mondavi Center for the Performing Arts | UC Davis**

Mondavi Center Administration Building  
530-754-5000; <http://www.mondaviarts.org>

The Mondavi Center is the premier performance venue in Northern California and the regional destination for the best in music, dance, distinguished speakers, jazz, theater, and world music.

UC Davis students receive 50% off every Mondavi Center Presents event ticket, while UC Davis Staff and Faculty enjoy 10% off their ticket purchases. Tickets are available through the Mondavi Center Ticket Office at 530-754-2787 or at <http://www.mondaviarts.org>.

## Music

Department of Music  
530-752-5537; <http://music.ucdavis.edu>

The Department of Music sponsors the UC Davis Symphony Orchestra, the University Chorus, Early Music Ensemble, Concert Band and Wind Ensemble, Jazz Band, several world music ensembles, and chamber music groups. Music majors and other interested students can receive credit for participating in these groups, which perform at concerts and recitals open to the university community. The department sponsors artists-in-residence who give concerts, recitals and lectures. Free noon concerts featuring individual performers and ensembles—both professional musicians and music students—are a favorite weekly event during the school year. The Empyrean Ensemble is in residence on campus. The Department of Music sponsors more than 100 public concerts each year.

## Theatre and Dance

Department of Theatre and Dance  
Wright Hall; <http://arts.ucdavis.edu/theatre-dance>

### **The Theatre and Dance Major Program**

The Department of Theatre and Dance facilities are complemented by an excellent faculty and production staff, as well as the Granada-Artist-in-Residence program, which brings a major director, choreographer or playwright to the department three times a year. The faculty includes a group of distinguished scholars in history, theory and criticism whose research and teaching focuses on social engagement and activism. Students, both majors and non-majors, can audition for department productions or apply to the Institute for Exploration in Theatre, Dance and Performance to do related work.

The A.B. degree in Theatre and Dance provides students with an appreciation for an understanding of performance and its role in culture and society. The program offers a strong foundation in all aspects of drama, theatre, dance performance, and production. Students build significant skills in specific areas (including acting, directing, choreography, design, playwriting and devising, production skills and management) as well as achieving a broad knowledge of theatre and dance.

**Productions and Facilities.** Each year's schedule includes opportunities to work with professional directors and choreographers in three Granada Artists-in-Residence productions; the Main Stage Dance/Theatre Productions; Film Festival at UC Davis; projects generated through the Institute for Exploration in Theatre, Dance and Performance; and workshops and performance projects developed by M.F.A and Ph.D. students. These productions are staged in our proscenium (Main), thrust (Wyatt), black box (Arena), performance studio (Della Davidson Performance Studio) and intimate laboratory theatre (Lab A), as well as in the Mondavi Center's Vanderhoef Studio Theatre and Jackson Hall. These productions are part of the academic program of the department and serve an important purpose in the study of theatre and dance. Participation is open to all students.

## Art Galleries

### **Manetti Shrem Museum**

530-752-8500; <http://manettishremmuseum.ucdavis.edu>

UC Davis' new art museum, the Jan Shrem and Maria Manetti Shrem Museum of Art, will open on November 13, 2016. The 60-year legacy of experimentation lives on at the Manetti Shrem Museum. Grounded in the work of UC Davis' world-renowned first generation art faculty, the museum will be a hub of creative practice for today's thinkers, makers and innovators, now and for generations to come. When the museum opens, make plans to stop by on your lunch break or between classes and refresh yourself with art and ideas. The museum will be open to all for free.

### **UC Davis Design Museum**

124 Cruess Hall 530-752-6150;  
<http://designmuseum.ucdavis.edu>

The UC Davis Design Museum and Collection enhances and supports the teaching and research activities of the Department of Design, exploring how design shapes, improves and makes economically viable the objects, technology and environments we use, inhabit and experience every day. The museum exhibits national and international design-related materials including architecture, fashion, textiles, graphics, new media, product, furniture and lighting, and serves as a laboratory for experimental exhibition design and interpretation.

### **Fine Arts Collection**

Art Building, adjacent to the Nelson Gallery 530-752-8500

The Fine Arts Collection, representing various historical periods and cultures, is the UC Davis campus' major collection of art.

### **Basement Gallery**

Art Building basement

The Basement Gallery is a student-directed gallery that exhibits the artwork of advanced UC Davis art majors. The Basement Gallery is a vital alternative space for seeing important new work and for experiencing interesting and innovative art shows. There are approximately three shows per quarter. For more information, see <http://ucdbasementgallery.com/information/>.

### C.N. Gorman Museum

1316 Hart Hall 530-752-6567; <http://gormanmuseum.ucdavis.edu>  
 Monday-Friday, 12-5 p.m.; Sun: 2-5 p.m. (PT), closed holidays and holiday weekends.

The C.N. Gorman Museum is committed to the creative expressions of Native American artists, and artists of diverse cultures and histories. Changing exhibits feature contemporary artwork in a wide range of media, reflecting the canon in which Indigenous artists are working today. Founded in 1973 by the Department of Native American Studies, the museum is named in honor of retired faculty member, Carl Nelson Gorman, Navajo artist, WWII code-talker, cultural historian, and advocate for Native peoples.

## STUDENT GOVERNMENT

### Associated Students (ASUCD)

Student Government Administrative Office  
 348 Memorial Union 530-752-3632

ASUCD Student Services Office  
 347 Memorial Union 530-752-1990; <http://asucd.ucdavis.edu>

The Associated Students of the University of California, Davis (ASUCD), authorized by the regents and the chancellor, represents all undergraduate students and is responsible for over \$11 million used to enhance the student experience. Graduate and law students also have access to all ASUCD commercial activities. Funds allocated to ASUCD provide for activities and services that make life as a student a little easier, less expensive and/or simply more fun.

ASUCD operates more than 40 activities, including the Unitrans bus system, The *California Aggie* newspaper, the Bike Barn repair services, free legal advice for undergraduate students, Campus Copies, Classical Notes, Project Compost, Cal Aggie Camp, U.S. Post Office and the Coffee House, among others.

The ASUCD-sponsored Experimental College offers a variety of nontraditional classes each quarter for students interested in diversifying their educational experience. The community garden is available to students and non-students alike. Radio KDVS stereo 90.3 FM, the student-run campus radio station, broadcasts at 5,000 watts. Other ASUCD activities include Entertainment Council and the Whole Earth Festival.

Picnic Day, a UC Davis tradition since 1909, is the largest student-run event in the nation. This annual spring open house features more than 100 exhibits and cultural displays, including a parade, a fashion show, sports, sheep dog trials, dachshund races, food, music and dancing.

You can find information about ASUCD programs at <http://asucd.ucdavis.edu>, in the Student Directory, which combines details about ASUCD services and organizations with the ASUCD student telephone directory or by visiting the ASUCD Student Services Office in the Memorial Union.

Allocated funds are budgeted through the ASUCD Senate. Based on a modified form of the U.S. Senate, the ASUCD senate consists of 12 elected senate members and the ASUCD president and vice president. The senate is the policy-making body for ASUCD and supervises all aspects of the association. The ASUCD president is the chief administrative officer and is assisted by the vice president. ASUCD is the liaison for the undergraduate student body and represents the students with other universities, the UC Office of the President and the regents.

The ASUCD Senate is the policy-making body of the student government and are responsible for allocating funds through their annual budget hearings. The Senate consists of 12 members who serve year-long terms with elections held during the fall and winter quarters.

Seven commissions and one committee advise the senate and assist the governing board with its decisions by researching legislation and making recommendations. Commission chairs are ex-officio members of the senate. Each commission also involves itself with various projects that relate to its specific area.

- Academic Affairs advocates students' rights in the area of academics, including dealing with the Academic Senate and with issues such as grading policies, tenure and teacher evaluations. Academic Affairs also sponsors the popular "Last Lecture Series."
- Business and Finance makes recommendations to the Senate on all financial matters and conducts audits on ASUCD commercial units.
- Environmental Policy and Planning addresses all issues and concerns that pertain directly to the environment.
- Ethnic and Cultural Affairs makes recommendations on policies and programs concerning UC Davis' ethnic community, acts as a liaison between on-campus and off-campus bodies affecting ethnic students and their quality of life at the university.
- External Affairs deals with off-campus concerns including the regents, UC Office of the President, and the Davis City Council.
- Internal Affairs recommends policies to improve ASUCD operations and the quality of nonacademic student life on campus.
- The Gender and Sexuality Committee actively promotes awareness of gender and sexuality issues, and prevention of sexual assault through outreach efforts and education programs.
- The Elections Committee ensures the fair administration of ASUCD online elections. The Committee coordinates candidate and ballot measure forums and provides unbiased election information.

The ASUCD President is the chief administrative officer and is assisted by the Vice President. ASUCD is the liaison for the undergraduate student body and represents the students with other universities, the community, the UC Office of the President and the regents.

The judicial branch consists of the ASUCD Student Court. The nine member court has the responsibility to carry out all rules designated to it in the ASUCD Constitution and its bylaws. ASUCD Court Members serve "life" terms, lasting four years or their entire academic career at UC Davis.

### UC Davis Administrative Advisory Committees

Office of the Chancellor; <http://aac.ucdavis.edu/>

The Office of the Chancellor encourages students to participate in issues affecting the campus community by applying for membership on an administrative advisory committee. Each committee focuses on a specific area, such as child and family care, disability issues, diversity, or student services and fees. The committees respond to requests for advice, identify needs or concerns within the charge of the committee and recommend action to the campus administration.

Applications are accepted each winter for service on committees the next academic year. Undergraduate students should contact ASUCD Student Advocacy. Graduate students should contact the Graduate Student Association.

## Graduate Student Association (GSA)

Graduate Student Association (GSA)  
Room 253, South Silo  
530-752-6108; Fax 530-752-5158; [gsa@ucdavis.edu](mailto:gsa@ucdavis.edu); <http://gsa.ucdavis.edu>

The Graduate Student Association (GSA) is the officially recognized student government for UC Davis graduate students. GSA provides a forum for addressing the concerns of graduate students and promotes communication with campus administrators. GSA also serves as an advocate at all levels of the university on behalf of graduate students. Funded by graduate student fees, GSA provides services to all academic graduate students and to professional students in both the Graduate School of Management and the School of Education. Services include new student orientation, travel awards, announcements and assorted social events. Other professional students are eligible to join GSA by paying a fee.

GSA General Assembly representatives are usually designated by other students in their department or graduate group but can be selected through other processes determined by their department or graduate group. General Assembly meetings are held once a month and are open to all graduate and professional students. Each year the General Assembly elects the members of the Executive Council, who serve in a variety of positions to carry out the policies and functions of the organization.

## CENTER FOR STUDENT INVOLVEMENT (CSI)

442 Memorial Union  
530-752-2027; <http://csi.ucdavis.edu>

Research shows that college students engaged in campus life through activities and organizations feel more connected to campus, are more satisfied with their college experience and are more likely to graduate than non-involved students. The Center for Student Involvement (CSI) provides opportunities for campus engagement, co-curricular learning, leadership development, professional and personal growth, service, cross-cultural interaction and awareness, collaboration and community building by supporting a wide variety of student organizations and campus programs.

## Student Organizations

Over 750 student organizations are registered and supported at UC Davis through Center for Student Involvement. Organizations range in focus, with categories including: academic, professional, cultural, political, religious, service, ethnic, international, social, recreational, performing arts, fraternity/sorority and advocacy. Student organizations provide the entire campus community with

important educational experiences and opportunities for students to make friends, build community and find their home at UC Davis. Visit the CSI website to browse currently registered student organizations and learn more about how to get involved!

## Involvement Fair

530-752-2027; <http://csi.ucdavis.edu>

The annual Involvement Fair is an ideal opportunity to learn how to get involved, meet new people, try new activities and find a place to belong. Over 200 student organizations and campus programs provide information and hope to recruit new members like you.

## Sorority and Fraternity Life

530-752-4606 or 752-3828; <http://osfl.ucdavis.edu>

Affiliation with fraternities and sororities provides a connection to campus through friendships, a support group for academic and personal growth, leadership opportunities and involvement in campus activities and traditions.

## Student Retention and Recruitment Center

1100 Student Community Center  
530-754-6836; <http://srrc.ucdavis.edu>

The Student Recruitment and Retention Center (SRRC) offers student-run and student-initiated programs that foster holistic academic and personal development, raise political and cultural awareness. We aim to empower students to act as dynamic leaders in their communities. SRRC programs include peer mentoring, academic/study support, leadership development, transfer student support, community building, self-awareness, K-12 enrichment, transfer outreach/support and funding for services and activities complementary to the SRRC's mission.

## Cal Aggie Student Alumni Association (SAA)

Walter A. Buehler Alumni Center  
530-752-0286; <https://saa.ucdavis.edu>

Student Alumni Association (SAA) follows the mission of "advancing student-alumni relations" by building community through networking events, providing student leadership opportunities, upholding Aggie traditions, and offering benefits and services, such as 10% off textbooks from the UC Davis Bookstore. Programs include Aggie Diner, Interview with an Aggie, Take an Aggie to Work, Pajamarino, and community service opportunities. You may join SAA at any time during the academic year. SAA membership fees are applied to your Cal Aggie Alumni Association life membership after graduation. For more information about joining SAA, see <https://saa.ucdavis.edu>.

## **UNIVERSITY POLICY ON NONDISCRIMINATION, SEXUAL HARASSMENT/SEXUAL ASSAULT, DISABILITY ACCOMMODATIONS, STUDENT RECORDS AND PRIVACY**

**Nondiscrimination.** The University of California, Davis, does not discriminate on the basis of race, color, national origin, religion, sex, gender identity, pregnancy (including pregnancy, childbirth, and medical conditions related to pregnancy or childbirth), physical or mental disability, age, medical condition (cancer related or genetic characteristics), ancestry, marital status, citizenship, sexual orientation, or service in the uniformed services (includes membership, application for membership, performance of service, application for service, or obligation for service in the uniformed services), status as a Vietnam-era veteran or special disabled veteran, in accordance with all applicable state and federal laws, and with University policy. As required by Title IX, the University of California, Davis, does not discriminate on the basis of sex in its educational programs, admissions, employment, or other activities.

Information about campus policies and procedures for reporting and addressing incidents of alleged harassment, discrimination and incidents of hate and bias may be found at <http://hdapp.ucdavis.edu>.

Inquiries related to Title IX and to Section 34 CFR § 106.9 may be referred to the Title IX Coordinator:

Wendi Delmendo  
 Mrak Hall, Fourth Floor  
 One Shields Ave, Davis, CA 95616  
 530-752-9466  
[wjdelmendo@ucdavis.edu](mailto:wjdelmendo@ucdavis.edu)

Inquiries related to Title IX at the UC Davis Medical Center may also be referred to the Deputy Title IX Coordinator for the UC Davis Medical Center:

Cindy Oropeza  
 2730 Stockton Blvd.  
 Ticon III Rm 2200  
 Sacramento, CA 95817  
 916-734-8104  
[cgoropeza@ucdavis.edu](mailto:cgoropeza@ucdavis.edu)

Inquiries may also be directed to the:

Assistant Secretary for Civil Rights of the Department of Education  
 San Francisco Office  
 U.S. Department of Education  
 50 Beale Street, Suite 7200  
 San Francisco, CA 94105-1813  
 415-486-5555  
[OCR.SanFrancisco@ed.gov](mailto:OCR.SanFrancisco@ed.gov)

**Sexual Harassment/Sexual Assault.** The University of California is committed to creating and maintaining a community free of sexual violence and sexual harassment. Sexual violence and sexual harassment violate both law and University policy. Any member of the University community may report conduct that may constitute sexual violence, sexual harassment, retaliation, and other prohibited behavior (“Prohibited Conduct”). The University will respond promptly and equitably to such reports, and will take appropriate

action to stop, prevent, and remedy the Prohibited Conduct, and when necessary, to discipline the Respondent.

In addition to sexual harassment, discrimination based on sex, gender, gender identity, gender expression, sex- or gender-stereotyping, and sexual orientation violates law and other University policies. Such discrimination may also contribute to the creation of a hostile work or academic environment based on sex and thus constitute or contribute to sexual harassment. Harassment that may not be sexual, but still contributes to a hostile work or academic environment, may also violate the University's other non-discrimination policies.

Campus policies and procedures for reporting and addressing sexual violence and sexual harassment may be found at <http://sexualviolence.ucdavis.edu>.

**Accommodations for Students with Disabilities.** Students with documented disabilities may be entitled to reasonable accommodations to gain access to the University's academic programs. More information about academic accommodations can be obtained by contacting the Student Disability Center 530-752-3184 or <http://sdc.ucdavis.edu>. Questions or concerns about accommodations that are not related to academic programs should be directed to the UC Davis Compliance Director (ADA Officer) 530-752-9466.

**Disclosures from Student Records.** Students have the right to review records that relate to themselves in their capacity as students and to request corrections of records believed to be inaccurate. Most disclosures from student records to outside parties require prior consent from the student.

Under the Family Educational Rights and Privacy Act of 1974 and University and campus policies, UC Davis students have the following rights:

- A. To review their own student records within 45 days after the student submits a written request for access to the University Registrar or other department in possession of the records. That office will make arrangements for access and notify the student when and where the records may be reviewed. If the records requested are in a different office, the request will be redirected and the student notified. The campus maintains several types of student records in various locations. Questions about how to obtain records should be referred to the Office of Student Support and Judicial Affairs at 530-752-1128.
- B. To request amendment of their own student records if they believe the records are inaccurate or misleading, students should submit a written request to the office that maintains the records specifying the portion of the record the student wants changed and why it is believed to be inaccurate or misleading. That office has 45 days to determine whether the record should be changed and notify the student of the decision. If a student wishes to contest this decision, the student should contact the Office of Student Support and Judicial Affairs.
- C. To restrict the disclosure of personally identifiable information contained in student records, except when law and policy permit disclosure without consent. Examples of circumstances in which the student's consent is not required for disclosure of student records include the following:
  - Disclosure of “directory” or “public” information including the student's name; local and/or permanent address(es); email addresses and telephone number(s); dates of atten-

dance; major field(s) of study [major, minor, concentration, specialization, and similar designations]; grade level; enrollment status (undergraduate/graduate, full time or part time, number of enrolled course units) degrees and honors received; most recent previous educational institution attended; participation in officially recognized activities, including Intercollegiate Athletics (ICA), and the name, weight and height of participants on ICA teams.

- To prevent disclosures of telephone numbers and/or addresses, students must submit a Directory Confidential Update Form to the Office of the University Registrar. To prevent disclosure of their email address, students must follow instructions at <https://computingaccounts.ucdavis.edu/>, and select the *Change your directory information* option.
- Students may designate all information about themselves as confidential and withhold it from public disclosure by filing a request with the Office of the University Registrar in 3100 Dutton Hall. If all information is designated confidential, UC Davis cannot respond to requests for verification of student status or degrees, make public any honors, or include the student's name in the commencement program without the student's specific written consent.
- Disclosure to campus officials (for example faculty, staff, student employees, or those under contract with the University) having a legitimate educational interest in the records. Legitimate educational interest means the information is relevant and necessary to a task or determination that is (a) an employment responsibility or an assigned subject matter for the inquirer and/or related to (b) the inquirer's participation in the student's education; (c) the discipline of a student; or (d) providing a service or benefit related to a student or student's family (such as health care, counseling, job placement, or financial aid).
- Disclosure of appropriate student records, including academic records, disciplinary records, and other student records, to other educational institutions in which a student seeks or intends to enroll, or is currently enrolled, so long as the disclosure is for purposes related to the student's enrollment or transfer

For more information, see UC Davis Policy and Procedure Manual Section 320-21 at <http://manuals.ucdavis.edu/ppm/320/320-21.pdf>.

Contact the Office of Student Support and Judicial Affairs 530-752-1128 for questions about these rights and requirements. Student complaints regarding alleged violations of privacy rights should be submitted to Student Judicial Affairs.

Students may also contact the U.S. Department of Education concerning alleged violations of these requirements, addressed to the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC. 20202-4605. See Section 99.63 at <http://www.ed.gov/policy/gen/guid/fpcos/ferpa/index.html>.

**Social Security Numbers.** A student's Social Security number is used to verify personal identity in the UC Davis Student Records System. Students are mandated to disclose their social security number to UC Davis. In compliance with state law, Social security numbers are confidential and are not used as student identifiers.

**Release of Registration Material and Grades.** In compliance with student privacy rights under federal and state law and University policy, the Office of the University Registrar may not release a student's grades, registration material, and/or identification card to anyone other than the student without specific written authorization signed by the student. The person to whom the information, material, or card is released must be designated by name and must present proof of identity. The signed authorization is kept in the "Record of Disclosures" in the student's file.

## CAMPUS SECURITY, CRIME AWARENESS, AND ALCOHOL AND DRUG ABUSE PREVENTION

In accordance with federal law, UC Davis annually provides makes available to students and employees information regarding campus security, crime statistics, and alcohol and drug abuse prevention, pursuant to the Student Right to Know and Campus Security Act of 1990 and the Drug Free Schools Act of 1989. The UC Davis Police and Campus Administration make continual efforts to reduce crime on campus. A well-informed community is better served and safer.

For more information on:

- Security and crime awareness, see <http://police.ucdavis.edu/index.html>.
- Alcohol and Drug Abuse Prevention, see <https://shcs.ucdavis.edu/>.
- Victim support services, see <http://care.ucdavis.edu/>.

**ACADEMIC ADVISING AND STUDENT SERVICES**

## ACADEMIC ADVISING

UC Davis offers many different types of academic advising to help you get the most from your education. College advisers can assist you in meeting degree requirements and taking maximum advantage of the resources available at the university. A conference at least once a quarter with your faculty or staff adviser is especially desirable during your first year and during your final quarters preceding graduation. A meeting with a faculty or staff adviser is required each year for College of Engineering and College of Letters and Science students. Matriculating students in their first year at UC Davis in the College of Biological Sciences are required to meet with a staff adviser in the Biology Academic Success Center.

## COLLEGE ADVISING

### College of Agricultural and Environmental Sciences

Office of the Dean  
150 Mrak Hall  
530-752-0108; <http://www.caes.ucdavis.edu>

In the dean's office you will find:

- Staff advisers who can help with university and college rules, regulations and policies and procedures that affect students
- Academic advising; in-depth advice regarding probation/dismissal status, admission to the college, readmission, second baccalaureate options, and limited status enrollment requirements
- Advice and action on petitions
- Other services including college English requirement check, release of holds on registration and final evaluation for graduation

### Associate Dean of Undergraduate Academic Programs

Associate Dean  
150 Mrak Hall  
530-752-0108

The college has an associate dean of undergraduate academic programs and advising staff who welcome the opportunity to become acquainted and to talk with individual students. They can also help you with academic problems if you are placed on probation or subject to dismissal.

**Faculty Advisers/Staff Advisers.** You will be assigned a faculty adviser to help you plan a program that corresponds to your individual educational interests. The master advisers coordinate advising within a major. Staff advisers in the department can advise you on courses, specific requirements of majors and career opportunities. You are strongly urged to consult with your faculty adviser or staff adviser each quarter before selecting your courses.

As educational objectives evolve, you may, in consultation with the master adviser for your major, choose a new faculty adviser whose area of expertise corresponds more directly to your specific objectives.

### ***Undeclared/Exploratory Program (non-degree program)***

150 Mrak Hall  
530-752-0108

Are you unsure what major you really want to pursue? If so, you may want to register in the Undeclared/Exploratory Program. With the help of staff in the dean's office and the major advisers, you can explore specialized options, develop your decision-making abilities and select the major best suited to your needs. For registration purposes, indicate "Undeclared/Exploratory" on your admissions materials. You must declare a major before you complete 90 units; see [Declaration of Major, on page 85](#), in the [Academic Information](#) chapter.

## College of Biological Sciences

Biology Academic Success Center  
1023 Sciences Laboratory Building  
530-752-0410; <http://basc.ucdavis.edu>

The College of Biological Sciences offers complete academic advising services at the Biology Academic Success Center (BASC) for all students working on, or interested in, a major administered by the College. Students who declare or intend to declare majors in Biochemistry and Molecular Biology; Biological Sciences, Cell Biology; Evolution, Ecology and Biodiversity; Genetics and Genomics; Microbiology; Neurobiology, Physiology, and Behavior; Plant Biology; or are Undeclared Life Sciences should meet with their BASC adviser for program planning. At the BASC, academic advisers advise on all major, college and university requirements, policies, and procedures, including PELP, withdrawal, readmission, change of major or college, multiple majors and late actions. The BASC advisers evaluate transfer work, discuss petitions for variance and provide degree checks for graduation purposes.

The BASC is responsible for the academic progress of all students majoring in the college. If you have any problems (personal, medical, financial) that are affecting your academic performance, or if you are on academic probation, we invite you to make an appointment to see your academic adviser in BASC. You may schedule an appointment using the website located above.

Master faculty advisers are also available in the department that houses their major, as listed in the catalog, or at the Biology Academic Success Center.

**Peer Advisers.** Peer advisers are College of Biological students who are pursuing, but have not yet completed, a degree at UC Davis. Students may meet with a peer adviser in the BASC on a daily, drop-in basis.

## College of Engineering

Undergraduate Office  
1050 Kemper Hall  
530-752-1979; <http://engineering.ucdavis.edu>  
<http://www.facebook.com/UCDEngineering>

Our mission is to promote your success. The entire advising group in the College of Engineering—department staff and faculty advisers, student affairs officers in the Undergraduate Office, and peer advisers—are here to help you get the most out of your undergraduate engineering education and prepare for a successful career. Questions about Majors, Courses, Holds, Degree Requirements, Dismissals, or Readmission can be addressed to our advising staff. Adviser contact information can be found at <http://engineering.ucdavis.edu/undergraduate/advisors/>.

**Mandatory Advising.** The College has implemented a mandatory advising system, enforced through myucdavis Schedule Builder. You are required to meet with your program adviser once a year, during a specific quarter, which is determined by the first letter of your last name (A-G = Fall; H-N = Winter; O-Z = Spring). Students are notified of the hold by checking Schedule Builder at the time of registration. If you fail to clear your hold during your specified period, you may be unable to make changes to your current registration and to register for future quarters. For more information on mandatory advising, talk to your program adviser or call the Engineering Undergraduate Office at 530-752-1979.

Students seeking information about graduate school preparation or undergraduate research opportunities in engineering can participate in the Gearing up for Grad School (Winter Quarter) seminar series offered by the College of Engineering. Additional advising about graduate school preparation and undergraduate research opportunities is available from faculty or staff advisers in the program in which you are interested and from the Engineering Undergraduate Office or through the Pre-Graduate School advising unit of the Student Academic Success Center at <http://success.ucdavis.edu/grad-profs/index.html>.

**Peer Advisers.** In addition to staff and faculty advisers, peer advisers—current engineering students—are available to advise you on academic and administrative issues. Peer advisers are available in the Engineering Undergraduate Office in 1050 Kemper Hall as well as in some of the departments.

## College of Letters and Science

Undergraduate Education and Advising Office  
200 Social Sciences and Humanities Building  
530-752-0392; <http://www.ls.ucdavis.edu/advising/>

The Associate Dean and staff in the Undergraduate Education and Advising Office can help you with issues relating to your academic goals and experiences. You can consult the Advising Office on matters such as program planning, selection of a major, exceptions to regulations and academic enrichment opportunities. To find answers to your questions and other useful information, including contact information and how to arrange to meet with an adviser, see <http://www.ls.ucdavis.edu/advising/>.

The Undergraduate Education and Advising Office also provides a number of additional services:

- Determines how your transfer credits from other institutions apply towards completion of university, campus, and college requirements for the bachelor's degree. Applicability of transfer credit toward the major is determined by your major faculty adviser
- Performs degree checks to identify remaining university, campus, and college requirements, and certifies graduation
- Acts on petitions requiring the dean's approval
- Works with students who are in academic difficulty or subject to disqualification on intervention strategies to foster success

**Major Advising.** All students who have selected a major have an assigned adviser within that major department or advising cluster. New students should contact their department or program office during the first quarter of residence on the UC Davis campus to meet with their adviser. If your adviser is not available when you need assistance, or if you wish to consult an adviser in a major program other than the one represented by your assigned adviser, contact the department or program office for help.

Continuing students who have completed three quarters in residence in the college should consult with an adviser at certain important checkpoint stages in their academic careers. You are urged, however, to maintain regular contact with an adviser in your major to avoid program errors that may delay graduation. Seniors should maintain close contact with their advisers to ensure that they are meeting the major requirements.

**Undeclared Advising Program.** Students who have not yet selected a major and are undeclared in one of four emphasis areas within the College of Letters and Science are automatically placed in the Undeclared Advising Program which provides academic advising to lower division undeclared students. Undeclared Advising Program students receive academic advising from the Undergraduate Education and Advising Office. They will help you with your academic planning, ensuring progress toward your educational goals and satisfaction of degree requirements.

In addition to the advising services provided in the Undergraduate Education and Advising Office, L&S Peer Advisers staff Residence Hall Advising Team sites in on-campus residence hall areas and are available to Undeclared Advising Program students living in that residence hall complex. Through individual advising, group sessions, and programs, this team will work with you over your first year at UC Davis. They also can assist you in exploring your options before you select your major. Undeclared Advising Program students are required to meet with Letters and Science Advisers in their first and seconds years as long as you remain Undeclared. Students that declare a major within the 90 unit requirement would then be incorporated into the regular Mandatory Advising Program for the College; see below.

**Mandatory Advising in the College of Letters & Science.** Interacting with an academic adviser regularly in your university career can enhance your college success. Our objective is to build a partnership with you to help you achieve your personal and academic goals. Comprehensive advising in Letters and Science is shared between the Undergraduate Education and Advising Office and the major advisers. We are excited to work with you and are here to help you get the most out of your undergraduate experience and prepare for a successful career. More information on the Mandatory Advising program in the College of Letters & Science can be found at <http://ls.ucdavis.edu/advising/academic-advising/mandatory-adv.html>. The mandatory advising program targets the following checkpoints.

**Advising Checkpoints.** At a minimum, you should consult with your faculty or staff adviser at two, possibly three, critical stages in your academic career:

- Before you complete 90 units of degree credit, including transfer work, you must develop in consultation with your faculty or staff adviser, a proposal for a quarter-by-quarter program of courses showing how you will meet your educational goals and graduation requirements. You must also have declared a major by this time. Filing this plan with your adviser does not preclude subsequent modifications of the plan or a change of major.
- When you complete 90 units of degree credit, including transfer work, and have a declared major you are required to request a Degree Check from the Letters and Science Undergraduate Education and Advising Office and should consult your faculty or staff adviser concerning course selection and satisfaction of requirements in the major.

- Before you complete 200 units of degree credit, including transfer work, you must develop in consultation with your faculty or staff adviser, a firm study plan in the form of a quarter-by-quarter program that will satisfy all remaining degree requirements as expeditiously as possible. This plan will be filed with your adviser. If the plan indicates that you will have to register beyond the 225-unit limit in order to meet degree requirements, you must contact the Undergraduate Education and Advising Office immediately. Exceptions to the 225-unit limit are granted by the dean only rarely. Typically, approval is granted only to allow completion of *minimum* degree requirements.

If you have not met with your faculty or staff adviser before these established checkpoints, a hold may be placed on your registration as a reminder.

**Peer Advisers.** Student-to-student advising is an important part of the university advising services. The College of Letters and Science peer advisers are available in the Undergraduate Education and Advising office, in 200 Social Sciences and Humanities Building, and on a weekly basis in the campus residence halls to talk with students about their academic concerns.

## ACADEMIC ADVISING SERVICES

**Academic Peer Advising** 530-752-1736, places Peer Advisers in over 70 departments, Dean's offices or the Biology Academic Success Center to help students find the answers to their questions about major requirements, courses and university regulations. The Academic Peer Adviser complements faculty advising by providing a student perspective. The Academic Peer Advising program is managed by the Academic & First-Year Transition Services office in Student Housing, and the peer advisers are trained by the major departments to provide information and assistance about graduate schools, career opportunities and college requirements.

## Educational Opportunity Program (EOP)

EOP Building  
530-752-9366; <http://eop.ucdavis.edu>

**Educational Opportunity Program (EOP)** offers an array of services to support students both academically and socially. EOP provides a caring and supportive environment for students to meet with peer and staff advisers for help with course selection, registration procedures, campus processes and resources, choosing a major, social challenges and other general advising questions.

Students interested in learning more about EOP may inquire at [eop@ucdavis.edu](mailto:eop@ucdavis.edu) or see <http://eop.ucdavis.edu>.

Visitors are always welcome and no appointment is necessary.

The EOP Guardian Scholars Program (GSP) provides academic and personal support to former foster youth. The program offers services to help students transition to the University and increase their potential to succeed. The staff adviser serves as the liaison between students and various campus units, providing assistance with academic planning, financial aid, housing and other campus resources. The Guardian Scholars office is located in the EOP Building.

## Student Disability Center

54 Cowell Building  
530-752-3184; <http://sdc.ucdavis.edu>

As part of UC Davis' commitment to providing students with disabilities equal access to educational programs, the Student Disability Center (SDC) facilitates academic accommodations and promotes accessibility of instruction and classrooms. SDC advises students on their rights and responsibilities, as well as strategies and tools for managing their disabilities. The SDC specialists assist students with clinically documented disabilities in identifying accommodations needed for their classes. SDC also provides information and guidance to faculty and staff about working with students with disabilities. SDC provides information to current, entering, and prospective students with disabilities about available services, resources, and the accommodations process.

## Student Housing

160 Student Housing  
530-752-1736; <http://housing.ucdavis.edu>

**The First-Year Experience Program** 530-752-4546, is one component of the Student Housing Academic & First-Year Transition Services office, which includes the new student Orientation program and the academic year First-Year Experience Peer Advising program. All first-year and transfer students living in Student Housing and second year students have access to an extensive network of academic support services referred to as the "Residence Hall Advising Team," a partnership between Student Housing, the four Colleges and the Student Academic Success Center. Included are residential Academic Advising Centers, which offer drop-in peer advising provided by peer advisers from the four Colleges and the FYE Program. The peer advisers are able to assist with registration procedures, course selection, choosing a major or other general advising questions. The peer advisers can either answer your questions or put you in contact with others who can. Peer tutors from the SASC provide drop-in tutoring services during the evenings in the Academic Advising Centers for new students enrolling in common first-year courses such as Math, Chemistry, Writing and Statistics. Upper-division students should visit their major department adviser, College Dean's office or the Biology Academic Success Center for academic advising and support services.

**New Student Orientation** 530-752-4443, [orientation@ucdavis.edu](mailto:orientation@ucdavis.edu), <http://orientation.ucdavis.edu>, assists new students and their families with the transition to UC Davis. Orientation includes assistance with academic advising, course registration, information for campus resources and social integration. The staff will introduce you to the campus environment, procedures and opportunities, and offers programs relevant to your changing needs. Your contribution to orientation programs, through ideas and assistance, is always welcome.

## STUDENT CONDUCT AND GRIEVANCES

Office of Student Support and Judicial Affairs  
3200 Dutton Hall  
530-752-1128; <http://sja.ucdavis.edu>

The Office of Student Support and Judicial Affairs (OSSJA) upholds campus standards of academic honesty and student conduct by resolving alleged violations of university policies or campus regulations. OSSJA provides information about campus grievance procedures, provides interpretations of university policy

and regulations and assists with conflict resolution and general problem solving. OSSJA also helps co-ordinate the university's response to distressed or distressing students.

## Misconduct and Discipline

Students enrolling or seeking enrollment in the university have an obligation to act honestly, ethically and responsibly. As members of our academic community and of society at large, students have both rights and responsibilities and are expected to comply with the general law, University policies and campus regulations. Standards for student conduct include but are not limited to the *University of California Policies Applying to Campus Activities, Organizations and Students* and the *UC Davis Code of Academic Conduct*. The UC Davis Administration of Student Discipline explains the student conduct process for reported violations of University policies. These policies may be found on the OSSJA website. In summary, students may be subject to discipline for the following behaviors: academic dishonesty or misconduct; disruption or obstruction of University activities; providing false information, forgery, theft, misuse of any University property, documents or resources; physical assault; threats of violence or conduct that threatens health and safety or is intended to terrorize others; possession of weapons; sexual violence and sexual harassment, including sexual assault, stalking, and dating/domestic violence; possession, use, distribution or sale of drugs or alcohol that is illegal or against University policy; hazing; preparing, selling, or distributing course materials or notes for commercial purposes without the consent of the course instructor; or recording, photographing, or viewing a person in a private location without express consent.

If admitted or found in violation, disciplinary sanctions may range from censure to probation, suspension or dismissal from the university. Additional requirements may include but are not limited to community service, educational programs, or restitution. Suspected violations of campus or university standards by students should be reported to OSSJA. Online reports can be submitted on the OSSJA website.

## Student Responsibilities

Students are responsible for complying with the announcements and regulations printed in this catalog and with all policies, rules and regulations of the university and this campus. Students will not be able to register or receive transcripts of record or diplomas until they have met all university obligations.

## Discrimination/Harassment

If students believe that they have been subject to prohibited discrimination or harassment, they may contact OSSJA at 530-752-1128 or the Campus Chief Compliance Officer at 530-752-9466, for information and assistance. It is important to seek assistance as soon as possible, as time limits may apply to some grievance processes. Advice is also available from the Harassment and Discrimination Assistance and Prevention Program. Individuals may use an Anonymous Call Line at 530-752-2255 or the HDAPP Office at 530-752-9255.

# RESOLVING ACADEMIC PROBLEMS

## Grade Changes

Students who believe they received an incorrect grade due to a clerical or procedural error should ask their instructor to file a Request for Grade Change form with the Office of the University Registrar; see [Retroactive Grade Changes, on page 93](#). If the instructor does not agree, the student should discuss the matter with the chair of the department. If at that point the matter is still unresolved, the student may file a grade grievance with the Grade Change Deputy to the Academic Senate Committee in the Office of the University Registrar in 3100 Dutton Hall. Requests must be made by the end of the following quarter.

The Academic Senate Committee on Grade Changes reviews requests for grade changes and, like the instructor, has no authority to reevaluate student work but can change the grade if it finds a documented clerical or procedural error. In the case of a challenged grade, the student will be expected to bear the burden of proving that a clerical or procedural error occurred and caused the incorrect grade to be assigned. If a student believes that the grading error was the result of prohibited discrimination or arbitrary treatment, the student may file a complaint with the Office of Student Support and Judicial Affairs (OSSJA) in 3200 Dutton Hall. For more information, contact OSSJA at 530-752-1128 or [sja@ucdavis.edu](mailto:sja@ucdavis.edu).

For more details, see the <http://registrar.ucdavis.edu/records/grades/changes.cfm>. See guidelines for the Committee on Grade Changes at <http://academicsenate.ucdavis.edu/GCC>. Questions regarding this process should be directed to the Deputy to the Committee on Grade Changes at [GradeChanges@ucdavis.edu](mailto:GradeChanges@ucdavis.edu).

## Other Academic Problems

If you need a requirement waived or any other type of variance, contact your faculty adviser or the appropriate dean's office or the Biology Academic Success Center for information on your college's procedures. If you cannot get satisfaction through normal channels, contact the ASUCD Student Advocacy Grievance Center or the Committee on Student-Faculty Relationships; see [ASUCD Student Advocacy Grievance Center](#), below.

## ASUCD Student Advocacy Grievance Center

349 Memorial Union  
530-754-4131/6101/3339

The ASUCD Student Advocacy Grievance Center advocates students' academic and nonacademic concerns to the faculty and administration. Grievance counselors assist students one-on-one, directing them to appropriate channels through which to state their academic grievances (e.g., student-faculty relations, sexual harassment, grade change problems, pre-judicial treatment in the classroom and problems with academic procedure and policy) and nonacademic grievances (e.g., campus facilities, campus safety, ASUCD and any other nonacademic concerns). All information discussed between counselors and students is completely confidential. Students can get counseling, referrals and support to aid in the resolution of these matters.

## STUDENT ACADEMIC SUCCESS CENTER

### Academic Assistance and Tutoring

2205 Dutton Hall  
530-752-2013; <http://success.ucdavis.edu>

At the Student Academic Success Center, you can receive academic support with study skills, biology, chemistry, economics, math, physics, and statistics classes. Assistance is also available for writing essays and term papers, reading efficiency, learning English as a second language, and reducing test anxiety.

Academic Specialists teach pre and co classes primarily for EOP and STEP students in workload unit courses. These units count toward minimum progress and financial aid eligibility, but do not count toward graduation.

All students can attend subject workshops, instructor office hours in math, chemistry, physics, and statistics. Individual appointments are available for all students who need writing assistance with their course work.

Undergraduate tutors provide drop-in tutoring in BIS, Chemistry, Economics, Math, Physics, Statistics courses, and writing across the curriculum. Students can walk in to ask questions about the subject material, stay to study while an experienced tutor is in the room, or join a problem solving session in the room.

### Educational Opportunity Program (EOP) Services

EOP Building  
530-752-9366; <http://eop.ucdavis.edu>

Educational Opportunity Program (EOP), offers an array of services to help students adapt both academically and socially to the University setting and successfully achieve their educational goals. EOP provides a caring and supportive environment for students to meet with peer and staff advisers and network with other students. Services include:

- Orientation and welcome activities to introduce new students to UC Davis
- First-year seminars
- Summer bridge program
- Academic advising and pre-enrollment assistance
- Personal and social support from trained peers and staff counselors
- General study skills and graduate school preparation advising
- Supplemental instruction in math and science
- Online EOP newsletter
- Guardian Scholars Program (GSP); a support network for former foster youth

### Guardian Scholars Program (GSP)

EOP Building  
530-752-1211

The mission of the Guardian Scholars Program (GSP) is to empower foster youth at UC Davis to reach their potential by providing a community network that supports their academic progress and personal growth. The GSP is a one-stop center where students can get help from professionals who understand the challenges of former foster youth and where students can meet other

students who have a similar background. In addition to the services available through EOP, Guardian Scholars offers one-on-one mentoring with faculty and staff and a network of off-campus resources specifically intended for former foster youth.

### Mentorships for Undergraduate Research in Agriculture, Letters and Science (MURALS)

EOP Building  
530-752-9931

Mentorships for Undergraduate Research in Agriculture, Letters and Science (MURALS) is designed to enrich the research experience of students situationally disadvantaged in their access to graduate school. The program aims to encourage students to further their education beyond the baccalaureate. By working with a faculty mentor, students not only have an opportunity to participate in academic research, but their experience may give them an incentive to pursue graduate work leading to a master's or doctoral degree. Students must be a junior or senior with a GPA of 3.000 and 90 units and meet additional eligibility requirements.

For more information, please see the MURALS website at <http://murals.ucdavis.edu>.

### Transfer Reentry Veterans (TRV) Center

1210 Dutton Hall  
530-752-2200 Transfer Reentry

If you transferred to UC Davis, are a reentry student, the TRV Center is here to serve you. Reentry refers to undergraduate students who are 25 or older, graduate students who are 30 or older, married students or student parents.

If you or your parent(s) served in the U.S. military and you are unsure of what benefits you may be eligible for, the TRV Center can help.

TRV Center services include: drop-in academic peer advising, Osher Reentry Scholarship program, access to the TRV Resource Network, Veteran educational benefit certifications and fee waivers, resources for commuting students, computer access, study space and networking with the community of TRV students through events and activities.

### Pre-Graduate/Pre-Professional Services

South Hall, 1st Floor  
530-752-4475

Pre-Professional/Pre-Graduate School Advising offers individualized advice and information to students interested in admission to professional and graduate schools (law, Masters and Ph.D. programs, etc.) including prerequisite course planning, exam preparation, evaluation of competitiveness and assistance with all aspects of the application process such as writing the personal statement, getting good letters of recommendation, selecting schools/programs and strategies for becoming the most competitive applicant possible. In addition, the program offers small group advising and informative workshops, and hosts visits from admissions officers from various professional schools.

Graduate School and Law School Information Day is held on campus each fall to give students an opportunity to speak with representatives from Universities across the country in preparation for entrance to graduate or law school.

## Special Transitional Enrichment Program (STEP)

2205 Dutton Hall  
530-752-2013

Freshman EOP students are invited to participate in the Special Transitional Enrichment Program (STEP). The program begins in summer and continues through the first two academic years, offering preparatory course work, academic assistance and advising. It helps students adjust academically and socially to the campus by strengthening their learning skills and study habits, and by providing an extensive orientation to campus life.

## Study Skills Assistance

117 South Hall  
530-752-4475

Advising and workshops are offered to help students strengthen skills that have significant impact on college achievement and academic success. Students may attend a workshop or meet with an adviser to get help with time management, test preparation, success strategies, note taking and other study skills. The workshop schedule is available each quarter at <http://success.ucdavis.edu>.

## INTERNSHIPS AND CAREER SERVICES

### Internship Programs

The Internship and Career Center  
2nd Floor, South Hall 530-752-2855;  
<http://icc.ucdavis.edu>

Gain practical skills that will transfer to the workplace. Apply your coursework. Launch your career. Take advantage of hundreds of internships organized through the Internship and Career Center (ICC) or initiate your own. There is literally something for everyone.

An internship may be full time or part time, credit or non-credit, voluntary or paid, depending on your skills, needs and interests and the availability of openings. Internship experiences must emphasize learning and be supervised by a professional. Academic credit is awarded for experiences planned and approved in advance by a sponsoring faculty member. In addition, a student can have their internships recorded on their academic transcript through the Transcript Notation (<http://icc.ucdavis.edu/find/internships/tn.htm>) process available at the ICC.

### The Internship and Career Center (ICC)

2nd Floor, South Hall 530-752-2855;  
<http://icc.ucdavis.edu>

The Internship and Career Center (ICC) works with undergraduate, masters, and Ph.D students, postdoctoral scholars and recent alumni. The ICC can help you identify your abilities and interests and relate them to career options; gain access to practical experience to increase your competitiveness in the job market; and find out how and where to look for employment. Attend ICC workshops on finding an internship or part time job, beginning a job search, developing a resume, networking and preparing for an interview. Resources on these topics are also available at the ICC website.

ICC's Career Resource Manual, available at <http://icc.ucdavis.edu/>, provides resume guidelines, interview tips and employment information. Also available at the ICC website is Aggie Job Link, an

online database of internships, student jobs and career positions that is updated daily. The ICC coordinates employer visits to campus for company information sessions and on campus interviews.

### Masters, Ph.D.s and Postdoc Services

The Internship and Career Center  
2nd floor, South Hall  
530-752-8342

The Internship and Career Center, located in South Hall, provides comprehensive career services for UC Davis Master's and Ph.D. students, and Postdoctoral scholars (MPP).

Career advisers can assist you with all aspects of your career search either within or beyond academia, or both. Our career services include confidential one-to-one advising with individualized review of curriculum vitae (CV), resumes, and cover letters; workshops and panel discussions; recruiting and networking events; and employer information sessions, all specifically designed for advanced degree holders.

If you are exploring an academic career in research or teaching, looking for a non-academic career in industry, government or the non-profit sector, or considering both paths, the ICC has resources that can help.

### Community Service Resource Center

The Internship and Career Center  
1st floor, South Hall  
530-752-3813

If you are interested in providing community service, visit the UC Davis Community Service Resource Center (CSRC) coordinated through the ICC. Volunteering can be a rewarding and satisfying experience that may also improve your qualifications for the job market. A database with information about non-profit agencies and volunteer opportunities locally, nationally and world-wide is available at the Community Service Resource Center website at <http://csrc.ucdavis.edu/find/volunteer/index.htm>.

## ACADEMIC RESOURCES

### UC Davis Study Abroad

International Center, Suite 1120  
530-297-4633; Fax 530-297-4695;  
[studyabroad@ucdavis.edu](mailto:studyabroad@ucdavis.edu)  
<http://studyabroad.ucdavis.edu/>

Study abroad is one of the richest educational experiences a student can have. When students return from study abroad in places like Italy or Hong Kong, they describe their time abroad as an experience that changed their lives. Students study abroad to pursue their academic interests in a global context, to learn a language, to gain practical field work or lab experience, to engage in an international internship, and to add distinction to an application for graduate or professional school.

UC Davis Study Abroad advisers can help students decide which program is best for them, whether to study abroad for a summer, quarter, semester or a full year and when to go abroad (freshman through senior years). UC Davis Study Abroad also provides freshman seminars, advising sessions for new and transfer students, information sessions for particular majors, countries or regions, and financial aid workshops to assist with funding study abroad programs. Staff also advise on programs that have internship

opportunities. UC Davis Study Abroad also administers the Global and International Studies (GIS) minor, which is sponsored by the Humanities Program in the College of Letters and Science.

UC Davis Study Abroad is home to UC Davis Quarter Abroad, UC Davis Summer Abroad, UC Davis Internships Abroad, UC Davis Seminars Abroad and the University of California Education Abroad Program (UCEAP). UC Davis Study Abroad also provides advising for students interested in non-UC “independent” programs and administers the non-UC study abroad leave program, and provides student services for international UCEAP Reciprocal Exchange students.

## **First-Year Seminar Program**

The Grove, Room 1350 (Surge III)  
<http://fys.ucdavis.edu/>  
<http://fys.ucdavis.edu/student/index.html>

The UC Davis First-Year Seminar Program gives first-year students the opportunity to study with faculty members in small groups, meeting in settings more informal than the ordinary classroom. The seminars focus on a current intellectual interest of the faculty member. All seminars emphasize student participation, providing intense intellectual exchange among students and between student and teacher.

## **Mathematics and Science Teaching Program (MAST)**

104 Everson Hall  
 530-754-9621; [mast@ucdavis.edu](mailto:mast@ucdavis.edu); <http://mast.ucdavis.edu>

The UC Davis CalTeach Mathematics and Science Teaching Program (MAST) provides students with opportunities to explore careers in mathematics and science education. Part of the statewide University of California Science and Mathematics Initiative designed to address the critical need for quality science and mathematics teachers, MAST offers seminars on effective teaching practices, active internships in K-12 and UC Davis classrooms, and academic advising.

## **Student Farm**

530-752-7645; <http://studentfarm.ucdavis.edu>

The Student Farm offers students diverse hands-on learning and research opportunities in sustainable agriculture through internships, formal courses (e.g., in organic crop production, sustainable agriculture, environmental education) and research projects. Students grow and sell organic vegetables in the Market Garden, develop diverse horticultural skills in the Ecological Garden, operate and maintain tractors and equipment, make compost, and provide hands-on farm tours for school children. Students may also create specialized projects in related areas. The Student Farm is a part of the Agricultural Sustainability Institute and is located on the west edge of the campus core, near the Rec Pool. The Student Farm is open to all students, regardless of major or background.

## **Undergraduate Research Center**

2300 Student Community Center  
 530-752-3390; <http://urc.ucdavis.edu>

The Undergraduate Research Center serves as central hub to encourage and facilitate faculty-sponsored undergraduate research, scholarship and creative activity by UC Davis undergrad-

uates. These experiences serve as a vehicle to help students understand what it means to attend a premier research university, enhance the quality of students' interactions with faculty, and learn first-hand that knowledge is not just learned, but discovered. Programs and services are available to students in all majors and all class levels, and include advising, coaching, referrals to sponsored research programs and faculty research projects; educational seminars and workshops related to the student researcher's professional development and training; and funding and awards for student researchers.

## **Washington Program**

**Campus Program Office.** The Grove (Surge III), Room 1350, 530-752-6652; <http://washingtonprogram.ucdavis.edu>

**Residential Program Location.** 1608 Rhode Island Avenue, NW, Washington, D.C. 20036

The University of California hosts a system-wide academic and residential program for undergraduate students attending from each of the UC campuses. Housed within the UC Washington Center (UCDC), an 11-story, state of the art facility, convenient to public transportation, and located in downtown D.C., the programs provide undergraduates an opportunity to enrich their education while in residence for one quarter in the nation's capital. The program's principal activities include enrollment in credit-bearing courses, participation in academic internships, and opportunity to explore the many educational, cultural and historical activities in the Washington area.

UCDC is open to undergraduates from all majors who will have upper-division standing by the start of the quarter in which they plan to participate. A GPA of at least 3.000 is recommended for admission although not required. Applicants are also evaluated based on overall relevant experience, a written statement, and letters of recommendation.

The program offers both an 11 week academic year component, where students earn academic credit and continue to be registered as full-time UC Davis students during the quarter in which they participate; and a 10-week summer component with a credit or non-credit option. The academic component includes an internship that requires students to work three to four days per week as interns in think-tanks, museums, Congress, federal agencies, interest groups, trade associations, research institutions, media corporations, or in other organizations related to the interests and objectives of individual students; a research seminar; and an optional upper division course. Courses are taught by UCDC faculty appointed by the various UC campuses, or visiting faculty from the Washington area.

## **STUDENT RESOURCE AND INFORMATION CENTERS**

### **Center for Advocacy, Resources & Education (CARE)**

530-752-3299; [ucdcare@ucdavis.edu](mailto:ucdcare@ucdavis.edu); <http://care.ucdavis.edu>

The UC Davis Center of Advocacy, Resources & Education (CARE) is committed to reducing the incidence and the impact of all forms of sexual violence, including sexual assault, dating and domestic violence, and stalking, within the UC Davis campus community and at the UC Davis Medical Center. CARE staff work to broaden public awareness about the nature of sexual violence

and its impact on people of all genders, to reinforce the necessity of healthy communication, including healthy sexual communication and consent, and to mitigate the trauma of the survivor.

CARE's primary mission is to eliminate all forms of sexual violence using a multi-faceted approach, including primary prevention, education and awareness, and trauma-informed survivor services. CARE provides confidential and supportive advocacy services to students, staff, and faculty who have experienced sexual assault, dating and domestic violence, and stalking. Confidential crisis intervention, problem-solving and advocacy is available to recent survivors and to those working to recover from past incidents. Survivor services may include assistance in understanding rights and reporting options, safety planning, assistance with the campus administrative and criminal justice reporting processes, and assistance with housing, employment, and academic accommodations. CARE also provides short-term intervention and support for friends, family, house mates and co-workers of survivors.

## **Center for Leadership Learning**

1350 The Grove  
530-752-6908; <http://cll.ucdavis.edu/>

The Center for Leadership Learning (CLL) offers a variety of co-curricular programs and activities to help undergraduate students develop their leadership and professional skills. The CLL provides students a unique opportunity to formally learn about leadership and professionalism, while receiving invaluable, hands-on training that will assist them for a lifetime.

The CLL's programs and services are open to all UC Davis undergraduate students and are free of charge. Undergraduates from all majors, class levels, and range of leadership and professional experience are welcome to participate. Students may elect to participate in our quarterly workshops, complete any of our optional certificate programs, attend our special events, or all the above! The CLL embraces all students who wish to enhance their personal and professional lives and they get to choose the level of involvement that works for them!

## **Cross-Cultural Center**

Bruce E. Smail, Director  
Student Community Center, First Floor  
530-752-4287; Fax 530-752-5067;  
[ccc@ucdavis.edu](mailto:ccc@ucdavis.edu); <http://ccc.ucdavis.edu>

The mission of the Cross Cultural Center (CCC) is to foster a community through education and advocacy regarding systematic group oppressions, ethnic and cultural diversity, and establishing an environment of cross-cultural learning and exchange for the entire campus. The CCC advocates for a campus environment free of racism, classism, sexism, heterosexism, ableism, body image oppression, religious/spiritual oppression and any other forms of oppression.

The CCC strives to build an inclusive and welcoming campus community through the annual Culture Days programs that raise awareness and celebrate our cultural diversity. Everyone is invited to share in these programs featuring speakers, workshops, films, entertainment and family events.

The center features much more as well. It is home to Danzantes del Alma, a popular student folklórico dance troupe that celebrates the culture and heritage of Mexico through performances on campus and throughout Northern California. All students are invited to participate and no prior dance experience is required. Peer Edu-

cation and Community Empowerment (PEACE), is a student-to-student train the trainer program dedicated to undoing racism, sexism, homophobia, and to promoting a welcoming, respectful, living and learning environment. It also has an affiliate program for registered campus student organizations called SoDA. Lastly, the center is frequently home to resources from elsewhere on campus, including the College of Letters and Sciences, the College of Engineering, the Internship and Career Center, and the Educational Opportunity Program.

## **Lesbian Gay Bisexual Transgender Queer Intersex Asexual Resource Center**

Elizabeth Coté, Director  
Student Community Center, 397 Hutchison Drive  
530-752-2452; <http://lgbtqia.ucdavis.edu>

The Lesbian, Gay, Bisexual, Transgender, Queer, Intersex, Asexual Resource Center (LGBTQIARC) provides an open and inclusive space and community that is committed to challenging sexism, cis-sexism, genderism, homophobia, biphobia, transphobia and heterosexism. We recognize that this work requires a continued process of understanding and addressing all forms of oppression. We are committed to this process both in our work and in the structure of the Center itself. The LGBTQIA Resource Center promotes education about all sexes, genders and sexualities, as well as space for self-exploration of these identities. The LGBTQIA Resource Center is a dynamic, responsive and collaborative organization that serves UC Davis and the surrounding region by providing a growing spectrum of programs, resources, outreach and advocacy.

The LGBTQIA Resource Center is open Monday-Thursday, 10 a.m.-6 p.m. and Fridays 9 a.m.-5 p.m. (PT).

## **Services for International Students and Scholars (SISS)**

Services for International Students and Scholars  
530-752-0864; [siss@ucdavis.edu](mailto:siss@ucdavis.edu)

Services for International Students and Scholars assists international students, faculty and researchers in gaining and maintaining an appropriate immigration status while at UC Davis. SISS provides orientation and other information and assistance as part of its mission to build a campus community that is fully inclusive of international students and scholars.

All new and transfer international students must attend a special orientation program held just before each quarter begins. The orientation helps new students with immigration regulations and finding campus services and community resources, and is a vital addition to campus and departmental orientation programs. Orientation for new J-1 international scholars is held every two weeks. Students and scholars should report to SISS as soon as possible after arriving in Davis.

## **Estimated Costs for 2016-2017**

International students are responsible for all of their expenses while studying at UC Davis. The expenses include Nonresident Supplemental Tuition, Tuition, room and board and a modest amount for personal expenses. For the 2016-2017 calendar year, we estimate the cost will be \$56,000 (9 months) for undergraduates, and \$55,800 (12 months) for graduate students. Because the exact cost for tuition and fees is not determined until just before

the beginning of the academic year, these are only preliminary figures. This minimum allowance may be increased without advance notice.

## **Women's Resources and Research Center (WRRC)**

North Hall, First Floor  
530-752-3372; <http://wrrc.ucdavis.edu>

The Women's Resources and Research Center (WRRC) promotes gender equity and aspires for a campus where students, faculty, and staff of all genders can thrive. All are welcome to visit the WRRC and learn about gender equity, connect with community, and find resources and support.

The WRRC focuses on four areas:

- Leadership for Gender Equity: Training and skills-building opportunities to develop leaders that promote gender equity across campus, such as the EDGE Peer Education Program, Volunteer Program, Internship Program, and the Women in Science and Engineering Program.

- Community Empowerment: Student-led initiatives and coalitions that foster self-empowerment and strengthen communities, including: Semana de la Xicanx, the Empowerment Conference, International Womxn's Day, Vagina\* Our Stories, and Gender Equity Awareness Week.
- Research & Scholarship: The Joy Fergoda Library houses over 12,000 feminist volumes available to support research efforts. Scholarships are available that encourage critical inquiry of feminisms, intersectional systems of oppression, and equity are also available.
- Resources & Support: Provide information and referrals on a broad range of topics, such as: sexual violence, gender bias, harassment, health, reproductive and sexual health, self-esteem, childcare, and more. Provide confidential support and referrals on topics involving sexual violence.

ACADEMIC INFORMATION

## REGISTERING AT UC DAVIS

### Registration

Office of the University Registrar  
3100 Dutton Hall  
530-752-3639; <http://registrar.ucdavis.edu>

Registration is the way you become a student at the university. To be a continuing UC Davis student, you must register each quarter. Registration includes enrolling in classes, the financial obligation to pay tuition, fees and all other charges on your student account, filing your current address with the Office of the University Registrar, and completing and filing any forms pertaining to your registration status.

If you are a *new* or *reentering* student, you must complete the following:

- Submit a Statement of Legal Residence; see [Residence for Tuition Information, on page 56](#).
- California Health and Safety Code requires first time enrollees who are 18 years of age or younger to provide a statement of immunization status for the Hepatitis B virus prior to enrollment. For more information, see Student Health and Counseling Services (SHCS) at <https://shcs.ucdavis.edu/information/newstudent/hep-b.html>.
- Have a student ID card produced; see the AggieCard website at <http://aggiecard.ucdavis.edu> or information on how to upload your photo and obtain your AggieCard.

New graduate students who have been registered previously at UC Davis as undergraduates are considered to be new students.

**Change of Name.** Your legal name must be on file with the Office of the University Registrar. If your name has changed since the time of your application, please complete the Name Change Form and submit it with the legal documentation for verification to the Office of the University Registrar in 3100 Dutton Hall or use the form at <https://registrar.ucdavis.edu/records/changes-personal-information.cfm>.

**Change of Address.** Be sure to inform the Office of the University Registrar of any change of address. Failure to file your current addresses can result in a hold on your registration. You can update your address using SISWeb; see <http://sisweb.ucdavis.edu>.

### Late Registration

Late registration privileges extend through the 10th day of instruction, but you are assessed a late fee to defray the extra administrative costs. Registration after the deadline is allowed only if action or inaction on the part of the university delays registration. A recommendation from an appropriate administrative unit is required and tuition and registration fees must be paid with cash, cashier's check, credit union check, university check or fee credit.

## ENROLLING IN COURSES

**Online Registration.** Students enroll in courses by using SISWeb; see <http://sisweb.ucdavis.edu> or myucdavis Schedule Builder; see <https://students.my.ucdavis.edu/schedulebuilder/>.

**The Class Search Tool** and other registration information are available at <http://registrar.ucdavis.edu>.

**Undergraduate Registration Priority.** Access to registration is by priority groups. The groups are established according to student class level, as determined by the number of units completed. Undergraduate Class Level is determined as follows:

• Freshman Level	0–44.99 units
• Sophomore Level	45–89.99 units
• Junior Level	90–134.99 units
• Senior Level	135 units and above

You are officially registered in all courses listed on your individual class schedule. Once registered, you are financially liable for all tuition and fees associated with the term and responsible for completing each of the courses. View your class schedule using SISWeb or myucdavis Schedule Builder.

### Adding and Dropping Courses

You can adjust your schedule by adding or dropping courses until the deadlines published in the Quarter Dates and Deadlines calendar at <http://registrar.ucdavis.edu/calendar/>.

The last day to add courses is the 12th day of instruction. The last day to drop courses without dean's permission or fee is the 20th day of instruction, except for those courses designated by departments as 10-day-drop courses. You need to obtain the permission of your dean and pay the processing fee to drop a designated 10-day-drop course after the 10th day of instruction or to drop any other courses after the 20th day of instruction.

See Adding and Dropping Courses, at <http://registrar.ucdavis.edu/registration/schedule-adjustments/add-drop.cfm>, on how to adjust your schedule and what add/drop procedures and fees apply after the published deadlines. The Quarter Dates and Deadlines calendar, at <http://registrar.ucdavis.edu/calendar/>, also lists the course add and drop deadlines.

### Late Add

To add a course after the deadline, but on or before the last day of instruction, you need approval of the department. A processing fee applies to late adds.

### Late Drop

To drop a course after the deadline, but on or before the last day of instruction, you need approval of the dean of your college or school. Graduate students must have their adviser's approval in order to drop courses. A processing fee applies to late drops. Permission to drop courses after the deadline may be granted only in exceptional circumstances.

### Retroactive Drop

Occasionally, in exceptional circumstances, students are allowed to drop a course after the course is completed. Reasons for seeking a retroactive drop are very specific: medical problems, severe emotional difficulties, or recent death or severe illness in the immediate family. Retroactive Drop petitions must also include an explanation as to why the class being petitioned was more affected than other classes completed during the term. Petitions are subject to approval by the Academic Senate Committee on Grade Changes. Petitions for Retroactive Change are available from the Office of the University Registrar and should include a detailed account of the problem, appropriate documentation and an ade-

quate explanation of why an *I* grade or late drop was not taken during the quarter in which the problem occurred. Retroactive drop petitions should be submitted by the student to the instructor of the course, who will then submit the petition on the student's behalf to the Office of the University Registrar. A processing fee is applicable on all retroactive drops.

### Retroactive Add

In some rare circumstances, students are allowed to add a course after the course is completed. Petitions are subject to approval by the Academic Senate Committee on Grade Changes.

Petitions for Retroactive Change are available from the Office of the University Registrar. Each petition must include the reason for the student's failure to add the course during the quarter in which it was offered. Retroactive add petitions should be submitted by the student to the instructor of the course, who will then submit the petition on the student's behalf to the Office of the University Registrar. A course grade must be assigned by the instructor. A processing fee is applicable on all retroactive adds.

## COURSE LOAD

**Expected Progress.** Undergraduate students are expected to graduate in 12 quarters (four years). To do so, students should plan to complete an average of 15 units per quarter (15 units per quarter for 12 quarters totals 180 units). Because occasions arise which prevent students from achieving expected progress towards the degree, the campus has established minimum progress requirements, to which students must adhere.

**Minimum Progress Requirements.** To meet minimum progress, a full-time regular undergraduate is required to maintain an average of at least 13 units passed over all quarters of enrollment. Minimum progress is calculated at the end of every Spring Quarter for the preceding three quarters (Fall, Winter, Spring) comprising the academic year. Undergraduate students falling below this requirement are not in good minimum progress standing and may be disqualified from further enrollment at the University. Quarters for which a student was officially approved for part-time status are omitted from the minimum progress calculation. For more information, see *Probation and Dismissal*, on page 93.

**Certification of Full-Time Status.** Undergraduate students must carry a study load of at least 12 units (including workload units) each quarter in order to be certified as full-time students for insurance and financial aid purposes or to compete in intercollegiate athletics. Graduate students must carry a study load of at least 12 units each quarter in order to be certified as full-time students.

#### Course Load Limits in the College of Letters and Science.

Freshman students in their first year and transfer students in their first quarter of residence may not take more than 17 units each quarter. For all other Letters and Science students, the class schedule may not exceed 21 units each quarter. These unit limitations include non-credit remedial courses and repeated courses, but not make-up work to remove incomplete grades.

**Course Loads in the College of Engineering.** Because of the large number of required units in engineering programs, many students must take more than 15 units per quarter and/or attend summer session to finish in four years.

### Part-Time Student Status

If, for reasons of occupation, family responsibility, health or, graduating-senior status (one term only), you are unable to attend the university on a full-time basis, you may qualify for enrollment in part-time status. Undergraduate students must file for part-time status each quarter. Graduate students with approved part-time status will remain part-time until the student enrolls full-time. To be considered eligible, undergraduate students must be registered in 10 units (including workload units) or fewer by the tenth day of instruction that quarter and graduate students must be registered in 6 units or fewer by the tenth day of instruction. The Part-Time Petition is available through the Office of the University Registrar at <https://registrar.ucdavis.edu/registration/part-time.cfm>. The petition must be submitted no later than the tenth day of instruction. Minimum progress requirements are waived for part-time students. Part-time students have use of the same facilities and are eligible for the same services, including student health services, as full-time students.

## THE MAJOR

You will find a complete list of the majors offered at UC Davis under [Degrees Offered by UC Davis, on page 15](#).

### Declaration of Major

**College of Agricultural and Environmental Sciences.** Students must declare a major by the time they have completed 90 units. Failure to declare a major at this point may result in a hold on further registration. In order to declare a major, you must meet with your faculty adviser and/or advising associate, fill out a Change of Major petition on the OASIS portal at <https://students.ucdavis.edu/>, and then file the petition with the dean's office. If you have completed 90 units, you must prepare a study plan with your adviser and/or advising associate at the same time. You are accepted into a major only after your major department and the dean's office have approved the Change of Major petition. With the approval of the College Executive Committee, additional requirements, such as completion of a particular set of required courses with a specified grade point average (usually well above a C average), may be introduced as conditions for acceptance into any major at any time.

**College of Biological Sciences.** Students must declare a major by the time they have completed 90 UC Davis units. A hold will be placed on registration if a student is still undeclared after completing 90 units. Students must meet with a BASC academic adviser for that specific major, review eligibility and discuss a projected plan of studies. Students file a Change of Major petition on the OASIS portal at <https://students.ucdavis.edu/>. The minimum requirement for entry into a major is a C average in all courses used to satisfy major requirements. Students are accepted into the major when their adviser and the dean have approved the petition.

Students who fail to maintain a 2.000 GPA in courses required for their major over two consecutive quarters may be required to withdraw from the major.

**College of Engineering.** Students must declare a major when they apply to the College of Engineering. The ability to change majors is subject to meeting the requirements set forth by the faculty of the College of Engineering. Requirements for changing to a College of Engineering major can be found at <http://engineering.ucdavis.edu/undergraduate/advising/answers.html#a1> or by contacting the Engineering Undergraduate Office 530-752-1979.

**College of Letters and Science.** Students must declare a major by the time they have completed 90 units. If you have not declared a major by this point, a hold may be placed on your registration. Such a hold would be removed only when your Change of Major petition is approved by the Undergraduate Education and Advising Office. Petitions are only accepted electronically and are available on the “Forms and Petitions” tab on the OASIS portal at <https://students.ucdavis.edu/>. As a part of the declaration procedure, you must, in consultation with a faculty adviser, prepare a projected plan of study. You are accepted into the major when your adviser and the Undergraduate Education and Advising Office have approved the petition.

To be accepted into a major, you must have a *C* average in all courses you have completed that are required for that major. With the approval of the College Executive Committee, additional requirements, such as completion of a particular set of required courses with a specified grade point average (usually well above a *C* average), may be introduced as conditions for acceptance into any major at any time.

If your performance is unsatisfactory after you have declared a major program, you may be required by the dean to withdraw from that major, upon written recommendation from the chair of the department or the curriculum committee that administers the major.

### Change of Major Within a College

To change from one major to another within a college, you need the consent of the department or committee in charge of your proposed new major and the approval of the dean. Admission into a major program may be denied by the program or by the dean if your grade point average (GPA) in courses required for the selected major is less than 2.000.

Procedures for change of major within a college are the same as for declaration of major and the same conditions apply. If you wish to change to a major that has admission restrictions, you must comply with the special procedures and requirements for that major.

Except under unusual circumstances, no change of major will be permitted after you attain senior standing (135 units). Students wishing to petition for such an exception should consult in advance with the relevant dean's office or the Biology Academic Success Center regarding additional restrictions and requirements.

It is not possible to change or declare a major in the quarter in which you file to graduate.

**College of Biological Sciences.** Students who wish to change their major after completing 135 units should file a quarter-by-quarter graduation plan with the change of major petition, both available on the OASIS portal at <https://students.ucdavis.edu/>. Changes of major will not be permitted by the Dean after the beginning of the quarter of the student's graduation. Students whose graduation plan causes them to exceed 200 units must also file an Excess Units petition available on OASIS.

**College of Engineering.** The above provisions may not apply to students in the College of Engineering, whose freedom to change majors is limited. Requirements for changing to a College of Engineering major can be found at <http://engineering.ucdavis.edu/undergraduate/advising/answers.html#a1> or by contacting the Engineering Undergraduate Office 530-752-1979.

### Change of Major Accompanied by Change of College

A change of major petition, available on the OASIS portal at <https://students.ucdavis.edu/>, must be approved by a faculty or staff adviser of the new major you are selecting. In addition, admission to the new college will require that dean's approval. To obtain that approval, you must be in good academic standing (qualitatively and quantitatively; see the [Probation and Dismissal, on page 93](#)), meet all minimum GPA criteria, including those for the major, and satisfy any other admission requirements established by the new college.

Except under unusual circumstances, no change of major will be permitted after you attain senior standing (135 units). Students wishing to petition for such an exception should consult in advance with the relevant dean's office or Biology Academic Success Center regarding additional restrictions and requirements.

It is not possible to change or declare a major in the quarter in which you file to graduate.

**College of Biological Sciences.** Students who wish to change their major and college after completing 135 units should file a quarter-by-quarter graduation plan with the change of major petition, both available on the OASIS portal at <https://students.ucdavis.edu/>. Students whose graduation plan causes them to exceed 200 units must also file an Excess Units petition available on OASIS. Changes of major will not be permitted by the Dean after the beginning of the quarter of the student's graduation.

**College of Engineering.** Requirements for changing to a College of Engineering major can be found at <http://engineering.ucdavis.edu/undergraduate/advising/answers.html#a1> or by contacting the Engineering Undergraduate Office 530-752-1979.

**College of Letters and Science.** Requirements for changing to a College of Letters and Science major can be found at <http://www.ls.ucdavis.edu/advising/faq.html>.

### Multiple Majors

**College of Agricultural and Environmental Sciences.** A student choosing to major in multiple majors must petition the departments/programs/divisions responsible for the major(s) and the dean of the college. The dean's approval of declaration for multiple majors is subject to the following:

1. Eighty percent of the upper division units offered in satisfaction of course and unit requirements of each major must be unique; that is, they may not be offered in satisfaction toward the upper division unit requirements of any of the other selected majors. Courses with substantial overlap in content will not count as part of the eighty percent. Departmental advisers may approve only one course for substitution when considering the eighty percent in upper division courses and units required for each major.
2. When unit requirements of the majors included in a request differ, the major with the smaller number of upper division units required should be used to compute the minimal unit difference that must be met.

3. A student in good academic standing and with a minimum of a C average in the upper division courses taken toward the major may elect to declare simultaneously more than one major within the college or a combination of majors offered by the college and other undergraduate colleges on campus.

**College of Biological Sciences.** Admission into multiple majors is subject to the approval of offices in charge of the majors involved and the Dean of the College. Departments, curriculum committees and other teaching units, singly or collectively, as well as faculty advisers have the right to disapprove a student's request for a multiple major.

Approval of a request to declare more than one major is subject to the following:

1. Eighty percent of the upper division units used to satisfy requirements in each major must be unique; that is, they may not be offered in satisfaction of requirements of any of the other majors involved.
2. If the major programs differ in the number of upper division units required, the major program requiring the smaller number of upper division units will be used to compute the minimum number of units that must be unique.
3. In determining that the eighty percent requirements have been satisfied, advisers and the Dean must count both specific courses and courses with substantial overlap of content as common to the majors involved.
4. Students must complete all majors within the 225-unit limit.
5. Students may only petition for a multiple major after completing two Depth Subject Matter courses in each major.

A student who completes all requirements for approved multiple majors in which one major normally leads to an B.A. degree and another normally leads to a B.S. degree, will receive a B.A.S. degree. A single degree is granted to students who graduate with multiple majors.

**College of Engineering.** Students may choose to complete two engineering majors. Double-major students must satisfy the requirements for both majors. Degree requirements for such double majors ordinarily cannot be completed within four academic years. A change of major petition is required for all requests and appropriate approvals from all applicable departments and dean's offices are necessary.

The Department of Computer Science **does not allow** double majors of Computer Science and Engineering and Computer Engineering, or Computer Science and Engineering and Electrical Engineering, or Computer Science and Engineering and Computer Science (L&S).

Triple majors will not be approved.

If you want to double major in any over-subscribed engineering major, you will be subject to the additional restrictions for changing into those majors and must satisfy the requirements of both majors.

**College of Letters and Science.** Students choosing to major in multiple subjects must notify the Undergraduate Education and Advising Office of their decision by submitting for approval a petition endorsed by faculty advisers in the majors. The dean's approval of the declaration of more than one major is subject to the following conditions:

1. At least 80 percent of the upper division units used to satisfy course and unit requirements in each major selected must be unique and may not be counted toward the upper division unit requirements of any other major undertaken. Courses with substantial overlap in content will not count as part of the 80 percent.

If the major programs differ in the number of upper division units required, the major program requiring the smaller number of units will be used to compute the minimum number of units that must be unique.

2. At the time of request, a substantial part of the preparatory subject matter in each major must have been successfully completed.
3. All degree requirements must be completed within the 225-unit limit.

Combination proposals that *cannot be approved* are two or more majors offered by the same discipline, *except* art history and art studio.

A student who completes all requirements for approved multiple majors in which one major normally leads to an A.B. degree and another normally leads to a B.S. degree, will receive a B.A.S. degree. A single degree is granted to students who graduate with multiple majors.

## Cross-College Majors

**College of Agricultural and Environmental Sciences.** The College does encourage multiple majors between colleges whenever your academic interests and abilities indicate this to be the best route. After endorsement of the Change of Major petition by the appropriate faculty or staff adviser in the colleges involved, each dean may approve the petition if there are sufficient differences between the requirements for the major programs you wish to study.

At least 80 percent of the upper division units used to satisfy course and unit requirements in each major selected must be unique and not duplicate those of the other major. In planning for multiple majors, you should determine the total requirements needed for each major as well as for graduation from each college involved.

All degree requirements must be completed within the 225-unit limit.

The same conditions apply for cross-college majors as for multiple majors.

**College of Biological Sciences.** The same conditions apply for cross-college multiple majors as for multiple majors within the college. In addition, approval of the deans of all involved colleges are required for cross-college multiple majors.

**College of Engineering.** Enrollment in a combination of an engineering major and a non-engineering major may be possible. A change of major petition is required for all requests and appropriate approvals from all applicable departments and deans' offices are necessary. Such double-major students must satisfy the requirements for both majors. Degree requirements for such double majors ordinarily cannot be completed within four academic years.

**College of Letters and Science.** The same conditions apply for cross-college majors as for multiple majors. Cross-college programs will not be approved if the majors involved are available within a single college as well.

## Individual Major

Students with academic interests not covered by an established major have the opportunity to develop an individual major. Such a major requires the selection of interrelated courses totaling a minimum of 45 upper division units from two or more areas of study. If you choose this option you will work closely with faculty advisers to develop a coherent and rigorous academic program. This program is then submitted to a faculty committee for review and approval. Submit the proposed program to the committee prior to reaching 90 units, or by the fourth full week of the fifth quarter before graduation, whichever is earlier. If you wish to undertake an individual major, see an adviser in your dean's office or the Biology Academic Success Center. Program requirements are outlined under [Individual Major, on page 379](#). *The College of Engineering does not offer an individual major. The College of Agricultural and Environmental Sciences has suspended this program.*

## THE MINOR

If you are interested in two or more areas of study, you should consider completing one or more minor programs. Minor program requirements are listed in the chapter of this catalog under the department that offers them. You will find a complete list of the minors offered at [Minor Programs Offered by UC Davis, on page 17](#).

A minor typically consists of 18 to 24 upper division units in courses specified by the department or program offering the minor. Courses used to satisfy the requirements of a minor, including those completed elsewhere, must be approved by an adviser in the sponsoring department or program. You are also expected to complete all courses that are prerequisite to the upper division courses required for the minor.

When unique subject matter essential to the academic coherence of the program is offered only at the lower division level, the program may include a single lower division course as part of the minor in lieu of an equal number of units in the upper division courses.

For successful completion of a minor, **you must have a grade point average of 2.000 in all courses required for the minor.**

If you want to have completion of a minor certified on your transcript, you must file a minor petition on the OASIS portal at <https://students.ucdavis.edu/>. Requirements for the minor must be met by the time of graduation.

## Additional Requirements for Colleges

### College of Agricultural and Environmental Sciences

Transfer units will not normally be used to satisfy minor requirements. Exceptions will require approval by the student's adviser and the Undergraduate Majors and Courses Committee.

No more than one course applied to the satisfaction of requirements in the major program shall be accepted in satisfaction of the requirements of a minor. No course used to satisfy the requirements of one minor shall be applied toward any other minor.

### College of Biological Sciences

Students in the College of Biological Sciences may not complete a minor in the same field as the student's major. This includes any minor offered by the department or curriculum committee in charge of the student's major. All major and minor requirements must be completed within the 225 total unit limit.

No more than one course applied to the satisfaction of requirements in the major program shall be accepted in satisfaction of the requirements of a minor. No course used to satisfy the requirements of one minor shall be applied toward any other minor.

### College of Letters and Science

With the exception of interdisciplinary minors approved by the College Executive Committee, students in the College of Letters and Science may not complete a minor offered by the department or program in charge of the student's major. You can elect only one minor in a subject area.

No more than one course applied to the satisfaction of requirements in the major program shall be accepted in satisfaction of the requirements of a minor. No course used to satisfy the requirements of one minor shall be applied toward any other minor.

## Requirements for Schools

Beyond minors offered by the undergraduate colleges, there are two additional minors available for undergraduate students. The School of Education offers a minor in Education and the Graduate School of Management offers a minor in Technology Management and. The process for declaring these minors is the same, students file a minor petition on the OASIS portal at <https://students.ucdavis.edu/>.

### School of Education

Any student may minor in Education.

### School of Management

The Graduate School of Management offers the minor in Technology Management. To complete the minor, students must complete a minimum of 20 units of coursework in the minor with a GPA of 2.000 or better. Coursework in the minor will complement the student's undergraduate major studies with training in accounting, finance, marketing, organizational behavior and operations. The minor also provides students with business and management skills that will enable them to apply training from their major program in a business setting.

## ACADEMIC CREDIT

### Units of Credit

Academic work at the university is measured by "units of credit." In conjunction with the letter grade you receive from the course instructor, units of credit give a fairly accurate evaluation of the amount of time you have devoted to a given subject. Units of credit also make it possible to anticipate the amount of work involved in a particular course and enable you to transfer from one campus or university to another without undue difficulty. To convert quarter units to semester units, multiply by 0.66; from semester to quarter units, multiply by 1.5.

Units of credit are assigned to courses based on 1 unit of credit for three hours of work by the student per week. Usually this means one hour of lecture or discussion led by the instructor and two hours of outside preparation by the student. In laboratory courses, two or three hours of work in the laboratory are normally assigned 1 unit of credit.

In most courses at UC Davis, the standard procedure prevails, so that a 3-unit course meets for three hours a week, a 4-unit course for four hours and so on. Courses that are an exception to this pattern may require additional class time or give more demanding assignments. If you have questions about the number of units assigned to a course, you should check the expanded course descriptions (available at your college, department, or on the Internet) or ask the instructor what is required in terms of outside reading, term papers, problem sets or field trips. These are not always spelled out completely in the *General Catalog*. By knowing the amount of work that will be required, you can plan your course load more systematically and realistically.

### Credit by Examination

Under certain prescribed conditions, currently registered students in good standing may receive course credit by taking an examination without formally enrolling in a course. You may obtain a petition and a copy of the prescribed conditions from the Office of the University Registrar. The petition is subject to the approval of the instructor giving the examination and the department involved.

The completed petition, accompanied with the processing fee, must be presented for final approval to the dean of your college or school, or if you are a graduate student, to the dean of Graduate Studies. The completed petition must be submitted to the Office of the University Registrar no later than the business day before the date of the scheduled examination; petitions that are submitted after this date will be denied. Students who are approved by the Office of the University Registrar to take credit by examination shall be issued a permit to take the examination, which the student will present to the instructor at the time of the examination.

The credit received for the examination may not duplicate any credit you have already earned toward your degree. You may not use credit by examination to repeat any course you have taken previously, regardless of the grade you received in that course. Credit earned by examination may not be applied towards satisfaction of the General Education requirement. The final examination results will be reported to the Office of the University Registrar, which will assign the appropriate grade and grade points to you. Since failure to pass the examination will be recorded as an *F*, you are encouraged to prepare fully for such an examination before attempting it. Optional *P/NP* or *S/U* grading is subject to approval by the appropriate dean.

You may also receive credit for learning in nonacademic settings through credit by examination.

To earn credit through the credit by examination process, the examination must be given by a UC Davis instructor and be for a course listed in the current *General Catalog*. Students are not eligible to take a credit by examination in a quarter in which they are not currently enrolled.

### Concurrent Credit from Another Institution

A student may not obtain transfer credit for courses taken at a non-University of California campus in a term during which the student is registered as a full-time student at UC Davis. A variance can be obtained only by petitioning the dean of your college well in advance of the desired registration. When a variance is granted, units earned are counted toward minimum progress for the term in which the dual registration occurs. Summer Session courses are exempt from this regulation.

Students may gain credit for courses taken during the summer at other institutions, provided the courses parallel those given in the University of California. Assurance that such credit will be accepted, however, can be given only after the courses have been completed. You should arrange to have the transcripts of your Summer Session grades sent to Undergraduate Admissions for evaluation.

### Intercampus Visitor Program

Qualified undergraduates may take advantage of educational opportunities on other University of California campuses as an Intercampus Visitor (ICV). This program enables students who have completed at least one year in residence on their home campus and have maintained a grade point average of at least 2.000 to take courses not available on their home campus, to participate in special programs, or to study with distinguished faculty members on other campuses of the university. Students who meet the above requirements should complete an application available in the Office of the University Registrar or at <http://registrar.ucdavis.edu>.

### Summer Sessions

1350 Surge III  
530-752-7622; <http://summer-sessions.ucdavis.edu>

Every summer, many students earn units, complete their undergraduate degrees, expand their knowledge, do research, take special study courses, meet prerequisites or take courses that are often over-enrolled during the academic year by participating in Summer Sessions at UC Davis. Per unit course fees are equivalent to academic year tuition based on the standard 15-unit quarter.

Summer Sessions offers more than 600 lower and upper division course sections in a wide range of subject areas that provide full university credit transferable to most campuses. Since admission is open to virtually all adults, Summer Sessions traditionally attracts students from US and international universities and colleges, high school graduates and many other qualified applicants. Admission to a summer session, however, does not guarantee or imply admission to the university's regular academic quarters.

Summer offerings include Special Sessions that either occur off-campus or take place outside the normal six-week terms.

Summer Sessions dates are listed at the bottom of the *Academic Calendar*, on page 1, and at <http://summer-sessions.ucdavis.edu>.

## **UC/CSU/Community College Cross Enrollment**

If you are interested in taking a particular class at a nearby California State University or community college campus, you may now do so through the Intersegmental Cross Enrollment program.

Enrollment is limited to one course per term and participating students need the approval of both the home and the host campus. Please note that the Los Rios Community College district is not participating in the program.

Senate Bill 361 requires that UC, CSU and the California Community Colleges permit students to enroll in one course per term at a campus of either of the other two systems on a space available basis at the discretion of the two campuses. This program aims to encourage community college students to enroll concurrently in courses offered at local universities, potentially increasing the number of community college transfers, including students from underrepresented groups.

Students must meet certain qualifications and be certified by their home campus as to eligibility, residence, fee, financial aid and health status. Generally, students will be allowed to add a class, if space is available, after the add/drop period on the host campus. To add a course, students must obtain the faculty member's approval and signature on a Cross-Enrollment form, available at their home campus Registrar's Office. The student takes the signed form to the Registrar's Office at the host campus for processing. If you are interested in participating, come to the Office of the University Registrar in 3100 Dutton Hall for more information.

## **Open Campus (Concurrent) Program**

UC Davis Extension  
1333 Research Park Drive  
800-752-0881 or 530-757-8777  
<https://extension.ucdavis.edu/open-campus>

Most of the classes taught at UC Davis are available to members of the public through the Open Campus (Concurrent) Program on a space available basis. The enrollment limitations, deadlines and fee schedule are provided in the Open Campus brochure-available online, by mail or from the UC Davis Extension office. Students previously registered at UC Davis who have not graduated may not enroll through Open Campus (Concurrent) until twelve months after withdrawing from UC Davis except with permission of the student's College Dean's Office or the Biology Academic Success Center. Upon admission or readmission to regular student status at UC Davis, the units and grade points earned when enrolled in Open Campus courses will count toward both the 180-unit undergraduate degree requirement and the UC GPA.

## **UC Davis Extension**

1333 Research Park Drive  
800-752-0881 or 530-757-8777  
<http://www.extension.ucdavis.edu/>

As the outreach arm of UC Davis, UC Davis Extension provides continuing education in numerous professional and academic fields. Details on Extension courses are available by visiting the Extension website, calling or coming to the Extension office. Students enrolled at UC Davis who wish to use UC Davis Extension courses, other than those offered through Open Campus (Concurrent), towards degree requirements must obtain written approval from the dean's office of their college or the Biology Academic Success Center before enrolling in the Extension courses. Upon approval students may apply a limited number of credits towards the undergraduate or graduate degree requirement.

## **EXAMINATIONS**

### **Midterms**

In undergraduate courses for which a midterm examination is required, each student has the right to take the midterm (or submit the take-home examination as opted by the instructor) during one of the regularly scheduled meetings of the class. The scheduling of a midterm examination at a time other than a regularly scheduled class meeting requires mutual written consent of the instructor and each student registered in the course. A student who does not consent in writing to the different time must be permitted to take the examination (or submit the take-home examination) at the officially scheduled time. A student who consents in writing to the change of examination time waives the right to take the midterm at the officially scheduled time.

### **Final Examinations**

**Scheduling.** The quarterly final examinations schedule is listed at <http://registrar.ucdavis.edu/registration/schedule/finals.cfm>. Exams are set according to the day-and-start time of the classes offered during the quarter. This information is available so that you can avoid final examination conflicts. A student who has multiple exams on the same day may discuss the situation with the instructors of the courses. **Students are responsible for ensuring they do not have conflicting exams. There is no regulation mandating a change.**

**Requirements.** Except under certain specified circumstances, Academic Senate Regulations require that final examinations be given in all undergraduate courses. Final examinations may be given in graduate courses. Exceptions to the regulation would be independent study courses, courses that consist of laboratory work only and courses in which the examination has been waived by the Academic Senate Committee on Courses of Instruction.

At the instructor's option, the final examination in any course other than an on-line course may be wholly or in part of the take-home type. All examinations for on-line courses must be proctored to ensure that the person taking the examination is the student receiving credit. The writing time (in undergraduate courses) of a take-home and an in-class final examination together should not exceed three hours. In each course in which a final examination is required, the students have the right to take the final examination (and/or submit the take-home examination) at the time and on the date published in the quarterly final examinations schedule at <http://registrar.ucdavis.edu/registration/schedule/finals.cfm>.

An instructor may release each student's original examination, or a copy, at any time. Otherwise, the instructor will keep the exams, or copies thereof, until the end of the next quarter and students may pick up their exams during this period.

For on-line courses, the instructor of each on-line class will be provided the option to have the final in any of the TBA slots or at a time on dead day. Students shall be notified of the time and place of the final on or before the first day of instruction.

**Changing a Final Examination Date.** An in-class final examination may not be rescheduled for a date earlier than the first day of finals week. The due date for a take-home final examination may not be rescheduled for a date earlier than the first day of finals week. The scheduling of an examination at a time other than the specified time requires the written mutual consent of the instruc-

tor and each student involved in the change. Any student who does not consent in writing to a different time will be permitted to take an examination (or submit the instructor-opted take-home examination) at the officially scheduled time. A student who consents in writing to a change in the final examination time waives the right to take the examination as originally scheduled. Departures from the published examination schedule should be carried out so as not to disadvantage students who are unable to accept the changed schedule.

A student who is improperly denied the right to take a required final examination on the published date (or submit the take-home examination as opted by the instructor) may file a petition with the Executive Council of the Davis Division of the Academic Senate by the end of the next regular term for appropriate action.

**Disabilities.** Students with documented disabilities may be entitled to in-class accommodations. The student shall provide the instructor with a letter from the Student Disability Center (SDC) recommending those academic accommodations that the instructor is responsible for providing. Students must request accommodation as soon as possible, to allow the university reasonable time to evaluate the request and offer necessary adjustments. No accommodations shall alter the nature of the academic demands made of the student nor decrease the standards and types of academic performance, nor require facilities or personnel that cannot reasonably be provided. SDC coordinates with the Office of the University Registrar to reserve a classroom for examinations for students with documented disabilities during finals week. The instructor should consult with the student and SDC on any questions or concerns.

**Religious Observances.** UC Davis seeks to accommodate any student who, in observance of a religious creed, encounters an unavoidable conflict with a test or examination schedule. The student is responsible for providing, in writing no later than the beginning of the quarter, notification of a potential conflict to the individual responsible for administering the examination and requesting accommodation. Instructors will consider such requests on a case-by-case basis and determine whether such conflicts can be resolved without imposing on the instructor or the other students in the class an undue hardship, which cannot be reasonably avoided. If so, the instructor will determine, in consultation with the student, a time during which the student can take the test or examination without incurring a penalty or violation to the student's religious creed.

## GRADES

Every instructor is required to assign a grade for each student enrolled in a course. The following grades are used to report the quality of a student's work at UC Davis:

A	Excellent
B	Good
C	Fair
D	Barely passing
F	Not passing (work so poor that it must be Repeated to receive recognition)
P	Passed (grade C- or better)
NP	Not passed
S	Satisfactory
U	Unsatisfactory

I	Incomplete (work is satisfactory but Incomplete for a good cause)
IP	In progress

The grades A, B, C and D may be modified by a plus (+) or minus (-).

## Grade Points

Grade points are assigned each letter grade as follows:

A+ = 4.000	B- = 2.700	D = 1.000
A = 4.000	C+ = 2.300	D- = 0.700
A- = 3.700	C = 2.000	F = 0.000
B+ = 3.300	C- = 1.700	P/NP = n/a
B = 3.000	D+ = 1.300	S/U = n/a

## Grade Point Average (GPA)

The grade point average is computed on courses taken at the University of California. The value of grade points over units attempted determines your grade point average. The grade point balance represents the number of grade points above or below a C average. The grades IP, P, S, NP and U carry no grade points and are not included in grade point computations. Incomplete (I) grades are not included in the GPA at the end of the quarter, but are counted as F in determining if a bachelor's degree candidate has earned the minimum 2.000 GPA required for graduation.

A student at UC Davis is expected to maintain a C (2.000 GPA) or better in all work undertaken in the university. If you fall below a C average, you are considered "scholastically deficient," see [Probation and Dismissal, on page 93](#).

## Passed/Not Passed (P/NP) Grading

Subject to regulation by the faculties of the colleges and schools, an undergraduate student in good standing may request to take specific courses on a Passed/Not Passed basis. Such requests must be submitted and confirmed before the 25th day of instruction.

The grade P is assigned for a grade of C- or better. Units thus earned are counted in satisfaction of degree requirements but are not counted in determining your grade point average.

The intent of this option is to encourage exploration in areas in which you have little or no previous experience by alleviating grading pressures. The maximum number of units graded P that will be accepted for degree credit is one third of the units completed in residence on the UC Davis campus. Consequently, at least two thirds of the units completed in residence at UC Davis and presented in satisfaction of degree requirements must be in courses taken for a letter grade.

In specific approved courses, instructors will assign only Passed or Not Passed grades. Such courses count toward the maximum number of units graded P allowable toward the degree. If you are planning to take courses on a P/NP basis, you should also familiarize yourself with the requirements of your particular school or college, which may have placed conditions or restrictions in addition to the university requirements. If you plan to attend graduate or professional school, you should consult with Pre-Graduate/Pre-Professional Advising Services and Health Professions Advising regarding Passed/Not Passed grading.

If you elect the *P/NP* grading option for courses graded upon completion of a two- or three-quarter sequence (in-progress grading), a petition must be submitted before half of the time covered by the *IP* grading has elapsed. The *P/NP* grading will then be in effect for the entire course sequence.

If you receive a *D* or an *F* in a course, you may not repeat it using the *P/NP* option. If you receive an *Incomplete* in a course you took for a letter grade, you may not complete the course on a *Passed/Not Passed* basis.

**College of Agricultural and Environmental Sciences.** The *Passed/Not Passed* option should be used only for elective courses, not for courses taken to fulfill major requirements. An *NP* grade in a course required by the major could prevent graduation. When in doubt, check with your faculty adviser before electing to take a course on a *Passed/Not Passed* grading basis.

**College of Biological Sciences.** All courses used to satisfy major requirements must be taken on a letter-graded basis, unless courses are only offered on a *Passed/Not Passed* basis. Courses taken before Fall 2006 on a *Passed/Not Passed* basis will be accepted in fulfillment of major requirements.

**College of Engineering.** Students enrolled in any undergraduate major within the College of Engineering may not exercise the *Passed/Not Passed* option for any coursework used toward satisfaction of course or unit requirements for the degree. Courses offered only on a *P/NP* basis (e.g., Engineering 199s) are acceptable for specific program area degree requirements. Students wishing to exercise the *P/NP* option for coursework which is not being used to satisfy course or unit requirements may submit a *P/NP* petition by visiting the Engineering Undergraduate Office in 1050 Kemper Hall.

**College of Letters and Science.** Students in the College of Letters and Science are subject to an additional limitation on the number of units that may be completed employing the *Passed/Not Passed* grading option; see *Bachelor's Degree Requirements* for the college in the *Undergraduate Education* chapter. Graduating seniors and other students planning to undertake graduate or professional studies, should consult an adviser before electing for *Passed/Not Passed* grading in courses required for the major program.

### Satisfactory/Unsatisfactory (S/U)

The grade of *S* is awarded to graduate students for work in graduate courses that otherwise would receive a grade of *B-* or better and for work in undergraduate courses that otherwise would receive a grade of *C-* or better.

Graduate students, under certain circumstances, may be assigned grades of *S* or *U*, but units earned in this way will not be counted in calculating the grade point average. Petitions to elect *S/U* grading are available from the Graduate Studies Office and must be signed by your graduate adviser. Prior to advancement to candidacy, graduate students may petition to take no more than one course per quarter on an *S/U* grading basis. Doctoral students who are advanced to candidacy and master's students who have completed all the courses included on their program of study and advanced to candidacy may, with the approval of the Graduate Adviser and the Dean of Graduate Studies, take an unlimited number of courses on an *S/U* basis including courses offered by student's major program. A graduate course in which a *C*, *D* or *F* grade is received may not be repeated with the *S/U* option.

In specific approved courses, instructors will assign only Satisfactory or Unsatisfactory grades. Such courses count toward the maximum number of units graded *S* allowable toward the degree, as specified by each degree program.

### In-Progress (IP) Grading

For a course extending over more than one quarter (designated "deferred grading only, pending completion of sequence" in course descriptions), evaluation of student performance is deferred until the end of the final quarter. Provisional grades of *IP* are assigned in the intervening quarters and are replaced with the final grade at the completion of the sequence. In order to gain credit toward graduation, a student must successfully complete the entire sequence. For electing *P/NP* grading for a course graded in-progress, see *Passed/Not Passed (P/NP) Grading*, on page 91.

### Incomplete Grades

The grade of *I* may be assigned when a student's work is of passing quality and represents a significant portion of the requirements for a final grade, but is incomplete for a good cause as determined by the instructor; good cause may include current illness, serious personal problems, an accident, a recent death in the immediate family, a large and necessary increase in working hours or other situations of equal gravity.

In courses listed in the *General Catalog* as being letter graded, "passing quality" means "of *D-* quality or better." This standard holds in such courses whether or not the student has elected to take the course on a *Passed/Not Passed* or *Satisfactory/Unsatisfactory* basis. For courses listed in the *General Catalog* as being graded on a *Passed/Not Passed* or *Satisfactory/Unsatisfactory* basis only, the completed work must be of a quality consistent with a grade of *Pass* or *Satisfactory*, respectively.

You may replace an *I* grade with a passing grade and receive unit credit (and grade points if the instructor assigns a letter grade) provided you satisfactorily complete the course work as specified by the instructor. In order to change your records, you must obtain a petition from the Office of the University Registrar and present it to your instructor for completion and mailing.

An *I* grade must be replaced with a letter grade (or *P* or *S* grade) before the end of the third succeeding quarter (excluding summer sessions) of the student's academic residence, or the grade will revert to an *F* (or *NP* or *U*). If a student's degree is conferred before the expiration of the time limit for an *I*-grade conversion, the graduated student shall have until the end of the third quarter succeeding the quarter in which the *I* grade was assigned to replace the *I* grade. If the grade is not replaced by then, the *I* grade will remain on the student's record.

You may not re-enroll for credit in a course for which an *I* grade has been assigned. An undergraduate student whose record shows more than 16 units of *I* grades will be subject to disqualification. A graduate student who accumulates more than eight units of *I* grades will be subject to probation.

Incomplete grades will not be included in your grade point average at the end of a quarter. However, at the time of graduation, any remaining *I* grades are included when your grade point average is computed in order to determine whether you have achieved the 2.000 average required for the bachelor's degree. An Incomplete grade, in these computations, has the same effect as a grade *F*, *NP*.

or *U*, depending on which option you have exercised. Therefore, it is recommended that students not delay the clearance of incomplete grades so as not to jeopardize graduation.

If the degree has not been conferred, and the work has not been completed before the end of the term three calendar years after the grade Incomplete has been assigned, and during which the student has not been in academic residence as defined in Regulation 610, the grade Incomplete shall remain on the student's record, unless the course is repeated. This time-limit for the completion of courses assigned the grade Incomplete shall apply to all and only those courses in which the grade Incomplete is assigned on or after September 1, 2010 per Academic Senate Regulation A540(c).

### Retroactive Grade Changes

All grades except *I* and *IP* are final when filed by an instructor at the end of the quarter. No final grade except *I* may be revised by examination or the submission of additional work after the close of the quarter.

If a clerical or procedural error in the reporting of a grade by the instructor can be documented, you may request a change of grade with the instructor. Information regarding grade changes is available at <http://registrar.ucdavis.edu/records/grades/changes.cfm>. The request must be made by the fifth week of the following quarter.

Grade changes for "clerical" errors (such as incorrect addition of points), upon documentation, may be approved by the Office of the University Registrar without requiring review by the Academic Senate Committee on Grade Changes. Requests to interchange *P*, *NP*, *S* or *U* grades with normal letter grades based upon student need (such as to allow graduation or to meet entrance requirements for professional school) do not involve clerical or procedural errors and are automatically denied. Thus, students should exercise the Passed/Not Passed or Satisfactory/Unsatisfactory grading options with caution.

Students are reminded of their responsibility to be aware of the procedures and regulations contained in the *General Catalog*, to verify their class schedules, and to familiarize themselves with the expectations of their instructors. No changes, except completion of an *I* grade as noted above, can be made to the student's record once he or she has graduated.

### Repeating Courses

Undergraduate students may only repeat courses in which they received a *D*, *F* or *NP*. Courses in which students received a grade of *D* or *F* may not be repeated on a *P/NP* grading basis. (Courses in which a grade of *NP* was received may be repeated on a *P/NP* grading basis.)

Degree credit for a repeated course will be given only once, but the grades assigned for both the first and second time a course is taken will appear on the student's transcript. In computing the GPA of undergraduates who have received a grade of *D* or *F*, only the grade and corresponding grade points earned the second time a course is taken will be used, up to a maximum of 16 units for all repeated courses. After the 16-unit maximum is reached, the GPA shall be based on all grades assigned and total units attempted.

Repeating a course more than once requires approval by the appropriate college dean. Departments may restrict the repetition of a course if it is a prerequisite to a course the student has already completed with a grade of *C-* or better.

Graduate students, with the consent of the appropriate graduate adviser and the dean of Graduate Studies, may repeat any course in which they received a *C*, *D*, *F* or *U*, up to a maximum of three courses for all courses repeated. Courses in which a grade of *C*, *D* or *F* has been earned may not be repeated on an *S/U* basis. Courses in which a grade of *U* as received may be repeated on an *S/U* basis.

Degree credit for a repeated course will be given only once, but the grades assigned for both the first and second time a course is taken will appear on the student's transcript. In computing the GPA of graduate students who have received a grade of *C*, *D* or *F*, only the most recently earned grade for each course and corresponding grade points will be used, up to a maximum of three courses for all courses repeated. After the three courses maximum is reached, the GPA shall be based on all grades assigned and total units attempted.

### Mid-Term Grade Standing

Students wishing to know their grade at the mid-quarter should ask the instructor. Those who have deficient grades (*D*, *F* or *NP*) are urged to confer with their advisers.

### Final Grades

Grades are generally available about three weeks after a quarter has ended. You can check your grades through SISWeb or myucdavis Schedule Builder at <https://students.my.ucdavis.edu/>.

### Transcripts

A record of each student's academic work at UC Davis is retained permanently by the Office of the University Registrar. Copies of your official transcript may be obtained from the Office of the University Registrar. For more information on how to request a transcript and applicable transcript fees, see the Office of the University Registrar website at <http://registrar.ucdavis.edu/records/transcripts/>.

Transcripts of all work done through UC Davis Extension or concurrent enrollment must be requested directly from the UC Davis Extension Office, 1333 Research Park Drive, Davis, CA 95616. Transcripts of work completed at another campus of the university or at another institution must be requested directly from the campus or institution concerned.

### PROBATION AND DISMISSAL

The following provisions apply to all undergraduates. Graduate and professional students with scholarship deficiencies are subject to action at the discretion of their respective deans.

### Scholastic Deficiencies

A student will be placed on probation or subject to disqualification for failure to meet qualitative or quantitative standards of scholarship.

**Qualitative Standards.** The qualitative standards of scholarship require that a student maintain a *C* average (2.000) or better for all work undertaken in the university and for the work undertaken in any one quarter.

A student will be placed on probation for qualitative reasons if, at the end of any quarter, the student's grade point average (GPA) is:

- Less than 2.000, but not less than 1.500, for the quarter  
or
- Less than 2.000 for all courses taken within the University of California

A student will be **subject to disqualification for qualitative reasons** if, at the end of any quarter,

- The student's grade point average is less than 1.500 for the quarter,  
or
- The student's grade point average is less than 1.500 for all courses taken within the University of California,  
or
- The student has attempted more than 16 units graded I (Incomplete),  
or
- The student has spent two consecutive quarters on academic probation.

In the case of probation or subject to disqualification for qualitative reasons, the official transcript will state that the student is not in good academic standing. Once a student has met the qualitative standards of scholarship, or has satisfied all requirements for graduation, the notation will be removed from the transcript.

**Quantitative Standards.** The quantitative standards, referred to as minimum progress requirements, define scholarship in terms of the number of units that you must satisfactorily complete. It is expected that a student will earn the 180-unit minimum degree requirement within 12 quarters (four years). This means students are expected to complete, on average, 15 units per quarter.

Because occasions arise which prevent students from achieving expected progress towards the degree, the campus has established minimum progress requirements, to which students must adhere. To meet minimum progress, a full-time regular undergraduate is required to maintain an average of at least 13 units passed over all quarters of enrollment. Minimum progress is calculated at the end of every Spring Quarter for the preceding three quarters (Fall, Winter, Spring) comprising the academic year. Quarters during that period for which a student was officially approved for part-time status are omitted from the minimum progress calculation.

The following courses may be counted toward unit minimum progress:

- Required non-credit courses, e.g., Mathematics B, will be evaluated according to the "Carnegie unit" rule and counted as units passed, although these courses shall not be applied toward the satisfaction of baccalaureate degree requirements.
- Repeated courses passed to improve D or F grades up to a maximum of 16 units.
- Courses passed in Summer Sessions at UC Davis or at another accredited school and transferred to UC Davis will be counted as units passed (applied to the next full-time quarter of enrollment immediately following the summer session).

- Courses passed by examination in accordance with policies established by the Divisional Committee on Courses (applied to quarter in which exam is taken).
- Courses that are *IP* (in progress) will be counted as units passed.
- Courses graded *I* will be counted as units passed when replaced by a passing grade (applied to the quarter in which the *I* grade is received).

A student will be placed on **probation for quantitative reasons** if, at the end of any Spring Quarter, the minimum progress calculation for the preceding academic year shows that the student passed an average of less than 13 units but greater than or equal to 12 units per quarter.

A student will be **subject to disqualification for quantitative reasons** if, at the end of any Spring Quarter, the minimum progress calculation for the preceding academic year shows that the student passed an average of less than 12 units per quarter.

For every student who is subject to academic disqualification for quantitative reasons at the end of Spring Quarter, a "degree progress average" will be calculated at the close of the next full-time quarter of enrollment at UC Davis. The degree progress average is defined as the quotient of the number of units passed during all full-time quarters from the initial quarter of matriculation at UC Davis divided by the number of full-time quarters completed at UC Davis.

A student whose degree progress average is less than 13 units shall be "subject to disqualification for quantitative reasons." A student whose degree progress average is 13 or more units shall not be "subject to disqualification for quantitative reasons."

The degree progress average shall be calculated each subsequent full-time quarter of enrollment as long as the student is "subject to disqualification for quantitative reasons." A student who is "subject to disqualification for quantitative reasons" at the end of two consecutive full-time quarters of enrollment shall be disqualified from the university.

In the case of dismissal for quantitative reasons, the official transcript will state that the student is not in good academic standing." Once a student has met the quantitative standards of scholarship, or has satisfied all requirements for graduation, the notation will be removed from the transcript.

## Dismissal

Dismissal for either qualitative or quantitative reasons (defined above) is based on the decision of the dean of the college in which the student is enrolled. Such dismissal is from the University of California system and not simply the college or the UC Davis campus. Should a former UC Davis student later wish to be readmitted to the UC Davis campus, the authority to do so rests with the dean of the college from which the student was dismissed. If a student is dismissed from their college, they will automatically receive a full refund of registration fees paid for that term.

Students should go to the dean's office of their college or the Biology Academic Success Center if they need academic advising about probation and dismissal.

## HONORS AND PRIZES

### Deans' Honors Lists

According to UC Davis campus regulations, the quarterly Dean's Honors List includes names of students who have completed, for a letter grade, a minimum of 12 units in a specific quarter with a grade point average equal to or higher than the minimum grade point average attained by the upper 16 percent of those registered in the same class level and college during that quarter. Honors lists will be posted quarterly on deans' office websites or made available by other means and a notation of these honors will be placed on each student's permanent record by the Office of the University Registrar.

### Graduation Honors

Honors at graduation are awarded to students who have a grade point average in the top percent of their college as shown in the table below. The College of Letters and Science requires that additional criteria be met for high and highest honors; see the sections below for more information.

Total Quarter Units Completed at UC	Highest Honors	High Honors	Honors	Total
45-89	2%	next 2%	next 4%	8%
90-134	3%	next 3%	next 6%	12%
135+	4%	next 4%	next 8%	16%

Grade point averages from the winter quarter prior to graduation are used to determine the averages that will earn an honors designation. Following are the averages for winter quarter 2016. These averages will be used through winter quarter 2017.

Grade Point Average by College

Percent Determining Cut-Off Point	Agricultural & Environmental Sciences	Biological Sciences	Engineering	Letters and Sciences
2%	3.908	3.964	3.945	3.932
3%	3.861	3.950	3.897	3.900
4%	3.829	3.922	3.868	3.867
6%	3.782	3.864	3.807	3.804
8%	3.728	3.821	3.756	3.755
12%	3.637	3.742	3.679	3.670
16%	3.551	3.679	3.563	3.588

An honors notation is made on students' diplomas and on their permanent records in the Office of the University Registrar.

**College of Letters and Science.** Graduation with "honors" requires that a student meet the appropriate grade point requirement described in the above table for all UC courses completed. Students who meet the grade point requirement for graduation with honors, and who complete the Honors Program of the College of Letters and Science, may be recommended by their departments for graduation with high honors or highest honors on the basis of an evaluation of their academic achievements in the major and in the honors project in particular. Graduating students will not be awarded honors with the bachelor's degree if more than eight units of grade *I* (Incomplete) appear on their transcripts. The College Committee on Honors may consider exceptions to this condition. Petitions for this purpose should be submitted to the Undergraduate Education and Advising Office.

### The Honors Program of the College of Letters and Science

The Honors Program in the College of Letters and Science permits students to pursue a program of study in their major at a level significantly beyond that defined by the normal curriculum. It represents an opportunity for the qualified student to experience aspects of the major that are representative of advanced study in the field. Successful completion of the College Honors Program is a necessary prerequisite to consideration for the awarding of high or highest honors at graduation.

Entrance into the honors program requires that a student have completed at least 135 units with a minimum grade point average of 3.500 in courses counted toward the major. Other prerequisites for entrance into the program are defined by the major. The program consists of a project whose specific nature is determined by consultation with the student's major adviser. It may involve completion of a research project, a scholarly paper, a senior thesis, or some comparable assignment depending on the major. The project will have a minimum duration of two quarters and will be noted on the student's record by a variable unit course number or special honors course designation. Successful completion of the honors program requires that a minimum of six units of credit be earned in course work for the project.

### The Honors Program of the College of Engineering

An Honors Program is available to qualified students in the Chemical Engineering, Biochemical Engineering, and Materials Science and Engineering majors. The Chemical Engineering and Materials Science Honors Program is a four-year program designed to challenge the most talented students in these majors. Students invited to participate will take a one-unit honors seminar in their freshman year and will enroll in various one-unit honors courses. In the upper division, students will complete either an honors thesis or a project that might involve local industry (Chemical Engineering 194 HA, HB, HC). Students must maintain a grade point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

### University Honors Program

(formerly Davis Honors Challenge & Integrated Studies Honors Program)  
[honors@ucdavis.edu](mailto:honors@ucdavis.edu); <http://honors.ucdavis.edu>

The University Honors Program (UHP) is an interdisciplinary, campus-wide honors program for highly motivated students interested in enhancing their education through special courses, close contact with faculty, and dynamic interaction with academic peers. High-achieving students are invited in spring to apply for participation in the fall.

General Education Honors courses, seminars, and special study opportunities constitute the course offerings of the University Honors Program. A complete list of these courses, with course registration numbers, is made available to admitted students through the UHP office.

Approximately 185 students live in the Honors Academic Residential Community during their first year. Students ranked within the top 5% of the UC Davis entering class are invited to participate.

and are selected to create a balanced community of students from all four undergraduate colleges. For specific program details, see the University Honors Program website at <http://honors.ucdavis.edu>.

### Prizes and Awards

The University Medal is the highest campus honor awarded to a graduating senior in recognition of superior scholarship and achievement. A College or School Medal is also given to the outstanding graduating student in each of the colleges and professional schools.

Departmental citations, special awards and prizes are also awarded to students for superior achievement and scholarship.

**College of Agricultural and Environmental Sciences.** Each year, the outstanding graduating senior in the College is awarded a silver medal, known as the "Agricultural and Environmental Sciences Medal." Scholastic excellence (in a minimum of six quarters at UC Davis) is the primary basis for choosing the recipient. The Mary Regan Meyer Prize is awarded to an outstanding graduate who has demonstrated expertise and an interest in serving humanity. The Charles E. Hess Award is awarded to the graduate with the most noteworthy record of public/community service while at UC Davis. The Kinsella Memorial Prize, in honor of John E. Kinsella, is awarded annually to an outstanding individual who submits his or her Ph.D. dissertation during the spring, fall winter quarter or summer session immediately preceding the due date for nomination.

**College of Biological Sciences.** Each year, the College Medal is awarded to one outstanding graduating senior. Academic excellence and outstanding research are the primary bases for selecting medal nominees. The Undergraduate Student of the Year is awarded to a graduating senior based on academic excellence, research activity and involvement in service to the campus or community. For additional information regarding college awards, please contact the Dean's Office or the Biology Academic Success Center.

**College of Engineering.** Each year, outstanding senior students in engineering are selected by their grade point averages as nominees for the M.S. Ghausi Medal. Academic excellence is the primary basis for selecting the recipient of the award. Graduate students are eligible for the Zuhair Munir Award, given to the student who has submitted the year's best engineering doctoral dissertation. The award honors Zuhair Munir, former Dean of the College and its Associate Dean for Graduate Studies for twenty years.

**College of Letters and Science.** Graduating seniors with a distinguished academic record may be recommended by the faculty as nominees for the College's Herbert A. Young Medal. Each June, one medalist is selected from among the graduates of the current academic year. The Leon H. Mayhew Award is conferred upon the outstanding graduate majoring in the arts or humanities, preferably music, art, or literature. Academic excellence is the primary basis for selecting the recipients of these awards. The Lawrence J. Andrews prize is awarded to a student entering the senior year who not only has achieved academic excellence but who also has demonstrated interests outside of pure scholarship.

### Chancellor's Award for Excellence in Mentoring Undergraduate Research

These prestigious awards recognize a graduating senior who has distinguished him/herself through their excellence in undergraduate research; and faculty, postdocs or graduate students who have excelled in mentoring undergraduate researchers. The student winner, chosen for completing research or scholarship in any academic subject while at UC Davis, is announced and awarded a special plaque at commencement ceremonies in June. In conjunction with the Chancellor's Award, Professor Dean Simonton of UC Davis' Department of Psychology established an endowment for funding a cash prize for each year's student recipient. An award is also given each year to a faculty, graduate student or postdoctoral fellow mentors for their outstanding contribution to mentoring undergraduate researchers. For more information, see [http://urc.ucdavis.edu/awards/chancellors\\_award/index.html](http://urc.ucdavis.edu/awards/chancellors_award/index.html).

### Honorary Societies

Election to an honorary society is one of the most prestigious awards a student can receive. At UC Davis, the following honor societies are established as student organizations:

- Alpha Omega Alpha (Medicine)
- Alpha Zeta (College of Agricultural and Environmental Sciences)
- Chi Epsilon (Engineering)
- Golden Key (All colleges and schools)
- The National Society of Collegiate Scholars (All colleges and schools)
- Order of Omega (Fraternities-Sororities)
- Phi Alpha Theta (History)
- Phi Kappa Phi (All colleges and schools)
- Prytanean Honor Society (All colleges-undergraduate women only)
- Psi Chi (Psychology)
- Tau Beta Pi (Engineering)

### LEAVING UC DAVIS

#### Graduation

Each candidate for an undergraduate degree must file an **Application for Graduation** with the Office of the University Registrar for the quarter in which the candidate plans to receive the degree; see <http://registrar.ucdavis.edu/graduation>. The dates for campus filing are published in the **Academic Calendar**, on page 1, and at <http://registrar.ucdavis.edu/registration/leave/graduate/>.

Students in the College of Agricultural and Environmental Sciences must have their Major Certification evaluated by the dean's office before their candidacy for a degree can be finalized; see **Bachelor's Degree Requirements** for the college in the **Undergraduate Education** chapter.

Graduating students who wish to participate in the Commencement Ceremony must register to do so with their college by the filing deadline for that term at <http://commencement.ucdavis.edu>. Commencement Ceremonies are held twice a year, in the fall (December) and spring (June).

Please note that to graduate, undergraduate students *must* file an Application for Graduation with the Office of the University Registrar by the stated deadline. To participate in the Commencement Ceremony, a student *must* register with their college by the stated deadline. *These are separate actions.*

### **Leave of Absence: Planned Educational Leave Program (PELP)**

The Planned Educational Leave Program allows any registered student—undergraduate or graduate—to suspend academic work at UC Davis temporarily. Undergraduates may take one such leave during their academic career at UC Davis; that leave is limited to one quarter in duration. Undergraduates apply for PELP through the Office of the University Registrar at <http://registrar.ucdavis.edu/registration/leavelelp.cfm>. Graduate students apply through their departments and professional students apply through their dean's office.

Applications for PELP may be filed as late as the tenth day of instruction during the quarter for which the student is requesting a leave. However, approved applications submitted after the first day of instruction will entitle you to only a partial retraction of tuition and student fees assessed, which may provide a refund in accordance with the Schedule of Refunds. The Schedule of Refunds refers to calendar days beginning with the first day of instruction. The effective date for determining a refund of fees is the date the completed and approved PELP Form is returned to the Office of the University Registrar; see the *Fees, Expenses and Financial Aid* chapter.

An application fee is charged to your account when you enroll in the PELP program.

While students may receive academic credit at other institutions and transfer this credit to UC Davis (subject to rules concerning transfer credit), participants are reminded that the intent of the program is to “suspend academic work.” Therefore, students are urged to carefully evaluate the desirability of taking academic work while away from the campus during PELP. Students enrolled in PELP are not eligible to enroll in Open Campus (Concurrent) courses at the UC Davis campus or to otherwise earn academic credit at UC Davis during the PELP leave.

You will not be eligible to receive normal university services during the planned leave. Certain limited services, however, such as placement and student employment services, counseling, and faculty advising are available. Students on PELP may elect to voluntarily enroll in the Davis Health Insurance Plan (SHIP). Undergraduate students may elect to enroll for one additional quarter of coverage. Graduate students may elect to enroll for up to two quarters or one semester of coverage. Students on PELP may also purchase limited borrowing privileges from the library. International students should consult Services for International Students and Scholars to find out how the PELP will affect their status. Grants and other financial aids will be discontinued for the period of the leave, but effort will be made, where legally possible, to allow you to renegotiate loan payment schedules and to ensure the availability of financial aid upon your return.

### **Cancellation/Withdrawal**

To cancel your registration before the first day of instruction or to withdraw from the university on or after the first day of instruction but on or before the last day of instruction,

undergraduate and graduate students must complete an online Cancellation/Withdrawal Form accessed through the Office of the University Registrar at <http://registrar.ucdavis.edu/registration/leave/cancellation-withdrawal.cfm>. Professional students must see their Registrar or administrative office to cancel or withdrawal. If you do not submit a Cancellation/Withdrawal Form, you will be liable for fees according to the Schedule of Refunds; see the *Fees, Expenses and Financial Aid* chapter. The effective date for determining a refund of fees is the date the Cancellation/Withdrawal Form is submitted. No exceptions will be made to this policy. After filing your withdrawal form, you must complete an Exit Interview with Student Accounting; see Student Accounting at <http://studentaccounting.ucdavis.edu/>.

If you are receiving financial aid, you must report your change of status immediately, in person or by mail, to the Financial Aid Office. If you are receiving veteran's benefits, you must also report your withdrawal to the Veterans Affairs Office.

**College of Agricultural And Environmental Sciences** students planning to withdraw from the University are strongly advised to meet with an adviser in Undergraduate Advising Programs in 150 Mrak Hall or call 530-752-0108 to discuss readmission requirements prior to withdrawing.

**College of Engineering** students planning to withdraw from the University are strongly advised to meet with an adviser in the Engineering Undergraduate Office in 1050 Kemper Hall or call 530-752-1979 to discuss readmission requirements prior to withdrawing.

**College of Letters and Science** students planning to withdraw are strongly advised to meet with an adviser in the Undergraduate Education and Advising Office in 200 Social Science and Humanities Building or call 530-752-0392 to discuss readmission requirements prior to withdrawing.

**Retroactive Withdrawal.** Petitions for retroactive withdrawal may be obtained from the Office of the University Registrar. Petitions are subject to approval by the Academic Senate Committee on Grade Changes. Reasons for seeking such are medical problems, severe emotional difficulties, or death or severe illness in the immediate family. Petitions should include a detailed account of the problem, appropriate documentation and an adequate explanation of why withdrawal was not taken during the quarter in which the problem occurred.

### **RETURNING TO UC DAVIS; READMISSION**

If you are a former UC Davis undergraduate student who wishes to resume undergraduate studies, you may reapply through the Readmission process. You are considered a former student if you have interrupted the completion of consecutive terms of enrollment on the UC Davis campus. For details regarding the Readmission process, see <http://registrar.ucdavis.edu/registration/return/readmission.cfm>.

You may access the online Readmission application through the Office of the University Registrar at <http://registrar.ucdavis.edu/registration/return/readmission.cfm>. The online Readmission application must be submitted with the non-transferable, non-refundable application fee on or before the following deadlines:

- **Fall.** August 31.
- **Winter.** October 31.
- **Spring.** January 31.

UNDERGRADUATE EDUCATION

## UNDERGRADUATE EDUCATION

5th Floor, Mrak Hall  
530-752-6068

UC Davis offers the Bachelor of Arts (A.B.) and Bachelor of Science (B.S.) degrees in more than 100 major programs and many minors.

Undergraduate Education is governed by the Vice Provost and Dean for Undergraduate Education, and the Undergraduate Council, a standing committee of the Davis Division of the Academic Senate. The Vice Provost and Dean is also responsible for education-related programs including the Undergraduate Research Center, the Center for Leadership Learning, the University Honors Program, First Year Seminars, the Washington Program, Entry Level Writing, Summer Sessions, the Center for Educational Effectiveness, and International and Academic English.

Academic programs are offered by the four undergraduate colleges: the College of Agricultural and Environmental Sciences, the College of Biological Sciences, the College of Engineering, and the College of Letters and Science.

## COLLEGE OF AGRICULTURAL AND ENVIRONMENTAL SCIENCES

Office of the Dean  
150 Mrak Hall  
530-752-0108; <http://www.caes.ucdavis.edu>

Major programs in the College of Agricultural and Environmental Sciences highlight the multiple connections among agricultural sciences, environmental sciences and human sciences within the larger context of the quality of life in the global economy. The majors fall into three broad areas of study described below. The College of Agricultural and Environmental Sciences also offers two college-wide degree programs and two college-wide non-degree programs.

### The Undergraduate Programs

#### **Agricultural Sciences**

These majors prepare students in animal biology and the management of environmental resources as needed to develop sustainable animal production technologies. Also considered is the impact of production and management processes on animal health and welfare, human diet and health, and the natural environment.

The majors that focus on plant science provide a strong background in the context of agricultural and environmental systems and societal needs; ecological understanding of food and fiber production systems; biological and economic principles that underlie management decisions in agribusiness; and a basic background in all areas of plant biology, including plant development, plant protection, biotechnology and post-harvest physiology.

#### **Majors:**

- Agricultural and Environmental Education, B.S.
- Animal Biology, B.S.
- Animal Science, B.S.
- Animal Science and Management, B.S.
- Biotechnology, B.S.
- Entomology, B.S.
- Plant Sciences, B.S.
- Sustainable Agriculture and Food Systems, B.S.

- Sustainable Environmental Design, B.S.
- Viticulture and Enology, B.S.

#### **Minors:**

- Agricultural Pest Management
- Agricultural Systems & Environment
- Applied Computing and Information Systems (Plant Sciences)
- Animal Biology (Animal Science)
- Animal Genetics (Animal Science)
- Aquaculture (Animal Science)
- Avian Sciences
- Dairy/Livestock (Animal Science)
- Environmental Horticulture (Plant Sciences)
- Equine (Animal Science)
- Forensic Entomology
- Fungal Biology and Ecology (Plant Pathology)
- Insect Biology (Entomology)
- Insect Ecology and Evolution
- Landscape Restoration
- Medical-Veterinary Entomology (Entomology)
- Nematology
- Precision Agriculture (Biological and Agricultural Engineering)

#### ***Environmental Sciences***

These majors focus on the broad facets of the human and natural environments and their interactions. They draw on the social, physical and biological sciences as needed to prepare students for leadership and advanced studies in the areas of natural resource management, environmental quality and stewardship, community planning and design, and public policy decision making.

#### **Majors:**

- Agricultural and Environmental Education, B.S.
- Atmospheric Science, B.S.
- Ecological Management and Restoration, B.S.
- Environmental Horticulture and Urban Forestry, B.S.
- Environmental Policy Analysis and Planning, B.S.
- Environmental Science and Management, B.S.
- Environmental Toxicology, B.S.
- Global Disease Biology, B.S.
- Hydrology, B.S.
- Landscape Architecture, B.S.
- Marine and Coastal Science, B.S.
- Sustainable Agriculture and Food Systems, B.S.
- Sustainable Environmental Design, B.S.
- Wildlife, Fish, and Conservation Biology, B.S.

#### **Minors:**

- Atmospheric Science (Land, Air, and Water Resources)
- Environmental Policy Analysis and Planning (Environmental Science and Policy)
- Environmental Toxicology
- Geographic Information Systems (Biological and Agricultural Engineering)
- Geographic Studies (Environmental Design)
- Global Disease Biology (Plant Pathology)
- Hydrology (Land, Air, and Water Resources)
- International Science Studies (Land, Air, and Water Resources)
- Landscape Restoration (Plant Sciences)
- Soil Science (Land, Air, and Water Resources)
- Watershed Science (Land, Air, and Water Resources)
- Wildlife, Fish, and Conservation Biology

## **Human Sciences**

These majors foster a deeper understanding of the multiple connections between scientific and cultural issues in the context of human health and the quality of life. Basic physical and biological science, social science, design, and economic principles are taught in this context, linking food and fiber production to consumption, emerging knowledge to societal applications and policy, and human development to active, informed citizenship. Emphasis is on linking resources for humans with humans as resources. Physiological, social and aesthetic dimensions of the human experience are explored.

### **Majors:**

- Agricultural and Environmental Education, B.S.
- Clinical Nutrition, B.S.
- Community and Regional Development, B.S.
- Fiber and Polymer Science, B.S.
- Food Science, B.S.
- Human Development, B.S.
- International Agricultural Development, B.S.
- Managerial Economics, B.S.
- Nutrition Science, B.S.
- Sustainable Agriculture and Food Systems, B.S.
- Sustainable Environmental Design, B.S.
- Textiles and Clothing, B.S.

### **Minors:**

- Aging and Adult Development (Human and Community Development)
- Community Development (Human and Community Development)
- Community Nutrition (Nutrition)
- Fiber and Polymer Science (Textiles and Clothing)
- Food Service Management (Nutrition)
- Human Development (Human and Community Development)
- International Agricultural Development (Plant Sciences)
- Managerial Economics (Agricultural and Resource Economics)
- Nutrition and Food (Nutrition)
- Nutrition Science (Nutrition)
- Textiles and Clothing

## **College-wide Programs**

The college-wide programs cut across all of the above areas, providing students in a variety of majors with a background in such areas as public policy, economic principles in a global context and the intersections among environmental, agricultural and socio-economic issues. College-wide programs also include non-degree, lower division curricula aimed at providing students with a foundational knowledge base and the potential for developing individualized programs.

### **Majors:**

- Individual Major, B.S. (suspended)

### **Minors:**

- Contemporary Leadership
- Science and Society

### **Non-degree programs:**

- Undeclared/Exploratory
- Science and Society

## **COLLEGE OF BIOLOGICAL SCIENCES**

Biology Academic Success Center  
1023 Sciences Laboratory Building  
530-752-0410; <http://basc.ucdavis.edu/>

The College of Biological Sciences administers undergraduate programs in fundamental aspects of biology. The college is organized into five departments that represent major themes of modern biology: Evolution and Ecology; Microbiology and Molecular Genetics; Molecular and Cellular Biology; Neurobiology, Physiology, and Behavior; and Plant Biology. A total of eight specialized majors are offered, each focusing on one of the core disciplines of biology. The Biological Sciences major, the Individual major, the Undeclared Life Sciences program and the Bodega Marine Laboratory Spring Quarter Program are offered by the entire college.

The academic advising for all majors within the college is administered through the Biology Academic Success Center (BASC). Students enrolled, or interested, in any of the college's majors may meet with an academic adviser at BASC to receive information on all major, college and university requirements, policies, and procedures, including PELP, withdrawal, readmission, change of major or college, multiple majors and late actions. Academic advisers work closely with master advisers, who are faculty members in the departments, to connect students to research opportunities in a variety of fields, and career development experiences in the community. Students are encouraged to meet with their academic advisers at least yearly, starting during their first two quarters of enrollment in the college.

## **The Undergraduate Programs**

### **Biological Sciences**

The Biological Sciences major is broad in concept, designed to span the numerous core disciplines of biology. The major covers most dimensions of the study of life, ranging from molecules and cells to populations of organisms.

#### **Major:**

- Biological Sciences, A.B., B.S.

#### **Minor:**

- Biological Sciences

### **Evolution and Ecology**

The major in Evolution, Ecology and Biodiversity offers the student a broad background in the theoretical and empirical basis of our understanding of the evolution and ecology of living organisms. The program of study begins with a core of introductory courses in mathematics, physical sciences and biology. These are followed by survey courses in evolution and ecology and more specialized courses that focus the student on particular disciplines or organisms, with an emphasis on problem-solving and critical thinking.

#### **Major:**

- Evolution, Ecology and Biodiversity, A.B., B.S.

#### **Minor:**

- Evolution, Ecology and Biodiversity

### ***Microbiology and Molecular Genetics***

Microbiology deals with bacteria, yeasts and other fungi, algae, protozoa and viruses. These microorganisms are ubiquitous in nature and play a crucial role in areas such as agriculture, biotechnology, ecology, medicine and veterinary science. The field of microbiology contributes to areas of fundamental inquiry such as biochemistry, cell biology, evolution, genetics, molecular biology, pathogenesis and physiology.

**Major:**

- Microbiology, A.B., B.S.

### ***Molecular and Cellular Biology***

The Department of Molecular and Cellular Biology offers three majors.

The Biochemistry and Molecular Biology major introduces students to the chemistry of living organisms and the experimental techniques that are used to probe the structures and functions of biologically important molecules. Students who enjoy both chemistry and biology and who are comfortable with quantitative approaches to problem-solving will find this major a rewarding field of study.

The Cell Biology major provides a comprehensive understanding of the cell, the basic structural and functional unit of all living organisms. The major emphasizes the principles that govern how biomolecules interact with one another to organize themselves into higher order structures that comprise cells and how cellular organization and function contribute to the development, maintenance and reproduction of adult organisms.

The Genetics and Genomics major provides a broad background in the biological, mathematical and physical sciences basic to the study of heredity and evolution. The major provides a dual focus on the molecular mechanisms that regulate utilization of information encoded within the genome as well as the mechanisms and analysis of inheritance of genetic information. The major is sufficiently flexible to accommodate students interested in the subject either as a basic discipline in the biological sciences or in terms of its applied aspects in medicine, biotechnology and agriculture.

**Majors:**

- Biochemistry and Molecular Biology, B.S.
- Cell Biology, B.S.
- Genetics and Genomics, B.S.

### ***Neurobiology, Physiology, and Behavior***

The Neurobiology, Physiology, and Behavior major emphasizes the understanding of vital functions common to all animals. All animals perform certain basic functions-they grow, reproduce, move, respond to stimuli and maintain homeostasis. The physiological mechanisms upon which these functions depend are precisely regulated and highly integrated. Actions of the nervous and endocrine systems determine behavior and the interaction between organisms and their physical and social environments. Students in this major will study functional mechanisms; the control, regulation and integration of these mechanisms; and the behavior which relates to those mechanisms at the level of the cell, the organ system and the organism.

**Majors:**

- Neurobiology, Physiology, and Behavior, B.S.

**Minors:**

- Exercise Biology
- Human Physiology
- Neuroscience

### ***Plant Biology***

Plant Biology is the study of plants as organisms. It includes the newer disciplines of cellular and molecular plant biology and the traditional areas of botany, such as anatomy, morphology, systematicatics, physiology, mycology, phycology, ecology and evolution. The major provides breadth in diverse areas of plant biology and depth in one of several areas of specialization.

**Major:**

- Plant Biology, A.B., B.S.

**Minor:**

- Plant Biology

### ***College-wide Programs***

#### ***Quantitative Biology and Bioinformatics***

The interdisciplinary minor in Quantitative Biology and Bioinformatics is an integrative program that introduces students to the quantitative and computational approaches that are redefining all disciplines in the biological sciences, from molecular and cell biology, through genetics and physiology, to ecology and evolutionary biology. The minor in Quantitative Biology and Bioinformatics is open to all undergraduates regardless of major and is sponsored by the College of Biological Sciences.

**Minor:**

- Quantitative Biology and Bioinformatics

#### ***Individual Major***

Students whose academic interests are not met by any established major, or combinations of majors and minors may develop an Individual major. Students work in conjunction with the Committee on Undergraduate Petitions and a faculty member in the college.

**Major:**

- Individual Major, A.B., B.S.

Students who wish to explore the array of life science majors offered at UC Davis before declaring a major may be admitted to the college through the Undeclared-Life Sciences program. These students use the Biology Academic Success Center for their advising center. Students in this program must declare a major before completing 90 units.

### ***Bodega Marine Laboratory Program***

<http://bml.ucdavis.edu/>

#### ***Spring Quarter Program***

A full quarter of undergraduate course work in marine biology is available each spring quarter at the Bodega Marine Laboratory, located in Bodega Bay, California. Course offerings include lecture

and laboratory instruction in the developmental biology and physiological adaptation of marine organisms, and population biology and ecology; a weekly colloquium; and an intensive individual research experience under the direction of laboratory faculty (Biological Sciences courses 120, 120P, 122, 122P, 123; Neurobiology, Physiology, and Behavior 141, 141P). This is a 15 unit program and course offerings and instructors may vary from year to year. Applications are due January 31. For more course detail, see [Bodega Marine Laboratory Program, on page 197](#) or <http://bml.ucdavis.edu/>.

### **Summer Sessions Courses**

This integrated program offers students a multidisciplinary understanding of coastal ecosystems through intensive, hands on courses taught at Bodega Marine Laboratory. The program offers courses during the Summer Session 1 and Summer Session 2 academic quarters with up to 10 units available in each quarter. Applications are due March 15. For more course detail, see full description under appropriate academic department listing or <http://bml.ucdavis.edu/>.

Course offerings and instructors may vary from year to year.

BML programs are residential with students housed on the laboratory grounds. Participants are assessed a room and board fee in addition to standard campus registration fees. Additional information is available directly from the Bodega Marine Laboratory at 707-875-2211, P.O. Box 247, Bodega Bay, CA 94923.

## **COLLEGE OF ENGINEERING**

Undergraduate Office  
1050 Kemper Hall  
530-752-1979; <http://engineering.ucdavis.edu>  
Facebook: <http://www.facebook.com/UCDEngineering>

Engineering is the profession in which the physical and biological sciences are applied in a practical way for the benefit of society. As an engineering student, you will learn to observe and describe technological problems and to seek useful solutions to them. Your skills upon graduation will be useful to you not only as an engineer, but also as a professional in management, sales, operations, manufacturing and other fields.

**Undergraduate Majors.** Eleven undergraduate majors are offered. Each of these is a four-year program leading to the degree of Bachelor of Science.

The following programs are accredited by the Engineering Accreditation Commission of ABET; see <http://www.abet.org>:

- Aerospace Science and Engineering
- Biochemical Engineering
- Biomedical Engineering
- Biological Systems Engineering
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Electrical Engineering
- Materials Science and Engineering
- Mechanical Engineering

The Engineering Accreditation Commission and the Computing Accreditation Commission of ABET accredit the following program; see <http://www.abet.org>:

- Computer Science and Engineering

**Minor Programs.** The College of Engineering currently offers nine minor programs:

- Biomedical Engineering (Department of Biomedical Engineering)
- Construction Management and Engineering (Department of Civil and Environmental Engineering)
- Computational Biology (Department of Computer Science)
- Electrical Engineering (Department of Electrical and Computer Engineering)
- Energy Efficiency (Department of Biological and Agricultural Engineering)
- Energy Science and Technology (Department of Biological and Agricultural Engineering)
- Energy Policy (Department of Biological and Agricultural Engineering)
- Materials Science (Department of Chemical Engineering and Materials Science)
- Sustainability in the Built Environment (Department of Civil and Environmental Engineering)

In addition, the Department of Computer Science offers a minor in Computer Science.

## **The Undergraduate Programs**

### ***Biological and Agricultural Engineering***

Biological Systems Engineering majors learn to combine the science and art of engineering with the science of biology to design systems that influence, control, or use biological materials and organisms for improving the quality of life. Specific objectives include designing systems to process biological materials into consumer products; designing machines to interact with biological systems in disciplines ranging from agriculture to medicine; managing, recycling and using wastes; developing systems to protect and preserve our natural resources and environment; developing and improving processing systems for food; designing equipment and systems that improve nutrition and diets; and minimizing waste discharge to the environment.

**Major:**

- Biological Systems Engineering, B.S.

**Minors:**

- Energy Science and Technology
- Energy Policy
- Energy Efficiency

### ***Biomedical Engineering***

The Department of Biomedical Engineering advances fundamental medical concepts; creates knowledge from the molecular to the organ systems levels; and develops innovative biologics, materials, processes, implants, devices and informatics approaches. These approaches are applied to the prevention, diagnosis and treatment of disease. The objective is to prepare students for employment in companies that manufacture medical assist devices, human tissue products and therapeutics. The program also prepares students to enter a graduate program in biomedical engineering or pursue professional degrees in medicine and related health fields.

**Major:**

- Biomedical Engineering, B.S.

**Minor:**

- Biomedical Engineering

### ***Chemical Engineering***

The Department of Chemical Engineering and Materials Science offers three majors.

Chemical Engineering majors learn to apply chemical and engineering principles to create useful products ranging from antibiotics to zirconium, from petroleum to plutonium, from agricultural chemicals to plastics. Specific objectives include the design of industrial processes as diverse as integrated circuit materials production, integrated waste management and petroleum refining.

Biochemical Engineering majors combine chemical engineering studies with studies in the life sciences and bioprocess engineering. Bioprocess engineering is the application of engineering principles to develop, optimize and commercialize manufacturing processes. Specific objectives include pharmaceuticals production, environmental repair, industrial chemical production and food production.

***Majors:***

- Biochemical Engineering, B.S.
- Chemical Engineering, B.S.

### ***Civil and Environmental Engineering***

Civil Engineering majors learn to apply the principles of the physical and biological sciences and engineering to plan and design systems to improve the quality of life. Specific objectives include providing potable water and freedom from disease-carrying wastes; protecting the natural environment; mitigating the effects of earthquakes and other natural disasters; designing land-, water- and air-transportation systems; and building roads and structures.

***Major:***

- Civil Engineering, B.S.

***Minors:***

- Construction Engineering and Management
- Sustainability in the Built Environment

### ***Computer Science and Engineering***

The field of computer science and engineering encompasses the organization, design, analysis, theory, programming and application of digital computers and computing systems. The curriculum develops versatile engineers with backgrounds spanning a broad computer/software spectrum. The Computer Science and Engineering major provides a solid background in mathematics, physics, chemistry and electronic circuits and systems—all supporting the computer hardware and software courses that form the focus of the curriculum. A key theme is the hardware/software interaction in computer system design; this theme is reflected in the balance between hardware and software course requirements and in the orientation of the courses themselves.

***Major:***

- Computer Science and Engineering, B.S.

***Minor:***

- Computational Biology

### ***Electrical and Computer Engineering***

Electrical Engineering majors learn to apply the principles of the physical sciences and engineering to the design, analysis, development, production and evaluation of electronic systems. Specific objectives include the provision of systems for communications, control, signal processing, integrated circuit fabrication, optoelectronics, consumer electronics and digital systems.

Computer Engineering majors study the design, development, analysis, organization, theory, programming and application of digital computers. Specific objectives include developing the student's ability to design both software and hardware. In comparison to the Computer Science and Engineering major, the Computer Engineering major provides greater emphasis on hardware in the key hardware/software interaction in computer system design.

***Majors:***

- Computer Engineering, B.S.
- Electrical Engineering, B.S.

***Minor:***

- Electrical Engineering

### ***Materials Science and Engineering***

The Department of Materials Science and Engineering offers one major.

Materials Science and Engineering majors learn to understand the relationships among microscopic structure, properties and behavior of materials in order to produce new and improved materials with capabilities far superior to common metals, alloys and ceramics. Specific objectives include the development of materials for high-speed transportation systems, surgical and dental implants, new generations of power plants and solid-state electronic devices in computer and optical communications technology.

***Major:***

- Materials Science and Engineering, B.S.

***Minor:***

- Materials Science

### ***Mechanical and Aerospace Science Engineering***

Aerospace Science and Engineering majors learn to apply the principles of the physical sciences and engineering to vehicles whose motion is determined by aerodynamic forces. Specific objectives include the design, development and manufacture of aircraft and other transportation systems integrating the disciplines associated with aerodynamics, propulsion, structures and guidance/control.

Mechanical Engineering majors learn to apply physical and mechanical principles to the design and manufacture of machines and products, energy conversion systems and equipment for guidance and control. Specific objectives include the provision of products and processes for intelligent manufacturing systems, biomechanical and sports equipment, power generation systems, propulsion for transportation, integration of vehicles and automated highways, and applications of computer and automation technologies.

***Majors:***

- Aerospace Science and Engineering, B.S.
- Mechanical Engineering, B.S.

## COLLEGE OF LETTERS AND SCIENCE

Office of Undergraduate Education  
and Advising  
Room 200, Social Sciences  
and Humanities Building  
530-752-0392; <http://www.ls.ucdavis.edu/advising/>

Major programs in the College of Letters and Science provide students systematic exposure to the key principles, methods, findings and representations of a selected area of study. In pursuing a major, students gain intellectual depth and competency in that subject matter, explore important linkages with collateral fields of inquiry and are encouraged to engage in independent study.

The academic programs offered through the college are grouped in three divisions: Humanities, Arts and Cultural Studies; Mathematical and Physical Sciences; and Social Sciences. One college-wide degree program, the individual major, also is available.

### The Undergraduate Programs

#### ***Division of Humanities, Arts and Cultural Studies***

These majors focus centrally on the artifacts, expressions and concerns of humankind in various cultures and times. They provide students the opportunity to explore the creation, performance and analysis of works of art, the language and customs of non-English speaking societies, the theory and criticism of literature, and the peoples and cultures of this nation and its hemisphere. Students interested in studying these types of issues may select from more than 25 different majors.

##### **Majors:**

- African American and African Studies, A.B.
- American Studies, A.B.
- Art History, A.B.
- Art Studio, A.B.
- Asian American Studies, A.B.
- Chicana/Chicano Studies, A.B.
- Chinese, A.B.
- Cinema and Digital Media, A.B.
- Classical Civilization, A.B.
- Comparative Literature, A.B.
- Design, A.B.
- English, A.B.
- French, A.B.
- Gender, Sexuality and Women's Studies, A.B.
- German, A.B.
- Italian, A.B.
- Japanese, A.B.
- Medieval and Early Modern Studies, A.B.
- Music, A.B.
- Native American Studies, A.B.
- Religious Studies, A.B.
- Russian, A.B.
- Spanish, A.B.
- Theatre and Dance, A.B.
- Women's Studies, A.B.

##### **Minors:**

- African American and African Studies
- American Studies
- Art History
- Art Studio
- Asian American Studies

- Chicana/Chicano Studies
- Chinese
- Classical Civilization
- Comparative Literature
- Dramatic Art
- English
- Film Studies
- French
- Gender, Sexuality and Women's Studies
- German
- Global and International Studies
- Greek
- Human Rights
- Italian
- Japanese
- Latin
- Luso-Brazilian Studies
- Medieval and Early Modern Studies
- Music
- Native American Studies
- Professional Writing
- Religious Studies
- Russian
- Sexuality Studies
- Social and Ethnic Relations
- Spanish

#### ***Division of Mathematical and Physical Sciences***

These majors focus primarily on the description and interpretation of the structure, processes and events of the physical universe. They provide students the opportunity to explore in depth the structure, properties and reactions of substances; fundamental mathematical techniques and models and their application to the interpretation and explanation of phenomena; studies of matter and energy and their interconversions; the nature and development of computer languages; and earth and environmental processes. Students interested in studying these types of subjects may select from twelve different majors. The division strongly encourages undergraduates to enroll in undergraduate research projects with one-on-one instruction by faculty scholar/researchers.

##### **Majors:**

- Applied Mathematics, B.S.
- Applied Physics, B.S.
- Chemical Physics, B.S.
- Chemistry, A.B., B.S.
- Computer Science, B.S.
- Geology, A.B., B.S.
- Marine and Coastal Science, B.S.
- Mathematical and Scientific Computation, B.S.
- Mathematical Analytics and Operations Research, B.S.
- Mathematics, A.B., B.S.
- Natural Sciences, B.S.
- Pharmaceutical Chemistry, B.S.
- Physics, A.B., B.S.
- Statistics, A.B., B.S.

##### **Minors:**

- Chemistry
- Computer Science
- Environmental Geology
- Geology
- Geophysics

- Mathematics
- Oceanography
- Physics
- Statistics

### **Division of Social Sciences**

These majors focus largely on issues and problems that characterize social, cultural, political and economic life across human societies. They provide students the opportunity to explore the relationships between people and the groups and organizations of which they are a part, the antecedents of individual behavior, the development of political and economic systems, the social forces that have shaped the contemporary world and the foundations of language, thought, knowledge and perception. Students interested in studying these types of issues may select from 15 dozen different majors.

#### **Majors:**

- Anthropology, A.B., B.S.
- Cognitive Science, A.B., B.S.
- Communication, A.B.
- East Asian Studies, A.B.
- Economics, A.B.
- History, A.B.
- International Relations, A.B.
- Linguistics, A.B.
- Middle East/South Asia Studies, A.B.
- Philosophy, A.B.
- Political Science, A.B.
- Political Science–Public Service, A.B.
- Psychology, A.B., B.S.
- Science and Technology Studies, A.B.
- Sociology, A.B.
- Sociology–Organizational Studies, A.B.

#### **Minors:**

- Anthropology
- Arab Studies
- Coaching Principles and Methods
- Communication
- East Asian Studies
- Economics
- History
- History and Philosophy of Science

- India and South Asia Studies
- Iran and Persian Studies
- Jewish Studies
- Latin American and Hemispheric Studies
- Linguistics
- Linguistics for Language Teachers
- Middle East/South Asia Studies
- Philosophy
- Political Science
- Psychology
- Sociology
- War-Peace Studies

### **College-wide Program**

Students whose academic interests cannot be satisfactorily met through the completion of an established major have the opportunity to develop an individual major. Individual majors may reflect the most recent trends in scholarship and research and are typically interdisciplinary in nature. The major proposal is developed in close and active consultation with two faculty advisers from the academic disciplines most closely related to the subject matter of the individual major. Careful faculty guidance and review assure that individual majors are comparable in academic rigor and intellectual coherence to those regularly available through the departments and programs of the college.

#### **Major:**

Individual Major, A.B., B.S.

## **BACHELOR'S DEGREE REQUIREMENTS**

You must satisfy four groups of requirements before you can become eligible for candidacy for the bachelor's degree; see [Bachelor's Degree Requirements](#), below. The four groups are:

- University requirements, which apply to all colleges;
- General Education requirements, which apply to all colleges;
- College requirements; and
- Major requirements.

You are responsible for seeing that all of your degree requirements are fulfilled.

Detailed information on university requirements, the General Education requirement and college requirements can be found in this chapter.

<b>Bachelor's Degree Requirements</b>			
<b>University Requirements</b>			
All students must fulfill the following University of California requirements:			
Entry Level Writing Requirement			
American History and Institutions Requirement			
Unit Requirement			
Residence Requirement			
Scholarship Requirement			
<b>General Education Requirement</b>			
All students must fulfill the campus General Education Requirement; see <a href="#">General Education Requirement, on page 107.</a>			
<b>College Requirements</b>			
<b>College of Agricultural &amp; Environmental Sciences</b>	<b>College of Biological Sciences</b>	<b>College of Engineering</b>	<b>College of Letters and Science</b>
Unit	Unit	Unit	Unit
Residence	Scholarship	Residence	Residence
Scholarship	English Composition	Scholarship	Scholarship
English Composition	Foreign Language (only A.B. & B.A.S. degrees)	English Composition	English Composition
	Breadth (only A.B. & B.A.S. degrees)	Current Catalog Curriculum	Area (Breadth)
<b>Major Requirements</b>			
Course requirements for each major are listed in the <a href="#">Programs and Courses</a> section of this catalog.			

## UNIVERSITY REQUIREMENTS

All students must fulfill the following University of California requirements.

### Entry Level Writing Requirement

The university requires every undergraduate student to demonstrate college-level proficiency in English composition by satisfying the Entry Level Writing Requirement (ELWR). Satisfaction of the ELWR is a prerequisite to all other undergraduate courses in English.

Students can meet this requirement by scoring:

- 680 or better on the College Board SAT Reasoning Test, Writing section (last administration January 2016); or
- 3 or above on either Advanced Placement Examination in English; or
- 30 or better on the ACT, English Language Arts; or
- 30 or better on the ACT, Combined English/Writing (last administered June 2015); or
- 5 or above on an International Baccalaureate Higher Level English A: Literature exam (formerly known as Higher Level English A1 exam); or
- 6 or above on the International Baccalaureate Standard Level English A: Literature exam (formerly known as Standard Level English A1 exam); or
- 5 or above on an International Baccalaureate Higher Level English A: Language and Literature exam; or
- 6 or above on an International Baccalaureate Standard Level English A: Language and Literature exam.

Students can also meet the requirement by earning a grade of C or higher in an acceptable 3 semester-unit or 4 quarter-unit college-level course in English composition.

All incoming California students who have not met the Entry Level Writing Requirement by April 1 must take the UC Analytical Writing Placement Examination (AWPE). The exam is administered the morning of the second Saturday in May, at testing centers throughout the state. Out-of-state U.S. students and California freshmen admitted after mid-April will take another form of the Analytical Writing Placement Examination on campus at the beginning of Fall quarter. For the time and location, see <http://entrylevelwriting.ucdavis.edu/examination-schedule/analytical-writing-placement-examination>.

The AWPE may be taken only once. Students who have not satisfied the requirement in one of the ways described above and who were not held for ESL coursework in the University Writing Program (see below) *must enroll in Workload 57 during their first quarter of residence at the university, or as soon thereafter as space is available in the course.* Workload 57, offered by Sacramento City College on the UC Davis campus, counts as 4.5 units on the study list and toward minimum progress but carries no units toward graduation. To satisfy the requirement, students must earn a course grade of C or higher; students who receive a grade lower than C must repeat Workload 57. Students who do not satisfy the Entry Level Writing Requirement by the end of the third quarter will be disenrolled from the University.

New students whose native or school language is not English (including some California residents who previously took the AWPE), and some students whose schooling combines work in the United States and in another country, will take the English Language Placement Exam (ELPE) to determine which UWP ESL course(s), if any, are needed prior to enrollment in Workload 57 and fulfillment of the Entry Level Writing Requirement. The English Language Placement Exam, which may be taken only

once, will be delivered via SmartSite and taken remotely during one of several testing periods during the summer before the first quarter. Students whose ELPE results require them to take one or more UWP ESL courses will have the standard three quarters to meet the Entry Level Writing Requirement *plus* the number of quarters they are held for UWP ESL coursework. The ELWR time line begins with the first quarter of enrollment at UC Davis and continues each quarter. Students who do not satisfy the ELWR within the time limit will be disenrolled from the University.

## American History and Institutions

The American History and Institutions requirement ensures that every graduating student will have at least a minimum knowledge of the background of this country's development and an understanding of the political, economic and social interrelationships of its way of life.

You may meet this requirement in any of these ways:

- Complete one high school unit in American history, or 1/2 high school unit in American history and 1/2 high school unit in civics or American government, with a grade of C or better in each course
- Complete any one of the following courses:
  - African American and African Studies 10, 100
  - Asian American Studies 1, 2
  - Chicana/Chicano Studies 10
  - Economics 111A, 111B
  - History 17A, 17B, 72A, 72B, 170A, 170B, 170C, 171A, 171B, 174A, 174B, 174C, 176A, 176B, 177A, 177B, 179, 180A, 180B, 183A, 183B (upper division courses may be taken only with the consent of the instructor)
  - Native American Studies 1, 10, 116, 130A, 130B, 130C
  - Political Science 1, 5, 100, 102, 104, 105, 106, 108, 109, 113, 130, 131, 160, 163

Students electing to complete one of the above courses in order to meet this requirement are subject to the rules for prerequisites and majors

- Present evidence that the requirement has been accepted as satisfied at another campus of the university
- Present evidence that the requirement has been satisfied through courses in the area of American History and Institutions at another collegiate institution whose credits are acceptable for transfer to UC Davis
- Successful completion of the Advanced Placement (AP) Examination in American History or American Government and Politics with a score of 3 or higher
- Successful completion of the International Baccalaureate (IB) Examination in History of the Americas Higher Level (HL) with a score of 5, 6, or 7
- Successful completion of the SAT Subject Examination in U.S. History with a score of 550 or higher

International students, regardless of the type of visa they hold, must meet the university's American History and Institutions requirement for graduation.

## Unit Requirements

A minimum of 180 quarter units is required for graduation. These must be distributed according to the minimum requirements set forth by the faculty of your college.

A maximum of 15 units of Internship Courses (92, 192, or a combination) may be counted toward the 180-unit bachelor's degree requirement.

The acceptability of transfer courses for unit credit is determined by Undergraduate Admissions. The acceptability of such courses toward specific requirements is determined by the individual college or school.

Students should refer to the Advanced Placement Examination chart and their transcripts to eliminate the possibility of duplication of credit.

## Residence Requirements

The minimum residence requirement for a bachelor's degree at the University of California is one academic year (three quarters). Thirty-five of the final 45 quarter units completed by each candidate must be earned while in residence on the UC Davis campus. Each summer session in which a student completes a course of at least 2 quarter units may be counted as half a quarter's residence.

Regularly approved courses (laboratory, field, or other individual work) done outside of a regular session but under the direction of a department of instruction may be accepted upon the recommendation of the department in partial fulfillment of the residence requirement for the bachelor's degree. Registration is with the consent of the instructor only.

UC Davis Extension courses are not accepted as part of the university residence requirement.

There are additional residence requirements for students enrolled in the Colleges of Letters and Science and Engineering. If you are planning to study abroad during your senior year, you should consult your college dean's office or the Biology Academic Success Center.

With the approval of the dean of a student's college or school, a candidate for the bachelor's degree who was in active service in the armed forces of the United States in the year preceding the awarding of the degree may be recommended for the degree after only one quarter of university residence in which the candidate completes at least 16 units or passes a comprehensive examination in the major or field of concentration.

## Scholarship Requirement

To receive a bachelor's degree, you must obtain twice as many grade points as units (a 2.000 GPA) for all courses you have attempted in the university. For specific college requirements consult the college sections following.

## GENERAL EDUCATION REQUIREMENT

The General Education (GE) requirement promotes the intellectual growth of all undergraduates by ensuring that they acquire a breadth of knowledge that will enlarge their perspectives beyond the focus of a major and serve them well as participants in a knowledge-based society. It seeks to stimulate continued growth by providing knowledge of both the content and the methodolo-

gies of different academic disciplines. It involves students in the learning process by its expectation of considerable writing and class participation, and encourages students to consider the relationships between disciplines.

## **General Education (GE) Requirement—Fall 2011 and On**

The following section pertains to students who matriculated to UC Davis for the first time in Fall 2011 or later. Students who matriculated prior to Fall 2011 should refer to the [Former General Education \(GE\) Requirement—Pre-Fall 2011, on page 109](#).

The GE requirement has two components, **Topical Breadth** and **Core Literacies**, and is defined in terms of units, not courses.

### **Topical Breadth Component . . . . . 52 units**

A GE course in topical breadth addresses broad subject areas that are important to the student's general knowledge. The units of most undergraduate courses at UC Davis are assigned to one of the three Topical Breadth Areas.

**Note:** In the case of a course that has been certified in more than one Topical Breadth Area, a student may count the units of the course in only one of the areas in which it has been certified.

- **Arts and Humanities . . . . . 12-20 units**  
Courses in this area provide students with knowledge of significant intellectual traditions, cultural achievements and historical processes.
- **Science and Engineering . . . . . 12-20 units**  
Courses in this area provide students with knowledge of major scientific ideas and applications. They seek to communicate the scope, power, limitations and appeal of science.
- **Social Sciences . . . . . 12-20 units**  
Courses in this area provide students with knowledge of the individual, social, political and economic activities of people.

### **Core Literacies Component . . . . . 35 units**

The literacies are crucial both for success in one's profession and also for a thoughtful engaged citizenship in the community, nation and world.

**Note:** In the case of a course that has been certified in more than one Core Literacy Area, a student may count the units of the course in only one of the core literacy areas in which it has been certified. Additionally, GE credit for a core literacy course a student completes before it was an approved GE literacy course is subject to the relevant dean's office or the Biology Academic Success Center approval.

#### **1. Literacy with Words and Images . . . . . at least 20 units**

The objective of this core literacy is to help students communicate their ideas effectively in written, oral and visual forms. The requirement also seeks to enhance students' critical judgment of oral, written, and visual messages created by others.

**Note:** A student must have completed the Entry Level Writing Requirement (formerly known as the Subject A requirement) before receiving General Education credit for coursework satisfying requirements a, b, and Writing Experience coursework satisfying requirement c, below.

**a. English Composition . . . . . 8 units**  
(as described by College of A&ES, College of L&S, College of Biological Sciences, or College of Engineering)

**b. Writing Experience** coursework in the student's major or in other departments . . . . . at least 6 units

Courses in writing experience provide students instruction on how to communicate ideas in the subject matter of the course. The opportunity to improve writing after having received careful commentary is crucial to this requirement.

**c. Oral Skills** coursework or additional writing experience coursework . . . . . at least 3 units

Courses in oral literacy involve effective communication of ideas through oral presentation and build on and strengthen the critical thinking skills exercised through writing. As an alternative to developing oral communication skills, the student may take additional coursework certified as writing experience (see requirement b, above).

**d. Visual Literacy** coursework . . . . . at least 3 units

Courses in visual literacy provide students with the analytical skills they need to understand how still and moving images, art and architecture, illustrations accompanying written text, graphs and charts, and other visual embodiments of ideas inform and persuade people. Coursework may stress the skills needed to communicate through visual means as well as the analytical skills needed to be a thoughtful consumer of visual messages.

#### **2. Civic and Cultural Literacy . . . . . at least 9 units**

The objective of this core literacy is to prepare students for thoughtful, active participation in civic society. Students will learn to think analytically about American institutions and social relations, understand the diversity of American cultures, and see the relationships between national and local cultures and the world.

**a. American Cultures, Governance, and History . . . . . at least 6 units;**  
of which at least 3 units must be in coursework certified as focusing on issues of domestic diversity.

Courses in American Cultures, Governance, and History provide students with an understanding and appreciation of the social and cultural diversity of the United States and of the relationships between these diverse cultures and larger patterns of national history and institutions.

**b. World Cultures . . . . . at least 3 units**

Courses in World Cultures provide students with a global perspective in a world where communication technologies, economic relationships, and the flow of people across national borders increasingly challenge national identities and create transnational cultures. Students can satisfy this requirement through coursework or through certified study abroad.

#### **3. Quantitative Literacy . . . . . at least 3 units**

The objective of this core literacy is to provide students with an understanding of quantitative reasoning and skills for eval-

uating claims and knowledge generated through quantitative methods.

#### 4. Scientific Literacy . . . . . at least 3 units

The objective of this core literacy is to provide students with an understanding of the fundamental ways scientists approach problems and generate new knowledge, and an understanding of how scientific findings relate to other disciplines and to public policy.

#### **Additional Conditions**

**Meeting Total Units Requirement.** With the exception of units used to satisfy the English Composition element, units approved for a Core Literacy will be accepted toward satisfaction of the appropriate Topical Breadth component. Course units that satisfy requirements in the candidate's major or majors may also be counted toward satisfaction of General Education requirements.

**Grading.** Students may take courses P/NP to fulfill their General Education requirements, up to the limits set by college and campus regulations.

**Advanced Placement and International Baccalaureate.** Students may not present Advanced Placement or International Baccalaureate credit in satisfaction of GE requirements, except insofar as it may be applied to the English Composition component of the Literacy with Words and Images requirement.

**Transfer Students** who have successfully completed the Intersegmental General Education Transfer Curriculum (IGETC) lower division course work are exempt from all General Education requirements that may be met with lower-division courses. Transfer students who have not completed the IGETC, and who are not entitled to graduate under the provisions of a *General Catalog* issued prior to Fall 2011 as permitted by the applicable college policy on degree requirement changes, are required to satisfy all General Education components under the revised requirement but may offer previously completed coursework toward their satisfaction.

#### **Approved Revised General Education Courses**

See New General Education Courses; Fall 2011 and On, on page 592, for a list of the courses that provide General Education credit. Please note that you cannot claim GE credit for a course you completed before it was an approved GE course.

#### **Former General Education (GE) Requirement—Pre-Fall 2011**

The following section pertains to students who matriculated to UC Davis prior to Fall 2011. Students who matriculated for the first time in Fall 2011 or later should refer to the [General Education \(GE\) Requirement—Fall 2011 and On, on page 108](#).

The GE requirement has three components: Topical Breadth, Social-Cultural Diversity and Writing Experience.

#### **Topical Breadth Component . . . . . 6 courses**

Topical breadth courses are grouped into three broad subject areas of knowledge:

**1. Arts and Humanities.** Courses in this area provide students with knowledge of significant intellectual traditions, cultural achievements and historical processes.

**2. Science and Engineering.** Courses in this area provide students with knowledge of major scientific ideas and applications. They seek to communicate the scope, power, limitations and appeal of science.

**3. Social Sciences.** Courses in this area provide students with knowledge of the individual, social, political and economic activities of people.

To fulfill the topical breadth component of the General Education requirement you must successfully complete three approved courses in each of the two subject areas of topical breadth other than the one that includes your major. To identify the area of topical breadth to which your major belongs, see [Topical Breadth Assigned Subject Areas for Majors and Minors; Pre-Fall 2011, on page 631](#). Each academic major has been assigned to one of the three subject areas of GE topical breadth. If you have any questions concerning the subject area to which your major is assigned, consult the relevant dean's office or the Biology Academic Success Center.

A course approved in more than one topical breadth subject area may only be offered in satisfaction of only one of those subject areas.

- **Double majors** will satisfy the topical breadth subject areas to which they are assigned. You will still be responsible for completing any topical breadth subject area in which you do not have a major. If, for example, two majors are assigned to the same subject area, you will need to complete the topical breadth component in each of the other two other subject areas. If, on the other hand, you complete two majors that have been assigned to two different areas of topical breadth then you will be responsible for completing the topical breadth component in only the remaining subject area.
- **Individual majors** are assigned to an area of topical breadth at the time they are approved by your college.
- **Each minor** has also been assigned to one of the three subject areas of topical breadth. A minor assigned to a subject area other than the area of your major will satisfy the GE course requirement for topical breadth in that subject area.
- **Courses in your major** may count toward the topical breadth component when those courses are also assigned to subject areas other than the area of your major.

#### **Social-Cultural Diversity . . . . . 1 course**

Courses in social-cultural diversity teach students the significance of the many patterned differences that characterize human populations—particularly differences of gender, race, ethnicity, sexuality, religion or social class.

To fulfill the social-cultural diversity component of the GE requirement, you must successfully complete one course from the approved list; see [Former General Education Courses; Pre-Fall 2011, on page 616](#).

#### **Writing Experience . . . . . 3 courses**

Courses in writing experience improve student writing through instruction and practice. Writing assignments are designed to encourage students to think critically and communicate effectively. Courses require one extended writing assignment (five

pages or more) or multiple short assignments. Writing is evaluated not only for content, but also for organization, style, use of language, and logical coherence.

To fulfill the writing experience component of the GE requirement, you must successfully complete three courses from the approved list at the back of this catalog.

**Note:** You must satisfy the university Entry Level Writing Requirement (formerly Subject A) before you take any writing experience course for GE credit. If you take an approved writing experience course, but have not yet satisfied the Entry Level Writing Requirement, you will not receive GE writing experience credit for that course.

### **Additional Conditions**

**Letter Grading.** All courses taken to fulfill the GE requirement must be taken for a letter grade. No GE credit will be awarded for a course that you take on a Passed/Not Passed basis.

**College and University Composition Requirements.** The following GE courses may not be used to satisfy university or college requirements in composition and GE writing experience simultaneously:

- Communication 1
- Comparative Literature 1, 2, 3, 4
- English 3
- Native American Studies 5
- University Writing Program 1, 18, 19, 101, 102 series, and 104 series

**Courses Approved for Multiple GE Components.** Courses approved for more than one component of the GE requirement (topical breadth, writing experience and social-cultural diversity) will be accepted toward satisfaction of all components for which the course has been approved.

**College of Engineering.** Beginning in Fall 2011, the General Education requirement changed. The new General Education requirement applies to freshmen admitted Fall 2011 or later. However, students admitted before Fall 2011 may follow the previous General Education requirement. To ensure accurate information about satisfying General Education, all students should schedule an appointment with their Engineering Departmental Adviser or speak with an adviser in the Undergraduate Advising office in 1050 Kemper Hall.

**Transfer Student Exemption for IGETC, TCC and UC Reciprocity.** You are exempt from the UC Davis GE requirement if you come from a California community college and are certified as having successfully completed the "Intersegmental General Education Transfer Curriculum" (IGETC) or "Transfer Core Curriculum" (TCC), or if you come from another UC campus and are certified as having successfully completed the lower division breadth or General Education requirements of that UC campus (UC reciprocity).

If you are a Transfer student who has not completed TCC or IGETC prior to attending UC Davis, transfer work comparable to approved UC Davis GE courses may be used to satisfy the GE requirement, as determined by the college's dean's office or the Biology Academic Success Center.

### **Approved Former General Education Courses**

See [Former General Education Courses; Pre-Fall 2011, on page 616](#), for a list of the courses that provide General Education credit. Please note that you cannot claim GE credit for a course you completed before it was an approved GE course.

### **General Education Theme Options**

The following section pertains to students who matriculated to UC Davis prior to Fall 2011.

General Education theme options are sets of GE courses sharing a common intellectual theme. Faculty from the College of Agricultural and Environmental Sciences has worked collaboratively to develop sets of complementary courses in several areas of interest. These GE theme options are not a separate element of the GE requirement, but a way of selecting your GE courses so that you may benefit from a coherent focus of study while completing the GE requirement.

Completion of a theme satisfies the GE requirement for students with majors assigned to the GE topical breadth area of Arts and Humanities. Students with majors assigned to the topical breadth area of either Science and Engineering or Social Science will need to complete additional GE courses in Arts and Humanities to satisfy the campus GE requirement.

Beginning a theme option does not prevent you from later choosing to take other approved GE courses to fulfill the GE requirement. If you choose to mix courses from a theme option and the broader GE course lists, you will need to make sure that the combination of courses you select will complete the campus GE requirement.

## **COLLEGE REQUIREMENTS FOR THE BACHELOR'S DEGREE**

### **College of Agricultural and Environmental Sciences**

#### **Unit Requirements**

Of the required 180 units counted toward a degree, 54 units must be upper division work.

#### **Unit Credit Limitations**

In addition, the following unit limitations apply to all majors:

- Not more than 6 units can be Physical Education 1 and 6
- Not more than 20 units can be courses numbered 90X, 92, 97T, 97TC, 99, 190C, 190X, 192, 197T, 197TC, or 199
- Not more than 12 units can be courses numbered 92 and/or 192 (credit will not be given for 192s or 199s taken before the completion of 84 units)
- Not more than 5 units per quarter of Special Study courses (99, 194H, 199)
- Not more than 9 units of professional courses (numbers 300–499) may be used toward the 54 upper division units

**Limitation on Credit for Units Graded P.** The Academic Senate limits the total number of courses graded *P*, including units earned in courses graded “P/NP only,” to one third of the units completed on the UC Davis campus. The *P/NP* option is to be used only for elective courses and should not be used for major requirements.

**Credit for Open Campus (Concurrent) Courses.** Students may apply credit for courses taken in the Open Campus (Concurrent) Program through UC Davis Extension towards the 180-unit undergraduate degree requirement. The grade points earned when enrolled in Open Campus courses will count toward the calculation of a student's UC GPA upon his/her admission or readmission to regular student status at UC Davis. Students registered at UC Davis may not enroll in Open Campus courses.

**Credit for UC Davis Extension Courses.** Registered UC Davis students who plan to use academic credit earned in a UC Davis Extension course other than Open Campus (Concurrent) towards their UC Davis degree must obtain prior written approval from their College before registering in the UC Davis Extension. Upon approval students may apply a limited number of credits towards the 180-unit undergraduate degree requirements. Courses completed in UC Davis Extension will not count toward the calculation of a student's UC GPA.

**Registration Beyond the 225-Unit Limit.** Students may not exceed 225 units; registration for enrollment when the limit has been reached may only be approved by the Dean. A petition to complete excess units may be picked up in the Dean's office or in your major department.

### **Residence Requirement**

Meet university residence requirement. No additional college residence requirements.

### **Scholarship Requirement**

Students in the College are required to attain a minimum grade point average of 2.000 for all courses specified as depth subject matter in their major. Options, specializations and emphases may be included. Consult your master adviser. Only grades earned in courses taken at UC Davis are included in the grade point calculation. Each candidate must complete a program of study either as prescribed in (a) a major approved by the Undergraduate Majors and Courses Standing committee and printed in this catalog, or (b) an individual major approved by the Individual Major Standing committee.

### **English Composition Requirement**

Once the Entry-Level Writing requirement has been satisfied, you may begin taking courses to meet the College's English composition requirement.

The English Composition requirement may be met in one of three ways:

**1.** Either two courses emphasizing written expression or one course emphasizing written expression and one course emphasizing oral expression, with a grade of *C-* (or *P*) or better. The following UC Davis courses satisfy this requirement:

(a) one course must be selected from English 3, University Writing Program 1, 18, 19, 101, 102 series, 104 series or Nematology 150 (courses with primary emphasis in writing skills);

(b) one course selected from the courses not selected above, or from Communication 1, Comparative Literature 1, 2, 3, 4, or Native American Studies 5 (courses emphasizing either writing or speaking skills);

**2.** Advanced Placement English score of 4 or 5 PLUS any course listed in 1(a) or 1(b) above EXCEPT University Writing Program 1 or English 3

### **OR**

**3.** By passing the English Composition Examination administered by the College of Letters and Science upon completion of 70 units of degree credit (the examination does not yield credit).

**English Composition Examination.** The no-fee, no-unit examination is typically offered on a Saturday in October, January and April; for specific dates, see <http://writing.ucdavis.edu/compexam/>.

If students choose to take this challenge exam, they are strongly advised to do so in their junior year. Register for the English Composition Examination at <http://writing.ucdavis.edu/compexam/> from the Monday before the exam date until Friday at noon or until no spaces remain. The AWPE/Upper-Division Composition Examination form, available at the UC Davis Bookstore, is required. It is recommended that students with disabilities contact the Student Disability Center at 530-752-3184 and the University Writing Program at 530-752-0450 at least two weeks prior to the exam date to arrange accommodations. No examinations are given during the summer.

### **General Education**

You should consult your Dean's Office or department adviser in advance to determine exactly how your General Education courses will apply toward your major.

You can choose one of four General Education theme options to help plan your GE courses. The themes, Global Population and Environmental Issues; Biodiversity and Cultural Diversity; Food and Fiber; and Changing Agriculture are described in more detail in [General Education Theme Options, on page 632](#).

### **Study Plan Approval**

A Study Plan provides for attainment of specific long-term goals and should allow for the acquisition of prerequisite knowledge for courses to be taken in subsequent quarters; the fulfillment of College and major requirements; a proper balance between the demands of the courses and your ability to master the subject matter; and meeting the minimum progress requirements; see [Course Load, on page 85](#).

In conjunction with a faculty adviser and/or staff adviser, you must plan and prepare a program that specifies your goals and shows how the graduation requirements will be met. It is a regulation that a written “study plan” be filed with your faculty adviser or staff adviser by the end of the second quarter of the junior year (having completed not more than 120 units either in residence and/or by transfer).

You may be denied registration for future quarters if you do not comply with this regulation. However, filing this study plan does not preclude a change of major or program modifications.

## **Major Degree Certification**

A Major Certification is completed during the quarter you plan to graduate. At that time, you and your faculty adviser and/or staff adviser check to see that all **major requirements have been completed**. The Dean's Office completes the degree certification by verifying that all **college and university requirements have been satisfied**.

## **Degree Requirement Changes**

On occasion, the faculty make changes in the requirements that students must satisfy to obtain the baccalaureate degree. So that you will not be penalized by changes that may work to your disadvantage and so that you will benefit by changes that assist you in completing your degree requirements, it is college policy that you may choose to fulfill the university, college and major requirements in effect at the time you were registered at UC Davis. If you have transferred to UC Davis from a community college, state college, or another university, you may follow the requirements as stated in any UC Davis *General Catalog* in effect *either during the three years immediately preceding your transfer to UC Davis or at the time you first registered at that institution, whichever is most recent*. Once you have chosen the year of the *General Catalog* under which you wish to be governed, you must satisfy all of the university, college and major requirements specified in that catalog.

## **College of Biological Sciences**

All students in the College of Biological Sciences must satisfy the following college requirements in addition to satisfying the [University Requirements, on page 106](#) and [General Education Requirement, on page 107](#).

### **Unit Requirements**

**Total Units.** Complete no less than 180 units allowing for the unit credit limitations listed below. No student may exceed 225 units in their academic career without approval of the Dean. Units earned in Advanced Placement and International Baccalaureate exams are not counted toward this 225-unit limit. Upon reaching 200 units, a student must submit a quarter-by-quarter graduation plan to the Biology Academic Success Center or a hold will be placed on his/her registration.

**Upper Division Units.** Complete 64 upper division units.

### **Unit Credit Limitations**

- **Passed/Not Passed Units.** All courses used to satisfy major requirements must be taken on a letter-graded basis, unless courses are only offered on a Passed/Not Passed basis.

The Academic Senate limits the total number of courses graded P, including units earned in courses graded "P/NP only," to one third of the units completed on the UC Davis campus.

- **Physical Education.** Maximum of 6 units of Physical Education 1, 6 and similar physical activity courses including transfer work.
- **Transfer work.** Maximum of 105 units of credit earned at two-year institutions (community college).
- **Graduate Courses.** Units from courses in the 200 series (with

the exception of course 299) may apply toward the minimum 64-unit upper division requirement and/or as a substitution for undergraduate courses in the major under the following conditions:

- Students must obtain written permission from the course instructor and the master adviser for their major.
- The master adviser will confirm that students have a minimum 3.400 GPA in the major at the time that they register for the course.
- **Professional and teaching courses.** Maximum of 9 units in courses numbered 300-399 and 400-499. These units may not be applied toward the 64-unit upper division requirement.
- **Upper division standing.** Must complete 84 units before enrolling in 192, 194H and 199 to receive degree and upper division credit.
- **Special Study.** Not more than 5 units per quarter of Special Study courses (99, 194H, 199).
- **Nonstandard Courses.** Maximum of 20 units of nonstandard courses including transfer work.\*

Nonstandard courses are defined here as tutoring, internship, research, research conference, honors research and similar course activities. Some examples of these courses are, but are not limited to, courses numbered 90C, 92, 92C, 97T, 97TC, 99, 189, 190C, 191, 192, 192C, 193, 194H, 197T, 197TC, 199, etc. Courses numbered 98 or 198 are not included in this 20-unit limitation.

There are additional unit credit limitations on tutoring and internship units.

- **Tutoring.** Maximum of 3 tutoring units including but not limited to 97T, 197T, 97TC and 197TC.
- **Internship.** A maximum of 6 internship units including but not limited to 92, 192, 92C, 192C.

\* Specific exceptions to these limits may be granted by the Committee on Undergraduate Petitions based on the uniqueness of the experiences and their concordance with the petitioner's educational objectives.

**Credit for Open Campus (Concurrent) Courses.** Students may apply credit for courses taken in the Open Campus (Concurrent) Program through UC Davis Extension towards the 180-unit undergraduate degree requirement. The grade points earned when enrolled in Open Campus courses will count toward the calculation of a student's UC GPA upon his/her admission or readmission to regular student status at UC Davis. However, the units earned do not satisfy the university residence requirement. Students registered at UC Davis may not enroll in Open Campus courses.

### **Residence Requirement**

Meet university residence requirement. No additional college residence requirements.

### **Scholarship Requirement**

Students must attain at least a 2.000 GPA for all courses required in their major. Students must also attain a 2.000 GPA in all Depth Subject Matter courses required in their major. Students who fail to maintain a 2.000 GPA in courses required for their major over two consecutive quarters may be required to withdraw from the major.

- **Repeating Courses.** Students may once repeat courses in which they received a grade of D+ or less. To repeat a course more than once, students must petition the Dean for approval prior to enrolling in the course.
- **Passed/Not Passed Grading Option.** All courses used to satisfy major requirements must be taken on a letter-graded basis, unless courses are only offered on a Passed/Not Passed basis.

### **English Composition Requirement**

The English Composition requirement may be satisfied in one of two ways:

1. Completing 8 units, to include 4 upper division units, in English composition courses with at least a C- or Passed grade from the following list: Comparative Literature 1, 2, 3, 4, English 3, Native American Studies 5, University Writing Program 1, 18, 19, 101, 102 series, or 104 series.

**OR**

2. Passing the English Composition Examination, administered by the Entry Level Writing program, upon completion of 70 units of degree credit. This examination does not yield credit. Students interested in entering the health science field should check with the Health Professions Advising office or the Biology Academic Success Center before choosing this option.

**English Composition Examination.** The no-fee, no-unit examination is typically offered on a Saturday in October, January, and April; for specific dates see <http://writing.ucdavis.edu/compexam/>.

If students choose to take this challenge exam, they are strongly advised to do so in their junior year. Register for the English Composition Examination at <http://writing.ucdavis.edu/compexam/> from the Monday before the exam date until Friday at noon or until no spaces remain. The AWPE/Upper-Division Composition Examination form, available at the UC Davis Bookstore, is required. It is recommended that students with disabilities contact the Student Disability Center 530-752-3184 and the University Writing Program 530-752-6283 at least two weeks prior to the exam date to arrange accommodations. No examinations are given during the summer.

### **Additional Bachelor of Arts Requirements**

Bachelor of Arts degrees are available in Biological Sciences; Evolution, Ecology and Biodiversity; Microbiology; and Plant Biology. These degrees offer students an opportunity to broaden their education while pursuing a rigorous life science major.

Candidates for the Bachelor of Arts degrees must complete two additional requirements.

1. **Foreign Language.** The requirement can be met in one of three ways:

- Complete with passing grades 15 quarter units of college level course work, or the equivalent thereof, in a single language.
- Attain a minimal score prescribed by the Committee on Undergraduate Curriculum and Educational Policy, in the College Entrance Examination Board Achievement Test in Foreign Language, which may be taken at any time during the student's high school career, or any other achievement test approved by the Committee on Undergraduate Curriculum and Educational Policy.

- Placement beyond the 15-unit level on a placement/proficiency examination offered by one of the foreign language departments of the University.

2. **Breadth Requirements.** Satisfaction of the campus General Education requirement (or IGETC for transfer students) in effect Fall 2011 will satisfy the Breadth requirement. Students that matriculated prior to Fall 2011 have the option of completing the Breadth Requirement specified in the College of Biological Sciences regulations prior to this revision. Completion of a minor in the humanities, social sciences or fine arts can offer structure and coherence to the courses selected for satisfaction of the requirement.

### **Declaration of Major/Undeclared—Life Sciences**

Students must declare a major by 90 units. A hold will be placed on a student's registration if he/she is still undeclared after completing 90 UC Davis units.

All changes of major and college must be completed before the beginning of the student's quarter of graduation.

Students who are enrolled in a major administered by the College of Biological Sciences and students who are Undeclared-Life Sciences see a staff adviser in the Biology Academic Success Center for their major, university, general education, and college academic advising. Master faculty advisers are also available in the department that houses their major, as listed in the catalog, or at the Biology Academic Success Center.

### **Degree Check**

Students are encouraged to meet with their academic adviser at least once a year to ensure timely graduation. Students are required to consult a Biology Academic Success Center academic adviser at three points in their academic careers:

- In their first two quarters on the Davis campus.
- Before accumulating 90 units.
- Before accumulating 135 units.
- In addition, if you are taking courses which, if passed, will cause your unit total to exceed 200 units and you intend to register for the next quarter, you must file a plan with your adviser that leads to graduation within 225 units. If the plan anticipates registering after you have accumulated 225 units, the plan must be submitted to the Dean for approval.

If you do not meet any of these advising requirements, a hold may be placed on your registration.

### **Degree Requirement Changes or Catalog Rights**

On occasion, the faculty makes changes in the requirements that students must satisfy to obtain the baccalaureate degree. So that you will not be penalized by changes that may work to your disadvantage and so that you will benefit by changes that assist you in completing your degree requirements, it is college policy that you may choose to fulfill the university and college requirements (see *General Education Requirement*, on page 107 for an exception) as stated in any UC Davis *General Catalog* in effect at the time you were registered at UC Davis. If you have transferred to UC Davis from a community college, state college, or another university, you may follow the requirements as stated in any UC Davis *General Catalog* in effect either during the three years immediately preceding your transfer to UC Davis or at the time you first registered at that

institution, whichever is most recent. Once you have chosen the year of the *General Catalog* under which you wish to be governed, you must satisfy all of the university and college requirements specified in that catalog.

With respect to the completion of your major requirements, most of the majors in the College of Biological Sciences require completion of the major degree requirements in effect at the time you officially declared your major. However, because departments differ in how they handle these matters, check with the department or major program office if you have any questions about which requirements apply to you.

## College of Engineering

### Prerequisite Requirements

Engineering is a discipline that requires mastery of prerequisite coursework before you can move forward in the curriculum. You should plan to repeat any engineering requirement in which you earned a grade of less than C-. You are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop you from a course for which you have not completed the stated prerequisites.

### Current Curriculum Requirement

Because engineering is a rapidly developing profession, the things an engineer needs to know change on an almost daily basis. To respond to this, the faculty members make changes to the curriculum on a regular basis. In order to ensure that students graduate with the most current engineering knowledge, College of Engineering students must complete the major requirements in effect in the academic year of graduation or in the immediately preceding academic year. For information about undergraduate studies in the College of Engineering, see <http://engineering.ucdavis.edu/undergraduate/>.

When degree requirements change, a transition plan is developed to ensure that students who are getting regular advising and following recommended course sequences will be able to graduate within four years. Contact your program adviser or the Engineering Undergraduate Office for more specific information or questions. The list of advisers can be found at <http://engineering.ucdavis.edu/undergraduate/advisors/>.

The faculty of the College of Engineering may prescribe special or comprehensive examinations or may otherwise test student preparation and achievement, and may specify course-work alternatives to passing such examinations.

### Engineering Design

Engineering design is the process of devising a system, component, or process to meet certain needs. Design involves a decision-making process (often iterative), in which the basic sciences, mathematics and engineering sciences are applied to convert resources optimally to meet a stated objective. Among the fundamental elements of the design process are the establishment of objectives and criteria, synthesis, analysis, construction, testing and evaluation. Specific design requirements are included in individual curriculum descriptions. In general, the design experience in the engineering programs prepares students to recognize responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in

global, economic, environmental, and societal contexts. The engineering curricula culminate in a major design experience based on the knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple constraints to satisfy desired needs.

### Unit Requirements

Each candidate for the degree of Bachelor of Science in Engineering must satisfactorily complete an approved curriculum in engineering, totaling at least 180 units. No unit of coursework you complete may be used to satisfy two different degree requirements, except under any of the following conditions:

- You may use course units to satisfy both General Education 3 requirements and course requirements for the major.
- You may use course units for two different degree requirements in cases where the catalog specifically states that course units may be used to satisfy two different degree requirements.
- You may use course units for permitted double majors within the College of Engineering.

Detailed requirements for the approved curricula are given in the *Programs and Courses* chapter of this catalog; to see the courses required in your major, consult this section. The minimum number of required units varies with the curriculum. You are responsible for planning your program and satisfactorily completing all degree requirements.

You may, for good cause, request a modification of particular degree requirements by submitting a student petition. These petitions, available from your program adviser or from the Engineering Undergraduate Office, can be valuable aids in resolving individual program conflicts or other special problems. Such petitions are subject to approval by the Undergraduate Educational Policy Committee, composed of one faculty representative from each department and non-voting staff advisers. The Associate Dean for Undergraduate Studies serves as ex-officio member of this committee.

### Residence Requirement

College of Engineering students must meet the university residence requirement. There are no additional college residence requirements.

### Limitation on Credit for UC Davis Extension Courses.

Students may apply a maximum of 16 units of credit for courses taken in the Open Campus Program through UC Davis Extension towards the unit requirement of their major. Courses may be taken only when written approval has been obtained from the Associate Dean for Undergraduate Studies. The grade points earned when enrolled in Open Campus courses will count toward the calculation of the student's UC GPA upon your admission or readmission to regular student status at UC Davis. Students registered at UC Davis may not enroll in Open Campus courses.

### Scholarship Requirement

In addition to meeting the university scholarship requirement, College of Engineering students are required to maintain at least a 2.000 grade point average for all undergraduate course work within Engineering at UC Davis.

### **English Composition Requirement**

Prospective engineering employers cite the ability to write well and communicate effectively as a desirable trait. Because engineers must be able to explain complex ideas, it is critical that you pay close attention to the development of writing and communication skills. All students admitted to the University must complete the Entry Level Writing Requirement (see [page 106](#)) before credit for any composition course or general education writing experience course will be granted.

Once the Entry Level Writing Requirement has been satisfied, there are two distinct composition requirements for engineering students:

- **Lower-division composition.** This requirement can be satisfied by completion of an Advanced Placement English exam with a score of 4 or 5; International Baccalaureate credit for English 3; or completion of certain coursework with a grade of *C-* or better. Courses allowed vary by major. Please see your program adviser to determine coursework that has been approved for your major.
- **Upper division composition.** Requirements for upper division composition vary by major. Please see your program adviser to determine the coursework that has been approved for your major.

Please note that when you use coursework to satisfy either of the composition requirements, you must earn a grade of *C-* or better.

### **Electives**

Because, as an engineer, you will be a significant participant in the human setting, you will need to have a breadth of education that will allow you to deal with contemporary social issues and to understand the impact of engineering solutions in the global and societal context. To these ends, you must complete the UC Davis General Education requirement details; see [page 107](#).

Since all engineering programs are in the Science and Engineering GE topical breadth area, you will fulfill the campus GE requirements by taking courses in the Arts and Humanities and Social Sciences areas.

In satisfying the GE requirement note that (a) you must take GE courses for a letter grade, and (b) you must satisfy the Entry-Level Writing requirement before you can receive writing experience credit for any course.

Students in the College of Engineering will complete any version of the general education requirement in effect between the time of matriculation and the time of graduation. Readmitted students will complete the general education requirement in effect at the time of readmission.

### **College of Letters and Science**

#### **Unit Requirements**

A minimum of 180 units is required for the bachelor's degree. 64 units must be earned in upper division courses.

**Registration Beyond the 225-unit Limit.** You are expected to fulfill all degree requirements within the 180- to 225-unit range.

Once 225 units have been completed (excluding units awarded for College Board Advanced Placement Examinations or International Baccalaureate Examinations), you may register only with the permission. Such permission is rarely granted and then typically only

to allow completion of minimum degree requirements. You will be expected to adhere to a program of courses agreed upon and to meet other conditions that may have been set. Approval must be obtained from the Undergraduate Education and Advising Office before you will be permitted to register for courses for the quarter following completion of 225 or more units.

If you are in good standing, you will be able to complete 12 quarters or the equivalent (e.g., four years) of college work even if you have earned more than 225 units before you finish your fourth year. You must petition for continuation, however, and file the quarter-by-quarter course program you have planned.

#### **Unit Credit Limitations**

For certain courses, limits have been established on the number of units that can be counted towards the 180-unit minimum required for the degree. To avoid discovering just before graduation that you are short units, keep track of the number of units you have taken in each of the following categories.

#### **Limitation on Credit for Graduate and Professional Courses.**

Undergraduates may enroll in graduate and professional courses in the 200, 300, and 400 series subject to the restrictions described in [Academic Information, on page 83](#), in this catalog. Graduate and professional courses that have been completed will be listed on the student's transcript in the usual manner. *However, the units earned may be counted toward degree requirements only under the conditions listed below.*

Within the limitations A, B and C given below, undergraduate students in the College may count an unlimited number of units in graduate 200 series courses and up to a combined total of 9 units in 300 and 400 series professional courses toward degree requirements. These units, however, are not counted as upper division units unless this is granted by petition to the Undergraduate Education and Advising Office.

**A.** The recommendations of the instructor in the course and the department chairperson—in addition to approval from the Undergraduate Education and Advising Office—must be obtained by petition in order to receive credit toward the degree for the following kinds of courses:

- All graduate courses 200–298, whether offered by a department or program outside of or within the College of Letters and Science
- All professional courses 300–398 for teachers offered outside of the College of Letters and Science
- All postgraduate professional courses 400–498 offered outside of the College of Letters and Science
- All variable unit courses 300–398 and 400–498 offered within the College of Letters and Science

**B.** The minimum eligibility conditions for an undergraduate student in the College to petition for degree credit for a 200, 300, or 400 series course are a UC grade point average of 3.300 and completion of 18 upper division units basic to the subject matter of the course. These eligibility conditions may be waived, however, upon the recommendation of the course instructor and concurrence of the department chairperson if the student's preparation warrants exception.

**C.** Undergraduates in the College cannot receive degree credit for special study courses 299, 399, or 499.

**Limitation on Credit for Units Graded P.** Excluding courses that are graded on a Passed/Not Passed (P/NP) basis only, the number of units graded P that may be accepted towards a degree in the College of Letters and Science is limited to not more than one fourth of the units completed in residence on the UC Davis campus.

The Academic Senate limits the total number of courses graded P including units earned in courses graded "P/NP only," to one third of the units completed on the UC Davis campus. This limitation applies to all UC Davis undergraduates, including Letters and Science students.

#### **Limitation on Credit for UC Davis Extension Courses.**

A. UC Davis Extension courses with a designator of "X." Students may apply credit earned through lower division and upper division UC Davis Extension "X" courses towards the 180-unit requirement only with written approval from the dean prior to registration. The degree credit allowed by the dean for such courses is usually less than the unit value listed in the course description. Additional limitations on UC Davis Extension "X" courses include: a maximum of 9 units may be offered for elective credit only and may not be applied toward fulfillment of the Area, Foreign Language, Upper Division, or Residence requirements of the College.

B. UC Davis Extension courses with a designator of "XD." Students may apply credit earned through lower division and upper division UC Davis Extension "XD" courses towards the 180-unit requirement. Additionally, credit from such courses may be applied toward fulfillment of all university, campus, college and major unit and subject matter requirements—including the Area, Foreign Language, Upper Division and Residence requirements of the College—in the same manner that the corresponding regular UC Davis course is so accepted.

C. UC Davis Extension courses with a designator of "XDC" (Open Campus (Concurrent) Program). Subject to the following conditions, students may apply credit earned through lower division and upper division UC Davis Extension Open Campus (Concurrent) courses—i.e., those bearing the "XDC" designator—towards university unit and subject requirements, and, effective Fall 2003, the calculation of the student's UC GPA, upon admission or readmission to regular student status at UC Davis.

- Students on leave of absence and regular status students when matriculated, or regular status students for a period of one calendar year following the last term of regular enrollment at UC Davis, may not enroll in Open Campus (Concurrent) courses. Exceptions to this policy for undergraduate students may be made only under extraordinary circumstances by petition with prior approval by the Undergraduate Education and Advising Office and the Dean of UC Davis Extension.
- Concurrent ("XDC") courses do not count toward satisfaction of the University residence requirement or the residence requirements of the campus or the college.
- Concurrent ("XDC") courses may constitute at most half of the units offered in satisfaction of the upper division requirements of the major.
- In the event that the faculty of the college imposes further restrictions on the number of units of UC Davis Extension Open Campus (Concurrent) course work that may be applied to undergraduate degree programs, the allowable number of units of course work will be determined chronologically, starting with the course completed first. Grade point credit for such

courses will be determined in the same manner.

**Other Unit Credit Limitations.** The following are additional courses that have limits on the number of units that can be counted toward your degree.

- **Internship courses (numbers 92, 192):** 12 units maximum including internship units taken at other institutions; see Non-standard courses
- **Music 130, 131, 140-150 (combined):** 19 units maximum
- **Nonstandard courses (92, 97T, 97TC, 99, 192, 194H, 197T, 197TC, 199 and similar courses):** 30 units maximum or one-sixth of the units taken at UC Davis, whichever is the smaller; note the separate unit limits on internship, special study and tutoring courses; and major limitations
- **Physical Education 1 and 6 (combined):** 6 units maximum
- **Special Study courses (99, 194H, 199):** 5 units maximum in any one quarter; see Nonstandard courses
- **Tutoring courses (97T, 97TC, 197T, 197TC):** 10 units maximum; see Nonstandard courses, above

#### **Residence Requirement**

While registered in the College of Letters and Science, a minimum of 27 upper division units, including 18 upper division units in the major, must be completed on the UC Davis campus; work completed while registered in the UC Study Abroad Program or the UC Davis Extension Open Campus Program does not satisfy campus or College Residence requirements.

#### **Scholarship Requirement**

The minimum grade point average to satisfy the scholarship requirement is 2.000 for all courses counted toward the major and for all upper division courses used to satisfy major requirements. Only grades earned in courses taken at UC Davis will be included in the grade point computations. To obtain these minimum averages in the major, you may repeat courses that are graded D or F. If you have to repeat a course more than once, you need prior approval from the Undergraduate Education and Advising Office.

#### **English Composition Requirement**

The English Composition requirement can be met in one of two ways:

1. By passing the English Composition Examination upon completion of 70 units of degree credit (the examination does not yield credit);

**OR**

2. By completing with a grade of C- (or P) or better
    - a. One course from English 3, Comparative Literature 1, 2, 3, 4, Native American Studies 5, or University Writing Program 1, 1V, 1Y;
- and
- b. One course from University Writing Program 101, 102 series, or 104 series, which must be taken after 84 units have been completed.

**Transfer Courses in English Composition.** Transfer courses considered to be equivalent or comparable to English 3, Comparative Literature 1, 2, 3, 4, Native American Studies 5, or University

Writing Program 1, 1V, 1Y, 101, or 104 series, will be accepted toward satisfaction of the English Composition requirement. Note that University Writing Program 101 and 104 series courses or the equivalent must be taken after you have completed 84 units of transferable degree credit.

If your transfer work does not include an acceptable English composition course taken after you had completed or accumulated 84 units, you may fulfill the requirement by examination (see below) or take one course from University Writing Program 101, 102 series, or 104 series at UC Davis.

**Upper Division Composition Examination.** The no-fee examination is typically offered on a Saturday morning in October, January and April. No examinations are given during the summer.

For specific examination dates, instructions, and to sign up to take an examination, see the University Writing Program-Upper Division Composition Exam Information at <http://writing.ucdavis.edu/compexam>. It is recommended that students with disabilities contact the Student Disability Center at 530-752-3184 and the Entry Level Writing Program Office 530-752-0450 at least two weeks prior to the exam date to arrange accommodations.

### **Area (Breadth) Requirement**

The College Breadth Requirement promotes the intellectual growth of students by asking them to acquire a broader background of knowledge than is provided by the usual major. The Breadth requirement also guides students in exploring the interdependence of knowledge.

**A.B. Degree.** Satisfaction of the campus General Education requirement.

**B.S. Degree.** A total of 90 units in natural sciences/ mathematics; units used in satisfaction of the campus General Education requirement in Science and Engineering topical breath may also be used to satisfy this requirement.

Courses numbered 92, 97T, 97TC, 98, 192, 197T, 197TC, 198 and from 200 through 499 cannot be counted toward satisfaction of the natural sciences/mathematics Area requirement. A maximum of 10 units in special study courses (99, 194H, 199) may be counted toward that portion of the Area requirement. Subject to the restrictions just listed, courses acceptable for fulfilling the 90-unit natural sciences/mathematics Area requirement are:

### **Natural Sciences and Mathematics**

- Anatomy, Physiology and Cell Biology 100
- Anthropology 1, 5, 15, 151, 152, 153, 154A, 154BN, 156A, 156B, 157, 158
- Astronomy
- Avian Sciences 13
- Biological Sciences
- Cell Biology and Human Anatomy 101, 101L
- Chemistry
- Engineering 6, 10, 35, 102
- Engineering: Biomedical 126
- Engineering: Computer Science 10, 30, 40, 50, 60, 120, 122A, 122B, 140A, 140B, 142, 150, 152A, 152B, 153, 154A, 154B, 158, 160, 163, 165A, 165B, 170, 175, 177, 178
- Engineering: Electrical and Computer 70, 170, 173A
- Entomology 10, 100, 153
- Environmental and Resource Sciences 30, 131

- Environmental Science and Policy 30, 100, 121
- Environmental Toxicology 101
- Evolution and Ecology
- Exercise Biology 101, 103, 106, 106L, 110, 111, 112, 113, 115, 116, 117, 126
- Fiber and Polymer Science 110
- Food Science and Technology 100A, 100B, 101A, 101B
- Geology
- Integrated Studies 8A
- Mathematics
- Microbiology
- Molecular and Cellular Biology
- Neurobiology, Physiology, and Behavior
- Nutrition 10, 111AV, 111B
- Pathology, Microbiology, and Immunology 126
- Physical Education 133, 135
- Physics
- Plant Biology
- Psychology 41, 100, 101, 103A, 103B, 104, 113, 121, 122, 123, 124, 126, 127, 129, 130, 131, 135, 146, 180B
- Statistics
- Wildlife, Fish, and Conservation Biology 10

### **Foreign Language Requirement; A.B. and B.A.S. Degrees**

A key component of liberal education, the study of another language exposes students to a ubiquitous and highly diverse component of human behavior and interaction. Language learning enables students to communicate effectively in an increasingly internationalized world, enhances their ability to understand ways of thinking different from their own, gives them direct access to cultural production from another time and place, awakens in them an awareness of the conditioned nature of their assumptions about the world, and trains them to cope more effectively with intellectual and practical problems they may face in their future careers.

The College of Letters and Science encourages its students to acquire functional proficiency in at least one language other than English before graduating. At a minimum, the College requires A.B. candidates to complete three sequenced quarters (15 units) of courses, or its equivalent, in one foreign language. B.S. candidate requirements are determined by their respective major program.

### **Languages Satisfying the Requirement**

The Foreign Language Requirement may be satisfied in any language offered at UC Davis, including ancient languages, or which is normally taught at—and for which transfer credit is allowed—from another institution, including American Sign Language. Students may also satisfy this requirement by examination in a language not offered on the UC Davis campus (see below).

### **Satisfaction of the Requirement**

**At UC Davis or Another Accredited Institution.** You may satisfy the requirement by taking 15 quarter units of one foreign or classical language offered at UC Davis. You may also fulfill this requirement by taking the equivalent number of transferable quarter units in one foreign language at an accredited institution.

Transfer students should consult the Transfer Credit Evaluation, which is issued by the Deans' Office within a quarter after their first enrollment at UC Davis. Students planning to continue to study the same language at UC Davis must consult the relevant language coordinator.

If you have successfully completed the second or third year of a language in the tenth or higher grade in high school, you may receive unit credit for course 1 of that language when taken at UC Davis, but the grading mode will be P/NP only. Although a Passed or Not Passed grade will be charged to your P/NP option, no petition is required; see [Passed/Not Passed \(P/NP\) Grading, on page 91](#).

**Through Study Abroad.** Certain study abroad programs offered by UC Davis through the Study Abroad Center, UC Education Abroad Program and other accredited institutions may be used to satisfy the requirement. Some of these programs do not have a language prerequisite, but others do. If you intend to apply for a study abroad program with a language prerequisite, you should plan on completing the relevant foreign language requirement by the end of your second or third year, depending on the program.

**With the Intersegmental General Education Transfer Curriculum (IGETC).** IGETC is a series of courses which prospective transfer students attending California community colleges may complete to satisfy the lower division breadth/general education requirements at the University of California. Students may satisfy the Foreign Language requirement by attaining certification of IGETC completion.

**By Examination: Proficiency Exam.** The UC Davis Language Center (DLC) offers proficiency tests in numerous languages. A proficiency test does not yield unit credit—it only determines whether the Foreign Language requirement has been met or at which point in the language sequence you should enroll. Students must follow the language program's placement policy if they decide to study the language at UC Davis.

**By Examination: Standardized Tests.** College Board Subject Test: Earning a qualifying score of at least 550 on a College Board Foreign Language Subject Test satisfies the requirement. This test may be taken at any time during your high school career. Once your score is on file at Undergraduate Admissions, notify the Letters and Science Deans' Office so that satisfaction of the College requirement can be noted on your record.

**College Board Advanced Placement Examination.** A score of 5, 4 or 3 on any foreign language College Board Advanced Placement Examination, with the exception of Latin, taken in high school will satisfy the Foreign Language requirement.

**International Baccalaureate Higher Level Examination.** A score of 7, 6, or 5 on the French A1, A2, or B Examination, the German A1, A2 or B Examination, the Italian A1 Examination, the Latin Examination, the Portuguese A1, A2 or B Examination, or the Spanish A1 Examination taken in high school will satisfy the Foreign Language requirement.

**By Examination: Other means.** If you have not completed the required level language course, but assume you have attained equivalent language fluency and cultural knowledge, you may satisfy the language requirement by passing a proficiency examination. For more information, consult the appropriate foreign language department.

You may validate your knowledge of a language acquired by any means before matriculating at UC Davis by taking a proficiency test or another form of evaluation (if available in the relevant language department). A test may not be taken, however, in a language for which you have already received degree credit.

### **Major Degree Certification**

Requirements for major programs are described in the [Undergraduate Courses](#) chapter of this catalog. These requirements are fulfilled by completing a major program offered by a teaching department or program committee in the College of Letters and Science (see the list of majors) or an individual major program approved by the College's Committee on Individual Majors.

No more than six units in internship courses (numbered 92, 192, or similar internship courses) may be accepted in satisfaction of the requirements of major programs. Courses numbered 97T, 97TC, 197T and 197TC do not satisfy unit or course requirements in the major.

### **Degree Check**

Before the beginning of your senior year, take some time to consider your goals and to plan the academic program for your final year as an undergraduate. To plan properly and to ensure that you get the most out of your remaining education and complete all graduation requirements as well, you should know what requirements remain unsatisfied. To help you in these efforts, the Undergraduate Education and Advising Office provides on its website informational materials and instructions on how to evaluate your progress on college and university requirements; see <http://www.ls.ucdavis.edu/advising/>. Many departments provide similar information regarding your major requirements.

Once you have completed 90 units of degree credit, you should contact your departmental adviser for a check of your major requirements. At approximately this point, you will also be required to request an official degree check summarizing your progress in fulfilling college and university requirements from the Undergraduate Education and Advising Office; see <http://ls.ucdavis.edu/advising/academic-advising/mandatory-adv.html> for additional information.

### **Degree Requirement Changes**

On occasion, the faculty makes changes in the requirements that students must satisfy to obtain the baccalaureate degree. So that you will not be penalized by changes that may work to your disadvantage and so that you will benefit by changes that assist you in completing your degree requirements, it is College policy that, unless otherwise specified by the Davis Division of the Academic Senate, you may choose to fulfill the university and College requirements as stated in any UC Davis *General Catalog* in effect at any time you were registered as a full-time student at a postsecondary institution of higher education; e.g., community college, college or university.

Once you have chosen the year of the *General Catalog* under which you wish to be governed, you must satisfy all of the university and college requirements specified in that catalog. With respect to the completion of your major requirements, most of the majors in the College of Letters and Science require completion of the major degree requirements in effect at the time you officially declared your major. However, because departments differ in how they handle these matters, check with the department or major program office if you have any questions about which requirements apply to you.

GRADUATE STUDIES

## GRADUATE STUDIES

250 Mrak Hall  
530-752-0650; <https://gradstudies.ucdavis.edu>

UC Davis offers advanced degrees in nearly 100 graduate programs. A student's graduate study is guided by either departments or graduate groups. Graduate groups are composed of individual faculty members from multiple departments with similar academic interests. The group structure, used extensively at UC Davis, permits faculty to be affiliated with graduate programs in more than one discipline and offers students an interdisciplinary graduate experience that crosses the administrative boundaries of the various departments, colleges, schools, and sometimes campuses. In keeping with UC Davis' progressive spirit, the group structure also allows for evolution of established degree programs and facilitates the development of new ones. More than half of the graduate programs at UC Davis are organized as graduate groups. You will find a complete list of graduate degrees under [Degrees Offered by UC Davis, on page 15](#).

Graduate study is governed by the Graduate Council, a standing committee of the Davis Division of the Academic Senate and by the dean of Graduate Studies. A university-wide Coordinating Committee on Graduate Affairs determines general policies and establishes common procedures.

## PREPARING FOR AN ADVANCED DEGREE

Admission to a graduate program at the University of California requires a bachelor's degree that is comparable in quality to a degree from the University of California both in distribution of academic subject matter and in scholarly achievement.

The primary requirement for admission to any program is evidence of intellectual achievement and promise. Your application will be evaluated first on the basis of your transcript to assure that your qualifications meet minimum standards as set by the university and UC Davis Graduate Council. Generally, you must have a minimum B average in undergraduate course work from an institution of acceptable standing to be considered for admission. UC Davis also requires a Statement of Purpose and a Personal History Statement from each applicant. International applicants must demonstrate the ability to understand and use English by submitting TOEFL or IELTS scores. Graduate programs frequently require submission of additional materials such as Graduate Record Examination (GRE) scores, letters of recommendation, and portfolios or examples of written work to assist in selecting from among many highly qualified applicants. Admission to graduate study is limited by the number of spaces available in major programs. Not all eligible applicants can be admitted.

UC Davis is committed to maintaining excellence, preserving fairness and promoting diversity in its student population. In addition to an applicant's past scholastic achievement, admissions criteria include an applicant's potential for service in the field, keeping in mind the needs of our society and of underrepresented and disadvantaged communities. Evaluation criteria also attempt to take into account any prior disadvantages applicants have overcome that may bear on future achievements and services.

## APPLYING FOR ADMISSION

To apply for admission, please see <https://gradstudies.ucdavis.edu>.

Each program to which you apply must receive a complete application, including the nonrefundable application fee of \$90 (U.S.) or \$110 (international).

To apply for fellowship, please see <https://gradstudies.ucdavis.edu>.

For application deadlines, please go to the Graduate Studies website at <https://gradstudies.ucdavis.edu/prospective-students/admissions-application/deadlines>. It is also recommended that you check the website of the program to which you are applying for their application deadlines. No applications are accepted after the published program-specific deadline.

### About Admissions

Applications are accepted for fall quarter only. You may apply for admission to graduate study at <https://gradstudies.ucdavis.edu>.

You should begin the application process as early as possible in the academic year since many programs have early deadlines. In addition, your chances for appointment as a teaching assistant or graduate student researcher, or of receiving financial support, are enhanced by applying early. The application deadlines are available on the Graduate Studies website as noted above or until your proposed graduate program is full, whichever occurs first.

The Graduate Admissions Advisory Committee for the program will submit its recommendation and evaluation to the Office of Graduate Studies; final admission decisions rest with the Dean of Graduate Studies. This approval procedure applies to all applicants, including those seeking a transfer to UC Davis from another UC campus.

Applications for the degrees of Juris Doctor, Doctor of Medicine, Doctor of Veterinary Medicine, Master of Business Administration, Master of Professional Accountancy, and Master of Preventive Veterinary Medicine must be filed directly with the appropriate professional school.

### Readmission

If you were formerly registered at UC Davis as a graduate student and wish to return to pursue the same degree objective in the same major, you must apply for readmission and pay the readmission application fee of \$70. The readmission application must be filed with the Office of Graduate Studies by the tenth day of instruction of the quarter. If you are seeking to return to a new degree program and/or new major, you must apply for admission along with other new applicants. Apply at <https://gradstudies.ucdavis.edu>. Transcripts of any college-level coursework undertaken since you were last registered in graduate status at UC Davis must be presented with the application. There is no assurance of reentry, as applicants for readmission will be considered in competition with other applicants for the program.

## International Students

<http://intlstudents.ucdavis.edu>

Assessment of a foreign degree is based on the characteristics of the national system of education, the type of institution attended, and the level of study completed.

If you are an international student with credentials from universities outside the U.S., you should begin the application process as early as one year in advance. The Office of Graduate Studies will determine your eligibility using U.S. guidelines for credential evaluation. International students are also required to complete the online application process and pay the nonrefundable application fee. International students must apply at <https://gradstudies.ucdavis.edu>.

**English Requirement.** Applicants whose native language and language of prior instruction is not English must take the TOEFL or IELTS. The minimum score required for admission to graduate study at UC Davis is total score of 550 for the paper test or a total score of 80 on the Internet-based test for TOEFL, or band score of at least 7.0 on a 9-point scale for IELTS. TOEFL and IELTS scores are valid for two years only. Some programs require higher scores; for more information, see <https://gradstudies.ucdavis.edu/programs>. UC Davis does not offer conditional admission on the basis of future English language test scores. TOEFL scores must be reported electronically by ETS. The score report is required before application processing begins.

**TOEFL Scores.** The Test of English as a Foreign Language (TOEFL) is given by Educational Testing Service (ETS), TOEFL Services, PO Box 6151, Princeton NJ 08541-6151, 609-771-7100. Request information from [toefl@ets.org](mailto:toefl@ets.org) or see <http://www.ets.org/toefl>.

**IELTS Scores.** The Academic Modules of the International English Language Testing System (IELTS) are designed by the University of Cambridge Local Examinations Syndicate and administered by the British Council worldwide. You are responsible for providing us with an official Test Report Form (TRF) of your IELTS. Remember to order the TRF when you register to take the test. To register for the IELTS, see <http://www.ielts.org> or contact the IELTS Subject Officer, University of Cambridge, Local Examinations Syndicate, 1 Hills Road, Cambridge, CB1 2EU, United Kingdom.

**Visas.** If you need a certificate of eligibility for a student visa issued by UC Davis, you will be required to complete a certification of finances form showing the availability of sufficient funding for your graduate program. For complete details, see [Services for International Students and Scholars \(SISS\)](#), on page 81.

## PROGRAM OF STUDY

New students are assigned an adviser within the appropriate department or graduate group who assists them in planning a program of study. The program will depend to some degree on the student's undergraduate training and may include undergraduate courses to remove deficiencies. Each student must satisfy the degree requirements as stated by the program and found at <https://gradstudies.ucdavis.edu/programs>.

Additional requirements for study may be established by the department or group and approved by the Graduate Council. These requirements often include a core of required courses, but considerable flexibility is permitted to suit individual needs. Undergraduates at UC Davis who plan to pursue graduate study

should consult with their major adviser at the end of their junior year or the beginning of their senior year to guarantee adequate preparation.

A graduate degree is awarded to recognize a student's command of a wide range of knowledge in an academic field. It is not awarded merely for fulfillment of technical requirements, such as residence or the completion of specific courses.

## Master's Degree

Students working toward a master's degree must be registered for at least three full-time quarters. Two regular six-week Summer Sessions may count as the equivalent of one quarter. Usually, all work for the master's degree is done in residence on the UC Davis campus; however, some work taken elsewhere may be credited toward your degree with the consent of the graduate adviser and the Associate Dean for Graduate Students. The limit for such transfer credit is 6 units from another institution, or 12 concurrent units (Open Campus enrollment), or up to one half of the unit requirement if the courses were taken at another UC campus-providing the units were not used to satisfy requirements for another degree.

A master's degree may be awarded upon completion of one of two basic plans in which either a thesis or a comprehensive examination is required.

## Doctoral Degree

The Doctor of Philosophy degree, as granted at the University of California, means that the recipient possesses knowledge of a broad field of learning and has given evidence of distinguished attainment in that field; it is a warrant of critical ability and powers of imagination and synthesis. It means, too, that the candidate has presented a dissertation containing an original contribution to the knowledge in the chosen field of study.

Students working toward a doctorate must be registered for a minimum of six full-time quarters. Experience indicates that it takes considerably longer than this to complete a degree program. Two consecutive regular Summer Sessions may count as the equivalent of one regular quarter.

There is no university unit requirement for the doctoral degree. However, individual programs have course requirements that must be completed before admission to the Qualifying Examination.

The Qualifying Examination is administered by a committee appointed by the dean of Graduate Studies. The examination is intended to demonstrate critical thinking ability, powers of imagination and synthesis and broad knowledge of the field of study. Upon recommendation of the Qualifying Examination Committee, and with the approval of the Graduate Council, the examination may be repeated one time.

After successful completion of the Qualifying Examination, the student must file for Advancement to Candidacy for the degree. At this time, a committee is appointed to direct the research problem and guide in the preparation of the dissertation.

Graduate students in certain doctoral programs may participate in a Designated Emphasis, a specialization that might include a new method of inquiry or an important field of application that is related to two or more existing doctoral programs. The Designated Emphasis is awarded in conjunction with the doctoral degree and is signified by a transcript designation; for example, "Ph.D. in History with a Designated Emphasis in Critical Theory." Programs

approved as Designated Emphases include African American and African Studies, Biology of Vector-borne Diseases, Biophotonics, Biotechnology, Classics and Classical Receptions, Critical Theory; Feminist Theory and Research; International and Community Nutrition; Native American Studies; Organism-Environment Interaction; Reproductive Biology; Second Language Acquisition; Stem and Progenitor Cells; Studies in Performance and Practice; Translational Research; and Writing, Rhetoric, and Composition Studies.

## INTERCAMPUS EXCHANGE PROGRAM

A graduate student registered on any campus of the University of California may become an intercampus exchange student with the approval of the graduate adviser, the chairperson of the department or group on the host campus, and the Dean of Graduate Studies on both the home and the host campuses.

An intercampus exchange student has library, health service and other student privileges on the host campus, but is considered a graduate student in residence on the home campus. The grades obtained in courses on the host campus are transferred to the home campus and entered on the student's official graduate transcript.

Application forms may be obtained from the Office of Graduate Studies website (<https://gradstudies.ucdavis.edu>) and must be submitted five weeks before the beginning of the quarter in which you wish to participate in the program. Petitions received after the first day of the quarter will not be processed.

## FELLOWSHIPS, ASSISTANTSHIPS AND LOANS

<https://gradstudies.ucdavis.edu/current-students/financial-support>

Financial support for graduate study at UC Davis is available in several forms: teaching and research assistantships, financial aid and fellowships/scholarships. For more information, see <https://gradstudies.ucdavis.edu/current-students/financial-support>.

Financial aid is awarded on the basis of demonstrated financial need and is administered by the Financial Aid and Scholarships Office. Federal financial aid includes student loans, grants and work-study funding. You may apply for financial aid before you have been admitted. To be considered for financial aid, or for any awards based on financial need, you must file a "Free Application for Federal Student Aid" (FAFSA), at <http://www.fafsa.gov> no later than March 2, prior to the fall quarter enrollment. Your application will be used to determine financial need only. Contact the Graduate Financial Aid Office for information regarding loans, grants and work-study at <http://financialaid.ucdavis.edu/graduate>.

Graduate fellowships are awarded primarily on the basis of scholarly accomplishment and promise of outstanding academic and professional achievement. Fellowship awards can include a stipend, fees and/or Nonresident Supplemental Tuition. Considered in evaluations are the Graduate Record Examination (GRE) scores, undergraduate and graduate grade point averages, academic transcripts, statement of purpose, letters of recommendation and other documentation such as publications or awards. The minimum cumulative undergraduate or graduate grade point average required for a stipend, Nonresident Supplemental Tuition fellowships or in-state fee award is 3.000 (A=4.000).

UC Davis has a single online application system for the admission application and for the student fellowship application. To apply for fellowship, see <https://gradstudies.ucdavis.edu>.

For fellowship application deadlines, please go to the Office of Graduate Studies website at <https://gradstudies.ucdavis.edu/prospective-students/admissions-application/deadlines>. It is also recommended that you check the website of the program to which you are applying for their fellowship application deadline.

## GRADUATE ACADEMIC CERTIFICATE PROGRAM

A Graduate Academic Certificate (GAC) program is a structured sequence of courses and requirements that focus on a specialty or area of expertise not offered by a regular graduate degree program. GACs are administered by a UC Davis instructional unit (professional school, department, graduate group or a designated emphasis program) and are an additional sequence of training and expertise for graduate students enrolled in a degree program.

GACs consist of a minimum of 12 units of graduate level instruction and are recognized by transcript notation and an official certificate issued by UC Davis with the gold seal of the University of California. GAC programs include Conservation Management, Development Practice, Landscape Architecture and Environmental Design, and Second Language Acquisition.

For more information, see <https://gradstudies.ucdavis.edu/programs/graduate-academic-certificates>.

## GRADUATE CERTIFICATE PROGRAM FOR ENGINEERS

For engineers who already have a degree, the College of Engineering offers Graduate Certificate Programs in various fields of Engineering. The certificate programs consist of course work in selected engineering subjects and require fewer units than the degree programs. The purpose of the Graduate Certificate Program is to provide practicing engineers with an opportunity to develop additional expertise in specific areas and to explore new fields of technical interest.

General requirements for the programs are:

- 15 or 16 units of specified graduate course work, or a combination of specified graduate and undergraduate course work.
- Admission to Graduate Studies.

Further information on the Graduate Certificate Programs may be found within the graduate programs of the College of Engineering; see <http://engineering.ucdavis.edu/graduate>.

## SEMINAR ON COLLEGE TEACHING

Center for Educational Effectiveness  
[http://cee.ucdavis.edu/instructional\\_success/courses.html](http://cee.ucdavis.edu/instructional_success/courses.html)

The Seminar on College Teaching (2 units, S/U grading) introduces graduate students to the research-based principles and practices of effective teaching. Using engaging activities, discussions, and readings, participants will develop essential skills for designing, teaching, and assessing effective courses. The seminar covers a broad range of topics related to college-level teaching, including: objectives of higher education, how students learn, facilitating active learning, meaningful forms of assessment, integrating tech-

nology, creating positive learning environments, and fostering diversity.

Participants meet for weekly two-hour sessions. Participants select and complete several assignments that are designed to be practically useful for participants own teaching as well as for an academic job search. Sample assignments include preparing a lesson

plan, micro teaching session(s), designing a syllabus, and writing a teaching philosophy statement.

All participants who complete all course requirements will earn a certificate of completion that is appropriate to include in a teaching portfolio and curriculum vitae. The course is also open to post-docs, who can earn a certificate for participating instead of course credit.

SCHOOL OF EDUCATION

## SCHOOL OF EDUCATION

School of Education  
School of Education Building  
530-752-0757; <http://education.ucdavis.edu>

The School of Education offers a wide range of academic and professional development programs that prepare teacher and administrative leaders for the world of public education (P-16), as well as researchers and university faculty. Hallmarks of our work include research that is integrated with practice and policy; deep, sustained engagement with schools and communities; and authentic, collaborative partnerships with those who share our goals.

Through our Ph.D., Ed.D. and M.A. programs, we prepare students to take leadership roles in strengthening schools, community colleges and universities, advancing research and scholarship, and improving education policy and practice. In our credential program (Teaching Credential/M.A.), we prepare students to become teacher leaders and educational advocates for all children.

### PROGRAMS OF STUDY

**The Minor in Education** is considered a foundation for undergraduates who wish to obtain a teaching credential; enter any education-related field such as speech therapy, school counseling, occupational learning, or social work; obtain a master's degree in education or a related field; pursue a doctoral degree in education; or develop a better understanding of issues confronting education today. Education Minor coursework focuses on social foundations of education, psychology of learning, schools as institutions, challenges of educational assessment, and educating diverse populations in a wide variety of disciplines and contexts. As part of the Education Minor, students also complete an internship in a local K-12 school or other learning context.

Undergraduates who are interested in exploring teaching mathematics or science in public schools should contact the MAST Program (<http://mast.ucdavis.edu>) at their first opportunity. The MAST Program offers seminars that give participants experience in elementary, middle school, and high school classrooms. MAST advisers can help students combine the prerequisites for a credential program with General Education requirements. The Natural Sciences major is sound preparation for teaching the science disciplines offered in middle and high schools. A major in Mathematics will provide the broad understanding needed to teach in public schools.

**The Master of Arts in Education** provides a course of study for examining research and theory about learners, teachers, schools, and related social institutions. The program prepares professionals to conduct research about the education of children, youth, and adults in a multicultural society. Graduates may assume leadership positions in school districts, state education agencies, and private organizations concerned with instructional research, policy and practice.

**The M.A. Program in Education** offers (1) a general track that serves a broad range of student research interests and career plans, and (2) an M.A./Credential track that integrates the M.A. with the Teaching Credential and focuses particularly on classroom-based research.

**The Integrated Teaching Credential with Master's Degree Program** offers an opportunity for qualified students to complete the requirements for both a Masters of Arts in Education degree and a Multiple Subject OR Single Subject Credential in English, mathematics, science, social science or agriculture in a 15-month, five-quarter program. A bilingual authorization in Spanish is available to credential candidates in both the elementary and secondary programs.

The Credential Program prepares students for the teaching profession by immersing them in the total environment of a public school classroom while enrolled in required coursework. The coursework incorporates a theoretical-practical approach to the teaching-learning process, encouraging close interactions among teacher candidates and teacher education faculty. Students complete requirements for the M.A. degree during two part-time quarters following the credential year. This coursework introduces the integration of research into teaching practice, making teachers more informed and pro-active practitioners.

**The Capital Area North Doctorate in Educational Leadership (CANDEL)** program leading to a Doctor of Education (Ed.D.) degree, is intended primarily for working professionals in schools, community colleges, and related educational capacities that reside in the greater Sacramento Valley, Bay Area, and Northern California. Graduates of this program will be prepared to lead in educational environments that promote learning, equity and achievement for all students. Armed with both real-world, problem-based learning, and scholarship skills, program graduates will be uniquely ready to manage the complexities of educational organizations, effect school change processes and shape the educational policies that bear on the practice of education in the public setting.

**The Ph.D. in Education** is a multidisciplinary program offered by the Graduate Group in Education, with faculty drawn from education, mathematics, science, social science and humanities units throughout the UC Davis campus. The program provides a challenging course of study for examining research and theory about learners, teachers, schools and related social institutions. Through coursework, apprenticeships and mentoring, Ph.D. students are prepared to conduct research and teach about the education of children, youth and adults in a multicultural and multilingual society. Graduates of the program have assumed faculty positions in universities, as well as other leadership positions in universities, school districts, state education agencies and in private organizations that support teaching and learning in schools and communities. The program offers five areas of emphasis: Language, Literacy and Culture; Learning and Mind Sciences; Mathematics Education; Science/Agricultural Education; and School Organization and Educational Policy.

## PREPARING FOR THE STUDY OF EDUCATION

### Teaching Credential/M.A. Degree Program

Academic preparation for the Teaching Credential Program includes a completed bachelor's degree and a GPA of at least 3.000. For the Multiple Subject credential, many undergraduate majors are appropriate preparation for the program. For Single Subject credential candidates, we recommend an undergraduate major in the intended area of secondary teaching. Use undergraduate internship opportunities to gain classroom experience in the grade levels at which you wish to teach. In addition to these general requirements, learn about current state and UC Davis credential prerequisites at the School of Education website or call our Student Services Office.

- Classroom experience in the appropriate grade levels
- U.S. Constitution course
- Specific preparatory coursework; see adviser for details
- California Basic Skills Requirement
- For the elementary credential program, the California Subject Examination for Teachers (CSET)
- For secondary credential programs, approved subject matter coursework or the California Subject Examination for Teachers (CSET) for the appropriate subject

Applicants are encouraged to have program prerequisites and testing requirements completed prior to submitting an application. Credential requirements are revised by the State of California. To obtain the most current information, students considering a career in teaching are encouraged to consult with the School of Education advisers throughout their undergraduate career.

**M.A. in Education Degree Programs.** Applicants to the General Track M.A. must have completed an undergraduate degree with a major in a field that supports their intended area of emphasis. A minimum undergraduate GPA of 3.000 is necessary for graduate admission at the University of California, Davis. Please consult with advisers in the School of Education regarding additional testing or supplemental information that may be required for application to a specific program.

**Ed.D. Degree (CANDEL).** Applicants to the CANDEL program must meet general admission requirements for graduate study at the University of California. Requirements include a bachelor's and master's degree (or equivalent) from an accredited institution, and a GPA of at least 3.000. In addition, applicants will have demonstrated prior experience in administrative or leadership roles in an educational institution or related areas.

**Ph.D. Degree.** Applicants to the Ph.D. program in Education must have a bachelor's degree, and normally will have completed a master's degree (or equivalent) in a field that supports their intended area of emphasis. A minimum GPA of 3.000 in previous undergraduate coursework is required for graduate admission at the University of California, Davis. Applicants must demonstrate a high potential for scholarly achievement and research. Individuals possessing graduate degrees in fields other than education are encouraged to apply. Experience in teaching, research, or related areas of education are desirable.

## APPLYING FOR ADMISSION

School of Education graduate and teaching credential students are admitted for fall term ONLY. Online applications will be available through the Office of Graduate Studies website at <http://gradstudies.ucdavis.edu/>.

Application deadlines and requirements vary by program. Please consult with a School of Education adviser regarding your program interests. Applicants with underrepresented and nontraditional backgrounds are encouraged to apply.

### Minor in Education

**No Application Deadline.** The Education Minor is open to students in all majors.

For more information, see <http://education.ucdavis.edu> or contact the School of Education Student Services Office at 530-752-5887 or [eduadvising@ucdavis.edu](mailto:eduadvising@ucdavis.edu).

Steps in declaring a minor in education:

- Consult with the education undergraduate adviser in our Student Services Office
- Declare minor by completing a "Declaration of Minor" form at the MyUCDavis website

### Teaching Credential/M.A. Degree Program

**Application Deadline.** Please see the School of Education website for Program application information and deadlines at <http://education.ucdavis.edu>.

For more information or instructions please see our website or contact the School of Education Student Services Office at 530-752-5887 or [eduadvising@ucdavis.edu](mailto:eduadvising@ucdavis.edu).

Steps in the Admissions Process:

- Complete Office of Graduate Studies online application
- Submit nonrefundable application fee payable to UC Regents
- Upload official transcripts for all college and university work completed
- Submit to the School of Education any supporting documentation: verification of classroom field experience, copies of test scores, etc.

Applicants will be:

- Screened and scheduled for an admissions interview
- Evaluated and reviewed by an admissions committee
- Recommended to Office of Graduate Studies for admission or denial
- Notified of admission or non-admission by the Office of Graduate Studies

## M.A. Degree

### ***Master of Arts in Education General Track***

**Application Deadline.** Please see the School of Education website for Program application information and deadlines at <http://education.ucdavis.edu>.

For more information or instructions please see our website or contact the School of Education Student Services Office at 530-752-5887 or [eduadvising@ucdavis.edu](mailto:eduadvising@ucdavis.edu).

Steps in the Application Process:

- Complete Office of Graduate Studies online application, which includes three (3) uploaded letters of recommendation
- Submit nonrefundable application fee payable to UC Regents
- Upload official transcripts for all college and university work completed
- Submit to UC Davis your official scores (taken within the last five (5) years) for the Graduate Record Exam (GRE) General Test

### **Capital Area North Doctorate in Educational Leadership (CANDEL)**

**Application Deadline.** Please see the School of Education website at <http://education.ucdavis.edu>.

For more information, see the program website at <http://education.ucdavis.edu/candel-admissions> or contact the School of Education at 530-754-6664 or [candeledd@ucdavis.edu](mailto:candeledd@ucdavis.edu).

Steps in the application process:

- Complete the online application for the Capital Area North Doctorate in Educational Leadership

- Complete online UC Davis Office of Graduate Studies application
- Submit nonrefundable application fee payable to UC Regents
- Official score(s) for the Graduate Record Examination (GRE) General Test
- Three (3) letters of recommendation
- Upload one (1) official transcript from all institutions attended
- Writing sample (typically a seminar paper, thesis, or published article)
- Submit a statement of support from employer; a separate document from the applicant's current employer verifying a commitment to Friday's coursework

Finalists will be contacted to schedule an interview.

## Ph.D. Degree

**Application Deadline.** Please see the School of Education website at <http://education.ucdavis.edu>.

For more information or an application package, see the program website at <http://education.ucdavis.edu/phd-education> or contact the School of Education Student Services Office at 530-752-5887 or [phdeduadvising@ucdavis.edu](mailto:phdeduadvising@ucdavis.edu).

Steps in the application process:

- Complete online UC Davis Office of Graduate Studies application
- Submit nonrefundable application fee payable to UC Regents
- Official score(s) for the Graduate Record Examination (GRE) General Test
- Three (3) letters of recommendation
- Upload one (1) official transcript from all institutions attended
- Writing sample (typically a seminar paper, thesis, or published article)

SCHOOL OF LAW

## SCHOOL OF LAW

School of Law, Admission Office  
530-752-6477; [admissions@law.ucdavis.edu](mailto:admissions@law.ucdavis.edu), <http://www.law.ucdavis.edu>

The University of California Davis School of Law offers a three-year professional curriculum leading to the degree of Juris Doctor. Within a uniquely supportive atmosphere, law students have access to a comprehensive modern law school curriculum taught by a nationally and internationally distinguished faculty. The School offers a full range of traditional law courses, opportunities for practical experience through clinical programs, and in-depth study of an area of law in an individualized program of classroom work, research, writing, or experience in the community. It further provides professional skills training in interviewing and counseling, negotiation and dispute resolution and trial practice. The School seeks to promote critical evaluation of law and legal institutions in a broad perspective, integrating non-legal disciplines with professional legal education.

UC Davis Law School is fully accredited by the American Bar Association, is a member of the Association of American Law Schools, and has a chapter of the Order of the Coif.

## PREPARING FOR THE STUDY OF LAW

No specific college major is required for admission to the School of Law and there is no prescribed pre-legal program. Your college record and Law School Admission Test (LSAT) score must, of course, demonstrate that you are highly qualified for the study of law.

As a pre-law student, you should plan a course of study that will give you a broad cultural background and include intensive work for a substantial period of time in a selected field of study. Pre-law students should develop the ability to think critically. You should gain an understanding of people and institutions and know how to gather and weigh facts, to solve problems and think creatively. You should be able to read rapidly with comprehension and express thoughts clearly, completely, and concisely, both orally and in writing.

You can get help with program planning from the Pre-Law Advising Office in 160 South Silo 530-752-4475.

For additional information, see the Official Guide to ABA-Approved Law Schools, a publication of the Law School Admission Council and the American Bar Association. The guide includes information on the law and lawyers, pre-law preparation, applying to law school and the study of law, together with individualized information on all ABA approved law schools. The Official Guide is accessible at <https://officialguide.lsac.org>.

## APPLYING FOR ADMISSION

Deadline for filing electronic applications for admission to the School of Law:

### March 15

1. Request the law school catalog to learn more about the School and the admission process. The electronic application is available at the School's website, <http://www.law.ucdavis.edu> or at the Law School Admission Council (LSAC) website at <http://www.lsac.org/jd>. Complete instructions about the admission process, including answers to frequently asked questions, are available on the J.D. Admissions section of the Law School website.
2. You must take the Law School Admission Test (LSAT) and register with the Credential Assembly Service (CAS) so that the score will be reported to the school. You are urged to take the test as early as possible, and to take it no later than February of the year in which admission is sought; the June test date is too late for fall admission.

Testing centers are located in all parts of the United States and in many foreign countries. LSAC administers the test four times a year: February, June, September/October, and December

To obtain information about the test, specific test dates, and the location of testing centers, visit the Law School Admission Council (LSAC) website at <http://www.lsac.org/jd>. Both the CAS and LSAT registration process are electronic

3. Register with the Credential Assembly Service (CAS) no later than December 1 at the LSAC website. Arrange to have a transcript from each college or university you have attended sent directly to LSAC. Complete instructions for the online services are available at the LSAC website.
4. Submit an updated official transcript of college work completed during the first semester or quarter of your senior year directly to the School of Law as soon as it is available. Failure to do so may delay consideration of your application materials. Successful applicants must submit a final transcript showing the award of a bachelor's degree.
5. Provide two letters of recommendation from objective and responsible persons who know you well. At least one of these letters should come from a faculty member under whom you studied while in college. UC Davis School of Law requires all applicants to submit recommendations to the LSAC Letter of Recommendation Service (LOR) for inclusion with your CAS report.

Your application will be reviewed by the School of Law Admissions Committee, which seeks students of demonstrated academic ability, as evidenced by a variety of factors including information provided in the required two-four page personal statement, letters of recommendation, LSAT score, and the undergraduate grade point average (GPA). The Committee seeks students of diverse backgrounds and considers economic factors, obstacles overcome, advanced degrees or other advanced studies, significant work experience and extracurricular and community activities during and after the college years. An applicant's growth, maturity, and commitment to the study of law are also major considerations. Students are admitted only on a full-time basis and only for fall admission.

- 6.** When accepted by the School of Law, you are simultaneously admitted to Graduate Studies on the UC Davis campus of the university for the program leading to the degree of Juris Doctor. If you intend to pursue studies leading to other graduate degrees, or wish to become a candidate for a Combined Degree Program, you must make separate application to Graduate Studies or the Graduate School of Management before commencing such studies.

### **Admission to Advanced Standing**

If you have completed at least one year of full-time law course work in another American Bar Association (ABA) approved law school, you may be considered for admission to advanced standing with credit for not more than one year of such work. The application filing period is January 1-30. No application for advanced standing will be considered until the Office of Admissions has received transcripts for at least one semester of full-time course work in a three-year program.

Application procedures for advanced standing are the same as described above with the addition of (1) a letter of good standing, including class rank, from the dean of any law school previously attended; (2) at least one letter of recommendation from a law professor; (3) transcripts of all law school work; (4) LSAT score provided as part of an updated CAS report from LSAC; and (5) an official transcript from the school where you earned your undergraduate degree, stating the date the degree was conferred. The deadline for transfer applications is June 30 of the year for which transfer is sought. Those applicants who demonstrate high academic performance in the first semester of law school may be offered early admission. Those offered early admission must complete the first full year in the top one-third of the class or the School of Law reserves the right to reconsider its offer of admission. All other decisions are normally made in July or early August of the year in which admission is sought.

Students who have been disqualified at another law school will not be admitted to UC Davis Law School.

### **Recruitment of Underrepresented Groups**

The students and faculty of the School of Law recognize the great need for lawyers from under-represented groups. The School, therefore, actively solicits applications from those groups that reflect the many diverse populations of California but, traditionally, have been underrepresented in the law school population.

The School of Law, in cooperation with the Association of American Law Schools (AALS) and the Council on Legal Education Opportunity (CLEO), participates in programs designed to increase the number of law students from underrepresented groups. CLEO applications may be obtained by writing to Council on Legal Education Opportunity, 740 15th Street, N.W., 9th floor, Washington, D.C. 20005, 202-828-6100 or toll free 866-886-4343; <http://www.cleoscholars.com>.

### **PROGRAM OF STUDY**

The professional curriculum requires six semesters for completion and extends over a period of three years. It is for full-time students only; no part-time or evening program is offered. New students are admitted only at the beginning of the fall semester.

After satisfactorily completing the professional curriculum of 88 semester units and the required period of resident study, you will receive the degree of Juris Doctor (J.D.). Students who fail to attain satisfactory grades may be required to withdraw from the School at the end of any academic year.

The first year's work is prescribed and provides the essential foundation for subsequent legal study. Satisfactory completion of the first-year courses is, in all cases, prerequisite to second- and third-year courses. The work of the second and third years is elective. The courses of the professional curriculum are listed in the [Undergraduate Courses](#) chapter.

### **Combined Degree Programs**

Individual students may find a combined degree involving law and another discipline such as economics, business, sociology, or science advantageous. To support this kind of study, the School, in conjunction with other schools and university departments, has established Combined Degree Programs. Under these programs, a student may work toward a J.D. degree and a master's degree in another discipline at the same time. Students working toward a combined degree are required to spend their first year at the law school.

Normally, a Combined Degree Program will take at least four years. You will usually be able to earn up to 10 semester-hours of law school credit for work in the related discipline and normally can complete the combined degrees in less time than it would take to earn the two degrees separately. The first year of the Combined Degree Program must be taken entirely in the School of Law. During the remaining years, course work may be divided between the law school and the related discipline. You must satisfy the admission requirements for both programs and file applications with both units.

Students have pursued degree programs in combination with UC Davis departments for the M.A. degree in economics, philosophy, computer science, and sociology, and with the School of Management for the M.B.A. degree. The law school will attempt to work out an additional program if you are interested in other disciplines. You may enroll in the Combined Degree Program any time before the beginning of your third year in law school. If you are interested in pursuing a Combined Degree Program, and have made a separate application to another school or department, you should notify the School of Law if that application is accepted.

## The LL.M. Program

530-752-6081; Fax 530-757-8596; [internationallaw@ucdavis.edu](mailto:internationallaw@ucdavis.edu)  
<http://www.law.ucdavis.edu/international/>

The Law School LL.M. (Master of Laws) program integrates American and foreign law students at all levels of study. For foreign law graduates, the program provides an opportunity to gain a basic knowledge of the United States legal system. United States law school graduates and selected foreign LL.M. candidates may also seek admission on a thesis rather than a course basis. Other opportunities available to all graduate law students include developing special expertise in a particular area and doing special projects and original research under the direction of a faculty member.

Each LL.M. candidate must successfully complete a minimum of 20 semester units of work, usually 10 units each semester. Foreign LL.M. students must enroll in the 1-unit course *Introduction to Legal Research* and the 2-unit course *Introduction to the Law of the United States*. They earn the remainder of their required course credit in regular elective J.D. courses. Each foreign student must also complete an intellectually rigorous legal research and writing project, constituting at least two units of credit.

All LL.M. candidates begin their year of study with a complete orientation in the academic and social life of the law school, the UC Davis campus, and the city of Davis. LL.M. students are encouraged to enroll in the School of Law's Orientation in U.S.A. Law Program, given in the month before the LL.M. Program begins.

## SCHOOL OF LAW ACADEMIC CALENDAR 2016-2017

The School of Law operates on a semester system rather than the quarter system used on the remainder of the UC Davis campus.

	Fall 2016	Spring 2017
Introduction Week	Monday– Friday, Aug 15–19	
Law School instruction begins	Monday, Aug 22	Thursday, Jan 11
Labor Day holiday	Monday, Sep 5	
Veteran's Day holiday	Friday, Nov 11	
Thanksgiving holiday	Thursday– Friday, Nov 24–25	
Martin Luther King, Jr. holiday		Monday, Jan 16
Presidents' Day holiday		Monday, Feb 20
Spring recess		Monday– Friday, Mar 20–24
Cesar Chavez Day		Friday, March 31
Law School instruction ends	Thursday, Dec 1	Friday, Apr 28
Reading period	Friday– Sunday, Dec 2–4	Saturday– Tuesday, Apr 29–May 2
Law School examination period	Monday– Tuesday, Dec 5–20	Wednesday– Thursday, May 3–18
Law School Commencement		Friday, May 19
<i>Tuesday, November 8 is treated as a Friday for class schedule purposes.  Wednesday, November 23 is treated as a Friday for class schedule purposes.  Wednesday, January 18 is treated as a Monday for class schedule purposes.  Thursday, February 23 is treated as a Monday for class schedule purposes.</i>

GRADUATE SCHOOL OF MANAGEMENT

## GRADUATE SCHOOL OF MANAGEMENT

Graduate School of Management  
Gallagher Hall  
530-752-7658; <http://gsm.ucdavis.edu>

The Graduate School of Management offers multiple program options in locations throughout northern California, leading to the MBA degree. The programs provide both entry-level and mid-career students with an understanding of management approaches to problem solving and an awareness of the environment within which public and private management decisions are made. Successful completion requires not only a sophisticated understanding of a variety of functional skills in finance, marketing, production, program evaluation and accounting, but also an understanding of leadership, information systems and the application of scientific methods to the identification and solution of management problems.

### PREPARING FOR THE STUDY OF MANAGEMENT

A bachelor's degree and a strong interest in professional management are prerequisites for admission to the Graduate School of Management. The program seeks students from diverse professional and academic backgrounds and does not limit its consideration to applicants from any particular category of majors. Entry-level and mid-career applicants are considered and women and minorities are encouraged to apply.

Although the program has no specific subject prerequisites, it is strongly recommended that students complete the following course work before enrolling:

- Accounting**—an introductory course in financial accounting
- Economics**—an introductory course in microeconomics
- Mathematics**—an introductory course in calculus
- Statistics**—a course in elementary statistics

### APPLYING FOR ADMISSION

**Application Deadlines** are in November, January, March and May, each year. Dates are subject to change.

For the most current information, see <http://gsm.ucdavis.edu>.

Admission is for the fall quarter only. Application materials can be obtained in the following ways:

- Apply at <http://gsm.ucdavis.edu>
- Print the application materials at <http://gsm.ucdavis.edu> or contact the Admissions office at [admissions@gsm.ucdavis.edu](mailto:admissions@gsm.ucdavis.edu)
- Contact admissions staff at 530-752-7658

Complete and return your application, with all supporting documents, by the deadlines given above. The application fee is \$125.00.

In addition to the formal application, applicants must submit:

- Transcripts from all colleges or universities previously attended
- Graduate Management Admission Test (GMAT) or Graduate Record Exam (GRE) taken within the last five years of the admission date. For further information and registration forms, contact Graduate Management Admission Council at <http://mba.com> or Educational Testing Service at <http://ets.org/gre>

- Two letters of recommendation
- Two essays on specific topics
- Interviews are by invitation only

For more information, call 530-752-7658, or contact [admissions@gsm.ucdavis.edu](mailto:admissions@gsm.ucdavis.edu).

### International Students

International applicants for whom English is a second language must take either Test of English as a Foreign Language (TOEFL) or IELTS within the last two years. For more information, contact TOEFL, Educational Testing Service at <http://toefl.org> or IELTS International at <http://ielts.org>.

International students must show proof of financial support for two academic years including fees and living expenses.

### Criteria for Admission

Admission to the UC Davis MBA Program is highly selective. The aim of the Admissions Committee is to select those applicants whose academic background, intellectual capability, work experience, demonstrated leadership and communication skills meet the challenging demands of the MBA program and a managerial career. Consideration of an applicant's undergraduate performance includes a review of trends in scholastic performance and areas of academic strength as well as an assessment of overall grade point average. Admissions standards and grading policies of the schools attended are also considered. Verbal, quantitative and analytical scores on the GMAT are used to evaluate general aptitude for management study. Background and maturity as indicated by employment history, service and activity records, recommendations and the applicant's essays, and interviews are factors in the committee's evaluation. Professional management experience is not required for admission but is favorably considered.

### PROGRAM OF STUDY

The UC Davis MBA program prepares innovative leaders for global management. Students are required to take ten core courses (equaling 30 units of study), and 42 units of elective coursework for the 72 units required for the degree. The required core curriculum is designed to provide students with a foundation in the functional areas of business—accounting, economics, finance, marketing, organizational behavior, statistics, and strategy. These management disciplines are examined through the use of case studies, lectures and the analysis of a few select companies on which to base illustrations and spark discussions. All students must also complete a course in business speaking and writing, and a capstone project course that integrates knowledge from the core courses. The capstone project requires students to complete a sophisticated consulting project with a corporate client. Professional level analysis and recommendations are expected as outputs.

Elective courses at the Graduate School of Management place an emphasis on real-world application of management principles through the use of executive guest speakers who present "live" case study analyses and actual "client" businesses for student projects. Many courses require team projects and emphasize managing by innovation and entrepreneurship. These team projects develop your independent research abilities and hone your presentation skills.

Most students choose functional concentrations such as:

- Business Analytics and Technologies
- Entrepreneurship
- Finance/Accounting
- General Management
- Marketing
- Organizational Behavior
- Strategy

## Part-Time MBA Programs in Sacramento and Bay Area

In addition to the full-time program on the UC Davis campus, the Graduate School of Management offers two part-time MBA programs in Sacramento and in the Bay Area. These programs offer the same courses taught by the same instructors as in the full-time program, and have the same requirements for graduation as does the full-time program. Students enrolled in the MBA Program pay a flat rate per unit.

Information about fees is available at <http://gsm.ucdavis.edu>.

**Application deadlines** are in November, January, March, May and June each year. Dates are subject to change. For the most current information, see <http://gsm.ucdavis.edu>.

If you would like more information about this program, please contact the Graduate School of Management Admissions at 530-752-7658 or see <http://gsm.ucdavis.edu>.

## Master of Professional Accountancy (MPAc)

The Master of Professional Accountancy (MPAc) degree is a full-time, one-year program designed to prepare students for a career in the accounting field, and to fulfill the requirements for those seeking to take the Uniform Certified Public Accountant Exam as administered by the State of California. The MPAc degree provides students with the skills to be experts in risk assessment, systems analysis, taxation, and corporate governance, and to act as overseers of public trust.

Graduates will gain a breadth of communication, business, and accounting skills that will meet the demands of sought-after organizational leadership roles.

### Preparing for the Master of Professional Accountancy

An undergraduate degree in accounting is not a prerequisite for the MPAc program. However in order to prepare for the rigorous curriculum at the graduate level, students are required to complete the following three courses:

**Introduction to Financial Accounting.** Basic concepts of accounting; interpreting and using financial statements; understanding accounting principles

**Introduction to Managerial Accounting.** Product costing; using accounting information for decision making; planning

and performance evaluation

**Business Law.** General principles of business law in the areas of contracts, business organization, real property, uniform commercial code, sales, commercial paper, employment relations, and creditor-debtor against a background of the history and functioning of our present legal system

Students are expected to complete prerequisites before beginning the MPAc program; any deficiencies must be completed prior to enrollment. Transfer credits from other institutions cannot be substituted for the MPAc curriculum, although such classes can be used to fulfill the aforementioned prerequisites.

The MPAc program welcomes applicants from all undergraduate disciplines and backgrounds. Women and minorities are encouraged to apply.

### Applying For Admission

Application deadlines for the Masters of Professional Accountancy are in December, February, March and June, each year. For current information, see <http://gsm.ucdavis.edu/master-professional-accountancy>.

To obtain application materials or apply online, see <http://gsm.ucdavis.edu/mpac-admissions>. Applicants are required to submit:

- Transcripts from all colleges or universities attended
- Scores from either the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) taken within the last five years
- Two letters of recommendation
- International students who have not earned an undergraduate degree in an English-speaking institution must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam. For more information, see <http://toefl.org>, <http://pearsonpte.com>, or <http://ielts.org>
- International students must demonstrate proof of financial support for one academic year, including fees and living expenses.

Interviews are by invitation only.

### Admission Criteria

The goal of the Admissions Committee is to select those applicants whose academic background, intellectual capability, communication skills, and professional promise meet the demands of the MPAc program.

Consideration of an applicant's undergraduate performance includes a review of trends in scholastic performance and areas of strength as well as an assessment of overall grade point averages. Admissions standards and grading policies of the schools attended are also considered. Verbal, quantitative and analytical scores on the GMAT or GRE are used to evaluate general aptitude for the MPAc course of study. Recommendations and the applicant's essays are factors in the committee's evaluation.

**Program of Study**

The MPAc program is “lock-step” meaning there are no electives and students complete courses as a unified cohort. The curriculum, which begins in the fall quarter and finishes the following spring quarter, is designed to establish a foundation in financial reporting and analysis, financial management, taxation and tax

analysis, auditing and attestation, professional communication, managerial controls, and accounting ethics.

Students must pass a capstone examination at the end of coursework at the culmination of spring quarter to receive the degree.

For more information, call the Graduate School of Management at 530-752-7658, or see <http://gsm.ucdavis.edu/master-professional-accountancy>.

SCHOOL OF MEDICINE

## SCHOOL OF MEDICINE

School of Medicine  
<http://www.ucdmc.ucdavis.edu/medschool/>

The Doctor of Medicine degree requires the satisfactory completion of a four-year course of study composed of 15 consecutive quarters. Course work is conducted on the Sacramento campus, at the UC Davis Medical Center and in nearby affiliated hospitals.

### PREPARING FOR THE STUDY OF MEDICINE

When you apply to the School of Medicine, you must submit the results from the Medical College Admission Test (MCAT), so it is recommended that you take the MCAT by the spring before application. Information can be obtained at your undergraduate institution or directly from MCAT Program, Box 4056, Iowa City, IA 52243; 319-337-1357. To be acceptable for the fall entering class, the MCAT must be taken no later than the previous fall. No scores older than three years from June of the year you apply will be accepted. Applicants must also meet the following academic requirements.

**A.** Completed at least three years of study in an accredited college or university in the United States. A minimum of 90 semester hours or 135 quarter units of college-level work is required. Courses in highly specialized fields are acceptable only at the discretion of the medical school.

**B.** Physicians should have a broad college level education in the natural, social, and behavioral sciences and the humanities. We require the MCAT and three years (90 semester hours or 135 quarter hours) in an accredited college or university that include the specific requirements listed below.

**C.** Required college-level courses (verified by AMCAS):

- Biological Sciences: 1 year
- Chemistry, general and organic sequence: 2 years
- Physics: 1 year

Technical, Non-Academic Standards are also required. For more information, see <http://www.ucdmc.ucdavis.edu/mdprogram/admissions/requirements.html>.

For additional information, contact the School of Medicine Admissions Office at 916-734-4800.

### ADMISSIONS PROCESS

The UC Davis School of Medicine admissions cycle starts in July and ends the following July. Upon applying through AMCAS, you receive information on how to enter and use the Applicant Portal. All communications and updates related to your application are managed through the Applicant Portal. For your convenience, please communicate through the Message Center, which is checked regularly. The UCDSOM admissions process consists of four major steps:

#### STEP 1: Complete your AMCAS Application

June 1 is the first day students may submit applications to the American Medical College Application Service. It is a good idea to

submit your AMCAS application no later than August 1. October 1 is our deadline to submit all application materials to AMCAS. Extensions will not be considered.

#### STEP 2: Secondary Application (by invitation only)

After applying, your application is reviewed and qualified applicants are invited to complete our UC Davis School of Medicine secondary application. The secondary application consists of:

- Supplementary activities and essays including possible interest in special Programs in Medical Education (PRIME) tracks and research pathways
- Letters of recommendation (3-6 LORs allowed)
- Complete pre-requisite information
- Non-refundable application fee: \$90

Completed secondary applications are forwarded to the admissions committee who perform a holistic review of applications and invite select applicants for an interview. Interview invitations are on a rolling basis-July through January.

#### STEP 3: Interview Day (by invitation only)

Our interviews are always held on Fridays starting in mid-August and ending in February/March.

#### STEP 4: Acceptance Decision

Upon completion of your interview, your application is forwarded to Admissions Committee. Acceptance decisions are made on a rolling basis starting on October 15 through July 15 the following year. Decisions are made within 30-45 days post-interview after review of your entire application packet. Categories of decision are:

- Acceptance: Starting October 15 and through July 15
- Wait list: Applicant informed of wait list status with final decision starting April 30 through July 15
- Not Accepted

### ADMISSIONS CRITERIA

The UC Davis School of Medicine Admissions Committee reviews each applicant's experiences, attributes, and metrics as related to our core student physician competencies:

- Patient care
- Knowledge
- Interpersonal and communications skills
- Professionalism
- System-based practice (working within the health care system to enhance care)
- Life-long learning

The Admissions Committee determines whether the applicant will be granted a secondary application, interview, and ultimately acceptance to the UC Davis School of Medicine. Committee members attempt to do a holistic assessment of each applicant that includes, but is not limited to, the following experiences, attributes, and metrics (in no particular order of importance):

## Experiences

- Healthcare experience
- Research experience
- Leadership experience
- Community service
- Educational background
- Experience working in inter-professional teams
- Life experiences (e.g. obstacles overcome)

## Attributes

- Geographic origin (e.g. rural or medically underserved area)
- Resilience
- Motivation for a medical career
- Intellectual curiosity
- Communication skills, including listening and empathy
- Languages spoken, particularly by underserved patient populations
- Critical thinking skills including problem solving
- Professional responsibility and accountability
- Values and ethical beliefs
- Self-assessment and improvement skills
- Altruism and compassion
- Appreciation for diverse perspectives
- Ability to work in inter-professional teams
- Honesty and integrity

## Metrics

- Undergraduate grades, grade trends, and course load
- Medical College Admissions Test (MCAT) score
- Performance in a post-baccalaureate and/or graduate degree program

Western Interstate Commission for Higher Education (WICHE) and residents of participating states will be considered as residents for the purposes of admission. For more information submit inquiries to WICHE at <http://wiche.edu/askWICHE/submit> or call 303-541-0200.

## Transfer with Advanced Standing

We do not accept transfer students.

## PROGRAM OF STUDY

**Doctor of Medicine.** The curriculum for the M.D. degree is normally a four-year program that provides comprehensive training for the practice of medicine and provides a blend of basic sciences training and clinical experience. The emphasis during the first two years is on the basic-science foundations of medicine. Medical students are introduced to patient care during their very first quarter of study, reflecting the school's commitment to the training of highly skilled clinicians. Several volunteer clinics, largely staffed by UC Davis medical students, provide an ideal setting for hands-on clinical experience.

**Tailored Clinical Tracks.** We offer tailored clinical training for students interested in providing care for rural communities, urban underserved communities, and communities in the San Joaquin

Valley. Our newest track, offered in collaboration with Kaiser Permanente Northern California, is a three-year pathway through medical school for students committed to Primary Care careers.

**Combined Degree Program.** In addition to the Doctor of Medicine degree, the School of Medicine at UC Davis offers a variety of dual-degree programs through coordination with other graduate groups and divisions. These advanced degrees can couple the M.D. degree with the M.P.H., Ph.D., and M.B.A. that train physicians to meet, respond to and solve the broad diversity of problems and dilemmas facing current and future health care.

Meeting this challenge requires those capable of advancing our biological sciences knowledge base and others who can recognize and solve the ethical, political and humanitarian issues that confront the broad delivery of health care to all. Hence, the field for the Ph.D. in the joint degree program at UC Davis can be any graduate program offered on the UC Davis campus, extending beyond the traditional biological sciences boundaries, and strongly encouraging candidates to seek degrees in social sciences and humanities. All requirements for both degrees are met in a course of study that usually lasts seven years. To be admitted, and be concurrently enrolled in both degree programs, students must apply for separate admission to both the M.D. and Ph.D. programs and obtain permission of the School of Medicine M.D./Ph.D. Advisory Committee. Funding for two competitive fellowships is awarded annually to students enrolled in the M.D./Ph.D. program.

**Advisory Committee.** Inquiries about admission to graduate education should be directed to the Dean of Graduate Studies, University of California, One Shields Avenue, Davis, CA 95616. For more information concerning the combined-degree programs, contact Joanna Garcia, Office of Admissions, School of Medicine, University of California, 4610 X Street, Sacramento, CA 95817.

**Master of Public Health (MPH) Degree.** The Department of Public Health Sciences (PHS) offers the MPH degree. The MPH degree is accredited by the Council on Education for Public Health. Students apply for admission through the Office of Graduate Studies. The MPH program is designed for people interested in disease prevention and community health. The program includes instruction in epidemiology, biostatistics, environmental and occupational health, health services and administration, and social and behavioral science, and prepares students for an expanding range of professional opportunities and roles in public health and medicine. The MPH program runs on the main campus quarter system. The majority of courses are taught on the Davis campus. For more information, see <http://mph.ucdavis.edu/>. For course information, see Master of Public Health (MPH), on page 442.

## ACADEMIC CALENDAR

The School of Medicine operates on a different schedule from the rest of the UC Davis campus. The program is a continuous four-year academic experience. The first year curriculum commences in mid-summer and extends through mid-spring of the following year. There is a five week break between the first and second year for electives, research, and remediation. The second year curriculum begins in early summer and extends through mid-spring of the following year. This is followed by a six-week academic period for preparation for USMLE Step 1. The third year clinical clerkships start in the spring and extend for 48 weeks. The fourth year curriculum begins immediately thereafter and extends through spring of the following year, with graduation in May.

BETTY IRENE MOORE SCHOOL OF NURSING

## BETTY IRENE MOORE SCHOOL OF NURSING AT UC DAVIS

Education Building, Sacramento campus  
UC Davis Health System  
916-734-2145; <http://nursing.ucdavis.edu>

The Betty Irene Moore School of Nursing at UC Davis advances health and ignites leadership through innovative education, transformative research and bold system change.

The school cultivates academic excellence through immersive, interprofessional and interdisciplinary education and research in partnerships with the communities it serves. Faculty, staff and students discover and disseminate knowledge to advance health, improve quality of care and shape policy.

The school was launched through a \$100 million commitment from the Gordon and Betty Moore Foundation, the nation's largest grant for nursing education. The Betty Irene Moore School of Nursing cultivates academic excellence and addresses urgent societal needs through:

- Leadership development—build capacity for advocacy and action at all levels
- Interprofessional/interdisciplinary education—health professionals learn multiple perspectives to work and communicate as teams
- Transformative research—apply the science of nursing to improve health and reshape health systems with emphasis on aging, rural health and diverse communities
- Cultural inclusiveness—teach culturally-appropriate approaches to care and involve communities to design and conduct relevant research
- Innovative technology—use technology to create an engaged and interactive approach to nursing education, research and practice

Through the Nursing Science and Health-Care Leadership Graduate Degree Program, the school welcomed its first classes for the Master of Science—Leadership and the Doctor of Philosophy degree programs in fall 2010, for the Master of Science—Nurse Practitioner and Master of Health Services—Physician Assistant Studies degree programs in summer 2013, and welcomes the first class of the Master's Entry Program in Nursing in summer 2016.

Graduates of the Nursing Science and Health-Care Leadership Graduate Degree Program are prepared for academic and leadership positions. Graduates exercise leadership through scientific thinking, responsibility, initiative, cultural inclusiveness, knowledge of organizations and system change, teamwork and a commitment to healthy communities.

The Betty Irene Moore School of Nursing is part of UC Davis Health System, an integrated, academic health system encompassing the UC Davis School of Medicine, the 619-bed-acute-care teaching hospital and clinical services of UC Davis Medical Center and the 1,000-member physician group known as UC Davis Medical Group. For more information, see <http://nursing.ucdavis.edu>.

## PROGRAMS OF STUDY

### Nursing Science and Health-Care Leadership

The UC Davis Nursing Science and Health-Care Leadership Graduate Degree Programs prepare nurse leaders, physician assistants, researchers and faculty in a unique interdisciplinary and interprofessional environment. The graduate group is composed of faculty from across campus with expertise in nursing, medicine, health informatics, nutrition, biostatistics, public health and other fields.

### Doctor of Philosophy

Students with experience or interest in leading the transformation of health care through nursing education and research are sought for the Nursing Science and Health-Care Leadership Doctor of Philosophy program. Ideal students want to focus on important societal health issues through the work of advancing health and improving the systems that provide health services.

Graduates of the Betty Irene Moore School of Nursing are prime candidates for formal leadership positions. Graduates exercise leadership through scientific approaches, vision, initiative, cultural inclusiveness, teamwork, and a commitment to assuring health care is highly effective, compassionate and accessible.

The full-time, academic doctoral program prepares graduates as leaders in health care, health policy and also education and research at the university level to:

- Conduct transformative research
- Educate health professionals and researchers
- Effect system change
- Influence and implement policy
- Advance health from multiple settings

### Master of Health Services—Physician Assistant Studies

The Master of Health Services—Physician Assistant Studies Degree Program prepares graduates to deliver care as physician assistants. In alignment with the school's vision to advance health, a primary goal of the physician assistant program is to improve the availability of culturally relevant primary care to underserved populations and educate clinicians to deliver care as a member of a health-care team.

Physician assistants are health care professionals licensed to practice medicine with physician supervision. As part of their comprehensive responsibilities, physician assistants conduct physical exams, diagnose and treat illnesses, order and interpret tests, counsel on preventive health care, assist in surgery and write prescriptions.

Within the physician-physician assistant relationship, the physician assistant exercises autonomy in medical decision making and provides a broad range of diagnostic and therapeutic services.

A physician assistant's practice may also include education, research and administrative services.

The Master of Health Services—Physician Assistant Studies Degree Program graduates are prepared to work as leaders of health care teams and learn methods to continually critique and improve their care, provide care that is evidence-based and to establish systems

of care to address population health. All students must take core academic courses and complete a comprehensive exam as well as 1,530 hours of supervised clinical practice.

### **Master of Science—Leadership**

Ideal students for the Nursing Science and Health-Care Leadership Master of Science—Leadership Track are those with experience or interest in transforming health care through nursing education and research. They want to focus on important societal health issues through the work of advancing health and improving the systems that provide health services.

Graduates of this program are prepared for academic and leadership positions. Graduates exercise leadership through scientific thinking, responsibility, initiative, cultural inclusiveness, knowledge of organizations and system change, teamwork and a commitment to healthy communities.

The M.S.—Leadership program is a full-time, professional degree program that prepares graduates for health care leadership roles in a variety of organizations and as nurse faculty at the community college level.

Some examples include:

- Leaders of health organizations and agencies—such as community clinics, trade associations, advocacy groups—improving quality of care and work environments and advancing outcomes as well as health care effectiveness and efficiency
- Community college and other prelicensure nursing faculty—teaching the next generation of nurses
- Legislative and governmental agency staff and leadership developing, influencing and implementing policy to improve access and outcomes (not limited to health agencies but other organizations that provide public infrastructure such as transportation, planning or parks and recreation)
- Careers across the health care sector, such as insurance, pharmaceutical, hospital, home health, aging support services, adoption services, chronic illness support services and medical equipment industries fostering the integration of excellence in clinical care, management, policy, education and research

### **Master of Science—Nurse Practitioner**

The Master of Science—Nurse Practitioner Degree Program prepares graduates to deliver care as family nurse practitioners. In alignment with the school's vision to advance health, a primary goal of the family nurse practitioner program is to improve the availability of culturally relevant primary care to underserved populations and educate clinicians to deliver care as a member of a health care team.

Family nurse practitioners are registered nurses who are prepared, through advanced education and clinical training, to provide a wide range of preventive and acute health care services to individuals of all ages. Family nurse practitioners complete graduate-level education that leads to a master's degree.

Family nurse practitioners complete health histories and provide complete physical examinations, diagnose and treat many common acute and chronic problems, interpret laboratory results and X-rays, prescribe and manage medications and other therapies, provide health teaching and supportive counseling with an

emphasis on prevention of illness and health maintenance, and refer patients to other health professionals as needed.

The Master of Science—Nurse Practitioner program prepares graduates to work as leaders of health-care teams and learn methods to continually critique and improve their care, provide care that is evidence-based, and to establish systems of care to address population health. All students must take core academic courses and complete a comprehensive exam as well as 720 hours of supervised clinical practice.

### **Master's Entry Program in Nursing**

The Master's Entry Program in Nursing prepares new nurses as leaders in quality and safety, advocates for diverse patient populations and agents of change for healthier communities. Graduates of the program are qualified to take the national licensing examination (NCLEX) for registered nurses, eligible for certification as a Public Health Nurse and earn a Master of Science in Nursing Degree.

Also known as an accelerated program, this master's degree program offers the quickest route to registered nursing licensure for adults who already completed an undergraduate degree in another discipline and also completed prerequisite courses to transition into the nursing profession.

Guided by the School of Nursing's core values of leadership development, interprofessional and interdisciplinary education, transformative research, cultural inclusiveness and innovative technology, the entry-level master's-degree program takes 18 months (six consecutive quarters including summers) to complete. Core courses are offered summer, fall, winter and spring quarters. Students are typically in class Monday through Friday and should expect that some quarters they may complete clinical experiences during nights and weekends.

### **Master of Science—Nurse Practitioner and Physician Assistant Dual-Track Program**

Family nurse practitioner students at the Betty Irene Moore School of Nursing may apply to simultaneously prepare for both the nurse practitioner and physician assistant professions through the unique Master of Science—Nurse Practitioner and Physician Assistant Dual-Track Program.

This dual-track program is the only one in the nation where nurses are prepared to work as both family nurse practitioners and physician assistants.

Students who wish to enroll in this track must first be accepted into the M.S.—Nurse Practitioner program. Once accepted, students may apply during their first quarter for the dual-track programs.

Students in the dual-track program must complete additional coursework and supervised clinical hours to meet both the family nurse practitioner and physician assistant education requirements. The dual-track program is nine quarters in length. Upon completion of the dual-track program, a graduate earns a Master of Science—Nurse Practitioner Track Degree in Nursing Science and Health Care Leadership as well as a certificate in physician assistant studies. Dual-track students are then eligible to complete the family nurse practitioner certification exam and the physician assistant licensing exam.

## PREPARING FOR THE STUDY OF NURSING

The Nursing Science and Health Care Leadership Graduate Degree Program is ideal for students who:

- See problems in health care and think of solutions
- Want to improve health systems and advance health
- Find value in diversity of thought, belief, language and culture

## APPLYING FOR ADMISSION

Betty Irene Moore School of Nursing students are admitted during fall term only for the Master of Science—Leadership and Doctor of Philosophy programs and summer term only for the Master of Science—Nurse Practitioner program, Master of Health Services—Physician Assistant Studies program and Master's Entry Program in Nursing. Students applying for the physician assistant program must complete a Centralized Application System for Physician Assistants (CASPA) application and meet selection criteria. Students applying for the nurse practitioner program must complete a Nursing Centralized Application Service (NursingCAS) application and meet selection criteria. Following that process, a select pool of qualified applicants is invited to apply for UC Davis graduate admissions. All invited applicants must meet UC Davis graduate admissions requirements. Online applications are available through the Office of Graduate Studies website at <http://gradstudies.ucdavis.edu>.

Application deadlines and requirements vary by program and year. For more information, please see the School of Nursing website at <http://nursing.ucdavis.edu> or contact the School of Nursing at 916-734-2145.

## DOCTOR OF PHILOSOPHY

### Admission Requirements

- A bachelor's degree in nursing or a related field
- A minimum bachelor's-degree G.P.A. of 3.000
- Three (3) letters of recommendation
- A statement of purpose, personal history, research professional history and future goals
- The application process may require an interview
- The G.R.E. is not required

### Degree Program Requirements

Required courses for the doctoral program include a combination of core courses and electives. Students work with their advisers to select electives appropriate to their areas of interest.

- Full-time enrollment (12 units per quarter) is required.
- Required courses for the doctoral-degree program include a combination of core and elective courses. A series of courses in research methods is also required.
- Doctoral students are required to pass an oral qualifying examination. The intent of the oral qualifying examination is to determine whether the student is adequately prepared and sufficiently intellectually independent to conduct doctoral-level research. The exam may include both an oral component as well as the student's proposal for the dissertation research.
- A doctoral dissertation is required. Students will enroll in disser-

tation units as full-time students after the qualifying exam until the dissertation is complete.

- Ph.D. students are expected to complete the program in four years.

## MASTER OF HEALTH SERVICES—PHYSICIAN ASSISTANT STUDIES DEGREE PROGRAM

### Admission Requirements

- A bachelor's degree
- A minimum undergraduate G.P.A. of 3.000
- A minimum 2.700 G.P.A. in all science prerequisite coursework
- A minimum of 1,000 hours of paid or volunteer experience in a clinical environment with direct patient exposure
- Statement of purpose, personal history and research professional history
- The application process may require an interview
- G.R.E. is not required
- TOEFL (international applications only)
- Three (3) letters of recommendation

Official transcripts from each institution attended (submitted online through CASPA website).

### Degree Program Requirements

- Full-time enrollment (12 units per quarter) is required.
- Required courses for the master's degree program include a combination of core courses and electives. Six graduate-level core courses—Health Status and Care Systems, Implementation Science, Leadership in Health Care, Quantitative Skills for Change, Community Connections and an Informatics course—and the Master's Degree Seminar are required courses for the master's-degree program.
- A comprehensive exam is required.
- Physician assistant students are expected to complete the program in 27 months.

## MASTER OF SERVICES—LEADERSHIP DEGREE PROGRAM

### Admission Requirements

- Current registered nurse (R.N.) licensure
- A bachelor's degree
- A minimum undergraduate G.P.A. of 3.000
- A statement of purpose, personal-history, research professional history and future goals
- Three (3) letters of recommendation
- The application process may require an interview
- G.R.E. is not required

### Degree Program Requirements

- Full-time enrollment (12 units per quarter) is required.
- Required courses for the master's-degree leadership program include a combination of core courses and electives. Six gradu-

ate-level core courses—Health Status and Care Systems, Implementation Science, Leadership in Health Care, Quantitative Skills for Change, Community Connections and an Informatics course—and the Master's Degree Seminar are required courses for the master's-degree program.

- Students work with their advisers to select electives appropriate to their areas of interest.
- A master's thesis is required.
- M.S.—Leadership Track students are expected to complete the program in five quarters. A sixth quarter option is available if needed.

## **MASTER OF SERVICES—NURSE PRACTITIONER TRACK DEGREE PROGRAM**

### **Admission Requirements**

- Current registered nurse (R.N.) licensure
- A bachelor's degree
- A minimum undergraduate G.P.A. of 3.000
- A minimum 2.700 G.P.A. in all science prerequisite coursework
- A statement of purpose, personal-history, and research professional history
- The application process may require an interview
- TOEFL (international applicants only)
- Three (3) letters of recommendation
- Official transcripts from each institution attended (submitted on-line through CASPA website)
- G.R.E. is not required

### **Degree Program Requirements**

- Full-time enrollment (12 units per quarter) is required.
- Required courses for the master's-degree program include a combination of core courses and electives.
- A comprehensive exam is required.
- Nurse practitioner track students are expected to complete the program in 24 months.

## **MASTER OF SCIENCE IN NURSING: MASTER'S ENTRY PROGRAM IN NURSING**

### **Admission Requirements**

- A bachelor's degree
- A minimum bachelor's-degree G.P.A. of 3.000
- Three (3) letters of recommendation
- A minimum 2.7 G.P.A. in all science prerequisite coursework
- Statement of purpose, personal-history statement and future goals
- The application process may require an interview
- The G.R.E. is not required

### **Degree Program Requirements**

- Full-time enrollment (13-16 units per quarter) is required.
- A final capstone portfolio project and a comprehensive final exam are required; no thesis is required.
- M.S.N. students are expected to complete the program in six (6) quarters.
- Students in the Master's Entry Program in Nursing are required to follow the standard curriculum for a total of 92 units. Required courses include 33 units of graduate core courses plus 27 units of clinical and 32 units of theory courses required by the California Board of Registered Nursing (BRN). There are no electives in the requirements. Students must enroll full-time for the required number of units per quarter for six (6) consecutive quarters including academic, clinical, lab and seminar units. All core courses must be completed for a letter grade.

## **MASTER OF SCIENCE—NURSE PRACTITIONER AND PHYSICIAN ASSISTANT DUAL-TRACK PROGRAM**

Nurse practitioner students at the Betty Irene Moore School of Nursing can simultaneously prepare for both the nurse practitioner and physician assistant professions through the unique Master of Science—Nurse Practitioner and Physician Assistant Dual-Track program. This dual-track program is the only one in the nation where nurses are prepared to work as both nurse practitioners and physician assistants.

Students who wish to enroll in this track must first be accepted into the M.S.—Nurse Practitioner Program. Once accepted, the student works in conjunction with his or her adviser to determine dual-track eligibility. Students in the dual-track program must complete additional coursework and supervised clinical hours to meet both the nurse practitioner and physician assistant education requirements.

### **ACADEMIC CALENDAR**

The School of Nursing operates on the traditional UC Davis campus quarter system. The Doctor of Philosophy program is a four-year academic program and requires full-time enrollment. Core courses are offered fall, winter and spring quarters (not summer).

The Master of Health Services—Physician Assistant Studies Degree Program is a full-time, 27-month program. Core courses are offered summer, fall, winter and spring quarters.

The Master of Science—Leadership Degree Program is a full-time, professional degree five-quarter program. Core nursing courses are offered in fall, winter and spring quarters only (not summer).

The Master of Science—Nurse Practitioner Degree Program is a full-time, 24-month program. Core courses are offered summer, fall, winter and spring quarters.

The Master's Entry Program in Nursing Degree Program is a full-time, 18-month program. Core courses are offered summer, fall, winter and spring quarters.

SCHOOL OF VETERINARY MEDICINE

## SCHOOL OF VETERINARY MEDICINE

School of Veterinary Medicine  
Office of the Dean  
Dean's Suite, Veterinary Medicine Student Services and Administration  
Center, 944 Garrod Drive  
530-752-1360; <http://vetmed.ucdavis.edu>

The mission of the School of Veterinary Medicine is to advance the health of animals, people and the environment.

To carry out this mission, we focus on students of our professional Doctor of Veterinary Medicine program, Master of Preventive Veterinary Medicine program, graduate clinical residency program and graduate academic MS and PhD programs. The School of Veterinary Medicine serves the people of California by providing educational, research, clinical service, and public service programs of the highest quality to advance the health and care of animals, the health of the environment, and public health, and to contribute to the economy.

We address the health of all animals, including livestock, poultry, companion animals, captive and free-ranging wildlife, exotic animals, birds, aquatic mammals and fish, and animals used in biological and medical research. Our expertise also encompasses related human health concerns.

Our statewide mission includes 28 research and clinical programs, including clinical referral services; diagnostic testing services; continuing education; extension; and community outreach.

## PROGRAMS AND COURSES

## UNDERGRADUATE COURSES

### Lower Division Courses

These courses, numbered 1–99, are open to all students for lower division credit, but are designed primarily for freshmen and sophomores.

### Upper Division Courses

These courses, numbered 100–199, are open to all students who have met the necessary prerequisites as indicated in the *General Catalog* course description. Preparation should generally include completion of one lower division course in the given subject or completion of two years of college work.

## VARIABLE-UNIT COURSES

Subject to approval by the department chair, an instructor may arrange to give a special study course (numbers 90X, 92, 97T, 97TC, 98, 99, 190X, 192, 194H, 197T, 197TC, 198, 199) to interested students. These courses may be offered any fall, winter, or spring quarter as determined by the department.

- **90X/190X (Seminar)** are seminar courses for in-depth examination of a special topic within the subject area.
- **92/192 (Internship)** courses enable individual students to obtain practical experience to complement their educational goals or to explore potential career interests and opportunities. Students must have completed 84 units before enrolling in course 192.
- **97T/197T (Tutoring) and 97TC/197TC (Tutoring in the Community)** are courses for students who want to tutor in a subject in which they are proficient—generally in their major field—while enrolled as an undergraduate.
- **98/198 (Directed Group Study)** courses are set up on a one-time basis for a group of students in a subject for which no regular courses have been established.
- **99 (Special Study for Undergraduates)** is a course arranged for an individual student who shares, with an instructor, an academic interest that cannot be accommodated within the formal course structure.
- **194H (Special Study for Honors Students)** courses are for individual students with honor status, as determined by the department offering the course and who have completed 84 units.
- **199 (Special Study for Advanced Undergraduates)** courses are the upper division counterparts of course 99 and involve supervised independent study and research requiring adequate background in the subject proposed for study as well as prior completion of 84 units.

Credit in courses 99, 194H and 199 is limited to a total of 5 units per term.

**Autotutorial Courses** are courses in which students instruct themselves at their own pace. These courses can be identified by the letters AT at the end of their course numbers, e.g., 13AT, 141AT.

**Online & Hybrid Courses** are courses in which instruction is delivered on the Internet. Courses that are delivered:

- Completely online can be identified by the letter V at the end of their course numbers, e.g., 10V, 162V.
- As a combination of online and classroom can be identified by the letter Y at the end of their course numbers, e.g., 10Y, 162Y.

**Research Conference Courses** are courses in which advanced undergraduate students may participate in critical discussions of staff research activities. These one-unit courses are numbered 190C and are graded on a Passed/Not Passed basis.

## GRADUATE COURSES

Courses numbered 200–299 are open to graduate students and to undergraduates who have completed 18 units of upper division work basic to the subject matter of the course. However, admission is subject to the approval of the instructor in charge of the course. Grading in 290C courses and most variable-unit 299 or 299D courses is Satisfactory/Unsatisfactory. Check the course description for grading information.

## PROFESSIONAL COURSES FOR TEACHERS AND NURSE PRACTITIONERS

Courses numbered 300–399 are teacher-training courses in the School of Education and in other departments and are especially intended for teachers or prospective teachers. Courses designed to provide instruction to teaching assistants are included. Courses for certification of family nurse practitioners and physician assistants are also included. These courses are open only to students enrolled in those programs.

## OTHER PROFESSIONAL COURSES

Courses numbered 400–499 are professional training courses. Graduate students should consult their faculty adviser or contact the Graduate Studies Office before registering in 400 series courses to determine if graduate credit may be awarded for the course in question.

## PREREQUISITES

Prerequisites for courses should be noted carefully; the responsibility for meeting these requirements rests on the student. If you can demonstrate that your preparation is equivalent to that specified by the prerequisites, the instructor may waive these requirements for you. However, the prerequisite that requires that you complete 84 units before registering in the course may not be waived. The instructor in charge of a course may request that the Registrar drop from the course any student who has enrolled without completing the published prerequisites if, in the judgment of the instructor, failure to have completed that work seriously reduces the probability that the student will successfully complete the course. An instructor who intends to exclude a student for this reason must notify the student before taking action.

## COURSE DESCRIPTIONS

The course offerings and instructors listed in this catalog are subject to change without notice.

For the most current offerings and instructors, refer to the *General Catalog Supplement* at <http://catalog.ucdavis.edu/>.

Below is a sample of how a course is listed in this catalog.

### **190. Proseminar in Nutrition (1)**

Seminar—1 hour. Prerequisite: senior standing; course 111. Discussion of human nutrition problems. Each term will involve a different emphasis among experimental, clinical, and dietetic problems of community, national and international scope. May be repeated two times for credit with consent of instructor. GE credit: SciEng | OL, SE, VL.—F, W, S. (F, W, S.) Zidenberg-Cherr

**Top line** is course number; title; units (in parentheses).

**Paragraph following** is course instructional format; prerequisite; course description; grading, if other than letter grading; GE attributes, if any; quarter offered 2016–17; quarter offered 2017–18 (in parentheses); instructor (if specified).

**Quarters offered** is the quarter in which a course is intended to be given is shown as follows:

- **F.** Fall Quarter (September to December) or Fall Semester (August to December), School of Law
- **W.** Winter Quarter (January to March)
- **S.** Spring Quarter (April to June) or Spring Semester (January to May), School of Law & Veterinary Medicine
- **Su.** Summer Quarter (July to September)

The quarter a course is offered is subject to change. For more information, consult the department.

## Alternate Year Designation

Some course descriptions will include the phrase “Offered in alternate years.” If the course will be offered in the 2016–17 academic year, the quarter designation immediately follows the description. If the course will be offered in the 2017–18 academic year, the quarter designation is inside parentheses.

## Multi-Quarter Courses

A series of course numbers followed by two or three letters (for example, Physics 110A-110B-110C) is continued through three successive quarters, ordinarily from September to June. The first quarter course listed this way is a prerequisite to the second and the second is prerequisite to the third. On the other hand, where A and B portions of a course are listed separately (for example, Economics 160A and 160B), the A course is not a prerequisite to B, unless it is specifically mentioned in the list of prerequisites.

## Expanded Course Descriptions

Because of space limitations, you may find that the descriptions in the *General Catalog* do not include all the information you would like about a course. The faculty has responded to this need by writing the “Expanded Course Descriptions,” giving more detailed explanations about each course offering. These descriptions are available each quarter to assist students in selecting their courses. They contain such information as texts used, preparation required of students, basis for grading, course format, special assignments (papers, field trips, etc.) and a topical outline of the material to be covered.

Copies of the “Expanded Course Descriptions” are available for on-campus use at the College dean's offices or the Biology Academic Success Center, advisers' offices, advising centers, and departmental offices.

## African American and African Studies

(College of Letters and Science)

**Department Office.** 2201 Hart Hall  
530-752-1548; <http://aas.ucdavis.edu>

### Faculty

Wale Adebanwi, Ph.D., Associate Professor  
Moradewun Adejunmobi, Ph.D., Professor  
Milmon F. Harrison, Ph.D., Senior Lecturer  
Laurie Lambert, Ph.D., Assistant Professor  
Bettina Ng'weno, Ph.D., Associate Professor  
Halifu Osumare, Ph.D., Professor  
Elisa Joy White, Ph.D., Associate Professor

### Emeriti Faculty

John Stewart, Ph.D., Professor Emeritus

### The Major Program

African American and African Studies is an interdisciplinary field of study in the humanities, arts, and social sciences. This major introduces students to the social cultural, historical and artistic dimensions of global African Diaspora and Black communities in the United States, Africa, Europe, Asia, Caribbean, Latin America and Pacific regions of the world. The instructors are creative, accessible and highly qualified, with specializations across a range of disciplines. Students are exposed to and trained to think critically about the conditions and demands of global societies. Students may choose to enrich their education studying for a summer, a quarter, or a year in Africa, or by studying for a quarter in the Caribbean. Majors and Minors are also encouraged to take advantage of relevant internship opportunities.

**The Program.** The purpose of this program is to give students a sense of the individual characteristics and common concerns of Black communities in Africa, the United States, and in the wider Diaspora. The African American emphasis includes courses on history, culture, and the impact of developments in politics and the economy on the social organization of Black people in the United States. The African Diaspora emphasis enables students to study the way Black communities outside Africa and the United States have dealt with questions of race and ethnicity. It also considers how they have defined their identity in the political arena as well as by using religion, theater and dance, literature and film. The African emphasis allows students to focus on Africa's recent history, social issues, and contemporary culture.

**Career Alternatives.** Students majoring in African American and African Studies gain knowledge and strong critical thinking and analytical skills, problem-solving skills and communication skills, all suited for advanced studies in the social sciences, law, education and professional schools. Graduates in the major have pursued careers in education, the private and public sectors, the non-profit sector, international development agencies and in human service. The interdisciplinary nature of African American and African Studies is excellent preparation for professions in community organizations such as the Urban League, NAACP and the Office of Economic Opportunity.

### A.B. Major Requirements:

The major program must be developed in consultation with the African American and African Studies Staff Adviser, and approved by the program's Faculty Adviser.

UNITS

#### Preparatory Subject Matter ..... 28

One course from: African American and African Studies 10, 12.....	4
One course from: African American and African Studies 15, 17, 18, 50, 51, 52, 80.....	4

One course from: Anthropology 2; Economics 1A, 1B; Geography 2; Sociology 1; Political Science 1, 2; Psychology 1 .....	4
One course from: Chicana/o Studies 10; Native American Studies 1, 10; Women & Gender Studies 50; American Studies 10; Asian American Studies 1, 2 .....	4
Two courses from: History 15, 17A, 17B.....	8
Four units from: African American and African Studies 16, 51, 54, 154, 155A; Dramatic Art 41A, 41B, 44A, 44B; Music 28, 105, 106.....	4

#### Depth Subject Matter ..... 36

One course from: African American and African Studies 100, 101, 107A, 107B, 107C, 110, 145B, 172, 180.....	4
One course from: African American and African Studies 150A, 150B, 151, 152, 153, 155A, 156, 157, 160, 169, 170, 171, 175A, 175B, 181, 182, 185.....	4
One course from: African American and African Studies 111, 123, 130, 133, 141, 145A, 145B, 156, 162, 163, 165, 172, 176, 177.....	4
A coordinated program of upper division courses, selected and approved in consultation with the major adviser and chosen to reflect the student's major emphasis.....	24
<i>Possible areas of emphasis include the following:</i> Creative arts in the black community worldwide, social and political trends in the global black community, African American society and culture, Africa, African Diasporas. These areas of emphasis are offered as guidelines for students in the major. They are not the only areas of emphasis that students may choose for the major.	

#### Related Upper Division Courses

The following courses are offered by faculty members in other disciplines and focus on African American studies, African diaspora studies, or African studies.

American Studies 156; Anthropology 104N, 139AN, 140A, 140B; Art History 150; Community and Regional Development 151, 151L, 152, 153, 172; Comparative Literature 154, 165; English 167, 178, 179, 181A, 181B; History 102 (O), 115A, 115B, 115C, 115D, 116, 177A, 177B, 178A, 178B; Political Science 134, 149, 176; Sociology 128, 129, 130, 134, 137, 143A, 145A, 145B, 130; Dramatic Art 155A; Women's Studies 160, 178C, 180, 182

#### Total Units for the Major ..... 64

**Major Adviser.** Contact Program office.

#### Minor Program Requirements:

UNITS

#### African American and African Studies ... 24

Select one course from: African American and African Studies 10, 12, 15, 17, 18, or 80.....	4
Select any five upper division courses offered in African American and African Studies, but not including African American and African Studies 154.	

Note: Although a course may be listed more than once, such a course may satisfy only one requirement.

**American History and Institutions.** This University requirement can be satisfied by completion of African American Studies 10, 100; see also under University Requirements, on page 106.

## Courses in African American and African Studies (AAS)

### Lower Division

#### 10. African-American Culture and Society (4)

Lecture—3 hours; discussion—1 hour. Critical examination of the historical, political, social, and economic factors that have affected the development and status of African-American people in contemporary society. GE credit: SocSci, Div | ACGH, DD, SS, WE.—F. (F.) Harrison

#### 12. Introduction to African Studies (4)

Lecture/discussion—4 hours. Introduction to African Studies will focus on the various disciplinary perspectives through which African society and culture are generally studied. A survey of methods, resources and conceptual tools for the study of Africa. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—W. (W.) Adebanwi, Adejunmobi

#### 15. Introduction to African American Humanities (4)

Lecture—3 hours; discussion—1 hour. Class size limited to 165 students. Introduction to the humanist tradition developed by writers, philosophers, and artists of African descent in the West. Attention also given to African sources, as well as European, Caribbean, Latin-American, and North American variations on this tradition. GE credit: Wrt | ACGH, AH, DD.—W. (W.) Harrison

#### 16. Verbal and Performance Arts in Africa (4)

Lecture/discussion—4 hours. African verbal arts; oral texts from different African cultures. Types of critical response to oral texts, role of oral artists, context and esthetics of oral performance in Africa. GE credit: ArtHum, Div, Wrt | AH, VL, WC.—W. (W.) Adejunmobi

#### 17. Women in African Societies (4)

Lecture/discussion—4 hours. Gender relations in traditional and contemporary African society. Involvement of African women in politics, religion, the economy, the arts. African responses to feminist theory. Images of women in African literature. GE credit: SocSci, Div, Wrt | SS, WC, WE.—F. (F.) Adejunmobi

#### 18. Introduction to Caribbean Studies (4)

Lecture—3 hours; discussion—1 hour. Introduction to the contemporary culture, peoples, politics, and societies of the Caribbean. Topics include movements of people, goods and ideas across the Atlantic world and creative productions within the Caribbean. GE credit: ArtHum or SocSci | AH or SS, WC.—F. (F.) Ng'weno

#### 50. Black Popular Culture (4)

Lecture—3 hours; discussion—1 hour. Survey of the African American images in popular culture (film, television, comedy, sports and music). GE credit: AH or SS, WC.—S. (S.) Harrison, White

#### 51. History of Afro American Dance (4)

Lecture—4 hours. Evolution of African-American dance, tracing its history and development from West and Central Africa to the United States. Investigates the social and cultural relevance of African American dance and its artistic merits through contributions from its choreographers and performers. GE credit: ArtHum | AH, DD, VL.—S. (S.)

#### 52. African Traditional Religion (4)

Lecture—2 hours; discussion—2 hours. Introduction to traditional religions of the sub-Saharan African peoples: emphasis on myths, rituals and symbols in West, East, Central and South African indigenous religions. Examines themes: sacred kingship, divination system, women, prophecy, conversion and adaptation to Islam and Christianity. GE credit: ArtHum, Div, Wrt | AH, WC.—W. (W.)

#### 80. Introduction to Black Politics (4)

Lecture—4 hours. Introduction to the analysis of Afro-American politics, using conceptual frameworks from political science and other social sciences. GE credit: SocSci, Div, Wrt.—S. (S.) Harrison

**Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;**

**ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience**

**Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience**

**Quarter Offered: F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses**

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division****100. Survey of Ethnicity in the U.S. (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing or consent of instructor. Limited enrollment. Sociological and historical analysis of the experience, culture, and relations of and between groups considered racial and/or ethnic minorities in the United States. GE credit: ArtHum | ACGH, AH, DD. —W. (W.) Harrison

**101. Introduction to Research in the Afro-American Community (4)**

Lecture—4 hours. Prerequisite: course 10 or consent of instructor. Introductory survey of Afro-American Studies methods and techniques; problems and methodology in Afro-American Studies. —S. (S.) Harrison, White

**107A. African Descent Communities and Culture in the Caribbean and Latin America (4)**

Lecture/discussion—4 hours. Prerequisite: upper division standing. Origin and development of African descent communities and cultures in the Caribbean, and Latin America. The similarities and differences among African descent communities and cultures in terms of religious practices, music, and national identity. GE credit: ArtHum, Div, Wrt | WC. —F. (F.) Lambert, Ng'weno

**107B. African Descent Communities and Culture in North America (4)**

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: upper division standing. Origin and development of African descent communities and culture in the U.S.A., Canada, and Mexico from the African slave trade to contemporary urban society. Offered in alternate years. GE credit: ArtHum, Div, Wrt. —(F.) White

**107C. African Descent Communities and Culture in Asia (4)**

Lecture/discussion—4 hours. Study of the origin and development of African Descent communities and cultures in Asia. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC. —W. (W.) Ng'weno

**107D. African Descent Communities and Cultures in Europe (4)**

Lecture/discussion—4 hours. Study of the origin and development of African Descent communities and cultures in Europe. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC. —S. (S.) White

**110. West African Social Organization (4)**

Lecture—4 hours. Ecology, population, social and political organization, and culture of West Africa in the precolonial, colonial, and post-colonial periods. GE credit: SocSci, Div | SS, WC. —F. (F.) Adebanwi, Adejunmobi

**111. Cultural Politics in Contemporary Africa (4)**

Lecture/discussion—4 hours. Prerequisite: upper division standing or course 12. Themes and style of new cultural forms in Africa as displayed in art, music, film and writing, especially in regard to blending of indigenous and foreign influences. Social and political forces shaping contemporary cultural expression. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC. —(W.) Adebanwi, Adejunmobi

**123. Black Female Experience in Contemporary Society (4)**

Lecture—4 hours. Prerequisite: upper division standing or consent of instructor. Black female social, intellectual, and psychological development. Black women's contributions in history, literature, and social science; life experiences of Black women and philosophical underpinnings of the feminist movement. Offered in alternate years. GE credit: ArtHum or SocSci, Div | ACGH, DD, SS. —S. (S.) Lambert

**130. Education in the African-American Community (4)**

Lecture—2 hours; discussion—1 hour; fieldwork—3 hours. Prerequisite: course 10 or course 100, completion of the subject A requirement. Examination of the history of the education of African Americans in the United States. Examination and critique of contemporary theories concerning the schooling of African Americans. (Former course 140.) Offered irregularly. GE credit: SocSci | DD, SS. —F. (F.)

**133. The Black Family in America (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing or consent of instructor. Analysis of social science research to examine relationship between black (African-descent) family structures, patterns of functioning, and political, economic, and social conditions in the U.S. Offered in alternate years. GE credit: SocSci, Div | ACGH, DD, SS. —S. Su. (S. Su.) Harrison

**141. Psychology of the African American Experience (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 10 or consent of instructor. Introduction to the psychological issues faced by African Americans. Analysis of issues from European/Western and Afro-centric frame of reference. Emphasis on Optimal Theory, a psychological theory based on an Afro-centric world view. —S. (S.)

**145A. Black Social and Political Thought (4)**

Lecture—4 hours. Prerequisite: course 10 or 80, or consent of instructor. Exploration and analysis of Black social and political thought in the Americas. Offered in alternate years. GE credit: SocSci, Div | SS. —W. (W.) Harrison

**145B. Black Intellectuals (4)**

Lecture—4 hours. Prerequisite: course 10, 80, 145A, or consent of instructor. Exposition and critical analysis of selected theoretical writings of Black intellectuals, and especially political and social thinkers, in the Americas. Offered in alternate years. GE credit: SocSci, Div | DD, SS, WE. —F. (F.) Harrison, Lambert

**150A. Afro-American Visual Arts Tradition: A Historical and Cultural Study (4)**

Lecture—4 hours. Prerequisite: upper division standing. Afro-American visual arts tradition, folk and formal, in historical and cultural context, from 1600 through Reconstruction. GE credit: ArtHum, Div. —F. (F.)

**150B. Afro-American Visual Arts Tradition: A Historical and Cultural Study (4)**

Lecture—4 hours. Prerequisite: upper division standing. Afro-American visual arts tradition, folk and formal, in historical and cultural context, from Reconstruction to the present. GE credit: ArtHum, Div. —W. (W.)

**151. Afro-American Vernacular Music and Verbal Arts (4)**

Lecture—2 hours; discussion—2 hours. Socio-political dimensions of Afro-American musical forms like spiritual, work song, minstrelsy blues, rhythm and blues, jazz, gospel, soul and contemporary pop, and related verbal arts like preaching, toasting, rapping. —S. (S.)

**152. Major Voices in Black World Literature (4)**

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: upper division standing, completion of course 10, or course 12, or course 18. Recurrence of cultural tropes in the works of major black world authors and formation of an African-oriented canon. Principal activities include critical reading and discovery of literature as a cultural resource. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, DD, WC, WE. —(W.) Adejunmobi

**153. African Literature (4)**

Lecture—3 hours; term paper. Prerequisite: completion of Entry Level Writing Requirement (ELWR). Colonial and post-colonial sub-Saharan African literature and the African oral traditions from which it emerged. Genres and themes of African literature

from the nineteenth century to the present. (Same course as Comparative Literature 154.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE. —S. (S.) Adejunmobi

**155A. African-American Dance and Culture in the United States, Brazil and the Caribbean (4)**

Lecture/discussion—4 hours. Comparative study of the African American dance forms in the U.S.A., Brazil, Haiti, Cuba, Jamaica, Barbados, and Trinidad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms. (Same course as Dramatic Art 155A.) GE credit: ArtHum | AH, VL, WC. —W. (W.)

**156. Language and Identity in Africa and the African Diaspora (4)**

Lecture/discussion—4 hours. Prerequisite: upper division standing or course 12. Relationship between language and identity in literature from Africa and the African Diaspora. Use of pidgins, Creoles, translation from African languages and impact of language policies. Offered irregularly. GE credit: ArtHum, Div | AH, DD, WC. —S. (S.) Adejunmobi

**157. Literature and Society in South Africa (4)**

Lecture/discussion—4 hours. Prerequisite: upper division standing. Political and social developments in 20th-century South Africa as illustrated by a range of South African writing. Response of different writers to race relations, impact of government policy on types and context of writing. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE. —(W.) Adejunmobi

**160. African-American Folklore (4)**

Lecture—2 hours; discussion—1 hour; fieldwork—3 hours. Prerequisite: course 10. Theory and history of African American folklore and folklife, including music, material culture, oral narrative, proverbs, and humor. African and Caribbean cultural influences on New World folk genres will be probed. GE credit: ArtHum, Div. —S. (S.)

**162. Islam in Africa and the Americas (4)**

Lecture/discussion—4 hours. Prerequisite: Religious Studies 60 or course 12 or course 110. Comparative and historical survey of Islam in the regional and cultural settings of Sub-Saharan Africa and the Americas. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE. —S. (S.)

**163. African Religions in the Americas (4)**

Lecture—2 hours; discussion—2 hours. Prerequisite: course 10; course 15 or consent of instructor. Comparative study of African religious heritage in the Americas: Jamaica, Trinidad, Cuba, U.S.A., Haiti, and Brazil. Emphasis on the origins and development of Candomble, Santeria, Shango, Vodun, and Rastafarianism in the New World. (Former course 153.) GE credit: ArtHum, Div, Wrt | AH, WC, WE. —S. (S.)

**165. Afro-Christianity and the Black Church (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing; course 10, 15 or consent of instructor. Examination of the historical role of Christianity belief and practice as well as the institution of the Black Church in the experience of African Americans, from slavery to the present. Offered in alternate years. GE credit—SocSci, Div | ACGH, DD, SS. —(S.) Harrison

**168. Black Documentary: History and Practice (4)**

Lecture—3 hours; laboratory—5 hours. Prerequisite: Film Studies 1, course 170; course 50 recommended; consent of instructor. Study of Black documentary history and understanding of the use of the documentary form for political purposes. A discussion of documentary theory. Each student, singly or in a team, will create and carefully edit a documentary project. GE credit: ArtHum, Div | AH, DD, VL, WC. —S. Su. (Su.)

**169. History of African-American Television (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 50 recommended. History of the representation of African Americans in television; how the representations reflect social and political forces in American society. Role of African Americans in actively shaping their representation. GE credit: ArtHum, Div | AH, DD, VL, WE.—W. White

**170. African-American Film and Video (4)**

Lecture—3 hours; film viewing—3 hours. Prerequisite: Film Studies 1, course 50 recommended. Comparative approach in the study of fictional film and video dealing with the African American experience drawing on film and cultural studies to examine and discuss selected works. GE credit: ArtHum, Div, Wrt | AH, DD, VL, WE.—W. (W.) Lambert, White

**171. Black African and Black European Film and Video (4)**

Lecture/discussion—3 hours; film viewing—3 hours; term paper. Prerequisite: one of course 15, 50, or English 160 or 162, or consent of instructor. Comparative approach in the study of dramatic films and videos that treat black life in Africa and Europe. Critical attention will focus on the imaginative construction of ethnicity, race, nationality, gender, and sexuality in each particular work. Offered in alternate years. GE credit: ArtHum, Div | AH, VL, WC.—S. White

**172. Diaspora and New Black Identities (4)**

Lecture/discussion—3 hours; term paper. Critical analysis about what it means to be Black/African American in the United States today. Topics include old and new diasporas, immigration, national origin, language, religion, class, education, politics, identity and cultural heritage. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.—W. (W.) Lambert

**175A. Black Documentary: History and Theory (4)**

Lecture—3 hours; film viewing—3 hours. Prerequisite: Film Studies 1, course 170; course 50 recommended. Black documentary history and documentary theory. Use of black documentary for political purposes. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, DD, VL, WE.—(S.) Lambert, White

**175B. Black Documentary Practicum (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 175A and consent of instructor. Creation of documentary projects, with students working in production crews. Offered in alternate years. GE credit: ArtHum | AH, DD.—W. S.

**176. The Politics of Resources (4)**

Lecture/discussion—4 hours. Prerequisite: course 12 or 110. Limited enrollment. Examination of the ways in which the processes of the extraction, purification and use of natural resources and the complex regimes of valuation and commodification they (re)produce lead to cooperation and conflict in contemporary Africa and beyond. GE credit: SocSci | SS, WC.—S. (S.) Adebanwi

**177. Politics of Life in Africa (4)**

Lecture/discussion—4 hours. Existing (in)capacities in the structures of state and society in Africa for people to live well. Topics include institutions and practices that define state and civil society encounters in Africa; democracy, ethnicity, economic crisis, religion, citizenship, etc. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC.—(W.) Adebanwi

**178. African Modernity and Globalization (4)**

Lecture—4 hours. Prerequisite: course 12 or consent of instructor. Class size limited to 80 students. Exploration of modernity and globalization and their dimensions and impacts in/on Africa. Examination of modern necessities and constraints in Africa in relation to (neo)colonialism, transnational encounters, technology, gender, risk, ritual, identity, culture, etc. GE credit: ArtHum or SocSci | AH or SS, WC.—W. (W.) Adebanwi

**180. Race and Ethnicity in Latin America (4)**

Lecture/discussion—4 hours. The social and political effects of racial and ethnic categorization in Latin America, including issues of economic production, citizenship, national belonging, and access to resources. Emphasis is on peoples of African, Indigenous, and Asian descent. GE credit: ArtHum or SocSci, Div | SS, WC, WE.—W. (W.) Ng'wenyo

**181. Hip Hop in Urban America (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing or consent of the instructor. Must have Junior or Senior level standing. History, aesthetics, urban context, and economics of hip-hop in the US, and its globalization. Hip-hop's four artistic elements—rap, deejaying, breakdance, and aerosol art—allow the examination of issues of race, ethnicity, and gender in youth culture and American society. GE credit: ArtHum | AH, DD, VL.—S. (S.)

**182. Hip Hop Culture & Globalization (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 181 preferable, not required. Investigation of hip-hop youth cultures outside the United States using globalization and Cultural Studies theories. Analysis of international hip-hop sites in Africa, Asia, Europe, South America, and the Middle East through reading, discussion, and visiting virtual sites. Offered in alternate years. GE credit: ArtHum, Div | AH, WC.—S. (S.) White

**185. Topics in African-American Film (4)**

Lecture—3 hours; film viewing—3 hours. Prerequisite: course 170; course 50 recommended. Intensive study of special topics in African American film. May be repeated one time for credit. GE credit: ArtHum, Div, Wrt | AH, DD, VL, WE.—W. (W.) Lambert, White

**190. Topics in African and African-Diaspora Studies (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing in African American and African Studies or consent of instructor. Intensive treatment of a special topic or problem in African or African Diaspora Studies. May be repeated one time for credit when topic differs.—S. (S.)

**192. Internship in African-American and African Studies (1-8)**

Internship—3-24 hours. Prerequisite: completion of 12 units of upper division study in African American and African Studies courses; upper division standing; consent of instructor. Restricted to African American and African Studies majors and minors. Supervised internship in community, government, or private institutions, in all subject areas offered by the African American and African Studies Program. May be repeated up to 12 units for credit. (P/NP grading only.)

**197T. Tutoring in Afro-American Studies (1-5)**

Tutoring—1-5 hours. Prerequisite: consent of major committee; upper division standing with major in Afro-American Studies. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated for credit for a total of six units. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate****201. Critical Foundations in African American Studies (4)**

Seminar—3 hours. Prerequisite: graduate standing. Introduction to history of African American Studies. Topics include: research agendas, policy implications, debates, crises, and institutional frameworks. Offered in alternate years.—(F.)

**202. Critical Foundations in African Studies (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Introduction to the history and current organization of African Studies as area of intellectual investigation. Offers students an opportunity to review research agenda and policy implications, debates, crises, and institutional frameworks surrounding the production of knowledge about Africa. Offered in alternate years.—S. Adebanwi, Adejumobi

**203. Critical Foundations in African Diaspora Studies (4)**

Seminar—3 hours; term paper. Integrative conceptual framework includes History, Geography, Political Economy, Culture, Aesthetics as tools to investigate the African Diaspora. Students engage African Diaspora theories within their research projects understanding issues developing from the movement of Africans to the rest of the world.—S. (W.) Lambert, White

**204. Methodologies in African American and African Studies (4)**

Seminar—3 hours; term paper. Relationship between theory and methodology, with emphasis on identifying relevant methodological approaches and constructing theoretically informed research projects for studying the experience of people of African descent whether on the African continent or in the rest of the world.—F. Harrison, Ngwenyo

**298A. Directed Group Study in African American and African Diaspora Studies (1-5)**

Prerequisite: graduate standing. May be repeated for credit up to three times. (S/U grading only.)

**298B. Directed Group Study in African Studies (1-5)**

May be repeated for credit up to three times. (S/U grading only.)

**299. Directed Group Study in African Studies (1-12)**

(S/U grading only.)

## Agricultural and Environmental Chemistry (A Graduate Group)

William R. Horwath, Ph.D., Chairperson of the Group

**Group Office.** 4117 Meyer Hall 530-752-4516; <http://agchem.ucdavis.edu/>

**Faculty.** The more than 70 faculty in the graduate group represent at least 13 academic departments within the College of Agricultural and Environmental Sciences, the College of Letters and Science, the College of Engineering, the School of Medicine, and the School of Veterinary Medicine.

**Graduate Study.** The Graduate Group in Agricultural and Environmental Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees. Study relates to the chemical and biochemical aspects of foods, wine, fibers/polymers, pesticides, and environmental pollution. Detailed information regarding graduate study may be obtained at <http://agchem.ucdavis.edu/>.

**Graduate Advisers.** D.O. Adams (*Viticulture and Enology*), Y. Hsieh (*Textiles and Clothing*), A.E. Mitchell (*Food Science and Technology*), T. Shiba-moto M. Hengel (*Environmental Toxicology*), S. Parikh (*Land, Air and Water Resources*), W.R. Horwath (*Land, Air and Water Resources*), T. Young (*Civil and Environmental Engineering*)

## Courses in Agricultural and Environmental Chemistry (AGC)

### Graduate

#### 290. Seminar (1)

Seminar—1 hour. Selected topics in agricultural and environmental chemistry, presented by students. (S/U grading only.)—F, W, S. (F, W, S.)

#### 298. Group Study (1-5)

Prerequisite: consent of instructor. The chemistry and biochemistry of foods, nutritional chemicals, pesticides, and other special topics as they apply to agricultural and environmental chemistry.

#### 299. Research (1-12)

Arrangements should be made well in advance with a faculty member of the Group in Agricultural and Environmental Chemistry. (S/U grading only.)

## Agricultural and Environmental Education

(College of Agricultural and Environmental Sciences and School of Education)

### The Major Program

The major serves those interested in teaching agricultural and environmental sciences in schools or in non-formal settings such as nature preserves, environmental camps, or other venues. This major prepares graduates to direct programs in the agricultural and environmental sciences as well as provides them with a skill set necessary to work within social science careers related to these fields. This program of study meets state and federal requirements for entry into teacher preparation in agriculture and science, as well as requirements in Career Technical Education (CTE).

### The Program

The program is designed to provide students with a broad background in various agricultural and environmental science disciplines, e.g., animal science, environmental science, plant and soil science, agricultural engineering, business management, agro ecology, and horticulture. The program also focuses on the social sciences related to human resource development. The program provides students with practical experiences through fieldwork, school, and non-formal learning sites placements, or placement in sites related to a student's focus of study. Through this major students will have the opportunity to explore and then incorporate agricultural and environmental issues into educational and development settings.

### Career Alternatives

The need for scientists, technicians and educators to assist in domestic and international agricultural and environmental programs has created a continuing demand for qualified instructors and supervisory personnel. This major also provides general preparation which is appropriate for work in banking, sales and service, rural recreation and related agricultural and environmental sectors. Students interested in obtaining breadth in both agricultural and environmental sciences will appreciate the scope and flexibility the major provides.

### B.S. Major Requirements (AEE):

Units

#### Government/U.S. Constitution ..... 4

History 17A or Political Science 1 ..... 4

#### Preparatory Subject Matter ..... 50

A minimum of eight (8) units is required in each area of Animal Science, Agricultural Business and Economics, Applied Biological Systems Technology, Environmental Horticulture, Environmental Science and Natural Resources; and Plant and Soil Science.

Animal Science 1, 2, 21, 41 .....	8
Applied Biological Systems Technology 16, 52, 49, 101 .....	9
Agricultural & Resource Economics 15 and either Economics 1A or 1B .....	8
Environmental Horticulture 1, 6, Plant Sciences 5 .....	9
Environmental Science and Policy 10; Environmental Toxicology 10, Hydrologic Science 10, 47 .....	8
Plant Sciences 1, 2, 15, 49; Viticulture and Enology 2, 3 .....	8
<b>Science/Math Preparatory ..... 43-45</b>	
Biological Sciences 2A & 2B .....	10
Chemistry 2A & 2B .....	10
Geology 1, 20, Soil Science 10 .....	9
Mathematics 16A & 16B, or 17A&B, or 21A&B .....	6-8
Physics 7A & 7B .....	8

#### Depth Subject Matter ..... 20

Agricultural Education 100 & 160 .....	6
Education 110, 115, 142 .....	10
Environmental Science and Policy 110 ....	4

#### Focused Depth Subject Matter ..... 16

The specialized focus will consist of a minimum of 16 units in one of the six areas listed below:

*Agricultural Business and Economics:*  
Agricultural and Resource Economics 100A, 100B, 120, 130, 135, 138, 140, 150, 175, 176

*Animal Science:* Select upper division units from any Animal Genetics, Animal Science, Avian Sciences course or Animal Biology 102; Food Science and Technology 109; Nature and Culture 140; Neurobiology, Physiology, and Behavior 101, 121; Nutrition 115, 122, 123

*Applied Biological Systems Technology:*  
Applied Biological Systems Technology 121, 142, 161, 165, 175, 180, 182

*Environmental Horticulture:* Environmental Horticulture 102, 105, 120, 129, 125, 133, 160; Nature and Culture 120, Plant Sciences 150

*Environmental Science and Natural Resources:* Environmental and Resource Sciences 121, 131; Environmental Science and Policy 100, 101, 110, 116, 123, 151, 161, 170, EVE 101, 115, 134; Plant Sciences 101, 105, 110A; Wildlife, Fish, and Conservation Biology 110, 111, 120, 154

*Plant and Soil Science:* Plant Biology 102, 105, 116, 117, 160, 172, 176; Plant Sciences 150; Soil Science 100, 102, 118; Viticulture and Enology 101A, 101C

#### Restricted Electives ..... 16

At least four additional upper division courses (minimum 16 units; duplicate from Depth specialization courses not counted) selected with approval of an adviser to supplement or expand depth subject matter courses chosen from Animal Biology, Animal Genetics, Animal Science, Agricultural and Resource Economics, Avian Sciences, Environmental Horticulture, Environmental and Resource Sciences, Environmental Sciences and Policy, Food Science and Technology, International Agricultural Development, Nature and Culture, Neurobiology, Physiology, and Behavior, Nutrition, Plant Sciences, Plant Biology, or Viticulture and Enology.

#### Total Units For Major ..... 149-151

**Master Adviser.** Cary J. Trexler, Associate Professor

**Major Advisers.** Lynn Martindale, Lecturer/Supervisor School of Education; Cary J. Trexler, Associate Professor

**Undergraduate Advising Center** for the major (including peer advising) is located in the Animal Science Advising Center in 1202 Meyer Hall 530-754-7915; <http://asac.ucdavis.edu/>.

## Agricultural and Environmental Education

### Courses in Agricultural Education (AED)

Questions pertaining to the following courses should be directed to the instructor or Lynn Martindale 530-754-6655.

### Lower Division

#### 92. Internship (1-12)

Internship—3-36 hours. Prerequisite: lower division standing; consent of instructor. Supervised internship off and on campus in areas of agricultural education. (P/NP grading only.)

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

### Upper Division

#### 100. Concepts in Agricultural and Environmental Education (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: upper division standing. Philosophy and nature of formal and non-formal agricultural and environmental education programs. Emphasis on understanding the role of the teacher and observing a variety of programs. GE credit: SocSci, Wrt.—W. (W.) Martindale

#### 160. Vocational Education (3)

Lecture—3 hours. Philosophy and organization of vocational education, with particular reference to educational principles for agriculture commerce, home economics, and industry. GE credit: SocSci, Wrt.—F. (F.)

#### 171. Audiovisual Communications (2)

Lecture—1 hour; laboratory—3 hours. Prerequisite: upper division standing. Theory and principles of audiovisual communications. Comparison of audiovisual materials such as transparencies, slides, computer-generated graphics, and videos. Operation and use of audiovisual equipment is stressed. Offered irregularly.

#### 172. Multimedia Productions (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 171 recommended. Design and production of educational, technical, and professional multimedia presentations. Instructional or professional presentations using a variety of media, including slides, video, transparencies, and computer-generated graphics. Offered irregularly. GE credit: SocSci, Wrt.

#### 190. Seminar in Agricultural Education (2)

Seminar—2 hours. Discussion of selected critical issues in agricultural education. May be repeated for credit with consent of instructor. (P/NP grading only.)—W. (W.)

#### 192. Internship (1-12)

Internship—3-36 hours. Prerequisite: upper division standing; consent of instructor. Supervised internship off and on campus in areas of agricultural education. (P/NP grading only.)

#### 198. Directed Group Study (1-5)

(P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

### Professional

#### 300. Directed Field Experience in Teaching (2)

Discussion—1 hour; field experience—3 hours. Prerequisite: course 100. Experience as teaching assistant in agriculture or home economics programs in public schools. May be repeated one time for credit. (S/U grading only.)

#### 301. Planning for Instructional Programs (3)

Lecture—3 hours. Prerequisite: course 100; course 300 (may be taken concurrently). Major paradigms in program planning and development. Emphasis on

key steps in curriculum development, including selection and organization of educational objectives, learning experiences and teaching materials and resources.—S. (S.) Trexler

### **302. Teaching Methods in Agricultural Education (3)**

Lecture—2 hours; laboratory—2 hours. Prerequisite: course 100, course 300 (may be taken concurrently). Development of teaching strategies with special emphasis on the designing of learning experiences, instructional execution, and use of teaching aids in agricultural education.

### **306A. Field Experience with Future Farmers of America and Supervised Experience Programs (4)**

Lecture/discussion—2 hours; field work—6 hours. Prerequisite: acceptance into a teacher education program; course 306B (concurrently). Develop an understanding of the Future Farmers of America and supervised occupational experience programs through planning, conducting, and evaluating actual programs. Offered irregularly.

### **306B. Field Experience in Teaching Agriculture (5-18)**

Student teaching (corresponds with public school session). Prerequisite: acceptance into a teacher education program; course 306A (concurrently); courses 100, 300, 301, 302. Directed teaching including supervision of occupational experience programs and youth activities in secondary schools or community colleges. May be repeated for credit up to a maximum of 18 units. Offered irregularly.

### **323. Resource Development: Agricultural Education (3)**

Lecture—3 hours. Prerequisite: courses 306A, 306B. Selection and implementation of community resources in teaching.

### **390. Seminar: Issues in Agricultural Education (2)**

Discussion/laboratory—4 hours. Prerequisite: acceptance into a teacher education program and courses 306A-306B. Discussion and evaluation of current issues, theories and research in agricultural education. (S/U grading only.)

## **Agricultural and Managerial Economics**

See Managerial Economics, on page 415.

## **Agricultural and Resource Economics**

(College of Agricultural and Environmental Sciences) Richard J. Sexton, Ph.D., Chair of the Department

**Department Office.** 2116 Social Sciences and Humanities Building 530-752-9995

Gerald T. Lundblad, M.B.A., Lecturer  
John Maxey, M.B.A., J.D., Lecturer  
Tina L. Saitone, Ph.D., Associate Project Scientist  
Stephen A. Vosti, Ph.D., Adjunct Professor  
Marilyn D. Whitney, Ph.D., Lecturer

**Major Program.** See the undergraduate program in [Managerial Economics, on page 415](#).

**Major Advisers.** Contact the Department office.

**Related Courses.** See courses in Economics and Environmental Science and Policy.

## **Courses in Agricultural and Resource Economics (ARE)**

### **Lower Division**

#### **1. Economic Basis of the Agricultural Industry (4)**

Lecture—4 hours. Agriculture and man; the agricultural industry in U.S. and world economies; production and supply, marketing and demand; agricultural land, capital and labor markets; economic and social problems of agriculture in an urban and industrialized economy emphasizing California. GE credit: SocSci | SS.

#### **1S. Economic Basis of the Agricultural Industry (4)**

Lecture—4 hours. Agriculture and man; the agricultural industry in Australia and world economies; production and supply, marketing and demand; agricultural land, capital and labor markets; economic and social problems of agriculture in an urban and industrialized economy emphasizing Australia. Taught in Australia under the supervision of a UC Davis faculty member. Not open for credit to students who have completed course 1. GE credit: SocSci | SS, WC.

### **15. Population, Environment and World Agriculture (4)**

Lecture—3 hours; discussion—1 hour. Economic analysis of interactions among population, environment, natural resources and development of world agriculture. Introduces students to economic thinking about population growth, its causes and consequences for world food demand, and environmental and technological limits to increasing food supplies. GE credit: SocSci, Div, Wrt | SS, WC, WE, —W. (W)

### **18. Business Law (4)**

Lecture—4 hours. Prerequisite: sophomore standing. General principles of business law in the areas of contracts, business organization, real property, uniform commercial code, sales, commercial paper, employment relations, and creditor-debtor against a background of the history and functioning of our present legal system. GE credit: SocSci | SS. —F, S, Su. (F, S, Su.)

### **98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Restricted to lower division students. (P/NP grading only.) Offered irregularly. GE credit: SS.

### **99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SS.

### **Upper Division**

#### **100A. Intermediate Microeconomics: Theory of Production and Consumption (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A, 1B; Mathematics 16C. Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM), and Textiles and Clothing (ATXC) Majors and Agricultural and Resource Economics (GARE), International Agricultural Development (GIAD), Viticulture and Enology (GVEN) and Transportation Technology and Policy (GTTP) Graduate Majors. Theory of individual consumer and market demand; theory of production and supply of agricultural products, with particular reference to the individual firm; price determination, and employment of resources under pure competition. Not open for credit to students who have completed Economics 100. GE credit: SocSci | QL, SS. —F, W, S, Su. (F, W, S, Su.)

#### **100B. Intermediate Microeconomics: Imperfect Competition, Markets and Welfare Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100A. Pass One open to Managerial Economics Majors (AMGE) and Agricultural and Resource Economics (GARE) Graduate Majors. Price determination, and employment of resources under conditions of monopoly, oligopoly, and monopolistic competition. GE credit: SocSci | QL, SS. —F, W, S, Su. (F, W, S, Su.)

### **106. Econometric Theory and Applications (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100A, Statistics 103. Pass One open to Managerial Economics Majors (AMGE) and Agricultural and Resource Economics (GARE) Graduate Majors. Statistical methods for analyzing data to solve problems in managerial economics. Topics include the linear regression model, methods to resolve data problems, and the economic interpretation of results. Not open for credit to students who have enrolled in or completed Economics 140. GE credit: SocSci | QL, SS. —F, W, S, Su. (F, W, S, Su.)

### **107. Econometrics for Business Decisions (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 106. Pass One open to Managerial Economics majors; Pass Two open to majors in the College of Agricultural and Environmental Sciences. Covers state-of-the art econometric and statistical methods for causal and predictive modeling with applications to finance and marketing. GE credit: SocSci | SS. —F, W, S. (F, W, S.)

**Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;**

**ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience**

**Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience**

**Quarter Offered:** F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses

**112. Fundamentals of Organization Management (4)**

Lecture—4 hours. Prerequisite: upper division standing or consent of instructor. Open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Role of organizational design and behavior in business and public agencies. Principles of planning, decision making, individual behavior, management, leadership, informal groups, conflict and change in the organization. GE credit: SocSci | SS.—F, W, S, Su. (F, W, S, Su.)

**113. Fundamentals of Marketing Management (4)**

Lecture—4 hours. Prerequisite: Economics 1A; for non-majors only. Nature of product marketing by the business firm. Customer-product relationships, pricing and demand; new product development and marketing strategy; promotion and advertising; product life cycles; the distribution system; manufacturing, wholesaling, retailing. Government regulation and restraints. Not open for credit to students who have completed course 136. Offered irregularly. GE credit: SocSci | SS.

**115A. Economic Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A and 1B. Major issues encountered in emerging from international poverty, problems of growth and structural change, human welfare, population growth and health, labor markets and internal migration. Important issues of policy concerning international trade and industrialization. (Same course as Economics 115A.) GE credit: SocSci, Div | SS, WC.—F, W, S. (F, W, S.)

**115B. Economic Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A and 1B. Macroeconomic issues of developing countries. Issues include problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Important issues of policy concerning international borrowing and external debt of developing countries. (Same course as Economics 115B.) GE credit: SocSci | SS, WC.—F, S. (F, S.)

**118. Tax Accounting (4)**

Lecture—4 hours. Prerequisite: Management 11A, 11B; course 18 recommended. Development and application of a framework to understand the tax effects of typical management decisions on both entities and their owners. Impacts that different methods of taxation have on business entities with emphasis on tax planning, using income and deduction strategies, retirement plans, and choice of business entity for tax minimization.

**119. Intermediate Managerial Accounting (4)**

Lecture—4 hours; extensive problem solving—8 hours. Prerequisite: Management 11A; 11B. Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Use of accounting information by managers in decision making, planning, directing and controlling operations. Focuses on managerial/cost accounting theory and practice. Covers costing systems, budgeting, and financial statement analysis. GE credit: SocSci | SS.—F, W, (F, W.)

**120. Agricultural Policy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100A. Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Analytical treatment of historical and current economic problems and governmental policies influencing American agriculture. Uses of economic theory to develop historical and conceptual understanding of the economics of agriculture; how public policy influences the nature and performance of American agriculture. GE credit: SocSci | ACGH, SS.—S. (S.)

**120S. Agricultural Policy (4)**

Lecture—4 hours. Prerequisite: course 100A or consent of instructor. Analytical treatment of historical and current economic problems and governmental policies influencing agriculture. Uses of economic theory to develop historical and conceptual understanding of the economics of agriculture; how public policy influences the nature and performance of agriculture. Taught in Australia under the supervision of a UC Davis faculty member. Not open for credit to students who have completed course 120. Offered irregularly. GE credit: SocSci | SS, WC.

**121. Economics of Agricultural Sustainability (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Plant Sciences 15; Community and Regional Development 20; Economics 1A; Mathematics 12 or equivalent. Application of economic concepts to agro-environmental issues relevant to agricultural sustainability. Topics include market efficiency, production externalities, government policies, agricultural trade, product differentiation, all linked to sustainability issues. Case studies include biofuels, genetically modified foods and geographically differentiated products. GE credit: SocSci | SS.

**130. Agricultural Markets (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 106. Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Nature, function, organizational structure, and operation of agricultural markets; prices, costs, and margins; market information, regulation, and controls; cooperative marketing. GE credit: SocSci | SS.—F. (F.)

**132. Cooperative Business Enterprises (3)**

Lecture—3 hours. Prerequisite: Economics 1A. Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Study of cooperative business enterprise in the United States and elsewhere; economic theories of behavior, principles of operation, finance, decision-making, and taxation. Offered irregularly. GE credit: SocSci | SS.—W. (W.)

**135. Agribusiness Marketing Plan Development (2)**

Lecture/discussion—2 hours. Prerequisite: upper division standing. Fundamental components required to develop a marketing plan. Appreciation of the concept of a marketing plan, appropriate research required, including the use of library and Internet, survey and interview instruments, government documents, market analysis, business proposition, action planning, financial evaluation and monitoring. (P/ NP grading only.) GE credit: SS.

**136. Managerial Marketing (4)**

Lecture—4 hours. Prerequisite: course 100A; Statistics 103. Application of economic theory and statistics in the study of marketing. Marketing measurement and forecasting, market planning, market segmentation, determination of optimal product market mix, sales and cost analysis, conduct of marketing research, marketing models and systems. GE credit: SocSci | SS.—F, S, Su. (F, S, Su.)

**138. International Commodity and Resource Markets (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100B. Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Basic nature and scope of international trade in agricultural commodities, agricultural inputs, and natural resources. Market dimensions and policy institutions. Case studies to illustrate import and export problems associated with different regions and commodities. GE credit: SocSci | SS.—W. (W.)

**139. Futures and Options Markets (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100A; Statistics 103. Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. History, mechanics, and economic functions of

futures and options markets; hedging; theory of inter-temporal price formation and behavior of futures and options prices; price forecasting; futures and options as policy tools. GE credit: SocSci | SS.—F, S. (F, S.)

**140. Farm Management (4)**

Lecture—4 hours. Prerequisite: Economics 1A. Pass One open to Managerial Economics majors. Farm organization and resources; economic and technological principles in decision making; analytical techniques and management control; problems in organizing and managing the farm business. GE credit: SocSci | SS.—W. (W.)

**142. Personal Finance (3)**

Lecture—3 hours. Prerequisite: Economics 1B. Management of income and expenditures by the household. Use of consumer credit, savings, and insurance by households. Principles of tax, retirement, and estate planning. GE credit: SocSci | SS.—F, S, Su. (F, Su.)

**143. Investments (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Survey of investment institutions, sources of investment information, and portfolio theory. Analysis of the stock, bond and real estate markets from the perspective of the investor. GE credit: SocSci | SS.—F, Su. (F, Su.)

**144. Real Estate Economics (3)**

Lecture—3 hours. Prerequisite: course 100A. The economic theory, analysis, and institutions of real estate markets and related financial markets. Case studies drawn from the raw land, single family, multi-family, industrial and office real estate markets. GE credit: SocSci | SS.—S. (S.)

**145. Farm and Rural Resources Appraisal (4)**

Lecture/discussion—4 hours. Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Principles, procedures, and practice of the valuation process with specific emphasis placed on farm real estate. Concepts of value, description of land, identification of the major physical and economic determinants of value, the three primary appraisal approaches to valuation, discussion of appraisal activity and practice. GE credit: SocSci | SS.—W. (W.)

**146. Business, Government Regulation, and Society (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100B. Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Variety, nature and impact of government regulation: anti-trust laws and economic and social regulation. Nature of the legislative process, promulgation of regulations, and their impact, especially as analyzed by economists. GE credit: SocSci | ACGH, SS.—S. (S.)

**147. Resource and Environmental Policy Analysis (3)**

Lecture—3 hours. Prerequisite: Economics 1A. Open to non-majors only. Natural resource use problems with emphasis on past and current policies and institutions affecting resource use; determinants, principles, and patterns of natural resource use; property rights; conservation; private and public resource use problems; and public issues. Students who have had or are taking course 100A, Economics 100, or the equivalent, may receive only 2 units of credit, so must enroll in course 147M instead. GE credit: SocSci | SS.—W. (W.)

**147M. Resource and Environmental Policy Analysis (2)**

Lecture—3 hours. Prerequisite: Economics 1A. Open to non-majors only. Natural resource use problems with emphasis on past and current policies and institutions affecting resource use; determinants, principles, and patterns of natural resource use; property

rights; conservation; private and public resource use problems; and public issues. Students who have had or are taking course 100A, Economics 100, or the equivalent, must enroll in this course for 2 units rather than course 147. GE credit: SocSci | SS. —W. (W.)

#### **150. Agricultural Labor (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100A. Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Analysis of labor markets with focus on U.S. and world agriculture. Labor supply, demand, market equilibrium; why farm labor markets are different; global trends in farm labor; U.S. farm labor history; unions and collective bargaining; immigration policy. GE credit: SocSci, Div, Wrt | SS. —S. (S.)

#### **155. Operations Research and Management Science (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100A; Statistics 103. Pass One open to Managerial Economics (AMGE) and Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Introduction to quantitative methods used to analyze business and economic processes: decision analysis for management, mathematical programming, competitive analysis, and other methods. GE credit: SocSci | SS, QL. —F, W, S, Su. (F, W, S, Su.)

#### **156. Introduction to Mathematical Economics (4)**

Lecture—4 hours. Prerequisite: courses 100B; 155. Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Linear algebra for economists; necessary and sufficient conditions in static optimization problems; implicit function theorem; economic methodology and mathematics; comparative statics; envelope theorem; Le Chatelier principle; applications to production and consumer models. Offered irregularly. GE credit: SocSci | QL, SS. —Su. (Su.)

#### **157. Analysis for Operations and Production Management (4)**

Lecture—4 hours. Prerequisite: course 155. Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Application of economic theory and quantitative methods to analyze operations and production management problems including process strategy, quality management, location and plant layout, and inventory management. GE credit: SocSci | SS. —F, W. (F, W.)

#### **165. Emerging Economies and Globalization (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 100A, 115A, 115B; completion of course 106 and Economics 162 strongly recommended. Pass One open to Managerial Economics and graduate majors. Economic drivers and policy challenges in the major emerging markets, with an emphasis on the effects of rising incomes, population growth, urbanization, and relative wages on world markets and natural resources. GE credit: SocSci | SS. —F. (F.)

#### **171A. Financial Management of the Firm (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 106; Management 11A-11B. Financial analysis at the firm level: methods of depreciation; influence of the tax structure; inventory, cash, and accounts receivable management; sources of short-term and long-term financing, and financial problem solving using a computer spreadsheet program. Not open for credit to students who have completed Economics 134. GE credit: SocSci | QL, SS. —F, W, Su. (F, W, Su.)

#### **171B. Financial Management of the Firm (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 171A. Financial analysis at the firm level: methods of capital budgeting; calculating the cost of

capital; dividend policies; mergers and acquisitions; and special current topics in finance. GE credit: SocSci | QL, SS. —W, S, Su. (W, S, Su.)

#### **175. Natural Resource Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100B or Economics 100 or the equivalent. Economic concepts and policy issues associated with natural resources, renewable resources, (ground water, forests, fisheries, and wildlife populations) and non-renewable resources (minerals and energy resources, soil). (Same course as Environmental Science and Policy 175.) GE credit: SocSci | SS. —S. (S.)

#### **176. Environmental Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100B or Economics 100. Role of the environment in economic activity and methods for protecting and enhancing environmental quality; implications of market failures for public policy; design of environmental policy; theory of welfare measurement; measuring the benefits of environmental improvement. GE credit: SocSci | SS. —W. (W.)

#### **190. Topics in Managerial Economics (3)**

Lecture—3 hours. Prerequisite: passing grades in course 100A and Statistics 103; consent of instructor. Selected topics in managerial economics, focusing on current research. May be repeated four times for credit when topic differs. Offered irregularly. GE credit: SocSci | SS.

#### **192. Internship (1-6)**

Internship—3-18 hours. Internship experience off and on campus in all subject areas offered in the Department of Agricultural and Resource Economics. Internships are supervised by a member of the staff. (P/NP grading only.) GE credit: SS.

#### **194HA. Special Study for Honors Students (4)**

Independent study—3 hours; seminar—1 hour. Prerequisite: minimum GPA of 3.500; course 100B, courses 106 and 155 (may be taken concurrently); major in Agricultural and Managerial Economics or Managerial Economics; senior standing; consent of instructor. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: SocSci | QL, SS, WE.

#### **194HB. Special Study for Honors Students (4)**

Independent study—3 hours; seminar—1 hour. Prerequisite: minimum GPA of 3.500; course 100B; courses 106 and 155 (may be taken concurrently); major in Agricultural and Managerial Economics or Managerial Economics; senior standing. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: SocSci | QL, SS, WE.

#### **197T. Tutoring in Managerial Economics (1-3)**

Prerequisite: senior standing in Managerial Economics and consent of Department Chairperson. Undergraduates assist the instructor by tutoring students in one of the department's regularly scheduled courses. (P/NP grading only.) GE credit: SS.

#### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SS.

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SS.

#### **Graduate**

#### **200A. Microeconomic Theory (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: graduate standing. Linear and non-linear optimization theory applied to develop the theory of the profit-maximizing firm and the utility-maximizing consumer. (Same course as Economics 200A.) —F. (F.)

#### **200B. Microeconomic Theory (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: course 200A. Characteristics of market equilibrium under perfect competition, simple monopoly and monopsony. Emphasis on general equilibrium and welfare economics; the sources of market success and market failures. (Same course as Economics 200B.) —W. (W.)

#### **200C. Microeconomic Theory (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: course 200B. Uncertainty and information economics. Individual decision making under uncertainty. Introduction to game theory, with emphasis on applications to markets with firms that are imperfect competitors or consumers that are imperfectly informed. (Same course as Economics 200C.) —S. (S.)

#### **202A. Introduction to Applied Research Methods (3)**

Lecture/discussion—3 hours. Prerequisite: courses 204A and 256, or the equivalent; course 200A concurrently. Study of philosophy and methodology of applied research in agricultural economics. Methods of conceptualization of researchable topics. Method of communication and constructive criticism. —F. (F.)

#### **202B. Applied Microeconomics I: Consumer and Producer Behavior (3)**

Lecture/discussion—3 hours. Prerequisite: courses 200A and 202A; course 200B concurrently. Application of consumer and producer theory in models of individual behavior and market-level phenomena. Implications of consumer and producer theory for specification of empirical models of supply and demand for inputs and outputs and market equilibrium displacement models. —W. (W.)

#### **202C. Research Design for Applied Microeconomics (3)**

Lecture/Discussion—3 hours. Prerequisite: courses 240A and 202B. Third of three courses in the Ph.D level applied microeconomics sequence. Examines the design of empirical research and the application of econometric theory. —S. (S.)

#### **204A. Microeconomic Analysis I (4)**

Lecture—4 hours. Prerequisite: course 100B or Economics 100; advanced undergraduates with consent of instructor. Behavior of consumers and producers and their interactions; tools and methods needed to analyze economic behavior in the marketplace. Application of those methods to real-world problems. —F. (F.)

#### **204B. Microeconomic Analysis II (4)**

Lecture—4 hours. Prerequisite: course 204A or consent of instructor. Behavior in imperfectly competitive markets-monopoly and price discrimination; oligopoly. Introduction to noncooperative game theory. Analysis of decisions made under risk and uncertainty and imperfect information. The economics of externalities and public goods. —W. (W.)

#### **214. Development Economics (4)**

Lecture—4 hours. Prerequisite: course 100A, 100B, Economics 101; course 204A and Economics 160A, 160B recommended. Review of the principal theoretical and empirical issues whose analysis has formed development economics. Analysis of economic development theories and development strategies and their application to specific policy issues in developing country contexts. (Same course as Economics 214.) —S. (S.)

#### **215A. Microdevelopment Theory and Methods I (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A or 204A; course 240A recommended. Agricultural development theory, with a focus on microeconomics. Agricultural household behavior with and without imperfections and uncertainty. Analysis of rural land, labor, credit and insurance markets, institutions, and contracts. (Same course as Economics 215A.) —F. (F.)

#### **215B. Open Macroeconomics of Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 200A or 204A; 200D or 205, and 214 or 215A. Models and policy approaches regarding

trade, monetary and fiscal issues, capital flows and debt are discussed in the macroeconomic framework of an open developing country. The basic analytical focus is real exchange rate and its impact on sectoral allocation of resources. (Same course as Economics 215B.)—W. (W.)

### **215C. Microdevelopment Theory and Methods II (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 215A. Extension of development theory and microeconomic methods. Agricultural growth and technological change; poverty and income inequality; multisectoral, including village and regional models. Computable general equilibrium methods and applications. (Same course as Economics 215C.)—S. (S.)

### **215D. Environment and Economic Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A, 204A or 275. Interdisciplinary course drawing on theoretical and empirical research on interactions between environmental resource use and economic development processes. Analysis of issues emerging at the interface of environmental and development economics. (Same course as Economics 215D.)—S. (S.)

### **222. International Agricultural Trade and Policy (4)**

Lecture—4 hours. Prerequisite: course 100B or 204A; Economics 160A or the equivalent. Analysis of country interdependence through world agricultural markets. Partial equilibrium analysis is used to study the impacts of national intervention on world markets, national policy choice in an open economy and multinational policy issues. —F. (F.)

### **223. Economics of Agriculture (4)**

Lecture—4 hours. Prerequisite: courses 204A and 256A or equivalent completed or concurrent required. Open to MS students in Agricultural and Resource Economics, Ph.D. students in Agricultural and Resource Economics and qualified students from other UC Davis graduate groups/programs. Analytic treatment of the historical development and contemporary role of agriculture in the global, U.S. and California economies. Uses economic reasoning and evidence to develop historical and conceptual understanding of the economics of agriculture, agricultural issues, and related government policies. —F. (F.) Alston

### **231. Supply and Demand for Agricultural Products (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 200A, 202A, and 240A or consent of instructor. Analysis of supply and demand for agricultural commodities emphasizing the effective use of microeconomic theory with econometric methods, and other empirical procedures, in conducting applied analysis of supply and demand at the firm and industry level. —F. (F.)

### **232. Agricultural Commodity Markets (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 200A, 202A, and 240A or consent of instructor. Economic analysis of industries that produce, market, transport, store, and process basic commodities. Analysis of market equilibrium under perfect and imperfect competition, with and without government involvement. —W. (W.)

### **233. Agricultural Policy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 200A, 202A, and 240A or consent of instructor. Nature, formation, evolution, and institutions of economic policy applied to food, agricultural, and rural issues. Examples for detailed consideration include food security, commodity issues, and trade policy. Analytical approaches include static and dynamic welfare analysis, policy design, and political-economic analysis. —S. (S.)

### **239. Econometric Foundations (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. The course will prepare students for econometric theory and empirical work by examining the statistical foun-

dation of econometrics. Special attention is paid to problems specific to non-experimental data common to social sciences. Topics from matrix algebra are also covered. (Same course as Economics 239.)—F. (F.)

### **240A. Econometric Methods (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Statistics 133 and a course in linear algebra or the equivalent. Least squares, instrumental variables, and maximum likelihood estimation and inference for single equation linear regression model; linear restrictions; heteroskedasticity; autocorrelation; lagged dependent variables. (Same course as Economics 240A.)—W. (W.)

### **240B. Econometric Methods (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 240A. Topics include asymptotic theory and instrumental variables, pooled time-series cross-section estimation, seemingly unrelated regression, classical hypothesis tests, identification and estimation of simultaneous equation models, cointegration, error-correction models, and qualitative and limited dependent variable models. (Same course as Economics 240B.)—S. (S.)

### **240C. Time Series Econometrics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 240B or consent of instructor. Probability theory; estimation, inference and forecasting of time series models; trends and non-standard asymptotic theory; vector time series methods and cointegration; time series models for higher order moments and transition data; state-space modeling; the Kalman filter. (Same course as Economics 240C)—W. (W.)

### **240D. Cross Section Econometrics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 240B or consent of instructor. Estimation and inference for nonlinear regression models for cross-section data; models for discrete data and for limited dependent variables; models for panel data; additional topics such as bootstrap and semiparametric regression. (Same course as Economics 240D)—F. (F.)

### **240E. Topics in Time Series Econometrics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 240C or consent of instructor. Modern econometric techniques for time series data. Expand on topics covered in Economics 240A, 240B and 240C. Contents may vary from year to year. (Same course as Economics 240E.)—S. (S.)

### **240F. Topics in Cross Section Econometrics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 240D or consent of instructor. Modern econometrics techniques for cross-section data. Expand on topics covered in Economics 240A, 240B and 240D. Contents may vary from year to year. (Same course as Economics 240F.)—S. (S.)

### **252. Optimization with Economic Applications (4)**

Lecture—3 hours; discussion—1 hour. Applied linear programming methods emphasizing uses for business decisions: production, diet, blending, network and related problems. —W. (W.)

### **254. Dynamic Optimization Techniques with Economic Applications (4)**

Lecture—4 hours. Prerequisite: course 253 and elementary knowledge of ordinary differential equations. Necessary and sufficient conditions in the calculus of variations and optimal control, economic interpretations, the dynamic envelope theorem and transversality conditions, infinite horizon problems and phase diagrams, local stability and comparative statics of the steady state, comparative dynamics. —F. (F.)

### **255. Applied Dynamic Structural Econometric Modeling (4)**

Lecture—4 hours. Prerequisite: course 254. Course covers structural econometric models of static games of incomplete information, single-agent dynamic optimization problems and multi-agent dynamic

games, with a focus on applications to issues relevant to the environment, energy, natural resources, agriculture, and development. —W. (W.)

### **256A. Applied Econometrics I (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 106 or Economics 140; or consent of instructor. First of two courses in the Masters-level econometrics sequence. The linear regression model and generalizations are applied to topics in agricultural and resource economics. Tools for empirical research for problems requiring more sophisticated tools than standard regression models are emphasized. —F. (F.)

### **256B. Applied Econometrics II (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 256A or consent of instructor. Second of two courses in the Masters-level econometrics sequence. The linear regression model and generalizations are applied to topics in agricultural and resource economics. Tools for empirical research for problems requiring more sophisticated tools than standard regression models are emphasized. Offered in alternate years. —(W.)

### **258. Demand and Market Analysis (4)**

Lecture—4 hours. Prerequisite: courses 204B and 256 or consent of instructor. Application of theoretical material covered in 204A/B, with particular focus on production theory/factor demand and imperfect competition/market power. Use of theoretical models as a foundation for empirical economic analysis, and empirical exercises. Independent research on chosen topics, with empirical application. —S. (S.)

### **275. Economic Analysis of Resource and Environmental Policies (4)**

Lecture/discussion—4 hours. Prerequisite: course 204A. Development of externality theory, market failure concepts, welfare economics, theory of renewable and non-renewable resource use, and political economic models. Applications to policy issues regarding the agricultural/environment interface and managing resources in the public domain. (Same course as Environmental Science and Policy 275.)—S. (S.)

### **276A. Environmental Economics: Externalities (4)**

Lecture—4 hours. Prerequisite: students should have completed the first year graduate-level sequence in microeconomics and econometrics. Course introduces fundamental and recent research in environmental economics, focusing on the design, implementation and evaluation of environmental policy instruments to correct market failures. It will expose students to economic theories and empirical techniques frequently used in this field. —W. (W.)

### **276B. Environmental Economics: Non-Market Valuation (4)**

Lecture—4 hours. Prerequisite: students should have completed the first year graduate-level sequence in microeconomics and econometrics. Second PhD field course in environmental economics, covering theory and econometrics of methods for valuing non-market goods and environmental quality changes. Topics include revealed preference (travel cost, hedonics, sorting equilibrium) and stated preference (contingent valuation, choice experiments, conjoint analysis) techniques. —S. (S.)

### **277. Natural Resource Economics (4)**

Lecture—4 hours. Prerequisite: course 254 or consent of instructor. Application of capital theory and dynamic methods to issues of optimal use of renewable and nonrenewable resources. Examination of policy issues associated with forests, fisheries, groundwater, energy resources, watersheds, soil, global climate, and wildlife. —S. (S.)

### **290. Topics in Agricultural and Resource Economics (3)**

Lecture—3 hours. Selected topics in agricultural and resource economics, focusing on current research. May be repeated 4 times for credit. Offered irregularly.

**293. Analysis of California Agriculture and Resources (3)**

Lecture—1.5 hours; fieldwork—45 hours total, including one 5-day summer field trip. Review and analysis of production, marketing, and resource issues facing agricultural firms in California. Application of economic theory and measurement to individual firm and industry decisions in an applied setting. (S/U grading only.)—F. (F.)

**298. Directed Group Study (1-5)**

Advanced study through special seminars, informal group studies, or group research on problems for analysis and experimentation. Sections: (1) Managerial Economics; (2) Agricultural Policy; (3) Community and Regional Development; (4) Natural Resources; (5) Human Resources; (6) Research Methods and Quantitative Analysis.

**299. Individual Study (1-12)**

Sections: (1) Managerial Economics; (2) Agricultural Policy; (3) Community and Regional Development; (4) Natural Resources; (5) Human Resources; (6) Research Methods and Quantitative Analysis; and (7) Dissertation Research Prospectus. (S/U grading only.)

**299D. Special Study for Doctoral Dissertation (1-12)**

(S/U grading only.)

**Professional****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Agricultural Computing and Information Systems

See Applied Computing and Information Systems, on page 175.

## Agricultural Management and Rangeland Resources

(College of Agricultural and Environmental Sciences)

This major was discontinued as of Fall 2008; see Ecological Management and Restoration, on page 250.

**Faculty.** See Plant Sciences, on page 514.

**Courses.** See Plant Sciences, on page 514.

## Agricultural Systems and Environment

(College of Agricultural and Environmental Science)

**Minor Program Requirements:**

UNITS

**Agricultural Systems and Environment.....**

18-20

**Preparatory material:** Course in statistics such as Statistics 13, 32, 100, Plant Sciences 120, Sociology 46B or equivalent. Course in plant science such as Plant Sciences 2, completion of Biological Sciences 2A and 2B and 2C also fulfills this requirement.

Select one of the two following tracks:

Sustainable Agriculture track	
Plant Sciences 150 .....	4
Soil Science 100 .....	5
Plant Sciences 105 or 176 or Entomology 110.....	3-5
Minimum of six units from the following:	
Plant Sciences 110A, 110C, 110L, 112, 113, 114 170A, 170B .....	6
Range and Natural Resources track	
Plant Sciences 130 .....	3
Minimum of 15 units from the following:	
Plant Sciences 112, 131, 135, 150, 163, Environmental Science and Policy 123, 172, Wildlife, Fish and Conservation Biology 110, 151	

**Minor Advisers.** T. Gradziel (*Plant Sciences*)

**Advising Center** is located in 1220 Plant and Environmental Sciences 530-752-1715.

## Agronomy

See Plant Sciences, on page 514.

## Agronomy and Range Science

See Plant Sciences, on page 514.

## American Studies

(College of Letters and Science)

**Department Office.** 2134A Hart Hall  
530-752-6429; <http://ams.ucdavis.edu>

**Faculty**

Javier Arbona, Ph.D., Post Doctoral Scholar  
Charlotte Biltekoff, Ph.D., Associate Professor  
Ryan Cartwright, Assistant Professor  
Caren Kaplan, Ph.D., Professor  
Eric Smoodin, Ph.D., Professor  
Julie Sze, Ph.D., Professor  
Carolyn Thomas, Ph.D., Professor  
Grace Wang, Ph.D., Associate Professor

**Emeriti Faculty**

Jay Mechling, Ph.D., Professor Emeritus  
*Academic Senate Distinguished Teaching Award*  
Michael L. Smith, Ph.D., Senior Lecturer Emeritus  
David Scofield Wilson, Ph.D., Senior Lecturer  
Emeritus

**The Major Program**

American Studies explores the cultures of the United States, as well as their transnational exchanges and impact. The discipline's practitioners seek to understand the historical origins of particular cultures and practices held by individuals and groups within the United States and how those values and beliefs shape social and political realities within and beyond U.S. borders. The approach that American Studies takes is interdisciplinary, meaning that in American Studies we answer these questions using tools developed by numerous disciplines including history, sociology, anthropology, literary criticism, folklore, media and science and technology studies. American Studies takes as its subject American cultures and provides an excellent, broad education in the liberal arts. Our aim is to make each student a culture critic, a person capable of bringing a thoughtful and humane approach to bear upon our understanding of the varieties of American experiences. Making connections is the way we like to characterize our work in American Studies. American Studies majors are good critical thinkers, develop excellent writing skills, and most importantly "learn how to learn," that is, you learn to figure out

what intellectual tools and specialized knowledge you will need to perform a task or solve a problem. These intellectual and communication skills will prepare majors for a broad array of careers.

**The Program.** American Studies majors take five upper division courses devoted to close study of major issues crucial to the practice of American Studies. Advanced work in at least two other departments or programs allows each student to areas tailored to his or her own individual education goals. Sample emphases include: Culture and Consumption, Youth Education, Social Identities, Nature, Culture and Environment, Marketing, Advertising and Business, and Food and Health, for example. Students have the option of writing a senior thesis within this emphasis.

**Career Alternatives.** As an interdisciplinary program, American Studies provides a good liberal arts and sciences undergraduate education. American Studies maximizes a student's contact with a variety of subject matter and approaches. Graduates have moved into a broad range of career settings, including journalism, law, teaching, marketing, non-profit and community organizations, government, social work, environmental planning, library science, museum curatorship, and business. Students discover new career possibilities through their internships in American institutions.

**A.B. Major Requirements:**

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>24</b>
American Studies 10 .....	4
One additional lower division American Studies course.....	4
One course from: African American and African Studies 10, Asian American Studies 1, Chicana/o Studies 10, Native American Studies 1, or an equivalent course in racial and ethnic diversity .....	4
One course from: Anthropology 2, Sociology 2, Women's Studies 50, or an equivalent course in social science approaches to culture.....	4
One course from: History 17A, 17B, 72A, 72B.....	4
One course from: English 30A, 30B, Film Studies 1, or an equivalent course introducing critical approaches to literary and visual texts in the humanities .....	4
<b>Depth Subject Matter.....</b>	<b>40</b>
American Studies 100 and 160.....	8
American Studies Electives: Three additional upper-division American Studies courses .....	12
Emphasis.....	20
In consultation with the American Studies Undergraduate Adviser, the student designs a program of 20 units (typically five courses) of upper division course work around a unifying theme, period, or subject matter in American cultures. The courses should come from two or more departments or programs and can include up to 8 units of American Studies courses. Only 4 units of course 192 (internship) can be included in the emphasis. The student may choose the senior thesis option (190A-190B) for 8 units of the emphasis and take the remaining 12 units outside the program.	
<b>Total Units for the Major .....</b>	<b>64</b>

**Recommended**

Completion of the college requirement in English composition before enrollment in American Studies 190A.

**Minor Program Requirements:**

	UNITS
<b>American Studies .....</b>	<b>20</b>
American Studies, upper division courses .....	20
No more than 8 units of course 192 may be counted toward this total.	

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;

ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience

Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience  
Quarter Offered: F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses

**Faculty Advisers.** J. Arbona, C. Biltkoff, C. Kaplan, A. Nath, E. Smoodin, J. Sze, G. Wang

## Courses in American Studies (AMS)

### Lower Division

#### 1A. Science and American Culture (4)

Lecture—3 hours; discussion—1 hour. American science as a cultural system. Mutual influence and interaction of that system with other cultural systems including religion, social thought, art, architecture, literature, music, and common sense. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, DD, WE.—F.

#### 1B. Religion in American Lives (4)

Lecture—3 hours; discussion—1 hour. Religious and spiritual practices in the United States, and their interrelationships with other aspects of U.S. history, society and culture; indigenous and imported faiths, and the impact of immigration, colonization and culture contact on religious systems. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.—F. (F.)

#### 1C. American Lives Through Autobiography (4)

Lecture—3 hours; discussion—1 hour. American culture as understood through the individual life stories told by Americans, with attention to the roles of gender, race, ethnicity, social class, and sexual orientation in the individual's life course. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.—W.

#### 1E. Nature and Culture in America (4)

Lecture—3 hours; discussion—1 hour. Uses and abuses of nature in America; patterns of inhabitation, exploitation, appreciation, and neglect; attention to California; emphasis on metaphor as a key to understanding ourselves and the natural world; attention to models of healing: stewardship, ecology, the "rights" movement. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.—S. Cartwright

#### 4. Freshman Seminar (2)

Seminar—2 hours. Prerequisite: open only to students who have completed fewer than 40 quarter units. Class size limited to 25 students. Investigation of a special topic in American Studies through shared readings, discussions, written assignments, and special activities (such as fieldwork, site visits). Emphasis on student participation in learning.—F, S. (F, S.)

#### 5. Technology in American Lives (4)

Lecture—2 hours; discussion—2 hours. Technology as both a material cultural force and a symbol in American culture; the lives of engineers at work and play; images of the engineer and technology in popular culture; social political and ethical issues raised by technology. Offered irregularly. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.—F. (F.)

#### 10. Introduction to American Studies (4)

Lecture—3 hours; discussion—1 hour. United States history, culture and society. Examination of cultural objects and social practices. Topics include popular culture (film, TV, Internet), cultural diversity, social activism, play, and communication. GE credit: GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.—S. Wang, Sze

#### 21. Objects and Everyday Life (4)

Lecture—3 hours; discussion—1 hour; term paper. Material culture (objects and artifacts ranging from everyday objects like toys and furnishings to buildings and constructed landscapes) as evidence for understanding the everyday (vernacular) lives (gender, social class, ethnicity, region, age, and other factors; collecting and displaying material. Offered in alternate years. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, WE.—S. Kaplan

#### 25. United States as a Business Culture (4)

Lecture—3 hours; discussion—1 hour. Business as a cultural system and its relation to religion, politics, arts, science, technology, and material culture; business themes of success, creativity, invention, and competition in American autobiographies, fiction, advice literature, film, and television; cultures of the

workplace; multinational business. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.—F. (F.)

#### 30. Images of America and Americans in Popular Culture (4)

Lecture—3 hours; discussion—1 hour. Investigation of verbal and visual discourses about American identity in various popular culture products, including film, television, radio, music, fiction, art, advertising, and commercial experiences; discourses about the United States in the popular culture of other societies. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.—(F.) Kaplan, Smoodin

#### 55. Food in American Culture (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: complete Subject A requirement. Food as a cultural system in the United States; food in the performance of individual and group identity, including gender and ethnicity; food in literature, art, popular culture (film, television, advertising), and folk culture; the food industry and business. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.—S. (S.) Biltkoff

#### 59. Music and American Culture (4)

Lecture—3 hours; discussion—1 hour. An examination of music and American culture. Studies will explore music in its cultural contexts, which may include examinations of recording and broadcasting, of race, class, and gender, the role of technology, and relationships between musical production, consumption and listening. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.—F. (F.)

#### 95. Careers and Identity in American Culture (2)

Lecture—1 hour; discussion—1 hour. Defining one's identity through the career. The life course, preparation, and choices. Personality and career. Ethics. Gender, ethnicity, sexuality, and social class in the workplace. The transnational workplace. Conflicts between the career and other social roles.—F, W, S, Su. (F, W, S, Su.)

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 99. Individual Study for Undergraduates (1-5)

(P/NP grading only.)

### Upper Division

#### 100. Methods in American Studies (4)

Lecture/discussion—3 hours; term paper. Design and implementation of interdisciplinary research, analysis and writing for American Studies and other cultural studies fields. Library and Internet research skills, project/problem definition, methods for study of texts, individuals, communities. Hand-on, skill-building, focused reading, discussion.

#### 101A. Special Topics: Popular Culture Studies (4)

Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit in different subject area only.

#### 101B. Special Topics: Women's Studies (4)

Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit in different subject area only.)

#### 101C. Special Topics: Material Aspects of American Culture (4)

Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit in different subject area only.

#### 101D. Special Topics: American National Character (4)

Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit in different subject area only.

#### 101E. Special Topics: American Lives Through Autobiography (4)

Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit in different subject area only.

#### 101F. Special Topics: Interrelationship Between Arts and Ideas (4)

Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit in different subject area only.

#### 101G. Special Topics: New Directions in American Culture Studies (4)

Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit in different subject area only.

#### 101H. Special Topics: Problems in Cross-Cultural American Studies (4)

Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit in different subject area only.

#### 110. A Decade in American Civilization (4)

Lecture—2 hours; discussion—2 hours. Close examination of a single decade in American civilization; the connections between the history, literature, arts, customs, and ideas of Americans living in the decade. Issues and representations of race, class, gender, age, and sexuality in the decade. May be repeated for credit if decades studied are different. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

#### 120. American Folklore and Folklife (4)

Lecture—3 hours; fieldwork—1 hour. Theory and method of the study of American folk traditions, including oral lore, customs, music, and material folk culture; the uses and meanings of those traditions in various folk communities, including families, ethnic institutions, voluntary organizations, and occupational groups. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

#### 125. Corporate Cultures (4)

Lecture—2 hours; discussion—1 hour; fieldwork—1 hour. Prerequisite: consent of instructor. Exploration of the small group cultures of American corporate workplaces, including the role of environment, stories, jokes, rituals, ceremonies, personal style, and play. The effects of cultural diversity upon corporate cultures, both from within and in contact with foreign corporations.—S. (S.)

#### 130. American Popular Culture (4)

Lecture/discussion—3 hours; fieldwork—1 hour. American popular expression and experience as a cultural system, and the relationship between this system and elite and folk cultures. Exploration of theories and methods for discovering and interpreting patterns of meaning in American popular culture. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

#### 139. Feminist Cultural Studies (4)

Lecture/discussion—4 hours. The histories, theories, and practices of feminist traditions within cultural studies. (Same course as Women's Studies 139.) Offered irregularly. GE credit: SocSci, Div, Wrt | ACGH, AH, DD, SS, VL, WE.

#### 151. American Landscapes and Places (4)

Lecture—2 hours; discussion—1 hour; fieldwork—3 hours. Comparative study of several American cultural populations inhabiting a region, including their

relationship to a shared biological, physical, and social environment, their intercultural relations, and their relationships to the dominant American popular and elite culture and folk traditions. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE. —W. (W.)

#### **152. The Lives of Children in America (4)**

Lecture—2 hours; discussion—2 hours. Experience of childhood and adolescence in American culture, as understood through historical, literary, artistic, and social scientific approaches. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE. —S. (S.) Smoodin

#### **153. The Individual and Community in America (4)**

Lecture—2 hours; discussion—2 hours. Interdisciplinary examination of past and present tensions between the individual and the community in American experience, as those tensions are expressed in such cultural systems as folklore, public ritual, popular entertainment, literature, fine arts, architecture, and social thought. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

#### **154. The Lives of Men in America (4)**

Lecture—2 hours; discussion—2 hours. Interdisciplinary examination of the lives of boys and men in America, toward understanding cultural definitions of masculinity, the ways individuals have accepted or resisted these definitions, and the broader consequences of the struggle over the social construction of gender. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

#### **155. Eating in America (4)**

Lecture—3 hours; fieldwork. Prerequisite: course 1. Interdisciplinary examination of the culture of food in America. Exploration of eating as a richly symbolic event integral to how Americans express and negotiate values, politics and identity. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE. —S. (S.) Biltzoff

#### **156. Race, Culture and Society in the United States (4)**

Lecture—2 hours; discussion—2 hours. Interdisciplinary examination of the significance of race in the making of America; how race shapes culture, identities and social processes in the United States; the interweaving of race with gender, class and nationhood in self and community. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE. —W. (W.)

#### **157. Animals in American Culture (4)**

Lecture—3 hours, discussion—1 hour. Animals as symbols in American thought, as found in folklore, popular culture, literature, and art; customs and stories around human-animal interactions, including hunting, religion, foodways, pets, zoos, circuses, rodeos, theme parks, and scientific research on animals. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE. —W.

#### **158. Technology and the Modern American Body (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Technocultural Studies 1 and either course 1A or 5. The history and analysis of the relationships between human bodies and technologies in modern society. Dominant and eccentric examples of how human bodies and technologies influence one another and reveal underlying cultural assumptions. (Same course as Technocultural Studies 158.) GE credit: GE credit: ArtHum | ACGH, AH, WE.

#### **160. Undergraduate Seminar in American Studies (4)**

Seminar—3 hours; term paper. Prerequisite: open to junior and senior American Studies majors only. Limited enrollment. Intensive reading, discussion, research, and writing by small groups in selected topics of American Studies scholarship; emphasis on

theory and its application to American material. May be repeated one time for credit when content differs. —F, S. (F, S.)

#### **190A. Senior Thesis Research Seminar (4)**

Seminar—2 hours; extensive writing. Research and prospectus writing for senior thesis. —F. (F.)

#### **190B. Senior Thesis (4)**

Independent study—12 hours. Prerequisite: course 190A; consent of instructor. In consultation with adviser, student writes an extended research paper on a topic proposed in course 190A.—F, W, S. (F, W, S.)

#### **192. Internship in American Institutions (1-12)**

Internship—1-12 hours. Prerequisite: enrollment dependent on availability of intern positions, with priority to American Studies majors. Supervised internship and study within and about key organizations in American civilization at archives, museums, schools, historical societies, governmental and social agencies, etc., with attention to the techniques of participant observation and the collection of ethnographical data. May be repeated for credit for a total of 12 units. (P/NP grading only.)

#### **197T. Tutoring in American Studies (1-5)**

Tutorial—1-5 hours. Prerequisite: consent of Chairperson of American Studies Program. Tutoring in lower division American Studies courses, usually in small discussion groups. Periodic meetings with the instructor in charge; reports and readings. May be repeated for credit when the tutoring is for a different course. (P/NP grading only.)

#### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor and chairperson of American Studies Program. (P/NP grading only.)

#### **Graduate**

#### **220. American Folklore and Folklife (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Theory and methods for the study of the folklore and the folk customary behavior of Americans; contributions of folklore studies to scholarship in humanities and social science disciplines. —S. (S.) Turner

#### **250. Cultural Study of Masculinities (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Interdisciplinary approaches to understanding the social and cultural construction of masculinities; attention to the effects of biology, gender, race, class, sexual and national identities; criticism of oral, printed, visual, and mass mediated texts, and of social relations and structures. (Same course as Women's Studies 250.) —W.

#### **255. Food in American Culture (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Graduate standing or advanced undergraduate with consent of instructor. Interdisciplinary theories and methods for the study of food in American culture; food studies in relation to issues of identity (age, gender, ethnicity, religion, region, etc.), social relations, systems of production, and cultures of consumption. Offered irregularly. —W. (W.)

#### **298. Group Study (1-5)**

(S/U grading only.)

#### **299. Individual Study (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

#### **Professional**

#### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) —F, W, S. (F, W, S.)

## **Anatomy**

See **Anatomy, Physiology and Cell Biology, on page 159; and Courses in Cell Biology and Human Anatomy (CHA), on page 432.**

## **Anatomy, Physiology and Cell Biology**

See **Veterinary Medicine, School of, on page 581.**

## **Anesthesiology and Pain Medicine**

See **Medicine, School of, on page 427.**

## **Animal Behavior (A Graduate Group)**

Andrew Sih, Ph.D., Chairperson of the Group

**Group Office.** 227D Life Sciences  
530-752-2981; Fax 530-752-8822;  
[animalbehavior@biosci.ucdavis.edu/](mailto:animalbehavior@biosci.ucdavis.edu)  
<http://anb.ucdavis.edu/>

**Faculty.** The Group includes faculty from 12 departments in five schools and colleges.

**Graduate Study.** The Ph.D. program in Animal Behavior is an interdepartmental program focusing on the mechanisms underlying and evolution of behavior, and applications of animal behavior to current problems in conservation biology and animal welfare. The program trains students for teaching and research in a variety of areas, including anthropology, animal science, ecology, entomology, neurobiology, psychology, physiology, veterinary science, wildlife biology, and zoology. Resources available to students, in addition to various departmental facilities, include those of the California National Primate Research Center, Bodega Marine Laboratory, and the UC Natural Reserve System.

There is an application deadline of Dec 1 for fall quarter.

**Preparation.** Appropriate preparation is a bachelor's or master's degree in a discipline relevant to the biology of behavior. In addition, at least one course from each of the following areas must be taken before admission into the program or before the end of the first year in the program.

**Ecology:** e.g., Evolution and Ecology 101, Environmental Science and Policy 100

**Genetics:** e.g., Biological Sciences 101

**Statistics:** e.g., Statistics 102 or Psychology 103

**Evolution:** e.g., Evolution and Ecology 100

**Animal behavior:** Neurobiology, Physiology, and Behavior 102

**Physiology:** e.g. Neurobiology, Physiology, and Behavior 101

**Core Requirements.** Students take two "breadth" courses, at least one course in statistics, a methodology and grant writing course, and a graduate seminar. Required courses:

**Fundamentals of Animal Behavior:** Animal Behavior 218A and 218B

**Methodology and Grant Writing:** Animal Behavior 201

**Advanced Statistics:** Psychology 204A, 204B, 204C, or 204D; Statistics 106, 108, 138, 205; Agronomy 204, 206

**Graduate Seminars:** Animal Behavior 290  
**Strongly recommended:** a course on teaching science: Biological Sciences 310, Psychology 390A, 390B

**Electives:** Students also take two additional courses (of at least 3 units each) in the student's area of specialization, chosen in consultation with and approved by the Course Guidance Committee.

**Strongly recommended:** at least one additional course in statistics or modeling. In addition to the above listed courses, modeling courses include Population Biology 231 and Psychology 120.

## Courses in Animal Behavior (ANB)

### Graduate

#### 201. Scientific Approaches to Animal Behavior Research (3)

Lecture—3 hours. Prerequisite: consent of instructor. Philosophical issues, goals, strategies and tools in field and laboratory research. May be repeated for credit when topics differ. —S. (S.)

#### 203. Advanced Animal Welfare (3)

Lecture—3 hours. Prerequisite: Animal Science 103 or equivalent course. Advanced animal welfare. Key concepts used when evaluating and understanding the welfare of animals kept by humans. Topics include animal pain, stress, cognition, motivation and emotions. Critical discussion of primary literature. May be repeated one time for credit. Offered in alternate years. —S. (S.) Tucker

#### 210. History of Animal Behavior (1)

Discussion—1 hour. Prerequisite: consent of instructor. Classic, seminal papers in animal behavior. Discussion of readings and broader historical context in which papers were written. (S/U grading only.)

#### 218A. Fundamentals of Animal Behavior (5)

Lecture/discussion—4 hours; discussion—1 hour. Prerequisite: consent of instructor; upper-division undergraduate introduction to the biology of behavior, such as Psychology 101, 122, 123, Neurobiology, Physiology, and Behavior 102, 150, 152, Wildlife, Fish, and Conservation Biology 141, Entomology 104, or Animal Science 105. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science. (Same course as Psychology 218A.) —F. (F.) Schank

#### 218B. Fundamentals of Animal Behavior (5)

Lecture/discussion—4 hours; discussion—1 hour. Prerequisite: consent of instructor; course 218A or Psychology 218A. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science. (Same course as Psychology 218B.) —W. (W.) Sih

#### 221. Animal Behavior, Ecology and Evolution (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 102, Evolution and Ecology 100, 101 or the equivalent, graduate standing, and consent of instructor. Interface between animal behavior, ecology and evolution. New developments in behavioral ecology and development and testing of hypotheses in this discipline. (Same course as Animal Behavior 221.) Offered irregularly.

#### 230A. Interdisciplinary Approaches to Animal Behavior (3)

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Analysis of literature in behavior and an allied discipline or disciplines that offer the potential, in combination, to advance the understanding of a topic in animal behavior conceptually and empirically. Topics will vary from year to year.

#### 230B. Interdisciplinary Approaches to Animal Behavior (5)

Workshop—4 days total; discussion—3 hours; term paper. Prerequisite: course 230A the previous quarter. Development of an empirical or theoretical interdisciplinary approach to research on a current topic in animal behavior.

#### 270. Research Conference in Behavioral Ecology (1)

Conference—1 hour. Prerequisite: graduate standing and consent of instructor. Limited enrollment. Critical presentation and evaluation of current literature and ongoing research in behavioral ecology. May be repeated for credit. (S/U grading only.)

#### 287. Advanced Animal Behavior (2)

Seminar—2 hours. Prerequisite: graduate standing and consent of instructor, courses in animal behavior (Neurobiology, Physiology, and Behavior 102 or the equivalent), and either evolution (Evolution and Ecology 100 or the equivalent) or ecology (Evolution and Ecology 101 or the equivalent). Reading, reports and discussion on current topics in animal behavior, with a focus on topics that lie at the interface between animal behavior, ecology and evolution. (Same course as Population Biology 287.) May be repeated two times for credit.

#### 290. Seminar in Animal Behavior (1-3)

Seminar—1-3 hours. Prerequisite: consent of instructor. Selected topics in animal behavior. (S/U grading only.) —F, W, S. (F, W, S.)

#### 294. Seminar in Behavioral Ecology of Predators and Prey (3)

Seminar—2 hours. Prerequisite: graduate standing. Presentation and analysis of research papers on social and foraging behavior of predatory animals, antipredator strategies of prey species, co-evolution of predators and prey, and ecology of predator-prey interactions. May be repeated two times for credit. (Same course as Wildlife, Fish, and Conservation Biology 294.) Offered in alternate years. —W. Caro

#### 298. Group Study in Animal Biology (1-5)

Prerequisite: graduate standing; consent of instructor. May be repeated two times for credit. —F, W, S, Su. (F, W, S, Su.)

#### 299. Research (1-12)

Prerequisite: and consent of instructor. (S/U grading only.)

### Professional

#### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Animal Biology

(College of Agricultural and Environmental Sciences)

Department of Entomology and Nematology.

### Faculty

Edward P. Caswell-Chen, Ph.D., Professor  
Joanna Chiu, Ph.D., Assistant Professor  
Brian R. Johnson, Ph.D., Assistant Professor  
Neal M. Williams, Ph.D., Associate Professor  
Robert Kimsey, Ph.D., Lecturer

### The Major Program

The Animal Biology major offers students training in the biological and natural sciences as they apply to animals. The major covers the basic biological sciences that explain animal evolution, systematics, ecology, physiology and molecular biology. Students in the Animal Biology major are encouraged to think beyond particular groups of animals in which they are interested and to consider science as a process and a way of advancing society. Emphasis is on biological principles that can be used in research or in solving societal problems associated with animals in agriculture, urban areas, or natural environments.

**The Program.** The Animal Biology major consists of core courses in the biological sciences that build

an understanding of animal biology from the molecular to the ecological and evolutionary levels of organization. After completing these core courses, students have the option of specializing in various interdisciplinary aspects of animal biology, and plan their chosen emphasis of study as part of a required discussion course and in consultation with their adviser. The Animal Biology major emphasizes courses on biological principles as opposed to courses on animal care and husbandry. This program includes a senior thesis, which each student designs to bridge the disciplines of the major.

**Internships and Career Alternatives.** The program and interests of each student in solving societal problems guides him or her to logical internship and career choices. On- and off-campus internship opportunities are available in research laboratories, in field situations, with governmental agencies, with private industry, and in international programs. A degree in Animal Biology prepares students for careers in research, teaching, governmental regulation, health or agriculture as each relates to the integrative biology or ecology of animals. Careers in veterinary medicine, animal husbandry and animal management are open to Animal Biology majors, however, other preparation may be required. Students in the major gain research experience and may choose to continue their training at the graduate or professional level in a variety of biological disciplines.

### B.S. Major Requirements:

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>68-74</b>
Biological Sciences 2A, 2B, and 2C .....	14
Chemistry 2A-2B-2C, and 8A-8B or 118A-118B.....	21-23
Mathematics 16A-16B-16C or 17A-17B-17C or 21A-21B-21C.....	9-12
Physics 7A-7B-7C.....	12
One course from: Statistics 13 or 100 or 102 or Agricultural Management and Rangeland Resources 120.....	4
Animal Biology 50A, 50B, 50C.....	8
<b>Depth Subject Matter .....</b>	<b>29-38</b>
Biological Sciences 101 .....	4
Animal Biology 102 and 103 or Biological Sciences 102 and 103 .....	6-10
One course from: Neurobiology, Physiology, and Behavior 101, 117; Entomology 102; Wildlife, Fish, and Conservation Biology 121 .....	3-5
One course from: Anatomy, Physiology and Cell Biology 100; Entomology 101; Neurobiology, Physiology, and Behavior 123 .....	3-4
Evolution and Ecology 100 .....	4
One course from: Environmental Science and Policy 100, 121; Evolution and Ecology 101, 102 .....	4
Animal Biology 187 .....	2
Animal Biology 189 and 189D .....	3-5
<b>Restricted Electives .....</b>	<b>25</b>
Focused specialty upper division courses as outlined in the student's major proposal (from course 187) with approval of an adviser.	
<b>Total Units for the Degree .....</b>	<b>122-137</b>

**Master Adviser.** R. Kimsey

**Major Adviser.** E. Galvan Hack

**Advising Center** for the major, including peer advising, is located in 150 and 152 Hutchison Hall 530-754-7277; [abi-advising@ucdavis.edu](mailto:abi-advising@ucdavis.edu).

### Courses in Animal Biology (ABI)

#### Lower Division

##### 50A. Animal Biology Laboratory (2)

Lecture/laboratory—4 hours. Scientific methods for answering questions in animal biology by doing exercises to demonstrate hypothesis testing and reporting, short laboratory, population and field experiments. Maintain notebooks, analyze data, interpret results and write reports. —F. (F.) Kimsey

**50B. Animal Biology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A, Biological Sciences 1B (may be taken concurrently). Basic biological disciplines important to an understanding of practical animal biology issues including the evolution of animal groups, genetic mechanisms, animal physiology as it relates to maintenance and production, and aspects of comparative anatomy, behavior and ecology.—W. (W.) Caswell-Chen, Johnson, Williams

**50C. Animal Biology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1B, 1C, courses 50A, 50B. Animal management and conservation. Societal concerns arising from management and conservation issues, including economics, aesthetics, regulations, safety, public perspectives and advocacy.—S. (S.) Chui, Lanzaro

**92. Internship in Animal Biology (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor. Office, laboratory or fieldwork off or on campus in research, governmental regulation, policy making, and private enterprise dealing with animal related issues of production, welfare, pest management, biodiversity and the environment. All requirements of Internship Approval Request form must be met. (P/NP grading only.)

**98. Directed Group Study (1-5)**

(P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**  
(P/NP grading only.)**Upper Division****102. Animal Biochemistry and Metabolism (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: Chemistry 2A, 2B, 8A and 8B or 118A and 118B. Water and biological buffers; thermodynamics of metabolism; structure and function of biomolecules; enzyme kinetics and function; membrane biology; digestion and absorption; carbohydrate metabolism. Not open for credit to students who have completed Biological Sciences 102.—F. (F.) Calvert

**103. Animal Biochemistry and Metabolism (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: course 102 or Biological Sciences 102. Physiological function and metabolism of lipids and amino acids; integrative metabolism; biochemical basis for nutrient requirements; structure and function of vitamins; mineral metabolism and requirements. Not open for credit to students who have completed Biological Sciences 103.—W. (W.) Calvert, Rucker

**187. Animal Biology Seminar (2)**

Seminar—1 hour; discussion—1 hour. Prerequisite: junior standing, courses 50A, 50B, 50C. Seminar leading to development of the Major Proposal for the Animal Biology major.—F. (F.) R. Kimsey

**189. Senior Practicum (2)**

Independent study—6 hours. Prerequisite: junior standing, courses 50A, 50B, 50C, and 187; course 189D concurrently the first time course 189 is taken. The practicum may be an experimental research project, a library research project or some other creative activity that will serve as a capstone experience for the Animal Biology major. May be repeated one time for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

**189D. Senior Practicum Discussion (1)**

Discussion—1 hour. Prerequisite: junior standing, courses 50A, 50B, 50C, and 187; course 189 required concurrently. Course helps prevent or solve problems during the students' senior practicum activity. (P/NP grading only.)—F, W, S. (F, W, S.)

**192. Internship in Animal Biology (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Office, laboratory or fieldwork off or on campus in research, governmental regulation, policy making, and private enterprise dealing with animal related issues of production, welfare, pest management, biodiversity

and the environment. All requirements of Internship Approval Request form must be met. (P/NP grading only.)

**198. Directed Group Study (1-5)**

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

## Animal Biology (A Graduate Group)

Trish Berger, Ph.D., Interim Chairperson of the Group

**Group Office.** 1249 Meyer Hall

530-752-2382; Fax 530-752-0175

<http://animalbiology.ucdavis.edu>

**Faculty**

Danika L. Bannasch, Ph.D., Associate Professor (*Population Health and Reproduction; School of Veterinary Medicine*)

Rebecca Bellone, Ph.D., Associate Adjunct Professor (*Population Health and Reproduction; School of Veterinary Medicine*)

Trish Berger, Ph.D., Professor (*Animal Science*)

Chris C. Calvert, Ph.D., Professor, Emeriti Faculty (*Animal Science*)

Bruce W. Christensen, D.V.M., Assistant Professor (*Population Health & Reproduction; School of Veterinary Medicine*)

Alan J. Conley, Ph.D., Professor (*Population Health and Reproduction; School of Veterinary Medicine*)

Richard E. Connor, Ph.D., Assistant Adjunct Professor (*Anatomy, Physiology & Cell Biology; School of Veterinary Medicine*)

Mary E. Delany, Ph.D., Professor (*Animal Science*)

Edward J. DePeters, Ph.D., Professor (*Animal Science*)

James G. Fadel, Ph.D., Professor (*Animal Science*)

Nann A. Fangue, Ph.D., Assistant Professor (*Wildlife, Fish, and Conservation Biology*)

Andrea J. Fascati, V.M.D., Ph.D., Professor (*Molecular Biosciences; School of Veterinary Medicine*)

Carrie Finno, Ph.D., Assistant Professor (*Population Health and Reproduction; School of Veterinary Medicine*)

Janet Foley, Ph.D., Professor (*Medicine & Epidemiology; School of Veterinary Medicine*)

Rodrigo Gallardo, Ph.D., Assistant Professor (*Poultry Medicine; School of Veterinary Medicine*)

Matthias Hess, Ph.D., Assistant Professor (*Animal Science*)

Russell C. Hovey, Ph.D., Professor (*Animal Science*)

Amy S. Kapatkin, D.V.M., Professor (*Surgical & Radiological Sciences; School of Veterinary Medicine*)

Ermias Kebede, Ph.D., Professor (*Animal Science*)

Kirk C. Klasen, Ph.D., Professor (*Animal Science*)

Dietmar Kuelz, Ph.D., Professor (*Animal Science*)

Yanhong Liu, Ph.D., Assistant Professor (*Animal Science*)

Elizabeth Maga, Ph.D., Associate Researcher and Lecturer (*Animal Science*)

Brenda J. McCowan, Ph.D., Professor (*Veterinary Medicine Teaching and Research Center and California National Primate Research Center*)

Juan F. Medrano, Ph.D., Professor (*Animal Science*)

Joy A. Mench, Ph.D., Professor (*Animal Science*)

Deanne Meyer, Ph.D., Specialist in Cooperative Extension and Lecturer (*Animal Science*)

Stuart Meyers, Ph.D., Professor (*Anatomy, Physiology and Cell Biology; School of Veterinary Medicine*)

Mike Mienaltowski, Ph.D., Assistant Professor (*Animal Science*)

Michael R. Miller, Ph.D., Assistant Professor (*Animal Science*)

Frank M. Mitloehner, Ph.D., Associate Professor (*Animal Science*)

James D. Murray, Ph.D., Professor (*Animal Science*)

Anita M. Oberbauer, Ph.D., Professor (*Animal Science*)

James W. Olijen, Ph.D., Specialist in Cooperative Extension and Lecturer (*Animal Science*)

Peter H. Robinson, Ph.D., Specialist in Cooperative Extension and Lecturer (*Animal Science*)

Jan F. Roser, Ph.D., Professor, Emeriti Faculty (*Animal Science*)

Pablo J. Ross, Ph.D., Associate Professor (*Animal Science*)

Heidi A. Rossow, Ph.D., Assistant Professor (*Population, Health, and Reproduction; School of Veterinary Medicine*)

Benjamin N. Sacks, Ph.D., Associate Adjunct Professor (*Population, Health, and Reproduction; School of Veterinary Medicine*)

Roberto D. Sainz, Ph.D., Professor (*Animal Science*)

Susan A. Stover, D.V.M., Ph.D., Professor (*Anatomy, Physiology, and Cell Biology; School of Veterinary Medicine*)

Brian D. Todd, Ph.D., Associate Professor (*Wildlife, Fish, and Conservation Biology*)

Anne Todgham, Ph.D., Assistant Professor (*Animal Science*)

M. Cecilia Torres-Penedo, Ph.D., Associate Research Geneticist (*Veterinary Genetics Laboratory; School of Veterinary Medicine*)

Cassandra B. Tucker, Ph.D., Associate Professor (*Animal Science*)

Alison L. Van Eenennaam, Ph.D., Specialist in Cooperative Extension and Lecturer (*Animal Science*)

Jason Watters, Ph.D., Associate Adjunct Professor (*Animal Science*)

Huaijun Zhou, Ph.D., Associate Professor (*Animal Science*)

Richard A. Zinn, Ph.D., Professor (*Animal Science; located at Desert Research and Extension Center*)

**Graduate Study.** The Graduate Group in Animal Biology offers programs of study and research leading to the M.S. and the Ph.D. degrees. The Animal Biology Graduate Group focuses on integrated animal biology. Each student individually tailors his/her program of study to meet individual needs. The Animal Biology Graduate Group is unique in encouraging a multidisciplinary or interdisciplinary approach involving physiology, nutrition, genetics, ecology and/or behavior within the context of organismal animal biology.

**Preparation.** Applicants should have undergraduate preparation in a field appropriate to the course of study selected, including upper division coursework in most of the following subjects: biochemistry, genetics, nutrition, physiology, and integrative animal biology such as animal management.

**Graduate Advisers.** R.C. Hovey, E.A. Maga, C.B. Tucker, J.D. Murray, E.Kebreab, P.J. Ross

## Courses in Animal Biology (ABG) Graduate

**200A. Integrated Animal Biology I (3)**

Lecture/discussion—3 hours. Prerequisite: graduate standing; Biological Sciences 101 or equivalent or consent of instructor. Class size limited to 20 students; Pass One restricted to Animal Biology Graduate Group students. Natural history, management, historical and current uses, and specialized disciplinary features of model and novel animal systems used in research. Development of conceptual approaches in organismal biology to improve experimental design and interpretation of interdisciplinary research studies.—F. (F.) Sainz

**200B. Integrated Animal Biology II (3)**

Lecture/discussion—3 hours. Prerequisite: course 200A. Limited enrollment; Pass One restricted to Animal Biology Graduate Group students. Natural history, management, historical and current uses, and specialized disciplinary features of model and novel animal systems used in research. Development of

conceptual approaches in organismal biology to improve experimental design and interpretation of interdisciplinary research studies.—S. (S.) Berger

### **202. Grant Procurement and Administration (2)**

Lecture—1 hour; discussion/laboratory—1 hour. Prerequisite: course 200B. Class size limited to 12 graduate students; Pass One restricted to Animal Biology Graduate Group students. Topics include: structure of grants, attention to specifications, concise persuasive writing, and grant budgeting. Identify grant opportunities, write a persuasive research grant proposal, and administer grants. Offered in alternate years.—F. (F.) Connon

### **250. Mathematical Modeling in Biological Systems (4)**

Lecture/discussion—4 hours. Prerequisite: graduate standing; Mathematics 16A, 16B, or equivalents required; Mathematics 16C or equivalent recommended; Statistics 100 or equivalent required; more than one course in statistics recommended; Animal Biology 102 or Biological Sciences 102 recommended or equivalent course in biochemistry. Limited enrollment. Model development and evaluation including sensitivity analyses using R. Four principle modeling methodologies included: algebraic functions of biological processes, physiological-based compartmental models, linear programming and meta-analysis. Fundamental background and understanding of mathematical modeling principles in biological systems.—W. (W.) Fadel, Kebreab

### **255. Physiology of the Stress Response (2)**

Lecture/discussion—2 hours. Prerequisite: graduate student. Definition of Stress; Physiological mechanisms of adaptation to stress; Hormonal control of the systemic stress response; Mechanisms of the cellular stress response; Discussion of current trends in stress physiology and current methods for studying the stress response. (Same course as Molecular, Cellular, and Integrative Physiology 255.)—S. (S.) Kueltz

### **290. Seminar in Animal Biology (1)**

Seminar—1 hour. Prerequisite: graduate standing. Seminar on advanced topics in animal biology. Presentations by members of the Animal Biology Graduate Group and guest speakers. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **290C. Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Student presentations of research in Animal Biology and discussions among participating students and Animal Biology faculty. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S, Su.)

### **298. Group Study in Animal Biology (1-5)**

Prerequisite: graduate standing; consent of instructor.

### **299. Research (1-11)**

Prerequisite: graduate standing and consent of instructor. Research with a faculty member in Animal Biology Graduate Group. May be repeated for credit. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

## **Professional**

### **300. Methods in Teaching Animal Biology (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing and consent of instructor. Practical experience in the methods and problems of teaching animal biology. Includes analysis of laboratory exercises, discussion of teaching techniques, grading scientific essays, preparing for and conducting discussion or laboratory sections, formulating quiz and exam questions under instructor supervision. May be repeated up to three times for credit. (S/U grading only.)—F, W. (F, W.) Famula, Oberbauer

### **396. Teaching Assistant Training Practicum (1-4)**

Variable—3-12 hours. Prerequisite: graduate standing and consent of instructor. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## **Professional**

### **401. Ethics and Professionalism in Animal Biology (2)**

Discussion—2 hours. Restricted to graduate standing; Pass One restricted to Animal Biology graduate group students. Case studies and discussion of ethical and professional issues for animal biologists, including the use of animals in research and teaching, patenting and intellectual property, consulting and conflict of interest, scientific integrity, dealing with the media, and mentoring relationships. Offered in alternate years.—(F.) Mench

## **Animal Genetics**

(College of Agricultural and Environmental Sciences)

**Faculty.** See under Department of Animal Science, on page 162.

**Major Program.** See the major in Animal Science, on page 162.

**Related Courses.** See Biological Sciences 101, 101D; Evolution and Ecology 102, 175; Genetics Graduate Group courses; Microbiology 150, 170, 215, 260, 274, 292; Molecular and Cellular Biology 121, 141, 160L, 161, 162, 163, 164, 178, 182, 221C, 257, 262, 263; Neurobiology, Physiology, and Behavior 131; Plant Biology 151, 152, 154, 161A, 161B; Plant Pathology 215X, 217; Plant Sciences 220, 221.

## **Courses in Animal Genetics (ANG)**

Questions pertaining to the following courses should be directed to the instructor or to the Animal Science Advising Center in 1202 Meyer Hall 530-754-7915.

## **Upper Division**

### **101. Animal Cytogenetics (3)**

Laboratory/discussion—1 hour; laboratory—6 hours. Prerequisite: Biological Sciences 101, 102 or the equivalent. Principles and techniques of cytogenetics applied to animal systems; chromosome harvest techniques, analysis of mitosis and meiosis, karyotyping, chromosome banding, cytogenetic mapping, chromosome structure and function, comparative cytogenetics. GE credit: SciEng | SE.

### **105. Horse Genetics (2)**

Lecture—2 hours. Prerequisite: Animal Science 15; Biological Sciences 101. Coat color, parentage testing, medical genetics, pedigrees, breeds, the gene map and genus Equus. Emphasis on understanding horse genetics based on the unity of mammalian genetics and making breeding decisions based on fundamental genetic concepts. GE credit: SciEng | SE, SL.—S. (S.) Famula

### **107. Genetics and Animal Breeding (5)**

Lecture—4 hours; laboratory—3 hours. Prerequisite: Biological Sciences 101. Principles of quantitative genetics applied to improvement of livestock and poultry. Effects of mating systems and selection methods are emphasized with illustration from current breeding practices. GE credit: SciEng | SE.—F, W, (F, W.) Medrano, Miller

### **111. Molecular Biology Laboratory Techniques (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1C, 101, 102, 103. Introduction to the concepts and techniques used in molecular biology; the role of this technology in both basic and applied animal research, and participation in laboratories using some of the most common techniques in molecular biology. GE credit: SciEng | SE, SL, VL, WE.—F. (F.) Kueltz, Murray

### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Selected topics relating to animal genetics. (P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

## **Graduate**

### **204. Theory of Quantitative Genetics (3)**

Lecture—3 hours. Prerequisite: course 107 or the equivalent. Theoretical basis of quantitative genetics and the consequences of Mendelian inheritance. Concepts used to estimate quantitative genetic differences and basis for partitioning the phenotypic variance.

### **206. Advanced Domestic Animal Breeding (3)**

Lecture—3 hours. Prerequisite: course 107 and Animal Science 205; course 204 recommended. Procedures for the genetic evaluation of individuals to include selection indices and mixed model evaluation for single and multiple traits. Methods of estimating genetic trends. Offered in alternate years.

### **208. Estimation of Genetic Parameters (3)**

Lecture—3 hours. Prerequisite: course 107 and Animal Science 205; courses 204 and 108 recommended. General methods for the estimation of components of variance and covariance and their application to the estimation of heritability, repeatability and genetic correlations are considered. Specific emphasis is given to procedures applicable to livestock populations under selection.

### **211. Genetic Engineering of Animals (2)**

Lecture—1 hour; lecture/discussion—1 hour. Review of techniques for the genetic engineering of animals and their limitations and applications. Student-led discussions of recent papers in the field and possible future applications of genetically engineered animals in basic research and applied agricultural and medical research. (S/U grading only.)—Murray

### **212. Sequence Analysis in Molecular Genetics (2)**

Lecture/laboratory—2 hours. Prerequisite: Biological Sciences 101 or the equivalent; graduate standing or consent of instructor. Use of computer algorithms and online databases to analyze nucleic acid and protein sequences in molecular genetics research.—Medrano

### **298. Group Study (1-5)**

Prerequisite: consent of instructor. Lectures and discussions of advanced topics in animal genetics. (S/U grading only.)

### **299. Research in Animal Genetics (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

## **Animal Physiology**

See Animal Biology, on page 160;

Animal Science, on page 162;

Neurobiology, Physiology, and

Behavior, on page 478; and

Molecular, Cellular, and Integrative

Physiology (A Graduate Group), on

page 466.

## **Animal Science**

(College of Agricultural and Environmental Sciences)

Anita M. Oberbauer Ph.D., Chairperson of the Department

**Department Office.** 2223 Meyer Hall  
530-752-1250;  
<http://animalscience.ucdavis.edu/>

**Master Adviser.** E.J. DePeters

**Undergraduate Advising.** 1202 Meyer Hall  
530-754-7915; <http://asac.ucdavis.edu>

**Advising Center** for the major, minors and course offerings (including peer advising) is located in the Animal Science Advising Center in 1202 Meyer Hall 530-754-7915. Each student will be assigned a faculty adviser through this office upon entering the major.

**Graduate Advising.** 1249 Meyer Hall  
530-752-2382

## Faculty

- Trish J. Berger, Ph.D., Professor  
 Mary E. Delany, Ph.D., Professor and Executive Associate Dean in CA&ES  
 Edward J. DePeters, Ph.D., Professor, *Academic Senate Distinguished Teaching Award, UC Davis Prize for Undergraduate Teaching and Scholarly Achievement*  
 John M. Eadie, Ph.D., Professor (*Wildlife, Fish & Conservation Biology; Animal Science*)  
 James G. Fadel, Ph.D., Professor  
 Matthias Hess, Ph.D., Assistant Professor  
 Russell C. Hovey, Ph.D., Professor  
 Silas S. O. Hung, Ph.D., Professor  
 Ermias Kebreab, Ph.D., Professor  
 Annie J. King, Ph.D., Professor  
 Kirk C. Klasing, Ph.D., Professor  
 Dietmar Kueltz, Ph.D., Professor  
 Yanhong Liu, Ph.D., Assistant Professor  
 Maja M. Makagon, Ph.D., Assistant Professor  
 Juan F. Medrano, Ph.D., Professor  
 Michael J. Mienaltowski, Ph.D., Assistant Professor  
 Michael R. Miller, Ph.D., Assistant Professor  
 Frank M. Mitloehner, Ph.D., Professor and Specialist in Cooperative Extension  
 James D. Murray, Ph.D., Professor  
 Anita M. Oberbauer, Ph.D., Professor, *Academic Senate Distinguished Teaching Award*  
 L. Allen Pettry, Lecturer (*PSOE*)  
 Pablo J. Ross, Ph.D., Associate Professor  
 Roberto D. Sainz, Ph.D., Professor  
 Anne Todgham, Ph.D., Assistant Professor  
 Cassandra B. Tucker, Ph.D., Associate Professor  
 Huaijun Zhou, Ph.D., Associate Professor  
 Richard A. Zinn, Ph.D., Professor

## Emeriti Faculty

- Hans Abplanalp, Ph.D., Professor Emeritus  
 Thomas E. Adams, Ph.D., Professor Emeritus  
 Academic Senate Distinguished Teaching Award  
 Gary B. Anderson, Ph.D., Distinguished Professor Emeritus, *Distinguished Teaching Award- Graduate/Professional, UC Davis Prize for Undergraduate Teaching and Scholarly Achievement, Academic Senate Distinguished Teaching Award*  
 C. Robert Ashmore, Ph.D., Professor Emeritus  
 C. Christopher Calvert, Ph.D., Professor Emeritus, *Academic Senate Distinguished Teaching Award*  
 Ernest S. Chang, Ph.D., Professor Emeritus  
*(Biological Sciences, Bodega marine Laboratory)*  
 Wallis H. Clark, Jr., Ph.D., Professor Emeritus  
 Douglas E. Conklin, Ph.D., Professor Emeritus  
 Serge I. Doroshov, Ph.D., Professor Emeritus  
 Thomas R. Famula, Ph.D., Professor Emeritus, *Academic Senate Distinguished Teaching Award*  
 Graham A. E. Gall, Ph.D., Professor Emeritus  
 William N. Garrett, Ph.D., Professor Emeritus  
 Yu-Bang Lee, Ph.D., Professor Emeritus  
 Bernard P. May, Ph.D., Adjunct Professor Emeritus  
 Joy A. Mench, Ph.D., Professor Emerita  
 James R. Millam, Ph.D., Professor Emeritus  
 Edward O. Price, Ph.D., Professor Emeritus  
 Kathryn Radke, Ph.D., Professor Emerita  
 Janet F. Roser, Ph.D., Professor Emerita  
 Wesley W. Weathers, Ph.D., Professor Emeritus

## Affiliated Faculty

- Richard A. Blatchford, Ph.D., Assistant Poultry Extension Specialist  
 David A. Bunn, Ph.D., Assistant Adjunct Professor  
 Fred S. Conte, Ph.D., Specialist in Cooperative Extension and Lecturer  
 Joshua Hull, Ph.D., Assistant Adjunct Professor  
 Peng Ji, Ph.D., Assistant Adjunct Professor  
 Elizabeth A. Maga, Ph.D., Adjunct Professor  
 Deanne Meyer, Ph.D., Specialist in Cooperative Extension and Lecturer  
 James W. Oltjen, Ph.D., Specialist in Cooperative Extension and Lecturer

- Peter H. Robinson, Ph.D., Specialist in Cooperative Extension and Lecturer  
 Andrea Schreier, Ph.D., Assistant Adjunct Professor  
 Alison L. Van Eenennaam, Ph.D., Specialist in Cooperative Extension and Lecturer  
 Dana B. Van Liew, M.Ed., Continuing Lecturer *Academic Federation Excellence in Teaching Award*  
 Jason V. Watters, Ph.D., Associate Adjunct Professor

## The Major Program

The Animal Science major is devoted to the sciences central to understanding biological function of domestic and captive animals, their care, management, and utilization by people for food, fiber, companionship and recreation. Advances in science and technology, and an ever-growing human population, have increased the complexity of issues surrounding the care and management of animals. Specializations within the major allow students to develop a scientific appreciation of animals and their relationship to their environment. Graduates in Animal Science are able to advance the science and technology of animal care and management in an objective and effective manner for the betterment of animals and society.

**The Program.** The curriculum provides depth in the biological and physiological sciences and allows students to specialize within the broad field of applied animal science. Study begins with introductory courses in animal science, biology, chemistry, mathematics, and statistics. Students undertake advanced courses in animal behavior, biochemistry, genetics, nutrition, and physiology and the integration of these sciences to animal function, growth, reproduction, and lactation. Students complete the curriculum by choosing a specialization in either an animal science discipline (behavior, biochemistry, genetics, nutrition, or physiology) or in the sciences particular to a class of animals (aquatic, avian, companion and captive, equine, laboratory, livestock and dairy, or poultry).

**Career Alternatives.** A wide range of career opportunities are available to graduates. The primary goal of the major is to prepare students for graduate study leading to the M.S. and Ph.D. degrees; for continued study in a professional school such as veterinary medicine, human medicine or dentistry; for careers in research, agricultural production, farm and ranch management, or positions in business, sales, financial services, health care, agricultural extension, consulting services, teaching, journalism, or laboratory technology.

## B.S. Major Requirements:

### UNITS Preparatory Subject Matter.....53-57

- |  |       |
|--|-------|
| Animal Science 1, 2, 41, 41L.....                    | 12    |
| Biological Sciences 2A, 2B, 2C .....                 | 15    |
| Chemistry 2A, 2B and 8A, 8B or<br>118A, 118B.....    | 16-18 |
| Mathematics 16A, 16B or 17A, 17B or 21A,<br>21B..... | 6-8   |
| Plant Sciences 120 or Statistics 100.....            | 4     |
- Note: Some professional and graduate schools may require additional preparatory subject matter. Please consult the advising center.

### Depth Subject Matter .....39-43

- Biology:** Biological Sciences 101; Animal Genetics 107; Animal Biology 102, 103; Neurobiology, Physiology, and Behavior 101 or Animal Science 100 .....24  
**Integrative Animal Biology:** Animal Science 123, 124, and Neurobiology, Physiology, and Behavior 121 and 121L .....13  
**Laboratory:** Select one from the following:  
 Animal Genetics 111; Animal Science 106, 136, 137, or 139; Microbiology 102L; Molecular and Cellular Biology 120L or 160L; Neurobiology, Physiology, and Behavior 101L or 104L; Pathology, Microbiology, and Immunology 126L .... 2-6

## Area of Specialization .....20-23

Choose one area of specialization below; the program of study must be approved in advance by your faculty adviser. Courses must be taken for a letter grade.

### Animal Science with a Disciplinary Focus.....20

Select 20 upper division units, with approval from your faculty adviser, to form a coherent series of courses in one of the following disciplines: animal behavior, biochemistry, genetics, nutrition, or physiology.

### Aquatic Animals.....20

Animal Science 18 and 131; Nutrition 124; and Animal Science 118 or 119. Select additional upper division units from any Animal Genetics or Animal Science course, or other courses approved by your faculty adviser. Students in this specialization must take Animal Science 136 to meet their Laboratory Depth Subject Matter requirement.

Students in this specialization may elect to substitute any of Biological Sciences 104, Evolution and Ecology 112, or Wildlife, Fish, and Conservation Biology 120 and 121 for the 12-unit requirement under Integrative Animal Biology, with approval of your faculty adviser.

### Avian Sciences.....20

Avian Sciences 13, 100, 150; Nutrition 123, 123L.

Select additional upper division units from any Animal Genetics, Animal Science, or Avian Sciences courses or other courses approved by your adviser. Students in this specialization must substitute Avian Sciences 103, 121, and Neurobiology, Physiology, and Behavior 117 for the Animal Science 124 and Neurobiology, Physiology, and Behavior 121 and 121L requirement under Integrative Animal Biology.

### Companion and Captive Animals.....20

Animal Science 42, 142; Nutrition 115 or 122 or 123 and 123L; Animal Science 170. Select additional upper division units from any Animal Genetics, Animal Science or Avian Sciences course, or from Nutrition 115, 122, 123, 123L or other courses.

### Equine Science .....20

Animal Science 15, 115, 141 and one of Animal Science 125, 126 or 127. Select additional upper division units from any Animal Genetics or Animal Science course, or from Nutrition 115, 122, 123, 123L or other courses approved by your faculty adviser.

### Laboratory Animals .....23

Animal Science 42, 103, 140, Nutrition 123, 123L, Animal Science 104 or Neurobiology, Physiology, and Behavior 102, and Anatomy, Physiology and Cell Biology 100 or Neurobiology, Physiology, and Behavior 123.

### Livestock and Dairy .....20

Select two of Animal Science 143, 144, 146; Animal Science 145 or 147; Nutrition 115.

Select additional upper division units from any Animal Genetics, Animal Science or Avian Sciences course, or from Nutrition 122, 123, 123L or other courses approved by your faculty adviser.

### Poultry .....20

Avian Sciences 11, 100, 150; Animal Science 143; Avian Sciences 149 or Food Science and Technology 121; Nutrition 123, 123L.

Select additional upper division units from any Animal Genetics, Animal Science, Avian Sciences, or other courses approved by your faculty adviser.

Students in this specialization must substitute Avian Sciences 103, 121, and Neurobiology, Physiology, and Behavior 117 for the Animal Science 124 and Neurobiology, Physiology, and Behavior 121 and 121L requirement under Integrative Animal Biology.

### Total Units for the Major ..... 112-125

### Minor Program Requirements:

The Department of Animal Science offers five minor programs open to students majoring in other disciplines who wish to complement their study programs with a minor in Animal Science. Some courses have required prerequisites not included as part of the minor, and students should plan accordingly.

UNITS

### Animal Science—Animal Biology ..... 20

Animal Science 15, 42, 41 and 41L, or 41 and 21 .....	3-4
Animal Science 103 or 104 .....	3-4
Animal Science 123, 124, or Neurobiology, Physiology, and Behavior 121 and 121L .....	4
Additional upper division courses .....	8-10
Select additional units to complete the 20-unit total from: upper division Animal Science courses, Animal Genetics courses, Neurobiology, Physiology, and Behavior 121, 121L, Nutrition 115, 122, 123, 123L. Variable unit courses (92, 99, 192, 197T, 198, 199) are not allowed for the completion of this requirement.	

### Animal Science—Animal Genetics ..... 20

Animal Science 15, 42, 41 and 41L, or 41 and 21 .....	3-4
Animal Genetics 107, 111 .....	9
Additional upper division courses .....	7-8
Select additional units to complete the 20-unit total from: upper division Animal Science courses, Animal Genetics courses, Avian Science 103, Neurobiology, Physiology, and Behavior 121, 121L, Nutrition 115, 122, 123, 123L. Variable unit courses (92, 99, 192, 197T, 198, 199) are not allowed for the completion of this requirement.	

### Animal Science—Aquaculture ..... 20

Animal Science 18 .....	4
Animal Science 118, 119 .....	8
Additional upper division courses .....	8
Select additional units to complete the 20-unit total from upper division Animal Science courses, Animal Genetics courses, Applied Biological Systems Technology 161, Nutrition 124, Wildlife, Fish, and Conservation Biology 121. Variable unit courses (92, 99, 192, 197T, 198, 199) are not allowed for the completion of this requirement.	

### Animal Science—Dairy/Livestock ..... 20

Animal Science 41 and 41L or 21 .....	4
Animal Science 104 .....	4
Additional upper division courses .....	12
Select four or eight units from Animal Science 143, 144, 146.	
Select additional units to complete the 20-unit total from: upper division Animal Science courses, Animal Genetics courses, Neurobiology, Physiology, and Behavior 121, 121L, Nutrition 115, 122, 123, 123L. Variable unit courses (92, 99, 192, 197T, 198, 199) are not allowed for the completion of this requirement.	

### Animal Science—Equine ..... 21

Animal Science 15 .....	3
Animal Science 103 or 104 .....	3-4
Animal Science 115, 141 .....	8
Animal Science 125 or 126 .....	3
One additional upper division course ....	2-3
Select from: upper division Animal Science courses, Animal Genetics courses, Neurobiology, Physiology, and Behavior 121, 121L, Nutrition 115, 122, 123, 123L.	

Variable unit courses (92, 99, 192, 197T, 198, 199) are not allowed for the completion of this requirement.

### Minor Adviser. E.J. DePetres

**Graduate Study.** The Animal Biology Graduate Group offers a program of study and research leading to the M.S. or Ph.D. degree in Animal Biology. See [Animal Biology \(A Graduate Group\)](#), on page 161; see also [Graduate Studies](#), on page 120.

### Courses in Animal Science (ANS)

#### Lower Division

##### 1. Domestic Animals and People (4)

Lecture—3 hours; laboratory—3 hours. Animal domestication and factors affecting their characteristics and distribution. Animal use for food, fiber, work, drugs, research and recreation; present and future roles in society. Laboratory exercises with beef and dairy cattle, poultry, sheep, swine, laboratory animals, fish, horses, meat and dairy products. GE credit: SciEng, Wrt | SE, WE. —F. (F.) Hovey

##### 2. Introductory Animal Science (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 1 recommended, Biological Sciences 2A recommended. Open to students in Animal Science, Animal Science and Management, Agricultural and Environmental Education, and Sustainable Agriculture and Food Systems majors. Growth, reproduction, lactation, inheritance, nutrition, and disease control in domesticated animals and species used in aquaculture; the application of sciences to animal production. GE credit: SciEng, Wrt | SE, SL, VL, WE. —S. (S.) Murray

##### 12. Animal Science: Basic Principles and Application (3)

Lecture—3 hours. Overview of domestic and global animal industries. Exploration of production systems, animal biology, genetics, anatomy, physiology, reproduction, health, behavior, research, biotechnology and welfare. GE credit: SciEng | SE, SL, VL, WE. —W. (W.) Mienaltowski

##### 15. Introductory Horse Husbandry (3)

Lecture—3 hours. Introduction to care and use of light horses emphasizing the basic principles for selection of horses, responsibilities of ownership, recreational use and raising of foals. GE credit: SciEng | QL, SE, VL, WE. —W. (W.) Mienaltowski

##### 17. Canine Behavior: Learning and Cognition (3)

Lecture—3 hours. Domestic dog behavior from basic principles of learning to complex cognitive behaviors; interaction between learning and cognition including how these processes contribute to interactions with humans; basic genetic correlates of learning and cognition.

##### 18. Introductory Aquaculture (4)

Lecture—3 hours; discussion—1 hour. Historical and contemporary aquacultural practices. Interaction between the aqueous culture environment and the biology of aquatic animals. Impact of economics and governmental policies on the development of aquaculture. Interaction of aquacultural practices with larger societal goals. GE credit: SciEng | SE, OL, QL, VL, WE. —F. (F.) Kuetz

##### 21. Livestock and Dairy Cattle Judging (2)

Laboratory—6 hours. Prerequisite: course 1 or 2 recommended. Evaluation of type as presently applied to light horses, meat animals and dairy cattle. Relationship between form and function, form and carcass quality, and form and milk production. GE credit: SciEng | OL, SE. —S. (S.) Van Liew

##### 22A. Animal Evaluation (2)

Laboratory—3 hours; fieldwork—30 hours (total). Prerequisite: course 21 or the equivalent. Attendance at 3 one-day weekend field trips required. Domestic livestock species with emphasis on visual appraisal, carcass evaluation, and application of performance information. Emphasis on accurate written and oral descriptions of evaluations. Prerequisite

to intercollegiate judging competition. Offered in alternate years. (P/NP grading only.) GE credit: OL, SE. —(F.) Van Liew

### 22B. Animal Evaluation (2)

Laboratory—3 hours; fieldwork—30 hours (total). Prerequisite: course 22A or the equivalent. Attendance at 3 one-day weekend field trips required. Continuation of course 22A with emphasis on specific species: swine, beef cattle and sheep. Application of animal science principles to selection and management problem-solving scenarios. Prerequisite to intercollegiate judging competition. Offered in alternate years. (P/NP grading only.) GE credit: OL, SE. —(W.) Van Liew

### 41. Domestic Animal Production (2)

Lecture—2 hours. Principles of farm animal management, including dairy and beef cattle, sheep, and swine. Industry trends, care and management, nutrition, and reproduction. GE credit: SciEng | SE. —F. (F.) Mitloehner

### 41L. Domestic Animal Production Laboratory (2)

Discussion—1 hour; laboratory—3 hours. Prerequisite: course 41 can be concurrent. Animal production principles and practices, including five field trips to dairy cattle, beef cattle, sheep, and swine operations and campus labs. (P/NP grading only.) GE credit: QL, SE, SL, VL, WE. —F. (W. W.) Mitloehner, Pettery

### 42. Introductory Companion Animal Biology (4)

Lecture—3 hours; discussion—1 hour. Companion animal domestication. Historical, contemporary perspectives. Legislation concerning companion animals. Selected topics in anatomy, physiology, genetics, nutrition, behavior and management. Scientific methods in studying the human-animal bond. Discussions: application of biological concepts to problems related to companion animals. GE credit: SciEng, Wrt | QL, SE, SL, WE. —W. (W.) Oberbauer

### 49A. Animal Management Practices: Aquaculture (2)

Discussion—1 hour; laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.)

### 49B. Animal Management Practices: Beef (2)

Discussion—1 hour; laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) —F. S. (F. S.)

### 49C. Animal Management Practices: Dairy (2)

Discussion—1 hour; laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) —F. W. S. (F. W. S.)

### 49D. Animal Management Practices: Goats (2)

Discussion—1 hour; laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) —F. S. (F. S.)

### 49E. Animal Management Practices: Horses (2)

Discussion—1 hour; laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) —F. W. (F. W.)

### 49F. Animal Management Practices: Laboratory Animals (2)

Discussion—1 hour; laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) —F. S. (F. S.)

**49G. Animal Management Practices: Meats (2)**

Discussion—1 hour; laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.)—F, W, S. (F, W, S.)

**49H. Animal Management Practices: Poultry (2)**

Discussion—1 hour; laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.)—F, W, S. (F, W, S.)

**49I. Animal Management Practices: Sheep (2)**

Discussion—1 hour; laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.)—F, W, S. (F, W.)

**49J. Animal Management Practices: Swine (2)**

Discussion—1 hour; laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.)—F, W, S. (F, W.)

**49K. Animal Management Practices: Captive and Companion Avian (2)**

Discussion—1 hour; laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.)—F, W, S. (F, W.)

**90C. Research Group Conference (1)**

Discussion—1 hour. Prerequisite: lower division standing, consent of instructor. Restricted to lower division standing. Weekly conference on research problems, progress and techniques in the animal sciences. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

**92. Internship in Animal Science (1-12)**

Internship—3-18 hours. Prerequisite: consent of instructor. Restricted to lower division standing. Internship off and on campus in dairy, livestock, and aquaculture production, research and management; or in a business, industry, or agency associated with these or other animal enterprises. All requirements of Internship Approval form must be met. (P/NP grading only.)—F, W, S. (F, W, S.)

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Restricted to lower division standing. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. Restricted to lower division standing. (P/NP grading only.)

**Upper Division****100. Animal Physiology (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: Biological Sciences 2A, Chemistry 2B. Pass One restricted to students in the Animal Science and Animal Science and Management majors. Basic principles of animal physiology in domesticated and captive animals with a comparative approach. Molecular, biochemical, chemical and physical aspects and their influences on function of physiological systems in animals. Not open for credit to students who have taken Neurobiology, Physiology, and Behavior 101. GE credit: SciEng | SE. —S. (S.) Todgham

**103. Animal Welfare (4)**

Lecture—2 hours; discussion—2 hours. Prerequisite: course 104 or Neurobiology, Physiology, and Behavior 102 or Wildlife, Fish, and Conservation Biology 141 or consent of instructor. Restricted to upper division standing. Application of principles of animal behavior and physiology to assessment and improvement of the welfare of wild, captive, and domestic animals. Topics include animal pain, stress,

cognition, motivation, emotions, and preferences, as well as environmental enrichment methods. GE credit: SciEng | SE, SL. —F. (F.) Makagon

**104. Principles and Applications of Domestic Animal Behavior (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or Biological Sciences 2B. Basic principles of animal behavior as applied to domesticated species. Emphasis placed on application of the principles of animal behavior. GE credit: SciEng | SE. —F. (F.) Tucker

**106. Domestic Animal Behavior Laboratory (2)**

Laboratory—6 hours. Prerequisite: course 104 or Neurobiology, Physiology, and Behavior 102 or consent of instructor. Research experience with the behavior of large domestic animals. Experimental design, methods of data collection and analysis, and reporting of experimental results. GE credit: SciEng, Wrt | QL, SE, SL, VL, WE. —W. (W.) Tucker

**112. Sustainable Animal Agriculture (3)**

Lecture/discussion—3 hours. Prerequisite: course 1 or Biological Sciences 2B; Statistics 100 or Plant Sciences 120 recommended. Current applications of sustainable animal agriculture including the challenges of animal production, animal needs, animal well-being, and protection of the environment and resources for future food supply systems. Various scenarios for meeting sustainability objectives are evaluated using computing modeling. GE credit: SciEng or SocSci | OL, QL, SE or SS. —S. (S.) Kebread

**115. Advanced Horse Production (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 15, 100 or Neurobiology, Physiology, and Behavior 101, Biological Sciences 101, Nutrition 115; or consent of instructor. Feeding, breeding, and management of horses; application of the basic principles of animal science to problems of production of all types of horses. Designed for students who wish to become professionally involved in the horse industry. GE credit: SciEng | QL, SE, SL, WE. —F. (F.) F.

**118. Fish Production (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Wildlife, Fish, and Conservation Biology 120. Current practices in fish production; relationship between the biological aspects of a species and the production systems, husbandry, management, and marketing practices utilized. Emphasis on species currently reared in California. GE credit: SciEng | SE.

**119. Invertebrate Aquaculture (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 2B. Management, breeding and feeding of aquatic invertebrates; application of basic principles of physiology, reproduction, and nutrition to production of mollusks and crustaceans for human food; emphasis on interaction of species biology and managerial techniques on production efficiencies. GE credit: SciEng | SE.

**120. Principles of Meat Science (3)**

Lecture—3 hours. Prerequisite: course 2. Restricted to upper division standing. Anatomical, physiological, developmental, and biochemical aspects of muscle underlying the conversion of muscle to meat. Includes meat processing, preservation, microbiology, and public health issues associated with meat products. (Same course as Food Science and Technology 120.) GE credit: SciEng | SE.

**120L. Meat Science Laboratory (2)**

Discussion—1 hour; laboratory—3 hours. Prerequisite: course 2, 120 can be concurrent. Restricted to upper division standing. Laboratory exercises and student participation in transformation of live animal to carcass and meat, structural and biochemical changes related to meat quality, chemical and sensory evaluation of meat, and field trips to packing plant and processing plant. GE credit: SciEng | SE.

**123. Animal Growth and Development (4)**

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: course 100 or Neurobiology, Physiology, and Behavior 101, Animal Biology 103 or Biological Sciences 103. Growth and development of ani-

mals from conception to maturity, viewed from practical and biological perspectives; includes genetic, metabolic, nutritional control of cell and organism function. GE credit: SciEng | OL, QL, SE, VL, WE. —S. (S.) Ross

**124. Lactation (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 100 or Neurobiology, Physiology, and Behavior 101, Animal Biology 103 can be concurrent. Consideration of the biochemical, genetic, physiological, nutritional, and structural factors relating to mammary gland development, the initiation of lactation, the composition of milk and lactational performance. GE credit: SciEng, Wrt | SE, SL. —W. (W.) Hovey

**125. Equine Exercise Physiology (3)**

Lecture—3 hours. Prerequisite: course 15, 100 or Neurobiology, Physiology, and Behavior 101. Basic and applied physiology of the exercising horse. Includes physiological systems, gait analysis, lameness, pharmacology, sports medicine; sport horse performance evaluation and conditioning. Offered in alternate years. GE credit: SciEng | SE. —S.

**127. Advanced Equine Reproduction (3)**

Lecture—3 hours. Prerequisite: course 115; 100 or Neurobiology, Physiology, and Behavior 101. Reproductive physiology, anatomy and endocrinology of the mare and stallion. Emphasis on structure/function relationships as they are applied to improving equine reproductive management and efficiency. GE credit: SciEng | SE, WE. —S. (S.)

**128. Agricultural Applications of Linear Programming (4)**

Lecture—2 hours; laboratory—2 hours; discussion—1 hour. Prerequisite: Plant Sciences 21 or Engineering Computer Science 15 or consent of instructor. Restricted to upper division standing. Applications of linear programming in agriculture, emphasizing resource allocation problems and decision making. Problems include crop production, ration formulation, and farm management. Hands-on experience in developing linear programs and interpreting the results. GE credit: SciEng | QL, SE, SL. —W. (W.) Fadel

**129. Environmental Stewardship in Animal Production Systems (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 10 or 1A and 1B, Chemistry 2A, 2B, 8A, 8B. Class size limited to 24 students. Management principles of environmental stewardship for grazing lands, animal feeding, operations and aquaculture operations; existing regulations, sample analyses, interpretation and utilization of data, evaluation of alternative practices, and policy development. Offered in alternate years. GE credit: SciEng | SE, SL. —W. (W.) Meyer

**131. Reproduction and Early Development in Aquatic Animals (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Molecular and Cellular Biology 150 and Wildlife, Fish and Conservation Biology 120; or consent of instructor. Physiological and developmental functions related to reproduction, breeding efficiency and fertility of animals commonly used in aquaculture. GE credit: SciEng | SE, WE.

**136. Techniques and Practices of Fish Culture (3)**

Lecture—1 hour; laboratory—6 hours. Prerequisite: general biology and chemistry; course 2. Daily care and maintenance of fish in residential aquariums, research and commercial facilities. Biological and environmental factors important to sound management of fish. Laboratories focus on fish culture including growth trials and biochemical assays. Not open for credit to students who have previously completed course 136A or 137. GE credit: SciEng, Wrt | QL, SL, VL, WE. —F. (F.) Hung

**137. Techniques and Practices of Avian Culture (3)**

Lecture—1 hour; laboratory—6 hours. Prerequisite: basic understanding of general biology and chemistry; course 2. Not open for credit to students who

have previously completed course 136B or 137. Daily care and maintenance of birds for research, commercial production and companion or hobby uses. Biological and environmental factors important to sound management of birds. Laboratories focus on bird husbandry, management and care and include growth trials and biochemical assays. GE credit: SciEng | QL, SE, SL, VL, WE. —S. (S.) Hung

### **139. Experimental Animal Physiology (3)**

Lecture—1 hour; laboratory—3 hours; fieldwork—3 hours. Prerequisite: Animal Biology 102, Biological Sciences 101, or consent of instructor. Restricted to seniors in the Animal Science and Animal Science and Management majors. Combination of theory and hands-on experiences in animal physiology using various experimental techniques. Practical laboratory skill development from cellular level to whole animal, in areas such as genetics, endocrinology, histology and physiological function. GE credit: SciEng | SE, WE. —S. (S.)

### **140. Management of Laboratory Animals (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 100 or Neurobiology, Physiology & Behavior 101. Laboratory animal management procedures in view of animal physiology, health and welfare, government regulations, and experimental needs. Clinical techniques using rodents and rabbits as models. GE credit: SciEng | SE. —F. (F.)

### **141. Equine Enterprise Management (4)**

Lecture/discussion—4 hours. Prerequisite: course 115; Economics 1A, 1B recommended. Examination of the concepts and principles involved in the operation of an equine enterprise. Essential aspects of equine enterprise management, including equine law, marketing, cash flow analysis, and impact of state and federal regulations. Offered in alternate years. GE credit: SocSci, Wrt | SS. —W.

### **142. Companion Animal Care and Management (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 42, Biological Sciences 101, course 100 or Neurobiology, Physiology, and Behavior 101; Animal Biology 102 or Biological Sciences 102 and Animal Biology 103 or Biological Sciences 103 recommended. Management and production of companion animals. Integration of the disciplinary principles of behavior, genetics, nutrition, and physiology as related to the care of companion animals. GE credit: SciEng | OL, QL, SE, SL, VL, WE. —F. (F.) Oberbauer

### **143. Pig and Poultry Care and Management (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 41, Nutrition 115, course 100 or Neurobiology, Physiology, and Behavior 101 or consent of instructor. Care and management of swine, broilers and turkeys as related to environmental physiology, nutrition and metabolism, disease management and reproduction. Saturday field trips. Offered in alternate years. GE credit: SciEng | SE, SL. —(F.) King, Petley

### **144. Beef Cattle and Sheep Production (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 41, Nutrition 115 or consent of instructor; Animal Genetics 107 recommended. Genetics, physiology, nutrition, economics and business in beef cattle and sheep production. Resources used, species differences, range and feedlot operations. Emphasis on integration and information needed in methods for management of livestock enterprises. One or two Saturday field trips. GE credit: SciEng | OL, QL, SE, SL, VL, WE. —S. (S.) Sainz, Zinn

### **145. Meat Processing and Marketing (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 2; consent of instructor. Distribution, processing and marketing of meat and meat products. Meat and meat animal grading and pricing. Government regulations and social/consumer concerns. Future trends and impact on production management practices. Includes poultry. GE credit: SciEng | SE.

### **146. Dairy Cattle Production (5)**

Lecture—3 hours; laboratory—3 hours; fieldwork—1 hour; discussion—1 hour. Prerequisite: Nutrition 115, or consent of instructor; Animal Genetics 107 recommended. Scientific principles from genetics, nutrition, physiology, and related fields applied to conversion of animal feed to human food through dairy animals. Management and economic decisions are related to animal biology considering the environment and animal well-being. Mandatory Saturday field-trip. GE credit: SciEng, Wrt | OL, QL, SE, SL, VL, WE. —S. (S.) DePeters

### **147. Dairy Processing and Marketing (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 146 or consent of instructor. Examination of distribution systems, processing practices, product quality, impact of government policy (domestic and foreign), marketing alternatives, and product development. GE credit: SciEng | SE.

### **148. Enterprise Analysis in Animal Industries (4)**

Lecture/discussion—4 hours. Restricted to students with upper division standing. Examination and application of decision making and problem solving in the production enterprise. The areas of production analysis, problem solving, risk analysis and cost-benefit analysis will be examined in terms of the total enterprise. GE credit: SocSci, Wrt | OL, QL, SS, WE. —S. (S.) Petley

### **149. Farrier Science (3)**

Lecture—3 hours. Prerequisite: course 115. In-depth examination of the structure-function relationship of the equine hoof and how it relates to conformation, injury and performance. Offered irregularly. GE credit: SciEng | SE.

### **149L. Farrier Science Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 149 (may be taken concurrently) or consent of instructor. Art and science of horseshoeing in equine related fields. Proper use of the tools, materials and techniques in the fabrication of shoes and safe preparation of the hoof for application of shoes. (P/NP grading only)

### **170. Ethics of Animal Use (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: any basic course in composition or speech, or completion of college English requirement. Ethical issues relating to animal use in contemporary society. Integration of philosophical theories with scientific evidence relating to animal behavior, mentality, and welfare. Uses of animals in agriculture, research, and as companions. Ethical responsibilities regarding wildlife and the environment. GE credit: SocSci, Wrt | SL, SS, WE. —S. (S.) Makagon

### **190C. Research Group Conference (1)**

Discussion—1 hour. Prerequisite: advanced standing; consent of instructor. Weekly conference on research problems, progress and techniques in the animal sciences. May be repeated for credit. (P/NP grading only.) —F, W, S. (F, W, S.)

### **192. Internship in Animal Science (1-12)**

Internship—3–36 hours. Prerequisite: completion of 84 units and consent of instructor. Internship off and on campus in dairy, livestock and aquaculture production, research and management; or in a business, industry, or agency associated with these or other animal enterprises. All requirements of Internship Approval Form must be met. (P/NP grading only.) —F, W, S. (F, W, S.)

### **194. Research in Animal Science (3)**

Laboratory—6 hours; discussion—1 hour. Prerequisite: course 106 or 133 or 135 or 136 or 137 or 139 or Animal Genetics 111 and consent of instructor. Research with a faculty mentor. Weekly discussion and laboratory on specific research topic. May include a seminar to research group. Choose from sections: (1) Animal Behavior; (2) Animal Genetics; (3) Animal Nutrition; (4) Animal Physiology. May be repeated for credit for a total of four times.—F, W, S. (F, W, S.)

### **194HA. Undergraduate Honors Thesis in Animal Science (4)**

Lecture—1 hour; laboratory—9 hours. Prerequisite: course 100 or Neurobiology, Physiology and Behavior 101, Animal Biology 103 or Biological Sciences 103; minimum cumulative GPA of 3.200 and selection by the Honors Selection Committee; consent of instructor. Students will carry out a research project (chosen from faculty-suggested or approved proposals) during the academic year under the guidance of a faculty member. Upon completion, student will write a thesis and present a public seminar describing his/her research. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | OL, SE.

### **194HB. Undergraduate Honors Thesis in Animal Science (4)**

Lecture—1 hour; laboratory—9 hours. Prerequisite: course 100 or Neurobiology, Physiology and Behavior 101, Animal Biology 103 or Biological Sciences 103; minimum cumulative GPA of 3.200 and selection by the Honors Selection Committee; consent of instructor. Students will carry out a research project (chosen from faculty-suggested or approved proposals) during the academic year under the guidance of a faculty member. Upon completion, student will write a thesis and present a public seminar describing his/her research. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE, VL.

### **194HC. Undergraduate Honors Thesis in Animal Science (4)**

Lecture—1 hour; laboratory—9 hours. Prerequisite: course 100 or Neurobiology, Physiology, and Behavior 101, Animal Biology 103 or Biological Sciences 103; minimum cumulative GPA of 3.200 and selection by the Honors Selection Committee; consent of instructor. Students will carry out a research project (chosen from faculty-suggested or approved proposals) during the academic year under the guidance of a faculty member. Upon completion, student will write a thesis and present a public seminar describing his/her research. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE, WE.

### **197T. Tutoring in Animal Science (1-2)**

Tutorial—1–2 hours. Prerequisite: Animal Science or related major; upper division standing; consent of instructor. Tutoring of students in lower division animal science courses; weekly conference with instructors in charge of courses; written critiques of teaching procedures. May be repeated one time for credit. (P/NP grading only.)

### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. Restricted to students with upper division standing. (P/NP grading only.)

### **Graduate**

### **200. Strategies in Animal Production (4)**

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Examines the forces and issues in animal agriculture through the strategic management process.

### **206. Models in Agriculture and Nutrition (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: Mathematics 16B; Statistics 108. Basic model building principles and techniques for statistical and systems simulation models. Optimization techniques for non-linear experimental designs and management models are presented. Quantitative analysis and evaluation of linear and non-linear equations used in agriculture and nutrition.

### **259. Literature in Animal Science (1)**

Seminar—1 hour. Prerequisite: graduate standing. Critical presentation and analysis of recent journal articles in animal science. May be repeated for credit up to nine times. (S/U grading only.)

**290. Seminar (1)**

Seminar—1 hour. Reports and discussions of topics of interest in genetics, nutrition, and physiology as they apply to animal science. (S/U grading only.)—F, W, S. (F, W, S.)

**290C. Research Group Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing. Weekly conference on research problems, progress and techniques in the animal sciences. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**291. Current Research in Animal Science (1)**

Seminar—1 hour. Prerequisite: graduate standing. Current research in animal science explored at weekly seminars presented by guest lecturers. Discussion of research presented. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**297. Supervised Teaching in Animal Science (2)**

Supervised teaching—6 hours. Prerequisite: consent of instructor. Practical experience in teaching Animal Science at the University level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work. An evaluation letter sent to the Graduate Adviser with a copy to the student. (S/U grading only.)—F, W, S. (F, W, S.)

**298. Group Study (1-5)**

Prerequisite: consent of instructor. (Sect. 1, 2, 3—letter grading; from Sect. 4 on—S/U grading only.)

**299. Research (1-12)**

(S/U grading only.)

## Animal Science and Management

(College of Agricultural and Environmental Sciences)

**Master Adviser.** J.G. Fadel

**Advising Center** for the major (including peer advising) is located in 1202 Meyer Hall 530-754-7915. Each student will be assigned a faculty adviser through this office upon entering the major. <http://asac.ucdavis.edu>

### The Major Program

The Animal Science and Management major combines a thorough education in the basic biology of domestic animal species with a strong background in agricultural economics. Graduates of this interdisciplinary major will be well positioned to adjust to our rapidly changing world and job market.

**The Program.** The interdisciplinary program in Animal Science and Management combines a fundamental background in the natural sciences (chemistry, biology, physiology, nutrition, genetics, mathematics, and behavior), with an understanding of economics and humanities. After completing preparatory courses, students focus on both the animal species that interest them (horses, cattle, sheep, companion animals, goats, fish, crustaceans or mollusks, among others) and principles of managerial economics (marketing, finance, business organization or systems analysis). Students preparing for medical or veterinary school can meet professional entrance requirements with those of this major if they plan ahead.

**Career Alternatives.** Job opportunities for successful graduates are plentiful and include positions with banking and financial institutions, agribusiness, Peace Corps, and farms of all scales. Most Animal Science and Management graduates are well prepared for professional study (medical, law, veterinary, and graduate business schools) as well as graduate research programs leading to the M.S. or Ph.D. degrees. Advanced degrees open doors to work as extension specialists, farm advisers, and teachers, and prepare students for international service.

### B.S. Major Requirements:

	UNITS
<b>Written and Oral Expression</b> .....	<b>8</b>
Select two courses (if not selected for English college requirement) from: Communication 130, 134, 135, 136, 140; Nematology 150; University Writing Program 101, 102A, 102B, 102C, 102D, 102E, 102F, 102G, 104A, 104B, 104C, 104D, 104E, 104F .....	8
<b>Preparatory Subject Matter</b> .....	<b>69-75</b>
Animal Science 1 and 2.....	8
Biological Sciences 2A, 2B, and 2C.....	15
Chemistry 2A, 2B, 8A, 8B.....	16
Plant Sciences 21 or Computer Science Engineering 15.....	3-4
Economics 1A, 1B; Management 11A, 11B.....	16
Mathematics 16A, 16B, and 16C or 17A-B-C or 21A-B-C .....	9-12
Plant Sciences 120, Statistics 100 or 103, or other courses in quantitative skills with prior approval of the Master Adviser .....	4

### Depth Subject Matter ..... 27-30

Biological Sciences 101 .....	4
Nutrition 115.....	4
Neurobiology, Physiology, and Behavior 101 .....	5
Business Management.....	14-17
Agricultural and Resource Economics 100A;	
One course from: Agricultural and Resource Economics 113, 130, 136, 138;	
One course from: Agricultural and Resource Economics 120, 132, 140, 145, 157;	
Plus one course from: Animal Science 128 or Agricultural and Resource Economics 155.	

### Area of Specializations ..... 14-16

Choose one area of specialization below:	
Aquatic Animals.....	16
Animal Science 18, 118 or 119, 131, and 148.	
Companion Animals .....	16
Animal Science 42, 140, 142, and 148.	
Dairy .....	15
Animal Science 41, 41L, 146, 147, and 148.	
Equine .....	15
Animal Science 15, 115, 141, and 148.	
Livestock.....	16
Animal Science 41, 41L, 143 or 144, 145, and 148.	
Poultry .....	15
Avian Sciences 11, Animal Science 143, 145, and 148.	
Individualized .....	14-16
Students may, with prior approval of their adviser and the Master Adviser, design their own individualized specialization within the major. The specialization will consist of 4 to 6 courses with one of the courses being Animal Science 148. The other courses will include an introduction, care and management, and processing and/or marketing aspects of the animal of interest.	

### Restricted Electives..... 8-10

At least two additional courses (minimum 8 units; duplicate from Depth courses not counted) selected with approval of adviser from: Agricultural and Resource Economics 18, 112, 113, 118, 120, 130, 132, 136, 138, 140, 142, 143, 144, 145, 150, 155, 157, 171A, 171B, 176; Animal Science 103, 104, 106, 115, 118, 119, 120, 120L, 123, 124, 125, 126, 127, 128, 129, 131, 136, 137, 140, 141, 142, 143, 144, 145, 146, 147, 149, 170, 192, 194, 194H; Avian Sciences 100, 103, 115, 121, 123, 149, 150; Animal Genetics 101, 105, 107, 111; Nutrition 122, 123, 123L, 124; Animal Biology 102 (strongly recommended); 103;	
---	--

Computer Science Engineering 124;  
Management 100; Neurobiology, Physiology, and Behavior 117, 121, 121L, 130;  
Wildlife, Fish, and Conservation Biology 120, 120L, 130.

**Total Units for the Major ..... 126-139**

## Anthropology

(College of Letters and Science)

James H. Smith, Ph.D., Chairperson of the Department

**Department Office.** 328 Young Hall  
530-752-0745;  
<http://www.anthropology.ucdavis.edu>

### Faculty

Monique Borgerhoff Mulder, Ph.D., Professor  
Timothy K. Choy, Ph.D., Associate Professor (*Science and Technology Studies*)

Damien Caillaud, Ph.D., Assistant Professor  
Margaret C. Crofoot, Ph.D., Assistant Professor  
Christyann M. Darwent, Ph.D., Associate Professor  
Marisol de la Cadena, Ph.D., Professor  
Donald L. Donham, Ph.D., Distinguished Professor  
Joseph Dumit, Ph.D., Professor (*Science and Technology Studies*)

Jelmer W. Eerkens, Ph.D., Professor  
Tarek Elhaik, Ph.D., Assistant Professor  
Cristiana Giordano, Ph.D., Associate Professor  
Lyne A. Isbell, Ph.D., Professor  
Academic Senate Distinguished Teaching Award

Jeffrey S. Kahn, Ph.D., Assistant Professor  
Suad Joseph, Ph.D., Distinguished Professor (*Women and Gender Studies*)

Alan Klima, Ph.D., Professor  
Suzana M. Sawyer, Ph.D., Associate Professor  
James H. Smith, Ph.D., Professor  
Smriti Srinivas, Ph.D., Professor  
Teresa E. Steele, Ph.D., Associate Professor  
Timothy D. Weaver, Ph.D., Associate Professor  
Li Zhang, Ph.D., Professor  
Nicolas Zwyns, Ph.D., Assistant Professor

### Emeriti Faculty

Robert L. Bettinger, Ph.D., Professor  
David J. Boyd, Ph.D., Professor Emeritus  
Richard T. Curley, Ph.D., Senior Lecturer Emeritus  
William G. Davis, Ph.D., Professor Emeritus  
Alexander H. Harcourt, Ph.D., Professor Emeritus  
Sarah B. Hrdy, Ph.D., Professor Emerita Member, National Academy of Sciences

Henry M. McHenry, Ph.D., Professor Emeritus  
UC Davis Prize for Undergraduate Teaching and Scholarly Achievement

David L. Olmsted, Ph.D., Professor Emeritus  
Peter S. Rodman, Ph.D., Professor Emeritus  
Janet S. Shibamoto-Smith, Ph.D., Professor  
David Glenn Smith, Ph.D., Professor  
Carol A. Smith, Ph.D., Professor Emerita  
Carolyn F. Wall, Ph.D., Senior Lecturer Emerita  
Bruce P. Winterhalder, Ph.D., Professor Emeritus  
Aram A. Yengoyan, Ph.D., Distinguished Professor Emeritus

### The Major Program

Anthropology is the systematic study of humans. The student of anthropology learns about human biology, ecology, and social life—past and present—and gains a broad understanding of humans and societies. It is a diverse field, and the courses, faculty, and degree programs at UC Davis are subdivided into two wings—*Evolutionary* and *Sociocultural*.

**Evolutionary.** Evolutionary anthropologists are united by their common application of science and evolutionary theory to understand the behavior, ecology, history, and evolution of humans and non-human primates, as individuals and as societies. These topics may be approached through archaeology, human behavioral ecology, molecular anthropology, paleoanthropology, primatology, genetics, biogeography, and conservation biology. Archaeo-

ogy is the study of the history or prehistory by analysis of a people's artifacts, or their material culture, with the goal of reconstructing culture history and human behavior. *Human behavioral ecology* is the study of how variation in ecology and social organization can help us understand variation in human behavior. *Paleoanthropology* is the study of human evolution through fossil and archaeological records, drawing on relevant studies in biological anthropology, Paleolithic archaeology, genetics, and geology. *Primateology* is the study of behavior, ecology, and morphology of primates to address questions about the evolution and function of behavioral and morphological patterns in nonhuman primates and to test models of the origins of human morphology and behavior. *Geneticists* can use DNA to address anthropological questions about population histories, migrations, mixing, and adaptations to local contexts. *Biogeography* investigates the biology behind the geographic distribution of species and human cultures. *Conservation biology* explores the causes of loss of biological diversity—in this department, it focuses on threatened non-human primates and the conservation of natural resources by a rapidly growing population.

**Sociocultural.** *Sociocultural anthropologists* study the varied ways in which people around the world organize their lives and interpret the circumstances in which they operate. Their main method is extended field research, which combines attention to global issues with the close study of human relations and culture. Among the themes addressed in the department's undergraduate courses are globalization and transnationalism; human ecology and environmental change; cultures of healing, health and medicine, the global spread of media and technology; migration, multiculturalism and urban life; colonialism and neocolonialism development and post-development; race, class and gender; politics and the political; cultures of everyday life; language use and discourse; and self, identity and family. The track in sociocultural anthropology thus offers a rich set of resources for understanding and engaging pressing issues in a globalizing world characterized by new forms of international culture and community as well as by increasing material inequality and political volatility.

**The Program.** The Bachelor of Arts program is divided into two tracks, *Sociocultural* and *Evolutionary*, which parallel the two wings described above. Students interested in the study of recent and contemporary human languages and societies should follow the Sociocultural Track. To obtain a A.B. degree in sociocultural anthropology, each student is required to complete courses that provide (1) foundational skills, (2) language and cultural skills, (3) comprehensive skills, and (4) specialized skills. Students interested in the study of archaeology; primate studies; or human biology, ecology or origins should follow the Evolutionary Track. The B.A. degree offered by the Evolutionary Track provides general training in anthropology from an evolutionary perspective. The Evolutionary Track also offers a B.S. degree that requires lower division coursework in math and science and upper division coursework in biological anthropology and closely related disciplines.

Students in both tracks are encouraged to gain practical experience through courses taken while studying abroad (under the administration of the UC Davis Study Abroad) and through undergraduate research or internships performed for credit (under ANT 192, 198, or 199 units provided by the advising office). Students showing exceptional ability are welcome to seek permission from instructors to participate in graduate seminars offered by the department.

**Career Opportunities.** A Bachelor of Arts degree in Anthropology is suited for students seeking a solid liberal arts education. With its broad goal to facilitate understanding across lines of cultural difference, sociocultural anthropology prepares students for lives that are influenced by increasingly pervasive cultural exchange, as well as cultural conflict,

around the world. The program serves as excellent preparation for careers in which inter-cultural skills are increasingly needed, including social and environmental activism, business, diplomacy and social administration, journalism, law, education and international relations. Students that focus on evolutionary processes will be well prepared to enter fields such as medical or health anthropology, museum studies, cultural resource management and wildlife conservation. A Bachelor of Science degree in Anthropology provides suitable training for a variety of health professions including pre-medical, pre-dental, and pre-veterinary training, and the educational background for further training in the biological/evolutionary sciences and forensic investigation. The A.B. or B.S. degree in anthropology with appropriate courses in education is good preparation for high school teaching in social, biological and natural sciences. An anthropology degree also provides the foundation for advanced study leading to careers in college-level teaching and research.

## A.B. Major Requirements:

	UNITS
<b>Evolutionary Emphasis:</b>	
<b>Preparatory Subject Matter</b> .....19-21	
Anthropology 1, 2, 3 .....	12
Anthropology 15, 23, 24, 25, 28, 50, or 54.....	4-5
Anthropology 13, Sociology 46B, or Statistics 13, 32, 100 or 102.....	3-4
<b>Depth Subject Matter</b> .....42-47	
Two courses from:	
Anthropology 101, 102, 103, 105, 122A, 128A, 141B, 141C, 154A, 154B, 154C, 154CL, 158, 178.....	7.9
Anthropology 153, 157, or 159.....	3-5
Anthropology 151 or 152.....	4-5
One course from:	
Anthropology 170, 171, 172, 173, 174, 175, 176, 177, 179, 180, 182, 183, 184 or 185.....	4
One course from:	
Anthropology 100, 102, 104N, 109, 110, 117, 120, 121, 122B, 123AN, 124, 125A, 125B, 126A, 126B, 127, 128B, 129, 130A, 131, 132, 134, 136, 137, 138, 139AN, 139BN, 140A, 140B, 141B, 141C, 142, 143A, 144, 145, 146N, 148A, 149A, 149B, 186A .....	4
Select 20 additional units from any upper division evolutionary track Anthropology courses (see list below) chosen in consultation with an evolutionary track undergraduate adviser .....	20
<b>Total Units for the Major</b> .....62-69	

Note: Evolutionary track courses at the upper division level are courses 101, 102, 103, 105, 122A, 128A, 141B, 141C, and 151 to 186A

## Sociocultural Emphasis:

	20-22
Anthropology 2 .....	4
Two courses from: Anthropology 1, 3, or 4.....	8
Select one of the following two options:	
(1) Two additional quarters of the foreign language used to meet the L&S language requirement .....	8-10
(2) Two additional lower division sociocultural track courses .....	8-10
<b>Depth Subject Matter</b> .....42-46	
Anthropology 100 .....	4
Two upper division area-focus sociocultural track courses from the following:	
Anthropology 140A, 140B, 141C, 142, 143A, 144, 145, 146N, 148A, 149A, 149B.....	8
Select one of the following two options in consultation with sociocultural track undergraduate adviser (see list below identifying upper division sociocultural	

courses; see list above identifying  
evolutionary track courses):

- (1) Eight additional upper division anthropology courses (two courses may be in the evolutionary track; and up to six units can be Anthropology 192 internship units) ..... 30-34
- (2) Eight additional upper division courses that may combine six sociocultural track courses and either 8 units of Study Abroad credit or two related courses in a single academic discipline (including but not limited to: African American and African Studies, American Studies, Art Studio, Art History, Asian American Studies, Chicana/o Studies, Communication, Community and Regional Development, Economics, East Asian Studies, History, Linguistics, Music, Native American Studies, Nature and Culture, Philosophy, Political Science, Psychology, Religious Studies, Sociology, Textiles and Clothing, Theatre and Dance, Women and Gender Studies) ..... 30-34

## Total Units for the Major ..... 62-68

Note: Sociocultural track courses at the upper division level are those with numbers from 100 to 149B, with the exception of 101, 103, 105, 128A, and 141B. Area-focus sociocultural track courses are those that refer in their titles to one or more peoples or regions of the world.

## B.S. Major Requirements:

	UNITS
<b>Evolutionary Emphasis:</b>	
<b>Preparatory Subject Matter</b> .....54-60	
Anthropology 1, 2, 3 .....	12
Biological Sciences 2A, 2B, 2C.....	14
Chemistry 2A, 2B, and 8A, 8B, or 118A, 118B.....	16-18
Mathematics 16A-16B-16C or 17A-17B-17C or 21A-21B-21C.....	9-12
Anthropology 13, Sociology 46B, Statistics 13, 32, 100, or 102.....	3-4
<b>Depth Subject Matter</b> .....45	
Anthropology 151 or 152 .....	4.5
Anthropology 153, 157, or 159 .....	3.5
Anthropology 154A or 154B .....	5
Three additional courses in anthropology chosen in consultation with evolutionary track undergraduate adviser .....	8-12
Biological Sciences 101 .....	4
Evolution and Ecology 100 .....	4
Additional units from the list below to achieve a minimum of 45 upper division units .....	10-14
Anthropology 101, 102, 103, 105, 122A, 128A, 151, 152, 153, 154A 154B, 154C, ANT 154CL, 156, 157, 157L, 158, 159, 180, 182, 185; Anatomy, Physiology and Cell Biology 100; Biological Sciences 102, 103; Cell Biology and Human Anatomy 101, 101L; Environmental Science and Policy 100; Evolution and Ecology 101, 102, 103, 104, 105, 138, 141, 147, 149, 175; Exercise Science 103, 115; Geology, 107, 107L, 108, 144, 146; History and Philosophy of Science 131; Molecular and Cellular Biology 120L, 121, 150, 150L, 160L, 161, 162, 163, 164; Neurobiology, Physiology, and Behavior 101, 101L, 102, 123, 124, 150, 152; Psychology 101, 113, 121, 122, 123, 124; Statistics 104, 106, 108, 130A, 130B; Wildlife, Fish, and Conservation Biology 141, 154	

## Total Units for the Major ..... 99-105

### Recommended

Anthropology 5, 15, 50; Geology 1; Psychology 1

**Major Advisers.** Consult Department office.

**Minor Program Requirements:**

UNITS

**Anthropology ..... 18-30****General emphasis ..... 19-21**

One course from: Anthropology 101, 102, 103, 105, 122A, 128A, 151, 152, 153, 154A, 155, 156, 157, 158, 159.....3-5  
 One course from: Anthropology 170, 171, 172, 173, 174, 176, 177, 179, 180, 182, 183, 184, 185.....4

One course from: Anthropology 140A through 149B, 178 or any other sociocultural track course that refers in its title to one or more peoples or regions of the world.....4  
 Two courses from: Anthropology 100 through 139BN, excluding 101, 103, 105, 128A, and 141B.....8

**Archaeology emphasis ..... 20-25**

Anthropology 170.....4  
 Two courses from: Anthropology 172, 173, 174 175, 176, 177, 178, or 179 .....8  
 Two courses from: Anthropology 156A, 156B, 171, 180, 181, 182, 183, 184, or 185 .....8-13

**Evolutionary emphasis ..... 18-30**

Any five upper division Evolutionary Anthropology courses chosen in consultation with an evolutionary track adviser.

**Sociocultural emphasis ..... 19-21**

Anthropology 100.....4  
 One upper division area-focus sociocultural track course .....4  
 (area-focus sociocultural track courses are those that refer in their titles to one or more peoples or regions of the world)  
 Two courses from: Anthropology 102 through 139BN, excluding 103, 105, and 128A.....8  
 One additional upper division Anthropology course chosen in consultation with sociocultural track undergraduate adviser.....3-5

**Minor Advisers.** Consult Department office in 1282 Social Sciences & Humanities.

**Honors Program.** Candidates for high or highest honors in Anthropology must write a senior thesis under the direction of a faculty member. The thesis project will have a minimum duration of two quarters. Honors candidates must take at least six units of Anthropology 194H. Only students who, at the end of their junior year (135 units), have attained a cumulative grade point average of 3.500 in Anthropology courses will be eligible for the honors program. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

**Teaching Credential Subject Representative.** \_\_\_\_\_; see the Teaching Credential/M.A. Program on page 124.

**Graduate Study.** The Department offers a program of study leading to the M.A. and Ph.D. degrees in Anthropology. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies.

**Courses in Anthropology (ANT)****Lower Division****1. Human Evolutionary Biology (4)**

Lecture—3 hours; discussion—1 hour. Processes and course of human evolution; primatology; biological and social diversity within Homo sapiens; human paleontology. GE credit: SciEng, Div, Wrt | SE, SL, WE.—F, W, S, Su. (F, W, S, Su.)

**1Y. Human Evolutionary Biology (4)**

Web virtual lecture—2 hours; lecture/discussion—1 hour; laboratory/discussion—1 hour. Evolutionary theory and mechanisms of evolution; basic population and quantitative genetics; primatology; biological and cultural diversity within Homo sapiens;

paleoanthropology. Students may not take both course 1 and course 1Y for credit. GE credit: SE, WE.—W. (W.) Weaver

**2. Cultural Anthropology (4)**

Lecture—3 hours; discussion—1 hour. Introduction to cultural diversity and the methods used by anthropologists to account for it. Family relations, economic activities, politics, gender, and religion in a wide range of societies. Current problems in tribal and peasant societies. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WC, WE.—F, W, S, Su. (F, W, S, Su.)

**3. Introduction to Archaeology (4)**

Lecture—3 hours; discussion—1 hour. Development of archaeology as an anthropological study; objectives and methods of modern archaeology. GE credit: SciEng or SocSci, Div | SE or SS, SL.—F, W, S. (F, W, S.)

**4. Introduction to Anthropological Linguistics (4)**

Lecture—3 hours; discussion—1 hour. Exploration of the role of language in social interaction and world view, minority languages and dialects, bilingualism, literacy, the social motivation of language change. Introduction of analytical techniques of linguistics and demonstration of their relevance to language in sociocultural issues. Offered in alternate years. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**5. Proseminar in Biological Anthropology (4)**

Seminar—3 hours; term paper. Prerequisite: course 1 or course 1Y recommended; and consent of instructor. Course primarily for majors. Integration of related disciplines in the study of biological anthropology through discussion and research projects. Principal emphasis in human adaptation to the environment. Offered irregularly. GE credit: SciEng, Wrt | SE, OL, WE.—Isbell

**13. Scientific Method in Physical Anthropology (4)**

Lecture—2 hours; laboratory/discussion—1 hour; fieldwork—1 hour. Skills for scientific thinking; designing, implementing, analyzing, interpreting, presenting, and criticizing research. Collection and analysis of original data. Basic statistical methods. GE credit: SciEng or SocSci, Wrt | OL, SE, VL, WE.

**15. Behavioral and Evolutionary Biology of the Human Life Cycle (5)**

Lecture—3 hours; discussion—1 hour; term paper. Introduction to the biology of birth, childhood, marriage, the family, old age, and death. Examines comparative characteristics of nonhuman primates and other animals as well as cross-cultural variation in humans by study of selected cases. GE credit: SciEng, Div, Wrt | SE, SL, WE.—Crofoot

**20. Comparative Cultures (4)**

Lecture—3 hours; discussion—1 hour. Introduction to the anthropological study of cultural diversity. Case studies of eight societies will be presented to illustrate and compare the distinctive features of major cultural regions of the world. Concludes with a discussion of modernization. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WC, WE.—Sawyer

**23. Introduction to World Prehistory (4)**

Lecture—3 hours; discussion—1 hour. Broadly surveys patterns and changes in the human species' physical and cultural evolution from earliest evidence for "humanness" to recent development of large-scale complex societies or "civilizations." Lectures emphasize use of archaeology in reconstructing the past. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**24. Ancient Crops and People (4)**

Lecture—3 hours; discussion—1 hour. The archaeological evidence for domestication of plants and the origins of agricultural societies. Anthropological context of agriculture and the effects on sexual division of labor, social inequality, wealth accumulation, warfare, human health, and sedentism. Offered in alternate years. GE credit: SocSci, Div, Wrt | SS, WC, WE.—Eerkens

**25. Ancient Animals and People (2)**

Lecture—2 hours. History of human and animal relationships and how animals have influenced social and economic structures of past societies. Why, when and how humans used animals in the context of hunting, domestication, secondary products, ritual, companionship, and conservation. Offered in alternate years. GE credit: SocSci | SS.—Darwent, Steele

**26. Mummies of the Ancient World (2)**

Lecture—2 hours. Archaeological approaches for studying mummies and the process of mummification in the ancient world. Analytical techniques used, environmental factors promoting mummification, and archaeological conservation of mummified bodies. Offered in alternate years. GE credit: SS, WC.—F. Eerkens

**28. Prehistoric Origins of Art (2)**

Lecture/discussion—2 hours. Interdisciplinary look at the earliest evidence for art and symbolic behavior. Method and techniques to investigate Prehistoric art. Interpretative framework and relevance for understanding the role of symbolic activities in traditional societies. Offered in alternate years. GE credit: SocSci | SS.—Zwyns

**29. Vikings (2)**

Lecture—2 hours. History of the Vikings through the Slavic and Mediterranean regions in the East and across the vast North Atlantic region to the west. Emphasis on archaeology and sagas to understand Viking culture from the 8th to 11th centuries. Offered in alternate years. GE credit: SS, WC.—S. (S.) Darwent

**30. Sexualities (4)**

Lecture/discussion—4 hours. Introduction to the study of sexuality, particularly to the meanings and social organization of same-sex sexual behavior across cultures and through time. Biological and cultural approaches will be compared, and current North American issues placed in a wider comparative context. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WC.—Donham

**32. Drugs, Science and Culture (4)**

Lecture—3 hours; discussion—1 hour. Drugs, politics, science, society in a cultural perspective: emphasis on roles of science, government and the media in shifting attitudes toward alcohol, marijuana, Prozac and other pharmaceuticals; drug laws, war on drugs and global trade in sugar, opium, cocaine. (Same course as Science and Technology Studies 32.) GE credit: SocSci, Div, Wrt | SS, VL, WE.—Dumit

**34. Cultures of Consumerism (4)**

Lecture/discussion—4 hours; term paper. Aspects of modern consumer cultures in capitalist and socialist countries. Transformations of material cultures over the past century. Case studies on the intersections of gender, class, and culture in everyday consumption practices. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC.

**50. Evolution and Human Nature (4)**

Lecture—3 hours; discussion—1 hour. Evolutionary analyses of human nature, beginning with Lamarck, Darwin, Spencer and contemporaries, and extending through social Darwinism controversies to contemporary evolutionary anthropology research on human diversity in economic, mating, life-history, and social behavior. Offered in alternate years. GE credit: SciEng or SocSci, Div, Wrt | SE or SS, SL, WE.

**54. Introduction to Primatology (4)**

Lecture/discussion—3 hours; term paper. Basic survey of the primates as a separate order of mammals; natural history and evolution of primates; consideration of hypotheses for their origin. GE credit: SciEng | SE, SL, WE.—S. (S.) Isbell

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**99. Special Study for Lower Division****Students (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division****100. Theory in Social-Cultural Anthropology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Discussion of the theoretical and philosophical developments in cultural anthropology from the 19th century to the present. Not open for credit to students who have completed course 137. GE credit: SocSci | SS, WE.—F. (F.) Donham

**101. Ecology, Nature, and Society (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or 2 or Environmental Science & Policy 30 or Evolution and Ecology 100 or Biological Sciences 101 recommended. Interdisciplinary study of diversity and change in human societies, using frameworks from anthropology, evolutionary ecology, history, archaeology, psychology, and other fields. Topics include population dynamics, subsistence transitions, family organization, disease, economics, warfare, politics, and resource conservation. (Same course as Environmental Science and Policy 101.) Offered in alternate years. GE credit: SocSci, Div, Wrt | SS, WC, WE.—Borgerhoff, Mulder

**103. Indigenous Peoples and Natural Resource Conservation (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or Geology 1 or Environmental Science and Policy 30 recommended. Integration of the interests of resident and indigenous peoples with the conservation of natural resources and ecosystems, using case study examples from both the developing and the developed world. Not open for credit to students who have completed course 121N. (Former course 121N.) Offered in alternate years. GE credit: SocSci | ACGH, DD, OL, SS, WC, WE.—Mulder

**104N. Cultural Politics of the Environment (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Relationship between social inequality (based on race, class, and/or gender) and ecological degradation. Articulation of local peoples, national policy, and the international global economy in the contestation over the use of environmental resources. Not open for credit to students who have completed course 134N. (Former course 134N.) GE credit: SocSci, Div | ACGH, DD, SS, WC, WE.—Sawyer

**105. Evolution of Societies and Cultures (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or 2 or Environmental Science and Policy 30 or Evolution and Ecology 100 or Biological Sciences 101 recommended. Interdisciplinary study of social and cultural evolution in humans. Culture as a system of inheritance, psychology of cultural learning, culture as an adaptive system, evolution of mal-adaptations, evolution of technology and institutions, evolutionary transitions in human history, coevolution of genetic and cultural variation. Only two units of credit to students who have completed Environmental Science and Policy 101 or course 101 prior to fall 2004. (Same course as Environmental Science and Policy 105.) Offered irregularly. GE credit: SocSci, Wrt | QL, SS, WC, WE.

**109. Visualization in Science: A Critical Introduction (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 2 or Science & Technology Studies 1 or Science & Technology Studies 20 recommended. Anthropological approaches to scientific visualization techniques, informatics, simulations. Examination of different visualization techniques toward understanding the work involved in producing them, critical assessment of their power and limits, especially when visualizations are used socially to make claims. (Same course as Science & Technology Studies 109.) Offered in alternate years. GE credit: SocSci, Wrt | SS, VL, WE.—Dumit

**110. Language and Sociocultural Anthropology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. The role of language analysis and linguistic theory in the development of sociocultural anthropology. Language, culture, and thought; the linguistic accomplishment of social action; language ideology; language and social power. Language as cultural mediator of politicoeconomic process. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**117. Language and Society (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 4 or Linguistics 1 recommended; course 2 recommended. Consideration of language in its social context. Methods of data collection and analysis; identification of socially significant linguistic variables. Contributions of the study of contextualized speech to linguistic theory. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**120. Language and Culture (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 4 or Linguistics 1 recommended; course 2 recommended. Culture, cognition, meaning, and interpretation; language and the classification of experience; communication and learning in crosscultural perspective. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WC, WE.

**121. Special Topics in Medical Anthropology (4)**

Lecture/discussion—4 hours. Prerequisite: course 2 recommended. Introduction to critical medical anthropology. Topics include anthropological analysis of bio-medicine, psychiatry, systems of knowledge and healing, the body, emotions, and clinical encounters in a cross-cultural perspective. (Same course as Science and Technology Studies 121.) GE credit: SocSci, Div, Wrt | SS, WC, WE.—Giordano

**122A. Economic Anthropology (4)**

Lecture—3 hours; discussion—1 hour. Varieties of production, exchange, and consumption behavior in precapitalist economies, their interaction with culture and social-political organization, and the theories that account for these phenomena. The effects of capitalism on precapitalist sectors. Not open for credit to students who have completed course 122. (Former course 122.) GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WC, WE.

**122B. Anthropology and Political Economy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Survey of anthropological approaches to the study of political organizations; inter-relationships among political institutions, economic infrastructures and cultural complexity. Not open for credit to students who have completed course 123A. (Former course 123A.) Offered in alternate years. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**123AN. Resistance, Rebellion, and Popular Movements (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Analysis of popular protest in Third World and indigenous societies ranging from covert resistance to national revolts. Comparative case studies and theories of peasant rebellions, millennial movements, social bandits, Indian "wars", ethnic and regional conflicts, gender and class conflicts. Not open for credit to students who have completed course 123B. (Former course 123B.) Offered irregularly. GE credit: SocSci | SS, WC, WE.

**124. Religion in Society and Culture (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Discussion of anthropological theories of religion with emphasis on non-literate societies. Survey of shamanism, magic and witchcraft, ritual and symbols, and religious movements. Extensive discussion of ethnographic examples and analysis of social functions of religious institutions. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**125A. Structuralism and Symbolism (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Survey of anthropological approaches to understanding the logic of structuralism and symbolism in cultural analysis. Focus on how structural and symbolic interpretations relate to cultural and linguistic universals and to the philosophical basis of relativism in the social sciences. (Former course 125.) Offered irregularly. GE credit: SocSci, Div | SS, WC, WE.

**125B. Postmodernism(s) and Culture (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. The U.S.-European postmodern condition. "Modernity" as an incomplete project for subordinated groups. The economic, social, technological and political conditions leading to postmodern aesthetics, in comparison with postcolonialism, feminism and minority discourse. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**126A. Anthropology of Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Theories of development and current critiques. Colonial legacies and post-colonial realities. Roles of the state and NGOs, population migrations, changing gender identities, cash-earning strategies, and sustainability issues. Stresses importance of cultural understandings in development initiatives. Case studies emphasizing non-industrial societies. Not open for credit to students who have completed course 126. (Former course 126.) GE credit: SocSci, Div, Wrt | SS, WC, WE.—Smith

**126B. Women and Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Current Third World and Western development issues concerning women in agriculture, industry, international division of labor, political movements, revolutions, politics of health, education, family and reproduction. Impact of colonialism, capitalism, the world system, and international feminism on women and development. Not open for credit to students who have completed course 131. (Former course 131.) GE credit: SocSci, Div, Wrt | SS, WC, WE.—Su. (Su.)

**127. Urban Anthropology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or consent of instructor. Survey of approaches to urban living: political structures, organization of labor, class relations, world views. The evolution of urban life and its contemporary dilemmas. Cross-cultural comparisons discussed through case studies. GE credit: SocSci, Div, Wrt | SS, WC, WE.—Srinivas, Zhang

**128A. Kinship and Social Organization (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Comparative examination of personal kinship, descent, marriage, household and family organizations; the theories that account for variation, and recent advances in the treatment of these data. Not open for credit to students who have completed course 128. (Former course 128.) Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**128B. Self, Identity, and Family (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Exploration of self, identity, and family systems cross-culturally. Impact of class, gender, race, ethnicity, ruralization, urbanization, and globalization on notions of selfhood in different social/cultural systems. Not open for credit to students who have completed course 129. (Former course 129.) Offered in alternate years. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**129. Health and Medicine in a Global Context (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 2 recommended. Recent works in medical anthropology and the science studies of medicine dealing with social and cultural aspects of global health issues such as AIDS, pandemics, clinical trials, cultural differences in illnesses, diabetes, organ trafficking, medical technologies, illness nar-

ratives, and others. (Same course as Science and Technology Studies 129.) GE credit: SocSci, Div, Wrt | SS, WC, WE.—Dumit

### **130A. Cultural Dimensions of Globalization (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. The cultural dimensions of recent economic and political developments frequently termed “globalization.” Offered in alternate years. GE credit: SocSci, Wrt | SS, WC, WE.

### **130BN. Migration and the Politics of Place and Identity (4)**

Lecture/discussion—4 hours. Prerequisite: course 2 recommended. Internal and international migration from an anthropological perspective, including causes, processes, and political, economic, and cultural effects of spatial mobility and displacement. Emphasizes the interplay of identity, place, and power in diverse cultural and historical contexts. Not open for credit to students who have completed course 123D. (Former course 123D.) Offered irregularly. GE credit: SocSci, Wrt | SS, WC, WE.

### **131. Ecology and Politics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Analysis of the complex interactions between ecological dynamics and political processes employing the emerging approach of political ecology. Case studies of environmental degradation (e.g., desertification, logging, mineral extraction, petroleum, water) from various cultural and geographic regions. Offered in alternate years. GE credit: SocSci, Div | SS.

### **132. Psychological Anthropology (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 2 recommended. History of the relationship between anthropology and psychoanalysis. Exploration of anthropology of emotions, colonial psychology, contemporary ethno-psychiatry, studies on personhood, possession, magic, altered states, subjectivity, and definitions of the normal and the pathological in different contexts and cultures. GE credit: SocSci, Div, Wrt | SS, WC, WE.—Giordano

### **134. Buddhism in Global Culture (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Class size limited to 50 students. Buddhist meditation and ritual as a cultural system that adapts to global and local forces of change. Anthropological theory and method in understanding global culture transmission, including Buddhist reform movements in Asia and Buddhist practice in the West. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—Klima

### **136. Ethnographic Film (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Overview of the use of film in anthropology and its advantages and limitations in comparison to written ethnographic descriptions. Essential features of ethnographic films. Film production in anthropological research and problems encountered in producing films in the field. Offered irregularly. GE credit: SocSci, Wrt | SS, VL, WC, WE.

### **137. Meditation and Culture (4)**

Lecture/discussion—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Class size limited to 50 students. Study and practice of the relation between meditation and cultural conditioning; comparison of Buddhist practice with other cultural constructions of mind, body, brain, thought, emotion, and self.—Klima

### **138. Ethnographic Research Methods in Anthropology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Basic concepts in and approaches to ethnographic field research. Problem formulation, research design, qualitative and quantitative data collection procedures, and techniques for organizing, retrieving, and analyzing information. Ethnographic description and constructed inference. Students will organize and conduct individual research projects. Offered in alternate years. GE credit: SocSci | SS, WC, WE.—de la Cadena

### **139AN. Race, Class, Gender Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Comparative analysis of class/race/gender inequality, concentrating on the ways in which beliefs about descent, “blood,” and biological difference interact with property and marital systems to affect the distribution of power in society. Not open for credit to students who have completed course 139. (Former course 139.) Offered irregularly. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WC, WE.—de la Cadena

### **139BN. Gender and Sexuality (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Gender and sexuality in foraging bands, horticultural and pastoral tribes, agricultural and industrial states. Debates on cultural evolution and distribution of gender hierarchies. Impact of politics, economics, religion, social practices, women's movements on gender and sexuality. Culture, nature, and sexuality. Not open for credit to students who have completed course 130. (Former course 130.) Offered irregularly. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WC, WE.

### **140A. Cultures and Societies of West and Central Africa (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Ethnographic survey of West Africa and Congo Basin with analyses of representative societies which illustrate problems of general theoretical concern. Major consideration will be the continuities and discontinuities between periods prior to European contact and the present. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

### **140B. Cultures and Societies of East and South Africa (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Ethnographic survey of Eastern and Southern Africa with analyses of selected societies which illustrate problems of interest to anthropologists. Major consideration will be given to continuities and discontinuities between periods prior to European contact and the present. GE credit: SocSci, Div, Wrt | SS, WC, WE.—Donham

### **141B. Ethnography of California and the Great Basin (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended; consent of instructor. Description and analysis of the native peoples of California and the Great Basin, and their lifeways at the time of European contact. (Former course 141C.) GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.—Beffinger

### **141C. People of the Arctic: Contemporary and Historic Cultures of the Circumpolar Region (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or 3 recommended. Social, economic, political, and religious lives of Russian, American, Canadian, and Greenlandic Arctic people (Yup'ik, Inupiat, Inuit). Topics include Arctic ecosystems, archaeological record of human occupation, ethno-historical and ethnographic accounts, arctic people in popular culture, and contemporary issues. Offered in alternate years.—F. Darwent

### **142. Peoples of the Middle East (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Peoples of the Middle East (including North Africa). Discussions of class relations, kinship organization, sex/gender systems, religious beliefs and behavior, ethnic relations, political systems. Impact of world systems, political and religious movements and social change. (Former course 136.) GE credit: SocSci, Div, Wrt | SS, WC, WE.

### **143A. Ethnology of Southeast Asia (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Patterns of culture and social organization from prehistory to the present, in the context of historical, ecological, economic, and political settings. Emphasis on the relation of ethnic minorities to national states. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

### **144. Contemporary Societies and Cultures of Latin America (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Introduction to contemporary social structure of Latin America. Origins, maintenance and changes in inequality: economic responses to poverty, sociocultural responses to discrimination, and political responses to powerlessness. GE credit: SocSci, Div, Wrt | SS, WC, WE.—de la Cadena

### **145. Performance, Embodiment, and Space in South Asia (4)**

Lecture/discussion—4 hours. Prerequisite: course 2 or consent of instructor. South Asian cultures and societies with a focus on performance, embodiment, and space from several disciplinary fields. Topics may include colonialism, nationalism, religious traditions, media, popular culture, cities, social movements, modernity, body-cultures, identity, gender, and diasporas. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—Srinivas

### **146N. Topics in the Anthropology of Europe (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Recent ethnographies of different nation-states and socio-political spaces in Europe. Topics include the question of old and new boundaries, historical and contemporary constructions of Europe, migration and ethnicity, citizenship, belonging, multiculturalism, and post/socialisms. Offered in alternate years. GE credit: SocSci, Div, Wrt | SS, WC, WE.—Giordano

### **148A. Culture and Political Economy in Contemporary China (4)**

Lecture/discussion—4 hours. Prerequisite: course 2 recommended. Examining contemporary Chinese culture and political economy through reading ethnographic studies on recent transformations in rural and urban Chinese society. Special attention is given to state power, popular culture, spatial mobility, city space, and gender. GE credit: SocSci, Div, Wrt | SS, WC, WE.—Zhang

### **149A. Traditional Japanese Society (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 recommended. Patterns of culture and social organization from prehistoric to early twentieth-century Japan. Origins, prehistory, and traditional religious and political systems, marriage and kinship, language and culture. Changes and continuities in traditional and contemporary Japanese culture are addressed. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

### **149B. Contemporary Japanese Society (4)**

Lecture—3 hours; discussion—1 hour. Introduction to contemporary Japanese social structure, social organization, and patterns of culture. Analysis of rural-urban cultural continuities and contrasts, class relations, political and economic systems, kinship, sex/gender systems, contemporary religious beliefs and behavior, conflict, consensus, and cultural stereotypes. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.—Shibamoto-Smith

### **151. Primate Evolution (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or Biological Sciences 2B or Biological Sciences 2C or Evolution and Ecology 10 recommended. Origin and relationships of the prosimians, monkeys, and apes. GE credit: SciEng, Wrt | SE, WE.—S. (S.) Isbell

### **152. Human Evolution (5)**

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: course 1 recommended. Nature and results of the evolutionary processes involved in the formation and differentiation of humankind. GE credit: SciEng, Wrt | SE, WE.—W. (W.) Zwyns

### **153. Human Biological Variation (5)**

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: course 1 or Biological Sciences 2B recommended. Origin, adaptive significance and methods of analysis of genetic differences among human populations. Special attention given to racial differences such as those in blood groups, plasma pro-

teins, red cell enzymes, physiology, morphology, pigmentation and dermatoglyphics. GE credit: SciEng, Wrt | QL, SE, WE.—D. G. Smith

#### **154A. The Evolution of Primate Behavior (5)**

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: course 1 or 54 or Evolution and Ecology 10 recommended. Examines ecological diversity and evolution of social systems of prosimians, monkeys, and apes, placing the social behavior of the primates in the context of appropriate ecological and evolutionary theory. GE credit: SciEng, Wrt | SE, VL, WE.—F. (F.) Isbell

#### **154B. Primate Evolutionary Ecology (5)**

Lecture—3 hours; lecture/discussion—1 hour; term paper. Prerequisite: course 1 or Evolution and Ecology 10 recommended. Examination of the ecology of primates within an evolutionary framework. Theoretical concepts in individual, population, and community ecology, illustrated with primate (and other vertebrate) examples, with additional discussion of primate and rainforest conservation. GE credit: SciEng, Wrt | QL, SE, WE.

#### **154C. Behavior and Ecology of Primates (2)**

Lecture/discussion—2 hours. Prerequisite: course 54, 154A, or 154BN; Statistics 13 or its equivalent. Scientific methods of studying, describing and analyzing the behavior and ecology of primates. (P/NP grading only.) Offered in alternate years. GE credit: SE.—S. (S.) Crofoot

#### **154CL. Laboratory in Primate Behavior (4)**

Laboratory—6 hours; term paper. Prerequisite: course 54, 154A, or 154BN; Statistics 13 or its equivalent. Design and conduct of scientific “field studies” of the behavior of group-living primates at the California National Primate Research Center Offered in alternate years. GE credit: SciEng | OL, SE, WE.—S. (S.) Crofoot

#### **156A. Human Osteology (4)**

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 1 or course 1Y recommended. Not open to students who have previously completed course 156. Human skeleton from archaeological, forensic, and paleontological perspectives, including anatomical nomenclature, variation with sex and age, function, evolution, growth, and development of bones and teeth. Hands-on study and identification of human skeletal remains. GE credit: SciEng | SE.—F. (F.) Weaver

#### **156B. Advanced Human Osteology (4)**

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 156A or equivalent. Not open to students who have previously completed course 156. Human skeletons from archaeological, forensic, and paleontological contexts. Bone and tooth structure, growth, and development; measurement, statistics, and biomechanics; assessment of age, sex, weight, height, and ancestry; and indicators of illness, injuries, diet, and activities. Offered in alternate years. GE credit: SciEng | SE.—S. (S.) Weaver

#### **157. Anthropological Genetics (3)**

Lecture—3 hours. Prerequisite: course 1 or Biological Sciences 2C recommended. Method and theory of genetic and genomic analysis of molecular evolution of human and non-human primate populations. Special attention to the molecular evolutionary transition to humans and genetic differences among extant human populations and their adaptive significance. Offered in alternate years. GE credit: SciEng | QL, SE.—D. G. Smith

#### **157L. Laboratory in Anthropological Genetics (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 1 or Biological Sciences 2C recommended; enrolled in course 157 concurrently or following. Methods for identifying genetic variation in human blood group antigens, serum proteins and red cell enzymes (hemagglutination), general electrophoresis on starch, cellulose acetate and polyacrylamide, immunodiffusion and immunoelectrophoresis on agarase. (P/NP grading only.) Offered irregularly. GE credit: QL, SE.—D. G. Smith

#### **158. The Evolution of Females and Males: Biological Perspective (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 recommended. Current theoretical frameworks for explaining the evolution of sex differences and for understanding the interrelationship between biological processes and cultural construction of gender roles. GE credit: SciEng, Div, Wrt | OL, WE.—Eerkens

#### **159. Molecular Anthropology of Native America (4)**

Seminar—3 hours; term paper. Prerequisite: course 1 or Biological Sciences 2B; or consent of instructor. Use of DNA and other genetic polymorphisms to test hypotheses regarding genetic relationships among different Native American tribal groups and about prehistoric population replacements and migrations to and within the Americas. Integration with craniometric, archaeological, paleoenvironmental, linguistic and ethnohistorical evidence. Offered irregularly. GE credit: SciEng | QL, SE.

#### **160. Neandertals and Modern Human Origins (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or course 1Y or equivalent recommended. Origins, evolution, and disappearance of Neandertals. Emergence of humans like us in both anatomy and behavior. Interpretation of the fossil and archaeological records of Europe and Africa. Genetics of living and fossil humans. Offered in alternate years. GE credit: SciEng | SE.—Weaver

#### **170. Archeological Theory and Method (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 recommended. Introduction to history and development of archeological theory and method, with particular emphasis on the basic dependence of the latter on the former. Stress is on historical development of archaeology in the New World. GE credit: SocSci, Div, Wrt | SS, WE.—W. (W.) Darwent

#### **172. New World Prehistory: The First Arrivals (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 recommended. Survey of data relating to the peopling of the New World. Cultural adaptation and development of early inhabitants of North and South America. Offered in alternate years. GE credit: SocSci, Div, Wrt | SS, WC, WE.—Darwent

#### **173. New World Prehistory: Archaic Adaptations (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 recommended; consent of instructor. Introduction to and survey of prehistoric hunting and gathering adaptations across North America with particular emphasis on the East, Southeast, Midwest, Plains, Southwest, and Northwest. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WE.

#### **174. European Prehistory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 recommended. Survey of the prehistory of Europe from its earliest human inhabitants, to the Neandertals and first modern humans, and through early agricultural and complex societies. Analysis and interpretation of the European archaeological record for understanding human dispersals into Europe. Offered in alternate years. GE credit: SocSci | SS, WC, WE.—Steele

#### **175. Andean Prehistory: Archaeology of the Incas and their Ancestors (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 recommended. Prehistory of the Andean region, especially Peru, from the earliest hunting and gathering societies through the Inca. Focus on the use of archaeological data to reconstruct ancient human adaptations to the varied Andean environments. Offered in alternate years. GE credit: SocSci | SS, WC, WE.—Eerkens

#### **176. Prehistory of California and the Great Basin (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 recommended; consent of instructor. Description and analysis of the prehistoric peoples of California and the Great Basin from earliest times

to European contact. Offered in alternate years. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.—Eerkens

#### **177. African Prehistory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 recommended. Survey of prehistory of Africa from early human ancestors, through modern human origins, and into early agricultural and complex societies and the Bantu expansion. Analysis and interpretation of the African archaeological record, incorporating human paleontology and genetics. Offered in alternate years. GE credit: SocSci | SS, WC, WE.—Steele

#### **178. Hunter-Gatherers (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 recommended. Study and interpretation of the ancient and modern lifeway in which peoples support themselves with primitive technologies and without benefit of domesticated plants and animals. Offered in alternate years. GE credit: SocSci, Div, Wrt | SS, WC, WE.—Bettinger

#### **179. Asian Prehistory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 recommended. Survey of the prehistory of Asia from the earliest human occupations to the rise of complex societies. Special focus on fossil and archaeological records. Offered in alternate years. GE credit: SocSci—Zwyns

#### **180. Zooarcheology (4)**

Lecture—2 hours; discussion/laboratory—3 hours. Prerequisite: course 1 or course 3 recommended. Restricted to junior or senior standing. Theories and methods for studying animal skeletal remains from archaeological sites. Identification and quantification of zooarchaeological material, cultural and natural processes affecting animal bones pre- and postburial, and use of faunal remains for determining past human diets and past environments. Offered in alternate years. GE credit: SciEng | SE.—W. (W.) Darwent, Steele

#### **181. Field Course in Archeological Method (9)**

Lecture—6 hours; daily field investigation. Prerequisite: course 3. On-site course in archeological methods and techniques held at a field location in the western United States, generally California or Nevada. Introduces basic methods of archeological survey, mapping, and excavation. GE credit: SciEng | SE.—Su. (Su.)

#### **182. Archaeometry (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 3 recommended. Scientific techniques used to study the chemical and physical properties of archaeological materials. Types of anthropological questions that can be addressed with different methods. Preparation and analysis of archaeological materials. Offered in alternate years. GE credit: SciEng | QL, SE, VL, WE.—Eerkens

#### **183. Laboratory in Archeological Analysis (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 3 recommended; consent of instructor. Limited enrollment. Museum preparation, advanced field investigation, and guidance in preparation of museum material for publication. May be repeated for credit with consent of instructor. Offered irregularly. GE credit: SciEng, Wrt | OL, QL, SE, WE.

#### **184. Prehistoric Technology: The Material Aspects of Prehistoric Adaptation (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 recommended. Examination of the role of lithic, ceramic, textile and wooden implements as elements in prehistoric survival and development. Emphasis is descriptive, but the significance of material resources as factors in prehistoric adaptation, settlement patterns, and culture change are discussed. Offered in alternate years. GE credit: SocSci | SS, WE.—Eerkens

#### **185. Lithic Analysis (4)**

Lecture/laboratory—4 hours. Prerequisite: course 3 recommended. Basic concepts of lithic analysis. General introduction on the place of stone tool tech-

nology in the archeological record. Physics, terminology and methodological concepts behind the study of stone tools. Review of the development of stone tool technology from its emergence. Offered in alternate years. GE credit: SocSci | SS. —Zwyns

#### **186A. Museum Studies: Analysis of Native American Basketry (4)**

Lecture/laboratory—3 hours; discussion/laboratory—1 hour. Class size limited to 25 students. Study of ethnographic and prehistoric basketry from North America, especially California and Oregon, in a multidisciplinary anthropological context. Techniques for basketry attribution and textile analysis. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, OL, VL, WE. —F. (F.) Bettinger

#### **191. Topics in Anthropology (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: junior or senior standing in anthropology. Intensive treatment of a special anthropological topic or problem. May be repeated one time for credit when topic differs.

#### **192. Internship in Anthropology (1-12)**

Internship—3-36 hours. Prerequisite: Upper division standing; consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Anthropology under the supervision of a member of the faculty. Limited to Anthropology majors. May be repeated for a total of 12 units including 192 courses taken in other departments. (P/NP grading only.)

#### **194H. Special Study for Honors Students (1-5)**

Prerequisite: open only to majors of senior standing who qualify for honors program. Independent study of an anthropological problem involving the writing of an honors thesis. May be repeated for a total of 12 units. (P/NP grading only.) GE credit: WC.

#### **197T. Tutoring in Anthropology (1-5)**

Tutorial—1.5 hours. Prerequisite: upper division standing with major in Anthropology and consent of Department Chairperson. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated for credit. (P/NP grading only.)

#### **198. Directed Group Study (1-5)**

(P/NP grading only.)

#### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

#### **Graduate**

#### **200. History of Anthropology (4)**

Lecture/discussion—2 hours; term paper. Historical development of socio-cultural theory within anthropology, from mid-19th to mid-20th Centuries. Focus on original theory texts in context of historical developments in the field as a whole. Offered in alternate years.

#### **201. Critical Readings in Ethnography (4)**

Seminar—3 hours; term paper. Prerequisite: graduate student in Anthropology or consent of instructor. Critical readings of selected ethnographies that examine a wide range of important topics and analytical issues in social and cultural anthropology. Emphasis on how and why ethnographic writing has changed over time and its relationship with contemporary theoretical explorations. —F. (F.) Zhang

#### **202. History and Theory of Biological Anthropology (4)**

Seminar—3 hours; term paper. History of thought in biological anthropology and analysis of major theoretical problems in the field. Suggested for all first-year graduate students lacking intensive preparation in biological anthropology. —Weaver

#### **203. History and Theory of Archaeology (4)**

Seminar—3 hours; term paper. Generally restricted to graduate students; outstanding undergraduates with extensive training in archaeology with consent of instructor. History of archaeology and archaeological theory and analysis of archaeological research methodology. —F. (F.) Bettinger

#### **204. Contemporary Issues in Anthropological Theory (4)**

Seminar—3 hours; term paper. Prerequisite: course 2, 137 or consent of instructor. Advanced consideration of fundamental issues in anthropological theory. Emphasis on critical examination of major contemporary debates between proponents of competing theories.

#### **205. History and Theory in Anthropological Linguistics (4)**

Seminar—3 hours; term paper. History of thought in anthropological linguistics. Consideration of the historical development of fundamental ideas in anthropological linguistics, of major theoretical issues, and of research methodology.

#### **206. Research Design and Method in Social Anthropology (5)**

Seminar—4 hours. Prerequisite: consent of instructor. Limited enrollment. Formulation of research problems and preparation of research proposals; relationships between theory and method, funding, pre-fieldwork preparations, entering the community, field research techniques, and problems of ethics; intensive work on proposal writing. May be repeated one time for credit. —S. (S.)

#### **207. Ethnographic Writing (4)**

Seminar—3 hours; term paper. Prerequisite: courses 137, 201, or the equivalent. Relationship between conducting participant observation of others and writing it up, emphasizing the processual rift between the reality of fieldwork and its written representation. Study of various literary genres and textual strategies used in cultural anthropology. May be repeated for credit.

#### **210. Aspects of Culture Structure (4)**

Seminar—3 hours; term paper. Analysis of various phases of culture, such as religion, economics, law, and folklore. May be repeated for credit when topic differs. —F, W, S. (F, W, S.)

#### **211. Advanced Topics in Cultural Ecology (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Environmental Science and Policy/Anthropology 133, graduate standing in Anthropology or Ecology. Topics of current analytical and methodological importance in cultural ecology. Examination of general issues in cultural ecology through study of human response to and influence on climate. (Same course as Ecology 211.)

#### **212. Political Ecology (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Interdisciplinary seminar evaluating contributions from ecological anthropology, political economy, cultural constructivism, postmodernism, and feminism towards development of theories of political ecology. Historical relationships between local/global power structures, environmental degradation, and resistance movements. Case studies of desertification, deforestation, mining, conservation, development.

#### **216. Problems in Archeological Method (4)**

Seminar—3 hours; term paper. Techniques for analyzing archeological data; application to various prehistoric cultures. May be repeated for credit with consent of instructor. —Darwent, Steele

#### **217. Quantitative Modeling in Archaeology (4)**

Lecture/discussion—3 hours; term paper. Examination of the nature of archaeological data with a focus on the quantitative and statistical techniques available to model, analyze, display, and make sense of such data. Offered irregularly. —Eerkens

#### **218. Topics in New World Prehistory (4)**

Seminar—3 hours; term paper. Advanced study on current problems in New World Prehistory and archaeology. May be repeated for credit only if material is unique for that student and with consent of instructor. May be repeated for credit. Offered irregularly. —Darwent, Eerkens

#### **219. Topics in Old World Prehistory (4)**

Seminar—3 hours; term paper. Advanced study on current problems in Old World prehistory and archaeology. May be repeated for credit only if material is unique for that student and with consent of instructor. May be repeated for credit. Offered irregularly. —Steele, Zwyns

#### **220. Field Course in Linguistics (4)**

Seminar—2 hours; laboratory—2 hours. Prerequisite: courses 110, 111. Techniques of eliciting, recording, and analyzing; work with a native speaker.

#### **221. Rural Transformation in Postcolonial Societies (4)**

Seminar—3 hours; term paper. Prerequisite: courses 223, 265, or consent of instructor. Problems of rural transformation arising out of political and economic interaction between national elites and rural regional and local populations under varying conditions of induced change in postcolonial societies. Attention will be given to the implications of this interaction for rapid economic growth. May be repeated for credit.

#### **222. Cities and Citizenship (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing; consent of instructor. Explores the nature of modern cities, urban socioeconomic life, and urban culture and politics from an anthropological perspective. —F. (F.) Zhang

#### **223. Economic Anthropology (4)**

Seminar—3 hours; term paper. Prerequisite: course 122 or consent of instructor. Selected current methodological and theoretical problems in the analysis of nonindustrial economic systems.

#### **224. Problems in Comparative Religion (4)**

Seminar—3 hours; term paper. Advanced study of current problems in the anthropological study of religion.

#### **225. State and Nation in the Modern World (4)**

Seminar—3 hours; term paper. A presentation of current anthropological theories of the origins and nature of the modern nation-state in both the First and Third Worlds, with special reference to state ideology (nationalism) and forms of control.

#### **226. Consciousness and Resistance (4)**

Seminar—3 hours; term paper. Prerequisite: completion of first-year graduate work or consent of instructor. Consideration of approaches to the study of social inequality, and responses of subordinated groups. Emphasis on situating approaches to contemporary social theory, concrete research problems, and political strategies. Topics: formation of consciousness and identity; collective action, accommodation to frontal resistance.

#### **228. Culture and Power (4)**

Seminar—3 hours; extensive writing. Prerequisite: graduate standing or consent of instructor. Exploration of one of the core paradigms within contemporary anthropological inquiry, "culture and power." Focus on how distinct theoretical perspectives—Marxism, post-Marxism, structuralism, post-structuralism, and feminism—have examined the mutually constitutive nature of culture and power. —W. (W.) Sawyer

#### **229. Gender, Identity, and Self (4)**

Seminar—3 hours; term paper. Intersections of gender, identity, and selfhood cross-culturally and historically. How the self is feminized and masculinized, and interfaces with sexual, race, class, work, national, minority, and majority identities under different historical, cultural, and social structural conditions. May be repeated for credit when topic differs. —W. (W.) Joseph

#### **230. Family Systems and Reproduction: Theory and Comparisons (4)**

Lecture—1.5 hours; seminar—1.5 hours; term paper. Prerequisite: graduate standing in one of the social sciences including History. Comparative examination of family systems in historical context and of reproductive behaviors and strategizing. A major theme is how family-system norms specify the

relative desirability of differently configured offspring sets. Cases are drawn from Western Europe and South and East Asia.

### **232. Political Movements (4)**

Seminar—3 hours; term paper. Prerequisite: completion of first-year graduate work recommended. An interdisciplinary approach to political movements of protest, reform, and revolution emphasizing historical comparison and evaluation of major theoretical approaches including world systems, resource mobilization, state and culture, rational choice, moral economy, social class and gender.

### **239. Problems in African Society and Culture (4)**

Seminar—3 hours; term paper. Diachronic analyses of traditional institutions in sub-Saharan Africa.

### **241. Topics in North American Ethnology (4)**

Seminar—3 hours; term paper. Advanced study on current problems in North American ethnography and culture history. May be repeated for credit with consent of instructor.

### **245. Ethnology of Northern and Central Asia (4)**

Seminar—3 hours; term paper. Prerequisite: a reading knowledge of German, Russian, Chinese, or Japanese. Lectures on the culture aboriginally found north of the Caucasus-Korea line. Supervised study of the primary and secondary sources. Work with informants when available.

### **246. Ethnology of Europe (4)**

Seminar—3 hours; term paper. Prerequisite: reading knowledge of a European language other than English. Supervised study of the primary and secondary sources dealing with the ethnography and ethnology of the peoples of Europe. Emphasis upon folk, peasant, and minority groups.

### **248. Topics in Chinese Culture and Society (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing in the social sciences, history, or the humanities. Selected topics in the anthropology of Chinese society. Focus on one or more of the following topics: state-society dynamics, family and gender, city formation and urban life, social movement, labor politics, and religion and ideology in Chinese society. May be repeated for credit when topic differs.

### **250. Behavioral Ecology of Primates (4)**

Seminar—3 hours; term paper. Prerequisite: course 154A (may be taken concurrently) or the equivalent, graduate standing. Concepts, issues, and hypotheses in primate behavioral ecology, with emphasis on the social and ecological determinants and consequences of variation in social organization for individuals. Offered in alternate years.—Isbell

### **252. Human Evolution Seminar (4)**

Seminar—3 hours; term paper. Prerequisite: course 152 or the equivalent; consent of instructor. Study of selected topics in human evolutionary studies. Each year course will focus on one or more of the following: molecular evolution, primate evolutionary biology, Tertiary hominoids, Australopithecus, Homo erectus, archaic Homo sapiens, brain evolution. May be repeated for credit.—S. (S.) Weaver, Zwyns

### **253. Seminar in Human Biology (4)**

Seminar—3 hours; term paper. Prerequisite: course 153, 157, or consent of instructor. Study of selected topics in human biology. May be repeated for credit when topics vary. Offered irregularly.—W. (W.) D. G. Smith

### **254. Current Issues in Primate Sociobiology (4)**

Seminar—3 hours; term paper. Prerequisite: course 154B or the equivalent. Analysis of primate behavior, with particular emphasis on preparation for field studies. May be repeated for credit when topic differs.—Crofoot, Isbell

### **256. Primate Conservation Biology (4)**

Seminar—3 hours; term paper. Prerequisite: course 154, graduate standing or upper division undergraduate with consent of instructor. Class size limited

to 10 students. Application of understanding of prime biology to conservation of primates and their habitat. Topics include evolutionary anthropology, behavioral ecology, biogeography, macroecology, population biology, and socio-ecology of primates. May be repeated one time for credit if term paper differs. (S/U grading only.) Offered irregularly.

### **261. Modeling the Evolution of Social Behavior (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: Mathematics 16C or the equivalent or consent of instructor. Tools and topics in modeling the evolution of social behavior in humans and other animals. Game theory, basic population genetics, animal conflict, altruism, reciprocity, signaling, and group selection.

### **262. Evolution and Human Behavior (4)**

Discussion—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Exploration of the links between behavioral ecological theory and human cultural variation, focusing on reproduction, marriage, parental investment and family structure; implications of evolutionary theory for social organization in human communities, historical and contemporary. Offered in alternate years.—Bergerhoff, Mulder

### **263. Human Applications of Foraging Theory (4)**

Discussion—3 hours; laboratory—3 hours. Foraging theory models and their use in ethnographic and archaeological analyses of human behavior, with a focus on hunter-gatherers and resource selection, patch use, population and habitat, central places, sharing, stochastic processes, population dynamics, and conservation behavior. Not open for credit to students who have completed course 258. Offered irregularly.

### **265. Language, Performance, and Power (4)**

Seminar—3 hours; term paper. Restricted to graduate standing or consent of instructor. Exploration of the intersection between linguistic and social theories in the language-state relation and the performance of identity. Ideological sources of language differentiation; nation-building and linguistic difference. Political economic, sociolinguistic, and ethnographic approaches to understanding linguistic inequality. (Same course as Linguistics 265.) Offered in alternate years.—Shibamoto-Smith

### **270. Anthropology Colloquium Seminar (1)**

Seminar—1 hour. Reports and discussions of recent advances in the four subfields of anthropology. To be presented by guest speakers. May be repeated two times for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **280. Current Anthropology Journal Editorial Workshop (4)**

Workshop—1 hour; independent study—3 hours. Prerequisite: consent of instructor. Students must enroll for all three quarters. Reading and offering workshop critiques of manuscripts submitted for publication, and reading and discussion of other relevant work in anthropology and human ecology. Track and edit published comments and authors' replies that accompany major features. Participation in the development of new sections for the electronic edition of the journal, including a "news and views" section and a debate section. (Same course as Ecology 280.) May be repeated up to 12 units for credit with consent of instructor.

### **291. Advanced Topics in Human Behavioral Ecology (4)**

Discussion—3 hours; term paper. Prerequisite: course 261, 262, or 263, or comparable experience in anthropology or related disciplines and consent of instructor. Topically focused, critical discussion of current and emerging research in the field of human behavioral ecology, giving special attention to theory, concepts, models, and methods for the evolutionary analysis of ethnographic and archaeological evidence. May be repeated one time for credit if topic differs.

### **292. Seminar in Linguistic Anthropology (4)**

Seminar—3 hours; term paper. Selected topics in linguistic anthropology. May be repeated for credit when topic differs.

### **298. Group Study (1-4)**

(S/U grading only.)

### **299. Research (1-12)**

(S/U grading only.)

### **299D. Dissertation Research (1-12)**

(S/U grading only.)

### **Professional**

### **390. Teaching Anthropology (4)**

Seminar—3 hours; practice—1 hour. Prerequisite: graduate standing in Anthropology or closely related discipline. Intellectual and practical elements of college teaching in the field of Anthropology, from curriculum design and the syllabus through grading and course evaluations, including classroom and information technology methods, and problems and rewards of teaching in higher education. Offered in alternate years.

### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S.

## **Applied Behavioral Sciences**

**See Community and Regional Development, on page 221.**

## **Applied Biological Systems Technology**

(College of Agricultural and Environmental Sciences)

**Faculty.** See under Department of Engineering: Biological and Agricultural, on page 266.

### **Courses in Applied Biological Systems Technology (ABT)**

#### **Lower Division**

##### **15. Wood Properties and Fabrication (2)**

Lecture/discussion—1 hour; laboratory—3 hours. Study of wood properties and techniques for fabrication with wood. Gain experience working with various woods and woodworking tools for specific applications. (P/NP grading only.) GE credit: OL, QL, SE, VL. —W. (W.) Shafii

##### **16. Metal Properties and Fabrication (2)**

Lecture—1 hour; laboratory—3 hours. Study of metal properties and of techniques for fabricating in metal. Physical principles, design considerations, effects of techniques on quality and appearance, and evaluation procedures. Experience in working with metal. (P/NP grading only.) GE credit: QL, SE, VL. —F. (F.) Shafii

##### **17. Plastic Properties and Fabrication (2)**

Lecture—1 hour; laboratory—3 hours. Study of the properties of plastic materials and the fundamentals of fabrication techniques. Experience in working with common plastics, with applications to biological systems. (P/NP grading only.) GE credit: QL, SE, VL. —S. (S.) Shafii

##### **49. Field Equipment Operation (2)**

Lecture—1 hour; laboratory—3 hours. Operation, adjustment, and troubleshooting of farm tractors and field equipment. Principles of operation, equipment terminology and uses of tilling, cultivating, thinning, and planting equipment. Typical sequences in cropping practices. (P/NP grading only.) GE credit: QL, SE, VL. —S. (S.) Shafii

**52. Field Equipment Welding (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 16 or consent of instructor. Intermediate welding to include hardfacing and inert gas welding. Class projects on repair and fabrication by welding. Troubleshooting and major repair of field equipment. (P/NP grading only.) GE credit: QL, SE, VL.—W. (W.) Shafii

**58. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.

**59. Special Study for Lower Division Students (1-5)**

(P/NP grading only.) GE credit: SE.

**Upper Division****101. Engine Technology (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: upper division standing or consent of instructor. Principles of 2-stroke cycle, 4-stroke cycle gasoline and 4-stroke cycle diesel engine construction and operation. Engine systems, performance, troubleshooting, and overhaul. GE credit: SciEng | QL, SE, VL.—W. (W.) Jenkins, Vougioukas

**110L Experiments in Food Engineering (2)**

Laboratory—6 hours. Prerequisite: Food Science and Technology 110B (may be taken concurrently). Use of temperature sensors; measurement of thermal conductivity and heat transfer in foods; refrigeration, freezing, concentration and dehydration of foods. GE credit: SciEng | QL, SE, VL, WE.—S. (S.) Bornhorst

**121. Animal Housing and Environment Management (2)**

Lecture—2 hours. Prerequisite: Animal Science 1 or 2. Optimal structures and environments for animal growth and comfort; heat and moisture transfer principles; heating, cooling, ventilating principles and equipment; animal housing design; environmental regulations and waste management practices. Offered in alternate years. GE credit: SciEng | SE.—(W.) Zhang

**142. Equipment and Technology for Small Farms (2)**

Lecture—1 hour; laboratory—3 hours. Types and characteristics of agricultural equipment and technologies appropriate for small commercial farming. Adjustment and calibration of equipment. Selection of and budgeting for equipment. (Same course as International Agricultural Development 142.) GE credit: SciEng | QL, SE, VL.—S. (S.) Shafii

**150. Introduction to Geographic Information Systems (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Plant Sciences 21 or equivalent with consent of instructor. Priority given to College of Agricultural and Environmental Science majors. Basic concepts, principles and methods of GIS are presented. Data structures, database design, GIS data creation, GPS, and spatial analysis techniques are emphasized. Lab topics include: online data sources, aerial photography, GPS data input, suitability analysis, cartographic design and graphic communication. Not open for credit to students who have completed Applied Biological Systems Technology 180/Plant Sciences 180 or Applied Biological Systems Technology 181N. (Same course as Landscape Architecture 150.) GE credit: SciEng | SE, VL.—F. (F.) Greco, Upadhyaya

**161. Water Quality Management for Aquaculture (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1B, Mathematics 16B, Chemistry 2B. Basic principles of water chemistry and water treatment processes as they relate to aquacultural systems. Offered in alternate years. GE credit: SciEng | QL, SE, SL, VL.—W. Hung

**163. Aquaculture Systems Engineering (3)**

Lecture—3 hours. Prerequisite: course 161. Design of aquacultural systems: design methodology, principles of fluid mechanics, site selection and facility

planning, management operations, computer modeling. Offered in alternate years. GE credit: SciEng | OL, QL, SE, SL, VL, WE.—S. Hung

**165. Irrigation Practices for an Urban Environment (2)**

Lecture—2 hours. Prerequisite: Physics 1A or 5A. Basic design, installation, and operation principles of irrigation systems for turf and landscape: golf courses, parks, highways, public buildings, etc. Emphasis on hardware association with sprinkler and drip/trickle systems. GE credit: SciEng | QL, SE, VL.—W. (W.) Grismer

**181N. Concepts and Methods in Geographic Information Systems (4)**

Lecture/laboratory—8 hours. Prerequisite: course 180 or Agricultural Management and Rangeland Resources 180 or Landscape Architecture 50 or consent of instructor. Data representation and analysis in geographic information systems (GIS). Creation of spatial data sets from analog and digital sources such as aerial photography and maps; data structures, data management, database design, georeferencing, georectification, surface models, analysis, and spatial data visualization. Offered in alternate years. GE credit: SciEng | SE, SL, VL.—W. Hijmans

**182. Environmental Analysis using GIS (4)**

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 180 or equivalent GIS experience and skills; general biology and/or ecology courses recommended. Ecosystem and landscape modeling with emphasis on hydrology and solute transport. Spatial analysis of environmental risk analysis including ecological risk assessment, natural resource management. Spatial database structures, scripting, data models, and error analysis in GIS. (Same course as Hydrologic Science 182.) Offered in alternate years. GE credit: SciEng | QL, SE, SL, VL.—S. Hijmans, Zhang

**190C. Research Conference for Advanced Undergraduates (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Research conferences for specialized study in applied biological systems technology. May be repeated for credit. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**192. Internship in Applied Biological Systems Technology (1-5)**

Internship—3-15 hours. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised internship in applied biological systems technology. May be repeated for credit. (P/NP grading only.) GE credit: SE.

**197T. Tutoring in Applied Biological Systems Technology (1-5)**

Tutorial. Prerequisite: consent of instructor; upper division standing. Tutoring individual students, leading small voluntary discussion groups, or assisting the instructor in laboratories affiliated with one of the department's regular courses. May be repeated for credit if topic differs. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.) GE credit: SE.

**Graduate****233. Pest Control Practices (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: graduate standing or consent of instructor. Practical and theoretical considerations of pest control systems and techniques. Design, selection, and use of mechanical systems for field, orchard, greenhouse, and vector control use. Biological, legal, and environmental considerations in pest control and pesticide application.—W. (W.) Giles

**289A. Selected Topic in Applied Biological Systems Technology: Agricultural and Natural Resources (1-5)**

Prerequisite: consent of instructor. Special topic. May be repeated for credit. Offered irregularly.—F, W, S. (F, W, S.)

**289B. Selected Topics in Applied Biological Systems Technology: Biotechnology (1-5)**

Prerequisite: consent of instructor. Special topic. May be repeated for credit. Offered irregularly.—F, W, S. (F, W, S.)

**289C. Selected Topics in Applied Biological Systems Technology: Food Technology (1-5)**

Prerequisite: consent of instructor. Special topic. May be repeated for credit. Offered irregularly.—F, W, S. (F, W, S.)

**290C. Graduate Research Conference (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Research problems, progress, and techniques in applied biological systems technology. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**298. Group Study (1-5)****299. Research (1-12)**

(S/U grading only.)

**Professional****317. Teaching Agricultural Mechanics (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: a course in physics; 6 units related to agricultural mechanics; enrolled in Agricultural Education Teacher Credential Program. Preparation of the teacher to plan, organize, and conduct an agricultural mechanics program in secondary schools. Development of and presentation of lesson plans and teaching aids. Review of subject matter in metal fabrication, power and machinery and agricultural structures areas.—F. (F.) Shafii

## Applied Computing and Information Systems

(College of Agricultural and Environmental Sciences)

This minor is for students interested in applying modern computer technology to management problems in agriculture, resource management, and other areas. Course work provides knowledge of the use of information technology and the methodology of applied quantitative and systems analysis. The minor is offered by the Department of Plant Sciences.

**Minor Program Requirements:**

UNITS

**Applied Computing and Information Systems .....**

18

Two or three of the following courses: Plant Sciences 120, 121, Animal Science 128, Engineering: Computer Science 167. (The third course may be taken in substitution for a course from either of the elective groups.)

Remainder of the units to be made up of courses in one or both of the following groups .....

6-12

*Computer Applications, Computer Assisted Analysis in Data Manipulation: Agricultural and Resource Economics 106, 155, Plant Sciences 180, Applied Biological Systems Technology 180, 181, 182, Community and Regional Development 160, Economics 102,*

*Engineering: Computer Science 124, Hydrologic Science 182, International Agricultural Development 170, Statistics 141 Communication and Business Organization:*

*Agricultural and Resource Economics 112, Community and Regional Development 168, Communication 103, 130, 134, 135, 136, International Agricultural Development 111*

**Minor Adviser.** T. R. Famula (*Animal Science*)

**Advising Center** is located in 1220 Plant and Environmental Sciences 530-752-1715.

## Applied Mathematics (A Graduate Group)

**Group Office.** 1130 Mathematical Sciences Bldg.  
530-752-8130  
[studentservices@math.ucdavis.edu](mailto:studentservices@math.ucdavis.edu);  
<http://math.ucdavis.edu/grad/ggam>

**Faculty.** The Group includes approximately 90 faculty members, of whom about one-third are in the Department of Mathematics. Membership comprises chemists, biologists, physicists, geologists, statisticians, computer scientists, and engineers. Research interests include biology, atmospheric sciences, mechanics, solid and fluid dynamics, optimization and control, theoretical chemistry, computer and engineering sciences, mathematical physics, signal and image processing, harmonic analysis, numerical analysis and nonlinear partial differential equations. A complete list of faculty and their research areas are available at <http://math.ucdavis.edu/grad/ggam/faculty>.

**Graduate Study.** Students prepare for careers where mathematics is applied to problems in the physical and life sciences, engineering, and management. The degree requirements consist of rigorous training in applied mathematics, including course work and a research dissertation under the direction of a member of the Graduate Group in Applied Mathematics. The M.S. degree provides preparation for further study in applied mathematics or an application area, or for a career in industry or public service. The Ph.D. degree provides preparation for a career in research and/or teaching, or in industrial or national research laboratories. For further information, please contact [studentservices@math.ucdavis.edu](mailto:studentservices@math.ucdavis.edu) or 530-752-8130.

New applicants are admitted to the fall quarter only.

**Preparation.** The program admits qualified students with a bachelor's degree in mathematics, physics, chemistry, engineering, economics, the life sciences and related fields. General and advanced mathematics GRE scores are required, and applicants should display evidence of strong quantitative skills. Undergraduate courses should include calculus (including vector calculus), linear algebra, and ordinary differential equations. Advanced calculus (introduction to real analysis) is strongly recommended. Additional background in probability, partial differential equations, and/or numerical analysis is a plus. The ability to program in a high-level computer programming language (e.g., C, Fortran, MATLAB, Python, R, etc.) is assumed.

**Graduate Advisers.** Contact the Student Services Office at 530-752-8130 or by email at [studentservices@math.ucdavis.edu](mailto:studentservices@math.ucdavis.edu).

### Faculty

Katharine Burnett, Ph.D., Associate Professor  
Taliyah Grigor, Professor  
Lynn Roller, Ph.D., Professor  
Diana Strazdes, Ph.D., Associate Professor  
Hegnar Watenpaugh, Ph.D., Associate Professor

### Emeriti Faculty

Robert J. Grigg, Ph.D., Professor Emeritus  
Seymour Howard, Ph.D., Professor Emeritus  
Jeffrey Ruda, Ph.D., Professor Emeritus  
Dianne Sachko Macleod, Ph.D., Professor Emerita

### The Major Program

Art History studies the changing visual expression of values, beliefs and experiences across diverse cultures and over time. It provides training in historical, social and aesthetic understanding, critical thinking, scholarly research, and lucid, thoughtful analysis and writing. More than any other discipline art history sharpens its students' visual acuity and deepens their visual literacy. In so doing, it prepares them to face the increasingly complex visual world we find ourselves in today.

**The Program.** The major begins with a series of courses that surveys major landmarks in the history of visual culture, art and architecture in Asia, Europe, and the United States. More advanced lecture courses and proseminars focus on particularly important periods and issues. Students are encouraged to personalize their training with internships, independent study, and focused upper-division study. Top students considering graduate study are encouraged to engage in more advance study in the Honors program.

**Career Options.** A major in Art History develops critical thinking and the integration of research, interpretation and understanding. It provides an excellent liberal arts basis for professions as far ranging as advertising, law, medicine, politics and business. The major prepares students for advanced study in Art History, Architecture, Museum Studies and Cultural Studies. It also serves as the foundation for careers in teaching, arts, administration, museums, galleries, historic preservation, art libraries, publishing, journalism, advertising, art conservation, and art investment. As the world becomes increasingly flooded with images, the critical visual literacy gained through the study of art history becomes more important for a wide variety of careers.

### A.B. Major Requirements:

**Preparatory Subject Matter** ..... 20 UNITS

Any four of the following courses: Art History 1A, 1B, 1C, 1D, 1DY, 1E, 5, and 25 ..... 16  
Any lower division Art Studio course except Art 10 or 30 ..... 4

**Depth Subject Matter** ..... 40

Four courses, one each in four of the following six areas. Two courses must be from areas a, b, c, and two courses must be from areas d, e, f ..... 16  
(a) Ancient Mediterranean Art: Art History 172A, 172B, 173, 175  
(b) East Asian Art: Art History 163A, 163B, 163C, 163D, 164  
(c) Islamic Art: Art History 120A, 155, 156  
(d) European Art before 1700: Art History 178B, 178C, 179B  
(e) Western Art 1700-1900: Art History 110, 130, 168, 182, 183A, 183B, 188A, 188B, 188C  
(f) Art after 1900: 148, 163D, 183C, 184, 185, 186, 189

Two additional Art History courses which may include 401, 402; Undergraduate Seminar, Art History 190A-H strongly recommended ..... 8

One lower division course may be substituted for upper-division study in any of these areas. Other appropriate substitutions may be made for the course options listed above with the prior consent of the major adviser.

**Total Units for the Major** ..... 60

**Emphasis in Architectural History** UNITS

**Art History** ..... 60

Emphasis in Architectural History follows the same requirements as for the Art History major above, applying at least six of the following courses to their respective required areas or as electives: Art History 25, 110, 120A, 155, 163A, 168, 172A, 172B, 173, 175, 176A, 176B, 176C, 178B, 178C, 184, 188A, 188B.

Fulfilling the undergraduate seminar requirement (Art History 190A-H) through an architectural topic is highly recommended.

### Minor Program Requirements:

UNITS

**Art History** ..... 20

Three courses chosen from three of the following six areas with at least one course in area a, b, or c, and one course in area d, e, or f ..... 12

(a) Ancient Mediterranean Art: Art History 172A, 172B, 173, 175

(b) East Asian Art: Art History 163A, 163B, 163C, 163D, 164

(c) Islamic Art: Art History 120A, 155, 156

(d) European Art before 1700: Art History 178B, 178C, 179B

(e) Western Art 1700-1900: Art History 110, 130, 168, 182, 183A, 183B, 188A, 188B, 188C

(f) Art after 1900: 148, 163D, 183C, 184, 185, 186, 189

Two additional Art History courses which may include 401, 402; Undergraduate Seminar, Art History 190A-H strongly recommended ..... 8

One lower division course may be substituted for upper-division study in any of these areas. Other appropriate substitutions may be made for the course options listed above with the prior consent of the major adviser.

**Honors Program.** The Honors Program is encouraged for Art History majors who are considering attending graduate school. To be eligible for the program, a student must have a grade point average of 3.700 in the major or consent of the major adviser. In addition to meeting the standard major requirements, the honors student completes one undergraduate seminar (course 100 or 190A-L), and writes an honors thesis (course 194H) after completing Art History 100 or equivalent, and after satisfactorily preparing a preliminary thesis draft through a preparatory special study (Art History 199), supervised by the prospective thesis adviser. Students participating in this Program are candidates for Departmental recommendation for graduation with High or Highest Honors. See the Academic Information chapter, Letters and Science honors section, of this catalog and consult the department website for more information.

**Teaching Credential Subject Representative.** Department Chairperson; see the Teacher Education program.

**Graduate Study.** The Program in Art History offers studies leading to the Master of Arts degree in History of Art as preparation for further graduate study or professional work. For more information, contact the Graduate Staff Adviser at 530-752-8710, or see <http://arthistory.ucdavis.edu>.

## Courses in Art History (AHI)

### Lower Division

#### 1A. Ancient Mediterranean Art (4)

Lecture—3 hours; discussion—1 hour. Introduction to the art and architecture of the ancient Mediterranean world, including Mesopotamia, Egypt, Greece, and Rome. GE credit: ArtHum | AH, VL, WC.—F. (F.) Roller

#### 1B. Medieval and Renaissance Art (4)

Lecture—3 hours; discussion—1 hour. Christian, Barbarian, Moslem, and Classical traditions in European Art from the fourth through the sixteenth centuries. GE credit: ArtHum | AH, VL, WC.—W. (W.)

#### 1C. Baroque to Modern Art (4)

Lecture—3 hours; discussion—1 hour. Introduction to visual analysis through study of western art 1600-present, examining major artists and movements from Europe to North America. Study of the relationship of art and artists to political, religious, social change, and to changes in ideology, patronage, audience. May be repeated for credit. GE credit: ArtHum, Div | AH, VL, WC.—S. (S.) Strazdes

#### 1D. Arts of Asia (4)

Lecture—3 hours; discussion—1 hour. Introduction to major forms and trends in the arts, architecture, and material culture of Asia from the Neolithic to the contemporary emphasizing the visual manifestation of secular and religious ideas and ideals. Not open for credit to students who have completed course 1DV. GE credit: ArtHum, Div | AH, VL, WC.—Burnett

#### 1DY. Arts of Asia (5)

Web virtual lecture—2.5 hours; discussion—1 hour; lecture/discussion—1.5 hours. Introduction to major forms and trends in the arts and material culture of Asia from the Neolithic to the contemporary, emphasizing the visual manifestation of secular and religious ideas and ideals. Not open for credit to students who have completed course 1D. GE credit: ArtHum, Div | AH, VL, WC, WE.—Burnett

#### 1E. Islamic Art and Architecture (4)

Lecture—3 hours; discussion—1 hour. Introduction to the art and architecture of the Islamic world including the Middle East, Africa, Europe, and South Asia, from the 7th century CE to the 20th. Offered in alternate years. GE credit: ArtHum, Div | AH, VL, WC.—Watenpaugh

#### 5. Understanding Visual Culture (4)

Lecture/discussion—3 hours; discussion—1 hour. Development of visual literacy for an increasingly visual world; critical analyses focusing on the widest variety of visual imagery: the fine arts across media and eras of world culture, television, film, and advertising. Intended for a diverse spectrum of audiences. GE credit: ArtHum | AH, VL, WC.

#### 25. Understanding Architecture (4)

Lecture—3 hours; discussion—1 hour. Development of architecture and urban design; how form, space, order are conceived and used across eras and cultures. Examines the function and organization of space, technological problems of construction, visual qualities of architecture, and social issues connected to architecture. GE credit: ArtHum | AH, DD, VL, WC.—Watenpaugh

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Restricted to lower division students. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division

#### 100. Methods of Art History (4)

Extensive writing or discussion—3 hours; term paper. Prerequisite: prior completion of two upper-division Art History courses recommended. Methods of art historical research and analysis, and general issues in critical thought. Writing skills appropriate to a range of art-historical exposition. Offered irregularly. GE credit: ArtHum, Wrt | AH, VL.—Ruda

#### 110. Cultural History of Museums (4)

Lecture/discussion—3 hours; term paper. Evolution of museums in the western world from the "cabinet of curiosities" of sixteenth-century Europe to the modern "art center." The changing motives behind collecting, exhibiting, and interpretation of objects. Attention to museums' historical legacies and continuing philosophical dilemmas. Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WE.—Strazdes

#### 120A. Art, Architecture, and Human Rights (4)

Lecture/discussion—4 hours. Study of human rights as they relate to art, architecture, and cultural heritage. Examines museums, art collections, and cultural-heritage management, their relation to the cultural prerogatives of communities and indigenous groups, and protection of cultural heritage during war and conflict. (Same course as Human Rights 120A.) Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, DD, VL WC, WE.—Watenpaugh

#### 130. Landscape, Nature, and Art (4)

Lecture—3 hours; term paper. Interpretation of the natural world in the western world 1600-1900, with perspectives on the present; landscape painting, ideology of picturesque and sublime, landscape art and travel, reshaping the land as art; dialogues between art and science; nature as national identity. GE credit: ArtHum | AH, VL, WC, WE.

#### 148. Theory and Criticism: Painting & Sculpture (4)

Lecture—3 hours; term paper. Prerequisite: Art Studio 5 or 7 recommended. Study of forms and symbols in historic and contemporary masterpieces. (Same course as Art Studio 148.) Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WE.—Pardee

#### 150. Arts of Subsaharan Africa (4)

Lecture/discussion—3 hours; term paper. Traditional arts and crafts of subsaharan Africa from prehistoric times to the present; the relationships among art, nature, cycles of life, and religion; art as expression of power; sculpture and culture in West and Central Africa; Colonialism and collecting. Offered irregularly. GE credit: ArtHum, Div | AH, VL, WC.

#### 151. Arts of the Indians of the Americas (4)

Lecture/discussion—3 hours; term paper. Development of art in North America, emphasizing ancient Mexico. South American relationships and parallels. Recent and contemporary Indian arts and crafts from Alaska to Chile. Offered irregularly. GE credit: ArtHum, Div | AH, VL, WE.

#### 152. Arts of Oceania and Prehistoric Europe (4)

Lecture—3 hours; term paper. Traditional arts of aboriginal Australia, Melanesia, Polynesia, and Micronesia, as seen in their cultural contexts. Prehistoric art of Europe and the Near East. GE credit: ArtHum, Div | AH, VL, WC.

#### 154. The Hindu Temple (4)

Lecture—3 hours; term paper. Comparative history of architecture and symbolism of the Hindu Temple in India, Southeast Asia and the United States. Attention to the temple as expression of religious knowledge, political authority, and cultural heritage through the lens of colonialism and postcolonialism. (Same course as Religious Studies 154.) Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, VL, WC, WE.—Venkatesan

#### 155. The Islamic City (4)

Lecture—3 hours; term paper. Prerequisite: course 1E recommended. Introduction to the urban history of the Islamic world. Includes critical study of the historiography of the Islamic city, development of urban form, institutions and rituals, and analysis of selected themes. GE credit: ArtHum, Div, Wrt | AH, VL.—Watenpaugh

#### 156. Arts of the Islamic Book (4)

Lecture—3 hours; term paper. Prerequisite: prior completion of course 1E recommended. Critical study of the arts of the luxury book in the pre-modern Islamic world. Representation in Islam, the relationship of word and image, the discipline of calligraphy, aesthetics and representation in Persianate painting. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WC.—Watenpaugh

#### 163A. Chinese Art (4)

Lecture/discussion—4 hours. Thematic and chronological examination of 3000 years of Chinese art and culture from Neolithic through Tang Dynasty (10th c. CE). Study of ceremonial and secular objects manifesting folk beliefs and belief systems of ancestor worship, Buddhism, Daoism, and Confucianism. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Burnett

#### 163B. Chinese Painting (4)

Lecture/discussion—4 hours. Thematic and chronological examination of Chinese painting and culture from the Tang Dynasty (7th c. CE) through the early 20th century. Issues considered include political art (made to support or protest regimes), art and the market, art and individual expression. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Burnett

#### 163C. Early Modern Chinese Painting (4)

Lecture/discussion—4 hours. Topics in Chinese Art History, 13th-19th century. Study of issues pertaining to self and society; gender and gendering; religion and philosophy; political engagement and protest; economy and the market; the effects created by periods of transition on visual expression. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Burnett

#### 163D. Art from China 1900 to the Present (4)

Lecture/discussion—4 hours. Prerequisite: course 163B or consent of instructor. Forms of modern and avant-garde expression from China's industrialization to the 21st century. Interactions of art and politics, individual and state, art for the free market versus art for the state, expressions of modernity; China on the world stage. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Burnett

#### 164. The Arts of Japan (4)

Lecture/discussion—3 hours; term paper. Japan's painting, architecture, decorative arts, and print heritage, ancient times to the 20th century in literary, political, intellectual, and spiritual contexts; impact of Japanese art on the West and the West's transformative impact upon Japan's opening in the 19th century. GE credit: ArtHum, Div, Wrt | AH, VL, WC.

#### 168. Great Cities (4)

Lecture—3 hours; term paper. Transformation in architecture and urban form in Paris, London, and Vienna in the context of varying social, political, and economic systems as well as very different cultural traditions, concentrating on the years 1830-1914. Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WE.—Sadler

#### 172A. Early Greek Art and Architecture (4)

Lecture—3 hours; term paper. Examination of the origin and development of the major monuments of Greek art and architecture from the eighth century to the mid-fifth century B.C. (Same course as Classics 172A.) Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WE.—Roller

#### 172B. Later Greek Art and Architecture (4)

Lecture—3 hours; term paper. Study of the art and architecture of later Classical and Hellenistic Greece, from the mid-fifth century to the first century

B.C. (Same course as Classics 172B.) Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, —Roller

### **173. Roman Art and Architecture (4)**

Lecture—3 hours; term paper. Art and architecture of Rome and the Roman Empire, from the founding of Rome through the fourth century C.E. (Same course as Classics 173.) Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WE.—Roller

### **175. Architecture and Urbanism in Mediterranean Antiquity (4)**

Lecture—3 hours; extensive writing. Prerequisite: a lower division Classics course (except 30, 31); course 1A recommended. Architecture and urban development in the ancient Near East, Greece, and Rome. Special emphasis on the social structure of the ancient city as expressed in its architecture, and on the interaction between local traditions and the impact of Greco-Roman urbanism. (Same course as Classics 175.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Roller

### **176A. Art of the Middle Ages: Early Christian and Byzantine Art (4)**

Lecture—3 hours; term paper or gallery studies and review. Painting, sculpture and architecture of the early Christian era and Byzantine Empire: through the later Roman Empire in the West and to the final capture of Constantinople in the East. GE credit: ArtHum, Wrt | AH, VL, WC, WE.

### **176B. Art of the Middle Ages: Early Medieval and Romanesque Art (4)**

Lecture—3 hours; term paper or gallery studies and review. Painting, sculpture and architecture of western Europe in the early medieval era: from the rise of the barbarian kingdoms through the twelfth century. GE credit: ArtHum, Wrt | AH, VL, WC, WE.

### **176C. Art of the Middle Ages: Gothic (4)**

Lecture—3 hours; term paper or gallery studies and review. Painting, sculpture and architecture in northern Europe from the twelfth through the fifteenth centuries. GE credit: ArtHum | AH, VL, WC, WE.

### **177. Northern Renaissance Art (4)**

Lecture/discussion—3 hours; term paper. Artistic culture of Western and Central Europe c. 1350-1600. Topics include the development of “realism” in portraiture and landscape, prints and print culture, urbanism, science and the exotic, anti-religious artworks, religious attacks on art, contacts with Renaissance Italy. Offered irregularly. GE credit: ArtHum | AH, VL, WC, WE.

### **178B. Early Italian Renaissance Art and Architecture (4)**

Lecture—3 hours; term paper. Fifteenth-century artists, with a focus on Florence; Donatello and Masaccio through Botticelli, in their artistic, architectural, and cultural setting; the impact of Humanism and the rebirth of classical learning. GE credit: ArtHum, Wrt | AH, VL, WE.

### **178C. High and Late Italian Renaissance Art and Architecture (4)**

Lecture—3 hours; term paper. High Renaissance and Mannerism in 16th-century Italy: Leonardo, Michelangelo, Raphael, and Titian in their artistic and cultural settings—Florence, Rome, and Venice; the architecture of Bramante, Michelangelo, and Palladio. GE credit: ArtHum, Wrt | AH, VL, WE.

### **179B. Baroque Art (4)**

Lecture—3 hours; term paper. Seventeenth-century painting, sculpture and graphic arts, including such artists as Caravaggio, Rubens, Rembrandt, and Velázquez in their political and social context. GE credit: ArtHum, Wrt | AH, VL, WE.

### **182. British Art and Culture, 1750–1900 (4)**

Lecture—3 hours; term paper. British painting in relation to the position of women in society and the rise of the middle-class art market. Topics include Hogarth and popular culture, Queen Victoria and the female gaze, and Pre-Raphaelite artists and collectors. GE credit: ArtHum, Wrt | AH, VL, WC, WE.

### **183A. Art in the Age of Revolution, 1750–1850 (4)**

Lecture—3 hours; term paper. Prerequisite: prior completion of course 1C recommended. Emergence of modernism in Europe from the late 18th century to the middle of the 19th century. Major artistic events viewed against a revolutionary backdrop of changing attitudes toward identity, race, and gender. GE credit: ArtHum | AH, VL, WE.—Strazdes

### **183B. Impressionism and Post-Impressionism: Manet to 1900 (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1C recommended. Innovations of Impressionists, Post-Impressionists, and Symbolists in relation to social changes. Assessment of role of dealers and critics, myth of the artist-genius, and gender relations in French art and culture of the late 1800s. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.

### **183C. Modernism in France, 1880–1940 (4)**

Lecture—3 hours; term paper. Development of modern art in France, its social context, and its transnational aspects. Post-Impressionism, Fauvism, Cubism, Expressionism, and Surrealism are considered in relation to secessionist movements, the formation of other artistic groups, new forms of patronage, and new audiences. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.

### **184. Twentieth Century Architecture (4)**

Lecture—3 hours; term paper. Prerequisite: prior completion of course 25 recommended. Major movements in architecture of the twentieth century in Europe and America. Formal innovations are examined within the social, political, and economic circumstances in which they emerged. GE credit: ArtHum, Wrt | AH, VL, WE.—Sadler

### **185. Avant-Gardism and its Aftermath, 1917–1960 (4)**

Lecture/discussion—4 hours. Social, cultural, aesthetic, and theoretical development for artists and their audiences in the context of larger issues like the Mexican, Russian and German revolutions, WWI, the Depression, WWII, etc., and a critical-theoretical inquiry into questions of modernism, modernity, and avant-gardism. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WC.—Stimson

### **186. Contemporary Art 1960–Present (4)**

Lecture/discussion—4 hours; term paper. Development of new media and aesthetics in the context of such cultural and political phenomena as the New Left, feminism, and globalization; investigation of the critical-theoretical questions of neo avant-gardism, postmodernism, and postmodernity. GE credit: ArtHum, Div, Wrt | ACGH, AH, VL, WE.

### **187. Contemporary Architecture (4)**

Lecture—3 hours; term paper. Prerequisite: prior completion of course 25 and/or course 184 recommended. Introduction to world architecture and urban design since circa 1966. Relation of influential styles, buildings, and architects to postmodern debates and to cultural, economic, technological and environmental change. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WE.

### **188A. The American Home (4)**

Lecture/discussion—4 hours; term paper. American domestic architecture and its responsiveness to changes in daily life from Colonial times to the 1960s. Vernacular developments, effects of different socioeconomic conditions, and women's role in shaping the home receive special attention. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, VL, WE.—Strazdes

### **188B. Architecture of the United States (4)**

Lecture/discussion—3 hours; term paper. Major movements from colonial times to the present. The role of buildings in a changing American society, the interplay of styles with technologies of construction, relationship between American and European developments and evolution of the architectural and planning professions. GE credit: ArtHum, Wrt | ACGH, AH, VL, WE.—Cogdell, Strazdes

### **188C. American Art to 1910 (4)**

Lecture/discussion—4 hours; term paper. Major movements in American art from the 17th-century English speaking colonies to the onset of World War I. Offered in alternate years. GE credit: ArtHum | ACGH, AH, VL, WE.—Strazdes

### **189. Photography in History (4)**

Lecture/discussion—4 hours. Social, cultural, aesthetic and technical developments in the history of photography including patronage and reception, commercial, scientific, political and artistic applications, and a critical-theoretical inquiry into photography's impact on the social category “art” and the history of subjectivity. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL.

### **190A. Undergraduate Seminar in Art History: Mediterranean Antiquity (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, OL, VL, WE.—Roller

### **190B. Undergraduate Seminar in Art History: Medieval (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, OL, VL, WE.

### **190C. Undergraduate Seminar in Art History: Renaissance (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, OL, VL, WE.

### **190D. Undergraduate Seminar in Art History (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, OL, VL, WE.—Strazdes

### **190E. Undergraduate Seminar in Art History: Gendering of Culture (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, OL, VL, WE.

### **190F. Undergraduate Seminar in Art History: Chinese (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, OL, VL, WE.—Burnett

**190G. Undergraduate Seminar in Art History: Japanese (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, OL, VL, WE.

**190H. Undergraduate Seminar in Art History: Modern-Contemporary (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, OL, VL, WE.

**190I. Undergraduate Seminar in Art History: 17th-18th Century (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, OL, VL, WE.

**190J. Undergraduate Seminar in Art History: Islamic (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, OL, VL, WE.—Watenpaugh

**190K. Undergraduate Seminar in Art History: 19th Century (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. GE credit: ArtHum | AH, OL, VL, WE.

**190L. Undergraduate Seminar in Art History: Architecture & Heritage (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. GE credit: ArtHum | AH, OL, VL, WE.

**192. Internship (2-12)**

Internship—term paper or catalogue. Supervised program of internships at professional art institutions such as museums, galleries, and art archives including collections of slides and photographs. May be repeated one time for credit. (P/NP grading only.)

**194H. Special Study for Honor Students (4)**  
Independent study—12 hours. Prerequisite: course 190 or the equivalent, as determined by the major adviser. Open only to students in the Art History Honors Program. Independent study of an art historical problem culminating in the writing of an honors thesis under the supervision of a faculty guidance committee.

**198. Directed Group Study (1-5)**

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate****200A. Visual Theory and Interpretive Methods (4)**

Discussion—3 hours; extensive writing. Close study of selected recent developments in interpretive methodology used by art historians and other analysts of visual culture and the place of those developments within art history's history and in the larger field of social, cultural and historical analysis. May be repeated one time for credit. —Roller, Watenpaugh

**200B. Research and Writing Methods in Art History (4)**

Discussion—3 hours; term paper. Restricted to graduate students in art history. Development of the research, writing, and editing skills necessary for producing publishable work. Focus on reference tools used by art historians and the mechanics of scholarship, from question framing and organization of ideas to writing clear, effective prose. —Burnett, Strazdes

**200C. Thesis Writing Colloquium (1)**

Discussion—1.5 hour; autotutorial. Prerequisite: course 200B, taken by all Art History M.A. students in their first year. Restricted to graduate students in Art History. Meeting concurrently with course 200B, the colloquium provides a structured, supportive environment for second-year Art History graduate students drafting masters' theses. Offers a forum for technical discussions, discussion of writing/editing procedures, and peer review of writing in progress. (S/U grading only.) —Burnett, Strazdes

**210. Museums, Art Exhibitions and Culture (4)**

Seminar—3 hours; extensive writing or discussion; term paper. Prerequisite: graduate status in art history or an allied field. Class size limited to 20 students. Issues accompanying the evolution and function of museums from cabinets of curiosities in sixteenth-century Europe to modern art centers. Examination of divergent motives behind collecting, exhibiting, and interpretation of objects. Investigation of museums' historical legacies and continuing philosophical dilemmas. Offered in alternate years. GE credit: ArtHum, Wrt.—Strazdes

**250. Problems in Art Historical Research (4)**

Seminar—3 hours; term paper. Major topics in art historical research, emphasizing special methods of investigation, and of historical and critical analysis. May be repeated for credit.

**254. Seminar in Classical Art (4)**

Seminar—3 hours; term paper. Selected areas of special study in classical art of the Greek and Roman tradition. Course may be repeated for credit with consent of instructor. —Roller

**263. Seminar in Chinese Art (4)**

Seminar—3 hours; term paper. Selected areas of special study in Chinese Art. May be repeated for credit with consent of instructor. —Burnett

**276. Seminar in Medieval Art (4)**

Seminar—3 hours; term paper. Selected areas of special study in medieval art from Early Christian to late Gothic. May be repeated for credit with consent of instructor.

**278. Seminar in Italian Renaissance Art (4)**

Seminar—3 hours; term paper. Selected areas of special study in Italian art from the fourteenth to the sixteenth century. May be repeated for credit with consent of instructor. Offered in alternate years.

**283. Seminar in Visual Culture and Gender (4)**

Seminar—3 hours; term paper. Selected areas of special study in the relationship between visual culture and gender in Europe and America from 1750 to present. May be repeated for credit with consent of instructor. Offered in alternate years.

**288. Seminar in European and American Architecture (4)**

Seminar—3 hours; term paper. Exploration of selected topics in European and American architectural history with concentration on the Modern Period. May be repeated for credit with consent of instructor. —Cogdell, Sadler, Strazdes

**290. Special Topics in Art History (4)**

Seminar—3 hours; term paper. Special research seminar in the theory or methods of Art History, or in a period of Art History. Topic will vary depending on the interests of the instructor or students. May be repeated for credit when topic differs and with consent of instructor. Offered irregularly.

**292. Internship (1-4)**

Internship—3-12 hours. Prerequisite: graduate student; consent of instructor. Restricted to graduate students in Art History only. Supervised internship at professional art or cultural institution including museums, galleries, archives, government offices, visual resources libraries, etc. May be repeated up to eight units for credit. Offered irregularly. (S/U grading only.)

**298. Directed Group Study (1-5)**

(S/U grading only.)

**299. Individual Study (1-6)**

(S/U grading only.)

**Professional**

Note: Various of the below courses are not offered each year.

**390. Introduction to Teaching Art History for Teaching Assistants (1)**

Discussion—1 hour. Designed for teaching assistants with emphasis on problems and procedures encountered by teachers of undergraduate art history. (S/U grading only.)

**396. Teaching Assistant Training Practicum (4)**

Seminar—2 hours; Practice—10 hours. Prerequisite: graduate standing. Principles and techniques of the effective teaching of undergraduate courses in the history of art. May be repeated for credit as often as the student is awarded a TA-ship. (S/U grading only.)

**Professional****401. Museum Training: Curatorial Principles (4)**

Seminar—3 hours. Approved for graduate degree credit. Study of private and public collections. Museum personalities. Appraisal of works of art; ethics of appraisal. Auction and sales: methods and catalogues. Registration. Technical problems of the museum. Connoisseurship. Collateral reading. Visits to museums. Seminar with assigned papers. —W.

**402. Museum Training: Exhibition Methods (4)**

Seminar—3 hours; exhibition. Approved for graduate degree credit. History of exhibition methods in private and public collections. Comparisons of different types of museums and their exhibition problems. Lighting and techniques of display with emphasis on actual design. Experimentation with unusual presentation forms.

**Faculty**

Tom Bills, M.F.A., Professor  
Robin Hill, B.F.A., Professor  
Darrin Martin, M.F.A., Associate Professor  
Hearne Pardee, M.F.A., Professor  
Lucy Puls, M.F.A., Professor

Annabeth Rosen, M.F.A., Professor  
 Youngsuk Suh, M.F.A., Assistant Professor  
 Gina Werfel, M.F.A., Professor

## Emeriti Faculty

Conrad Atkinson, R.A.S. (Honors), Professor Emeritus  
 William Henderson, M.F.A., Professor Emeritus  
 Lynn Hershman, M.A., Professor Emerita  
 Harvey Himelebar, M.A., Professor Emeritus  
*Academic Senate Distinguished Teaching Award*  
 David Hollowell, M.F.A., Professor Emeritus  
 Malaquias Montoya, B.F.A., Professor Emeritus  
 Maunel Neri, Professor Emeritus  
 Roland C. Petersen, M.A., Professor Emeritus  
 Cornelia Schulz, M.F.A., Professor Emerita  
*Academic Senate Distinguished Teaching Award*  
 Wayne Thiebaud, M.A., hon. D.F.A. (C.C.A.C., D.C.) Professor Emeritus, UC Davis Prize for Teaching and Scholarly Achievement

## The Major Program

The Studio Art Major provides the studio experience necessary for a broad understanding of the practice and interpretation of the visual arts.

**The Program.** The Art Studio program is designed to deliver a broad range of hands-on studio practices to the art major. Areas of focus include painting, sculpture, drawing, photography, ceramics, printmaking, and time-based media. Course choices/sequences are determined by the student according to major distribution requirements. Students are encouraged to explore a broad range of disciplines and are expected to take advantage of beginning classes which provide a critical introduction to the research possibilities within the major, across disciplines. In addition to studio classes, students are encouraged to participate in a distinguished visiting artist lecture series, professional practice seminars, student exhibitions/competitions, internships, and benefit from exposure to cultural events and exhibitions in Davis, Sacramento, and the Greater Bay Area.

**Portfolios.** While portfolios are not required for admission to the art major, students at all levels are expected to maintain current portfolios of completed work in order to qualify and compete for the numerous internships, fellowships, grants, awards, and exhibitions the program has to offer, as well as to better prepare for the rigors of graduate school and/or an independent studio practice.

**Career Options.** Graduates of the Studio Art Program attend prestigious post-baccalaureate and graduate programs in studio art. Alumni often go on to develop professional studio practices. Commitment to the development of one's studio work leads to exhibition opportunities as well as accomplishments in the realm of fellowships, commissions, collaborations, and a host of other professional projects and opportunities. For the student wishing to explore additional arts-related trajectories, in the private or public sector, a studio arts education provides a strong foundation for careers and/or graduate work in K-12 art education, art therapy, arts administration, curatorial studies, set design, architecture, culinary arts, design, film, animation, art criticism/journalism among others.

## A.B. Major Requirements:

	UNITS
<b>Preparatory Subject Matter.....</b>	<b>24</b>
Four courses chosen from: Art Studio 2, 5, 7, 8, 9, 11, 12.....	16
Two lecture courses chosen from: Art Studio 24, 30, or Art History 1A, 1B, 1C, 1D, 1DV, 1E, 5, 10, 25 .....	8
<b>Depth Subject Matter .....</b>	<b>44</b>
36 upper division units in Art Studio.....	36
Any two upper division theory or history courses from: Art History, Cinema and Technocultural Studies, Design, Music or Theatre and Dance .....	8

## Total Units for the Major .....68

**Major Advisers.** Information on the current Academic Advisers can be obtained by contacting the Art Department Main Office at 530-752-0105 or at <http://art.ucdavis.edu>.

## Minor Program Requirements:

	UNITS
<b>Art Studio .....</b>	<b>20</b>

Prerequisite courses must be taken prior to enrollment in upper division courses. Independent study courses are not applicable.

Upper division art studio courses in two of the following areas: ..... 20  
 Area 1 (Painting, Drawing, Printmaking)  
 Area 2 (Sculpture and Ceramic Sculpture)  
 Area 3 (Photography and Video)  
 Note: One lower division substitute course permissible

## Teaching Credential Subject Representative.

See the Teacher Education program.

**Graduate Study.** The Department of Art offers programs of study and research leading to the M.F.A. degree in the practice of art. For more information contact the Graduate Staff Adviser at 530-752-8710 or at <http://art.ucdavis.edu>.

## Courses in Art Studio (ART)

### Lower Division

#### 2. Beginning Drawing (4)

Studio—6 hours. Introduction to drawing using various black and white media to articulate forms and organize space, with reference to historical and contemporary works. GE credit: ArtHum | AH, VL.—F, W, S, Su. (F, W, S, Su.) Pardee, Puls, Werfel

#### 5. Beginning Sculpture (4)

Studio—6 hours. Basic sculpture techniques using a variety of media. Form in space using cardboard, plaster, and/or cement, wood and/or metal and other media. GE credit: ArtHum | AH, VL.—F, W, S, (F, W, S, J) Bills, Hill, Puls

#### 7. Beginning Painting (4)

Studio—6 hours. Introduction to techniques and concepts in the practice of painting. GE credit: AH, VL.—F, W, S, (F, W, S, J) Pardee, Werfel

#### 8. Beginning Ceramic Sculpture (4)

Studio—6 hours. Introduction to ceramic sculpture construction and processes. Large scale hand-building, glazing, kilns and kiln firing technology. GE credit: ArtHum | AH, VL.—Rosen

#### 9. Beginning Photography (4)

Studio—6 hours. Introduction to the fundamental technical, aesthetic, and formal aspects of photography. Camera skills, film developing and printing in the black and white darkroom. GE credit: ArtHum | AH, VL.—Suh

#### 10. Introduction to Art Appreciation (3)

Lecture—3 hours. The understanding and appreciation of painting, sculpture, architecture and industrial art. Illustrated lectures. Intended for non-majors. GE credit: ArtHum | AH, VL.

#### 11. Beginning Printmaking (4)

Studio—6 hours. Introduction to printmaking techniques such as monography, relief, and intaglio. Investigation of personal imagery through use of these techniques. GE credit: ArtHum | AH, VL.

#### 12. Beginning Video (4)

Studio—6 hours. Production techniques of video shooting, editing, lighting, sound and effects. A conceptual framework for video-art techniques. GE credit: ArtHum | AH, VL.—Martin

#### 24. Introduction to Experimental Video and Film (4)

Lecture—3 hours; discussion—1 hour; term paper. Evolution of moving image technologies. Shifts within avant-garde artistic practices. Conceptual and historical differences between film and video. Offered in alternate years. GE credit: ArtHum | AH, VL, WE.—(F,) Martin

## 30. Introduction to Contemporary Visual Culture (4)

Lecture—3 hours; discussion/laboratory—1 hour. Establishing visual literacy across the media of fine art, photography, advertising, television and film; media culture; focus on critical decoding of contemporary visual culture. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL.—F, W, (F, W,) Pardee

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Restricted to lower division students. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division

Pre-enrollment in upper division courses is restricted to art majors.

#### 101. Intermediate Painting (4)

Studio—6 hours. Prerequisite: courses 2, 7. Individualized projects exploring color and space in a variety of subject matter and approaches. Builds on basic skills and concepts from beginning drawing and painting courses. Study of historical and contemporary art in relation to studio practice. May be repeated one time for credit when topic differs. GE credit: ArtHum | AH, VL.—F, W, S, (F, W, S,) Pardee, Werfel

#### 102A. Advanced Painting: Studio Projects (4)

Studio—6 hours. Prerequisite: course 101. Pass One restricted to Art Studio majors. Sustained development of painting for advanced students. Approaches will vary according to the instructor. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Pardee, Werfel

#### 102B. Advanced Painting: Figure (4)

Studio—6 hours. Prerequisite: course 101. Pass One restricted Art Studio majors. Advanced painting using the human figure as subject. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Pardee, Werfel

#### 102C. Advanced Painting: Special Topics (4)

Studio—6 hours. Prerequisite: courses 2, 7, 101; course 102A or 102B. Pass One restricted to Art Studio majors. Special topics in painting for upper division students. Emphasis on development of a personal practice of painting informed by awareness of contemporary issues in painting and their historical background. Topics will vary with instructor. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Pardee, Werfel

#### 103A. Intermediate Drawing: Black and White (4)

Studio—6 hours. Prerequisite: courses 2. Pass One restricted to Art Studio majors. Advanced study of drawing composition using black and white media. GE credit: ArtHum | AH, VL.—Pardee, Werfel

#### 103B. Intermediate Drawing: Color (4)

Studio—6 hours. Prerequisite: courses 2. Pass One restricted to Art Studio majors. Study of drawing composition in color media. GE credit: ArtHum | AH, VL.—Pardee, Werfel

#### 105A. Advanced Drawing: Studio Projects (4)

Studio—6 hours. Prerequisite: courses 2; course 103A or 103B. Pass One restricted to Art Studio majors. Exploration of composition and process in drawing. Emphasis on the role of drawing in contemporary art and on drawing as an interdisciplinary practice. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Pardee, Werfel

#### 105B. Advanced Drawing: Figure (4)

Studio—6 hours. Prerequisite: courses 4; course 103A or 103B. Pass One restricted to Art Studio majors. Study of the figure through drawing of the model. Exploration of different methods and process of figure-drawing. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Pardee, Werfel

**110A. Intermediate Photography: Black and White Analog (4)**

Studio—6 hours. Prerequisite: course 9. Pass One restricted to Art Studio majors. Introduction to 35mm and medium format camera. Development of personal aesthetic and portfolio of black and white prints. GE credit: ArtHum | AH, VL.—Suh

**110B. Intermediate Photography: Digital Imaging (4)**

Studio—6 hours. Prerequisite: course 9. Pass One restricted to Art Studio majors. Comprehensive introduction to all elements of digital photography, including scanning, imaging software and printing. GE credit: ArtHum | AH, VL.—Suh

**111A. Advanced Photography: Special Topics (4)**

Studio—6 hours. Prerequisite: courses 9 and 110A. Pass One restricted to Art Studio majors. Special topics related to photography and contemporary art practice. Multiple projects in a variety of approaches. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, VL.—Suh

**111B. Advanced Photography: Digital Imaging (4)**

Studio—6 hours. Prerequisite: course 9 and 110B. Pass One restricted to Art Studio majors. In-depth exploration of digital photography, including refined digital imaging techniques. Theoretical issues involved in digital media. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Suh

**112. Sound for Vision (4)**

Studio—6 hours. Prerequisite: course 12 or Technocultural Studies 100. Pass One restricted to Art Studio majors. Sound composition and development of an audio databank. Study of repetition and phase shifts. Creation of descriptive acoustic space recordings in combination with other artistic media. Audio as stand alone or accompaniment. May be repeated for credit one time. GE credit: ArtHum | AH.—Martin

**113. Interdisciplinarity Art (4)**

Studio—6 hours. Prerequisite: Upper division standing in Art Studio, Theater and Dance, Design, Technocultural Studies, or Music. Experimental interdisciplinary strategies. Use of various media in creation of collaborative or independent works. Production of participatory audio-visual works, installations, or two dimensional explorations. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Hill, Martin, Puls, Suh

**114A. Intermediate Video: Animation (4)**

Studio—6 hours. Prerequisite: course 12 or Technocultural Studies 100; one drawing course. Pass One restricted to Art Studio majors. Exploration of animation. Relationship between drawing, digital stills, and multiple images. Animation using traditional drawing techniques, collage, and digital processes. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Martin

**114B. Intermediate Video: Experimental Documentary (4)**

Studio—6 hours. Prerequisite: course 12 or Technocultural Studies 100. Pass One restricted to Art Studio majors. Experimental documentary practice. Use of interviews, voice-overs, and still and moving images. Production of alternative conceptual and visual projects. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Martin

**114C. Intermediate Video: Performance Strategies (4)**

Studio—6 hours. Prerequisite: course 12 or Technocultural Studies 100. Pass One restricted to Art Studio majors. Use of video to expand performance art production. Exploration of improvisation, direction, projection, and image processing in real time. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Martin

**117. Advanced Video and Electronic Arts (4)**

Studio—6 hours. Prerequisite: course 12 or Technocultural Studies 100; one of the following: course 112, 114A, 114B, or 114C; upper division stand-

ing Art Studio majors. Pass One restricted to Art Studio majors. Independently driven video, digital, and/or performance projects. Further development in the electronic arts ranging from video installation to performance. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Martin

**121. Reinterpreting Landscape (4)**

Studio—6 hours. Prerequisite: courses 2, 7. Pass One restricted to Art Studio majors. Interpretation of landscape through painting, drawing, and related media. Emphasis on the integration of historical, cultural, natural, and artistic contexts. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Pardee, Werfel

**125A. Intermediate Printmaking: Relief (4)**

Studio—6 hours. Prerequisite: course 11. Pass One restricted to Art Studio majors. Woodcut linocut, metal-plate, relief, and experimental uses of other materials for printmaking. Additive and reductive relief techniques. May be repeated for credit one time. GE credit: ArtHum | AH, VL.

**125B. Intermediate Printmaking: Intaglio (4)**

Studio—6 hours. Prerequisite: course 11. Pass One restricted to Art Studio majors. Metal plate etching, aquatint, hard and soft ground, burin engraving and related printmaking techniques. May be repeated for credit one time. GE credit: ArtHum | AH, VL.

**125C. Intermediate Printmaking: Lithography (4)**

Studio—6 hours. Prerequisite: course 11. Pass One restricted to Art Studio majors. Stone and metal-plate lithography and other planographic printmaking methods. Exploration of the basic chemistry and printing procedure inherent in stone lithography. May be repeated for credit one time. GE credit: ArtHum | AH, VL.

**125D. Intermediate Printmaking: Serigraphy (4)**

Studio—6 hours. Prerequisite: course 11. Pass One restricted to Art Studio majors. Printmaking techniques in silk screen and related stencil methods. Development of visual imagery using the language of printmaking. May be repeated for credit one time. GE credit: ArtHum | AH, VL.

**129. Advanced Printmaking (4)**

Studio—6 hours. Prerequisite: completion of two of 125A, 125B, 125C, or 125D. Pass One restricted to Art Studio majors. Development of intermedia printmaking. Advanced modes in print technologies: relief, serigraphy, intaglio, surface, as well as addition of digitized imagery. Production of prints using multi-plate prints and other methods. May be repeated for credit two times. GE credit: ArtHum | AH, VL.

**138. The Artist's Book (4)**

Studio—6 hours. Prerequisite: completion of three upper division Art Studio courses. Pass One restricted to Art Studio majors. Creation of an artist's book in an edition of three. Use of a variety of media. May be repeated for credit one time. Offered in alternate years. GE credit: ArtHum | AH, VL.—Hill, Suh

**142A. Intermediate Ceramic Sculpture: Industrial Production Methods (4)**

Studio—6 hours. Prerequisite: course 8. Pass One restricted to Art Studio majors. Ceramic sculpture creation using two forms of industrial processes: plaster mold design, fabrication and casting; and extrusion with dies, including die fabrication. May be repeated one time for credit. GE credit: ArtHum | AH, VL.—Rosen

**142B. Intermediate Ceramic Sculpture: Material Study (4)**

Studio—6 hours. Prerequisite: course 8. Pass One restricted to Art Studio majors. Study of ceramic materials and processes. Areas studied include clay and clay bodies; glaze materials through temperature, color and texture; history and technology of kilns and kiln firing. Examination of material proper-

ties and characteristics through experimentation. May be repeated one time for credit. GE credit: ArtHum | AH, VL.—Rosen

**142C. Intermediate Ceramic Sculpture: Special Topics (4)**

Studio—6 hours. Prerequisite: course 8. Pass One restricted to Art Studio majors. Exploration of the ceramic surface for creative expression. Use of glazing techniques including china paint, decals, luster, and silkscreen with underglaze and overglaze as well as the use of common materials such as epoxy, paint, oil and wax. May be repeated two times for credit. GE credit: ArtHum | AH, VL.—Rosen

**143B. Advanced Ceramic Sculpture: Issues in Contemporary Ceramics (4)**

Studio—6 hours. Prerequisite: course 8; 142A or 142B. Pass One restricted to Art Studio majors. Individual studio work in conjunction with readings, field trips, critiques and writing about contemporary ceramic art. May be repeated for credit two times. GE credit: ArtHum | AH, VL.—Rosen

**147. Theory and Criticism of Photography (4)**

Lecture—3 hours; term paper. Prerequisite: course 9. Development of camera vision, ideas, and aesthetics and their relationship to the fine arts from 1839 to the present. Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL.—Suh

**148. Theory and Criticism: Painting and Sculpture (4)**

Lecture—3 hours; term paper. Prerequisite: course 5 or 7 recommended. Study of forms and symbols in historic and contemporary masterpieces. (Same course as Art History 148.) Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WE.—Pardee

**149. Introduction to Critical Theory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: two of Art History 1B, 1C, or 183F. An overview of 20th century critical theories of culture and their relation to visual art and mass media culture. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL.

**150. Theory and Criticism of Electronic Media (4)**

Lecture—3 hours; term paper. Prerequisite: course 24 recommended. Study of electronic media, focusing on critique, application, and relationship to art practice. Analysis of the conceptual basis of electronic media as an artistic mode of expression. Offered in alternate years. GE credit: ArtHum, Wrt | AH.—Martin

**151. Intermediate Sculpture (4)**

Studio—6 hours. Prerequisite: course 5. Individualized explorations through multiple projects in a variety of sculpture media and techniques. Builds upon technical skills and concepts covered in course 5. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, VL.—F, W, S. (F, W, S.) Bills, Hill, Puls

**152A. Advanced Sculpture: Studio Projects (4)**

Studio—6 hours. Prerequisite: course 5; 151. Pass One restricted to Art Studio majors. Sculpture for advanced students. Emphasis on concept, idea development and honing technical skills. Approaches and projects will vary according to the instructor. May be repeated for credit one time when topic differs. GE credit: ArtHum | AH, VL.—Bills, Hill, Puls

**152B. Advanced Sculpture: Material Explorations (4)**

Studio—6 hours. Prerequisite: course 5; 151. Pass One restricted to Art Studio majors. Primary application and exploration of a single sculpture material chosen by the student. Examination of its properties, qualities, and characteristics for three-dimensional expression. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Puls

**152C. Advanced Sculpture: Concepts (4)**

Studio—6 hours. Prerequisite: course 5; 151. Pass One restricted to Art Studio majors. Investigation of a specific idea chosen by the class. Relationship of idea to form and content. Individual development of conceptual awareness. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Puls

**152D. Advanced Sculpture: Metals (4)**

Studio—6 hours. Prerequisite: course 5; 151. Pass One restricted to Art Studio majors. Technical aspects of the use of metals in contemporary art practice. Projects assigned to demonstrate the evolution of concepts and processes. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Bills

**152E. Advanced Sculpture: Site Specific Public Sculpture (4)**

Studio—6 hours. Prerequisite: course 5; 151. Pass One restricted to Art Studio majors. Place and site specificity in contemporary sculpture. Individual and group work to conceive and fabricate sculpture in a public space. May be repeated for credit one time. GE credit: ArtHum | AH, VL.—Hill

**152F. Advanced Sculpture: Figure (4)**

Studio—6 hours. Prerequisite: course 5; 151. Pass One restricted to Art Studio majors. Exploration of historical and contemporary approaches to the body in three-dimensions. Projects based on observational and conceptual strategies. Variety of media and techniques, including clay, wax, plaster, plastics, found objects, and others. May be repeated for credit one time. GE credit: ArtHum | AH, VL.

**152G. Advanced Sculpture: The Miniature and Gigantic (4)**

Studio—6 hours. Prerequisite: course 5; 151. Pass One restricted to Art Studio majors. Exploration of scale, from the very small to the very large in a series of projects in a variety of media. Tools and techniques of enlargement and miniaturization. May be repeated for credit one time. GE credit: ArtHum | AH, VL.

**171. Mexican and Chicano Mural Workshop (4)**

Studio—8 hours; independent study—1 hour. Prerequisite: Chicana/o Studies 70; consent or instructor. The Mural: a collective art process that empowers students and people through design and execution of mural paintings in the tradition of the Mexican Mural Movement; introduces materials and techniques. May be repeated one time for credit. (Same course as Chicana/o Studies 171.) GE credit: ArtHum | AH, VL.—S. (S.)

**190. Seminar in Art Practice (4)**

Studio—6 hours. Prerequisite: upper division standing Art Studio major. Pass One restricted to Art Studio majors. Introduction to professional practices. Development of an artist's packet including a resume, cover letter, artist statement, and statement of purpose. Ongoing independent studio work with group critiques. Research on galleries and museums, and readings in contemporary theory and criticism. GE credit: ArtHum | AH, VL, WE.—F, W, S. (F, W, S.) Hill, Puls, Rosen, Werfel

**192. Internship (2-12)**

Internship. Supervised program of internships in artists' studios and at professional art institutions such as museums, galleries, and art archives including collections of slides and photographs. May be repeated for credit for a total of 12 units. (P/NP grading only.)

**195. Expanded Field: Artist Lecture Series (1)**

Lecture/discussion—3 hours. Prerequisite: consent of instructor. Exploration of the expanded field of practice, theory and criticism in the visual arts. Presentations and discussions with professional practitioners in the field. May be repeated up to 12 units for credit when topic differs. (P/NP grading only.)—F, W, S. (F, W, S.) Hill

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate****290. Seminar (4)**

Seminar—3 hours. Original works produced for group discussion and criticism; associated topics of a contemporary and historical nature. May be repeated for credit.—F, W, S. (F, W, S.)

**291. Seminar: Critical Evaluation (1)**

Seminar—1 hour. May be repeated for credit. (S/U grading only.)—W. (W.)

**292. Seminar: Comprehensive Qualifying (1)**

Seminar—1 hour. Further critical evaluation of the student's work to determine his eligibility to begin the Comprehensive Project. May be repeated for credit. (S/U grading only.)—(F.)

**299. Individual Study (1-6)**

(S/U grading only.)

**299D. Comprehensive Project (9)**

An original body of work accompanied by a catalog summarizing the student's aesthetic position. May be repeated for credit. (S/U grading only.)—S. (S.)

**Professional**

Note: Various of the below courses are not offered each year.

**401. Museum Training: Curatorial Principles (4)**

Seminar—3 hours; papers. Approved for graduate degree credit. Study of private and public collections. Museum personalities. Appraisal of works of art; ethics of appraisal. Auction and sales: methods and catalogues. Registration. Technical problems of the museum. Connoisseurship. Collateral reading. Visits to museums. Offered in alternate years.

**402. Museum Training: Exhibition Methods (4)**

Seminar—3 hours; exhibition. Approved for graduate degree credit. History of exhibition methods in private and public collections. Comparisons of different types of museums and their exhibition problems. Lighting and techniques of display with emphasis on actual design. Experimentation with unusual presentation forms. Offered in alternate years.

## Asian American Studies

(College of Letters and Science)

Richard S. Kim, Ph.D., Chairperson of the Department

**Program Office.** 3102 Hart Hall  
530-752-2069; <http://asa.ucdavis.edu>

**Faculty**

Darrell Y. Hamamoto, Ph.D., Professor  
Wendy Ho, Ph.D., Senior Lecturer  
Richard S. Kim, Ph.D., Associate Professor  
Sunaina Maira, Ed.D., Professor  
Susette Min, Ph.D., Associate Professor  
Robyn Rodriguez, Ph.D., Associate Professor  
Caroline Kieu Linh Valverde, Ph.D., Associate Professor  
Nolan Zane, Ph.D., Professor

**Emeriti Faculty**

Isao Fujimoto, Ph.D., Senior Lecturer Emeritus  
Bill Ong Hing, J.D., Professor Emeritus  
Stanley Sue, Ph.D., Professor Emeritus

**The Major Program**

The Asian American Studies Program offers an interdisciplinary major that examines the experiences of various Asian American groups in the United States. Pertinent to these experiences are the historical, cul-

tural, legal, political, social-psychological, class, racial, and gender contexts for Asian Americans.

**The Program.** Majors take a prescribed set of lower division and upper division courses in Asian American Studies. These courses offer diverse theoretical and methodological tools to develop and encourage student critical thinking, creativity, initiative, and independent research about a complex, multiethnic and racialized society in the United States and in a global world.

**Career Alternatives.** Asian American Studies prepares students for a variety of careers. Given the multicultural nature of society and the increasing relations with different societies, many occupations seek individuals with background and expertise in ethnic relations and cultural issues. Graduates often enter the fields of teaching, research, government service, law, social services, etc., as well as graduate schools for advanced degrees in various disciplines.

**A.B. Major Requirements:**

UNITS

**Preparatory Subject Matter .....** 32

Asian American Studies 1, 2, 3, and 4 .....	16
--	----

At least two lower division courses from the following departments or programs:

At least two lower division courses from the following departments or programs: African American and African Studies (AAS), American Studies (AMS), Chicana/o Studies (CHI), Middle East and South Asia Studies (ME/SA), Native American Studies (NAS), Women and Gender Studies (WGS) (all lower division courses of at least 4 units are acceptable except those numbered 92, 97T, 98, and 99) .....	8
--	---

Methodology .....

At least two courses from any of the following methods courses:

African American and African Studies 101; American Studies 100; Anthropology 13; Art History 5, 100 Art Studio 10, 30; Chicana/o Studies 23; English 42, 110A, 110B; History 101; Human Development 120; Native American Studies 46; Philosophy 5; Political Science 51; Psychology 41; Sociology 46A, 46B; Statistics 13; Women and Gender Studies 104.	
--	--

**Depth Subject Matter .....** 36

Asian American Studies 192 Community Internship (required) .....	4
--	---

**Major Emphasis**

As part of the depth subject matter requirement, all Asian American Studies majors must develop a major emphasis by choosing either a disciplinary or thematic specialization in consultation with the Student Affairs Officer (SAO) and/or faculty advisers. The major emphasis must include six Asian American Studies upper-division courses and two upper-division elective courses from other departments or programs.

At least six upper-division Asian American Studies courses .....

Asian American Studies 100, 102, 112, 113, 114, 115, 116, 121, 130, 131, 132, 140, 141, 150, 150B, 150C, 150D, 150E, 150F, 155, 189A, 189B, 189C, 189D, 189E, 189F, 189G, 189H, 189I, 194/195, 198 (1-5 units), 199 (1-5 units).	
--	--

Up to six units in Asian American Studies 198 and/or Asian American Studies 199 can be used to satisfy the Asian American Studies upper division course requirements.

At least two upper-division elective courses from other departments or programs that relate to chosen emphasis .....

Two courses (of up to eight units) from Study Abroad can be substituted for major	8
---	---

requirements upon approval from the SAO or faculty adviser.

### Total Units for the Major ..... 68

**Major Adviser.** Joe Nguyen, Student Affairs Officer (SAO), 530-752-8617 or [jovnguyen@ucdavis.edu](mailto:jovnguyen@ucdavis.edu)

Substitutions for disciplinary track courses will be considered by the Program Director on a case by case basis. Likewise, any substitutions of Major/Minor criteria will be considered by the Program Director.

### Minor Program Requirements:

Asian American Studies	UNITS
Two courses from Asian American Studies 1, 2, 3, or 4 ..... 8	8

Five courses from:

Asian American Studies 100, 102, 112, 113, 114, 115, 116, 121, 130, 131, 132, 140, 141, 150, 150B, 150C, 150D, 150E, 150F, 155, 189A, 189B, 189C, 189D, 189E, 189F, 189G, 189H, 189I, 192, 198, and 199 (no more than 4 units of 192, 198, and 199 may be counted toward this total) ..... 20

**Minor Adviser.** Joe Nguyen, Student Affairs Officer (SAO), 530-752-8617 or [jovnguyen@ucdavis.edu](mailto:jovnguyen@ucdavis.edu)

**American History and Institutions.** This university requirement can be satisfied by one of the following courses in Asian American Studies: 1, 2; see also under University Requirements.

### Courses in Asian American Studies (ASA)

Direct questions pertaining to the following courses to the instructor or to Asian American Studies Department in 3102 Hart Hall 530-723-9767.

### Lower Division

#### 1. Historical Experience of Asian Americans (4)

Lecture—3 hours; discussion—1 hour. Introduction to Asian American Studies through an overview of the history of Asians in America from the 1840s to the present within the context of the development of the United States. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, VL, WC, WE.—F, S.

#### 2. Contemporary Issues of Asian Americans (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Introduction to Asian American Studies through the critical analysis of the impact of race, racism, ethnicity, imperialism, militarism, and immigration since post-World War II on Asian Americans. Topics may include sexuality, criminality, class, hate crimes, and inter-ethnic relations. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, VL, WC, WE.—F, W, S.

#### 3. Social and Psychological Perspectives of Asian Americans (4)

Lecture—3 hours; discussion—1 hour. Major psychosocial issues of Asian Americans. Theories and empirical research that address cultural values, behavioral norms, ethnic stereotypes, racism, acculturation, ethnic identity development, family communication, stressors and social support systems, academic achievement, interpersonal effectiveness, and psychopathology. GE credit: SocSci, Div | ACGH, DD, SS.—W, S.

#### 4. Asian American Cultural Studies (4)

Lecture—3 hours; discussion—1 hour. This interdisciplinary course examines the multiple ways in which race, class, sexuality and gender, as well as the recent turn to transnationalism and postcolonial theory, have changed the ways we read Asian American literature and see art, theater and film. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, OL, VL, WE.—F, W, S.

#### 92. Internship (1-3)

Internship—3-9 hours. Prerequisite: enrollment dependent on availability of intern positions and consent of instructor. Supervised internship in community and institutional settings related to Asian American concerns. (P/NP grading only.)

#### 98. Directed Group Study (1-5)

Primarily intended for lower division students. (P/NP grading only.)

#### 98F. Student Facilitated Course (1-4)

Student-facilitated (taught) course intended for lower division students. Offered irregularly. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

### Upper Division

#### 100. Asian American Communities (4)

Lecture/discussion—4 hours. Survey and analysis of Asian American communities within both historical and contemporary contexts. Presentation of the analytical skills, theories, and concepts needed to describe, explain, and understand the diversity of Asian American communities within the larger, dominant society. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WE.—S. (S.) Hamamoto, Kim, Maira

#### 102. Theoretical Perspective in Asian American Studies (4)

Lecture/discussion—4 hours. Prerequisite: course 1, 2, 3, or 4 or consent of instructor; upper division standing. Explores major theories of race and its intersections with class, gender, and sexuality from interdisciplinary perspective. Introduces key theoretical developments, issues, debates. Through case studies, analyzes ways various theoretical frameworks and perspectives have been incorporated into range of scholarship. GE credit: SocSci, Div.—F, Su. (F, Su.) Ho, Kim, Valverde

#### 112. Asian American Women (4)

Lecture/discussion—4 hours. Experiences of Asian American women from major ethnic subgroups comparatively examined in their social, economic and historical contexts using theoretical perspectives from social sciences, humanities/arts: identity, racialization, immigration, gender, sexuality, labor, socialization, cultural expression, social movements and feminist theorizing. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, VL, WC, WE.—F. (F.) Ho

#### 113. Asian American Sexuality (4)

Lecture/discussion—4 hours. Restrictive US immigration laws, labor exploitation, race-based exclusionary laws, removal and internment, anti-miscegenation laws, and other examples of social control are surveyed to assess their role in shaping the sexuality of the different Asian American groups. Offered irregularly. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, WC, WE.—W. (W.) Hamamoto

#### 114. Asian Diasporas (4)

Lecture—4 hours. Asian diasporic communities and the experiences of its members in the United States and internationally. Community building, cyberspace, gender issues, labor, transnational practices, effects of globalization, political organizing, homeland politics, humanitarian projects, citizenship and nationalism. Offered in alternate years. GE credit: SocSci, Div | ACGH, DD, SS, WC.—F. (F.) Kim, Valverde

#### 115. Multiracial Asian Pacific American Issues (4)

Lecture/discussion—4 hours. Introduction to the experiences of biracial and multiracial Asian Pacific people in the U.S., concentrating on theories of race, racial identity formation, culture, media, and anti-racist struggles. Critical approaches to the analysis of popular media and academic representations. Offered in alternate years. GE credit: SocSci, Div | ACGH, DD, OL, SS, WC, WE.—Valverde

#### 116. Asian American Youth (4)

Lecture—3 hours; term paper. Social experiences of diverse groups of Asian American youth. Ways in which youth themselves actively create cultural expressions and political interventions. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, OL, WE.—Maira

#### 121. Asian American Performance (4)

Lecture/discussion—4 hours. Performance work by, for, and/or about Asian Pacific Americans including dramatic literature, performance art, dance, and film. Ethnicity, gender and sexuality, class and age as they intersect with Asian Pacific American identities in and through dramatic performance. Offered in alternate years. GE credit: ArtHum | ACGH, AH, DD, OL, WE.—W. Min, See

#### 130. Asian American Literature (4)

Lecture/discussion—4 hours. Works of Asian American literature by writers from the major ethnic subgroups, examined in their social, economic and historical contexts. Intertextual analysis of their thematic and formal elements to form an understanding of Asian American literary traditions. GE credit: ArtHum, Div | ACGH, AH, DD, OL, WE.—S. (S.) Ho, Min

#### 131. Ethnicity, Culture, and the Self (4)

Lecture—3 hours; discussion—1 hour. Cultural and social psychological influences on Asian Americans focusing on the individual. GE credit: SocSci, Div | ACGH, DD, SS.—Zane

#### 132. Health Issues Confronting Asian Americans and Pacific Islanders (4)

Lecture/discussion—4 hours. Health issues confronting Asian Americans and Pacific Islanders. (Same course as Public Health Sciences 132.) GE credit: SocSci | SS.

#### 140. Asian Americans and Media (4)

Lecture—4 hours. Prerequisite: course 1 or 2. Upper division standing. The politics of Asian American representation in print, radio, television, film, and new media will be examined in tandem with sustained discussion of alternatives offered by independent Asian American media arts. GE credit: ArtHum, SocSci, Div, Wrt.—F. (F.) Hamamoto, Maira

#### 141. Asian Americans and the Political Culture of Fashion in the U.S. and Asia (4)

Lecture—4 hours; term paper; project. Prerequisite: course 1; course 2, 3, or 4 or consent of instructor. Historical, cultural and sociopolitical development of fashion in Asia and the U.S. as it relates to the Asian Diasporas. Specific aspects of material culture: textiles, clothing and fashion. Offered in alternate years. GE credit: ArtHum, SocSci, Div | ACGH, AH or SS, DD, OL, VL, WC, WE.—F. Valverde

#### 150. Filipino American Experience (4)

Lecture/discussion—4 hours. Examination of the relationship between the Filipino-American community, the Philippine home community and the larger American society through a critical evaluation of the historical and contemporary conditions, problems and prospects of Filipinos in the U.S. GE credit: SocSci | ACGH, DD, SS, WC.—S. (S.) Rodriguez

#### 150B. Japanese American Experience (4)

Lecture—3 hours; term paper. Analytical approaches to understanding Japanese American history, culture and society. Offered in alternate years. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, VL, WC, WE.—W. Hamamoto

#### 150C. Chinese American Experience (4)

Lecture/discussion—4 hours. Survey of the historical and contemporary experiences of Chinese in the United States, starting with the gold rush era and concluding with the present-day phenomenon of Chinese transnational movement to the United States and its diasporic significance. Offered in alternate years. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, VL, WC.—Ho

#### 150D. Korean American Experience (4)

Lecture/discussion—4 hours. Interdisciplinary survey of the historical and contemporary experiences of Koreans in the United States from the late nineteenth

century to the present. Offered in alternate years. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WC. —Kim

#### **150E. Southeast Asian American Experience (4)**

Lecture/discussion—4 hours. Upper division status. Historical survey of Southeast Asian experiences with special focus on United States involvement and post 1975 migrations. Defines international and transnational conditions that led up to the large exodus and resettlement of Southeast Asians. Offered in alternate years. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, OL, WC, WE. —S. Valverde

#### **150F. South Asian American History, Culture, & Politics (4)**

Lecture/discussion—4 hours. South Asian American experiences, focusing on the histories, cultures, and politics of Indian, Pakistani, Bangladeshi, and Sri Lankan communities in the U.S. Interdisciplinary approaches to migration, labor, gender, racialization, ethnicity, youth, community mobilization. Offered in alternate years. GE credit: ArtHum, SocSci, Div | ACGH, AH or SS, DD, OL, WE. —W. Maira

#### **155. Asian American Legal History (4)**

Lecture/discussion—4 hours. Legal history of Asian Americans, from the mid-19th century to present. Laws and administrative policies affecting Asian American communities, including those governing immigration, social and economic participation, WWII internment, and affirmative action. Offered irregularly. GE credit: SocSci | ACGH, DD, SS.

#### **189A. Topics in Asian American Studies: History (4)**

Lecture—4 hours. Intensive treatment of a topic in Asian American Studies; history. May be repeated for credit when topic differs. Offered irregularly. GE credit: SocSci | ACGH, DD, SS, WC.

#### **189B. Topics in Asian American Studies: Culture (4)**

Lecture—4 hours. Intensive treatment of a topic in Asian American Studies; culture. May be repeated for credit when topic differs. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS.

#### **189C. Topics in Asian American Studies: Physical and Mental Health (4)**

Lecture—4 hours. Intensive treatment of a topic in Asian American Studies. Health. May be repeated for credit when topic differs. Offered irregularly. GE credit: SocSci | SS.

#### **189D. Topics in Asian American Studies: Policy and Community (4)**

Lecture—4 hours. Intensive treatment of a topic in Asian American Studies; policy and community. May be repeated for credit when topic differs. Offered irregularly. GE credit: SocSci | ACGH, DD, SS.

#### **189E. Topics in Asian American Studies: Comparative Racial Studies (4)**

Lecture—4 hours. Intensive treatment of a topic in Asian American Studies; comparative race studies. May be repeated for credit when topic differs. Offered irregularly. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, OL, WE.

#### **189F. Topics in Asian American Studies: Asian Studies and Asian American Studies (4)**

Lecture—4 hours. Intensive treatment of a topic in Asian American Studies; asian and asian american studies. May be repeated for credit when topic differs. Offered irregularly. GE credit: SocSci | SS.

#### **189G. Topics in Asian American Studies: Race, Class, Gender, and Sexuality (4)**

Lecture—4 hours. Intensive treatment of a topic in Asian American Studies; race, class, gender, and sexuality. May be repeated for credit when topic differs. Offered irregularly. GE credit: SocSci | SS.

#### **189H. Topics in Asian American Studies: Society and Institutions (4)**

Lecture—4 hours. Intensive treatment of a topic in Asian American Studies. society and institutions. May be repeated for credit when topic differs. GE credit: ArtHum or SocSci | AH or SS.

#### **189I. Topics in Asian American Studies: Politics and Social Movements (4)**

Lecture—4 hours. Intensive treatment of a topic in Asian American Studies: politics and social movements. May be repeated for credit when topic differs. Offered irregularly. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, OL, WE.

#### **192. Internship (1-5)**

Internship—3-15 hours. Prerequisite: enrollment dependent on availability of intern position with priority to Asian American Studies minors. Supervised internship in community and institutional settings related to Asian American concerns. (P/NP grading only.)

#### **194. Asian American Studies Capstone Course (4)**

Lecture/discussion—4 hours; project; extensive writing. Open to junior or senior level standing in Asian American Studies or consent of instructor. Synthesis of the approaches and methods learned by students in Asian American Studies and development of specialization in their areas of interest. Development of a research proposal for thesis project. —F, W, S. (F, W, S.)

#### **195. Asian American Studies Senior Thesis Seminar (4)**

Lecture/discussion—3 hours; project; extensive writing. Restricted to junior and senior level standing in Asian American Studies. Completion of ASA 194 required. Synthesis of the approaches and methods learned in Asian American Studies. Production of an original research paper on a topic of student's interest, building on the research proposal submitted in the capstone seminar. —W, S. (W, S.)

#### **197T. Tutoring in Asian American Studies (1-5)**

Tutoring—1-5 hours. Prerequisite: consent of instructor. Tutoring in lower division Asian American Studies courses in small group discussion. Weekly meetings with instructor. May be repeated for credit once for a given course and also for a different course. (P/NP grading only.) —F, W, S. (F, W, S.)

#### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Primarily intended for upper division students. (P/NP grading only.) —F, W, S. (F, W, S.)

#### **198F. Student Facilitated Course (1-4)**

Student-facilitated (taught) course intended for upper division students. Offered irregularly. (P/NP grading only.)

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) —F, W, S. (F, W, S.)

#### **199FA. Student Facilitated Course Development (1-4)**

Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 98F/198F. Offered irregularly. (P/NP grading only.)

#### **199FB. Student Facilitated Teaching (1-4)**

Prerequisite: course 199FA. Student facilitated. Under the supervision of a faculty member, an undergraduate student teaches a course under 98F/198F. Offered irregularly. (P/NP grading only.)

## **Asian Studies**

**See Asian American Studies, on page 182; East Asian Languages and Cultures, on page 244; and East Asian Studies, on page 249.**

## **Astronomy**

**See Physics, on page 503.**

## **Atmospheric Science**

(College of Agricultural and Environmental Sciences)

**Faculty.** See under Department of Land, Air and Water Resources, on page 391.

#### **The Major Program**

Atmospheric science is the study of the air that surrounds the planet. It includes all weather phenomena and climate including global and regional climate change, the chemistry of trace constituents and cloud and particle formation, interactions between ecosystems and the atmosphere, as well as quantitative studies of climate extremes and severe weather, including droughts, floods, hurricanes and tornadoes. The study of the impacts of human and other biotic activity on the quality of the air we breathe are important topics in the major.

**The Program.** Modern atmospheric science is a quantitative science that is reflected in the major's curriculum. In addition to the study of daily weather events, the program deals with fundamental dynamical and physical processes that involve the general circulation of the atmosphere; turbulent mass and energy transfer at the planetary surface as well as within the free atmosphere; the transfer of solar and terrestrial radiation throughout the atmosphere; atmospheric interaction with the biosphere; climate variations; and developments in remote sensing using satellites with modern meteorological instrumentation. In addition, the program has significant expertise in the areas of air quality and its related atmospheric chemistry. As well as providing a broad background in meteorology, the major includes an informal minor area to be chosen from mathematics, computer science, environmental studies, resource management or a physical or biological science.

**Internships and Career Opportunities.** Atmospheric science students have participated in internships with the California Air Resources Board, various county Air Pollution Control Districts, the National Weather Service, and performing research. Job opportunities include: national weather services, weather forecasting for broadcast media or private forecasting firms, environmental consulting firms (such as environmental impact reports, wind farm siting), government agencies at all levels from local (air quality districts, planning departments, etc.) to state (Air Resources Board) to national (NOAA), and companies whose operations are impacted by weather (such as airlines, futures markets). About half of our graduates continue their education by seeking the M.S. or Ph.D. degree in atmospheric science or related areas.

#### **B.S. Major Requirements:**

UNITS

**Written Expression. Also counts toward College English Composition Requirement .....** 3-4

University Writing Program 101 or one course from 102 or 104 sequences or course selected with adviser's approval

**Preparatory Subject Matter .....** 59-60

Plant Sciences 2 ..... 4

Chemistry 2A, 2B ..... 10

Computer Science Engineering 30 or course selected with adviser's approval .... 4

Mathematics 21A, 21B, 21C, 21D, 22A,

22B ..... 22

Atmospheric Science 60 ..... 4

Physics 9A, 9B, 9C ..... 12

Statistics 13 ..... 3

**Depth Subject Matter.....** 41

Atmospheric Science 110, 111, 111L, 120, 121A, 121B, 124, 128 ..... 28

Internship-Atmospheric Science 192 or 199 .....	2
Two upper division Atmospheric Science courses selected with adviser's approval, not including courses 192 and 199 .....	7
Engineering 6, Atmospheric Science 150, Civil and Environmental Engineering 119A or course selected with adviser's approval .....	4
<b>Restricted Electives .....</b>	<b>15</b>
Coordinated group of courses (minor area) to be chosen with adviser's approval from mathematics, computer science, environmental studies, communication, resource management, or a physical or biological science (at least 10 upper division units).....	15

### Total Units for the Major..... 118-120

**Major Adviser.** Kyaw Tha Paw U

**Advising Center** for the major, is located in 1150 Plant and Environmental Sciences Building in Land, Air and Water Resources Teaching Center 530-752-1603 ATM Adviser Lacole Brooks; [lawradvising@ucdavis.edu](mailto:lawradvising@ucdavis.edu).

**Note.** Alternative options for students who are interested in atmospheric science are to minor in ATM or to major in ESM choosing climate change and air quality track. However, both the ATM minor and the ESM climate change and air quality track do not meet the Federal civil service requirements for meteorologists.

### Minor Program Requirements:

**Minor Program.** The minor in Atmospheric Science provides a broad treatment of weather and climate, with the option to focus on such topics as climate change, meteorological instrumentation, and satellite remote sensing. Students undertaking the minor should have completed minimum preparatory course work in calculus and physics (Mathematics 16A-16B, Physics 5A or 7A). Some upper division courses in Atmospheric Science have the Mathematics 21 and 22 series and the Physics 9 series as prerequisites.

### UNITS

<b>Atmospheric Science.....</b>	<b>20-24</b>
Atmospheric Science 60, 110.....	8
Four courses selected with the approval of the minor program adviser from upper division Atmospheric Science courses (excluding 192 or 199) or Environmental Science and Management 131 .....	12-16

**Minor Adviser.** Kyaw Tha Paw U

**Graduate Study.** You can specialize in particular areas of atmospheric science through graduate study and research leading to the M.S. and Ph.D. degrees. For details, see the [Atmospheric Science \(A Graduate Group\)](#), on page 187, and see [Graduate Studies](#), on page 120.

**Related Courses.** See Environmental Science and Policy 150A; Physics 104A, 104B; Environmental Science and Management 131.

### Courses in Atmospheric Science (ATM)

Questions pertaining to the following courses should be directed to the instructor or to the Land, Air and Water Resources Teaching Center in 1150 Plant & Environmental Sciences Building 530-752-1603.

### Lower Division

#### 5. Global Climate Change (3)

Lecture—2 hours; discussion—1 hour. Scientific concepts needed to understand climate and climate change. Principles of regional variations in climate. Understanding observed seasonal, decadal and millennial changes. Analysis of the Antarctic ozone hole, El Niño and human-induced global warming. GE credit: SciEng | QL, SE, SL, VL.—S. (S.) Ullrich

#### 6. Fundamentals of Atmospheric Pollution (3)

Lecture—3 hours. Effects of human emissions on the atmosphere: smog, ozone pollution, and ozone depletion; indoor air pollution; global warming; acid rain. Impacts of these problems on the earth, ecosystems, and humans. Strategies to reduce atmospheric pollution. GE credit: SciEng | SE, SL, VL.—F. (F.) Anastasio

#### 10. Severe and Unusual Weather (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: high school physics. Introduction to physical principles of severe and unusual weather: flood, blizzards, thunderstorms, lightning, tornadoes, and hurricanes. Emphasis on scientific perspective and human context. Not open to students who have received credit for course 100. (Former course 100.) GE credit: SciEng, Wrt | QL, SE, SL, VL.—F, W. (F, W.) Chen, Grotjahn, Paw U

#### 60. Introduction to Atmospheric Science (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 16A or 21A and Physics 5A, 7A or 9A. Fundamental principles of the physics, chemistry, and fluid dynamics underlying weather and climate. Solar radiation, the greenhouse effect, and the thermal budget of the Earth. Clouds and their formation, convection, precipitation, mid-latitude storm systems. GE credit: SciEng | QL, SE, VL.—F. (F.) Faloona

#### 92. Atmospheric Science Internship (1-12)

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Internship off and on campus in atmospheric science. Internship supervised by a member of the faculty. (P/NP grading only.)—F, W, S. (F, W, S.)

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

#### 99. Special Study for Undergraduates (1-5) (P/NP grading only.)—F, W, S. (F, W, S.)

### Upper Division

#### 110. Weather Observation and Analysis (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 60. Acquisition, distribution and analysis of meteorological data. Vertical sounding analysis, stability indices, probability of local severe weather, weather map analysis. Use of National Weather Service analyses and forecast products. Laboratory makes use of computer-generated analyses. Offered in alternate years. GE credit: SciEng | OL, QL, SE, VL.—S. Chen

#### 111. Weather Analysis and Prediction (3)

Lecture—3 hours. Prerequisite: courses 110, 121B, 111L (concurrently), knowledge of a programming language. Tools for analyzing observed properties of mid-latitude weather systems. The analysis-forecast system, including various weather forecast models. General structure and properties of mid-latitude weather systems. Offered in alternate years. GE credit: SciEng | QL, SE, VL.—W. Grotjahn

#### 111LY. Weather Analysis and Prediction Laboratory (2)

Laboratory—2 hours; web virtual lecture—4 hours. Prerequisite: course 111 (concurrently). Subjective and objective analysis of weather data. Web-based learning of the analysis-forecast system and various weather forecasting situations. Weather map interpretation and forecast discussions. (P/NP grading only.) Offered in alternate years. GE credit: SciEng | OL, QL, SE, VL.—W. Grotjahn

#### 112. Weather Forecasting Practice (2)

Discussion—2 hours; laboratory—1 hour. Prerequisite: course 110. Formal practice in preparing local weather forecasts. Analysis of current weather conditions and recent model performance. Verification and discussion of prior forecast. Interpretation of current forecast model guidance. Posting of forecast. May be repeated for credit up to three times. (P/NP grading only.)—F. (F.) Grotjahn

#### 115. Hydroclimatology (3)

Lecture—3 hours. Prerequisite: course 60. Examination of climate as the forcing function for the hydrologic system. Emphasis on seasonal variations in the relationship between precipitation and evapotranspiration for meso-scale areas. Watershed modeling of floods and drought for evaluating the effects of climatic fluctuations. Offered irregularly. GE credit: SciEng | SE, SL.—S. (S.)

#### 116. Climate Change (4)

Lecture—3 hours; extensive writing. Prerequisite: University Writing Program 1; consent of instructor. Climate trends and patterns spanning the recent past and the future. Emphasis on natural processes that produce climate variations and human influence on these processes. Evidence of climate change and the role of global climate models in understanding climate variability. Offered in alternate years. GE credit: SciEng | QL, SE, WE.—(S.) Anastasio

#### 120. Atmospheric Thermodynamics and Cloud Physics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: Mathematics 21C, Physics 9B, course 60 (may be taken concurrently). Atmospheric composition and structure, thermodynamics of atmospheric gases, thermal properties of dry and moist air, atmospheric stability; cloud nucleation, cloud growth by condensation and collision, cloud models. GE credit: SciEng | QL, SE, VL.—F. (F.) Faloona

#### 121A. Atmospheric Dynamics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 120, Mathematics 21D, Physics 9B. Fundamental forces of atmospheric flow; noninertial reference frames; development of the equations of motion for rotating stratified atmospheres; isobaric and natural coordinate systems; geostrophic flow; thermal wind; circulation and vorticity. GE credit: SciEng | QL, SE.—W. (W.) Chen, Nathan, Ulrich

#### 121B. Atmospheric Dynamics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 121A. Dynamics of fluid motion in geophysical systems; quasi-geostrophic theory; fundamentals of wave propagation in fluids; Rossby waves; gravity waves; fundamentals of hydrodynamic instability; two-level model; baroclinic instability and cyclogenesis. GE credit: SciEng | QL, SE.—S. (S.) Chen

#### 124. Meteorological Instruments and Observations (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 60; Physics 5C. Modern meteorological instruments and their use in meteorological observations and measurements. Both standard and micro-meteorological instruments are included. Offered in alternate years. GE credit: SciEng | QL, SE, SL, VL.—(F.) Paw U

#### 128. Radiation and Satellite Meteorology (4)

Laboratory/discussion—3 hours; extensive problem solving—1 hour. Prerequisite: course 60, Physics 9B, Mathematics 22B, 21D. Concepts of atmospheric radiation and the use of satellites in remote sensing. Emphasis on the modification of solar and infrared radiation by the atmosphere. Estimation from satellite data of atmospheric variables such as temperatures and cloudiness. GE credit: SciEng | QL, SE, VL.—W. (W.) Nathan

#### 133. Biometeorology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in a biological discipline and Mathematics 16B or consent of instructor. Atmospheric and biological interactions. Physical and biological basis for water vapor, carbon dioxide and energy exchanges with the atmosphere associated with plants and animals, including humans. Microclimate of plant canopies and microclimatic modification such as frost protection and windbreaks. GE credit: SciEng | QL, SE, SL, VL.—W. (W.) Paw U

#### 149. Air Pollution (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 21D, 22B; C- or better in Chemistry 2B; Atmospheric Science 121A or C- or better in Engineering 103. Physical and technical aspects of

air pollution. Emphasis on geophysical processes and air pollution meteorology as well as physical and chemical properties of pollutants. (Same course as Civil and Environmental Engineering 149.) GE credit: SciEng | QL, SE, SL. —F. (F.) Cappa

### **150. Introduction to Computer Methods in Physical Sciences (4)**

Lecture—3 hour; lecture/discussion—2 hours. Prerequisite: Mathematics 22B, Physics 9B, and a computer programming course such as Engineering Computer Science 30. Additional courses in fluid dynamics (course 121A or Engineering 103) and in Fourier transforms (Mathematics 118C or Physics 104A) are helpful, but not required. Computational techniques used in physical sciences. Integral and differential equation numerical solution: mainly finite differencing and spectral (Fourier transform) methods. Time series applications (time-permitting). Specific applications drawn from meteorology.

Accelerated introduction to FORTRAN including programming assignments. Enrollment limited to 12, preference to Atmospheric Science majors. (P/NP grading only.) Offered irregularly. GE credit: SE. —F. (F.) Grotjahn

### **158. Boundary-Layer Meteorology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 121A. Dynamics of the atmosphere nearest the Earth's surface. Friction and heat transfer. Properties of turbulent flows; statistical and spectral techniques; use and interpretation of differential equations. Emphasis on the importance to weather, air pollution, and the world's oceans. Offered in alternate years. GE credit: SciEng | QL, SE, VL. —(S.) Falloona

### **160. Introduction to Atmospheric Chemistry (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 2B. Quantitative examination of current local, regional and global problems in atmospheric chemistry (including photochemical smog, acid deposition, climate change, and stratospheric ozone depletion) using fundamental concepts from chemistry. Basic chemical modeling of atmospheric reaction systems. Offered in alternate years. GE credit: SciEng | QL, SE, SL, VL. —W. Anastasio

### **192. Atmospheric Science Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Internship off and on campus in atmospheric science. Internship supervised by a member of the faculty. (P/NP grading only.) —F, W, S. (F, W, S.)

### **198. Directed Group Study (1-5)**

Prerequisite: three upper division units in Atmospheric Science. (P/NP grading only.) —F, W, S. (F, W, S.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: three upper division units in Atmospheric Science and at least an overall B average. (P/NP grading only.) —F, W, S. (F, W, S.)

### **Graduate**

#### **215. Advanced Hydroclimatology (3)**

Lecture—3 hours. Prerequisite: course 115. Theoretical and applied aspects of energy and mass fluxes linking the earth's surface, atmosphere, and hydrologic system. Emphasis on regional scale analysis and modeling, spatial data representation, and climate change influences on precipitation and its hydroclimatic expression. Offered irregularly.—S. (S.)

#### **221. Advanced Atmospheric Dynamics (3)**

Lecture—3 hours. Prerequisite: course 121B. Conditions for instability in stratified atmospheres; baroclinic instability; forced topographic Rossby Waves; wave-mean flow interaction theory; tropical dynamics; stratospheric dynamics. Offered in alternate years.—(W.) Nathan

### **223. Advanced Boundary-Layer Meteorology (3)**

Lecture—3 hours. Prerequisite: course 230. Characteristics of the atmospheric boundary layer under convective and nocturnal conditions. Heat budget at the surface and boundary layer forcing. Similarity theory and scaling of the boundary layer. Measurement and simulation techniques. Offered in alternate years.—(S.) Falloona

### **230. Atmospheric Turbulence (3)**

Lecture—3 hours. Prerequisite: course 121B or 158. Dynamics and energetics of turbulence in the atmosphere including vorticity dynamics. Statistical description of turbulence; Eulerian and Lagrangian scales, spectral analysis, conditional sampling techniques. Turbulent diffusion; the closure problem, gradient-diffusion and second-order methods. Offered in alternate years.—W. Paw U

### **231. Advanced Air Pollution Meteorology (3)**

Lecture—3 hours. Prerequisites: Course 149A, 160 and one course in fluid dynamics. Processes determining transport and diffusion of primary and secondary pollutants. Models of chemical transformation, of the atmospheric boundary layer and of mesoscale wind fields, as applicable to pollutant dispersion problems. Offered irregularly.—F. (F.) Paw U

### **233. Advanced Biometeorology (3)**

Lecture/discussion—3 hours. Prerequisite: course 133 or consent of instructor. Current topics in biometeorology. Physical and biological basis for water vapor, other gases, and energy exchange with the atmosphere. Topics include modeling and measuring turbulent transport from plant canopies, surface temperatures and energy budgets, bio-aerosol physics and aerobiology. Offered in alternate years.—(W.) Paw U

### **240. General Circulation of the Atmosphere (4)**

Lecture/discussion—4 hours. Prerequisite: course 121B. Large-scale, observed atmospheric properties. Radiation, momentum, and energy balances derived and compared with observations. Lectures and homework synthesize observations and theories, then apply them to understand the large-scale circulations. Offered in alternate years.—F. Grotjahn

### **241. Climate Dynamics (3)**

Lecture/discussion—3 hours. Prerequisite: course 121B. Dynamics of large-scale climatic variations over time periods from weeks to centuries. Description of the appropriate methods of analysis of atmospheric and oceanic observations. Conservation of mass, energy and momentum. Introduction to the range of climate simulations. Offered in alternate years.—(F.) Ullrich

### **245. Climate Change, Water and Society (4)**

Lecture—4 hours. Class size limited to 25 students. Integration of climate science and hydrology with policy to understand hydroclimatology and its impact upon natural and human systems. Assignments: readings, take-home examination on climate and hydrologic science, paper that integrates course concepts into a research prospectus or review article. (Same course as Hydrologic Sciences 245 and Ecology 245.) —F. (F.) Fogg, Lubell, Ullrich

### **250. Meso-Scale Meteorology (3)**

Lecture—3 hours. Prerequisite: graduate standing, course 150, a course in partial differential equations; or consent of instructor. The study of weather phenomena with horizontal spatial dimensions between 2.5 and 2500 kilometers. Methods of observational study and numerical modeling of the structure and temporal behavior of these weather systems. Offered in alternate years.—(W.) Chen

### **255. Numerical Modeling of the Atmosphere (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 121B and Engineering 5; course 150 recommended. Principles of numerical modeling of the dynamic, thermodynamic and physical processes of the atmosphere. Hands-on experiments on model

development using the shallow water equations and the primitive equations. Operational forecast models. Offered in alternate years.—W. Chen

### **260. Atmospheric Chemistry (3)**

Lecture—3 hours. Prerequisite: course 160. Chemistry and photochemistry in tropospheric condensed phases (fog, cloud, and rain drops and aerosol particles). Gas-drop and gas-particle partitioning of compounds and effects of reactions in condensed phases on the fates and transformations of tropospheric chemical species. Offered in alternate years.—S. Anastasio

### **265. The Art of Climate Modeling (3)**

Lecture—2 hours; laboratory—1 hour. Prerequisite: course 121A. Over the past fifty years, global models have given us incredible insight into the Earth system. This course provides an introduction to these models, with a focus on their design and the science questions they have been built to address. Offered irregularly.—S. (S.) Ullrich

### **270A. Topics in Atmospheric Science: Meteorological Statistics (1-3)**

Discussion—1-3 hours. Prerequisite: consent or instructor. Applications and concepts in meteorological statistics.—F, W, S. (F, W, S.)

### **270B. Topics in Atmospheric Science: Computer Modeling of the Atmosphere (1-3)**

Discussion—1-3 hours. Prerequisite: consent or instructor. Applications and concepts in computer modeling of the atmosphere.—F, W, S. (F, W, S.)

### **270C. Topics in Atmospheric Science: Design of Experiments and Field Studies in Meteorology (1-3)**

Discussion—1-3 hours. Prerequisite: consent or instructor. Applications and concepts in design of experiments and field studies in meteorology.—F, W, S. (F, W, S.)

### **270D. Topics in Atmospheric Science: Solar and Infrared Radiation in the Atmosphere (1-3)**

Discussion—1-3 hours. Prerequisite: consent or instructor. Applications and concepts in solar and infrared radiation in the atmosphere.—F, W, S. (F, W, S.)

### **270E. Topics in Atmospheric Science: Aerosol and Cloud Physics (1-3)**

Discussion—1-3 hours. Prerequisite: consent or instructor. Applications and concepts in aerosol and cloud physics.—F, W, S. (F, W, S.)

### **270F. Topics in Atmospheric Science: Atmospheric Chemistry (1-3)**

Discussion—1-3 hours. Prerequisite: consent or instructor. Applications and concepts in atmospheric chemistry.—F, W, S. (F, W, S.)

### **270G. Topics in Atmospheric Science: General Meteorology (1-3)**

Discussion—1-3 hours. Prerequisite: consent or instructor. Applications and concepts in general meteorology.—F, W, S. (F, W, S.)

### **280A. Air Quality Policy in the Real World (4)**

Project. Prerequisite: consent of instructor; Atmospheric Science 149 or Engineering: Civil and Environmental 149, and Engineering: Civil and Environmental 242 or equivalent. In-depth investigation of an air quality problem with a team and mentor from government or industry. Science, engineering and policy will be involved. Findings will be presented orally and in writing. (Deferred grading only, pending completion of sequence.) Offered irregularly.—F, S. (F, S.)

### **280B. Air Quality Policy in the Real World (4)**

Project. Prerequisite: course 280A; consent of instructor. In-depth investigation of an air quality problem with a team and mentor from government or industry. Science, engineering and policy will be involved. Findings will be presented orally and in writing. (Deferred grading only, pending completion of sequence.) Offered irregularly.—F, S. (F, S.)

**290. Seminar (1)**

Seminar—1 hour. Prerequisite: graduate standing in Atmospheric Science or related field. Current developments in selected areas of atmospheric research. Topics will vary according to student and faculty interests. (S/U grading only.)—F, W, S. (F, W, S.)

**291A. Research Conference in Atmospheric Science; Air Quality Meteorology (1-3)**

Lecture/discussion—1-3 hours. Prerequisite: consent of instructor. Review and discussion of current literature and research in Air Quality Meteorology. May be repeated up to 6 units for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**291B. Research Conference in Atmospheric Science; Biometeorology (1-3)**

Lecture/discussion—1-3 hours. Prerequisite: consent of instructor. Review and discussion of current literature and research in Biometeorology. May be repeated up to 6 units for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**291C. Research Conference in Atmospheric Science; Boundary Layer Meteorology (1-3)**

Lecture/discussion—1-3 hours. Prerequisite: consent of instructor. Review and discussion of current literature and research in Boundary Layer Meteorology. May be repeated up to 6 units for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**291D. Research Conference in Atmospheric Science; Climate Change (1-3)**

Lecture/discussion—1-3 hours. Prerequisite: consent of instructor. Review and discussion of current literature and research in Climate Change. May be repeated up to 6 units for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**291E. Research Conference in Atmospheric Science; General Meteorology (1-3)**

Lecture/discussion—1-3 hours. Prerequisite: consent of instructor. Review and discussion of current literature and research in General Meteorology. May be repeated up to 6 units for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**291F. Research Conference in Atmospheric Science; Atmospheric Chemistry (1-3)**

Lecture/discussion—1-3 hours. Prerequisite: consent of instructor. Review and discussion of current literature and research in Atmospheric Chemistry. May be repeated up to 6 units for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**298. Group Study (1-5)**

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

**299. Research (1-12)**

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

**Professional****393. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## Atmospheric Science (A Graduate Group)

Ian Faloona, Ph.D., Chairperson of the Group  
530-752-2044

**Group Office.** 1152 Plant and Environmental Sciences Building 530-752-1669;  
<http://atm.ucdavis.edu>

**Faculty**

Cort Anastasio, Ph.D., Professor  
Joseph Biello, Ph.D., Associate Professor  
(Mathematics)

Christopher Cappa, Ph.D., Assistant Professor

(Civil and Environmental Engineering)

Shu-Hua Chen, Ph.D., Associate Professor

Ian Faloona, Ph.D., Associate Professor

Richard Grotjahn, Ph.D., Professor

Michael J. Kleeman, Ph.D., Professor

(Civil and Environmental Engineering)

John Largier, Ph.D., Professor

(Environmental Science and Policy)

Terrence R. Nathan, Ph.D., Professor

Kyaw Tha Paw U, Ph.D., Professor

Paul Ullrich, Ph.D., Assistant Professor

Susan Ustin, Ph.D., Professor

Anthony Wexler, Ph.D., Professor (Mechanical and Aerospace Engineering; Civil and Environmental Engineering)

Bruce White, Ph.D., Professor (Mechanical and Aerospace Engineering)

Zhang, Qi, Assistant Professor (Environmental Toxicology)

**Emeriti Faculty**

Thomas A. Cahill, Ph.D., Professor Emeritus

Robert Floccihini, Ph.D., Professor Emeritus

(Crocker Nuclear Laboratory)

Ruth Reck, Ph.D., Professor Emeritus

Bryan Ware, Ph.D., Professor Emeritus

**Affiliated Faculty**

Lowell Ashbaugh, Ph.D., Associate Researcher

Emeritus (Crocker Nuclear Laboratory)

Steven S. Cliff, Ph.D., Assistant Researcher

(Applied Science)

Ann Dillner, Ph.D., Assistant Researcher

(Crocker Nuclear laboratory)

Richard L. Snyder, Ph.D., Biometeorology Specialist

Richard Anthony VanCuren, Ph.D., Professional Researcher (Air Pollution Research Center)

**Graduate Study.** The Graduate Group in Atmospheric Science offers both the M.S. and Ph.D. degree programs. A student may place emphasis on graduate work in one or more of the following fields: air quality meteorology, atmospheric chemistry, biometeorology, micrometeorology, numerical weather prediction, remote sensing, climate dynamics, large scale dynamics, and meso-scale meteorology. The diverse and extensive backgrounds of the faculty allow opportunities for interdisciplinary training and research.

**Preparation.** The Group encourages applications from all interested students with backgrounds in the physical or natural sciences. Basic qualifications for students entering the Atmospheric Science graduate program include mathematics to the level of vector calculus and differential equations, and one year of college-level physics. Flexibility may be allowed for students with high academic potential, but it is expected that deficiencies in preparatory material and in key undergraduate atmospheric science courses be completed within the first year of graduate study.

**Graduate Adviser.** Terrence Nathan, Ph.D.

**Graduate Admissions Officer.** Christopher Cappa, Ph.D.

## Avian Sciences

This major has been discontinued as of Fall 2011; see [Animal Science, on page 162](#).

(College of Agricultural and Environmental Sciences)

**Faculty.** See under [Animal Science, on page 162](#).

**Advising Center** for the minor and course offerings is located in the Animal Science Advising Center in 1202 Meyer Hall 530-754-7915; <http://asac.ucdavis.edu/>

**The Program.** The flexibility of the program and the close personal interaction between students, faculty, and specialists in the field give students a large role in selecting and designing their own course work.

**Internships and Career Alternatives.** Independent study, undergraduate research, and internships are emphasized in the Avian Sciences program. Birds for laboratory or special study are housed within the main building as well as at the research farm and the experimental aviary.

**Minor Program Requirements:**

UNITS

**Avian Sciences ..... 18**

Choose one from: Avian Sciences 11, 13, 14L, 15L, 16L ..... 2-3

Choose remaining units from: Avian Sciences 100, 103, 115, 121, 123, 149, 150, 160; Animal Science 143; Neurobiology, Physiology, and Behavior 117; Wildlife, Fish, and Conservation Biology 111, 136 ..... 15-16

**Graduate Study.** The Avian Sciences Graduate Group offers a program of study and research leading to the M.S. degree in Avian Sciences. The M.S. degree is offered in Avian Sciences. For details, see [Graduate Studies, on page 120](#).

**Related Courses.** See Agricultural and Resource Economics 130; Animal Science 143; Food Science and Technology 120, 120L, 121; Molecular and Cellular Biology 150, 150L; Nutrition 123, 123L.

**Courses in Avian Sciences (AVS)****Lower Division****11. Introduction to Poultry Science (3)**

Lecture—3 hours. The mosaic of events that have tied poultry science to other scientific disciplines and poultry to humans. Poultry science techniques and production methods from the time of domestication to the present. One field trip required. GE credit: SciEng, Wrt | SE.

**13. Birds, Humans and the Environment (3)**  
Lecture—2 hours; discussion—1 hour. Interrelationships of the worlds of birds and humans. Lectures, discussions, field trips and projects focus on ecology, avian evolution, physiology, reproduction, flight, behavior, folklore, identification, ecotoxicology and conservation. Current environmental issues are emphasized. Half-day field trip. GE credit: SciEng, Wrt | SE, SL.—F. (F.) King

**14L. Management of Captive Birds (2)**

Fieldwork—3 hours; lecture/discussion—1 hour. Prerequisite: consent of instructor. One weekly discussion and field trip to study practical captive management (housing, feeding, equipment, marketing, diseases). Visit facilities rearing birds such as commercial parrots, hobbyist exotics, ostrich, raptors, waterfowl, game birds, poultry and pigeons. GE credit: SciEng | SE.

**15L. Captive Raptor Management (2)**

Laboratory—3 hours; independent study—3 hours; one field trip. Hands-on experience handling birds of prey. Students are taught all of the skills required to handle and care for raptors, including their husbandry, biology, habitat requirements, cage design, veterinary care, rehabilitation methods, research potential and long-term care requirements. GE credit: SciEng | SE.

**16LA. Raptor Migration and Population Fluctuations (2)**

Fieldwork—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip. GE credit: SciEng | SE.

**16LB. Raptor Migration and Population Fluctuations (2)**

Fieldwork—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study

sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip. GE credit: SciEng | SE.

### **16LC. Raptor Migration and Population Fluctuations (2)**

Fieldwork—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip. GE credit: SciEng | SE.

### **92. Internship in the Avian Sciences (1-12)**

Internship—3-36 hours. Prerequisite: sophomore standing preferred; consent of instructor. Internship on and off campus in poultry, game birds or exotic bird production, management and research; or in a business, industry, or agency concerned with these entities. Compliance with Internship Approval form essential. (P/NP grading only.)

### **98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

### **99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

## **Upper Division**

### **100. Avian Biology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 2A, 2B, Animal Science 2 preferred. Biology of domesticated poultry, specifically chickens and turkeys. Avian genetics, immunology, reproduction, growth and development, broiler and layer management. GE credit: SciEng | SE.—S. (S.) Zhou

### **103. Avian Development and Genomics (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 2A, 2B. Unique features of avian development and genomics: Incubation; Staging; Egg Structure/Function; Fertilization; Pre-oviposital; Oviposition; Cold Torpor; Post-oviposital Development; Organogenesis; Growth; Sexual Differentiation; Extraembryonic Membranes; Mortality/Hatching; Genome Organization; Comparative Avian Genomics; Telomere Biology; Sex Chromosomes/Sex Determination; Advanced Technologies; Genome Manipulation; Mutations. GE credit: SciEng | SE.—F. (F.) Delany

### **115. Raptor Biology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 2A or the equivalent. Study of birds of prey: classification, distribution, habits and habitats, migration, unique anatomical and physiological adaptations, natural and captive breeding, health and diseases, environmental concerns, conservation, legal considerations, rehabilitation, and falconry. Includes two Saturday field trips. Offered irregularly. GE credit: SciEng | SE.—Su. (Su.)

### **121. Avian Reproduction (2)**

Lecture—2 hours. Prerequisite: Biological Sciences 2A, 2B. Breeding cycles and reproductive strategies, egg and sperm formation, incubation, sexual development, imprinting, hormonal control of reproductive behavior and song. Species coverage includes wild and companion birds. Course has a physiological orientation. GE credit: SciEng | SE, SL.

### **123. Management of Birds (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 2A, 2B. Captive propagation of birds, including reproduction, genetic management, health, feeding, artificial incubation, artificial insemination, and related legal aspects, including trade and smuggling. Emphasis on exotic species and the role of captive propagation in conservation. GE credit: SciEng | SE, SL, WE.

### **149. Egg Production Management (2)**

Lecture—2 hours. Prerequisite: course 11 or consent of instructor. Management of commercial table egg flocks as related to environment, nutrition, disease

control, economics, housing, equipment, egg processing and raising replacement pullets. One Saturday field trip required. GE credit: SciEng | SE.

### **150. Nutrition of Birds (1)**

Lecture—1 hour. Prerequisite: Animal Biology 103 or Biological Sciences 103 (may be taken concurrently). Principles of nutrition specific to avian species, including feedstuffs, feed additives, nutrient metabolism, energy systems, and nutritional support of egg production and growth. Use of computers for feed formulation to support production. GE credit: QL, SciEng | SE.—Klasing

### **160. Designing and Performing Experiments in Avian Sciences (2)**

Laboratory—6 hours. Prerequisite: course 100 or Wildlife, Fish, and Conservation Biology 111 or consent of instructor. Experiments in current problems in avian biology. Introduction to experimental design. Students choose a project, design a protocol, perform an experiment and report their findings. May be repeated for credit with consent of instructor. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

### **170. Advanced Avian Biology (4)**

Lecture/discussion—3 hours; project—1 hour. Prerequisite: course 100 or Wildlife, Fish, and Conservation Biology 111. Ecology, behavior, functional morphology and life-history evolution of birds. Emphasis on the importance of body size as a principle determinant of most aspects of avian performance from lifespan to reproduction and species abundance. Analytical synthesis and critical thought emphasized. GE credit: SciEng | SE.

### **190. Seminar in Avian Sciences (1)**

Seminar—1 hour. Prerequisite: consent of instructor. May be repeated three times for credit. (P/NP grading only.)—S. (S.) Klasing

### **192. Internship in Avian Sciences (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor. Internship on and off campus in poultry, game birds or exotic bird production, management and research; or in a business, industry, or agency concerned with these entities. Compliance with Internship Approval form essential. (P/NP grading only.)

### **195. Topics in Current Research (1-3)**

Lecture/discussion—1-3 hours. Prerequisite: consent of instructor. Discussion of topics of current interest in avian sciences. May be repeated three times for credit.—F, W, S. (F, W, S.)

### **197T. Tutoring in Avian Sciences (1-3)**

Tutorial—1-3 hours. Prerequisite: consent of instructor. Tutoring of students in lower division avian sciences courses; weekly conference with instructors in charge of courses; written critiques of teaching procedures. (P/NP grading only.)

### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

## **Graduate**

### **203. Advanced Avian Development and Genomics (1)**

Discussion—1 hour. Prerequisite: graduate standing; concurrent enrollment in course 103. In consultation with the instructor, students develop a lecture and associated instructional materials, i.e., lesson plan, including justification, reading and presentation and evaluation aids. The topic must complement a topic covered in Avian Sciences 103. Offered irregularly.—F. (F.) Delany

### **290. Seminar (1)**

Seminar—1 hour. Reports and discussions of recent advances and selected topics of current interest in avian genetics, physiology, nutrition, and poultry technology.—F. (F.) Klasing

### **290C. Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Major professors lead research discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion. (S/U grading only.)—F, W, S. (F, W, S.)

### **297T. Supervised Teaching in Avian Sciences (1-4)**

Tutoring—1-4 hours. Prerequisite: graduate standing and consent of instructor. Tutoring of students in lower, upper division, and graduate courses in Avian Sciences; weekly conference with instructor in charge of course; written critiques of teaching methods in lectures and laboratories. (S/U grading only.)—F, W, S. (F, W, S.)

### **298. Group Study (1-5)**

Prerequisite: consent of instructor.

### **299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

## **Avian Sciences (A Graduate Group)**

Kirk Klasing, Ph.D., Chairperson of the Group

**Group Office.** 1249 Meyer Hall  
530-752-2382; <http://aviansciences.ucdavis.edu>

## **Faculty**

Richard Blatchford, Ph.D., Assistant Poultry Extension Specialist (*Animal Science*)

C. Christopher Calvert, Ph.D., Professor (*Animal Science*)

Thomas P. Coombs-Hahn, Ph.D., Associate Professor (*Neurobiology, Physiology, and Behavior*)

Mary E. Delany, Ph.D., Professor (*Animal Science*)

John M. Eadie, Ph.D., Professor (*Wildlife, Fish, and Conservation Biology, Animal Science*)

Michelle Hawkins, V.M.D., ABVP, Associate Professor (*Medicine and Epidemiology, School of Veterinary Medicine*)

Joshua M. Hull, Ph.D., Assistant Adjunct Professor (*Animal Science*)

Annie J. King, Ph.D., Professor (*Animal Science*)

Kirk C. Klasing, Ph.D., Professor (*Animal Science*)

Maja M. Makagon, Ph.D., Assistant Professor (*Animal Science*)

Joy A. Mench, Ph.D., Professor (*Animal Science*)

James R. Millam, Ph.D., Professor (*Animal Science*)

Gabrielle Nevitt, Ph.D., Professor

(*Neurobiology, Physiology, and Behavior*)  
Joanne R. Paul-Murphy, D.V.M., Ph.D., Professor (*Medicine & Epidemiology; School of Veterinary Medicine*)

Maurice E. Pitesky, D.V.M., M.P.V.M., Dipl ACVPM, Assistant Specialist in Cooperative Extension (*Population Health & Reproduction; School of Veterinary Medicine*)

Lisa A. Tell, D.V.M., Professor (*Medicine and Epidemiology, School of Veterinary Medicine*)

Huaijun Zhou, Ph.D., Associate Professor (*Animal Science*)

## **Emeriti Faculty**

Hans Abplanalp, Ph.D., Professor Emeritus

Dan Anderson, Ph.D., Professor Emeritus

Francine A. Bradley, Ph.D., Specialist Emeritus

Ralph A. Ernst, Ph.D., Specialist Emeritus

Peter Marler, Ph.D., Professor Emeritus

Barry W. Wilson, Ph.D., Professor Emeritus

## **Affiliated Faculty**

Lowell Ashbaugh, Ph.D., Associate Researcher Emeritus (*Crocker Nuclear Laboratory*)

Steven S. Cliff, Ph.D., Assistant Researcher (*Applied Science*)

Ann Dillner, Ph.D., Assistant Researcher

(*Crocker Nuclear laboratory*)

Richard L. Snyder, Ph.D., Biometeorology Specialist

Richard Anthony VanCuren, Ph.D., Professional Researcher (*Air Pollution Research Center*)

**Graduate Study.** The Graduate Group in Avian Sciences offers the M.S. degree program to students who wish to pursue specialized advanced work on avian species. Specializations students may choose include behavior, nutrition, physiology, reproduction, pathology, immunology, toxicology, food chemistry, management, ecology, genetics, comparative incubation, environmental physiology, and cellular and developmental studies using wild and domestic birds as experimental animals. Both master's degree plans, thesis or comprehensive examination, are available.

**Preparation.** Applicants should have undergraduate preparation in a field appropriate to the course of study selected, including courses in most of the following subjects: general biology, general and organic chemistry, biochemistry, avian biology, genetics, nutrition, physiology, and statistics.

**Graduate Advisers.** C.C. Calvert, J.M. Eadie, K.C. Klasing.

## Biochemistry and Molecular Biology

See **Biochemistry, Molecular, Cellular and Developmental Biology**, on page 189; **Molecular and Cellular Biology**, on page 463

## Biochemistry and Molecular Biology (A Graduate Group)

The Biochemistry and Molecular Biology program has merged with the Cell and Developmental Biology program to form Biochemistry, Molecular, Cellular, and Developmental Biology (BMCDB); see **Biochemistry, Molecular, Cellular and Developmental Biology**, on page 189.

**Group Office.** 227B Life Sciences  
530-752-9091;  
<http://biosci3.ucdavis.edu/GradGroups/BMCDB/>

## Biological Chemistry

See **Medicine, School of**, on page 427.

## Biochemistry, Molecular, Cellular and Developmental Biology

Daniel Starr, Ph.D., Chairperson of the Group  
530-754-6083

**Group Office.** 227B Life Sciences  
530-752-9091;  
<http://biosci3.ucdavis.edu/GradGroups/BMCDB/>

### Faculty

Iannis, Adamopoulos, Ph.D., Associate Professor (*Medical Division of Internal Medicine, Rheumatology*)  
Jawdat Al-Bassam, Ph.D., Assistant Professor (*Molecular and Cellular Biology*)  
John, Albeck, Ph.D., Assistant Professor (*Molecular and Cellular Biology*)  
F. Javier Arsuaga, Ph.D., Professor (*Mathematics, Molecular and Cellular Biology*)

- Shota Atsumi, Ph.D., Associate Professor (*Chemistry*)  
Enoch Baldwin, Ph.D., Associate Professor (*Molecular and Cellular Biology*)  
Jacqueline Barlow, Ph.D., Professor (*Microbiology and Molecular Genetics*)  
Peter Barry, Ph.D., Professor (*Pathology*)  
Andreas Baumler, Ph.D., Professor (*Medical Microbiology and Immunology*)  
Peter A Beal, Ph.D., Professor (*Chemistry*)  
Alan Bennett, Ph.D., Professor (*Plant Sciences*)  
Donald M. Bers, Ph.D., Professor (*Pharmacology*)  
Charles Bevins, Ph.D., Professor (*Medical Microbiology and Immunology*)  
Linda F. Bisson, Ph.D., Professor (*Viticulture and Enology*)  
Eduardo Blumwald, Ph.D., Professor (*Plant Sciences*)  
Laura Borodinsky, Ph.D., Assistant Professor (*Physiology and Membrane Biology*)  
Alexander Borowsky, Ph.D., Associate Professor (*Pathology*)  
Siobhan Mary, Brady, Ph.D., Associate Professor (*Plant Biology*)  
Nadean L. Brown, Ph.D., Associate Professor (*Cell Biology and Human Anatomy*)  
Sean Burgess, Ph.D., Professor (*Molecular and Cellular Biology*)  
Marie E. Burns, Ph.D., Professor (*Cell Biology and Human Anatomy*)  
Judy Callis, Ph.D., Professor (*Molecular and Cellular Biology*) Academic Senate Distinguished Teaching Award  
Kermi L. Carraway, Ph.D., Professor (*Cancer Center UCDMC*)  
Luis G. Carvajal-Carmona, Ph.D., Assistant Professor (*Biochemistry and Molecular Medicine*)  
Frederic Chedin, Ph.D., Associate Professor (*Molecular and Cellular Biology*)  
Hongwu Chen, Ph.D., Professor (*Biochemistry and Molecular Medicine*)  
Tsung-Yu Chen Ph.D., Professor (*Neurology*)  
Xinbin Chen, Ph.D., Professor and Director (*VM: Surgical and Radiological Science*)  
Hwai-Jong Cheng, Ph.D., Professor (*Neurobiology, Physiology, and Behavior, Pathology*)  
Joanna Chiu, Ph.D., Assistant Professor (*Entomology*)  
Sean Collins, Ph.D., Assistant Professor (*Microbiology and Molecular Genetics*)  
Gino A. Cortopassi, Ph.D., Professor (*VM: Molecular Biosciences*)  
Sheila David, Ph.D., Professor (*Chemistry*)  
Scott Dawson, Ph.D., Associate Professor (*Microbiology and Molecular Genetics*)  
Michael S. Denison, Ph.D., Professor (*Environmental Toxicology*)  
Megan Dennis, Ph.D., Assistant Professor (*Biochemistry and Molecular Medicine*)  
Elva Diaz, Ph.D., Associate Professor (*Medical Pharmacology and Toxicology*)  
Savithramma P, Dinesh-Kumar, Ph.D., Professor (*Plant Biology*)  
Georgia Drakakaki, Ph.D., Assistant Professor (*Pant Science*)  
Bruce Draper, Ph.D., Associate Professor (*Molecular and Cellular Biology*)  
JoAnne Engebrecht, Ph.D., Professor (*Molecular and Cellular Biology*)  
Marc Facciotti, Ph.D., Assistant Professor (*Biomedical Engineering*)  
Robert H. Fairclough, Ph.D., Associate Professor (*Neurology*)  
Michael Ferns, Ph.D., Professor (*Physiology and Membrane Biology, Anesthesiology and Pain Medicine*)  
Oliver Fiehn, Ph.D., Professor (*Molecular and Cellular Biology*)  
Diasynou Fioravante, Ph.D., Assistant Professor (*Neurobiology, Physiology, and Behavior*)  
Andrew Fisher, Ph.D., Professor (*Chemistry, Molecular and Cellular Biology*)  
Paul G. Fitzgerald, Ph.D., Professor (*Cell Biology and Human Anatomy*)  
Annaliese K. Franz, Ph.D., Associate Professor (*Chemistry*)  
Christopher Fraser, Ph.D., Assistant Professor (*Molecular and Cellular Biology*)
- J. David Furlow, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
Charles S. Gasser, Ph.D., Professor (*Molecular and Cellular Biology*)  
Angela Gelli, Ph.D., Associate Professor (*Medical Pharmacology and Toxicology*)  
Damian C. Genetos, Ph.D., Assistant Professor (*VM: Anatomy and Cell Biology*)  
Paramita Ghosh, Ph.D., Associate Professor (*Urology, Biochemistry and Molecular Medicine*)  
Cecilia Giulivi, Ph.D., Professor (*VM: Molecular Biosciences*)  
Thomas M. Glaser, Ph.D., Professor (*Cell Biology and Human Anatomy*)  
Aldrin Gomes, Ph.D., Assistant Professor (*Neurobiology, Physiology and Behavior, Physiology and Membrane Biology*)  
Qizhi Gong, Ph.D., Assistant Professor (*Cell Biology and Human Anatomy*)  
John Gray, Ph.D., Assistant Professor (*Neurology*)  
Paul Hagerman, Ph.D., Professor (*Biochemistry and Molecular Medicine*)  
Nobuko Hagiwara, Ph.D., Associate Professor (*Internal Medicine: Cardiovascular Medicine*)  
Fawaz Haj, Ph.D., Professor (*Nutrition*)  
Bruce D. Hammock, Ph.D., Professor (*Entomology and Nematology*) Academic Senate Distinguished Teaching Award  
John H. Harada, Ph.D., Professor (*Plant Biology*) Academic Senate Distinguished Teaching Award  
Dominik Haudenschild, Ph.D., Associate Professor (*Orthopedics, Biomedical Engineering*)  
Johannes W. Hell, Ph.D., Professor (*Pharmacology*)  
Wolf-Dietrich Heyer, Ph.D., Professor (*Microbiology and Molecular Genetics*)  
Henry Ho, Ph.D., Assistant Professor (*Cell Biology and Human Anatomy*)  
Mary Horne, Ph.D., Assistant Adjunct Professor (*Pharmacology*)  
Mark Huising, Ph.D., Assistant Professor (*Neurobiology, Physiology and Behavior, Physiology and Membrane Biology*)  
Neil Hunter, Ph.D., Professor (*Microbiology and Molecular Genetics, Cell Biology and Human Anatomy*)  
Kentaro Inoue, Ph.D., Professor (*Plant Sciences*)  
Yoshihiro Izumiya, Ph.D., Assistant Professor (*Dermatology*)  
Li-En Jao, Ph.D., Assistant Professor (*Cell Biology and Human Anatomy*)  
Celina Juliano, Ph.D., Assistant Professor (*Molecular and Cellular Biology*)  
Ken Kaplan, Ph.D., Professor (*Molecular and Cellular Biology*)  
Jinoh Kim, Ph.D., Associate Professor (*Pediatrics*)  
Paul Knoepfler, Ph.D., Associate Professor (*Cell Biology and Human Anatomy*)  
Anne Knowlton, Ph.D., Professor (*Cardiovascular Physiology, Pharmacology*)  
Artyom Kopp, Ph.D., Professor (*Population Biology, Evolution and Ecology*)  
Ian Korff, Ph.D., Professor (*Molecular and Cellular Biology*)  
Stephen C. Kowalczykowski, Ph.D., Distinguished Professor (*Microbiology and Molecular Genetics*)  
Anna La Torre, Ph.D., Assistant Professor (*Cell Biology and Human Anatomy*)  
J. Clark Lagarias, Ph.D., Distinguished Professor (*Molecular and Cellular Biology*)  
Janine LaSalle, Ph.D., Professor (*Microbiology*)  
Jerold A. Last, Ph.D., Professor (*Pulmonary Medicine*)  
Walter Leal, Ph.D., Professor (*Molecular and Cellular Biology*)  
Julie A. Leary, Ph.D., Professor (*Molecular and Cellular Biology, Chemistry*)  
Jian-Jian Li, Ph.D., Professor (*Radiation Oncology*)  
Su-Ju Lin, Ph.D., Professor (*Microbiology and Molecular Genetics*)  
Yu-Fung Lin, Ph.D., Associate Professor (*Physiology and Membrane Biology, Anesthesiology and Pain Medicine*)  
Bo Liu, Ph.D., Professor (*Plant Biology*)  
Su Hao Lo, Ph.D., Professor (*Biochemistry and Molecular Medicine*)

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;

ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience

Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience  
Quarter Offered: F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses

Susan E. Lott, Ph.D., Assistant Professor  
*(Population Biology, Evolution and Ecology)*  
 Shirley Luckhart, Ph.D., Professor  
*(Microbiology and Immunology)*  
 Veronica Martinez-Cerdeno, Ph.D., Assistant Professor  
*(Pathology)*  
 A. Kimberley McAllister, Ph.D., Professor  
*(Neurobiology, Physiology and Behavior)*  
 Richard J. McKenney, Ph.D., Assistant Professor  
*(Molecular and Cellular Biology)*  
 Francis J. McNally, Ph.D., Professor  
*(Molecular and Cellular Biology)*  
 Maria Mudryj, Ph.D., Professor  
*(Microbiology and Immunology)*  
 Lorena Navarro, Ph.D., Assistant Professor  
*(Microbiology and Molecular Genetics)*  
 Jan Nolta, Ph.D., Professor  
*(Hematology, Oncology)*  
 Alex Nord, Ph.D., Assistant Professor  
*(Neurobiology, Physiology and Behavior)*  
 Jodi M. Nunnari, Ph.D., Professor  
*(Molecular and Cellular Biology)*  
 Martha E. O'Donnell, Ph.D., Professor  
*(Physiology and Membrane Biology)*  
 Cassandra Ori-Mckenney, Ph.D., Professor  
*(Molecular and Cellular Biology)*  
 Rebecca Parales, Ph.D., Professor  
*(Microbiology and Molecular Genetics)*  
 John A. Payne, Ph.D., Professor  
*(Physiology and Membrane Biology)*  
 David Pleasure, Ph.D., Distinguished Professor  
*(Neurology)*

*(Plant Biology)*  
 Li Tian, Ph.D., Assistant Professor  
*(Plant Sciences)*  
 Lin Tian, Ph.D., Assistant Professor  
*(Neurobiology, Physiology, and Behavior, Physiology and Membrane Biology)*  
 Jim Trimmer, Ph.D., Professor  
*(Neurobiology, Physiology, and Behavior)*  
 Richard P. Tucker, Ph.D., Professor  
*(Cell Biology and Human Anatomy)*  
 Andrew T. Vaughan, Ph.D., Professor  
*(Radiation Oncology)*  
 John V. Voss, Ph.D., Professor  
*(Biochemistry and Molecular Medicine)*  
 Yu-Jui Yvonne Wan, Ph.D., Professor  
*(Pathology)*  
 David Wilson, Ph.D., Professor  
*(Molecular and Cellular Biology)*  
 Kevin Yang, Xiang, Ph.D., Professor  
*(Pharmacology)*  
 Lifeng Xu, Ph.D., Assistant Professor  
*(Microbiology and Molecular Genetics)*

Soichiro Yamada, Ph.D., Associate Professor  
*(Biomedical Engineering)*  
 Wei Yao, Ph.D., Associate Adjunct Professor  
*(Medical Science)*  
 Aiming Yu, Ph.D., Associate Professor  
*(Biochemistry and Molecular Medicine)*  
 Konstantinos Zarbalis, Ph.D., Assistant Professor  
*(Pathology)*  
 Philipp Zerbe, Ph.D., Assistant Professor  
*(Plant Biology)*  
 Min Zhao, Ph.D., Professor  
*(Dermatology, Ophthalmology)*  
 Chengji Zhou, Ph.D., Associate Professor  
*(Biochemistry and Molecular Medicine)*  
 Karen Zito, Ph.D., Associate Professor  
*(Neurobiology, Physiology, and Behavior)*  
**Graduate Study.** The Graduate Group in Biochemistry, Molecular, Cellular, and Developmental Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. While an M.S. may be obtained while pursuing a Ph.D. only Ph.D. applications will be accepted. Biochemistry, Molecular, Cellular, and Developmental Biology is a broad interdepartmental program.  
**Preparation.** Appropriate preparation is an undergraduate degree in a biological or physical science. Preparation should include a year of calculus, physics, general chemistry and organic chemistry, and courses in statistics, biochemistry, genetics and cell biology.  
**Graduate Advisers.** F. McNally (*Molecular and Cellular Biology*), E. Diaz (*Pharmacology*), R. Tucker (*Med: Cell Biology*), R. Fairclough (*Neurology*), T. Powers (*Molecular and Cellular Biology*), L. Rose (*Molecular and Cellular Biology*), J. Engebrecht (*Molecular and Cellular Biology*), C. Fraser (*Molecular and Cellular Biology*), E. Baldwin (*Molecular and Cellular Biology*), P. Knoepfle (*Med: Cell Biology*), K. Carraway (*Med: Biochem and Molecular Medicine*), K. Zito (*Center for Neuroscience*), D. Genetos (*Vet. Anatomy & Cell Biology*), M. Singer (*Microbiology and Molecular Genetics*), B. Draper (*Molecular and Cellular Biology*)

## Courses in Biochemistry, Molecular, Cellular and Developmental Biology (BCB)

### Graduate

**210. Molecular Genetics and Genomics (3)**  
 Lecture/discussion—3 hours. Prerequisite: Biological Sciences 101 and Molecular & Cellular Biology 121, or equivalent. Pass One restricted to graduate students. Emphasizes molecular genetic and genomic approaches to address fundamental biological questions. Introduces and emphasizes the strengths of prokaryotic and eukaryotic model systems and serves as building block for the BMCDB core courses, which use model systems to develop their themes.—F. (F.) Engebrecht

### 211. Macromolecular Structure and Interactions (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102, or the equivalent, or consent of instructor. Pass One restricted to graduate students. Conceptual and quantitative basis for macromolecular structure-function relationships. Investigation of the paradigm form follows function. Review of key elements of protein, nucleic acid, and membrane structure. Exploration of specific macromolecular associations by analyzing chemical structure and physical-chemical behavior. No credit for students that have taken course 221A.—F. (F.) Baldwin, Segal, Wilson

### 212. Cell Biology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 104, or equivalent, or consent of instructor. Pass One restricted to graduate students. Analysis of basic processes governing cell organization, division, and transport. Study of the integration and regulation of cell behavior in response to changes in cellular environment. No credit for students that have taken course 221D.—W. (W.) Al-Bassam, Kim, McNally, Powers

### 213. Developmental Biology (3)

Lecture—3 hours. Prerequisite: undergraduate biology course or consent of instructor. Pass One restricted to graduate students. Fundamental principles in embryonic development that guide application of modern cellular and genetic approaches to understand developmental mechanisms. Emphasis on experimental approaches used to critically address scientific questions.—W. (W.) Brady, Draper, Lott, Tucker

### 214. Molecular Biology (3)

Lecture—3 hours. Prerequisite: course 211, or equivalent, or consent of instructor. Pass One restricted to graduate students. Investigation of the basic cellular processes in prokaryotes and eukaryotes that govern the central dogma of molecular biology (DNA-RNA-protein). No credit for students that have taken course 221C.—S. (S.) Chedin, Fraser, Heyer

### 215. Graduate Reading Course (2)

Discussion—10 hours. Prerequisite: graduate standing or consent of instructor. Restricted to graduate students. Development of critical reading skills through study of major paradigm advances in specialized fields of biochemistry, molecular, cell, and developmental biology. Emphasis on active learning and student participation. Guided analysis of literature and major advances in field of study. May be repeated two times for credit when topic differs.—S. (S.) Chen, Fairclough, Genetos, Giulivi, Inoue, Vaughan

### 220L. Advanced Biochemistry Laboratory Rotations (5)

Laboratory—15 hours. Prerequisite: course 210 and 211 (may be taken concurrently) and 120L or the equivalent. Open to graduate students. Two five-week assignments in BMCDB research laboratories. Individual research problems with emphasis on methodological/procedural experience, experimental design, proposal writing and oral communication of results. May be repeated two times for credit.—F. W. (F. S.) Albeck, Baldwin, Haudenschild, Tian

### 251. Molecular Mechanisms in Early Development (3)

Lecture—3 hours. Prerequisite: graduate standing or consent of instructor; introductory background in developmental biology and/or cell biology recommended. Analysis of the early events of development including: germ cells and other stem cells, gametogenesis, meiosis, imprinting, fertilization, genetically-engineered organisms, egg activation and establishment of embryonic polarity with focus on cellular events including gene regulation and cell signaling. Offered in alternate years.—(F.) Draper

### 255. Molecular Mechanisms in Pattern Formation and Development (3)

Lecture—3 hours. Prerequisite: graduate standing or consent of instructor; introductory background in developmental biology and/or genetics recommended. Genetic and molecular analysis of mechanisms that control animal development after fertilization. Establishment of embryonic axes, cell fate and embryonic pattern; induction, apoptosis, tissue patterning. Critical reading of current literature in *C.elegans*, *Drosophila*, and mouse genetic model systems. Offered in alternate years.—F. Natzle, Rose

### 257. Cell Proliferation and Cancer Genes (3)

Lecture—1.5 hours; seminar—1.5 hours. Prerequisite: course 221C and 221D or equivalents. Genetic and molecular alterations underlying the conversion of normal cells to cancers, emphasizing regulatory mechanisms and pathways. Critical reading of the current literature and development of experimental approaches.—F. (F.) Carraway

### 290. Seminar (1)

Seminar—1 hour. Prerequisite: consent of instructor and/or graduate standing. Presentation and discussion of faculty and graduate-student research. (S/U grading only.)—F, W, S. (F, W, S.)

### 298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

**299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

## Biological and Agricultural Engineering

(College of Agricultural and Environmental Sciences and College of Engineering)

Bryan M. Jenkins, Ph.D., Chair of the Department

**Department Office.** 2030 Bainer Hall;  
530-752-0102;

<http://bae.engineering.ucdavis.edu>

**Faculty**

Gail M. Bornhorst, Ph.D., Assistant Professor

Juliana de Moura Bell, Ph.D., Assistant Professor  
(Food Science and Technology)

Irwin Donis-Gonzalez, Ph.D., Assistant Extension Specialist

Zhiliang (Julia) Fan, Ph.D., Associate Professor

Fadi A. Fathallah, Ph.D., Professor

D. Ken Giles, Ph.D., Professor

Mark E. Grismer, Ph.D., Professor  
(Land, Air and Water Resources)

Bryan M. Jenkins, Ph.D., Professor

Tina Jeoh, Ph.D., Associate Professor

Michael J. McCarthy, Ph.D., Professor  
(Food Science and Technology)

Nitin Nitin, Ph.D., Associate Professor  
(Food Science and Technology)

Ning Pan, Ph.D., Professor (Textiles and Clothing)

David C. Slaughter, Ph.D., Professor

Shrinivas K. Upadhyaya, Ph.D., Professor

Jean S. VanderGheynst, Ph.D., Professor

Stavros G. Vougioukas, Ph.D., Assistant Professor

Ruihong Zhang, Ph.D., Professor

**Emeriti Faculty**

William J. Chancellor, Ph.D., Professor Emeritus

Pictiaw (Paul) Chen, Ph.D., Professor Emeritus

Michael J. Delwiche, Ph.D., Professor Emeritus

Roger E. Garrett, Ph.D., Professor Emeritus

John R. Goss, M.S., Professor Emeritus

Bruce R. Hartsough, Ph.D., Professor Emeritus

David J. Hills, Ph.D., Professor Emeritus

John M. Krochta, Ph.D., Professor Emeritus

Miguel A. Mariño, Ph.D., Professor Emeritus

Kathryn McCarthy, Ph.D., Professor Emeritus

R. Larry Merson, Ph.D., Professor Emeritus

John A. Miles, Ph.D., Professor Emeritus

Stanton R. Morrison, Ph.D., Professor Emeritus

Raul H. Piedrahita, Ph.D., Professor Emeritus

Richard E. Plant, Ph.D., Professor Emeritus

James W. Rumsey, M.S., Senior Lecturer Emeritus

Thomas R. Rumsey, Ph.D., Professor Emeritus

Verne H. Scott, Ph.D., Professor Emeritus

R. Paul Singh, Ph.D., Distinguished Professor Emeritus

James F. Thompson, M.S., Extension Specialist Emeritus

Wesley W. Wallender, Ph.D., Professor Emeritus

Wesley E. Yates, M.S., Professor Emeritus

**Affiliated Faculty**

Tien-Chieh Hung, Ph.D., Assistant Adjunct Professor

Kurt Kornbluth, Ph.D., Assistant Adjunct Professor

Zhongli Pan, Ph.D., Adjunct Professor

Herbert Scher, Ph.D., Professional Researcher

Mir S. Shafii, Ph.D., Lecturer

**Major Programs and Graduate Study.** For the Bachelor of Science program, see the major in **Engineering: Biological and Agricultural**, on page 266; for graduate study, see also **Graduate Studies**, on page 120.

**Minor Programs.** The Department of Biological and Agricultural Engineering offers two minors through the College of Agricultural and Environmental Sciences: Geographic Information Systems and Precision Agriculture.

The minor in Geographic Information Systems is open to all majors, including those in engineering. This minor is for students interested in information processing of spatial data related to remote sensing for geographical and environmental planning and related areas.

The minor in Precision Agriculture is open to all majors, including those in engineering, and acquaints students with recent developments and their applications to agriculture, in geographic information systems, global positioning systems, and variable rate technologies.

The Department of Biological and Agricultural Engineering also administers three minors through the College of Engineering in Energy Science and Technology, Energy Efficiency, and Energy Policy.

**Courses.** Courses are listed under Applied Biological Systems Technology, and Engineering: Biological and Agricultural (Biological Systems Engineering).

## Biological Sciences

(College of Biological Sciences)

**Biology Academic Success Center (BASC).**  
1023 Sciences Laboratory Building; 530-752-0410;  
<http://biosci.ucdavis.edu>  
<http://basc.ucdavis.edu>

**Faculty**

The Biological Science major and the Bodega Marine Laboratory Spring Quarter Program are offered jointly by the departments of the college. The faculty in the college are members of the Departments of Evolution and Ecology; Microbiology; Molecular and Cellular Biology; Neurobiology, Physiology, and Behavior; Plant Biology. See each department for a list of their faculty.

**The Biological Sciences Major**

Departments of Evolution and Ecology; Microbiology and Molecular Genetics; Molecular and Cellular Biology; Neurobiology, Physiology, and Behavior; and Plant Biology

**The Program.** The Biological Sciences major is broad in concept, spanning the numerous core disciplines of biology. The Bachelor of Science (B.S.) and Bachelor of Arts (A.B.) programs includes preparatory work in mathematics, general and organic chemistry, physics, and introductory level biology, as well as upper division core classes emphasizing the breadth of biological sciences. Students in the B.S. degree program complete additional upper division coursework, for which they can choose classes from a variety of different areas such as molecular biology and genetics, animal behavior, plant growth and development, bioinformatics, marine biology, forensics, and microbiology. Students in the Bachelor of Arts (A.B.) program can pursue upper division coursework outside of the biological sciences. Research and internships are encouraged in both programs.

**Career Alternatives.** Both degree programs prepare students for admission to graduate schools or professional schools, leading to either a variety of professional health careers or further study in basic and applied areas of biology. They provide suitable preparation for careers in teaching, biological and biotechnological research with various governmental agencies or private companies, government regulatory agencies, environmental consulting, biological illustration and writing, pharmaceutical sales, biological/environmental law, and biomedical engineering.

**A.B. Major Requirements:**

UNITS

**Preparatory Subject Matter.....45-57**

Biological Sciences 2A-2B-2C ..... 15  
Chemistry 2A-2B ..... 10  
Chemistry 8A-8B or  
118A-118B-118C ..... 6-12  
Mathematics 17A-17B-17C or 21A-21B  
(21C recommended) ..... 8-12  
Physics 7A-7B-7C ..... 12

Mathematics 17A-17B or 21A-21B ..... 8

Physics 1A-1B or 7A-7B-7C ..... 6-12

(Recommended: Chemistry 2C and Math

17C or 21C)

**Depth Subject Matter.....28-36**

Biological Sciences 101 ..... 4  
Biological Sciences 105  
(or 102 + 103) ..... 3-6  
Statistics 100 ..... 4  
Evolution: Evolution and Ecology 100 ..... 4  
\* Select one course from each topic.  
\* Ecology: Environmental Science and Policy  
100 or Evolution and Ecology  
101 ..... 4  
\* Microbiology: Food Science and  
Technology 104; Microbiology 102, 162,  
170 ..... 3-4  
\* Animal Physiology, Behavior or  
Development: Biological Sciences 104,  
Molecular and Cellular Biology 150;  
Neurobiology, Physiology and Behavior 100,  
101, 102, 141 ..... 3-5  
\* Plant Physiology or Development: Plant  
Biology 105\*\*\*, 111, 112, 113,  
116\*\*\* ..... 3-5

**Laboratory Requirement**

Select course(s) for a minimum total of 6 hours/week of laboratory or field work from the list of courses below.

\*\* PLB 105 or PLB 116 may fulfill the topic area and laboratory requirement.

Courses with 3 hours lab or field work/week (select two): Evolution and Ecology 110, 117, 119, 140, 180A, 180B; Exercise Biology 104L, 115; Microbiology 103L; Neurobiology, Physiology and Behavior: 100L, 101L, 121L, 123; Plant Biology 117, 119, other courses with approval of the master adviser.

Courses with 6 hours lab or field work/week (select one): Biological Sciences 180L; Evolution and Ecology 105, 106, 108, 112L, 114; Exercise Biology 106L; Food Science and Technology 104L; Microbiology 104L, 105L; Molecular and Cellular Biology 120L, 140L, 160L; Neurobiology, Physiology and Behavior 111L, 141P; Plant Biology 102, 105\*\*, 116\*\*, 148; other courses with approval of the master adviser.

**Total Units for the Major .....73-93****B.S. Major Requirements:**

UNITS

**Preparatory Subject Matter .....56-66**

Biological Sciences 2A-2B-2C ..... 15  
Chemistry 2A-2B-2C ..... 15  
Chemistry 8A-8B or  
118A-118B-118C ..... 6-12  
Mathematics 17A-17B-17C or 21A-21B  
(21C recommended) ..... 8-12  
Physics 7A-7B-7C ..... 12

**Depth Subject Matter.....42-51**

Genetics: Biological Sciences 101 ..... 4  
Biochemistry: Biological Sciences 105 (or  
102 + 103) ..... 3-6  
Cell Biology: Biological Sciences 104 ..... 3  
Statistics 100 ..... 4  
\* Select one course from each topic.  
\* Evolution: Evolution and Ecology 101 or  
Environmental Science Policy 100 ..... 4  
\* Microbiology: Microbiology 102, 104,  
162, 170; Food Science & Technology  
104 ..... 3-5  
\* Animal Physiology, Behavior or  
Development: Neurobiology, Physiology and  
Behavior 100, 101, 102, 141; Molecular  
and Cellular Biology 150 ..... 3-5  
\* Plant Physiology or Development: Plant  
Biology 105\*\*, 111, 112, 113,  
116\*\* ..... 3-5

**Laboratory Requirement**

Select course(s) for a minimum total of 6 hours/week of laboratory or field work from the list of courses below.

\*\* PLB 105 or PLB 116 may also be used as a restricted elective, unless already used as the Plant Physiology or Development topic course. All other laboratory courses may be used as a restricted elective.

Courses with 3 hours lab or field work/week (select two): Evolution and Ecology 110, 117, 119, 140, 180A, 180B; Exercise Biology 104L, 115; Microbiology 103L; Neurobiology, Physiology and Behavior 100L, 101L, 121L, 123; Plant Biology 119; other courses with approval of the master adviser.

Courses with 6 hours lab or field work/week (select one): Biological Sciences 180L; Evolution and Ecology 105, 106, 108, 112L, 114; Exercise Biology 106L; Food Science and Technology 104L; Microbiology 104L, 105L; Molecular and Cellular Biology 120L, 140L, 160L; Neurobiology Physiology and Behavior 111L, 141P; Plant Biology 102, 105\*\*, 108, 116\*\*, 148; other courses with approval of the master adviser.

#### **Restricted Electives.....11**

Select at least 3 or more courses for a minimum of 11 units from the list of Approved Upper Division Restrictive Electives and/or laboratory courses.

Students may choose any combination of approved courses that align with their academic or career objectives, or choose from a list of sample themes provided on the BASC website at <http://basc.ucdavis.edu/>. Up to 3 of the 11 units may be fulfilled by approved seminar or research courses.

#### **Total Units for the Major .....98-117**

#### **Approved Upper Division Restricted Electives:**

Animal Genetics ANG 105, 107  
Animal Science ANS 104, 119, 123, 131, 142, 170  
Anthropology ANT 151, 152, 153, 154A, 154B, 157  
Anatomy, Physiology and Cell Biology APC 100  
Avian Sciences AVS 100, 150  
Biomedical Engineering BIM 117, 140  
Biological Sciences BIS all upper division courses\*\*\*  
Biotechnology BIT 150, 160, 161A, 161B, 171  
Cell Biology and Human Anatomy CHA 101, 101L  
Chemistry CHE 104, 107A, 107B, 108, 130A, 130B, 150  
Engineering: Computer Science ECS 124  
Education EDU 100, 181  
Environmental Horticulture ENH 102, 105  
Entomology ENT all upper division courses\*\*\*  
Environmental Science and Policy ESP 110, 116N, 121, 123, 124, 150A, 150B, 150C, 151, 151L, 155  
Environmental Toxicology ETX 101, 102B, 103A, 104  
Evolution and Ecology EVE all upper division courses\*\*\*  
Exercise Biology EXB 101, 103, 106, 106L, 110, 111, 124  
Food Science and Technology FST 102A, 104  
Geology GEL 107, 107L, 108, 116N, 141, 141L, 144, 150A, 150B, 150C  
Mathematics MAT 124  
Molecular and Cellular Biology MCB all upper division courses\*\*\*  
Microbiology MIC all upper division courses\*\*\*  
Medical Microbiology MMI 188  
Neurobiology, Physiology, and Behavior NPB all upper division courses\*\*\*  
Philosophy PHI 108  
Plant Biology PLB all upper division courses\*\*\*

Plant Pathology PLP 120, 130  
Plant Sciences PLS 130, 131, 135, 142, 144, 150, 153, 154, 157, 158  
Pathology, Microbiology, and Immunology PMI 126, 126L, 128  
Psychology PSC 121, 122, 123, 124  
Sociology SOC 154  
Soil Science SSC 111  
Science and Technology Studies STS 108, 129, 130A, 131, 164, 180  
University Writing Program UWP 102B, 104T, 111C, 112A  
Wildlife, Fish, and Conservation Biology WFC 100, 101, 110, 110L, 111, 111L, 120, 120L, 121, 122, 130, 134, 134L, 136, 140, 141, 151, 154, 157  
\*\*\* Courses numbered 198 do not fulfill restricted elective units without adviser approval. Discussion section courses, those noted with a "D" do not fulfill restricted elective units. Only 3 units of approved seminar or research courses can be applied to the restrictive electives

#### **Approved Seminar/Research Courses**

Courses in ABI, ANS, BIS, BIT, ENH, ENT, ETX, EVE, EXB, MCB, MIC, NPB, PLB, PLP, PLS, VEN, WFC numbered 189, 190/190C, 192, 194H, 199, as well as BIS 122P, 123, 133; EVE 111; MIC 191; MCB 138, 139, 148, 158, 178, 191, 193; NPB 139, 159, 169

#### **Minor Program Requirements:**

	UNITS
<b>Biological Sciences .....</b>	<b>18</b>

Complete at least three units from each of the five numbered groups to total at least 18 units. Appropriate alternative courses may be used with approval of an adviser.

(1) *Cell and Molecular Biology*: Biological Sciences 101, 102, 105 ..... 3-4  
(2) *Animal Biology*: Anthropology 151, Anatomy, Physiology and Cell Biology 100/ Neurobiology, Physiology, and Behavior 123; Entomology 100; Evolution and Ecology 105, 112 and 112L, 134; Nematology 100, 110; Neurobiology, Physiology, and Behavior 100, 101, 102, 117; Wildlife, Fish, and Conservation Biology 110, 111, 120..... 2-5  
(3) *Microbiology*: Microbiology 101, 102, 162; Pathology, Microbiology, and Immunology 128; Plant Biology/Plant Pathology 148..... 3-5  
(4) *Plant Biology*: Environmental and Resource Sciences/Plant Sciences 144; Plant Biology 105, 111, 112, 116, 126; Plant Biology/Plant Pathology 148; Plant Sciences 141, 171..... 3-5  
(5) *Evolution and Ecology*: Anthropology 151, 152, 154; Entomology 100; Evolution and Ecology 100, 101, 108, 115, 117, 119, 138, 140, 147; Plant Biology 102, 108, 117, 119, 143; Plant Pathology 150; Plant Sciences 142, 146; Wildlife, Fish, and Conservation Biology 151 ..... 3-5  
Additional courses (if necessary) from above numbered groups to reach 18 units.

**Advisors and Advising.** Information on the Biological Sciences major or minor can be obtained at the Biology Academic Success Center (BASC) in 1023 Sciences Laboratory Building; 530-752-0410; <http://basc.ucdavis.edu/>.

**Citation for Outstanding Performance.** The College of Biological Sciences confers Citations for Outstanding Performance on undergraduates majoring in Biological Sciences who have demonstrated superior academic performance and individual achievement in research. Students who wish to be considered for a citation must first meet or exceed a specified grade point average and participate in an appropriate research project.

**Teaching Credential Subject Representative.**  
Associate Director of Teacher Education (School of

Education); see the Teaching Credential/M.A. Program on page 124.

**Bodega Marine Laboratory Program**  
See also Biological Sciences, *Bodega Marine Laboratory Program*, on page 197.

<http://bml.ucdavis.edu/>

A full quarter of undergraduate course work in marine biology is available each spring quarter at the Bodega Marine Laboratory, located in Bodega Bay, California. Course offerings include lecture and laboratory instruction in the developmental biology and physiological adaptation of marine organisms, and population biology and ecology; a weekly colloquium; and an intensive individual research experience under the direction of laboratory faculty (Biological Sciences courses BIS 122, 122P, 123, 199; Neurobiology, Physiology, and Behavior NPB 141, 141P). This is a 15-unit program and course offerings and instructors may vary from year to year.

The program is residential, with students housed on the laboratory grounds. Participants are assessed a room and board fee in addition to standard campus registration fees. An application is required. Obtain forms from the Bodega Marine Laboratory website listed above. Applications are due January 31 for spring quarter. Additional information on the Bodega Marine Laboratory Program is available at the Biology Academic Success Center (BASC) in 1023 Sciences Laboratory Building, or directly from Bodega Marine Laboratory, P.O. Box 247, Bodega Bay, CA 94923 707-875-2211.

#### **Courses in Biological Sciences (BIS)**

##### **Lower Division**

##### **2A. Introduction to Biology: Essentials of Life on Earth (5)**

Lecture—3 hours; discussion—2 hours. Essentials of life including sources and use of energy, information storage, responsiveness to natural selection and cellularity. Origin of life and influence of living things on the chemistry of the Earth. Not open for credit to students who have completed course 1A with a grade of C- or better. GE credit: SciEng | SE.—F, W, S, Su. {F, W, S, Su.}

##### **2B. Introduction to Biology: Principles of Ecology and Evolution (5)**

Lecture—3 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: grade of C- in course 1A or 2A. Introduction to basic principles of ecology and evolutionary biology, focusing on the fundamental mechanisms that generate and maintain biological diversity across scales ranging from molecules and genes to global processes and patterns. Not open for credit for student who have completed Biological Sciences 1B with a grade of C- or better. GE credit: SciEng | QL, SE, SL, VL.—F, W, S, Su. {F, W, S, Su.}

##### **2C. Introduction to Biology: Biodiversity and the Tree of Life (5)**

Lecture—4 hours; laboratory—3 hours. Prerequisite: course 1B or 2B completed with a C- or better. Introduction to organismal diversity, using the phylogenetic tree of life as an organizing theme. Lectures and laboratories cover methods of phylogenetic reconstruction, current knowledge of the tree of life, and the evolution of life's most important and interesting innovations. Not open for credit to students who have completed course 1C with a grade of C- or better. GE credit: SciEng | OL, QL, SE, SL, VL.—F, W, S, Su. {F, W, S, Su.}

##### **5. Exploring Biological Sciences (1)**

Seminar—1 hour. Prerequisite: consent of instructor. Enrollment limited to first year CBS students. Introduction to biology at UC Davis through discussions with faculty and speakers from industry and medicine. (P/NP grading only.)—F, W, S. {F, W, S.}

##### **10. Everyday Biology (4)**

Lecture—3 hours; discussion—1 hour. Everyday biological concepts using contemporary readings for non-scientists. Key topics include: personal genomics; food and health; climate and evolution; brain biology and the law. Innovative projects apply bio-

logical concepts to current events. For students not specializing in biology. Not open for credit to students who have completed course 2A, or 2B, or 2C, or 10V or Nematology 10V or equivalent. GE credit: SciEng, Wrt | SE, SL, WE.—F, W, S. (F, W, S.)

### **11. Issues in the Life Sciences (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: enrollment limited to BUP students, consent of instructor. The range of subjects and approaches in the field of biology, including both basic and applied research topics.—F. (F.)

### **11L. Basic Life Sciences Laboratory (1)**

Laboratory—6 hours. Prerequisite: enrollment limited to BUP students; consent of instructor required. Basic laboratory skills in life sciences research, including microbiology, molecular biology, and genetics.—Su. (Su.)

### **20Q. Modeling in Biology (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: Mathematics 16B (may be taken concurrently). Introduction to the application of quantitative methods to biological problems. Students will use a mathematical software package to tackle problems drawn from all aspects of biology. Offered irregularly.—Mogilner, Sutter

### **92. Internship in Biological Sciences (1-12)**

Internship—3-36 hours. Prerequisite: lower division standing; consent of instructor. Restricted to lower division standing. (P/NP grading only.)

### **98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

### **99. Special Study for Undergraduates (1-5)**

Prerequisite: lower division standing; consent of instructor. Restricted to lower division standing. (P/NP grading only.)

## **Upper Division**

### **101. Genes and Gene Expression (4)**

Lecture—4 hours. Prerequisite: course 2A and 2B; Chemistry 8A or 118A or 128A; Statistics 100 or 13 or 102 or 130A (Statistics 100 preferred). Nucleic acid structure and function; gene expression and its regulation; replication; transcription and translation; transmission genetics; molecular evolution. GE credit: SciEng | QL, SE, SL.—F, W, S, Su. (F, W, S, Su.) Brady, Comai, Dvorak, Ellefson-Crowder, Engebrecht, Kliebenstein, Langley, Lott, Nord, Rodriguez, Ross-Iberra, Turelli

### **101D. Genes and Gene Expression**

#### **Discussion (1)**

Discussion—1 hour. Prerequisite: course 101 (concurrently); consent of instructor. Discussion and problem solving related to fundamental principles of classical and molecular genetics as presented in course 101. (P/NP grading only.)—F, W, S. (F, W, S.) Brady, Comai, Dvorak, Ellefson-Crowder, Engebrecht, Kliebenstein, Langley, Lott, Nord, Rodriguez, Ross-Iberra, Turelli

### **102. Structure and Function of Biomolecules (3)**

Lecture—3 hours. Prerequisite: course 1A or 2A; Chemistry 8B or 118B or 128B. Structure and function of macromolecules with emphasis on proteins, catalysis, enzyme kinetics, lipids, membranes, and proteins as machines. Only one unit of credit for students who have completed Animal Biology 102 & 1.5 units of credit for students who have completed Biological Science 105. GE credit: SciEng | QL, SE.—F, W, S, Su. (F, W, S, Su.) Cheng, Gasser, Hilt, Leal, Monfared

### **103. Bioenergetics and Metabolism (3)**

Lecture—3 hours. Prerequisite: course 102. Fundamentals of the carbon, nitrogen, and sulfur cycles in nature, including key reactions of biomolecules such as carbohydrates, amino acids, lipids, and nucleotides, and of energy production and use in different types of organisms. Principles of metabolic regulation. 1.5 units of credit for student who has completed course 105; 1 unit of credit if students who

has completed Animal Biology 103. GE credit: SciEng | SE.—F, W, S, Su. (F, W, S, Su.) Callis, Fiehn, Hilt, Inoue, Monfared, Zerbe

### **104. Cell Biology (3)**

Lecture—3 hours. Prerequisite: course 101; 102 or 105. Membrane receptors and signal transduction; cell trafficking; cell cycle; cell growth and division; extracellular matrix and cell-cell junctions; cell development; immune system. GE credit: SciEng | SE.—F, W, S. (F, W, S.) Carrasco, Dinesh-Kumar, S. Lin, B. Liu, McNally, Privalsky, Starr, Xu

### **105. Biomolecules and Metabolism (3)**

Lecture—3 hours. Prerequisite: courses 1A, 1B, and 1C, or 2A, 2B, and 2C; Chemistry 8B or 118B or 128B. Fundamentals of biochemical processes, with emphasis on protein structure and activity; energy metabolism; catabolism of sugars, amino acids, and lipids; and gluconeogenesis. One and one half units of credit for students who have completed course 102 or 103; no credit for students who have completed both course 102 and 103; one unit of credit for students who have completed Animal Biology 102 or 103; no credit for students who have completed both Animal Biology 102 and 103. GE credit: SciEng | SE, QL.—F, W, S. (F, W, S.) Hilt, Thig

### **122. Population Biology and Ecology (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: courses 1A, 1B, 1C, or 2A, 2B, 2C; residence at Bodega Marine Laboratory required. Biological and physical processes affecting plant and animal populations in the rich array of habitats at the Bodega Marine Laboratory ecological preserve. Emphasis on field experience, with complementing lectures to address population and community processes. See Bodega Marine Laboratory Program. GE credit: SciEng | OL, QL, SE, SL, VL, WE.—S. (S.) Morgan

### **122P. Population Biology and Ecology/Advanced Laboratory Topics (5)**

Laboratory—12 hours; discussion—1 hour. Prerequisite: course 122 concurrently. Residence at Bodega Marine Laboratory required. Training in scientific research, from hypothesis testing to publication, including methods of library research. Research related to topic covered in course 122. Final presentation both oral and written. See Bodega Marine Laboratory Program. GE credit: SciEng | SE, VL, WE.—S. (S.) Morgan

### **123. Undergraduate Colloquium in Marine Science (1)**

Seminar—1 hour. Prerequisite: enrolled student at the Bodega Marine Laboratory. Series of weekly seminars by recognized authorities in various disciplines of marine science from within and outside the UC system. Includes informal discussion with speaker. Course will be held at Bodega Marine Laboratory. (P/NP grading only.) (See above description for Bodega Marine Laboratory Program.)—S. (S.) Cherr, Morgan

### **124. Coastal Marine Research (3)**

Laboratory—6 hours; fieldwork—6 hours; laboratory/discussion—1 hour. Prerequisite: upper division standing or consent of instructor; concurrent enrollment in at least one course from Environmental Science and Policy 124, 152, Evolution and Ecology 106, 110, 114; residence at or near Bodega Marine Lab required. Student must complete the application at <http://www.bml.ucdavis.edu>. Independent research on topics related to the accompanying core Bodega Marine Laboratory summer courses. Students will select one instructor to be primary mentor, but integrative topics that draw on the expertise of several BML faculty members will be encouraged. May be repeated two times for credit. GE credit: SciEng | OL, QL, SE, VL, WE.—Su. (Su.) Hill, Gaylord, Largier, Sanford

### **132. Introduction to Dynamic Models in Modern Biology (4)**

Lecture—3 hours; laboratory—2 hours. Prerequisite: Mathematics 16C, Statistics 13, one lower division course in biology, or the equivalents. Dynamic modeling in the biological sciences, including matrix

models, difference equations, differential equations, and complex dynamics. Examples include classic models in ecology, cell biology, physiology, and neuroscience. Emphasis on understanding models, their assumptions, and implications for modern biology. GE credit: SciEng, Wrt | QL, SE, SL, VL, WE.—Grosberg

### **133. Collaborative Studies in Mathematical Biology (3)**

Lecture/discussion—3 hours. Prerequisite: Mathematics 16ABC or the equivalent, one course from course 1A, 1B, 1C, 2A, 2B, 2C, 10 or the equivalent in biology, consent of instructor. Interdisciplinary research and training that uses mathematics and computation to solve current problems in biology. May be repeated six times for credit. Offered irregularly. GE credit: SciEng | QL, SE, SL, VL, WE.

### **134. Systems Biology: From Biological Circuits to Biological Systems (2)**

Lecture/discussion—2 hours; term paper. Prerequisite: course 101 and one course from Molecular and Cellular Biology 121, 161 or Plant Biology 113, Mathematics 16ABC or 17ABC; or consent of instructor. Applying systems theory to understand the properties of biological networks in a variety of model organisms. Emphasis on both local biological circuits, and genome-scale biological networks. Topics include network motifs, robustness, modeling, emergent properties and integration of networks. GE credit: SciEng | OL, QL, SE, VL—Brady

### **180L. Genomics Laboratory (5)**

Lecture—2 hours; laboratory—6 hours; discussion—1 hour. Prerequisite: course 181; course 183 (may be taken concurrently); Molecular and Cellular Biology 182. Computational approaches to model and analyze biological information about genomes, transcriptomes, and proteomes. Topics include genome assembly and annotation, mRNA and small RNA profiling, proteomics, protein-DNA and protein-protein interactions, network analysis, and comparative genomics. Computer programming experience not required. Students who have received credit for taking Computer Science Engineering 124 or Biotechnology 150 will receive 3 units for completing course 180L. GE credit: SciEng | QL, SE, VL.—S. (S.) Brady, Dawson, Dinesh-Kumar, Harada, Korf, Maloof

### **181. Comparative Genomics (3)**

Lecture—3 hours. Prerequisite: course 101. Comparison of genomes at the population and species level. Genomic techniques for mapping disease (and other) genes, reconstruction of evolutionary history and migration patterns, determination of gene function, prediction of organismal traits, and metagenomics: determination of community composition and function. GE credit: SciEng | QL, SE, SL.—F. (F.) Dawson, Maloof

### **183. Functional Genomics (3)**

Lecture—3 hours. Prerequisite: course 101; course 102 or 105 recommended. Overview of genomic methodologies and key biological findings obtained using genome-wide analyses. RNA profiling, small RNAs, epigenomics, chromatin immunoprecipitation, protein-DNA interactions, proteomics and network analysis. GE credit: SciEng | QL, SE, VL.—S. (S.) Brady, Maloof

### **192. Internship in Biological Sciences (1-12)**

Internship—3-36 hours. Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

### **194H. Research Honors (2)**

Independent study—6 hours. Prerequisite: senior standing. Students majoring in Biological Sciences who have completed two quarters (3-5 units per quarter) of 199 and who qualify for the honors program as defined by the current catalog. Opportunity for Biological Sciences majors to pursue intensive research culminating in the writing of a senior thesis with the guidance of faculty advisers. (P/NP grading only.) GE credit: SE, WE.

### 195A. Science Teaching Internship Program (4)

Lecture/discussion—2 hours; internship—6 hours. Prerequisite: upper division standing in a science major or consent of instructor. Major in science; junior or senior status (based on units); application and interview; class size limited to 24 students. Basic teaching techniques including lesson planning, classroom management, and presentation skills. Interns spend time in K-12 science classrooms working with a master teacher observing, assisting with labs and activities, managing students, and teaching lessons. (P/NP grading only.) Offered irregularly.

### 195B. Science Teaching Internship (1-5)

Internship—3-15 hours. Prerequisite: course 195A. Reinforcement of teaching techniques learned in 195A with additional classroom experiences in K-12 science classrooms working with a master teacher observing, assisting with labs and activities, managing students, and teaching lessons. May be repeated one time for credit with consent of instructor. (P/NP grading only.)

### 197T. Tutoring in Biological Sciences (1-5)

Discussion—2-6 hours. Prerequisite: upper division standing and consent of instructor. Assisting the instructor by tutoring students in one of the Biological Sciences' regular courses. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

### 199. Special Study in Biological Sciences (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.) Cherr, Morgan

## Graduate

### 298. Group Study (1-5)

Prerequisite: consent of instructor. College of Biological Sciences staff members may offer group study courses under this number.

## Biomedical Engineering (A Graduate Group)

J. Kent Leach, Ph.D., Chairperson of the Group  
530-754-9149

**Group Office.** 2316 Genome and Biomedical Sciences Facility 530-752-2611;

## Faculty

Ralph C. Aldredge, III, Ph.D., Professor  
(Mechanical and Aerospace Engineering)  
Kyriacos Athanasiou, Ph.D., Distinguished Professor  
(Biomedical Engineering, Orthopaedic Surgery)  
Sharon Aviran, Ph.D., Assistant Professor  
(Biomedical Engineering)  
Keith Baar, Ph.D., Associate Professor  
(Physiology & Membrane Biology, Neurobiology, Physiology, and Behavior)  
Ramsey D. Badawi, Ph.D., Associate Professor  
(Diagnostic Radiology, Biomedical Engineering)  
Stanley Benedict, Ph.D., Professor  
(Radiation Oncology)  
Craig J. Benham, Ph.D., Professor  
(Biomedical Engineering, Mathematics)  
John M. Boone, Ph.D., Professor  
(Diagnostic Radiology, Biomedical Engineering)  
James Chan, Ph.D., Assistant Professor  
(Pathology and Laboratory Medicine)  
Abhijit J. Chaudhari, Ph.D., Assistant Professor  
(Diagnostic Radiology)  
Ye Chen-Izu, Ph.D., Associate Professor  
(Biomedical Engineering, Pharmacology)  
Simon R. Cherry, Ph.D., Distinguished Professor  
(Biomedical Engineering, Radiology)

Blaine Christiansen, Ph.D., Assistant Professor  
(Orthopaedic Surgery, Medicine)  
Colleen Clancy, Ph.D., Professor (Pharmacology)  
Cristina Davis, Ph.D., Professor  
(Mechanical and Aerospace Engineering)  
Sonja Dieterich, Ph.D., Associate Professor  
(Radiation Oncology)  
Yong Duan, Ph.D., Professor  
(Biomedical Engineering)  
Marc T. Facciotti, Ph.D., Assistant Professor  
(Biomedical Engineering)  
Fadi A. Fathallah, Ph.D., Professor  
(Biological and Agricultural Engineering)  
Katherine W. Ferrara, Ph.D., Professor  
(Biomedical Engineering)  
David Fyhrie, Ph.D., Professor (Orthopaedic Surgery, Medicine, Biomedical Engineering)  
Jeffery C. Gibeling, Ph.D., Professor  
(Chemical Engineering and Materials Science)  
Mark Goldman, Ph.D., Professor  
(Neurobiology, Physiology, and Behavior)  
Frederic Gorin, Ph.D., Professor  
(Neurology)  
Eleonora Grandi, Ph.D., Assistant Professor  
(Pharmacology)  
Dominik R. Haudenschild, Ph.D., Associate Professor  
(Orthopaedic Surgery)  
David A. Hawkins, Ph.D., Professor  
(Neurobiology, Physiology, and Behavior)  
Volkmar Heinrich, Ph.D., Associate Professor  
(Biomedical Engineering)  
Johannes W. Hell, Ph.D., Professor (Pharmacology)  
Stephen Howell, M.D., Adjunct Professor  
(Biomedical Engineering)  
Thomas Huser, Ph.D., Adjunct Professor  
(Internal Medicine)  
Sanjay Joshi, Ph.D., Associate Professor  
(Mechanical and Aerospace Engineering)  
Thomas Jue, Ph.D., Professor (Biological Chemistry)  
Patrice Koehl, Ph.D., Associate Professor  
(Computer Science)  
Gerald J. Kost, Ph.D., M.D., Professor (Pathology)  
Tonya L. Kuhl, Ph.D., Professor (Chemical Engineering and Materials Science, Biomedical Engineering)  
Kit S. Lam, Ph.D., Professor  
(Biochemistry & Molecular Medicine)  
J. Kent Leach, Ph.D., Professor (Biomedical Engineering, Orthopaedic Surgery)  
Jamal Lewis, Ph.D., Assistant Professor  
(Biomedical Engineering)  
Angelique Louie, Ph.D., Professor  
(Biomedical Engineering)  
Laura Marcu, Ph.D., Professor  
(Biomedical Engineering, Neurological Surgery)  
Dennis L. Matthews, Ph.D., Professor  
(Neurological Surgery)  
Alexander Mogilner, Ph.D., Professor (Mathematics)  
Christopher J. Murphy, D.V.M., Ph.D., Professor  
(Surgical & Radiological Sciences)  
Nitin Nitin, Ph.D., Associate Professor  
(Food Science and Technology, Biological and Agricultural Engineering)  
Jan Nolta, Ph.D., Professor (Internal Medicine)  
Tingrui Pan, Ph.D., Associate Professor  
(Biomedical Engineering)  
Atul Parikh, Ph.D., Professor  
(Biomedical Engineering, Chemical Engineering and Materials Science)  
Anthony G. Passerini, Ph.D., Associate Professor  
(Biomedical Engineering)  
Jinyi Qi, Ph.D., Professor (Biomedical Engineering)  
Bahram Ravani, Ph.D., Professor (Mechanical and Aerospace Engineering)  
A. Hari Reddi, Ph.D., Professor (Orthopaedic Surgery, Medicine)  
Alexander Revzin, Ph.D., Professor  
(Biomedical Engineering)  
Crystal M. Ripplinger, Ph.D., Assistant Professor  
(Pharmacology)  
David Rocke, Ph.D., Distinguished Professor  
(Biomedical Engineering, Public Health Sciences)  
Leonor Saiz, Ph.D., Associate Professor (Biomedical Engineering)  
Nesrin Sarigul-Klijn, Ph.D., Professor  
(Mechanical and Aerospace Engineering)

Michael A. Savageau, Ph.D., Distinguished Professor (Biomedical Engineering)  
J. Anthony Seibert, Ph.D., Professor  
(Diagnostic Radiology)  
Erkin Seker, Ph.D., Assistant Professor  
(Electrical and Computer Engineering)  
Eduardo Silva, Ph.D., Assistant Professor  
(Biomedical Engineering)  
Scott I. Simon, Ph.D., Professor  
(Biomedical Engineering)  
Vivek J. Srinivasan, Ph.D., Assistant Professor  
(Biomedical Engineering)  
Susan M. Stover, D.V.M., Ph.D., Professor  
(Anatomy, Physiology and Cell Biology)  
Julie Sutcliffe, Ph.D., Associate Professor (Biomedical Engineering, Medicine: Hematology and Oncology)  
Ilias Tagkopoulos, Ph.D. Assistant Professor  
(Computer Science, Genome Center)  
Yoshikazu Takada, M.D., Professor (Dermatology)  
Cheemeng Tan, Ph.D., Assistant Professor  
(Biomedical Engineering)  
Alice Tarantal, Ph.D., Professor (Pediatrics, Cell Biology and Human Anatomy, Medicine)  
Sebastian Wachsmann-Hogiu, Ph.D., Associate Professor  
(Pathology and Laboratory Medicine)  
John Werner, Ph.D., Professor (Ophthalmology)  
Jeffrey Walton, Ph.D., Associate Research Physicist  
(NMR Facility)  
Soichiro Yamada, Ph.D., Associate Professor  
(Biomedical Engineering)  
Tokiharu Yamamoto, Ph.D., Assistant Professor  
(Radiation Oncology)

## Emeriti Faculty

Maury L. Hull, Ph.D., Distinguished Professor  
Emeritus (Mechanical and Aerospace Engineering, Biomedical Engineering)

**Graduate Study.** The Graduate Group in Biomedical Engineering offers programs of study and research leading to the M.S. and Ph.D. degrees. The programs of study prepare students for professional work in the effective integration of engineering with medical and biological sciences. Research strengths lie in the areas of imaging, tissue engineering and regenerative medicine, sensor and MEMs systems, cellular and molecular mechanics, computational modeling, targeted therapeutics, orthopedic biomechanics, biofluids and transport, and human movement. This broad interdepartmental program is best suited for students who are capable of and comfortable with considerable independence. Each student, together with an adviser, defines a specific course of study suited to individual goals.

**Preparation.** The Group regards strong competence in mathematics and engineering as necessary for successful completion of study. Prior course work in these areas is emphasized in the evaluation of applications. Some undergraduate training can be acquired after admission to the Group, but it may require an additional year of study.

**Courses.** See [Engineering: Biomedical](#), on page 271.

## Biophysics (A Graduate Group)

John Voss, Ph.D., Chairperson of the Group

## Faculty

Jawdat Al-Bassam, Ph.D., Assistant Professor  
(Molecular and Cellular Biology)  
James B. Ames, Ph.D., Associate Professor  
(Chemistry)  
Enoch Baldwin, Ph.D., Associate Professor  
(Molecular and Cellular Biology)  
R. David Britt, Ph.D., Professor (Chemistry)  
Tsung-Yu Chen, Ph.D., Professor (Neurology)

R. Holland Cheng, Ph.D., Professor (*Molecular and Cellular Biology*)  
 Colleen Clancy, Ph.D., Associate Professor (*Pharmacology*)  
 Daniel L. Cox, Ph.D., Professor (*Physics*)  
 Stephen P. Cramer, Ph.D., Professor (*Chemistry*)  
 Yong Duan, Ph.D., Associate Professor (*Applied Science*)  
 Robert H. Fairclough, Ph.D., Associate Professor (*Neurology*)  
 Roland Faller, Ph.D., Professor (*Chemical and Material Engineering*)  
 Katherine Ferrara, Ph.D., Professor (*Biomedical Engineering*)  
 Andrew J. Fisher, Ph.D., Professor (*Chemistry, Molecular and Cellular Biology*)  
 Alla F. Fomina, Ph.D., Assistant Professor (*Physiology and Membrane Biology*)  
 David Goodin, Ph.D., Professor (*Chemistry*)  
 Volkmar Heinrich, Ph.D., Assistant Professor (*Biomedical Engineering*)  
 Thomas Jue, Ph.D., Professor (*Med: Biochemistry and Molecular Medicine*)  
 Patrice Koehl, Ph.D., Associate Professor (*Computer Science Engineering*)  
 Stephen C. Kowalczykowski, Ph.D., Professor (*Microbiology and Molecular Genetics*)  
 Denise Krol, Ph.D., Professor (*Applied Science*)  
 Tonya L. Kuhl, Ph.D., Associate Professor (*Biomedical Engineering, Chemical and Material Engineering*)  
 Delmar Larsen, Ph.D., Assistant Professor (*Chemistry*)  
 Janine M. LaSalle, Ph.D., Professor (*Microbiology and Immunology*)  
 Julie A. Leary, Ph.D., Professor (*Chemistry, Molecular and Cellular Biology*)  
 Gang-Yu Liu, Ph.D., Professor (*Chemistry*)  
 Marjorie L. Longo, Ph.D., Professor (*Chemical and Material Engineering*)  
 Laura Marcu, Ph.D., Associate Professor (*Biomedical Engineering*)  
 Atul N. Parikh, Ph.D., Professor (*Biomedical Engineering, Chemical and Material Engineering*)  
 Subhadip Raychaudhuri, Ph.D., Assistant Professor (*Biomedical Engineering*)  
 Niels G. Ronbeck-Jensen, Ph.D., Professor (*Mathematics, Applied Science, Mechanical and Aerospace Engineering*)  
 Jon Sack, Ph.D., Assistant Professor (*Anesthesiology and Pain Medicine, Physiology and Membrane Biology*)  
 Leonor Saiz, Ph.D., Associate Professor (*Biomedical Engineering*)  
 Daisuke Sato, Ph.D., Assistant Professor (*Pharmacology*)  
 Erkin Seker, Ph.D., Assistant Professor (*Electrical and Computer Engineering*)  
 Justin Siegel, Ph.D., Assistant Professor (*Chemistry, Biochemistry and Molecular Medicine*)  
 Scott I. Simon, Ph.D., Professor (*Biomedical Engineering*)  
 Rajiv R. Singh, Ph.D., Professor (*Physics*)  
 Alexei Stuchebrukhov, Ph.D., Professor (*Chemistry*)  
 Ilias Tagkopoulos, Ph.D., Associate Professor (*Computer Science Engineering*)  
 Steven M. Theg, Ph.D., Professor (*Plant Biology*)  
 Michael D. Toney, Ph.D., Professor (*Chemistry*)  
 John C. Voss, Ph.D., Professor (*Biochemistry and Molecular Medicine*)  
 David K. Wilson, Ph.D., Professor (*Molecular and Cellular Biology*)  
 Vladimir Yarov-Yarovoy Ph.D., *[Biochemistry and Molecular Medicine, Anesthesiology and Pain Medicine, Physiology and Membrane Biology and Membrane Biology]*

## Emeriti Faculty

Morton Bradbury, Ph.D., Professor Emeritus  
 John H. Crowe, Ph.D., Professor Emeritus  
 William H. Fink, Ph.D., Professor Emeritus  
 Jerry L. Hedrick, Ph.D., Professor Emeritus  
*Distinguished Graduate Mentoring Award*  
 Gerd N. LaMar, Ph.D., Professor Emeritus  
 Carl W. Schmid, Ph.D., Professor Emeritus

Yin Yeh, Ph.D., Professor Emeritus

**Graduate Study.** The Biophysics Graduate Group offers a program leading to a Ph.D. degree in biophysics. The interdisciplinary program prepares students to conduct independent research at the interface of physics, chemistry, and biology. Faculty members have particular research interests in structural biology, membrane dynamics, mechanisms of catalysis and energy transduction, computational biology, theory, neuroscience, and imaging. Students choose from the broad biophysics research areas a research laboratory that matches their interests and career goals.

## Courses in Biophysics (BPH)

### Graduate

#### 200A. Current Techniques in Biophysics (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102 or equivalent; Chemistry 110A or equivalent. Current techniques in Biophysics. Topics in 200A include mathematical methods, modeling, mass spectrometry, stochastic process, scanning probe microscopy, electron microscopy, fluorescence, membrane diffusion/mechanics, and single particle tracking. (S/U grading only.)—W. (W.) Faller

#### 200B. Current Techniques in Biophysics (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102 or equivalent; Chemistry 110A. Current Techniques in Biophysics. Topics include protein folding, membrane structure and dynamics, Raman spectroscopy, fluorescence resonance energy transfer, time resolved fluorescence, quantum dot, fluorescence imaging, esr, high resolution nmr, and in vivo nmr. (S/U grading only.)—S. (S.) Jue

#### 200LA. Biophysics Laboratory (3)

Laboratory—18 hours. Prerequisite: course 200 (may be taken concurrently). One five-week laboratory assignment in the research laboratory of a Biophysics Graduate Group faculty member. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated for credit four times.—F, W, S. (F, W, S.)

#### 200LB. Biophysics Laboratory (6)

Laboratory—two 18-hour rotations. Prerequisite: course 200 (may be taken concurrently). Two five-week laboratory assignments in the research laboratories of Biophysics Graduate Group faculty members. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated for credit two times.—F, W, S. (F, W, S.)

#### 231. Biological Nuclear Magnetic Resonance (3)

Lecture—3 hours. Prerequisite: Molecular and Cellular Biology 221A or the equivalent or consent of instructor. Principles and applications of magnetic resonance in biomedicine. Fundamental concepts and the biophysical basis for magnetic resonance applications in areas of tissue characterization/imaging, metabolic regulation, and cellular bioenergetics. (Same course as Biological Chemistry 231.) Offered in alternate years.—S. (S.) Jue

#### 241. Membrane Biology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102, 103, 104 or consent of instructor. Advanced topics on membrane biochemistry and biophysics. Relationship of the unique properties of biomembranes to their roles in cell biology and physiology. (Same course as Molecular and Cellular Biology 241.)—S. (S.) Crowe, Longo, Voss

#### 255. Biophotonics in Medicine and the Life Sciences (3)

Lecture/discussion—3 hours. Prerequisite: Physics 108 and Biology 101-105; Biomedical Engineering 202 highly recommended; graduate standing. Introduction to the science and technology of biomedical optics and photonics, with an overview of applications in medicine and the life sciences. Emphasis on research supported by the NSF Center for Biophotonics at UC Davis Medical Center. (Same course as Applied Science 255 and Biomedical Engineering 255.)—W. (W.) Chuang, Matthews

tonics at UC Davis Medical Center. (Same course as Applied Science 255 and Biomedical Engineering 255.)—W. (W.) Chuang, Matthews

#### 271. Optical Methods in Biophysics (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: Biological Sciences 102 or the equivalent, Applied Science Engineering 108B or the equivalent, and Chemistry 110A or the equivalent. Principal optical techniques used to study biological structures and their related functions. Specific optical techniques useful in the studies of protein-nucleic acid, protein-membrane and protein-protein interactions. Biomedical applications of optical techniques. (Same course as Applied Science Engineering 271.)—S. (S.) Huser, Parikh, Yeh

#### 290. Biophysics Seminar (1)

Seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Presentation of current research by experts in biophysics. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### 290C. Research Conference in Biophysics (1)

Discussion—1 hour. Prerequisite: graduate standing in Biophysics and/or consent of instructor; course 299 concurrently. Presentation and discussion of faculty and graduate-student research in biophysics. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### 293. Introduction to Research Topics (1)

Seminar—1 hour. Presentation of current research activities of the Biophysics Graduate Group faculty. Facilitation of students in developing their research interest, and promoting collegial interactions. May be repeated one time for credit if topics differ. (S/U grading only.)—F. (F.)

#### 298. Group Study (1-5)

(S/U grading only.)

#### 299. Research (1-12)

(S/U grading only.)

## Biostatistics (A Graduate Group)

Bruce Rannala, Ph.D. (*Evolution and Ecology*), Chairperson of the Group

**Group Office.** 4118 Mathematical Sciences Building 530-692-5194; <http://biostat.ucdavis.edu/>

### Faculty

Sharif Aly, Ph.D., Assistant Professor (*Population Health & Reproduction*)  
 Rahman Azari, Ph.D., Lecturer (*Statistics*)  
 Heejung Bang, Ph.D., Associate Professor (*Public Health Sciences*)  
 Laurel Beckett, Ph.D., Professor (*Public Health Sciences*)  
 Prabir Burman, Ph.D., Professor (*Statistics*)  
 Hao Chen, Ph.D., Assistant Professor (*Statistics*)  
 Andrew J. Clifford, Ph.D., Professor (*Nutrition*)  
 Christiana Drake, Ph.D., Professor (*Statistics*)  
 Thomas B. Farver, Ph.D., Professor (*Population Health and Reproduction*)  
 Emilio Ferrer, Ph.D., Associate Professor (*Psychology*)  
 Valdimir Filkov, Ph.D., Associate Professor (*Computer Science*)  
 Danielle Harvey, Ph.D., Associate Professor (*Public Health Sciences*)  
 Fushing Hsieh, Ph.D., Professor (*Statistics*)  
 Ana-Maria Iosif, Ph.D., Assistant Professor (*Public Health Sciences*)  
 Jiming Jiang, Ph.D., Professor (*Statistics*)  
 Philip H. Kass, Ph.D., Professor (*Population Health and Reproduction*)  
 Kyoungmi Kim, Ph.D., Associate Professor (*Public Health Sciences*)  
 Ian Korf, Ph.D., Assistant Professor (*Evolution and Ecology*)  
 Thomas Lee, Ph.D., Professor (*Statistics*)  
 Chin-Shang Li, Ph.D., Assistant Professor (*Public Health Sciences*)

**Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;**

**ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience**

**Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience**

**Quarter Offered:** F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses

Diana Miglioretti, Ph.D., Professor  
(*Public Health Sciences*)  
Brian Moore, Ph.D., Assistant Professor  
(*Evolution and Ecology*)  
Hans-Georg Müller, M.D., Ph.D., Professor  
(*Statistics*)  
Debashis Paul, Ph.D., Associate Professor (*Statistics*)  
Jie Peng, Ph.D., Professor (*Statistics*)  
Lihong Qi, Ph.D., Associate Professor  
(*Public Health Sciences*)  
Gerald Quon, Ph.D., Assistant Professor  
(*Molecular and Cellular Biology*)  
Bruce Rannala, Ph.D., Professor  
(*Evolution and Ecology*)  
David M. Rocke, Ph.D., Professor  
(*Public Health Sciences*)  
Daniel Runcie, Ph.D., Assistant Professor  
(*Plant Sciences*)  
Daniel J. Tancredi, Ph.D., Associate Professor  
(*Pediatrics*)  
Chih-Ling Tsai, Ph.D., Professor  
(*Graduate School of Management*)  
Jane-Ling Wang, Ph.D., Professor (*Statistics*)

**Graduate Study.** Biostatistics is a field of science that uses quantitative methods to study life sciences related problems that arise in a broad array of fields. The program provides students with, first, solid training in the biostatistical core disciplines and theory; second, with state-of-the art knowledge and skills for biostatistical data analysis; third, substantial exposure to the biological and epidemiological sciences; and fourth, with a strong background in theoretical modeling, statistical techniques and quantitative as well as computational methods. Programs of study and research are offered leading to the M.S. and Ph.D. degrees. The program prepares students for interdisciplinary careers ranging from bioinformatics, environmental toxicology and stochastic modeling in biology and medicine to clinical trials, drug development, epidemiological and medical statistics. The program draws on the strengths of the Biostatistics faculty at UC Davis.

**Preparation.** Students should have one year of calculus; a course in linear algebra or one year of biological course work; facility with a programming language; and upper-division work in at least one of Mathematics, Statistics and Biology.

**Graduate Adviser.** Jie Peng (*Statistics*)

## Courses in Biostatistics (BST)

### Graduate

#### 222. Biostatistics: Survival Analysis (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: Statistics 131C. Incomplete data; life tables; nonparametric methods; parametric methods; accelerated failure time models; proportional hazards models; partial likelihood; advanced topics. (Same course as Statistics 222.)—F. (S.)

#### 223. Biostatistics: Generalized Linear Models (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: Statistics 131C. Likelihood and linear regression; generalized linear model; Binomial regression; case-control studies; dose-response and bioassay; Poisson regression; Gamma regression; quasi-likelihood models; estimating equations; multivariate GLMs. (Same course as Statistics 223.)—W.

#### 224. Analysis of Longitudinal Data (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course/Statistics 222, 223, Statistics 232B or consent of instructor. Standard and advanced methodology, theory, algorithms, and applications relevant for analysis of repeated measurements and longitudinal data in biostatistical and statistical settings. (Same course as Statistics 224.)—S. (S.)

#### 225. Clinical Trials (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course/Statistics 223 or consent of instructor. Basic statistical principles of clinical designs, including bias, randomization, blocking, and masking. Practical applications of widely-used designs, including dose-finding, comparative and

cluster randomization designs. Advanced statistical procedures for analysis of data collected in clinical trials. (Same course as Statistics 225.) Offered in alternate years.—S.

#### 226. Statistical Methods for Bioinformatics (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 131C or consent of instructor; data analysis experience recommended. Standard and advanced statistical methodology, theory, algorithms, and applications relevant to the analysis of omics data. (Same course as Statistics 226.) Offered in alternate years.—(W.)

#### 252. Advanced Topics in Biostatistics (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 222, 223. Biostatistical methods and models selected from the following: genetics, bioinformatics and genomics; longitudinal or functional data; clinical trials and experimental design; analysis of environmental data; dose-response, nutrition and toxicology; survival analysis; observational studies and epidemiology; computer-intensive or Bayesian methods in biostatistics. May be repeated for credit with consent of adviser when topic differs. (Same course as Statistics 252.) Offered in alternate years.—S.

#### 290. Seminar in Biostatistics (1)

Seminar—1 hour. Restricted to graduate standing. Seminar on advanced topics in the field of biostatistics. Presented by members of the Biostatistics Graduate Group and other guest speakers. May be repeated for up to 12 units of credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### 298. Directed Group Study (1-5)

Prerequisite: consent of instructor.

#### 299. Special Study for Biostatistics Graduate Students (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

#### 299D. Dissertation Research (1-12)

Prerequisite: advancement to Candidacy for Ph.D. and consent of instructor. Research in biostatistics under the supervision of major professor. (S/U grading only.)

## Biotechnology

(College of Agricultural and Environmental Sciences)

**Faculty.** Faculty includes members of the Departments of Animal Science, on page 162; Engineering: Chemical Engineering, on page 276; Computer Science, on page 230; Engineering: Biological and Agricultural, on page 266; Food Science and Technology, on page 340; Land, Air and Water Resources, on page 391; Plant Pathology, on page 513; Plant Sciences, on page 514; Viticulture and Enology, on page 584; and the College of Biological Sciences, on page 191.

### The Major Program

Every living organism, from the smallest and most primitive bacteria to every plant, insect, animal or human being, contains DNA as the primary genetic material. DNA directs all cellular processes, creating the incredible variety and diversity of living organisms in the biosphere. Biotechnology focuses on the mechanics of life processes and their application. Biotechnology means "life technology" and represents an integrated, multidisciplinary field, with a profound impact today on almost every aspect of human endeavor.

**Preparatory Requirements.** UC Davis students who wish to change their major to Biotechnology must complete the following courses (representing the subject areas of Biological Sciences, Chemistry, and Mathematics) with a grade point average of at least 2.500 in each subject area. All of these courses must be taken for a letter grade:

UNITS
Biological Sciences 2A, 2B, 2C ..... 15
Chemistry 2A, 2B, 2C ..... 15

Mathematics, one of the following groups: ..... 6-8  
Mathematics 16A, 16B; or Mathematics 17A, 17B; or Mathematics 21A, 21B

**The Program.** In the first two years, students develop a strong and general background in biological science with an emphasis on fundamental concepts and basic principles of genetics, molecular biology and cell biology. Four options, Animal Biotechnology, Plant Biotechnology, Fermentation/Microbial Biotechnology, and Bioinformatics, provide in-depth training and specialized knowledge in an aspect of biotechnology. Each option has a strong laboratory component to reinforce the theoretical concepts. Students also do an internship in a biotechnology company or university or government laboratory.

**Internships and Career Opportunities.** In the last decade, more industries are turning to biotechnology to solve problems and improve products, creating a growing job market for individuals trained in biotechnology in the agricultural, food and beverage, health care, chemical, pharmaceutical and biochemical, and environmental and bioremediation industries.

Graduates trained in the technologies designed for biotechnology will find their training applicable to advanced research in molecular biology, genetics, biochemistry, and the plant and animal sciences.

### B.S. Major Requirements:

	UNITS
<b>Preparatory Subject Matter</b> ..... 57-69	
Biological Sciences 2A-2B-2C..... 15	
Chemistry 2A-2B-2C..... 15	
Chemistry 8A, 8B or 118A, 118B, 118C or 128A, 128B, 128C, 129A..... 6-12	
Mathematics 16A, 16B, or 17A, 17B, or 21A, 21B ..... 6-8	
Physics 7A-7B..... 8	
Plant Sciences 120 or Statistics 100..... 4	
Biotechnology 1 ..... 4	
Select one course from:	
University Writing Program 101, 102A, 102B, 102C, 102D, 102E, 102F, 102G, 102H, 102I, 102J, 102K, 102L, 104A, 104B, 104C, 104D, 104E, 104F, 104I, 104T (may overlap with college composition requirement, may be waived by passing the upper division composition exam)	

#### Depth Subject Matter ..... 16-20

Biological Sciences 101 .....	4
Biological Sciences 104 .....	3
Molecular and Cellular Biology 121 or 161 .....	3
Biotechnology 171 .....	3
Internship or independent research; course 192 or 199 or Biotechnology 189L..... 3	
Undergraduate research proposal: Biotechnology 188 (optional) .....	3
Honors undergraduate thesis (optional) .... 1	

#### Areas of Specialization (choose one)

#### Fermentation/Microbiology Biotechnology Option ..... 38-45

Microbiology 104; Biological Sciences 102 and 103, or Animal Biology 102 and 103; Microbiology 104L or Food Science and Technology 104L; Molecular and Cellular Biology 160L or Biotechnology 161A; One of Microbiology 115, 120, 140, 150, 170, Plant Pathology 130; and a second course from the previous list or one of Biological Sciences 181, 183, Molecular and Cellular Biology 182 .....	23-30
Restricted Electives .....	15

Select from:	
Biological Sciences 132, 181, 183, Biotechnology 150, 161B, 188, Chemistry 107A, 107B, 130A, 130B, Engineering: Chemical 161C, 161L, Engineering: Computer Science 124, 129, Evolution and Ecology 100, Food Science and	

Technology 102A, 102B, 104, 104L, 110A, 110B, 123, 123L; Microbiology 105, 105L, 115, 120, 140, 150, 155L, 162, 170; Molecular and Cellular Biology 120L, 164, 182; Plant Pathology 130, 140; Plant Sciences 174, Viticulture and Enology 124, 124L, 128, 135

#### **Plant Biotechnology Option ..... 38-45**

Microbiology 101, Molecular and Cellular Biology 126, Plant Sciences 152, Biotechnology 160, 161A, 161B, Biochemistry: Biological Sciences 105; or Biological Sciences 102 and 103; or Animal Biology 102 and 103 ..... 28-35 Restricted Electives ..... 10 Select at least one course from each of the following areas:

(a) *Pests, Pathogens and Production:* Biological Sciences 181, 183, Biotechnology 150, 188, Chemistry 130A, 130B, Engineering: Computer Science 124, 129, Entomology 110, Evolution and Ecology 100, Microbiology 115, 162, Molecular and Cellular Biology 120L, 164, 182, Nematology 100 or 110, Plant Pathology 120, 123, 130, 140, Plant Biology 143, Plant Sciences 153, 154, 172, 173, 174

(b) *Growth and Development:* Biotechnology 150, 188, Chemistry 130A, 130B, Evolution and Ecology 100, Microbiology 115, Molecular and Cellular Biology 120L, Plant Biology 105, 111, 112, 113, Plant Pathology 140, Plant Sciences 100A, 100AL, 100B, 100BL, 100C, 100CL, 157, 158

#### **Animal Biotechnology Option ..... 37-45**

Microbiology 101, Animal Genetics 111, Neurobiology, Physiology, and Behavior 101, Molecular and Cellular Biology 150 or 163, 182, Animal Science 170, Biochemistry: Biological Sciences 105; or Biological Sciences 102 and 103; or Animal Biology 102 and 103 ..... 27-35 Restricted Electives ..... 10 Select at least one course from each of the following areas:

(a) *Animal Cell Biology/Microbiology/ Immunology:* Biological Sciences 183, Biotechnology 150, 161A, 161B, 188, Evolution and Ecology 100, Medical Microbiology 188, Microbiology 115, 162, Molecular and Cellular Biology 120L, 160L, Pathology, Microbiology, and Immunology 126, 126L, 127, 128, Molecular, Cellular, and Integrative Physiology 200L, Neurobiology, Physiology, and Behavior 132, Plant Pathology 140

(b) *Animal Reproduction and Breeding:* Animal Genetics 107, Animal Science 131, 140, Avian Sciences 121, Biological Sciences 181, Evolution and Ecology 102, Molecular and Cellular Biology 164, Neurobiology, Physiology, and Behavior 121, 121L, Plant Pathology 140

#### **Bioinformatics Option ..... 38-45**

Biological Sciences 180L, Biological Sciences 181 or 183, Microbiology 101, Engineering: Computer Science 20, 30, Engineering: Computer Science 124 or 129, Molecular and Cellular Biology 182, Biochemistry: Biological Sciences 105; or Biological Sciences 102 and 103; or Animal Biology 102 and 103 ..... 31-38 Restricted Electives ..... 7

Select from: Animal Genetics 212, Biological Sciences 132, 181, 183, Biotechnology 188, Engineering: Computer Science 40, 50, 60, 122A, 124, 129, 140A, 150, 154A, 166, Evolution and Ecology 100, 102, 103, Mathematics 124, Microbiology 115, Neurobiology,

Physiology, and Behavior 132, Statistics 130A, 130B, 131A, 131B, 141

#### **Total Units for the Major ..... 110-135**

**Major Adviser:** J.I. Yoder (*Plant Sciences*) in 101 Asmundson Hall

**Advising Center** for the major is located in 1220 Plant and Environmental Sciences 530-752-1715.

#### **Courses in Biotechnology (BIT)**

Courses in Biotechnology (BIT) are listed below; courses in Biotechnology; Design Emphasis (NEB) follow, see Courses in Biotechnology; Design Emphasis (NEB), on page 197.

#### **Lower Division**

##### **1Y. Introduction to Biotechnology (4)**

Lecture—2 hours; web virtual lecture—1 hour; discussion—1 hour. Principles and technologies of biotechnology as applied to agriculture, the environment, and medicine. Business plans and presentation pitches for new biotechnology products. Bioinformatics approaches exploring genomic databases and DNA manipulations in silica. GE credit: SciEng | SE. —S. (S.) Dandekar, Yoder

##### **92. Internship in Biotechnology (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience on or off campus in subject area pertaining to biotechnology or in a business, industry or agency associated with biotechnology. Internship supervised by faculty member in the animal or plant sciences. (P/NP grading only.)

##### **99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **Upper Division**

##### **150. Applied Bioinformatics (4)**

Lecture—2 hours; laboratory/discussion—2 hours. Prerequisite: Computer Science Engineering 10 or 15 or Plant Science 21; Biological Sciences 101 and 104; Plant Science 120 or Statistics 13 or Statistics 100. Limited enrollment. Concepts and programs needed to apply bioinformatics in biotechnology research. Sequence analysis and annotation and use of plant and animal databases for students in biological and agricultural sciences. Two units of credit for students who have completed Computer Science Engineering 124. GE credit: SciEng | SE, VL.—Runcie

##### **160. Principles of Plant Biotechnology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A or 2A; Biological Sciences 101 or Plant Sciences 152. Principles and concepts of plant biotechnology including recombinant DNA technology, molecular biology, genomics, cell and tissue culture, gene transfer and crop improvement strategies using transgenic crops. Not open for credit to students who have completed Plant Biology 160. (Former course Plant Biology 160.) GE credit: SciEng | SE. —W. (W.) Dandekar

##### **161A. Genetics and Biotechnology Laboratory (6)**

Lecture—3 hours; laboratory—9 hours. Prerequisite: Plant Sciences 152 or Biological Sciences 101; consent of instructor. Techniques of genetic analysis at the molecular level including recombinant DNA, gene mapping and basic computational biology. Not open for credit to students who have completed Plant Biology 161A. GE credit: SciEng | SE. —W. (W.) Beckles

##### **161B. Plant Genetics and Biotechnology Laboratory (4)**

Lecture—1 hours; laboratory—8 hours. Prerequisite: Plant Sciences 152 or Biological Sciences 101; consent of instructor. Advanced techniques of genetic analysis at the molecular and cellular levels, including transformation, gene expression and analysis of transgenic plants. Not open for credit to students who have taken Plant Biology 161B. (Former course Plant Biology 161B.) GE credit: SciEng | SE, SL. —S. (S.) Bennett, Blumwald

#### **171. Professionalism and Ethics in Genomics and Biotechnology (3)**

lecture—1 hour; discussion—2 hours. Prerequisite: upper division standing in a natural science major. Real and hypothetical case studies to illustrate ethical issues in genomics and biotechnology. Training and practice in difficult ethical situations and evaluating personal and social consequences. GE credit: SciEng | SE, SL, WE. —F, W, S. (F, W, S.) Bennett, Bradford, Yoder

#### **188. Undergraduate Research Proposal (3)**

Lecture/discussion—3 hours. Prerequisite: upper division standing. Preparation and review of a scientific proposal. Problem definition, identification of objectives, literature survey, hypothesis generation, design of experiments, data analysis planning, proposal outline and preparation. (Same course as Plant Sciences 188.) GE credit: SciEng, Wrt | OL, SE, WE. —S. (S.) Kliebenstein

#### **189L. Laboratory Research in Genomics and Biotechnology (2-5)**

Laboratory—3-12 hours; discussion—1 hour. Prerequisite: course 188 and consent of instructor. Formulating experimental approaches to current questions in biotechnology; performance of proposed experiments. May be repeated for credit up to 12 units. (P/NP grading only.)

#### **192. Internship in Biotechnology (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience on or off campus in a subject area pertaining to biotechnology or in a business, industry or agency associated with biotechnology. Internship supervised by faculty member in the animal or plant sciences. (P/NP grading only.)

#### **194H. Honors Thesis in Biotechnology (1-2)**

Independent Study—3-6 hours. Prerequisite: senior standing in Biotechnology with 3.250 GPA or higher and completion of courses 188 and 189L. Independent study of selected topics under the direction of a member or members of the staff. Completion will involve the writing of a senior thesis. (Deferred grading only, pending completion of sequence.) (P/NP grading only.) GE credit: SciEng | SE, WE. —F, W, S, Su. (F, W, S, Su.) Yoder

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **Courses in Biotechnology; Design Emphasis (NEB)**

#### **Graduate**

##### **263. Biotechnology Fundamentals and Application (2)**

Lecture—2 hours. Prerequisite: Biological Sciences 101, 102 and Microbiology 102 or consent of instructor; must be a graduate student in good standing. Fundamentals of molecular biology and chemical engineering involved in recombinant DNA technology. Topics: principles of rate processes of biological systems, optimization of bioreactors, and issues related to overexpression and production of recombinant molecules. Participation in student-directed team projects. —W. (W.) McDonald, Privalsky, Rodriguez, VanderGheynst

## **Bodega Marine Laboratory Program**

<http://bml.ucdavis.edu/>

See also Biological Sciences, *Bodega Marine Laboratory Program*, on page 192.

In 2014, the new multi-college B.S. in Marine and Coastal Science (MCS) major started and the MCS field requirement can be fulfilled by any of the courses below.

## Spring Quarter Program

A full quarter (15 units) of undergraduate course work in marine biology is available each spring quarter at the Bodega Marine Laboratory, located in Bodega Bay, California. Course offerings include lecture and laboratory instruction in the developmental biology and physiological adaptation of marine organisms, and population biology and ecology; a weekly colloquium; and an intensive individual research experience under the direction of laboratory faculty [Biological Sciences courses 122, 122P, 123; Neurobiology, Physiology, and Behavior 141, 141P]. This is a 15 unit program and course offerings and instructors may vary from year to year. Applications are due January 31.

For more course detail, see full description under appropriate academic department listing or <http://bml.ucdavis.edu/>.

## Summer Session Courses

This integrated program offers students a multidisciplinary understanding of coastal ecosystems through intensive, hands on lab and field courses taught at Bodega Marine Laboratory. Applications are due April 15.

For more course detail, see full description under appropriate academic department listing or <http://bml.ucdavis.edu/>.

Course offerings and instructors may vary from year to year.

Bodega Marine Laboratory spring and summer programs are residential, with students housed on the laboratory grounds. Participants are assessed a room and board fee in addition to standard campus registration fees. Applications and consent of instructors are required.

Additional information is available from the Biology Academic Success Center, in 1023 Sciences Laboratory Building, or directly from:

Bodega Marine Laboratory  
P.O. Box 247  
Bodega Bay, CA 94923  
707-875-2211; <http://bml.ucdavis.edu/>

## Botany

**See Plant Biology, on page 509; and Plant Biology (A Graduate Group), on page 511.**

## Business Management

**See Managerial Economics, on page 415, for undergraduate study; and Management, Graduate School of, on page 410.**

## Cantonese

**See Asian American Studies, on page 182.**

## Cell Biology

**See Molecular and Cellular Biology, on page 463.**

## Cell and Developmental Biology (A Graduate Group)

The Cell and Developmental Biology program has merged with the Biochemistry and Molecular Biology program to form Biochemistry, Molecular, Cellular, and Developmental Biology (BMCDB); see [Biochemistry, Molecular, Cellular and Developmental Biology, on page 189](#).

**Group Office.** 227B Life Sciences

### Faculty

James Ames, Ph.D., Professor  
Shota Atsumi, Ph.D., Associate Professor  
Matthew P. Augustine, Ph.D., Professor  
Alan L. Balch, Ph.D., Professor  
Enoch Baldwin, Ph.D., Associate Professor  
Peter Beal, Ph.D., Professor  
Louise A. Berben, Ph.D., Associate Professor  
R. David Britt, Ph.D., Professor  
William Casey, Ph.D., Professor  
Julia Chamberlain, Ph.D., Lecturer PSOE  
Xi Chen, Ph.D., Professor  
Kyle Crabtree, Ph.D., Assistant Professor  
Stephen Cramer, Ph.D., Professor  
Sheila David, Ph.D., Professor  
Davide Donadio, Ph.D., Assistant Professor  
Andrew J. Fisher, Ph.D., Professor  
Annaliese K. Franz, Ph.D., Associate Professor  
Jacquelyn Gervay Hague, Ph.D., Professor  
David Goodin, Ph.D., Professor  
Ozcan Gulacar, Ph.D., Lecturer PSOE  
Ting Guo, Ph.D., Professor  
Susan M. Kauzlarich, Ph.D., Professor  
*Distinguished Graduate Mentoring Award*  
Peter B. Kelly, Ph.D., Professor  
Kirill Kovnir, Ph.D., Assistant Professor  
Mark J. Kurth, Ph.D., Professor  
Donald P. Land, Ph.D., Professor  
Delmar Larsen, Ph.D., Associate Professor  
Carlito B. Lebrilla, Ph.D., Professor  
Gang-Yiu Liu, Ph.D., Professor  
C. William McCurdy, Ph.D., Professor  
Mark Mascali, Ph.D., Professor  
Alexandra Navrotsky, Ph.D., Professor  
Cheuk-Yiu Ng, Ph.D., Professor  
David Olson, Ph.D., Assistant Professor  
Frank Osterloh, Ph.D., Professor  
Philip P. Power, FRS, Ph.D., Professor  
Neil E. Schore, Ph.D., Professor

*Academic Senate Distinguished Teaching Award*  
Jared T. Shaw, Ph.D., Professor  
Justin Siegel, Ph.D., Assistant Professor  
Alexei P. Stuchebrukhov, Ph.D., Professor  
Dean Tantillo, Ph.D., Professor  
*Academic Senate Distinguished Teaching Award*

Michael Toney, Ph.D., Professor  
Lee-Ping Wang, Ph.D., Assistant Professor

### Emeriti Faculty

Thomas L. Allen, Ph.D., Professor Emeritus  
W. Ronald Fawcett, Ph.D., Professor Emeritus  
William H. Fink, Ph.D., Professor, Emeritus  
Edwin Friedrich, Ph.D., Professor Emeritus  
Hakon Hope, Cand. Real., Professor Emeritus  
William M. Jackson, Ph.D., Professor Emeritus  
Gerd N. LaMar, Ph.D., Professor Emeritus  
Claude F. Meares, Ph.D., Professor Emeritus  
W. Kenneth Musker, Ph.D., Professor Emeritus  
Marilyn Olmstead, Ph.D., Professor  
Krishnan P. Nambiar, Ph.D., Associate Professor  
*Distinguished Graduate Mentoring Award*  
Carl W. Schmid, Ph.D., Professor, Emeritus  
James H. Swinehart, Ph.D., Professor Emeritus  
Dino S. Tinti, Ph.D., Professor, Emeritus  
Nancy S. True, Ph.D., Professor Emeritus  
George S. Zweifel, Sc.D., Professor Emeritus

### Affiliated Faculty

Toby Allen, Ph.D., Associate Professor  
Giulia Galli, Ph.D., Adjunct Professor

### The Major Programs

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

**The Program.** The Department of Chemistry offers several degree programs leading to the Bachelor of Arts and the Bachelor of Science. The curriculum leading to the A.B. degree offers a substantive program in chemistry while allowing students the freedom to take more courses in other disciplines and pursue a broad liberal arts education. Students who have a deeper interest in chemistry normally elect one of the several programs leading to the B.S. degree. The standard B.S. program, the only chemistry program accredited by the American Chemical Society, is appropriate for students who are interested in chemistry as a profession. The B.S. in Chemical Physics, the B.S. in Pharmaceutical Chemistry, and the two B.S. Applied Chemistry emphases are slightly less intense in chemistry, and draw on significant course materials from areas relevant to their particular focus but outside of a classical chemistry degree. Students following the A.B. or one of the B.S. programs may consider taking advantage of the Education Abroad Program. Our major adviser can assist students in planning a curriculum while abroad that assures regular progress in the major. A minor program in chemistry is also available.

**Career Alternatives.** Chemistry graduates with bachelor's degrees are employed extensively throughout various industries in quality control, research and development, production supervision, technical marketing, and other areas. The types of industries employing these graduates include chemical, energy, pharmaceutical, genetic engineering, biotechnology, food and beverage, petroleum and petrochemical, paper and textile, electronics and computer, and environmental and regulatory agencies. The bachelor's programs also provide chemistry graduates with the rigorous preparation needed for an advanced degree in chemistry and various professional schools in the health sciences.

### Chemistry

#### A.B. Major Requirements:

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>36-42</b>
Chemistry 2A-2B-2C or 2AH-2BH-2CH ... 15	
Physics 7A-7B-7C or 9A-9B-9C ..... 12-15	
Mathematics 16A-16B-16C or 17A-17B-17C or 21A-21B-21C ..... 9-12	
<b>Depth Subject Matter .....</b>	<b>43</b>
Chemistry 105, 110A-110B-110C, 124A, 128A-128B-128C-129A-129B ..... 32	
At least 11 additional upper division units in chemistry (except Chemistry 107A or 107B) or related areas, including one course with	

formal lectures. Courses in related areas must be approved in advance by the major adviser.....11  
**Total Units for the Major** ..... **79-85**

## Chemistry

### American Chemical Society Accredited Program

#### B.S. Major Requirements:

UNITS

##### **Preparatory Subject Matter** ..... **53**

Chemistry 2A-2B-2C or 2AH-2BH-2CH ... 15  
 Physics 9A, 9B, 9C ..... 15  
 Mathematics 21A, 21B, 21C, 21D, 22A,  
 22AL, 22B ..... 23

##### **Depth Subject Matter** ..... **54**

Chemistry 105, 108, 110A, 110B, 110C,  
 115, 124A, 124B or 124C, 124L, 125,  
 128A, 128B, 128C, 129A, 129B,  
 129C ..... 50  
 At least four additional upper-division units  
 in chemistry (except Chemistry 107A,  
 107B) ..... 4

##### **Total Units for the Major** ..... **107**

#### Recommended

Physics 9D

## Chemistry

### Environmental Chemistry emphasis

#### B.S. Major Requirements:

UNITS

##### **Preparatory Subject Matter** ..... **43-50**

Chemistry 2A-2B-2C or 2AH-2BH-2CH ... 15  
 Physics 7A, 7B, 7C or 9A-9B-9C ..... 12-15  
 Mathematics 16A-16B-16C or 17A-17B-17C  
 or 21A-21B-21C ..... 9-12  
 Biological Sciences 2A ..... 4  
 Statistics 13 or 32 or 100 ..... 3-4

##### **Depth Subject Matter** ..... **53-62**

Chemistry 100, 105, 115, 124A ..... 14  
 Chemistry 107A-107B or  
 110A-110B-110C ..... 6-12  
 Chemistry 118A-118B-118C or 128A-128B-  
 128C-129A-129B ..... 12-13  
 Environmental Science and Policy 110 ..... 4  
 Environmental Toxicology 101 ..... 4  
 At least three courses from: Atmospheric  
 Science 160; Environmental Science and  
 Policy 151; Environmental Toxicology 102A,  
 102B, 120, 131, 135, 146; Geology 150A;  
 Soil Science 111 ..... 9-13  
 At least three additional upper division units  
 in chemistry (Chemistry 199 or 194H strongly  
 encouraged) ..... 3

##### **Total Units for the Major** ..... **95-113**

## Chemistry

### Forensic Chemistry Emphasis:

#### B.S. Major Requirements:

UNITS

##### **Preparatory Subject Matter** ..... **47-54**

Chemistry 2A-2B-2C or 2AH-2BH-2CH ... 15  
 Physics 7A-7B-7C or 9A-9B-9C ..... 12-15  
 Mathematics 16A-16B-16C or 17A-17B-17C  
 or 21A-21B-21C ..... 9-12  
 Biological Sciences 2A ..... 4  
 Environmental Toxicology 20 ..... 4  
 Statistics 13, 32, 100 or 102 ..... 3-4

##### **Depth Subject Matter** ..... **51-61**

Chemistry 104, 105, 115 ..... 11  
 Chemistry 107A-107B or  
 110A-110B-110C ..... 6-12  
 Chemistry 118A-118B-118C or 128A-128B-  
 128C-129A-129B ..... 12-13  
 Environmental Toxicology 101, 102A,  
 102B ..... 13

At least two courses from: Biological Sciences  
 101; Environmental Science and Policy 161;  
 Environmental Toxicology 103A, 103B, 111,  
 135, 138; Statistics 108, 130A ..... 6-9  
 At least three additional upper division units  
 in chemistry (Chemistry 199 or 194H strongly  
 encouraged) ..... 3

##### **Total Units for the Major** ..... **98-115**

## Chemical Physics

#### B.S. Major Requirements:

UNITS

##### **Preparatory Subject Matter** ..... **57**

Chemistry 2A-2B-2C or  
 2AH-2BH-2CH ..... 15  
 Physics 9A, 9B, 9C, 9D ..... 19  
 Mathematics 21A, 21B, 21C, 21D, 22A,  
 22AL, 22B ..... 23

##### **Depth Subject Matter** ..... **53**

Chemistry 105, 110A, 110B, 110C, 115,  
 124A, 125, 128A, 128B, 129A ..... 35  
 Physics 104A, 105A, 110A ..... 12  
 At least one course from: Physics 105B,  
 110B, 112, 115A, 140A ..... 4  
 At least two additional upper division units in  
 chemistry (except Chemistry 107A,  
 107B) ..... 2

##### **Total Units for the Major** ..... **110**

## Pharmaceutical Chemistry

#### B.S. Major Requirements:

UNITS

##### **Preparatory Subject Matter** ..... **48-55**

Chemistry 2A-2B-2C or 2AH-2BH-2CH ... 15  
 Physics 7A, 7B, 7C or 9A-9B-9C ..... 12-15  
 Mathematics 16A-16B-16C or 17A-17B-17C  
 or 21A-21B-21C ..... 9-12  
 Biological Sciences 2A, and 2B or 2C ..... 9  
 Statistics 13, 32 or 100 ..... 3-4

##### **Depth Subject Matter** ..... **48-64**

Chemistry 124A, 130A-130B-135,  
 150 ..... 15  
 Chemistry 107A-107B or  
 110A-110B-110C ..... 6-12  
 Chemistry 118A-118B-118C or 128A-  
 128B-128C-129A-129B-129C ..... 12-15  
 Biological Sciences 102 or Chemistry  
 131 ..... 3  
 At least four courses (not used to satisfy the  
 above requirements) from: Biological  
 Sciences 102, 103, Biotechnology 171 or  
 Veterinary Medicine 170, Chemistry 131,  
 199 (minimum 3 units) or 194H,  
 Environmental Toxicology 103A,  
 Microbiology 104, Neurobiology,  
 Physiology, and Behavior 100, 101, Plant  
 Biology 126 ..... 12-19

##### **Total Units for the Major** ..... **96-119**

**Major Adviser.** To contact a major adviser in  
 the Department of Chemistry, see [http://chemistry.ucdavis.edu/undergraduate/contact\\_undergraduate\\_affairs.html](http://chemistry.ucdavis.edu/undergraduate/contact_undergraduate_affairs.html).

## Minor Program Requirements:

UNITS

##### **Chemistry** ..... **20-21**

Chemistry 105, 107A, 107B, 118A,  
 124A ..... 17  
 At least one additional course from:  
 Chemistry 118B, 124B and 124C ..... 3-4

Note: The minor program has prerequisites of Chemistry 2A-2B-2C, Mathematics 16A-16B-16C, and Physics 7A-7B-7C or their equivalents. Students wishing to earn a Chemistry minor should consult with a Chemistry major adviser.

**Honors and Honors Program.** The student must take courses 194HA, 194HB, and 194HC.

**Graduate Study.** The Department of Chemistry  
 offers programs of study and research leading to the

M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Adviser, Department of Chemistry. See also [Graduate Studies](#), on page 120.

## Courses in Chemistry (CHE)

**Chemistry Placement Requirement.** Students who enroll in Chemistry 2A, 2AH or Workload Chemistry 41C must satisfy the Chemistry Placement Requirement. See the Department of Chemistry website at [http://chemistry.ucdavis.edu/undergraduate/chemistry\\_placement\\_exam.html](http://chemistry.ucdavis.edu/undergraduate/chemistry_placement_exam.html) well in advance of enrolling in these general chemistry courses for further details about the placement requirements. Students who do not meet the placement requirements will be administratively dropped from these Chemistry courses.

## The Student Academic Success Center (SASC)

(SASC) provides review materials, workshops, drop-in and group tutoring, and additional resources.

**Chemistry Graduate Students Tutors** are also listed on the Department of Chemistry website at [http://chemistry.ucdavis.edu/undergraduate/tutors\\_in\\_chemistry.html](http://chemistry.ucdavis.edu/undergraduate/tutors_in_chemistry.html).

## Lower Division

### 2A. General Chemistry (5)

Lecture—3 hours; laboratory/discussion—4 hours. Prerequisite: high school chemistry and physics strongly recommended; any one of the following: (A) SAT Mathematics score = 600+; (B) ACT Mathematics score = 27+; (C) AP Chemistry exam score of = 3+; (D) SAT Chemistry subject test score = 700+; (E) UC Davis Chemistry Placement Examination score = 24+ on first attempt; in lieu of A-E, either completion of ALEKS online Preparatory Chemistry course with 100% Pie Mastery or completion of Workload 41C with a grade of C or better (offered only in fall quarter to students who do not meet A-E). Periodic table, stoichiometry, chemical equations, physical properties and kinetic theory of gases, atomic and molecular structure and chemical bonding. Laboratory experiments in stoichiometric relations, properties and collection of gases, atomic spectroscopy, and introductory quantitative analysis. Not open for credit to students who have taken course 2AH. GE credit: SciEng | QL, SE, SL.—F, W. (F, W.)

### 2AH. Honors General Chemistry (5)

Lecture—3 hours; laboratory/discussion—4 hours. Prerequisite: high school chemistry and physics. Any ONE of the following: (A) SAT Mathematics score = 670+; (B) ACT Mathematics score = 30+; (C) AP Chemistry exam score = 4+; (D) SAT Chemistry subject test score = 700+; (E) UC Davis Chemistry Placement Examination score = 33+ on first attempt; (F) UC Davis Chemistry Placement Examination score = 30+ AND UC Davis Mathematics Placement Examination score = 45+, both on first attempts; consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in course 2A. Students completing course 2AH can continue with course 2BH or 2B. Not open for credit to students who have taken course 2A. GE credit: SciEng | QL, SE, SL.—F. (F.)

### 2B. General Chemistry (5)

Lecture—3 hours; laboratory/discussion—4 hours. Prerequisite: C- or better in course 2A or 2AH. Continuation of course 2A. Condensed phases and intermolecular forces, chemical thermodynamics, chemical equilibria, acids and bases, solubility. Laboratory experiments in thermochemistry, equilibria, and quantitative analysis using volumetric methods. Not open for credit to students who have taken course 2B. GE credit: SciEng | QL, SE, SL.—W, S. (W, S.)

### 2BH. Honors General Chemistry (5)

Lecture—3 hours; laboratory/discussion—4 hours. Prerequisite: course 2A with consent of instructor or course 2AH with a grade C or better; and Mathematics 21B (may be taken concurrently) or consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in course 2B.

Students completing course 2BH can continue with course 2CH or 2C. GE credit: SciEng | QL, SE, SL.—W. (W.)

### **2C. General Chemistry (5)**

Lecture—3 hours; laboratory/discussion—4 hours. Prerequisite: C- or better in course 2B or 2BH. Kinetics, electrochemistry, spectroscopy, structure and bonding in transition metal compounds, application of principles to chemical reactions. Laboratory experiments in selected analytical methods and syntheses. Not open for credit to students who have taken course 2CH. GE credit: SciEng | QL, SE, SL.—F, S. (F, S.)

### **2CH. Honors General Chemistry (5)**

Lecture—3 hours; laboratory—6 hours. Prerequisite: course 2B with consent of instructor or course 2BH with a grade of C or better; Mathematics 21C (may be taken concurrently) or consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in course 2C. Not open for credit to students who have taken course 2C. GE credit: SciEng | QL, SE, SL.—S. (S.)

### **3A. Chemistry for Life Sciences: Determining Structure and Predicting Properties (5)**

Lecture—3 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: high school chemistry and physics strongly recommended; satisfactory score on the Chemistry and Mathematics Placement Examinations or satisfactory completion of the ALEKS Summer Chemistry Prep Course; a satisfactory grade in Workload 41C ('P' or 'C' or better) will suffice in lieu of a satisfactory Chemistry Placement Examination score. Concurrent enrollment with course 2A, 2B, 2C, 2AH, 2BH, 2CH prohibited; not open for enrollment to students who have completed CHE 2C or 2CH with a C- or better. Integrated General and Organic Chemistry intended for majors in the life sciences. Core concepts of chemical composition, structure and properties. Includes phase changes, separation methods, composition, spectroscopy, atomic and molecular structure, periodicity, bonding, charge distribution, intermolecular forces, and physical properties. Only 3 units credit for students who have completed course 2A or 2AH with a C- or better; only 1 unit of credit to students who have completed course 2B or CHE 2BH with a C- or better. GE credit: SciEng | QL, SE, SL.—F, W. (F, W.)

### **3B. Chemistry for Life Sciences: Predicting and Characterizing Chemical Change (5)**

Lecture—3 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: C- or better in course 3A; note: C- or better in course 2A or 2AH does not satisfy the prerequisite requirement. Concurrent enrollment with course 2A, 2B, 2C, 2AH, 2BH, 2CH prohibited. Continuation of course 3A covering core concepts of characterization of chemical processes and predicting chemical changes. Includes modeling chemical reactions, understanding proportions/stoichiometry, tracking energy, activation energy, reaction kinetics, thermodynamics, and equilibrium. Only 3 units credit for students who have completed course 2B or 2BH with a C- or better. GE credit: SciEng | QL, SE, SL.—W. (W.)

### **3C. Chemistry for Life Sciences: Controlling Processes and Synthetic Pathways (5)**

Lecture—3 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: C- or better in course 3B; note: C- or better in course 2B or 2BH does not satisfy the prerequisite requirement. Concurrent enrollment with course 2A, 2B, 2C, 2AH, 2BH, 2CH prohibited. Continuation of course 3B covering core concepts of harnessing energy, controlling reaction extent, and organic chemistry synthetic pathways. Includes acids and bases, thermodynamics, chemical equilibria, organic chemistry terminology and mechanisms. Only 3 units credit for students who have completed course 2C or 2CH with a C- or better. GE credit: SciEng | QL, SE, SL.—S. (S.)

### **8A. Organic Chemistry: Brief Course (2)**

Lecture—2 hours. Prerequisite: C- or better in course 2B or 2BH. With course 8B, an introduction to the nomenclature, structure, chemistry, and reaction mechanisms of organic compounds. Intended for stu-

dents majoring in areas other than organic chemistry. No credit to students who have completed courses 118A or 128A. GE credit: SciEng | SE.—F, S. (F, S.)

### **8B. Organic Chemistry: Brief Course (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 8A, 118A, or 128A. Laboratory concerned primarily with organic laboratory techniques and the chemistry of the common classes of organic compounds. Lecture portion a continuation of course 8A. Varying credit hours according to courses taken previously and corresponding expected workload for this course; full credit to students who complete course 118A or 128A; 3 units credit to students who have completed courses 128A and 129A (students who have completed course 129A are exempt from the laboratory portion of course 8B); 2 units credit to students who have completed 128B; 1 unit credit to students who have completed course 118B or courses 128B and 129A (students who have completed course 118B are exempt from the laboratory portion of course 8B). GE credit: SciEng | SE.—F, W. (F, W.)

### **10. Concepts of Chemistry (4)**

Lecture—4 hours. Survey of basic concepts and contemporary applications of chemistry. Designed for non-science majors and not as preparation for Chemistry 2A. Not open for credit to students who have had Chemistry 2A; but students with credit for course 10 may take Chemistry 2A for full credit. GE credit: SciEng, Wrt | SE, SL.—F. (F.)

### **98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

### **99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

## **Upper Division**

### **100. Environmental Water Chemistry (3)**

Lecture—3 hours. Prerequisite: course 2C or 2CH. Practical aspects of water chemistry in the environment, including thermodynamic relations, coordination chemistry, solubility calculations, redox reactions and rate laws. Computer modeling of the evolution in water chemistry from contact with minerals and gases.—W. (W.) Casey

### **104. Forensic Applications of Analytical Chemistry (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 2C or 2CH. Theory and application of standard methods of chemical analysis to evidentiary samples. Use and evaluation of results from screening tests, FTIR, GC and GCMS to various sample types encountered in forensics.—F. (F.) Land

### **105. Analytical and Physical Chemical Methods (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 110A (may be taken concurrently) or course 107B (may be taken concurrently). Fundamental theory and laboratory techniques in analytical and physical chemistry. Errors and data analysis methods. Basic electrical circuits in instruments. Advanced solution equilibria. Potentiometric analysis. Chromatographic separations. UV-visible spectroscopy. Lasers. GE credit: SciEng | QL, SE.—F, S. (F, S.)

### **107A. Physical Chemistry for the Life Sciences (3)**

Lecture—3 hours. Prerequisite: course 2C, Mathematics 16C or 21C, one year of college level physics. Physical chemistry intended for majors in the life science area. Introductory development of classical and statistical thermodynamics including equilibrium processes and solutions of both non-electrolytes and electrolytes. The thermodynamic basis of electrochemistry and membrane potentials.—F. (F.)

### **107B. Physical Chemistry for the Life Sciences (3)**

Lecture—3 hours. Prerequisite: course 107A. Continuation of course 107A. Continuation of course 107A. Kinetic theory of gases and transport processes in liquids. Chemical kinetics, enzyme kinetics

and theories of reaction rates. Introduction to quantum theory, atomic and molecular structure, and spectroscopy. Application to problems in the biological sciences. GE credit: SciEng | SE.—W, S. (W, S.)

### **108. Molecular Biochemistry (3)**

Lecture—3 hours. Prerequisite: course 118C or 128C. Pass One open to Chemistry majors. Chemical principles and experimental methods applied to the biological sciences to understand the molecular structure and function of proteins, nucleic acids, carbohydrates, and membrane lipids.—S. (S.) Ames, Fisher

### **110A. Physical Chemistry: Introduction to Quantum Mechanics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2C, Mathematics 16C or 21C; one year of college physics. Introduction to the postulates and general principles of quantum mechanics. Approximations based on variational method and time independent perturbation theory. Application to harmonic oscillator, rigid rotor, one-electron and many-electron atoms, and homo- and hetero-nuclear diatomic molecules. GE credit: SciEng | QL, SE.—F, S. (F, W.)

### **110B. Physical Chemistry: Properties of Atoms and Molecules (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 110A. Group theory. Application of quantum mechanics to polyatomic molecules and molecular spectroscopy. Intermolecular forces and the gas, liquid and solid states. Distributions, ensembles and partition functions. Transport properties.—F, W. (F, W.)

### **110C. Physical Chemistry: Thermodynamics, Equilibria and Kinetics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 110B. Development and application of the general principles of thermodynamics and statistical thermodynamics. Chemical kinetics, rate laws for chemical reactions and reaction mechanisms.—F, S. (F, S.)

### **115. Instrumental Analysis (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: courses 105 and 110B (may be taken concurrently) or 107A-107B. Intermediate theory and laboratory techniques in analytical and physical chemistry. Advanced data analysis methods and goodness-of-fit criteria. Fouriertransform spectroscopic methods and instrumentation. Mass spectrometry. Electrochemistry. Liquid chromatography. GE credit: SciEng, Wrt | QL, SE, WE.—F, W. (F, W.)

### **118A. Organic Chemistry for Health and Life Sciences (4)**

Lecture—3 hours; laboratory/discussion—1.5 hours. Prerequisite: course 2C or 2CH with a grade C- or higher. The 118A, 118B, 118C series is for students planning professional school studies in health and life sciences. A rigorous, in-depth presentation of basic principles with emphasis on stereochemistry and spectroscopy and preparations and reactions of nonaromatic hydrocarbons, haloalkanes, alcohols and ethers.—F, W, S. (F, W, S.)

### **118B. Organic Chemistry for Health and Life Sciences (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 118A or 128A. Continuation of course 118A, with emphasis on spectroscopy and the preparation and reactions of aromatic hydrocarbons, organometallic compounds, aldehydes and ketones.—F, W, S. (F, W, S.)

### **118C. Organic Chemistry for Health and Life Sciences (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 118B or courses 128B and 129A. Open to students changing from the Chemistry 128 course sequence only if they have completed prior organic laboratory work (at least course Chemistry 129A). Continuation of course 118B, with emphasis on the preparation, reactions and identification of carboxylic acids and their derivatives, alkyl and acyl

amines,  $\beta$ -dicarbonyl compounds, and various classes of naturally occurring, biologically important compounds.—F, W, S. (F, W, S.)

### **121. Introduction to Molecular Structure and Spectra (4)**

Lecture—4 hours. Prerequisite: course 110B. Modern theoretical and experimental methods used to study problems of molecular structure and bonding; emphasis on spectroscopic techniques.—S. (S.)

### **122. Chemistry of Nanoparticles (3)**

Lecture—3 hours. Prerequisite: course 110C (may be taken concurrently) or 107B (may be taken concurrently). Chemical and physical aspects of inorganic nanoparticles. Topics include synthesis, structure, colloidal behavior, catalytic activity, size and shape dependency of physical properties, analytical methods and applications.—S. (S.) Osterloh

### **124A. Inorganic Chemistry: Fundamentals (3)**

Lecture—3 hours. Prerequisite: course 2C or course 2CH. Symmetry, molecular geometry and structure, molecular orbital theory of bonding (polyatomic molecules and transition metals), solid state chemistry, energetics and spectroscopy of inorganic compounds. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

### **124B. Inorganic Chemistry: Main Group Elements (3)**

Lecture—3 hours. Prerequisite: course 124A. Synthesis, structure and reactivity of inorganic and hetero-organic molecules containing the main group elements.—W. (W.)

### **124C. Inorganic Chemistry: d and f Block Elements (3)**

Lecture—3 hours. Prerequisite: course 124A. Synthesis, structure and reactivity of transition metal complexes, organometallic and bioinorganic chemistry, the lanthanides and actinides.—S. (S.)

### **124L. Laboratory Methods in Inorganic Chemistry (2)**

Laboratory—6 hours. Prerequisite: course 124B or 124C (may be taken concurrently). The preparation, purification and characterization of main group and transition metal inorganic and organometallic compounds.—S. (S.)

### **125. Advanced Methods in Physical Chemistry (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 110C (may be taken concurrently) and 115. Advanced theory and laboratory techniques in analytical and physical chemistry. Advanced spectroscopic methods. Thermodynamics. Kinetics. Chemical literature. Digital electronics and computer interfacing. Laboratory measurements and vacuum techniques. GE credit: SciEng, Wrt | QL, SE, WE.—F, S. (F, S.)

### **128A. Organic Chemistry (3)**

Lecture—3 hours. Prerequisite: course 2C with a grade of C or higher; chemistry majors should enroll in course 129A concurrently. Introduction to the basic concepts of organic chemistry with emphasis on stereochemistry and the chemistry of hydrocarbons. Designed primarily for majors in chemistry.—F, W. (F, W.)

### **128B. Organic Chemistry (3)**

Lecture—3 hours. Prerequisite: course 128A or consent of instructor, course 129A strongly recommended; chemistry majors should enroll in course 129B concurrently. Continuation of course 128A with emphasis on aromatic and aliphatic substitution reactions, elimination reactions, and the chemistry of carbonyl compounds. Introduction to the application of spectroscopic methods to organic chemistry.—F, S. (F, S.)

### **128C. Organic Chemistry (3)**

Lecture—3 hours. Prerequisite: course 128B, chemistry majors should enroll in course 129C concurrently. Continuation of course 128B with emphasis on enolate condensations and the chemistry of amines, phenols, and sugars; selected biologically important compounds.—F, S. (F, S.)

### **129A. Organic Chemistry Laboratory (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 2C with a grade of C or higher; course 128A (may be taken concurrently). Introduction to laboratory techniques of organic chemistry. Emphasis is on methods used for separation and purification of organic compounds.—F, W. (F, W.)

### **129B. Organic Chemistry Laboratory (2)**

Laboratory—6 hours. Prerequisite: courses 128B (may be taken concurrently) and 129A. Continuation of course 129A. Emphasis is on methods used for synthesis and isolation of organic compounds.—F, S. (F, S.)

### **129C. Organic Chemistry Laboratory (2)**

Laboratory—6 hours. Prerequisite: courses 128C (may be taken concurrently) and 129B. Continuation of course 129B.—F, S. (F, S.)

### **130A. Pharmaceutical Chemistry (3)**

Lecture—3 hours. Prerequisite: course 118C or 128C. Examination of the design principles and experimental methods used in pharmaceutical and medicinal chemistry.—W. (W.)

### **130B. Pharmaceutical Chemistry (3)**

Lecture—2 hours; lecture/laboratory—1 hours. Prerequisite: course 130A. Continuation of course 130A with emphasis on case studies of various drugs and the use of computational methods in drug design.—S. (S.)

### **130C. Case Studies in Pharmaceutical Chemistry (1)**

Seminar—2 hours; independent study. Prerequisite: courses 130A and 130B concurrently. Seminar. Exploration of medicinal and pharmaceutical chemistry topics through seminars presented by professional chemists (and allied professionals). Designed to highlight career opportunities for students with a degree in pharmaceutical chemistry. (P/NP grading only.)—S. (S.)

### **131. Modern Methods of Organic Synthesis (3)**

Lecture—3 hours. Prerequisite: course 118C or 128C. Introduction to modern synthetic methodology in organic chemistry with emphasis on retrosynthetic analysis, reaction mechanisms, and application to multistep syntheses of pharmaceuticals and natural products. GE credit: SciEng | SE.—F. (F.)

### **135. Advanced Bio-organic Chemistry Laboratory (3)**

Lecture—1 hour; laboratory—6 hours. Prerequisite: course 118C or 129C. Separation, purification, identification and biological evaluation of organic compounds using modern methods of synthesis, computational chemistry and instrumentation. Emphasis on pharmaceutical and medicinal substances.—F, S. (F, S.)

### **145. Good Quality Practices (3)**

Discussion—1 hour; laboratory—6 hours. Prerequisite: course 129B or 118B. Open to Chemistry and science majors. Preparation for work in GQP laboratories in both research and industry. Context within GQP: Good Quality Practices (GMP Good Manufacturing Practice, GCP Good Clinical Practices). Lab practice in GQP skills. GE credit: SciEng | SE.—W, S. (W, S.)

### **150. Chemistry of Natural Products (3)**

Lecture—3 hours. Prerequisite: course 128C. Chemistry of terpenes, steroids, acetogenins, and alkaloids: isolation, structure determination, biosynthesis, chemical transformations, and total synthesis. GE credit: SciEng, Wrt | SE, WE.—S. (S.)

### **192. Internship in Chemistry (1-6)**

Internship—3-18 hours. Prerequisite: upper division standing; project approval by faculty sponsor prior to enrollment. Supervised internship in chemistry; requires a final written report. May be repeated for credit for a total of 6 units. (P/NP grading only.)

### **194HA. Undergraduate Honors Research (2)**

Independent study—2 hours. Prerequisite: open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original

research under the guidance of a faculty adviser, culminating in the writing of an extensive report. (Deferred grading only, pending completion of sequence.)—F, W, S. (F, W, S.)

### **194HB. Undergraduate Honors Research (2)**

Independent study—2 hours. Prerequisite: open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty adviser, culminating in the writing of an extensive report. (Deferred grading only, pending completion of sequence.)—F, W, S. (F, W, S.)

### **194HC. Undergraduate Honors Research (2)**

Independent study—2 hours. Prerequisite: open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty adviser, culminating in the writing of an extensive report. (Deferred grading only, pending completion of sequence.)—F, W, S. (F, W, S.)

### **195. Careers in Chemistry (1)**

Seminar—2 hours. Prerequisite: junior or senior standing in Chemistry. Designed to give Chemistry undergraduate students an in-depth appreciation of career opportunities with a bachelors degree in chemistry. Professional chemists (and allied professionals) describe research and provide career insights. (P/NP grading only.)—F.

### **197. Projects in Chemical Education (1-4)**

Discussion and/or laboratory. Prerequisite: consent of instructor. Participation may include development of laboratory experiments, lecture demonstrations, autotutorial modules or assistance with laboratory sessions. May be repeated for credit for a total of 12 units. (P/NP grading only.)—F, W, S. (F, W, S.)

### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor based upon adequate preparation in chemistry, mathematics and physics. (P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor based upon adequate preparation in chemistry, mathematics, and physics. (P/NP grading only.)

### **Graduate**

### **201. Chemical Uses of Symmetry and Group Theory (3)**

Lecture—3 hours. Prerequisite: course 124A and 110B, or consent of instructor. Symmetry elements and operations, point groups, representations of groups. Applications to molecular orbital theory, ligand field theory, molecular vibrations, and angular momentum. Crystallographic symmetry.—F. (F.)

### **204. Mathematical Methods in Chemistry (3)**

Lecture—3 hours. Prerequisite: course 110C. Graduate standing in Chemistry. Introduction to mathematical and numerical methods in chemistry. Real and complex functions. Methods of integration. Differential equations. Linear algebra and matrices. Special functions. Integral transforms. Statistics.—F. (F.)

### **205. Symmetry, Spectroscopy, and Structure (3)**

Lecture—3 hours. Prerequisite: course 201 or the equivalent. Vibrational and rotational spectra; electronic spectra and photoelectron spectroscopy; magnetism; electron spin and nuclear quadrupole resonance spectroscopy; nuclear magnetic resonance spectroscopy; other spectroscopic methods.—W. (W.)

### **209. Special Topics in Physical Chemistry (3)**

Lecture—3 hours. Prerequisite: courses 210A and 211A. Graduate standing in Chemistry. Advanced topics in physical chemistry, biophysical chemistry or chemical physics chosen from areas of current research interest. May be repeated for credit when topic differs. Offered irregularly.

**210A. Quantum Chemistry: Introduction and Stationary-State Properties (3)**

Lecture—3 hours. Prerequisite: course 110B and 110C or consent of instructor. Stationary-state quantum chemistry: postulates of quantum mechanics, simple solutions, central field problems and angular momenta, hydrogen atom, perturbation theory, variational theory, atoms and molecules. —W. (W.)

**210B. Quantum Chemistry: Time-Dependent Systems (3)**

Lecture—3 hours. Prerequisite: course 210A. Matrix mechanics and time-dependent quantum chemistry: matrix formulation of quantum mechanics, Heisenberg representation, time-dependent perturbation theory, selection rules, density matrices, and miscellaneous molecular properties. —S. (S.)

**210C. Quantum Chemistry: Molecular Spectroscopy (3)**

Lecture—3 hours. Prerequisite: course 210B. Molecular spectroscopy: Born-Oppenheimer approximation, rotational, vibrational and electronic spectroscopy, spin systems, and molecular photo-physics. —F. (F.)

**211A. Advanced Physical Chemistry: Statistical Thermodynamics (3)**

Lecture—3 hours. Prerequisite: consent of instructor. Principles and applications of statistical mechanics; ensemble theory; statistical thermodynamics of gases, solids, liquids, electrolyte solutions and polymers; chemical equilibrium. —F. (F.)

**211B. Statistical Mechanics (3)**

Lecture—3 hours. Prerequisite: course 211A. Statistical mechanics of nonequilibrium systems, including the rigorous kinetic theory of gases, continuum mechanics transport in dense fluids, stochastic processes, brownian motion and linear response theory. Offered in alternate years. —W.

**212. Chemical Dynamics (3)**

Lecture—3 hours. Prerequisite: consent of instructor. Introduction to modern concepts in chemical reaction dynamics for graduate students in chemistry. Emphasis will be placed on experimental techniques as well as emerging physical models for characterizing chemical reactivity at a microscopic level. Offered in alternate years. —W.

**215. Theoretical and Computational Chemistry (3)**

Lecture—3 hours. Prerequisite: courses 211A and 210B or consent of instructor. Mathematics of wide utility in chemistry, computational methods for guidance or alternative to experiment, and modern formulations of chemical theory. Emphasis will vary in successive years. May be repeated for credit when topic differs. Offered in alternate years. —(S.)

**216. Magnetic Resonance Spectroscopy (3)**

Lecture—3 hours. Prerequisite: courses 210A, 210B (may be taken concurrently). Quantum mechanics of spin and orbital angular momentum, nuclear magnetic resonance, theory of chemical shift and multiplet structures, electron spin resonance, theory of g-tensor in organic and transition ions, spin Hamiltonians, nuclear quadrupolar resonance, spin relaxation processes. Offered in alternate years. —(S.)

**217. X-Ray Structure Determination (3)**

Lecture—3 hours. Prerequisite: consent of instructor. Introduction to x-ray structure determination; crystals, symmetry, diffraction geometry, sample preparation and handling, diffraction apparatus and data collection, methods of structure solution and refinement, presentation of results, text, tables and graphics, crystallographic literature. —S. (S.)

**218. Macromolecules: Physical Principles (3)**

Lecture—3 hours. Prerequisite: courses 110A, 110B, 110C or the equivalent. Relationship of higher order macromolecular structure to subunit composition; equilibrium properties and macromolecular dynamics; physical chemical determination of macromolecular structure. Offered in alternate years. —F.

**219. Spectroscopy of Organic Compounds (4)**

Lecture—3 hours; laboratory—2.5 hours. Prerequisite: course 128C or the equivalent. Identification of organic compounds and investigation of stereochemical and reaction mechanism phenomena using spectroscopic methods—principally NMR, IR and MS. —W. (W.)

**219L. Laboratory in Spectroscopy of Organic Compounds (1)**

Laboratory—2.5 hours. Prerequisite: course 219 (may be taken concurrently). Restricted to Chemistry graduate students only (or consent of instructor). Practical application of NMR, IR and MS techniques for organic molecules. —S. (S.)

**221A. Special Topics in Organic Chemistry (3)**

Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. —F. (F.)

**221B. Special Topics in Organic Chemistry (3)**

Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. —F. (F.)

**221C. Special Topics in Organic Chemistry (3)**

Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. —F. (F.)

**221D. Special Topics in Organic Chemistry (3)**

Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. —F. (F.)

**221E. Special Topics in Organic Chemistry (3)**

Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. —F. (F.)

**221F. Special Topics in Organic Chemistry (3)**

Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. —F. (F.)

**221G. Special Topics in Organic Chemistry (3)**

Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. —F. (F.)

**221H. Special Topics in Organic Chemistry (3)**

Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. —F. (F.)

**222. Chemistry of Nanoparticles (3)**

Lecture/discussion—3 hours. Prerequisite: course 110C or equivalent. Chemical and physical aspects of inorganic nanoparticles, including synthesis, purification, reactivity, characterization, and applications for technology. Emphasis is on problems from the current literature. Not open for credit to students who have taken course 122. —S. (S.) Osterloh

**226. Principles of Transition Metal Chemistry (3)**

Lecture—3 hours. Prerequisite: course 124A or the equivalent. Electronic structures, bonding, and reactivity of transition metal compounds. —F. (F.)

**228A. Bio-inorganic Chemistry (3)**

Lecture—3 hours. Prerequisite: course 226 or consent of instructor. Defines role of inorganic chemistry in the functioning of biological systems by identifying the functions of metal ions and main group compounds in biological systems and discussing the chemistry of model and isolated biological compounds. Offered every third year. —W.

**228B. Main Group Chemistry (3)**

Lecture—3 hours. Prerequisite: course 226 or consent of instructor. Synthesis, physical properties, reactions and bonding of main group compounds. Discussions of concepts of electron deficiency, hypervalency, and non-classical bonding. Chemistry of the main group elements will be treated systematically. Offered every third year. —W.

**228C. Solid-State Chemistry (3)**

Lecture—3 hours. Prerequisite: courses 124A, 110B, 226, or the equivalent. Design and synthesis, structure and bonding of solid-state compounds; physical properties and characterization of solids; topics of current interest such as low-dimensional materials, inorganic polymers, materials for catalysis. Offered every third year. —W.

**228D. Homogeneous Catalysis (3)**

Lecture—3 hours. Prerequisite: course 226. Overview of homogeneous catalysis and related methods, with emphasis on kinetics, mechanisms, and applications for organic synthesis. The related methods may include cluster, colloid, phase transfer, enzymatic, heterogeneous and polymer-supported catalysis. Offered every third year. —W.

**228E. Magnetochemistry (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 124A or 201 or an equivalent class from either Physics or Chemical Engineering and Materials Science. Covers the basic principles and concepts of magnetism, methods used for characterization of magnetic properties, as well as specific state-of-the-art magnetic materials and topics from the recent chemistry literature. Offered in alternate years. —F. (F.) Kovnir

**231A. Organic Synthesis: Methods and Strategies (4)**

Lecture—3 hours; lecture/discussion—3 hours. Prerequisite: course 128C or equivalent. Current strategies and methods in synthetic organic chemistry. Focus on construction of carbon frameworks, control of relative and absolute stereochemistry and retrosynthetic strategies. Use of databases and molecular modeling software in multistep strategies. —W. (W.)

**231B. Advanced Organic Synthesis (3)**

Lecture—3 hours. Prerequisite: course 231A. Current strategies and methods in synthetic organic chemistry. Continuation of course 231A. Organic synthesis of complex target molecules. Stereochemical considerations and asymmetric synthesis. Organometallics for selective transformations. Carbocyclic and heterocyclic ring formation. —F. S. (F. S.)

**233. Physical-Organic Chemistry (3)**

Lecture—3 hours. Prerequisite: courses 128A-128B-128C and 110A-110B-110C or the equivalent. Introduction to elementary concepts in physical-organic chemistry including the application of simple numerical techniques in characterizing and modeling organic reactions. —F. (F.)

**235. Organometallic Chemistry in Organic Synthesis (3)**

Lecture—3 hours. Prerequisite: course 128C. Current trends in use of organometallics for organic synthesis; preparations, properties, applications, and limitations of organometallic reagents derived from transition and/or main group metals. Offered in alternate years. —(S.)

**236. Chemistry of Natural Products (3)**

Lecture—3 hours. Prerequisite: course 128C or the equivalent. Advanced treatment of chemistry of naturally occurring compounds isolated from a variety of sources. Topics will include isolation, structure determination, chemical transformations, total synthesis, biological activity, and biosynthesis. Biosynthetic origin will be used as a unifying theme.—W. (W.)

**237. Bio-organic Chemistry (3)**

Lecture—3 hours. Prerequisite: course 128C or the equivalent. Structure and function of biomolecules; molecular recognition; enzyme reaction mechanisms; design of suicide substrates for enzymes; enzyme engineering; design of artificial enzymes and application of enzymes in organic synthesis. Offered in alternate years.—(F.)

**238. Introduction to Chemical Biology (3)**

Lecture—3 hours. Prerequisite: course 118C or 128C, or the equivalent; course 130A & B and Biological Sciences 102, 103, & 104, or the equivalents recommended. Synthesis of complex molecules in nature. Use of biosynthetic pathways in synthesis of new chemical entities. Applications of small molecules in chemical genetics and structural biology. Solving biological problems using synthetic biomolecules.—F. (F.) Beal

**240. Advanced Analytical Chemistry (3)**

Lecture—3 hours. Prerequisite: courses 110A and 115 or the equivalent. Numerical treatment of experimental data; thermodynamics of electrolyte and non-electrolyte solutions; complex equilibria in aqueous and non-aqueous solutions; potentiometry and specific ion electrodes; mass transfer in liquid solutions; fundamentals of separation science, including column, gas and liquid chromatography.—F. (F.)

**241A. Surface Analytical Chemistry (3)**

Lecture—3 hours. Prerequisite: course 110C or the equivalent. Concepts of surfaces and interfaces: physical properties, unique chemistry and electronic effects. Focus on gas-solid interfaces, with some discussion of liquid-solid interfaces. Offered in alternate years.—F.

**241B. Laser and X-ray Spectroscopy (3)**

Lecture—3 hours. Prerequisite: course 110B or the equivalent. Concepts and mechanisms of light-matter interactions. Chemical applications of modern spectroscopic methods, including multiphoton spectroscopy, time-resolved laser and x-ray photolysis, and phase-contrast x-ray imaging. Offered in alternate years.—F.

**241C. Mass Spectrometry (3)**

Lecture—3 hours. Prerequisite: course 110C and 115 or the equivalent. Mass spectrometry and related methods with emphasis on ionization methods, mass analyzers, and detectors. Related methods may include ion-molecule reactions, unimolecular dissociation of organic and bio-organic compounds, and applications in biological and environmental analysis. Offered in alternate years.—W.

**241D. Electroanalytical Chemistry (3)**

Lecture—3 hours. Prerequisite: course 110C and 115 or the equivalent. Electroanalytical chemistry with consideration of mass transfer and electrode kinetics for polarizable electrodes. Current-potential curves for a variety of conditions, including both potentiostatic and galvanostatic control, and their application in chemical analysis. Offered in alternate years.—W.

**241E. Microscopy and Imaging Techniques (3)**

Lecture—3 hours. Prerequisite: course 110C and 115 or the equivalent. Introduction to modern microscopy and imaging techniques: scanning tunneling, atomic force, far-field optical, fluorescence, scanning near-field optical, and scanning electron microscopy. Application to nanoscience and analytical and bioanalytical chemistry. Some laboratory demonstrations. Offered in alternate years.—W.

**245. Mechanistic Enzymology (3)**

Lecture—3 hours. Advanced topics in chemical kinetics relevant to enzymes, enzyme kinetics, theory of enzyme catalysis, and the analysis of a selection of organic enzyme reaction mechanisms by the tools introduced in the first part of the course.—F. (F.) Toney

**261. Current Topics in Chemical Research (2)**

Lecture—2 hours. Prerequisite: graduate standing in Chemistry or consent of instructor. Designed to help chemistry graduate students develop and maintain familiarity with the current and past literature in their immediate field of research and related areas. May be repeated for credit when topics differ.—F, W, S. (F, W, S.)

**263. Introduction to Chemical Research Methodology (3)**

Laboratory/discussion—9 hours. Prerequisite: course 293 and graduate student standing in Chemistry; consent of instructor. Introduction to identification, formulation, and solution of meaningful scientific problems including experimental design and/or theoretical analyses of new and prevailing techniques, theories and hypotheses. May be repeated for credit when topic differs. (S/U grading only.)—F, W, S. (F, W, S.)

**264. Advanced Chemical Research Methodology (6)**

Laboratory/discussion—18 hours. Prerequisite: course 263 or consent of instructor. Applications of the methodology developed in Chemistry 263 to experimental and theoretical studies. Advanced methods of interpretation of results are developed. Includes the preparation of manuscripts for publication. May be repeated for credit when topic differs. (S/U grading only.)—F, W, S. (F, W, S.)

**280. Seminar in Ethics for Scientists (2)**

Seminar—2 hours. Restricted to 20 students; graduate standing in any department of science or engineering. Studies of topical and historical issues in the ethics of science, possibly including issues such as proper authorship, peer review, fraud, plagiarism, responsible collaboration, and conflict of interest. (Same course as Physics 280 and Engineering Chemical and Materials Science 280.) (S/U grading only.)—S. (S.)

**290. Seminar (2)**

Seminar—2 hours. Prerequisite: consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

**293. Introduction to Chemistry Research (1)**

Discussion—2 hours. Designed for incoming graduate students preparing for higher degrees in chemistry. Group and individual discussion of research activities in the Department and research topic selection. (S/U grading only.)—F. (F.)

**294. Presentation of Chemistry Research (1)**

Seminar—2 hours. Prerequisite: graduate standing. Restricted to graduate students in Chemistry who have not yet given their departmental presentation. Introduces first- and second-year Chemistry graduate students to the process of giving an effective research presentation. Advanced Ph.D. students give formal seminars describing the design and execution of their research projects. May be repeated three times for credit. (S/U grading only.)—F, S. (F, S.)

**295. Careers in Chemistry (1)**

Seminar—2 hours. Prerequisite: graduate standing in Chemistry. Designed to give Chemistry graduate students an in-depth appreciation of career opportunities with a M.S. or Ph.D. degree in chemistry. Professional chemists (and allied professionals) give seminars describing both research and career insights. May be repeated for credit 3 times. (S/U grading only.)—F.

**296. Research in Pharmaceutical Chemistry (6)**

Laboratory—18 hours. Prerequisite: courses 130A and 130B, 135, and 233 (may be taken concurrently); consent of instructor. Restricted to students in the Integrated B.S./M.S. Program in Chemistry. Lab-

oratory provides qualified graduate students with the opportunity to pursue original investigation in Pharmaceutical Chemistry and allied fields in order to fulfill the letter-graded research requirement of the Integrated B.S./M.S. Program in Chemistry (Pharmaceutical Chemistry Emphasis). May be repeated three times for credit when topic differs.—F, W, S, Su. (F, W, S, Su.)

**298. Group Study (1-5)**

W. (W.)

**299. Research (1-12)**

The laboratory is open to qualified graduate students who wish to pursue original investigation. Students wishing to enroll should communicate with the department well in advance of the quarter in which the work is to be undertaken. (S/U grading only.)

**Professional****390. Methods of Teaching Chemistry (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate student standing in Chemistry and consent of instructor. Practical experience in methods and problems of teaching chemistry. Includes analyses of texts and supporting material, discussion of teaching techniques, preparing for and conducting of discussion sessions and student laboratories. Participation in the teaching program required for Ph.D. in chemistry. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**392. Advanced Methods of Teaching Chemistry (2)**

Lecture—2 hours. Prerequisite: course 390. Advanced topics in teaching chemistry. Analysis and discussion of curricular design, curricula materials, teaching methods and evaluation. For students who are planning a career in teaching chemistry. (P/NP grading only.)—S. (S.)

## Chicana/Chicano Studies

(College of Letters and Science)

Carlos F. Jackson, M.F.A., Chairperson of the Department

**Department Office.** 2102 Hart Hall  
530-752-2421; Fax 530-752-8814;  
<http://chi.ucdavis.edu>

**Faculty**

Angie Chabram, Ph.D., Professor  
Sergio de la Mora, Ph.D., Associate Professor  
Adela de la Torre, Ph.D., Professor  
Yvette Flores, Ph.D., Professor  
Carlos F. Jackson, M.F.A., Associate Professor  
Kevin R. Johnson, J.D., Professor (*School of Law*)  
Maceo Montoya, M.F.A., Assistant Professor  
Clarissa Rojas, Ph.D., Assistant Professor  
Natalia Deeb-Sossa, Ph.D., Associate Professor  
Susy Zepeda, Ph.D., Assistant Professor

**Emeriti Faculty**

Malaquias Montoya, B.F.A., Professor Emeritus  
Beatriz Pesquera, Ph.D., Associate Professor Emerita  
Refugio Rochin, Ph.D., Professor Emeritus  
Adaljiza Sosa-Riddell, Ph.D., Senior Lecturer Emerita

**The Major Program**

The Department of Chicana/Chicano Studies offers an interdisciplinary curriculum focusing on the Chicana/Chicano experience through an analysis of class, race, ethnicity, gender and sexuality, and cultural expression. The department offers a major leading to the Bachelor of Arts degree and a minor that can satisfy breadth requirements for the College of Letters and Science. Both the major and minor frame an analysis within the historical and contemporary experiences of Chicanas/os in the Americas. The major gives students an opportunity to specialize in one of two emphases: Cultural Studies or Social/Policy Studies. Students in the major are expected to read, write, and speak Spanish at a level suitable for

future study and work in Chicana/o and Latina/o settings. There are no language requirements for the minor, and all Chicana/Chicano Studies courses are open to students in any major.

**The Program.** At the lower division level, the major curriculum provides an interdisciplinary overview of various topics. Students are advised to take courses that serve as prerequisites for certain upper division courses. At the upper division level, majors pursue advanced interdisciplinary course work in both the humanities/arts and the social sciences. At this level, students will find courses in Chicana/Chicano history, theory, health and several courses taught from a variety of disciplinary perspectives. Majors may specialize in one of two emphases for the A.B. degree. The Cultural Studies emphasis integrates literature, culture, and artistic expression. Social/Policy Studies emphasizes social theory, research methods, area studies in community/political economy, family, societal and health issues.

**Career Alternatives.** The Cultural Studies emphasis prepares students for professional work in cross-cultural education, cultural/art centers, artistic expression and communications. The Social/Policy Studies emphasis orients students towards professional work in human service delivery, community development, legal services assistance, health services, social welfare and education. Both emphases in the major prepare students for advanced graduate and/or professional studies in related fields.

#### A.B. Major Requirements:

	UNITS
<b>Cultural Studies Emphasis:</b>	
<b>Preparatory Subject Matter.....</b>	<b>16-31</b>
Chicana/o Studies 10, 50 .....	8
Chicana/o Studies 21 or 40 .....	4
One of Chicana/o Studies 60, 65, 70, or 73 .....	4
Spanish 1, 2, 3, or 28, 31, 32 or the equivalent .....	0-15
<b>Depth Subject Matter .....</b>	<b>40</b>
One course from: Chicana/o Studies 150, 181 History 165, 166B, 169A, 169B .....	4
Two courses from: Chicana/o Studies 100, 110, 111, 112, 130, 131, 132, 181 .....	8
Comparative ethnicity/gender: two upper division courses selected from two of the following areas: African American and African Studies, Asian American Studies, Native American Studies, or Women's Studies .....	8
Two courses from: Chicana/o Studies 110, 112, 120, 121, 122, 123 .....	8
Three courses from: Chicana/o Studies 154, 55, 156, 160, 165, 171, 172 .....	12
<b>Total Units for the Major .....</b>	<b>56-71</b>
<b>Social/Policy Studies Emphasis:</b>	
<b>Preparatory Subject Matter.....</b>	<b>20-35</b>
Chicana/o Studies 10, 50 .....	8
Chicana/o Studies 21 or 40 .....	4
One course from: Chicana/o Studies 60, 65, 70, or 73 .....	4
One course from: Chicana/o Studies 23, 140A Sociology 46A or Psychology 41....	4
Spanish 1, 2, 3, or 28, 31, 32 or the equivalent .....	0-15
<b>Depth Subject Matter .....</b>	<b>40</b>
One from Chicana/o Studies 150, 181, History 165, 166B, 169A or 169B .....	4
Two courses from: Chicana/o Studies 154, 155, 156, 160, 165, 171, or 172 .....	8
Comparative ethnicity/gender: two upper division courses selected from two of the following areas: African American and African Studies, Asian American Studies, Native American Studies, or Women's Studies .....	8

Three courses from: Chicana/o Studies 100, 110, 111, 112, 130, 131, 132 .....	12
or 181 .....	12
Two courses from: Chicana/o Studies 110, 112, 120, 121, 122 or 123 .....	8
<b>Total Units for the Major .....</b>	
<b>60-75</b>	

**Major Adviser.** A. Martinez

#### Minor Program Requirements:

This minor provides a broad overview of the historical, social, political, economic, ideological and cultural forces that shape the Chicana/o and Latina/o experience. The minor is open to all students with or without course work in Spanish. Students should contact the master adviser for a plan approval and verification of the minor.

	UNITS
<b>Chicana/o Studies.....</b>	<b>24</b>

Chicana/o Studies 10 or 50 .....	4
Chicana/o Studies 150 or 181 or History 169A or 169B.....	4
Four courses from: Chicana/o Studies 110, 111, 112, 120, 121, 122, 123, 130, 131, 132, 154, 155, 156, 160, 165, 171, 172.....	16

**Minor Adviser.** A. Martinez

#### Courses in Chicana/Chicano Studies (CHI)

##### Lower Division

###### **10. Introduction to Chicana/o Studies (4)**

Lecture—3 hours; discussion—1 hour. Analysis of the situation of the Chicana/o (Mexican-American) people, emphasizing their history, literature, political movements, education and related areas. Offered in alternate years. GE credit: Div, Wrt | ACGH, AH or SS, DD, OL, WE.—F. W. Jackson

###### **21. Chicana/o and Latina/o Health Care Issues (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10. Overview of health issues of Chicanas/os and Latinas/os in the State of California; role of poverty/lack of education in limited access to health care. GE credit: Div | OL, WE.—Flores, de la Torre

###### **21S. Chicana/o and Latina/o Health Care Issues (4)**

Lecture—4 hours. Prerequisite: Spanish 3 or the equivalent. Overview of health issues of Chicanas/os and Latinas/os in the State of California; role of poverty/lack of education and limited access to health care. All course instruction for this course will be in Spanish. Course is taught abroad. Not open for credit to students who have completed course 21. GE credit: Div | OL, WC, WE.—F. (F.) Flores, de la Torre

###### **23. Qualitative Research Methods (4)**

Lecture/discussion—3 hours; discussion—1 hour. Dominant models of qualitative inquiry in educational and social science research as well as mestizo approaches to research with latinos. Emphasis given to choosing and designing culturally appropriate strategies to investigate latino health, education, social context, and policy issues. GE credit: SocSci | AH, OL, SS, WE.—S. (S.)

###### **30. United States Political Institutions and Chicanas/os (4)**

Lecture/discussion—3 hours; term paper. Overview of the major political institutions and ideologies of the United States and the Chicana/o people's historical and contemporary role in, effects from, and responses to them. Theory, method and critical analysis. Offered irregularly. GE credit: Div | ACGH, DD, OL, SS, WE.

###### **40. Comparative Health: Top Leading Causes of Death (4)**

Lecture/discussion—3 hours; discussion—1 hour. Prerequisite: Statistics 13 or consent by instructor. Introduction to the epidemiology of the leading causes of death for ethnic/racial minorities. Assess-

ment of disproportionate rates at which ethnic/racial minorities suffer and die from chronic and infectious diseases and injuries and statistical methods used to calculate these rates. Not open for credit to students who have completed course 40S. GE credit: SciEng, Div, Wrt | QL, SE, WE.—W. Deeb-Sossa, Rojas

###### **40S. Comparative Health: Leading Causes of Death (4)**

Lecture—4 hours. Prerequisite: Statistics 13 or consent by instructor. Introduction to epidemiology of leading causes of death for ethnic/racial minorities. Assessment of disproportionate rates at which ethnic/racial minorities suffer & die from chronic and infectious diseases & injuries & statistical methods used to calculate these rates. Offered abroad. Not open for credit to students who have completed course 40. GE credit: SciEng, Div, Wrt | QL, SE, WC, WE.

###### **50. Chicana and Chicano Culture (4)**

Lecture—3 hours; discussion—1 hour. Interdisciplinary survey of Chicana/cultural representation in the 20th century. Examines Chicana/o culture within a national and transnational context. Explores how Chicano cultural forms and practices intersect with social/material forces, intellectual formations and cultural discourses. (Former course 20.) Offered in alternate years. GE credit: Div | ACGH, AH, DD, WC, WE.—W. S. Chabram, de la Mora, M. Montoya

###### **60. Chicana and Chicano Representation in Cinema (4)**

Lecture—3 hours; discussion—1 hour; film viewing—2 hours. Introductory-level study of Chicana and Chicano representation in cinema. Depiction of Chicana and Chicano experience by Chicana/o filmmakers, as well as by non-Chicanos, including independent filmmakers and the commercial industry. GE credit: ArtHum, Div | ACGH, AH, DD, VL, WE.—W. de la Mora

###### **65. New Latin American Cinema (4)**

Lecture/discussion—2 hours; discussion—1 hour; film viewing—3 hour. Historical, critical, and theoretical survey of the cinemas of Latin America and their relationship to the emergence of U.S. Latino cinema. Emphasis on representation and social identity, including gender, sexuality, class, race and ethnicity. GE credit: ArtHum, Div | AH, VL, WC, WE.—W. (W.) de la Mora

###### **70. Survey of Chicana/o Art (4)**

Lecture—4 hours. Survey of contemporary Chicana/o art in context of the social turmoil from which it springs. Includes political use of the poster and the mural, the influence of the Mexican mural and graphic movement, and social responsibility of the artist. GE credit: Div | ACGH, AH, DD, VL, WC, WE.—F. Jackson, Montoya

###### **73. Chicana/o Art Expression Through Silk Screen (4)**

Studio—8 hours; laboratory—4 hours. Introductory level studio course using silk screen and basic printing techniques to explore and develop images of Chicana/o cultural themes and expressions. Students will experiment with images and symbols from their immediate environment/culture. Integrated approach to Chicana/o philosophy of art. GE credit: ACGH, AH, DD, OL, VL, WC.—F. Jackson

###### **92. Internship (1-12)**

Internship—3-36 hours. Prerequisite: course 10 or consent of instructor. Academic guidance combined with internship in community agencies serving Mexican/Latina/Latino/Chicana/Chicano clients. Use of bilingual skills and knowledge of history, culture, economics, politics and social issues. May be repeated for credit up to 12 units. (P/NP grading only.)

###### **98. Directed Group Study (1-5)**

(P/NP grading only.)

###### **99. Special Study for Undergraduates (1-5)**

(P/NP grading only.)

**Upper Division****100. Chicana/Chicano Theoretical Perspective (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: courses 10 and 50. Critical examination of emerging Chicana/o Studies theoretical perspectives in light of contemporary intellectual frameworks in the social sciences, arts, and humanities. Includes analysis of practices of self-representation, and socio-cultural developments in the Chicana/o community. GE credit: ACGH, DD, SS, WC, WE.—S. (S.) Chabram, Zepeda

**110. Sociology of the Chicana/o Experience (4)**

Lecture/discussion—4 hours. Prerequisite: course 10 or Sociology 1. The Chicana/o experience in the American society and economy viewed from theoretical perspectives. Immigration, history of integration of Chicana/o labor into American class structure, education inequality, ethnicity, the family and Chicana/o politics. (Former course Sociology 110.) GE credit: SocSci, Div, Wrt | ACGH, DD, OL, SS, WE.—S. Deeb-Sossa, Zepeda

**111. Chicanas/Mexicanas in Contemporary Society (4)**

Lecture/discussion—4 hours. Prerequisite: course 10 or 50, Women's Studies 50 or History 169B. Analysis of the role and status of Chicanas/Mexicanas in contemporary society. Special emphasis on their historical role, the political, economic and social institutions that have affected their status, and their contributions to society and their community. (Former course 102.) GE credit: ArtHum | ACGH, DD, SS, WE.—Deeb-Sossa

**112. Globalization, Transnational Migration, and Chicana/o and Latina/o Communities (4)**

Lecture—4 hours. Prerequisite: course 10. Chicana/o and Latina/o migration experiences within a global context. Topics include national and/or transnational migration in Mexico, Central America, and the United States. GE credit: SocSci, Div, Wrt | ACGH, DD, OL, SS, WE.—Deeb-Sossa

**113. Latin American Women's Engagement in Social Movements (4)**

Lecture/discussion—3 hours; term paper. Examination of how women of different racial/ethnic and class backgrounds in Latin America challenge their marginalization. Exploration of US foreign policy, its effects on Latin American's institutions and on Latin American citizens. Using Chicana feminist perspective. Offered in alternate years. GE credit: SocSci | ACGH, DD, SS, WC, WE.—Deeb-Sossa

**114. Women of Color Reproductive Health and Reproductive Politics in a Global Perspective (4)**

Lecture/discussion—3 hours; term paper. Study contemporary issues in reproductive health and reproductive politics, both globally and in the U.S., for women of color. Offered in alternate years. GE credit: SocSci | ACGH, DD, SS, WC, WE.—Deeb-Sossa

**114S. Women of Color Reproductive Health and Gender Politics in Cuba and the US (4)**

Lecture/discussion—3 hours; term paper. Study of contemporary issues in reproductive health, reproductive politics, and gender politics both in Cuba and in the U.S., for women of color. Offered in alternate years. GE credit: SocSci | ACGH, DD, SS, WC, WE.—W. (W.) Deeb-Sossa

**120. Chicana/o Psychology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 21; introductory psychology course recommended. Introduction to the field of Chicana/o psychology. Analysis of socio-cultural context of Chicanas/os and Latinas/os. Special attention to issues of ethnic identity development, bilingualism, and development of self esteem. Impact of minority experience, migration, acculturation are examined. GE credit: SocSci, Div | ACGH, DD, OL, SS, WE.—Flores

**121. Chicana/o Community Mental Health (4)**

Lecture—3 hours; term paper. Prerequisite: course 10 or 20. Mental health needs, problems, and service utilization patterns of Chicanas/os and Latinas/os will be analyzed. An analysis of social service policy, and the economic context of mental health programs. Offered Alternate Years. GE credit: SocSci, Div, Wrt | ACGH, DD, OL, SS, WE.—Flores

**122. Psychology Perspectives Chicana/o and Latina/o Family (4)**

Lecture—4 hours. Prerequisite: course 10; introductory psychology course highly recommended, and/or consent of instructor. Role of migration and acculturation on family structure and functioning. From a psychological and Chicana/o Studies perspective, contemporary gender roles and variations in family structures are examined. Special topics include family violence, addiction, family resilience and coping strategies. GE credit: SS, WE.—F. Flores

**122S. Psychology Perspectives Chicana/o and Latina/o Family (4)**

Lecture—4 hours. Role of migration and acculturation on family structure and functioning. From a psychological and Chicana/o Studies perspective, contemporary gender roles and variations in family structures are examined. Special topics include family violence, addiction, family resilience and coping strategies. This course is taught abroad. Not open for credit to students who have completed course 122. GE credit: OL, SS, WC, WE.—Flores

**123. Psychological Perspectives on Chicana/o and Latina/o Children and Adolescents (4)**

Lecture—3 hours; term paper. Prerequisite: course 10 or 21. Restricted to upper division standing. Psychological and educational development of Chicano/Latino children and adolescents, with particular attention to the formation of ethnic, gender, class, race, and sexual identities. GE credit: SocSci, Div, Wrt | ACGH, DD, OL, SS, WE.—Flores

**125S. Latino Families in the Age of Globalization: Migration and Transculturación (4)**

Lecture/discussion—4 hours. Prerequisite: Spanish 3 or equivalent highly recommended. Impact of globalization on Latino families in the American continent. Relationships of political structure, economics and family. Intimate partner violence, child maltreatment and alcohol/drug abuse in contemporary Latino families. Offered in a Spanish speaking country. 125S GE credit: OL, SS, WC, WE.—Flores

**130. United States-Mexican Border Relations (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing. Theories of U.S.-Mexican border relations, with an overview of the political, economic, and social relationships and an in-depth analysis of immigration issues, border industrialization, women's organizations, economic crises, and legal issues. GE credit: Div | ACGH, DD, SS, WE.—F. (F.) Chabram, Rojas

**131. Chicanas in Politics and Public Policy (4)**

Lecture/discussion—4 hours. Prerequisite: course 30 or Political Science 1. Historical and political analysis of Chicana/Latina political involvement and activities in the general political system, women's movement, Chicano movement, and Chicana movement. Course also examines the public policy process and the relationship of Chicanas/Latinas to public policy formation. Offered in alternate years. GE credit: SocSci, Div | ACGH, DD, OL, SS, WE.—W. (W.) Deeb-Sossa

**131S. Chicanas in Politics and Public Policy (4)**

Lecture/discussion—4 hours. Historical and political analysis of Chicana/Latina political involvement and activities in the general political system, women's movement, Chicano/a movement. Course also examines the public policy process and the relationship of Chicanas/Latinas to public policy formation.

Offered abroad. Not open for credit to students who have completed course 131. GE credit: SocSci, Div | OL, SS, WC, WE.

**132. Political Economy of Chicana/o Communities (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing; lower division Chicana/o Studies course recommended. Historical and contemporary study of political and economic forces which define and influence the development of Chicana/o communities. Includes critiques of traditional and Marxian theories and concepts applicable to Chicana/o communities, case studies of Chicana/o communities, especially in California and Texas. GE credit: ACGH, DD, OL, WE.—S.

**135S. Transnational Latina/o Political Economy (4)**

Lecture—3 hours; term paper. Prerequisite: Spanish 3 or equivalent, or consent of instructor; Economics 1A and 1B recommended. Intensive reading, discussion and research on selected topics from Latin America and the US with regard to immigrant and native communities. Topics include comparative immigration and macroeconomic policies in the US and Latin America. Offered in a Spanish speaking country. Offered irregularly. GE credit: OL, WC, WE.

**140A. Quantitative Methods: Chicano/Latino Health Research (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: two years of high school algebra or the equivalent in college. Focuses on measuring Latino/Chicano health outcomes using a quantitative approach. Assesses main types of study designs and addresses measurement of disease frequency and health effects. Offered in alternate years. GE credit: SciEng | ACGH, DD, QL, SE.—S. (S.) Deeb-Sossa

**141. Community-Based Participatory Research and Chicana/o and Latina/o Health (4)**

Lecture/discussion—3 hours; term paper. Overview of CBPR, as well as methodological CBPR considerations in building community partnerships, community assessment, issue analysis, research planning, data gathering, and data sharing with Chicana/o and Latina/o communities in particular. GE credit: WE.—F. (F.) Flores, Deeb-Sossa

**145S. Bi-National Health (5)**

Lecture—5 hours. Prerequisite: Biological Sciences 1A-1B-1C, Spanish 21 or 31 or consent of instructor; upper division standing only. Examination of health status and intervention strategies presented in public health care settings, private clinics and by indigenous healers in Mexico. Analysis of impact of high risk diseases. Offered in a Spanish speaking country under supervision of UC Davis faculty/lecturer. GE credit: OL, WC, WE.—F. Flores, de la Torre

**146S. Public Health in Latin America (5)**

Lecture/discussion—4 hours; term paper. Critical examination of emerging Public Health issues in Latin America in light of economic, political and social conditions. Contemporary behavioral frameworks used in public health. Includes analysis of clinical medicine and health care systems.—de la Torre

**147S. Indigenous Healing and Biodiversity in Latin America (5)**

Lecture—4 hours; term paper. Contrast between western and traditional healing practices in Latin America and the role of the natural environment in creating sustainable health delivery systems. Questions of health status attributable to public health and environmental risk factors. GE credit: OL, WC, WE.—F. de la Torre

**150. The Chicana and Chicano Movement (4)**

Lecture—3 hours; term paper. Development of the Chicano Movement within the context of the socio-political movements of the 1960's in a national and global perspective. Ideological/political perspectives and the implications for political strategies. GE credit: ArtHum, Div, Wrt | ACGH, AH or SS, DD, WC, WE.—W. (W.) Deeb-Sossa

**154. The Chicana/o Novel (4)**

Lecture—4 hours. Prerequisite: intermediate Spanish or consent of instructor. Introduction to the forms and themes of the Chicana/o novel with special attention to the construction of gender, nationality, sexuality, social class, and the family by contemporary Chicana/o novelists. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course Spanish 126A.) GE credit: ArtHum, Div | ACGH, AH, DD, OL, WC, WE.—W. Chabram, Montoya

**155. Chicana/o Theater (4)**

Lecture—4 hours. Prerequisite: intermediate Spanish or consent of instructor. Examination of the formal and thematic dimensions of Chicana/o theater in the contemporary period with special emphasis on El Teatro Campesino and Chicana Feminist Theater. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course Spanish 126B.) GE credit: ACGH, AH, DD, OL, VL, WC, WE.—Chabram

**156. Chicana/o Poetry (4)**

Lecture—4 hours. Prerequisite: intermediate Spanish or consent of instructor. Survey of Chicana/o poetry with special emphasis on its thematic and formal dimensions. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course Spanish 126C.) GE credit: ACGH, AH, DD, OL, WC, WE.—S. Chabram

**157. Chicana and Chicano Narrative (4)**

Lecture/discussion—3 hours; term paper. Exploration of contemporary forms of the Chicana and Chicano narrative, encompassing visual art, fiction, poetry, film, theater, and creative nonfiction. Exposure to a variety of artists and scholars whose work shapes our evolving understanding of the Chicana/o experience. GE credit: ArtHum | ACGH, AH, DD, VL, WC, WE.—S. Montoya

**160. Mexican Film and Greater Mexican Identity (4)**

Lecture/discussion—4 hours; film viewing—1 hour. Prerequisite: intermediate Spanish. Survey of the role Mexican cinema plays in consolidation and contestation of post-revolutionary Mexican state and in the formation of a greater Mexican cultural identity including Chicana/o identity. Showcases genres, periods, auteurs, movements, and emphasis on gendered and sexualized narratives. GE credit: ArtHum, Div | AH, VL, WC, WE.—de la Mora

**161. Queer Latinidad (4)**

Lecture/discussion—3 hours; term paper or discussion. Introduction to queer Latina and Latino studies with a focus on Chicana and Chicano theory and cultural production. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.—S. (S.) de la Mora, Zepeda

**165. Chicanas, Latinas and Mexicanas in Commercial Media (4)**

Lecture/discussion—4 hours; laboratory—2 hours. Prerequisite: course 60 or other film or feminist theory course; conversational fluency in Spanish. The portrayal of Chicanas, Latinas and Mexicanas in commercial media. The relation between the representation of Chicana, Latina, and Mexicana women in commercial television and cinema and the role of women in Mexican and U.S. societies. Offered in alternate years. GE credit: AH, VL, WC, WE.—de la Mora

**170. Contemporary Issues in Chicano Art (4)**

Lecture—4 hours. Issues and conflicts in the dismantling of the Contemporary Chicano Art Movement. Response and challenge to the dominant culture. GE credit: ACGH, AH, DD, VL, WC, WE.—Jackson

**171. Mexican and Chicano Mural Workshop (4)**

Studio—8 hours; independent study—1 hour. Prerequisite: course 70; consent of instructor. The Mural: a collective art process that empowers students and people through design and execution of mural paintings in the tradition of the Mexican Mural Movement; introduces materials and techniques.

May be repeated one time for credit. (Same course as Art Studio 171.) GE credit: ArtHum | AH, VL.—S. Jackson, Montoya

**172. Chicana/o Voice/Poster Silk Screen Workshop (4)**

Studio—8 hours; independent study—1 hour. Prerequisite: course 70 or course 73 and consent of instructor. The poster as a voice art form used by Chicanas/os and other people of color to point to the defects of social and political existence and the possibility for change, from the Chicana/o artists' perspective. May be repeated one time for credit. GE credit: AH, OL, VL, WC.—W. Jackson

**180. Grant Writing in the Chicana/o/Latina/o Community (4)**

Lecture—4 hours. Prerequisite: course 10, 23 or consent of instructor. Upper division standing. Overview of key elements for grant writing. Topics include community needs assessments, development of human subjects protocols, data collection, methods, evaluation designs and community based methodologies for grant development applications in the Latino community. Offered irregularly.—de la Torre

**181. Chicanas and Latinas in the U.S.: Historical Perspectives (4)**

Lecture/discussion—4 hours. Prerequisite: course 10 or Women's Studies 50. Historical issues in the lives of Chicanas, Puerto Ricanas, and Cubans in the U.S. and their countries of origin. GE credit: ArtHum, Div, Wrt | ACGH, AH or SS, DD, WE.

**182. Race and Juvenile Justice (4)**

Lecture—4 hours. Prerequisite: course 10 or equivalent. Individual and institutional responses to "troublesome" youth of color through history and in contemporary society. Emphasis on how race, as well as ethnicity, class, and gender have informed the treatment of "delinquent" youth. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, DD, OL, SS, WE.—Rojas

**184. Latino Youth Gangs in Global Perspective (4)**

Lecture—3 hours; term paper. Comparative analysis of Latino youth gangs in Europe, Latin America, and the United States. Social, economic, political, and cultural factors leading to youth gangs as well as the responses are considered within a global perspective. Not open for credit to students who have completed course 184S. Offered irregularly. GE credit: SocSci | ACGH, DD, OL, SS, WC, WE.

**185. Latino Youth Gangs in Global Perspective (4)**

Lecture—12 hours. Comparative analysis of Latino youth gangs in Europe, Latin America, and the United States. Social, economic, political, and cultural factors leading to youth gangs as well as the responses to the youths are considered within a global perspective. Not open for credit to students who have completed course 184. Offered irregularly. GE credit: SocSci | ACGH, DD, OL, SS, WC, WE.

**192. Internship in the Chicana/Chicano/Latino Community (1-12)**

Internship—3-36 hours. Prerequisite: course 10, 21, or 50, Spanish 3 or the equivalent. Academic guidance combined with internship in community agencies serving Mexican/Latina/Latino/Chicana/Chicano clients. Use of bilingual skills and knowledge of history, culture, economics, politics and social issues. Internship project required. May be repeated for credit up to 12 units. (P/NP grading only.)

**192S. Internship (1-12)**

Internship. Prerequisite: consent of instructor; course 10, 21, or 50; Spanish 3 or equivalent. May be repeated for credit (P/NP grading only.)

**194HA. Senior Honors Research Project (2-5)**

Independent study—6-15 hours. Prerequisite: senior standing in Chicana/o Studies major. Student is required to read, research, and write Honors Thesis

on Chicana/o Studies topics. (Deferred grading only, pending completion of sequence.) GE credit: OL, WE.—F, W, S. (F, W, S.)

**194HB. Senior Honors Research Project (2-5)**

Independent study—6-15 hours. Prerequisite: senior standing in Chicana/o Studies major. Student is required to read, research, and write Honors Thesis on Chicana/o Studies topics. (Deferred grading only, pending completion of sequence.) GE credit: OL, WE.—F, W, S. (F, W, S.)

**194HC. Senior Honors Research Project (2-5)**

Independent study—6-15 hours. Prerequisite: senior standing in Chicana/o Studies major. Student is required to read, research, and write Honors Thesis on Chicana/o Studies topics. (Deferred grading only, pending completion of sequence.) GE credit: OL, WE.—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

Prerequisite: upper division standing and consent of Program Chairperson. (P/NP grading only.)

**198S. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: upper division standing and consent of Program Chairperson. (P/NP grading only.)

**199S. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate****230. Chicano/Latino Hispanic Politics (4)**

Seminar—3 hours; term paper. Prerequisite: two undergraduate courses in Chicana/o Studies or consent of instructor. Examination of Chicano/Latino political experiences. Evaluate theories, ideology, and practice of Chicano politics. Brief history of Chicano/Latino/Hispanic political activity, comparisons among political modes, gendered politics, and understanding relationships among Chicano, Mexican, American and world politics. Offered irregularly.—Chabram

**298. Group Study for Graduate Students (1-5)**

Prerequisite: graduate standing, consent of instructor. May be repeated for credit when topic differs. (S/U grading only.)

**299. Special Study for Graduate Students (1-12)**

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

**Professional****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

**Child Development (A Graduate Group)**

Katherine J. Conger, Ph.D., Group Chairperson

**Group Office.** 1315 Hart Hall

530-754-4109;

<http://humandev.ucdavis.edu/>

**Faculty.** See Human Development (A Graduate Group), on page 373.

**Graduate Study.** The Graduate Group in Child Development offers a multidisciplinary program leading to an M.S. degree. The program provides students with an opportunity to pursue a coordinated course of postgraduate study in the field of child development which cuts across departmental boundaries. Students may work with children and families in the community, as well as the University's Center

for Child and Family Studies. Recipients of the degree gain sufficient background to engage in professions that directly (e.g., preschool, 4-H) or indirectly (e.g., social policy) involve children and families, obtain positions in teaching or research settings, or pursue further study leading to a doctorate in child development, human development, clinical psychology, or related fields.

Applicants seeking admissions and fellowships consideration must submit all materials by our priority December 15 deadline. The final admissions deadline is March 1. See our website for more details.

**Graduate Adviser.** Contact Group office.

### The Cinema and Digital Media Major Program

The Cinema and Digital Media (CDM) program combines the study of audio-visual and digital media, theories about such media, and the relevant modes of artistic practice and production. CDM integrates the analysis of audio-visual and digital texts with their theoretical underpinnings and their methods of production. The program also addresses the

particular impact that technology has on culture in its many forms and fields.

CDM faculty teach and research on various histories, theories, and practices of media. Current fields for teaching and research in cinema and digital media include the history and analysis of film and video, film and video production, electronic music, digital content creation and design, the digital arts, community media and activism, computer graphics, animation, and gaming—as well as the theories and politics of these various areas.

**The Program.** Preparatory course work involves a solid introduction to the history, ideas and current trends in cinema and digital media. For depth subject matter, students in the major select a combination of critical studies and creative production courses. Two courses will be selected from the production/programming distribution, two from the theory/history distribution and four will be elected by the student, allowing them to take up to six production courses or six studies/theory classes, should they so choose.

**Career Alternatives.** Cinema and Digital Media is designed to prepare graduates to be highly adaptable analytical thinkers, collaborative, multi-skilled and current with the latest developments in media and technology. Perhaps most importantly is self-motivation: students do best when fueled by their own passions and plot their own directions, while held to very high standards. We feel this is the best education for living and working in a complex, rapidly changing world. Final research papers and creative production portfolios will provide graduate school admissions committees, employers or clients with tangible evidence of Cinema and Digital Media graduates' track records and talents.

**Course Changes.** Cinema and Digital Media is working on updating all of the existing FMS, TCS, and CTS courses to the CDM course code. If you have any questions regarding the course code changes and equivalent major requirements please contact the Arts Group Advising Center at 530-752-0890.

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter.....25

Choose two courses from:

Film Studies 1; Technocultural Studies 1 or 5 ..... 8

Cinema and Technocultural Studies 12, 20 ..... 9

Choose two courses from:

Cinema and Technocultural Studies 40A, 40B, 41A, 41B; Film Studies 45 ..... 8

#### Depth Subject Matter .....37-38

Film Studies 127 or Cinema and Technocultural Studies 150 ..... 5

Choose two courses for a total of 8 units from the following courses:

Art Studio 114A, 114B, 114C, 117; Cinema and Technocultural Studies 116, 124E, 174; Technocultural Studies 100, 101, 103, 104, 111, 112, 113, 115, 121, 122, 123, 125, 130, 131, 170A-E, 175, 192, 198, 199 ..... 8

Choose two courses for a total of 8 units from the following courses:

Cinema and Technocultural Studies 146A, 147A, 150; Film Studies 120, 121, 121S, 124, 125, 127, 129, 142, 176A, 189, 194H, 195H, 198, 199; Science and Technology Studies 160; Technocultural Studies 151, 152, 155, 158, 159.

Some courses are identified as fulfilling more than one requirement; a given course can only fulfill one such requirement ..... 8

Plus four additional courses chosen from the lists above for a total of at least 16 units ..... 16

#### Total Units for the Major .....62-63

**Major Adviser.** Information on the current Academic Advisers can be obtained by contacting the Arts Group Advising Center at 530-752-0890.

### The Film Studies Major Program

Major is closed to new students beginning 2015-2016.

Interested students are encouraged to explore the Film Studies minor which is open to new and current students, and the Cinema and Digital Media major which incorporates many of the courses previously offered through Film Studies.

**The Program.** The interdisciplinary major in Film Studies takes one of the most influential art forms of the twentieth century and today as its object of study. The field of Film Studies addresses the history, theory, and culture of this art form and asks questions about film texts themselves: modes of production (including everything from filmmakers' aesthetic choices to the role of the global economy); historical, national, and cultural contexts; and spectators and audiences. Questions of gender, race, sexuality, and nationality, in all of these areas, have been central to Film Studies almost since its inception and continue to shape much of the work in the field. While the program emphasizes film history, criticism, and theory, students also have opportunities to explore film/video production.

Students majoring in Film Studies take upper-division courses in film history and film theory, as well as in at least three of five general areas of study. Students also develop a thematic emphasis, in consultation with an adviser, that draws on courses from at least two different departments/programs and that allows them to pursue their particular interests within the field of Film Studies. Students have the option of completing a senior thesis (either a written paper or an original film/video) within this emphasis.

**Career Alternatives.** The A.B. degree in Film Studies prepares students for a variety of careers in media industries: for example, local and national film and television production companies, local television newsrooms, community television stations, computer graphic companies, advertising and marketing companies, public relations departments, and film distribution companies. Students wishing to pursue graduate work will be prepared to go on in film studies, as well as a variety of other fields that draw on interdisciplinary study: for example, American studies, English, literatures and languages, drama, communication, computer science, cultural studies, women and gender studies, and ethnic studies programs. Many film students also choose to go on to law school, and the analytical skills, writing abilities, and familiarity with theoretical thought developed through the film major prepare them well for the study and practice of law.

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter .....20-40

Film Studies 1 ..... 4

A four-course sequence in a single language or equivalent ..... 0-20

One course from: African American and African Studies 15, 50; American Studies 1A, 21, 30; Art History 5; Art Studio 30;

Chicana/o Studies 50, 60; Design 1;

French 50; Humanities 60; Italian 50;

Japanese 25; Native American Studies 32;

Textiles and Clothing 7; Women's Studies 20, 25

..... 4

One course from: African American and African Studies 10, 15, 50; Asian

American Studies 1, 2; Chicana/o Studies 10, 50, 60; Native American Studies 1,

10, 32, 33; Women's Studies 20, 25, 50,

70, 80

..... 4

Two courses from: Art History 1A, 1B, 1C,

1D; Asian American Studies 2; Chinese 10,

11; Classics 10; Comparative Literature 3,

4, 5, 6, 7; Dramatic Art 1, 20; English 43,

44; German 48; History 4C, 10C, 17B, 72B; Humanities 5, 6; Japanese 10; Music 10, 28; Native American Studies 33; Russian 41, 42 ..... 8  
Note: One of these two courses may be from Design 15, 16 or Dramatic Art 10, 21A, 21B, 24.

### **Depth Subject Matter ..... 36-40**

One course from: English 161A, 161 B or Film Studies 124 ..... 4  
One course from: English 162; Film Studies 127; Philosophy 127; Women and Gender Studies 162 ..... 4  
One course each from three of the following topic areas: Cinematic Traditions and Movements, Visual and Popular Culture, Gender/Sexuality/Class, Race/Ethnicity/Class, Production and Performance ..... 12  
A current list of approved classes is available from the Advising office and from the faculty adviser.  
16-20 units in one of the two breadth areas not used to satisfy the breadth requirement, or development of a thematic area in consultation with a faculty adviser ..... 16-20  
Qualified students who complete 20 units and have an overall GPA of 3.500 may choose the senior thesis option (194H-196H) for 8 of those 20 units.  
No course may be counted for more than one requirement for the major.

### **Total Units for the Major ..... 56-80**

**Major Adviser.** Information on the current Academic Advisers can be obtained by contacting the Arts Group Advising Center at 530-752-0890.

### **Minor Program Requirements:**

	UNITS
<b>Film Studies ..... 24</b>	
Film Studies 1 ..... 4	
Upper division courses selected from the following list, with no more than two courses from any one category..... 20	
(a) <i>Problems and Themes in Cinema:</i> Anthropology 136, Classics 102, Dramatic Art 115, English 160, 161A, 161B, Film Studies 124, 125, Women's Studies 162	
(b) <i>Cinema, Nation and Nationality:</i> German 119, 142, Film Studies 176A, 176B, Italian 150, Japanese 106, Russian 129, Spanish 148	
(c) <i>Film and Social Identities:</i> African American and African Studies 170, 171, Film Studies 120, Jewish Studies 120, Women's Studies 160, 164	
(d) <i>Film/Video Production:</i> Art Studio 116, 117, 150	
(e) <i>Popular and Visual Culture:</i> American Studies 130, 132, 133, 139, Art Studio 150, Communication 140, Political Science 165, Textiles and Clothing 107, Women's Studies 139	

**Minor Adviser.** Information on the current Academic Advisers can be obtained by contacting the Arts Group Advising Center at 530-752-0890.

### **The Technocultural Studies Major Program**

Major is closed to new students beginning 2015-2016.

Interested students are encouraged to explore the Cinema and Digital Media major which incorporates many of the courses previously offered through Technocultural Studies.

### **The Program**

The Technocultural is an interdisciplinary integration of current research in cultural history and theory with innovative hands-on production in digital media and "low-tech." It focuses on the fine and performing arts, media arts, community media, literature and cultural studies as they relate to technology and sci-

ence. Backed by critical perspectives and the latest forms of research and production skills, students enjoy the mobility to explore individual research and expression, project-based collaboration and community engagement.

Preparatory coursework involves a solid introduction to the history, ideas and current activities of Technocultural studies, along with technical skill courses enabling individuals to get up to speed on digital imaging, sound, digital video and Web production, among other skills. For depth subject matter, students in the major select to concentrate on either critical studies or creative production emphases, and work toward a final project. All majors are required to take at least one course from another department or program relevant to their area of study, upon approval from Technocultural Studies, and may take more courses with approval. The final project for the critical studies emphasis consists of a substantial research paper. The final project for the creative production emphasis will be a major individual or collaborative work. Plans for final projects must be approved in advance.

### **Career Paths**

Technocultural Studies is designed to prepare graduates to be highly adaptable, collaborative, multi-skilled, and current with the latest developments. Perhaps most importantly is self-motivation: students do best when fueled by their own passions and plot their own directions, while held to very high standards. We feel this is the best education for living and working in a complex and rapidly changing world. Final research papers and creative production portfolios will provide graduate school admissions committees, employers, or clients with tangible evidence of Technocultural Studies graduates' track records and talents.

### **A.B. Major Requirements:**

	UNITS
<b>Preparatory Subject Matter ..... 28</b>	
Technocultural Studies 1, 2, 4, 5, 6, 7A-E ..... 24	
American Studies 1A or 5 ..... 4	
<b>Depth Subject Matter ..... 44</b>	
Technocultural Studies 190, 191 ..... 8	
Production emphasis ..... 32	
Choose five from production based Technocultural Studies: 100, 101, 103, 104, 110, 111, 112, 113, 121, 122, 123, 192	
Plus two from Technocultural Studies: 120, 150, 151, 152, 153, 154, 155, 158, 159	
Plus a four-unit class from another department or program relevant to the student's area of concentration, as approved by Technocultural Studies.	
Studies emphasis ..... 32	
Choose two from production based Technocultural Studies: 100, 101, 103, 104, 110, 111, 112, 113, 121, 122, 123, 192	
Plus five from Technocultural Studies: 120, 150, 151, 152, 153, 154, 155, 158, 159

### **Total Units for the Major ..... 72**

**Major Adviser.** Information on the current Academic Advisers can be obtained by contacting the Arts Group Advising Center at 530-752-0890.

### **Courses in Cinema & Technocultural Studies (CTS)**

#### **Lower Division**

##### **12. Introduction to Media Computation (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Introduction to key computational ideas necessary to understand and produce digital media. Fundamentals of programming are covered as well as analysis

of how media are represented and transmitted in digital form. Aimed primarily at non-computer science students. (Same course as Engineering: Computer Science 012.) GE credit: ArtHum or SciEng | AH or SE, VL—W. (W.) Neff

### **20. Filmmaking Foundations (5)**

Lecture—3 hours; laboratory—3 hours; film viewing—2 hours; project. Prerequisite: recommended: course 5/Technocultural Studies 5 and/or Film Studies 1. Introduction to filmmaking concepts, principles, and methods. Hands-on exercises build critical and creative capacities. Emphasis on form, content and the historical dialectic between classical narrative filmmaking conventions and artists' challenges to these conventions. Weekly Lab, Lab Preparation, and Evening Screening. GE credit: ArtHum | AH, VL—F. (F.) Wyman

### **40A. Media History 1, Gutenberg to Oppenheimer (4)**

Lecture—3 hours; discussion—1 hour; film viewing—2 hours; extensive writing. History of Media to 1945, with particular focus on mechanically reproduced mass media technologies including the printing press, the newspaper, photography, cinema, radio and early computing technology. Analysis of inter-related cultural and political topics. (Same Course As: Science and Technology Studies 40A.) GE credit: ArtHum or SocSci | AH or SS, OL, VL, WE—F. (F.)

### **40B. Media History 2 1945-Present (4)**

Lecture—3 hours; discussion—1 hour; film viewing—2 hours; extensive writing. Prerequisite: course 40A. History of media from 1945 to present, with particular focus on the development of the computer, digital network and internet technologies in the context of other media infrastructures like radio, television and satellite networks. Analysis of inter-related cultural/political topics. (Same course as Science & Technology Studies 40B.) GE credit: ArtHum or SocSci | AH or SS, OL, VL, WE—F. (F.)

### **41A. History of Cinema from 1895 to 1945 (4)**

Lecture—2 hours; discussion—1 hour; film viewing—3 hours; extensive writing. Examination of the cultural context of the emergence of cinema. Discussion of cinema as a product of the age of industrialization and conquest, as well as an element of urban culture, and mass transportation. GE credit: ArtHum | AH, OL, VL, WC, WE.

### **41B. History of Cinema from 1945 to the present (4)**

Lecture—2 hours; discussion—1 hour; film viewing—3 hours; extensive writing. Examination of cinema in the postwar period. Study of world cinema trends and the economic and socio-political conditions enabling innovative work in the film industry. GE credit: ArtHum | AH, OL, VL, WC, WE.

### **Upper Division**

#### **116. Design on Screen (4)**

Lecture/discussion—3 hours; film viewing—2 hours. Analysis of the contribution of outstanding designers for cinema, television and filmed entertainment. Study of diverse aesthetic theories of production design and art direction, costume design, or cinematography. Introductory principles and practice, history. May be repeated two times for credit when topic differs. (Same course as Dramatic Art 116.) Offered irregularly. GE credit: ArtHum | AH, VL—Iacovelli, Morgan

#### **124E. Costume Design for Film (4)**

Lecture/discussion—4 hours. Prerequisite: for Dramatic Art majors; Dramatic Art 24 or 124D or consent of instructor. Theory and practice of the art and business of film costume design. Script analysis, costume research, developing design concepts, budgeting, and current production practices and methods. Execution of designs for period and contemporary films. Viewing of current films. (Same course as Dramatic Art 124E.) GE credit: ArtHum | AH, OL, VL—W. (W.) Morgan

**146A. Modern Iranian Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: upper-division standing, or consent of instructor. Iranian cinema of the 20th century in the context of profound cultural and social changes in Iran especially since the Iranian Revolution. Productions by representative directors such as Kiarostami, Makhmalbaf, Bahram Beizaie are included. Knowledge of Persian not required. (Same course as Middle East/South Asia Studies 131A.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—(S.)

**147A. Chinese Film (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: History 9A or any course on traditional China; upper division standing. English language survey of Chinese film, from its inception to the end of the twentieth century. Chinese films as important texts for understanding national, transnational, racial, gender, and class politics of modern China. (Same course as Chinese 101.) GE credit: ArtHum, Div | AH, VL, WC.—S. (S.) Chen

**148B. Japanese Literature on Film (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Survey of films based on works of Japanese literature, emphasis on pre-modern and early modern texts. Introduction to major directors of Japan, with a focus on cinematic adaptation. Lectures and readings in English. Films in Japanese with English subtitles. (Same course as Japanese 156.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—(S.) Sorensen

**150. Media Theory (5)**

Lecture—2 hours; discussion—1 hour; film viewing—3 hours; extensive writing. Critical and theoretical approaches to the emergence of new technologies since the invention of photography. Examine various approaches to media (formalist, semiotic, structuralist, Frankfurt School, cybernetics, visual and game theory). (Same course as Science and Technology Studies 151.) GE credit: AH or SS, OL, VL, WE.

**162. Surveillance Technologies and Social Media (4)**

Lecture—3 hours; film viewing—3 hours; term paper. Prerequisite: Technocultural Studies 1 or course 20. Study of the ubiquitous presence of CCTV, face recognition software, global tracking systems, biosensors, and data mining practices that have made surveillance part of our daily life. Exploration of the boundary between security and control, information and spying. (Same course as Science & Technology Studies 162.) Offered in alternate years. GE credit: ACGH, AH or SS, OL, VL, WE.—Ravetto

**172. Video Games and Culture (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: Technocultural Studies 1 or English 3 or Science and Technology Studies 1 or equivalent. Critical approaches to the study of video games, focusing on formal, historical, and cultural modes of analysis. History of software and hardware in North American and global contexts. Relations of games to society, politics, economics, literature, media, and the arts. (Same course as Science and Technology Studies 172 and English 172.) GE credit: ArtHum or SocSci | ACGH, AH or SS, VL

**174. Acting for Camera (4)**

Lecture/laboratory—6 hours. Prerequisite: consent of instructor. Analysis and practice of acting skills required for camera work and digital media. May be repeated eight times for credit when instructor differs. (Same course as Dramatic Art 174.)—S. (S.) Anderson, Merlin

**Courses in Film Studies (FMS)****Lower Division****1. Introduction to Film Studies (4)**

Lecture—2 hours; discussion—1 hour; film viewing—3 hours. Analysis of film form and narrative, including cinematography, editing, and sound. Issues in film studies, including authorship, stardom, race, gender, class, and cultural identity. Includes

introduction to selected cinematic movements and national film traditions. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE.—F, W, S. (F, W, S.)—Fisher, Lu, Ravetto-Biagioli, Smoodin

**45. Vampires and Other Horrors in Film and Media (4)**

Lecture—2 hours; discussion—1 hour; film viewing—3 hours. History of representations of vampires and horror generally from the 19th through 21st centuries. Emphasis on transnational history of the horror genre; psychologies of horror effects; issues of race, gender, and class; intersections with prejudice, medicine, modernity. (Same course as German 45.) Offered in alternate years. GE credit: ArtHum | ACGH, AH, DD, OL, VL, WC, WE.—W, S. Fisher

**90X. Lower Division Seminar (4)**

Seminar—4 hours. Prerequisite: lower division standing and consent of instructor. Study of a special topic in film studies in a small class setting. May be repeated for credit if topic differs. (P/NP grading only.)—F, W, S. (F, W, S.)

**92. Internship (1-12)**

Internship—3-36 hours. Supervised internship off and on campus in areas of Film Studies. May be repeated for credit. (P/NP grading only.)

**98. Directed Group Study (1-5)**

(P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

(P/NP grading only.)

**Upper Division****120. Italian-American Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1. Exploration of representations of Italian-American identity in American (U.S.) cinema. Analysis of both Hollywood and independently produced films, especially as they represent ethnicity, gender, and social class of Italian Americans. Not open for credit to students who have completed Humanities 120. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, OL, VL, WC, WE.—S. (S.) Heyer-Caput, Schiesari

**121. New Italian Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1 and upper-division standing, or consent of instructor. Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. (Same course as Italian 121.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—S. Heyer-Caput

**121S. New Italian Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1 and upper-division standing, or consent of instructor. Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. (Same course as Italian 121S.) GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—F, S. (F, S.) Heyer-Caput

**124. Topics in U.S. Film History (4)**

Lecture—3 hours; film viewing—3 hours. Prerequisite: course 1. Study of an aspect of American film history (such as the silent era; the studio system; U.S. avant-garde cinema), including the influences of technological, economic, regulatory, cultural, and artistic forces. Not open for credit to students who have completed Humanities 124 unless topic differs. May be repeated two times for credit if topic differs. GE credit: ArtHum, Wrt | ACGH, AH, DD, OL, VL, WE.—S. (S.) Clover, Fisher, Simon, Smoodin

**125. Topics in Film Genres (4)**

Lecture—3 hours; film viewing—3 hours. Prerequisite: course 1. A study of one or more of the film genres (such as the documentary, the musical, film noir, screwball comedy, or the western), including genre theory and the relationship of the genre(s) to

culture, history, and film industry practices. Not open for credit to students who have completed Humanities 125 unless topic differs. May be repeated two times for credit if topic differs. GE credit: ArtHum, Wrt | AH, OL, VL, WE.—W. (W.) Clover, Constable, Fisher, Ravetto-Biagioli, Simon, Smoodin

**127. Film Theory (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1 or consent of instructor. Survey of the conceptual frameworks used to study film (including semiotics, psychoanalysis, spectatorship, auteur, genre and narrative theories). Historical survey of major film theorists. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE.—S. (S.) Fisher, Ravetto-Biagioli

**129. Russian Film (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: completion of Subject A requirement. History of Russian film; film and social revolution, the cult of Stalin, dissident visions; film and the collapse of the Soviet empire; gender and the nation in Russian film. Course taught in English; films are in Russian with English subtitles. (Same course as Russian 129.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—W.

**142. New German Cinema (4)**

Lecture/discussion—3 hours; extensive writing. German filmmakers of the 1960s-1980s such as Fassbinder, Herzog, Syberberg, Brückner, Schlöndorff, Kluge, Wenders. Knowledge of German not required. May be repeated for credit with consent of instructor. (Same course as German 142) GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE.—F. (F.) Fisher

**176A. Classic Weimar Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: Humanities 1. German Weimar (1919-1933) cinema. Fritz Lang, F.W. Murnau, and G.W. Pabst among others. Influence on world-wide (esp. Hollywood) film genres such as film noir, horror, science fiction, and melodrama. Not open for credit to students who have completed Humanities 176. (Same Course as German 176A.) Offered in alternate years. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE.—F. Fisher

**176B. Postwar German Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1. Exploration of German cinema from 1945 to 1980, when the Nazi past was a central theme. Includes study of postwar "rubble films," escapist "homeland films," and New German Cinema of the 1970s (including films by Fassbinder, Kluge, Syberberg, and Herzog). Not open for credit to students who have completed Humanities 177. Offered in alternate years. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE.—W.

**189. Special Topics in Film Studies (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1, upper division standing, or consent of instructor. Group study of a special topic in film, focusing on a national tradition, a major filmmaker, or a specific era. May be repeated three times for credit. GE credit: ArtHum, Wrt | AH, OL, VL, WE.—F, S. (F, S.) Clover, Constable, Fisher, Heyer-Caput, Lu, Simon, Smoodin

**190X. Upper Division Seminar (4)**

Seminar—4 hours. Prerequisite: upper division standing or consent of instructor. Study of a special topic in film studies in a small class setting. May be repeated for credit if topic differs. (P/NP grading only.)—F, W, S. (F, W, S.)

**192. Internship (1-12)**

Supervised internship off and on campus in areas of Film Studies. May be repeated for credit. (P/NP grading only.)

**194H. Special Study for Honors Students (1-5)**

Variable—1-5 hours; independent study—3-15 hours. Prerequisite: senior standing; GPA of at least 3.500; consent of instructor. Guided research on a topic in Film Studies in preparation for the writing of an honors thesis in course 195H or the creation of

an honors project in course 196H. May be repeated two times for credit. (P/NP grading only.) —F, W, S. (F, W, S.)

### **195H. Honors Thesis (1-5)**

Independent study—3-15 hours. Prerequisite: course 194H and consent of instructor; GPA of at least 3.500; senior standing. Writing of an honors thesis on a topic in Film Studies under the direction of a faculty member. May be repeated two times for credit. (P/NP grading only.) GE credit: AH, VL, WE.—F, W, S. (F, W, S.)

### **196H. Honors Project (1-5)**

Project—3-15 hours. Prerequisite: course 194H and consent of instructor; GPA of at least 3.500; senior standing. Creation of an honors film, video, or mixed-media project under the direction of a faculty member. May be repeated two times for credit. (P/NP grading only.) GE credit: AH, VL, WE.—F, W, S. (F, W, S.)

### **197T. Tutoring in Film Studies (1-5)**

Tutorial—3-15 hours. Prerequisite: consent of program director. Leading of small voluntary discussion groups affiliated with one of the Program's regular courses. May be repeated for credit. (P/NP grading only.)

### **198. Directed Group Study (1-5)**

(P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

## **Professional**

### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit (S/U grading only.)

## **Courses in Technocultural Studies (TCS)**

### **Lower Division**

#### **1. Introduction to Technocultural Studies (4)**

Lecture—3 hours; extensive writing. Contemporary developments in the fine and performing arts, media arts, digital arts, and literature as they relate to technological and scientific practices. GE credit: ArtHum | AH, VL, WE.—Ostertag

#### **5. Media Archaeology (4)**

Lecture/discussion—3 hours; term paper. Evolution of media technologies and practices beginning in the 19th Century as they relate to contemporary digital arts practices. Special focus on the reconstruction of the social and artistic possibilities of lost and obsolete media technologies. GE credit: ArtHum or SciEng | AH or SE, VL, WE.

#### **7A. Technocultural Workshop; Digital Imaging (1)**

Seminar—1 hour. Workshops in technocultural digital skills; Digital Imaging. Offered irregularly. GE credit: VL.—F, Su. (F, Su.)

#### **7B. Technocultural Workshop; Digital Video (1)**

Seminar—1 hour. Workshops in technocultural digital skills; Digital Video. Offered irregularly. GE credit: VL.—F, Su. (F, Su.)

#### **7C. Technocultural Workshop; Digital Sound (1)**

Seminar—1 hour. Workshops in technocultural digital skills; Digital Sound. Offered irregularly. GE credit: VL.—F, Su. (F, Su.)

#### **7D. Technocultural Workshop; Web Design (1)**

Seminar—1 hour. Workshops in technocultural digital skills; Web Design. GE credit: VL.

#### **7E. Technocultural Workshop; Topics in Digital Production (1)**

Seminar—1 hour. Workshops in technocultural digital skills; Topics in Digital Production. May be repeated for credit. Offered irregularly. GE credit: VL.—S, Su. (S, Su.)

### **Upper Division**

#### **100. Experimental Digital Cinema I (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Experimental approaches to the making of film and video in the age of digital technologies. Opportunities for independent producers arising from new media. Instruction in technical, conceptual and creative skills for taking a project from idea to fruition. GE credit: VL.—Wyman

#### **101. Experimental Digital Cinema II (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: course 100. Continuation of course 100 with further exploration of digital cinema creation. Additional topics include new modes of distribution, streaming, installation and exhibition. GE credit: VL.—Wyman

#### **103. Interactivity and Animation (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Fundamentals of creating interactive screen-based work. Theories of interactivity, linear versus non-linear structures, and audience involvement and participation. Use of digital production tools to produce class projects. GE credit: VL.—Drew

#### **104. Documentary Production (4)**

Lecture/discussion—3 hours; project. Prerequisite: course 7B or equivalent proficiency, course 155. Traditional and new forms of documentary, with focus on technocultural issues. Skills and strategies for producing work in various media. Progression through all stages of production, from conception through post-production to critique. GE credit: VL.—Drew, Wyman

#### **110. Object-Oriented Programming for Artists (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: course 1. Introduction to object-oriented programming for artists. Focus on understanding the metaphors and potential of object-oriented programming for sound, video, performance, and interactive installations. GE credit: VL.—S. Ostertag

#### **111. Community Media Production (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Use of video and new media tools to address social issues among neighborhood and community groups. Students will use basic video, sound, and lighting techniques as they work with local groups in a group video project. GE credit: VL.—S. (S.) Ostertag

#### **112. New Radio Features and Documentary (4)**

Lecture/discussion—3 hours; laboratory—3 hours. New feature and documentary production for radio and other audiophonic media, including audio streaming Web sites and installation. Emphasis on new and experimental approaches to audio production for broadcast on community radio and in international arts programming.

#### **113. Community Networks (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Impact and implications of computer-based networks in community, civic, and social life. Subjects may include community-access computer sites, neighborhood wireless networks, the digital divide, open-source software, and citizen action.

#### **115. Electronics for Artists (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 1. Creative application of electronic technology relevant to media and fine arts involving both electronic principles and hands-on application.—S. (S.) Drew

#### **120. History of Sound in the Arts (4)**

Lecture—3 hours; term paper. Prerequisite: course 1. A survey of the use of sound, voice, noise, and modes of listening in the modernist, avant-garde, and experimental arts, from the late 19th Century to the present. Focus on audiophonic and audiovisual technologies.—Kahn

### **Cinema and Digital Media**

#### **121. Introduction to Sonic Arts (4)**

Lecture/discussion—3 hours; lecture/laboratory—3 hours. Prerequisite: course 7C. Introduction to the use of sound within the arts. Techniques and aesthetics of experimental contemporary practices. Creation of original sound works.—Ostertag

#### **122. Intermediate Sonic Arts (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: course 121, 170C. Techniques of recording, editing, mixing, and synthesis to combine voice, field recordings, and electronic signals. Incorporating live, recorded, and found sounds to create multidimensional stories. Presentation of live performances, audio recordings, and sound installations.—Ostertag

#### **123. Sight and Soundtrack (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: courses 7C, 170C. The use of sound to articulate, lend mood or subconsciously underscore visual, environmental or performative situations, combining music, voice, sound effects and other noises to create sound designs that enhance, alter or support action and movement.—Ostertag

#### **125. Advanced Sound: Performance and Improvisation (4)**

Workshop—3 hours; practice—3 hours. Prerequisite: courses 121 and 122 or consent of instructor. Culmination of TCS sound courses. Class will focus on performance and improvisation, culminating in a final public performance. Students will be expected to do extensive reading and rehearsal outside of class time.—S. (S.) Ostertag

#### **130. Fundamentals of 3D Computer Graphics (4)**

Lecture—3 hours; laboratory—3 hours. A foundation course that teaches students the theory of three dimensional computer graphics, including modeling, rendering and animation. Development of practical skills through the use of professional software to create computer graphics.—F. (F.) Neff

#### **131. Character Animation (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 130 or consent of instructor. The art of character animation in three dimensional computer animation. Movement theory, principles of animation, animation timing. Development of technical and practical skills.—S. (S.) Neff

#### **150. Introduction to Theories of the Technoculture (4)**

Lecture/discussion—3 hours; extensive writing. Major cultural theories of technology with emphasis on media, communications, and the arts. Changing relationships between technologies, humans, and culture. Focus on the evolution of modern technologies and their reception within popular and applied contexts. GE credit: ArtHum | VL.—Dyson

#### **151. Topics in Virtuality (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 1. Social, political, economic, and aesthetic factors in virtual reality. Artificial environments, telepresence, and simulated experience. Focus on contemporary artists' work and writing. GE credit: VL.—Dyson

#### **152. New Trends in Technocultural Arts (4)**

Lecture/discussion—3 hours; term paper. Current work at the intersection of the arts, culture, science, and technology including biological and medical sciences, computer science and communications, and artificial intelligence and digital media. GE credit: VL.—Dyson

#### **153. Concepts of Innovative Soundtracks (4)**

Lecture/discussion—3 hours; term paper. Innovative and unconventional soundtracks in cinema, media arts, and fine arts. Introduction to basic analytical skills for understanding sound-image relationships.—Kahn

#### **154. Outsider Machines (4)**

Lecture/discussion—3 hours; term paper. Invention, adaptation and use of technologies outside the mainstream, commonsense, and the possible. Topics

include machines as metaphor and embodied thought, eccentric customizing and fictional technologies. GE credit: VL.

#### **155. Introduction to Documentary Studies (4)**

Lecture/discussion—3 hours; term paper. Recent evolution of the documentary. The personal essay film; found-footage/appropriation work; non-linear, multi-media forms; spoken word; storytelling; oral history recordings; and other examples of documentary expression. GE credit: ArtHum | ACGH, AH, DD, VL.—F. (F.) Drew

#### **158. Technology and the Modern American Body (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 1 and either American Studies 1A or 5. The history and analysis of the relationships between human bodies and technologies in modern society. Dominant and eccentric examples of how human bodies and technologies influence one another and reveal underlying cultural assumptions. (Same course as American Studies 158.) GE credit:

ArtHum | ACGH, AH, WE.—de la Pena

#### **159. Media Subcultures (4)**

Lecture/discussion—3 hours; term paper. Relationships between subcultural groups and media technologies. Media as the cohesive and persuasive force of subcultural activities. List-servs, Web sites, free radio, fan 'zines, and hip-hop culture. GE credit: Div | ACGH, VL—W. (W.) Drew

#### **160. Ghosts of the Machine: How Technology Rewires our Senses (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Historical, aesthetic and critical approaches to how information technologies produced ghost effects or a sense of terror in response to new media like the photograph, gramophone, film, typewriter, computer, Turing Machine. Focus on technological media transforms sense perception. (Same course as Science and Technology Studies 160.) Offered in alternate years. GE credit: ArtHum or SocSci | ACGH, AH or SS, VL, WE.—Ravetto-Biagioli

#### **170A. Advanced Technocultural Workshop (1)**

Seminar—1 hour. Prerequisite: course 7A or the equivalent. Workshop in advanced technocultural digital skills: Digital Imaging. GE credit: VL.

#### **170B. Advanced Technocultural Workshop (1)**

Seminar—1 hour. Prerequisite: course 7B. Workshop in advanced technocultural digital skills: Digital Video. GE credit: VL.

#### **170C. Advanced Technocultural Workshop (1)**

Seminar—1 hour. Prerequisite: course 7C. Workshop in advanced technocultural digital skills: Digital Sound. GE credit: VL.

#### **170D. Advanced Technocultural Workshop (1)**

Seminar—1 hour. Prerequisite: course 7D. Workshop in advanced technocultural digital skills: Web Design. GE credit: VL.

#### **170E. Advanced Technocultural Workshop (1)**

Seminar—1 hour. Prerequisite: consent of instructor. Workshop in advanced technocultural digital skills: Topics in Digital Production. GE credit: VL.

#### **175. Small Scale Film Production (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: consent of instructor. Lecture and intensive workshop teaching small-scale film production. Appointments as a(n) director, director of photography, actor, writer, lighting designer, sound designer and other critical positions are used to produce and submit a short film to a film festival. (Same course as Dramatic Art 175.) May be repeated two times for credit.—S. (S.) Anderson, Drew

#### **190. Research Methods in Technocultural Studies (4)**

Lecture/discussion—3 hours; project. Introduction to basic research methods for Technocultural Studies: electronic and archived images, sounds and data, satellite downlinking, radiowave scanning, and oral histories. GE credit: VL, WE.—Drew

#### **191. Writing Across Media (4)**

Lecture/discussion—3 hours; extensive writing. Introduction to experimental approaches to writing for different media and artistic practices. How written texts relate to the images, sounds, and performances in digital and media production. GE credit: WE.—Jones

#### **192. Internship (1-4)**

Internship—3-12 hours. Supervised internship on or off campus in area relevant to Technocultural Studies. May be repeated two times for credit. (P/NP grading only)

#### **197T. Tutoring in Technocultural Studies (1-5)**

Tutorial—3-15 hours. Prerequisite: consent of instructor. Undergraduates assist the instructor by tutoring students in one of the department's regularly scheduled courses. May be repeated for credit up to eight units. (P/NP grading only)—F, W, S. (F, W, S.)

#### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. Guided study with faculty member in independent scholarly activity. May be repeated for credit up to eight units. (P/NP grading only.)

## **Classics**

Jocelyn Sharlet, Ph.D., Associate Professor  
(*Comparative Literature*)

## **The Major Program**

Classical Civilization is an interdisciplinary major that examines the ancient Mediterranean cultures of Greece, Rome and the Near East, with courses offered on the languages, history, literature, religions, myths, art and archaeology of these societies, their achievements in rhetoric and philosophy, and their political and social institutions. Minor programs in Classical Civilization, Greek, and Latin, and many General Education courses are also offered.

**The Program.** The major has two tracks: (1) Classical and Mediterranean Civilizations, and (2) Classical Languages and Literatures. The core of both major tracks consists of two years of Latin or Greek, the introductory sequence on the ancient Mediterranean world (Classics 1, 2, 3), the advanced seminar (Classics 190), and a number of electives. The Classical and Mediterranean Civilization track allows students to choose their electives from a broadly balanced program in history, art and archaeology, literature, philosophy and rhetoric. The Classical Languages and Literatures track focuses more intensively on language and literature, requiring the study of two languages and allowing fewer electives. Students planning to go on to graduate work in Classics should take Track 2 and study as much Latin and Greek as possible. They should make a point of talking to an adviser early in their undergraduate program. They are also advised to acquire a reading knowledge of French or German.

**Career Opportunities.** A degree in Classical Civilization represents a solid liberal arts education that provides an excellent foundation for a wide variety of careers. In the last twenty-five years, many majors have applied to law or medical schools and nearly all have been accepted. Additional career options include library and museum work, teaching, journalism, and graduate study in Classics, art, archaeology, history, literature, philosophy, and religion.

#### **Classical Civilization**

#### **A. B. Major Requirements:**

UNITS
-------

#### **Classical and Mediterranean Civilizations track**

#### **Preparatory Subject Matter ..... 26-27**

Latin 1-2-3, or Greek 1-2-3 .....	15
Two courses from: Classics 1, 2, 3 .....	8
One additional course from: Art History 1A; Classics courses 1 through 50; Comparative Literature 1; Philosophy 21; Religious Studies 21, 40 .....	3-4

#### **Depth Subject Matter ..... 40**

Upper division courses in Latin or Greek .....	12
Classics 190 .....	4
Six additional courses selected from at least three of the following groups .....	24
Of these 24 units, at least 12 must be in Latin, Greek, or Classics.	

(a) <i>Literature and Rhetoric</i> : Additional upper division courses in Latin, Greek and Hebrew; Classics 102, 110, 140, 141, 142, 143	12
(b) <i>History</i> : History 102A, 111A, 111B, 111C; Religious Studies 102, 125	12
(c) <i>Art and Archaeology</i> : Classics 171, 172A, 172B, 173, 174, 175	12
(d) <i>Philosophy and Religion</i> : Classics 141, 150; Philosophy 143, 160, 161, 162; Political Science 118A; Religious Studies 141A, 141B, 141C	12

#### **Total Units for the Major ..... 66-67**

#### **Classical Languages and Literatures track**

#### **Preparatory Subject Matter ..... 34**

Latin 1-2-3 and Greek 1-2-3 .....	30
Classics 1, 2, or 3 .....	4

#### **Depth Subject Matter ..... 36**

Six upper division courses in the two chosen languages, with at least two courses in each language .....	24
--	----

Classics 190 .....	4
Two additional courses selected from any of the following groups .....	8
(a) <i>Literature and Rhetoric</i> : Additional upper division courses in Latin or Greek; Classics 102, 110, 140, 141, 142, 143	
(b) <i>History</i> : History 102A, 111A, 111B, 111C; Religious Studies 102, 125	
(c) <i>Art and Archaeology</i> : Classics 171, 172A, 172B, 173, 174, 175	
(d) <i>Philosophy and Religion</i> : Classics 141, 150; Philosophy 143, 160, 161, 162; Political Science 118A; Religious Studies 141A, 141B, 141C	
<b>Total Units for the Major .....</b>	<b>70</b>

**Major Advisers.** E. Albu, V. Popescu, C. Seal, A. Uhlig

### Minor Program Requirements:

The Department offers minors in Classical Civilization, Greek and Latin for those wishing to follow a shorter but formally recognized program of study in Classics.

#### UNITS

<b>Classical Civilization .....</b>	<b>20</b>
Classics 1, 2, or 3 .....	4
One upper division course in Latin or Greek .....	4
Two additional upper division courses in Classics, Latin or Greek .....	8
One additional upper division course selected from any of the groups (a) through (d) in the Classical Civilization major .....	4
<b>Greek.....</b>	<b>20</b>
Classics 1 or 2 .....	4
Three upper division courses in Greek .....	12
One additional upper division course in Classics, Latin, or Greek .....	4
<b>Latin.....</b>	<b>20</b>
Classics 3 .....	4
Three upper division courses in Latin.....	12
One additional upper division course in Classics, Latin, or Greek .....	4

**Honors Program.** Candidates for high or highest honors in Classical Civilization must write a senior honors thesis under the direction of a faculty member in Classics. Potential candidates for the honors program must enroll in Classics 194HA and 194HB, normally during the first two quarters of the senior year. Enrollment is limited to upper division students with a minimum of 135 units, and a 3.500 grade point average in courses in the Classical Civilization major. For further information, students should consult with the major adviser or program director. The requirements for the honors program are in addition to the regular requirements for the major in Classical Civilization.

**Graduate Study.** The Department offers a master's degree in Classics with emphasis on either Greek or Latin; however, admission into the graduate program has been suspended.

**Prerequisite credit.** Credit will not normally be given for a lower division course in Latin or Greek if it is the prerequisite of a course already successfully completed. Exceptions can be made by the Program Director only.

### Courses in Arabic, Classics, Greek, Hebrew, Hindi-Urdu, Latin, and Persian follow in alphabetical order.

### Courses in Arabic (ARB)

#### Lower Division

##### 1. Elementary Arabic 1 (5)

Lecture/discussion—5 hours. Introduction to basic Arabic. Interactive and integrated presentation of listening, speaking, reading, and writing skills, includ-

ing the alphabet and basic syntax. Focus on standard Arabic with basic skills in spoken Egyptian and/or one other colloquial dialect. GE credit: ArtHum | AH, WC. —F. (F.) Hassouna

##### 1A. Accelerated Intensive Elementary Arabic (15)

Lecture/discussion—15 hours. Special 12-week accelerated, intensive summer session course that combines the work of courses ARB 1, 2, and 3. Introduction to Modern Standard Arabic through development of all language skills in a cultural context with emphasis on communicative proficiency. Not open for credit to students who have completed course 1, 2, or 3. Offered irregularly. GE credit: ArtHum | AH, WC. —S. (S.) Sharlet

##### 2. Elementary Arabic 2 (5)

Lecture/discussion—5 hours. Prerequisite: course 1 or consent of instructor. Continuation of basic Arabic from course 1. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including syntax. Focus on standard Arabic and limited use of spoken Egyptian and/or one other colloquial dialect. GE credit: ArtHum | AH, WC. —W. (W.) Hassouna

##### 3. Elementary Arabic 3 (5)

Lecture/discussion—5 hours. Prerequisite: course 2 or with consent of instructor. Continuation of introduction to basic Arabic from courses 1 and 2. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including syntax. Focus on standard Arabic with limited use of spoken Egyptian and/or one other colloquial dialect. GE credit: ArtHum | AH, WC. —S. (S.) Hassouna

##### 21. Intermediate Arabic 21 (5)

Lecture/discussion—5 hours. Prerequisite: course 3 or with consent of instructor. Builds on courses 1, 2, and 3. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including idiomatic expression. Focus on standard Arabic with limited use of Egyptian and/or one other colloquial dialect. GE credit: ArtHum | AH, WC. —F. (F.) Hassouna

##### 21C. Colloquial Egyptian Arabic (4)

Lecture/discussion—3 hours; lecture/laboratory—1 hour. Prerequisite: course 3 or consent of instructor. Continuation of the Colloquial Egyptian Arabic covered in the first year of Arabic; courses 1, 2, and 3. May be repeated one time for credit if instruction material changes. GE credit: ArtHum | AH. —F. (F., Su. (F., Su.) Hassouna, Radwan, Sharlet

##### 22. Intermediate Arabic 22 (5)

Lecture/discussion—5 hours. Prerequisite: course 21 or with consent of instructor. Continuation of course 21. Continuation of interactive and integrated presentation of listening, speaking, reading, and writing skills, including idiomatic expression. Focus on standard Arabic with limited use of Egyptian and/or one other colloquial dialect. GE credit: ArtHum | AH, WC. —W. (W.) Hassouna

##### 22C. Colloquial Egyptian Arabic (4)

Lecture/discussion—3 hours; lecture/laboratory—1 hour. Prerequisite: course 21C or consent of instructor. Continuation of the Colloquial Egyptian Arabic covered in first year of Arabic; courses 1, 2, and 3 and the first quarter of Colloquial Arabic course 21C. May be repeated one time for credit if instruction material changes. GE credit: ArtHum | AH. —W. (W., Su. (W., Su.) Hassouna, Radwan, Sharlet

##### 23. Intermediate Arabic 23 (5)

Lecture/discussion—5 hours. Prerequisite: course 22 or with consent of instructor. Continuation of courses 21 and 22. Interactive and integrated presentation of Arabic listening, speaking, reading, and writing skills, including idiomatic expression. GE credit: ArtHum | AH, WC. —S. (S.) Hassouna

##### 23C. Colloquial Egyptian Arabic (4)

Lecture/discussion—3 hours; lecture/laboratory—1 hour. Prerequisite: course 22C or consent of instructor. Continuation of the Colloquial Egyptian Arabic

covered in the first year of Arabic; courses 1, 2, and 3 and the preceding colloquial Arabic courses 21C and 22C. May be repeated one time for credit if instruction material changes. GE credit: ArtHum | AH. —S. (S., Su.) Hassouna, Radwan, Sharlet

#### Upper Division

##### 101A. Readings in Arabic: 600-1850 (4)

Discussion—3 hours; extensive writing. Prerequisite: course 123 or consent of instructor. Readings in Arabic. Poetry, prose literature, and selections from texts on religion, history, politics, science, philosophy and mysticism. Students can repeat the course one time if the instructor decides that they would benefit from additional practice working on the different selections from the same texts or if 50% or more of the texts are different. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, OL, WC, WE. —Radwan, Sharlet

##### 121. Advanced Arabic (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 23 or consent of instructor. Review, refinement, and development of skills learned in intermediate Arabic through work with texts, video, and audio on cultural and social issues. Integrated approach to reading, writing, listening, speaking primarily standard Arabic, with limited use of one colloquial dialect. May be repeated two times for credit based on different readings. GE credit: ArtHum | AH, WC. —F. (F.) Radwan, Sharlet

##### 122. Advanced Arabic (4)

Lecture/discussion—3 hours. Prerequisite: course 121 or permission of instructor. Continuation of course 121. Further development of advanced skills in reading, listening, writing, and speaking standard Arabic through work with texts, video, and audio on cultural and social issues. Limited use of one colloquial dialect. GE credit: ArtHum | AH, WC. —W. (W.) Radwan

##### 123. Advanced Arabic (4)

Lecture/discussion—3 hours. Prerequisite: course 122 or permission of instructor. Continuation of course 122. Further development of advanced skills in reading, listening, writing, and speaking standard Arabic through work with texts, video, and audio on cultural and social issues. Limited use of one colloquial dialect. GE credit: ArtHum | AH, WC. —S. (S.) Radwan

##### 140. A Story for a Life: The Arabian Nights (4)

Lecture/discussion—3 hours; term paper. In-depth exploration of The Arabian Nights, the best-known work of pre-modern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature. (Same course as Comparative Literature 172 and Middle East/South Asia Studies 121C.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE. —Radwan, Sharlet

##### 141. Readings in Modern Arabic Literature (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 123 or consent of instructor. Readings of modern Arabic poetry and fiction in original format, assisted by instructor-prepared glossaries and other supplementary material. Readings to be followed by class discussion and short writing assignments in Arabic. Open to students at advanced proficiency in Arabic. May be repeated one time for credit if reading material changes. GE credit: ArtHum | AH, WC. —F. (F.) Radwan, Sharlet

##### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. Development of reading, writing, speaking, and listening skills in advanced Arabic. Materials may include al-Kitaab Part Two or Three, news articles and broadcasts, short stories, poetry, novels, essays, scripture, prophetic traditions, audio recordings, and television and film. May be repeated four times for credit if content differs. (P/NP grading only.) —F, W, S. (F, W, S.)

## Graduate

### 297. Directed Independent Study (4)

Discussion—1 hours; independent study. Prerequisite: graduate standing or consent of instructor. Restricted to graduate students. Directed Independent Study on a topic culminating in a term paper. Independent Study may only be arranged with consent of the instructor when graduate seminars are unavailable. Topic varies by instructor. May be repeated five times for credit when no graduate seminars are available and topic differs.—F, W, S. (F, W, S.) Radwan, Sharlet

### 299. Individual Study (1-12)

Prerequisite: graduate standing; consent of instructor. Restricted to graduate students. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## Professional

### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing; consent of instructor. Restricted to graduate students. May be repeated 18 times for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## Courses in Classics (CLA)

### Lower Division

#### 1. The Ancient Near East and Early Greece: 3000-500 B.C.E. (4)

Lecture—3 hours; discussion—1 hour. Introduction to the literature, art, and social and political institutions of ancient Mesopotamia, Egypt, Palestine, and early Greece from 3000 to 500 B.C.E. GE credit: ArtHum, Wrt | AH, WC, WE.—Brelinski

#### 2. Ancient Greece and the Near East: 500 to 146 B.C.E. (4)

Lecture—3 hours; term paper. Introduction to the literature, art and thought and the political and social institutions and values of Greece and its eastern Mediterranean neighbors—the Persians, Egyptians, and Judeans. GE credit: ArtHum, Wrt | AH, WC, WE.—Brelinski

#### 3. Rome and the Mediterranean: 800 B.C.E. to 500 C.E. (4)

Lecture—3 hours; discussion—1 hour. Introduction to the history, literature, material culture, political and social institutions and values of Roman Civilization, with an emphasis on the development of the Roman Empire and the interactions of Roman culture with other Mediterranean cultures. GE credit: ArtHum | AH, WC, WE.—Stem

#### 4. Late Antiquity (4)

Lecture—3 hours; discussion—1 hour. History and culture of the Roman and Byzantine empires from the third to the eighth century. Transformation of the classical Mediterranean world through political and cultural interactions, rise of Christianity and Islam, beginning of the medieval period in Europe. GE credit: ArtHum | AH, WC, WE.—F, W. (F, W.) Albu, Chin

#### 10. Greek, Roman, and Near Eastern Mythology (3)

Lecture—3 hours. Examination of major myths of Greece, Rome, and the Ancient Near East; their place in the religion, literature and art of the societies that produced them; their subsequent development, influence and interpretation. GE credit: ArtHum | AH, VL, WC.—Rundin, Seal, Stem, Uhlig

#### 10Y. Greek, Roman, and Near Eastern Mythology—Hybrid (3)

Lecture—2 hours; web virtual lecture—1 hour. Prerequisite: course 3 (required concurrently) or consent of instructor. Examination of major myths of Greece, Rome, and the Ancient Near East; their place in the religion, literature and art of the societies that produced them; their subsequent development, influence and interpretation. GE credit: ArtHum | AH, VL, WC.—F, W, S. (F, W, S.) Brelinski, Rundin, Seal, Stem, Uhlig

#### 15. Women in Classical Antiquity (4)

Lecture/discussion—3 hours; term paper. Lives and roles of women and men in ancient Greece and Rome. Readings from history, philosophy, medical and legal documents, literature and myth. Offered irregularly. GE credit: ArtHum | AH, VL, WC, WE.—Popescu, Seal

#### 20. Pompeii AD 79 (4)

Lecture—3 hours; term paper. Roman life in an urban community at the time of the eruption of Vesuvius. Slide presentations of the archeological evidence will be supplemented by selected readings from Petronius' *Satyricon* and other ancient authors. GE credit: ArtHum, Wrt | AH, VL, WC, WE.

#### 25. The Classical Heritage in America (4)

Lecture/discussion—3 hours; term paper. Classical heritage in the New World, with emphasis on the United States from its colonial past to the present day. The reception of Greco-Roman thought and values as expressed in art, architecture, education, law, government, literature, and film. Offered irregularly. GE credit: ArtHum, Wrt | ACGH, AH, WE.

#### 30. Greek and Latin Elements in English Vocabulary (3)

Lecture—3 hours. Knowledge of Latin and Greek not required. Elements of Greek and Latin vocabulary for increased understanding of English word formation and improved ability to understand and retain unfamiliar words. Emphasis on Greek and Latin elements but other languages not neglected. Not open for credit to students who have completed course 30F. GE credit: ArtHum | AH.—F, W, S, Su. (F, W, S, Su.) Albu, Popescu, Rundin

#### 30F. Greek and Latin Elements in English Vocabulary (3)

Lecture—3 hours. Restricted to incoming freshmen. Knowledge of Latin and Greek not required. Elements of Greek and Latin vocabulary for increased understanding of English word formation and improved ability to understand and retain unfamiliar words. Emphasis on Greek and Latin elements but other languages not neglected. Not open for credit to students who have completed course 30. GE credit: ArtHum | AH.—F. (F.) Albu, Brelinski, Popescu, Rundin

#### 31. Greek and Latin Elements in Technical Vocabulary (3)

Lecture—3 hours. Knowledge of Greek and Latin not required. Elements of Greek and Latin vocabulary to increase understanding of English word formation in medical, scientific and technical terminology and improve ability to understand and retain unfamiliar terms. GE credit: ArtHum | AH.

#### 50. Ancient Science (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 16A or the equivalent. Study of science in ancient Greece and Rome; consideration of its social context; concentration on the basic concepts of physics, the world of medicine and biology, the history of mathematics, and the practices of astronomy, astrology and meteorology. (Same course as Science & Technology Studies 50.) Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE.—Webster

#### 51. Ancient Medicine (4)

Lecture—3 hours; discussion—1 hour. Medicine in ancient Greece and Rome; physiological conceptions of the body within scientific and social frameworks; exploration of sanitation technology and health in antiquity; medical treatment of the female body; medicine and the economy. (Same course as Science and Technology Studies 51.) Offered in alternate years. GE credit: AH, WC, WE.—Webster

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division

#### 101A. Topics in Ancient Mediterranean Civilizations (4)

Lecture/discussion—3 hours; term paper. Prerequisite: a lower division Classics course or consent of instructor. Topics may be ordered by time or place

(e.g. Hellenistic Egypt) or by theme or genre (e.g. slavery in the ancient world). May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, WC, WE.—F, W, S. (F, W, S.) Albu

#### 101B. Topics in Greek Civilization (4)

Lecture/discussion—3 hours; term paper. Prerequisite: a lower division Classics course or consent of instructor. Topics may be ordered by time or place (e.g. the world of Homer) or by theme or genre (e.g. the Greek art of war). May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, WC, WE.—F, W, S. (F, W, S.) Albu, Webster

#### 101C. Topics in Roman Civilization (4)

Lecture/discussion—3 hours; term paper. Prerequisite: a lower division Classics course or consent of instructor. Topics may be ordered by time or place (e.g. Julius Caesar and his age) or by theme or genre (e.g. gladiators: blood in the arena). May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, WC, WE.—F, W, S. (F, W, S.) Albu

#### 101D. Topics in Classical Receptions (4)

Lecture/discussion—3 hours; term paper. Prerequisite: a lower division Classics course or consent of instructor. Topics in classical reception from late antiquity to the present. Topics may be ordered by time or place (e.g. the classical tradition in Washington, D.C.) or by theme or genre (e.g. cinematic representations of the ancient world). May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, WC, WE.—F, W, S. (F, W, S.) Albu

#### 101E. Topics in Ancient Science (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 50 or 51, or by consent of instructor. Topics may be ordered by discipline (e.g. ancient medicine), historical figure (e.g. Galen) or topic (e.g. science and the economy). May be repeated two times for credit when topic differs. Offered irregularly. GE credit: AH, WE.—Webster

#### 102. Film and the Classical World (4)

Lecture—3 hours; film viewing—2.5 hours. Prerequisite: a lower division Classics course or consent of instructor. The Classical World as portrayed in films. Viewings and discussions of modern versions of ancient dramas, modern dramas set in the Ancient Mediterranean world, and films imbued with classical themes and allusions. Supplementary readings in ancient literature and mythology. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.) Albu

#### 105. Theory and Practice of Greek and Roman Mythology (4)

Lecture/discussion—3 hours; term paper. Prerequisite: a lower division Classics course or consent of instructor. Thematically focused study of mythological narratives. Emphasis on the historical development of myths and the variety of theoretical approaches for the study of myth. GE credit: ArtHum | AH, WE.—F, W, S. (F, W, S.) Uhlig

#### 110. Origins of Rhetoric (4)

Lecture—3 hours; term paper. Prerequisite: a lower division Classics course or consent of instructor. Issues in the development of rhetoric from its origins in ancient Greece to A.D. 430. Special attention to works of Plato, Aristotle, Cicero, and Quintilian. Role of grammar and rhetoric in schools of Roman Empire. The Christian rhetoric of Saint Augustine. Not open for credit to students who have completed Rhetoric and Communication 110 or Communication 110. (Former course Rhetoric and Communication 110.) GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

#### 120. Greek and Roman Historiography (4)

Lecture/discussion—3 hours; term paper. Prerequisite: a lower division Classics course or consent of instructor. Survey of Greek and Roman historical writing in English translation. Authors to be read may include Herodotus, Thucydides, Sallust, Livy, and Tacitus. Focus on the development of historical writing as a literary genre. GE credit: ArtHum | AH, WC, WE.—F, W, S. (F, W, S.) Seal

**125. Roman Political Thought (4)**

Lecture—3 hours; term paper. Prerequisite: a lower division Classics course or consent of instructor. Survey of Roman thinking about politics, as expressed both in formal theorizing and in a variety of other contexts, including oratory, historiography, and epic. Study of Roman political reflection in its historical, cultural, and literary context. GE credit: ArtHum | AH, WC, WE.—F, W, S. (F, W, S.) Seal

**140. Homer and Ancient Epic (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: a lower division Classics course or consent of instructor. Reading of the classical epics of Homer (*Iliad*, *Odyssey*) and Virgil (*Aeneid*) in English. Discussion of techniques of composition, the beliefs and values of their respective societies, and the generic tradition of ancient epic. GE credit: ArtHum, Wrt | AH, WC, WE.—F, W, S. (F, W, S.) Brelinski, Popescu

**141. Greek and Roman Comedy (4)**

Lecture—3 hours; conference—1 hour. Prerequisite: a lower division Classics course or consent of instructor. Readings in Aristophanes, Menander, Plautus, and Terence; lectures on the development of ancient comedy. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.) Popescu

**142. Greek and Roman Novel (4)**

Lecture—3 hours; term paper. Prerequisite: a lower division Classics course or consent of instructor. Examination of the ancient Greek romances and their development into the grotesque realism of Petronius' *Satyricon*, and the religious mysticism of Apuleius' *The Golden Ass*. GE credit: ArtHum, Wrt | AH, WC, WE.—S. (S.) Popescu

**143. Greek Tragedy (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: a lower division Classics course or consent of instructor. Reading in English of selected plays of Aeschylus, Sophocles, and Euripides. Discussion of the development and influence of Athenian tragedy. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.) Popescu

**150. Socrates and Classical Athens (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: a lower division Classics course or consent of instructor. Study of the major sources of our knowledge of Socrates, assessment of his role in the politics and culture of ancient Athens, his method of teaching, and his place in Western thought. GE credit: ArtHum | AH, WC, WE.—F, W, S. (F, W, S.) Seal

**171. Mediterranean Bronze Age Archaeology (4)**

Lecture—3 hours; extensive writing. Prerequisite: a lower division Classics course or consent of instructor. Archaeological monuments of the ancient Near East, including Egypt and Mesopotamia, and of Greece and Crete during the Bronze Age. Special emphasis on the problems of state formation and on the co-existence and collapse of Bronze Age societies. GE credit: ArtHum, Div, Wrt | AH, WC.—F, W, S. (F, W, S.) Roller

**172A. Early Greek Art and Architecture (4)**

Lecture—3 hours; term paper. Examination of the origin and development of the major monuments of Greek art and architecture from the eighth century to the mid-fifth century B.C. (Same course as Art History 172A.) GE credit: ArtHum, Wrt | AH, VL, WE.—Roller

**172B. Later Greek Art and Architecture (4)**

Lecture—3 hours; term paper. Study of the art and architecture of later Classical and Hellenistic Greece, from the mid-fifth century to the first century B.C. (Same course as Art History 172B.) GE credit: ArtHum, Wrt | AH, VL.—Roller

**173. Roman Art and Architecture (4)**

Lecture—3 hours; term paper. Art and architecture of Rome and the Roman Empire, from the founding of Rome through the fourth century C.E. (Same course as Art History 173.) GE credit: ArtHum, Wrt | AH, VL, WE.—Roller

**174. Greek Religion and Society (4)**

Lecture—3 hours; term paper. Prerequisite: a lower division Classics course or consent of instructor. Cults, festivals, and rituals of Greek religious practice and their relationship to Greek social and political institutions, and to Greek private life. Includes discussion of major sanctuaries at Olympia, Delphi, Athens, and others. GE credit: ArtHum, Wrt | AH, WC.—F, W, S. (F, W, S.) Roller

**175. Architecture and Urbanism in Mediterranean Antiquity (4)**

Lecture—3 hours; extensive writing. Prerequisite: a lower division course (except 30, 31); Art History 1A recommended. Architecture and urban development in the ancient Near East, Greece, and Rome. Special emphasis on the social structure of the ancient city as expressed in its architecture, and on the interaction between local traditions and the impact of Greco-Roman urbanism. (Same course as Art History 175.) GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Roller

**190. Senior Seminar (4)**

Seminar—3 hours; term paper. Prerequisite: completion of one upper division course in Latin, Greek or Hebrew or consent of instructor. Advanced interdisciplinary study of a problem in the ancient Mediterranean world using the techniques of history, archaeology, art history and philology. May be repeated for credit with consent of instructor. GE credit: ArtHum, Wrt | AH, WE.

**190. Senior Seminar (4)**

Seminar—3 hours; term paper. Prerequisite: completion of one upper division course in Latin, Greek or Hebrew or consent of instructor. Advanced interdisciplinary study of a problem in the ancient Mediterranean world using the techniques of history, archaeology, art history and philology. May be repeated for credit with consent of instructor. GE credit: ArtHum, Wrt | AH, WE.

**194HA. Special Study for Honors Students (3)**

Discussion—1 hour; independent study; term paper. Prerequisite: admission to the honors program and consent of faculty member supervising honors thesis. Directed reading, research and writing culminating in the completion of a senior honors thesis under the direction of faculty adviser. (Deferred grading only, pending completion of sequence. P/NP grading only.) GE credit: AH.—F, W. (F, W.)

**194HB. Special Study for Honors Students (3)**

Discussion—1 hour; independent study; term paper. Prerequisite: admission to the honors program and consent of faculty member supervising honors thesis. Directed reading, research and writing culminating in the completion of a senior honors thesis under the direction of faculty adviser. (Deferred grading only, pending completion of sequence. P/NP grading only.) GE credit: AH.—F, S. (F, S.)

**197TC. Community Tutoring in Classical Languages (1-5)**

Tutoring—1-5 hours. Prerequisite: consent of instructor. Supervised instruction of Greek or Latin in nearby schools by qualified students in department. May be repeated for credit up to 5 units. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: upper division standing. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

**Graduate****200A. Approaches to the Classical Past (4)**

Seminar—3 hours; term paper. Prerequisite: graduate student status or consent of instructor. Survey of major areas of classical scholarship, with special

emphasis on the continuing impact of Mediterranean antiquity on later literature, history, art, and culture.—F, W, S. (F, W, S.) Albu

**200B. Approaches to the Classical Past (4)**

Independent study—4 hours. Prerequisite: course 200A and graduate student status or consent of instructor. Restricted to graduate students. Research project on major area of Classical scholarship, with special emphasis on the continuing impact of Mediterranean antiquity on later literature, history, art, and culture.—F, W, S. (F, W, S.) Albu

**201. Introduction to Classical Philology (4)**

Seminar—3 hours; term paper. Survey of major contemporary areas of classical scholarship with special attention devoted to current problems in literary and textual criticism.

**202. Homer (4)**

Seminar—3 hours; term paper. Readings in the Iliad and Odyssey: the origins and transmission of the poems.

**203. Vergil (4)**

Seminar—3 hours; term paper. Reading of selected books of the Bucolics, Georgics, and Aeneid. Emphasis will be placed on the study of Vergilian poetic language.

**204. Greek and Roman Comedy (4)**

Seminar—3 hours; term paper. Historical and critical problems in Aristophanes or New Comedy. May be repeated for credit.

**205. Latin Lyric and Elegy (4)**

Seminar—3 hours; term paper. Critical examination of the works of Catullus, Horace, or Properius. May be repeated for credit.

**206. Greek Historiography (4)**

Seminar—3 hours; term paper. Development of historical writing in Greece. May be repeated for credit.

**207. Greek Drama (4)**

Seminar—3 hours; term paper. Literary and philosophical analysis of the plays of Euripides, Sophocles, or Aeschylus. May be repeated for credit.

**299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**Professional****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**Courses in Greek (GRK)****Lower Division****1. Elementary Greek (5)**

Lecture—5 hours. Introduction to the basic grammar and vocabulary of Classical and New Testament Greek. Development of translation skills with emphasis on Greek-English. (Students who have successfully completed Greek 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.) GE credit: ArtHum | AH.—F. (F.) Popescu

**2. Elementary Greek (5)**

Lecture—5 hours. Prerequisite: course 1 or the equivalent. Continuation of course 1. GE credit: ArtHum | AH.—W. (W.) Popescu

**2NT. Elementary New Testament Greek (1)**

Lecture—1 hour. Prerequisite: course 2 (required concurrently) or consent of instructor. Supplementary study of New Testament Greek. GE credit: ArtHum | AH.—W. (W.) Popescu

**3. Intermediate Greek (5)**

Lecture—5 hours. Prerequisite: course 2 or the equivalent. Continuation of course 2. Selected readings from Greek authors. GE credit: ArtHum | AH.—S. (S.) Popescu

**3NT. Elementary New Testament Greek (1)**

Lecture—1 hour. Prerequisite: course 3 (required concurrently) or consent of instructor. Supplementary study of New Testament Greek. GE credit: ArtHum | AH.—S. (S.) Popescu

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division****100. Readings in Greek Prose (4)**

Lecture/discussion—4 hours. Prerequisite: course 3 or equivalent. Review of Greek morphology, syntax, and vocabulary. Readings in Greek prose authors, including Xenophon. GE credit: ArtHum | AH.—F. (F.) Rundin, Seal

**101. Plato (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE.—F. (F.)

**102. Euripides (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.) Popescu

**103A. Homer: Iliad (4)**

Recitation—3 hours; term paper. Prerequisite: course 3. GE credit: ArtHum, Wrt | AH, WE.—Brelinski

**103B. Homer: Odyssey (4)**

Recitation—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

**104. Menander (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

**105. Attic Orators (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Selected readings from the orators of 4th and 5th century Athens. May be repeated for credit if topic differs and with consent of instructor. GE credit: ArtHum | AH, WC, WE.—F, W, S. (F, W, S.) Seal

**110. Readings in the Greek Novel (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Selected readings from Greek prose fiction of the late classical, Hellenistic and imperial periods. May be repeated two times for credit with consent of instructor. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

**111. Sophocles (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.) Uhlig

**112. Aristophanes (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

**113. Thucydides (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE.—Popescu, Seal

**114. Lyric Poetry (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.) Popescu

**115. Aeschylus (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

**116. Herodotus (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

**121. Greek Prose Composition (4)**

Lecture/discussion—4 hours. Prerequisite: course 100 or consent of instructor. Intensive grammar and vocabulary review through exercises in Greek prose composition. Offered in alternate years. GE credit: ArtHum | AH.—F, W, S. (F, W, S.)

**130. Readings in Later Greek (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Translation and discussion of selected readings from Hellenistic to Byzantine Greek literature. Offered in alternate years. GE credit: ArtHum | AH, WE.—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Courses in Hebrew (HEB)****Lower Division****1. Elementary Hebrew (5)**

Lecture/discussion—4 hours; laboratory—1 hour. Speaking, listening, comprehension, reading and writing fundamentals of modern Hebrew. (Students who have successfully completed, with a C- or better, Hebrew 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.) GE credit: ArtHum | AH.—F. (F.) Franco

**1A. Accelerated Intensive Elementary Hebrew (15)**

Lecture/discussion—15 hours. Special 12 week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to Hebrew grammar and development of language skills in a cultural context with emphasis on communication. Not open to students who have completed course 1, 2, or 3. GE credit: ArtHum | AH, WC.—Su. (Su.)

**2. Elementary Hebrew (5)**

Lecture/discussion—4 hours; laboratory—1 hour. Prerequisite: course 1 or the equivalent. Speaking, listening, comprehension, reading and writing fundamentals of modern Hebrew. GE credit: ArtHum | AH.—W. (W.) Franco

**3. Elementary Hebrew (5)**

Lecture/discussion—4 hours; laboratory—1 hour. Prerequisite: course 2 or the equivalent. Speaking, listening comprehension, reading and writing fundamentals of modern Hebrew. GE credit: ArtHum | AH.—S. (S.) Franco

**10. Introduction to Biblical Hebrew (3)**

Lecture/discussion—3 hours. Introduction to the Hebrew Alphabet and basic grammar rules of the biblical language. Students will learn to read most any biblical text and learn how to find the meaning of words by their roots and morphological structure. GE credit: ArtHum | AH, WC.

**21. Intermediate Mod Hebrew I (5)**

Lecture/discussion—5 hours. Prerequisite: course 3 or consent of instructor. Development and refinement of grammar, composition, and language skills required for reading literary texts and conversing about contemporary topics at an advanced level. History of the Hebrew language. Not open to students who have taken courses 100 or 100A.—Franco

**22. Intermediate Modern Hebrew II (5)**

Lecture/discussion—5 hours. Prerequisite: course 21 or consent of instructor. Continued development and refinement of grammar, composition, and language skills required for reading literary texts and conversing about contemporary topics at an advanced

level. History of the Hebrew language. Not open to students who have taken course 101 or 100B.—Franco

**23. Intermediate Modern Hebrew III (5)**

Lecture/discussion—5 hours. Prerequisite: course 22 or consent of instructor. Continued development and refinement of grammar, composition, and language skills required for reading literary texts and conversing about contemporary topics at an advanced level. History of the Hebrew language. Further development of writing and translating skills. Not open to students who have taken course 100C or 102.

**Upper Division****100AN. Advanced Modern Hebrew I (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 23 or consent of instructor. Students who have taken course 100A as 2nd year Hebrew may take course 100AN. Third year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing. GE credit: ArtHum | AH.

**100BN. Advanced Modern Hebrew II (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100AN or consent of instructor. Students who have taken course 100B as 2nd year Hebrew may take course 100BN. Third year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing. GE credit: ArtHum | AH.

**100CN. Advanced Modern Hebrew III (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100BN. Students who have taken course 100C as 2nd year Hebrew may take course 100CN. Third year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing. GE credit: ArtHum | AH.

**Courses in Hindi (HIN)****Lower Division****1. Elementary Hindi/Urdu I (5)**

Lecture/discussion—5 hours. Introduction to Devanagari Script through development of all language skills in a cultural context with emphasis on communicative proficiency. GE credit: ArtHum | AH, WC.—F. (F.) Chauhan

**1A. Accelerated Intensive Elementary Hindi (15)**

Lecture/discussion—15 hours. Special 12-week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to Devanagari Script through development of all language skills in cultural context with emphasis on communicative proficiency. Not open for credit to students who have completed course 1, 2 or 3. GE credit: ArtHum | AH.

**2. Elementary Hindi/Urdu II (5)**

Lecture/discussion—5 hours. Prerequisite: course 1. Continuation of course 1. Devanagari Script through development of all language skills in a cultural context with emphasis on communicative proficiency. GE credit: ArtHum | AH, WC.—W. (W.) Chauhan

**3. Elementary Hindi/Urdu III (5)**

Lecture/discussion—5 hours. Prerequisite: course 2. Introduction to Devanagari Script through development of all language skills in cultural context with emphasis on communicative proficiency. GE credit: ArtHum | AH, WC.—S. (S.) Chauhan

**21. Intermediate Hindi/Urdu (5)**

Lecture/discussion—5 hours. Prerequisite: course 3. An intermediate level course for students who have completed Elementary Hindi/Urdu or the equivalent. Students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu. GE credit: ArtHum | AH.—F. (F.) Chauhan

**22. Intermediate Hindi/Urdu II (5)**

Lecture/discussion—5 hours. Prerequisite: course 21. An intermediate level course where students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu. GE credit: ArtHum | AH.—W. (W.) Chauhan

**23. Intermediate Hindi/Urdu III (5)**

Lecture/discussion—5 hours. Prerequisite: course 22. An intermediate level course where students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu. GE credit: ArtHum | AH. —S. (S.) Chauhan

**Courses in Latin (LAT)****Lower Division****1. Elementary Latin (5)**

Lecture—5 hours. Introduction to basic grammar and vocabulary and development of translation skills with emphasis on Latin to English. (Students who have successfully completed Latin 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.) GE credit: ArtHum | AH. —F. (F.) Popescu, Rundin

**2. Elementary Latin (5)**

Lecture—5 hours. Prerequisite: course 1 or equivalent. Continuation of course 1. GE credit: ArtHum | AH. —W. (W.) Rundin

**3. Intermediate Latin (5)**

Lecture—5 hours. Prerequisite: course 2 or equivalent. Continuation of course 2. Selected readings from Latin authors. GE credit: ArtHum | AH. —S. (S.) Rundin

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division****100. Readings in Latin Prose (4)**

Lecture/discussion—4 hours. Prerequisite: course 3 or equivalent. Review of Latin morphology, grammar, and vocabulary. Readings in prose authors, including Julius Caesar. GE credit: AH. —F. (F.) Albu, Stem

**101. Livy (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE. —F, W, S. (F, W, S.) Seal, Stem

**102. Roman Comedy (5)**

Lecture—4 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE. —F, W, S. (F, W, S.) Albu

**103. Vergil: Aeneid (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE. —Albu, Brelinski, Seal

**104. Sallust (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WE. —S. (S.) Stem

**105. Catullus (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE. —F, W, S. (F, W, S.) Seal

**106. Horace: Odes and Epodes (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE. —F, W, S. (F, W, S.) Albu, Seal

**108. Horace: Satires and Epistles (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE. —F, W, S. (F, W, S.)

**109. Roman Elegy (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE.

**110. Ovid (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or equivalent. Translation and discussion of selected readings from the works of Ovid.

May be repeated one time for credit when topic differs and with consent of instructor. GE credit: ArtHum, Wrt | AH, WC, WE. —Albu

**112. Cicero (4)**

Recitation—3 hours; term paper. Prerequisite: course 100 or equivalent. Translation and discussion of selected readings from the works of Cicero. May be repeated one time for credit if readings vary and with consent of instructor. GE credit: ArtHum, Wrt | AH, WE. —Stem

**115. Lucretius (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE. —F, W, S. (F, W, S.) Webster

**116. Vergil: Eclogues and Georgics. (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. GE credit: ArtHum, Wrt | AH, WE. —F, W, S. (F, W, S.)

**118. Roman Historians (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or equivalent. Readings in Latin from one or more of the major Roman historians and biographers. Authors may include Sallust, Nepos, Livy, Tacitus, Suetonius, and Ammianus Marcellinus. GE credit: ArtHum | AH, WC, WE. —Seal

**119. Readings in Republican Latin Literature (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or equivalent. Translation and discussion of selected readings from Republican Latin literature. May be repeated for credit when topics vary. GE credit: ArtHum | AH, WC, WE. —Brelinski, Stem

**120. Readings in Imperial Latin Literature (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or equivalent. Readings in Imperial Latin literature. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, WC, WE. —Popescu, Seal, Stem

**121. Latin Prose Composition (4)**

Lecture/discussion—4 hours. Prerequisite: course 100 or equivalent. Intensive grammar and vocabulary review through exercises in Latin prose composition. GE credit: ArtHum | AH.

**125. Medieval Latin (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Selected readings from the Vulgate and various medieval authors provide an introduction to the developments in the Latin Language and literature from the fourth to the fifteenth centuries. GE credit: ArtHum, Wrt | AH, WE. —F, W, S. (F, W, S.) Albu

**130. Readings in Late Latin (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Translation and discussion of selected readings from late imperial-early medieval Christian and pagan literature. GE credit: ArtHum | AH, WC, WE. —F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) —F, W, S. (F, W, S.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) —F, W, S. (F, W, S.)

**Courses in Persian (PER)****Lower Division****1. Elementary Persian (5)**

Lecture/discussion—5 hours. Introduction to listening, speaking, reading and writing skills in Persian and to Persian culture. GE credit: ArtHum | AH, WC. —F. (F.) Sharlet

**Clinical Nutrition**

(College of Agricultural and Environmental Sciences)

**Faculty.** See the Department of Nutrition, on page 490.

**The Major Program**

The Clinical Nutrition major provides students with training in normal and therapeutic nutrition, biological and social sciences, food science, communication, business management and food service management. This major fulfills the academic requirements for admission into a dietetics internship or the equivalent, which must be completed before qualifying for registration as a dietitian.

**The Program.** The Clinical Nutrition major (formerly Dietetics) includes the same basic core of nutrition classes as the Nutrition Science major, but includes additional courses such as food service management, education, sociology, and communication skills to prepare for work with the public. Clinical Nutrition students spend the first two years completing preparatory course work in the basic biological sciences, along with several of the social sciences. In the final two years, students take courses in normal and clinical nutrition, food science, biochemistry, and management techniques.

Entering freshman or transfer students are assumed to have basic computer skills and to demonstrate mathematics competency adequate to pass the Math Placement Exam with a minimum score of 25.

**Career Alternatives.** The Clinical Nutrition major qualifies students to apply for a dietetic internship accredited by the Accreditation Council for Education in Nutrition and Dietetics enabling them to become a Registered Dietitian, the professional credential necessary to work in a clinical setting. Once dietitians are registered, they generally seek employment in administrative, therapeutic, teaching, research, or public health/public service positions in clinics, hospitals, schools, or other similar institutions. There is a growing role for dietitians working in settings outside of the traditional hospital (for example, in state and federal nutrition programs, nutrition education, Peace Corps and Cooperative Extension work). Students who complete the undergraduate preparation in clinical nutrition are also qualified to enter graduate programs in dietetics, nutrition science, public health nutrition, and food service management.

**B.S. Major Requirements:**

	UNITS
<b>Written/Oral Expression</b> .....	<b>8</b>
English 3 or University Writing	
Program 1 .....	4
Communication 1 .....	4
<b>Preparatory Subject Matter</b> .....	<b>47-48</b>
Biological Sciences 2A & 2B .....	10
Chemistry 2A, 2B, 2C, 8A, 8B .....	21
Economics 1A or 1B .....	4
Psychology 1 .....	4
Sociology 1 or 3 or Anthropology 2 .....	4-5

**Graduate Study.** Graduate Group in Clinical Research (GGCR) is an interdisciplinary graduate group in clinical research with a Master of Advanced Study degree in Clinical Research. The GGCR provides a solid clinical/translational, patient-oriented research foundation for junior faculty, clinical and pre-clinical fellows, and post-doctoral scholars. The program centers around three core elements: didactic instruction, mentored research, and special experiences:

Mandatory course work includes biostatistics, epidemiology, patient-oriented research, health services research, data management/informatics, scientific communication, research management, responsible conduct of research and career development. The instruction includes a 12-week summer curriculum followed by a one- or two-year core curriculum and electives that can be tailored to best meet each scholars career development needs.

**Degree Offered.** M.A.S. Plan II

**Degree Requirements** can be found at [http://www.ucdmc.ucdavis.edu/cpsc/area/education/ClinicalResearchGraduateGroup/crgg\\_degree\\_curriculum.html](http://www.ucdmc.ucdavis.edu/cpsc/area/education/ClinicalResearchGraduateGroup/crgg_degree_curriculum.html)

## Coaching Principles and Methods

(College of Letters and Science)

The Coaching Principles and Methods minor is an interdisciplinary minor open to undergraduates in all four colleges. Students must complete a statement of interest to assist in placing them in future internships. This form is available in the Physical Education Program Office, in 264 Hickey Gym, and may be turned in at any time.

### Minor Program Requirements:

#### Coaching Principles and Methods..... 20 UNITS

Physical Education 1; must complete a minimum of two Physical Education 1 courses in two different activities or sports.....	1
Physical Education 7 .....	1
Physical Education 100 .....	2
Physical Education 143 .....	3
Physical Education 141 .....	3
Physical Education 192 .....	2

#### Required Minor Electives

A minimum of eight units with courses from at least two different departments. One course must be taken from race/class/gender list. Second course can be from race/class/gender list or from sociocultural issues and settings list.

*Race/Class/Gender List:* One course from: African American Studies 123, 130, 133, American Studies 154, 156, Anthropology 128B, 139AN, Asian American Studies 112, 115, 116, 120, 150, 150B, 150C, 150D, 150E, Chicana/o Studies 110, 120, 122, 123, Native American Studies 115, 134, 180, Sociology 128, 129, 130, 132, 134, 172, 174, Women's Studies 130, 158, 170.

*Sociocultural Issues and Settings List:* American Studies 115, 130, 152, Anthropology 141B, Education 115, 122, 153, Exercise Biology 102, 121, 122, Human Development 100B, 110, Native American Studies 156, Physical Education 120, Psychology 126, 140, 151, 157, 158, 161, 162, 168, Sociology 122, 123, 124, 131, 153, Women's Studies 140

PHE 192 has a prerequisite of junior/senior standing. PHE 192 cannot be taken until after

a student has completed more than 90 total units. PHE 192 internship must be in a coaching or teaching setting. Setting must be approved IN ADVANCE by the coaching minor adviser before a CRN will be issued.

**Minor Adviser.** Lou Bronzan, 530-752-5541 or [stbronzan@ucdavis.edu](mailto:stbronzan@ucdavis.edu)

### Committee in Charge

Raul Aranovich, Ph.D. (*Linguistics*)

David Corina, Ph.D. (*Linguistics*)

Zoe Drayson, Ph.D. (*Philosophy*)

John Henderson, Ph.D. (*Psychology*)

Steven Luck, Ph.D. (*Psychology*)

Bernard Molyneux, Ph.D. (*Philosophy*)

### The Major Programs

The Cognitive Science major is designed to provide a broad interdisciplinary approach to the study of mind that includes courses from different departments and attracts students with a variety of interests. It emphasizes a multi-faceted approach to the study of mind that integrates concepts and techniques from psychology, artificial intelligence, linguistics, neurology, philosophy and other relevant fields.

For students interested in the liberal arts the Cognitive Science major can be pursued as a Bachelor of Arts (A.B.) program. Alternatively, it can be pursued as a Bachelor of Science (B.S.) program for students with a stronger interest in the mathematical, neurological and computational foundations of the discipline. The main objective of both programs is to give the student a broad grounding in the integrated sciences of the mind and to connect approaches from different fields. Students must complete a number of core courses for the degree, as well as a number of specialty courses on such wide-ranging topics as logic for artificial intelligence, computational linguistics, cognitive neuroscience, animal cognition and the psychology of music.

**Career Alternatives.** A degree in cognitive science provides broad intellectual foundations useful for careers in a variety of areas, including teaching, business, social work/counseling and the information technology industry. An undergraduate education in cognitive science also prepares the student for graduate study in appropriate subfields of psychology, linguistics, philosophy and informatics. It is also suitable training for pre-medicine, pre-law, and pre-management students.

### A.B. Major Requirements:

#### Preparatory Subject Matter ..... 28 UNITS

Linguistics 1 .....	4
Philosophy 10.....	4
Philosophy 13G.....	4
Psychology 1.....	4
Psychology 41 .....	4
Statistics 13.....	4
Philosophy 12.....	4

#### Depth Subject Matter..... 44

All courses from group A.....	12
Group A: Core	
One 4-unit upper division course in cognitive science, Psychology 101, Philosophy 112	
One course from group B .....	4
Group B: Computation Linguistics 177, Philosophy 133	

A further sixteen units from two of groups B-F..... 16

*Group C: Neuroscience*

Psychology 121, 135

*Group D: Linguistics*

Linguistics 103A, 103B, 131, 141, 171, 173

*Group E: Philosophy*

Philosophy 103, 104, 136

*Group F: Psychology*

Psychology 100, 137, 130, 131, 132,

136, 140, 141

Twelve additional units from groups B-G.. 12

*Group G: Other*

Communication 101, 105, 138, Education

110, 173, Human Development 100C,

102, 161, 163, Linguistics 112, 121, 150,

Jorge Peña, Ph.D., Assistant Professor

Cuihua (Cindy) Shen, Ph.D., Assistant Professor

Laramie D. Taylor, Ph.D., Associate Professor

Narine Yegian, Ph.D., Assistant Professor

Jingwen Zhang, Ph.D., Assistant Professor

### Emeriti Faculty

Rina Alcalay, Ph.D., Professor Emerita

Charles R. Berger, Ph.D., Professor Emeritus

Michael T. Motley, Ph.D., Professor Emeritus

James J. Murphy, Ph.D., Professor Emeritus

*Academic Senate Distinguished Teaching Award*

Ralph S. Pomeroy, Ph.D., Professor Emeritus

John L. Vohs, M.A., Senior Lecturer Emeritus

### Affiliated Faculty

Virginia O. Hamilton, Ph.D., Lecturer

Alisa Shubb, M.A., Lecturer

John Theobald, M.A., Lecturer

### The Major Program

The major in communication focuses upon human symbolic behavior in interpersonal and mediated contexts.

**The Program.** The program of study in communication examines communication processes at several different levels of analysis. Courses dealing with communication at the individual, interpersonal, organizational and societal levels of analysis are offered.

The emphasis in the program reflects the changing focus in the discipline and society toward computer-mediated communication, quantitative behavioral science and cognitive science. Classes addressing such topics as communication and cognition, message systems, interpersonal communication, nonverbal communication, communication and persuasion, organizational communication, mass media effects, computer-mediated communication and public communication campaigns explore communication at these levels of analysis. Related social science courses are also part of the major.

**Career Alternatives.** Communication graduates have found careers in such fields as broadcast and print journalism, administration, sales, management, politics and government, education, social work, and public relations. A communication degree is also excellent preparation for law school or other graduate programs.

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter .....

29-30

Anthropology 4 or Linguistics 1 .....

4

Communication 10Y.....

4

Communication 1 or 3 or 5/Linguistics 5 .....

4

Computer Science 15 or Philosophy 12 .....

4

Psychology 1 .....

4

Sociology 1 .....

5

Statistics 13 or Sociology 46B .....

4-5

#### Depth Subject Matter .....

40

Communication 101; 102; 120; 140; 170/

170V or 172.....

Select five of the following additional courses: .....

20

Communication 110, 111, 112, 114, 121,

122, 123, 130, 131, 136, 139, 141,

142, 143, 144, 145, 146, 148, 161, 165,

170, 172, 174, 176, 180, 189A, 189B,

189C, 189D, Anthropology 117, 120,

Economics 122, Linguistics, 171, 177,

182, Political Science 165, Psychology

100, 107, 152, 154, Sociology 126, 175,

Statistics 102, 106, 108

Note: Many of the upper division courses offered by the other L&S departments have their own prerequisites not accounted for by lower division Communication courses. To the degree that students elect to take those courses having "hidden prerequisites," the number of units necessary to complete the major increases above the stated minimum.

#### Total Units for the Major .....

69-70

**Grading recommendation.** Although not required, it is recommended that all courses offered in satisfaction of the major, except variable-unit courses, be taken for a letter grade.

**Major Advisers.** Faculty; contact department.

**Advising Office.** 466 Kerr Hall

### Minor Program Requirements:

UNITS

#### Communication .....

24

One course from: Communication 1, 3 .....

4

At least five upper division courses in communication .....

20

**Graduate Study.** The Department of Communication offers programs of study and research leading to M.A. and Ph.D. degrees in Communication. Detailed information may be obtained from the Graduate Adviser, Department of Communication.

**Graduate Adviser.** B. Feng

### Courses in Communication (CMN)

Students must have satisfied the Entry Level Writing requirement before taking any course in Communication.

### Lower Division

#### 1. Introduction to Public Speaking (4)

Lecture—2 hours; discussion—2 hours. Practice in the preparation and delivery of speeches based on contemporary principles and strategies of informing and persuading audiences. GE credit: Wrt | OL, WE—F, W, S. (F, W, S.) Shubb

#### 3. Interpersonal Communication Competence (4)

Lecture—2 hours; discussion—2 hours. Communication in interpersonal contexts. Sender, receiver, and message variables, and their interaction with communication competence. Participation in simulations and experiential exercises. GE credit: SocSci | SS.—F, W, S. (F, W, S.) Hamilton

**5. Global English and Communication (4)**

Lecture—2 hours; discussion—2 hours. English as a global language and its uses in intercultural communication. Cultural, historical, and political dimensions of varieties of English spoken around the world. Experiential grounding in strategies for increasing interpretive and verbal communicative competence for a globalized world. (Same course as Linguistics 5.) GE credit: ArtHum or SocSci | AH or SS, OL. WC.—W. (W.) Farrell, Feng, Ramamthan

**10Y. Introduction to Communication (4)**

Web virtual lecture—3 hours; discussion—1 hour. Basic principles of communication and communication processes; models of communication; foundations of empirical research in communication; contexts of communication and communication research including interpersonal, intercultural, news, entertainment, mediated, and others. GE credit: SocSci | SS.—F, W, S, Su. (F, W, S, Su.) Taylor

**12Y. Data Visualization in the Social Sciences (4)**

Lecture—2 hours; laboratory—1.5 hours; web virtual lecture—1.5 hours. Introduction to quantitative data across the social sciences (Communications, Political Science, Psychology, Sociology, and other disciplines). Transforming data, describing data, producing graphs, visual reasoning, and interpretations. (Same course as Sociology 12Y, Political Science 12Y, Psychology 12Y.) GE credit: QL, VL.—F, W, S. (F, W, S.) Cross

**76. Video Games and Virtual Environments (4)**

Lecture—3 hours; discussion—1 hour. Impact of video games on players and society. Topics include motivations for playing games; cognitive, emotional, and behavioral effects, including violence and addiction; interpersonal and group processes in online games; virtual communities; and video games for education. GE credit: SocSci | SS, VL.—F. (F.) Peña

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division****101. Communication Theories (4)**

Lecture—3 hours; discussion—1 hour. Forms, functions, development, and testing of communication theory, with emphasis on social scientific approaches. Survey and comparison of significant micro and macro theories and models of face-to-face and mediated communication. Application of theories to real world problems. GE credit: SocSci | SS.—F, W, S, Su. (F, W, S, Su.) Feng

**102. Empirical Methods in Communication (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Statistics 13 or equivalent. Social scientific research methods commonly employed in Communication. Topics include research design, measurement, sampling, questionnaire construction, survey research, experimental design, evaluation research, content analysis and qualitative field methods. GE credit: SocSci | QL, SS.—F, W, S. (F, W, S.) Bell, Palomares, Yegian

**110. Communication Networks (4)**

Lecture/discussion—4 hours. Theoretical approaches to communication networks, practical applications of network studies, and network analysis tools. Topics include friendship, political discussion, social support, organizational, social media, and disease transmission networks. Impact of emerging technologies on network creation, maintenance, and expansion. GE credit: SocSci | SS.—F. (F.) Barnett, Shen

**111. Gender Differences in Communication (4)**

Lecture—4 hours. Pass One open to Communication majors only. Examination of communication differences between men and women as sources of male/female stereotypes, misunderstandings, dilemmas, and difficulties (real and imagined). Treatment of

genders as cultures. Topics include male/female differences in discursive practices and patterns, language attitudes, and relationship dynamics. Not open for credit to students who have taken Communication 103. GE credit: SocSci | DD, SS.—F, W. (F, W.) Palomares

**112. Theories of Persuasion (4)**

Lecture/discussion—4 hours. Pass One open to Communication majors only. Theories and models of persuasion that account for the effects of source, channel and audience factors on message recipients. Examination of message strategies for altering attitudes and gaining compliance. Contexts of application include interpersonal relationships, advertising, politics, and health. Not open for credit to students who have taken Communication 152. GE credit: SocSci | SS.—F, W. (F, W.) Bell, Puckering

**114. Communication and Cognition (4)**

Lecture—4 hours. Pass One open to Communication majors only. Relationship between communication and cognition in interpersonal and mediated contexts. Models of discourse comprehension and production, the influence of language attitudes on social judgments, and the effects of information processing on decision making are explored. Not open to students who have completed course 138. GE credit: SocSci | SS.—S. (S.) Yegian

**120. Interpersonal Communication (4)**

Lecture—4 hours. Pass One open to Communication majors only. Theories and principles of interpersonal communication related to perception, verbal and nonverbal channels, mutual understanding, and relationship development. Communication processes in face-to-face and technologically-mediated encounters. Consideration of different relationship contexts, including friendships, dating and family relationships, and the workplace. Not open for credit to students who have completed course 134. GE credit: SocSci | SS.—F, W, S. (F, W, S.) Feng, Puckering

**121. Language Use in Conversation (4)**

Lecture/discussion—4 hours. Pass One open to Communication majors only. Examination of how people use language in social interaction, how they exchange meaning during conversation, and how their use of language plays a central role in turn-taking, speech acts, attitude formation, figurative speech, politeness, and other aspects of conversation. Not open for credit to students who have taken course 105. GE credit: SocSci | SS.—F, W. (F, W.) Palomares

**122. Nonverbal Communication (4)**

Lecture—4 hours. Pass One open to Communication majors only. Examination of the interaction between nonverbal communication and verbal communication channels in influencing outcomes in interpersonal relationships. Underlying functions served by nonverbal communication are considered. Not open for credit to students who have completed course 135. GE credit: SocSci | SS.—F, S. (F, S.) Puckering

**123. Intercultural Communication (4)**

Seminar—3 hours; term paper. Pass One open to Communication majors only. Major concepts and theories of intercultural communication. Topics include cultural similarities and differences in verbal and nonverbal communication; dimensions of cultural variations, barriers to intercultural communication, and intercultural communication competence. Not open for credit to students who have taken course 137. GE credit: SocSci | SS.—S. (S.) Feng

**130. Group Communication (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Statistics 13 or equivalent. Communication processes in the development and maintenance of effective groups and teams in organizations. Examination of both face-to-face and computer-mediated group interaction. Topics include group development, power, norms, cohesion, decision making, problem solving, creativity, conflict management, working remotely, and leadership. GE credit: SocSci | SS.—F. (F.)

**131. Strategic Communication in Public Relations (4)**

Lecture/discussion—4 hours. Pass One open to Communication majors only. Principles, evolution, and professional practice of public relations. Planning and execution of effective, ethical communication strategies and campaigns. Distribution of messages through traditional and new media, including social media. Cultivation of relationships between organizations and their publics. Crisis communication management. GE credit: SocSci | SS.—F. (F.) Barnett

**136. Organizational Communication (4)**

Lecture—4 hours. Pass One open to Communication majors only. Organizational communication theory and practice is examined with an emphasis on the use of effective communication strategies for achieving organizational goals. GE credit: SS.—F, W, Su. (F, W, Su.) Barnett, Hamilton

**139. Advanced Organizational Communication (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 136. Pass One open to Communication majors only. Communication processes within and among social organizations. Examines formal organizations as information processing systems. Topics include general systems theory, input-output analysis, structural-functionalism, cybernetics, organizational network analysis, organization environments, organizations as cultures, organizational learning, information technologies, and communication diagnostic/auditing strategies. GE credit: SocSci | SS, WE.—S. (S.) Barnett

**140. Introduction to Mass Communication (4)**

Lecture/discussion—4 hours. History of mass media and media research traditions. Organization and economics of the media industry. Media policy, law, regulation and ethics. Impact of the media on individuals and society. Traditional, new and emerging communication technologies. GE credit: SocSci | SS.—F, W, S, Su. (F, W, S, Su.) Cho, Taylor, Yegian

**141. Media Effects: Theory and Research (4)**

Lecture/discussion—4 hours. Prerequisite: course 140. Pass One open to Communication majors only. Social scientific studies of the effects of mass media messages on audience members' actions, attitudes, beliefs, and emotions. Topics include the cognitive processing of media messages, television violence, political socialization, cultivation of beliefs, agenda-setting, and the impact of new technologies. GE credit: SocSci | SS.—W, S. (W, S.) Cho, Taylor

**142. News Policies, Practices and Effects (4)**

Lecture—4 hours. Prerequisite: course 102 (or equivalent course in research methods), course 140. Pass One open to Communication majors only. Exploration of processes and constraints in the gathering, editing, and reporting of news. Examination of studies on the effects of news, contemporary challenges to news reporting presented by new technologies, and the relationship of news to other social institutions. GE credit: SocSci | ACGH, SS.—F, W, S. (F, W, S.) Theobald

**143. Analysis of Media Messages (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 102 (or equivalent course in research methods), course 140. Pass One open to Communication majors only. Examination of alternative approaches to the analysis, interpretation, and evaluation of media messages, including those disseminated through broadcasting, print, and new technologies. GE credit: SocSci, Wrt | ACGH, SS, Wrt.—F, W, S. (F, W, S.) Cho

**144. Media Entertainment (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 102 (or equivalent course in research methods), course 140. Pass One open to Communication majors only. Effects and appeal of media entertainment, emphasizing emotional reactions. Topics include key concepts of entertainment research such as mood management, and the

respective features and emotional/social-psychological effects of genres such as comedy, mystery, thriller, sports, music, horror, and erotica. GE credit: SocSci | SS, WE.—S. (S.) Taylor

#### **145. Political Communication (4)**

Lecture/discussion—4 hours. Prerequisite: course 102 or equivalent course in research methods and course 140. Pass One open to Communication majors only. Discussion of theories and research on the relationships among the mass media, citizens, and politics, production of political news, campaign strategies, and citizens' attitudes and behaviors. Provides frameworks for mediated politics, the news, and elite discourse and campaign messages. Offered irregularly. GE credit: SocSci | ACGH, SS.—Cho

#### **146. Communication Campaigns (4)**

Lecture/discussion—4 hours; term paper. Pass One open to Communication majors only. Strategic uses of media and interpersonal communication channels in health, environmental advocacy, and political campaigns. Emphasis on general principles relevant to most campaign types, including public information, social marketing, and media advocacy campaigns. GE credit: SocSci | SS.—S. (S.) Barnett, Theobald

#### **148. Contemporary Trends In Media (4)**

Lecture/discussion—4 hours. Pass One open to Communication Major only. Global trends in media, including media and globalization, impacts of the new media economy, media and security, and effects of ownership on media content and culture. Offered irregularly. GE credit: SocSci | SS.—Barnett, Theobald

#### **161. Health Communication (4)**

Lecture/discussion—4 hours. Health communication theories and research, including a review of research on health literacy, social support and coping, doctor-patient interaction, health communication campaigns, and media influences on health. Application of new communication technologies in health promotion. GE credit: SocSci | SS.—S. (S.) Bell

#### **165. Media and Health (4)**

Lecture/discussion—4 hours. Prerequisite: course 102 or equivalent course in research methods. Content and effects of health messages in news, entertainment, and advertising. Topics include health news reporting; portrayals of disease, disability, death and health-related behaviors; representations of health professionals; promotion of drugs and other health products; tobacco and alcohol advertising. GE credit: SocSci | SS.—S. (S.) Bell, Taylor

#### **170. Digital Technology and Social Change (4)**

Lecture/discussion—4 hours. Conceptual understanding of how digital communication technologies transform our lives through social media, mobile connectivity, globalization, and big data. Contexts of application include education, health, entrepreneurship, democracy, and poverty. GE credit: SocSci | SS.—S. (S.) Hilbert, Theobald

#### **170V. Digital Technology and Social Change (4)**

Web virtual lecture—3 hours; web electronic discussion—1 hour. Conceptual understanding of how digital technologies transform our lives, through social media, mobile connectivity, globalization, big data, and artificial intelligence. Context of course include education, health, entrepreneurship, democracy, among others. Not open for credit to students who have completed course 170. GE credit: SocSci | SS.—F, W, S, Su. (F, W, S, Su.) Hilbert

#### **172. Computer-Mediated Communication (4)**

Lecture/discussion—4 hours. Pass One open to Communication majors only. Theories and research pertaining to how people use technologies for interpersonal purposes. Impression formation, self-presentation, long-distance romantic relationships, online dating, deception, anonymity, maintaining friendships, and transmitting emotions in online contexts. GE credit: SocSci | SS.—S. (S.) Peña

#### **174. Social Media (4)**

Lecture—4 hours. Application of theories of communication to the study and design of social media. Examination of social media in various contexts such as health, political movements, and collaboration. Topics include motivations for membership, participation, virality, social-technical capital, and privacy. GE credit: SocSci | SS.—F, S. (F, S.) Shen

#### **176. Video Games Theory and Research (4)**

Lecture/discussion—2 hours; laboratory/discussion—2 hours. Prerequisite: course 102 or an equivalent research methods course. Communication theory and research on the uses and effects of video games. Research methods available for investigating game use and the impact of games on behavior. Application of those methods in a research project. GE credit: SS.—W. (W.) Peña

#### **180. Current Topics in Communication (4)**

Lecture/discussion—4 hours. Prerequisite: course 101 and 102 (or equivalent research methods course). Pass One open to Communication majors only. Group study of a special topic in communication. May be repeated one time for credit when topic differs. Offered irregularly. GE credit: SocSci | SS.—S. (S.)

#### **189A. Proseminar in Social Interaction (4)**

Seminar—3 hours; term paper. Prerequisite: course 101, 102, 136; consent of instructor. Open to Communication majors only. Reading, discussion, research, and writing on a selected topic in the specialty of social interaction. Potential topics include relationship initiation, maintenance, and deterioration; communication failure; nonverbal communication; conversational management; semantics and pragmatics of languages; and family/marital communication. May be repeated for credit when topic differs. Offered in alternate years. GE credit: SocSci, Wrt | SS, WE.—S. Feng, Palomares

#### **189B. Proseminar in Mass Communication (4)**

Seminar—3 hours; term paper. Prerequisite: course 101, 102, 140; consent of instructor. Reading, discussion, research, and writing on a selected topic in the specialty of mass communication. Potential topics include, agenda-setting, the cultivation of beliefs, television violence, media portrayals of underprivileged groups, mediated political discourse, interactive technologies, and international/global communications. May be repeated for credit when topic differs. Offered in alternate years. GE credit: SocSci, Wrt | SS, WE.—S. Berger, Cho, Hwang, Taylor, Yegian

#### **189C. Proseminar in Health Communication (4)**

Seminar—3 hours; term paper. Prerequisite: course 101; 102; 161 or 165; consent of instructor. Open to Communication majors only. Reading, discussion, research, and writing on a selected topic in health communication. Potential topics include health communication design and evaluation, media advocacy, physician-patient interaction, uses of communication technologies in health settings, and health-related advertising. May be repeated for credit when topic differs. Offered in alternate years. GE credit: SocSci, Wrt | SS, WE.—S. Bell, Feng, Taylor

#### **189D. Proseminar in Organizational Communication (4)**

Seminar—3 hours; term paper. Prerequisite: course 101, 102, 136; consent of instructor. Open to Communication majors only. Reading, discussion, research, and writing on a selected topic in the specialty of organizational communication. Potential topics include organizational networks, organizational conflict and its resolution, mediation, bargaining and negotiation, superior-subordinate interaction, leadership styles, and inter-organizational communication. May be repeated for credit when topic differs. Offered in alternate years. GE credit: SocSci, Wrt | SS, WE.—S. Barnett

#### **192. Internship in Communication (1-12)**

Internship—3-36 hours. Prerequisite: communication majors who have completed 20 units of upper division communication courses; consent of instruc-

tor. Open to Communication majors only. Supervised work experience requiring the application of communication principles and strategies or the evaluation of communication practices in a professional setting. Relevant experiences include public relations, advertising, sales, human resources, health promotion, political campaigns, journalism, and broadcasting. May be repeated up to 6 units of credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **194H. Senior Honors Thesis (4)**

Seminar—1 hour; individual tutoring on research project—3 hours. Prerequisite: senior standing and approval by Honors Committee. Directed reading, research, and writing culminating in the preparation of honors thesis under direction of faculty adviser. GE credit: SocSci | SS, WE.

#### **197T. Tutoring in Communication (2-4)**

Seminar—1-2 hours; laboratory—1-2 hours. Prerequisite: upper division standing with major in Communication and consent of Department Chairperson. Tutoring in undergraduate Communication courses, including leadership of discussion groups affiliated with departmental courses. May be repeated for credit up to a total of six units. (P/NP grading only.)

#### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

#### **Graduate**

#### **201. Theoretical Perspectives on Strategic Communication (4)**

Seminar—4 hours. Prerequisite: graduate standing; consent of instructor. Explores the intentional use of discourse and nonverbal behavior to reach goals. Explores theories and models that elucidate the processes that enable the realization of intentions in message plans and discourse.—F. (F.)

#### **202. Communication Theory Construction (4)**

Seminar—4 hours. Prerequisite: consent of instructor; graduate standing. Alternative meta-theoretical perspectives for theory generation in communication inquiry. Processes of construct explication, operationalization and theory construction. Emphasis on the critique of extant communication theories and the development of theory construction skills. Offered irregularly.—S. Barnett

#### **203. Scientific Methods for Communication (4)**

Seminar—3 hours; term paper. Prerequisite: 201, 202, Psychology 204A, 204B or equivalent. Social scientific research methods commonly employed in Communication. Topics include research design measurement sampling questionnaire construction survey research experimental design evaluation research content analysis and qualitative field methods.—S. (S.) Palomares, Yegian

#### **210. Experimental Methods and Analysis in Communication (4)**

Lecture—4 hours. Prerequisite: graduate standing; one course in inferential statistics; consent of instructor. Experimental designs in communication. Topics include: causation; threats to validity; conceptualization, operationalization, and measurement; hypothesis testing; ethics; data analysis software focusing on the analysis of variance and planned contrasts; and the practical and effective implementation and writing of experiments.—F. (F.) Palomares

#### **211. Survey Research Methods in Communication (4)**

Seminar—4 hours. Prerequisite: graduate standing; one course in inferential statistics; consent of instructor. Methods for designing personal interview, phone, mail, and web-based surveys in communication. Topics include: sampling strategies, sources of error and bias in survey designs, questionnaire construction, cognitive interviewing, interviewer behavior, and analysis of complex survey data using standard software packages.—W. (W.) Bell, Cho

**220. Persuasion Theories and Message Design (4)**

Seminar—4 hours. Prerequisite: graduate standing; consent of instructor. Major social scientific theories and perspectives on attitude change and persuasion. Application of persuasion theories and principles to persuasive message design in applied contexts.—S. (S.)

**221. Communication and Cognition (4)**

Seminar—4 hours. Prerequisite: graduate standing; consent of instructor. Explores the cognitive structures and processes that enable the production, comprehension and interpretation of messages in face-to-face and mediated communication contexts. Explores the communication outcomes associated with these processes. Offered in alternate years.—(W.) Yegian

**222. Risk Communication (4)**

Seminar—4 hours. Prerequisite: graduate standing; consent of instructor. Theories and models of individual risk information processing. Media depictions of threats and risk-related information and their potential effects on audiences. Implications for the design and implementation of messages concerning threat and risk. Offered irregularly.—S. (S.)

**230. Social Interaction Theory and Research (4)**

Seminar—4 hours. Prerequisite: graduate standing; consent of instructor. Survey of theories and research on social interaction and interpersonal communication. Covers communication codes, individual differences in communication, communication and relationship development, family communication, conflict, cognitive and emotional processes underlying social interaction, social influence, intercultural communication, and nonverbal behavior.—W. (W.) Feng, Palomares

**231. Tactics of Interpersonal Influence (4)**

Seminar—4 hours. Prerequisite: graduate standing; consent of instructor. Achievement of interpersonal goals in social interaction. Topics include message production; tactics, strategies and planning; anticipating potential obstacles; resisting and thwarting goals; plan recognition; and goal detection. Examined goals include compliance gaining, attitude change, ingratiation, information seeking, comforting, and deception. Offered in alternate years.—(S.)

**232. Health Communication (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Health communication theories and research traditions. Topics include consumer health information seeking; physician-patient interaction; information, social marketing, "edutainment," and media advocacy campaigns; social networks and coping; media influences on health; and new communication technologies in health promotion and healthcare delivery. (Same course as Public Health Science 232.) Offered in alternate years.—(W.) Bell

**233. Communication in Medicine (4)**

Seminar—3 hours; term paper. Restricted to graduate standing. Survey of research on communication between patients and health care providers. Topics include verbal and nonverbal behavior, power and influence, empathy and support, and conflict management. Cultural, social, organizational, and technological influences on communication are examined. Offered in alternate years.—W. Bell

**234. Intercultural Communication (4)**

Seminar—3 hours; term paper. Restricted to graduate standing. Theories and research on intercultural communication. Topics include national, racial, and ethnic similarities and differences in communication practices; cultural beliefs and values; identity and conflict; and technological influences on intercultural communication. Methodological issues in intercultural communication research are also examined. Offered in alternate years.—(S.) Peña

**243. Media and Health (4)**

Seminar—3 hours; term paper. Restricted to graduate standing. Survey of research on media and health. Topics include health news coverage; depictions of health, illness and disability in entertainment;

health campaigns; advertising of health products and services; and the influence of gaming and other new media on health behaviors. Offered irregularly.—W. (W.) Bell, Taylor

**244. Organizational Communication (4)**

Seminar—4 hours. Prerequisite: graduate standing and consent of instructor. Theory and research on communication processes in organizations.—Barnett

**250. Mediated Communication Theory and Research (4)**

Seminar—4 hours. Prerequisite: graduate standing; consent of instructor. Survey of major theories on the intended and unintended effects of mediated communication. Topics include media's effects on learning, political behavior, interpersonal violence, sexual socialization, consumer behavior, race relations, gender socialization, and cultural processes.—W. (W.) Cho, Taylor, Yegian

**251. Digital Technology and Social Change (4)**

Seminar—3 hours; term paper. Conceptual, theoretical, and international consideration of how digital communication technologies transform social organization and development. Topics include social media, big data, political revolutions, e-democracy, digital divide, e-education, e-health, entrepreneurship, public policies, poverty reduction, technological innovations, microfinance, and entertainment. Offered in alternate years.—(W.) Hilbert

**252. Computer-Mediated Communication (4)**

Seminar—4 hours. Prerequisite: graduate standing; consent of instructor. The effects of computer-mediated communication on the ways in which people express themselves, form impressions about strangers, develop and maintain relationships, collaborate on group work, and expand social network, especially in comparison to face-to-face communication. Offered in alternate years.—(S.) Peña

**254. Communication Campaigns (4)**

Seminar—4 hours. Prerequisite: graduate standing; consent of instructor. Strategic uses of media and interpersonal channels to promote social change through social marketing, information, and media advocacy campaigns. Focus on theory-based interventions in a variety of applied contexts. Offered in alternate years.—(W.) Barnett, Bell

**255. Social Media (4)**

Seminar—3 hours; term paper. Theoretical, conceptual and analytic issues pertaining to social media research. Topics include motivation, participation, virality, and social-technical capital. Examination of social media in various contexts. Introduction to online behavioral data collection and analysis methods. Offered in alternate years.—F. Shen

**256. Communication Perspective on Video Games (4)**

Seminar—3 hours; term paper. Review of theory and research on the uses and effects of video games and virtual environments developed for entertainment and education. Study of the research methods available for documenting and measuring game use and effects on behavior. Offered in alternate years.—S. Peña, Shen

**259. Cognitive Approaches to Media (4)**

Seminar—3 hours; term paper. Restricted to graduate standing. Interdisciplinary examination of cognitive approaches to mediated communication. Application of studies on mediated message processing, cognitive and emotional information processing, psychophysiology, and neuroscience to mass communication. Review of media research and methods on attention, memory, motivation, and limited capacity. Offered in alternate years.—W. Yegian

**270. Diffusion of Innovations (4)**

Seminar—3 hours; term paper. Communication processes by which information and innovations spread through social systems. Models of diffusion, including spatial, network, time dependent, semantic and cognitive frameworks. Impact of communication

technologies on diffusion. Practical application of diffusion models in a variety of contexts. Offered in alternate years.—W. Barnett, Hilbert

**271. Communication Networks (4)**

Seminar—3 hours; term paper. Theoretical, conceptual, and analytic issues pertaining to network perspectives on communicating and organizing. Consideration of both structural and dynamic features of communication networks. Examination of the impact of emerging technologies on communication networks. Introduction to network analysis software.—S. (S.) Barnett, Shen

**280. Special Topics in Social Interaction (4)**

Seminar—4 hours. Prerequisite: graduate standing; consent of instructor. Reading, discussion, research, and writing on a selected topic in the specialty of social interaction. May be repeated for credit when topic differs. Offered irregularly.—S. Feng, Palomares

**281. Special Topics in Mediated Communication (4)**

Seminar—4 hours. Prerequisite: graduate standing; consent of instructor. Reading, discussion, research, and writing on a selected topic in the specialty of mediated communication. May be repeated for credit when topic differs. Offered irregularly.

**282. Special Topics in Health Communication (4)**

Seminar—4 hours. Prerequisite: graduate standing; consent of instructor. Reading, discussion, research and writing on a focused topic in health communication. May be repeated for credit when topic differs. Offered irregularly.—S.

**283. Special Topics in Organizational Communication (4)**

Seminar—4 hours. Prerequisite: graduate standing; consent of instructor. Reading, discussion, research, and writing on a selected topic in the specialty of organizational communication. May be repeated for credit when topic differs. Offered irregularly.

**298. Group Study (1-5)**

Lecture—3 hours. (S/U grading only.)

**299. Individual Study (1-12)**

(S/U grading only.)

**299R. Thesis Research (1-12)**

Independent study—3-36 hours. Prerequisite: graduate standing in Communication. (S/U grading only.)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—Theobald

## Community and Regional Development

(College of Agricultural and Environmental Sciences)  
(Department of Human Ecology)

**Faculty**

See [Human Ecology](#), on page 373.

**The Major Program**

The Community and Regional Development major (formerly Applied Behavioral Sciences) aims to provide a broad comparative understanding of theories, methodologies, and issues relevant to the study of communities and the people in them. The program focuses on the ways that economic, political and socio-cultural forces are transforming regions and local communities, and it considers how knowledge can be used to improve the quality of community life.

**The Program.** Principal subjects of study within the major are community and organizational development, social change processes, the role of culture and ethnicity in shaping community life, community research methodologies, the impacts of innovation

and technology on community development, and the effects of social, economic and political systems on communities. The major is organized to allow students to develop fields of concentration that meet their career goals.

**Internships and Career Alternatives.** Community and Regional Development students are required to complete an internship in their field before graduation. Internships have been arranged with local, county, and state planning units, health departments, schools, housing offices, businesses, and education programs. Community and Regional Development graduates are prepared for occupations in community development, social research, program evaluation, organizational and educational consulting, city and regional planning, and for-profit organizations. The major also provides effective preparation for graduate or professional study in the social and behavioral sciences, or for professional degrees.

UC Davis students who wish to change their major to Community and Regional Development must be in good academic standing.

Students must have achieved a 2.00 GPA in any required upper-division course taken prior to declaring the major.

All courses satisfying the Preparatory Subject Matter, Depth Subject Matter, Area of Specialization options and English requirement must be taken for a letter grade.

### B.S. Major Requirements:

	UNITS
<b>Preparatory Subject Matter.....</b>	<b>22-26</b>
Community and Regional Development 1, 2 .....	8
Plant Sciences 21 or Computer Science	
Engineering 15 .....	3-4
Economics 1A or 1B .....	4
Anthropology 2 or Sociology 1 .....	4-5
Statistics 13 or 32 or Sociology 46B ....	3-5

<b>Depth Subject Matter .....</b>	<b>40-43</b>
<i>Core Issues in Community Development:</i> Three courses from: Community and Regional Development 142, 152, 153A or 153B or 153C, 164, 172, 176, or 180 .....	12-13
<i>Economics of Community Change:</i> Two courses from: Community and Regional Development 118, 140, 141, 162, or International Agricultural Development 103 .....	8
<i>Political Processes and Community Change:</i> Two courses from: Community and Regional Development 147, 149, 154, 157, 158, or 171 .....	8
<i>Methods for Community Research:</i> Two courses, including at least one *d course from: Community and Regional Development 151, *156, *Communication 102, *Education 114, *Landscapes and Architecture 150, *Sociology 103, *Sociology 106, *Statistics 102, *American Studies 100 .....	8-10
**Note on substitutions: supplementary list of pre-approved substitutions available in Advising Office.	
<i>Internship:</i> Community and Regional Development 192 .....	4

### Areas of Specialization

Take 20 units from each of two options, including at least one Community and Regional Development course from each option, or 40 units from one option, including at least two Community and Regional Development courses. These courses cannot overlap with the depth subject. Up to 4 units of variable-unit course work may be counted toward this requirement; e.g., Community and Regional Development 192.

### Global Communities Option .....

Students must consult with a faculty adviser to identify an emphasis within the option and to select suitable courses.

*Development Policy:* Anthropology 122B, 126A, 142, Agricultural and Resource Economics 115A, 115B, Community and Regional Development 140, 152, 153A, 153B, 153C, 164, 180, Economics 115A, 115B, 160A, 160B, 162, International Agricultural Development 170, Sociology 138, 139, 141, 145A, 159

*Gender and Development:* Sociology 132, 145A, 145B, Anthropology 126B, Women and Gender Studies 102, 182

*Globalization and Politics:* Political Science 124, 130, 131, 175

*Experiential Learning, Area Studies, and Language:* Total number of units of credit in Experiential learning, Area Studies, and Language courses cannot exceed 32.

Up to 12 credits transferred from any accredited foreign program or foreign internship, including UCD EAP and Summer Abroad programs.

Up to 12 credits in regional area studies classes; e.g., Middle East, China, Latin America.

Up to 12 credits for foreign language.

### Organization and Management Option .....

Students must consult with a faculty adviser to identify an emphasis within the option and to select suitable courses.

*Administration:* Community and Regional Development 157, 158, 194HA and 194HB, Agricultural and Resource Economics 100A, 171A, Economics 115A, Political Science 100, 105, 142A, 142B, 142C, 155, 183

*Communication:* Communication 134, 136, 140, 152, Community and Regional Development 147, 176, Education 120

*Human Resources:* Community and Regional Development 151, 172, 176, Communication 102, Economics 151B, Sociology 120, 128, 129

*Management:* Community and Regional Development 118, 140, 141, 154, 162, 164, Agricultural and Resource Economics 112, 113, History 174A, 174AD, Sociology 138, 139, 158, 159, 180A, 180B

### Policy, Planning, and Social Services Option .....

Students must consult with a faculty adviser to identify an emphasis within the option and to select suitable courses.

*General:* Community and Regional Development 118, 142, 151, 153A, 153B, 153C, 154, 156, 162, 176, 180, 194HA and 194HB, Environmental Science and Policy 165N, Political Science 100, 105, 108, 109, 142A, 142B, 142C, 154, 155, 183, Sociology 120, 140, 154, 155, 185

*Community Health and Counseling:* Communication 120, 122, 165, Community and Regional Development 164, Education 160A, 160B, Public Health Sciences 101, Human Development 120, 130, Psychology 123, 126, 151, 154, 162, 168, Sociology 154

*Education and Community:* Agricultural Education 100, 160, Communication 101, 146, Education 100, 110, 120, 151, 152, 153, Psychology 100, 132, Sociology 124

*Environmental Policy and Regional Planning:* Community and Regional Development 140, 141, 149, 152, 158, 171, Economics 115A, Environmental Science and Management 121, Environmental Science and Policy 110, 160, 161, 164, 166N, 168A, 168B, 171, 172, 173, 179, Political Science 102, 107, 175, Sociology 102, 118, 138, 141, 143A, 143B, 170

*Family and Community:* American Studies 152, Community and Regional Development 147, Human Development 100A, 100B, 100C, 101, 102, 103, 110, 130, 140,

140L, 141, 143, 160, 161, 163, Psychology 140, Sociology 122, 131, 134, 135, 152

Three courses in English Composition from the following list:

English 3, University Writing Program 1, 18, 19, 101, 102A, 102B, 102C, 102D, 102E, 102F, 102G, 102H, 102J, 102K, 102L, 104A, 104B, 104C, 104D, 104E, 104F, 104I, Communication 1, Comparative Literature 1, 2, 3, 4, or Native American Studies 5.

At least one course must be selected from:

University Writing Program 101, 102 and 104 series.

The Upper Division Composition Exam does not satisfy the requirement.

Advanced Placement English score of 4 or 5 which satisfies English 3 and/or University Writing Program 1 will satisfy one of the three required courses.

### Total Units for Major ..... 106-113

**Major Adviser.** M. Kenney,  
[mkenney@ucdavis.edu](mailto:mkenney@ucdavis.edu)

**Advising Center** for the major is located in 1303 Hart Hall 530-752-2244.

**Honors Program.** An Honors Program available to Human and Community Development majors who have demonstrated excellence in their field of study. Entrance into the honors program requires that a student have completed at least 135 units with a minimum grade point average of 3.500 in upper division courses counted toward the major. The program consists of a project whose specific nature is determined by consultation with the student's Honors Adviser. It may involve completion of a research project, a scholarly paper, a senior thesis, or some comparable assignment. The project will have a minimum duration of two quarters and will be noted on the student's record by a variable unit course number or special honors course designation. Successful completion of the honors program requires that a minimum of eight (8) units of credit be earned in course work for the project. It is expected that a student participating in the Honors Program of the Community Studies and Development will participate in the Undergraduate Research, Scholarship and Creative Activities Conference. Additionally, students participating in the Honors Program will be required to give a public presentation of their work in a departmental seminar program.

**Honors Program Adviser.** M. Kenney,  
[mkenney@ucdavis.edu](mailto:mkenney@ucdavis.edu)

### Minor Program Requirements:

The Community and Regional Development Program (Department of Human Ecology) offers the following minor:

#### UNITS

### Community Development ..... 24

Community and Regional Development 1 .....

4

Five courses selected from:

Community and Regional Development 118, 140, 141, 142, 147, 149, 151, 152, 153A, 153B, 153C, 154, 156, 157, 158, 162, 164, 171, 172, 176, 180..... 20

**Minor Adviser.** M. Kenney,  
[mkenney@ucdavis.edu](mailto:mkenney@ucdavis.edu)

**Graduate Study.** See [Graduate Studies](#), on page 120.

### Courses in Community and Regional Development (CRD)

#### Lower Division

##### 1. The Community (4)

Lecture—3 hours; discussion—1 hour. Basic concepts of community analysis and planned social change. The dynamics of community change through

case studies of communities including peasant, urban ghetto, suburban mainline, and California farm workers. GE credit: SocSci, Div, Wrt | ACGH, DD, OL, SS, VL, WE.—F, W. (F, W.) Tarallo

## **2. Ethnicity and American Communities (4)**

Lecture—3 hours; discussion—1 hour; extensive writing; term paper. Historical and cultural survey of the role of various ethnic groups in the development of American communities. Examines ethnicity as a cultural factor, ethnicity as power and issues related to selected American ethnic groups. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.—F, S. (F, S.)

## **20. Food Systems (4)**

Lecture—3 hours; laboratory—3 hours. Social aspects of agri-food systems. Social science perspectives applied to food and agricultural sustainability in relation to ecology, knowledge, technology, power, governance, labor, social difference, and social movements. Social and environmental effects of commodity chains in comparative global context. GE credit: SocSci, Wrt | OL, VL, SS, WE.—F. (F.) Galt

## **92. Internship (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.)

## **98. Directed Group Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

## **99. Special Study for Undergraduates (1-5)**

(P/NP grading only.)

## **Upper Division**

### **118. Technology and Society (4)**

Lecture—3 hours; discussion—1 hour; extensive writing; term paper. Prerequisite: course 1 or 2 or Sociology 1 or Anthropology 2. Impact of technology on labor relations, employment, industrial development and international relations. Internal relations of technology development and deployment. GE credit: SocSci | SS, WC, WE.—F. (F.) Kenney

### **140. Dynamics of Regional Development (4)**

Lecture—4 hours; extensive writing; term paper; project. Prerequisite: course 1 or 2 or Sociology 1 or Anthropology 2. Industrial cluster formation and institutions. Technology, labor relations and interfirm linkages in global value chains. California and other regions are used as case studies. GE credit: SocSci | SS, WE.—W. (W.) Kenney

### **141. Organization of Economic Space (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or 2 or Sociology 1 or Anthropology 2. Globalization and technological restructuring of economic activity focusing on new spatial patterns of production and circulation and their implications for workers, communities and societies, both in the U.S. and around the globe. GE credit: SocSci | SS, WC, WE.—F. (F.)

### **142. Rural Change in the Industrialized World (4)**

Lecture—3 hours; discussion—1 hour; extensive writing; term paper. Prerequisite: course 1 or 2 or Sociology 1 or Anthropology 2. Geography of rural environment with emphasis on rural restructuring. Demographics, community, economy, governance, agriculture, and environmental conservation in rural areas of industrialized world. Case studies from and comparisons drawn between North America, Europe, Australia, New Zealand, and Japan. GE credit: SocSci | SS, WE.—W. (W.) Galt

### **147. Community Youth Development (4)**

Lecture/discussion—4 hours; project; extensive writing or discussion; term paper. Community influences on youth well-being, youth as agents of community change, and policies to support healthy communities for young people. Special emphasis on disparities in youth well-being related to race, class, immigration

status, gender, sexual-orientation. Offered in alternate years. GE credit: SocSci, Div, Wrt | DD, OL, SS, VL, WE.—S. (S.) London

## **149. Community Development Perspectives on Environmental Justice (4)**

Lecture/discussion—4 hours; extensive writing or discussion; project; term paper. Environmental justice social movements; inequitable distribution of pollution on low-income communities of color; histories, policies, and innovations associated environmental justice movements in the United States and around the world. Offered in alternate years. GE credit: SocSci, Div, Wrt | DD, OL, SS, VL, WE.—S. (S.) London

## **151. Community Field Research: Theory and Analysis (4)**

Lecture—4 hours; extensive writing; project. Prerequisite: course 1; any upper division Community and Regional Development course is recommended. Emphasis on the design and analysis of community research considering the relationship between theory and practice. Study of community research methods, including structural analysis, elite interviewing, and ethnographic approaches. Course requires design and completion of field research project. GE credit: SocSci, Div, Wrt | ACGH, DD, OL, SS, VL, WE.—S. (S.) Tarallo

## **152. Community Development (4)**

Lecture—4 hours. Prerequisite: course 1 or 151 or Sociology 2 or Anthropology 2 or Asian American Studies 100 or Chicana/o Studies 132 or African American & African Studies 101. Introduction to principles and strategies of community organizing and development. Examination of non-profit organizations, citizen participation, approaches to reducing poverty, community needs assessment, and regional development strategies. GE credit: SocSci, Wrt | ACGH, DD, SS, WC, WE.—F. (F.) Brinkley

### **153A. International Community Development: Asia (4)**

Lecture—4 hours. Prerequisite: course 1 or Anthropology 2 or International Agricultural Development 10 or Sociology 1 or 2 or Political Science 1. Examination and analysis of community development efforts in Japan and the impact of global forces in different settings. Alternative strategies with emphasis on self-reliance and locally controlled development. Course is based in Kyoto, Japan, and includes field trips. GE credit: SocSci, Div | OL, SS, VL, WC, WE.—Su. (Su.) Fujimoto, Wiener

### **153B. International Community Development: Europe (4)**

Lecture—4 hours. Prerequisite: course 1 or 2 or Anthropology 2 or International Agricultural Development 10 or Sociology 1 or 2 or Political Science 1. Examination and analysis of community development efforts in Europe and the impact of global forces in different settings. Alternative strategies with emphasis on self-reliance and locally controlled development. Course is based in Freiburg, Germany, and includes field trips to France and Switzerland. GE credit: SocSci, Div | SS, WC.—Su. (Su.)

### **153C. International Community Development: Africa (4)**

Lecture—2 hours; fieldwork—2 hours. Prerequisite: course 1 or 2 or Anthropology 2 or International Agricultural Development 10 or Sociology 1 or 2 or Political Science 1. Examination and analysis of community development efforts in Africa and the impact of global forces in urban and rural settings. Focus on strategies that promote self-reliance and locally controlled development. Course based in South Africa, includes field trips. GE credit: SocSci, Div | SS, WC.—Su. (Su.)

### **154. Social Theory and Community Change (4)**

Lecture/discussion—4 hours; course 1 or Sociology 1 or Anthropology 2. Comparative overview of the dominant social science paradigms for the study of community development and change. Among the paradigms discussed are functionalism, conflict theory/Marxism, structuralism, methodological individualism, reflexive modernity. GE credit: SocSci, Div, Wrt | ACGH, DD, OL, SS, VL, WC, WE.—F, W. (F, W.) Lacy

ualism, reflexive modernity. GE credit: SocSci, Div, Wrt | ACGH, DD, OL, SS, VL, WC, WE.—F, W. (F, W.) Lacy

## **156. Community Economic Development (5)**

Lecture—4 hours; laboratory—2 hours. Prerequisite: course 152 or Plant Sciences 21 or Engineering Computer Sciences 15; consent of instructor. How low income communities work together to improve their economic well-being, increase their control over their economic lives, and build community power and decision-making. Includes techniques to analyze community economic potential and identification of appropriate intervention tools. Group project. GE credit: SocSci | QL, SS, WE.—W. (W.)

## **157. Politics and Community Development (4)**

Lecture—4 hours. Analyzes political, economic and sociocultural forces shaping the form and function of local communities in the U.S. Considers theories of the state, the community and social change and case studies of actual community development in comparative historical perspective. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.—F. (F.)

## **158. Small Community Governance (4)**

Lecture/discussion—3 hours; fieldwork—3 hours. Prerequisite: course 1 or Sociology 1 or Political Science 1. Governing institutions and political processes in rural and small urban places. Local government organization, community autonomy, leadership, political change, policy development, and select policy issues including public finance. Field research on political processes or policy issues in select communities. Offered in alternate years.—S. (S.) London

## **162. People, Work and Technology (4)**

Lecture—4 hours. Prerequisite: course 1 or Sociology 1 or Anthropology 2; upper division standing recommended. Restricted to upper division standing. Analysis of the relationship between work, technology, and human experience. Theories of the causes and consequences of labor process change; impacts of race/ethnicity, class, gender, and citizenship status on work; responses of workers, communities, and policy-makers to workplace changes.—F, W. (F, W.) Visser

## **164. Theories of Organizations and Their Roles in Community Change (5)**

Lecture—4 hours; laboratory—2 hours. Prerequisite: course 1 or 2 or Sociology 1 or Anthropology 2; Statistics 13 or 13V or Sociology 46B. Planned change within and through community organizations. Private voluntary organizations, local community associations, and local government. Relationship between community organizations and social capital. Collaborative original data gathering and professional report writing. GE credit: SocSci | ACGH, DD, OL, SS, VL, WE.—W. (W.) Brinkley

## **171. Housing and Social Policy (4)**

Lecture—4 hours; term paper. Social impact, economics, and politics of housing in the United States. Special attention given to federal, state, and local policy and program strategies to produce and preserve affordable housing and inclusive neighborhoods.—S. (S.) Wiener

## **172. Social Inequality: Issues and Innovations (4)**

Lecture/discussion—4 hours; extensive writing; term paper; project. Prerequisite: course 1 or 2 or Sociology 1 or Anthropology 2; upper division standing recommended. Focus on the dimensions, causes, and means of alleviating social inequality in the U.S. Examination and analysis of major theories and forms (class, race/ethnicity, gender, and citizenship status) of inequality. Policy-based and grassroots approaches to change.—S. (S.) Visser

## **176. Comparative Ethnicity (4)**

Lecture—4 hours; term paper. Prerequisite: course 1 or 2 or Sociology 1 or Anthropology 2 and upper division standing recommended. Role of ethnicity in shaping social systems and interaction. Analytical approaches to and issues arising from the study of

ethnicity, through utilization of data from a range of different societies. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WC, WE.—S. (S.) Guarnizo

### **180. Transnational Community Development (4)**

Lecture/discussion—4 hours; extensive writing; project; term paper. Prerequisite: course 1, or Anthropology 2, or Sociology 1. The effects of grassroots, non-state, non-corporate actors from abroad on local, national and international development. Socioeconomic, political, and cultural implications of transnational actions undertaken by international non-governmental organizations, individual migrants, and migrant grassroots civic organizations. GE credit: SocSci | SS, WC, WE.—S. (W.) Guarnizo

### **192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.)

### **194HA. Special Study for Honors Students (4)**

Independent study—3 hours; seminar—1 hour; project; term paper. Prerequisite: completion of 135 units at the time of enrollment; GPA 3.500 in the major; GPA 3.300 in overall standing; completion of at least four upper division courses; agreement of a faculty member to serve as thesis adviser; consent of instructor. Community and Regional Development Honors is a program of direct reading, research and writing culminating in the preparation of a Senior Honors Thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of sequence.)—F, W. (F, W.) Kenney

### **194HB. Special Study for Honors Students (4)**

Independent study—3 hours; seminar—1 hour; project; term paper. Prerequisite: completion of 135 units at the time of enrollment; GPA 3.500 in the major; GPA 3.300 in overall standing; completion of at least four upper division courses; agreement of a faculty member to serve as thesis adviser; consent of instructor. Community and Regional Development Honors is a program of direct reading, research and writing culminating in the preparation of a Senior Honors Thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of sequence.)—F, W. (F, W.) Kenney

### **197T. Tutoring in Community and Regional Development (1-5)**

Tutorial—3-15 hours. Prerequisite: upper division standing; completion of course to be tutored; consent of instructor. Assisting instructor in one of the Community and Regional Development's regular courses by tutoring individual students or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary activities. May be repeated up to 10 units for credit. Offered irregularly. (P/NP grading only.)—F, W, S, Su.

### **198. Directed Group Study (1-5)**

(P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

## **Graduate**

### **240. Community Development Theory (4)**

Lecture/discussion—4 hours. Introduction to theories of community development and different concepts of community, poverty, and development. Emphasis on building theory, linking applied development techniques to theory, evaluating development policy, and examining case studies of community development organizations and projects. (Same course as Geography 240.)—F, (F.)

### **241. The Economics of Community Development (4)**

Seminar—4 hours. Prerequisite: graduate standing. Economic theories and methods of planning for communities. Human resources, community services and infrastructure, industrialization and technological

change, and regional growth. The community's role in the greater economy. (Same course as Geography 241.) Offered irregularly.—Kenney

### **242. Community Development Organizations (4)**

Seminar—4 hours. Prerequisite: course 240. Class size limited to 15 students. Theory and praxis of organizations with social change agendas at the community level. Emphasis on non-profit organizations and philanthropic foundations.—S. (S.) Hirtz

### **242S. Community Development Organizations (International) (4)**

Fieldwork—10 hours; lecture—5 hours; workshop—5 hours. Prerequisite: course 240. Class size limited to 10 students. Theory and praxis of organizations with social change agendas at the community level. Emphasis on local governance, non-profit organizations and philanthropic foundations at an international level.—Su. (Su.) Hirtz

### **244. Political Ecology of Community Development (4)**

Lecture—4 hours. Prerequisite: graduate standing. Community development from the perspective of geographical political ecology. Social and environmental outcomes of the dynamic relationship between communities and land-based resources, and between social groups. Cases of community conservation and development in developing and industrialized countries. (Same course as Geography 254.)—W. (W.) Galt

### **245. The Political Economy of Urban and Regional Development (4)**

Lecture—4 hours. Prerequisite: course 157, 244, or the equivalent. How global, political and economic restructuring and national and state policies are mediated by community politics; social production of urban form; role of the state in uneven development; dynamics of urban growth and decline; regional development in California. (Same course as Geography 245.)—S. (S.)

### **246. The Political Economy of Transnational Migration (4)**

Lecture—4 hours. Prerequisite: graduate standing. Theoretical perspectives and empirical research on social, cultural, political, and economic processes of transnational migration to the U.S. Discussion of conventional theories will precede contemporary comparative perspectives on class, race, ethnicity, citizenship, and the ethnic economy. (Same course as Geography 246.)—W. (W.) Guarnizo

### **247. Transformation of Work (4)**

Lecture/discussion—4 hours. Prerequisite: graduate standing in history or social science degree program or consent of instructor. Exploration of the ways that the experience, organization, and systems of work are being reconfigured in the late twentieth century. The impacts of economic restructuring on local communities and workers.—F. (F.) Visser

### **248. Social Policy, Welfare Theories and Communities (4)**

Seminar—4 hours. Prerequisite: graduate standing. Theories and comparative histories of modern welfare states and social policy in relation to legal/normative, organizational, and administrative aspects. Analysis of specific social issues within the U.S./California context. Not open for credit to students having completed Community & Regional Development 248A and 248B. (Same course as Geography 248.) Offered in alternate years.—(S.) Hirtz

### **248A. Social Policy, Welfare Theories and Communities I (2)**

Seminar—2 hours. Prerequisite: graduate standing. Theories and comparative histories of modern welfare states. Theories of welfare and social policy in relation to normative, organizational, and administrative aspects of welfare and social policy. Offered in alternate years.—Hirtz

### **248B. Social Policy, Welfare Theories and Communities II (2)**

Seminar—2 hours. Prerequisite: graduate standing. Concurrent enrollment in course 248A. Analysis of a specific set of social issues within the U.S./Califor-

nia context. Issues may include poverty, hunger, housing, health, family, disability, economic opportunity, affirmative action orientations, gender, old age, or special social groups. Offered in alternate years.—Hirtz

### **249. Media Innovation and Community Development (4)**

Seminar—4 hours. Restricted to graduate students. Role of innovative media in communities and social change. Studies historical, practical and theoretical issues involving media in community organizing, social justice movements, democracy initiatives, and economic justice.—S. (S.)

### **250. Professional Skills for Community Development (4)**

Lecture/discussion—2 hours; project—2 hours; fieldwork; extensive writing or discussion. Prerequisite: course 240. Priority enrollment for Masters and Ph.D. students in Community and Regional Development. Help students develop the practical skills needed to work professionally in organizations that are involved in community development. Provides an overview of community development planning, project management, and consultation skills.—W. (W.) Benner, Hirtz, London

### **290. Seminar (1)**

Seminar—1 hour. Analysis of research in applied behavioral sciences. (S/U grading only.)—F, W, S. Hirtz

### **292. Graduate Internship (1-12)**

Internship—3-36 hours. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. (S/U grading only.)

### **293. Community Development Graduate Proseminar (1)**

Lecture/discussion—1 hour. Prerequisite: enrollment in Community Development graduate group. Restricted to first year Community Development graduate students only. Introduction to graduate training in Community Development. Seminar designed to introduce students entering graduate work in the Community Development Graduate Group to its ongoing activities. (S/U grading only.)—F. (F.) Galt

### **298. Group Study (1-5)**

### **299. Research (1-12)**

(S/U grading only.)

## **Professional**

### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## **Professional**

### **440. Professional Skills for Community Development (4)**

Seminar—4 hours. Prerequisite: course 240. The intersection of theory and case studies to develop practical skills needed to work as a professional community developer, program administrator, and/or policy consultant.—W. (W.) Bradshaw

## **Community Development (A Graduate Group)**

Michael Rios, Ph.D., Chairperson of the Group

 Julie Sze, Ph.D., Associate Professor (*American Studies*)  
 Tom Tomich, Ph.D., Professor (*Human Ecology*)  
 M. Anne Visser, Ph.D., Assistant Professor (*Human Ecology*)  
 Karen Watson-Gegeo, Ph.D., Professor (*School of Education*) Distinguished Graduate Mentoring Award  
 Stephen Wheeler, Ph.D., Professor (*Human Ecology*)  
 Diane Wolf, Ph.D., Professor (*Sociology*)

### Affiliated Faculty

David Campbell, Ph.D., Specialist in Cooperative Extension (*Human Ecology*)  
 Gail Feenstra, Ph.D., Food Systems Analyst (SAREP)  
 Shermain Hardesty, Ph.D., Specialist in Cooperative Extension (*Agricultural and Resource Economics*)  
 Jeff Loux, Ph.D., Director (*Land Use and Natural Resources, UC Davis Extension*)  
 Deborah Paterniti, Ph.D., Associate Adjunct Professor (*UCDHS: Center for Healthcare Policy and Research*)  
 Carolyn Penny, Ph.D., Director (*Chancellor and Provost Office*)  
 Bernadette Tarallo, Ph.D., Continuing Lecturer (*Human Ecology*)  
 Mark Van Horn, Director (*PSTC/SF*)

### Emeriti Faculty

Stephen Brush, Ph.D., Professor Emeritus (*Human Ecology*)  
 Deborah Elliott-Fisk, Ph.D., Sr. Lecturer SOE, Emeritus (*Wildlife, Fish, and Conservation Biology*)

Mark Francis, M.L.A., Professor Emeritus (*Human Ecology*)  
 Isao Fujimoto, M.A., Lecturer SOE Emeritus (*Human Ecology*)  
 James I. Grieshop, Ph.D., Specialist in Cooperative Extension Emeritus (*Human Ecology*)  
 Joyce Gutstein, Ph.D., Director (*Public Service Research Program*)  
 Frank Hirtz, Ph.D., Sr. Lecturer SOE (*Human Ecology*)  
 Janet D. Momsen, Ph.D., Professor Emerita (*Human Ecology*)  
 Ben Orlove, Ph.D., Professor Emeritus (*Environmental Sciences and Policy*)  
 Dennis Pendleton, Ph.D., Dean (*UC Davis Extension*)  
 Michael P. Smith, Ph.D., Distinguished Professor Emeritus (*Human Ecology*)  
 Alvin D. Sokolow, Ph.D., Extension Specialist Emeritus (*Human Ecology*)  
 Geoffrey A. Wandesforde-Smith, Ph.D., Associate Professor Emeritus (*Political Science, Environmental Science and Policy*)  
 Miriam J. Wells, Ph.D., Professor Emerita (*Human Ecology*)

**Graduate Study.** The Graduate Group in Community Development offers a multidisciplinary program of study which leads to the M.S. degree. The program helps students link conceptual knowledge with cutting edge practical experience so they can influence the social, economic, cultural and political forces that affect the well-being of people living in community settings whether small towns or large cities, whether in the United States or elsewhere in the world. Graduate study in community development also prepares individuals to work within government or non-profit organizations in the realm of social and economic change, or to prepare them for further doctoral studies in related programs. Particular strengths of the program include: urban political development and change; sustainable agriculture and food systems; community organizing and organizations in under-served communities; community economic development; environmental conservation and planning; local impacts of globalization and trans-nationalism.

**Preparation.** Applicants to this program can prepare themselves by enrolling for upper division courses in the social or behavioral sciences, e.g., anthropology, economics, sociology, psychology, geography, urban studies or political science, and courses in community studies.

**Graduate Advisers.** Contact the Group office.

## Community Nutrition

Manfred Kusch, Ph.D., Senior Lecturer Emeritus (*Comparative Literature, French and Italian*)  
 Scott McLean, Ph.D., Lecturer  
 Seth L. Schein, Ph.D., Professor Emeritus  
 Robert M. Torrance, Ph.D., Professor Emeritus

### The Major Program

Comparative Literature is a dynamic major whose own self-definition is constantly shifting. Once mostly limited to the study of western European literature and its Greco-Roman classical past, today Comparative Literature has become a global interdisciplinary study of literature in original languages and other media (including cinema, television, fine arts, and opera, for example). Thus, we can define Comparative Literature as the study of literature and culture across national boundaries and throughout historical time.

**The Program.** Both the major and the minor programs in Comparative Literature allow students to combine courses in one or more national literature departments with courses in Comparative Literature. The introductory course sequence (COM 1 through 4) provides both an overview of ancient to contemporary literature and film and offers intensive practice in analytical thought. In addition, any one of the courses in the sequence satisfies the university composition requirement. All readings in undergraduate Comparative Literature courses are in English, but majors take upper division courses in at least one foreign literature in the original language.

Students majoring in Comparative Literature choose a first and second literature of concentration, one of which may be English. After the introductory sequence, each student's major course work is divided between courses in the two literatures of concentration and Comparative Literature courses. These Comparative Literature courses encourage students to take a broad view of a historical period, a theme, a genre, or a literary movement. The wide variety of options in the program permits great flexibility and encourages interdisciplinary connections among literature and philosophy, psychology, history, and the arts. Each student's plan of study must be approved by the major adviser at the beginning and end of each calendar year.

**Career Alternatives.** A Comparative Literature major offers an excellent enhancement to pre-professional training, preparing students for graduate study in medicine, dentistry, veterinary medicine, and other science fields as well as law and business, besides of course journalism and publishing, teaching, or graduate study in literature.

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter ..... 16-46

Comparative Literature 1 or 2; 3 or 4 .....	8
Two other lower division courses in Comparative Literature (selected from 1-53C excluding the 10 series. Cannot include the two required courses in the 1-4 series).	
It is recommended that students who do not use a European language toward the major take one of the remaining required lower division courses in the 53 series, preferably the 53 course that relates to the region of the language the student is using to satisfy the upper division language requirement in the major.....	8

Foreign language: sufficient preparation to ensure satisfactory performance at the upper division level..... 0-30

#### **Depth Subject Matter ..... 40**

Five upper division Comparative Literature courses including at least one course in a major period (such as 164A-164B-164C-164D), movement (such as 168A-168B, 169) or genre (such as 160A-160B, 161A-161B, 163, 166A-166B) and including the following required courses:

Comparative Literature 141 (recommended for the junior year); Comparative Literature 195 (to be taken in the spring quarter before graduation) ..... 20

Three upper division literature courses in a language other than English ..... 12

Two additional upper division literature courses in Comparative Literature or in any other program including English or literature in translation..... 8

#### **Total Units for the Major ..... 56-86**

**Major Adviser.** Consult the Department office.

#### **Minor Program Requirements:**

The minor in Comparative Literature allows students to combine courses in Comparative Literature with courses in a national literature, including English or foreign literature in translation. There is no foreign language requirement for the minor.

UNITS

#### **Comparative Literature ..... 24**

Comparative Literature 1, 2, 3, or 4..... 4

At least five upper division literature courses, at least four of which are in Comparative Literature; Comparative Literature 141 and 195 recommended..... 20

Courses should be chosen in consultation with, and with the approval of, the adviser.

**Minor Adviser.** Consult the Department office.

**Advising.** All Comparative Literature majors and minors must consult with their adviser, individually, at least once at the beginning and once at the end of each academic year.

**Honors and Honors Program.** Students, who meet the grade point requirement for graduation with honors and complete the requirements established by the College of Letters and Science, may be recommended by the department for graduation with high honors or highest honors on the basis of an evaluation of their academic achievements in the major and in the honors project in particular. Entrance into the honors program requires that a student have completed at least 135 units with a minimum grade point average of 3.500 in courses counted toward the major.

Candidates must write a senior thesis under the direction of a faculty member approved by the major adviser. For this purpose, in addition to fulfilling all other major requirements, honors candidates must enroll in 6 units of Comparative Literature 194H during the first two quarters of the senior year.

**Teaching Credential Subject Representative.** See the Teaching Credential/M.A. Program on page 124.

**Education Abroad Options.** The department of Comparative Literature encourages students to study abroad, in the Summer Abroad program, the Quarter Abroad Program, or the Education Abroad Program. With the approval of a major adviser, applicable courses taken abroad may be accepted in the major or minor programs.

**Graduate Study.** The Comparative Literature Program offers the Ph.D. degree with a strong emphasis on individual research under the supervision of a faculty member. Candidates for the Ph.D., in addition to research of a comparative nature, study three literatures (one of which may be English and/or American) in the original languages, acquiring an extensive knowledge of the overall development of

one. Students may choose to focus on a special topic instead of on a third literary tradition.

Within this framework, each student's program will be tailored to individual interests, and may center on a major historical period, such as the Renaissance or the modern age; a genre, such as lyric poetry, epic, drama, or the novel; or any other special emphasis approved by the Graduate Adviser.

**Preparation.** For admission to the Ph.D. Program candidates should have an undergraduate major in literature and reading ability in three foreign languages. The Group requires three letters of recommendation and a sample of recent written work, and it is recommended that students submit their GRE scores.

**Graduate Adviser.** S. Lu

#### **Courses in Comparative Literature (COM)**

**Note.** Many courses in Comparative Literature require that students have met the Entry Level Writing Requirement (ELWR) for the University of California.

#### **Lower Division**

##### **1. Major Books of Western Culture: The Ancient World (4)**

Lecture/discussion—4 hours. Prerequisite: completion of Entry Level Writing Requirement. Introduction, through class discussion and frequent written assignments, to some of the major books of western civilization such as The Odyssey, Aeneid, Bible, and Augustine's Confessions. GE credit: ArtHum, Wrt | AH, WC, WE.

##### **2. Major Books of Western Culture: From the Middle Ages to the Enlightenment (4)**

Lecture/discussion—4 hours. Prerequisite: completion of Entry Level Writing Requirement. Introduction to the methods of inquiry applied to critical reading and the practice of writing. Focus on texts from the European Middle Ages to the eighteenth century; critical analysis of the historical-cultural developments in this period. GE credit: ArtHum, Wrt | AH, WC, WE.

##### **3. Major Books of Western Culture: The Modern Crisis (4)**

Lecture/discussion—4 hours. Prerequisite: completion of Entry Level Writing Requirement. Introduction, through class discussion and frequent written assignments, to the major literature and thought of the late eighteenth to the mid-twentieth century. GE credit: ArtHum, Wrt | AH, WC, WE.

##### **4. Major Books of the Contemporary World (4)**

Lecture/discussion—4 hours. Prerequisite: completion of entry level writing requirement. Comparative study of selected major Western and non-Western texts composed in the period from 1945 to the present. Intensive focus on writing about these texts, with frequent papers written about these works. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.

##### **5. Fairy Tales, Fables, and Parables (4)**

Lecture—3 hours; discussion—1 hour. An introduction to fairy tales, fables, and parables as recurrent forms in literature, with such readings as tales from Aesop and Grimm, Chaucer and Shakespeare, Kafka and Borges, Buddhist and Taoist parables, the Arabian Nights, and African American folklore. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Schildgen, Sharlet

##### **6. Myths and Legends (4)**

Lecture—3 hours; discussion—1 hour. Introduction to the comparative study of myths and legends, excluding those of Greece and Rome, with readings from Near Eastern, Teutonic, Celtic, Indian, Japanese, Chinese, African and Central American literary sources. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

##### **7. Literature of Fantasy and the Supernatural (4)**

Lecture—3 hours; discussion—1 hour. The role of fantasy and the supernatural in literature: tales of magic, hallucination, ghosts, and metamorphosis,

including diverse authors such as Shakespeare, P'u Sung-Ling, Kafka, Kawabata, Fuentes, and Morrison. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

#### **8. Utopias and their Transformations (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. A consideration, in literary works from different ages, of visionary and rational perceptions of a lost paradise, Golden Age, or Atlantis—and of the inhuman nightmares that can result from perversions of the utopian dream of perfection. GE credit: ArtHum, Wrt | AH, WC, WE.

#### **9. The Short Story and Novella (4)**

Lecture/discussion—3 hours; term paper. An introduction to shorter forms of prose fiction by major authors of different countries, with special emphasis on the modern period. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

#### **10A. Master Authors in World Literature; Gilgamesh, Ramayana, Beowulf, Nibelungenlied (2)**

Lecture/discussion—1 hour. Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Gilgamesh, Ramayana, Beowulf, Nibelungenlied. May be repeated for credit in different subject area. (P/NP grading only.)

#### **10B. Master Authors in World Literature; Metamorphoses, Decameron, Arabian Nights, Canterbury Tales (2)**

Lecture/discussion—1 hour. Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Metamorphoses, Decameron, Arabian Nights, Canterbury Tales. (P/NP grading only.)

#### **10C. Master Authors in World Literature; Chanson de Roland, El Cid, Igor's Campaign, Morte D'Arthur (2)**

Lecture/discussion—1 hour. Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Chanson de Roland, El Cid, Igor's Campaign, Morte D'Arthur. May be repeated for credit in different subject area. (P/NP grading only.)

#### **10D. Master Authors in World Literature; Sakuntala, Tristan and Isolde, Aucassin and Nicolette, Gawain and the Green Knight (2)**

Lecture/discussion—1 hour. Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Sakuntala, Tristan and Isolde, Aucassin and Nicolette, Gawain and the Green Knight. May be repeated for credit in different subject area. (P/NP grading only.)

#### **10E. Master Authors in World Literature; Swift, Rabelais, La Celestina, Simplicissimus (2)**

Lecture/discussion—1 hour. Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Swift, Rabelais, La Celestina, Simplicissimus. May be repeated for credit in different subject area. (P/NP grading only.)

#### **10F. Master Authors in World Literature; Cervantes, Saikaku, Fielding, Voltaire (2)**

Lecture/discussion—1 hour. Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Cervantes, Saikaku, Fielding, Voltaire. May be repeated for credit in different subject area. (P/NP grading only.)

**10G. Master Authors in World Literature; Machiavelli, Shakespeare, Lope de Vega/ Calderón, Molière/Racine, Lessing/Schiller (2)**

Lecture/discussion—1 hour. Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Machiavelli, Shakespeare, Lope de Vega/ Calderón, Molière/Racine, Lessing/Schiller. May be repeated for credit in different subject area. (P/NP grading only.)

**10H. Master Authors in World Literature; Goethe, Byron, Stendhal, Pushkin, Lermontov (2)**

Lecture/discussion—1 hour. Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Goethe, Byron, Stendhal, Pushkin, Lermontov. May be repeated for credit in different subject area. (P/NP grading only.)

**10I. Master Authors in World Literature; Hoffmann, Gogol, Poe, Hawthorne, Maupassant, Chekhov, Melville (2)**

Lecture/discussion—1 hour. Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Hoffmann, Gogol, Poe, Hawthorne, Maupassant, Chekhov, Melville. May be repeated for credit in different subject area. (P/NP grading only.)

**10J. Master Authors in World Literature; Flaubert, Twain, Turgenev, Galdós, Ibsen (2)**

Lecture/discussion—1 hour. Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Flaubert, Twain, Turgenev, Galdós, Ibsen. May be repeated for credit in different subject area. (P/NP grading only.)

**10K. Master Authors in World Literature; Balzac, Dostoevski/Tolstoi, Hardy, Shaw, Strindberg (2)**

Lecture/discussion—1 hour. Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Balzac, Dostoevski/Tolstoi, Hardy, Shaw, Strindberg. May be repeated for credit in different subject area. (P/NP grading only.)

**10L. Master Authors in World Literature; Unamuno, Svevo, Conrad, Gide, Kafka, Faulkner (2)**

Lecture/discussion—1 hour. Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Unamuno, Svevo, Conrad, Gide, Kafka, Faulkner. May be repeated for credit in different subject area. (P/NP grading only.)

**10M. Master Authors in World Literature; Rilke/Yeats, Joyce/Woolf, Mann/Céline, Bulgakov/Tanizaki, O'Neill/Brecht, Lorca/Pirandello (2)**

Lecture/discussion—1 hour. Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Rilke/Yeats, Joyce/Woolf, Mann/Céline, Bulgakov/Tanizaki, O'Neill/Brecht, Lorca/Pirandello. May be repeated for credit in different subject area. (P/NP grading only.)

**10N. Master Authors in World Literature; Camus/Sartre, García Márquez/Grass, Borges/Sarrate, Bellow/Nabokov, Beckett/Pinter, Genet/Dürrenmatt (2)**

Lecture/discussion—1 hour. Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Camus/Sartre, García Márquez/Grass, Borges/Sarrate, Bellow/Nabokov, Beckett/Pinter, Genet/Dürrenmatt. May be repeated for credit in different subject area. (P/NP grading only.)

**11. Travel and the Modern World (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: completion of entry level writing requirement. Examination of travel as a quintessential human activity and experience of global modernity and cross-cultural encounters from the 18th to the 21st century with an emphasis on German-speaking culture. Travelogues, literature, art, memoirs, and films in English translation. (Same course as German 11.) GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—F, W, S. (F, W, S.) Zhang

**12. Introduction to Women Writers (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: completion of entry level writing requirement. Survey of fiction, drama, and poetry by women writers from all continents. Concerns of women compared in light of their varied social and cultural traditions. Literary analysis of voice, imagery, narrative strategies and diction. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Lokke

**13. Dramatic Literature (3)**

Lecture—3 hours. Prerequisite: completion of entry level writing requirement. Introduction, through careful reading of selected plays, to some of the major forms of Western drama, from the earliest tragedies of ancient Greece to the contemporary American theater. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

**14. Introduction to Poetry (3)**

Lecture/discussion—3 hours. Prerequisite: completion of entry level writing requirement. Comparative study of poetry in a variety of lyric and other poetic forms from different historical periods and different linguistic, national, and cultural traditions. GE credit: ArtHum, Wrt | AH, WC, WE.

**20. Humans and the Natural World (4)**

Lecture/discussion—3 hours; term paper. Changing relationship between humans and the natural environment in ancient and modern authors as Virgil, Li Po, Basho, Darwin, and Thoreau. GE credit: ArtHum, Wrt | AH, WC, WE.

**24. Animals in Literature (4)**

Lecture—3 hours; term paper or discussion. Prerequisite: completion of Entry Level Writing Requirement. Study of literary texts from various periods and cultures whose theme is the representation of animals. GE credit: ArtHum | AH, WC, WE.—Schiesari

**25. Ethnic Minority Writers in World Literature (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: ELWR (Entry Level Writing Requirement). Consideration of a broad range of writers who speak from an ethnic perspective different from the nominally or politically dominant culture of their respective countries and who explore the challenges faced by characters significantly affected by their ethnic minority status. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

**53A. Literature of East Asia (4)**

Lecture—3 hours; term paper. Introduction to representative masterpieces of East Asia with readings from such works as The Story of the Stone, The Peach Blossom Fan, T'ang and Sung poetry, classical Japanese poetry, drama, and travel diaries, and The Tale of Genji. GE credit: ArtHum, Div, Wrt | AH, OL, WC, WE.

**53B. Literature of South Asia (4)**

Lecture—3 hours; term paper. Introduction to representative masterpieces of South Asia with readings from such works as the Mahabharata and

Ramayana, The Cloud Messenger, Shakuntala, The Little Clay Cart, and the stories and poems of both ancient and modern India and Southeast Asia. GE credit: ArtHum, Div, Wrt | AH, OL, WC, WE.—Schilddgen

**53C. Literatures of the Islamic World (4)**

Lecture—3 hours; term paper. Introduction to classical Islamic culture through translations of literature primarily from Arabic and Persian, as well as other languages. Topics include the concept of the self, society and power, spirituality, the natural world, the cosmos, and the supernatural. GE credit: ArtHum, Div, Wrt | AH, OL, WC, WE.—Sharlet

**90X. Lower Division Seminar (1-2)**

Seminar—1-4 hours. Prerequisite: consent of instructor. Examination of a special topic in a small group setting.

**98. Directed Group Study (1-5)**

Restricted to lower division students. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**  
(P/NP grading only.)

**Upper Division**

**100. World Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: upper-division standing, or consent of instructor. A comparative, cross-cultural study of a topic, theme, or movement in world cinema beyond the boundary of a single national tradition. Topics may include "postsocialist cinemas in East Europe and Asia," "cinema and globalization," and "popular Asian cinemas." May be repeated three times for credit when topics differ. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Lu

**110. Hong Kong Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: upper-division standing, or consent of instructor. Hong Kong cinema, its history, industry, styles, genres, directors, and stars. Special attention to its polyglot, multicultural, transnational, colonial, and postcolonial environment. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Lu

**120. Writing Nature: 1750 to the Present (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. Study of representations, descriptions, and discussions of humankind's problematical relationship with the non-human world in texts written in a variety of European and American traditions between 1750 and the present. GE credit: ArtHum, Wrt | AH, WC, WE.—S. (S.)

**135. Women Writers (4)**

Lecture/discussion—3 hours; term paper. An exploration of women's differing views of self and society as revealed in major works by female authors of various times and cultures. Readings, principally of fiction, will include such writers as Lady Murasaki, Mme de Lafayette, and Charlotte Bronte. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Lokke, Schiesari

**138. Gender and Interpretation in the Renaissance (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. Critical analysis of Renaissance texts with primary focus on issues such as human dignity, education and gender politics; "high" and "low" culture and its relation to literary practices. (Same course as Italian 141.) GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Schiesari

**139. Shakespeare and the Classical World (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. Shakespeare's representations of the classical world in the light of selected ancient texts and Renaissance conceptions of Antiquity, with special attention to the depiction of politics and history. GE credit: ArtHum | AH, WC, WE.—Schein

**140. Thematic and Structural Study of Literature (4)**

Lecture/discussion—3 hours; term paper. Interpretation of selected works illustrating the historical evolution of themes, as well as of formal and structural elements. May be repeated for credit when substance of course varies. GE credit: ArtHum, Wrt | AH, WE.

**141. Introduction to Comparative Critical Theory (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. Introduction to comparative critical theory and its use for interpreting literary texts, film, and media forms in global culture. (Same course as Critical Theory 101.) GE credit: ArtHum, Wrt | AH, WC, WE.—S. (S.) Larsen

**142. Critical Reading and Analysis (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Close reading of selected texts; scrutiny of very limited amount of material, with attention to the problems of texts in translation. GE credit: ArtHum | AH, WC, WE.

**144. The Grotesque (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. Study of the “grotesque” in selected texts from the Renaissance to the 20th century, with attention to the “grotesque” as a means of social, cultural, and political commentary, as well as of aesthetic innovation. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE.—S. (S.)

**145. Representations of the City (4)**

Lecture—2 hours; discussion—1 hour; writing. Exploration of the representation of the city in major translated literary texts from a variety of literary traditions and periods. Emphasis on the diversity of urban experience in literature. Topics include public and private space, memory, and gender. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Radwan, Sharlet

**146. Myth in Literature (4)**

Lecture—3 hours; term paper. Prerequisite: course 6 recommended. Comparative study of different versions of one or more central myths, with attention to their cultural settings, artistic and literary forms of representation, as well as to their psychological dimensions. GE credit: ArtHum, Wrt | AH, WC, WE.

**147. Modern Jewish Writers (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. Problems of the modern Jewish experience from the perspective of the writer’s construction of the self in relation to the future and to the non-Jew. Draws upon Russian, German, Yiddish, and American traditions. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

**148. Mystical Literatures of South Asia and the Middle East (4)**

Lecture/discussion—3 hours; term paper. Exploration of the comparative mystical literatures of major religious traditions, with a focus on those produced in South Asia and the Middle East, although including other traditions. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Venkatesan

**151. Colonial and Postcolonial Experience in Literature (4)**

Lecture—3 hours; term paper. Prerequisite: completion of entry level writing requirement. A literary introduction to the cultural issues of colonialism and postcolonialism through reading, discussing and writing on narratives which articulate diverse points of view. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Larsen

**152. Literature of the Americas (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. Study of the various stylistic, historical, social and cultural factors that contribute to a hemispheric vision of American literature, encompassing works by Canadian, United States, Caribbean, Brazilian, and Spanish-American writers. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

**152S. Literature of the Americas (Taught in Latin America) (4)**

Lecture/discussion—6 hours; term paper; field-work—6 hours. Prerequisite: completion of entry level writing requirement. Various stylistic, historical, social, and cultural factors that contribute to a hemispheric vision of American literature, encompassing works by Canadian, United States, Caribbean, Brazilian, and Spanish-American writers. Course taught abroad. May be repeated one time for credit. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Larsen

**153. The Forms of Asian Literature (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. Introduction to distinctive Asian literary forms, such as haiku, noh, the Chinese novel and tale, through reading of major works. Comparison with Western genres and study of native and Western critical traditions. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

**154. African Literature (4)**

Lecture—3 hours; term paper. Prerequisite: completion of Entry Level Writing Requirement (ELWR). Colonial and post-colonial sub-Saharan African literature and the African oral traditions from which it emerged. Genres and themes of African literature from the nineteenth century to the present. GE credit: ArtHum | AH, OL, WC, WE.—Adejumobi

**155. Classical Literatures of the Islamic World 600-1900 (4)**

Lecture—3 hours; term paper. Major texts from Arabic, Persian, Ottoman Turkish and Urdu literature with attention to historical and cross-cultural context. Includes epic, romance, various genres of lyric poetry, fairy tales, historical and religious stories, mystical and philosophical narratives, and essays. GE credit: ArtHum, Div, Wrt | AH, OL, WC, WE.—Sharlet

**156. The Ramayana (4)**

Lecture—3 hours; term paper. Exploration of the Indian epic, Ramayana, through the lens of literature, performance, and visual art. Emphasis on the text’s diversity and its contemporary global relevance. Topics include Ramayanas in Southeast Asia, and in various South Asian diaspora communities. (Same course as Religious Studies 158.) GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Venkatesan

**157. War and Peace in Literature (4)**

Lecture/discussion—3 hours; term papers. Prerequisite: course 1, 2, or 3, or consent of instructor. Through study of a few major works from Western and non-Western literature the course seeks to illuminate the way in which literature from antiquity to the present has dealt with the antinomy peace/war through the ages. GE credit: ArtHum, Wrt | AH, WC, WE.—Radwan

**158. The Detective Story as Literature (4)**

Lecture—3 hours; term paper. Study of the origins, literary and social background, development and implications of the literature of detection in a comparative context. GE credit: ArtHum, Wrt | AH, WC, WE.

**159. Women in Literature (4)**

Lecture—3 hours; term paper. Prerequisite: course 1, 2, 3, or 4 or the equivalent recommended. Portrayals of women in literature, comparing selected heroines who represent a particular theme, period, or genre. Texts range around the globe and from ancient to modern works, such as Lysistrata, Emma, Hedda Gabler, The Makioka Sisters, and Top Girls. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

**160A. The Modern Novel (4)**

Lecture/discussion—3 hours; term paper. The changing image of man and his world as seen in novels by such writers as Joyce, Proust, and Mann. GE credit: ArtHum, Wrt | AH, WC, WE.

**160B. The Modern Drama (4)**

Lecture/discussion—3 hours; term paper. Readings in representative authors such as Ibsen, Strindberg, Chekhov, Pirandello and Brecht. GE credit: ArtHum, Wrt | AH, WC, WE.—Finney

**161A. Tragedy (4)**

Lecture/discussion—3 hours; term paper. Persistent and changing aspects of the tragic vision in literature from ancient times to the present. GE credit: ArtHum, Wrt | AH, WC, WE.

**161B. Comedy (4)**

Lecture/discussion—3 hours; term paper. Comic attitudes towards life in literary works of different ages. GE credit: ArtHum, Wrt | AH, WC, WE.

**162. Writing Love and War in South Asia (4)**

Lecture—3 hours; term paper. Comparative study of the themes and motifs of love and war in the literature of South Asia. Includes a discussion of Sanskrit epics, classical erotic court poetry, medieval heroic poetry, mystical compositions and colonial and post-colonial fiction. GE credit: ArtHum | AH, WC, OL, WE.—Venkatesan

**163. Biography and Autobiography (4)**

Lecture/discussion—3 hours; term paper. Portrayals of a human life in biographies and/or autobiographies of different countries and ages. GE credit: ArtHum, Wrt | AH, WC, WE.

**164A. The European Middle Ages (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. Medieval literary genres as the foundation for modern literary forms. Topics and themes as love, God, vision, nature, history and politics, and sign theory. GE credit: ArtHum, Wrt | AH, WC, WE.—Schildgen

**164B. The Renaissance (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. Literature, new science, gender, politics, and exploration in European Renaissance. Readings in Petrarch, Machiavelli, Montaigne, Tasso, Ariosto, Stampa, Shakespeare, Labé and Aphra Behn. GE credit: ArtHum, Wrt | AH, WC, WE.—Schiesari

**164C. Baroque and Neoclassicism (4)**

Lecture/discussion—3 hours; term paper. Readings in major authors such as Calderón, Corneille, Pascal, Racine, Milton, and Grimmelshausen, with consideration of the tension between the expansive energies of the “baroque” and the restraints of dogma and reason. GE credit: ArtHum, Wrt | AH, WC, WE.

**164D. The Enlightenment (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. Enlightenment writers such as Swift, Voltaire, Sterne, Rousseau, Wollstonecraft, and Kant. Emphasis on the revolutionary impact of eighteenth-century philosophical ideas and literary forms on modern political, social, and aesthetic culture. GE credit: ArtHum, Wrt | AH, WC, WE.—Uhlig

**165. Caribbean Literatures (4)**

Lecture/discussion—4 hours. Prerequisite: completion of entry level writing requirement. Comparative approach to the multi-lingual, multi-cultural literatures of the Caribbean. Works from English, French, and Spanish speaking regions with special attention to problems of identity, diaspora and resistance, class, gender, race. Not open for credit to students who have completed course 165S. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

**165S. Caribbean Literatures (4)**

Lecture/discussion—4 hours. Prerequisite: upper division standing. Comparative approach to the multi-lingual, multi-cultural literatures of the Caribbean. Works from English, French, and Spanish speaking regions with special attention to problems of identity, diaspora and resistance, class, gender, race. Taught at the University of Havana, Cuba. Not open for credit to students who have completed course 165. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

**166. Literatures of the Modern Middle East (4)**

Lecture/discussion—3 hours; term paper. Major translated works in modern Middle Eastern and North African literature, including Arabic, Hebrew, Persian, and Turkish. Social and historical formation,

with topics such as conflict and coexistence, journeys, and displaced people, gender and family. GE credit: ArtHum, Wrt | AH, WC, WE. —Sharlet

#### **166A. The Epic (4)**

Lecture/discussion—3 hours; term paper. Study of various forms of epic poetry in both the oral and literary traditions. May be repeated for credit in different subject area. GE credit: ArtHum, Wrt | AH, WC, WE.

#### **166B. The Novel (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. The novel as global genre: picaresque, epistolary, Bildungsroman, historical novel, contemporary forms. May be repeated one time for credit. GE credit: ArtHum, Wrt | AH, WC, WE.

#### **167. Comparative Study of Major Authors (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Pivotal works of artists in the Western mainstream, such as Dante, Shakespeare, Cervantes, Goethe, Tolstoi, Proust, and Joyce. GE credit: ArtHum, Wrt | AH, WC, WE.

#### **168A. Romanticism (4)**

Discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. Introduction to the Romantic movement with emphasis upon Romantic concepts of the self, irony, love, the imagination and artistic creativity, and the relationship of the individual to nature and society. GE credit: ArtHum, Wrt | AH, WC, WE. —Lokke

#### **168B. Realism and Naturalism (4)**

Discussion—3 hours; term paper. Prerequisite: consent of instructor. Novels and plays by Dickens, Zola, Flaubert, Dreiser, Ibsen, and Strindberg investigate marriage and adultery, the city and its perils, the hardships of industrialization, the war between the sexes, the New Woman, and other 19th-century themes. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE. —Finney

#### **169. The Avant-Garde (4)**

Lecture/discussion—3 hours; term paper. Studies in movements such as surrealism, expressionism and the absurd. GE credit: ArtHum, Wrt | AH, WE.

#### **170. The Contemporary Novel (4)**

Lecture—3 hours; term paper. Study of important novels from different parts of the world, including Asia, Africa, Latin America, Europe, and the United States, in the period from the Second World War to the present. GE credit: ArtHum, Wrt | AH, WC, WE.

#### **172. A Story for a Life: The Arabian Nights (4)**

Lecture/discussion—3 hours; term paper. In-depth exploration of The Arabian Nights, the best-known work of pre-modern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature. (Same course as Arabic 140 and Middle East/South Asia Studies 121C.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE. —Radwan, Sharlet

#### **175. Shahnameh: The Persian Book of Kings (4)**

Lecture/discussion—3 hours; term paper. In-depth analysis of the Persian Book of Kings (Shahnameh) by Abu al-Qasim Ferdowsi (d. 1020 CE) in its historical context with a comparative perspective on the role of this work in Persian and world literature. (Same course as Middle East/South Asian Studies 121A.) GE credit: ArtHum, Div, Wrt | AH, WC, WE. —Anooshahr, Sharlet

#### **180. Selected Topics in Comparative Literature (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of Subject A requirement and at least one course in literature. Study of a selected topic or topics appropriate to student and faculty interests and areas of specialization of the instructor. May be repeated one time for credit when the topic differs. GE credit: ArtHum, Wrt | AH, WC, WE.

#### **180S. Selected Topics in Comparative Literature (Taught Abroad) (4)**

Lecture/discussion—6 hours; extensive writing; field-work—6 hours. Prerequisite: Subject A; at least one course in literature, or consent of instructor. Study of selected topics appropriate to student and faculty interests and areas of specialization of the instructor. May be repeated one time for credit when topic differs. Offered irregularly. GE credit: ArtHum, Wrt | AH, WC, WE. —Su.

#### **192. Internship in Comparative Literature (1-12)**

Internship—1-12 hours. Prerequisite: completion of 84 units; consent of instructor. Restricted to Comparative Literature majors. Internships in fields where students can practice their skills. May be repeated up to 12 units for credit. (P/NP grading only.)

#### **194H. Special Study for Honors Students (1-5)**

Independent study—1-5 hours. Prerequisite: open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a comparative topic. May be repeated for credit. (P/NP grading only.) GE credit: AH, WE.

#### **195. Seminar in Comparative Literature (4)**

Seminar—3 hours; term paper. Prerequisite: senior standing as a Comparative Literature major or minor or consent of instructor. Open only to Comparative Literature majors or minors or in consent of instructor. Advanced study of selected topics and texts in Comparative Literature, with explicit emphasis on the theoretical and interpretive approaches that define Comparative Literature as a discipline and distinguish it from other literary disciplines. Required for the major. GE credit: ArtHum | AH, WE.

#### **197T. Tutoring in Comparative Literature (1-5)**

Discussion—2-4 hours. Prerequisite: upper division standing with declared major in Comparative Literature. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with current courses offered by Comparative Literature. May be repeated for credit for a total of 6 units. (P/NP grading only.)

#### **198. Directed Group Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

#### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

#### **Graduate**

#### **210. Topics and Themes in Comparative Literature (4)**

Discussion—3 hours; term paper. Prerequisite: graduate standing in Comparative Literature, English, or a foreign-language literature, or consent of instructor. Comparative, interpretive study of the treatment of specific topics and themes in literary works from various periods, societies, and cultures, in light of these works' historical and sociocultural contexts. May be repeated for credit when topic differs.

#### **214. Approaches to Lyric Poetry (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Analysis and interpretation of poetic texts in different historical periods and national literatures, with consideration of major theoretical developments in the understanding of poetic discourse. Offered irregularly. —Schiesari

#### **215. Forms of the Spiritual Quest (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor; knowledge of at least one foreign language. An exploration, culminating in a research paper, of changing forms of the quest for transcendence in different cultures, mainly in major works of Western literature, but also in other traditions and from the perspectives of other disciplines. Offered irregularly.

#### **220. Literary Genres (4)**

Discussion—3 hours; term paper. Prerequisite: graduate standing in Comparative Literature, English, or a foreign-language literature, or consent of instructor. Comparative literature of major works in a particular genre from various linguistic, national, and cultural traditions, with particular attention to historical developments within the genre and to genre theory. May be repeated for credit when topic differs. Offered irregularly.

#### **238. Gender and Interpretation (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of how literary texts from different periods, societies, and cultures represent gender roles and gender hierarchy, building on recent work on gender in anthropology, literature, psychology, and women's studies. Offered irregularly.

#### **250A. Research in Primary Literature (4)**

Project. Individually guided research in the primary literature of concentration, under the supervision of a faculty member culminating in a conference paper. Required of M.A. and Ph.D. candidates.

#### **250B. Research in Second Literature (4)**

Project. Individually guided research in the second-year literature of concentration, under the supervision of a faculty member, culminating in a paper. Required of Ph.D. candidates.

#### **250C. Research in Third Literature or Special Topic (4)**

Conference—1 hour; term paper; independent study—8 hours. Individually guided research, under the supervision of a faculty member, in the third literature of concentration or on a special topic culminating in a paper. Required of Ph.D. candidates.

#### **250D. Dissertation Prospectus (4)**

Independent study. Individually guided writing of the dissertation prospectus under supervision of a faculty member. Must be taken prior to completion of the qualifying exam. Required of Ph.D. candidates. Offered irregularly. (S/U grading only.)

#### **255. Proseminar: Comparative Literature: Past, Present, Future (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Restricted to graduate students. History, theory, and methodology of comparative literature. Issues of national literature, world literature, and comparative literature. Relation of comparative literature to other disciplines and diverse expressions. Discussion of current problems in teaching and research in comparative literature. Required for MA/PhD.—F, S. (F, S.)

#### **260. Contexts of the 19th-Century Novel (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Development in 19th-century history, culture, and society in relation to major trends in the 19th-century novel. Offered irregularly.

#### **297. Directed Independent Study in Primary, Secondary, or Third Literature (4)**

Conference—1 hour; term paper; independent study—8 hours. Prerequisite: consent of instructor. Restricted to graduate students. Directed Independent Study in Primary, Secondary, or Third Literature culminating in term paper. Only for languages with no graduate course offerings. May be repeated for credit when no seminars are available and topic differs. —F, W, S. (F, W, S.)

#### **298. Directed Group Study (1-5)**

Prerequisite: graduate standing. (S/U grading only.)

#### **299. Individual Study (1-12)**

(S/U grading only.)

#### **299D. Special Study for the Doctoral Dissertation (1-12)**

(S/U grading only.)

## Professional

### 390. Teaching Comparative Literature in College (4)

Lecture—2 hours; discussion—2 hours. Prerequisite: appointment as a Comparative Literature Associate Instructor or consent of instructor. Restricted to graduate students. Discussion of the theory and practice of teaching composition at the college level in a department of comparative literature in relation to the major cultural and social developments and with specific application to the introductory courses 1, 2, 3, 4. (S/U grading only.)—F, W, S. (F, W, S.)

### 392. Teaching Internship in Comparative Literature (2)

Discussion—2 hours. Restricted to graduate students. Regular consultations between the student instructor teaching Comparative Literature courses and a supervisor. Specifically designed for first-time TAs in COM 5, 6, 7, and 10. Instruction in the teaching of writing in a literature course, grading of papers, leading discussions. (S/U grading only.)—F, W, S. (F, W, S.)

### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Computer Science

**See Computer Science, on page 230; Computer Science (A Graduate Group), on page 230; Engineering: Computer Science, on page 288; and Engineering: Electrical and Computer Engineering, on page 295.**

## Computer Science

(College of Letters and Science)

Nina Amenta, Ph.D., Chairperson of the Department

**Department Office.** 2063 Kemper Hall  
530-752-7004; <http://www.cs.ucdavis.edu>

**Faculty.** For complete faculty listing, please see Engineering: Computer Science, on page 288.

### The Major Program

The Department of Computer Science administers two majors: Computer Science and Engineering (CSE), in the College of Engineering, and Computer Science (CS), in the College of Letters and Science. It also administers two minors: Computer Science, in the College of Letters and Science, and Computational Biology, in the College of Engineering. For information on the Computer Science and Engineering curriculum and the minor in Computational Biology, see Engineering: Computer Science, on page 288.

The primary differences between the CSE and CS majors are the extent of hardware coverage and curricular flexibility. The CSE major develops a solid understanding of the entire machine, including hands-on experience with its hardware components. The CS major teaches some hardware, at the digital design level, on simulators. The CSE major has fewer free electives. The CS major's more generous electives make it easier to complete a minor or double major.

Students in the CS major receive a solid grounding in the fundamentals of computer languages, operating systems, computer architecture, and the mathematical abstractions underpinning computer science. Students are prepared for both industry and post-graduate study.

### B.S. Major Requirements:

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>50-55</b>
Mathematics 21A-21B-21C; 22A or 67.....	15-16
Computer Science Engineering 20, 30, 40, 60.....	16
Computer Science Engineering 50 or Electrical and Computer Engineering 70 ... 4 One series from the following four.....	15-19
(a) Chemistry 2A-2B-2C	
(b) Chemistry 2A-2B and Biological Sciences 2A	
(c) Chemistry 2AH-2BH-2CH	
(d) Physics 9A-9B-9C and Mathematics 21D	
<b>Depth Subject Matter .....</b>	<b>51-54</b>
Computer Science Engineering 122A, 120 or 122B, 140A, 150, 154A .....	20
Computer Science Engineering 132 or Mathematics 135A or Statistics 131A .... 4	
Computer Science electives .....	27-30
Minimum of 7 courses, including at least one mathematics or statistics course, from: Computer Science Engineering courses numbered between 120 and 189 inclusive; Computer Science and Engineering 193AB (counts as one); one approved course of 3 or 4 units from Computer Science and Engineering 192 or 199; Electrical and Computer Engineering 171, 172, 180A, 180B; Linguistics 177; Mathematics courses numbered between 100 and 189, excluding Mathematics 111; Statistics 131A, 131B. <b>No course can count as both a required course and a Computer Science elective.</b>	

### Total Units for the Major ..... 101-109

**Major Advisers.** M. Farrens, V. Filkov, D. Ghosal, P. Koehl, N. Matloff, M. Neff, P. Koehl, P. Rogaway

### Minor Program Requirements:

	UNITS
<b>Computer Science.....</b>	<b>24</b>

Computer Science Engineering 60 ..... 4  
Upper division Computer Science Engineering courses ..... 20 |

Select any upper-division Computer Science Engineering courses. A single approved course of 3 or 4 units from Computer Science and Engineering 192 or 199 is allowed.

Note. Computer Science Engineering 60 has a prerequisite chain of 20, 30, 40 and Mathematics 16A or 21A.

**Note.** The minor program has prerequisites of Computer Science Engineering 20, 30, and 40, and Mathematics 16A or 21A.

**Graduate Study.** See *Graduate Studies*, on page 120.

## Computer Science (A Graduate Group)

Kwan-Liu Ma, Ph.D., Chairperson of the Group

**Group Office.** 2063 Engineering II (Department of Computer Science)  
530-752-7004; [gradinfocs@ucdavis.edu](mailto:gradinfocs@ucdavis.edu); <http://www.cs.ucdavis.edu>

### Faculty

Venkatesh Akella, Ph.D., Professor (*Electrical and Computer Engineering*)  
Nina Amenta, Ph.D., Professor, Chair (*Computer Science*)  
Zhaojun Bai, Ph.D., Professor (*Computer Science*)  
Matthew Bishop, Ph.D., Professor (*Computer Science*)  
Hemant Bhargava, Ph.D., Professor (*Graduate School of Management*)

Hao Chen, Ph.D., Associate Professor (*Computer Science*)

Harry Cheng, Ph.D., Professor (*Mechanical and Aerospace Engineering*)

R. Holland Cheng, Ph.D., Professor (*Molecular and Cellular Biology*)

Chen-Nee Chuah, Ph.D., Assistant Professor (*Electrical and Computer Engineering*)

James P. Crutchfield, Ph.D., Professor (*Physics*)  
Ian Davidson, Ph.D., Professor (*Computer Science*)

Jesus M. D'Souza, Ph.D., Professor (*Mechanical and Aerospace Engineering*)

Raissa M. D'Souza, Ph.D., Assistant Professor (*Mechanical and Aerospace Engineering*)

Jesu DeLoera, Ph.D., Professor (*Mathematics*)

Prem Devanbu, Ph.D., Professor (*Computer Science*)

Matthew Farrells, Ph.D., Professor (*Computer Science*)

Robert Faris, Ph.D., Associate Professor (*Sociology*)  
Vladimir Filkov, Ph.D., Associate Professor (*Computer Science*)

Matthew Franklin, Ph.D., Professor (*Computer Science*)

Dipak Ghosal, Ph.D., Professor (*Computer Science*)

Todd J. Green, Ph.D., Assistant Professor (*Computer Science*)

Daniel Gusfield, Ph.D., Professor (*Computer Science*)

Francois Gygi, Ph.D., Professor (*Computer Science*)

Bernd Hamann, Ph.D., Professor (*Computer Science*)

Michael Hogarth, Ph.D., Professor (*School of Medicine*)

Greta Hsu, Ph.D., Associate Professor (*Graduate School of Management*)

Sanjay Joshi, Ph.D., Associate Professor (*Mechanical and Aerospace Engineering*)

Louise Kellogg, Ph.D., Professor (*Geology*)

Patrice Koehl, Ph.D., Professor (*Computer Science*)

Mathias Koeppe, Ph.D., Professor (*Mathematics*)

Karl Levitt, Ph.D., Professor (*Computer Science*)

Xin Liu, Ph.D., Associate Professor (*Computer Science*)

Kwan-Liu Ma, Ph.D., Professor (*Computer Science*)

Norman Matloff, Ph.D., Professor (*Computer Science*)

Nelson Max, Ph.D., Professor (*Computer Science*)

Deb Niemeier, Ph.D., Professor (*Civil and Environmental Engineering*)

Prasant Mohapatra, Ph.D., Professor (*Computer Science*)

Biswanath Mukherjee, Ph.D., Professor (*Computer Science*) *Distinguished Graduate Mentoring Award*

Michael Neff, Ph.D., Associate Professor (*Computer Science*)

Ronald Olsson, Ph.D., Professor (*Computer Science*)

John Owens, Ph.D., Assistant Professor (*Electrical and Computer Engineering*)

Raju Pandey, Ph.D., Associate Professor (*Computer Science*)

Sean Peisert, Ph.D., Assistant Adjunct Professor (*Computer Science*)

Bahram Ravani, Ph.D., Professor (*Mechanical and Aerospace Engineering*)

Robert Redinbo, Ph.D., Professor (*Electrical and Computer Engineering*)

David Rocke, Ph.D., Professor (*Applied Science*)

Garry Rodrigue, Ph.D., Professor (*Applied Science*)

Phillip Rogaway, Ph.D., Professor (*Computer Science*)

Kenneth Shackel, Ph.D., Professor (*Plant Sciences*)

David Slaughter, Ph.D., Professor (*Biological and Agricultural Engineering*)

Zhendong Su, Ph.D., Associate Professor (*Computer Science*)

Ilias Tagkopoulos, Ph.D., Associate Professor (*Computer Science*)

Susan Ustin, Ph.D., Professor (*Land, Air and Water Resources*)

S. Felix Wu, Ph.D., Professor (*Computer Science*)

Rao Vemuri, Ph.D., Professor (*Applied Science*)

Kent Wilken, Ph.D., Professor  
(*Electrical and Computer Engineering*)  
David Woodruff, Ph.D., Professor  
(*Graduate School of Management*)  
Catherine Yang, Ph.D., Associate Professor  
(*Graduate School of Management*)  
Ben Yoo, Ph.D., Professor  
(*Electrical and Computer Engineering*)

### Emeriti Faculty

Ralph Algazzi, Ph.D., Professor Emeritus  
Kenneth Joy, Ph.D., Professor Emeritus  
Peter Linz, Ph.D., Professor Emeritus  
Charles Martel, Ph.D., Professor Emeritus  
E.O. Milton, Ph.D., Professor Emeritus  
Raju Pandey, Ph.D., Associate Professor Emeritus  
Michael Soderstrand, Ph.D., Professor Emeritus  
Donald Topkis, Ph.D., Professor Emeritus  
Richard Walters, Ph.D., Professor Emeritus

### Affiliated Faculty

Sean Peisert, Ph.D., Adjunct Associate Professor  
(*Computer Science*)

**Graduate Study.** The Graduate Group in Computer Science offers programs of study leading to the M.S. and Ph.D. degrees in Computer Science. The varied nature of the faculty brings a wide variety of research interests to the program. Research strengths lie in algorithms, computational biology, computer architecture, computer graphics and visualization, database systems, computer security and cryptography, computer networks, program specifications and verification, programming languages and compilers, parallel and distributed systems, scientific computation, and software engineering. Interdisciplinary research in computer science is encouraged.

**Preparation.** Normal preparation for the program is a bachelor's degree in either computer science or in a closely related field (such as electrical engineering or mathematics, with substantial course work in computer science). Applications are also considered from students with outstanding records in other disciplines. M.S. students may either complete a thesis or pass a comprehensive examination. Ph.D. students must pass a qualifying oral examination and complete a dissertation demonstrating original research in an area approved by the Graduate Group.

**Graduate Advisers.** P. Devanbu, M. Farrens, D. Ghosal, V. Filkov, P. Rogaway

## Conservation Biology

See **Ecology (A Graduate Group), on page 250; and Wildlife, Fish, and Conservation Biology, on page 587.**

## Consumer Science

(College of Agricultural and Environmental Sciences)

**Faculty.** See under the Division of *Textiles and Clothing*, on page 567.

**Major Programs.** The Consumer Food Science option under the Food Science major is a related program. See also *Food Science and Technology*, on page 340, *Nutrition*, on page 490, and *Textiles and Clothing*, on page 567.

**Graduate Study.** For graduate study, see *Graduate Studies*, on page 120.

### Courses in Consumer Science (CNS)

Questions pertaining to the following courses should be directed to the Division of Textiles and Clothing Advising office in 1204 RMI south or 129 Everson Hall.

### Lower Division

#### 92. Internship in Consumer Science (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Internship on and off campus in a consumer science related area. (P/NP grading only.)

### Upper Division

#### 100. Consumer Behavior (3)

Lecture—3 hours. Prerequisite: preparation in areas of psychology or sociology and economics recommended. Provides a set of behavioral concepts and theories useful in understanding consumer behavior on the part of the individual, business, and social organizations. Conceptual models to help guide and understand consumer research will be presented. GE credit: SocSci, Div, Wrt | SS, WE.

#### 192. Internship in Consumer Science (1-12)

Internship—3-36 hours. Prerequisite: completion of a minimum of 84 units; consent of instructor. Internship on and off campus in a consumer science related area. (P/NP grading only.)

#### 198. Directed Group Study (1-5)

(P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

### Graduate

#### 299. Research (1-12)

(S/U grading only.)

### Professional

#### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## Contemporary Leadership

(College of Agricultural and Environmental Sciences)

The Science and Society Program offers a minor in Contemporary Leadership, open to all undergraduate students regardless of major. The minor provides a broad overview of leadership theory and practice, and engages students in critical thinking, self-reflection, problem solving and multicultural education. Students should contact the minor adviser for course selection and plan approval.

Consult advisers often to insure timely enrollment in Science and Society 192 and 190X as courses with fewer than ten students will not be taught.

### Minor Program Requirements:

	UNITS
--	-------

#### Contemporary Leadership ..... 24

##### Core Leadership Courses

Science and Society 130 .....	4
Science and Society 192 (must be taken concurrently with an approved internship) .....	2
Science and Society 190X.....	2

##### Preparatory Subject Matter

Students are required to complete four units from each of the following four categories. All courses are four units unless specified in parentheses:

<i>Ethics and Values:</i> Animal Science 170, Computer Science 188 (3), English 107, Environmental Science and Policy 164 (3), Nature and Culture 120, Philosophy 115, 116, 117, Psychology 175 .....	4
<i>Communication, Interpersonal Relationships and Human Dynamics:</i> Anthropology 139AN, Communication 134, 135, 136, Community and Regional Development 172, 174, Linguistics 163, Psychology 151, Sociology 126, 132, University Writing Program 104 (A-F) .....	4

### Organization Structure and Cultures:

American Studies 125, Anthropology 105, 123BN, Community and Regional Development 152, 154, 158, 164, Sociology 30A (3), 156, 180A, 180B, 183, Women's Studies 140.....	4
<i>Multiculturalism, the Global Community and Social Change:</i> American Studies 133, 153, 156, Community and Regional Development 176, English 179, History 173, 178A, 178B, Native American Studies 134, Political Science 124, 125, 130, Textiles and Clothing 174.....	4

**Minor Adviser.** The list of appropriate courses changes over time. Consult Elvira Galvan Hack in Science and Society (*Plant Pathology*) to request an advising appointment at [eghack@ucdavis.edu](mailto:eghack@ucdavis.edu).

## Critical Theory

Jeff Fort, Ph.D., Chairperson of the Program

**Program Office.** 216 Sproul Hall  
530-752-5799; <http://crittheory.ucdavis.edu>

### Committee in Charge

Jeff Fort, Ph.D. (*French*)

Kathleen Frederickson, Ph.D. (*English*)

Neil Larsen, Ph.D. (*Comparative Literature*)

Kriss Ravetto-Biagioli, Ph.D.

    (*Cinema and Technocultural Studies*)

Sven-Erik Rose, Ph.D. (*German*)

Scott Shershaw, Ph.D. (*English*)

David Simpson, Ph.D. (*English*)

**Graduate Study.** The program in Critical Theory offers study and research leading to the Ph.D. with a designated emphasis in Critical Theory. The program provides theoretical emphasis and interdisciplinary perspective to students already preparing for the Ph.D. in one of 14 participating graduate programs (Anthropology, Comparative Literature, Cultural Studies, Education, English, French, German, History, Music, Psychology, Sociology, Spanish, Study of Religion, and Performance Studies). Students complete all requirements for the Ph.D., including the dissertation, in one of the participating departments. Minimum coursework for the Critical Theory Designated Emphasis consists of four courses. The first three of these, Critical Theory 200A, 200B, and 200C are taught by affiliated faculty, with 200A normally being taken first. For the fourth course, students have the option of taking another section of Critical Theory 200B or an approved course from any affiliated department.

**Graduate Adviser.** Consult Critical Theory Program office.

### Courses in Critical Theory (CRI)

#### Upper Division

##### 101. Introduction to Critical Theoretical Approaches to Literature and Culture (4)

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. Introduction to critical theory and its use for interpreting literary texts, film, and media forms in our present global culture. (Same course as Comparative Literature 141.) GE credit: ArtHum, Wrt | AH, WC, WE.—S. (S.)

#### Graduate

##### 200A. Approaches to Critical Theory (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing in a participating program. Restricted to Graduate students. Critical overview of modern theoretical texts; e.g., semiotics, hermeneutics, deconstruction, social and cultural critique, feminist theory, psychoanalysis.—F, W, S. (F, W, S.)

##### 200B. Problems in Critical Theory (4)

Seminar—3 hours; term paper. Prerequisite: graduate student standing. Restricted to Graduate students. Focused study of a particular critical theoretical approach, school or perspective. Topics

may include but are not limited to: critical approaches to the study of literature, culture, film, historiography, visual culture, the body, and aesthetics. May be repeated for credit when topic differs and with consent of instructor. —F, W, S. (F, W, S.)

#### **200C. History of Critical Theory (4)**

Seminar—3 hours; term paper. Prerequisite: graduate student standing. Restricted to Graduate students. Critical analysis and discussion of pre-twentieth century theories of literary and cultural criticism. Topics may include but are not limited to: ancient and early modern philosophy; nature and culture in the Renaissance; theories of Mimesis from antiquity to the Renaissance. May be repeated for credit when topic differs and with consent of instructor. —F, W, S. (F, W, S.)

#### **201. Critical Theory Special Topics (4)**

Seminar—3 hours; term paper. Prerequisite: graduate student standing. Application of theoretical principles to one specific research topic. May be repeated for credit with consent of instructor when topic differs. —F, W, S. (F, W, S.)

#### **202. Visual Culture (4)**

Lecture/discussion—4 hours. Restricted to Graduate student standing. Analysis of image production in the contemporary world (photography, film, television, advertising, etc.) and their effects on individual subjectivities and collective social identities. Offered irregularly. —W. (W.)

#### **298. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Restricted to Graduate student standing. —F, W, S. (F, W, S.)

#### **299. Individual Study (1-12)**

Prerequisite: graduate student standing. (S/U grading only.) —F, W, S. (F, W, S.)

## Crop Science and Management

(College of Agricultural and Environmental Sciences)

This major was discontinued as of Fall 2008; see *Plant Sciences*, on page 514.

## Cultural Studies (A Graduate Group)

Robert Irwin, Ph.D., Director of the Group

**Group Office.** 3102 Hart Hall  
530-752-2069; <http://culturalstudies.ucdavis.edu>

#### **Committee in Charge**

Marisol de la Cadena, Ph.D. (*Anthropology*)  
Maxine Craig, Ph.D. (*Gender, Sexuality, and Women's Studies*)

Omnia el Shakry, Ph.D. (*History*)

Kathleen Frederickson, Ph.D. (*English*)

Robert M. Irwin, Ph.D. (*Spanish and Portuguese*)

Caren Kaplan, Ph.D. (*American Studies, Science and Technology Studies*)

Susette Min, Ph.D. (*Asian American Studies, Art History*)

Kriss Ravello, Ph.D. (*Technocultural Studies*)

Robyn Rodriguez, Ph.D. (*Asian American Studies*)

Sudipta Sen, Ph.D. (*History*)

Elisa White, Ph.D. (*African American and African Studies*)

#### **Affiliated Faculty**

Moradewun Adejunmobi, Ph.D., Professor (*African American and African Studies*)

Ali Abooshaahr, Associate Professor (*History*)  
Mario Biagioli, Ph.D., Professor

(*School of Law; Science and Technology Studies*)

Charlotte Biltzoff, Ph.D., Assistant Professor (*American Studies, Food Science and Technology*)

Lawrence Bogad, Ph.D., Associate Professor (*Theatre and Dance*)

Ryan Cartwright, Assistant Professor (*American Studies*)

Angie Chabram, Ph.D., Professor (*Chicana/o Studies*)

Christina Cogdell, Ph.D., Associate Professor (*Design*)

Elizabeth Constable, Ph.D., Associate Professor (*Women and Gender Studies*)

Allison Coudert, Ph.D., Professor (*Religious Studies*)

Xiaomei Chen, Ph.D., Professor (*East Asian Languages and Cultures*)

Maxine Craig, Ph.D., Associate Professor (*Women and Gender Studies*)

Diana K. Davis, Ph.D., Associate Professor (*History*)

Marisol de la Cadeña, Ph.D., Associate Professor (*Anthropology, Science and Technology Studies*)

Sergio de la Mora, Ph.D., Associate Professor (*Chicana/o Studies*)

David de la Pena, Assistant Professor (*Environmental Design*)

Gregory Dobbins, Ph.D., Associate Professor (*English*)

Joseph Dumit, Ph.D., Associate Professor (*Anthropology, Science and Technology Studies*)

Tarek Elhaik, Assistant Professor (*Anthropology*)

Omnia El Shakry, Ph.D., Associate Professor (*History*)

Kriss Fallon, Assistant Professor (*Cinema and Digital Media*)

Gail Finney, Ph.D., Professor

(*Comparative Literature, German and Russian*)

Jaimey Fisher, Ph.D., Associate Professor (*Cinema and Technocultural Studies, German and Russian*)

Kathleen Frederickson, Ph.D., Assistant Professor (*English*)

Elizabeth Freeman, Ph.D., Professor (*English*)

Cristiana Giordano, Ph.D., Assistant Professor (*Anthropology*)

Laura Grindstaff, Ph.D., Professor (*Sociology*)

James Griesemer, Ph.D., Professor

(*Philosophy, Science and Technology Studies*)

Angela Harris, J.D., Professor (*School of Law*)

Danielle Heard, Ph.D., Assistant Professor (*English*)

Wendy Ho, Ph.D., Associate Professor (*Asian American Studies, Women and Gender Studies*)

Hsuan Hsu, Ph.D., Associate Professor (*English*)

Lynette Hunter, Ph.D., Professor (*Theatre and Dance*)

Robert Irwin, Ph.D., Professor

(*Spanish and Portuguese*)

Carlos Jackson, Ph.D., Assistant Professor (*Chicana/o Studies*)

Rana Jaleel, Assistant Professor

(*Gender, Sexuality and Women's Studies*)

Mark Jernig, Ph.D., Associate Professor (*English*)

Suad Joseph, Ph.D., Professor

(*Anthropology, Women and Gender Studies*)

Susan Kaiser, Ph.D., Professor (*Textiles and Clothing, Women and Gender Studies*)

Caren Kaplan, Ph.D., Professor (*American Studies, Science and Technology Studies*)

Richard Kim, Ph.D., Associate Professor (*Asian American Studies*)

Elisabeth Krimmer, Ph.D., Professor (*German and Russian*)

Patrick LaMieux, Assistant Professor (*Cinema and Digital Media*)

Neil Larsen, Ph.D., Professor

(*Comparative Literature, Critical Theory*)

Michael Lazzara, Ph.D., Associate Professor (*Spanish and Portuguese*)

Tim Lenoir, Professor (*Cinema and Digital Media*)

Sheldon Lu, Ph.D., Professor (*Comparative Literature*)

Suncaina Maira, Ph.D., Professor

(*Asian American Studies*)

Amina Mama, Ph.D., Professor

(*Women and Gender Studies*)

Desirée Martín, Ph.D., Assistant Professor (*English*)

Colin Milburn, Ph.D., Associate Professor (*English*)

Flagg Miller, Professor (*Religious Studies*)

Susette Min, Ph.D., Associate Professor

(*Asian American Studies*)

Fiamma Montezemolo, Associate Professor (*Cinema and Digital Media*)

Maceo Montoya, Assistant Professor

(*Chicana/o Studies*)

Bettina Ng'wenyo, Ph.D., Associate Professor (*African American and African Studies*)

Halifa Osumare, Ph.D., Associate Professor (*African American and African Studies*)

Ana Peluffo, Ph.D., Associate Professor (*Spanish and Portuguese*)

Sarah Perrault, Ph.D., Assistant Professor (*University Writing Program*)

Jessica Bissett Perea, Assistant Professor (*Native American Studies*)

Carolyn Thomas, Ph.D., Professor (*American Studies*)

Vaidehi Ramanathan, Ph.D., Professor (*Linguistics*)  
Kriss Ravello-Biagioli, Ph.D., Associate Professor (*Cinema and Technocultural Studies*)

Michael Rios, Ph.D., Associate Professor (*Environmental Design*)

Robyn Rodriguez, Ph.D., Associate Professor (*Asian American Studies*)

Clarissa Rojas, Assistant Professor (*Chicana/o Studies*)

Jon Rossini, Ph.D., Associate Professor (*Theatre and Dance*)

Parama Roy, Ph.D., Associate Professor (*English*)  
Margaret Rucker, Ph.D., Professor (*Textiles and Clothing*)

Simon Sadler, Ph.D., Professor (*Design*)

Suzana Sawyer, Ph.D., Associate Professor (*Anthropology*)

Sudipta Sen, Ph.D., Professor (*History*)

Scott Simon, Ph.D., Professor (*English*)

Julia Simon, Ph.D., Professor (*French and Italian*)

Eric Smoodin, Ph.D., Professor (*American Studies*)  
Maurice Stierl, Assistant Professor (*Cultural Studies*)

Madhavi Sunder, J.D., Professor (*School of Law, Science and Technology Studies*)

Julie Sze, Ph.D., Associate Professor (*American Studies*)

Grace Wang, Ph.D., Assistant Professor (*American Studies*)

Heghnar Watenpaugh, Ph.D., Associate Professor (*Art History*)

Keith Watenpaugh, Ph.D., Associate Professor (*Religious Studies*)

Evan Watkins, Ph.D., Professor (*English*)

Karen Watson-Gegeo, Ph.D., Professor (*Education*)

Elisa White, Associate Professor, African (*American and African Studies*)

Carl Whithaus, Ph.D., Associate Professor (*University Writing Program*)

Diane Wolf, Ph.D., Professor (*Sociology, Jewish Studies*)

Julie Wyman, Ph.D., Assistant Professor (*Cinema and Technocultural Studies*)

Susy J Zepeda, Assistant Professor (*Chicana/o Studies*)

Chunjie Zhang, Assistant Professor (*German and Russian*)

Li Zhang, Ph.D., Professor (*Anthropology*)

Michael Ziser, Ph.D., Associate Professor (*English*)

**Graduate Study.** The Graduate Group in Cultural Studies at UC Davis offers an interdisciplinary approach to the study of culture and society that highlights how sexuality, race, ability, citizenship, gender, nationality, class and language organize embodied identities, social relations and cultural objects. With the close guidance and supervision of a faculty committee, students in the program pursue interdisciplinary research in areas including studies of comparative and critical race, ecocriticism, fashion, queer theory, media and popular cultural representation, science and technology, Marxist theory, travel and tourism, food, physical and cognitive abilities, cultural geography, transnational culture and politics, globalization, religion, rhetoric, performance, and critical theory. Although both the Ph.D. and M.A. are offered, the majority of students are admitted to the Ph.D. program.

**Preparation.** Normal preparation for the program is a bachelor's degree in a related field. M.A. students must pass an examination. Ph.D. students must pass a qualifying examination, a comprehensive examination, and complete a dissertation demonstrating original research in an area approved by

the Graduate Group. In addition to the standard UC Davis graduate application (which requires a statement of purpose), we also require three letters of recommendation, transcripts, GRE scores, writing sample (ten-page minimum, not exceeding twenty pages), and a fellowship application.

**Graduate Advisers.** Omnia el Shakry (*History*), Caren Kaplan (*American Studies*), Kriss Ravetto (*Cinema and Technocultural Studies*), Robert M. Irwin (*Spanish and Portuguese*), Sudipta Sen (*History*)

### Courses in Cultural Studies (CST)

#### Graduate

##### 200A. Histories of Cultural Studies (4)

Lecture/discussion—4 hours. Prerequisite: graduate standing or consent of instructor. Undergraduate coursework in the humanities or social sciences recommended. Histories and traditions of cultural studies internationally; multiple legacies of cultural studies as a field of inquiry in various geographical contexts; foregrounds important critical perspectives resulting from social and intellectual movements worldwide.—F. (F.)

##### 200B. Theories of Cultural Studies (4)

Lecture/discussion—4 hours. Prerequisite: course 200A or consent of instructor. Definitions of “critical” scholarship and examination of various contexts in which cultural studies theory has emerged worldwide. Both mainstream and alternative theoretical traditions, such as those developed by people of color and by other minoritized groups.—W. (W.)

##### 200C. Practices of Cultural Studies (4)

Lecture/discussion—4 hours. Prerequisite: courses 200A and 200B or consent of instructor. Methodological and practical applications of cultural studies research. Critical analyses of ethnography, textual analysis, social change, community development, and identity formation. Emphasis given to students’ unique versions of cultural studies practices.—S. (S.)

##### 204. History and Theory of Sexualities (4)

Lecture/discussion—4 hours. Prerequisite: course 200A (may be taken concurrently) or consent of instructor. Studies of sexuality in feminist, literary, historical, and cultural studies research, specifically examining the emergence of “sexuality” as a field of research and the relationship of sexuality studies to cultural forms, subjectivity, and social relations generally. May be repeated two times for credit. Offered irregularly.—F. (F.)

##### 206. Studies in Race Theory (4)

Lecture/discussion—4 hours. Prerequisite: course 200A (may be taken concurrently) or consent of instructor. Theoretical framework for the critical study of race, drawing on contemporary cultural studies and postcolonial scholarship in order to understand the social production of “race” as a category for organizing social groups and determining group processes. Offered irregularly.—W. (W.)

##### 208. Studies in Nationalism, Transnationalism, and Late Capitalism (4)

Lecture/discussion—4 hours. Prerequisite: course 200A (may be taken concurrently) or consent of instructor. Contemporary theories of nation, nationalism, postcolonialism, and transnationalism. Specific attention to the relationship between cultural production and the formation of ideas about nation and nationalism, including examination of both “legitimizing” and resistant discourses. Offered irregularly.—S. (S.)

##### 210. Memory, Culture, and Human Rights (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Restricted to graduate students. Explores the multiple convergences among memory, culture, and human rights. Discusses diverse approaches to how societal actors in different historical, cultural, and national settings, construct meanings of past political violence, inter-group conflicts, and human rights struggles. (Same course as Human Rights 200B.) Offered in alternate years.—F. Lazzara

### 212. Studies in the Rhetorics of Culture (4)

Lecture/discussion—4 hours. Prerequisite: course 200A (may be taken concurrently) or consent of instructor. Survey of critical and analytical approaches to the study of texts. Examination of multi-mediated objects to understand their cultural import by focusing on discursive production, dispersal, and reception processes, and related shifts in power relations. Offered irregularly.—F. (F.)

##### 214. Studies in Political and Cultural Representations (4)

Lecture/discussion—4 hours. Prerequisite: course 200A (may be taken concurrently) and consent of graduate adviser. Framework for the analysis of political and popular cultural representations. Emphasis on concepts, theories, and methodologies illuminating dominant and vernacular cultural representation, appropriation, and innovation in transnational contexts. May be repeated for credit up to 4 times when topic differs. Offered irregularly.—W. (W.)

##### 250. Research Seminar (4)

Seminar—4 hours. Prerequisite: courses 200A, 200B, 200C or consent of instructor. Designed to facilitate student interaction and promote student research by guiding students through the production of a publishable essay. Essays submitted, distributed, and discussed by seminar participants. May be repeated up to 12 units of credit.—W. (W.)

##### 270A. Individually Guided Research in Cultural Studies (4)

Discussion—1 hour; independent study—2 hours; extensive writing. Prerequisite: course 200C, 250, consent of instructor. Individually guided research, under the supervision of a faculty member, on a Cultural Studies topic related to the student’s proposed dissertation project to produce a dissertation prospectus.—F, W, S. (F, W, S.)

##### 270B. Individually Guided Research in Cultural Studies (4)

Discussion—1 hour; independent study—2 hours; extensive writing. Prerequisite: course 200C, 250, consent of instructor. Individually guided research, under the supervision of a faculty member, on a Cultural Studies topic related to the student’s proposed dissertation project to produce a dissertation prospectus.—F, W, S. (F, W, S.)

##### 270C. Individually Guided Research in Cultural Studies (4)

Discussion—1 hour; independent study—2 hours; extensive writing. Prerequisite: course 200C, 250, consent of instructor. Individually guided research, under the supervision of a faculty member, on a Cultural Studies topic related to the student’s proposed dissertation project to produce a dissertation prospectus.—F, W, S. (F, W, S.)

##### 290. Colloquium (1)

Lecture—1 hour. Prerequisite: graduate standing or consent of instructor. Designed to provide cohort identity and faculty student exchange. Opportunity to present papers, hear guest lecturers, and see faculty presentations, gather for organizational and administrative news, exchange information, and make announcements. May be repeated up to 12 units of credit. (S/U grading only.)—F, W, S. (F, W, S.)

##### 295. Special Topics (4)

Lecture/discussion—4 hours. Prerequisite: graduate standing or consent of instructor. Special topics courses offered according to faculty and student interests and demands. May be repeated for credit with consent of adviser.—F, W, S. (F, W, S.)

##### 298. Group Research (1-5)

(S/U grading only.)—F, W, S. (F, W, S.)

##### 299. Directed Research (1-5)

(S/U grading only.)—F, W, S. (F, W, S.)

##### 299D. Dissertation Research (1-12)

Independent study—3-36 hours. Prerequisite: advancement to doctoral candidacy. (S/U grading only.)—F, W, S. (F, W, S.)

### Professional

#### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### Dermatology

See **Medicine, School of, on page 427.**

### Design

(College of Letters and Science)

Susan Avila, M.F.A., Chairperson of the Department

**Department Office.** 101 Art Building  
530-752-0890; <http://design.ucdavis.edu>

#### Faculty

Susan Avila, M.F.A., Professor  
Christina Cogdell, Ph.D., Associate Professor  
Glenda Drew, M.A., Professor  
James Housefield, Ph.D., Associate Professor  
Mark Kessler, M.Arch., Associate Professor  
Helen Koo, Ph.D., Assistant Professor  
Timothy McNeil, M.A., Professor  
Konstantinos Papamichael, Ph.D., Professor  
Simon Sadler, Ph.D., Professor  
Michael Siminovitch, Ph.D., Professor  
Brett Snyder, M.Arch., Assistant Professor  
Susan Verba, M.F.A., Associate Professor  
Jaiyi Young, M.F.A., Assistant Professor

#### Emeriti Faculty

Richard Berteaux, B.Arch., M.S., Professor Emeritus  
Frances Butler, M.A., Professor Emerita  
Dolph Gotelli, M.A., Professor Emeritus  
Patricia Harrison, M.Arch., Professor Emerita  
Gyongy Laky, M.A., Professor Emerita  
Helge B. Olsen, Senior Lecturer Emeritus  
Victoria Z. Rivers, M.A.C.T., S.C.T., Professor Emerita  
Katherine W. Rossbach, M.A., Professor Emerita  
Ann Savageau, M.F.A., Professor Emerita  
Barbara Shawcroft, M.F.A., Professor Emerita  
JoAnn C. Stabb, M.A., Senior Lecturer Emerita  
Kathryn Sylva, M.F.A., Professor Emerita

#### Affiliated Faculty

John Driscoll, M.F.A., Lecturer  
Barbara Molloy, M.F.A., Lecturer  
Gale Okumura, B.A., Lecturer  
Adele Zhang, M.F.A., Lecturer and Design Collection Curator

#### The Major Program

The Department of Design offers a creative, challenging, and flexible approach to the study of design with emphasis on socially responsible, human centered, and sustainable practice.

**The Program.** Foundation courses: Design and Visual Culture; Design Drawing, Form and Color, and Graphic Design and Computer Technology; are required of all design majors. One additional course in the student’s area of interest is required for Preparatory Subject Matter. Depth Subject Matter courses provide: (1) further exploration of design principles and conceptual, formal and technical issues; (2) conceptual and critical development through a series of history and theory classes; (3) in-depth studio experience with projects that demonstrate a research-based, iterative design process. Optional capstone class. A more detailed explanation is available through the Design Advising office in 107 Art Building; 530-752-6244.

**Portfolios.** Portfolios are not required for admission to the major. However, it is highly recommended that design students maintain an updated portfolio of visual work for faculty and professional evaluation and consideration for enrollment in spe-

cialized courses, including independent study, group study and internship.

**Internships, Careers, and Study Abroad.** Design students are encouraged to supplement their coursework with internships in design firms, museums, and design related businesses. Design graduates go directly from this program into further graduate study, or professional work including exhibition, fashion, information, interior architecture and product (lighting and furniture), textiles, visual communications (digital, environmental and print) and sustainable design. In addition, students have become entrepreneurs through freelance and commissioned work in many related areas. The Department of Design encourages students to experience design education abroad through a variety of sponsored programs. For more information, contact UC Davis Study Abroad.

## A.B. Major Requirements:

	UNITS
<b>Preparatory Subject Matter.....</b>	<b>28</b>
Design 1 .....	4
Art 2 or Design 14 .....	4
Design 15 .....	4
Design 16 .....	4
University Writing Program 11,18 or 19 .....	4
Design 40A, 40B, or 40C.....	4
One course from the following: Design 21, 31, 37, 50, 60, 70, 77; Art 9.....	4
<b>Depth Subject Matter .....</b>	<b>44</b>
Two courses, at least one of which must be a Design course, from the following: Art 110A, 110B; Design 107, 115, 117, 127B, 150A; Dramatic Art 128; Technocultural Studies 100.....	8
Three courses, at least two of which must be Design courses, from the following: Art History 168, 184, 187, 188A, 188B, 189; Design 127A, 138, 142A, 142B, 143, 144, 145, 149; Dramatic Art 114, 150, 155; Technocultural Studies 150, 152, 153, 155, 159.....	12
Choose six courses from the lists below:.. 24 <i>List A:</i> Design 116, 131, 132A, 132B, 134A, 134B, 135A, 135B, 136A, 136B, 137A, 137B, 150B, 151, 155A, 160, 161, 170, 171, 177, 180A, 185, 186, 191. One course from the following approved list may count: ART 113, 114A, Chicano Studies 172, Dramatic Art 124A, 124B, 124C, 124D, 124E, 130, 170, Technocultural Studies 104, 130, 131; Textiles and Clothing 163 and 163L <i>List B:</i> Capstone Course Option (these courses are the most advanced in the major and prerequisites are strictly enforced): Design 154, 157, 159, 179, 180B, 187	24
Note: Substitutions for the listed courses may be allowed under certain circumstances with prior departmental approval.	
<b>Total Units for the Major .....</b>	<b>72</b>

**Honors Program.** A senior honors program is available to design majors, requiring preparation of an independent design research project in their final year. The honors program consists of 6 units of DES 194HA and DES 194HB, normally taking during the final two quarters of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. See the Design Department website for current honors application procedures.

**Major Adviser.** Information on the current Academic Advisers can be obtained by contacting the Undergraduate Adviser at [designmasteradviser@ucdavis.edu](mailto:designmasteradviser@ucdavis.edu).

**Graduate Study.** The graduate program in Design leading to the Master of Fine Arts

The UC Davis Master of Fine Arts (M.F.A.) in Design unites theory and practice, offering graduate students a unique opportunity to work with a dedicated and renowned design faculty within one of the nation's top public research universities. This two-

year program encourages an interdisciplinary approach. Design faculty expertise includes design theory, exhibition, fashion, history, interior architecture, lighting, textiles, and visual communication (environmental, information, print and screen-based design). Design M.F.A. students collaborate with outstanding faculty inside and outside the department whose work covers a broad array of disciplines. Graduate students in Design blend individually focused research and creative practice with an understanding of key design issues in history, theory, research methodology, and sustainable practices. The M.F.A. degree culminates in a project-based thesis and exhibition. For more information, see <http://arts.ucdavis.edu/design-graduate-program>.

**Graduate Adviser.** Please contact the Program at 530-752-8710.

## Courses in Design (DES)

Questions pertaining to the following courses should be directed to the instructor or to the Design Advising office in 107 Art 530-752-6244. Scheduling of classes is subject to change; please contact the Advising office to confirm when a course is offered.

### Lower Division

#### 1. Introduction to Design (4)

Lecture—3 hours; discussion—1 hour. Priority given to Design majors. Introduction to design discipline through readings, writing, visual problem solving, and critical analysis. Topics: design principles and elements, vocabulary, color theory, Gestalt principles, conceptualization strategies. Role of designer and products in contemporary culture including social responsibility and sustainability. GE credit: ArtHum | AH, VL.—F. (W.) Housefield

#### 14. Design Drawing (4)

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1 (may be taken concurrently); students with a background in drawing or Advanced Placement Art Studio units are encouraged to submit a portfolio for review to waive this course. Priority given to Design majors. Drawing as a tool for design. Basic skills in objective observation and representation, including line, shape, tone, and space. Drawing as a tool for formulating and working through design problems. GE credit: ArtHum | AH, VL.—F, W, S, Su. (F, W, S, Su.) McNeil

#### 15. Form and Color (4)

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1 (may be taken concurrently) or consent of instructor. Priority given to Design majors. Understanding color, form and composition as ways of communicating design concepts and content. Color theory, color mixing, interaction of color. Design principles and elements. Gestalt theory. Explores a variety of materials, media and presentation techniques. GE credit: ArtHum | AH, VL.—F, W, S, Su. (F, W, S, Su.) Snyder

#### 16. Graphic Design and Computer Technology (4)

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1 (may be taken concurrently) or consent of instructor. Priority given to Design students. Introduction to digital tools with emphasis on graphic design including theory, practice and technology. Includes principles of color, resolution, pixels, vectors, image enhancement, layout, visual organization, visual hierarchy, typography. GE credit: ArtHum | AH, VL.—F, W, S, Su. (F, W, S, Su.)

#### 21. Drafting and Perspective (4)

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1 (may be taken concurrently) or consent of instructor. Priority given to Design majors. Introduction to mechanical drafting, including scaled drawing, orthogonal projection, isometric, axonometric and perspective. Includes basic rendering techniques. GE credit: ArtHum | AH, VL.—F, Su. (F, Su.) Kessler

#### 31. Photography for Designers (4)

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16 or consent of instructor. Pass One priority given to Design majors. Visual communication and digital imaging tech-

niques using black and white, and color. Critical analysis of photographs and the role of photography in society combining theoretical perspectives with practical applications. Explore use and meaning of single, sequence, and single composite images. GE credit: ArtHum | AH, VL.—F, W. (F, W.) Drew

#### 37. Coding for Designers (4)

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16 or consent of instructor. Pass One priority to Design majors. Programming concepts and skills as applied for visual design. Algorithm-based design and development, flowcharts, pseudo-code, entry level scripting or programming. Principles of coding, logic, syntax, structure. Analysis of historical examples of code-based design. Development, iteration, presentation of design projects. GE credit: VL.—F, Su. (F, Su.) Drew

#### 40A. Energy, Materials, and Design Over Time (4)

Lecture—3 hours; discussion—1 hour. Priority to Design majors. Global history of design across time, viewed through the lens of the effects of the creation and discovery of new energy sources, processes and materials on design. Not open for credit to students who have taken course 40 or 140. GE credit: ArtHum | AH, DD, VL, WE.—W. (W.) Cogdell

#### 40B. Ideologies of Design (4)

Lecture—3 hours; discussion—1 hour. Priority to Design majors. Introduction to the history and theory of design in particular relation to political, philosophical, cultural, economic, and environmental debates and objectives. GE credit: ArtHum | AH, WE.—S. (S.) Sadler

#### 40C. Design for Aesthetics and Experience (4)

Lecture—3 hours; discussion—1 hour. Priority to Design majors. Global historical survey of design's engagement with changing notions of aesthetics and experience. Relates transformations in the theory, production, and reception of all aspects of design (objects, landscapes, architectures, etc.) to larger cultural, social, and political contexts. Not open for credit to students who have taken course 40 or 140. GE credit: ArtHum | AH, DD, WE.—S. (S.) Housefield

#### 50. Introduction to Three-Dimensional Design (4)

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1 or consent of instructor. Priority given to Design majors. Design concept development and detailing as it relates to the making of objects, structures and models using form, scale and materials. Product design and rapid prototyping methods using a range of techniques for advancing the design process. GE credit: ArtHum | AH, VL.—F, W, S, Su. (F, W, S, Su.) Snyder

#### 70. Introduction to Textile Design Structures (4)

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1 (may be taken concurrently) or consent of instructor. Introduction to diverse methods for creating textile structures. Exploration of the creative potential of hand-constructed textiles, manipulation of fabric to create dimensional surfaces, and the basics of building and joining fabric structures. Only two units of credit to students who have completed courses 23 or 24. Not open for credit for students who have completed both 23 and 24. GE credit: ArtHum | AH, VL.—F. (F.) Avila

#### 77. Introduction to Structural Design for Fashion (4)

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1 (may be taken concurrently) or consent of instructor. Priority given to Design majors. Study and practice of designing clothing for the human body. Emphasis on flat pattern development, structural joining sequences and the development of three-dimensional garments from two-dimensional drawings. Not open for credit to students who have completed course 77A. GE credit: ArtHum | AH, VL.—F, W. (F, W.) Koo

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division****107. Advanced Structural Design for Fashion (4)**

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16 or consent of instructor. Priority given to Design majors. Advanced study and practice of designing clothing for the human body through pattern development and structural joining. Emphasis on draping techniques and advanced conceptualization for fashion design. Not open for credit to students who have taken course 77B. GE credit: ArtHum | AH, VL.—S. (S.) Koo

**115. Letterforms and Typography (4)**

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16 or consent of instructor. Priority given to Design majors. Fundamentals of letterforms and typography. Characteristics of typefaces; formatting and composition of type. Principles of legibility, visual hierarchy, grid systems, and the integration of type and image. Not available for credit to students who have completed course 22. GE credit: ArtHum | AH, VL.—F, W, S, Su. (F, W, S, Su.) Verba

**116. Visual Communication: Graphic Design Studio (4)**

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16, 115 or consent of instructor. Priority given to Design majors. Multiple, conceptually-linked assignments focusing on the fundamental choices designers make in translating concepts into effective graphic form. Problem finding and analysis of audience needs. Design process from research and initial concepts to project prototypes. Not open for credit to students who have completed course 152 or 152A. GE credit: ArtHum | AH, VL.—W, S, Su. (W, S, Su.) Verba

**117. Interactive Media I (4)**

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16 or consent of instructor. Priority given to Design majors. Practice of creating interactive visual media for network-based applications and principles of human computer interaction. Responsive design. User-centered research, information architecture, interface and interaction. Analysis of usability. Development and presentation of design production materials and completed interactive projects. GE credit: ArtHum | AH, VL.—W, S, Su. (W, S, Su.) Drew

**127A. Sustainable Design (4)**

Lecture/discussion—4 hours. Prerequisite: course 1. Priority to Design majors. Principles, practice and materials of contemporary sustainable design in the context of environmental crisis. History of sustainable design in relation to the fields of textiles, visual communication, interior architecture, exhibition design and lighting. GE credit: ArtHum | AH, VL.—F, (F.)

**127B. Studio Practice in Sustainable Design (4)**

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 127A or consent of instructor. Priority to Design majors. Analysis and practice of sustainable design within studio context. Design project that incorporate the reuse of post consumer waste; standard materials vs. sustainable materials; Cradle to Cradle philosophy and practice. Field trips required. GE credit: ArtHum | AH, VL.—S. (S.)

**131. Global Fashion and Product Design (4)**

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16 or consent of instructor. Priority given to Design majors. Exploration of materials, embellishments, and structural techniques derived from historic and contemporary world cultures. Emphasis on unique qualities of individual expression applied to hand made textiles, fashion and textile products. Offered irregularly. GE credit: ArtHum | AH, VL.—Avila

**132A. Textile Design: Woven Structures (4)**

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16 or consent of instructor. Priority given to Design majors. Foundation course in handwoven textile structure and design, emphasizing yarn identification, basic drafting, basic weaves and their derivatives explored in context of original color effects and yarn combinations. May be repeated one time for credit with consent of instructor. Offered irregularly. GE credit: ArtHum | AH, VL.—Avila

**132B. Loom-Constructed Textile Design (4)**

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16, 132A or consent of instructor. Priority to Design majors. Intermediate level study of complex fabric structure with emphasis on pattern in relation to surface, dimension, and material. May be repeated one time for credit with consent of instructor. Offered irregularly. GE credit: ArtHum | AH, VL.—Avila

**134A. Introduction to Interior Design—Residential (4)**

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 21 or 150A or consent of instructor. Priority to Design majors. Introduction to the theory and practice of interior design with focus on residential spaces. Basic methods of design conceptualization, development, and presentation. GE credit: ArtHum | AH, VL.—F. (F.) Kessler

**134B. Introduction to Interior Design—Commercial and Technical Spaces (4)**

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 21 or 150A or consent of instructor. Pass One priority given to Design majors. Introduction to the theory and practice of interior design with focus on small commercial and technical spaces. Archetypal spaces, non-residential building systems, ADA accessibility, design programming and research methods. GE credit: ArtHum | AH, VL.—F, W, S. (F, W, S.) Kessler

**135A. Furniture Design and Detailing (4)**

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16 or consent of instructor. Priority given to Design majors. Development of designs for contemporary furniture. Consideration of behavioral and physical requirements, cultural and historic expression, and structural and aesthetic qualities. Process includes research, drawings, and construction of scale models. Required field trip. GE credit: ArtHum | AH, VL.—W. (W.)

**135B. Furniture Design and Prototyping (4)**

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16 or consent of instructor. Priority given to Design majors. Design and construction of full size prototype furniture based on preliminary work completed in course 135A. Material technology, construction methods, and finishes discussed. Development of shop drawings and furniture construction. Required field trip. Offered irregularly. GE credit: ArtHum | AH, VL.

**136A. Lighting Technology and Design (4)**

Laboratory—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16 or consent of instructor. Priority to Design majors. Introduction to lighting design and technology. Understanding the role of lighting and vision in the development of functional and aesthetically pleasing environments. GE credit: ArtHum | AH, VL.—F. (F.) Siminovitch

**136B. Designing with Light—Industrial Design (4)**

Laboratory—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16, 136A or consent of instructor. Priority to Design majors. Design and manipulation of light sources, luminaires, and lighting controls to enhance the functional and aesthetic impact of interior and exterior spaces. Industrial design projects explore lighting effects, light distribution characteristics, and luminaire design. GE credit: ArtHum | AH, VL.—W. (W.) Siminovitch

**137A. Daylighting and Interior Design (4)**

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16 or consent of instructor. Priority to Design majors. Emphasis on understanding the effect of daylight on the perception of interior designs as well as on vision, luminous and thermal comfort, health and energy efficiency. GE credit: ArtHum | AH, VL.—F. (F.) Papamichael

**137B. Daylighting Design Studio (4)**

Studio—4 hours; lecture/discussion—2 hours. Prerequisite: course 1, 14 or 21, 15, 16 or consent of instructor. Priority to Design majors. Introduction to daylighting through observation of its effects on interior designs using scale models of interior designs of choice and photographing them outdoors and in CLTC's Heliodon to understand year-round performance. GE credit: ArtHum | AH, VL.—S. (S.) Papamichael

**138. Materials and Methods in Interior Design (4)**

Lecture/discussion—3 hours; project—1 hour. Prerequisite: course 1 or consent of instructor. Priority to Design majors. Introduction to the finish materials used for interior design with special emphasis on sustainable and recycled products. Performance factors, relative costs and energy impacts, installation conditions and construction details, and design potential for a full range of interior materials. Offered in alternate years. GE credit: ArtHum | AH, VL, WE.—Kessler

**142A. World Textiles: Eastern Hemisphere (4)**

Lecture—4 hours. Prerequisite: course 1; Art History 1A, 1B, 1C, or 1D recommended. Social contexts, meanings, aesthetics, stylistic developments, and methods significant in eastern hemisphere textiles. Emphasis on Japan, China, Indonesia, Oceania, Southern and Central Asia, Africa. Offered irregularly. GE credit: ArtHum, Div | AH.—Avila

**142B. World Textiles: Western Hemisphere (4)**

Lecture—4 hours. Prerequisite: course 1, Art History 1A, 1B, or 1C recommended. Social context, aesthetics, stylistic developments and methods significant in western hemisphere textiles. Emphasis on the Middle East, Europe, and the Americas up to contemporary times. Two required field trips. GE credit: ArtHum, Div | AH.—Avila

**143. History of Fashion (4)**

Lecture—3 hours; discussion—1 hour. Priority to Design majors. History of fashion design from the earliest times to the present focusing on the ancient Middle East and Common Era North America and Europe. Emphasis on aesthetic, functional, social, economic, political and cultural aspects of clothing and personal adornment. GE credit: ArtHum | AH, VL.—W. (W.) Avila

**144. History of Interior Architecture (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. Pass One priority to Design majors. Thematic survey of interior architecture. Emphasis on dwellings in their cultural settings and development of modern interior design theories. Interiors considered in relation to buildings' exteriors, sites, and uses. Offered in alternate years. GE credit: ArtHum | AH, WE.—Housefield

**145. History of Visual Communication (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. Priority to Design majors. Historical developments of visual communication, concentrating on the technological and aesthetic development of graphic design; origins and manifestations of current issues in visual communication; provide framework for analysis of current and future trends in visual communication. GE credit: ArtHum | AH, VL, WE.—F, S. (F, S.) Drew

**149. Information Design: Principles and Practice (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing or consent of instructor. Restricted to students with upper division standing. Design principles and visual strategies for effective information display; analysis of contemporary and

historical examples of visual representations and visual narratives in science, humanities, and the arts; emergence of digital methods for interactive data presentation. GE credit: AH, VL.—S. (S.) Verba

#### **150A. Computer-Assisted Drawing for Designers (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: courses 1, 14 or 21, 15, 16 or consent of instructor; 21 preferred. Priority given to Design majors. Computer assisted drawing and modeling using a mid-level, multi-use CAD program. Basic architectural drawing and modeling technique in both two-dimensional and three-dimensional CAD environments. Not open for credit to students who have taken course 150. GE credit: ArtHum | AH, VL.—F, W. (F, W.)

#### **150B. Computer-Assisted Presentations for Interior Architecture (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1, 14 or 21, 15, 16, 150A or consent of instructor; 21 recommended. Priority given to Design majors. Computer-assisted architectural presentation including the development of complex 3D models, techniques of photo-realistic rendering and computer simulation of movement through architectural and interior space. Offered irregularly. GE credit: ArtHum | AH, VL.—S. (S.)

#### **151. Type in Motion (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: courses 1, 14 or 21, 15, 16 or consent of instructor; course 115 recommended. Priority given to Design majors. Fundamentals of creating motion-based, screen-based typography. Consideration of narrative structures, movement assemblage, and other visual languages, synthesized within a nuanced understanding of typography within digital space. GE credit: ArtHum | AH, VL.—F. (F.) Drew

#### **154. Visual Communication: Message Campaign Design (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1, 14 or 21, 15, 16, 115, 116 or consent of instructor. Priority given to Design majors. Principles and application of visual design strategies for projects that address a broad public audience. Emphasis on design for social awareness/interaction/benefit. Creation of public visual-media campaign. Not open for credit to students who have completed course 152B. GE credit: ArtHum | AH, VL.—S. (S.) Verba

#### **155A. Pattern, Form and Surface (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1, 14 or 21, 15, 16, 115 or consent of instructor. Experimental approaches to form-making through an examination of pattern, form, and surface in historical and contemporary contexts. Explorations of alternative design processes, methods, and materials that open up new possibilities for content creation and invention in design practice. GE credit: VL.—W. (W.) Verba

#### **157. Interactive Media II (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1, 14 or 21, 15, 16, (37 or 111) and 117 or consent of instructor. Priority to Design majors. Technical and conceptual aspects of creating web sites that address current trends, such as CSS for type and position and interactivity with ActionScript. Attention to conceptual framework, visual design and user interaction design. Research and written pre-production materials required. GE credit: ArtHum | AH, VL.—S. (S.) Drew

#### **159. Design for Understanding (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1, 14 or 21, 15, 16, 115, 116 or consent of instructor; course 117 recommended. Pass One open to Design majors. Principles of effective information display including aspects of language, structure, legibility, sequencing, and context. Analysis of historical examples of typographic, diagrammatic, and cartographic excellence. User-centered research. Development and presentation of iterative design prototypes. Design that informs, connects, and inspires. GE credit: ArtHum | AH, VL.—S. (S.) Verba

#### **160. Textile Surface Design: Patterns and Resists (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1, 14 or 21, 15, or consent of instructor. Use of traditional and contemporary processes to create images and patterns on fabric using a variety of dyes, including direct applications, bound and mechanical resists. Emphasis on individual exploration and interpretation of processes and techniques. May be repeated for credit one time with consent of instructor. GE credit: ArtHum | AH, VL.—S. (S.) Avila

#### **161. Textile Surface Design: Screen and Digital Printing (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1, 14 or 21, 15 and 16. Design of textiles and screen printing on fabrics; soft-product development; integration of hand-produced and digitally generated imagery on cloth. GE credit: ArtHum | AH, VL.—F. (F.) Avila

#### **170. Experimental Fashion & Textile Design (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1, 14 or 21, 15, 16 or consent of instructor. Priority to Design majors. Experimental approaches to fashion and textile design. Emphasis on developing conceptual ideas and translating them into one-of-a-kind garments and soft products. Exploration of a variety of current topics including sustainability, pattern design, new technologies, and social activism. May be repeated one time for credit with consent of instructor. GE credit: ArtHum | AH, VL.—Su. (Su.) Koo

#### **171. Fashion Drawing: Technical and Illustration (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1, 14 or 21, 15, 16 or consent of instructor. Priority to Design majors. Exploration of fashion design processes for industry within the social and physical context. Emphasis on two-dimensional conceptualization of ideas, garment construction, and ideation processes utilizing commercial textiles. Field trip required. GE credit: ArtHum | AH, VL.—F, S. (F, S.) Koo

#### **177. Computer-Assisted Fashion Design (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1, 14 or 21, 15, 16 and 77 or consent of instructor. Priority to Design majors for industry and personal expression with emphasis on computer-assisted design applications. Field trip required. GE credit: ArtHum | AH, VL.—F. (F.) Koo

#### **179. Fashion Design: Signature Collection (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1, 14 or 21, 15, 16, 77, (107 or 177) or consent of instructor. Priority to Design majors. Advanced exploration of fashion design with an emphasis on professional portfolio development and presentation. Emphasis on conceptualizing, designing, and fabricating a cohesive line of wearable garments suitable for presenting in a public fashion show. Not open for credit to students who have taken more than 8 units of course 191A. May be repeated one time for credit. GE credit: ArtHum | AH, VL.—W. (W.) Koo

#### **180A. Advanced Interior Design: Institutional Spaces (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1 and (21 or 150A) or consent of instructor. Priority to Design majors. Advanced interior design problems focused on complex institutional spaces. Introduction to building codes related to interior design. Integration of building systems with interior design solutions. GE credit: ArtHum | AH, VL.—F, W. (F, W.) Kessler

#### **180B. Advanced Interior Architecture (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 134A, (134B or 180A) or consent of instructor. Priority to Design majors. Advanced problems in interior architectural design emphasizing space planning for corporate and institutional environments. Field trips required. GE credit: ArtHum | AH, VL.—W, S. (W, S.) Kessler

#### **185. Exhibition Design (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1, 14 or 21, 15, 16 or consent of instructor; 150A recommended. Priority to Design majors. Design of cultural and commercial exhibition environments, including exhibition development and object selection, spatial planning and architectural finishes, object placement and staging, interpretive strategies, exhibition and promotional graphics. GE credit: ArtHum | AH, VL.—F. (F.) McNeil

#### **186. Environmental Graphic Design (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1, 14 or 21, 15, 16 or consent of instructor; course 115 recommended. Priority to Design majors. Design of informational and directional graphics for the built environment. Application and integration of typography, imagery and symbols into the architectural landscape. Development of universal wayfinding and graphic navigational systems to help people find their way. GE credit: ArtHum | AH, VL.—W. (W.) McNeil

#### **187. Narrative Environments (4)**

Studio—4 hours; lecture/discussion—2 hours. Pre-requisite: course 1, 14 or 21, 15, 16 and 185 or 186 or consent of instructor. Design of storytelling environments and multi-sensory experiences for cultural, commercial, entertainment and public spaces. Interpretive planning and design for specific exhibit audiences. Manipulation of objects and the communication of complex ideas in the exhibition environment. GE credit: ArtHum | AH, VL.—S, Su. (S, Su.) McNeil

#### **190. Proseminar (1)**

Seminar—1 hour. Prerequisite: design major or consent of instructor. Philosophies of design explored through discussion and presentation of research results. May be repeated three times for credit when topic differs. (P/NP grading only.)

#### **191A. Workshops in Design (4-12)**

Seminar—1 hour; studio or field experience—3 hours per unit (units determined by instructor and student); field trip. Prerequisite: course 14, 15; upper division standing and consent of instructor. Faculty initiated workshops featuring advanced studies and applications of original work in Design: Costume. Letter grading by contract. Field trips included. Credit limited to 12 units in one section or a combination of sections.—F, W, S. (F, W, S)

#### **191B. Workshops in Design (4-12)**

Seminar—1 hour; studio or field experience—3 hours per unit (units determined by instructor and student); field trip. Prerequisite: course 14, 15; upper division standing and consent of instructor. Faculty initiated workshops featuring advanced studies and applications of original work in Design: Environment. Letter grading by contract. Field trips included. Credit limited to 12 units in one section or a combination of sections.—F, W, S. (F, W, S)

#### **191C. Workshops in Design (4-12)**

Seminar—1 hour; studio or field experience—3 hours per unit (units determined by instructor and student); field trip. Prerequisite: course 14, 15; upper division standing and consent of instructor. Faculty initiated workshops featuring advanced studies and applications of original work in Design: Graphics. Letter grading by contract. Field trips included. Credit limited to 12 units in one section or a combination of sections.—F, W, S. (F, W, S)

#### **191D. Workshops in Design (4-12)**

Seminar—1 hour; studio or field experience—3 hours per unit (units determined by instructor and student); field trip. Prerequisite: course 14, 15; upper division standing and consent of instructor. Faculty initiated workshops featuring advanced studies and applications of original work in Design: Textiles. Letter grading by contract. Field trips included. Credit limited to 12 units in one section or a combination of sections.—F, W, S. (F, W, S)

#### **192. Internship (1-6)**

Internship—3-18 hours. Prerequisite: completion of 84 units and consent of instructor. Enrollment limited to 3 units per quarter or 6 units per IV session. Supervised internship, off and on campus, in areas

of design including environmental, costume, textile, museum, display and interior design. (P/NP grading only.)

#### **194HA. Special Study for Honors Students (3)**

Independent study—9 hours. Prerequisite: qualification for Letters and Science Honors Program; senior standing; approval of Design Honors Program proposal by the Curriculum Committee and major adviser; consent of instructor. Limited enrollment. Preparation and presentation of a culminating project. Supervision of an instructor in one of the creative or scholarly areas of Design. (Deferred grading only, pending completion of sequence.)—W. (W.)

#### **194HB. Special Study for Honors Students (3)**

Independent study—9 hours. Prerequisite: course 194HA; qualification for Letters and Science Honors Program; senior standing; consent of instructor. Limited enrollment. Preparation and presentation of a culminating project. Supervision of an instructor in one of the creative or scholarly areas of Design. (Deferred grading only, pending completion of sequence.)—S. (S.)

#### **197T. Tutoring in Design (1-5)**

Discussion—3-15 hours. Prerequisite: upper division standing and consent of instructor. Leading of small discussion groups or studio meetings affiliated with one of the department's regular courses. (P/NP grading only.)

#### **198. Directed Group Study (1-5)**

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

#### **199. Special Study of Advanced Undergraduates (1-5)**

(P/NP grading only.)

### **Graduate**

#### **221. Theory and Issues in Design (4)**

Seminar—3 hours; independent study. Prerequisite: graduate standing in Design or consent of instructor. Perspectives on theoretical and aesthetic issues related to the design professions such as methodology in historical and contemporary contexts, implications of technology on design theory and practice, and design relationships to environmental sustainability, recycling, and other social issues. May be repeated one time for credit.—F. (F.)

#### **222. Research Methods and Critical Writing for Design (4)**

Seminar—3 hours; independent study. Prerequisite: course 221; graduate standing in Design or consent of instructor. Focused on research methods and critical writing related to design topics including case studies, original and secondary sources, critical reviews. Expectation of a paper meeting professional standards suitable for publication from each student at end of course. May be repeated one time for credit.—W. (W.)

#### **223. Professional Practice and Ethics in Design (4)**

Seminar—3 hours; independent study. Prerequisite: courses 221, 222; graduate standing in Design or consent of instructor. Introduce students to issues of professional design practice: business ethics, contracts and business practices, social responsibility through case studies, guest lectures and field trips, and readings. Short written assignments and presentations will be required.—S. (S.)

#### **224. Seminar in Design Research and Teaching (4)**

Independent study—6 hours; extensive writing—4 hours; discussion—2 hours. Prerequisite: courses 221, 222, 223; concurrent academic appointment (TA) in courses 142A, 142B, 143, 144, 145; graduate standing in Design; consent of instructor. Student will work closely with instructor on a research and writing project related to subject matter of undergraduate history courses noted above with the goal of introducing student to advanced historical research processes and development of writing skills. May be repeated two times for credit.—F, W, S. (F, W, S.)

#### **225. Studio Practice in Design (4)**

Studio—3 hours. Prerequisite: course 221. Restricted to graduate standing in Design or consent of instructor. Students work together on a collective project to experience the multiple phases of design through an iterative process. Design projects will be geared towards relevance in contemporary social, cultural and political contexts. May be repeated two times for credit.—W. (W.)

#### **290. Seminar in Design (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Selected topics in design methodology, research, communication, and education. May be repeated for credit.—S. (S.)

#### **292. Practicum in Design (1-12)**

Prerequisite: graduate standing in Design or consent of instructor. Interaction with a working professional in the student's field of interest to apply theories and concepts to working practice. (S/U grading only.)

#### **298. Directed Group Study for Graduate Students (1-5)**

Studio. Prerequisite: consent of instructor. (S/U grading only.)

#### **299. Individual Focused Study (1-12)**

Prerequisite: graduate standing in Design or consent of instructor. Advanced study in studio practice on independent projects with faculty consultation. May be repeated for credit.—F, W, S. (F, W, S.)

#### **299D. Project Concentration (1-12)**

Prerequisite: graduate standing in Textile Arts and Costume Design or consent of instructor. A minimum of 22 units must be taken in Project Concentration and Individual Focused Study. Student creates a body of original work at a professional level, with written and visual documentation of process and concepts underlying the project, culminating in public presentation. (S/U grading only.)—S. (S.)

### **Professional**

#### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **Geology Major Programs**

"Civilization exists by geological consent—subject to change without notice." —Will Durant

Geology is the study of the Earth, and in particular its history, structure, and the processes that have molded our planet and its biosphere. Geology involves the origin of continents and ocean basins, earthquakes and volcanoes, variations in global climate, and how these physical changes impact the evolution of life. All of these planetary processes are viewed through the prism of "deep time," a perspective unique to geologists and one that distinguishes geology from most of the other physical sciences.

A significant component of geology is oriented toward the interaction between humans and the Earth. This aspect includes the study of resources such as minerals, oil, and water; identification and mitigation of Earth hazards such as earthquakes, landslides, floods, and volcanic eruptions; identification and mitigation of polluted ground water; land use planning; and the study of ancient and modern climate change.

**The Program.** Students interested in becoming professional geologists or continuing their geological studies at the graduate level should choose the Bachelor of Science degree program. The Bachelor of Arts program is for students interested in an interdisciplinary program of study, or who plan to go into pre-college teaching. Both programs allow students to emphasize an aspect of the field of particular interest to them. The upper division electives are not restricted to geology courses but must be chosen to provide a relevant, coherent, and in-depth program of study. Transfer students should have completed as much as possible of the preparatory subject matter listed below.

**Internships and Career Alternatives.** In recent years in California, the largest employers of geologists have been environmental and geotechnical consulting firms, with oil companies, research laboratories and government agencies also providing opportunities. Students graduating with a Bachelor's degree may get entry-level positions in the private

Biological Sciences 2A-2B-2C .....	15
Geology 2, 3, 3L, 50L, 60 .....	13
Mathematics 16A-16B-16C or 17A-17B-17C or 21A-21B-21C .....	9-12
Physics 7A-7B-7C or 9A-9B-9C .....	12-15
Statistics 100 .....	4

**Depth Subject Matter.....42**

Concentration (chosen from among the four fields of concentration listed below) ..... 27  
 Supplementary Field; chosen from among the four fields listed below. May not include the same field as the concentration. The same course may not be used to fulfill the requirements for both a Concentration and a Supplementary Field. ..... 15

**Total Units for the Major.....110-116****Fields of Concentration:**

Chemistry .....	27-36
Chemistry 105 .....	4
Chemistry 107A-107B or 110A-110B-110C .....	6-12
Chemistry 118A-118B or 128A-128B-129A-129B .....	8-10
Chemistry 124A .....	3
One course from Chemistry 100, 104, 118C, 128C .....	3-4
Three units from Chemistry 197, 199 or Education/Geology 181, 183 .....	3
Earth Science .....	27
Geology 62, 101, 101L, 105, 109, 109L, 116N, 163 .....	21
Once course from Geology 107, 108, 131 .....	3
Three units from Geology 199 or Education/Geology 181, 183 .....	3
Life Science .....	27-33
Chemistry 8A-8B or 118A-118B-118C .....	6-12
Biological Sciences 101 .....	4
Evolution and Ecology 100, 101 or approved electives and Biological Sciences 105 .....	8
Neurobiology, Physiology, and Behavior 101 .....	5
Four units from Biological Sciences 199, Evolution and Ecology 199, Molecular and Cellular Biology 199, or Neurobiology, Physiology, and Behavior 199 or Education/Geology 181, 183 .....	4
Physics .....	27
Chemistry 107A, 110A .....	7
Geology 161, 162, 163 .....	9
Physics 108, 108L, 160 .....	7
Four units from Physics 199 or Education/Geology 181, 183 .....	4

**Supplementary Fields:**

Chemistry .....	15-17
Chemistry 100 .....	3
Chemistry 104 or 105 .....	3-4
Chemistry 107A .....	3
Chemistry 118A or 128A .....	3-4
Chemistry 124A .....	3
Other Chemistry or related science courses may be substituted with the prior approval of the major adviser.	
Earth Science .....	15
Geology 108, 109, 109L, 116N .....	10
Geology 138 or 140 .....	4
Approved elective .....	1
Other Geology or related science courses may be substituted with the prior approval of the major adviser.	
Life Science .....	15
Biological Sciences 101* .....	4
Evolution and Ecology 100 .....	4
Neurobiology, Physiology, and Behavior 101 .....	5
Approved electives .....	2
Other Biological Sciences or related science courses may be substituted with the prior approval of the major adviser.	
Physics .....	15
Physics 108 .....	3

Chemistry 107A .....	7
Geology 161, 162, 163 .....	9
Approved electives .....	2
Other Physics or related science courses may be substituted with the prior approval of the major adviser.	

\*Note: Students pursuing a concentration in earth science or physics may not have had the necessary prerequisites in organic chemistry.

**Major Advisers.** T.M. Hill, R. Motani

**Related Major Program.** See also *Marine and Coastal Science*, on page 416.

**Courses in Geology (GEL)****Lower Division****1. The Earth (4)**

Lecture—3 hours; discussion—1 hour. Introduction to the study of the Earth. Earth's physical and chemical structure; internal and surface processes that mold the Earth; geological hazards and resources. Not open for credit to students who have completed course 50. Only 2 units of credit to students who have completed course 2. GE credit: SciEng | SE, SL, WE.—F, W, S. (F, W, S.) Mukhopadhyay, Osleger

**2. The Blue Planet: Introduction to Earth Science (3)**

Lecture—3 hours. Study of the solid and fluid earth and its place in the solar system. Holistic examination of how the solid earth interacts with the atmosphere, hydrosphere, biosphere, and extraterrestrial environment. Not open for credit to students who have completed course 50. Only 2 units of credit to students who have completed course 1. GE credit: SciEng | SE, SL, WE.—F, W, S. (F, W, S.) Montañez

**2G. The Blue Planet: Introduction to Earth Science Discussion (1)**

Discussion—1 hour. Prerequisite: course 2 concurrently. Small group discussion and preparation of short papers for course 2. GE credit: SciEng, Wrt | SE, WE.—W. (W.) Montañez

**3. History of Life (3)**

Lecture—3 hours. Prerequisite: course 1 recommended. The history of life during the three and one half billion years from its origin to the present day. Origin of life and processes of evolution; how to visualize and understand living organisms from their fossil remains. GE credit: SciEng | SE.—W. (W.) Motani

**3G. History of Life: Discussion (1)**

Discussion—1 hour. Prerequisite: course 3 concurrently. Small group discussion and preparation of short papers for course 3. GE credit: SciEng, Wrt | SE, WE.—W. (W.) Motani

**3L. History of Life Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 3 concurrently. Exercises in understanding fossils as the clues to interpreting ancient life, including their functional morphology, paleoecology, and evolution. GE credit: SciEng | SE.—W. (W.) Motani

**4. Evolution: Science and World View (3)**

Lecture—2 hours; discussion—1 hour. Introduction to biological evolution. Emphasis on historical development, major lines of evidence and causes of evolution; relationships between evolution and Earth history; the impact of evolutionary thought on other disciplines. GE credit: SciEng | SE, SL, WE.—S. (S.) Vermeij

**10. Modern and Ancient Global Environmental Change (3)**

Lecture—3 hours. Fundamental scientific concepts underlying issues such as global warming, pollution, and the future of non-sustainable resources presented in the context of anthropogenic processes as well as natural forcing of paleoenvironmental change throughout Earth's history. GE credit: SciEng | SE, SL, VL.—F. (F.) Montañez

**12. Evolution and Paleobiology of Dinosaurs (2)**

Lecture—2 hours. Introduction to evolutionary biology, paleobiology, ecology and paleoecology, using dinosaurs as case studies. GE credit: SciEng | SE.—F, W. (F, W.) Carlson

**16. The Oceans (3)**

Lecture—3 hours. Introductory survey of the marine environment. Oceanic physical phenomena, chemical constituents and chemistry of water, geological history, the seas biota and human utilization of marine resources. Not open for credit to students who have taken course 116. GE credit: SciEng | SE, SL.—W. S. (W, S.) Hill, Spero

**16G. The Oceans: Discussion (2)**

Discussion/laboratory—2 hours; term paper or discussion. Prerequisite: course 16 concurrently. Scientific method applied to discovery of the processes, biota and history of the oceans. Group discussion and preparation of term paper. Not open for credit to students who have taken course 116G. GE credit: SciEng, Wrt | SE, WE.—W. (W.) Hill

**17. Earthquakes and Other Earth Hazards (2)**

Lecture—2 hours. Impact of earthquakes, tsunami, volcanoes, landslides, and floods on humans, structures, and the environment. Discussion of the causes and effects of disasters and catastrophes, and on prediction, preparation, and mitigation of natural hazards. GE credit: SciEng | SE, SL.—F, W, S. (F, W, S.) Billen, Kellogg

**18. Energy and the Environment (3)**

Lecture—3 hours. Conventional and alternative energy resources and their environmental impacts. Basic principles, historical development, current advantages and disadvantages, future prospects. Oil, natural gas, coal, nuclear, wind, geothermal, water, tidal, solar, hydrogen, and other sources of energy for the 21st century. GE credit: SciEng | SE, SL, WE.—W. (W.) Verosub

**18V. Energy and the Environment (3)**

Web virtual lecture—1.5 hours; web electronic discussion—1.5 hours. Conventional and alternative energy resources and their environmental impacts. Basic principles, historical development, current advantages and disadvantages, future prospects. Oil, natural gas, coal, nuclear, wind, geothermal, water, tidal, solar, hydrogen, and other sources of energy for the 21st century. GE credit: SciEng | SE, SL, WE.—W. (W.) Verosub

**20. Geology of California (2)**

Lecture—2 hours. The geologic history of California, the origin of rocks and the environments in which they were formed, the structure of the rocks and the interpretation of their structural history, mineral resources, and appreciation of the California landscape. Offered in alternate years. GE credit: SciEng | SE, SL, VL.—W. Cowgill

**25. Geology of National Parks (3)**

Lecture—3 hours. Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Relationship of individual parks to geologic processes such as mountain building, volcanism, stream erosion, glacial action and landscape evolution. GE credit: SciEng | SE, SL, VL.—F. (F.) Osleger

**25V. Geology of National Parks (3)**

Web virtual lecture—1 hour; web electronic discussion—2 hours. Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Relationship of individual parks to geologic processes such as mountain building, volcanism, stream erosion, glacial action and landscape evolution. No credit for students who have completed course 25. GE credit: SciEng | SE.—S. (S.) Gee (UC San Diego), Osleger (UC Davis), Schwarz (UC Santa Cruz)

**28. Astrobiology (3)**

Lecture—3 hours. Origin, evolution and distribution of life in our solar system and the Universe. Detecting habitable worlds, Drake equations, necessities

and raw materials for life, philosophical implications of the search for life elsewhere. GE credit: SciEng | SE, SL. —F. (F.) Yin

### **30. Fractals, Chaos and Complexity (3)**

Lecture/discussion—3 hours. Prerequisite: Mathematics 16A or 21A. Modern ideas about the unifying ideas of fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture. (Same course as Physics 30.) Offered in alternate years. GE credit: SciEng | QL, SE, SL. —(W.) Rundle

### **32. Volcanoes (3)**

Lecture—3 hours. Role of eruptions, and eruptive products of volcanoes in shaping the planet's surface, influencing its environment, and providing essential human resources. GE credit: SciEng | SE, —S. (S.) Cooper

### **35. Rivers (3)**

Lecture—3 hours. Introduction to geomorphology, climate and geology of rivers and watersheds, with case examples from California. Assessment of impacts of logging, agriculture, mining, urbanization and water supply on river processes. Optional river field trips. GE credit: SciEng | SE, SL.

### **36. The Solar System (4)**

Lecture—3 hours; discussion—1 hour. Nature of the sun, moon, and planets as determined by recent manned and unmanned exploration of the solar system. Comparison of terrestrial, lunar, and planetary geological processes. Search for life on other planets. Origin and evolution of the solar system. (Former course 113-113G.) GE credit: SciEng, Wrt | SE, VL, WE. —S. (S.) Osleger, Stewart

### **50. Physical Geology (3)**

Lecture—3 hours. Prerequisite: high school physics and chemistry. The Earth, its materials, its internal and external processes, its development through time by sea-floor spreading and global plate tectonics. Students with credit for course 1 or the equivalent may receive only 2 units for course 50. GE credit: SciEng | SE, SL. —F. W. (F, W.) Billen, Cooper, Lesher, Zierenberg

### **50L. Physical Geology Laboratory (2)**

Laboratory—6 hours. Prerequisite: course 50 concurrently. Introduction to classification and recognition of minerals and rocks and to interpretation of topographic and geologic maps and aerial photographs. Students with credit for course 1L or the equivalent may receive only 1 unit for course 50L. GE credit: SciEng | SE, —F, W. (F, W.) Billen, Cooper, Lesher, Zierenberg

### **60. Earth Materials: Introduction (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 2A; Mathematics 16A or 17A or 21A; course 1 or 50; course 50L. Physical and chemical properties of rocks, minerals and other earth materials; structure and composition of rock-forming minerals; formation of minerals by precipitation from silicate liquids and aqueous fluids and by solid state transformations. GE credit: SciEng | SE. —F. (F.)

### **62. Optical Mineralogy (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 60 (can be concurrent). Optical properties of inorganic crystals; techniques of mineral identification using the polarizing microscope; strategies for studying rocks in thin section. GE credit: SciEng | SE, VL. —F. (F.)

### **81. Learning in Science and Mathematics (2)**

Lecture/discussion—2 hours; field work—2 hours. Limited to 26 students per section. Exploration of how students learn and develop understanding in science and mathematics classrooms. Introduction to case studies and interview techniques and their use in K-6 classrooms to illuminate factors that affect student learning. (Same course as Education 81.) (P/NP grading only.) GE credit: SS, VL, WE. —F, W, S. (F, W, S.) Latimer, Stevenson

### **91. Geology of Campus Waterways (1)**

Lecture/discussion—1 hour; fieldwork—1 hour. Research characterizing geological processes in waterways on campus including links among hydrologic, atmospheric, physical, and human processes; carbon cycling and interpreting processes from sediments; field research techniques; research project design and implementation; implications of results for society and environmental policy. May be repeated for credit three times. (P/NP grading only.) GE credit: SE, SL. —F, W, S. (F, W, S.) Motani

### **92. Internship (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor; lower division standing. Work-learn experience on and off campus in all subject areas offered by the department. Internships supervised by a member of the faculty. May be repeated for credit up to 12 units. (P/NP grading only.) GE credit: SE. —F, W, S. (F, W, S.)

### **98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. May be repeated for credit. May be repeated for credit up to three times. (P/NP grading only.) GE credit: SE. —F, W, S. (F, W, S.)

### **99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor; lower division standing. (P/NP grading only.) GE credit: SE. —F, W, S. (F, W, S.)

## **Upper Division**

### **101. Structural Geology (3)**

Lecture—3 hours. Prerequisite: courses 50 and 50L; Physics 7A or 9A; Mathematics 16A or 17A or 21A; consent of instructor. Class size limited to 35 students. Study of processes and products of rock deformation. Introduction to structural geology through a survey of the features and geometries of faults and folds, techniques of strain analysis, and continuum mechanics of rock deformation. GE credit: SciEng | SE. —W. (W.) Cowgill, Oskin

### **101L. Structural Geology Lab (2)**

Laboratory—6 hours; fieldwork—2 hours. Prerequisite: courses 50 and 50L; Physics 7A or 9A; course 101 concurrently; consent of instructor. Class size limited to 15 students per session. Laboratory study of the processes and products of rock deformation. Introduction to the practice of structural geology through observations and analysis of rock deformation, including field measurement techniques and geologic mapping. GE credit: SciEng | SE, VL. —W. (W.) Cowgill, Oskin

### **103. Field Geology (3)**

Fieldwork; laboratory. Prerequisite: course 101 and 101L; consent of instructor. Field mapping projects and writing geological reports. Weekly classroom meetings devoted to preparation of maps, cross sections, stratigraphic sections, rock descriptions, and reports. Seven-eight days on weekends during quarter. GE credit: SciEng | SE, VL, WE. —S. (S.) Cowgill, Lesher

### **105. Earth Materials: Igneous Rocks (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: courses 60, 62; Mathematics 16A or 17A or 21A; Chemistry 2B (can be concurrent). Origin and occurrence of igneous rocks. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SciEng, Wrt | SE, WE. —W. (W.) Cooper, Lesher

### **106. Earth Materials: Metamorphic Rocks (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 105. Physical and chemical properties of metamorphic rocks; interpretation of metamorphic environments. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SciEng, Wrt | SE, WE. —S. (S.) Lesher

### **107. Earth History: Paleobiology (3)**

Lecture—3 hours. Prerequisite: course 3 or Biological Sciences 2A or Biological Sciences 10. Evolution and ecological structure of the biosphere from the origin of life to the present. GE credit: SciEng | SE. —F, W, S. (F, W, S.) Carlson, Motani

### **107L. Earth History: Paleobiology Laboratory (2)**

Laboratory—6 hours. Prerequisite: courses 3 and 3L or Biological Sciences 2B; course 107 concurrently. Exercises in determining the ecological functions and evolution of individuals, populations, and communities of fossil organisms in field and laboratory. GE credit: SciEng | SE. —F, W, S. (F, W, S.) Carlson, Motani

### **108. Earth History: Paleoclimates (3)**

Lecture—3 hours. Prerequisite: course 1 or 50 or 116N or Environmental Science and Policy 116N; Chemistry 2A; consent of instructor. Geological and environmental factors controlling climate change, the greenhouse effect with a detailed analysis of the history of Earth's climate fluctuations over the last 600 million years. Past and present climate records are used to examine potential future climatic scenarios. GE credit: SciEng, Wrt | SE, SL, WE. —S. (S.) Spero, Montañez

### **109. Earth History: Sediments and Strata (2)**

Lecture—2 hours. Prerequisite: courses 50, 50L. Principles of stratigraphic and sedimentologic analysis. Evaluation of historical and modern global changes in sedimentation within terrestrial and marine environments. Examination of the plate tectonic, climatic and oceanographic factors controlling the distribution and exploitation of economic fluids within sedimentary rocks. GE credit: SciEng | SE. —W. (W.) Summer

### **109L. Earth History: Sediments and Strata Laboratory (2)**

Laboratory—6 hours. Prerequisite: course 109 concurrently. Methods of stratigraphic and sedimentologic analysis of modern and ancient sediments. Identification of major sediment and sedimentary rock types. Outcrop and subsurface analysis of sedimentary basins. GE credit with concurrent enrollment in course 109. Includes four one-day field trips. GE credit: SciEng, Wrt | SE, WE. —W. (W.) Summer

### **110. Summer Field Geology (8)**

Fieldwork. Prerequisite: course 103, course 109; course 105 recommended. Advanced application of geologic and geophysical field methods to the study of rocks. Includes development and interpretation of geologic maps and cross sections; gravity, magnetic, electrical resistivity and seismic surveys; and field analysis of plutonic and volcanic rock suites. Eight hours/day, six days/week for six weeks. GE credit: SciEng, Wrt | SE, VL, WE. —Su. (Su.) Oskin, Cowgill

### **115. Earth Science, History, and People (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing; course 1. Study of interplay between the Earth and its human inhabitants through history, including consideration of acute events such as earthquakes and eruptions as well as the geology of resources, topography, and water. GE credit: SciEng or SocSci, Wrt | OL, SE, WE. —S. (S.) Verosub

### **116N. Oceanography (3)**

Lecture—2 hours; laboratory—3 hours; field work. Prerequisite: course 1 or 2 or 16 or 50. Advanced oceanographic topics: Chemical, physical, geological, and biological processes; research methods and data analysis; marine resources, anthropogenic impacts, and climate change; integrated earth/ocean/atmosphere systems; weekly lab and one weekend field trip. (Same course as Environmental Science & Policy 116N.) Offered in alternate years. GE credit: SciEng | SE, SL. —W. Hill, McClain

### **120. Origins: From the Big Bang to Today (3)**

Lecture—3 hours. Limited enrollment. Long-term and large-scale perspectives on the origins of the universe, stars and planets, life, human evolution, the rise of civilization and the modern world. Multi-disciplinary approach to 'Big History' involving cosmology, astronomy, geology, climatology, biology, anthropology, archeology and traditional history. GE credit: SciEng | SE. —S. (S.) Osleger

**130. Non-Renewable Natural Resources (3)**

Lecture—3 hours. Prerequisite: course 1 or 50. Origin, occurrence, and distribution of non-renewable resources, including metallic, nonmetallic, and energy-producing materials. Problems of discovery, production, and management. Estimations and limitations of reserves, and their sociological, political, and economic effects. Offered in alternate years. GE credit: SciEng | SE, SL.—F. (F.) Verosub

**131. Risk: Natural Hazards and Related Phenomena (3)**

Lecture—3 hours. Risk, prediction, prevention and response for earthquakes, volcanic eruptions, landslides, floods, storms, fires, impacts, global warming. GE credit: SciEng | SE, SL.—W. (F.) Rundle

**132. Introductory Inorganic Geochemistry (3)**

Lecture—3 hours. Prerequisite: course 60 (can be concurrent); Chemistry 2B. Nucleosynthesis of chemical elements, physical and chemical properties of elements, ionic substitution, elemental partition, distribution and transport among planetary materials, basic thermodynamics and phase diagrams, isotopic geochronometers, stable isotope fractionation, mixing and dilution, advection and diffusion, geochemical cycles. Offered in alternate years.—F. Yin

**134. Environmental Geology and Land Use Planning (3)**

Lecture—3 hours. Prerequisite: one course in Geology or course 1 or course 50; consent of instructor. Geologic aspects of land use and development planning. Geologic problems concerning volcanic and earthquake hazards, land stability, floods, erosion, coastal hazards, non-renewable resource extraction, waste disposal, water resources. GE credit: SciEng, Wrt | SE, WE.—W. (W.) Pinter

**136. Ecogeomorphology of Rivers and Streams (5)**

Lecture—1 hour; discussion/laboratory—2 hours; fieldwork; term paper or discussion. Prerequisite: upper division or graduate standing in any physical science, biological science, or engineering, and consent of instructor. Restricted to advanced students in the physical sciences, biological sciences, or engineering. Integrative multidisciplinary field analysis of streams. Class project examines hydrology, geomorphology, water quality and aquatic and riparian ecology of degraded and pristine stream systems. Includes cooperative two-week field survey in remote wilderness settings with students from diverse scientific backgrounds. GE credit: SciEng | SE, WE.—S. (S.) Pinter

**138. Introductory Volcanology (4)**

Lecture—2 hours; fieldwork—6 hours. Prerequisite: course 60 and 109; consent of instructor. Principles of physical and chemical volcanology. Taught in a volcanically active setting (e.g., Hawaii) with a strong field component. GE credit: SciEng | SE.—F. (F.) Zierenberg

**139. Rivers: Form, Function and Management (4)**

Lecture—3 hours; fieldwork—3 hours. Prerequisite: course 50 or 50L; Mathematics 16B or 21B recommended. Analysis of river form and processes, emphasis on fluvial geomorphology, and river and stream restoration; case studies to illustrate concepts and applications. Two weekend field trips required. Offered in alternate years. GE credit: SciEng | SE.—F. Pinter

**140. Introduction to Process Geomorphology (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 1 or 50; Mathematics 16B or 21B. Quantitative description and interpretation of landscapes with emphasis on the relationships between physical processes, mass conservation, and landform evolution. Topics covered include physical and chemical weathering, hillslopes, debris flows, fluvial systems, alluvial fans, pedogenesis, eolian transport, glaciation and Quaternary geochronology. Offered in alternate years.—F. (F.) Oskin, Pinter

**141. Evolutionary History of Vertebrates (3)**

Lecture—3 hours. Prerequisite: course 3 or Biological Sciences 2A. Evolutionary history of vertebrates; fossil record and phylogeny; timing of major evolutionary events; appearance of major vertebrate groups; physical constraints in vertebrate evolution; paleobiogeography of vertebrates; effect of continental movement on vertebrate evolution; dinosaurs and other strange vertebrates. Offered in alternate years. GE credit: SciEng | SE.—(W.) Motani

**141L. Evolutionary History of Vertebrates Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 141 (can be concurrent). Augments lecture course 141 through handling of specimens enabling in-person examination of three dimensional features observed in vertebrate skeletons, both fossil and living. Offered in alternate years. GE credit: SciEng | SE.—(W.) Motani

**142. Basin Analysis (3)**

Laboratory—3 hours; lecture—2 hours. Prerequisite: courses 50, 50L, and 109. Analysis of sedimentary basins from initiation to maturity, including controls on sedimentary fill, subsidence analysis, sequence stratigraphy, core logs, and applications to petroleum exploration and hydrology. One two-day field trip. Offered in alternate years. GE credit: SciEng | SE, VL.—(F.) Sumner

**143. Advanced Igneous Petrology (5)**

Lecture—3 hours; laboratory—6 hours. Prerequisite: course 105, Mathematics 16C or 21C, Chemistry 2C. Physical and chemical properties of magmatic environments and processes of igneous rock formation. Laboratory study of representative igneous rocks. Offered in alternate years. GE credit: SciEng, Wrt | SE, WE.—W. (W.) Pinter

**144. Historical Ecology (3)**

Lecture—3 hours. Prerequisite: upper division course in environmental science or ecology, or an introductory course in paleobiology. Ancient ecosystems and the factors that caused them to change. Species, expansion, evolution of new modes of life, geologically induced variations in resource supply, and extinction provide historical perspective on the biosphere of future. GE credit: SciEng | SE, WE.—W. (W.) Vermeij

**145. Advanced Metamorphic Petrology (5)**

Lecture—3 hours; laboratory—6 hours. Prerequisite: course 106; Hydrologic Science 134 or Chemistry 2C; Mathematics 16C or 21C. Metamorphic processes and the origin of metamorphic rocks. Laboratory study of representative rock suites. Offered in alternate years. GE credit: SciEng, Wrt | SE.—Lesher

**146. Radiogenic Isotope Geochemistry and Cosmochemistry (3)**

Lecture—3 hours. Prerequisite: Chemistry 2C, Physics 7C, and Mathematics 16C. Basic principles of nuclear chemistry and physics applied to geology to determine the ages of terrestrial rocks, meteorites, archeological objects, age of the Earth, to trace geological/environmental processes, and explain formation of the chemical elements in the Universe. Offered in alternate years. GE credit: SciEng | QL, SE.—F. Yin

**147. Geology of Ore Deposits (4)**

Lecture—3 hours; laboratory—3 hours; optional one-weekend field trip. Prerequisite: Chemistry 2C or Hydrologic Science 134, courses 60, 62, and 105. Tectonic, lithologic and geochemical setting of major metallic ore deposit types emphasizing ore deposit genesis, water/rock interaction and the environmental effects of mining. Offered in alternate years. GE credit: SciEng | QL, SE.—(S.) Zierenberg

**148. Stable Isotopes and Geochemical Tracers (3)**

Lecture—3 hours. Prerequisite: Chemistry 2C or Hydrologic Science 134; courses 50, 50L, 60. Use of oxygen and hydrogen isotopes in defining hydrologic processes; carbon, nitrogen, and sulfur isotopes as indicators of exchange between the lithosphere, hydrosphere, atmosphere and bio-

sphere. Radiogenic, cosmogenic, and noble gas isotope tracers. Offered in alternate years. GE credit: SciEng | QL, SE.—S. Zierenberg

**149. Geothermal Systems (3)**

Lecture—3 hours; fieldwork. Prerequisite: courses 50 and 50L; Chemistry 2B. Geology, geochemistry, and geophysics of geothermal systems, including electrical power generation and direct use applications. Includes one day field trip on a weekend during the quarter. GE credit: SciEng | SE.—W. (W.) Zierenberg

**150A. Physical and Chemical Oceanography (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 116N or Environmental Science and Policy 116N; Physics 9B, Mathematics 21D, Chemistry 2C; consent of instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles. (Same course as Environmental Science and Policy 150A.) GE credit: SciEng | QL, SE.—F. (F.) McClain, Spero

**150B. Geological Oceanography (3)**

Lecture—3 hours. Prerequisite: course 50 or course 116N or Environmental Science and Policy 116N. Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as Environmental Science and Policy 150B.) GE credit: SciEng | SE.—W. (W.) McClain

**150C. Biological Oceanography (4)**

Lecture—3 hours; discussion—1 hour; fieldwork. Prerequisite: Biological Sciences 2A; a course in general ecology. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. One weekend field trip required. (Same course as Environmental Science and Policy 150C.) GE credit: SciEng | SE, SL.—Su. (Su.) Hill

**152. Paleobiology of Protista (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 107 or Biological Sciences 2A; consent of instructor. Morphology, systematics, evolution, and ecology of single-celled organisms that are preserved in the fossil record. Offered in alternate years. GE credit: SciEng | SE.—Hill

**156. Hydrogeology and Contaminant Transport (5)**

Lecture—3 hours; laboratory—3 hours; term paper. Prerequisite: Hydrologic Science 145, Civil and Environmental Engineering 144 or the equivalent. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic systems. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as Hydrologic Science 146.) GE credit: SciEng | SE.—W. (W.) Fogg

**160. Geological Data Analysis (3)**

Lecture/discussion—3 hours. Prerequisite: Mathematics 21A. Introduction to quantitative methods in analyzing geological data including basic principles of statistics and probability, error analysis, hypothesis testing, inverse theory, time series analysis and directional data analyses. Use of computer in lectures and homework. GE credit: SciEng | QL, SE.—W. (W.) Rundle

**161. Geophysical Field Methods (3)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 1 or 50; Mathematics 21C; Physics 7C or 9C. Geophysical methods applied to determining subsurface structure in tectonics, hydrogeology, geotechnical engineering, hydrocarbon and mineral exploration. Theory, survey design and interpretation of gravity, electrical resistivity, electromagnetic, reflection and refraction seismology, and ground-penetrating radar measurements. GE credit: SciEng | QL, SE.—F. (F.) Billen

**162. Geophysics of the Solid Earth (3)**

Lecture—3 hours. Prerequisite: Mathematics 21C; Physics 7C or Physics 9C; consent of instructor. Theory and use of physics in the study of the solid earth. Gravity, magnetism, paleomagnetism, and heat flow. Application to the interpretation of the regional and large-scale structure of the earth and to plate tectonics. Offered in alternate years. GE credit: SciEng | QL, SE. —(W.) Kellogg

**163. Planetary Geology and Geophysics (3)**

Lecture—3 hours. Prerequisite: Mathematics 21C; Physics 7C or Physics 9C; course 50 or course 36 or Astronomy 10G or Astronomy 10L or Astronomy 10S; consent of instructor. Principles of planetary science. Planetary dynamics, including orbital mechanics, tidal interactions and ring dynamics. Theory of planetary interiors, gravitational fields, rotational dynamics. Physics of planetary atmospheres. Geological processes, landforms and their modification. Methods of analysis from Earth-based observations and spacecraft. Offered in alternate years. GE credit: SciEng | QL, SE. —(W.) Yin

**175. Advanced Field Geology (3)**

Discussion—3 hours; fieldwork—6 hours. Prerequisite: consent of instructor. Advanced field studies of selected geologic terrains, interpretation and discussion of field observations. May be repeated two times for credit when instructors varies. (P/NP grading only.) GE credit: SE.—Cooper, Roeske

**181. Teaching in Science and Mathematics (2)**

Lecture/discussion—2 hours; field work—2 hours. Prerequisite: major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor. Class size limited to 40 students per section. Exploration of effective teaching practices based on examination of how middle school students learn math and science. Selected readings, discussion and field experience in middle school classrooms. (Same course as Education 181.) (P/NP grading only.) GE credit: SS, WE.—F, W, S. (F, W, S.) Horn

**182. Field Studies in Marine Geochemistry (2-8)**

Lecture—3 hours; laboratory—1-3 hours; fieldwork—6-40 hours. Prerequisite: consent of instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of sea-floor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected. GE credit: SciEng | SE.—Hill

**183. Teaching High School Mathematics and Science (3)**

Lecture/discussion—2 hours; field work. Prerequisite: course 81/Education 81 or course 181/Education 181 and major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor. Limited to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as Education 183.) GE credit: SocSci | OL, SS, WE.—F, W, S. (F, W, S.) Pinter, Stevenson

**190. Seminar in Geology (1)**

Discussion—1 hour; seminar—1 hour; Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. Written abstracts. May be repeated for credit. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**192. Internship in Geology (1-12)**

Internship. Prerequisite: upper division standing; project approval prior to internship. Supervised work experience in geology. May be repeated for credit for a total of 10 units. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**194A. Senior Thesis (3)**

Prerequisite: open to Geology majors who have completed 135 units and who do not qualify for the honors program. Guided independent study of a

selected topic, leading to the writing of a senior thesis. (Deferred grading only, pending completion of course sequence.) GE credit: SciEng | SE, WE.—F, W, S. (F, W, S.)

**194B. Senior Thesis (3)**

Prerequisite: open to Geology majors who have completed 135 units and who do not qualify for the honors program. Guided independent study of a selected topic, leading to the writing of a senior thesis. (Deferred grading only, pending completion of course sequence.) GE credit: SciEng | SE, WE.—F, W, S. (F, W, S.)

**194HA. Senior Honors Project (3)**

Independent study—9 hours. Prerequisite: open to Geology majors who have completed 135 units and who qualify for the honors program. Guided independent study of a selected topic, leading to the writing of an honors thesis. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE, WE.—F, W, S. (F, W, S.)

**194HB. Senior Honors Project (3)**

Independent study—9 hours. Prerequisite: open to Geology majors who have completed 135 units and who qualify for the honors program. Guided independent study of a selected topic, leading to the writing of an honors thesis. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE, WE.—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

Prerequisite: senior standing in Geology or consent of instructor. (P/NP grading only.) GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**Graduate****205. Advanced Field Stratigraphy (3)**

Lecture—1 hour; field work—2 hours. Prerequisite: courses 109 and 110 or consent of instructor; course 206 recommended. Fieldwork over spring break. Application of stratigraphic techniques to research problems. Collection, compilation, and interpretation of field data. Integration of data with models for deposition and interpretations of Earth history. Topics will vary. May be repeated for credit. Offered in alternate years.—S. (S.) Sumner

**206. Stratigraphic Analysis (3)**

Lecture—3 hours. Prerequisite: courses 109, 109L or consent of instructor; course 144 recommended. Topics in advanced methods of stratigraphic analysis, regional stratigraphy and sedimentation, and sedimentary basin analysis. Emphasis on techniques used to interpret stratigraphic record and on current issues in stratigraphy and sedimentation. May be repeated for credit when topic differs. Offered in alternate years.—W. (W.) Montañez

**214. Active Tectonics (3)**

Lecture/discussion—3 hours. Prerequisite: graduate standing or consent of instructor. Active deformation associated with faults, landslides, and volcanoes. Geodetic measurement techniques such as triangulation, trilateration, leveling, Global Positioning System (GPS), and radar interferometry. GPS data acquisition and analysis. Inversion of geodetic data and mechanical models of crustal deformation. Offered in alternate years.—S. (S.) Oskin

**216. Tectonics (3)**

Lecture/discussion—3 hours. Prerequisite: course 101 or consent of instructor. Nature and evolution of tectonic features of the Earth. Causes, consequences, and evolution of plate motion, with selected examples from the Earth's deformed belts. Offered in alternate years.—Cowgill

**217. Topics in Geophysics (3)**

Lecture—1 hour; seminar—2 hours. Prerequisite: consent of instructor. Discussion and evaluation of current research in a given area of geophysics. Topic will change from year to year. May be repeated for credit. Offered in alternate years.—F, S. (F, S.) Billen, Kellogg, McClain

**218. Analysis of Structures in Deformed Rocks (3)**

Seminar—3 hours. Prerequisite: courses 100, 100L, 101, 101L, 170; or consent of instructor. Recent advances in the understanding and analysis of structures in brittlely and ductilely deformed rocks. Detailed investigation of the characteristics of the structures, models for their formation, and applications to inferring the kinematics of larger scale tectonics. Offered in alternate years.—Cowgill

**219. Fracture and Flow of Rocks (3)**

Lecture—3 hours. Prerequisite: courses 100, 101, Mathematics 21 or 16, Physics 7 or 9, or consent of instructor. Origins of those structures in rocks associated with brittle and ductile deformation. Theoretical analysis, using continuum mechanics, and experimental evidence for the origin of the structures with emphasis on deformational processes in the earth. Offered in alternate years.—S. (S.) Billen

**220. Mechanics of Geologic Structures (3)**

Lecture—3 hours. Prerequisite: course 170, Mathematics 21C, Physics 9A or 5A, or consent of instructor; Mathematics 21D and 22A recommended. Development in tensor notation of the balance laws of continuum mechanics, and constitutive theories of elasticity, viscosity, and plasticity and their application to understanding development of geologic structures such as fractures, faults, dikes, folds, foliations, and boudinage. Offered in alternate years.—Cowgill, Oskin

**226. Advanced Sedimentary Petrology (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 144 or consent of instructor. Advanced petrography and geochemistry of sediments and sedimentary rocks. Geochemical, textual and mineralogical evolution of sedimentary rocks reflecting depositional or burial processes. Laboratory work emphasizes thin section study of rocks. May be repeated for credit when topic differs. Offered in alternate years.—W. (W.) Sumner

**227. Stable Isotope Biogeochemistry (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: graduate standing and consent of instructor. Discussion and application of stable isotope techniques for scientific research problems. Course emphasizes carbon, oxygen, nitrogen, hydrogen and sulfur isotopes. Laboratory will develop basic skills of cryogenic gas extraction and specific techniques for individual research using stable isotopes. Offered in alternate years.—Spero

**228. Topics in Paleoceanography (3)**

Lecture—3 hours. Prerequisite: courses 108, 150A or consent of instructor. Critical discussion and review of selected topics in paleoceanography and paleoclimatology relating to the history of the processes controlling and affecting climate change and ocean circulation throughout the geologic record. Topics vary. May be repeated for credit. Offered in alternate years.—W. (W.) Spero

**230. Geomorphology and River Management (3)**

Seminar—3 hours. Prerequisite: graduate standing, course 139 or equivalent. Impacts of management and land use activities on the geomorphology of rivers and streams. Evaluation and use of analytical tools for river assessment. Assessment of river and stream restoration strategies and emerging issues in river management. May be repeated for credit when topic differs. Offered in alternate years.—Pinter

**232. The Oceans and Climate Change (3)**

Lecture/discussion—3 hours. Prerequisite: graduate standing or consent of instructor. Modern climate change and linkages between the ocean-atmospherecryosphere-terrestrial climate system. Importance of the ocean in forcing climate change, and the impacts of anthropogenic processes on the ocean. Topics vary. May be repeated three times for credit. Offered in alternate years.—W. (W.) Hill

**235. Surface Processes (3)**

Seminar—3 hours. Prerequisite: courses 50, 50L, 139; Mathematics 21B or 16B recommended. Recent advances in the analysis of landforms and their evolution. Detailed investigation of the tools

used to document surface processes. Evaluation of concepts and processes that govern landscape evolution. May be repeated for credit when topic differs. Offered in alternate years.—S. (S.) Oskin

### **236. Inverse Theory in Geology and Geophysics (3)**

Lecture—3 hours. Prerequisite: consent of instructor. Inversion of data for model parameters. Evaluation of parameter uncertainties. Linear and nonlinear problems for discrete and continuous models. Bakus-Gilbert inversion. Offered in alternate years.—S. (S.) McClain

### **238. Theoretical Seismology (3)**

Lecture—3 hours. Prerequisite: consent of instructor. Elastodynamic wave equation. Greens functions and source representations. Ray theory. Plane and spherical waves and boundary conditions. Elastic wave propagation in stratified media. Offered in alternate years. (P/NP grading only.)—S. (S.) McClain

### **240. Geophysics of the Earth (3)**

Lecture—3 hours. Prerequisite: Earth Sciences and Resources 201, Physics 9B, Mathematics 22B. Physics of the earth's crust, mantle, and core. Laplace's equation and spherical harmonic expression of gravity and magnetic fields. Elastic wave equation in geologic media. Body and surface seismic waves. Equations of state, thermal structure of the earth. Offered in alternate years.—S. (S.) Kellogg

### **241. Geomagnetism (3)**

Lecture—3 hours. Prerequisite: graduate standing. Nature and origin of the Earth's magnetic field. Present field and recent secular variation. Spherical harmonic analysis. Paleosecular variation. Polarity transitions and geomagnetic excursions. Statistics of polarity intervals. Dynamo theory. Planetary magnetism. Offered in alternate years.—F. (F.) Verosub

### **242. Paleomagnetism (3)**

Lecture—3 hours. Prerequisite: graduate standing. Principles and applications of paleomagnetism. Physical basis of rock and mineral magnetism. Field and laboratory techniques. Instrumentation. Analysis of paleomagnetic data. Statistical methods. Rock magnetic properties. Geological and geophysical applications. Offered in alternate years.—F. (F.) Verosub

### **246. Physical Chemistry of Metamorphic Processes (3)**

Lecture—3 hours. Prerequisite: course 145, Chemistry 110A, or consent of instructor. Physiochemical principles of metamorphic mineral assemblages and methods of interpreting the paragenesis of metamorphic rocks. Offered in alternate years.

### **247. Metamorphic Petrology Seminar (3)**

Seminar—3 hours. Prerequisite: course 145 or consent of instructor; course 246 recommended. Selected topics in metamorphic petrology (e.g., mass transport processes, tectonic settings, geothermometry, thermal structure of metamorphic belts, regional studies). May be repeated for credit when topic differs. (S/U grading only.) Offered in alternate years.

### **250. Advanced Geochemistry Seminar (3)**

Seminar—3 hours. Prerequisite: course 146 or consent of instructor. Critical review of selected topics in geochemistry including: ore genesis, hydrothermal and geothermal fluids, recent and ancient sediments, isotope geology, origin and chemistry of the oceans. Subject varies yearly depending on student interest. May be repeated for credit. Offered in alternate years.—Cooper, Zierenberg

### **251. Advanced Topics in Isotope Geochemistry and Cosmochemistry (3)**

Lecture/discussion—2 hours; term paper. Prerequisite: graduate standing or consent of instructor. Astrophysical context on origin of Solar System, synthesis of chemical elements, condensation sequence, star and planet formation, cosmochronology, building blocks of planets, development on planets' layered structure, atmosphere and hydrosphere and the role of comets/asteroids for volatile delivery. May be repeated three times for credit when topics differ. Offered in alternate years.—W. (W.) Yin

### **253. Current Topics in Igneous Petrology (3)**

Seminar—3 hours. Prerequisite: graduate standing in Geology; course 143 or consent of instructor. Topical seminar designed to help graduate students develop and maintain familiarity with current and past literature related to igneous rock petrogenesis. May be repeated for credit when topic differs. (S/U grading only.)—F. (F.) Cooper, Lesher

### **254. Physical Chemistry of Igneous Processes (3)**

Lecture—3 hours. Prerequisite: course 143 or consent of instructor; Chemistry 110A required; Chemistry 110B and 110C recommended. Introduction of modern concepts in chemical thermodynamics and kinetics, and fluid dynamics of magmatic systems for graduate students in petrology. Offered in alternate years.—Lesher

### **255. Experimental Petrology (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 143 or consent of instructor. Introduction to techniques and methods of design and executing experiments on Earth-forming minerals and rocks. Problems and examples from igneous and metamorphic petrology will be utilized. Offered in alternate years.—Lesher

### **260. Paleontology (3)**

Seminar—3 hours. Prerequisite: graduate standing in geology or a biological science. Selected problems in paleontology. Subject to be studied will be decided at an organizational meeting. May be repeated for credit when topic differs. Offered in alternate years.—F. S. (F. S.) Vermeij

### **261. Paleobiology Graduate Seminar 1: Evolutionary aspects (3)**

Lecture—1 hour; seminar—2 hours. Prerequisite: graduate standing in Geology or a biological science; qualified undergraduates accepted on an exception-only basis. This course will treat one or more of several topics in paleobiology from a phylogenetic perspective, including major patterns in evolution, building the tree of life, extinction and phylogeny, phylogeny of major phyla, and the relation between taxonomy and phylogeny. May be repeated for credit when topic varies. Offered in alternate years.—F. S. (F. S.) Carlson

### **262. Paleobiology Graduate Seminar: Methodological Aspects (3)**

Lecture—1 hour; seminar—2 hours. One or more major methods used in the study of fossils: Morphometrics and three-dimensional reconstruction of fossils, phylogenetic methodology, the application of geochemical techniques, and electron microscopy. May be repeated four times for credit if topic varies. Offered in alternate years.—S. (S.) Motani

### **281N. Instrumental Techniques for Earth Scientists (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: Mathematics 21A, 21B, 21C, Physics 7A, 7B, 7C or 9A, 9B, 9C or consent of instructor. Laboratory research techniques for new graduate students in Geology. Demonstration of and exposure to appropriate techniques in research. Offered in alternate years.—S. (S.) Spero, Yin

### **285. Field Studies in Marine Geochemistry (2-8)**

Lecture—3 hours; laboratory—1-3 hours; field-work—6-40 hours. Prerequisite: consent of instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of seafloor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected.—Hill

### **290. Seminar in Geology (1)**

Seminar—1 hour; discussion—1 hour. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. (S/U grading only.)—F. W. S. (F. W. S.)

### **291. Geology of the Sierra Nevada (1)**

Seminar. Prerequisite: consent of instructor. Short oral presentations by students and faculty concerning results of their past work and plans for future

work in the Sierra. A written abstract is required following the format required at professional meetings. (S/U grading only.) Offered in alternate years.—S. (S.)

### **292. River Forum (1)**

Seminar—1 hour. Prerequisite: graduate standing. Review and discussion of latest research and fundamental issues surrounding riverine systems, with emphasis on physical processes. Topics vary. (S/U grading only.) Offered in alternate years.—F. W. S. (F. W. S.)

### **293. Geologic Event of the Week (1)**

Discussion—0.5 hours; seminar—0.5 hours. Prerequisite: graduate standing. Seminar/discussion group to review and discuss recent earthquakes, volcanic eruptions, and other significant geologic events. The focus is on understanding the available observations, the physical processes behind each event, the geological setting, and societal consequences. May be repeated for credit three times for up to three units. (S/U grading only.) Offered in alternate years.—F. W. S. (F. W. S.) Kellogg

### **294. Structure/Tectonics Forum (1)**

Seminar—1 hour. Prerequisite: graduate student in geology or consent of instructor. Seminar/discussion group to review and discuss latest research in structural geology and tectonics, and on-going research of participants. Topics will vary each quarter depending on the interests of the group. Occasional field trips to areas of current interest. May be repeated for credit when topic differs. (S/U grading only.) Offered in alternate years.—F. W. S. (F. W. S.) Roeske

### **295. Advanced Problems in Geodynamics (3)**

Seminar—3 hours. Prerequisite: courses 100 and 101 or consent of instructor. Seminar dealing with problems in geodynamics. Topics will vary (e.g., ductile deformation mechanisms, brittle fracture, earthquake prediction, driving forces for plate tectonics, mantle convection). Emphasis on recent literature. May be repeated for credit when topic differs. (S/U grading only.) Offered in alternate years.—F. W. S. (F. W. S.)

### **296. Advanced Problems in Tectonics (3)**

Seminar—3 hours. Prerequisite: course 101 or consent of instructor. Seminar dealing with current problems in tectonics of selected regions. Topics will change from year to year. Emphasis on study of recent literature. May be repeated for credit. (S/U grading only.) Offered in alternate years.—F. (F.) Cowgill

### **297. Geophysics Forum (1)**

Seminar—0.5 hours; discussion—0.5 hours. Prerequisite: graduate student status in the Geology Department, or consent of instructor. Seminar/discussion group to review and discuss latest research in geophysics, and on-going research of participants. Topics will change each quarter depending on the interests of the group. May be repeated three times for credit. (S/U grading only.) Offered in alternate years.—F. W. S. (F. W. S.) Kellogg

### **298. Group Study (1-5)**

Prerequisite: graduate standing or consent of instructor. May be repeated up to 10 units for credit. (S/U grading only.) Offered in alternate years.—F. W. S. (F. W. S.)

### **299. Research (1-12)**

(S/U grading only.)—F. W. S. (F. W. S.)

### **Professional**

### **390. Methods of Teaching Geology (2)**

Extensive writing or discussion—2 hours. Prerequisite: graduate student standing in Geology. Introduction to graduate-level writing and undergraduate-level teaching skills in geology. Persuasive (proposal) writing workshop; discussions on campus teaching resources, presenting information, managing classroom dynamics, evaluating student performance. Participation in teaching program required for Ph.D. in Geology. (S/U grading only.)—F. (F.) Billen

**391. Ethical Issues in Earth Sciences (1)**

Seminar—1 hour. Prerequisite: graduate standing in Geology or consent of instructor. Reading and discussion of ethical issues arising in the earth sciences. Topics include scientific misconduct, gender equity in science, authorship of scientific papers, establishing priorities in research, and related issues. (S/U grading only.) Offered in alternate years.—S. (S.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

Haruko Sakakibara, Lecturer (*Japanese*)  
Miyo Uchida, Lecturer (*Japanese*)  
Moeko Watanabe, Lecturer (*Japanese*)  
Miki Wheeler, Lecturer (*Japanese*)  
Binbin Yang, Lecturer (*Chinese*)

**The Major Program**

The department offers a core language program in both Chinese and Japanese and courses in literature and culture. The core language program in Chinese has two tracks: one for students who have no background whatsoever and one for students with prior language background.

**The Program.** A student elects to major in either Japanese or Chinese. Practical language skills are taught using the most modern methods so that upon entering the upper division a student will have

attained substantial fluency in the spoken language (hearing and speaking) and the written language (reading and writing). Upper-division courses balance the need to further language skills with the need to understand and appreciate the cultural richness of either Chinese or Japanese civilization. All students are encouraged to combine their study of language and literature with courses in related fields, and to study abroad through the Education Abroad Program, the UC Davis Study Abroad Program or through internships in China and Japan.

**Career Opportunities.** UC Davis graduates have learned that a major in Chinese or Japanese is a genuine, earned distinction that facilitates entrance to graduate programs and professional schools. In addition, job opportunities abound in virtually all career paths, especially for those who have completed study abroad.

**Chinese****A.B. Major Requirements:**

<b>Preparatory Subject Matter .....</b>	<b>0-30</b>	<b>UNITS</b>
---	-------------	--------------

Chinese 1, 2, 3, 4, 5, 6; OR 1BL, 2BL, 3BL; OR 1CN, 2CN, 3CN; OR equivalent as determined by a required language placement exam.  
Recommended but NOT required: Chinese 10, 11, 50, Comparative Literature 14, Japanese 10, Linguistics 1, History 9A.

<b>Depth Subject Matter .....</b>	<b>40</b>	<b>UNITS</b>
-----------------------------------	-----------	--------------

Chinese 106, 107, 111, 112, 113, 114, 160.....28

Note: With prior approval of the undergraduate adviser, students already proficient in Chinese at any third-year level (111-112-113) must take other upper-division Chinese courses to replace language course(s).

Three\* courses (at least 12 units) selected from Chinese 100A, 101, 102, 103, 104, 105, 108, 109A-I, 110, 115, 116, 120\*\*, 130\*, 131, 132, 133\*\*, 134, 140\*\*, 150\*\* or any approved substitutions; \*one of the three courses must be from Chinese 101, 102, 103, 104, 109G.....12  
\*\*Chinese 120, 130, 133, 140 and 150 can be repeated when the contents are different.

*Recommended substitutions:* Japanese 101, 102, 103, 104, 105, 106; Anthropology 148A or 148B; Art History 163A or 163B; East Asian Studies 113; History 191A-F; Religious Studies 172; or other advanced literature and culture courses selected in consultation with the undergraduate adviser.

<b>Total Units for the Chinese Major.....</b>	<b>40-70</b>	<b>UNITS</b>
---	--------------	--------------

**Major Advisers in Chinese.** X. Chen, C. Chu, M. Halperin, Y. He, M. Yeh

**Japanese****A.B. Major Requirements:**

<b>Preparatory Subject Matter .....</b>	<b>0-30</b>	<b>UNITS</b>
---	-------------	--------------

Japanese 1, 2, 3, 4, 5, 6 OR equivalent as determined by a language placement exam.  
Recommended but NOT required:

Japanese 10, 15, 25, Chinese 10, 11, 50, Linguistics 1, History 9B.

<b>Depth Subject Matter .....</b>	<b>40</b>	<b>UNITS</b>
-----------------------------------	-----------	--------------

Japanese 101, 102, 103, 111, 112, 113, 151.....28  
Note: With prior approval of the undergraduate adviser, students already proficient in Japanese at any third-year level (111-112-113) must take other upper division Japanese courses to replace language course(s).

Three classes (at least 12 units) selected from the following: Japanese 104, 105, 106, 107, 108, 109, 114A-C, 115, 121, 122, 123, 130, 131, 132, 133, 134, 135, 136,

12

**Total Units for the Japanese Major .. 40-70**

**Major Advisers in Japanese.** C. Chang, D. Gundry, N. Koyama, J. Sorensen

**Minor Program Requirements:**

Minors are offered in Chinese and in Japanese for students wishing to follow a formally recognized program of study in those languages and literatures.

UNITS

**Chinese .....** **20**

**Japanese .....** **20**

All upper division courses, including both language courses and literature in translation courses, may be used to meet this requirement. One approved lower division course (Chinese 10, 11, 50; Japanese 10, 25, 50) may also be used. In addition, students must demonstrate their language proficiency, normally through completion of Chinese 3BL or 6 or Japanese 6. Only four units from 192, 197T, 198, and 199 may be applied to the minor. For details, consult the undergraduate advisers.

**Honors Program.** Candidates for high or highest honors in Chinese or Japanese must enroll in Chinese 199 or Japanese 199 and complete a research project or a scholarly paper under the direction of a faculty member. The project will have a minimum duration of two quarters and carry a minimum of 6 units of credit. Additionally, entrance into the honors program requires completion of at least 135 units with a minimum GPA of 3.500 in courses counted toward the major. Interested students should consult with faculty in their field of interest in their junior year and undertake their project during the first two quarters of their senior year. Other arrangements must be authorized in advance by the department chair.

Students who complete the honors thesis receive departmental citation, and if their overall GPA qualifies them, may be recommended by the faculty for honors, high honors or highest honors at graduation.

**Education Abroad Program.** The university maintains study abroad programs in China, Japan, Hong Kong, and Taiwan. They offer excellent opportunities for students to polish their language skills and experience Asian cultures firsthand. Students are encouraged to participate. Appropriate courses taken abroad can be applied toward the major or the minor. For details, see the department's undergraduate adviser, the Education Abroad Program office or the UC Davis Study Abroad Office.

**Related Courses.** See East Asian Studies course list.

**Prerequisite Credit.** No student may repeat a course if that course is a prerequisite for a course that has already been completed with a grade of C- or better.

**Placement.** Chinese 1 and Japanese 1 are intended for beginning students with no prior knowledge of those languages. Students who do have some knowledge but wish to improve their skills should meet with one of the advisers to discuss appropriate placement. Students must follow departmental guidelines for placement in all language courses and instructor approval is required for enrollment.

**Backtracking.** Satisfactory completion of a language course is evidence that a student's language skills are beyond the level of those expected in its prerequisite courses. Accordingly, students who have

completed a language course cannot go back and take its prerequisites. If the prerequisite courses are required for the major, students may substitute other courses. Students who are not sure how this requirement applies to them should speak to the undergraduate adviser.

**Waived Language Courses.** Students with exceptional language ability may waive required language courses. If lower division courses have been waived, students will not have to take courses in their place. If upper division courses have been waived, students can use other appropriate courses to earn the units they need to complete the major. Consult the undergraduate adviser regarding selection of appropriate courses.

## Courses in Chinese (CHN)

### Lower Division

#### 1. Elementary Chinese (5)

Lecture/discussion—5 hours. Prerequisite: no background in Chinese or placement exam or consent of instructor. Developing elementary level skills of listening, speaking, reading and writing in Mandarin Chinese in everyday communication settings. Introduction of fundamentals of pronunciation, grammar, and Chinese characters will be introduced. GE credit: ArtHum | AH, OL, WC.—F, W, S. (F, W, S.)

#### 1A. Accelerated Intensive Elementary Chinese (15)

Lecture/discussion—15 hours. Prerequisite: no background in Chinese or placement exam or consent of instructor. Introduction and practice in contexts of pronunciation, writing system, basic grammar and vocabulary as basis of communicative competency in Mandarin Chinese within a special nine-week intensive course which combines courses 1, 2 and 3. Not open for credit to students who have completed course 1, 2, or 3. GE credit: ArtHum | AH, OL, WC.—Su. (Su.)

#### 1BL. Accelerated Written Chinese I (5)

Lecture—5 hours. Prerequisite: placement exam or consent of instructor. Trainings on all the communicative skills of listening, speaking, reading, and writing for students who already have elementary level ability to understand or speak Mandarin Chinese. Emphases on standard Mandarin pronunciation, Chinese characters, and discourse level conversations. Not open for credit to students who have completed course 8. GE credit: ArtHum | AH, OL, WC.—F. (F.)

#### 1CN. Mandarin for Cantonese Speakers I (5)

Lecture—5 hours. Prerequisite: placement exam or consent of instructor. Training in spoken Mandarin, particularly in the phonetic transcription system known as pinyin, for students who already read and write Chinese. Not open for credit to students who have completed course 7. GE credit: ArtHum | AH, OL, WC.

#### 2. Elementary Chinese (5)

Lecture/discussion—5 hours. Prerequisite: course 1 or placement exam or consent of instructor. Continuation of elementary level skill development in listening, speaking, reading and writing Mandarin Chinese in everyday communication settings. Continued introduction of basic vocabulary and characters as well as core grammar, and further train pronunciation. GE credit: ArtHum | AH, OL, WC.—F, W, S. (F, W, S.)

#### 2BL. Accelerated Written Chinese II (5)

Lecture—5 hours. Prerequisite: course 1BL or placement exam or consent of instructor. Further trainings on all the communicative skills of listening, speaking, reading, and writing for students that already have elementary level ability to understand or speak Mandarin Chinese. Emphases on standard Mandarin pronunciation, Chinese characters, and discourse level conversations. Not open for credit to students who have completed course 18. GE credit: ArtHum | AH, OL, WC.—W. (W.)

#### 2CN. Mandarin for Cantonese Speakers II (5)

Lecture—5 hours. Prerequisite: course 1CN or placement exam or consent of instructor. Continuation of course 1CN. Continuation of course 1CN. Training in spoken Mandarin for students who can already read and write Chinese. Not open for credit to students who have completed course 17. GE credit: ArtHum | AH, OL, WC.—Yeh

#### 3. Elementary Chinese (5)

Lecture/discussion—5 hours. Prerequisite: course 2 or placement exam or consent of instructor. Continuation of elementary level skill development in listening, speaking, reading and writing Mandarin Chinese in everyday communication settings. Continued introduction of basic vocabulary and characters as well as core grammar, and further train pronunciation. GE credit: ArtHum | AH, OL, WC.—F, W, S. (F, W, S.)

#### 3BL. Accelerated Written Chinese III (5)

Lecture—5 hours. Prerequisite: course 2BL or placement exam or consent of instructor. Continuation of course 2BL with further trainings on all the communicative skills of listening, speaking, reading, and writing with emphases on standard Mandarin pronunciation, Chinese characters, and discourse level conversations in more communication settings. Not open for credit to students who have completed course 28. GE credit: ArtHum | AH, OL, WC.—S. (S.)

#### 3CN. Mandarin for Cantonese Speakers III (5)

Lecture—5 hours. Prerequisite: course 2CN or placement exam or consent of instructor. Continuation of course 2CN. Prepares students for entering upper division courses in Chinese. Not open for credit to students who have completed course 27. GE credit: ArtHum | AH, OL, WC.

#### 4. Intermediate Chinese (5)

Lecture/discussion—5 hours. Prerequisite: course 3; or placement exam or consent of instructor. Continuation of intermediate-level communication skills in spoken and written Mandarin, based on language skills developed in course 3. GE credit: ArtHum | AH, OL, WC.—F, W, S. (F, W, S.)

#### 4A. Accelerated Intensive Intermediate Chinese (15)

Prerequisite: course 3 or 1A; or placement exam or consent of instructor. Special nine-week accelerated, intensive summer session course that combines the work of courses 4, 5, and 6. Intermediate-level training in spoken and written Chinese in cultural and communicative contexts, based on language skills developed in course 3 or 1A. Not open to students who have completed course 4, 5, or 6. GE credit: ArtHum | AH, OL, WC.—F. (F.)

#### 5. Intermediate Chinese (5)

Lecture/discussion—5 hours. Prerequisite: course 4; or placement exam or consent of instructor. Training continues at intermediate-level in spoken and written Chinese in cultural contexts, based on language skills developed in course 4. GE credit: ArtHum | AH, OL, WC.—W. (W.)

#### 6. Intermediate Chinese (5)

Lecture/discussion—5 hours. Prerequisite: course 5; or placement exam or consent of instructor. Intermediate-level training in spoken and written Chinese in cultural contexts, based on language skills developed in course 5. GE credit: ArtHum | AH, OL, WC.—S. (S.)

#### 7. Chinese Business Culture (4)

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Open to non-heritage students who have no prior knowledge of, or background in, the Chinese language; anyone who has taken Chinese language classes before or after being enrolled at UC Davis, or anyone who is currently enrolled in a Chinese language class, or who speaks any Mandarin or Chinese dialect (e.g., Cantonese), cannot take the course for credit without the instructor's permission. Introduction to business culture of China. Basic con-

versation and Romanization of Chinese words. GE credit: ArtHum or SocSci, Div | AH or SS, OL, WC.—Yeh

#### 10. Modern Chinese Literature (In English) (4)

Lecture—3 hours; term paper or discussion—1 hour. Introductory course requiring no knowledge of Chinese language or history. Reading and discussion of short stories and novels and viewing of two films. Designed to convey a feeling for what China has experienced in the twentieth century. Not open for credits to students who have already taken, or are taking concurrently, course 104. GE credit: ArtHum, Div, Wrt | AH, WC.—Chen

#### 11. Great Books of China (in English) (4)

Lecture—3 hours; discussion—1 hour. Selected readings in English translation are supplemented with background information on periods, authors and the interrelationships of culture, literature and social change. Methods of analysis are introduced and applied in class discussions. GE credit: ArtHum, Div, Wrt | AH, WC.—Halperin

#### 50. Introduction to the Literature of China and Japan (4)

Lecture/discussion—4 hours. Methods of literary analysis and their application to major works from the various genres of Chinese and Japanese literature (in translation), including film. East Asian cultural traditions will also be introduced. (Same course as Japanese 50.) GE credit: ArtHum, Div, Wrt | AH, WC.—Gundry

#### 98. Directed Group Study (1-5)

(P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

### Upper Division

#### 100A. Chinese Intellectual Traditions: Daoist Traditions (4)

Lecture/discussion—4 hours. Prerequisite: a course in Chinese history recommended. English-language survey of key Daoist texts and scholarship. Topics include Daoist concepts of the cosmos, the natural world, scripture, the body, and immortality; Daoist deities; Daoism and the state. (Same course as Religious Studies 175A) GE credit: ArtHum, Div, Wrt | AH, WC.—Halperin

#### 100B. Confucian Traditions (4)

Lecture/discussion—4 hours. Key aspects of the Confucian tradition in dynastic China. Major themes addressed include ritual, classical studies, and Confucian influences on the Chinese family and state. GE credit: ArtHum | AH, WC.—Halperin

#### 101. Chinese Film (4)

Lecture/discussion—3 hours; film viewing—3 hours. English language survey of Chinese film, from its inception to the end of the twentieth century. Chinese films as important texts for understanding national, transnational, racial, gender, and class politics of modern China. (Same course as Cinema & Technocultural Studies 147A) GE credit: ArtHum, Div | AH, VL, WC.—Chen

#### 102. Chinese American Literature (in English) (4)

Lecture—3 hours; term paper or discussion—1 hour. English language survey of Chinese American literature which reflects cultural roots in China before immigration and the diaspora experience in the United States after immigration. Memory, nostalgia, national identities, cross-cultural communication, globalization, and trans-national politics. GE credit: ArtHum, Div, Wrt | AH, WC.—Chen

#### 103. Modern Chinese Drama (4)

Lecture—3 hours; term paper or discussion—1 hour. English language survey of modern Chinese spoken drama in the twentieth century and its major playwrights, in the context of Chinese history and the interaction of Chinese culture with other cultures. GE credit: ArtHum, Div, Wrt | AH, VL, WC.—Chen

**104. Modern Chinese Fiction (in English) (4)**

Lecture—3 hours; term paper or discussion—1 hour. English language survey of Chinese fiction as it evolved amidst the great historical, social and cultural changes of the twentieth century. Thorough study of the most influential writers and genres. GE credit: ArtHum, Div, Wrt | AH, WC.—Chen

**105. Western Influences on Twentieth-Century Chinese Literature (in English) (4)**

Lecture—3 hours; discussion—1 hour. Introduction of Western literary thought into modern China, the experimentation with Western literary forms and techniques, and the development of Marxism in contemporary literary writing. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC.

**106. Chinese Poetry (in English) (4)**

Lecture—3 hours; discussion—1 hour. Organized topically and chronologically, the lyric tradition is explored from the dawn of folk songs down to modern expressions of social protest. Topics include friendship, love, oppression, war, parting, death, ecstasy and beauty. All readings are in English. GE credit: ArtHum, Div, Wrt | AH, WC.—Yeh

**109A. Topics in Chinese Literature; Crime and Punishment (in English) (4)**

Lecture—3 hours; discussion—1 hour. Topics in Chinese literature; crime and punishment. GE credit: ArtHum, Div, Wrt | AH, WC.—Chen, Halperin, Yeh

**109C. Topics in Chinese Literature; Women Writers (in English) (4)**

Lecture—3 hours; discussion—1 hour. Topics in Chinese literature; women writers. GE credit: ArtHum, Div, Wrt | AH, WC.—Chen, Halperin, Yeh

**109D. Topics in Chinese Literature; The Knight-Errant (in English) (4)**

Lecture—3 hours; discussion—1 hour. Topics in Chinese literature; the knight-errant. GE credit: ArtHum, Div, Wrt | AH, WC.—Chen, Halperin, Yeh

**109E. Topics in Chinese Literature; The City in Fiction (in English) (4)**

Lecture—3 hours; discussion—1 hour. Topics in Chinese literature; the city in fiction. GE credit: ArtHum, Div, Wrt | AH, WC.—Chen, Halperin, Yeh

**109G. Topics in Chinese Literature; The Literature of Twentieth-Century Taiwan (in English) (4)**

Lecture—3 hours; discussion—1 hour. Topics in Chinese literature; the literature of twentieth-century Taiwan. GE credit: ArtHum, Div, Wrt | AH, WC.—Chen, Halperin, Yeh

**109H. Topics in Chinese Literature; Popular Literature (in English) (4)**

Lecture—3 hours; discussion—1 hour. Topics in Chinese literature; popular literature. GE credit: ArtHum, Div, Wrt | AH, WC.—(S.) Chen, Halperin, Yeh

**109I. Topics in Chinese Literature; Scholar & The Courtesan (in English) (4)**

Lecture—3 hours; discussion—1 hour. Topics in Chinese literature; the scholar and the courtesan. GE credit: ArtHum, Div, Wrt | AH, WC.—Chen, Halperin, Yeh

**110. Great Writers of China: Texts and Context (in English) (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Examination of major theoretical concepts and interpretive methods in the study of literature by using examples from the Chinese tradition; discussions of classical and modern works with an emphasis on the relations between literature, author, society, and culture. GE credit: ArtHum, Div, Wrt | AH, WC.—Yeh, He

**111. Modern Chinese: Reading and Discussion (12)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 6 or placement exam or consent of instructor. Building on Chinese 6/3BL, further development of communication skills in Modern Standard Mandarin-speaking environments. Reading of dialogues/articles pertaining to contemporary China. GE credit: ArtHum | AH, OL, WC.—F. (F.)

**111A. Intensive Third-Year Chinese (12)**

Lecture/discussion—13.3 hours. Prerequisite: Not open to students who have completed course 111, 112, or 113. Nine-week intensive summer course combines courses 111, 112, and 113. Training at intermediate-high and advanced-low level in spoken and written Chinese in cultural and communicative contexts based on language skills developed in course 6. GE credit: ArtHum | AH, OL, WC.—He, (Su.)

**112. Modern Chinese: Reading and Discussion (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 111 or placement exam or consent of instructor. Continuation of course 111. Further development of communication skills in Modern Standard Mandarin-speaking environments. Reading dialogues/articles pertaining to contemporary China issues and discuss ethical, moral, aesthetic, social, and cultural concerns. Studying strategies for moving between simplified and traditional Chinese characters. GE credit: ArtHum | AH, OL, WC.—W. (W.)

**113. Modern Chinese: Reading and Discussion (4)**

Lecture—3 course 112 or placement exam or consent of instructor 112. Continuation of course 112, further developing communication skills in Modern Standard Mandarin-speaking environments. Read dialogues/articles pertaining to contemporary China issues and discuss ethical, moral, aesthetic, social, and cultural concerns. Study strategies for moving between simplified and traditional Chinese characters. GE credit: ArtHum | AH, OL, WC.—S. (S.)

**114. Introduction to Classical Chinese (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 112 or equivalent language proficiency; consent of instructor. Introduction to the language in which, until the twentieth century, most official, documentary, scholarly, and belle-lettistic Chinese literature was written. GE credit: ArtHum | AH, WC.—F, S. (F, S.) Halperin, He

**115. Introduction to Classical Chinese II (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 114 or consent of instructor. Continuation of enhancing classical Chinese reading skills with literature ranging from the prose found in Han dynasty historical works, Six Dynasties anecdotal literature, and Tang occasional texts, as well as the poetic shi and fu genres. GE credit: ArtHum | AH, WC.—Halperin, He

**116. Introduction to Classical Chinese III (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 115 or consent of instructor. Translations of extended readings in the original sources and brief analyses of syntax. These sources will include texts written by well-known figures from the eighth through fifteenth centuries, composing in a wide variety of genres. GE credit: ArtHum | AH, WC.—Halperin, He

**120. Advanced Chinese (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 113 or placement exam or consent of instructor. Evaluation of readings from various genres (literature, newspapers, TV and movies, etc.) develop advanced reading, writing, aural comprehension, and formal/professional speech skills in Mandarin Chinese. Chinese society/cultural studies, especially those sociocultural issues reflected in the language used in learning materials. May be repeated one time for credit. Course material is different for each quarter of an academic year. Students may repeat course one time but repeat class cannot be for the same quarter taken in a previous academic year. GE credit: ArtHum | AH, OL, WC.—F, W, S. (F, W, S.)

**130. Readings in Traditional Chinese Fiction (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 111 or equivalent language proficiency. Examination of representative works of traditional Chinese fiction popular from the 12th Century until

the 17th and 18th centuries. Translations in English of the Chinese texts will be available to students as reference. May be repeated one time for credit. GE credit: ArtHum | AH, VL, WC.—He

**131. Readings in Traditional Chinese Poetry (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 111 or equivalent language proficiency; consent of instructor. Traditional Chinese poetry from its beginnings to the golden ages of Tang and Song, surveying forms and poets that best reveal the Chinese poetic sensibility and the genius of the language of Chinese poetry. GE credit: ArtHum | AH.—Yeh

**132. Readings in Modern Chinese Poetry (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 111 or equivalent language proficiency; consent of instructor. Chinese poetry from the Literary Revolution of 1917 to the present, surveying works that embody exciting innovations and reflect the modernity of twentieth-century Chinese society and culture. GE credit: ArtHum | AH, WC.—Yeh

**133. Readings in Modern Chinese Prose and Drama (4)**

Lecture—4 hours. Prerequisite: course 111 or equivalent language proficiency. Literary works and scholarly essays on selected topics of Chinese prose and drama, development of a deep understanding of Chinese culture and society through sophisticated reading materials of these two important genres of the modern period. Conducted in Chinese. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, WC.—Chen

**134. Chinese Film in Chinese Language (4)**

Lecture—3 hours; film viewing—3 hours. Prerequisite: course 111 or equivalent language proficiency. Chinese placement exam. Chinese film and scholarly essays on Chinese cinema and film history. Develop a deep understanding of Chinese culture and society through viewing and studying Chinese films in the Chinese language. GE credit: ArtHum or SocSci | AH or SS, OL, VL, WC.—Chen

**140. Readings in Classical Chinese (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Study and philological analysis of selected texts from the first millennium of Imperial China. May be repeated two times for credit. GE credit: ArtHum | AH.—He

**150. Fifth-Year Chinese: Selected Topics in Chinese Language, Literature, and Culture (4)**

Lecture/discussion—4 hours. Prerequisite: course 120 or placement exam or consent of instructor. Examination of literary works and scholarly essays on selected topics of Chinese culture and society. Development of a deep understanding of Chinese culture and society through sophisticated Chinese speaking and writing exercises. May be repeated three times for credit when topic differs. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, OL, WC, WE.—Chu, He, Yeh

**160. The Chinese Language (4)**

Lecture/discussion—4 hours. Prerequisite: course 6 or 3BL or 3CN or 4A (can be concurrent) or placement exam or consent of instructor; Linguistics 1 recommended. Evaluation of the Chinese language viewed in its linguistic context, synchronically and diachronically. Historical phonology, classical and literary language, rise of written vernacular, descriptive grammar of modern standard Chinese, dialectal variation, and sociolinguistic factors. GE credit: ArtHum | AH, WC.—Chu

**192. Chinese Internship (1-12)**

Internship—3-36 hours to be arranged. Prerequisite: upper division standing and consent of instructor. Work experience in the Chinese language, with analytical term paper on a topic approved by instructor. (P/NP grading only.)

**194H. Special Study for Honors Students (1-5)**

Independent study—3-15 hours. Prerequisite: senior standing and qualification for the Chinese honors program; consent of instructor. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Chinese literature, civilization, or language studies. May be repeated up to eight units for credit. (P/NP grading only.) GE credit: ArtHum | AH, WC, WE.—F, W, S. (F, W, S.)

**197T. Tutoring in Chinese (1-4)**

Tutoring—1-4 hours. Prerequisite: consent of Department. Leading of small voluntary discussion groups affiliated with one of the Department's regular courses. May be repeated up to four units for credit. (P/NP grading only.)—Chu

**198. Directed Group Study (1-5)**

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate****299. Research (1-12)**

(S/U grading only.)

**Professional****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: consent of instructor; graduate standing. Any course taught by a graduate student under the direction of the Director. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.) Chu

**Courses in Japanese (JPN)****Lower Division****1. Elementary Japanese (5)**

Lecture/discussion—5 hours. Introduction to spoken and written Japanese in cultural contexts, with emphasis on communication. GE credit: ArtHum | AH, OL, WC.—F. (F.)

**1A. Accelerated Intensive Elementary Japanese (15)**

Lecture/discussion—15 hours. Special 12 week accelerated, intensive summer session course that combines the work of courses 1, 2 and 3. Introduction to Japanese grammar and development of all language skills in cultural context with emphasis on communication. Not open for credit to students who have completed course 1, 2, or 3. GE credit: ArtHum | AH, OL, WC—Su.

**1AS. Intensive Elementary Japanese (15)**

Lecture/discussion—15 hours. Intensive course taught combining the work of courses 1, 2 and 3. Introduction to Japanese grammar and development of all language skills in a cultural context with emphasis on communication. Offered in Japan. Not open for credit to students who have taken course 1, 2, or 3. GE credit: ArtHum | AH, OL, WC—Su. (Su.)

**2. Elementary Japanese (5)**

Lecture/discussion—5 hours. Prerequisite: successful completion (C- or better) of course 1 or the equivalent language proficiency. Continuation of training in basic Japanese spoken and written skills. GE credit: ArtHum | AH, OL, WC—W. (W.)

**3. Elementary Japanese (5)**

Lecture/discussion—5 hours. Prerequisite: successful completion (C- or better) of course 2 or equivalent language proficiency. Continuation of training in basic spoken and written skills in Japanese language. GE credit: ArtHum | AH, OL, WC—S. (S.)

**4. Intermediate Japanese (5)**

Lecture/discussion—5 hours. Prerequisite: successful completion (C- or better) of course 3 or the equivalent language proficiency. Intermediate-level training in spoken and written Japanese in cultural context, based on language skills developed in course 3. GE credit: ArtHum | AH, OL, WC—F. (F.)

**5. Intermediate Japanese (5)**

Lecture/discussion—5 hours. Prerequisite: successful completion (C- or better) of course 4 or the equivalent language proficiency. Intermediate-level training in spoken and written Japanese in cultural context, based on language skills developed in course 4. GE credit: ArtHum | AH, OL, WC—W. (W.)

**6. Intermediate Japanese (5)**

Lecture/discussion—5 hours. Prerequisite: successful completion (C- or better) of course 5 or the equivalent language proficiency. Intermediate-level training in spoken and written Japanese in cultural context, based on language skills developed in course 5. GE credit: ArtHum | AH, OL, WC—S. (S.)

**7S. Intensive Intermediate Japanese (20)**

Lecture/discussion—20 hours. Prerequisite: course 2. Not open for students who have taken course 3, 4, 5, or 6; an exception can be made for students who have taken course 3 or its equivalent, provided that those five units are deducted from the 20 total unit load. Special intensive course that combines the work of courses 3, 4, 5, and 6. Introduction to Japanese grammar and development of all language skills in a cultural context with emphasis on communication. Taught in Japan. GE credit: ArtHum | AH, OL, WC—S. (S.)

**10. Masterworks of Japanese Literature (in English) (4)**

Lecture—3 hours; discussion—1 hour. Introduction to Japanese literature: readings and discussion in English of important works from earliest times to the present. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Sorensen

**15S. Introduction to Japanese Culture (2)**

Lecture/discussion—2 hours; fieldwork. Restricted to students enrolled in units for the Kyoto Quarter Abroad program. Aspects of Japanese culture: literature, history, religion, art, language, and society. Conducted in English; taught in Japan. (P/NP grading only) GE credit: ArtHum | AH, WC—S. (S.) Sorensen

**25. Japanese Language and Culture (in English) (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or Linguistics 1 or Anthropology 4 recommended. Classification and communication of experience in Japanese culture; principles of language use in Japanese society. Speech levels and honorific language, language and gender, minority languages, literacy. Role of Japanese in artificial intelligence and computer science. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE—Koyama

**31. Basic Kanji (4)**

Lecture—3 hours; practice—1 hour. Prerequisite: successful completion (C- or better) of course 1 or equivalent proficiency of basic writing system (Hiragana and Katakana) or consent of instructor. Restricted to students who have never been exposed to any form of Kanji or Chinese characters before; students who have completed schooling up to the 6th grade in the Japanese education system or equivalent or whose native languages have Chinese character orthography are not allowed to register this course. Introduction and mastery of 300 basic Kanji or Chinese characters to establish a solid foundation in the novel and complex Kanji encountered while learning Japanese. GE credit: ArtHum | AH, WC—Koyama

**50. Introduction to the Literature of China and Japan (4)**

Lecture/discussion—4 hours. Methods of literary analysis and their application to major works from the various genres of Chinese and Japanese literature (in translation), including film. East Asian cultural traditions will also be introduced. (Same course as Chinese 50.) GE credit: ArtHum, Div, Wrt | AH, WC—Gundry

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: AH—F, W, S. (F, W, S.)

**99. Special Study for Undergraduates (1-5)**

(P/NP grading only.)

**Upper Division****101. Japanese Literature in Translation: The Early Period (4)**

Lecture—3 hours; discussion—1 hour. Study of early Japanese literature from the Nara to the end of the Heian period through a broad survey of the major literary genres such as lyric poetry, court diaries, prose narratives, poem-tales, and classical Chinese writings. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—F. (F.) Gundry

**102. Japanese Literature in Translation: The Middle Period (4)**

Lecture—3 hours; discussion—1 hour. Study of the major literary genres from the twelfth century to the second half of the nineteenth century including poetry, linked-verse, military chronicles, no drama, Buddhist literature, haiku, haibun, kabuki, bunraku, plays and Edo prose narratives. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—W. (W.) Sorensen

**103. Japanese Literature in Translation: The Modern Period (4)**

Lecture—3 hours; discussion—1 hour. Modern Japanese literature from the 1870s to the 1970s. Surveys representative literary works and ideas against the social and intellectual background of the Meiji, Taisho, and Showa periods. GE credit: ArtHum, Div, Wrt | AH, WC.—S. (S.) Chang

**104. Modern Japanese Literature: War and Revolution (3)**

Lecture/discussion—3 hours. Perspectives and sensibilities with which major modern Japanese writers have interpreted the traumatic and often poignant experiences of war and socio-political upheavals from the late nineteenth century to the 1970s. Lectures, discussions, and readings in English. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC.—Chang

**105. Modern Japanese Literature: Hero and Anti-hero (4)**

Lecture/discussion—4 hours. The ways in which representative hero and anti-hero protagonists in modern Japanese literature perceive, confront, challenge, and resolve a wide array of social, political, and moral problems of their times. Course taught in English. GE credit: ArtHum, Div, Wrt | AH, WC.—Chang

**106. Japanese Culture Through Film (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: consent of instructor. Aspects of Japanese culture such as love, sexuality, war, the military, the family, the position of women, growing up and death as portrayed in Japanese cinema. Lectures, discussion, and readings in English. Films with English subtitles. GE credit: ArtHum, Div, Wrt | AH, WC—Chang, Gundry

**107. Modern Japanese Autobiographies (in English) (4)**

Lecture—3 hours; term paper/discussion—1 hour. Exploring the modern and contemporary Japanese social and cultural landscape through critical analysis of modern Japanese autobiographies by prominent and other authors in the 19th and 20th centuries. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC—F. (F.) Chang

**108. Poetry of China and Japan (in English) (4)**

Lecture—3 hours; discussion—1 hour. A comparative approach to Chinese and Japanese poetry, examining poetic practice in the two cultures; includes a general outline of the two traditions, plus study of poetic forms, techniques, and distinct treatments of universal themes: love, nature, war, etc. (Same course as Chinese 108.) GE credit: ArtHum, Div, Wrt | AH, WC.

**109. Japanese Popular Culture (5)**

Lecture—3 hours; discussion—1 hour; film viewing—3 hours. Japanese popular culture, from its medieval/early modern precedents to contemporary incarnations. Emphasis on the major forms of twentieth-century popular culture, including genre films,

popular theater, TV manga (cartoons), animation and science fiction. GE credit: ArtHum, Div | AH, VL, WC.

### **111. Modern Japanese: Reading and Discussion (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: successful completion (C- or better) of course 6 or the equivalent language proficiency. Readings in modern Japanese short stories, newspaper articles, and essays; conversation practice based on these readings. GE credit: ArtHum | AH, OL.—F. (F.)

### **112. Modern Japanese: Reading and Discussion (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: successful completion (C- or better) of course 111 or equivalent language proficiency. Continuation of course 111. GE credit: ArtHum | AH, OL, WC.—W. (W.)

### **113. Modern Japanese: Reading and Discussion (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: successful completion (C- or better) of course 112 or equivalent language proficiency. Continuation of course 112. GE credit: ArtHum | AH, OL, WC.—S. (S.)

### **114A. Spoken Japanese (2)**

Discussion—2 hours. Prerequisite: successful completion (C- or better) of course 6 or equivalent language proficiency. Training in spoken Japanese for students with a basic working knowledge of the language. (P/NP grading only.) GE credit: OL.

### **114B. Spoken Japanese (2)**

Discussion—2 hours. Prerequisite: successful completion (C- or better) of course 114A or equivalent language proficiency or consent of instructor. Continuation of course 114A. Training in spoken Japanese for students with a basic working knowledge of the language. (P/NP grading only.) GE credit: OL.

### **114C. Spoken Japanese (2)**

Discussion—2 hours. Prerequisite: successful completion (C- or better) of course 114B or equivalent language proficiency or consent of instructor. Continuation of course 114B. Training in spoken Japanese for students with a basic working knowledge of the language. (P/NP grading only.) GE credit: OL.

### **115. Japanese Composition (2)**

Lecture—2 hours. Prerequisite: successful completion (C- or better) of course 6 or consent of instructor. Development of skills in the techniques of writing Japanese. Practice in short essay writing with an aim toward mastery of the vocabulary and syntax of written style Japanese.—F. (F.)

### **117S. Intensive Modern Japanese: Reading and Discussion (17)**

Lecture/discussion—17 hours. Prerequisite: course 5. Introduction to basic Japanese grammar and development of more advanced reading, writing, and conversation skills in a cultural context. Combination of courses 6, 111, 112, and 113 taught intensively in Japan. Not open to students who have taken courses 6, 111, 112, or 113; an exception can be made for students who have taken course 6 or its equivalent, provided that those five units are deducted from the 17 total unit load. GE credit: ArtHum | AH, OL, WC.

### **121. Advanced Japanese I (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: successful completion (C- or better) of course 113 or consent of instructor. First of three courses in a series of fourth year Advanced Japanese which focuses on the levels of formality or politeness in conversation as well as sociocultural aspects and topics in the Japanese society. GE credit: ArtHum | AH, OL, WC, WE.—Koyama

### **122. Advanced Japanese II (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: successful completion (C- or better) of course 121 or consent of instructor. Second of three courses in a

series of fourth-year Advanced Japanese which focuses on the levels of formality or politeness in conversation as well as socio-cultural aspects and topics in the Japanese society. GE credit: ArtHum | AH, OL, WC, WE.—W. (W.) Koyama

### **123. Advanced Japanese III (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: successful completion (C- or better) in course 122 or consent of instructor. Third of three courses in a series of 4th year Advanced Japanese which focuses on the levels of formality or politeness in conversation as well as socio-cultural aspects and topics in the Japanese society. GE credit: ArtHum | AH, OL, WC, WE.—S. (S.) Koyama

### **130. Readings in Modern Japanese Literature to 1926 (4)**

Lecture/discussion—4 hours. Prerequisite: course 113. Restricted to completion of course 113 or equivalent as determined by taking a placement exam or consent of instructor. Short stories and essays by Japanese writers of the Meiji and Taishō eras, from 1868 to 1926. Authors include Natsume Sōseki, Izumi Kyōka, Tanizaki Jun'ichirō and Akutagawa Ryūnosuke. Readings and discussion in Japanese with some emphasis on translation into English. GE credit: ArtHum | AH, WC.—Sorensen

### **131. Readings in Modern Japanese Literature: 1920-1945 (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 113 or the equivalent language proficiency. Fourth-year level reading of representative works of modern Japanese literature including short stories, novellas, diaries, memoirs, poetry and excerpts from novels and plays from 1920 through the militaristic era, to the end of the war years in 1945. GE credit: ArtHum | AH.—Chang, Gundry

### **132. Readings in Modern Japanese Literature: 1945-1970 (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 113 or the equivalent language proficiency. Continuation of course 131, but may be taken independently. Covers selected texts from the immediate post-war years beginning in 1945 down to 1970 and the post-war recovery. GE credit: ArtHum | AH.—Chang

### **133. Readings in Modern Japanese Literature: 1970 to Present (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 113 or the equivalent language proficiency. Continuation of course 132, but may be taken independently. Covers selected texts from 1970 to the present. Offered in alternate years. GE credit: ArtHum | AH, WC.—Chang

### **134. Readings in the Humanities: Traditional Culture (4)**

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: course 113 or the equivalent language proficiency. Fourth-year level reading of modern works by major specialists on traditional Japanese culture: history, religion, thought, art, international relations, and literary history and criticism. Focus is equally on developing reading skills and learning about Japanese culture. GE credit: ArtHum | AH, WC.—Sorensen

### **135. Readings in the Humanities: The Modern Period (4)**

Lecture—3 hours; term paper. Prerequisite: course 113 or equivalent language proficiency. Fourth-year level reading of authentic modern writings on Japanese culture, history, philosophy, society, religion, law, politics, international relations, aesthetics, and comparative culture by prominent critics, commentators, and scholars. GE credit: AH, WC.—Chang

### **136. Readings in Newspapers and Magazines (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 113 or the equivalent language proficiency. Fourth-year level reading of newspaper and magazine reports, articles, and editorials on domestic and international affairs relating to contemporary Japan. GE credit: ArtHum | AH, WC.—Chang

### **137. Readings in Contemporary Japanese Literature (4)**

Lecture/discussion—4 hours. Prerequisite: course 113 or equivalent language proficiency. Readings of short stories and essays by contemporary writers. Representative writers include Yoshimoto Banana, Otsuchi, Suzuki Koji, Kyogoku Natsumi, Ogawa Yoko, and Murakami Haruki. Readings and discussion in Japanese with some emphasis on translation into English. GE credit: AH, WC.—Sorensen

### **138. Readings in the Humanities: Japan Today (4)**

Lecture/discussion—4 hours. Prerequisite: course 113. Restricted to completion of course 113 or equivalent as determined by taking a placement exam or consent of instructor. Topical essays focused on contemporary Japan. Themes center on defining Japan today in terms of its future and its past such as through its urban society, trends in architecture, "soft power" industries, and "traditional" elements as mainstays of Japan's cultural currency. GE credit: ArtHum | AH, WC.—Sorensen

### **141. Introduction to Classical Japanese (4)**

Lecture/discussion—4 hours. Prerequisite: course 113 or equivalent language proficiency. The basic features of classical Japanese grammar through careful reading of selected literary texts such as Hojoki or Tsurezuregusa.—Sorensen

### **151. Japanese Linguistics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 3 or equivalent language proficiency. Introduction to Japanese linguistics, featuring key aspects of the Japanese language. Analysis of Japanese from the perspectives of phonology, syntax, discourse analysis, sociolinguistics and psycholinguistics. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Koyama

### **152. Traditional Japanese Drama (4)**

Lecture—3 hours; discussion—1 hour. Survey in English of Japanese drama, focusing on traditional forms: noh, kyōgen, bunraku puppet theater, and kabuki, with some attention to modern theater. Texts of plays and secondary works on performance techniques and the composition of plays. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Sorensen

### **153. Love, Sexuality and the Family in Modern Japanese Literature (4)**

Lecture—3 hours; discussion—1 hour. Modern Japanese literature from the late 19th century to the present with a focus on love and sexuality in various forms, particularly as understood through the evolving institution of the Japanese family. Lectures, readings and discussions in English. GE credit: AH, WC, WE.—W. (W.)

### **154. Tourism and Heritage in Japan (4)**

Lecture—3 hours; discussion—1 hour. Focus on related concepts of tourism and cultural heritage within Japan, with attention to questions of tradition, authenticity and nostalgia. Examination of cultural heritage sites on various scales, including built environment, national cultural forms, and local performances such as festivals. GE credit: AH, WC, WE.—S. (S.)

### **155. Introduction to Japanese Folklore (4)**

Lecture—3 hours; discussion—1 hour. Focus on narrative genres of myth, legend, and folktale, with additional attention paid to festivals, folk art, belief systems, and the development of folklore studies (minzokugaku) as an academic discipline. Examination of the relationship of folklore to ethnic and national identity. GE credit: AH, WC, WE.—W. (W.)

### **156. Japanese Literature on Film (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Survey of films based on works of Japanese literature, emphasis on pre-modern and early modern texts. Introduction to major directors of Japan, with a focus on cinematic adaptation. Lectures and readings in English. Films in Japanese with English subtitles. (Same course as Cinema and Technocultural Studies 148B.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—(S.) Sorensen

**157. Japanese Women Writers (4)**

Lecture/discussion—4 hours. Survey of women writers from earliest times to the present. Genres include poetry, narrative fiction, diaries, short stories, novels, and film. Representative authors include Murasaki Shikibu, Sei Shônagon, Higuchi Ichijo, Enchi Fumiko and Ogawa Yôko. Readings and discussion in English. GE credit: ArtHum | AH, WC, WE.—F, W. Sorensen

**158. The Supernatural in Japan (4)**

Lecture/Discussion—3 hours; Film Viewing—3 hours. Depictions of the supernatural in Japanese history through the contemporary era. Overview of Japanese literary and visual arts and the socio-historical contexts of the supernatural. Lectures and readings in English. Films in Japanese with English subtitles. Offered irregularly. GE credit: ArtHum | AH, VL, WC.—Sorensen

**192. Japanese Internship (1-12)**

Internship—3-36 hours to be arranged. Work experience in Japanese language, with analytical term paper on a topic approved by instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

**194H. Special Study for Honors Students (1-5)**

Independent Study—3-15 hours. Prerequisite: senior standing and qualification for the Japanese honors program; consent of instructor. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Japanese literature, civilization, or language studies. May be repeated up to eight units for credit. (P/NP grading only.) GE credit: ArtHum | AH, WC, WE.—F, W, S. (F, W, S.)

**197T. Tutoring in Japanese (1-5)**

Tutoring—1-5 hours. Prerequisite: consent of Department chairperson. Leading of small voluntary discussion groups affiliated with one of the Program's regular courses. May be repeated for credit, but only 2 units may be applied to the minor. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: AH, WC.—F, W, S. (F, W, S.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.) GE credit: AH, WC.

**Graduate****291. Seminar in Modern Japanese Literature: Major Writers (4)**

Seminar—4 hours. Prerequisite: one of courses 130, 131, 132, 133, 134, 135, 136, 137, 138 or equivalent language proficiency. In-depth reading and critical analyses of major works by and critical literature on one or two prominent modern or contemporary writers such as Natsume Soseki, Mori Ogai, Shimazaki Toson, Akutagawa Ryunosuke, Tanizaki Junichiro, Abe Kobo and Oe Kenzaburo. Offered in alternate years.—S. Chang

**299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**East Asian Studies**

(College of Letters and Science)

Katharine Burnett, Ph.D., Program Director

**Program Office.** 1277 Social Science and Humanities Building; 530-752-3406;  
<http://eastasian.ucdavis.edu>

**Committee in Charge**

Katharine Burnett, Ph.D., Associate Professor  
(*Art History*)

Beverly Bossler, Ph.D., Professor (*History*)

David Gundry, Ph.D., Assistant Professor

(*East Asian Languages & Cultures*)

Kyu Hyun Kim, Ph.D., Associate Professor (*History*)  
Sheldon Lu, Ph.D., Professor (*Comparative Literature*)  
Ethan Scheiner, Ph.D., Professor (*Political Science*)  
Xiaoling Shu, Ph.D., Professor (*Sociology*)

Eddy U, Ph.D., Associate Professor (*Sociology*)  
Li Zhang, Ph.D., Professor (*Anthropology*)

**The Major Program**

The East Asian Studies major gives the student an understanding of East Asia and Southeast Asia through interdisciplinary studies, including courses on East Asian countries within the humanities and social sciences. Students are encouraged to pursue study abroad opportunities, as well as other guided studies pertaining to East and Southeast Asia.

**The Program.** The program offers core courses in East Asian humanities and social sciences, including history, comparative literature, languages, philosophy and religion, political science, sociology, as well as courses focused on Southeast Asia. Science courses that closely engage the student of East and/or Southeast Asia are also eligible to count towards the major.

Along with taking the lower division and upper division depth subject courses; the student may choose additional courses that concentrate on a special field of interest, such as anthropology or history, or special courses such as honor thesis, independent study, internships, and study abroad.

**Programs, Internships, and Career Alternatives.** To enhance the student's understanding of East and Southeast Asia, our majors are strongly encouraged to participate in UC Davis's Study Abroad Program, which gives students the opportunity to live and experience a culture within East or Southeast Asia. Our majors are also encouraged to work with UC Davis's Internship and Career Center, which provides customized assistance for EAS students to obtain legislative, legal, and business internships and careers. Likewise, the UC Davis Sacramento and Washington Centers arrange internships and run full-credit academic programs in Sacramento and Washington D.C., with a wide range of opportunities for our majors. Graduating EAS majors are prepared for employment in government agencies (such as Foreign Service), state agencies, international or non-governmental organizations (NGO, such as the United Nations), foundations, journalism, teaching, counseling, and companies with international business interests, trade, or finance. The broad-based and multidisciplinary components of this major program enhance career prospects in jobs that demand knowledge of cultures of East and Southeast Asia.

**A.B. Major Requirements:****UNITS Preparatory Subject Matter.....21-22**

History 9A and 9B .....	8
One course from: Art History 1D, Chinese 7, 10, 11, Comparative Literature 53A, East Asian Studies 88, Japanese 10, 25, 50, Religious Studies, 75 .....	3-4
Two courses (or the equivalent) of Chinese, Japanese, or other East Asian language study (Chinese 12; Japanese 1-2) .....	10

**Depth Subject Matter .....24**

Choose 24 units from the following courses: Anthropology 134, 137, 143A, 148A, 148B, 149A, 149B; Art History 163A, 163B, 163C, 164, 190F, 190G; Chinese 100A, 100B, 101, 102, 103, 104, 105, 106, 107, 108, 109A; Community and Regional Development 153A; Comparative Literature 110, 153; Design 142A; Dramatic Art 144A, 144B, 144C, 154; East Asian Studies 113; 190; Economics 171; History 102G; 102H; 102N; 191A-J; 194A-E, 195B; Japanese 101, 102, 103, 104, 105, 106, 107, 108, 109, 152, 156, 157; Music 129C; Political Science 148B; Religious Studies 165; 170, 172, 175A; Sociology 147, 188.

**Elective Requirement.....16**

Choose 16 units from the following:  
Any East Asian Studies special course  
(Approved courses: East Asian Studies 190,

192, 194H, 196A-B, 198 - maximum 12 units from this list); Any Chinese or Japanese upper division course; Any Depth Subject Course; Any upper division Education Abroad course focusing on East Asia or Southeast Asian.

**Total Units for the Major .....61-62****Minor Program Requirements:**

Courses taken for the minor are expected to reflect a predominant interest in East Asia or Southeast Asia. All upper division courses counting towards the East Asian Studies major, may be used to fulfill the requirements for the minor program, as long as they deal predominantly with East Asia or Southeast Asia.

UNITS

**East Asian Studies.....20**

Choose any five upper division courses from the Depth Subject list for the major, or from the following list: Any Chinese or Japanese Upper Division Course; Any East Asian Studies special course (Approved: East Asian Studies 190, 192, 194H, 196A/B, 198); Study Abroad Upper Division courses focusing on East or Southeast Asia .....20

**Courses in East Asian Studies (EAS)****Lower Division****88. Korean Society: Late 19th Century to the Present (4)**

Lecture/discussion—4 hours. Modern Korean society (late 19th Century to contemporary period), emphasizing the perseverance and transformations of traditional social and cultural patterns. GE credit: ArtHum, Div, Wrt.—W. Kim

**Upper Division****113. Cinema and Society in China (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one course from History 190C, 193, or consent of instructor. Knowledge of Chinese not required. Viewing and analysis of one Chinese film with English subtitles each week, followed by discussion and short essays. Cinematic technique, social values and film topics from 1930s to today. Not open for credit to students who have completed Chinese 113. GE credit: ArtHum, Div, Wrt.—S. (S.)

**190. East Asian Studies Seminar (4)**

Seminar—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Political, social, cultural, and economic issues in East Asia. Topic varies each year. May be repeated for credit if topic differs. Offered irregularly.

**192. East Asian Studies Internship (1-12)**

Internship—3-36 hours; term paper. Prerequisite: upper division standing and consent of instructor. Work experience in the East Asian Studies field, with analytical term paper on a topic approved by the instructor. (P/NP grading only.)

**194H. Special Study for Honors Students (1-5)**

Independent study—1-5 hours. Prerequisite: open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in East Asian Studies culture, society, or language. (P/NP grading only.)

**196A. Honors Seminar (4)**

Seminar—2 hours; conference—2 hours. Prerequisite: GPA of 3.500 in the major; senior standing; consent of instructor. A two-quarter research project culminating in an Honors thesis. A grade of B or higher must be earned to qualify the student for honors distinction at graduation. (Deferred grading only, pending completion of sequence.)—F. (F.)

**196B. Honors Seminar (4)**

Seminar—2 hours; conference—2 hours. Prerequisite: GPA of 3.500 in the major; senior standing; consent of instructor. A two-quarter research project culminating in an Honors thesis. A grade of B or

higher must be earned to qualify the student for honors distinction at graduation. (Deferred grading only, pending completion of sequence.)—W. (W.)

### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Ecological Management and Restoration

(College of Agricultural and Environmental Sciences)

**Faculty.** See *Plant Sciences*, on page 514.

### The Major Program

This major is designed for students who are interested in understanding how to manage and restore wildland and rangeland plant communities. Courses are selected to provide an interdisciplinary background that encompasses ecology, applied plant biology, and the social sciences. Students will acquire a core understanding of natural and managed ecosystems and how they function, interact with the natural environment, are connected with human society and social change, and are restored and managed.

**The Program.** The curriculum provides depth in the ecological and botanical sciences directed toward an integrated understanding of how communities and ecosystems function and how this knowledge can assist in their management and restoration. Courses in environmental policy and law expose the students to the social drivers and constraints of ecosystem management. All students gain practical experience through practical field courses and a required internship. Students may also pursue an Honors thesis in their senior year.

**Career Alternatives.** Graduates from this program are prepared to pursue a wide range of careers, including positions in ecological restoration and ecosystem management; rangeland and reserve management; environmental consulting; public, private, or non-profit agencies concerned with restoration and natural resource management; Cooperative Extension; teaching; information and communication services. Graduates are qualified to pursue advanced studies in fields such as ecology, agroecology, environmental studies, geography or weed science.

### B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter.....49-58

Biological Sciences 2A, 2B, 2C .....	15
Chemistry 2A, 2B.....	10
Physics 1A, 1B or Physics 7A, 7B, 7C .....	6-12
Mathematics 16A, 16B or Mathematics 17A, 17B or Mathematics 21A, 21B.....	6-8
Plant Sciences 120.....	4
Soil Science 100.....	5
Plant Sciences 101 or Environmental Science and Policy 1 .....	3-4

#### Depth Subject Matter .....54-69

Environmental Horticulture 160, 160L.....	4
Soil Science 102 or 105 or 111 or 118 or 120 .....	3-5
Two ecology courses chosen from: Environmental Science and Policy 155, Plant Biology 117, Plant Sciences 131, 144, 147 Wildlife, Fish, and Conservation Biology 156, 157 .....	5-8
Evolution and Ecology 100 or Plant Biology 102 or 116.....	4-5
Plant Sciences 152 or Environmental Horticulture 150.....	3-4
Four restoration/conservation courses chosen from: Plant Sciences 130, 135, 150, Environmental Science and Management 141,	

Environmental Science and Policy 127, 155L, Wildlife, Fish, and Conservation Biology 154, 155, 155L .....	11-16
Plant Sciences 176 .....	4
Environmental Science and Management 100, Hydrology 143, 147, or 151 .....	3-4
Plant Sciences 171 or Environmental Horticulture 120.....	3-4
Plant Sciences 100C Landscape Architecture 180F or Plant Sciences 163 .....	3
Plant Biology 111 or Plant Sciences 100A .....	3-4
Environmental Science and Policy 160 or 161 or 171 or 172 or 179 .....	4-5
Internship: Plant Sciences 192 or 164, must be selected in consultation with master adviser .....	2
In addition to the required coursework listed above, students might consider taking some of the following courses: Entomology 107, Hydrology 124, Landscape Architecture 150, Plant Sciences, 158, 135, 141 and 162, Science and Society 18, and Soil Science 109	

#### Total Units for the Major .....103-127

##### Major Adviser. T.P. Young

**Advising Center** for the major, including peer advising, is located in 1220 Plant and Environmental Sciences 530-752-1715.

Thomas Coombs-Hahn, Ph.D., Professor (Neurobiology, Physiology, and Behavior)	
Anthony V. Cornel, Ph.D., Associate Professor (Entomology)	
Howard V. Cornell, Ph.D., Professor Emeritus (Environmental Science and Policy)	
Margaret Crofoot, Ph.D., Assistant Professor (Anthropology)	
Randy A. Dahlgren, Ph.D., Professor (Land, Air and Water Resources) Academic Senate Distinguished Teaching Award	
Christyann M. Darwent, Ph.D., Associate Professor (Anthropology)	
Serge I. Doroshov, Ph.D., Professor (Animal Science)	
John M. Eadie, Ph.D., Professor (Wildlife, Fish, and Conservation Biology)	
Jonathan Eisen, Ph.D., Professor (Evolution and Ecology)	
Deborah L. Elliott-Fisk, Ph.D., Professor (Wildlife, Fish, and Conservation Biology)	
Valerie T. Eviner, Ph.D., Associate Professor (Plant Sciences)	
Ian C. Falloona, Ph.D., Assistant Professor (Land, Air, and Water Resources)	
Nann A. Fangu, Ph.D., Assistant Professor (Wildlife, Fish Conservation Biology)	
Y. Hossein Farzin, Ph.D., Professor (Agricultural and Resource Economics)	
Howard Ferris, Ph.D., Professor (Nematology)	
Albert Fischer, Ph.D., Professor (Plant Sciences)	
Janet E. Foley, Ph.D., Professor (VM: Epidemiology)	
Brian Gaylord, Ph.D., Associate Professor (Evolution and Ecology)	
Shu Geng, Ph.D., Professor (Plant Sciences)	
Paul Gepts, Ph.D., Professor (Plant Sciences)	
Matthew E. Gilbert, Ph.D., Assistant Professor (Plant Sciences)	
Steven E. Greco, Ph.D., Associate Professor (Environmental Design)	
Jennifer Gremer, Ph.D., Assistant Professor (Evolution and Ecology)	
Susan L. Handy, Ph.D., Professor (Environmental Science and Policy)	
Susan Harrison, Ph.D., Professor (Environmental Science and Policy)	
Alan Hastings, Ph.D., Professor (Environmental Science and Policy)	
Robert Hijmans, Ph.D., Associate Professor (Environmental Science and Policy)	
Tessa Hill, Ph.D., Associate Professor (Geology)	
Marcel Holyoak, Ph.D., Professor (Environmental Science and Policy)	
William Horwath, Ph.D., Professor (Land, Air and Water Resources)	
Benjamin Z. Houlton, Ph.D., Assistant Professor (Land, Air and Water Resources)	
Silas S. O. Hung, Ph.D., Professor (Animal Science)	
Louise E. Jackson, Ph.D., Professor (Land, Air and Water Resources)	
Marie A. Jasieniuk, Ph.D., Associate Professor (Plant Sciences)	
Yufang Jin, Ph.D., Assistant Professor (Land, Air and Water Resources)	
Richard Karban, Ph.D., Professor (Entomology)	
Ermias Kebreab, Ph.D., Professor (Animal Science)	
Douglas A. Kelt, Ph.D., Professor (Wildlife, Fish, and Conservation Biology)	
Christine Krueder Johnson, Ph.D., Associate Professor (VM: Wildlife Health Center)	
Dietmar Kuelitz, Ph.D., Associate Professor (Animal Science)	
Emilio A. Laca, Ph.D., Professor (Plant Sciences)	
John Largier, Ph.D., Professor (Environmental Science and Policy)	
Andrew M. Latimer, Ph.D., Assistant Professor (Plant Sciences)	
Sharon P. Lawler, Ph.D., Professor (Entomology)	
Edwin E. Lewis, Ph.D., Professor (Nematology)	
C. Y. Cynthia Lin, Ph.D., Associate Professor (Agricultural and Resource Economics, Environmental Science and Policy)	
Mark Lubell, Ph.D., Professor (Environmental Science and Policy)	
Brenda McCowan, Ph.D., Professor (VM: Population Health and Reproduction)	
Richard L. McElreath, Ph.D., Associate Professor (Anthropology)	
Neil McRoberts, Ph.D., Assistant Professor (Plant Pathology)	
Michael R. Miller, Ph.D., Assistant Professor (Animal Science)	
Frank M. Mitloehner, Ph.D., Associate Professor (Animal Science)	
Steven G. Morgan, Ph.D., Professor (Environmental Science and Policy, Bodega Marine Laboratory)	
Peter B. Moyle, Ph.D., Professor (Wildlife, Fish, and Conservation Biology)	
Steven A. Nadler, Ph.D., Professor (Nematology)	
David Neale, Ph.D., Professor (Plant Sciences)	
Gabrielle Nevitt, Ph.D., Professor (Neurobiology, Physiology, Behavior)	
Debbie A. Niemeier, Ph.D., Professor (Civil and Environmental Engineering)	
Gregory Pasternack, Ph.D., Professor (Land, Air and Water Resources)	

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;

ACGH-American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience

Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience

Quarter Offered: F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses

Gail L. Patricelli, Ph.D., Assistant Professor (*Evolution and Ecology*)  
 Kyaw Tha Paw U, Ph.D., Professor (*Land, Air and Water Resources*)  
 Dan Potter, Ph.D., Professor (*Plant Sciences*)  
 James F. Quinn, Ph.D., Professor (*Environmental Science and Policy*)  
 Marcel Rejmanek, Ph.D., Professor (*Evolution and Ecology*)  
 Eliska Rejmankova, Ph.D., Professor (*Environmental Science and Policy*)  
 David Rizzo, Ph.D., Professor (*Plant Pathology*)  
 Jorge Luiz Mazza Rodrigues, Ph.D., Associate Professor (*Land Air & Water Resources*)  
 Jay Rosenheim, Ph.D., Professor (*Entomology*)  
 Academic Senate Distinguished Teaching Award  
 Jeffrey Rossell-Barra, Ph.D., Associate Professor (*Plant Sciences*)  
 James N. Sanchirico, Ph.D., Professor (*Environmental Science and Policy*)  
 Eric D. Sanford, Ph.D., Associate Professor (*Evolution and Ecology*)  
 S.G. Schladow, Ph.D., Professor (*Civil and Environmental Engineering*)  
 Johanna Schmitt, Ph.D., Professor (*Evolution & Ecology*)  
 Thomas W. Schoener, Ph.D., Professor (*Evolution and Ecology*)  
 Sebastian Schreiber, Ph.D., Professor (*Evolution and Ecology*)  
 Mark W. Schwartz, Ph.D., Professor (*Environmental Science and Policy*) Academic Senate Distinguished Teaching Award  
 Kate M. Scow, Ph.D., Professor (*Land, Air and Water Resources*)  
 Arthur M. Shapiro, Ph.D., Distinguished Professor (*Evolution and Ecology*)  
 Andrew Sih, Ph.D., Professor (*Environmental Science and Policy*)  
 David R. Smart, Ph.D., Associate Professor (*Viticulture and Enology*)  
 Michael R. Springborn, Ph.D., Assistant Professor (*Environmental Science and Policy*)  
 Jay Stachowicz, Ph.D., Professor (*Evolution and Ecology*) Academic Senate Distinguished Teaching Award  
 Maureen Stanton, Ph.D., Professor (*Evolution and Ecology*)  
 Sharon Y. Strauss, Ph.D., Professor (*Evolution and Ecology*)  
 Donald Strong, Ph.D., Professor (*Evolution and Ecology*)  
 Ron Tjeerdema, Ph.D., Professor (*Environmental Toxicology*)  
 Brian Todd, Ph.D., Assistant Professor (*Wildlife, Fish Conservation Biology*)  
 Anne Todgham, Ph.D., Assistant Professor (*Animal Science*)  
 Thomas P. Tomich, Ph.D., Professor (*Environmental Science and Policy, Human and Community Development*)  
 Susan L. Ustin, Ph.D., Professor (*Land, Air and Water Resources*)  
 Chris Van Kessel, Ph.D., Professor (*Plant Sciences*)  
 Dirk Van Vuren, Ph.D., Professor (*Wildlife, Fish, and Conservation Biology*)  
 Astrid Volder, Ph.D., Assistant Professor (*Plant Sciences*)  
 Peter C. Wainwright, Ph.D., Professor (*Evolution and Ecology*) Academic Senate Distinguished Teaching Award  
 Andrew Whitehead, Ph.D., Assistant Professor (*Environmental Toxicology*)  
 Neal M. Williams, Ph.D., Assistant Professor (*Entomology*)  
 Susan L. Williams, Ph.D., Professor (*Evolution and Ecology*)  
 Louie H. Yang, Ph.D., Assistant Professor (*Entomology*)  
 Truman P. Young, Ph.D., Professor (*Plant Sciences*)  
 Maciej Zwieniecki, Ph.D., Associate Professor (*Plant Sciences*)

## Affiliated Faculty

William Bennett, Ph.D., Associate Researcher Ecologist (*John Muir Institute of the Environment*)  
 Richard E. Connon, Ph.D., Assistant Adjunct Professor (*Vet Med*)  
 Edwin DeHaven Grosholz, Ph.D., Professor, Cooperative Extension Specialist (*Environmental Science and Policy*)  
 Richard Y. Evans, Ph.D., Extension Specialist (*Plant Sciences*)  
 Erica Fleishman, Ph.D., Researcher (*Environmental Science and Policy*)  
 Elise Gornish, Ph.D., Assistant Specialist Cooperative Extension (*Plant Sciences*)  
 Joshua M. Hull, Ph.D., Assistant Adjunct Professor (*Animal Science*)  
 Peter Klimley, Ph.D., Adjunct Professor, Associate Research Biologist (*Bodega Marine Laboratory*)  
 Bernie May, Ph.D., Adjunct Professor (*Animal Science*)  
 A. Keith Miles, Ph.D., Adjunct Professor (*Wildlife, Fish, and Conservation Biology*)  
 Malcolm North, Ph.D., Research Associate (*Plant Sciences*)  
 Lorence Oki, Ph.D., Associate Specialist in Cooperative Extension (*Plant Sciences*)  
 Leslie Roche, Ph.D., Assistant Specialist in Cooperative Extension (*Plant Sciences*)  
 Ben Sacks, Ph.D., Adjunct Associate Professor (*VM: Population Health and Reproduction*)  
 Hugh Safford, Ph.D., Associate-in (*Environmental Science and Policy*)  
 Samuel Sandoval Solis, Ph.D., Assistant Specialist in Cooperative Extension (*Land, Air and Water Resources*)  
 Andrea Schreier, Ph.D., Adjunct Assistant Professor (*Animal Science*)  
 Kenneth W. Tate, Ph.D., Cooperative Extension Specialist (*Plant Sciences*)  
 Swee Teh, Ph.D., Associate Research Toxicologist/ Pathologist (*Anatomy, Physiology and Cell Biology*)  
 Lisa C. Thompson, Ph.D., Associate Specialist in Cooperative Extension (*Wildlife, Fish, and Conservation Biology*)  
 Minghua Zhang, Ph.D., Associate Adjunct Professor (*Land, Air and Water Resources*)

**Graduate Study.** The Graduate Group in Ecology offers the M.S. and Ph.D. degrees. Ecology is a science that integrates numerous fields of study to attain deep understanding of natural and societal influences on the distribution, abundances, behaviors, traits, and ecosystem functions of organisms. In order to accommodate varied student interests, the Group has developed several 'areas of emphasis' with specialized programs of study: agricultural ecology, conservation ecology, ecosystems and landscape ecology, ecotoxicology, environmental policy and human ecology, integrative ecology, marine ecology, physiological ecology and restoration ecology. For further details, contact the Group office.

**Preparation.** Appropriate preparation is undergraduate work in any of the biological, social or behavioral, and physical sciences, mathematics or engineering. Applicants will normally be expected to have completed the following courses during the undergraduate years or shortly after matriculating: two courses each in introductory biology, general chemistry and physical science; one course each in calculus, an upper division introduction to ecology course and introductory statistics. Students that choose the environmental policy and human ecology area of emphasis are only required to complete one course in general chemistry. They may also substitute one quantitative course in social science such as micro- or macro-economics for one chemistry or physics requirement.

**Graduate Advisers.** E. Kebreab, S. Lawler, E. Lewis (*Ecosystems and Landscape Ecology*), M. Lubell, M. Miller, P. Moyle, E. Rejmankova, K. Rice (*Restoration Ecology*), J. Richards (*Integrative Ecology*), B. Sacks, J. Sanchirico (*Environmental Policy & Human Ecology*), E. Sanford (*Marine Ecology*), A. Shapiro (*Conservation Ecology*), M. Springborn, D.

Strong, R. Tjeerdema (*Ecotoxicology and Physiological Ecology*), A. Whitehead (*Ecological Genomics and Genetics*), N. Williams (*Agricultural Ecology*)

## Courses in Ecology (ECL)

### Graduate

#### 203. Physiological Ecology (3)

Lecture—3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Studies 100; Neurobiology, Physiology, and Behavior 110 or Plant Biology 111 or Environmental Studies 129; elementary calculus. A comparative examination of several animal groups addressing fundamental physiological mechanisms that shape the ecology of each animal group. Offered in alternate years.—S.

#### 204. Population and Community Ecology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Evolution and Ecology 101, Mathematics 21A-21B or consent of instructor; Mathematics 22B recommended. Review of major concepts of population ecology and community ecology, with emphasis on the rationale of theory and use of theory as applied in the ecology of natural and managed systems. Offered in alternate years.—F. (F.)

#### 205. Community Ecology (4)

Lecture—2 hours; discussion—2 hours. Prerequisite: an upper-division course in ecology. Introduction to literature and contemporary research into processes structuring ecological communities.—W. (W.) Karban, Lawler

#### 206. Concepts and Methods in Plant Community Ecology (4)

Lecture—3 hours; laboratory—4 hours. Prerequisite: introductory courses in statistics and plant ecology; consent of instructor. Principles and techniques of vegetation analysis, including structure, composition, and dynamics. Emphasis given to sampling procedures, association analysis, ordination, processes and mechanisms of succession, and classification. Most techniques are demonstrated or conducted during field trips and laboratories. Offered in alternate years.—F. (F.) Rejmanek

#### 207. Plant Population Biology (3)

Lecture—2 hours; laboratory/discussion—1 hour. Prerequisite: advanced undergraduate ecology course (e.g., Environmental Science and Policy 100, Evolution and Ecology 101, Entomology 104 or Plant Biology 117), and advanced undergraduate course in genetics and/or evolution (e.g., Biological Sciences 101 or Evolution and Ecology 100). Introduction to theoretical and empirical research in plant population biology. Emphasis placed on linking ecological and genetic approaches to plant population biology. (Same course as Population Biology 207.) Offered in alternate years.—(W.)

#### 208. Issues in Conservation Biology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: introductory biology (e.g. Biological Sciences 2B) and an upper division organismal biology class. Graduate-level introduction to current research in conservation biology. Course will emphasize reading and discussing primary literature. Specific topics will reflect the research interests of UC Davis conservation biology faculty.—W. S. (W. S.) Baskett

#### 210N. Environmental Policy and Human Ecology (4)

Lecture—3 hours; term paper. Prerequisite: graduate standing in Anthropology, Ecology, Political Science, Sociology Graduate Groups, or consent of instructor. Principles drawn from social science, ecology and evolution to study of human populations and behavior, emphasizing environmental/resource issues. These principles form a synthetic framework that articulates elements drawn from the social sciences as well as biology. Offered in alternate years.—(W.) Lubell, McElreath

#### 211. Advanced Topics in Cultural Ecology (4)

Lecture/discussion—3 hours; term paper. Prerequisite: Environmental Science and Policy 133/Anthropology 133 and graduate standing in Ecology or

**Anthropology.** Topics of current analytical and methodological importance in cultural ecology. Examination of general issues in cultural ecology through study of human response to and influences on climate. (Same course as Anthropology 211.) Offered in alternate years. —F. McElreath

#### **212A. Environmental Policy Process (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course in public policy (e.g., Environmental Studies 160) or environmental law (e.g., Environmental Studies 161); course in bureaucratic theory (e.g., Political Science 187 or Environmental Studies 166); course in statistics (e.g., Sociology 106 or Agricultural and Resource Economics 106). Introduction to selected topics in the policy process, applications to the field of environmental policy. Develops critical reading skills, understanding of frameworks of the policy process and political behavior, and an ability to apply multiple frameworks to the same phenomena. (Same course as Environmental Science and Policy 212A.) Offered in alternate years. —(F, S.) Lubell

#### **212B. Environmental Policy Evaluation (4)**

Lecture—1 hour; discussion—1 hour; seminar—2 hours. Prerequisite: intermediate microeconomics (e.g., Economics 100); Statistics 108 or Agricultural and Resource Economics 106; policy analysis (e.g., Environmental Studies 168A or the equivalent); Agricultural and Resource Economics 176. Methods and practices of policy analysis; philosophical and intellectual bases of policy analysis and the political role of policy analysis. (Same course as Environmental Science and Policy 212B.) Offered in alternate years. —(W, S.) Springborn

#### **213. Population, Environment, and Social Structure (4)**

Seminar—3 hours; term paper. Prerequisite: at least one course in population or human ecology, or in environment and resources. Relationships among population dynamics, resource scarcity and environmental problems, and social structure; focus on demographic content of global ecological models and simulations, ecological content of modern demographic theories, and debates about scarcity, inequality, and social conflict and change. Offered in alternate years. —S.

#### **214. Marine Ecology: Concepts and Practice (3)**

Lecture—1 hour; discussion—1.5 hours; fieldwork—1.5 hours. Prerequisite: graduate standing or one course in ecology, one course in evolution or genetics, and consent of instructor; survey course in marine ecology recommended. Critical review and analysis of concepts and practices in modern marine ecology at the interface of several fields of study including oceanography, evolution, behavior, and physiology. Emphasis on critical thinking, problem solving, and hands-on study. Two field trips required. —F, S. (F, S.) Morgan, Williams

#### **216. Ecology and Agriculture (4)**

Lecture—3 hours; term paper. Prerequisite: Evolution and Ecology 11 or consent of instructor. Ecological principles as relevant to agriculture. Integration of ecological approaches into agricultural research to increase ecosystem functions and services. Topics include crop autoecology, biotic interactions among crops and pests, ecosystem and landscape ecology. Not open for credit to students who have completed Vegetable Crops 216 (Former course Vegetable Crops 216). Offered in alternate years. —F. Jackson

#### **219. Ecosystem Biogeochemistry (4)**

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: introductory courses in ecology/biology and soils are recommended; undergraduates accepted with consent of instructor. Multi-disciplinary analysis of energy and nutrient transfers within terrestrial ecosystems. Examination of processes and inter- and intra-system interactions between the atmosphere, biosphere, lithosphere, and hydrosphere. Laboratory section uses biogeochemical simulation models to examine case studies. (Same course as Soil Science 219.) Offered in alternate years. —S. Houlton

#### **225. Terrestrial Field Ecology (4)**

Seminar—1 hour; field work—12 hours. Prerequisite: introductory ecology and introductory statistics or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay, emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and written and oral presentation of results will be stressed. (Same course as Entomology 225/Population Biology 225.) —S. Karban

#### **231. Mathematical Methods in Population Biology (3)**

Lecture—3 hours. Prerequisite: Mathematics 16C or 21C or the equivalent. Mathematical methods used in population biology. Linear and nonlinear difference equation and differential equation models are studied, using stability analysis and qualitative methods. Partial differential equation models are introduced. Applications to population biology models are stressed. (Same course as Population Biology 231.) —F. Hastings

#### **232. Theoretical Ecology (3)**

Lecture—3 hours. Prerequisite: course 204 or the equivalent, and Mathematics 16C or 21C; or one of courses 100 or 121 or Evolution and Ecology 101, and a strong mathematics background (Mathematics 22A-22B-22C or the equivalent). Examination of major conceptual and methodological issues in theoretical ecology. Model formulation and development will be emphasized. Topics will vary from year to year. May be repeated for credit. Offered in alternate years. —(W) Hastings

#### **233. Computational Methods in Population Biology (3)**

Lecture/laboratory—2 hours; discussion/laboratory—1 hour. Prerequisite: A course in theoretical ecology (e.g., course 231 or an equivalent to Environmental Science and Policy 121 from your undergraduate institution) or consent of instructor; no programming experience required. Numerical methods for simulating population dynamics using the computational software package R. Emphasis placed on model formulation and development, theoretical concepts and philosophical principles to guide simulation efforts, model parameterization, and implementing simulations with R. (Same course as Population Biology 233.) Offered in alternate years. (S/U grading only.) —W. Baskett, Schreiber

#### **242. Ecological Genetics: Applied Genetics for Ecology, Health, and Conservation of Natural Populations (3)**

Lecture—2 hours; discussion—0.5 hours; laboratory—0.5 hours. Prerequisite: undergraduate genetics and ecology/conservation biology courses recommended. Class size limited to 20 students; graduate students, 2nd or 3rd year veterinary students; advanced undergraduate students with consent of instructor. Introduction to the field of applied ecological genetics to include applications in conservation ecology, population genetics, population biology, wildlife health and disease ecology. (Same course as Population Health and Reproduction 242.) —F. (F)

#### **242. Ecological Genetics: Applied Genetics for Ecology, Health, and Conservation of Natural Populations (3)**

Lecture—2 hours; discussion—0.5 hours; laboratory—0.5 hours. Prerequisite: undergraduate genetics and ecology/conservation biology courses recommended. Class size limited to 20 students; graduate students, 2nd or 3rd year veterinary students; advanced undergraduate students with consent of instructor. Introduction to the field of applied ecological genetics to include applications in conservation ecology, population genetics, population biology, wildlife health and disease ecology. (Same course as Population Health and Reproduction 242.) —W. (W) Ernest

#### **243. Ecological Genomics (4)**

Lecture/discussion—3 hours; term paper or discussion. Prerequisite: course 242, or equivalent training in ecology and genetics according to the discretion of the instructors. Genomics concepts, technologies,

and analyses for ecology research. Mixture of lecture, discussion of recent literature, hands-on training in data analysis and experimental design, and research proposal preparation and evaluation. One all-day field trip is required. —W. (W) Miller, Ross-Ibarra, Whitehead

#### **245. Climate Change, Water and Society (4)**

Lecture—4 hours. Class size limited to 25 students. Integration of climate science and hydrology with policy to understand hydroclimatology and its impact upon natural and human systems. Assignments: readings, take-home examination on climate and hydrologic science, paper that integrates course concepts into a research prospectus or review article. (Same course as Hydrologic Science 245 and Atmospheric Science 245.) —F. (F) Fogg, Lubell, Ullrich

#### **262. Advanced Population Dynamics (3)**

Lecture—3 hours. Prerequisite: graduate standing; advanced course in ecology (e.g., Evolution and Ecology 101), population dynamics (e.g., Wildlife, Fish, and Conservation 122), and one year of calculus; familiarity with matrix algebra and partial differential equations recommended. Logical basis for population models; evaluation of simple ecological models, current population models with age, size, and stage structure, theoretical basis for management and exemplary case histories. Emphasis on development and use of realistic population models in ecological research. (Same course as Wildlife, Fish, and Conservation Biology 262.) Offered irregularly. —W. (W) Botsford

#### **271. Research Conference in Ecology (1)**

Seminar—1 hour. Prerequisite: consent of instructor. Critical presentation and evaluation of current literature and ongoing research in ecology. Requirements include active participation in weekly discussions and the presentation of a paper or chapter once per quarter. May be repeated for credit. (Same course as Population Biology 271.) (S/U grading only.) —F, W, S. (F, W, S.) Schoener, Schreiber

#### **280. Current Anthropology Journal Editorial Workshop (4)**

Workshop—1 hour; independent study—3 hours. Prerequisite: consent of instructor. Students must enroll for all three quarters. Reading and offering workshop critiques of manuscripts submitted for publication, and reading and discussion of other relevant work in anthropology and human ecology. Track and edit published comments and authors' replies that accompany major features. Participation in the development of new sections for the electronic edition of the journal, including a "news and views" section and a debate section. (Same course as Anthropology 280.) May be repeated for 12 units of credit with consent of instructor. (S/U grading only.) —F, W, S. (F, W, S.)

#### **290. Seminar in Ecology (1-4)**

Seminar—1—4 hours. Prerequisite: consent of instructor. Topics in ecology. Students are expected to present an oral seminar on a particular aspect of the general topic under consideration. (S/U grading only.) —F, W, S. (F, W, S.)

#### **296. Topics in Ecology and Evolution (1)**

Seminar—1 hour. Prerequisite: graduate standing. Seminars presented by visiting lecturers, UC Davis faculty, and graduate students. May be repeated for credit. (Same course as Population Biology 292.) (S/U grading only.) —F, W, S. (F, W, S.)

#### **297. Tutoring in Ecology (1-4)**

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing in ecology; consent of instructor. Teaching ecology including conducting discussion groups for regular departmental courses under direct guidance of staff. May be repeated for credit. (S/U grading only.)

#### **298. Group Study (1-5)**

(S/U grading only.)

#### **299. Research (1-12)**

Prerequisite: graduate standing. (S/U grading only.)

## The Major Program

Economics is the study of how individuals, organizations, and societies choose among alternative uses of resources and how these resources are turned into the things people want.

**The Program.** Economics majors complete an introductory course sequence in economics, in addition to several courses in quantitative methods. Intermediate theory and economic history are taken on the upper division level and then students are free to concentrate the remainder of their units in various areas of interest, including more courses in economic theory or history, international economics, labor, industry, alternative economic systems, economic development, public finance, econometrics, or mathematical economics.

**Internships and Career Alternatives.** Internships for economics majors have been arranged at banks, brokerages, other business enterprises, and governmental units. The internships must complement the student's course work. A degree in economics is

excellent preparation for students who want to go on to law school, business school, advanced work in economics, or graduate work in international relations. It is also a good background for careers in management and positions with the government.

## A.B. Major Requirements:

### UNITS **Preparatory Subject Matter.....17-20**

Economics 1A-1B ..... 8  
 Statistics 13, 32, or 102 ..... 3-4  
 Mathematics 16A-16B or 21A-21B ..... 6-8

### **Depth Subject Matter .....44**

Economics 100, 101 ..... 8  
 Economics 102 ..... 4

### Choose one specialization below:

#### *Specialization: General*

One course from: Economics 110A, 110B, 111A, 111B ..... 4

Select 4 courses from:

Economics 103, 106, 116, 121A, 121B, 122, 125, 130, 131, 132, 134 (or Agricultural and Resource Economics 171A), 135, 136, 137, 140 (or Agricultural and Resource Economics 106), 145, 151A, 151B, 152, 160A, 160B, 194HA, 194HB, Agricultural and Resource Economics 139, 156, 175, 176 ..... 16

Additional upper division Economics courses ..... 12

#### *Specialization: Behavior and Strategy*

One course from:

Economics 110A, 110B, 111A, 111B ..... 4

Economics 121A or 122 ..... 4

Select 2 courses from:

Economics 103, 106, 121A, 121B, 122 .. 8

Select 1 course from:

Economics 103, 106, 116, 121A, 121B, 122, 125, 130, 131, 132, 134 (or Agricultural and Resource Economics 171A), 135, 136, 137, 140 (or Agricultural and Resource Economics 106), 145, 151A, 151B, 152, 160A, 160B, 194HA, 194HB, Agricultural and Resource Economics 139, 156, 175, 176 ..... 16

Additional upper division Economics courses ..... 12

#### *Specialization: Data Analytics and Economics Analysis*

One course from:

Economics 110A, 110B, 111A, 111B ..... 4

Economics 140 ..... 4

Select 2 courses from:

Economics 103, 106, 122, and either 132 or 145 ..... 8

Select 1 course from:

Economics 103, 106, 116, 121A, 121B, 122, 125, 130, 131, 132, 134 (or Agricultural and Resource Economics 171A), 135, 136, 137, 140 (or Agricultural and Resource Economics 106), 145, 151A, 151B, 152, 160A, 160B, 194HA, 194HB, Agricultural and Resource Economics 139, 156, 175, 176 ..... 4

Additional upper division Economics courses ..... 12

#### *Specialization: International Macro-Finance*

One course from:

Economics 110A, 110B, 111A, 111B ..... 4

Select 3 courses from:

Economics 110B, 134, 135, 136, 160B, 171 ..... 12

Select 3 course from:

Economics 103, 106, 116, 121A, 121B, 122, 125, 130, 131, 132, 134 (or Agricultural and Resource Economics 171A), 135, 136, 137, 140 (or Agricultural and Resource Economics 106), 145, 151A, 151B, 152, 160A, 160B, 194HA, 194HB, Agricultural and Resource Economics 139, 156, 175, 176 ..... 12

Additional upper division Economics courses ..... 12

#### *Specialization: Policy*

One course from:

Economics 110A, 110B, 111A, 111B ..... 4

Select 3 courses from:

Economics 110B, 134, 135, 136, 160B, 171 ..... 12

Select 3 course from:

Economics 103, 106, 116, 121A, 121B, 122, 125, 130, 131, 132, 134 (or Agricultural and Resource Economics 171A), 135, 136, 137, 140 (or Agricultural and Resource Economics 106), 145, 151A, 151B, 152, 160A, 160B, 194HA, 194HB, Agricultural and Resource Economics 139, 156, 175, 176 ..... 12

Additional upper division Economics courses ..... 12

Select 4 units from upper division Economics courses ..... 4

One course from:

Economics 110A, 110B, 111A, 111B ..... 4

Select 3 courses from:

Economics 125, 130, 131, 145, 151A, 151B, 160A ..... 12

Select 1 course from:

Economics 103, 106, 116, 121A, 121B, 122, 125, 130, 131, 132, 134 (or Agricultural and Resource Economics 171A), 135, 136, 137, 140 (or Agricultural and Resource Economics 106), 145, 151A, 151B, 152, 160A, 160B, 194HA, 194HB, Agricultural and Resource Economics 139, 156, 175, 176 ..... 4

Additional upper division Economics courses ..... 12

#### *Specialization: Poverty and Inequality*

One course from:

Economics 110A, 110B, 111A, 111B ..... 4

Select 3 courses from:

Economics 115A, 115B, 130, 151B ..... 12

Select 3 courses from:

Economics 103, 106, 116, 121A, 121B, 122, 125, 130, 131, 132, 134 (or Agricultural and Resource Economics 171A), 135, 136, 137, 140 (or Agricultural and Resource Economics 106), 145, 151A, 151B, 152, 160A, 160B, 194HA, 194HB, Agricultural and Resource Economics 139, 156, 175, 176 ..... 12

Additional upper division Economics courses ..... 12

Select 4 courses from:

Economics 103, 106, 116, 121A, 121B, 122, 125, 130, 131, 132, 134 (one of which may be from History 108, 109B, 110, 110A, 111A-C, 112A, 112B, 112C, 113, 115A-F, 116, 120, 121A-C, 122, 125, 130A-C, 131A-C, 132, 133, 134A, 135A-B, 138A-C, 139A-B, 140, 141, 142A-B, 143, 144A-B, 145, 146A-B, 147A-C, 148A-C, 149, 151A-D, 159, 160, 162, 163A-B, 164, 165, 166A-B, 167, 168, 169A-B, 170A-C, 171A-B, 171D, 172, 173, 174A, 174B, 174C, 174D, 175, 176A-B, 177A-B, 178A-B, 179, 180AN, 181, 182, 183A-B, 184, 185A-B, 188, 189, 190A-D, 191A-J, 193A-D, 194A-E, 195B, 196A-B ..... 16

Choose 4 courses from:

Economics 103, 106, 116, 121A, 121B, 122, 125, 130, 131, 132, 134 (or Agricultural and Resource Economics 171A), 135, 136, 137, 140 (or Agricultural and Resource Economics 106), 145, 151A, 151B, 152, 160A, 160B, 194HA, 194HB, Agricultural and Resource Economics 139, 156, 175, 176 ..... 16

Total Units for the Major ..... 61-64

**Recommended.** Students considering graduate study in economics are strongly urged to take Mathematics 21A-21B-21C and 22A.

The Economics Department suggests that Economics 100 and 101 be taken as soon as possible after the introductory courses.

**Major Advisers.** Contact Department office at [ecnugadvisor@ucdavis.edu](mailto:ecnugadvisor@ucdavis.edu) or 530-752-9142.

## Minor Program Requirements:

### UNITS **Economics .....20**

Economics 100, 101 ..... 8

Select 8 units from Economics 103, 106,

116, 121A, 121B, 122, 125, 130, 131,

132, 134 (or Agricultural and Resource

Economics 171A), 135, 136, 137, 140 (or

Agricultural and Resource Economics 106), 145,

151A, 151B, 152, 160A, 160B;

Agricultural and Resource Economics 139,

156, 175, 176 ..... 8

Select 4 units from upper division Economics

courses ..... 4

**Preparation.** Economics 1A and 1B; Statistics 13, 32, or 102; Mathematics 16A and 16B or 21A and 21B; Mathematics 16A and 16B or 21A and 21B

should be completed before taking Economics 100 and 101. Students need to complete Economics 100 and 101 before taking the advanced courses.

**Course Limits.** Except under extraordinary circumstances, not more than two economics courses should be taken in any one quarter. In special cases, the department will accept a limited number of related upper division courses from other departments in satisfaction of the economics upper division course requirements. Approval from a departmental adviser is required in all such cases.

**Graduation with High or Highest Honors.** To be eligible for departmental recommendation for High or Highest Honors in Economics at graduation, a student must take all upper division courses in Economics for a letter grade, earn at least a 3.500 grade point average in those courses, and complete at least eight units of course work that result in the submission of an Honors project. Consult the College of Letters and Science section of this catalog and contact the Department for more information.

**Study Abroad.** The economics department wishes to accommodate students who would like to complement their economics degree with a study abroad experience. Up to 20 units of upper division credit from foreign campuses (excluding Economics 100 and 101) may be used towards the completion of the degree. To ensure that foreign courses will apply towards the economics degree, students need to select courses from the pre-approved list at the UC Davis Study Abroad office or seek pre-approval in the economics department for the foreign courses they wish to complete.

**Graduate Study.** Students who meet the admission requirements of Graduate Studies and the Department of Economics may pursue studies leading to the M.A. and Ph.D. degrees. Fields of emphasis for graduate study include: Economic Theory, Monetary Economics, Economic Development, Economic History, International Economics, Labor Economics, Industrial Organization, Economic Systems, Public Finance, Mathematical Economics, and Quantitative Methods (Econometrics). For information on admission to graduate study, degree requirements, and financial aid, consult the Graduate Announcement and <http://www.econ.ucdavis.edu>.

**Graduate Advisers.** Contact Department office.

**American History and Institutions.** This University requirement can be satisfied by completion of Economics 111A, 111B; see also under University requirements.

## Courses in Economics (ECN)

### Lower Division

#### 1A. Principles of Microeconomics (4)

Lecture—3 hours; discussion—1 hour. Course 1A and 1B may be taken in either order. Analysis of the allocation of resources and the distribution of income through a price system; competition and monopoly; the role of public policy; comparative economic systems. GE credit: SocSci | ACGH, QL, SS. —F, W, S. (F, W, S.)

#### 1B. Principles of Macroeconomics (4)

Lecture—3 hours; discussion—1 hour. Course 1A and 1B may be taken in either order. Analysis of the economy as a whole; determinants of the level of income, employment and prices; money and banking, economic fluctuations, international trade, economic development; the role of public policy. GE credit: GE credit: SocSci | ACGH, QL, SS. —F, W, S. (F, W, S.)

#### 90X. Lower Division Seminar (1-2)

Seminar—1-2 hours. Prerequisite: lower division standing and consent of instructor. Limited enrollment. Examination of a special topic in Economics through shared readings, discussions, and written assignments. May not be repeated for credit.

#### 92. Internship and Field Work (1-12)

Internship—3-36 hours; term paper. Prerequisite: junior or senior standing; availability of internship position or approved field work project; stock-brokerage interns must have completed Management

11A-11B; consent of instructor. Intensive study of practical application of concepts in economics, stressing research methods and empirical analysis. (P/NP grading only.)

#### 98. Group Study for Undergraduates (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

#### 99. Individual Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division

#### 100. Intermediate Micro Theory (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1A-1B and Mathematics 16A-16B or Mathematics 17A-17B or Mathematics 21A-21B, with a grade of C- or better in each course. Price and distribution theory under conditions of perfect and imperfect competition. General equilibrium and welfare economics. Not open for credit to students who have completed Agricultural and Resource Economics 100A or 100B. —F, W, S. (F, W, S.)

#### 101. Intermediate Macro Theory (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A-1B and Mathematics 16A-16B or Mathematics 17A-17B or Mathematics 21A-21B, with a grade of C- or better in each course. Theory of income, employment and prices under static and dynamic conditions, and long term growth. —F, W, S. (F, W, S.)

#### 102. Analysis of Economic Data (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1A, 1B, Statistics 13 or 32, Mathematics 16A-16B or 21A-21B, with grade of C- or better in each, or consent of instructor. Analysis of economic data to investigate key relationships emphasized in introductory microeconomics and macroeconomics. Obtaining, transforming, and displaying data; statistical analysis of economic data; and basic univariate and multivariate regression analysis. Only 2 units of credit allowed to students who have completed course 140 or Agricultural and Resource Economics 106. GE credit: VL. —F, W, S. (F, W, S.)

#### 103. Economics of Uncertainty and Information (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or Agricultural and Resource Economics 100A and 100B, Mathematics 16A and 16B or Mathematics 17A and 17B or Mathematics 21A and 21B. Optimal decisions under uncertainty, expected utility theory, economics of insurance, asymmetric information, signalling in the job market, incentives and Principal-Agent theory, optimal search strategies and the reservation price principle.

#### 106. Decision Making (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 16A-16B or Mathematics 17A-17B or Mathematics 21A-21B; Statistics 13 or 32, with grade of C- or better in each course, or consent of the instructor. Descriptive and normative analysis of individual decision making, with applications to personal, professional, financial, and public policy decisions. Emphasis on decision making under uncertainty and over time. Heuristics and biases in the psychology of decisions; overcoming decision traps. Offered irregularly.

#### 110A. World Economic History Before the Industrial Revolution (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1A and 1B. Development and application of analytical models to explain the nature and functioning of economies before the Industrial Revolution. Examples will be drawn from a variety of societies, including England, China, Polynesia, and Pre-Columbian America. GE credit: SocSci | SS.

#### 110B. World Economic History Since the Industrial Revolution (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1A, 1B and 110A. Development and application of analytical models to explain the nature and functioning of economies since the Industrial Revolu-

tion. Examples will be drawn from a variety of societies, including England, China, Germany, and India. GE credit: SocSci | SS.

#### 111A. Economic History (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A-1B or consent of instructor. Survey of economic change in the United States from Colonial times to 1865; reference to other regions in the Western Hemisphere. GE credit: SocSci | SS.

#### 111B. Economic History (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A-1B, or consent of instructor. Survey of economic change in the United States from 1865 to the post World War II era. GE credit: SocSci | SS.

#### 115A. Economic Development (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A and 1B. Major issues encountered in emerging from international poverty, including problems of growth and structural change, human welfare, population growth and health, labor markets and internal migration. Important issues of policy concerning international trade and industrialization. (Same course as Agricultural and Resource Economics 115A.) GE credit: SocSci, Div | SS, WC.

#### 115B. Economic Development (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A and 1B. Major macroeconomic issues of developing countries. Issues include problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Important issues of policy concerning international borrowing and external debt of developing countries. (Same course as Agricultural and Resource Economics 115B.) GE credit: SocSci | SS, WC.

#### 116. Comparative Economic Systems (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or Agricultural and Resource Economics 100A and 100B; Mathematics 16B or 17B or 21B. Economics analysis of the relative virtues of capitalism and socialism, including welfare economics. Marxian exploitation theory, the socialist calculation debate (Hayek and Lange), alternative capitalist systems (Japan, Germany, U.S.) and contemporary models of market socialism. Offered irregularly. GE credit: WC.

#### 121A. Industrial Organization (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A-1B; 100 or Agricultural and Resource Economics 100A-100B, or consent of the instructor. An appraisal of the role of competition and monopoly in the American economy; market structure, conduct, and economic performance of a variety of industries. GE credit: SocSci | SS.

#### 121B. Industrial Organization (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1A, 1B, 100 or Agricultural and Resource Economics 100A and 100B, or consent of instructor. The study of antitrust and economic regulation. Emphasis on applying theoretical models to U.S. industries and case studies, including telecommunications, software, and electricity markets. Topics include natural monopoly, optimal and actual regulatory mechanisms, deregulation, mergers, predatory pricing, and monopolization. GE credit: ACGH.

#### 122. Theory of Games and Strategic Behavior (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 16A and 16B or 17A and 17B or 21A and 21B or consent of instructor. Introduction to game theory. Explanation of the behavior of rational individuals with interacting and often conflicting interests. Non-cooperative and cooperative theory. Applications to economics, political science and other fields.

#### 125. Efficiency in Energy Markets (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1A and 1B, Mathematics 16A and 16B and course 102 or consent of instructor; intended for advanced economics undergraduates. Pass One open to Economics and Graduate School of Management majors. Application of theoretical and empirical models to examine efficiency in energy

production and use. Energy and environmental policy, market structure and power, global climate change, optimal regulation, and real-world applications; e.g., California electricity crisis.

### **130. Public Microeconomics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or Agricultural and Resource Economics 100A and 100B, or consent of instructor. Public expenditures; theory and applications. Efficiency and equity of competitive markets; externalities, public goods, and market failures; positive and normative aspects of public policy for expenditure, including benefit-cost analysis. Topics include consumer protection, pollution, education, poverty and crime.

### **131. Public Finance (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or Agricultural and Resource Economics 100A and 100B. Economic burden of taxation; equity and efficiency considerations in tax design; structure and economic effects of the U.S. tax system (including personal income tax, corporation income tax, and property tax); tax loopholes; recent developments; tax reform proposals. Offered irregularly.

### **132. Health Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or Agricultural and Resource Economics 100A and 100B; one course from list: course 102, course 140, Agricultural and Resource Economics 106 or Statistics 108; consent of instructor. The health care market, emphasizing the role and use of economics. Individual demand, provision of services by doctors and hospitals, health insurance, managed care and competition, the role of government access to health care.—W. (W.) Cameron

### **133Y. Poverty, Inequality and Public Policy (4)**

Web virtual lecture—2 hours; discussion—2 hours. Prerequisite: course 1A or 1B. Class size limited to 99; 3 sections of 33 each. Examination of the economics of poverty and inequality in the United States, including measurement, trends, and related policies.—Stevens

### **134. Financial Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A, 1B, and 100 or Agricultural and Resource Economics 100A and 100B; Mathematics 16A or 17A or 21A; Statistics 13. General background and rationale of corporation; finance as resource allocation over time; decision making under uncertainty and the role of information; capital market and interest rate structure; financial decisions. Students who have completed Agricultural and Resource Economics 171A may not receive credit for this course.

### **135. Money, Banks and Financial Institutions (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or (Agricultural and Resource Economics 100A and 100B), course 101; Statistics 13. Banks and the banking system. Uncertainty and asymmetric information in the lending process; efficiency of competitive equilibrium in lending markets. Regulation and the conduct of monetary policy.

### **136. Topics in Macroeconomic Theory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 101. Advanced Topics in macroeconomics theory. The course develops the theoretical and empirical analysis of a specific field of macroeconomics. Possible topics include, business cycle theories, growth theory, monetary economics, political economics and theories of unemployment and inflation.

### **137. Macroeconomic Policy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or (Agricultural and Resource Economics 100A and 100B), course 101; Statistics 13. Theory and practice of macroeconomic policy, both monetary and fiscal.

### **140. Econometrics (4)**

Lecture—3 hours; discussion—1 hours. Prerequisite: course 102, course 100 and course 101; Mathematics 16A and 16B or Mathematics 21A and 21B; Statistics 13, or any upper division Statistics course. Problems of observation, estimation and hypotheses testing in economics through the study of the theory and application of linear regression models. Critical evaluation of selected examples of empirical research. Exercises in applied economics. Not open for credit to students who have enrolled in or completed Agricultural and Resource Economics 106.

### **145. Transportation Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or (Agricultural and Resource Economics 100A, 100B); Mathematics (16A, 16B) or (17A, 17B); Statistics 13, course 102, 140, Agricultural and Resource Economics 106 or Statistics 108, or consent of instructor. Intended for advanced Economics undergraduates. Examination of fundamental problems of planning and financing transportation "infrastructure" (roads, ports, airports). The economics of the automobile industry, as well as the impact of government regulation and deregulation in the airlines and trucking industries. Offered irregularly.

### **151A. Economics of the Labor Market (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or Agricultural and Resource Economics 100A and 100B. Theory of labor supply and demand; determination of wages and employment in the labor market. Policy issues: labor force participation by married women; minimum wages and youth unemployment; effect of unions on wages.

### **151B. Economics of Human Resources (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or Agricultural and Resource Economics 100A and 100B. Human resource analysis; introduction to human capital theory and economics of education; the basic theory of wage differentials, including theories of labor market discrimination; income distribution; poverty. Policy issues; negative income tax; manpower training programs; incomes policy.

### **152. Economics of Education (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or (Agricultural and Resource Economics 100A and 100B), course 102; Mathematics 16B or 17B or 21B; Statistics 13 or 32, with grade of C- or better in each course, or consent of the instructor. Application of theoretical and empirical tools of economics to the education sector. Demand for Education; Education Production and Market Structures in Education. Policy applications: class size reduction, school finance equalization, accountability, and school choice. Offered irregularly.

### **160A. International Microeconomics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or Agricultural and Resource Economics 100A and 100B, or consent of instructor. International trade theory: impact of trade on the domestic and world economies; public policy toward external trade. Only two units of credit allowed to students who have completed course 162.

### **160B. International Macroeconomics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A, 1B, 100 or (Agricultural and Resource Economics 100A and 100B), course 101, or consent of instructor. Balance of payments adjustment mechanism, international monetary economics issues; international financial institutions and their policies. Only two units of credit allowed to students who have completed course 162.

### **162. International Economic Relations (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A-1B or consent of instructor. International trade and monetary relations, trade policy, exchange rate policy, policies toward international capital migration and investment. Emphasis on current policy issues. Course intended especially for non-majors. Not open for credit to students who have completed course 160A or 160B. GE credit: SocSci | SS, WC.

### **171. Economy of East Asia (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1A-1B or consent of instructor. Intensive reading, discussion and research on selected topics from the economies of the countries of East Asia. Consult department for course scheduling.

### **190. Topics in Economics (4)**

Lecture/discussion—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Selected topics in economic analysis and public policy. Variable content. May be repeated for credit.

### **190X. Upper Division Seminar (1-4)**

Seminar—1-4 hours. Prerequisite: courses 100 and 101, and consent of the instructor. In-depth examination at an upper division level of a special topic in Economics. Emphasis on focused analytical work.

### **192. Internship (1-6)**

Internship—3-18 hours. Prerequisite: upper division standing; consent of instructor. Internship experience off and on campus in all subject areas offered in the Department of Economics. Supervised by a member of the staff. May be repeated for credit. (P/NP grading only.) GE credit: SE.

### **194HA. Special Study for Honors Students (4)**

Independent study—3 hours; seminar—1 hour. Prerequisite: major in Economics with senior standing; consent of instructor and completion of 135 units with a minimum GPA of 3.500 in courses counted toward the major. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of course.)

### **194HB. Special Study for Honors Students (4)**

Independent study—3 hours; seminar—1 hour. Prerequisite: major in Economics with senior standing; consent of instructor and completion of 135 units with a minimum GPA of 3.500 in courses counted toward the major. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of course.)

### **197T. Tutoring in Economics (1-5)**

Tutorial—3-15 hours. Prerequisite: consent of instructor and chairperson. Undergraduates assist the instructor by tutoring students in one of the department's regularly scheduled courses. May be repeated for up to 10 units of credit. (P/NP grading only.)

### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

### **Graduate**

### **200A. Microeconomic Theory (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: graduate standing. Linear and non-linear optimization theory applied to develop the theory of the profit-maximizing firm and the utility-maximizing consumer. (Same course as Agricultural and Resource Economics 200A.)

### **200B. Microeconomic Theory (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: course 200A. Characteristics of market equilibrium under perfect competition, simple monopoly and monopsony. Emphasis on general equilibrium and welfare economics; the sources of market success and market failure. (Same course as Agricultural and Resource Economics 200B.)

### **200C. Microeconomic Theory (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: course 200B. Uncertainty and information economics. Individual decision making under uncertainty. Introduction to game theory, with emphasis on applications to markets with firms that are imperfect com-

petitors or consumers that are imperfectly informed. (Same course as Agricultural and Resource Economics 200C.)

#### **200D. Macroeconomic Theory (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: course 101, Mathematics 21A, 21B, and 21C. Macro static theory of income, employment, and prices.

#### **200E. Macroeconomic Theory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200B (may be taken concurrently) and 200D. Macrodynastic theory of income, employment, and prices.

#### **201A. History of Economic Thought (4)**

Lecture—3 hours; discussion—1 hour. Economic thought from the classical Greece era to modern times. Offered in alternate years.

#### **201B. History of Economic Thought II (4)**

Lecture—3 hours; discussion—1 hour. Origins and emergence of modern economic analysis. Offered in alternate years.

#### **203A. Advanced Economic Theory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A; 200B. Advanced topics in general equilibrium theory and welfare economics: existence, determinateness and efficiency; intertemporal economies; uncertainty.—W. (W.) Quinzi

#### **203B. Advanced Economic Theory: Game Theory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A, 200B, 200C. Covers the most recent developments in game theory, with the focus changing from year to year. Main topics are: refinements of Nash equilibrium, repeated games, evolution, social situations, bounded rationality, and bargaining theory.—S. (S.) Schipper

#### **203C. Topics in Economic Theory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A, 200B, 200C. Selected topics in contemporary microeconomic theory. May be repeated for credit with the consent of the Graduate Studies Committee.

#### **210A. Economic History (4)**

Lecture/discussion—4 hours. Economic history of the eastern hemisphere in the modern period. Medieval Europe or other regions may be studied, depending on student interest.

#### **210B. Economic History (4)**

Lecture/discussion—4 hours. The United States from Colonial times to the present. Other areas of the western hemisphere may be studied, according to student interest.

#### **210C. Economic History (4)**

Seminar—4 hours. Prerequisite: a graduate course in economic history. Selected topics and issues, emphasis on current research. (Quarter offered to be flexible.)—W. (W.) Meissner

#### **214. Development Economics (4)**

Lecture—4 hours. Prerequisite: Agricultural and Resource Economics 100A, 100B, course 101; Agricultural and Resource Economics/Economics 204 and course 160A-160B recommended. Review of the principal theoretical and empirical issues whose analysis has formed development economics. Analysis of economic development theories and development strategies and their application to specific policy issues in developing country contexts. (Same course as Agricultural and Resource Economics 214.)

#### **215A. Microdevelopment Theory and Methods I (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A or 204; course 240A recommended. Agricultural development theory, with a focus on microeconomics. Agricultural household behavior with and without market imperfections and uncertainty. Analysis of rural land, labor, credit and insurance markets, institutions, and contracts. (Same course as Agricultural and Resource Economics 215A.)

#### **215B. Open Macroeconomics of Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural and Resource Economics/Economics 200A or 204, 200D or 205, and 214 or 215A. Models and policy approaches regarding trade, monetary and fiscal issues, capital flows and debt are discussed in the macroeconomic framework of an open developing country. The basic analytical focus is real exchange rate and its impact on sectoral allocation of resources. (Same course as Agricultural and Resource Economics 215B.)

#### **215C. Microdevelopment Theory and Methods II (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 215A. Extension of development theory and microeconomic methods. Agricultural growth and technological change; poverty and income inequality; multisectoral, including village and regional models. Computable general equilibrium methods and applications. (Same course as Agricultural and Resource Economics 215C.)

#### **215D. Environment and Economic Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 200A, 204 or Agricultural and Resource Economics 275. Interdisciplinary course drawing on theoretical and empirical research on interactions between environmental resource use and economic development processes. Analysis of issues emerging at the interface of environmental and development economics. (Same course as Agricultural and Resource Economics 215D.) Offered irregularly.

#### **221A. The Theory of Industrial Organization (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A, 200B, 200C. Game theory is used to analyze strategic interaction of firms in industries. Topics include models of competition, product differentiation, entry-deterring strategies, contractual arrangements, vertical control and antitrust issues. Offered irregularly.

#### **221B. Empirical Analysis in Industrial Organization (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 221A and 240B. Recent empirical work in industrial organization. Topics include empirical analysis of cartels, product differentiation, innovation and technological change, and imperfect competition in international markets. Offered irregularly.

#### **221C. Industrial Organization and Regulation (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 221A and 240B. Optimal regulation of natural monopoly. Topics include regulatory mechanisms for single and multiple output firms under symmetric and asymmetric information, optimality without regulation, the economic theory of regulation, and empirical studies of regulation and deregulation.

#### **230A. Public Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200C. Measures of deadweight loss and consumer surplus; optimal commodity and income taxation; tax incidence; policy issues in personal taxation, corporate taxation, and social insurance; the evaluation of effective tax rates.

#### **230B. Public Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 240A, 240B. Effects of government policies on economic behavior; labor supply, program participation, investment, consumption and savings. Offered irregularly.

#### **230C. Public Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200C and 240B. Advanced topics in economics of the public sector, with emphasis on current research. Topics may vary from year to year.

#### **235A. Macroeconomics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200D or consent of instructor. Frontiers of applied/empirical macroeconomics. Evidence and

lessons from macroeconomic history for The Great Depression, financial crises, efficient markets, parity conditions, capital flows, default, financial crises, exchange rates, growth, and other current empirical research topics.—F. (F.) Taylor

#### **235B. Macroeconomics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200D or consent of instructor. Search theory, theory of real-world markets characterized by search frictions, with applications: Labor economics: models of unemployment and wages differentials; Financial economics: determination of asset prices in OTC financial markets; Monetary Economics: foundations for money as a medium of exchange.—W. (W.) Geromichalos

#### **235C. Macroeconomics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200D or consent of instructor. Basic numerical methods for analytically intractable problems in economics. Techniques presented applicable in a wide range of fields including macroeconomics, econometrics, resource economics, labor economics, economic theory, international trade, finance, game theory, public finance, contract theory, and others.—S. (S.) Henriksen

#### **239. Econometric Foundations (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. The course will prepare students for econometric theory and empirical work by examining the statistical foundation of econometrics. Special attention is paid to problems specific to non-experimental data common to social sciences. Topics from matrix algebra are also covered. (Same course as Agricultural & Resource Economics 239.)—F. (F.)

#### **240A. Econometric Methods (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Statistics 133 and a course in linear algebra or the equivalent. Least squares, instrumental variables, and maximum likelihood estimation and inference for single equation linear regression model; linear restrictions; heteroskedasticity; autocorrelation; lagged dependent variables. (Same course as Agricultural and Resource Economics 240A.)

#### **240B. Econometric Methods (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 240A. Topics include asymptotic theory and instrumental variables, pooled time-series cross-section estimation, seemingly unrelated regression, classical hypothesis tests, identification and estimation of simultaneous equation models, cointegration, error-correction models, and qualitative and limited dependent variable models. (Same course as Agricultural and Resource Economics 240B.)

#### **240C. Time Series Econometrics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 240B or consent of instructor. Probability theory; estimation, inference and forecasting of time series models; trends and non-standard asymptotic theory; vector time series methods and cointegration; time series models for higher order moments and transition data; state-space modeling and the Kalman filter. (Same course as Agricultural and Resource Economics 240C.)—W. (W.)

#### **240D. Cross Section Econometrics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 240B or consent of instructor. Estimation and inference for nonlinear regression models for cross-section data; models for discrete data and for limited dependent variables; models for panel data; additional topics such as bootstrap and semiparametric regression. (Same course as Agricultural and Resource Economics 240D)—F. (F.)

#### **240E. Topics in Time Series Econometrics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 240C or consent of instructor. Modern econometric techniques for time series data. Expand on topics covered in Economics 240A, 240B and 240C. Contents may vary from year to year. (Same course as Agricultural and Resource Economics 240E.) Offered irregularly.

**240F. Topics in Cross Section Econometrics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 240D or consent of instructor. Modern econometrics techniques for cross-section data. Expand on topics covered in Economics 240A, 240B and 240D. Contents may vary from year to year. (Same course as Agricultural and Resource Economics 240F.) Offered irregularly.

**250A. Labor Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 150A-150B or the equivalent. Philosophy, theory and history of American and foreign labor movements; union structure, organization and collective bargaining under changing labor market conditions; current labor market issues.—F. (F.) Stevens

**250B. Labor Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 151A or consent of instructor; course 204 or 200A recommended. Microeconomic theory of labor supply and labor demand, estimation of labor supply and demand functions; human capital theory; labor market analysis.—W. (W.) Page

**260A. International Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200A or 204. Theory of trade determinants; gains from trade; tariffs and effective protection; economic unions.

**260B. International Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 200D and 200E. Balance of payments adjustment mechanisms; foreign exchange markets' theories of balance of payments policy and international monetary mechanisms. Offered irregularly.

**260CN. International Investment and Trade (4)**

Seminar—4 hours. Prerequisite: course 260A. Analysis of foreign investment and its links to trade; theories of the firm as they relate to firm's export and investment decisions; and an introduction to the political economy of trade policies.

**260D. Topics in International Macroeconomics (4)**

Seminar—4 hours. Prerequisite: course 260B or consent of instructor. Survey of current literature in international macroeconomic theory. Offered irregularly.

**260E. Topics in International Trade (4)**

Seminar—4 hours. Prerequisite: course 260A, 260B. Current literature in international trade theory.

**260F. International Macroeconomic Policy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 260B. Theory and practice of international macroeconomic policy. Topics include exchange rate regimes, international financial institutions, crises and current topics.

**270A. Economics of Growth (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200D and 200E. Modern theories and empirics of economic growth beginning with the neoclassical theories up to current endogenous growth models. Emphasis on the analysis of human capital and growth, technological innovation, its diffusion and empirical evidence on growth.

**270B. Economics of Growth (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200D and 200E. Empirical analysis of growth patterns and growth models. Emphasis on the relationship between macroeconomic management and long-term growth; the use of foreign capital in accelerating growth and its occasional mishaps; the comparison of growth performance in East Asia and Latin America since WW2; the experiences of centrally-planned economies and transitions to market-based growth; and the transformation from an industrial economy to a knowledge economy.

**270C. Economics of Growth (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 200D and 200E. Institutional bases; politics; contracts and commitment; money and finance; malthusian dynamics; modern economic growth; transi-

tion of industrialization; dual economies, core and periphery; sources of convergence and divergence; openness and growth; resources, demography, and geography; institutions, imperialism, and class conflicts.

**280. Orientation to Economic Research (2)**

Discussion—2 hours. Course tries to bridge the gap between students' classwork and their subsequent research. It deals with topics such as the origination of a research project, some mechanics of empirical research and hints on the submission of research papers. (S/U grading only.)

**290. Topics in Economics (4)**

Seminar—4 hours. Prerequisite: consent of instructor. Selected topics in economic analysis and public policy, focusing on current research. May be repeated for credit.

**291. Contemporary Economics Seminar (2)**

Seminar—2 hours. Prerequisite: graduate standing in Economics. Seminar series on topics of current interest. May be repeated for credit. (S/U grading only.)—F. S. (F, S.)

**298. Group Study (1-5)**

Discussion—1.5 hours. Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

**299. Individual Study (1-12)**

Prerequisite: consent of instructor and graduate standing. (S/U grading only.)

**299D. Dissertation Research (1-12)**

(S/U grading only.)

**Professional****397. Teaching of Economics (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing in economics. Teaching of economics: methods of instruction, organization of courses, examination and evaluation procedures. (S/U grading only.)

Rebecca Ambrose, Co-Director of Teacher Education  
Christian Faltis, Co-Director of Teacher Education  
Associate Director of Teacher Education  
Program Coordinator: 530-752-0758

## Minor Program Requirements:

The UC Davis School of Education is committed to developing informed citizens and advocates for productive educational environments in a democratic society. Education courses are designed for undergraduate students from all majors.

A Minor in Education will help students:

- Develop an understanding of the issues and concerns of public and private education
- Complete prerequisites for the teaching credential program
- Work towards a master's degree or doctoral degree in education or related field
- Seek employment in policy, advocacy, or other education related careers

**Courses.** Students must complete 20 units the Minor program in Education. At least 12 units of the 20-unit minimum for the minor must be in Education. The remaining units for the minor may be in education or a related field as approved on the electives list.

## Minor Program Requirements:

	UNITS
<b>Upper Division Required Courses .....</b>	<b>12</b>
Education 100, 110, 120.....	12

<b>Elective Courses .....</b>	<b>8</b>
The remaining eight units may be taken from the following courses:	
Education 115, 181 .....	2
Education 183 .....	3
Education 114, 119, 121, 122, 130, 142, 147, 150, 152, 173, 185.....	4
Education 192, 198 .....	variable

## Approved Courses Outside of Education

Agricultural Education 100.....	3
Chicano Studies 192.....	1-3
Mathematics 197TC* .....	1-5
University Writing Program 197TC* .....	2-4
African American & African Studies 130; American Studies 152; Asian American Studies 101; Biological Sciences 195A or B*; Chicano Studies 132; Economics 152; Human Development 100A, 100B, 101; Linguistics 173, 180; Psychology 130, 132, 141; Sociology 124; Spanish 116, 117; University Writing Program 104D .....	4
* Internship (192, 195A or B, 195TC, 197TC, 198,) and Independent Study (199), or a combination of both, may not exceed a total of four units. Elective courses may include only one internship.	

**Minor Advisers.** A designated faculty member in the School of Education may advise students and give final approval on the minor. For additional information contact the Student Services office in School of Education Building.

## Courses in Education (EDU)

### Lower Division

#### 81. Learning in Science and Mathematics (2)

Lecture/discussion—2 hours; field work—2 hours. Limited to 26 students per section. Exploration of how students learn and develop understanding in science and mathematics classrooms. Introduction to case studies and interview techniques and their use in K-6 classrooms to illuminate factors that affect stu-

dent learning. (Same course as Geology 81.) (P/NP grading only.) GE credit: SS, VL, WE.—F, W, S. (F, W, S.) Latimer, Mendale, Stevenson

#### 92. Internship (1-3)

Internship—3-9 hours. Prerequisite: consent of instructor. Enrollment dependent on availability of intern placements. Internship as a teacher's aide or tutor in K-12 classrooms under the supervision of a faculty member. May be repeated for credit. (P/NP grading only.)

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

### Upper Division

#### 100. Introduction to Schools (4)

Lecture—3 hours; field work—3 hours. Study of occupational concerns of teachers; skills for observing classroom activities; school organization and finance; school reform movement; observing, aiding, and tutoring in schools. GE credit: ACGH, DD, OL, SS.—F, W, S. (F, W, S.) Ambrose, Faltis, Martini, Patterson, Trexler, Tonkovich

#### 110. Educational Psychology: General (4)

Lecture/discussion—4 hours. Learning processes, cognitive development, individual differences, testing and evaluation. GE credit: SocSci, Wrt | SS, WE.—F, W, S. (F, W, S.) Ching, Martin, Mundy, Passmore, Quijada, Solari, Tonkovich, White

#### 114. Quantitative Methods in Educational Research (4)

Lecture/discussion—4 hours. Problems and methods in data analysis. Design of research projects. Some consideration of procedures suited to digital computers. GE credit: QL.—F. (F.) Martin

#### 115. Educating Children with Disabilities (2)

Lecture—2 hours. Educational issues and processes involved in teaching children with disabilities. The course will focus on the structure of special education, with an emphasis on meeting the educational needs of children who are mainstreamed in regular classes. GE credit: SocSci | SS.—F, S. (F, S.) Mundy, Solari

#### 119. The Use and Misuse of Standardized Tests (4)

Lecture—3 hours; discussion—1 hour. Principles underlying educational and psychological testing. Purposes of testing for individual achievement and evaluation of school programs. Interpretation and misinterpretations of outcomes. Analysis of SAT, GRE and other common tests. Experience in test administration and outcome interpretation. GE credit: SocSci, Wrt | QL, SS, WE.—W, S. (W, S.) Abedi, Welsh

#### 120. Philosophical and Social Foundations of Education (4)

Lecture—3 hours; discussion—1 hour. Philosophical, historical, and sociological study of education and the school in our society. GE credit: SocSci, Wrt | SS, WE.—F, W, S. (F, W, S.) Gee, Hart, Kurlaender

#### 121. Introduction to Education Policy Analysis: Tools, Methods and Frameworks (4)

Lecture—3 hours; discussion—1 hours. Introduces students to the field of education policy analysis with a specific emphasis on the quantitative frameworks and analytical tools drawn primarily from economics and statistics that are used to guide and inform educational policymaking. GE credit: SocSci | QL, SS.—F, W, S. (F, W, S.)

#### 122. Children, Learning and Material Culture (4)

Lecture/discussion—3 hours; extensive writing or discussion—1 hour; fieldwork. Prerequisite: consent of instructor. How material artifacts shape what and how children learn in school, at home, and in the community. Artifacts examined include books, computers, household appliances, toys and games, entertainment media, collectibles, sports equipment, clothing, folk arts and crafts, and neighborhood

space. Offered in alternate years. GE credit: SocSci, Div, Wrt | SS, VL, WE.—F, S. (F, S.) Watson-Gegeo, White

#### 130. Issues in Higher Education (4)

Discussion—3 hours; field work—3 hours. Prerequisite: consent of instructor. Analysis of current issues in higher education and of some practical implications of varying philosophical approaches to the role of the university. GE credit: SocSci | SS, WE.—F, S. (F, S.) Cuellar, Gonzalez

#### 142. Introduction to Environmental Education (4)

Lecture—3 hours; field work. Study of history, philosophy, principles and approaches to environmental education (EE) and outreach; learning theories, teaching strategies and techniques in EE and outreach; evaluation of EE curricula in non-formal and in-school contexts; observing, aiding and facilitating local environmental education programs. GE credit: SocSci | OL, SS.—S. (S.) Ballard

#### 147. Anglos, Latinos and the Spanish Black Legend: The Origins and Educational Implications of Anti-Hispanic Prejudice (4)

Lecture/discussion—3 hours; field work; term paper. Examination of anti-Hispanic prejudice in the United States focusing on the "Black Legend," a 16th Century anti-Spanish myth underpinning the doctrine of "Manifest Destiny." Exploration of the Legend's presence in contemporary American society through interviews and analysis of school textbooks. (Same course as Spanish 147.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, WE.—(F.) González

#### 150. Cultural Diversity and Education in a Sociopolitical Context (4)

Lecture/discussion—4 hours; extensive writing. Introduction to cultural diversity and education in a socio-political context. Interactive course. Small and large-group discussions explore, extend, and apply readings; range of writing genres for responses to assignments and course themes; lectures, slide shows, speakers, brief fieldwork, and presentations. GE credit: SocSci | SS, DD, WE.—F, W, S. (F, W, S.) Athanases, Enright, Martinez

#### 151. Language Development in the Chicano Child (3)

Lecture/discussion—3 hours. Bilingualism, first and second language acquisition, bilingual education, language assessment, Chicano Spanish and the role of dialect varieties in the classroom. Not open for credit to students who have completed course 151T. Offered irregularly.

#### 151T. Language Development in the Chicano Child (3)

Lecture/discussion—3 hours. Prerequisite: acceptance in Teaching Credential Program. Open to UC Davis Teacher Credential candidates only. Bilingualism, first and second language acquisition, bilingual education, language assessment, Chicano Spanish and the role of dialect varieties in the classroom. Not open for credit to students who have completed course 151.—F. (F.)

#### 152. Academic Spanish for Bilingual Teachers (3)

Lecture/discussion—3 hours; field work. Prerequisite: Acceptance in Teaching Credential Program or consent of instructor. Communicative class taught in Spanish focused on the development of Spanish communication skills for current and/or future bilingual teachers. Main topics are related to school content areas in bilingual settings, with an emphasis on standard and Southwest Spanish dialects. Restricted to Spanish speaking students. GE credit: ArtHum or SocSci | AH or SS, OL, WE.—W. (W.) Fortes, Rosa

#### 153. Diversity in the K-12 Classroom (2)

Lecture/discussion—2 hours. Prerequisite: acceptance in Teaching Credential Program. Analysis of research on learning styles among culturally diverse students with review and evaluation of responsive curricula and classroom teaching techniques. The ethnographic interview as a research tool.—F. (F.) Fortes, Rosa

**160A. Introduction to Peer Counseling (2)**

Lecture/discussion—2 hours. Prerequisite: consent of instructor. Introduction to peer counseling techniques and development of peer counseling skills. Offered irregularly. (P/NP grading only.)

**160B. Issues in Peer Counseling (2)**

Lecture/discussion—2 hours. Prerequisite: consent of instructor. In-depth review and development of skills for specific counseling topics. May be repeated one time for credit when topic differs. Offered irregularly. (P/NP grading only.)

**163. Guidance and Counseling (4)**

Lecture—4 hours. Nature and scope of pupil personnel services; basic tools and techniques of guidance; theory and practice of counseling psychology, with emphasis on educational and vocational adjustment. Offered irregularly.

**173. Language Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Linguistics 1 or consent of instructor; Linguistics 103A, 103B. Theory and research on children's acquisition of their native language, including the sound system, grammatical systems, and basic semantic categories. (Same course as Linguistics 173.) GE credit: SocSci | SS. —F. (F.) Tonkovich

**180A. Computers in Education (3)**

Lecture/discussion—1 hour; laboratory—2 hours; project—3 hours. Prerequisite: acceptance in Teacher Credential Program. Restricted to Teaching Credential Majors. Applications of computers in education as instructional, intellectual, and communication tools. (Deferred grading only, pending completion of sequence.) —F. (F.)

**180B. Computers in Education (3)**

Lecture/discussion—1 hour; laboratory—2 hours; project—3 hours. Prerequisite: acceptance in Teacher Credential Program; successful completion of course 180A. Restricted to Teaching Credential Majors. Applications of computers in education as instructional, intellectual, and communication tools. (Deferred grading only, pending completion of sequence.) —W. (W.) Pomeroy, White

**180C. Computers in Education (3)**

Lecture/discussion—1 hour; laboratory—2 hours; project—3 hours. Prerequisite: acceptance in Teacher Credential Program; successful completion of course 180B. Restricted to Teaching Credential Majors. Applications of computers in education as instructional, intellectual, and communication tools. (Deferred grading only, pending completion of sequence.) —S. (S.) Pomeroy, White

**181. Teaching in Science and Mathematics (2)**

Lecture/discussion—2 hours; field work—2 hours. Prerequisite: major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor. Class size limited to 40 students per section. Exploration of effective teaching practices based on examination of how middle school students learn math and science. Selected readings, discussion and field experience in middle school classrooms. (Same course as Geology 181.) (P/NP grading only.) GE credit: SS, WE. —F, W, S. (F, W, S.) Horn

**182. Computer Project for Curricular Integration (1)**

Seminar—1 hour. Prerequisite: consent of instructor. Design and implementation of a curricular unit to integrate computer technology into a K-12 classroom setting. A project-based seminar intended for students with substantial prior experience with instructional use of computers and related technologies. Not open for credit to students who have completed course 180 or 181. Offered irregularly.

**183. Teaching High School Mathematics and Science (3)**

Lecture/discussion—2 hours; field work. Prerequisite: course 81/Geology 81 or course 181/Geology 181 and major in mathematics/science or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor. Limited to 40 students per section. Exploration and

creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as Geology 183.) GE credit: SocSci | OL, SS, WE. —F, W, S. (F, W, S.) Stevenson

**185. Learning in a Digital Age: Information, Schooling, and Society (4)**

Lecture/discussion—2 hours; lecture/laboratory—2 hours. Focus on the changing nature of learning in a digital age: social media, ubiquitous connectivity, online education, electronic communication, writing, gaming, and youth culture. Readings will be drawn from major recent works detailing fundamental shifts in information, schooling, and society. Offered in alternate years. GE credit: SocSci | OL, VL, SS. —(S.) Ching

**192. Internship (1-3)**

Internship—2-8 hours; discussion—1 hour. Prerequisite: consent of instructor. Internship as a tutor, teacher's aide, or peer counselor in a school or educational counseling setting under the supervision of a faculty member. May be repeated for credit. (P/NP grading only.) —F, W, S. (F, W, S.)

**197T. Tutoring in Education (1-2)**

Tutoring—1-2 hours. Prerequisite: consent of instructor. Leading of small voluntary discussion groups affiliated with the School's upper division courses under the supervision of, and at the option of, the course instructor, who will submit a written evaluation of the student's work. May be repeated one time for credit for a total of 4 units. (P/NP grading only.) Offered irregularly.

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. Offered irregularly. (P/NP grading only.)

**Graduate****200. Educational Research (4)**

Lecture—2 hours; discussion—2 hours. Prerequisite: introductory statistics or consent of instructor. Defining educational research questions, reviewing relevant literature, developing research designs, developing research instruments, selecting appropriate data analysis procedures, and writing research projects. A case problem will provide practice in designing and reporting research. —F. (F.) Solar, Welsh

**201. Qualitative Research in Education (4)**

Seminar—2 hours; lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Examines the design and conduct of educational research using non-numerical data (e.g., text, discourse, imagery and artifacts). Focuses on issues (e.g., validity, reliability, generalizability, ethics) and reporting genres (e.g., narrative accounts, case studies, and arguments). —W. (W.) Enright

**202N. Computer Analysis of Qualitative Data (4)**

Seminar—3 hours; laboratory—2 hours. Critical and practical understanding of how to use computer software programs to analyze qualitative data (text, images, and videotape) in conducting social research. Offered irregularly.

**203. Educational Testing and Evaluation (4)**

Lecture/discussion—4 hours. Prerequisite: graduate standing or consent of instructor. Introduces the theoretical assumptions underlying traditional test construction, as well as the basic statistical principles involved in the design, evaluation, and interpretation of standardized tests. Also introduces the debates surrounding the uses of different kinds of tests and evaluation tools. —F, S. (F, S.) Abedi, Welsh

**204A. Quantitative Methods in Educational Research: Analysis of Correlational Designs (4)**

Discussion—2 hours; laboratory/discussion—2 hours. Prerequisite: introductory statistics or consent of instructor. Topics include multiple correlation and regression, discriminant analysis, logistic regression, and canonical correlation. Emphasis on conceptual understanding of the techniques and use of statistical software. —W. (W.) Kurlaender

**204B. Quantitative Methods in Educational Research: Experimental Designs (4)**

Discussion—2 hours; discussion/laboratory—2 hours. Prerequisite: introductory statistics or consent of instructor. Methods for analysis of experimental data in educational research. Topics include ANOVA, fixed v. random effects models, repeated measures ANOVA, analysis of co-variance, MANOVA, chi square tests, small sample solutions to t and ANOVA. —F, S. (F, S.) Abedi

**205A. Ethnographic Research in Schools I: Current Theory and Practice (4)**

Lecture—4 hours. Current literature from anthropology and society related to schools. Emphasis on the organizational structure of institutions, and the analysis of face-to-face interaction. Will explore the relationship between field-based research and theory development on the acquisition of knowledge in specific social and cultural contexts. —F. (F.) Watson-Gegeo

**205A. Ethnographic Research in Schools I: Current Theory and Practice (4)**

Lecture—4 hours. Prerequisite: graduate standing. Current literature from anthropology and society related to schools. Emphasis on the organizational structure of institutions, and the analysis of face-to-face interaction. Will explore the relationship between field-based research and theory development on the acquisition of knowledge in specific social and cultural contexts. —F. (F.) Watson-Gegeo

**205B. Ethnographic Research in Schools II: Field-Based Research Projects (4)**

Discussion—4 hours. Prerequisite: course 205A. Student research projects in specific schools with cooperative critical analysis of the design, data collection, and inferencing by researchers. Students will continue to meet with instructor as a group throughout the quarter to discuss specific projects. —W. (W.) Watson-Gegeo

**206A. Inquiry into Classroom Practice: Traditions and Approaches (2)**

Lecture/discussion—2 hours; fieldwork. Prerequisite: acceptance in Teacher Credential Program. Introduction to traditions and approaches of teachers conducting research in their own classrooms: purposes, focal areas, methods of data collection and analysis, and written genre conventions. —W. (W.) Athanases, Holmes

**206B. Inquiry into Classroom Practice: Application of Teacher Research Approaches (4)**

Lecture/discussion—3 hours; fieldwork—1 hour. Prerequisite: satisfactory completion of course 206A or consent of instructor. Open to Graduate Teaching Credential students. Analysis and application of teacher research through the development, implementation and evaluation of a short-term classroom research-based intervention. Particular attention to research that enhances learning of English language learners and under-performing students. —S. (S.) Ambrose, Athanases, Ballard, Faltis, Passmore, White

**206C. Inquiry into Classroom Practice: Study Design (4)**

Seminar—3 hours; fieldwork—1 hours. Prerequisite: satisfactory completion of course 206B or consent of instructor. Open to Graduate MA Credential students only. Proposal development for classroom-based inquiry designed to address student learning needs. Mixed methods research design and preliminary data collection approaches. Design and application of baseline student assessment for proposal

development. Literature review. Data collection in K-12 classrooms required.—F. (F.) Ambrose, Faltis, Martinez, Wallace

#### **206D. Inquiry into Classroom Practice: Data Analysis and Research Reporting (4)**

Seminar—2 hours; fieldwork—1 hour; extensive writing or discussion. Prerequisite: satisfactory completion of course 206C or consent of instructor.

Open to Graduate MA Credential students. Support of the inquiry begun in course 206C through continuous collaborative critique and feedback resulting in the writing and presentation of a research study.

Open to Graduate MA Credential students.—W. (W.) Ambrose, Faltis, Martinez, Wallace

#### **207. Concepts of the Curriculum (4)**

Lecture—2 hours; discussion—2 hours. Prerequisite: consent of instructor. Development of the skills of philosophical analysis and argument for the establishment of a point of view, in the consideration of curriculum theory and practice. Classical and contemporary approaches to subject matter and activity emphases, hidden curriculum, and moral education. Offered irregularly.

#### **208. Presenting Educational Research in Written Reports (4)**

Seminar—3 hours; extensive writing. Prerequisite: consent of instructor. Rhetorical and substantive challenges of presenting educational research through written reports; research rhetoric and genres; competing discourse conventions of educational research, policy, and practice; the social organization of publishing educational research. May be repeated one time for credit. Offered irregularly.

#### **209. Image-based Field Research (4)**

Lecture/discussion—3 hours; fieldwork—2 hours. Critical and practical understanding of video tape and still photography as resources for enhancing field research in schools and other social setting. Offered irregularly.

#### **210. The Psychology of School Learning (4)**

Lecture/discussion—4 hours. Study of human learning theory and research related to learning in school. Classical approaches of scholars such as Ausubel, Bruner, Gagné, Piaget, Vygotsky, Skinner. Review of contemporary issues of constructivism, metacognition, problem solving, learning strategies, science and mathematics learning.—S. Martin, White

#### **211. Sociocultural and Situative Perspectives on Learning and Cognition (4)**

Lecture/discussion—3 hours; extensive writing—1 hour. Sociocultural and situative theories of cognition and learning. Major ideas of L.S. Vygotsky, followed by modern perspectives: situated cognition, cognitive apprenticeship, situated learning, communities of practice, cultural-historical activity theory, and distributed cognition. Implications of each theoretical perspective for educational practice. Offered in alternate years.—(S.) Ching, White

#### **213. Individual Assessment (4)**

Lecture—4 hours. Prerequisite: introductory statistics or consent of instructor. Theories of intellectual functioning and the measurement of cognitive abilities in school-aged children. Supervised practice in administration and scoring of contemporary tests for children including the WISC-R, the WAIS-R, the Stanford-Binet, the McCarthy Scales of Children's Ability. Offered in alternate years.—W. (W.) Mundy

#### **215. Research on Achievement Motivation in Education (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Analysis and critique of recent research on cognitive processes related to achievement motivation in school settings. Topics include self-determination theory, attribution theory, goal theory, intrinsic and extrinsic motivation, learned helplessness, psychological reactance, gender and culture, and research design. Offered irregularly.

#### **220. Concepts and Methods of Policy Analysis (4)**

Seminar—3 hours; fieldwork; term paper. Introduction to concepts and methods of policy analysis. Emphasis on the relationship between educational issues and problems; policy development; constructing persuasive policy analyses; issues related to policy process. Offered irregularly.

#### **221. Culture and Social Organization of Schools (4)**

Seminar—4 hours. Prerequisite: consent of instructor. Culture and social organization of schools. Examines perspectives of social researchers, educational policy-makers, and school members and their implications for educational research, policy and practice. Offered irregularly.

#### **222. School Change and Educational Reform (4)**

Lecture/discussion—2 hours; seminar—2 hours. Analysis of models, processes, and case studies of school change and educational reform with respect to variable characteristics of schools and schooling, planned and unplanned change, the moral evaluation of school change, and the role of educational research. Offered irregularly.

#### **223. Education and Social Policy (4)**

Seminar—4 hours. Prerequisite: consent of instructor. Focuses on understanding the social and political context of education in the U.S. and California and how education policy is formed in the broader public arena. Develops skills in educational policy analysis. (Former course 237.)—Hart

#### **225. Education Policy and Law (4)**

Lecture/discussion—4 hours. Examination of law as an instrument of social policy. Specific focus on the legalization of education decision making, its causes, dimensions, and effects on administrative and teacher authority. Offered irregularly.

#### **226. Culture and Social Organization of Higher Education (4)**

Seminar—3 hours; field work—1 hour. Prerequisite: consent of instructor. Critical study of culture and social organization of higher education institutions policies and functions in the U.S., with some attention to other countries. Offered irregularly.—Cuellar, Gonzalez

#### **228. Politics and Governance of Education (4)**

Seminar—3 hours; term paper. Examination of political power, representation, influence, decision-making and inter-governmental relations in the public schools. Offered irregularly.

#### **229. Education Finance Policy (4)**

Seminar—3 hours; term paper. Examination of (1) United States financing public education, (2) the relationship between school finance and education policy, and (3) the relationship between education finance and education practice. Offered irregularly.—Rose

#### **230. Special Topics in Education Policy (4)**

Seminar—3 hours; term paper. Selected topics in education policy. Designed to facilitate preparation for the qualifying examination or dissertation. Students will critically analyze scholarly work including their own works in progress. May be repeated for credit when topic differs.—F, W, S. (F, W, S.) Cuellar, Gee, Hart, Kurlaender, Martorell, Quijada

#### **235. Critical Pedagogy (4)**

Seminar—4 hours. A socio-cultural critique, from an interdisciplinary perspective, of educational reform and change. The critique will include an analysis of the influence of text content on the perpetuation of social power differences. Offered irregularly.

#### **236. Application of Hierarchical Linear Models in Education Research (4)**

Lecture—2 hours; lecture/discussion—2 hours; term paper. Prerequisite: course 204A or similar course with permission of the instructor. Application of hierarchical linear models in education research across multiple areas, such as policy, curriculum, and

assessment. Develop working knowledge of hierarchical linear modeling and an understanding of its use in existing research as well as student's work. Offered in alternate years.—(F) Gee

#### **237. Survey Research Methods (4)**

Lecture/discussion—3 hours; field work—1 hour; term paper. Theories, principles and application of survey research methodology. Students develop, validate, and administer survey instruments; select representative samples; conduct focus groups; and collect, organize, and analyze survey data. Familiarity with introductory concepts in descriptive and inferential statistics is assumed. Offered irregularly.—(F, S. (F, S.) Abedi, Welsh

#### **238. Participatory Action Research (PAR) (4)**

Lecture/discussion—3 hours; fieldwork—1 hour. introductory research methods course recommended. Principles and strategies of PAR and related methodologies that emphasize collaborating with those affected by the issue being researched in order to educate, take action or effect social change. Conduct interviews with potential collaborators, case analyses and research proposals.—W. (W.) Ballard

#### **239. Interview Methods (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 201 or equivalent course recommended. Introduction to qualitative interviewing, focused in particular on narrative and self-story as both practical method and theoretical stance. Students complete a case-focused interview project during the course: designing an interview protocol, conducting the interview, transcribing, analyzing, and presenting their research. Offered in alternate years.—Ching

#### **242. Research on Text Comprehension (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Analysis of recent research related to cognitive processing of written texts. Topics include word decoding, schema theory, background knowledge, assimilation, accommodation, working memory, processing depth, vocabulary acquisition, sentence-level processes, text-level processes, text structure, implications for curriculum and instruction. Offered irregularly.—Solari,

#### **243. Research on the Teaching and Learning of Writing (4)**

Seminar—4 hours. Prerequisite: consent of instructor. Study of issues in research on composition; history of composition studies; data analysis techniques; product and process approaches; cognitive and social perspectives. Offered irregularly.

#### **244. Topical Seminar in Language, Literacy and Culture (4)**

Seminar—3 hours; project—1 hour. Critical study of selected issues of language, literacy, and culture as they relate to education. May be repeated two times for credit when topic differs.—F, W, S. (F, W, S.) Athanases, Enright, Martinez, Solari, Tonkovich

#### **245. Theory and Research in Early Literacy (4)**

Seminar—3 hours; field work—1 hour. Analysis of children's initial processes in learning to read extending from the preschool years into second grade. Topics include emergent literacy, phonological awareness, word recognition, decoding, spelling, vocabulary, comprehension, second language reading, assessment, intervention, and instruction. Offered irregularly.—Tonkovich

#### **246. Reading as a Social and Cultural Process (4)**

Lecture—3 hours; field work—1 hour. Prerequisite: course 211 recommended. Recent theoretical and empirical work on reading in social contexts. Topics include reading as an individual interactive process; reading as a social and cultural process; critical perspectives on reading; implications of contrastive theoretical perspectives for curriculum and instruction in reading. Offered irregularly.

**247. Research on Response to Culturally Diverse Literature, K-12 (4)**

Lecture—3 hours; field work—1 hour. Research on response to culturally diverse literature in classrooms and other K-12 settings. Topics include reader response theories, values in expanding the literary canon, problems of cultural authenticity, resistance to multicultural literature, and instruction for diverse texts and learners. Offered in alternate years.—Athanases

**248. Academic Language and Literacies (4)**

Seminar—3 hours; fieldwork; project. Prerequisite: graduate standing or consent of instructor. Exploration of theories and research on academic language and literacies for the schooling of first and second language learners. Students use basic qualitative methods to collect and analyze classroom language and literacy data. Offered in alternate years.—Enright

**249. Discourse Analysis in Educational Settings (4)**

Seminar—3 hours; term paper. Prerequisite: an introductory linguistics or sociolinguistics course or consent of instructor. Examines form and type in discourse (e.g., narration, conversation, routines), approaches to discourse analysis, and research on classroom discourse (lessons, teaching/learning interactional sequences). Final term paper is an analysis of discourse data tape-recorded by student in a field setting.—W. (W.) Watson-Gegeo

**251. Research in Bilingual and Second Language Education (3)**

Seminar—3 hours. Discussion and analysis of recent research in bilingual and second language education. Topics include: language acquisition in second language learners and bilinguals, second language teaching methods, language-use models in bilingual education, interaction analysis in bilingual/cross-cultural classrooms, use of the vernacular in classrooms. Offered irregularly.—Tonkovich

**253. Language and Literacy in Linguistic Minorities (3)**

Seminar—2 hours; field work—3 hours. Prerequisite: acceptance in Teacher Credential Program. Analysis and application of research on oral language development and literacy in language minority students, through the development, implementation, and evaluation of research-based language arts curriculum.—S. (S.)

**255. Curriculum Development and Evaluation in Mathematics (4)**

Seminar—4 hours. Prerequisite: consent of instructor. Analysis of curricular issues and goals in mathematics education, including long-term trends, current status and influences, proposed changes, and evaluation issues. Selected curriculum projects will be examined. Offered irregularly.—Ambrose, White

**256A. Research in Mathematics Education (4)**

Seminar—4 hours. Prerequisite: consent of instructor. Examination of research process in mathematics education; review of critical productive problems identified by researchers; evolution of trends, issues, theories and hypotheses in various areas of mathematics education research. Course emphasizes foundations. Offered irregularly.—Ambrose, White

**256B. Research in Mathematics Education (4)**

Seminar—4 hours. Prerequisite: consent of instructor. Current research issues and activities in mathematics education: status, trends, theories and hypotheses. Formulation of research questions and design of studies. Projection of future directions for research. Offered irregularly.—Ambrose, White

**257. Computer Technology in Mathematics Education (4)**

Seminar—4 hours. Prerequisite: consent of instructor. The roles of calculators, computers, and graphing calculators in mathematics education will be addressed, with emphasis on the impact of these technologies on curriculum reform. Selected efforts to integrate technology into mathematics instruction will be examined. Offered irregularly.—White

**260. The Modern History of Science Education (4)**

Seminar—4 hours. Prerequisite: consent of instructor. History of curricular issues and goals in science education from the late 19th century forward, including long-term trends, current status and influences, proposed changes, and evaluation issues. National science standards and curriculum projects. Offered irregularly.—Passmore

**262A. Research Topics in Science Education I (4)**

Seminar—4 hours. Prerequisite: consent of instructor. Research process and product in science education; review of critical science education issues; evolution of trends, theories and hypotheses in various areas of science education research. Survey of current major research in science education. Offered irregularly.

**262B. Research Topics in Science Education II (4)**

Seminar—4 hours. Current research issues and activities in science education: status, trends, theories and hypotheses. Formulation of research questions, design of studies and critical, in-depth review of literature related to the student's research interests. Offered irregularly.—Passmore

**264. Scientific Literacy and Science Education Reform (4)**

Seminar—4 hours. Prerequisite: consent of instructor. Current trends in science education reform locally, regionally, and nationally focusing on scientific literacy. Equity, access and "science for all." Offered irregularly.—Ballard, Patterson, Trexler

**270. Research on Teacher Education and Development (4)**

Seminar—3 hours; project. Experience with formal or informal teaching recommended. Research on teacher preparation in university credential programs and on professional development of in-service teachers, with special attention to teacher preparation for work with culturally and linguistically diverse youth. Offered irregularly.—Athanases

**271. Supervision of Student Teachers: Research, Theory & Practice (4)**

Lecture/discussion—3 hour; fieldwork—1 hour. Research, theory and practice in the preparation and supervision of teachers. Practice in the supervision of candidates in university teaching credential programs during the student teaching field placement and the mentoring of novice teachers by expert teachers. Offered irregularly.

**275A. Effective Instruction: Curriculum and Assessment-Theory, Research, and Practice (2)**

Lecture/discussion—2 hours. Prerequisite: acceptance in Teacher Credential Program. Restricted to Teaching Credential majors. Examination of contemporary theories of curriculum development, research about the relationship among instructional planning, classroom assessment, and student learning to guide teaching practice.—F. (F. W.) Holmes

**275B. Effective Instruction: English Language Development and Instructing English Language Learners (2)**

Lecture/discussion—2 hours. Prerequisite: acceptance in the Teaching Credential program. Analysis and application of English language acquisition and development research to teaching practice. Particular attention to research that enhances learning of English language learners and under-performing students.—F. W. (F. W.) Fortes, Holmes

**280A. Inquiry and Practice: Qualitative Research for Educational Leaders (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Prepares students to understand the nature/assumptions/logic of qualitative methodology as applied to educational settings, focusing on issues of design/conceptualization/interpretation/application of qualitative research procedures. Students will use these methods in conducting studies in their educational settings.—F. (F.) Rodriguez

**280B. Inquiry and Practice: Quantitative Research for Educational Leaders (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Field-based and general quantitative research methods in education will focus this course. Students acquire skills and knowledge to collect, organize, analyze, and interpret univariate and multivariate quantitative data in educational research, dissertation projects, and field-based projects.—W. (W.) Hart

**280C. Inquiry and Practice: Research Design and Application for Educational Leaders (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Educational leaders are introduced to qualitative, quantitative, and mixed-methods educational research methods and learn to frame research questions, identify data/sources, use descriptive statistics, critically examine research studies, make sense of educational research/policy, and conduct independent studies.—S. (S.) Gee

**281A. Problem-Based Learning Courses: Part 1 (4)**

Lecture/discussion—4 hours; extensive writing or discussion; fieldwork. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Students identify problems from their educational settings, engage in data collection/analysis, write-up the process/results, and present to class. Work may become a dissertation proposal, if the problem or its extension is of sufficient interest and value.—F. (F.) Heckman

**281B. Problem-Based Learning Courses: Part 2 (4)**

Lecture/discussion—4 hours; extensive writing or discussion; fieldwork. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Continuation of part one.—W. (W.) Quijada

**281C. Problem-Based Learning Courses: Part 3 (4)**

Lecture/discussion—4 hours; extensive writing or discussion; fieldwork. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Continuation of part two.—S. (S.) Kurlaender

**282A. Beginning Issues and Practices: Contemporary Educational Leadership (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Students explore the history and emergent relationships among leadership theories/practice and their application to current educational settings. Students will reflect on and refine their personal theory of leadership.—F. (F.) Rodriguez

**282B. Beginning Issues and Practices: Diversity Issues for Educational Leaders (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. The diversity of stakeholders and community issues in California schools and colleges will be explored. Emphasis will be placed on the interaction between underrepresented segments of society and educational institutions. Best Practices in leading diverse schools will be explored.—W. (W.) Cuellar

**283A. Advanced Issues and Practices: Leadership Across Communities (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Students examine the theory/practice/process of leadership in community-building and collaboration in/across communities, while addressing the utilization of human and material resources and the creation of partnerships, community linkages, and collaborative efforts.—S. (S.)

**283B. Advanced Issues and Practices: Leadership and Student Services (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Practical and theoretical per-

spectives for building a sense of vision to lead the profession of student affairs and to meet the needs of the whole student.—S. (S.) Quijada

#### **284A. Policy: History and Theory of Educational Policy (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Students learn/analyze the history/theory of educational policy. They see how education leaders have/can positively influence the process and implement effective policies in their local institutions. Policy issues covered: educational opportunity, equity, access, regulation, testing, tenure, accountability.—F. (F.)

#### **284B. Policy: Formulating and Influencing Policy (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Students will conduct critical analyses of policy at the federal, judicial, state, regional and local levels. Specific California and federal policy environment structures, processes and people will be examined for intended consequences, ethical dilemmas, social justice and equity issues.—W. (W.) Martorell

#### **284C. Policy: Possibilities and Limitations of Educational Policy in a Democracy (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Students will critically examine the democratic purposes of education in light of existing National, State, and local policy reform efforts. Questions like, In what ways are these reforms and policies guided by democratic ideas and challenged by those ideals.—W. (W.)

#### **285A. Educational Finance, Human Resources, and Law: Integrated Seminar: Human and Financial Assets: Allocations, and Budgets (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Topics include: education finance theory, contemporary finance policy issues, intergovernmental relations, effective resource management, budget analysis and preparation.—S. (S.) Rose

#### **285B. Educational Finance, Human Resources, and Law: Ethical and Legal Issues in Education (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Human resource and legal concepts and activities governing decisions of school leaders in public education. Attention to theory, application, and practice of personnel and risk management, curriculum, student services, teacher rights, torts, student rights.—F. (F.)

#### **285C. Educational Finance, Human Resources, and Law: Human Resources and Personnel (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Human resource management research and theory and for applying human resource techniques in the educational setting.—S. (S.)

#### **286A. Organizational Structures and Change: Data-Driven Decision-Making for Change (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. Students use and examine multiple sources of information and data and trends found in making quality decisions to improve P-12/ community college settings and addressing problems at sites. Students learn limitations of these data sources.—F. (F.) Heckman

#### **286B. Organizational Structures and Change: Curriculum & Instruction Issues in Education (4)**

Lecture/discussion—4 hours; fieldwork; project. Prerequisite: admission into the CANDEL EdD program or consent of instructor. This course addresses the

historical development of various curriculum and instructional methodologies found in public and private schools and colleges, and their impact on current curriculum development and reform efforts at the national, state and local level.—W. (W.)

#### **287. CANDEL Dissertation Seminars (6-12)**

Prerequisite: admission into the CANDEL EdD program or consent of instructor. Third year seminars encourage students to complete dissertations within the year. Cohort members meet together in every three-week meetings with faculty members and share their writing, data collection, analysis, discussion of results, development of conclusions/implications. May be repeated nine times for credit until completion of dissertation. (S/U grading only.)—F, W, S. (F, W, S.)

#### **287D. CANDEL Dissertation (6-12)**

Prerequisite: passing of qualifying exams in CANDEL program and advancement to candidacy; consent of instructor. Cohort members continue to meet with faculty and share their writing, data collection, analysis, development of conclusions/implications. May be repeated nine times for credit until completion of dissertation. (S/U grading only.)—F, W, S. (F, W, S.)

#### **291. Proseminar in Education (4)**

Seminar—3 hours; fieldwork—3 hours. Prerequisite: admission to the M.A. or Ph.D. graduate program in Education. Professional induction into educational research field and Graduate Group in Education at UC Davis. Introduction to landscape of educational research methodologies, purposes and theories. Analysis of debates within field. Investigation of K-12 educational outreach efforts at UC Davis. May be repeated two times for credit. May take the course one time as an MA student and one time as a PhD student.—F. (F.) Ambrose, Martinez, Solari, Welsh

#### **292. Special Topics in Education (2-4)**

Variable—2-4 hours. Prerequisite: consent of instructor. Selected topics in education. Designed to facilitate preparation for the qualifying examination or dissertation. Students will critically analyze scholarly work including their own works in progress. May be repeated for credit.—F, W, S. (F, W, S.)

#### **294. Special Topics in Science, Agriculture and Mathematics Education (4)**

Seminar—3 hours; term paper; project. Critical study of special topics of research relevant to science, agricultural and mathematics education. Students and faculty present work-in-progress on a major research project, and critically analyze and discuss one another's developing scholarly work. May be repeated for credit when topic differs.—W, S. (W, S.) Ambrose, Ballard, Martin, Patterson, White

#### **295. Special Topics in Learning and Mind Science (4)**

Seminar—3 hours; term paper. Critical study of selected issues in the learning sciences, neurodevelopmental disorders, and psychometrics and measurement, as they relate to education. May be repeated for credit when topic differs. Offered irregularly.—Abedi, Ching, Martin, Mundy, Solari, White

#### **298. Group Study (1-5)**

Prerequisite: consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

#### **299. Individual Study (1-6)**

Independent study—3-18 hours. Prerequisite: consent of instructor. Individual study under the direction of a faculty member. (S/U grading only.)—F, W, S. (F, W, S.)

#### **299D. Research (1-12)**

Independent study—3-36 hours. Prerequisite: consent of instructor. Research for individual graduate students. (S/U grading only.)—F, W, S. (F, W, S.)

#### **Professional**

#### **300. Reading in the Elementary School (4)**

Lecture—3 hours; fieldwork—3 hours. Prerequisite: acceptance in Teacher Credential Program. Principles, procedures, and curriculum materials for teach-

ing of reading. Includes decoding skills with a special emphasis on phonics, comprehension skills, study skills, and reading in the content areas.—F. (F.)

#### **301. Reading in the Secondary School (4)**

Discussion—4 hours. Prerequisite: graduate standing, enrollment in the secondary credential program, or consent of instructor. Principles, procedures, and materials to help secondary school teachers improve the reading competence of students. Strategies for enhancing learning through reading and writing in all disciplines, with special attention to linguistically diverse populations.—F. W. (F, W.) Faltis, Martinez

#### **301A. Teaching Literacy in High School Contexts (2)**

Lecture/discussion—2 hours. Prerequisite: acceptance in Teacher Credential Program; consent of instructor. Restricted to students enrolled in the secondary credential program. Focuses on secondary school literacy practices and strategies for engaging English-speaking and bilingual students with textual, image, and digital literacies across content areas. Covers reading and writing, the Common Core and Language Proficiency standards.—F, W. (F, W.) Faltis, Martinez

#### **301B. Teaching Literacy in High School Contexts (2)**

Lecture/discussion—2 hours. Prerequisite: acceptance in Teacher Credential Program. Restricted to students enrolled in the secondary credential program. Focuses on secondary school literacy practices and strategies for engaging English-speaking and bilingual students with textual, image, and digital literacies across content areas. Covers reading and writing, the Common Core and Language Proficiency standards.—F, W. (F, W.) Faltis, Martinez

#### **302. Language Arts in the Elementary School (2)**

Lecture—2 hours. Prerequisite: acceptance in Teacher Credential Program. Principles, procedures, and materials for the teaching of oral and written expression, listening skills, drama, and children's literature in elementary schools. Offered irregularly.

#### **303. Art Education in the Elementary School (2)**

Lecture/discussion—2 hours. Prerequisite: acceptance in Teacher Credential Program. Understanding the principles of education in the arts through participation. Development of concepts, introduction to media, and techniques suitable for the elementary school. Curriculum, pedagogy, and materials for teaching the visual and performing arts curriculum in elementary schools.—S. (S.)

#### **304A. Teaching in the Elementary Schools (2-18)**

Lecture/discussion—2 hours; fieldwork—9-48 hours. Prerequisite: acceptance in Teacher Credential Program. Supervised teaching in regular classrooms in elementary schools. Selection and organization of teaching materials. Introduction to techniques of diagnosing school achievement of children.—F. (F.)

#### **304B. Teaching in the Elementary Schools (2-18)**

Lecture/discussion—2 hours; fieldwork—9-48 hours. Prerequisite: acceptance in Teacher Credential Program. Supervised teaching in regular classrooms in elementary schools. Current conceptions of elementary school curriculum, emphasis on contributions from the social, biological, and physical sciences. Emphasis on effective teaching methods.—W. (W.)

#### **304C. Teaching in the Elementary Schools (2-18)**

Lecture/discussion—2 hours; fieldwork—9-48 hours. Prerequisite: acceptance in Teacher Credential Program. Supervised teaching in regular classrooms in elementary schools. Evaluation of teaching materials including instructional technology. Current elementary school curriculum with emphasis on contributions from fine arts and humanities.—S. (S.)

#### **305A. Teaching in the Middle Grades (5-8)**

Lecture—2 hours; seminar—2 hours; student teaching—15-30 hours. Prerequisite: acceptance in Teacher Credential Program. Supervised teaching in

regular or special education classrooms in middle grades. Current conceptions of the middle-grades curriculum with emphasis on social, biological, and physical sciences. Effective teaching methods. Offered irregularly.

### **306A. Teaching in the Secondary Schools (2-18)**

Lecture/discussion—2 hours; fieldwork—9-48 hours. Prerequisite: acceptance in Teacher Credential Program. Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology.—F. (F.)

### **306B. Teaching in the Secondary Schools (2-18)**

Lecture/discussion—2 hours; fieldwork—9-48 hours. Prerequisite: acceptance in Teacher Credential Program. Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology.—W. (W.)

### **306C. Teaching in the Secondary Schools (2-18)**

Lecture/discussion—2 hours; fieldwork—9-48 hours. Prerequisite: acceptance in Teacher Credential Program. Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology.—S. (S.)

### **307. Methods in Elementary Science (2)**

Lecture/discussion—2 hours. Prerequisite: acceptance in Teacher Credential Program. Principles, procedures, and materials for teaching the biological and physical sciences in elementary schools.—F. (F.) Patterson, Passmore, Trexler

### **308. Methods in Elementary Social Studies (2)**

Lecture/discussion—2 hours. Prerequisite: acceptance in Teacher Credential Program. Principles, procedures, and materials for teaching history and the social sciences in elementary schools.—W. (W.) Rosa

### **309. The Teaching of Mathematics, K-9 (3)**

Lecture/discussion—3 hours. Prerequisite: acceptance in Teacher Credential Program. Mathematics curriculum and teaching methods for K-9 reflecting the needs of California's diverse student populations.—W. (W.) Mendle

### **322A. Pedagogical Preparation for Secondary Social Science I (3)**

Lecture/discussion—2 hours; discussion—1 hour. Prerequisite: acceptance in Teacher Credential Program. Introduction to teaching methods and curriculum approaches for secondary social science teaching. State and national curriculum standards; application of learning theory to effective instruction; interdisciplinary teaching and active learning approaches; effective teaching strategies for English Learners.—F. (F.) Rosa

### **322B. Pedagogical Preparation for Secondary Social Science II (3)**

Lecture/discussion—1 hour; discussion—2 hours. Prerequisite: acceptance in Teacher Credential Program. Intermediate teaching methods and curriculum approaches for secondary social science teaching. Interdisciplinary approaches to teaching major themes across social science content areas; teaching potentially controversial social science topics; teaching democratic civic values; student assessment and evaluation.—W. (W.) Rosa

### **323A. Physical Science in the Secondary School (3)**

Laboratory/discussion—2 hours; discussion/laboratory—1 hour. Prerequisite: acceptance in Teacher Credential Program. Activity-based overview of concepts and processes in secondary school physical sciences. Emphasis upon philosophy, appropriate teaching methods, materials, assessment and evaluation of learning.—F. (F.) Passmore, Pomeroy

### **323B. Life Sciences in the Secondary School (3)**

Laboratory/discussion—2 hours; discussion/laboratory—1 hour. Prerequisite: acceptance in Teacher Credential Program. Activity-based overview of concepts and processes in secondary school biology and life sciences. Emphasis on philosophy, appropriate teaching methods, materials, assessment and evaluation of learning, and issues.—W. (W.) Passmore, Pomeroy

### **324A. Methods and Technology in Secondary Mathematics I (4)**

Lecture/discussion—4 hours. Prerequisite: acceptance in Teacher Credential Program; consent of instructor. Introduction to methods and curriculum for teaching mathematics at the secondary level. Introduction to applications of computer technology as instructional, intellectual, and communication tools for mathematics teachers.—F. (F.) Wallace

### **324B. Methods in Secondary Mathematics II (3)**

Lecture/discussion—3 hours. Prerequisite: acceptance in Teacher Credential Program; consent of instructor. Expansion of methods and curriculum for teaching mathematics at the secondary level. Intermediate applications of computer technology as instructional, intellectual, and communication tools in mathematics teaching.—W. (W.) Wallace

### **325. Research and Methods in Secondary English Language Arts (4)**

Discussion—4 hours. Prerequisite: acceptance in Teacher Credential Program; consent of instructor. Research on teaching and learning in the language arts. Principles, procedures and materials for improving the writing, reading and oral language of secondary students, with special attention to students from culturally and linguistically diverse populations.—F. (F.) Holmes

### **326. Teaching Language Minority Students in Secondary Schools: Methods and Research (4)**

Seminar—3 hours; field work—3 hours. Prerequisite: acceptance in Teacher Credential Program; consent of instructor. Research on principles, procedures and curricula for teaching discipline-specific concepts to language-minority students in secondary schools. Second-language acquisition principles and instructional strategies. Offered irregularly.

### **327A. Teaching Methods for Secondary Foreign Language/Spanish, Part I (3)**

Lecture—3 hours. Prerequisite: acceptance in Teacher Credential Program. Introduction to methods for teaching Spanish as a foreign and a heritage language in secondary schools. State and National Standards. Theories on second language acquisition. Lesson plans. Effective teaching strategies and class management. Open to Graduate Teaching Credential students. Offered irregularly.

### **327B. Teaching Methods for Secondary Foreign Language/Spanish, Part II (3)**

Lecture—3 hours. Prerequisite: acceptance in Teacher Credential Program. Continuation to methods for teaching Spanish as a foreign and a heritage language in secondary schools. Research and practice on foreign and heritage language teaching. Expansion of effective teaching strategies and class management. Open to Graduate Teaching Credential students. Offered irregularly.

### **398. Group Study (1-5)**

(S/U grading only.)

### **399. Individual Study (1-5)**

(S/U grading only.)

## **Education (A Graduate Group)**

Michal Kurlaender, Chairperson of the Group

### **Faculty**

Leonard Abbeduto, Ph.D., Professor; Director of UC Davis MIND Institute and Tsakopoulos-Vismara Endowed Chair (*Psychiatry and Behavioral Sciences*)

Jamal Abedi, Ph.D., Professor (*Education*)

Rebecca C. Ambrose, Ph.D., Associate Professor (*Education*)

Shannon Anderson, Ph.D., Professor (*Graduate School of Management*)

Steven Z. Athanases, Ph.D., Professor (*Education*)

Heidi Ballard, Ph.D., Associate Professor (*Education*)

Robert Bayley, Ph.D., Professor (*Linguistics*)

Robert Blake, Ph.D., Professor

(*Spanish & Portuguese*)

Scott E. Carrell, Ph.D., Associate Professor

(*Economics*)

Cynthia Carter Ching, Ph.D., Associate Professor (*Education*)

Harry Cheng, Ph.D., Professor; Director of UC Davis K-14 Outreach Center for Computing and STEM Education (C-STEM) (*Mechanical and Aerospace Engineering*)

Cecilia Colombi, Ph.D., Professor (*Spanish*)

Marcela Cuellar, Ph.D., Assistant Professor (*Education*)

Adela de la Torre, Ph.D., Professor

(*Chicano/a Studies*)

Kerry Enright, Ph.D., Associate Professor (*Education*)

Nancy Erbstein, Ph.D., Assistant Research Scientist (*Human and Community Development*)

Christian Faltis, Ph.D., Professor; Director of Teacher Education (*Education*)

Dana Ferris, Ph.D., Professor; Associate Director for Lower-Division Writing (*University Writing Project*)

Kevin Gee, Ed.D., Assistant Professor (*Education*)

Cristina Gonzalez, Professor

(*Spanish and Education*)

Randi Hagerman, M.D., Professor; Medical Director (*M.I.N.D. Institute*)

Cassandra Hart, Ph.D., Assistant Professor

(*Education*)

Paul Heckman, Ph.D., Professor and Associate Dean (*Education*)

Jacob Hibel, Ph.D., Assistant Professor (*Sociology*)

Michal Kurlaender, Ed.D., Associate Professor

(*Education*)

Harold Levine, Ph.D., Professor and Dean

(*Education*)

Lee Martin, Ph.D., Assistant Professor (*Education*)

Danny Martinez, Ph.D., Assistant Professor

(*Education*)

Paco Martorell, Ph.D., Assistant Professor

(*Education*)

Julia Menard-Warwick, Ph.D., Associate Professor

(*Linguistics*)

Barbara J. Merino, Ph.D., Professor Emeritus

(*Education*)

Lisa M. Soederberg Miller, Ph.D., Associate Professor; Director, Adult Development Lab

(*Human and Community Development*)

Marco Molinaro, Ph.D., Chief Education Officer, Center for Biophotonics Science and Technology

Peter C. Mundy, Ph.D., Professor (*Education*)

Debbie Niemeier, Ph.D., Professor

(*Civil & Environmental Engineering*)

Adrienne Nishina, Ph.D., Assistant Professor

(*Human and Community Development*)

Patsy Eubanks Owens, Professor, Chair of Landscape Architecture (*Environmental Design*)

Marianne Page, Ph.D., Associate Professor

(*Economics*)

Cynthia Passmore, Ph.D., Associate Professor

(*Education*)

Sarah Perrault, Ph.D., Assistant Professor

(*University Writing Program*)

J. Richard Pomeroy, Ph.D., Lecturer, Supervisor of Teacher Education (*Education*)  
 Wendell Potter, Ph.D., Senior Lecturer Emeritus (*Physics*)  
 Patricia Quijada, Ph.D., Associate Professor (*Education*)  
 Gloria Rodriguez, Ph.D., Assistant Professor (*Education*)  
 Heather M. Rose, Ph.D., Associate Professor (*Education*)  
 Julie Schweitzer, Ph.D., Associate Professor (*Psychiatry & Behavioral Sciences*); Director (*ADHD Program, M.I.N.D. Institute*)  
 Kimberlee Shawman, Ph.D., Associate Professor (*Sociology*)  
 Emily Solaro, Ph.D., Assistant Professor (*Education*)  
 Dean Tantillo, Ph.D., Professor (*Chemistry*)  
 Christopher Thaiss, Ph.D. (*Clark Kerr Presidential Chair and Director, University Writing Program*)  
 Ross Thompson, Ph.D., Professor (*Psychology*)  
 Thomas Timar, Ph.D., Professor Emeritus (*Education*)  
 Cary Trexler, Ph.D., Associate Professor (*Education*)  
 Yuuko Uchikoshi Tonkovich, Ed.D., Associate Professor (*Education*)  
 Karen Watson-Gegeo, Ph.D., Professor (*Education*)  
 Megan Welsh, Ph.D., Assistant Professor (*Education*)  
 Tobin White, Ph.D., Associate Professor (*Education*)  
 Carl Whithaus, Ph.D., Professor, Director (*University Writing Program*)

**Graduate Study.** The Graduate Group in Education offers programs of study and research leading to the Ph.D. degree. Students may concentrate in; language, literacy and culture; learning and mind sciences; mathematics education; school organization and educational policy; or science and agriculture education. Students may also combine these fields of study with designated emphasis areas such as Critical Theory; Second Language Acquisition, Women's Studies, and Writing, Rhetoric, and Composition Studies. Detailed information regarding graduate study may be obtained by writing the Graduate Coordinator or at <http://education.ucdavis.edu/programs/PhDOverview.html>.

**Preparation.** Students should have earned a Bachelor's or M.A. degree or the equivalent in a discipline relevant to their proposed emphasis program. For example, students applying for the mathematics education emphasis should have earned the B.A. or M.A. or M.A.T. degree in mathematics or mathematics education.

**Graduate Advisers.** Lee Martin, Heather Rose, and Danny Martinez

**Graduate Coordinator.** Mary M. Reid

**Courses.** See *Education, School of*, on page 257.

## Endocrinology and Metabolism

See **Internal Medicine (IMD)**, on page 437.

## Engineering

(College of Engineering)

Jennifer Sinclair Curtis, Ph.D., Dean

S. Felix Wu, Ph.D., Associate Dean—Academic Personnel and Planning

Jean S. VanderGheynst, Ph.D., Associate Dean—Research and Graduate Studies

James A. Schaaf Ph.D., Associate Dean—Undergraduate Studies

C.P. (Case) van Dam, D. Engr., Associate Dean—Facilities and Capital Planning

Bruce White, Ph.D., Executive Associate Dean

**College Office.** 1042 Kemper Hall

### Undergraduate Study

The college has eight departments:

- Biological and Agricultural Engineering
- Biomedical Engineering
- Chemical Engineering
- Civil and Environmental Engineering
- Computer Science Engineering
- Electrical and Computer Engineering
- Materials Science and Engineering
- Mechanical and Aerospace Engineering

### Graduate Study

Graduate degrees (M.S and Ph.D.) are offered in the following engineering disciplines:

- Biological Systems Engineering
- Biomedical Engineering
- Chemical Engineering
- Civil and Environmental Engineering
- Computer Science
- Electrical and Computer Engineering
- Materials Science and Engineering
- Mechanical and Aerospace Engineering
- Transportation Technology and Policy

### The Major Programs

Eleven majors, leading to the B.S. degree, are open to students.

- Aerospace Science & Engineering
- Biochemical Engineering
- Biological Systems Engineering
- Biomedical Engineering
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Computer Science and Engineering
- Electrical Engineering
- Materials Science and Engineering
- Mechanical Engineering

### Minor Programs

The College of Engineering offers nine undergraduate minors:

- Biomedical Engineering (Department of Biomedical Engineering)
- Computational Biology (Department of Computer Science)
- Construction Engineering and Management (Department of Civil and Environmental Engineering)
- Electrical Engineering (Department of Electrical and Computer Engineering)
- Energy Science and Technology (Department of Biological and Agricultural Engineering)
- Energy Policy (Department of Biological and Agricultural Engineering)
- Energy Efficiency (Department of Biological and Agricultural Engineering)
- Materials Science (Department of Materials Science and Engineering)
- Sustainability in the Built Environment (Department of Civil and Environmental Engineering)

### Courses in Engineering (ENG)

Students are encouraged to carefully adhere to all prerequisite requirements. The instructor is authorized

to drop students from a course for which stated prerequisites have not been completed.

### Lower Division

#### 1. Introduction to Engineering (1)

Lecture—1 hour. Open to first year students only. Introduction to the role of engineers in the acquisition and development of engineering knowledge, the differences and similarities among engineering fields, and the work ethic and skills required for engineering. (P/NP grading only.) GE credit: SE.—F. (F.) Schaaf

#### 2. Creativity and Entrepreneurship for Engineers (3)

Discussion—3 hours. Introduction to entrepreneurial thinking from an engineer's perspective. Focus on identifying entrepreneurial opportunities, developing prototypes, and generating business models. Emphasis on developing a creative and entrepreneurial mindset. GE credit: SciEng or SocSci | SE or SS.

#### 4. Engineering Graphics in Design (3)

Lecture—2 hours; laboratory—3 hours. Engineering design, descriptive geometry, pictorial sketching, computer-aided graphics, and their application in the solution of engineering problems. GE credit: SciEng | SE, VL.—F, W. (F, W.) Schaaf, Soshi

#### 6. Engineering Problem Solving (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 16A, 17A or 21A, C- or above; Mathematics 16B, 17B or 21B, C- or above (may be taken concurrently). Methodology for solving engineering problems. Engineering computing and visualization based on MATLAB. Engineering examples and applications. GE credit: SciEng | QL, SE.—F, W, S. (F, W, S.)

#### 7. Technology and Culture of the Internet (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: basic computer experience recommended. Technology and culture of networked computing and the Internet. Topics include the history and development of networked computing; Internet architecture and services; basics of Web page design and hypertext markup language; political, social, cultural, economic and ethical issues related to the Internet. Offered irregularly. GE credit: SciEng | SE.

#### 10. The Science Behind the Technology in Our Lives (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: high school algebra. Understanding of how the technology in our lives works using only basic concepts and rudimentary mathematics. GE credit: SciEng or SocSci, Wrt | SE or SS.—F, W. (F, W.) Orel, Parikh

#### 11. Issues in Engineering (1)

Lecture—1 hour. Prerequisite: Participation in the MESA Engineering Program or consent of instructor. Designed to broaden student's understanding of the engineering profession, its methods, principles, design and development process, career opportunities, and professional resources. Offered irregularly.

#### 17. Circuits I (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 22A (C- or better recommended); Mathematics 22B (C- or better recommended) may be taken concurrently; Physics 9C or 9HD (C- or better recommended). Basic electric circuit analysis techniques, including electrical quantities and elements, resistive circuits, transient and steady-state responses of RLC circuits, sinusoidal excitation and phasors, and complex frequency and network functions. GE credit: SciEng | SE, VL.—F, S. (F, S.)

#### 20. Introduction to Space Exploration: Understanding the Technological and Environmental Challenges to Our Exploration of the Solar System (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: high school level Algebra, Geometry, General Science (Physics and Chemistry). Introductory overview of the space environment. Discussion of space exploration technology including propulsion, orbital mechanics, and spacecraft engineering. Offered irregularly. GE credit: SciEng | QL, SE, SL.

**35. Statics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Physics 9A C- or better and Mathematics 21D C- or better concurrently. Force systems and equilibrium conditions with emphasis on engineering problems. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**45. Properties of Materials (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: C- or better in Mathematics 16C or 21C, Chemistry 2A, and Physics 9A. Introductory course on the properties of engineering materials and their relation to the internal structure of materials. GE credit: SciEng, Wrt | QL, SE, SL, WE.—F, W, S, Su. (F, W, S, Su.)

**45H. Honors Properties of Materials (1)**

Discussion—1 hour. Prerequisite: enrollment in the Materials Science and Engineering Honors Program; concurrent enrollment in course 45 required. Examination of special materials science and engineering topics through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Open only to students in the Materials Science and Engineering Honors program.—W. (W.)

**45Y. Properties of Materials (4)**

Web virtual lecture; laboratory. Prerequisite: C- or better in Mathematics 16C or 21C; Chemistry 2A and Physics 9A. Introductory course on the properties of engineering materials and their relation to the internal structure of materials. Not open for credit to students who have taken course 45. GE credit: SciEng | QL, SE, SL.—Su. (Su.)

**98. Directed Group Study (1-4)**

Restricted to College of Engineering students only. (P/NP grading only.) May be repeated for credit up to three times when content differs.

**Upper Division****100. Electronic Circuits and Systems (3)**

Laboratory—3 hours; lecture—2 hours. Prerequisite: course 17 (C- or better is recommended). Introduction to analog and digital circuit and system design through hands on laboratory design projects. Students who have completed Electrical and Computer Engineering 100 may receive only 1.5 units of credit. GE credit: SciEng | SE, VL.—F, W, S. (F, W, S.)

**102. Dynamics (4)**

Lecture—4 hours. Prerequisite: grade of C- or better in Engineering 35; grade of C- or better in Mathematics 22B. Open to College of Engineering students only. Kinematics and kinetics of particles, systems of particles, and of rigid bodies; application of these topics are applied to engineering problems. Only two units of credit allowed to students who have previously taken course 36. GE credit: SciEng | QL, SE, VL.—F, W, S. (F, W, S.) Cheng, Eke, Hess, Joshi

**103. Fluid Mechanics (4)**

Lecture—4 hours. Prerequisite: C- or better in each of the following: Engineering 35 and Mathematics 22B and Physics 9B. Open to students in the College of Engineering and Hydrology majors. Fluid properties, fluid statics, continuity and linear momentum equations for control volumes, flow of incompressible fluids in pipes, dimensional analysis and boundary-layer flows. GE credit: SciEng | SE.—F, W, S. (F, W, S.) Aldredge, Davis, Delplanque, Hwang, Kennedy, Robinson

**104. Mechanics of Materials (4)**

Lecture—4 hours. Prerequisite: grade of C- or better in Engineering 35 and Mathematics 22B. Uniaxial loading and deformation. Uniaxial loading and deformation. General concepts of stress-strain-temperature relations and yield criteria. Torsion of shafts. Bending of beams. Deflections due to bending. Introduction to stability and buckling. GE credit: SciEng | QL, SE.—F, W, S. (F, W, S.)

**104L. Mechanics of Materials Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 104. Experiments which illustrate the basic principles and verify the analysis procedures used in the mechanics of materials are performed using the basic tools and techniques of experimental stress analysis. GE credit: SciEng | SE.—W, S. (W, S.)

**105. Thermodynamics (4)**

Lecture—4 hours. Prerequisite: grade of C- or better in Mathematics 22B and Physics 9B. Open to College of Engineering students only. Fundamentals of thermodynamics: heat energy and work, properties of pure substances, First and Second Law for closed and open systems, reversibility, entropy, thermodynamic temperature scales. Applications of thermodynamics to engineering systems. GE credit: SciEng | QL, SE, VL.—F, W, S. (F, W, S.) Aldredge, D'Souza, Erickson

**106. Engineering Economics (3)**

Lecture—3 hours. Prerequisite: upper division standing in Engineering. The analysis of problems in engineering economy; the selection of alternatives; replacement decisions. Compounding, tax, origins and cost of capital, economic life, and risk and uncertainty are applied to methods of selecting most economic alternatives. GE credit: SciEng or SocSci | QL, SE, SL, SS, VL.—W. (W.) Hartsough, Slaughter

**111. Electric Power Equipment (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: grade of C- or better in course 17. Principles of AC and DC electric motors and generators, their control systems and power sources. Selection of electric power equipment components based on their construction features and performance characteristics. Offered irregularly. GE credit: SciEng | QL, SE, VL, WE.—Delwiche, Hartsough

**121. Fluid Power Actuators and Systems (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: grade of C- or better in Engineering 100 and Engineering 102. Hydraulic and pneumatic systems with emphasis on analysis and control of actuators. Design of hydraulic and pneumatic systems, specification and sizing of components, and selection of electro-hydraulics/electro-pneumatics, servo valves, and closed loop systems to solve basic control problems. Offered in alternate years. GE credit: SciEng | QL, SE, SL, VL, WE.—(S.) Rosa

**122. Introduction to Mechanical Vibrations (4)**

Lecture—4 hours. Prerequisite: C- or better in Engineering 102; C- or better in Engineering 6 or course 5 or Computer Science Engineering 30; ability to program in MATLAB. Free and forced vibrations in lumped-parameter systems with and without damping; vibrations in coupled systems; electromechanical analogs; use of energy conservation principles. GE credit: SciEng | QL, SE.—F. (F.) F.

**160. Environmental Physics and Society (3)**

Lecture—3 hours. Prerequisite: Physics 9D, 5C, or 10 or 1B and Mathematics 16B or the equivalent. Impact of humankind on the environment will be discussed from the point of view of the physical sciences. Calculations based on physical principles will be made, and the resulting policy implications will be considered. In the College of Engineering, students may receive only one unit of credit towards the Technical Electives requirement. (Same course as Physics 160.) GE credit: SciEng or SocSci | SE, SL.—S. (S.) Craig, Jungerman

**180. Engineering Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in Mathematics 21D and 22B; C- or better in Engineering 6 or Mechanical Engineering 5 or Computer Science Engineering 30. Solutions of systems of linear and nonlinear algebraic equations; approximation methods; solutions of ordinary differential equations; initial and boundary value problems; solutions of partial differential equations of Elliptic, parabolic, and hyperbolic types; Eigen value problems. GE credit: SciEng | SE.—F. (F.) Hafez

**188. Science and Technology of Sustainable Power Generation (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: upper-division standing, Physics 7C or 9C. Focus on scientific understanding and development of power generation that is the basis of modern society. Concentration on power generation methods that are sustainable, in particular, discussion of the most recent innovations. GE credit: SocSci | SS.—S. (S.) Hwang

**190. Professional Responsibilities of Engineers (3)**

Lecture—3 hours. Restricted to upper-division students in the College of Engineering. Organization of the engineering profession; introduction to contracts, specifications, business law, patents, and liability; discussion of professional, ethical, societal, and political issues related to engineering. GE credit: SocSci | SS.—W, S. (W, S.) Tseregounis

**198. Directed Group Study (1-5)**

May be repeated for credit up to 3 times. (P/NP grading only.) GE credit: SE.

**Graduate****250. Technology Management (3)**

Lecture—3 hours. Prerequisite: consent of instructor. Management of the engineering and technology activity. Functions of design, planning, production, marketing, sales, and maintenance. Technological product life cycle. Research and development activity. Project planning and organization. Manufacturing issues. Case studies.—F. (S.)

## **Engineering: Applied Science**

(College of Engineering)

**The Graduate Program in Applied Science**

The Department of Applied Science is not accepting new graduate students.

**Courses in Engineering: Applied Science—Davis (EAD)****Graduate****213A. Computer Graphics (3)**

Lecture—3 hours. Prerequisite: consent of instructor. Development of algorithms for perspective line drawings of three-dimensional objects, as defined by polygons or bicubic patches.—(W.) Max

**225. Biophotonics in Medicine and the Life Sciences (3)**

Lecture/discussion—3 hours. Prerequisite: Physics 108 and Biology 101-105; course 202 highly recommended; graduate standing. Introduction to the science and technology of biomedical optics and photonics, with an overview of applications in medicine and the life sciences. Emphasis on research supported by the NSF Center for Biophotonics at UC Davis Medical Center. (Same course as Biomedical Engineering 255 and Biophysics 255.)—W. (W.) Chuang, Matthews

**230. Topics in Computational Fluid Dynamics (3)**

Lecture—3 hours. Prerequisite: course 210A, 210B or consent of instructor. A hands-on approach to numerical methods for compressible fluid flow. Readings and discussions of solution strategies complemented with programming exercises and projects to give first hand experience with performance and accuracy of several computational methods; from upwind differencing to Godunov methods.—S. (S.) Miller

**285D. Physics and Technology of Microwave Vacuum Electron Beam Devices IV (4)**

Lecture—4 hours. Prerequisite: 285C. Computational models of vacuum electron beam devices. Offered in alternate years.—(S.) Luhmann

**289A. Special Topics in Applied Science: Atomic, Molecular, and Optical Physics (1-5)**

Lecture, laboratory, or combination. Prerequisite: graduate standing or permission of instructor. Special topic in Atomic, Molecular, and Optical Physics. May be repeated for credit up to five units per segment when topic differs.—F, W, S. (F, W, S.)

**289B. Special Topics in Applied Science: Chemical Physics (1-5)**

Prerequisite: graduate standing or permission of instructor. Special topic in Chemical Physics. May be repeated for credit up to a total of five units per segment when topic differs.—F, W, S. (F, W, S.)

**289C. Special Topics in Applied Science Computational Physics (1-5)**

Prerequisite: graduate standing or permission of instructor. Special topic in Computational Physics. May be repeated for credit up to a total of five units per segment when topic differs.—F, W, S. (F, W, S.)

**289D. Special Topics in Applied Science: Biophotonics/Biotechnology (1-5)**

Prerequisite: graduate standing or permission of instructor. Special topics in Biophotonics/Biotechnology. May be repeated for credit up to a total of five units per segment when topic differs.—F, W, S. (F, W, S.)

**289E. Special Topics in Applied Science: Materials Science (1-5)**

Prerequisite: graduate standing or permission of instructor. Special topic in Materials Science. May be repeated for credit up to a total of five units per segment when topic differs.—F, W, S. (F, W, S.)

**289F. Special Topics in Applied Science: Imaging Science and Photonics (1-5)**

Prerequisite: graduate standing or permission of instructor. Special topic in Imaging Science and Photonics. May be repeated for credit up to a total of five units per segment when topic differs.—F, W, S. (F, W, S.)

**289G. Special Topics in Applied Science: Nonlinear Optics (1-5)**

Prerequisite: graduate standing or permission of instructor. Special topic in Nonlinear Optics. May be repeated for credit up to a total of five units per segment when topic differs.—F, W, S. (F, W, S.)

**289H. Special Topics in Applied Science: Plasma/Fusion Energy Physics (1-5)**

Prerequisite: graduate standing or permission of instructor. Special topic in Plasma/Fusion Energy Physics. May be repeated for credit up to a total of five units per segment when topic differs.—F, W, S. (F, W, S.)

**289I. Special Topics in Applied Science: Quantum Electronics (1-5)**

Prerequisite: graduate standing or permission of instructor. Special topic in Quantum Electronics. May be repeated for credit up to a total of five units per segment when topic differs.—F, W, S. (F, W, S.)

**289J. Special Topics in Applied Science: Condensed Matter/Statistical Physics (1-5)**

Prerequisite: graduate standing or permission of instructor. Special topic in Condensed Matter/Statistical Physics. May be repeated for credit up to a total of five units per segment when topic differs.—F, W, S. (F, W, S.)

**289K. Special Topics in Applied Science: Classical Optics (1-5)**

Prerequisite: graduate standing or permission of instructor. Special topic in Classical Optics. May be repeated for credit up to a total of five units per segment when topic differs.—F, W, S. (F, W, S.)

**289L. Special Topics in Applied Science: Microwave and Millimeter-Wave Technology (1-5)**

Prerequisite: graduate standing or permission of instructor. Special topic in Microwave and Millimeter-Wave Technology. May be repeated for credit up to a total of five units per segment when topic differs.—F, W, S. (F, W, S.)

**289M. Special Topics in Applied Science: Synchrotron Radiation Science (1-5)**

Prerequisite: graduate standing or permission of instructor. Special topic in Synchrotron Radiation Science. May be repeated for credit up to a total of five units per segment when topic differs.—F, W, S. (F, W, S.)

**289N. Special Topics in Applied Science: Space Physics (1-5)**

Prerequisite: graduate standing or permission of instructor. Special topic in Space Physics. May be repeated for credit up to a total of five units per segment when topic differs.—F, W, S. (F, W, S.)

**290. Seminar (1-2)**

Seminar—1-2 hours. (S/U grading only.)

**290C. Graduate Research Group Conference (1)**

Discussion—1 hour. Prerequisite: consent of instructor. May be repeated for credit. (S/U grading only.)

**298. Group Study (1-5)**

(S/U grading only.)

**299. Research (1-12)**

(S/U grading only.)

**Courses in Biophotonics (BPT) Graduate**

**290. Biophotonics Seminar (1)**

Seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Restricted to graduate standing. Presentation of current research in the area of biophotonics by experts in the field, followed by group discussions. May be repeated up to three times for credit. (S/U grading only.)—F, W, S. (F, W, S.) Yeh

## Engineering: Biological and Agricultural

(College of Engineering and College of Agricultural and Environmental Sciences)

Bryan M. Jenkins, Ph.D., Chairperson of the Department

**Department Office.** 2030 Bainer Hall  
530-752-0102;  
<http://bae.engineering.ucdavis.edu>

**Faculty**

Gail M. Bornhorst, Ph.D., Assistant Professor  
Juliana de Moura Bell, Ph.D., Assistant Professor

*(Biological and Agricultural Engineering; Food Science and Technology)*

Irwin Donis-Gonzalez, Ph.D., Assistant Extension Specialist

Zhiliang (Julia) Fan, Ph.D., Associate Professor

Fadi A. Fathallah, Ph.D., Professor

D. Ken Giles, Ph.D., Professor

Mark E. Grismer, Ph.D., Professor

(Land, Air and Water Resources)

Bryan M. Jenkins, Ph.D., Professor

Tina Jeoh, Ph.D., Associate Professor

Michael J. McCarthy, Ph.D., Professor

*(Biological and Agricultural Engineering; Food Science and Technology)*

Nitin Nitin, Ph.D., Associate Professor

*(Biological and Agricultural Engineering; Food Science and Technology)*

Ning Pan, Ph.D., Professor

*(Biological and Agricultural Engineering; Textiles and Clothing)*

David C. Slaughter, Ph.D., Professor

Shrinivasa K. Upadhyaya, Ph.D., Professor

Jean S. VanderGheynst, Ph.D., Professor

Stavros G. Vougioukas, Ph.D., Assistant Professor

Ruihong Zhang, Ph.D., Professor

**Emeriti Faculty**

William J. Chancellor, Ph.D., Professor Emeritus

Pictiaw (Paul) Chen, Ph.D., Professor Emeritus

Michael J. Delwiche, Ph.D., Professor Emeritus

Roger E. Garrett, Ph.D., Professor Emeritus

John R. Goss, M.S., Professor Emeritus

Bruce R. Hartsough, Ph.D., Professor Emeritus

David J. Hills, Ph.D., Professor Emeritus

John M. Krochta, Ph.D., Professor Emeritus

Miguel A. Mariño, Ph.D., Professor Emeritus

Kathryn McCarthy, Ph.D., Professor Emeritus

R. Larry Merson, Ph.D., Professor Emeritus

John A. Miles, Ph.D., Professor Emeritus

Stanton R. Morrison, Ph.D., Professor Emeritus

Raul H. Piedrahita, Ph.D., Professor Emeritus

Richard E. Plant, Ph.D., Professor Emeritus

James W. Rumsey, M.S., Senior Lecturer Emeritus

Thomas R. Rumsey, Ph.D., Professor Emeritus

Verne H. Scott, Ph.D., Professor Emeritus

R. Paul Singh, Ph.D., Distinguished Professor Emeritus

James F. Thompson, M.S., Extension Specialist Emeritus

Wesley W. Wallender, Ph.D., Professor Emeritus

Wesley E. Yates, M.S., Professor Emeritus

**Affiliated Faculty**

Tien-Chieh Hung, Ph.D., Assistant Adjunct Professor

Kurt Kornbluth, Ph.D., Assistant Adjunct Professor

Zhongli Pan, Ph.D., Adjunct Professor

Herbert Scher, Ph.D., Professional Researcher

Mir S. Shafii, Ph.D., Lecturer

**Mission.** The Department of Biological and Agricultural Engineering is dedicated to the advancement of the discipline of biological engineering and to the conduct of research under its many diverse areas of application. Biological engineering or biological systems engineering is the biology-based engineering discipline that integrates life sciences with engineering in the advancement and application of fundamental concepts of biological systems from molecular to ecosystem levels. Within this discipline, our faculty members work in a range of research areas including biotechnology engineering, agricultural and natural resources engineering, and food engineering.

The mission of the Department of Biological and Agricultural Engineering is to discover, develop, apply, and disseminate knowledge for the sustainable production, management, and use of biological materials, and to educate students for this work.

**Objectives.** We educate students in the fundamentals of mathematics, physical and biological sciences, and engineering, balanced with the application of principles to practical problems. We teach students to develop skills for solving engineering problems in biological systems through use of appropriate analysis, synthesis, and engineering design techniques. We prepare students for entry into engineering practice and graduate education, as well as for engagement in life-long learning. We foster the ability of our students to collaborate and communicate effectively, and provide an awareness of the importance of economics, professional responsibility, and the environment.

Students graduating with a B.S. degree in Biological Systems Engineering from UC Davis are prepared to:

- Apply life sciences in engineering at the biochemical, cellular, organism, and ecosystem levels,
- Solve biological systems engineering problems while employed in the private or public sector,
- Consider the environmental and social consequences of their engineering activities,
- Communicate effectively with professional colleagues and public constituencies,
- Act in an ethical manner, and
- Continue their education in a changing professional world.

**The Biological Systems Engineering Undergraduate Program**

Biological Systems Engineering is an engineering major that uses biology as its main scientific base. With rapid advances in biology and biotechnology, engineers are needed to work side by side with life

scientists to bring laboratory developments into commercial production or field application. Industries in bioenergy, bioprocessing, biotechnology, food processing, aquaculture, agriculture, plant production, animal production, and forest production all need engineers with strong training in biology. The heightened concern for environmental resources and their preservation generates many engineering opportunities as society strives to maintain balance within the biosphere.

In the freshman and sophomore years, the Biological Systems Engineering major requires sequences of courses in mathematics, physics, chemistry, engineering science, and humanities, similar to all accredited engineering programs. In addition to these course sequences, the Biological Systems Engineering major also requires courses in the biological sciences. Exclusive of General Education units, the Biological Systems Engineering major requires a minimum of 161 units (90 units in the lower division; 71 units in the upper division).

Biological Systems Engineering graduates take jobs in the biotechnology, energy, food, and medical industries; work for state and federal agencies; or pursue graduate work. Students also can use the program as a pathway to professional schools in medicine, veterinary medicine, dentistry, or business.

The Biological Systems Engineering program is accredited by the Engineering Accreditation Commission of ABET; see <http://www.abet.org>.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

#### **Lower Division Required Courses**

	UNITS
Mathematics 21A-21B-21C-21D .....	16
Mathematics 22A-22B .....	6
Physics 9A-9B-9C .....	15
Chemistry 2A-2B .....	10
Chemistry 8A or 118A .....	2 or 4
Chemistry 8B or 118B .....	4
Biological Sciences 2A-2B-2C .....	15
Engineering 6, 35, 17 .....	12
Biological Systems Engineering 1 .....	4
Biological Systems Engineering 75 .....	4
University Writing Program 1, 1Y or 1V (grade of C- or better is required) .....	4
Communication 1 or 3 .....	4

#### **Upper Division Requirements:**

If your career objective is a professional degree in the health sciences (e.g., medicine, veterinary medicine, or dentistry), you should consult with advisers from the appropriate school to plan for successful admission and to ensure that you take specific courses that may be required and that you have the necessary experience. The upper division requirements are listed following the areas of specialization:

- Biotechnology Engineering
- Agricultural and Natural Resources Engineering
- Food Engineering

#### **Areas of Specialization**

**Biotechnology Engineering.** Biotechnology involves the handling and manipulation of living organisms or their components to produce useful products. Students specializing in biotechnology engineering integrate analysis and design with applied biology to solve problems in renewable energy production, large-scale biotechnical production, control of biological systems, and bio-based materials production.

Students may focus on the mechanisms and processes for the sustainable production and use of energy from renewable biological sources. Students may also focus on the challenges in scaling up laboratory developments to industrial production, including production, packaging, and application of biocontrol agents for plant pests and diseases; genetically altered plants; plant materials and food products; and microbial production of biological

products, tissue culture, and bioremediation. Students may also focus on the development of biosensors to detect microorganisms and specific substances, useful in the development of products based on biological processes and materials.

Biotechnical engineers work in the biotech industries on process design and operation, scale-up, and instrumentation and control.

#### Recommended biological science electives:

- Biological Sciences 101, 102, 103
- Microbiology 102
- Molecular and Cellular Biology 120L
- Plant Biology 113

#### Recommended engineering electives:

- Biological Systems Engineering 161
- Chemical Engineering 161B, 161C, 161L
- Civil and Environmental Engineering 143, 148A, 149, 150, 153
- Engineering 180
- Mechanical Engineering 161, 162, 163

**Suggested advisers.** J. Fan, K. Giles, M. Grismer, B. Jenkins, T. Jeoh, N. Nitin, N. Pan, D. Slaughter, J. VanderGheynst, R. Zhang

#### **Agricultural and Natural Resources Engineering.**

With the world population expected to grow over the next several decades, major concerns lie with meeting the needs of agriculture and with the sustainable use of limited natural resources. Students specializing in agricultural and natural resources engineering combine analysis and design with applied biology to solve problems in producing, transporting, and processing biological products leading to food, fiber, energy, pharmaceuticals, and other human needs.

Students may focus on automation and control of field operations and engineered systems, robotics, and on the biomechanics of humans and animals. They may also focus on engineering issues related to the sustainable use of natural resources, particularly energy and water, but also land and air. Agricultural and natural resources engineers design machinery, processes, and systems for productive plant and animal culture, while improving overall sustainability.

Agricultural and natural resources engineers are employed as practicing professionals and managers with agricultural producers, equipment manufacturers, irrigation districts, food processors, consulting engineering firms, start-up companies, and government agencies. Graduates with interest in biomechanics work in industry on the design, evaluation, and application of human-centered devices and systems, as well as on improving worker health and safety.

#### Recommended biological science electives:

- Animal Emphasis*
- Avian Sciences 100
- Animal Science 143, 144, 146
- Neurobiology, Physiology, and Behavior 101
- Soil Science 100

#### *Aquaculture Emphasis*

- Animal Science 118, 131, 136A
- Applied Biological Systems Technology 163
- Wildlife, Fish, and Conservation Biology 120, 121

#### *Biomechanics Emphasis*

- Biological Sciences 102
- Neurobiology, Physiology and Behavior 101
- Exercise Biology 103
- Cell Biology and Human Anatomy 101

#### *Plant Emphasis*

- Entomology 100
- Environmental Horticulture 102
- Environmental Science and Policy 100
- Environmental Toxicology 101
- Hydrologic Sciences 124
- Microbiology 120
- Plant Biology 111

#### Soil Science 100

- Plant Sciences 101, 110A, 114, 142

#### Recommended engineering electives:

- Biological Systems Engineering 128, 145
- Biomedical Engineering 109, 116, 126
- Civil and Environmental Engineering 140, 141, 142, 144, 145, 148A, 171
- Engineering 111, 121, 180

#### Additional recommended electives:

- Applied Biological Systems Technology 150, 161, 165

**Suggested Advisers.** J. Fan, F. Fathallah, K. Giles, M. Grismer, T.C. Hung, B. Jenkins, K. Kornbluth, D. Slaughter, S. Upadhyaya, S. Vougioukas, J. VanderGheynst, R. Zhang

**Food Engineering.** Producing the food we eat every day constitutes the largest industrial sector of the U.S. economy, and this production involves the work of engineers in a wide variety of food industries, both at home and around the world. Students specializing in food engineering design food processes and operate equipment and facilities for production of high quality, safe, and nutritious food with minimal impact of these operations on the environment.

Students learn to apply engineering principles and concepts to handle, store, process, package, and distribute food and related products. In addition to engineering principles, the food engineering specialization provides an understanding of the chemical, biochemical, microbiological, and physical characteristics of food. Students study concepts of food refrigeration, freezing, thermal processing, drying, and other food operations, food digestion, and health and nutrition in food system design.

Food engineers work as practicing engineers, scientists, and managers in the food industry.

#### Recommended biological science electives:

- Biological Sciences 101, 102, 103
- Environmental Science and Policy 110
- Environmental Toxicology 101
- Food Science and Technology 104, 104L, 119, 128
- Plant Sciences 172

#### Recommended engineering electives:

- Biological Systems Engineering 161
- Chemical Engineering 157
- Mechanical Engineering 171, 172

**Suggested Advisers.** G. Bornhorst, J. de Moura Bell, T. Jeoh, M. McCarthy, N. Nitin, Z. Pan, D. Slaughter

#### **Upper Division Required Courses**

	UNITS
Engineering 100, 102, 104 105, 106.....	18
Biological Systems Engineering 103, 125, 127, 130, 165, 170A, 170B, 170BL, 170C, 170CL.....	29
Biological Systems Engineering electives—Select a minimum of 4 units from all upper division Biological Systems Engineering courses not otherwise required, with the exception of Biological Systems Engineering courses 189-199.....	4
Statistics 100.....	4
Engineering electives—Select a minimum of three units. All upper division courses offered by the College of Engineering may be taken as engineering electives with the exception of the following:	
Civil and Environmental Engineering 123, Computer Science Engineering 188, Engineering 103, 160, all courses numbered 190-197 and 199 (except Engineering 190, which may be taken for 2 units of engineering elective credit).....	3
Biological science electives—All upper-division courses in the College of Biological Sciences (with the exception of Biological Sciences 132, Evolution and Ecology 175,	

**Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;**

**ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience**

**Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience**

**Quarter Offered: F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses**

Exercise Biology 102, 112, 115, 118 through 149L, Microbiology 100 and all courses numbered 190-199 may be used as biological science electives. The following courses may also be taken as biological science electives: Applied Biological Systems Technology 161; Animal Science 118, 143, 144, 146; Agricultural Management and Rangeland Resources 110A; Atmospheric Science 133; Avian Sciences 100; Cell Biology and Human Anatomy 101, 101L; Entomology 100; Environmental Horticulture 102; Environmental Science Policy and Management 120, 182, 185 (offered at UC Berkeley); Environmental Science and Policy 100, 110, 155; Environmental Toxicology 101, 112A, 131; Food Science and Technology 102A, 104L, 119, 120, 121, 128, 159; Infectious Diseases 141; Soil Science 100; Wildlife, Fish, and Conservation Biology 121. Students may choose other upper division courses with substantial biological content offered by the College of Agricultural and Environmental Sciences; consultation with a faculty adviser and approval by petition is required) .... 3 Upper Division Composition Requirement\* one course from the following: University Writing Program 101, 102B, 102E, 102F, 102G, 104A, 104E, 104F, 104T (grade of C- or better is required) ..... 4

\*The Upper-Division composition exam administered by the College of Letters and Sciences cannot be used to satisfy the upper-division composition requirement for students in the Biological Systems Engineering program.

**Master Undergraduate Adviser.** T. Jeoh

### Energy Minor Programs

There is an urgent need to develop and commercialize technologies for the sustainable conversion and use of energy. The goal of these minors is to prepare students for careers that require training in energy science and technology, efficiency, and policy. Clean technologies and green technologies including energy are some of the fastest growing markets for new investments. Well trained individuals in all related fields are needed to provide the level of expertise required to advance technology and policy and to satisfy national and global objectives for greater energy sustainability. The minors are designed to accommodate persons of diverse backgrounds with educational interests in areas that may include engineering, science, policy, economics, planning, and management.

### Energy Science and Technology Minor

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements with an overall GPA in the required minor courses of 2.000 or better.

#### Minor Requirements:

UNITS

<b>Energy Science and Technology.....</b>	<b>20</b>
Engineering 105 or Chemical Engineering 152B .....	4
Engineering 188.....	4
Select 12 units from: Biological Systems Engineering 161; Chemical Engineering 146, 158C, 161A, 161B, 161L, 166; Civil and Environmental Engineering 125, 143, 162, 163; Mechanical Engineering 161; Agricultural and Resource Economics 175; Food Science and Technology 123; Applied Biological Systems Technology 182; Atmospheric Science 116; Plant Science 101; Environmental Science and Policy 167 .....	12

**Minor Advisers.** B. Jenkins (Department of Biological and Agricultural Engineering), K. McDonald (Department of Chemical Engineering), C. van Dam

(Department of Mechanical and Aerospace Engineering)

### Energy Policy Minor

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy the minor requirements with an overall GPA in the required minor courses of 2.000 or better.

#### Minor Requirements:

UNITS

<b>Energy Policy.....</b>	<b>18</b>
---------------------------	-----------

Engineering 188 and Environmental Science and Policy 167 .....	8
Select 10 units from: Civil Engineering 125; Environmental Science and Policy 171, 163, 168A, 169B; Political Science 105, 109, 122, 164 143, 162, 164.....	10

**Minor Advisers.** D. Niemeier (Department of Civil and Environmental Engineering), J. Ogden (Environmental Science and Policy)

### Energy Efficiency Minor

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy the minor requirements with overall GPA in the required minor courses of 2.000 or better.

#### Minor Requirements:

UNITS

<b>Energy Efficiency.....</b>	<b>20</b>
-------------------------------	-----------

Engineering 188 and Civil Engineering 125.....	8
Select 12 units from: Civil Engineering 126, 127, 128, 143; Environmental Science and Policy 167; Design 136A, 136B, 137A .....	12

**Minor Advisers.** F. Loge (Civil and Environmental Engineering), D. Sperling (Institute of Transportation Studies), M. Modera (Western Cooling Efficiency Center)

### The Graduate Program in Biological Systems Engineering

Integrated B.S./M.S., M.S., M.Engr., D.Engr., and Ph.D. in Biological Systems Engineering  
Designated Ph.D. emphasis available in Biotechnology  
<http://bae.engineering.ucdavis.edu>  
530-752-0102

Graduate students in Biological Systems Engineering focus on finding economically and environmentally sustainable solutions to many of the most important global issues of our time—the safety, security and abundance of our food, detection of pathogens, development of bioenergy and other sustainable energy systems, control of insect-borne disease and damage, as well as the preservation of our land, air and water resources.

We enjoy the strategic advantage of being located in California, the national leader in agricultural production and crop diversity, and a major center for biotechnology. With the unique status of belonging to both the College of Engineering and the College of Agricultural and Environmental Sciences, the program benefits from a wide diversity of collaborations across multiple disciplines. We interact with colleagues in both engineering and the life sciences to create multidisciplinary approaches to our teaching and research. Students benefit from this dynamic environment that combines the strengths of nationally ranked engineering, agricultural and environmental programs.

Financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid.

#### Research Highlights:

- Automation and Control
- Bioenvironmental engineering
- Renewable energy

### Industrial biotechnology

- Food safety
- Biosensors
- Bioprocess engineering
- Bioinstrumentation
- Ergonomics, health and safety
- Aquacultural engineering
- Ecological systems engineering
- Food engineering
- Forest and fiber engineering
- Postharvest engineering
- Remote sensing
- Robotics and autonomous systems
- Soil and water engineering
- Machine systems and precision agriculture

### Research Facilities and Partnerships:

- Agricultural Ergonomics Research Center
- Fish Conservation and Culture Laboratory
- GIS Visualization Lab
- Energy Institute
- Bodega Marine Lab
- Western Center for Agricultural Equipment

Complete information is available on the departmental website.

### Courses in Engineering: Biological Systems (EBS)

#### Lower Division

##### 1. Foundations of Biological Systems Engineering (4)

Lecture—2 hours; laboratory—3 hours; project—3 hours. Restricted to students in Biological Systems Engineering. Introduction to engineering and the engineering design process with examples drawn from the field of biological systems engineering. Introduction to computer-aided design and mechanical fabrication of designs. Students work on a quarter-long group design project. GE credit: SciEng | OL, QL, SE, SL, VL.—F. (F.) Bornhorst, Fatihah, Jenkins

##### 75. Properties of Materials in Biological Systems (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Sciences 2A; Physics 9C (may be taken concurrently). Properties of typical biological materials; composition and structure with emphasis on the effects of physical and biochemical properties on design of engineered systems; interactions of biological materials with typical engineering materials. GE credit: SciEng | QL, SE, SL, VL, WE.—W. (W.) Slaughter, Zicari

##### 90C. Research Group Conference in Biological Systems Engineering (1)

Discussion—1 hour. Prerequisite: lower division standing in Biological Systems Engineering or Food Engineering; consent of instructor. Research group conference. May be repeated for credit. (P/NP grading only.) GE credit: SE.—F. W. S. (F. W. S.)

##### 92. Internship in Biological Systems Engineering (1-5)

Internship. Prerequisite: lower division standing; project approval prior to period of internship. Supervised work experience in biological systems engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE.

##### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Group study of selected topics; restricted to lower division students. (P/NP grading only.) GE credit: SE.

##### 99. Special Study for Lower Division Students (1-5)

(P/NP grading only.) GE credit: SE.

**Upper Division****103. Fluid Mechanics Fundamentals (4)**

Lecture—4 hours. Prerequisite: Physics 9B. Fluid mechanics axioms, fluid statics, kinematics, velocity fields for one-dimensional incompressible flow and boundary layers, turbulent flow time averaging, potential flow, dimensional analysis, and macroscopic balances to solve a range of practical problems. (Same course as Hydrologic Science 103N.) GE credit: SciEng | QL, SE, VL, WE.—W. (W.)

**114. Principles of Field Machinery Design (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: Engineering 102, 104. Traction and stability of vehicles with wheels or tracks. Operating principles of field machines and basic mechanisms used in their design. GE credit: SciEng | QL, SE, VL, WE.—S.

**115. Forest Engineering (3)**

Lecture—3 hours. Prerequisite: Engineering 104. Applications of engineering principles to problems in forestry including those in forest regeneration, harvesting, residue utilization, and transportation. GE credit: SciEng | QL, SE, SL, VL.—S. (S.) Hartsough

**120. Power Systems Design (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Engineering 17, 102, 103, 105. Design and performance of power devices and systems including combustion engines, electric generators and motors, fluid power systems, fuels, and emerging technologies. Selection of units for power matching and optimum performance. GE credit: SciEng | QL, SE, SL, VL, WE.—F. (F.)

**125. Heat Transfer in Biological Systems (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 103; Engineering 105; Biological Sciences 2A, 2B and 2C. Fundamentals of heat transfer with application to biological systems. Steady and transient heat transfer. Analysis and simulation of heat conduction, convection and radiation. Heat transfer operations. GE credit: SciEng | OL, QL, SE, VL, WE.—S. (S.) Fan, Nitin

**127. Mass Transfer and Kinetics in Biological Systems (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 125. Fundamentals of mass transfer and kinetics in biological systems. Molecular diffusion and convection. Thermodynamics and bioenergetics. Biological and chemical rate equations. Heterogeneous kinetics. Batch and continuous reaction processes. GE credit: SciEng | QL, SE, VL, WE.—F. (F.) Jeoh

**128. Biomechanics and Ergonomics (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Statistics 100, Engineering 102. Limited enrollment. Anatomical, physiological, and biomechanical bases of physical ergonomics. Human motor capabilities, body mechanics, kinematics and anthropometry. Use of bioinstrumentation, industrial surveillance techniques and the NIOSH lifting guide. Cumulative trauma disorders. Static and dynamic biomechanical modeling. Emphasis on low back, shoulder, and hand/wrist biomechanics. GE credit: SciEng | QL, SE, SL, VL, WE.—S. (S.) Fathallah

**130. Modeling of Dynamic Processes in Biological Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 75; Engineering 6 or Computer Science & Engineering 30; grade of C- or better in Mathematics 22B required for enrollment eligibility. Techniques for modeling processes through mass and energy balance, rate equations, and equations of state. Computer problem solution of models. Example models include package design, evaporation, respiration heating, thermal processing of foods, and plant growth. GE credit: SciEng | OL, QL, SE, SL, VL, WE.—W. (W.) Fan, Upadhyaya

**135. Bioenvironmental Engineering (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 125, 130. Biological responses to environmental conditions. Principles and engineering design of environmental control systems. Overview of envi-

ronmental pollution problems and legal restrictions for biological systems, introduction of environmental quality assessment techniques, and environmental pollution control technologies. GE credit: SciEng | QL, SE, SL, VL, WE.—F. (F.) Zhang

**144. Groundwater Hydrology (4)**

Lecture—4 hours. Prerequisite: Mathematics 16B or 21A; Hydrologic Science 103 or Engineering 103 recommended. Fundamentals of groundwater flow and contaminant hydrology. Occurrence, distribution, and movement of groundwater. Well-flow systems. Aquifer tests. Well construction operation and maintenance. Groundwater exploration and quality assessment. Agricultural threats to groundwater quality: fertilizers, pesticides, and salts. Same course as Hydrologic Science 144. GE credit: SciEng | QL, SE, SL, VL.—F. (F.) Fogg, Harter

**145. Irrigation and Drainage Systems (4)**

Lecture—4 hours. Prerequisite: course 103 or Hydrologic Science 103N. Engineering and scientific principles applied to the design of surface, sprinkle and micro irrigation systems and drainage systems within economic, biological, and environmental constraints. Interaction between irrigation and drainage. GE credit: SciEng | QL, SE, SL, VL, WE.—S. (S.) Giles, Zhang

**147. Runoff, Erosion and Water Quality Management in the Tahoe Basin (3)**

Lecture/laboratory—30 hours; fieldwork—15 hours; discussion—10 hours; term paper. Prerequisite: Physics 7B or 9B, Mathematics 16C or 21C, Civil and Environmental Engineering 142 or Hydrologic Science 141 or Environmental and Resource Sciences 100. Practical hydrology and runoff water quality management from Tahoe Basin slopes. Development of hillslope and riparian restoration concepts, modeling and applications from physical science perspectives including precipitation-runoff relationships, sediment transport, and detention ponds. Five days of instruction in Tahoe City. (Same course as Hydrologic Science 147.) GE credit: SciEng | QL, SE, SL.—Grismer

**161. Kinetics and Bioreactor Design (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 127. Provide the basic principles of reactor design for bioprocess applications. This course emphasizes the following topics: 1) kinetics and reactor engineering principles; 2) bio-reaction kinetics; and 3) bioreactor design. GE credit: SciEng | QL, SE, VL, WE.—W. (W.) Fan, Jeoh

**165. Bioinstrumentation and Control (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Engineering 100. Instrumentation and control for biological production systems. Measurement system concepts, instrumentation and transducers for sensing physical and biological parameters, data acquisition and control. GE credit: SciEng | QL, SE, SL, VL, WE.—F. (F.) Slaughter, Vougioukas

**170A. Engineering Design and Professional Responsibilities (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 1, Engineering 102, 104. Engineering design including professional responsibilities. Emphasis on project selection, data sources, specifications, human factors, biological materials, safety systems, and professionalism. Detailed design proposals will be developed for courses 170B and 170BL. GE credit: SciEng | OL, QL, SE, SL, VL, WE.—F. (F.) Giles, Zhang

**170B. Engineering Projects: Design (2)**

Discussion—2 hours. Prerequisite: course 170A; course 170BL required concurrently. Individual or group projects involving the design of devices, structures, or systems to solve specific engineering problems in biological systems. Project for study is jointly selected by student and instructor. GE credit: SciEng | OL, QL, SE, SL, VL, WE.—W. (W.) Giles, Zhang

**170BL. Engineering Projects: Design Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 170B required concurrently. Individual or group projects involving the design of devices, structures, or systems to solve specific engineering problems in biological systems. GE credit: SciEng | OL, QL, SE, SL, VL, WE.—W. (W.)

**170C. Engineering Projects: Design Evaluation (1)**

Discussion—1 hour. Prerequisite: course 170B; required to enroll in course 170CL concurrently. Individual or group projects involving the fabrication, assembly and testing of components, devices, structures, or systems designed to solve specific engineering problems in biological systems. Project for study previously selected by student and instructor in course 170B. GE credit: SciEng | OL, QL, SE, SL, VL, WE.—S. (S.) Giles, Zhang

**170CL. Engineering Projects: Design Evaluation (2)**

Laboratory—6 hours. Prerequisite: required to enroll in course 170C concurrently. Individual or group projects involving the fabrication, assembly and testing of components, devices, structures, or systems designed to solve specific engineering problems in biological systems. GE credit: SciEng | OL, QL, SE, SL, VL, WE.—S. (S.)

**175. Rheology of Biological Materials (3)**

Lecture—3 hours. Prerequisite: course 103 or Engineering 103. Fluid and solid rheology, viscoelastic behavior of foods and other biological materials, and application of rheological properties to food and biological systems (i.e., pipeline design, extrusion, mixing, coating). GE credit: SciEng | QL, SE, VL, WE.—W. (W.) K. McCarthy

**189A. Special Topics in Biological Systems Engineering: Agricultural Engineering (1-5)**

Prerequisite: upper division standing in engineering; consent of instructor. Special topics in Agricultural Engineering. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189B. Special Topics in Biological Systems Engineering: Aquacultural Engineering (1-5)**

Prerequisite: upper division standing in engineering; consent of instructor. Special topics in Aquacultural Engineering. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189C. Special Topics in Biological Systems Engineering: Biomedical Engineering (1-5)**

Prerequisite: upper division standing in engineering; consent of instructor. Special topics in Biomedical Engineering. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189D. Special Topics in Biological Systems Engineering: Biotechnical Engineering (1-5)**

Prerequisite: upper division standing in engineering; consent of instructor. Special topics in Biotechnical Engineering. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189E. Special Topics in Biological Systems Engineering: Ecological Systems Engineering (1-5)**

Prerequisite: upper division standing in engineering; consent of instructor. Special topics in Ecological Systems Engineering. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189F. Special Topics in Biological Systems Engineering: Food Engineering (1-5)**

Prerequisite: upper division standing in engineering; consent of instructor. Special topics in Food Engineering. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189G. Special Topics in Biological Systems Engineering: Forest Engineering (1-5)**

Prerequisite: upper division standing in engineering; consent of instructor. Special topics in Forest Engineering. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**190C. Research Group Conference in Biological Systems Engineering (1)**

Discussion—1 hour. Prerequisite: upper division standing in Biological Systems Engineering or Food Engineering; consent of instructor. Research group conference. May be repeated for credit. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**192. Internship in Biological Systems Engineering (1-5)**

Internship. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in biological systems engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE.

**197T. Tutoring in Biological Systems Engineering (1-5)**

Tutorial—3-15 hours. Prerequisite: upper division standing. Tutoring individual students, leading small voluntary discussion groups, or assisting the instructor in laboratories affiliated with one of the department's regular courses. May be repeated for credit if topic differs. (P/NP grading only.) GE credit: SE.

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.) GE credit: SE.

**Graduate****200. Research Methods in Biological Systems Engineering (2)**

Lecture—2 hours. Prerequisite: graduate standing. Planning, execution and reporting of research projects. Literature review techniques and proposal preparation. Record keeping and patents. Uncertainty analysis in experiments and computations. Graphic analysis. Oral and written presentation of research results, manuscript preparation, submission and review.—F. (F.) Zhang, Giles

**205. Continuum Mechanics of Natural Systems (4)**

Lecture/discussion—4 hours. Prerequisite: Mathematics 21D and 22B, Physics 9B. Continuum mechanics of static and dynamic air, water, earth and biological systems using hydraulic, heat and electrical conductivity; diffusivity; dispersion; strain; stress; deformation gradient; velocity gradient; stretch and spin tensors. (Same course as Hydrologic Science 205).—S.

**215. Soil-Machine Relations in Tillage and Traction (3)**

Lecture—3 hours. Prerequisite: course 114. Mechanics of interactions between agricultural soils and tillage and traction devices; determination of relevant physical properties of soil; analyses of stress and strains in soil due to machine-applied loads; experimental and analytical methods for synthesizing characteristics of overall systems. Offered in alternate years.—W. Upadhyaya

**216. Energy Systems (4)**

Lecture/discussion—4 hours. Prerequisite: course 105. Theory and application of energy systems. System analysis including input-output analysis, energy balances, thermodynamic availability, economics, environmental considerations. Energy conversion systems and devices including cogeneration, heat pump, fuel cell, hydroelectric, wind, photovoltaic, and biomass conversion processes. Offered in alternate years.—W. Jenkins

**218. Solar Thermal Engineering (4)**

Lecture/discussion—4 hours. Prerequisite: course in heat transfer. Analysis and design of solar energy collection systems. Sun-earth geometry and estimation of solar radiation. Steady-state and dynamic models of solar collectors. Modeling of thermal energy storage devices. Computer simulation. Offered in alternate years.—S. Jenkins

**220. Pilot Plant Operations in Aquacultural Engineering (3)**

Lecture—1 hour; laboratory—6 hours. Prerequisite: Civil Engineering 243A-243B or Applied Biological Systems Technology 161, 163. Topics in water treatment as they apply to aquaculture operations. Laboratory study of unit operations in aquaculture. Offered in alternate years.—(F.) Hung

**228. Occupational Musculoskeletal Disorders (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: graduate standing and consent of instructor. Epidemiology and etiology of occupational musculoskeletal disorders (MSDs) with focus on low back and upper extremities disorders; anatomical and biomechanical functions of lower back and upper extremities; MSDs risk factors assessment and control; research opportunities related to MSDs.—S. (S.) Fathallah

**231. Mass Transfer in Food and Biological Systems (3)**

Lecture/discussion—3 hours. Prerequisite: graduate standing. Application of mass transfer principles to food and biological systems. Study of mass transfer affecting food quality and shelf life. Analysis of mass transfer in polymer films used for coating and packaging foods and controlling release of biologically active compounds. Offered in alternate years.—(W.)

**233. Analysis of Processing Operations: Drying and Evaporation (3)**

Lecture—3 hours. Prerequisite: course in food or process engineering, familiarity with FORTRAN. Diffusion theory in drying of solids. Analysis of fixed-bed and continuous-flow dryers. Steady-state and dynamic models to predict performance evaporators: multiple effects, mechanical and thermal recompression, control systems. Offered in alternate years.—(W.)

**235. Advanced Analysis of Unit Operations in Food and Biological Engineering (3)**

Lecture—3 hours. Prerequisite: course 132. Analysis and design of food processing operations. Steady state and dynamic heat and mass transfer models for operations involving phase change such as freezing and frying. Separation processes including membrane applications in food and fermentation systems.—(S.)

**237. Thermal Process Design (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course in heat transfer. Heat transfer and biological basis for design of heat sterilization of foods and other biological materials in containers or in bulk. Offered in alternate years.—S.

**239. Magnetic Resonance Imaging in Biological Systems (3)**

Lecture—3 hours. Prerequisite: graduate standing. Theory and applications of magnetic resonance imaging to biological systems. Classical Bloch model of magnetic resonance. Applications to be studied are drying of fruits, flow of food suspensions, diffusion of moisture, and structure of foods. Offered in alternate years.—F. M. McCarthy

**240. Infiltration and Drainage (3)**

Lecture—3 hours. Prerequisite: Soil Science 107, Engineering 103. Aspects of multi-phase flow in soils and their application to infiltration and immiscible displacement problems. Gas phase transport and entrapment during infiltration, and oil-water-gas displacement will be considered. Offered in alternate years.—W. Grismer

**241. Sprinkle and Trickle Irrigation Systems (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 145/Hydrologic Science 115. Computerized design of sprinkle and trickle irrigation systems. Consideration of emitter mechanics, distribution functions and water yield functions. Offered in alternate years.—S.

**242. Hydraulics of Surface Irrigation (3)**

Lecture—3 hours. Prerequisite: course 145, Hydrologic Science 115. Mathematical models of surface-irrigation systems for prediction of the ultimate dispo-

sition of water flowing onto a field. Quantity of runoff and distribution of infiltrated water over field length as a function of slope, roughness, infiltration and inflow rates. Offered in alternate years.—(S.)

**243. Water Resource Planning and Management (3)**

Lecture—3 hours. Prerequisite: Hydrologic Science 141 or the equivalent. Applications of deterministic and stochastic mathematical programming techniques to water resource planning, analysis, design, and management. Water allocation, capacity expansion, and reservoir operation. Conjunctive use of surface water and groundwater. Water quality management. Irrigation planning and operation models. (Same course as Hydrologic Science 243.) Offered in alternate years—(F.)

**245. Waste Management for Biological Production Systems (3)**

Lecture—3 hours. Prerequisite: graduate standing or consent of instructor. Characterization of solid and liquid wastes from animal, crop, and food production systems. Study of methods and system design for handling, treatment, and disposal/utilization of these materials.—W. (W.) Zhang

**260. Analog Instrumentation (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Engineering 100. Instrument characteristics: generalized instrument models, calibration, and frequency response. Signal conditioning: operational amplifier circuits, filtering, and noise. Transducers: motion, force, pressure, flow, temperature, and photoelectric. Offered in alternate years.—W.

**262. Computer Interfacing and Control (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Engineering 100, course 165. Procedural and object-oriented programming in C++, analog and digital signal conversion, data acquisition and computer control. Offered in alternate years.—(S.) Delwiche

**265. Design and Analysis of Engineering Experiments (5)**

Lecture—3 hours; lecture/discussion—2 hours. Prerequisite: Statistics 100, Agricultural Systems and Environment 120, or an introductory course in statistics. Simple linear, multiple, and polynomial regression, correlation, residuals, model selection, one-way ANOVA, fixed and random effect models, sample size, multiple comparisons, randomized block, repeated measures, and Latin square designs, factorial experiments, nested design and subsampling, split-plot design, statistical software packages.—S. (S.) Slaughter, Upadhyaya

**267. Renewable Bioprocessing (3)**

Lecture—3 hours. Prerequisite: course 160, Biological Sciences 101 or Microbiology 102. Applications of biotechnology and bioprocess engineering toward the use of agricultural and renewable feedstocks for the production of biochemicals. Design and modeling of microbial- and plant-based production systems including associated fermentation, extraction, and purification processes. Offered in alternate years.—F. VanderGheynst

**268. Polysaccharides Surface Interactions (3)**

Lecture—3 hours. Prerequisite: graduate students in science or engineering. Study of fundamental surface science theories as applied to physical and chemical interactions of carbohydrates and polysaccharides. Offered in alternate years.—F. Jeoh

**270. Modeling and Analysis of Biological and Physical Systems (3)**

Lecture—3 hours. Prerequisite: familiarity with a programming language. Mathematical modeling of biological systems: model development; analytical and numerical solutions. Case studies from various specializations within biological and agricultural engineering. Offered in alternate years.—S. Upadhyaya

**275. Physical Properties of Biological Materials (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: consent of instructor. Selected topics on physical properties, such as mechanical, optical, rheological,

and aerodynamic properties, as related to the design of harvesting, handling, sorting, and processing equipment. Techniques for measuring and recording physical properties of biological materials. Offered in alternate years.—S. M. McCarthy, Nitin

#### **289A. Selected Topics in Biological Systems Engineering; Animal Systems Engineering (1-5)**

Variable—1-5 hours. Prerequisite: consent of instructor. Special topics in Animal Systems Engineering. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

#### **289B. Selected Topics in Biological Systems Engineering; Aquacultural Engineering (1-5)**

Variable—1-5 hours. Prerequisite: consent of instructor. Special topics in Aquacultural Engineering. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

#### **289C. Selected Topics in Biological Systems Engineering; Biological Engineering (1-5)**

Variable—1-5 hours. Prerequisite: consent of instructor. Special topics in Biological Engineering. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

#### **289D. Selected Topics in Biological Systems Engineering; Energy Systems (1-5)**

Variable—1-5 hours. Prerequisite: consent of instructor. Special topics in Energy Systems. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

#### **289E. Selected Topics in Biological Systems Engineering; Environmental Quality (1-5)**

Variable—1-5 hours. Prerequisite: consent of instructor. Special topics in Environmental Quality. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

#### **289F. Selected Topics in Biological Systems Engineering; Food Engineering (1-5)**

Variable—1-5 hours. Prerequisite: consent of instructor. Special topics in Food Engineering. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

#### **289G. Selected Topics in Biological Systems Engineering; Forest Engineering (1-5)**

Variable—1-5 hours. Prerequisite: consent of instructor. Special topics in Forest Engineering. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

#### **289H. Selected Topics in Biological Systems Engineering; Irrigation and Drainage (1-5)**

Variable—1-5 hours. Prerequisite: consent of instructor. Special topics in Irrigation and Drainage. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

#### **289I. Selected Topics in Biological Systems Engineering; Plant Production and Harvest (1-5)**

Variable—1-5 hours. Prerequisite: consent of instructor. Special topics in Plant Production and Harvest. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

#### **289J. Selected Topics in Biological Systems Engineering; Postharvest Engineering (1-5)**

Variable—1-5 hours. Prerequisite: consent of instructor. Special topics in Postharvest Engineering. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

#### **289K. Selected Topics in Biological Systems Engineering; Sensors and Actuators (1-5)**

Variable—1-5 hours. Prerequisite: consent of instructor. Special topics in Sensors and Actuators. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

#### **290. Seminar (1)**

Seminar—1 hour. Prerequisite: graduate standing. Weekly seminars on recent advances and selected topics in biological systems engineering. Course theme will change from quarter to quarter. May be repeated for credit. (S/U grading only.)

#### **290C. Graduate Research Conference (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Research problems, progress and techniques in biological systems engineering. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### **298. Group Study (1-5)**

(S/U grading only.)

#### **Professional**

#### **390. Supervised Teaching in Biological and Agricultural Engineering (1-3)**

Laboratory—3 hours; tutorial—3-9 hours. Prerequisite: graduate standing; consent of instructor. Tutoring and teaching students in undergraduate courses offered in the Department of Biological and Agricultural Engineering. Weekly conferences with instructor; evaluation of teaching. Preparing for and conducting demonstrations, laboratories and discussions. Preparing and grading exams. May be repeated for a total of 6 units. (S/U grading only.)—F, W, S. (F, W, S.)

## **The Biomedical Engineering Undergraduate Major**

The Biomedical Engineering program is accredited by the Engineering Accreditation Commission of ABET; see <http://www.abet.org>.

Biomedical engineering is an interdisciplinary area of study that integrates knowledge from engineering with the biomedical sciences. It is a very diverse field, with biomedical engineers working in systems ranging from medical imaging to the design of artificial organs. Some major research advances in biomedical engineering include the left ventricular assist device (LVAD), artificial joints, kidney dialysis, bioengineered skin, angioplasty, computed tomography (CT), and flexible endoscopes. Students who choose biomedical engineering are interested in being of service to human health but do not routinely interact directly with patients.

The mission of the BS degree program of the Department of Biomedical Engineering is to combine exceptional teaching with state-of-the-art research for the advancement of technologies and computational techniques that meet medical and societal challenges. As a biomedical engineer, you can choose employment opportunities in industry, hospitals, academic research institutes, teaching, national laboratories, or government regulatory agencies.

The educational objectives of our program are that our graduates develop successful careers related to biomedical engineering or another area of the student's choosing, through employment in industry or government, or through pursuit of graduate or professional degrees; and contribute effectively to society through engineering practice, research and development, education, or in governmental, regulatory or legal aspects.

The biomedical engineering curriculum has been designed to provide a solid foundation in mathematics, life and physical sciences, and engineering, and to provide sufficient flexibility in the upper division requirements to encourage students to explore specializations within the field. Our instructional program is designed to impart knowledge of contemporary issues at the forefront of biomedical engineering research. Exclusive of General Education units, the minimum number of units required for the Biomedical Engineering degree is 157.

For information about graduate degree options, see [Biomedical Engineering \(A Graduate Group\)](#), on page 194.

#### **Lower Division Required Courses**

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

#### **UNITS**

Mathematics 21A or 21AH; 21B or 21BH;

21C or 21CH; 21D.....16

Mathematics 22A-22B .....6

Physics 9A or 9HA; 9B, 9C .....15

Chemistry 2A or 2AH; 2B or 2BH, 2C or

2CH .....15

Chemistry 8A or 118A; Chemistry 8B or 118B.....	6
Engineering 6, 17.....	8
University Writing Program 1, 1Y, or 1V, or English 3, or Comparative Literature 1, 2, 3, or 4, or Native American Studies 5 (grade of C- or better required) .....	4
Biological Sciences 2A .....	5
Biomedical Engineering 1, 20 .....	6

**Upper Division Required Courses**

Engineering 100 or Electrical and Computer Engineering 100 .....	3
Engineering 105, 190 .....	7
Biomedical Engineering 116 or Neurobiology Physiology Behavior 101 .....	5
Biomedical Engineering 105, 106, 108, 109, 110A-110B-110L, 111 .....	30
Science electives .....	7
To be chosen according to specialization. Biological Sciences 2B, 2C, Engineering Computer Science 30, 40, Physics 9D, Biomedical Engineering 102, 161A, 161L, 161S, Chemistry 118C or any graded upper division course in the Biological Sciences, Chemistry or Physics that is designated as Science and Engineering topical breadth. Four units of Biomedical Engineering 192 or 199 with the approval of the Biomedical Engineering Undergraduate Committee.	
Engineering electives .....	24
Any graded upper division Biomedical Engineering course (except Biomedical Engineering 102, 161A, 161L, 161S). 4 units of Biomedical Engineering 192 or 199 with the approval of the Biomedical Engineering Undergraduate Committee. No more than four units allowed from lower division coursework. Engineering 4, 35, 45, or 45Y, 102, 103, 104, 104L, 106; Electrical and Computer Engineering 110A, 110B, 118, 130A, 130B, 140A, 140B, 150A, 150B, 157A, 157B, 160; Biological Systems Engineering 128, 130, 165, 175; Chemical Engineering 141, 144, 145A, 145B, 155, 160, 161A, 161B, 161L, 170; Computer Science 124; Materials Science and Engineering 147, 160, 162, 162L, 164, 172, 172L, 174, 174L, 180, 181, 182; Mechanical Engineering 50, 150A, 150B, 151, 152, 154, 165, 171, 172.	

**Upper Division Composition**

Requirement .....	0.4
One course from the following (a grade of C- or better is required): University Writing Program 101; 102B, 102E; 104 A, 104E, 104F, 104I, 104T; or passing the Upper Division Composition Exam.	

**Additional upper division elective policies:**

- 2 units from Chemistry 118A may be applied towards Science electives if 118A is also used to satisfy lower division subject credit.
- 2 units from Electrical and Computer Engineering 100 may be applied towards Engineering electives if Electrical and Computer Engineering 100 is taken to satisfy upper division subject credit.

**Science electives and engineering electives are to be selected in consultation with a staff or faculty adviser.****Biomedical Engineering Minor**

The minor in Biomedical Engineering is restricted to enrolled College of Engineering students. The intent is to build upon their existing core strengths and add expertise in biomedical applications. This additional training would make students more attractive to employers in the medical device industry, and would also position students for graduate training in health related applications of engineering. The minor requires two life sciences courses not typically required for engineering students, one at the cellular level (Biomedical Engineering 102) and the other at

the physiological level (Neurobiology, Physiology, and Behavior 101 or Biomedical Engineering 116). The remaining 12 units are to be selected in consultation with an adviser from the list of upper division Biomedical Engineering courses. Students will be advised to select additional courses to complement their existing curricula. Examples of relevant coursework for different majors are provided as a reference. These listings classify the upper division Biomedical Engineering courses into categories and provide a suggested subset of coursework for the majors most likely to have students interested in health-related applications.

**Minor Requirements:**

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements with an overall GPA of 2.000 or better in courses required for the minor. No more than one course can be counted towards both the student's major and the minor.

**UNITS****Biomedical Engineering.....21**

Neurobiology, Physiology and Behavior 101 or Biomedical Engineering 116, and	
Biomedical Engineering 102 .....	9
Electives*	
Biomedical Engineering 117, 118, 126, 140, 141, 142, 143, 151, 152, 161A, 161L, 162, 163, 167, 173, 189A, 189B, 189C .....	12

\*Electives to be chosen in consultation with the Biomedical Engineering Departmental Adviser.

**Minor Advisers.** Rosalind Christian, Anthony Pascerini

**Areas of Specialization**

As Biomedical engineering is defined so broadly, specializing in a subfield of engineering can provide more in-depth expertise in a focus area. Through the judicious selection of upper division engineering and science electives, students can create this depth in one of our suggested areas of specialization or in an area of the student's choosing. One of the strengths of the UC Davis program is the flexibility to design one's own emphasis of study. These specializations are neither required nor degree-notated.

**Biomechanics**

This is a broad subfield that includes orthopedic/rehabilitation engineering (including the design of wheelchairs and prosthetics) as well as the study of mechanical forces produced by biological systems. Biomechanics allows a better understanding of the fluid dynamics of blood flow and the forces acting on tissue in the artery to allow the design of better cardiovascular interventions. This field involves more intensive study of mechanics, dynamics and thermodynamics.

**Cellular and Tissue Engineering**

This focus area applies biomedical engineering principles to control behavior at the gene, protein, cell, and tissue level. Scientists in this area can work in diverse areas including cellular therapies, protein production, gene therapy, tissue engineering and regeneration, and biomaterials development. This field can require study in biomedical transport, natural or synthetic biomaterials, pharmacokinetics and pharmacodynamics. It draws heavily from knowledge in the chemical and biological sciences.

**Imaging**

The visualization of anatomical structure, physiological processes, metabolic activity and molecular expression in living tissues is important to accomplish goals that include the diagnosis of disease, the development of new therapeutics, the evaluation of the response to therapeutics, and the guidance of interventional procedures. Our program has a particular strength in molecular imaging, in which molecular-scale events are detected within living systems. An imaging bioengineer can work in areas ranging from developing instruments for imaging, to

creating algorithms for three-dimensional reconstruction of imaging data, to generating new contrast agents for enhancing image quality. Depending upon the area of interest, this field can require further study in electronics signal processing, chemistry or computer programming.

**Medical Devices**

This is a diverse area that can include the development of instruments, apparatuses, machines, implants, or in-vitro reagents intended for use in the diagnosis, treatment or prevention of disease. Biomedical engineers have begun to combine technologies including pharmaceuticals, electronics and mechanical devices in the development of combination medical treatments.

**Systems & Synthetic Biology**

In this area, concepts, principles and techniques from engineering are applied to understand and build biological processes and systems at a fundamental level. Engineers describe biochemical, genetic and mechanical processes mathematically and integrate this information into models of natural and synthetic systems. These models are studied analytically, computationally and statistically to uncover design principles of natural systems and to guide development of methods capable of redirecting normal expression for biotechnological purposes or correcting pathological expression for therapeutic purposes.

**Pre-Medical Students**

Engineering is playing an increasing role in the practice of medicine, and students interested in medicine can focus on the intersection of engineering and medicine. To meet admission requirements for medical school, students must complete extra course work. These courses are in addition to the listed Department of Biomedical Engineering curricular requirements.

**Courses in Biomedical Engineering (BIM)****Lower Division****1. Introduction to Biomedical Engineering (2)**

Lecture—1 hour; laboratory—3 hours. Pass One open to freshmen. Introduction to the field of biomedical engineering with emphasis on design, careers, and specializations, including (1) medical devices (2) cellular & tissue engineering, (3) biomechanics, (4) systems & synthetic biology, and (5) biomedical imaging. GE credit: SciEng | SE. —F. (F.) Choi

**20. Fundamentals of Bioengineering (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in Chemistry 2B and Mathematics 21D; Physics 9B. Basic principles of mass, energy and momentum conservation equations applied to solve problems in the biological and medical sciences. Only two units of credit to students who have previously taken Chemical Engineering 51, Engineering 105. GE credit: SciEng | QL, SE, VL. —S. (S.) Choi

**89A. Topics in Biomedical Engineering (1-5)**

Prerequisite: consent of instructor. Restricted to lower division students. Topics in Biomedical Engineering. (A) Cellular and Molecular Engineering. May be repeated for credit when topic differs. GE credit: SciEng | SE.

**89B. Topics in Biomedical Engineering (1-5)**

Prerequisite: consent of instructor. Restricted to lower division students. Topics in Biomedical Engineering. (B) Biomedical Imaging. May be repeated for credit when topic differs. GE credit: SciEng | SE.

**89C. Topics in Biomedical Engineering (1-5)**

Prerequisite: consent of instructor. Restricted to lower division students. Topics in Biomedical Engineering. (C) Biomedical Engineering. May be repeated for credit when topic differs. GE credit: SciEng | SE.

**99. Special Study for Undergraduates (1-5)**

(P/NP grading only.) GE credit: SE.

**Upper Division****102. Quantitative Cell Biology (4)**

Lecture/discussion—4 hours. Prerequisite: Biological Sciences 2A; Chemistry 8B. Open to College of Engineering students only. Fundamental cell biology for bioengineers. Emphasis on physical concepts underlying cellular processes including protein trafficking, cell motility, cell division and cell adhesion. Current topics including cell biology of cancer and stem cells will be discussed. Only two units of credit for students who have completed Biological Sciences 104 or Molecular and Cellular Biology 143. GE credit: SciEng | QL, SE, VL.—F. (F.) Yamada

**105. Probability and Statistics for Biomedical Engineers (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in Mathematics 21D; Engineering 6 (may be concurrent). Concepts of probability, random variables and processes, and statistical analysis with applications to engineering problems in biomedical sciences. Includes discrete and continuous random variables, probability distributions and models, hypothesis testing, statistical inference and Matlab applications. Emphasis on BME applications. GE credit: SciEng | QL, SE, VL.—F. (F.) Rocke

**106. Biotransport Phenomena (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in course 20; course 116 or Neurobiology, Physiology, and Behavior 101; Physics 9B; Mathematics 22B. Open to Biomedical Engineering majors only. Principles of momentum and mass transfer with applications to biomedical systems; emphasis on basic fluid transport related to blood flow, mass transfer across cell membranes, and the design and analysis of artificial human organs. GE credit: SciEng | QL, SE, SL, VL.—W. (W.) Tan

**107. Mathematical Methods for Biological Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in Engineering 6; course 20; Mathematics 22B. Restricted to Biomedical Engineering majors only. Mathematical and computational modeling to solve biomedical problems. Topics include stochastic processes and Monte Carlo simulations, and partial differential equations. Introduced to numerical techniques in MATLAB. Offered irregularly. GE credit: SciEng | QL, SE, VL.

**108. Biomedical Signals and Control (4)**

Lecture—4 hours. Prerequisite: Engineering 6, 17; grade of C- or better in Mathematics 22B. Restricted to Biomedical Engineering majors only. Systems and control theory applied to biomedical engineering problems. Time-domain and frequency-domain analyses of signals and systems, convolution, Laplace and Fourier transforms, transfer function, dynamic behavior of first and second order processes, and design of control systems for biomedical applications. No credit for students who have taken Electrical and Computer Engineering 150A; two units of credit for students who have taken Mechanical Engineering 171. GE credit: SciEng | QL, SE, —S. (S.) Qi

**109. Biomaterials (4)**

Lecture—4 hours. Prerequisite: course 106; Biological Sciences 2A; Chemistry 2C. Restricted to upper division Engineering majors. Introduce important concepts for design, selection and application of biomaterials. Given the interdisciplinary nature of the subject, principles of polymer science, surface science, materials science and biology will be integrated into the course. GE credit: SciEng | SE, SL, VL.—S. (S.) Revzin

**110A. Biomedical Engineering Senior Design Experience (3)**

Lecture/discussion—1 hour; project—6 hours. Prerequisite: course 110L (may be concurrent); course 111 (may be concurrent); consent of instructor. Restricted to senior Biomedical Engineering majors (or by consent of instructor). Application of bioengineering theory and experimental analysis to a design project culminating in the design of a unique solution to a problem. Design may be geared towards current applications in biotechnology or medical technology. Continues in course 110B.

(Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE, OL, SL, VL.—W. (W.) Passerini

**110B. Biomedical Engineering Senior Design Experience (3)**

Lecture/discussion—1 hour; project—6 hours. Prerequisite: course 110A. Application of bioengineering theory and experimental analysis to a design project culminating in the design of a unique solution to a problem. Design may be geared towards current applications in biotechnology or medical technology. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | OL, SE, SL, VL.—S. (S.) Passerini

**110L. Biomedical Engineering Senior Design Lab (2)**

Laboratory—3 hours; laboratory/discussion—2 hours. Prerequisite: courses 105, 108, 109. Restricted to Senior Biomedical Engineering majors. Manufacturing processes, safety, and computer-aided design techniques applied to the fabrication of biomedical devices. Application of bioengineering principles and design theory to a project culminating in completion of a functional prototype that solves a biomedical problem. Continues in 110A. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.—F. W. (F., W.) Passerini

**111. Biomedical Instrumentation Laboratory (6)**

Lecture—4 hours; discussion/laboratory—4 hours. Prerequisite: courses 105, and 108; Engineering 100 or Electrical Engineering 100; course 116 or Neurobiology, Physiology, & Behavior 101. Open to Biomedical Engineering majors only. Basic biomedical signals and sensors. Topics include analog and digital records using electronic, hydrodynamic, and optical sensors, and measurements made at cellular, tissue and whole organism level. GE credit: SciEng | SE.—F. W. (F., W.) Marcu, Pan

**116. Physiology for Biomedical Engineers (5)**

Lecture—2 hours; discussion—3 hours. Prerequisite: C- or better in Biological Sciences 2A; Physics 9C; Mathematics 22B recommended. Basic human physiology for the nervous, musculoskeletal, cardiovascular, respiratory, gastrointestinal, renal, and endocrine systems. Emphasis on small group design projects and presentations in interdisciplinary topics relating biomedical engineering to medical diagnostic and therapeutic applications. GE credit: SciEng | OL, SE, SL, VL, WE.—F. (F.) Silva

**117. Analysis of Molecular and Cellular Networks (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: grade of C- or better in Biological Sciences 2A and Mathematics 22A. Restricted to upper division standing. Network themes in biology, emphasizing metabolic, genetic, and developmental networks. Mathematical and computational methods for analysis of such networks. Elucidation of design principles in natural networks. Engineering and ethical issues in the design of synthetic networks. Offered alternate years. GE credit: SciEng | QL, SE, SL, VL.—Savageau

**118. Microelectromechanical Systems (4)**

Lecture—2 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: Chemistry 2A; Engineering 17. Restricted to upper division standing in College of Engineering. One restricted to upper division standing in Biomedical Engineering. Introduction to the theory and practice of micro-electromechanical systems (MEMS), including fundamentals of micro-nano-fabrication, microscale sensing and actuation, self assembly, microfluidics and lab-on-a-chip. Weekly hands-on laboratory sections are emphasized on implementation and utilization of MEMS technologies. GE credit: SciEng | SE.—S. (S.) Pan

**126. Tissue Mechanics (3)**

Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: Exercise Science 103 and/or Engineering 45 and/or consent of instructor. Structural and mechanical properties of biological tissues, includ-

ing bone, cartilage, ligaments, tendons, nerves, and skeletal muscle. (Same course as Exercise Biology 126.) GE credit: SciEng | QL, SE, SL, WE.

**140. Protein Engineering (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 2A. Introduction to protein structure and function. Modern methods for designing, producing, and characterizing novel proteins and peptides. Design strategies, computer modeling, heterologous expression, in vitro mutagenesis. Protein crystallography, spectroscopic and calorimetric methods for characterization, and other techniques. Offered in alternate years. GE credit: SciEng | QL, SE, SL, VL.—(S.) Facciotti

**141. Cell and Tissue Mechanics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Physics 9B; Engineering 6; Engineering 35. Mechanical properties that govern blood flow in the microcirculation. Concepts in blood rheology and cell and tissue viscoelasticity, biophysical aspects of cell migration, adhesion, and motility. GE credit: SciEng | QL, SE, VL.—W. (W.) Simon

**142. Principles and Practices of Biomedical Imaging (4)**

Lecture—4 hour. Prerequisite: Mathematics 22B, course 108 (may be taken concurrently). Basic physics, engineering principles, and applications of biomedical imaging techniques including x-ray imaging, computed tomography, magnetic resonance imaging, ultrasound and nuclear imaging. GE credit: SciEng | SE.—S. (S.) Cherry

**143. Biomolecular Systems Engineering: Synthetic Biology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 2A; Mathematics 16C or Mathematics 17C or Mathematics 21C. Includes analysis, design, construction and characterization of molecular systems. Process and biological parts standardization, computer aided design, gene synthesis, directed evolution, protein engineering, issues of human practice, biological safety, security, innovation, and ethics are covered. Offered in alternate years. GE credit: SciEng | SE.—S. Facciotti

**151. Mechanics of DNA (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 2A and Mathematics 22B. Structural, mechanical and dynamic properties of DNA. Topics include DNA structures and their mechanical properties, in vivo topological constraints on DNA, mechanical and thermodynamic equilibria, DNA dynamics, and their roles in normal and pathological biological processes. GE credit: SciEng | OL, QL, SE.—Benham

**152. Molecular Control of Biosystems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 2A, Physics 9B and Mathematics 22B. Fundamentals of molecular biomedicine covering state-of-the-art methods for quantitative understanding of gene regulation and signal transduction networks at different levels of organization in health and disease. Topics include classic genetic systems, synthetic circuits, networks disrupted in disease and cancer. GE credit: SciEng | OL, SE, —S. (S.) Saiz

**161A. Biomolecular Engineering (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 2A; Chemistry 8B. Restricted to upper division standing. Introduction to the basic concepts and techniques of biomolecular engineering such as recombinant DNA technology, protein engineering, and molecular diagnostics. Three units of credit for students who have taken course 161S. Offered in alternate years. GE credit: SciEng | QL, SE.—(F.) Tan

**161L. Biomolecular Engineering Laboratory (3)**

Laboratory—4.5 hours; lecture/discussion—1.5 hours. Prerequisite: course 161A or Biological Sciences 101. Introduction to the basic techniques in biomolecular engineering. Lectures, laboratory, and discussion sessions will cover basic techniques in DNA cloning, bacterial cell culture, gene regulation, protein expression, and data analysis. Offered irregularly. GE credit: SciEng | QL, SE, SL.

**161S. Biomolecular Engineering: Brief Course (1)**

Lecture—1 hour. Prerequisite: Biological Sciences 2A; Chemistry 8B; course 161L (may be taken concurrently). Basic concepts and techniques in biomolecular analysis, recombinant DNA technology, and protein purification and analysis. Not open for credit to students who have taken course 161A. Offered irregularly. GE credit: SciEng | QL, SE.

**162. Introduction to the Biophysics of Molecules and Cells (4)**

Lecture—4 hours. Prerequisite: C- or better in Mathematics 22B and Physics 9C. Introduction to fundamental physical mechanisms governing structure and function of bio-macromolecules. Emphasis on a quantitative understanding of the nano- to microscale biomechanics of interactions between and within individual molecules, as well as of their assemblies, in particular membranes. GE credit: SciEng | QL, SE, SL.—F. (F.) Heinrich

**163. Bioelectricity, Biomechanics, and Signaling Systems (4)**

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: C- or better in Mathematics 22B; course 116 or Neurobiology, Physiology, and Behavior 101. Fundamentals of bioelectricity in cells, the calcium signaling system, and mechanical force generation in muscle. Combination of lecture and projects to promote learning of important concepts in hands-on projects using neurons and muscle as microcosms. GE credit: SciEng | SE, QL.—S. (S.) Chen-Izu

**167. Biomedical Fluid Mechanics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 106 (may be taken concurrently) or Engineering 103. Basic biofluid mechanics, Navier Stokes equations of motion, circulation, respiration and specialized applications including miscellaneous topics such as boundary layer flow. Not open for credit to students who have completed Mechanical Engineering 167C. GE credit: SciEng | QL, SE.—S. (S.) Tan

**173. Cell and Tissue Engineering (4)**

Lecture/discussion—4 hours. Prerequisite: grade of C- or better in courses 106 and 109. Engineering principles to direct cell and tissue behavior and formation. Cell sourcing, controlled delivery of macromolecules, transport within and around biomaterials, bioreactor design, tissue design criteria and outcomes assessment. GE credit: SciEng | OL, SE, SL, WE.—F. (F.) Leach

**189A. Topics in Biomedical Engineering; Cellular and Molecular Engineering (1-5)**

Prerequisite: consent of instructor. Topics in Biomedical Engineering; Cellular and Molecular Engineering. May be repeated if topic differs. Offered irregularly. GE credit: SciEng | SE.

**189B. Topics in Biomedical Engineering; Biomedical Imaging (1-5)**

Prerequisite: consent of instructor. Topics in Biomedical Engineering; Biomedical Imaging. May be repeated if topic differs. Offered irregularly. GE credit: SciEng | SE.

**189C. Topics in Biomedical Engineering; Biomedical Engineering (1-5)**

Prerequisite: consent of instructor. Topics in Biomedical Engineering; Biomedical Engineering. May be repeated if topic differs. Offered irregularly. GE credit: SciEng | SE.

**190A. Upper Division Seminar in Biomedical Engineering (1)**

Seminar—1 hour. Restricted to upper division standing. In depth examination of research topics in a small group setting. Question and answer session with faculty members. May be repeated for credit. (P/NP grading only.) GE credit: SE.

**192. Internship in Biomedical Engineering (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor. Restricted to upper division majors. Supervised work experience in the Biomedical Engineering field. May be repeated for credit. (P/NP grading only.) GE credit: SE.—F, W, S, Su. (F, W, S, Su.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. May be repeated up to three times for credit. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. Special study for advanced undergraduates. (P/NP grading only.) GE credit: SE.

**The Graduate Program in Biomedical Engineering**

Doctoral and master's degrees in Biomedical Engineering are offered through the interdisciplinary Graduate Group in Biomedical Engineering. Please see <http://www.bme.ucdavis.edu> and Biomedical Engineering [A Graduate Group], on page 194 of the catalog for a description of graduate education offerings, requirements, group faculty and research foci.

**Graduate****202. Cell and Molecular Biology for Engineers (4)**

Lecture/discussion—4 hours. Prerequisite: Biological Sciences 104 or Molecular and Cellular Biology 121. Preparation for research and critical review in the field of cell and molecular biology for biomedical or applied science engineers. Emphasis on biophysical and engineering concepts intrinsic to specific topics including receptor-ligand dynamics in cell signaling and function, cell motility, DNA replication and RNA processing, cellular energetics and protein sorting. Modern topics in bioinformatics and proteomics.—F. (F.) Yamada

**204. Physiology for Bioengineers (5)**

Lecture—4 hours. Prerequisite: Biological Sciences 1A or equivalent; graduate standing or consent of instructor. Basic human physiology of the nervous, muscular, cardiovascular, respiratory, and renal systems and their interactions; Emphasis on the physical and engineering principles governing these systems, including control and transport processes, fluid dynamics, and electrochemistry.—F. (F.) Benham

**209. Scientific Integrity for Biomedical Engineers (2)**

Lecture—1 hour; discussion—1 hour. Open to Biomedical Engineering majors only. Scientific integrity and ethics for biomedical engineers, with emphasis and discussion on mentoring, authorship and peer review, use of humans and animals in biomedical research, conflict of interest, intellectual property, genetic technology and scientific record keeping. (S/U grading only.)—S. (S.) Simon

**210. Introduction to Biomaterials (4)**

Lecture—4 hours. Prerequisite: Engineering 45 or consent of instructor. Mechanical and atomic properties of metallic, ceramic, and polymeric implant materials of metallic, ceramic, and polymeric implant materials; corrosion, degradation, and failure of implants; inflammation, wound and fracture healing, blood coagulation; properties of bones, joints, and blood vessels; biocompatibility of orthopaedic and cardiovascular materials.—W. (W.) Fyhrie

**211. Design of Polymeric Biomaterials and Biological Interfaces (4)**

Lecture—4 hours. Prerequisite: Engineering 45 or consent of instructor. Open to upper division undergraduates or graduate students. Design, selection and application of polymeric biomaterials. Integration of the principles of polymer science, surface science, materials science and biology. Offered in alternate years.—(W.) Revzin

**212. Biomedical Heat and Mass Transport Processes (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mechanical Engineering 165, Biological Systems Engineering 125, Chemical Engineering 153 or the equivalent. Application of principles of heat and mass transfer to biomedical systems related to heat exchange between the biomedical system and its environment, mass transfer across cell membranes

and the design and analysis of artificial human organs. (Same course as Mechanical and Aeronautical Engineering 212.) Offered in alternate years.—W. Aldredge

**213. Principles and Applications of Biological Sensors (4)**

Lecture—4 hours. Prerequisite: Chemistry 2C. Biological sensors based on principles of electrochemical, optical and affinity detection. Methods for integration of sensing elements (e.g. enzymes) into biosensors and miniaturization of biosensors. Offered in alternate years.—F. Revzin

**214. Blood Cell Biomechanics (4)**

Lecture—4 hours. Prerequisite: Engineering 102. Mechanical properties that govern blood flow in the microcirculation and cell adhesion and motility. Constitutive equations of vascular tissue and blood. Blood rheology and viscoelasticity. Red and white blood cell mechanics. Remodeling of blood vessels in disease and engineering of blood vessels and cells. Offered in alternate years.—(F.) Simon

**215. Biomedical Fluid Mechanics and Transport Phenomena (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 103 or Chemical Engineering 150B or Civil and Environmental Engineering 141. Application of fluid mechanics and transport to biomedical systems. Flow in normal physiological function and pathological conditions. Topics include circulatory and respiratory flows, effect of flow on cellular processes, transport in the arterial wall and in tumors, and tissue engineering. (Same course as Mechanical and Aeronautical Engineering 215.) Offered irregularly.

**216. Advanced Topics in Cellular Engineering (4)**

Lecture—4 hours. Prerequisite: course 214 or consent of instructor. Advanced research strategies and technologies used in the study of immune function and inflammation. Static and dynamic measurements of stress, strain, and molecular scale forces in blood and vascular cells, as well as genetic approaches to the study of disease. Offered in alternate years.—F. Simon

**217. Mechanobiology in Health and Disease (4)**

Lecture/discussion—4 hours. Prerequisite: course 106 or equivalent (e.g. Engineering 103), Biological Sciences 101 or equivalent, Neurobiology, Physiology, and Behavior 101 or equivalent. Principles by which biomechanical forces affect cell and tissue function to impact human health and disease. Emphasis on cardiovascular system: structure and function, biofluid mechanics and mechanotransduction, disease mechanisms and research methods. Cartilage, bone and other systems; current topics discussed.—S. Passerini

**218. Microsciences (4)**

Lecture/discussion—4 hours. Introduction to the theory of physical and chemical principles at the microscale. Scale effects, surface tension, microfluidic mechanics, micromechanical properties, intermolecular interactions and micro tribology. (Same course as Electrical and Computer Engineering 244B.)—F. (F.) Pan

**222. Cytoskeletal Mechanics (4)**

Lecture/discussion—4 hours. Prerequisite: course 202. Current topics in cytoskeletal mechanics including physical properties of the cytoskeleton and motor proteins, molecular force sensor and generator, cytoskeletal regulation of cell motility and adhesion. Offered in alternate years.—(F.) Yamada

**223. Multibody Dynamics (4)**

Lecture—4 hours. Prerequisite: Engineering 102. Coupled rigid-body kinematics/dynamics; reference frames; vector differentiation; configuration and motion constraints; holonomicity; generalized speeds; partial velocities; mass; inertia tensor/theorems; angular momentum; generalized forces; comparing Newton/Euler, Lagrange's, Kane's methods; computer-aided equation derivation; orientation;

Euler; Rodrigues parameters. (Same course as Mechanical and Aeronautical Engineering 223.)—W. (W.) Eke

### **225. Spatial Kinematics and Robotics (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: C Language and course 222. Spatial kinematics, screw theory, spatial mechanisms analysis and synthesis, robot kinematics and dynamics, robot workspace, path planning, robot programming, real-time architecture and software implementation. (Same course as Mechanical and Aeronautical Engineering 225.) Offered in alternate years.—W. Cheng

### **227. Research Techniques in Biomechanics (4)**

Lecture—2 hours; laboratory—4 hours; term paper/discussion—1 hour. Prerequisite: consent of instructor; Mathematics 22B; Exercise Science 115 recommended. Experimental techniques for biomechanical analysis of human movement are examined. Techniques evaluated include data acquisition and analysis by computer, force platform analysis, strength assessment, planar and three-dimensional videography, data reduction and smoothing, body segment parameter determination, electromyography, and biomechanical modeling. (Same course as Mechanical and Aeronautical Engineering 227/Exercise Science 227.)

### **228. Skeletal Muscle Mechanics: Form, Function, Adaptability (4)**

Lecture—4 hours. Prerequisite: basic background in biology, physiology, and engineering; Engineering 35 and 45, Mathematics 21D; Neurobiology, Physiology, and Behavior 101 recommended. Basic structure and function of skeletal muscle examined at the microscopic and macroscopic level. Muscle adaptation in response to aging, disease, injury, exercise, and disuse. Analytic models of muscle function are discussed. Offered in alternate years.—F. Hawkins

### **231. Musculo-Skeletal System Biomechanics (4)**

Lecture—4 hours. Prerequisite: Engineering 102. Mechanics of skeletal muscle and mechanical models of muscle, solution of the inverse dynamics problem, theoretical and experimental methods of kinematic and kinetic analysis, computation of intersegmental load and muscle forces, applications to gait analysis and sports biomechanics. (Same course as Mechanical and Aeronautical Engineering 231.)—S.

### **232. Skeletal Tissue Mechanics (3)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: Engineering 104B. Overview of the mechanical properties of the various tissues in the musculoskeletal system, the relationship of these properties to anatomic and histologic structure, and the changes in these properties caused by aging and disuse. The tissues covered include bone, cartilage and synovial fluid, ligament and tendon. (Same course as Mechanical and Aeronautical Engineering 232.)—S. (S.) Fyhrie

### **233. Soft Tissue Mechanics (4)**

Lecture—4 hours. Presentation of structure and function of musculoskeletal soft tissues: cartilage, tendon, ligament, meniscus, and intervertebral disc. Instruction in engineering principals governing the mechanical behavior of these tissues: viscoelasticity, quasilinear viscoelasticity, and biphasic theory. Offered in alternate years.—W. Christiansen

### **239. Advanced Finite Elements and Optimization (4)**

Lecture—4 hours. Prerequisite: Engineering 180 or Applied Science 115 or Mathematics 128C. Introduction to advanced finite elements and design optimization methods, with application to modeling of complex mechanical, aerospace and biomedical systems. Application of states of the art in finite elements in optimum design of components under realistic loading conditions and constraints. (Same course as Mechanical Engineering 239.) Offered in alternate years.—(W.) Sarigul-Klijn

### **240. Computational Methods in Nonlinear Mechanics (4)**

Lecture—4 hours. Prerequisite: Applied Science Engineering 115 or Mathematics 128B or Engineering 180. Deformation of solids and the motion of fluids treated with state-of-the-art computational methods. Numerical treatment of nonlinear dynamics; classification of coupled problems; applications of finite element methods to mechanical, aeronautical, and biological systems. (Same course as Mechanical and Aeronautical Engineering 240.) Offered in alternate years.—(W.) Sarigul-Klijn

### **241. Introduction to Magnetic Resonance Imaging (3)**

Lecture—3 hours. Prerequisite: Physics 9D, Mathematics 22B. Equipment, methods, medical applications of MRI. Lectures review basic, advanced pulse sequences, image reconstruction, display and technology and how these are applied clinically. Lecture complements a more technical course. (course 246 can be taken concurrently)—F. (F.)

### **242. Introduction to Biomedical Imaging (4)**

Lecture—4 hours. Prerequisite: Physics 9D and Electrical and Computer Engineering 106 or consent of instructor. Basic physics and engineering principles of image science. Emphasis on ionizing and nonionizing radiation production and interactions with the body and detectors. Major imaging systems: radiography, computed tomography, magnetic resonance, ultrasound, and optical microscopy.—F. (F.) Chaudhari

### **243. Radiation Detectors for Biomedical Applications (4)**

Lecture/discussion—4 hours. Prerequisite: Physics 9D, Mathematics 21D, 22B. Radiation detectors and sensors used for biomedical applications. Emphasis on radiation interactions, detection, measurement and use of radiation sensors for imaging. Operating principles of gas, semiconductor, and scintillation detectors.—W. (W.) Cherry

### **246. Magnetic Resonance Technology (3)**

Lecture—3 hours. Prerequisite: Physics 9D, Mathematics 22B. Course covers MRI technology at an advanced level with emphasis on mathematical descriptions and problem solving. Topics include spin dynamics, signal generation, image reconstruction, pulse sequences, biophysical basis of T1, T2, RF, gradient coil design, signal to noise, image artifacts.—F.

### **251. Medical Image Analysis (4)**

Lecture—4 hours. Prerequisite: Electrical and Computer Engineering 106. Techniques for assessing the performance of medical imaging systems. Principles of digital image formation and processing. Measurements that summarize diagnostic image quality and the performance of human observers viewing those images. Definition of ideal observer and other mathematical observers that may be used to predict performance from system design features. Offered in alternate years.—W. Qi

### **252. Computational Methods in Biomedical Imaging (4)**

Lecture—4 hours. Prerequisite: course 105 or Statistics 120; course 108 or Electrical and Computer Engineering 150A. Analytic tomographic reconstruction from projections in 2D and 3D; model-based image reconstruction methods; maximum likelihood and Bayesian methods; applications to CT, PET, and SPECT. (Same course as Electrical and Computer Engineering 205.) Offered in alternate years.—W. Qi

### **255. Biophotonics in Medicine and the Life Sciences (3)**

Lecture/discussion—3 hours. Prerequisite: Physics 108 and Biology 101-105; course 202 highly recommended; graduate standing. Introduction to the science and technology of biomedical optics and photonics, with an overview of applications in medicine and the life sciences. Emphasis on research supported by the NSF Center for Biophotonics at UC Davis Medical Center. (Same course as Applied Science 255 and Biophysics 255.) Offered in alternate years.—S. (S.) Chuang

### **257. Fundamentals of Tissue Optics and Biomedical Applications (5)**

Lecture—3 hours; discussion—1 hour; laboratory—3 hours. Fundamentals of optical properties of tissue. Range of optical technologies and their applications to tissue characterization and diagnostics.—S. (S.) Marcu, Wachsmann-Hogiu

### **262. Cell and Molecular Biophysics for Bioengineers (4)**

Lecture—4 hours. Prerequisite: course 284 or equivalent; graduate standing; undergraduate students by consent of instructor. Introduction to fundamental mechanisms governing the structure, function, and assembly of bio-macromolecules. Emphasis is on a quantitative understanding of the nano-to-microscale interactions between and within individual molecules, as well as of their assemblies, in particular membranes. Not open for credit to students who have completed course 162.—W. (W.) Heinrich

### **270. Biochemical Systems Theory (4)**

Lecture—4 hours. Prerequisite: course 202 concurrently or consent of instructor. Systems biology at the biochemical level. Mathematical and computational methods emphasizing nonlinear representation, dynamics, robustness, and optimization. Case studies of signal-transduction cascades, metabolic networks and regulatory mechanisms. Focus on formulating and answering fundamental questions concerning network function, design, and evolution.—F. Savageau

### **271. Gene Circuit Theory (4)**

Lecture—4 hours. Prerequisite: course 270 or 202 and consent of instructor. Analysis, design, and construction of gene circuits. Modeling strategies, elements of design, and methods for studying variations in design. Case studies involving prokaryotic gene circuits to illustrate natural selection, discovery of design principles, and construction of circuits for engineering objectives.—W. (W.) Savageau

### **272. Tissue Engineering (3)**

Lecture/discussion—3 hours. Prerequisite: Biological Sciences 104 or Molecular and Cellular Biology 121. Based on morphogenetic signals, responding stem cells and extracellular matrix scaffolding. Design and development of tissues for functional restoration of various organs damaged/lost due to cancer, disease and trauma. Fundamentals of morphogenetic signals, responding stem cells and extracellular matrix scaffolding.—W. (W.) Reddi

### **273. Integrative Tissue Engineering and Technologies (4)**

Lecture/discussion—4 hours. Prerequisite: courses 202 and 204 or similar; strongly encourage completion of course 272 although not a prerequisite. Restricted to graduate standing. Engineering principles to direct cell and tissue behavior and formation. Contents include controlled delivery of macromolecules, transport within and around biomaterials, examination of mechanical forces of engineered constructs, and current experimental techniques used in the field.—S. (S.) Leach

### **281. Acquisition and Analysis of Biomedical Signals (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Engineering 100; Statistics 130A. Restricted to upper division engineering. Basic concepts of digital signal recording and analysis; sampling; empirical modeling; Fourier analysis, random processes, spectral analysis, and correlation applied to biomedical signals.—S. (S.) Srinivasan

### **284. Mathematical Methods for Biomedical Engineers (4)**

Lecture/discussion—4 hours. Prerequisite: Mathematics 22B, Statistics 130A, or consent of instructor; upper division biomedical engineering majors, and graduate students in sciences and engineering; priority given to Biomedical Engineering graduate students. Theoretical applications of linear systems, ordinary and partial differential equations, and probability theory and random processes that describe biological systems and instruments that measure them. Students will be introduced to numerical solution techniques in MATLAB.—W. (W.) Duan

**286. Nuclear Imaging in Medicine and Biology (4)**

Lecture/discussion—4 hours. Prerequisite: course 243 or consent of instructor. Radioactive decay, interaction of radiation with matter, radionuclide production, radiation detection, digital autoradiography, gamma camera imaging, single photon emission computed tomography, positron emission tomography and applications of these techniques in biology and medicine. Offered in alternate years.—S. Cherry

**287. Concepts in Molecular Imaging (4)**

Lecture—2 hours; lecture/discussion—2 hours; term paper. Prerequisite: Chemistry 2C, Mathematics 21C, Physics 9D, consent of instructor. Current techniques and tools for molecular imaging. Emphasis on learning to apply principles from the physical sciences to imaging problems in medicine and biology.—S. Sutcliffe

**289A. Selected Topics in Biomedical Engineering; Cellular and Molecular Systems Engineering (1-5)**

Variable. Prerequisite: consent of instructor. Selected topics in Cellular and Molecular Systems Engineering. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289B. Selected Topics in Biomedical Engineering; Biomedical Imaging (1-5)**

Variable. Prerequisite: consent of instructor. Selected topics in Biomedical Imaging. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289C. Selected Topics in Biomedical Engineering; Computational Bioengineering (1-5)**

Variable. Prerequisite: consent of instructor. Selected topics in Computational Bioengineering. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289D. Selected Topics in Biomedical Engineering; Cell and Tissue Biomechanics (1-5)**

Variable. Prerequisite: consent of instructor. Selected topics in Cell and Tissue Biomechanics. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289E. Selected Topics in Biomedical Engineering; Analysis of Human Movement (1-5)**

Variable. Prerequisite: consent of instructor. Selected topics in Analysis of Human Movement. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**290. Seminar (1)**

Seminar—1 hour. Seminar in biomedical engineering. (S/U grading only.)

**290C. Graduate Research Conference (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Individual and/or group conference on problems, progress, and techniques in biomedical engineering research. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**298. Directed Group Study (1-5)**

Open to graduate students in the Biomedical Engineering Graduate Group, or consent of instructor. Directed group study in Biomedical Engineering. (S/U grading only.)—F, W, S. (F, W, S.)

**299. Research (1-12)**

(S/U grading only.)

**Professional****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

Alan P. Jackman, Ph.D., Professor Emeritus

Benjamin J. McCoy, Ph.D., Professor Emeritus

Dewey D.Y. Ryu, Ph.D., Professor Emeritus

Pieter Stroeven, Ph.D., Distinguished Professor

*Academic Senate Distinguished Teaching Award*

Stephen Whitaker, Ph.D., Professor Emeritus

*Academic Senate Distinguished Teaching Award*

**Affiliated Faculty**

Lucas Arzola, Ph.D., Assistant Adjunct Professor

Cong-Yan Cheng, Ph.D., Adjunct Professor

The Department of Chemical Engineering offers two undergraduate programs: Chemical Engineering and Biochemical Engineering.

**Mission Statement.** To advance, through teaching and research programs, the frontiers of chemical and biochemical engineering; to educate students with a sense of professionalism and community; and to serve the public of California through outreach efforts.

**Honors Program.** An Honors Program is available to qualified students in the Chemical Engineering, Biochemical Engineering, and Materials Science and Engineering majors. It is a four-year program designed to challenge the most talented students in these majors. Students invited to participate will take a one-unit honors seminar in their freshman year and will enroll in various one-unit honors courses. In the upper division, students will complete either an honors thesis or a project that might involve local industry (Chemical engineering 194 HA, HB, HC). Students must maintain a grade point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

**Chemical Engineering Undergraduate Program**

The Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET; see <http://www.abet.org>.

Chemical engineers apply the principles of chemistry and engineering to produce useful commodities, ranging from fuels to polymers. Chemical engineers are increasingly concerned with chemical and engineering processes related to the environment and food production. They work in diverse areas ranging from integrated circuits to integrated waste management. Preparation for a career in chemical engineering requires an understanding of both engineering and chemical principles to develop proficiency in conceiving, designing, and operating new processes.

The chemical engineering curriculum has been planned to provide a sound knowledge of engineering and chemical sciences so that you may achieve competence in addressing current and future technical problems.

**Objectives.** The objectives of the program in Chemical Engineering are to educate students in the fundamentals of chemical engineering, balanced with the application of these principles to practical problems; to train them as independent, critical thinkers who can also function effectively in teams; to foster a sense of community, ethical responsibility, and professionalism; to prepare them for careers in industry, government, and academia; to illustrate the necessity for continuing education and self-learning; and to help students to learn to communicate proficiently in written and oral form.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Chemical Engineering major is 156.

**Lower Division Required Courses**

## UNITS

Mathematics 21A-21B-21C-21D .....	16
Mathematics 22A-22B .....	6
Physics 9A-9B-9C .....	15
Chemistry 2A, 2B, 2C or Chemistry 2AH, 2BH, 2CH .....	15
Chemical Engineering and Materials Science 5, 6, 51, 80 .....	12
Engineering 45 or 45Y .....	4
Biotechnology 1 or Biotechnology 1Y or Biological Sciences 2A .....	4 or 5
English 3 or University Writing Program 1, 1V 1Y, or Comparative Literature 1, 2, 3, 4, or 4, or Native American Studies 5 (grade of C- or better is required) .....	4

**Upper Division Required Courses**

Chemical Engineering 140, 141, 142, 143, 145A, 145B, 148A, 148B, 152A, 152B, 155, 157, 158A, 158B, 158C .....	56
Chemistry 110A, 110B, 128A, 128B, 129A .....	16
Chemical Engineering and Materials Science Electives .....	8

Choose any upper division courses in the areas of Chemistry (CHE), Chemical Engineering (ECH) or Materials Science and Engineering (EMS). You may receive elective credit up to a maximum of four units for any combination of engineering courses numbered 190C, 192, 198, and 199. Courses may also be selected from the following: Biological Sciences 102; Food Science and Technology 100A, 102A, 102B; Fiber and Polymer Science 150.

**Upper Division Composition Requirement**

..... 0 or 4  
One course from the following (grade of C- or better is required): University Writing Program 102E, 102F, 104A, 104E, 104T

or passing the Upper Division Composition Exam.

### Options for Junior and Senior Years

The focus in your junior year is on fundamentals, such as thermodynamics, fluid mechanics, energy transfer, and mass transfer phenomena. In the senior year, you draw together these fundamentals and apply them in a study of kinetics, process design, and process dynamics and control. The program includes eight units of chemical engineering and materials science electives that allow you to strengthen specific areas in chemical engineering, explore new areas, or pursue new areas of specialization.

### Biochemical Engineering Undergraduate Program

The Biochemical Engineering program is accredited by the Engineering Accreditation Commission of ABET; see <http://www.abet.org>.

As the biotechnology industry expands and matures, there is increasing need for engineers who can move products from the research stage to large-scale manufacturing. As they fill this need, engineers must also understand the production, purification, and regulatory issues surrounding biopharmaceutical manufacturing.

Biochemical engineers—with their strong foundations in chemistry, biological sciences, and chemical process engineering—are in a unique position to tackle these problems. Biochemical engineers apply the principles of cell and molecular biology, biochemistry, and engineering to develop, design, scale up, optimize, and operate processes that use living cells, organisms, or biological molecules for the production and purification of products (such as monoclonal antibodies, vaccines, therapeutic proteins, antibiotics, and industrial enzymes); for health and/or environmental monitoring (such as diagnostic kits, microarrays, biosensors); or for environmental improvement (such as bioremediation). An understanding of biological processes is also becoming increasingly important in the industries that traditionally employ chemical engineers, including the industries that process materials, chemicals, foods, energy, fuels, and semiconductors.

**Objectives.** We educate students in the fundamentals of chemical and biochemical engineering, balanced with the application of these principles to practical problems; educate students as independent, critical thinkers who can also function effectively in a team; prepare students with a sense of community, ethical responsibility, and professionalism; prepare students for careers in industry, government, and academia; teach students the necessity for continuing education and self learning; and foster proficiency in written and oral communications.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Biochemical Engineering major is 162.

### Lower Division Required Courses

	UNITS
Mathematics 21A-21B-21C-21D	16
Mathematics 22A-22B	6
Physics 9A-9B-9C	15
Chemistry 2A, 2B, 2C or Chemistry 2AH, 2BH, 2CH	15
Biological Sciences 2A	5
Chemical Engineering and Materials Science 5, 6, 51, 80	12
English 3 or University Writing Program 1, 1V or 1Y, or Comparative Literature 1, 2, 3, or 4, or Native American Studies 5 (grade of C- or better is required)	4

### Upper Division Required Courses

Chemical Engineering 140, 141, 142, 143, 145A, 145B, 148A, 152A, 152B,

157, 158A, 158C, 161A, 161B, 161C, 161L ..... 60  
 Biological Sciences 102 ..... 3  
 Microbiology 102, 103L ..... 5  
 Chemistry 110A, 128A, 128B, 129A ..... 12  
 Biochemical Engineering electives ..... 9  
 Choose at least one laboratory course from the Laboratory Elective list; additional courses may be chosen from either list. You may receive biochemical engineering elective credit up to a maximum of two units of an internship (192) or independent study (199), or Biotechnology 189L with the approval of a petition, provided that the course is a laboratory-based experimental project, related to the biological and/or biochemical engineering sciences, and you submit a written report that demonstrates proficiency in laboratory skills, techniques, or method. Research does not replace the required lab elective.

*Laboratory elective list:* Biomedical Engineering 161L; Biotechnology 161A, 161B; Food Science and Technology 102B, 104L, 123L; Molecular and Cellular Biology 120L, 160L; Neurobiology, Physiology, and Behavior 101L, 104L; Viticulture and Enology 123L, 124L.  
*Lecture elective list:* Biological Sciences 2B, 2C, 101, 103, 104; Biological Systems Engineering 165; Biomedical Engineering 102, 107, 109, 117, 140, 161A, 162; Biotechnology 160, 188; Chemical Engineering 144, 166, 170; Chemistry 130A, 130B; Food Science and Technology 102A, 104, 123; Microbiology 140, 150; Molecular and Cellular Biology 123; Neurobiology, Physiology, and Behavior 101, 107; Plant Biology 112; Plant Sciences 100A, 152; Statistics 120, 130A, 131A.; Viticulture and Enology 123, 124

Upper Division Composition

Requirement ..... 0 or 4  
 One course from the following (grade of C- or better is required): University Writing Program 102E, 102F, 104A, 104E, 104T or passing the Upper Division Composition Exam.

### Graduate Program in the Department of Chemical Engineering

The Department of Chemical Engineering is home to a top-20 ranked graduate program in Chemical Engineering. We offer a unique environment for graduate studies, we are large enough to boast world-renowned faculty and state-of-the-art research facilities, yet small enough to give every graduate student personal attention.

### The Graduate Program in Chemical Engineering

M.S. and Ph.D.

Ph.D. designated emphases are available as specializations in biotechnology, biophysics, and nuclear science.

<http://chms.engineering.ucdavis.edu>  
 530-752-7952

The Chemical Engineering Graduate Program provides students with a strong grounding in the fundamentals and explores critical applications in a wide range of process systems.

Doctoral students are typically offered competitive 4-year financial offers of fellowships and research/teaching assistantships which include tuition, fees, and a stipend. Financial offers are subject to satisfactory progress towards completion of degree requirements.

Research areas include biochemistry, biomaterials, biotechnology, biomedical engineering, catalysis, colloids and surface science, electrochemical properties and devices, fluid mechanics and rheology,

green engineering and design, interfaces, mathematical modeling, molecular modeling, nanotechnology, polymers, process control, reaction engineering, renewable energy, thermochemistry, thin films, and transport phenomena.

### Courses in Engineering: Chemical and Materials Science (ECM)

Courses in Chemical and Materials Science Engineering (ECM) are listed below; courses in Chemical Engineering (ECH) follow. For Materials Science and Engineering (EMS) courses, see *Engineering: Materials Science and Engineering*, on page 304.

#### 1. Design of Coffee—An Introduction to Chemical Engineering (3)

Lecture—1 hour; laboratory—2 hours; project—1 hour. Non-mathematical introduction to how chemical engineers think, illustrated by elucidation of the process of roasting and brewing coffee. Qualitative overview of the basic principles of engineering analysis and design. Corresponding experiments testing design choices on the sensory qualities of coffee. Not open for credit to Chemical Engineering and Biochemical Engineering majors or students who have completed Chemical and Materials Science 5. GE credit: SciEng | SE, SL, VL.—F, W, S. (F, W, S.)

#### 5. Analysis in Biochemical, Chemical and Materials Engineering (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Mathematics 21A and 21B (concurrently). Analysis of systems of interest to chemical engineers and materials scientists. Applications of differential and integral calculus. Dimensional analysis. GE credit: SciEng | QL, SE, —W. (W.)

#### 6. Computational Methods for Bio/Chemical/Materials Engineers (4)

Lecture/discussion—4 hours. Prerequisite: Mathematics 21C. Programming methods for solving problems in chemical, biochemical and materials engineering using MATLAB. Programming styles, data structures, working with lists, functions and rules. Applications drawn from material balances, statistics, numerical methods, and bioinformatics. GE credit: SciEng | QL, SE, —S. (S.)

#### 90X. Honors Discussion Section (1)

Discussion—1 hour. Prerequisite: open only to students enrolled in the Chemical Engineering or Biochemical Engineering Honors programs.

Examination of special topics covered in selected lower-division courses through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. May be repeated for credit when topic differs. Offered irregularly.—W, S. (W, S.)

#### 94H. Honors Seminar (1)

Seminar—1 hour. Prerequisite: open only to students enrolled in the Chemical Engineering or Biochemical Engineering Honors programs. Examination of selected current topics in chemical or biochemical engineering through readings, discussions, collaborative work or special activities which may include projects, laboratory experiences or computer simulations. Offered irregularly.—F. (F.)

### Upper Division

#### 189A. Special Topics in ECM; Fluid Mechanics (1-5)

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Fluid Mechanics. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE, —F, W, S. (F, W, S.)

#### 189B. Special Topics in ECM; Nonlinear Analysis and Numerical Methods (1-5)

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Nonlinear Analysis and Numerical Methods. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE, —F, W, S. (F, W, S.)

**189C. Special Topics in ECM; Process Control (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Process Control. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189D. Special Topics in ECM; Chemistry of Catalytic Processes (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Chemistry of Catalytic Processes. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189E. Special Topics in ECM; Biotechnology (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Biotechnology. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189F. Special Topics in ECM; Interfacial Engineering (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Interfacial Engineering. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189G. Special Topics in ECM; Thermodynamics (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Thermodynamics. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189H. Special Topics in ECM; Membrane Separations (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Membrane Separations. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189I. Special Topics in ECM; Novel Experimental Methods (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Novel Experimental Methods. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189J. Special Topics in ECM; Transport Phenomena (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Transport Phenomena. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189K. Special Topics in ECM; Biomolecular Engineering (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Biomolecular Engineering. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189L. Special Topics in ECM; Electronic Materials (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Electronic Materials. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189M. Special Topics in ECM; Ceramics and Minerals (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Ceramics and Minerals. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189N. Special Topics in ECM; Physics and Chemistry of Materials (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Physics and Chemistry of Materials. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189O. Special Topics in ECM; Materials Processing (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Materials Processing. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189P. Special Topics in ECM; Materials Science and Forensics (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Materials Science and Forensics. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189Q. Special Topics in ECM; Biomaterials (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Biomaterials. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189R. Special Topics in ECM; Surface Chemistry of Metal Oxides (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics; Surface Chemistry of Metal Oxides. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**190X. Honors Discussion Section (1)**

Discussion—1 hour. Prerequisite: open only to students enrolled in the Chemical Engineering or Biochemical Engineering Honors programs.

Examination of special topics covered in selected upper division courses through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. May be repeated for credit when topic differs. Offered irregularly.—F, W, S. (F, W, S.)

**194HA. Special Study for Honors Students (2)**

Independent study—6 hours. Open only to students enrolled in the Chemical Engineering or Biochemical Engineering Honors programs. Guided independent study of a selected topic in Chemical Engineering or Biochemical Engineering. Preparation for course 194HB. Offered irregularly. GE credit:

SciEng | SE.—F, W, S. (F, W, S.)

**194HB. Special Study for Honors Students (1-5)**

Independent study—3 hours. Prerequisite: course 194HA. Open only to students enrolled in the Chemical Engineering or Biochemical Engineering Honors programs. Guided independent study of a selected topic in Chemical Engineering or Biochemical Engineering. Preparation for course 194HC. May be repeated for credit. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**194HC. Special Study for Honors Students (1-5)**

Prerequisite: course 194HB. Open only to students enrolled in the Chemical Engineering or Biochemical Engineering Honors programs. Guided independent study of a selected topic in Chemical Engineering or Biochemical Engineering leading to the presentation of an honors project or thesis, under the supervision of a faculty adviser. Offered irregularly. GE credit: SciEng | QL, SE.—F, W, S. (F, W, S.)

**Graduate****229. Computational Molecular Modeling (4)**

Lecture—3 hours; project—1 hour. Prerequisite: familiar with basic programming in either Fortran or C; prior experience with numerical methods and analysis; consent of instructor. Theory and hands-on implementation of algorithms in computational statistical mechanics. Temporal integrators, molecular dynamics, ab-initio methods, force fields, constrained dynamics, Monte Carlo techniques, fluctuation-dissipation theorem, and parallel vs. serial computing. Offered irregularly.—S. (S.)

**261. Molecular Modelling of Soft and Biological Matter (4)**

Lecture/discussion—4 hours. Prerequisite: Materials Science and Engineering 247 or Engineering: Chemical 252 or equivalent course in advanced thermodynamics/statistical mechanics. Modern molecular simulation techniques with a focus on soft matter like polymers, biologically relevant systems, and glasses. Offered irregularly.—W. (W.) Faller

**268. Process Monitoring and Data Analysis (3)**

Lecture—3 hours. Prerequisite: senior or graduate standing in engineering or physical sciences or consent of instructor. Analytical approaches to the proper management of experimental and process system data, ranging from univariate and multivariate statistical methods to neural networks, wavelets and Markov models. Offered irregularly.—S. (S.)

**280. Seminar in Ethics for Scientists (2)**

Seminar—2 hours. Restricted to 20 students; graduate standing in any department of science or engineering. Studies of topical and historical issues in the ethics of science, possibly including issues such as proper authorship, peer review, fraud, plagiarism, responsible collaboration, and conflict of interest. (Same course as Chemistry 280 and Physics 280.) (S/U grading only.) Offered irregularly.—S. (S.)

**281. Green Engineering: Theory and Practice (3)**

Lecture/discussion—3 hours. Prerequisite: graduate standing in Engineering or consent of instructor. Methods of evaluating alternative technologies, processes, materials, chemicals, and/or products relative to pollution, waste, toxic substance use, and sustainability. Topics include environmental regulations, recycling, life-cycle assessment, economic analysis, design for the environment, green chemistry and toxicology. Offered irregularly.—W. (W.)

**290. Chemical Engineering & Materials Science Seminar (1)**

Seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Selected topics of current interest in Chemical Engineering and Materials Science Engineering. The subjects covered will vary from year to year and will be announced at the beginning of each quarter. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**Courses in Engineering: Chemical (ECH)****Lower Division****51. Material Balances (4)**

Lecture—4 hours. Prerequisite: Mathematics 21D with C- or better, and Mathematics 22A or concurrent. Application of the principle of conservation of mass to single and multicomponent systems in chemical process calculations. Studies of batch, semi-batch, and continuous processes involving mass transfer, change of phase, stoichiometry and chemical reaction. Not open for credit to students who have completed course 151. GE credit: SciEng | SE.—W. (F)

**80. Chemical Engineering Profession (1)**

Lecture/discussion—1 hours. Professional opportunities and professional responsibilities of chemical engineers. Opportunities and needs for post-baccalaureate education. Relationship of chemical engineering to contemporary issues. GE credit: SciEng or SocSci | SE or SS.—F. (F.)

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor and lower division standing. Directed group study. (P/NP grading only.) Offered irregularly. GE credit: SE.—F, W, S. (F, W, S.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) Special study for undergraduates. Offered irregularly. GE credit: SE.—F, W, S. (F, W, S.)

**Upper Division****140. Mathematical Methods in Biochemical and Chemical Engineering (4)**

Lecture/discussion—3 hours; laboratory—1 hour. Prerequisite: Mathematics 22B; and Chemical and Materials Science 6 or Engineering 6 or equivalent. Mathematical methods for solving problems in chemical and biochemical engineering, with emphasis on transport phenomena. Fourier series and separation of variables. Sturm-Liouville eigenvalue problems. Similarity transformations. Tensor analysis. Finite difference methods for solving time-dependent diffusion problems. Not open for credit to students who have completed course 159. GE credit: SciEng | SE. —F. (F.)

**141. Fluid Mechanics for Biochemical and Chemical Engineers (4)**

Lecture/discussion—4 hours. Prerequisite: course 140 and course 51 or concurrent. Principles and applications of fluid mechanics in chemical and biochemical engineering. Hydrostatics. The stress tensor and Newton's law of viscosity. Not open for credit to students who have completed course 150B. GE credit: SciEng | QL, SE. —W. (W.)

**142. Heat Transfer for Biochemical and Chemical Engineers (4)**

Lecture/discussion—4 hours. Prerequisite: course 51 with a C- or better, course 141. Conduction, convection, and radiation of thermal energy in applications to chemical and biochemical engineering. Derivation of thermal and mechanical energy equations. Thermal boundary layers. Macroscopic balances. Applications: heat transfer in tubes, channels, and integrated circuits, and analysis of heat exchangers. Not open for credit to students who have completed course 153. GE credit: SciEng | QL, SE. —S. (S.)

**143. Mass Transfer for Biochemical and Chemical Engineers (4)**
