Lecture/discussion—4 hours. Prerequisite: course 51 with a C- or better, course 141. Derivation of species conservation equations describing convective and diffusive mass transfer. Fick's law and the Stefan-Maxwell constitutive equations. Mass transfer coefficients. Multicomponent mass transfer across gas/liquid interfaces. Applications include drying, heterogeneous chemical reactions, and membrane separations. GE credit: SciEng | SE. —S. (S.)

**144. Rheology and Polymer Processing (3)**

Lecture/Discussion—3 hours. Prerequisite: course 141. Deformation in steady shear, unsteady shear, and elongational flows. Linear and non-linear viscoelastic constitutive models. The principle of material indifference and admissibility of constitutive equations. Introduction to the unit operations of polymer processing. Not open for credit to students who have completed course 150C. Offered irregularly. GE credit: SciEng | SE. —S. (S.)

**145A. Chemical Engineering Thermodynamics Laboratory (3)**

Laboratory—2 hours; discussion—1 hour; extensive writing. Prerequisite: course 152A, course 152B (may be taken concurrently). Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, & Biochemical Engineering. Laboratory experiments in chemical engineering thermodynamics. GE credit: SciEng | SE, WE. —W. (W.)

**145B. Chemical Engineering Transport Lab (3)**

Laboratory—2 hours; discussion—1 hour; extensive writing. Prerequisite: courses 141 and 145A. Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, & Biochemical Engineering. Laboratory experiments in chemical engineering transport phenomena. GE credit: SciEng | SE, WE. —S. (S.)

**148A. Chemical Kinetics and Reaction Engineering (3)**

Lecture—3 hours. Prerequisite: course 143; course 152B. Ideal chemical reactors. Rate laws and stoichiometry. Design and analysis of isothermal reac-

tors with multiple reactions. Not open for credit to students who have taken course 146. GE credit: SciEng | SE. —F. (F.)

**148B. Chemical Kinetics and Reaction Engineering (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 148A. Design and analysis of non-isothermal reactors. Reactions in packed beds with pressure drop. Adsorption and heterogeneous catalysis. Transport limitations. Not open for credit to students who have taken course 146. GE credit: SciEng | SE. —W. (W.)

**152A. Chemical Engineering Thermodynamics (3)**

Lecture—3 hours. Prerequisite: Chemical and Materials Science Engineering 6 or concurrent enrollment. Application of principles of thermodynamics to chemical processes. Not open for credit to students who have completed Engineering 105 or 105A. GE credit: SciEng | SE. —F. (F.)

**152B. Chemical Engineering Thermodynamics (4)**

Lecture/discussion—4 hour. Prerequisite: course 152A. Continuation of course 152A. Not open for credit to students who have completed Engineering 105. GE credit: SciEng | SE. —W. (W.)

**155. Chemical Engineering Kinetics and Reactor Design Laboratory (4)**

Laboratory—6 hours; discussion—1 hour; term paper. Prerequisite: courses 145B, 148A; (course 148B and 157) may be taken concurrently; satisfaction of the upper division English composition requirement. Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, and Biochemical Engineering. Laboratory experiments in chemical kinetics, reactor design and process control. Not open for credit to students who have taken course 155B. GE credit: SciEng | SE, OL, VL, WE. —W, S. (W, S.)

**155A. Chemical Engineering Laboratory (4)**

Laboratory—6 hours; discussion—1 hour; term paper. Prerequisite: courses 141, 142, and 143 (may be taken concurrently); satisfaction of the upper division English composition requirement. Open only to majors in Chemical Engineering, Chemical Engineering/Materials Science, Biochemical Engineering, Biomedical Engineering, and Biological Systems Engineering. Laboratory experiments in transport phenomena, chemical kinetics, and thermodynamics. GE credit: SciEng | Wrt | OL, QL, SE, VL, WE.

**155B. Chemical Engineering Laboratory (4)**

Laboratory—6 hours; discussion—1 hour; extensive writing—1 hour. Prerequisite: courses 143 (may be taken concurrently), 155A; satisfaction of the upper division English composition requirement. Open only to majors in Chemical Engineering, Chemical Engineering/Materials Science, Biochemical Engineering, Biomedical Engineering, Food Engineering, and Biosystems Engineering. Continuation of course 155A. Laboratory experiments in transport phenomena, chemical kinetics, and thermodynamics. GE credit: SciEng, Wrt | QL, SE, VL, WE.

**157. Process Dynamics and Control (4)**

Lecture/discussion—4 hours. Prerequisite: course 140. Fundamentals of dynamics and modeling of chemical processes. Design and analysis of feedback control of chemical processes. GE credit: SciEng | QL, SE. —F. (F.)

**158A. Process Economics and Green Design (4)**

Lecture/discussion—4 hours. Prerequisite: courses 142; 143. Senior design experience in process and product creation and design with multiple realistic constraints. Cost accounting and capital investment estimation. Profitability analysis techniques. Green chemistry, health risk assessment and life cycle assessment concepts. GE credit: SciEng or SocSci | SE or SS, SL, VL, WE. —F. (F.)

**158B. Separations and Unit Operations (4)**

Lecture—4 hours. Prerequisite: course 158A. Senior design experience with multiple realistic constraints. Heuristic and rigorous design of chemical process equipment. Separation by filtration, distillation and extraction. Synthesis of reactor and separation networks, heat and power integration. GE credit: SciEng | QL, SE. —W. (W.)

**158C. Plant Design Project (4)**

Laboratory/discussion—2 hours; project—2 hours. Prerequisite: course 158B or 161C. Senior design experience for chemical and biochemical processes. Impact of multiple realistic constraints. Design, costing and profitability analysis of complete plants. Use of computer-aided design techniques. GE credit: SciEng | OL, QL, SE, SL, VL, WE. —S. (S.)

**160. Fundamentals of Biomanufacturing (3)**

Lecture—3 hours. Prerequisite: Microbiology 102, Biological Sciences 102 or Animal Biology 102. Principles of large scale bioreactor production of metabolites, enzymes, and recombinant proteins including the development of strains/cell lines, fermentor/bioreactor design, monitoring and operation, product recovery and purification, and biomanufacturing economics. Not open for credit to students who have completed course 161C or both 161A and 161B; only two units of credit to students who have completed either course 161A or 161B. Offered irregularly. GE credit: SciEng | QL, SE, VL.

**161A. Biochemical Engineering Fundamentals (4)**

Lecture/discussion—4 hours. Prerequisite: course 148A. Biokinetics; bioreactor design and operation; transport phenomena in bioreactors; microbial, plant, and animal cell cultures. GE credit: SciEng | QL, SE, VL. —W. (W.)

**161B. Bioseparations (4)**

Lecture/discussion—4 hours. Prerequisite: course 143. Product recovery and purification of biochemicals. Cell disruption, centrifugation, filtration, membrane separations, extraction, and chromatographic separation. GE credit: SciEng | QL, SE. —W. (W.)

**161C. Biotechnology Facility Design and Regulatory Compliance (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 161A (co-requisite) and course 161B (co-requisite), or Molecular & Cellular Biology 263 (co-requisite). Design of biotechnology manufacturing facilities. Fermentation and purification equipment, and utility systems. Introduction to current good manufacturing practices, regulatory compliance, and documentation. GE credit: SciEng or SocSci | QL, SE or SS, SL, VL. —W. (W.)

**161L. Bioprocess Engineering Laboratory (4)**

Laboratory—9 hours; discussion—1 hour; term paper. Prerequisite: course 161A and 161B, or Viticulture and Enology 186, or Biological Sciences 103 and Molecular and Cellular Biology 120L. Pass One restricted to chemical/biochemical engineering majors. Laboratory experiments in the operation and analysis of bioreactors; determination of oxygen mass transfer coefficients in bioreactors and ion exchange chromatography. GE credit: SciEng, Wrt | QL, SE, VL, WE. —S. (S.)

**166. Catalysis (3)**

Lecture—3 hours. Prerequisite: course 148A; consent of instructor. Principles of catalysis based on an integration of principles of physical, organic, and inorganic chemistry and chemical kinetics and chemical reaction engineering. Catalysis in solution; catalysis by enzymes; catalysis in swellable polymers; catalysis in microscopic cages (zeolites); catalysis on surfaces. Offered irregularly. GE credit: SciEng | SE. —S. (S.)

**170. Introduction to Colloid and Surface Phenomena (3)**

Lecture—3 hours. Prerequisite: Chemistry 110A. Introduction to the behavior of surfaces and disperse systems. Fundamentals will be applied to the solution of practical problems in colloid science. Course

should be of value to engineers, chemists, biologists, soil scientists, and related disciplines. Offered irregularly. GE credit: SciEng | SE. —S. (S.)

### **190C. Research Group Conferences (1)**

Discussion—1 hour. Prerequisite: upper division standing in Chemical Engineering; consent of instructor. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

### **190X. Upper Division Seminar (1)**

Seminar—1 hour. Prerequisite: upper division standing. In-depth examination of a special topic in a small group setting. Offered irregularly.—F, W, S. (F, W, S.)

### **192. Internship in Chemical or Biochemical Engineering (1-5)**

Internship—3-15 hours. Prerequisite: completion of a minimum of 84 units; project approval before period of internship, consent of instructor. Supervised work experience in Chemical or Biochemical. May be repeated for credit when project differs. (P/NP grading only.) Offered irregularly. GE credit: SE.—F, W, S. (F, W, Su.)

### **198. Group Study (1-5)**

Prerequisite: consent of instructor. Group study. (P/NP grading only.) Offered irregularly. GE credit: SE.—F, W, S. (F, W, S.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

## **Graduate**

### **206. Biochemical Engineering (3)**

Lecture—3 hours. Prerequisite: Microbiology 102 and 102L, Biological Sciences 101, 102, 103, Molecular and Cellular Biology 120L, 200A; Food Science and Technology 205 recommended; or consent of instructor. Interaction of chemical engineering, biochemistry, and microbiology. Mathematical representations of microbial systems. Kinetics of growth, death, and metabolism. Continuous fermentation, agitation, mass transfer and scale-up in fermentation systems, product recovery, enzyme technology. Offered irregularly.—W. (W.)

### **226. Enzyme Engineering (3)**

Lecture—3 hours. Prerequisite: Microbiology 102 and 102L, Biological Sciences 102, 103, Molecular and Cellular Biology 122, 120L, 200A; or consent of instructor. Application of basic biochemical and engineering principles of practical enzymatic processes. Lectures cover large scale production and separation of enzymes, immobilized enzyme systems, enzyme reactor design and optimization, and new application of enzymes in genetic engineering related biotechnology. Offered irregularly.—W. (W.)

### **245. Micro- and Nano-Technology in Life Sciences (4)**

Lecture/discussion—4 hours. Prerequisite: graduate standing or consent of instructor. Survey of biomedical device design from the engineering and biological perspectives; micro-/nano-fabrication and characterization techniques; surface chemistry and mass transfer; essential biological processes and models; proposal development skills to merge aforementioned themes in a multidisciplinary project. (Same course as Electrical and Computer Engineering 245 and Materials Science and Engineering 245.)—S. (S.) Seker

### **246. Advanced Biochemical Engineering (2)**

Lecture—2 hours. Prerequisite: course 206 or consent of instructor. Advances in the field of biotechnology including genetic engineering, enzyme engineering, fermentation science, and renewable resources development. The important results of original research will be evaluated for understanding of the fundamental principles and for potential practical application. Offered irregularly.—W. (W.)

### **252. Statistical Thermodynamics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 152B, Engineering 105B, or the equivalent. A treatment of the statistical basis of thermodynam-

ics; introduction to statistical mechanics; discussion of the laws of thermodynamics; application of thermodynamic relationships to phase and chemical reaction equilibrium; introduction to molecular simulations and the evaluation of thermodynamic properties from molecular simulations.—F. (F.)

### **253A. Advanced Fluid Mechanics (4)**

Lecture—4 hours. Prerequisite: courses 141 and 259. Kinematics and basic principles of fluid flow. Principles of constitutive equations. Navier-Stokes equations for Newtonian fluids. Survey of rectilinear creeping flow, lubrication flow and boundary layer theory.—F. (F.)

### **253B. Advanced Heat Transport (4)**

Lecture—4 hours. Prerequisite: courses 142 and 259 or the equivalent. Fundamental energy postulates and derivation of microscopic and macroscopic energy equations. Mechanisms of conduction. Isotropic, thermoelastic and anisotropic materials solution problems using Greens functions and perturbation theory.—W. (W.)

### **253C. Advanced Mass Transfer (4)**

Lecture—4 hours. Prerequisite: course 253A or the equivalent. Kinematics and basic conservation principles for multicomponent systems. Constitutive equations for momentum, heat and mass transfer, applications to binary and ternary systems. Details of diffusion with reaction, and the effects of concentration.—F. (F.)

### **254. Colloid and Surface Phenomena (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing in science or engineering or consent of instructor. Thermodynamics and rate processes at interfaces. These fundamental processes will be applied to determine the collective properties of thin films and membranes, self-assembled systems, liquid crystals and colloidal systems. Experimental techniques in surface analysis.—S. (S.)

### **256. Chemical Kinetics and Reaction Engineering (4)**

Lecture—4 hours. Prerequisite: courses 146 or the equivalent. Analysis of the performance of chemical reactors and design of chemical reactors based on the principles of chemical kinetics and transport phenomena. Consideration of noncatalytic/catalytic reactions in single fluid phases and emphasis on reactions in multiphase mixtures, especially gas-solid reactors.—W. (W.)

### **259. Advanced Engineering Mathematics (4)**

Lecture—4 hours. Prerequisite: Mathematics 21D, 22A, 22B. Applications of methods of applied mathematics to the analytical and numerical solution of linear and nonlinear ordinary and partial differential equations arising in the study of transport phenomena.—F. (F.)

### **262. Transport Phenomena in Multiphase Systems (3)**

Lecture/discussion—3 hours. Prerequisite: course 253C. Heat, mass and momentum transfer in multiphase, multicomponent systems with special emphasis on transport processes in porous media. Derivation of the averaging theorem and application of the method of volume averaging to multicomponent, reacting systems. Offered irregularly.—S. (S.)

### **263. Rheology and Mechanics of Non-Newtonian Fluids (3)**

Lecture—3 hours. Prerequisite: courses 253A and 259 or consent of instructor. Mechanics of polymer solutions and suspension, especially the development of properly invariant constitutive equations. Topics include: viscometry, linear and nonlinear viscoelasticity, continuum mechanics, kinetic theory. Offered irregularly.—W. (W.) Powell

### **265. Emulsions, Microemulsions and Bilayers (3)**

Lecture—3 hours. Prerequisite: an undergraduate course in physical chemistry. Thermodynamic and mechanical descriptions of surfactant-laden interfaces. Forces between and within interfaces. Physics

of micelle and microemulsion formation. Structure and stability of emulsions. Properties of phospholipid bilayers, with emphasis on vesicles.—W. (W.)

### **267. Advanced Process Control (3)**

Lecture—3 hours. Prerequisite: course 157 or the equivalent. Advanced course in analysis and synthesis of linear multivariable systems. Emphasis on frequency domain techniques and applications to chemical processes. Topics include singular value analysis, internal model control, robust controller design methods as well as self-tuning control techniques. Offered irregularly.—S. (S.)

### **289A. Special Topics in Chemical Engineering; Fluid Mechanics (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics in Fluid Mechanics. May be repeated for credit when topic differs. Offered irregularly.—F, W, S. (F, W, S.)

### **289B. Special Topics in Chemical Engineering; Nonlinear Analysis and Numerical Methods (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics in Nonlinear Analysis and Numerical Methods. May be repeated for credit when topic differs. Offered irregularly.—F, W, S. (F, W, S.)

### **289C. Special Topics in Chemical Engineering; Process Control (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics in Process Control. May be repeated for credit when topic differs. Offered irregularly.—F, W, S. (F, W, S.)

### **289D. Special Topics in Chemical Engineering; Chemistry of Catalytic Processes (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics in Chemistry of Catalytic Processes. May be repeated for credit when topic differs. Offered irregularly.—F, W, S. (F, W, S.)

### **289E. Special Topics in Chemical Engineering; Biotechnology (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics in Biotechnology. May be repeated for credit when topic differs. Offered irregularly.—F, W, S. (F, W, S.)

### **289F. Special Topics in Chemical Engineering; Interfacial Engineering (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics in Interfacial Engineering. May be repeated for credit when topic differs. Offered irregularly.—F, W, S. (F, W, S.)

### **289G. Special Topics in Chemical Engineering; Molecular Thermodynamics (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics in Molecular Thermodynamics. May be repeated for credit when topic differs. Offered irregularly.—F, W, S. (F, W, S.)

### **289H. Special Topics in Chemical Engineering; Membrane Separations (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics in Membrane Separations. May be repeated for credit when topic differs. Offered irregularly.—F, W, S. (F, W, S.)

### **289I. Special Topics in Chemical Engineering; Advanced Materials Processing (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics in Advanced Materials Processing. May be repeated for credit when topic differs. Offered irregularly.—F, W, S. (F, W, S.)

### **289J. Special Topics in Chemical Engineering; Novel Experimental Methods (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics in Novel Experimental Methods. May be repeated for credit when topic differs. Offered irregularly.—F, W, S. (F, W, S.)

### **289K. Special Topics in Chemical Engineering; Advanced Transport Phenomena (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics in Advanced Transport Phenomena. May be repeated for credit when topic differs. Offered irregularly.—F, W, S. (F, W, S.)

### **289L. Special Topics in Chemical Engineering; Biomolecular Engineering (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Special topics in Biomolecular Engineering. May be repeated for credit when topic differs. Offered irregularly.—F, W, S. (F, W, S.)

### **290. Seminar (1)**

Seminar—1 hour. Seminar. (S/U grading only.) Offered irregularly.—F, W, S. (F, W, S.)

### **290C. Graduate Research Group Conference (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Research problems, progress and techniques in chemical engineering. May be repeated for credit. (S/U grading only.) Offered irregularly.—F, W, S. (F, W, S.)

### **294. Current Progress in Biotechnology (1)**

Seminar—1 hour. Prerequisite: graduate standing. Seminars presented by guest lecturers on subjects of their own research activities. May be repeated for credit. (Same course as Molecular and Cellular Biology 294.) (S/U grading only.) Offered irregularly.—F, W, S. (F, W, S.)

### **298. Group Study (1-5)**

Prerequisite: consent of instructor. Group study. (S/U grading only.) Offered irregularly.—F, W, S. (F, W, S.)

### **299. Research (1-12)**

Research. (S/U grading only.) Offered irregularly.—F, W, S. (F, W, S.)

## **Professional**

### **390. Teaching of Chemical Engineering (1)**

Discussion—1 hour. Prerequisite: qualifications and acceptance as teaching assistant and/or associate-in in chemical engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated two times for credit. (S/U grading only.)—F, W, S. (F, W, S.)

Brian H. Maroney, D.Engr., Adjunct Assistant Professor

Professor

## **The Civil and Environmental Engineering Programs**

**Mission.** The Department of Civil and Environmental Engineering integrates research, education, and professional service in areas related to civil infrastructure and the environment. We provide the profession and academia with outstanding graduates who advance both engineering practice and fundamental knowledge.

**Program Educational Objectives.** The objectives of the Civil Engineering undergraduate program at the University of California, Davis are to produce civil and environmental engineers who (1) are proficient in the fundamentals of engineering science, analytical and quantitative reasoning, and design in the context of civil and environmental engineering, (2) are able to apply these skills in developing safe, sustainable, economical and environmentally sound solutions to civil engineering problems either within the profession or through post-graduate research, (3) grow professionally in their careers through continued development of technical and management skills, achievement of profes-

sional licensure, and assumption of roles of responsibility in professional service, and (4) understand the needs and represent the diversity of the program's constituencies\*, thereby serving the needs of society and the profession.

\*The constituency of the CEE program includes our students and those organizations or employers that they might join during career paths spanning professional practice, education, and research. Specifically, these constituents may include consulting firms and organizations, state and federal agencies or laboratories, universities, cities and counties, contractors, civil-product manufacturers and suppliers, and environmental organizations.

**Study Abroad and Civil Engineering.** The department offers courses in locations such as Ireland, Italy, and Japan through the Summer Abroad Program. Students may also complete a portion of the civil engineering program at an international institution, such as the University of Edinburgh, by participating in an Education Abroad Program. The department encourages interested students to participate in both Summer Abroad and Education Abroad Programs. Please consult with the undergraduate staff adviser in the department for more information. Often students are in their junior or senior year of study when they participate in this option.

## **Civil Engineering Undergraduate Program**

The Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET; see <http://www.abet.org>.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed. Exclusive of General Education units, the minimum number of units required for the Civil Engineering major is 152 (77 units in lower division and 75 units in upper division).

## **Lower Division Required Courses**

UNITS

Mathematics 21A-21B-21C-21D ..... 16

Mathematics 22A-22B ..... 6

Physics 9A-9B-9C and choice of Physics 9D,

Chemistry 2C, Biological Science 2A or

Geology 50-50L ..... 19

Chemistry 2A-2B or 2AH-2BH ..... 10

Civil and Environmental Engineering 3,

16 ..... 6

(Civil and Environmental Engineering 3 is designed for lower division students and is not open to upper-division students.

Students who do not take this course will substitute four units of additional upper-division Civil and Environmental Engineering coursework.)

One course from: Civil and Environmental Engineering 19, Engineering 6, or Computer

Science Engineering 30 ..... 4

Engineering 35, 45 or 45Y ..... 8

English 3 or University Writing Program 1,

1V, or 1Y, or Comparative Literature 1, 2, 3,

or 4, or Native American Studies 5 (grade of C- or better) ..... 4

Communication 1 or 3 ..... 4

## **Upper Division Requirements:**

**Environmental Engineering.** This area focuses on understanding and management of physical, chemical, and biological processes in natural and engineered systems. Areas of emphasis include improvement of air, land, and water quality in the face of increasing population, expanding industrialization, and global climate change. Examples of environmental engineering include innovative analysis and design of air, water, wastewater, and solid waste treatment systems; mathematical modeling of natural and engineered systems; life cycle analysis; sampling, analysis, transport and transformation of natural and anthropogenic pollutants; and modeling of air pollutant emissions.

**Suggested Advisers.** C.E. Bronner, C. D. Cappa, J.L. Darby, A. Kendall, M.J. Kleeman, F. J. Loge, J.R. Lund, M.P. Modera, D.A. Niemeier, S.G. Schladow, T.M. Young

**Geotechnical Engineering.** This area deals with civil infrastructure and environmental problems that require quantifying the behavior of geologic materials (such as soils and rocks). Examples of geotechnical engineering problems include foundations for buildings and bridges, earthwork (such as dams, tunnels, highways), earthquake hazards (such as ground motions, liquefaction, soil-structure interaction), and geo-environmental problems (ground water flow, subsurface contaminant transport and remediation).

**Suggested Advisers.** R.W. Boulanger, Y.F. Dafalias, J.T. DeJong, J.T. Harvey, B. Jeremic, B.L. Kutter, P.C. Lucia

### Structural Engineering and Structural Mechanics

**Structural Engineering and Structural Mechanics.** Structural Engineering addresses the conception, sustainable design, analysis, construction, and life-cycle modeling of all types of civil infrastructure, including buildings, bridges, dams, ports, highways, and industrial facilities subject to sources of loadings ranging from gravity, to earthquakes, to extreme environmental events. Structural Mechanics encompasses the theory of solid structures, and the associated methods of analysis and computation used in the practice of Structural Engineering. For both disciplines, materials of particular interest include steel, reinforced concrete, timber, advanced composites and particulate media.

**Suggested Advisers.** J.E. Bolander, Y.K. Chai, L. Cheng, Y.F. Dafalias, J.T. Harvey, A.M. Kanvinde, S.K. Kunnath, B.H. Maroney, S.A. Miller, M.M. Rashid, N. Sukumar

### Transportation Planning and Engineering.

This area deals with the movement of people and goods in a manner consistent with society's environmental and socio-economic goals. Transportation engineering applies engineering, physical and mathematical sciences, economics, and behavioral social science principles to plan, analyze, design, and operate resilient and sustainable transportation systems, such as highways, transit, airfields and ports. Transportation planning involves the formulation and analysis of transportation policy, program, and project alternatives in consideration of societal goals, budgetary constraints, socio-economic (such as safety, equity and mobility) and environmental objectives (such as air and water quality, climate change, and clean energy), and technological feasibilities (such as vehicle, infrastructure, and information technologies).

**Suggested Advisers.** Y. Fan, J.T. Harvey, M.A. Jaller, A. Kendall, M.P. Modera, D.A. Niemeier, D. Sperling, H.M. Zhang

**Water Resources Engineering.** This area includes hydrology, hydraulics, fluid mechanics, and water resources systems planning and design. Hydrology deals with quantifying and understanding all aspects of the hydrologic cycle, including the relationships between precipitation, runoff, groundwater, and surface water. Water quality and contaminant transport issues are linked to hydrologic conditions. Hydraulics and fluid mechanics deal with flows in pipes, open-channel water-distribution systems, and natural systems, such as lakes and estuaries. Water resources systems planning and design deals with the comprehensive development of water resources to meet the multiple needs of industry, agriculture, municipalities, recreation, and other activities.

**Suggested Advisers.** F.A. Bombardelli, J.L. Darby, A.L. Forrest, J.D. Herman, M.L. Kavvas, J.R. Lund, S.G. Schladow, B.A. Younis

Additional information on areas of specialization and potential faculty advisers can be obtained from the departmental website.

## Civil Engineering

### Upper Division Required Courses

Engineering 103, 104, 104L, 106.....	12
Engineering 102 or 105.....	4
Civil and Environmental Engineering 114, 190.....	6
One course from Civil and Environmental Engineering 115, 153; Mathematics 118A; or Statistics 108 .....	4

<i>Civil &amp; Environmental Engineering Breadth</i> Select one course from four of the following group options: .....	14-17
---	-------

<i>Environment:</i> Civil and Environmental Engineering 140 or 148A or 149	
<i>Geotechnical:</i> Both Civil and Environmental Engineering 171 and 171 Lab	
<i>Structures:</i> Civil and Environmental Engineering 130	
<i>Transportation:</i> Civil and Environmental Engineering 161 or 163 or 165	
<i>Water Resources:</i> Both Civil and Environmental Engineering 141 and 141 Lab	

<i>Civil &amp; Environmental Engineering Depth</i> Select two courses from two of the following group options: .....	15-16
---	-------

<i>Environment:</i> Civil and Environmental Engineering 140, 148B, 150	
<i>Geotechnical:</i> Civil and Environmental Engineering 173, 175, 179	
<i>Structures:</i> Civil and Environmental Engineering 131, 132, 135, 136	
<i>Transportation:</i> Civil and Environmental Engineering 161, 162, 179	
<i>Water Resources:</i> Civil and Environmental Engineering 142, 144, 145, 146	
<i>Senior Design Requirement:</i> Must complete at least two of the following courses as part of the Civil & Environmental Engineering depth and elective: Civil & Environmental Engineering 127, 136, 145, 148B, 150, 162, or 173	
<i>Civil &amp; Environmental Engineering electives</i> .....	20
Civil & Environmental Engineering electives may include any upper division, letter-graded Civil & Environmental Engineering course not already used towards another degree requirement, Engineering 102 or 105, and may include, but not exceed, a combination of six units from Civil & Environmental Engineering 198 and 199.**	

<i>Upper Division Composition Requirement</i> .....	0-4
One course from the following (grade of C- or better is required): University Writing Program 101, 102E, 102G, 104A, 104E, 104T or passing the Upper Division Composition Exam.	

\* No unit of coursework may be used to satisfy two different degree requirements, i.e. although a course may be listed in more than one category, that course may only satisfy one requirement.  
 \*\* A maximum of 4 units of upper-division courses outside of Civil & Environmental Engineering may be considered on a petition basis. Please consult with the undergraduate staff adviser.

### Construction Engineering and Management Minor

To declare this minor program offered by the Department of Civil and Environmental Engineering, students must complete ENG 104 with a C- or better and submit a short personal statement focusing on academic and career goals, including relevant internships/experience. The online Minor Declaration form is available via the Online Advising Student Information System (OASIS) at <https://students.ucdavis.edu/>. Minimum overall UC GPA at time of declaration: 2.500.

All prerequisites must have been taken for a letter grade; no grade lower than a C- will be accepted in any prerequisite course.

Successful completion and transcript notation of the minor requires both a minimum overall UC GPA of 2.000 and a minimum 2.000 GPA for the coursework completed for the minor, with no grade lower than a C- for any course used for the minor.

### Minor Requirements:

Prerequisite courses must be completed prior to enrollment in coursework taken for minor.

UNITS

### Construction Engineering and Management ..... 24

Civil and Environmental Engineering 137, 143, 153 .....	12
---	----

Twelve units from:

Civil and Environmental Engineering 179, Agricultural and Resource Economics 112, 155, 157, 171A, 171B, Economics 134, 162; Environmental Science and Policy 161; may include one course from Agricultural and Resource Economics 18, Management 11A.....	12
---	----

**Minor advisers.** J.L. Darby, J.T. Harvey, J.R. Lund

### Sustainability in the Built Environment Minor

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements with an overall GPA in minor requirement courses of 2.000 or better.

UNITS

### Sustainability in the Built Environment.. 20

Civil and Environmental Engineering 123, 143 .....	8
--	---

Twelve units from:

Civil and Environmental Engineering 125, 126, 127, 128, 148A, 149, 155, 162, 165, Engineering 188, Anthropology 101 (same as Environmental Science & Policy 101), 104N, Agricultural and Resource Economics 175, 176, Atmospheric Science 116, Community and Regional Development 142, 154, 172, Environmental Science and Policy 161, 162, 171, Environmental Toxicology 101, 102A, Geology 130, 134, Landscape Architecture 3, 180*, Plant Sciences 101, 141, 150, 162.....	12
---	----

\* Due to variability in series course offering, consent of minor adviser is required.

**Minor advisers.** F.J. Loge, A. Kendall

### The Graduate Program in Civil and Environmental Engineering

M.S. and Ph.D.; Designated Ph.D. emphasis available in Biotechnology  
<http://cee.engr.ucdavis.edu>  
 530-752-1441

With over thirty faculty members, over \$20 million in annual research expenditures and over 200 graduate students, the Department of Civil and Environmental Engineering integrates research, education and professional service in areas related to civil infrastructure and the environment. Graduate students benefit from close working relationships with professors who are the leading international experts in their field. They are supported in their study and research by robust funding, and they have access to state-of-the-art research centers. For example, the Center for Geotechnical Modeling, <http://cgm.engr.ucdavis.edu>, has the largest centrifuge of its kind in the nation and gives researchers access to their peers at other unique centers via high-speed networks. Since 1960, researchers at the J. Amoroco Hydraulics Laboratory (JAHL) have served the state of California by solving ecological, biological, environmental and hydraulic engineering problems. Students may also have the opportunity to work in one of the many modern environmental engineering

labs or the structural testing facilities in the department. Our graduates go on to serve the profession and academia by advancing the leading edge of fundamental knowledge, as well as engineering practice.

Generous financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid. About 75% of the graduate students in our program are either fully or partially supported.

#### **Research Highlights:**

- Alternative fuel transportation infrastructure
- Earthquake engineering
- Environmental engineering
- Environmental planning and management
- Geotechnical engineering
- Hydraulics and fluid mechanics
- Hydrology
- Structural engineering
- Structural health monitoring
- Structural mechanics
- Systems planning and design
- Transportation engineering
- Transportation planning and design
- Water resources engineering

#### **Research Facilities and Partnerships:**

- Advanced Transportation Infrastructure Research Center
  - Center for Geotechnical Modeling
  - Center for Watershed Sciences
  - Center for Water-Energy Efficiency
  - Institute of Transportation Studies
  - J. Amorocho Hydraulics Laboratory (JAHL)
  - John Muir Institute of the Environment
  - Nano-Engineering and Smart Structures Technologies
  - Tahoe Environmental Research Center
  - Western Cooling Efficiency Center
- Complete Information on our website.

### **Courses in Engineering: Civil and Environmental (ECI)**

#### **Lower Division**

##### **3. Civil Infrastructure and Society (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Mathematics 21A (may be taken concurrently). Pass One restricted to lower division students; Civil Engineering majors. Introduction to civil infrastructure and its relationship with society and the natural environment. Exposure to innovative research on civil engineering and environmental systems. Participation in laboratory experiments illustrative of the solution of representative but simplified engineering problems. Not open for credit to upper division students. GE credit: SciEng or SocSci | OL, SE or SS. —F. (F.) Darby

##### **16. Spatial Data Analysis (2)**

Lecture—1 hour; laboratory—3 hours. Restricted to Civil Engineering and Biological Systems Engineering majors; non-majors accommodated on a space-available basis. Computer-aided design and geographic information systems in civil engineering practice. GE credit: SciEng | QL, SE. —S. (S.) Fa, Bronner

##### **17. Surveying (2)**

Lecture—2 hours. Prerequisite: Physics 9A (may be taken concurrently). Restricted to Civil Engineering and Biological Systems Engineering majors; non-majors accommodated on a space-available basis. Theory behind and description of modern methods of land surveying in Civil Engineering. Offered irregularly. GE credit: SciEng | SE.

##### **19. C Programming for Civil and Environmental Engineers (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Mathematics 21A (may be taken concurrently). Pass One open to Civil Engineering majors and Optical Science and Engineering majors. Computational problem solving techniques for Civil and Environmental Engineering applications using structured C programming. Algorithm design applied to realistic problems. Offered irregularly. GE credit: SciEng | SE.—Jeremic, Kleeman

##### **90X. Lower Division Seminar (1-4)**

Seminar—1-4 hours. Prerequisite: consent of instructor. Examination of a special topic in a small group setting. May be repeated for credit. GE credit: SciEng | SE.

##### **92. Internship in Engineering (1-5)**

Internship. Prerequisite: lower division standing; approval of project prior to period of internship. Supervised work experience in civil engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE.

##### **98. Directed Group Study (1-5)**

Prerequisite: consent of instructor and lower division standing. (P/NP grading only.) GE credit: SE.

##### **99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor; lower division standing. (P/NP grading only.) GE credit: SE.

#### **Upper Division**

##### **114. Probabilistic Systems Analysis for Civil Engineers (4)**

Lecture—4 hours. Prerequisite: C- or better in Mathematics 21C. Probabilistic concepts and models in engineering. Statistical analysis of engineering experimental and field data. Introduction to stochastic processes and models of engineering systems. Not open for credit to students who have completed Statistics 120. GE credit: SciEng | QL, SE. —W, S. (W, S.)

##### **115. Computer Methods in Civil & Environmental Engineering (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Engineering 6 or Computer Science Engineering 30, and Mathematics 22B. Open to Civil Engineering majors only. Presentation, implementation and application of numerical algorithms and computer models for the solution of practical problems in Civil and Environmental Engineering. GE credit: SciEng | SE. —S. (S.) Sukumar, Younis

##### **119. Parallel Processing for Engineering Applications (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: C programming or consent of instructor. Fundamental skills in parallel computing for engineering applications; emphasis on structured parallel programming for distributed memory parallel clusters. Not open for credit to students who have completed course 119B. Offered irregularly. GE credit: SciEng | SE.—Kleeman, Jeremic

##### **123. Urban Systems and Sustainability (4)**

Lecture—4 hours. Prerequisite: upper division standing. Systems-level approach of how to evaluate and then modify sustainability of urban systems based on interaction with natural environments. Topics include: definition/metrics of urban sustainability; system analyses of urban systems; enabling technology, policies, legislation; measures and modification of ecological footprints. GE credit: SciEng or SocSci, Div, Wrt | ACGH, DD, SE, SL, SS, WE. —S. (S.) Kendall

##### **125. Building Energy Performance (4)**

Lecture—4 hours. Prerequisite: upper division standing in Engineering. Open to students in the College of Engineering. Mechanisms of energy consumption in buildings including end uses, thermal loads, ventilation, air infiltration, thermal energy distribution, and HVAC systems; energy performance simulation; methods and strategies of energy efficiency. Offered in alternate years. GE credit: SciEng | SE. —(S.) Modera

##### **126. Integrated Planning for Green Civil Systems (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Physics 9C or Landscape Architecture 60 or Design 145 or Environmental Science and Policy 100 or Nature and Culture 120 or Anthropology 100 or Statistics 32 or Plant Sciences 101; consent of instructor. Working within multidisciplinary teams, a heuristic learning environment, and multiple realistic constraints, an integrated design process will be applied to the planning of a project-based green and sustainable civil system. Offered irregularly. GE credit: SciEng | SE.

##### **127. Integrated Design for Green Civil Systems: Senior Design Experience (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 126; consent of instructor. Restricted to senior level standing. Working within multidisciplinary teams and a heuristic, project-based learning environment, a green and sustainable civil system will be designed. Evaluate various design options under architectural, structural, cost and environmental constraints, and present designs through oral and written presentations. Offered irregularly. GE credit: SciEng | SE.

##### **128. Integrated Construction for Green Civil Systems (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 127. Working within multidisciplinary teams, a heuristic learning environment, and multiple realistic constraints, an integrated design process will be applied to the construction of a project-based green and sustainable civil system. Offered irregularly. GE credit: SciEng | SE.

##### **130. Structural Analysis (4)**

Lecture—4 hours. Prerequisite: C- or better in Engineering 104; Mathematics 22A. Open to Civil Engineering majors. Elastic structural analysis of determinate and indeterminate trusses, beams and frames. Plastic bending and limit analysis. GE credit: SciEng | QL, SE. —W, S. (F, S.)

##### **131. Matrix Structural Analysis (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: C- or better in Engineering 104; Engineering 6. Open to Engineering majors only. Matrix formulation and computer analysis of statically indeterminate structures. Stiffness and flexibility formulations for elastic structures. Finite element methods for elasticity and bending problems. Offered irregularly. GE credit: SciEng | SE. —S.

##### **132. Structural Design: Metallic Elements (4)**

Lecture—4 hours. Prerequisite: course 130. Design of metallic beams, columns, and other members for various types of loading and boundary conditions; design of connections between members; member performance within structural systems. GE credit: SciEng | SE, VL. —F. (W.) Bolander, Kanvinde

##### **135. Structural Design: Concrete Elements (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 130. Restricted to Civil Engineering, Civil Engineering/Materials Science and Engineering, and Materials Science and Engineering majors only. Strength design procedures for columns, rectangular beams, Tbeams and beams of general cross-section. Building code requirements for bending, shear, axial load, combined stresses and bond. Introduction to prestressed concrete. GE credit: SciEng | QL, SE. —W. (W.) Chai

##### **136. Building Design: Senior Design Experience (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 130 or 131; course 135 or 132. Restricted to senior level standing. Design of a building structure for a specific need under the multiple constraints of safety, serviceability, cost and aesthetics. Offered irregularly. GE credit: SciEng | SE. —S.

##### **137. Construction Principles and Project Management (4)**

Lecture—3 hours; laboratory—3 hours. Restricted to upper division standing in Engineering. Project management, with civil engineering construction and

design applications, including project scope, schedule, resources, cost, quality, risk, and control. Construction industry overview. Interactions between planning, design, construction, operations. Construction operations analysis. Contract issues. Project management software, field trips, guest lectures. Offered irregularly. GE credit: SciEng or SocSci | ACGH, OL, QL, SE or SS, VL, WE. —W. (W.) Harvey

### **138. Earthquake Loads on Structures (4)**

Lecture—3 hours; discussion—1 hours. Prerequisite: course 130 or 131. Determination of loads on structures due to earthquakes. Methods of estimating equivalent static lateral forces; response spectrum and time history analysis. Concepts of mass, damping and stiffness for typical structures. Design for inelastic behavior. Numerical solutions and Code requirements. GE credit: SciEng | SE. —W. (S.) Kunath

### **139. Advanced Structural Mechanics (4)**

Lecture—4 hours. Prerequisite: C or better in Engineering 104. Review of stress, strain, equilibrium, compatibility, and elastic material behavior. Plane stress and plane strain problems in elasticity; energy methods. Theories for unsymmetric bending, straight and curved beams. Beams on elastic foundations; stresses in plates and shells; elastic stability. Offered irregularly. GE credit: SciEng | SE. —Rashid, Sukumar

### **140. Environmental Analysis of Aqueous Systems (3)**

Lecture—3 hours. Prerequisite: Chemistry 2B. Introduction to chemical principles underlying current practices in sampling and analysis of water and wastewater. GE credit: SciEng | SE. —F. (F.) Darby, Young

### **140L. Environmental Analysis of Aqueous Systems Laboratory (1)**

Laboratory—3 hours. Prerequisite: Chemistry 2B or the equivalent; course 140 (may be taken concurrently). Restricted to Civil Engineering undergraduate and graduate students. Introduction to "wet chemical" and instrumental techniques commonly used in the examination of water and wastewater and associated data analysis. Offered irregularly. GE credit: SciEng | SE. —F. Darby

### **141. Engineering Hydraulics (3)**

Lecture—3 hours. Prerequisite: C or better in Engineering 103. Nature of flow of a real fluid; flow in pipes; open channel flow; turbomachinery; fluid forces on objects; boundary layers, lift and drag. GE credit: SciEng | SE. —F. W. (F. W.) Bombardelli, Schladow, Younis

### **141L. Engineering Hydraulics Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 141 (may be taken concurrently). Open to Engineering students only. Laboratory experiments and demonstrations on flow measurement, sluice gates, hydraulic jump, flow characteristics, and centrifugal pumps. GE credit: SciEng | SE. —F. W. (F. W.) Bombardelli, Schladow, Younis

### **142. Engineering Hydrology (4)**

Lecture—4 hours. Prerequisite: course 141 (may be taken concurrently). Restricted to students in the College of Engineering. Hydrologic cycle. Evapotranspiration, interception, depression storage and infiltration. Streamflow analysis and modeling. Flood routing through channels and reservoirs. Frequency analysis of hydrologic variables. Precipitation analysis for hydrologic design. Hydrologic design. GE credit: SciEng | QL, SE. —F. (F.) Kavvas

### **143. Green Engineering Design and Sustainability (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 106; course 148A. Restricted to upper division standing; Pass One restricted to Civil Engineering majors. Application of concepts, goals and metrics of sustainability, green engineering and industrial ecology to engineering design. Other course topics include life-cycle assessments, analysis

of environmental management systems, and economics of pollution prevention and sustainability. GE credit: SciEng | QL, SE, SL, WE. —W. (W.) Bronner

### **144. Groundwater Systems Design (4)**

Lecture—4 hours. Prerequisite: course 141. Groundwater occurrence, distribution, and movement; groundwater flow systems; radial flow to wells and aquifer testing; aquifer management; groundwater contamination; solute transport by groundwater; fate and transport of subsurface contaminants. Groundwater supply and transport modeling. GE credit: SciEng | SE. —F. (F.)

### **144L. Groundwater Systems Design Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 144, taken concurrently. Computer modeling of groundwater flow under regional gradient, well injection/withdrawal, and natural and engineered boundary conditions. Use of Groundwater Vista computer program. Offered irregularly. —Ginn

### **145. Hydraulic Structure Design: Senior Design Experience (4)**

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: C or better in course 141. Restricted to senior level standing. Project-based course covering the design of an integrated urban drainage system, including consideration of design alternatives, multiple realistic constraints (public safety, economic, environmental, sustainability and health), quantification of hydrologic uncertainty, codes and standards, design drawings and specifications and cost analysis. Offered irregularly. GE credit: SciEng | SE. —S. (S.) Younis

### **146. Water Resources Simulation (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 103. Computer simulation techniques in the analysis, design and operation of surface water systems; modeling concepts and practices with application to surface runoff; water quality in rivers and streams and dispersion of contaminants in water bodies. GE credit: SciEng, Wrt | SE. —W. (W.) Bombardelli, Younis

### **148A. Water Quality Management (4)**

Lecture—4 hours. Prerequisite: C or better in Chemistry 2B. Basic concepts of water quality measurements and regulations. Introduction to physical, biological and chemical processes in natural waters. Fundamentals of mass balances in water and wastewater treatment. GE credit: SciEng | SE. —W. (W.) Bronner, Young

### **148B. Water and Wastewater Treatment System Design: Senior Design Experience (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: C or better in Engineering 103 and course 148A. Restricted to senior level standing. Design and evaluation of water and wastewater treatment systems. GE credit: SciEng | QL, SE, VL, WE. —S. (S.) Darby

### **149. Air Pollution (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 21D, 22B; C or better in Chemistry 2B; Atmospheric Science 121A or C or better in Engineering 103. Physical and technical aspects of air pollution. Emphasis on geophysical processes and air pollution meteorology as well as physical and chemical properties of pollutants. (Same course as Atmospheric Science 149.) GE credit: SciEng | QL, SE, SL. —F. (F.) Cappa

### **150. Air Pollution Control System Design: Senior Design Experience (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C or better in Atmospheric Science 149 or course 149. Restricted to senior level standing. Design and evaluation of air pollution control devices and systems. GE credit: SciEng | SE. —W. (W.) Cappa

### **153. Deterministic Optimization and Design (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Mathematics 21C and 22A; computer programming course. Operations research. Optimization techniques such as linear programming, dynamic programming, and non-linear programming.

Applications in civil engineering disciplines, including multiple realistic constraints, through computer-based course projects. GE credit: SciEng | QL, SE, SL. —F. (F.) Fan

### **155. Water Resources Engineering Planning (4)**

Lecture—4 hours. Prerequisite: Engineering 106 or Economics 1A; course 114. Basic engineering planning concepts; role of engineering, economic, environmental and social information and analysis; institutional, political and legal aspects. Case studies and computer models illustrate the planning of water resource systems. GE credit: SciEng or SocSci, Wrt | QL, SE or SS, SL, WE. —S. (W.) Herman, Lund

### **161. Transportation System Operations (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C or better in both Mathematics 21C and Physics 9A. Principles of transportation system operations; traffic characteristics and methods of measurement; models of transportation operations and congestion applied to urban streets and freeways. GE credit: SciEng | QL, SE. —F. (F.) Zhang

### **162. Transportation Land Use Sustainable Design: Senior Design Experience (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: C or better in course 148A or 161 or 163. Restricted to senior level standing. Interactions between land use and transportation systems design. Generalized design paradigm; project-based solutions for transportation land use. Students will select from various strategies to satisfy multiple constraints including cost, effectiveness and environmental sustainability. Oral, poster and written presentations required. GE credit: SciEng | SE, SL. —S. (S.) Nie-meier

### **163. Energy and Environmental Aspects of Transportation (4)**

Lecture—3 hours; extensive writing. Prerequisite: Economics 1A or Engineering 106. Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as Environmental Science and Policy 163.) Offered in alternate years. GE credit: SciEng or SocSci, Wrt | SE or SS, SL, WE. —F. Sperling

### **165. Transportation Policy (3)**

Lecture—3 hours. Transportation and associated environmental problems confronting urban areas, and prospective technological and institutional solutions. Draws upon concepts and methods from economics, engineering, political science and environmental studies. Offered in alternate years. GE credit: SciEng or SocSci, Wrt | QL, SE or SS. —(F.) Sperling

### **171. Soil Mechanics (4)**

Lecture—4 hours. Prerequisite: C or better in Engineering 104; Engineering 103 (may be concurrent); course 171L (co-requisite). Restricted to Civil Engineering and Civil Engineering/Materials Science and Engineering majors only. Soil formations, mass-volume relationships, soil classification, effective stress, soil-water-void relationships, compaction, seepage, capillarity, compressibility, consolidation, strength, states of stress and failure, lateral earth pressures, and slope stability. GE credit: SciEng | SE. —F. S. (F. S.) Kutter

### **171L. Soil Mechanics Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 171 must be taken concurrently. Laboratory studies utilizing standard testing methods to determine physical, mechanical and hydraulic properties of soil and demonstration of basic principles of soil behavior. GE credit: SciEng | SE. —F. S. (F. S.) Kutter

### **173. Foundation Design: Senior Design Experience (4)**

Lecture—4 hours. Prerequisite: course 171. Restricted to senior level standing. Soil exploration and determination of properties for design; design of shallow and deep foundations for bearing capacity and settlements; design of retaining structures;

selection and evaluation of foundation alternatives; excavation support and dewatering; major design experience and design report preparation. GE credit: SciEng | SE. —W. (W.) Boulanger

### **175. Geotechnical Earthquake Engineering (4)**

Lecture—4 hours. Prerequisite: C- or better in course 171. Earthquakes, faults, seismology and ground motions; complex notation for vibratory motions, the wave equation, reflection and refraction; dynamic soil properties, linear and nonlinear 1-D site response analysis; introduction to soil-structure interaction. Not open for credit to students who have taken course 287A. GE credit: SciEng | SE. —W. (W.) Boulanger, Kutter

### **179. Pavement Engineering (4)**

Lecture—3 hours; discussion/laboratory—3 hours. Prerequisite: C- or better in Engineering 104. Pavement types (rigid, flexible, unsurfaced, rail), their applications (roads, airfields, ports, rail) and distress mechanisms. Materials, traffic and environment characterization. Empirical and mechanistic-empirical design procedures. Maintenance, rehabilitation and reconstruction; construction quality; asphalt concrete mix design. GE credit: SciEng | QL, SE, SL, VL. —F. (F.) Harvey

### **189A. Selected Topics in Civil Engineering; Environmental Engineering (1-5)**

Prerequisite: consent of instructor. Directed group study in Environmental Engineering. May be repeated for credit when the topic is different. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **189B. Selected Topics in Civil Engineering; Hydraulics and Hydrologic Engineering (1-5)**

Prerequisite: consent of instructor. Directed group study in Hydraulics and Hydrologic Engineering. May be repeated for credit when the topic is different. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **189C. Selected Topics in Civil Engineering; Engineering Planning (1-5)**

Prerequisite: consent of instructor. Directed group study in Engineering Planning. May be repeated for credit when the topic is different. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **189D. Selected Topics in Civil Engineering; Geotechnical Engineering (1-5)**

Prerequisite: consent of instructor. Directed group study in Geotechnical Engineering. May be repeated for credit when the topic is different. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **189E. Selected Topics in Civil Engineering; Structural Engineering (1-5)**

Prerequisite: consent of instructor. Directed group study in Structural Engineering. May be repeated for credit when the topic is different. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **189F. Selected Topics in Civil Engineering; Structural Mechanics (1-5)**

Prerequisite: consent of instructor. Directed group study in Structural Mechanics. May be repeated for credit when the topic is different. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **189G. Selected Topics in Civil Engineering; Transportation Engineering (1-5)**

Prerequisite: consent of instructor. Directed group study in Transportation Engineering. May be repeated for credit when the topic is different. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **189H. Selected Topics in Civil Engineering; Transportation Planning (1-5)**

Prerequisite: consent of instructor. Directed group study in Transportation Planning. May be repeated for credit when the topic is different. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **189I. Selected Topics in Civil Engineering; Water Resources Engineering (1-5)**

Prerequisite: consent of instructor. Directed group study in Water Resources Engineering. May be repeated for credit when the topic is different. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **189J. Selected Topics in Civil Engineering; Water Resources Planning (1-5)**

Prerequisite: consent of instructor. Directed group study in Water Resources Planning. May be repeated for credit when the topic is different. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

### **190. The Civil Engineer in Society (2)**

Lecture—1 hours; laboratory—3 hours. Open to upper division Civil Engineering majors. The Civil Engineering profession; introduction to concepts in business, management, public policy and leadership including the importance of professional licensure and a discussion of professional ethical and societal issues related to civil engineering. GE credit: SocSci | SS. —F, S. (F, S.) Bronner, Kunath

### **190C. Research Group Conferences in Civil and Environmental Engineering (1)**

Discussion—1 hour. Prerequisite: upper division standing in Civil and Environmental Engineering; consent of instructor. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE. —F, W, S. (F, W, S.)

### **192. Internship in Engineering (1-5)**

Internship. Prerequisite: upper division standing; approval of project prior to the period of the internship. Supervised work experience in civil engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. —F.

### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE. —F, W, S. (F, W, S.)

### **Graduate**

#### **201. Introduction to Theory of Elasticity (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 104. Fundamental equations of elasticity in three dimensions; plane stress and plane strain; flexure and torsion of bars of various shapes. Introduction to variational and approximate methods. —F. (F.) Rashed

#### **203. Inelastic Behavior of Solids (3)**

Lecture—3 hours. Prerequisite: course 201. Fundamentals of theories of plasticity, viscoelasticity and viscoplasticity for solids. Macroscopic constitutive modelling for engineering materials, e.g., metals, polymers, soils, etc., and microscopic motivation. Offered in alternate years. —(W.) Dafalias

#### **205. Continuum Mechanics (3)**

Lecture—3 hours. Prerequisite: course 201. Tensor formulation of the field equations for continuum mechanics, including large deformation effects. Invariance and symmetry requirements. Introduction to nonlinear thermoelasticity and thermodynamics. Solution of three-dimensional problems. Selected topics. Offered in alternate years. —F. Dafalias

#### **206. Fracture Mechanics (4)**

Lecture—4 hours. Prerequisite: course 201; Engineering 104. Linear and nonlinear fracture mechanics, stress analysis, energy concepts, brittle fracture criteria, path independent integrals, Dugdale-Barenblatt model, general cohesive zone models, ductile fracture criteria, crack tip fields for stationary and propagating cracks, fatigue. Application of numerical methods for fracture mechanics. Offered in alternate years. —(W.) Sukumar

#### **211. Advanced Matrix Structural Analysis (4)**

Lecture—4 hours. Prerequisite: course 131. Analysis of complex frameworks by the displacement method; treatment of tapered beams, curved beams, and beams on elastic foundations; partially rigid connections; geometric and material nonlinearities; buckling; flexibility-based formulations; FEM-software for nonlinear analysis of structures. —F. (F.) Kunath

### **212A. Finite Element Procedures in Applied Mechanics (4)**

Lecture—4 hours. Prerequisite: Applied Science Engineering 115, or Mathematics 128A and Mathematics 128B (may be taken concurrently). Weighted-residual and Rayleigh-Ritz methods. Weak/variational formulation and development of discrete equations using finite element approximations.

Application to one- and two-dimensional problems (heat conduction). —W. (W.) Sukumar

### **212B. Finite Elements: Application to Linear and Non-Linear Structural Mechanics Problems (4)**

Lecture—4 hours. Prerequisite: course 212A. Application to linear and nonlinear structural mechanics problems. Linear elasticity, weak form, and finite element approximation. Incompressible media problems. Non-linear problems with material nonlinearity. —S. (S.) Sukumar

### **213. Analysis of Structures Subjected to Dynamic Loads (4)**

Lecture—4 hours. Prerequisite: course 211 (may be taken concurrently). Analysis of structures subjected to earthquake, wind and blast loading; distributed, consistent and lumped mass techniques; computer implementation; nonlinear response spectrum; frequency and time domain analysis; seismic protection of structures; numerical methods in linear and nonlinear structural dynamics. —F. (F.) Kunath

### **214. Probabilistic Seismic Hazard Analysis and Design Ground Motions (4)**

Lecture—4 hours. Probabilistic seismic hazard analysis for use in developing design spectra and for seismic risk analyses, including the development of earthquake ground motion time series for use in dynamic analyses of structures. Offered in alternate years. —F. (F.) Abrahamson

### **216. Meshfree Methods and Partition of Unity Finite Elements (4)**

Lecture—4 hours. Prerequisite: course 201 and 212A. Advanced discretization techniques such as meshfree methods and partition of unity finite elements for the Galerkin solution of boundary-value problems in solid and structural mechanics. Application of meshfree and extended finite element methods in computational fracture. Offered irregularly. —Sukumar

### **221. Theory of Plates and Introduction to Shells (3)**

Lecture—3 hours. Prerequisite: course 201 (may be taken concurrently). Development of classical and refined plate theories. Application to isotropic, orthotropic and composite plates. Solutions for rectangular and circular plates. Membrane theory for axisymmetric shells and bending of circular shells.

### **223. Advanced Dynamics, Signal Processing, and Smart Structures Technology (4)**

Lecture—4 hours. Prerequisite: course 213 or equivalent. Signal processing and system identification of structures under dynamic excitations; Fourier and Laplace transforms; data acquisition and sensor design fundamentals; sensor technologies/techniques for nondestructive evaluation; structural control; actuators and dampers for smart structures; piezoelectrics and acoustic emissions; micro- and nano-fabrication.

### **232. Advanced Topics in Concrete Structures (4)**

Lecture—4 hours. Prerequisite: course 130, 135, 138 and graduate standing. Ductility of reinforced concrete; strength of two-way slabs; modified compression field theory. —S. (S.) Chai

### **233. Advanced Design of Steel Structures (4)**

Lecture—4 hours. Prerequisite: courses 130 or 131, 132. Review of Load and Resistance Factor Design (LRFD); steel-plate girder design; plastic design of indeterminate systems; moment frames and bracing systems; connection design; seismic design of steel structures; vibration of flooring systems; steel-concrete composite design. —S. (S.) Bolander

**234. Prestressed Concrete (4)**

Lecture—4 hours. Prerequisite: courses 130 or 131, 135. Survey of methods and applications; prestressing materials and systems; prestress losses; flexural design; design for shear and torsion; deflection computation and control; continuous beams and indeterminate structures; floor systems; partial prestressing; design of compression members; strut-and-tie models. Offered in alternate years.—Bolander

**235. Cement Composites (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Engineering 104. Applications of cement composites; materials selection and proportioning; component and composite properties; hydration reactions and microstructure development; mechanisms of failure; nondestructive test methods; fiber reinforcement; concrete durability; novel reinforcing materials; reinforcement; repair and retrofit technologies; applications to structural design. Offered in alternate years.—W. Bolander

**236. Design of Fiber Reinforced Polymer Composite Structures (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 135. Basics of mechanics and design of polymer matrix composites: composite classification, manufacturing process, micromechanical property determination, classical lamination theory, strength theories, first-ply-failure, test methods, design practice, strengthening and retrofitting of existing reinforced concrete structures.—(S.) Cheng

**237. Bridge Design (4)**

Lecture—4 hours. Prerequisite: courses 130, 135; course 234 recommended. Open to graduate students only. Bridge types, behavior and construction characteristics; design philosophy, details according to Caltrans and American Association of State Highway and Transportation Officials codes, principles; seismic design and retrofit of concrete bridges; modern bridges using advanced fiber reinforced polymer composites; fieldtrip required.—S. (S.) Cheng

**238. Performance-Based Seismic Engineering (4)**

Lecture—4 hours. Prerequisite: Courses 138 and 213. Modern seismic design; performance-based seismic design; seismic hazard; seismic demands: linear and nonlinear procedures; performance assessment; deterministic and probabilistic procedure; review of FEMA-350, FEMA-356, ATC-40 and other performance-based guidelines.—(W.) Kunnath

**240. Water Quality (4)**

Lecture—4 hours. Prerequisite: courses 141 and 142. Quality requirements for beneficial uses of water. Hydrologic cycle of quality. Hydromechanics in relation to quality of surface and groundwaters; transport and fate of waterborne pollutants. Heat budget for surface waters; predictive methods; introduction to water quality modeling.—W. (W.) Schladow

**241. Environmental Reactive Chemical Transport Modeling (4)**

Lecture—4 hours. Prerequisite: Chemistry 2A, or Chemistry 2B, or course 149, or equivalent. Modeling of reactive chemical transport in air and water including kinetic reactions, equilibrium reactions, and phase partitioning. Emphasis on numerical solution schemes and programming techniques to provide deeper insight into model performance and limitations. Offered in alternate years.—S.s Kleeman

**242. Air Quality (4)**

Lecture—4 hours. Prerequisite: Engineering 105, course 141, 149 or the equivalent. Factors determining air quality. Effects of air pollutants. Physical and chemical fundamentals of atmospheric transport and reaction. Introduction to dispersion modeling. Offered in alternate years.—F. Kleeman

**243A. Water and Waste Treatment (4)**

Lecture—4 hours. Prerequisite: course 148A or the equivalent. Characteristics of water and airborne wastes; treatment processes and process kinetics; treatment system design.—F. (F.)

**243B. Water and Waste Treatment (4)**

Lecture—4 hours. Prerequisite: course 243A. Continuation of course 243A. Aeration, thickening, biological processes, design of biological treatment systems.—W. (W.) Loge

**243L. Pilot Plant Laboratory (4)**

Lecture—1 hour; Discussion—1 hour; Laboratory—6 hours. Prerequisite: course 243A and 243B (may be taken concurrently) or consent of instructor; graduate standing. Laboratory investigation of physical, chemical, and biological processes for water and waste-water treatment.—W. (W.) Darby

**244. Life Cycle Assessment for Sustainable Engineering (4)**

Lecture—4 hours. Prerequisite: graduate standing. Life cycle assessment methodology is taught emphasizing applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy are covered as well.—(F.) Kendall

**245A. Applied Environmental Chemistry: Inorganic (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 105, Chemistry 2B or the equivalent, course 140; Chemistry 2C or 107A recommended. Chemistry of natural and polluted waters. Topics include chemical, kinetic and equilibrium principles, redox reactions, gas solution and solid-solution equilibria, thermodynamics, carbonate systems, coordination chemistry, interfacial phenomena. Offered in alternate years.—(S.) Young

**245B. Applied Environmental Chemistry: Organic (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 128A, 128B, 128C, or the equivalent; Chemistry 2C or 107A recommended. Transport and transformation of organic chemicals in the environment. Topics include application of thermodynamics to predict solubility and activity coefficients; distribution of organic chemicals between the aqueous phase and air, solvent, or solid phases; chemical, photochemical and biological transformation reactions. Offered in alternate years.—S. Young

**246. Pilot Plant Laboratory (4)**

Lecture—1 hour; discussion—1 hour; laboratory—6 hours. Prerequisite: course 243A, 243B (may be taken concurrently) or consent of instructor, graduate standing. Laboratory investigation of physical, chemical, and biological processes for water and waste-water treatment.—W. (W.) Darby

**246N. Understanding Climate Change: Causes and Consequences (4)**

Lecture—4 hours. Open to graduate students. Diverse physical processes that govern climate and drive climate change. Observational, experimental and modeling techniques and methods used in the development of our scientific understanding of the Earth system.—S. (S.) Cappa

**247. Aerosols (4)**

Lecture—4 hours. Prerequisite: Engineering 103, 105, course 141, 149. Behavior of airborne particles including particle formation, modification, and removal processes. Offered in alternate years.—F. Kleeman

**247L. Aerosols Laboratory (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 247. Methods of generation and characterization of aerosols. Detailed topics may include flow rate measurement, aerosol generation, aerosol collection, ions measurement, metals measurement, and carbon measurement. May be repeated one time for credit.—Kleeman

**248. Biofilm Processes (4)**

Lecture—4 hours. Prerequisite: Soil Science 111 or 211 or course 243B or consent of instructor; calculus and basic cell molecular biology recommended. Natural and engineered biofilms, including biofilm occurrence and development, spatial structure, microbial processes, fundamental and applied research tools, biofilm reactors, beneficial uses, and detrimental effects.

**249. Probabilistic Design and Optimization (4)**

Lecture—4 hours. Prerequisite: courses 114 and 153 and Engineering 106, or equivalents. Design by optimization for probabilistic systems, decision theory, the value of information, probabilistic linear programming, probabilistic dynamic programming, nonlinear probabilistic optimization. Applications in civil engineering design, project evaluation, and risk management. Offered in alternate years.—W. Lund

**250. Civil Infrastructure System Optimization and Identification (4)**

Lecture—4 hours. Prerequisite: Mathematics 21C, 22A, programming course; Applied Science Engineering 115 and mathematical modeling course recommended. Applied mathematics with a focus on modeling, identifying, and controlling dynamic, stochastic, and underdetermined systems. Applications in transportation networks, water resource planning, and other civil infrastructure systems. Offered in alternate years.—(S.) Fan

**251. Transportation Demand Analysis (4)**

Lecture—4 hours. Prerequisite: course 114 or the equivalent. Procedures used in urban travel demand forecasting. Principles and assumptions of model components (trip generation, trip distribution, model split). New methods of estimating travel demand. Computer exercises using empirical data to calibrate models and forecast travel demand.—F. (F.) Nieheimer

**252. Sustainable Transportation Technology and Policy (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 165. Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as Environmental Science and Policy 252.) Offered in alternate years.—S. Sperling

**253. Dynamic Programming and Multistage Decision Processes (4)**

Lecture—4 hours. Prerequisite: Mathematics 21C, 22A, programming course; Applied Science Engineering 115 recommended. Operations research. Optimization techniques with a focus on dynamic programming in treating deterministic, stochastic, and adaptive multistage decision processes. Brief review of linear programming and non-linear programming. Applications in transportation networks and other civil infrastructure systems.—S. (S.) Fan

**254. Discrete Choice Analysis of Travel Demand (4)**

Lecture—4 hours. Prerequisite: course 114. Behavioral and statistical principles underlying the formulation and estimation of discrete choice models. Practical application of discrete choice models to characterization of choice behavior, hypothesis testing, and forecasting. Emphasis on computer exercises using real-world data sets. (Same course as Geography 279.)

**256. Urban Traffic Management and Control (4)**

Lecture—4 hours. Prerequisite: course 114. Basic concepts, models, and methods related to the branch of traffic science that deals with the movement of vehicles on a road network, including travel speed, travel time, congestion concepts, car-following and hydrodynamic traffic models.—F. (F.) Zhang

**257. Flow in Transportation Networks (4)**

Lecture—4 hours. Prerequisite: course 153; 161 or 256 recommended. Elements of graph theory, a survey of pertinent optimization techniques, extremal principles in network flow problems, deterministic equilibrium assignment, stochastic equilibrium assignment, extensions of equilibrium assignments and dynamic transportation network assignment.—W. (W.) Zhang

**258. Transportation Planning in Developing Countries (3)**

Lecture—3 hours. Prerequisite: course 160 or consent of instructor. Investigation of the role that transportation investments and policies play in the development of regions and countries. Emphasis is on identifying appropriate technologies, policies, and planning methods for designing transportation systems in regions of differing socioeconomic, geographic, and institutional settings. Offered in alternate years.—(S.) Sperling

**259. Asphalt and Asphalt Mixes (4)**

Lecture—4 hours. Prerequisite: course 179 or consent of instructor. Asphalts and asphalt mix types and their use in civil engineering structures, with primary emphasis on pavements. Asphalt, aggregate properties and effects on mix properties. Design, construction, recycling. Recent developments and research. Offered in alternate years.—(W.) Harvey

**260. Sediment Transport (4)**

Lecture—4 hours. Prerequisite: course 141 or equivalent. Sediment transport in hydrologic systems. Process-oriented course which will emphasize how sediment moves and the physical processes that affect sediment transport. Field trip. Offered in alternate years.

**264A. Transport, Mixing and Water Quality in Rivers and Lakes (4)**

Lecture—4 hours. Prerequisite: course 141 and 240. Principal causes of mixing and transport in rivers, lakes and reservoirs, and their impacts on water quality. Case studies of specific lakes and rivers. Offered in alternate years.—F. (S.) Schladow

**264B. Transport, Mixing and Water Quality in Estuaries and Wetlands (4)**

Lecture—4 hours. Prerequisite: courses 141 and 240. Principal causes of mixing and transport in estuaries and wetlands, and their impacts on water quality. Topics include advection/diffusion; tides; transverse mixing; longitudinal dispersion; sediment transport; nutrient cycling; computer modeling of estuaries. Case studies of specific systems. Offered in alternate years.—Schladow

**265. Stochastic Hydrology and Hydraulics (4)**

Lecture—4 hours. Prerequisite: course 266 or consent of instructor. Physics-based stochastic methods in modeling hydrologic and hydraulic processes; theory for modeling hydrologic-hydraulic governing equations as stochastic partial differential equations applied to various hydrologic-hydraulic processes under uncertainty, including transport, open channel flow, overland flow, soil water flow, and groundwater. Offered in alternate years.—(F.) Kavvas

**266. Applied Stochastic Methods in Engineering (4)**

Lecture—4 hours. Prerequisite: course 114 or Mathematics 131 or Statistics 130A or 131A; Mathematics 118A (may be taken concurrently). Stochastic processes classification; Gaussian random fields; stochastic calculus in mean square; Ito and Stratonovich stochastic differential equations; Fokker-Planck equation; stochastic differential equations with random coefficients. Offered in alternate years.—F. Kavvas

**267. Water Resource Management (3)**

Lecture—3 hours. Prerequisite: course 114, 141, and 142; course 153 recommended. Engineering, institutional, economic, and social basis for managing local and regional water resources. Examples in the context of California's water development and management. Uses of computer modeling to improve water management. (Same course as Geography 212.)—F. (F.) Lund

**268. Infrastructure Economics (3)**

Lecture—3 hours. Prerequisite: Economics 1A, Engineering 106 or the equivalent. Economics applied to infrastructure engineering planning, operations, maintenance, and management problems; microeconomic and macroeconomic theories; benefit-cost analysis; effect of uncertainty; optimization economics; non-classical economics; public finance. Offered in alternate years.—(W.) Lund

**269. Transportation-Air Quality: Theory and Practice (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 149 or the equivalent. Health and regulatory aspects of airborne pollutants. Principles of modeling vehicle emissions. Conformity issues and the regulatory framework. Regional and micro-scale modeling. Offered in alternate years.—S. Niemeier

**270. Advanced Water Resources Management (3)**

Lecture—3 hours. Prerequisite: courses 153 and 267 or the equivalent. Discussion of technical papers related to planning theory, system maintenance, regionalization, multi-objective methods, risk analysis, institutional issues, pricing model application, economic development, forecasting, operations, and other topics. Offered in alternate years.—Lund

**271. Inverse Problems (4)**

Lecture—3 hours. Prerequisite: courses 114 and 144 or equivalents. Inverse calibration of distributed parameter models, using data representing model outputs. Forward and inverse mappings, stability, uniqueness, identifiability. Optimization formulation of inverse problems, maximum likelihood and other objective functions, indirect and direct approaches, solution by UCODE in hands-on project format.

**272A. Advanced Hydrogeology (4)**

Lecture—4 hours. Prerequisite: course 144; Mathematics 118A recommended. Flow in confined, unconfined, and leaky aquifers. Geological aspects of aquifers. Regional groundwater flow and hydraulics of pumping and recharging wells. Identification of aquifer parameters. Isotope hydrogeology and recharge estimation.

**272B. Advanced Hydrogeology (4)**

Lecture—4 hours. Prerequisite: courses 212A and 272A. Processes of subsurface flows and transport. Numerical methods of subsurface fluid flow and transport systems. Flow in the unsaturated zone. Fresh water/salt water interface in coastal aquifers. Macrodispersion. Identification of regional aquifer parameters. Modeling of aquifer systems. Offered in alternate years.

**272C. Multiphase Reactive Transport (4)**

Lecture—4 hours. Prerequisite: courses 142, 144, 148A. Multicomponent reactive transport including multiple phases. Advective-dispersive transport, chemical equilibria, and mass transformation kinetics. Natural chemical/microbiological processes including sorption, complexation, biodegradation, and diffusive mass transfer. Eulerian and Lagrangian averaging methods. Applications to contaminant remediation problems in river and subsurface hydrology. Offered in alternate years.

**273. Water Resource Systems Engineering (3)**

Lecture—3 hours. Prerequisite: courses 114 and 153 or the equivalent. Planning, design, and management of water resource systems. Application of deterministic and stochastic optimization techniques. Water allocation, capacity expansion, and design and operation of reservoir systems. Surface water and groundwater management. Offered in alternate years.—(F.) Lund

**275. Hydrologic Time-Series Analysis (4)**

Lecture—4 hours. Prerequisite: course 114 and 142. Application of statistical methods for analysis and modeling of hydrologic series. Statistical simulation and prediction of hydrologic sequences using time series methodology. Offered in alternate years.—Kavvas

**276. Watershed Hydrology (4)**

Lecture—4 hours. Prerequisite: course 142 or the equivalent. Analysis and mathematical modeling of hydrologic processes taking place in a watershed. Precipitation analysis and modeling. Theory of overland flow and its kinematic wave approximation. Analysis and modeling of saturated and unsaturated subsurface flow processes taking place on a hill slope.—Kavvas

**277A. Computational River Mechanics I (4)**

Lecture—4 hours. Prerequisite: Applied Science Engineering 115, course 141 (both may be taken concurrently). Unsteady open channel flows, computation of water surface profiles, shallow water equations, St. Venant equations, method of characteristics, finite difference methods, stability and accuracy of explicit and implicit schemes, flood routing in simple and compound channels, advection of plumes. Not open for credit to students who have completed course 277.—F. (F.) Younis

**277B. Computational River Mechanics II (4)**

Lecture—4 hours. Prerequisite: course 277A. Open channel flows, physical aspects of river mechanics, formulation of depth-averaged equations, boundary conditions, coordinates transformation and grid generation, finite-difference solution techniques, applications to two-dimensional momentum and pollutant transport in rivers. Offered irregularly.—Younis

**277C. Turbulence and Mixing Processes (4)**

Lecture—4 hours. Prerequisite: graduate standing. Nature of turbulent flows, conservation equations, momentum, heat and mass transport in free and wall-bounded flows, body forces and mixing, roughness effects, turbulence modeling and simulation. Offered irregularly.—Younis

**278. Hydrodynamics (3)**

Lecture—3 hours. Prerequisite: course 141. Perturbation methods. Basic water waves. Governing equations for fluid motion on a rotating earth. Rotation effects, vorticity dynamics, Ekman layer. Stratification effects, internal waves and turbulent mixing. Combined effects. Offered in alternate years.—F.

**279. Advanced Mechanics of Fluids (4)**

Lecture—4 hours. Prerequisite: course 141. Rotational flows. Navier-Stokes equations and solutions for laminar flow; boundary layer equations and solution techniques. Nature of turbulence. Reynolds equations. Introduction to turbulence modeling. Offered in alternate years.—Bombardelli

**280A. Nonlinear Finite Elements for Elastic-Plastic Problems (4)**

Lecture—4 hours. Prerequisite: consent of instructor. State of the art finite element methods and tools for elastic-plastic problems, including computational techniques based on the finite element method and the theory of elastoplasticity. Offered in alternate years.—W. Jeremic

**280B. Nonlinear Dynamic Finite Elements (4)**

Lecture—4 hours. Prerequisite: consent of instructor. State of the art computational methods and tools for analyzing linear and nonlinear dynamics problems. Offered in alternate years.—S. Jeremic

**281A. Advanced Soil Mechanics (4)**

Lecture—4 hours. Prerequisite: course 171. Consolidation and secondary compression. Preloading and wick drains. Seepage and seepage pressures. Filtration, drainage, and dewatering. Shear strength: friction, cohesion, dilatancy and critical states.—F. (F.) Jeremic

**281B. Advanced Soil Mechanics (5)**

Lecture—4 hours; laboratory—3 hours. Prerequisite: course 281A. Site investigation and soil characterization within the context of slope stability analysis.—W. (W.) DeJong

**282. Pavement Design and Rehabilitation (4)**

Lecture—4 hours. Prerequisite: course 179 or consent of instructor. Advanced pavement design and structural/functional condition evaluation for concrete and asphalt pavements. Highways, airfields, port facilities; new facilities, rehabilitation, reconstruction. Mechanistic-empirical procedures, materials, climate and traffic characterization. Use of current design methods; recent developments and research. Offered in alternate years.—Harvey

**283. Physico-Chemical Aspects of Soil Behavior (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 171. Study of the geotechnical behavior of soils considering formation, transport, mineralogy,

soil/fluid/electrolyte systems, surface tension, particle mechanics, shape, fabric, and structure. Laboratories demonstrate effects of fundamental interparticle forces (contact, Van Der Waals, capillarity and chemical). Offered in alternate years.—F. Kutter

#### **284. Theoretical Geomechanics (4)**

Lecture—4 hours. Prerequisite: course 171. Elasticity, plasticity, micromechanics, coupled behavior and large deformations for geomaterials. Prediction of stress-strain-volume change behavior of geomaterials. Monotonic and cyclic loading, anisotropy, bifurcation of deformation.—W. (W.) Jeremic

#### **286. Advanced Foundation Design (4)**

Lecture—4 hours. Prerequisite: course 173. Design and analysis of pile and pier foundations, including seismic effects; deep excavation systems; tie-back, nailing, and anchor systems; coffer dams; loads on buried conduits; ground modification techniques; and other related topics.—F. (F.) DeJong

#### **287. Geotechnical Earthquake Engineering (4)**

Lecture—4 hours. Prerequisite: courses 138 and 281A. Characteristics and estimation of earthquake ground motions; wave propagation and local site response; liquefaction potential and remediation; residual strength and stability considerations; ground deformations; dynamic soil-structure interaction.—S. (S.) DeJong

#### **288. Earth and Rockfill Dams (4)**

Lecture—4 hours. Prerequisite: courses 281A and 281B (may be taken concurrently). Site selection; design considerations; layout; seismic effects including considerations of fault movements; construction; environmental considerations, instrumentation; maintenance remediation and retrofit of existing dams. Offered in alternate years.—(W.) Boulanger

#### **289A. Selected Topics in Civil Engineering; Environmental Engineering (1-5)**

Prerequisite: consent of instructor. Directed group study in Environmental Engineering. May be repeated for credit.—F, W, S. (F, W, S.)

#### **289B. Selected Topics in Civil Engineering; Hydraulics and Hydrologic Engineering (1-5)**

Prerequisite: consent of instructor. Directed group study in Hydraulics and Hydrologic Engineering. May be repeated for credit.—F, W, S. (F, W, S.)

#### **289C. Selected Topics in Civil Engineering; Engineering Planning (1-5)**

Prerequisite: consent of instructor. Directed group study in Engineering Planning. May be repeated for credit.—F, W, S. (F, W, S.)

#### **289D. Selected Topics in Civil Engineering; Geotechnical Engineering (1-5)**

Prerequisite: consent of instructor. Directed group study in Geotechnical Engineering. May be repeated for credit.—F, W, S. (F, W, S.)

#### **289E. Selected Topics in Civil Engineering; Structural Engineering (1-5)**

Prerequisite: consent of instructor. Directed group study in Structural Engineering. May be repeated for credit.—F, W, S. (F, W, S.)

#### **289F. Selected Topics in Civil Engineering; Structural Mechanics (1-5)**

Prerequisite: consent of instructor. Directed group study in Structural Mechanics. May be repeated for credit.—F, W, S. (F, W, S.)

#### **289G. Selected Topics in Civil Engineering; Transportation Engineering (1-5)**

Prerequisite: consent of instructor. Directed group study in Transportation Engineering. May be repeated for credit.—F, W, S. (F, W, S.)

#### **289H. Selected Topics in Civil Engineering; Transportation Planning (1-5)**

Prerequisite: consent of instructor. Directed group study in Transportation Planning. May be repeated for credit.—F, W, S. (F, W, S.)

#### **289I. Selected Topics in Civil Engineering; Water Resources Engineering (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Directed group study in Water Resources Engineering. May be repeated for credit.—F, W, S. (F, W, S.)

#### **290. Seminar (1)**

Seminar—1 hour. Discussion of current graduate research, and guest lectures on recent advances. Oral presentation of individual study. Course required of graduate degree candidates. (S/U grading only.)—F, W, S. (F, W, S.)

#### **290C. Graduate Research Group Conference (1)**

Discussion—1 hour. Research problems, progress, and techniques in civil engineering. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### **296. Topics in Water and Environmental Engineering (1)**

Seminar—2 hours. Seminars presented by visiting lecturers, UC Davis faculty and, graduate students. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### **298. Group Study (1-5)**

Prerequisite: consent of instructor. (S/U grading only.)

#### **299. Research (1-12)**

(S/U grading only.)

#### **Professional**

#### **390. The Teaching of Civil Engineering (1)**

Discussion—1 hour. Prerequisite: meet qualifications for teaching assistant and/or associate-in in Civil Engineering. Participation as teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for total of 9 units. (S/U grading only.)—F, W, S. (F, W, S.)

## **The Computer Science and Engineering Program**

The Department of Computer Science administers two curricula: Computer Science and Engineering in the College of Engineering, and Computer Science in the College of Letters and Science. It also administers two minors: Computer Science in the College of Letters and Science, and Computational Biology in the College of Engineering. For information on the Computer Science curriculum and minor; see *Computer Science*, on page 230.

The Computer Science Engineering major (below) prepares students to do further work in hardware, software, theory, or electronics, either in industry or in postgraduate study.

The primary differences between the Computer Science Engineering and the Computer Science majors are the extent of course work covering hardware and the flexibility of the curriculum. The Computer Science Engineering major develops a solid understanding of the entire machine, including hands-on experience with its hardware components. The Computer Science major has some course work on hardware, at the digital-design level, on simulators. The Computer Science Engineering major has fewer free electives. The CS major's more generous electives make it easier to complete a minor or double major.

A key theme of the Computer Science Engineering curriculum is the hardware/software interaction, a theme reflected in the courses required and the orientation of the courses themselves.

The Computer Science and Engineering major provides students with a solid background in mathematics, physics, chemistry, and electronic circuits and systems, all supporting the computer hardware and computer software courses that constitute the focus of the curriculum.

**Mission.** The University of California, Davis, is, first and foremost, an institution of learning and teaching, committed to serving the needs of society. The Department of Computer Science contributes to the mission in three ways. First, its undergraduate and graduate education programs seek to educate students in the fundamental principles of computer science and the skills needed to solve the complex technological problems of modern society. The breadth of coursework provides a framework for lifelong learning and an appreciation for multidisciplinary activities. Second, through its research programs, the department contributes to the development and progress of computer science, and software and information technology, to provide innovative, creative solutions for societal needs. Finally, the department disseminates its research to

enhance collaborations with the public sector, further interdisciplinary interests that benefit society, and educate the public through publications, public service, and professional activities.

**Department Objectives.** **Teaching**—We seek to provide undergraduate students with a thorough understanding of the key principles and practices of computing, which include a strong theoretical background in mathematics, basic sciences, and engineering fundamentals and an ability to apply this knowledge to practical problems. We endeavor to provide students with sufficient breadth to work creatively and productively in multidisciplinary work teams; this breadth, in its broadest context, will form the basis for an appreciation and interest in life-long learning. We provide students with the opportunities to design and conduct experiments, and to collect and analyze data in core, as well as more specialized, areas of computer science. We provide students with breadth in the humanities and social sciences so they learn to communicate effectively, understand professional and ethical issues in society, and appreciate the interrelatedness between computing and society. We educate graduate students to be our next generation of teachers or leaders in industry, or to pursue meaningful, creative research in industry, government, or academia. **Research**—We develop and maintain research programs that produce fundamental scientific advances, as well as useful technological innovations, while simultaneously training the next generation of researchers and leaders in the field of computer science.

**Objectives.** We train graduates to practice computer science and engineering in a broad range of industries; we prepare interested graduates for graduate education or other professional degrees; we give students an understanding of computer software and hardware systems, and both theoretical and experimental approaches to problem solving; we ready graduates for lifelong learning; and we encourage graduates to contribute to their profession and society.

**Integrated Degree Program.** An integrated B.S./M.S. plan in Computer Science allows Davis students in Computer Science, Computer Science Engineering, or Computer Engineering to complete a master's degree in Computer Science in one year. Formal course work for the master's degree is reduced by six units for these students. Students can begin graduate studies immediately after completing their B.S. degree. More information is available in the graduate section of the College of Engineering Bulletin, or at <http://www.cs.ucdavis.edu/graduate/bs-ms.html>.

## Computer Science and Engineering Undergraduate Program

The Computer Science and Engineering program is accredited by the Engineering Accreditation Commission of ABET; see <http://www.abet.org>.

Exclusive of General Education units, the minimum number of units for the Computer Science and Engineering major is 142.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

### Lower Division Required Courses

	UNITS
Mathematics 21A-21B-21C-21D .....	16
Mathematics 22A or 67 .....	3-4
Mathematics 22B .....	3
Physics 9A-9B-9C-9D .....	19
Chemistry 2A.....	5
Computer Science Engineering 20, 30, 40, 60.....	16
Computer Science Engineering 50 or Electrical and Computer Engineering 70 .....	4
Engineering 17 .....	4
English 3 or University Writing Program 1, 1V, 1Y or Comparative Literature 1, 2, 3, or	

4, or Native American Studies 5 (grade of C- or better required) .....	4
Communication 1 .....	4

### Upper Division Requirements:

#### Upper Division Required Courses

Computer Science Engineering 132, 140A, 150, 152A, 154A, 154B, 160, 188, 193A, 193B.....	32
Computer Science Engineering 120 or 122A.....	4
Electrical and Computer Engineering 100, 172.....	9
Computer Science electives .....	15
A minimum of four courses and a minimum of 15 units chosen from Computer Science Engineering courses numbered 120 to 189 inclusive; one approved course of 3 to 5 units from Computer Science and Engineering 192 or 199; Electrical and Computer Engineering 180A, 180B; Economics 122; Linguistics 177; Psychology 120. No course can count as both a required course and a computer science and engineering elective.	
Upper Division Composition	
Requirement .....	0-4
University Writing Program 101 (a grade of C- or better is required) or passing the Upper-Division Composition Exam.	

#### Computational Biology Minor

The minor in Computational Biology will provide to students with engineering, physical science or biological science majors the foundations necessary to build efficient computational models and algorithms, use state-of-the-art techniques for scientific analysis and create scalable infrastructure environments for biological and biotechnological applications.

Students must take a total of 19-24 upper division units, with two required courses and 11-12 units of upper division electives, as specified below. A minimum GPA of 2.000 is required for coursework in the minor. Students should note that most of the courses listed below have lower division prerequisites. In particular, required course Computer Science Engineering 122A has a prerequisite chain of Computer Science Engineering 20, 30, 40, and 60. No more than one course will be permitted for overlap between any major and the minor.

#### Minor Requirements:

	UNITS
<b>Computational Biology .....</b>	<b>20</b>
Required courses .....	8
Engineering: Computer Science 122A; 124	
Electives .....	12
At least one biology course from the following: Molecular & Cellular Biology 121, 124, 182; Evolution and Ecology 100, 101, 102, 103, 131; Biological Sciences 101, 104, 122	
At least one computational or statistics course from the following: Computer Science Engineering 130, 132, 140, 145, 158, 160, 165A, 170, 177; Statistics 130A, 141; Biotechnology 150; Biological Sciences 132	
At least one computational biology and bioinformatics course from the following: Computer Science Engineering 129; Biological Sciences 132; Biomedical Engineering 117, Biotechnology 150	

**Minor Advisers.** T. Pham, N. Coulter, V. Filkov, D. Gusfield, P. Koehl, I. Tagkopoulos

## Courses in Engineering: Computer Science (ECS)

### Lower Division

#### 10. Introduction to Programming (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: two years of high school algebra. Pass One open to Computer Science, Computer Science Engineering,

Computer Engineering, Electrical Engineering Majors only. A hands-on introduction to computation, through programming and problem solving. Two units of credit for students who have taken course 12 or Engineering 6; not open to students who have completed course 30. GE credit: SciEng | QL, SE, SL.—F, W, S. (F, W, S.) Eiselt, Max

#### 12. Introduction to Media Computation (4)

Lecture—3 hours; discussion/laboratory—1 hour. Introduction to key computational ideas necessary to understand and produce digital media. Fundamentals of programming are covered as well as analysis of how media are represented and transmitted in digital form. Aimed primarily at non-computer science students. Two units of credit for students that have taken course 10 or course 30 or Engineering 6. (Same course as Cinema and Technocultural Studies 012.) GE credit: ArtHum or SciEng | AH or SE, VL.—W. (W.) Neff

#### 15. Introduction to Computers (4)

Lecture—3 hours; laboratory—3 hours. Not open for credit to students who have completed course 30. Computer uses in modern society. Emphasis on uses in nonscientific disciplines. Includes word processing, spreadsheets, web-page creation, elementary programming, basic computer organization, the Internet, the uses of computers and their influence on society. Course not intended for CS or CSE majors. Only two units of credit allowed to students who have completed Plant Science 21. GE credit: SciEng, Wrt | QL, SE, WE.—F, W. (F, W.) Butner, Eiselt

#### 20. Discrete Mathematics for Computer Science (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: grade of C- or better in Mathematics 16A, 17A or 21A. Discrete mathematics of particular utility to computer science. Proofs by induction. Propositional and first-order logic. Sets, functions, and relations. Big-O and related notations. Recursion and solutions of recurrence relations. Combinatorics. Probability on finite probability spaces. Graph theory. GE credit: SciEng | QL, SE.—F, W, S. (F, W, S.) Koehl, D'Souza, Filkov

#### 30. Programming and Problem Solving (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 16A or 21A (may be taken concurrently); prior experience with basic programming concepts (variable, loops, conditional statements) recommended. Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Electrical Engineering Majors only. Introduction to computers and computer programming, algorithm design, and debugging. Elements of good programming style. Programming in the C language. Use of basic UNIX tools. GE credit: SciEng | QL, SE.—F, W, S. (F, W, S.) Butner, Gysel

#### 40. Software Development and Object-Oriented Programming (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 30 or the equivalent with a grade of C- or better. Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Electrical Engineering Majors only. Elements of program design, style, documentation, efficiency. Methods for debugging and verification. Operating system tools. Principles and use of object-oriented programming in C++. Basic data structures and their use. GE credit: SciEng | SE, VL.—F, W, S. (F, W, S.) Chen, Davis, Gygi

#### 50. Computer Organization and Machine-Dependent Programming (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: grade of C- or better in course 40. Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Comparative study of different hardware architectures via programming in the assembly languages of various machines. Role of system software in producing an abstract machine. Introduction to I/O devices and programming. Only one unit of credit allowed for students who have taken Electrical and Computer Engineering 70. GE credit: SciEng | SE.—F, W, S. (F, W, S.) Butner, Eiselt

**60. Data Structures and Programming (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 20, 40 (C++ and UNIX); grade of C- or better in each course. Design and analysis of data structures for a variety of applications. Trees, heaps, searching, sorting, hashing, graphs. Extensive programming. GE credit: SciEng | QL, SE.—F, W, S. (F, W, S.) Davi

**89A. Special Topics in Computer Science; Computer Science Theory (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Computer Science Theory. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**89B. Special Topics in Computer Science; Architecture (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Architecture. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**89C. Special Topics in Computer Science; Programming Languages and Compilers (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Programming Languages and Compilers. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**89D. Special Topics in Computer Science; Operating Systems (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Operating Systems. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**89E. Special Topics in Computer Science; Software Engineering (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Software Engineering. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**89F. Special Topics in Computer Science; Databases (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Databases. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**89G. Special Topics in Computer Science; Artificial Intelligence (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Artificial Intelligence. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**89H. Special Topics in Computer Science; Computer Graphics (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Computer Graphics. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**89I. Special Topics in Computer Science; Networks (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Programming Networks. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**89J. Special Topics in Computer Science; Computer-Aided Design (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Computer-Aided Design. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**89K. Special Topics in Computer Science; Scientific Computing (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Scientific Computing. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**89L. Special Topics in Computer Science; Computer Science (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Computer Science. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**92. Internship in Computer Science (1-5)**

Internship. Prerequisite: lower division standing; project approval prior to period of internship. Supervised work experience in computer science. May be repeated for credit. (P/NP grading only.)

**98. Directed Group Study (1-5)**

(P/NP grading only.)

**98F. Student Facilitated Course (1-4)**

Prerequisite: consent of instructor. Student facilitated course intended primarily for lower division students. (P/NP grading only.) Offered irregularly.

**99. Special Study for Lower Division Students (1-5)**

(P/NP grading only.)

**Upper Division****120. Theory of Computation (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 20 or Mathematics 108. Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Fundamental ideas in the theory of computation, including formal languages, computability and complexity. Reducibility among computational problems. GE credit: SciEng | QL, SE.—F, W, S. (F, W, S.) Doty, Gysel

**122A. Algorithm Design and Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 20, 60. Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Complexity of algorithms, bounds on complexity, analysis methods. Searching, sorting, pattern matching, graph algorithms. Algorithm design techniques: divide-conquer, greedy, dynamic programming. Approximation methods. NP-complete problems. GE credit: SciEng | SE.—F, W, S. (F, W, S.) Bai, Gysel, Filkov

**122B. Algorithm Design and Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 122A. Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Theory and practice of hard problems, and problems with complex algorithm solutions. NP-completeness, approximation algorithms, randomized algorithms, dynamic programming and branch and bound. Theoretical analysis, implementation and practical evaluations. Examples from parallel, string, graph, and geometric algorithms. GE credit: SciEng | QL, SE.—F, (F.) Gysel

**124. Theory and Practice of Bioinformatics (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 10 or 30 or Engineering 6; Statistics 12 or 13 or 32 or 100 or 131A or Mathematics 135A; Biological Science 2A or Molecular and Cellular Biology 10. Pass One open to Computer Science, Computer Science Engineering, and Biotechnology majors only. Fundamental biological, mathematical and algorithmic models underlying bioinformatics and systems biology; sequence analysis, database search, genome annotation, clustering and classification, functional gene networks, regulatory network inference, phylogenetic trees, applications of common bioinformatics tools in molecular biology and genetics. GE credit: SciEng | SE.—F, (F.) Tagkopoulos

**127. Cryptography (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 20 or Mathematics 108. Pass One open to Computer Science and Computer Science Engineering Majors only. Introduction to the theory and practice of cryptographic techniques used in computer security. Encryption (secret-key and public-key), message authentication, digital signatures, entity authentication, key distribution, and other cryptographic protocols. The social context of cryptography. GE credit: SciEng | QL, SE, SL.—Franklin, Rogaway

**129. Computational Structural Bioinformatics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: college level programming course; Biological Science 2A or Molecular and Cellular Biology 10. Pass One open to Computer Science, Computer Science Engineering, and Biotechnology majors only. Fundamental biological, chemical and algorithmic models underlying computational structural biology; protein structure and nucleic acids structure; comparison of protein structures; protein structure prediction; molecular simulations; databases and online services in computational structural biology. GE credit: SciEng | SE.—F, (F.) Koehl

**130. Scientific Computation (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 30 or Engineering 6; Mathematics 22A or Mathematics 67. Pass One open to Computer Science and Computer Science Engineering Majors only. Matrix-vector approach using MATLAB for floating-point arithmetic, error analysis, data interpolation, least squares data fitting, quadrature, zeros, optimization and matrix eigenvalues and singular values. Parallel computing for matrix operations and essential matrix factorizations. GE credit: SciEng | SE.—W, (W.) Bai

**132. Probability and Statistical Modeling for Computer Science (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 40; course 50 or Engineering Electrical and Computer 70; Mathematics 21C; Mathematics 22A or Mathematics 67. Pass One open to Computer Science and Computer Science Engineering Majors only. Univariate and multivariate distributions. Estimation and model building. Markov/Hidden Markov models. Applications to data mining, networks, security, software engineering and bioinformatics. GE credit: SciEng | QL, SE.—F, W, (F, W.) Ghosal, Matloff

**140A. Programming Languages (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 50 or Electrical Computer Engineering 70; course 60. Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Syntactic definition of programming languages. Introduction to programming language features including variables, data types, data abstraction, object-orientedness, scoping, parameter disciplines, exception handling. Non-imperative programming languages. Comparative study of several high-level programming languages. GE credit: SciEng | SE.—F, W, S. (F, W.) Olsson, Nitta, Su

**140B. Programming Languages (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 140A. Pass One open to Computer Science and Computer Science Engineering Majors only. Continuation of programming language principles. Further study of programming language paradigms such as functional and logic; additional programming language paradigms such as concurrent (parallel); key implementation issues for those paradigms; and programming language semantics. Offered in alternate years. GE credit: SciEng | SE.—Levitt, Olson, Pandey

**142. Compilers (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 20, 140A; course 120 recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Principles and techniques of lexical analysis, parsing, semantic analysis, code generation, and code optimization. Implementation of compilers. GE credit: SciEng | SE.—Pandey, Su

**145. Scripting Languages and Their Applications (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: programming skill at the level of course 60. Pass One open to Computer Science and Computer Science Engineering Majors only. Goals and philosophy of scripting languages, with Python and R as prime examples. Applications include networking,

data analysis and display, and graphical user interfaces (GUIs). Offered in alternate years. GE credit: SciEng | SE. —F. (F.) Matloff

### **150. Operating Systems and System Programming (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 40; course 50 or Electrical and Computer Engineering 170. Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Basic concepts of operating systems and system programming. Processes and interprocess communication/synchronization; virtual memory, program loading and linking; file and I/O subsystems; utility programs. Study of a real operating system. GE credit: SciEng | SE.—W, S. (W, S.) Levitt, Wu

### **152A. Computer Networks (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 60; course 132 or Electrical and Computer Engineering 161 or Mathematics 135A or Statistics 131A, or Statistics 120 or Statistics 32. Pass One open to Computer Science and Computer Science Engineering Majors only. Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis. Only 2 units of credit for students who have taken course 157. (Same course as Electrical and Computer Engineering 173A.) GE credit: SciEng | SE.—F, W, S. (F, W, S.) Ghosal, Mukherjee

### **152B. Computer Networks (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 152A or Electrical and Computer Engineering 173A. Pass One open to Computer Science and Computer Science Engineering Majors only. TCP/IP protocol suite, computer networking applications, clientserver and peer-to-peer architectures, application-layer protocols, transport-layer protocols, transport-layer interfaces, sockets, network programming, remote procedure calls, and network management. GE credit: SciEng | SE.—Ghosal, Matloff, Mohapatra, Mukherjee

### **152C. Advanced Topics in Computer Networks (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 152A or Electrical and Computer Engineering 173A. Advanced topics in computer networks, wireless networks, multimedia networking, traffic analysis and modeling, network design and management, network simulation and performance analysis, and design projects in communication networks. (Same course as Electrical and Computer Engineering 173B.) Offered in alternate years. GE credit: SciEng | SE.—Chauhan, Liu, Mukherjee

### **153. Computer Security (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 150, 152A. Pass One open to Computer Science and Computer Science Engineering Majors only. Principles, mechanisms, and implementation of computer security and data protection. Policy, encryption and authentication, access control, and integrity models and mechanisms; network security; secure systems; programming and vulnerabilities analysis. Study of an existing operating system. Not open for credit to students who have completed course 155. GE credit: SciEng | SE.—F. (F.) Bishop

### **154A. Computer Architecture (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 50 or Electrical and Computer Engineering 70. Introduction to digital design. Interfacing of devices for I/O, memory and memory management. Input/output programming, via wait loops, hardware interrupts and calls to operating system services. Hardware support for operating systems software. GE credit: SciEng | SE.—F, W. (F, W.) Butner, Davis

### **154B. Computer Architecture (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 154A or both Electrical and Computer Engineering 170 and Electrical and Computer Engineer-

ing 180A. Pass One open to Computer Science and Computer Science Engineering Majors only. Hardwired and microprogrammed CPU design. Memory hierarchies. Uniprocessor performance analysis under varying program mixes. Introduction to pipelining and multiprocessors. GE credit: SciEng | SE.—W, S. (W, S.) Farrens

### **158. Programming on Parallel Architectures (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 150 and 154B recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Techniques for software development using the shared-memory and message-passing paradigms, on parallel architectures and networks of workstations. Locks, barriers, and other techniques for synchronization. Introduction to parallel algorithms. GE credit: SciEng | SE.—F. (F.) Gygi

### **160. Software Engineering (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 140A. Pass One open to Computer Science and Computer Science Engineering Majors only. Requirements, specification, design, implementation, testing, and verification of large software systems. Study and use of software engineering methodologies. Team programming. GE credit: SciEng | SE.—F, W. (F, W.) Nitta

### **163. Information Interfaces (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 60. Pass One open to Computer Science and Computer Science Engineering Majors only. Art and science of information visualization and interfaces for information systems. Design principles of human-computer interaction. Visual display and navigation of nonspatial and higher dimensional data. Implementations, performance issues, tradeoffs, and evaluation of interactive information systems. GE credit: SciEng | SE, VL.—W. (W.) Ma

### **165A. Database Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 60. Pass One open to Computer Science and Computer Science Engineering Majors only. Database modeling and design (E/R model, relational model), relational algebra, query languages (SQL), file and index structures, query processing, transaction management. GE credit: SciEng | SE.—F. (F.) Nitta

### **165B. Database Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 165A. Pass One open to Computer Science and Computer Science Engineering Majors only. Data modeling (object-relational, graph-based, spatiotemporal models). Querying semistructured data (XML). Database theory (normalization, integration, provenance). Database programming (stored procedures, embedded SQL, web programming). Advanced topics (data warehousing, parallel data processing). GE credit: SciEng | SE.—S. (S.)

### **170. Introduction to Artificial Intelligence (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 60. Pass One open to Computer Science and Computer Science Engineering Majors only. Design and implementation of intelligent computer systems. Knowledge representation and organization. Memory and inference. Problem solving. Natural language processing. GE credit: SciEng | SE.—W. (W.) Davidson

### **171. Machine Learning (4)**

Lecture—3 hours; discussion—1 hour. Pass One open to Computer Science and Computer Science Engineering Majors only. Introduction to machine learning. Supervised and unsupervised learning, including classification, dimensionality reduction, regression and clustering using modern machine learning methods. Applications of machine learning to other fields. GE credit: SciEng | SE.—F. (F.) Tagkopoulos

### **173. Image Processing and Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 60; Mathematics 67 or C- or better in Mathematics 22A. Pass One open to Computer Science and Computer Science Engineering Majors only.

Techniques for automated extraction of high-level information from images generated by cameras, three-dimensional surface sensors, and medical devices. Typical applications include detection of objects in various types of images and describing populations of biological specimens appearing in medical imagery. GE credit: SciEng | SE.—S. (S.)

### **174. Computer Vision (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 60; Mathematics 22A or Mathematics 67. Pass One open to Computer Science and Computer Science and Engineering Majors only. Computer vision is the study of enabling machines to "see" the visual world (e.g., understand images and videos). Explores several fundamental topics in the area, including feature detection, grouping and segmentation, and recognition. GE credit: SciEng | SE.—S. (S.) Lee

### **175. Computer Graphics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 60; Mathematics 22A or Mathematics 67. Pass One open to Computer Science and Computer Science Engineering Majors only. Principles of computer graphics, with a focus on interactive systems. Current graphics hardware, elementary operations in two-and threedimensional space, geometric transformations, camera models and interaction, graphics system design, standard graphics APIs, individual projects. GE credit: SciEng | SE, VL.—F, W. (F, W.) Hamann, Joy

### **177. Scientific Visualization (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 175. Pass One open to Computer Science and Computer Science Engineering Majors only. Computer graphics techniques for generating images of various types of measured or computer-simulated data. Typical applications for these graphics techniques include study of air flows around car bodies, medical data, and molecular structures. GE credit: SciEng | SE, VL.—W. (W.) Max

### **178. Geometric Modeling (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 175. Pass One open to Computer Science and Computer Science Engineering Majors only. Interactive graphics techniques for defining and manipulating geometrical shapes used in computer animation, car body design, aircraft design, and architectural design. GE credit: SciEng | SE, VL.—S. (S.) Hamann

### **188. Ethics in an Age of Technology (4)**

Lecture/discussion—4 hours. Prerequisite: upper division standing. Pass One open to Computer Science and Computer Science Engineering Majors only. Foundations of ethics. Views of technology. Technology and human values. Costs and benefits of technology. Character of technological change. Social context of work in computer science and engineering. GE credit: SocSci, Wrt | SS, SL, WE.—F, W, S. (F, W, S.) Davidson, Eiselt, Gusfield, Koehl, Matlaff, Rogaway

### **189A. Special Topics in Computer Science; Computer Science Theory (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Computer Science Theory. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

### **189B. Special Topics in Computer Science; Architecture (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Architecture. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

### **189C. Special Topics in Computer Science; Programming Languages and Compilers (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Programming Languages and Compilers. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189D. Special Topics in Computer Science; Operating Systems (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Operating Systems. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189E. Special Topics in Computer Science; Software Engineering (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Software Engineering. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189F. Special Topics in Computer Science; Databases (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Databases. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189G. Special Topics in Computer Science; Artificial Intelligence (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Artificial Intelligence. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189H. Special Topics in Computer Science; Computer Graphics (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Computer Graphics. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189I. Special Topics in Computer Science; Networks (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Networks. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189J. Special Topics in Computer Science; Computer-Aided Design (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Computer-Aided Design. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189K. Special Topics in Computer Science; Scientific Computing (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Scientific Computing. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189L. Special Topics in Computer Science; Computer Science (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Computer Science. May be repeated for credit when topic differs. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189M. Special Topics in Computer Science; Computer Security (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Computer Security. May be repeated for credit when topic differs. Offered irregularly.

**189N. Special Topics in Computer Science; Bioinformatics and Computational Biology (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Bioinformatics and Computational Biology. May be repeated for credit when topic differs. Offered irregularly.

**190C. Research Group Conferences in Computer Science (1)**

Discussion—1 hour. Prerequisite: upper division standing in Computer Science and Engineering; consent of instructor. Research group conferences. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

**190X. Senior Seminar (2)**

Seminar—2 hours. Prerequisite: senior standing. Examination of a special topic in a small group setting.

**192. Internship in Computer Science (1-5)**

Internship. Prerequisite: completion of a minimum of 84 units; project approval prior to period of internship. Supervised work experience in computer science. May be repeated for credit. (P/NP grading only.)

**193A. Senior Design Project (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 160 recommended (may be concurrent) or consent of instructor. Pass One open to Computer Science Engineering Majors only; Pass Two open to Computer Science and Computer Science Engineering Majors only. Team design project involving analysis, design, implementation and evaluation of a large-scale problem involving computer and computational systems. The project is supervised by a faculty member. Students must take course 193A and 193B to receive credit. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.—W. (W.) Liu

**193B. Senior Design Project (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: IP grade in course 193A. Pass One open to Computer Science Engineering Majors only; Pass Two open to Computer Science and Computer Science Engineering Majors only. Team design project involving analysis, design, implementation and evaluation of a large-scale problem involving computer and computational systems. The project is supervised by a faculty member. Students must take course 193A and 193B to receive credit. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.—S. (S.) Liu

**197T. Tutoring in Computer Science (1-3)**

Discussion—1 hour; laboratory/discussion—3-6 hours. Prerequisite: consent of instructor. Restricted to upper-division standing. Tutoring in computer science courses, especially introductory courses. (P/NP grading only.)—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**198F. Student Facilitated Course (1-4)**

Prerequisite: consent of instructor. Student facilitated course intended primarily for upper division students. (P/NP grading only.) Offered irregularly.

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**199FA. Student Facilitated Course Development (1-4)**

Prerequisite: course 3 or University Writing Program 1; consent of instructor. STU FAC. Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 98F/198F. (P/N grading only.) Offered irregularly.

**199FB. Student Facilitated Teaching (1-4)**

Prerequisite: course 199FA; consent of instructor. STU FAC. Under the supervision of a faculty member, an undergraduate student teaches a course under 98F/198F. (P/N grading only.) Offered irregularly.

**The Graduate Program in Computer Science**

Doctoral and Masters degrees in Computer Science are offered through the interdisciplinary Graduate Group in Computer Science. Please see <http://www.cs.ucdavis.edu> and Computer Science (A Graduate Group), on page 230, for a description of graduate education offerings, requirements, group faculty and research foci.

**Graduate****201A. Advanced Computer Architecture (4)**

Lecture—3 hours; term paper. Prerequisite: course 154B or Electrical and Computer Engineering 170; course 150. Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Modern research topics and methods in computer architecture. Design implications of memory latency and

bandwidth limitations. Performance enhancement via within-processor and between-processor parallelism. Term project involving student-proposed extensions/modifications of work in the research literature. Not open for credit to students who have completed course 250A.—F. (F.) Farrens

**201B. High-Performance Uniprocessing (4)**

Lecture—3 hours; term paper. Prerequisite: course 201A. Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Maximizing uniprocessor performance. Barriers to high performance; solutions to the problems; historical and current processor designs. Not open for credit to students who have completed course 250B. Offered in alternate years.—(W.) Farrens

**201C. Parallel Architectures (4)**

Lecture—3 hours; project—1 hour. Prerequisite: course 201A. Evolution of parallel architectures from special-purpose machines to commodity servers. Emphasis on recent machines and applications that drive them. Not open for credit to students who have completed course 250C.

**203. Novel Computing Technologies (4)**

Lecture—3 hours; project—1 hour. Prerequisite: course 201A. Pass One and Pass Two open to Graduate Students in Computer Science only. Novel computing technologies that could revolutionize computer architecture. Quantum computing technologies, including algorithms, devices, and fault tolerance. A survey of other unconventional technologies including nanoscale electronics, MEMS devices, biological devices, and nanotechnology. Offered in alternate years.—(W.) Chong

**220. Theory of Computation (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 120, 122A. Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Time and space complexity classes. Reductions, completeness, and the role of randomness. Logic and undecidability.—W. (W.) Doty

**221. Computational Methods in Systems and Synthetic Biology (4)**

Lecture—3 hours; discussion—1 hour. Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Computational methods related to systems and synthetic biology. An overview of machine learning techniques related to the analysis of biological data, biological networks. Predictive modeling and simulation of biological systems. Topics on biological circuit construction.—F. (F.) Tagkopoulos

**222A. Design and Analysis of Algorithms (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 122A; Statistics 31A recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Techniques for designing efficient algorithms, analyzing their complexity and applying these algorithms to a broad range of applications. Methods for recognizing and dealing with difficult problems.—S. (F.) Gysel

**222B. Advanced Design and Analysis of Algorithms (4)**

Lecture—3 hours; project—1 hour. Prerequisite: course 222A. Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in complexity theory. Problem classification. The classes P, NP, P-space, co-NP. Matching and network flow algorithms. Matrix multiplication. Approximation algorithms.—(W.) Gusfield, Franklin, Martel, Rogaway

**223. Parallel Algorithms (4)**

Laboratory/discussion—3 hours; project—1 hour. Prerequisite: course 222A. Pass One and Pass Two open to Graduate Students in Computer Science only. Models of parallel computer systems including PRAMs, loosely coupled systems and interconnection networks. Parallel algorithms for classical problems and general techniques for their design and analysis. Proving lower bounds on parallel computation in several settings. Offered in alternate years.—(F.) Amenta, Martel

**224. String Algorithms and Applications in Computational Biology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 122A. Pass One and Pass Two open to Graduate Students in Computer Science only. Algorithms that operate on strings. Pattern matching, sets of patterns, regular expression pattern matching, suffix trees and applications, inexact similarity, parametric sequence alignment, applications to DNA sequencing and protein database searching. Offered in alternate year.—(F.) Gusfield

**225. Graph Theory (3)**

Lecture—3 hours. Prerequisite: graduate standing in electrical engineering or computer science or consent of instructor. Pass One and Pass Two open to Graduate Students in Computer Science only. Fundamental concepts. Vector spaces and graphs. Planar graphs: Whitney's and Kuratowski's theorems. Topological parameters: packings and coverings. Connectivity: Menger's theorem. Hamilton graphs: Posa's and Chvatal's theorems. Graph factorization: Tutte's theorem. Graph coloring: Brooks; and Vizing's theorem.—S. (W.) Gusfield

**226. Computational Geometry (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 175, 222A. Pass One and Pass Two open to Graduate Students in Computer Science only. Mathematics of unstructured data. Algorithms for data structures such as Voronoi diagrams, oct-trees, and arrangements. Applications in computer graphics, concentrating on problems in three-dimensions. Offered in alternate years.—(S.) Amenta, Max

**227. Modern Cryptography (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 220 or 222A. Pass One and Pass Two open to Graduate Students in Computer Science only. Modern cryptography as a discipline emphasizing formal definitions and proofs of security. One-way functions, pseudo-randomness, encryption, digital signatures, zero-knowledge, secure protocols. Offered in alternate years.—(W.) Rogaway

**228. Cryptography for E-Commerce (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 222A. Pass One and Pass Two open to Graduate Students in Computer Science only. Cryptographic primitives and protocols of importance to e-commerce, present and future, including content distribution mechanisms, payment mechanisms, pricing mechanisms, anonymity and privacy mechanisms, fair exchange mechanisms. Offered in alternate years.—(W.) Franklin

**229. Advanced Computational Structural Bioinformatics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing. Pass One and Pass Two open to Graduate Students in Computer Science only. Algorithmic problems in structural biology; protein structure classification; protein structure prediction (including comparative modeling and ab initio protein structure prediction); molecular simulations (molecular dynamics and Monte Carlo simulations). Offered in alternate years.—(W.) Koehl

**230. Applied Numerical Linear Algebra (4)**

Laboratory/discussion—3 hours; discussion—1 hour. Prerequisite: course 130 or Engineering Applied Science 209 or Mathematics 167. Pass One and Pass Two open to Graduate Students in Computer Science only. Numerical linear algebra (NLA) with emphasis on applications in engineered systems; matrix factorizations; perturbation and rounding error analyses of fundamental NLA algorithms.—S. (S.) Gygi

**231. Large-Scale Scientific Computation (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 130. Pass One and Pass Two open to Graduate Students in Computer Science only. Algorithms and techniques for large-scale scientific computation, including basics for high performance computing, iterative methods, discrete approximation, fast Fourier transform, Poisson solvers, particle methods, spectral graph partition and its applications. Offered in alternate years.—(S.) Bai

**234. Computational Functional Genomics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 124; graduate standing in Computer Science or Life Sciences. Pass One and Pass Two open to Graduate Students in Computer Science only. Bioinformatics methods for analysis and inference of functional relationships among genes using large-scale genomic data, including methods for integration of gene expression, promoter sequence, TF-DNA binding and other data, and approaches in modeling of biological networks.—(W.) Filkov

**235A. Computer and Information Security (4)**

Lecture—3 hours; project. Prerequisite: course 150; course 152A recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Modern topics in computer security, including: protection, access control, operating systems security, network security, applied cryptography, cryptographic protocols, secure programming practices, safe languages, mobile code, malware, privacy and anonymity, and case studies from real-world systems. Not open for credit to students who have taken course 235.—F. (F.) Chen

**235B. Foundations of Computer and Information Security (4)**

Lecture—3 hours; project. Prerequisite: course 235A; courses 120, 150 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Theoretical foundations of methods used to protect data in computer and communication systems. Access control matrix and undecidability of security; policies; Bell-LaPadula, Biba, Chinese Wall models; non-interference and non-deducibility; information flow and the confinement problem. Not open for credit to students who have taken course 235.—W. (W.) Bishop

**236. Computer Security: Intrusion Detection Based Approach (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 150; 153 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Concepts of intrusion detection, anomaly detection based on machine learning, signature-based detection using pattern matching, automated response to attacks using artificial intelligence planning, tracing intruders based on principal component analysis, security policy languages. Offered in alternate years.—(S.) Levitt

**240. Programming Languages (4)**

Lecture—3 hours; discussion—1 hour. Prerequisites: courses 140A; 142. Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in programming languages, including formal syntax and semantics, the relation between formal semantics and verification, an introduction to the lambda calculus. Additional topics will include language design principles, alternative programming languages, in-depth semantic theory and models of language implementation.—W. (W.) Su

**242. Translation of Programming Languages (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 240. Pass One and Pass Two open to Graduate Students in Computer Science only. Lexical analysis, parsing, storage management, symbol table design, semantic analysis and code generation. LR, LALR grammars. Compiler-compilers.—(S.) Pandey

**243. Code Generation and Optimization (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 201A or Engineering Electrical and Computer 270. Pass One and Pass Two open to Graduate Students in Computer Science only. Compiler optimizations for performance, code size and power reduction. Topics include control- and data-flow analysis, redundancy elimination, loop and cache optimizations, register allocation, local and global instruction scheduling, and modulo scheduling.—(W.) Wilken

**244. Principles of Concurrent Programming (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 20, 150. Pass One and Pass Two open to Graduate Students in Computer Science only. Fundamental concepts and applications of concurrent programs; concurrent program verification and derivation; synchronization mechanisms in programming languages; distributed programming techniques; case studies of languages.—F. (F.) Olsson

**247. Concurrent Programming Languages (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 140A, 150. Pass One and Pass Two open to Graduate Students in Computer Science only. Language design parameters. Models of parallel machines. Load balancing. Scalability. Portability. Efficiency measures. Design and implementation techniques for several classes of concurrent programming languages (such as object-oriented, functional, logic, and constraint programming languages).—(F.) Olsson, Pandey

**251. Operating Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 150. Pass One and Pass Two open to Graduate Students in Computer Science only. Models, design, implementation, performance evaluation in operating systems. Algorithms, internal architectures for single processor OS and distributed systems. Concurrency control, recovery, security. OS kernel-level programming. Special topics embedded systems, real-time system, device driver, NPU (Network Processor Unit).—S. (S.) Nitta

**252. Computer Networks (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 152B. Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Internet protocol based computer networks applications, transport, network layer protocols. High speed LAN technologies: Ethernet, Asynchronous Transfer Mode (ATM). Delay models in data networks: analysis of multi-access techniques in polling, ring, random access networks. Multimedia applications requirements and design.—(S.) Ghosal, Mukherjee, Mohapatra

**253. Network Theory and Applications (4)**

Lecture/discussion—4 hours. Prerequisite: Mathematics 22A; Mathematics 22B; Statistics 13 or 120; experience with computer software; or consent of instructor. Develops the mathematical theory underlying growth, structure and function of networks with applications to physical, social, biological and engineering systems. Topics include network growth, resilience, epidemiology, phase transitions, software and algorithms, routing and search control, cascading failures. (Same course as Mechanical & Aeronautical Engineering 253.) Offered in alternate years.—(S.) D'Souza

**255. Resource Management in Wireless Communication Networks (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 252A. Advanced research issues in wireless communication networks, including multi-user diversity and cross-layer optimization, basic network information theory, MIMO systems and the impact on networks, and dynamics spectrum management. Offered in alternate years.—(S.) Liu

**256. Performance Evaluation (4)**

Lecture—3 hours; project—1 hour. Prerequisite: courses 20, 152A, 154A-B or Electrical and Computer Engineering 170, Statistics 131A; course 150 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Use of simulation and queueing theory in computer and communication system design. Applications to processor scheduling, memory hierarchies; I/O systems; packet and circuit switched networks; fault-tolerance; computer networks applications. Not open for credit to students who have completed course 256A.

Offered in alternate years.—(F., W.) Ghosal, Matloff, Mohapatra, Mukherjee

**257. Mobile and Wireless Networks (4)**

Lecture—3 hours; independent study. Prerequisite: course 252. Pass One and Pass Two open to Graduate Students in Computer Science only. Fundamental techniques in design of second generation wireless networks: cellular network and protocols, medium access techniques, handoff control, signaling and mobility management, wireless data works, Internet mobility and Personal Communication Services (PCS). Third generation wideband systems, novel technologies, adhoc networks. Offered in alternate years.—(F.) Ghosal, Mohapatra, Mukherjee

**258. Networking Architecture and Resource Management (4)**

Lecture—3 hours; project. Prerequisite: course 152A or Electrical & Computer Engineering 173A. Pass One and Pass Two open to Graduate Students in Computer Science and Electrical and Computer Engineering only. Concepts and design principles of computer networks. Network architectures, protocol mechanisms and implementation principles (transport/network/data-link layers), network algorithms, router mechanisms, design requirements of applications, network simulation, modeling and performance analysis. (Same course as Electrical & Computer Engineering 273.) Offered in alternate years.—W. (W.) Chaudhuri, Mohapatra

**259. Optical Networks (4)**

Lecture—3 hours; independent study. Prerequisite: course 252. Pass One and Pass Two open to Graduate Students in Computer Science only. Optical networks. Enabling technologies. Multiplexing techniques. WDM. Broadcast networks. Wavelength-routed networks. Network architectures. Protocols. Network algorithms. Device-network interface. Optimization problems. Offered in alternate years.—(F.) Ghosal, Mukherjee

**260. Software Engineering (4)**

Lecture—3 hours; project. Prerequisite: course 142; course 160 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced techniques for domain-specific software reuse.—W. (W.) Devanbu

**261. Program Verification (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 125 or Philosophy 112 or familiarity with first-order logic; knowledge of an iterative and functional programming language. Methods of proving correctness of programs with respect to formal specifications, with attention to those suited for employing automated deduction. Logic background, symbolic execution, techniques suited to iterative programming, methods from denotational semantics, termination, dynamic logic and proofs of concurrent programs. Offered in alternate years.—(F.) Levitt

**262. Formal Specification (3)**

Lecture—3 hours. Prerequisite: course 261. Pass One and Pass Two open to Graduate Students in Computer Science only. Formal specification of modules, and its relationship to top-down programming development and verification. Abstract data types, together with methods for specifying them. Implementations and proofs of implementation. Using specifications to reason about programs. Parameterized types. Constructing good formal specifications. Offered in alternate years.—(W.) Levitt

**265. Distributed Database Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 165A. Pass One and Pass Two open to Graduate Students in Computer Science only. Concepts of distributed database systems and architectures, distributed database design, distributed query processing and optimization, transaction management and concurrency control, heterogeneous and multidatabase systems.—(S.) Ludaescher

**266. Spatial Databases (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 165A. Concepts, models, and architectures for spatial databases, spatial access methods, query processing, spatio-temporal data management, moving objects, spatial data mining. Offered in alternate years.—(W.) Ludaescher

**267. Wide-Area Distributed Information Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 152B or 165A. Pass One and Pass Two open to Graduate Students in Computer Science only. Wide-area distributed information systems, data broadcast, multicast, publish/subscribe, service differentiation, information retrieval, Web caching. Offered in alternate years.—(S.)

**268. Scientific Data And Workflow Management (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 165A. Scientific data integration, metadata, knowledge representation, ontologies, scientific workflow design and management. Offered in alternate years.—(W.) Ludaescher

**270. Artificial Intelligence (3)**

Lecture—3 hours. Prerequisite: courses 140A, 172. Pass One and Pass Two open to Graduate Students in Computer Science only. Concepts and techniques underlying the design and implementation of models of human performance on intelligent tasks. Representation of high-level knowledge structures. Models of memory and inference. Natural language and story understanding. Common sense planning and problem solving.—(W.) Levitt

**271. Machine Learning and Discovery (4)**

Lecture—3 hours; project—1 hour. Prerequisite: course 170. Pass One and Pass Two open to Graduate Students in Computer Science only. Artificial intelligence techniques for knowledge acquisition by computers. Fundamental problems in machine learning and discovery. Systems that learn from examples, analogies, and solved problems. Systems that discover numerical laws and qualitative relationships. Projects centering on implementation and evaluation. Offered in alternate years.—(S.) Levitt, Vemuri

**272. Information Visualization (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 163 or 175 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in information visualization: perceptually effective display methods, color design and selection, interaction models and techniques, focus-context techniques, distortion methods, large graph visualization techniques, visual data mining methods, and evaluation methods.—(W.) Ma

**273. Applied Visual Computing (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Visual computing paradigms, current visualization technologies, principles of 3-D graphics, user interface designs, and exploratory visualization. Offered in alternate years.—(F.) Hamann, Joy, Ma, Max

**274. Automated Deduction (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 125 or Philosophy 112 or familiarity with first-order logic. Techniques of mechanical theorem proving. Methods based on resolution and term-rewriting. Decision procedures. Induction. Applications to program verification, question/answering and plan generation. Study existing mechanical theorem provers. Offered in alternate years.—(S.) Levitt

**275A. Advanced Computer Graphics (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 175 or 177 or 178. Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in computer graphics. Hidden surface models, rendering of various surface types, subdivision methods, shading techniques, anti-aliasing, modeling techniques.—W. (W.)

**275B. Advanced Computer Graphics (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 175 or 177 or 178. Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Advanced topics in computer graphics and geometric modeling. Topics taken from advanced research papers in computer graphics, image synthesis, visualization and geometric modeling. Discussion of current research in the field. Offered in alternate years.—(W.) Joy, Hamann, Ma

**276. Advanced Volume Visualization (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 177. Pass One and Pass Two open to Graduate Students in Computer Science only. Applications, available tools and techniques, the challenges confronting the field of volume visualization, and some of the advanced topics in the field. Primary emphasis on advanced software and hardware techniques to achieve interactive visualization. Offered in alternate years.—(S.) Hamann, Joy, Ma, Max

**277. Advanced Visualization (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 177. Visualization of 3D data, including scalar fields, vector fields, and medical data.—W. (W.) Ma

**278. Computer-Aided Geometric Design (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 175. Mathematical techniques for the definition and manipulation of curves and surfaces, Bezier curves and surfaces, B-spline curves and surfaces, subdivision surfaces, wavelets. Integration into various computer graphics rendering models, visualization systems and computer-aided design systems. Offered in alternate years.—S. (S.) Hamann, Joy

**279. Computer Animation (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 175 or 275. Pass One and Pass Two open to Graduate Students in Computer Science only. Course surveys current research and fundamental techniques that lie behind character animation tools. Emphasis on improving expressive aspects of movement and how physics, motion capture data, the arts and psychology literature, and interactive techniques can be used towards this goal. Offered in alternate years.—S. Neff

**280. Virtual Reality Technology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 175. Pass One and Pass Two open to Graduate Students in Computer Science only. Fundamentals and principles of Virtual Reality (VR) technology. Potential and limits for its useful application. Developing a complete virtual reality application. Offered in alternate years.—(S.) Joy

**289A. Special Topics in Computer Science; Computer Science Theory (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Computer Science Theory. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289B. Special Topics in Computer Science; Architecture (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Architecture. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289C. Special Topics in Computer Science; Programming Languages and Compilers (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Programming Languages and Compilers. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289D. Special Topics in Computer Science; Operating Systems (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Operating Systems. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289E. Special Topics in Computer Science; Software Engineering (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Software Engineering. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289F. Special Topics in Computer Science; Databases (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Databases. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289G. Special Topics in Computer Science; Artificial Intelligence (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Artificial Intelligence. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289H. Special Topics in Computer Science; Computer Graphics (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Computer Graphics. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289I. Special Topics in Computer Science; Networks (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Networks. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289J. Special Topics in Computer Science; Computer-Aided Design (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Computer-Aided Design. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289K. Special Topics in Computer Science; Scientific Computing (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Scientific Computing. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289L. Special Topics in Computer Science; Computer Science (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Computer Science. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289M. Special Topics in Computer Science; Security (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Security. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289N. Special Topics in Bioinformatics and Computational Biology (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Bioinformatics and Computational Biology. May be repeated for credit when topic differs. Offered irregularly.

**290. Seminar in Computer Science (1)**

Seminar—1 hour. Participating seminar; discussion and presentation of current research and development in computer science. (S/U grading only.)—F, W, S. (F, W, S.)

**290C. Graduate Research Group Conference (1)**

Discussion—1 hour. Research problems, progress and techniques in computer science. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**293A. Research in Computer Science (1)**

Lecture—1 hour. Prerequisite: graduate standing in computer science. Pass One and Pass Two open to Graduate Students in Computer Science only. Study of research topics in computer science, Ph.D. level research methodologies (experimental, applied and theoretical). Study skills necessary to successfully find/solve significant research problems. Finding and successful interacting with a research adviser. Ethical issues in research/collaborative work. (S/U grading only.)—F. (F) Nitta

**293B. Research in Computer Science (1)**

Lecture—1 hour. Prerequisite: graduate standing in computer science; graduate standing in computer science; 293A recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Study of Ph.D. level research methodologies (experimental, applied and theoretical), presenting research results for the computer science community. Study skills necessary to successfully find/solve significant research problems. (S/U grading only.)—W. (W) Martel

**298. Group Study (1-5)**

Lecture, laboratory, or combination. Prerequisite: consent of instructor. (S/U grading only.)

**299. Research (1-12)**

(S/U grading only.)

**Professional****390. The Teaching of Computer Science (1)**

Discussion—1 hour. Prerequisite: meet qualifications for teaching assistant and/or associate-in in Pass One and Pass Two open to Graduate Students in Computer Science only. Computer Science Computer Science. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Engineering: Electrical and Computer Engineering

(College of Engineering)

Kent Wilken, Ph.D., Chairperson of the Department

Soheil Ghiasi, Ph.D., Vice Chairperson for Undergraduate Studies

Rajeevan Amirtharajah, Ph.D., Vice Chairperson for Graduate Studies

**Department Office.** 2064 Kemper Hall  
530-752-0583; <http://www.ece.ucdavis.edu>

V. Ralph Algazi, Ph.D., Professor Emeritus  
Robert W. Bower, Ph.D., Professor Emeritus  
Tsu-Shuan Chang, Ph.D., Professor Emeritus  
John N. Churchill, Ph.D., Professor Emeritus  
Jean-Pierre Colinge, Ph.D., Professor Emeritus  
K. Wayne Current, Ph.D., Professor Emeritus  
Andrew J. Dienes, Ph.D., Professor Emeritus

Richard C. Dorf, Ph.D., Professor Emeritus

Herman J. Fink, Ph.D., Professor Emeritus

Gary E. Ford, Ph.D., Professor Emeritus

*Academic Senate Distinguished Teaching Award*

William A. Gardner, Ph.D., Professor Emeritus

Mohammed S. Ghausi, Ph.D., Professor Emeritus/

Dean Emeritus

Stephen Haley, Ph.D., Professor Emeritus

Jonathan P. Heritage, Ph.D., Professor Emeritus

T.C. Steve Hsia, Ph.D., Professor Emeritus

Vojin G. Oklobdzija, Ph.D., Professor Emeritus

G.R. Redinbo, Ph.D., Professor Emeritus

Ronald F. Soohoo, Ph.D., Professor Emeritus

Richard R. Spencer, Ph.D., Professor Emeritus

Shih-Ho Wang, Ph.D., Professor Emeritus

**Affiliated Faculty**

Shu Lin, Ph.D., Adjunct Professor

Augusto Sarti, Ph.D., Adjunct Professor

Diego Yankelevich, Ph.D., Adjunct Professor

### The Electrical and Computer Engineering Undergraduate Programs

The department administers two undergraduate curricula in the College of Engineering: (1) the Electrical Engineering curriculum and (2) the Computer Engineering curriculum.

**Integrated Degree Program (IDP).**

The IDP leads to both the Bachelor of Science and the Master of Science degrees. The program provides a student the opportunity to obtain superior breadth and depth of technical material. The IDP program in the Department of Electrical and Computer Engineering is available only to UC Davis undergraduates with strong academic records enrolled in the Electrical Engineering, Computer Engineering, Electronic Materials Engineering or Applied Physics curricula. Applicants in their junior year must apply for the IDP by March 31. For more information on IDP, see <http://www.ece.ucdavis.edu>.

**Mission.** Under its land grant status, the University of California has a mission to provide the state with the trained workforce it needs and to advance knowledge and research in directions that contribute to the general welfare of the state and the nation.

The Department of Electrical and Computer Engineering contributes to the mission of the University in three ways. First, its undergraduate and graduate education programs seek to provide students with an understanding of the fundamental principles of electrical and computer engineering, the skills needed to solve the complex technological problems of modern society and the ability to continue to learn and develop throughout their careers. Second, through its research programs, the department contributes to the development and progress of electronics, communications, and computer technology. Finally, the department helps to transfer research results to industry through publication, public service and professional activities.

**Objectives.** **Teaching**—To provide undergraduate students with sufficient breadth to allow them to participate in teams, continue their own education after graduation and select a focus area intelligently; to provide undergraduate students with sufficient depth in a narrower discipline to allow them to develop the ability to solve complex engineering problems; to educate the students in the graduate program to be leaders in industry or to do meaningful research in industry, government or academia. **Research**—To develop and maintain research programs that produce useful technological advances while simultaneously training the next generation of researchers and leaders; to update and/or shift the foci of these programs frequently in response to the needs of our constituency and the nation; to provide a stimulating environment that encourages our graduate students to develop their abilities as far as possible.

## Electrical Engineering Undergraduate Program

The Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET; see <http://www.abet.org>.

Electrical engineering involves the design, analysis, and effective use of electrical systems including electronic computers. Electrical systems and computers play a central role in nearly all aspects of modern life, including communication, medicine, education, environmental protection, space exploration, defense, and home entertainment.

Students who complete the Electrical Engineering curriculum will obtain a Bachelor of Science in Electrical Engineering, one of the engineering degrees recognized in all fifty states as eligible for registration as a Professional Engineer.

**Objectives.** The Electrical Engineering program has adopted the following objectives to serve the long-term interests of our students and the industries of Northern California and the nation. *Foundation*—To provide our graduates with a solid foundation in engineering science, including mathematics, physical science, and the fundamentals of electrical engineering. This foundation is necessary to succeed in more advanced engineering courses and to be able to continue learning throughout a career. *Breadth*—To provide our graduates the sufficient breadth in electrical engineering in order to understand engineering tradeoffs that cross disciplines, to contribute effectively to multidisciplinary projects and to make an informed decision about their area of specialization. *Depth*—To provide our graduates with sufficient depth in a specific area of electrical engineering necessary to solve complex real-world engineering problems and to contribute to a specific discipline within electrical engineering. *Ethics*—To provide our graduates with a basic understanding of, and ability to handle correctly, ethical problems that may arise during their careers. To provide them with an understanding of their obligations to society at large.

Exclusive of General Education units, the minimum number of units for the Electrical Engineering major is 146.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

### Lower Division Required Courses

	UNITS
Mathematics 21A-21B-21C-21D	16
Mathematics 22A-22B	6
Physics 9A-9B-9C-9D	19
Chemistry 2A	5
Computer Science Engineering 30	4
Engineering 6, 17	8
Electrical and Computer Engineering 1, 10	5
(Electrical and Computer Engineering 10 is designed for sophomore students and is not recommended for upper-division students. Transfer and change of major students who do not take Electrical and Computer Engineering 10 will substitute four additional units of upper-division electives.)	
English 3 or University Writing Program 1, 1Y or 1V or Comparative Literature 1, 2, 3, or 4, or Native American Studies 5 (grade of C- or better required)	4
Communication 1 or 3	4

### Upper Division Requirements:

#### Electrical Engineering Curriculum

##### Areas of Specialization

For updated recommended courses, see the department website at <http://www.ece.ucdavis.edu/undergrad/undergradhandbook.html>.

**Physical Electronics:** solid-state devices, circuits and fabrication and the theory courses supporting those subjects.

##### Recommended elective courses:

**Core electives:** Electrical and Computer Engineering 130B, 140B  
**Design Electives with Lab:** Electrical and Computer Engineering 118, or 132A, 132B or 135. Select remaining upper-division design electives from Electrical and Computer Engineering 110B, 146A, 146B  
**Technical electives:** Electrical and Computer Engineering 112, 180B

**Suggested Advisers.** S. Chowdhury, E. Seker, J. Hihath, C.E. Hunt, S. Islam, J.M. Woodall

**Electromagnetics:** microwave circuits and systems, and fiber optical systems.

##### Recommended elective courses:

**Core electives:** Electrical and Computer Engineering 130B, 140B  
**Design Electives with Lab:** Electrical and Computer Engineering 132A, 132B. Select remaining upper division design electives from Electrical and Computer Engineering 110B, 132C, 135

**Technical electives:** Select from Electrical and Computer Engineering 112 and 133

**Suggested Advisers.** G.R. Branner, A. Knoesen, X. Liu, N. Luhmann, O. Momeni, A. Pham, B. Yoo

**Analog Electronics:** transistor- and system-level analog circuit design.

##### Recommended elective courses:

**Core electives:** Electrical and Computer Engineering 110B, 140B, 150B  
**Design Electives with Lab:** at least two from Electrical and Computer Engineering 112, 157A, 165, 195A-195B

Select remaining upper division design electives from Electrical and Computer Engineering 118, 132A, 132B, 132C, 157B, 160, 210

**Technical electives:** Select from Electrical and Computer Engineering 130B, 146A

**Suggested Advisers.** R. Amirtharajah, Q.J. Gu, P.J. Hurst, S.H. Lewis, O. Momeni

**Digital Electronics:** transistor- and system-level digital circuit design.

##### Recommended elective courses:

**Core electives:** Electrical and Computer Engineering 110B, 140B, 150B  
**Design Electives with Lab:** Electrical and Computer Engineering 118 and 180B or 172 or 183 or 195A-195B

Select remaining upper division design electives from Electrical and Computer Engineering 116, 170 or 171

**Technical electives:** Select from Electrical and Computer Engineering 130B and 112 or 146A or 157A or 160 or 210

**Suggested Advisers.** R. Amirtharajah, P.J. Hurst, S.H. Lewis

**Communication Controls and Signal Processing:** digital communication, robotics, classical controls and communication, wireless and cellular digital communication systems, signal and image processing, and computer vision.

##### Recommended elective courses:

**Core electives:** Electrical and Computer Engineering, 150B, 180B

**Design Electives with lab:** Electrical and Computer Engineering 157A and 157B or 165

Select remaining upper division design electives from Electrical and Computer Engineering ..... 160

**Technical Electives:** select from Electrical and Computer Engineering 112, 195A-195B

**Suggested Advisers.** S. Cui, Z. Ding, A.N. Gündes, B.C. Levy, Q. Zhao

### Upper Division Required Courses

Electrical and Computer Engineering 100, 110A, 130A, 140A, 150A, 161, 180A, 196 ..... 31  
 Engineering 160, 190 or Computer Science Engineering 188 ..... 34  
 Upper-division electives\*\*\* ..... 32  
 Choose at least eight courses for a minimum of 32 units from the following:

**Two core electives:** Electrical and Computer Engineering 110B\*, 130B, 140B, 170, 180B\*, one from 150B, 157A\*, or 160  
**Design laboratory electives:** At least two design electives with lab: Electrical and Computer Engineering 110B, 112, 116, 118, 132A, 132B, 132C, 135, 146A, 146B, 152, 157A, 157B, 165, 172, 180B, 183

**At least one design project course\*\*:**  
 Electrical and Computer Engineering 119AB, 134AB, 136AB, 181AB, 193AB, 195AB;

The remaining electives may be any letter-graded upper division Electrical and Computer Engineering course not used to satisfy another major requirement; Computer Science and Engineering 40, 150, 152B, 163, 175, 177, or 178

**Technical electives\*\*\*** ..... 9

Chemistry 2B, 2C and any upper-division course except Chemistry 195 & 197  
 Engineering 35, 45, and any upper-division engineering course not used in satisfaction of core degree requirements, excluding Engineering 100, 160, 190 (each restricted to one unit of technical elective), 198, Computer Science Engineering 132, 155, 157, 188, 154A, & 154B (ECS 154AB courses may be used by EEE majors who did not take EEC 170). A maximum of 6 units for any combination of engineering courses numbered 190C, 192, 198, and 199 may be used.

**Mathematics:** any upper-division course except Mathematics 135A & 197C

**Physics:** any upper-division course except 116, 137, 160 (restricted to one unit of technical elective), 195, 197T

**Statistics:** any upper-division course except Statistics 100, 102, 103, 104, 106, 108, 120, 130A

**Biological Sciences 101, 101D, 102, 103, 104, 120, 120P, 122, 122P, 132**  
**Economics 100, 101, 102, 103, 122, 140**  
**Management 11A, 11B, 100, 120, 140, 150, 160, 170, 180**

**Upper Division Composition Requirement:**  
 One course from the following (a grade of C- or better is required): University Writing Program 101, 102A-L, 104A-T or passing the Upper Division Composition Exam .... 0 or 4

\* Maximum of one course appearing on both the core elective list and the design elective list may be counted in both categories.

\*\* All design project courses are also considered design lab courses and may be counted in both categories simultaneously.

\*\*\* After completion of the upper division elective requirement (at least 8 courses, 2 core, 2 with labs, 1 project) any units in excess of 32 will count toward the technical elective requirement.

## Computer Engineering Undergraduate Program

The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET; see <http://www.abet.org>.

Exclusive of General Education units, the minimum number of units required for the Computer Engineering undergraduate major is 148.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is auth-

rized to drop students from a course for which stated prerequisites have not been completed.

#### Lower Division Required Courses

	UNITS
Mathematics 21A-21B-21C-21D .....	16
Mathematics 22A-22AL-22B .....	7
Physics 9A-9B-9C-9D .....	19
Chemistry 2A.....	5
Computer Science Engineering 20, 30, 40, 60.....	16
Electrical and Computer Engineering 1, 10.....	5
(Electrical and Computer Engineering 10 is designed for sophomore students and is not recommended for upper-division students. Transfer and change of major students who do not take Electrical and Computer Engineering 10 will substitute four additional units of upper-division electives.)	
Engineering 17 .....	4
English 3 or University Writing Program 1, 1Y or 1V or Comparative Literature 1, 2, 3, or 4, or Native American Studies 5 (grade of C- or better) .....	4
Communication 1 or 3 .....	4

#### Upper Division Required Courses

Electrical and Computer Engineering 100, 110A, 140A, 161, 170, 172, 173A, 180A, 180B, 196.....	40
Computer Science Engineering 122A, 150.....	8
Engineering 160, 190, or Computer Science Engineering 188 .....	3-4
Upper-Division Elective Courses: .....	9-11
One design project course: Electrical and Computer Engineering 119AB, 134AB, 136AB, 181AB, 193AB, 195AB	
One upper division Electrical and Computer Engineering or Computer Science course (excluding Computer Science 132, 155, 157, 188, 154A, & 154B).	
Technical electives .....	8
Chemistry 2B, 2C and any upper-division course except Chemistry 195 & 197.	
Engineering 35, 45, and any upper- division engineering course not used in satisfaction of core degree requirements, excluding Engineering 100, 160, 190 (each restricted to one unit of technical elective), 198, Computer Science Engineering 132, 155, 157, 188, 154A, 154B. A maximum of 6 units for any combination of engineering courses numbered 190C, 192, 198, and 199 may be used.	
Mathematics: any upper-division course except Mathematics 135A & 197TC	
Physics: any upper-division course except 116, 137, 160 (restricted to one unit of technical elective), 195, 197T	
Statistics: any upper-division course except Statistics 100, 102, 103, 104, 106, 108, 120, 130A	
Biological Sciences 101, 101D, 102, 103, 104, 120, 120P, 122, 122P, 132	
Economics 100, 101, 102, 103, 122, 140	
Management 11A, 11B, 100, 120, 140, 150, 160, 170, 180	
Upper Division Composition Requirement.....	0 or 4
One course from the following (a grade of C- or better is required): University Writing Program 101, 102A-L, 104A-T or passing the Upper Division Composition Exam.	

#### Electrical Engineering Minor

There has been an increasing need for professionals in most engineering disciplines to understand the fundamentals of electronic circuits, electronic signals, semiconductor devices, applied electromagnetics, control systems, computer systems, and communication systems.

The objective of this minor program is to prepare students with the necessary theoretical and practical

training in one or many of the above mentioned fields. The minor program curriculum is designed to allow flexibility while ensuring a solid foundation of fundamental electrical engineering concepts. The program is expected to accommodate students of diverse backgrounds.

The minor must be outside the department or program of your major and no more than one course may be counted toward both your minor and your major. The courses you take to satisfy the requirements of a minor, including those completed elsewhere, must be approved by an adviser in the Department of Electrical and Computer Engineering. You must have a minimum overall GPA of 2.000 and satisfy the minor course requirements, listed below. To receive notation of this minor on your diploma, you must obtain a minor petition and file it no later than the deadline for filing for graduation.

#### Minor Requirements

	UNITS
Electrical Engineering .....	21

Electrical and Computer Engineering 100.....	5
At least one of the following combinations:	
<i>Analog circuits</i> : Electrical and Computer Engineering 110A and 110B	
<i>Electromagnetics</i> : Electrical and Computer Engineering 130A and 130 B	
<i>Physical Electronics</i> : Electrical and Computer Engineering 140A and 140B	
<i>Signals and Systems</i> : Electrical and Computer Engineering 150A and 150B	
<i>Communication</i> : Electrical and Computer Engineering 150A and 160	
<i>Control Systems</i> : Electrical and Computer Engineering 150A and 157A	
<i>Digital Systems</i> : Electrical and Computer Engineering 180A and 180B .....	8-10
At least 8 additional units of Electrical and Computer Engineering courses numbered 101 or above, except for Electrical and Computer Engineering 190, 192, 196, 197, 198, 199, 298, 299, 390, and 396. (If you elect to do a design project, you must be registered for both quarters).....	8-10

**Minor Advisers.** Z. Ding, X. Liu

#### The Graduate Program in Electrical and Computer Engineering

M.S. and Ph.D.  
<http://www.ece.ucdavis.edu>  
530-752-8251

The Department of Electrical and Computer Engineering prepares graduate students to do meaningful research and acquire skills and insights vital to solving some of the world's most complex technological problems. Our graduate program offers a challenging and stimulating environment, covering optical, wireline and wireless communications, telecommunication networks, computer engineering, circuits, electromagnetics, physical electronics, optoelectronics, control, and signal processing. The depth of resources in the study of circuit design alone, with one of the largest faculty groups in the field in the UC system, distinguishes us from other programs, while our program in microwave communications and devices is unique.

The Electrical and Computer Engineering Graduate Program benefits from the highly interdisciplinary culture at UC Davis and attracts faculty from biomedical, chemical, electrical, computer, civil, and mechanical engineering, as well as computer science and mathematics.

Many of our graduates go on to leadership and technology management roles in industry, returning each year for our industrial affiliates meeting to network with other industry representatives, current students and faculty.

Generous financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid.

#### Research Highlights:

- Communications, control, networking, and signal processing
- Computer engineering
- Electronic circuits
- Optoelectronics
- RF, micro- and millimeter waves
- Physical electronics

#### Research Facilities and Partnerships:

- Center for Information Technology in the Interest of Society
  - Northern California Center for Nanotechnology
  - Center on Polymer Interfaces and Macromolecular Assemblies
  - Lawrence Livermore National Laboratory
  - Lawrence Berkeley National Laboratory
  - Los Alamos National Laboratory
  - California Lighting Technology Center
  - PlanetLab Consortium
  - Sandia National Laboratory
- Complete Information on our website.

#### Courses in Engineering: Electrical and Computer Engineering (EEC)

##### Lower Division

###### 1. Introduction to Electrical and Computer Engineering (1)

Lecture—1 hour. Electrical and Computer Engineering as a professional activity. What Electrical and Computer Engineers know and how they use their knowledge. (P/NP grading only.) GE credit: SE.—F. (F.)

###### 10. Introduction to Digital and Analog Systems (3)

Lecture—1 hour; laboratory—3 hours. Prerequisite: Computer Science Engineering 30, and Physics 9C or 9HD (may be taken concurrently); consent of instructor. Open to Electrical and Computer Engineering sophomores. Interactive and practical introduction to fundamental concepts of electrical and computer engineering by implementing electronic systems, which can be digitally controlled and interrogated, with a programmable microcontroller with the ability to program the electrical connections between analog and digital components. GE credit: SciEng | SE.—W, S. (W, S.)

###### 70. Computer Structure and Assembly Language (4)

Lecture—3 hours; workshop—1 hour. Prerequisite: Computer Science Engineering 30. Computer architecture; machine language; assembly language; macros and conditional macros; subroutine/parameter passing; input-output programming, interrupt and trap; direct-memory-access; absolute and relocatable code; re-entrant code; program development in an operating system. Only one unit of credit to students who have completed Computer Science Engineering 50. GE credit: SciEng | SE.

###### 89A. Special Topics in Electromagnetics (1-5)

Prerequisite: consent of instructor. Special topic in Electromagnetics. May be repeated for credit if topic differs. Offered irregularly. GE credit: SciEng | SE.

###### 89B. Special Topics in Physical Electronics (1-5)

Prerequisite: consent of instructor. Special topic in Physical Electronics. May be repeated for credit if topic differs. Offered irregularly. GE credit: SciEng | SE.

###### 89C. Special Topics in Active and Passive Circuits (1-5)

Prerequisite: consent of instructor. Special topic in Active and Passive Circuits. May be repeated for credit if topic differs. Offered irregularly. GE credit: SciEng | SE.

**89D. Special Topics in Signals and Systems (1-5)**

Prerequisite: consent of instructor. Special topics in Signals and Systems. May be repeated for credit if topic differs. Offered irregularly. GE credit: SciEng | SE.

**89E. Special Topics in Computer Systems and Software (1-5)**

Prerequisite: consent of instructor. Special topics in Computer Systems and Software. May be repeated for credit if topic differs. Offered irregularly. GE credit: SciEng | SE.

**89F. Special Topics in Digital System Design (1-5)**

Prerequisite: consent of instructor. Special topics in Digital System Design. May be repeated for credit if topic differs. Offered irregularly. GE credit: SciEng | SE.

**90C. Research Group Conference in Electrical and Computer Engineering (1)**

Discussion—1 hour. Prerequisite: consent of instructor; lower division standing. Research group conferences. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

**90X. Lower Division Seminar (1-4)**

Seminar—1-4 hours. Prerequisite: consent of instructor. Examination of a special topic in a small group setting. May be repeated for credit.

**92. Internship in Electrical and Computer Engineering (1-5)**

Internship—3-15 hours. Prerequisite: lower division standing; project approval prior to period of internship. Supervised work experience in Electrical and Computer Engineering. May be repeated for credit. (P/NP grading only.)

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**99. Special Study for Lower Division Students (1-5)**

(P/NP grading only.)

**Upper Division****100. Circuits II (5)**

Laboratory—3 hours; lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 17, C or better. Restricted to the following majors: Electrical Engineering, Computer Engineering, Computer Science & Engineering, Electronic Materials Engineering, Electrical Engineering/Materials Science, Optical Science & Engineering, Biomedical Engineering, Applied Physics, Electrical & Computer Engineering graduate students. Theory, application, and design of analog circuits. Methods of analysis including frequency response, SPICE simulation, and Laplace transform. Operational amplifiers and design of active filters. Students who have completed Engineering 100 may receive 3.5 units of credit. GE credit: SciEng | QL, SE, VL.—F, W. (F, W.)

**110A. Electronic Circuits I (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100; course 140A recommended. Use and modeling of nonlinear solid-state electronic devices in basic analog and digital circuits. Introduction to the design of transistor amplifiers and logic gates. GE credit: SciEng | SE, VL.—W, S. (W, S.)

**110B. Electronic Circuits II (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 110A. Analysis and design of integrated circuits. Single-stage amplifiers, cascaded amplifier stages, differential amplifiers, current sources, frequency response, and return-ratio analysis of feedback amplifiers. GE credit: SciEng | SE, VL.—S. (S.)

**112. Communication Electronics (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 110A and 150A; course 110B recommended. Electronic circuits for analog and digital communication, including oscillators, mixers, tuned amplifiers, modulators, demodulators, and phase-

locked loops. Circuits for amplitude modulation (AM) and frequency modulation (FM) are emphasized. GE credit: SciEng | SE.—W. (W.)

**116. VLSI Design (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 110A; course 180A recommended. CMOS devices, layout, circuits, and functional units; VLSI fabrication and design methodologies. GE credit: SciEng | SE.—F. (F.)

**118. Digital Integrated Circuits (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 110A, 180A. Analysis and design of digital integrated circuits. Emphasis on MOS logic circuit families. Logic gate construction, voltage transfer characteristics, propagation delay, and power consumption. Regenerative circuits, sequential elements, interconnect, RAMs, ROMs, and PLAs. GE credit: SciEng | SE.—S. (S.)

**119A. Integrated Circuit Design Project (3)**

Workshop—1 hour; laboratory—6 hours. Prerequisite: course 116 or 118. Design course involving architecture, circuit design, physical design, and validation through extensive simulation of a digital or mixed-signal integrated circuit of substantial complexity under given design constraints. Team project that includes a final report. (Deferred grading only, pending completion of sequence.) GE credit:

SciEng | SE.—W. (W.)

**119B. Integrated Circuit Design Project (3)**

Workshop—1 hour; laboratory—6 hours. Prerequisite: course 119A. Design course involving architecture, circuit design, physical design, and validation through extensive simulation of a digital or mixed-signal integrated circuit of substantial complexity under given design constraints. Team project that includes a final report. (Deferred grading only, pending completion of sequence.) GE credit:

SciEng | SE.—S. (S.)

**130A. Electromagnetics I (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 21D; Physics 9C or 9HD, Engineering 17. Basics of static electric and magnetic fields and fields in materials. Work and scalar potential. Maxwell's equations in integral and differential form. Plan waves in lossless media. Lossless transmission lines. GE credit: SciEng | SE.—F, W. (F, W.)

**130B. Introductory Electromagnetics II (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 130A. Plane wave propagation in lossy media, reflections, guided waves, simple modulated waves and dispersion, and basic antennas. GE credit: SciEng | SE.—S. (S.)

**132A. RF and Microwaves in Wireless Communication (5)**

Lecture—3 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 110A, 130B. Study of Radio Frequency and Microwave theory and practice for design of wireless electronic systems. Transmission lines, microwave integrated circuits, circuit analysis of electromagnetic energy transfer systems, the scattering parameters. GE credit: SciEng | SE.—F. (F.)

**132B. RF and Microwaves in Wireless Communication (5)**

Lecture—3 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 132A. Passive RF and microwave device analysis, design, fabrication, and testing for wireless applications. RF and microwave filter and coupler design. Introductory analysis and design of RF and microwave transistor amplifiers. GE credit: SciEng | SE.—W. (W.)

**132C. RF and Microwaves in Wireless Communications (5)**

Lecture—3 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 132B. RF and microwave amplifier theory and design, including transistor circuit models, stability considerations, noise models and low noise design. Theory and design of microwave transistor oscillators and mixers. Wireless system design and analysis. GE credit: SciEng | SE.—S. (S.)

**133. Electromagnetic Radiation and Antenna Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisites: course 130B. Properties of electromagnetic radiation; analysis and design of antennas: ideal cylindrical, small loop, aperture, and arrays; antenna field measurements. GE credit: SciEng | SE.—F. (F.)

**134A. RF/Microwave Systems Design (3)**

Workshop—3 hours; laboratory—6 hours. Prerequisites: course 130B or 110B or 150A. Class size limited to 24 students. Board-level RF design, fabrication, and characterization of an RF/microwave system, including the antenna, RF front-end, baseband, mix-signal circuits, and digital signal processing models. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.—F. (F.)

**134B. RF/Microwave Systems Design (3)**

Workshop—3 hours; laboratory—6 hours. Prerequisites: course 134A. Class size limited to 24 students. Board-level RF design, fabrication, and characterization of an RF/microwave system, including the antenna, RF front-end, baseband, mix-signal circuits, and digital signal processing models. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.—W. (W.)

**135. Optical Communications I: Fibers (4)**

Lecture—4 hours. Prerequisite: course 130B. Principles of optical communication systems. Planar dielectric waveguides. Optical fibers: single-mode, multi-mode, step and graded index. Attenuation and dispersion in optical fibers. Optical sources (LEDs and lasers) and receivers. Design of digital optical transmission systems. GE credit: SciEng | SE.—W. (W.)

**136A. Electronic Design Project (3)**

Workshop—1 hour; laboratory—6 hours. Prerequisite: Computer Science Engineering 30; courses 100, 180A; and either 110B, 157A (may be taken concurrently), or 180B. Pass One restricted to major. Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.—F. (F.)

**136B. Electronic Design Project (3)**

Workshop—1 hour; laboratory—6 hours. Prerequisite: course 136A. Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.—W. (W.)

**140A. Principles of Device Physics I (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 17; Physics 9D or 9HE. Semiconductor device fundamentals, equilibrium and non-equilibrium statistical mechanics, conductivity, diffusion, electrons and holes, p-n and Schottky junctions, first-order metal-oxide-semiconductor (MOS) field effect transistors, bipolar junction transistor fundamentals. GE credit: SE, SL.—F, W. (F, W.)

**140B. Principles of Device Physics II (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 140A. Electrical properties, designs, models and advanced concepts for MOS, Bipolar, and Junction Field-Effect Transistors, including scaling, minority-carrier distributions, non-ideal effects, and device fabrication methods. MESFET and heterojunction bipolar transistors (HBTs). Fundamentals of solar cells, photodetectors, LEDs and semiconductor lasers. GE credit: SciEng | SE.—S. (S.)

**145. Electronic Materials (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 140A. Electronic and physical properties of materials used in electronics, ICs, optoelectronics and MEMS. Semiconductors, dielectrics, metals, optical materials, organic semiconductive, optical

and nonlinear properties, as well as their synthesis and deposition methods. GE credit: SciEng | SE. —W. (W.)

#### **146A. Integrated Circuits Fabrication (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 140A. Basic fabrication processes for Metal Oxide Semiconductor (MOS) integrated circuits. Laboratory assignments covering oxidation, photolithography, impurity diffusion, metallization, wet chemical etching, and characterization work together in producing metal-gate PMOS test chips which will undergo parametric and functional testing. GE credit: SciEng | SE. —F. (F.)

#### **146B. Advanced Integrated Circuits Fabrication (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 146A. Restricted to Electrical, Computer, and Electrical/Materials Science majors and Electrical Engineering graduate students; non-majors accommodated when space available. Fabrication processes for CMOS VLSI. Laboratory projects examine deposition of thin films, ion implantation, process simulation, anisotropic plasma etching, sputter metallization, and C-V analysis. Topics include isolation, projection alignment, epilayer growth, thin gate oxidation, and rapid thermal annealing. Offered in alternate years. GE credit: SciEng | SE. —W. (W.)

#### **150A. Introduction to Signals and Systems I (4)**

Lecture—4 hours. Prerequisite: Engineering 6 or Mathematics 22AL (may be taken concurrently); course 100. Characterization and analysis of continuous-time linear systems. Fourier series and transforms with applications. Introduction to communication systems. Transfer functions and block diagrams. Elements of feedback systems. Stability of linear systems. GE credit: SciEng | QL, SE. —W, S. (W, S.)

#### **150B. Introduction to Signals and Systems II (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 150A. Characterization and analysis of discrete time systems. Difference equation models. Z-transform analysis methods. Discrete and fast Fourier transforms. Introduction to digital filter design. GE credit: SciEng | QL, SE. —F. (F.)

#### **152. Digital Signal Processing (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 150B; course 70 or Computer Science Engineering 50. Theory and practice of real-time digital signal processing. Fundamentals of real-time systems. Programmable architectures including I/O, memory, peripherals, interrupts, DMA. Interfacing issues with A/D and D/A converters to a programmable DSP. Specification driven design and implementation of simple DSP applications. GE credit: SciEng | SE. —S. (S.)

#### **157A. Control Systems (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 100. Analysis and design of feedback control systems. Examples are drawn from electrical and mechanical systems as well as other engineering fields. Mathematical modeling of systems, stability criteria, root-locus and frequency domain design methods. GE credit: SciEng | SE. —F. (F.)

#### **157B. Control Systems (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 157A. Control system design; transfer-function and state-space methods; sampled-data implementation, digital control. Laboratory includes feedback system experiments and simulation studies. GE credit: SciEng | SE. —W. (W.)

#### **160. Signal Analysis and Communications (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 150A. Signal analysis based on Fourier methods. Fourier series and transforms; time-sampling, convolution, and filtering; spectral density; modulation: carrier-amplitude, carrier-frequency, and pulse-amplitude. GE credit: SE. —F. (F.)

#### **161. Probabilistic Analysis of Electrical & Computer Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100; Engineering 6 or Mathematics 22AL. Probabilistic and statistical analysis of electrical and computer systems. Discrete and continuous random variables, expectation and moments. Transformation of random variables. Joint and conditional densities. Limit theorems and statistics. Noise models, system reliability and testing. GE credit: SciEng | SE. —F, S. (F, S.)

#### **165. Statistical and Digital Communication (4)**

Lecture—3 hours; project—3 hours. Prerequisite: course 160, 161. Introduction to random process models of modulated signals and noise, and analysis of receiver performance. Analog and digitally modulated signals. Signal-to-noise ratio, probability of error, matched filters. Intersymbol interference, pulse shaping and equalization. Carrier and clock synchronization. GE credit: SciEng | SE. —W. (W.)

#### **170. Introduction to Computer Architecture (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 180A, Computer Science Engineering 30. Introduces basic aspects of computer architecture, including computer performance measurement, instruction set design, computer arithmetic, pipelined/non-pipelined implementation, and memory hierarchies (cache and virtual memory). Presents a simplified Reduced Instruction Set Computer using logic design methods from the prerequisite course. GE credit: SciEng | SE. —F. (F.)

#### **171. Parallel Computer Architecture (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 170 or Computer Science Engineering 154B. Organization and design of parallel processors including shared memory multiprocessors, cache coherence, memory consistency, snooping protocols, synchronization, scalable multiprocessors, message passing protocols, distributed shared memory and interconnection networks. GE credit: SciEng | SE. —S. (S.)

#### **172. Embedded Systems (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 100; and course 170 or Computer Science Engineering 154A. Introduction to embedded-system hardware and software. Topics include: embedded processor and memory architecture; input/output hardware and software, including interrupts and direct memory access; interfacing with sensors and actuators; wired and wireless embedded networking. GE credit: SciEng | SE. —W, S. (W, S.)

#### **173A. Computer Networks (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Computer Science Engineering 60; Computer Science and Engineering 132 or Electrical and Computer Engineering 161 or Mathematics 135A or Statistics 131A, or Statistics 120 or Statistics 32. Pass One open to Computer Science, Computer Science Engineering and Computer Engineering Majors only. Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis. Only 2 units of credit for students who have taken course 157. (Same course as Computer Science Engineering 152A.) GE credit: SciEng | SE. —F, W, S. (F, W, S.) Chuah, Ghosal, Liu, Matloff, Mohapatra, Mukherjee

#### **173B. Design Projects in Communication Networks (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 173A or Computer Science and Engineering 152A. Advanced topics and design projects in communication networks. Example topics include wireless networks, multimedia networking, network

design and management, traffic analysis and modeling, network simulations and performance analysis. (Same course as Computer Science Engineering 152C.) Offered in alternate years. GE credit: SciEng | SE. —S. (S.)

#### **180A. Digital Systems I (5)**

Lecture—3 hours; laboratory—6 hours. Prerequisite: Physics 9C or 9HD. Introduction to digital system design including combinational logic design, sequential and asynchronous circuits, computer arithmetic, memory systems and algorithmic state machine design; computer aided design (CAD) methodologies and tools. GE credit: SciEng | SE. —F, W. (F, W.)

#### **180B. Digital Systems II (5)**

Lecture—3 hours; laboratory—6 hours. Prerequisite: course 180A. Computer-aided design of digital systems with emphasis on hardware description languages (VHDL), logic synthesis, and field-programmable gate arrays (FPGA). May cover advanced topics in digital system design such as static timing analysis, pipelining, memory system design, testing digital circuits. GE credit: SciEng | SE. —S. (S.)

#### **181A. Digital Systems Design Project (3)**

Workshop—1 hour; laboratory—6 hours. Prerequisite: courses 180B and either course 170 or Computer Science 122A. Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. This is a team project that includes a final presentation and report. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE. —W. (W.)

#### **181B. Digital Systems Design Project (3)**

Workshop—1 hour; laboratory—6 hours. Prerequisite: course 181A. Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. This is a team project that includes a final presentation and report. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE. —S. (S.)

#### **183. Testing and Verification of Digital Systems (5)**

Lecture—3 hours; laboratory—4 hours. Prerequisite: courses 170 and 180B. Computer aided-testing and design verification techniques for digital systems; physical fault testing; simulation-based design verification; formal verification; timing analysis. GE credit: SciEng | SE. —W. (W.)

#### **189A. Special Topics in Electrical Engineering and Computer Science; Computer Science (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topic in Computer Science. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

#### **189B. Special Topics in Electrical Engineering and Computer Science; Programming Systems (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Programming Systems. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

#### **189C. Special Topics in Electrical Engineering and Computer Science; Digital Systems (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Digital Systems. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE. —F, W, S. (F, W, S.)

**189D. Special Topics in Electrical Engineering and Computer Science; Communications (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Communications. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189E. Special Topics in Electrical Engineering and Computer Science; Signal Transmission (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Signal Transmission. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189F. Special Topics in Electrical Engineering and Computer Science; Digital Communication (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Digital Communication. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189G. Special Topics in Electrical Engineering and Computer Science; Control Systems (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Control Systems. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189H. Special Topics in Electrical Engineering and Computer Science; Robotics (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Robotics. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189I. Special Topics in Electrical Engineering and Computer Science; Signal Processing (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Signal Processing. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189J. Special Topics in Electrical Engineering and Computer Science; Image Processing (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Image Processing. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189K. Special Topics in Electrical Engineering and Computer Science; High-Frequency Phenomena and Devices (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in High-Frequency Phenomena and Devices. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189L. Special Topics in Electrical Engineering and Computer Science; Solid-State Devices and Physical Electronics (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Solid-State Devices and Physical Electronics. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189M. Special Topics in Electrical Engineering and Computer Science; Systems Theory (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Systems Theory. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189N. Special Topics in Electrical Engineering and Computer Science; Active and Passive Circuits (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Active and Passive Circuits. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189O. Special Topics in Electrical Engineering and Computer Science; Integrated Circuits (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Integrated Circuits. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189P. Special Topics in Electrical Engineering and Computer Science; Computer Software (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Computer Software. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189Q. Special Topics in Electrical Engineering and Computer Science; Computer Engineering (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Computer Engineering. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189R. Special Topics in Electrical Engineering and Computer Science; Microprocessing (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Microprocessing. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189S. Special Topics in Electrical Engineering and Computer Science; Electronics (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Electronics. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189T. Special Topics in Electrical Engineering and Computer Science; Electromagnetics (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Electromagnetics. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189U. Special Topics in Electrical Engineering and Computer Science; Opto-Electronics (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Opto-Electronics. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**189V. Special Topics in Electrical Engineering and Computer Science; Computer Networks (1-5)**

Lecture; laboratory; lecture/laboratory. Prerequisite: consent of instructor. Special topics in Computer Networks. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**190C. Research Group Conferences in Electrical and Computer Engineering (1)**

Discussion—1 hour. Prerequisite: upper division standing in Electrical and Computer Engineering; consent of instructor. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**192. Internship in Electrical and Computer Engineering (1-5)**

Internship—3-15 hours. Prerequisite: completion of a minimum of 84 units; project approval before period of internship; consent of instructor. Supervised work experience in electrical and computer engineering. May be repeated for credit if project is different. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**193A. Senior Design Project (3)**

Workshop—1 hour; laboratory—6 hours. Prerequisite: course 196 (may be taken concurrently); consent of instructor. Restricted to senior standing in Electrical or Computer Engineering. Team design project for seniors in Electrical or Computer Engineering. Team design project for seniors in Electrical or Computer Engineering. Project involves analysis, design, implementation and evaluation of an Electrical Engineering or Computer Engineering system. Project is supervised by a faculty member. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.—F, W, S. (F, W.)

**193B. Senior Design Project (3)**

Workshop—1 hour; laboratory—6 hours. Prerequisite: course 193A. Team design project for seniors in Electrical Engineering or Computer Engineering. Team design project for seniors in Electrical Engineering or Computer Engineering. Project involves analysis, design, implementation and evaluation of an Electrical Engineering or Computer Engineering system. Project supervised by a faculty member. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.—W, S. (W, S.)

**195A. Autonomous Vehicle Design Project (3)**

Workshop—1 hour; laboratory—6 hours. Prerequisite: Computer Science and Engineering 30; course 180A; and either 110B, 157A (may be taken concurrently), 180B, or 60. Pass One restricted to major. Design and construct an autonomous race car. Work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop. (Deferred grading only pending completion of sequence.) GE credit: SciEng | SE.—F, (F.)

**195B. Autonomous Vehicle Design Project (3)**

Workshop—1 hour; laboratory—6 hours. Prerequisite: course 195A. Design and construct an autonomous race car. Students work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop. (Deferred grading only pending completion of sequence.) GE credit: SciEng | SE.—W, (W.)

**196. Issues in Engineering Design (1)**

Seminar—1 hour. Prerequisite: senior standing in Electrical or Computer Engineering. The course covers various electrical and computer engineering standards and realistic design constraints including economic, manufacturability, sustainability, ethical, health and safety, environmental, social, and political. GE credit: SciEng | SE.—F, (F.)

**197T. Tutoring in Electrical and Computer Engineering (1-3)**

Discussion—1 hour; discussion/laboratory—2-8 hours. Prerequisite: upper division standing; consent of instructor. Tutoring in Electrical and Computer Engineering courses, especially introductory circuits. For upper-division undergraduate students who will provide tutorial assistance. (P/NP grading only.)—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. May be repeated three times for credit. (P/NP grading only.) GE credit: SE.

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate****201. Digital Signal Processing (4)**

Lecture—4 hours. Prerequisite: course 150B; Statistics 120 or Mathematics 131 or Mathematics 167 recommended. Theory and design of digital filters.

Classification of digital filters, linear phase systems, all-pass functions, FIR and IIR filter design methods and optimality measures, numerically robust structures for digital filters. —W. (W.)

### **202. Advanced Digital Signal Processing (4)**

Lecture—4 hours. Prerequisite: courses 201, 260, and 265, and Mathematics 167 are recommended. Multirate DSP theory and wavelets, optimal transform and subband coders in data compressions, advanced sampling theory and oversampled A/D converters, transmultiplexers and precoders in digital communication systems, genomic signal processing. Offered in alternate years.—(S.)

### **205. Computational Methods in Biomedical Imaging (4)**

Lecture—4 hours. Prerequisite: Biomedical Engineering 105 or Statistics 120; Biomedical Engineering 108 or course 150A. Analytic tomographic reconstruction from projections in 2D and 3D; model-based image reconstruction methods; maximum likelihood and Bayesian methods; applications to CT, PET, and SPECT. (Same course as Biomedical Engineering 252.) —W. (W.)

### **206. Digital Image Processing (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 150B. Two-dimensional systems theory, image perception, sampling and quantization, transform theory and applications, enhancement, filtering and restoration, image analysis, and image processing systems. —(W.)

### **210. MOS Analog Circuit Design (3)**

Lecture—3 hours. Prerequisite: course 140A and 110B. Analysis and design of MOS amplifiers, bias circuits, voltage references and other analog circuits. Stability and compensation of feedback amplifiers. Introduction to noise analysis in MOS circuits. —F. (F.)

### **211. Advanced Analog Circuit Design (3)**

Lecture—3 hours. Prerequisite: course 210; Statistics 131A and course 112 recommended. Noise and distortion in electronic circuits and systems. Application to communication circuits. Specific applications include mixers, low-noise amplifiers, power amplifiers, phase-locked loops, oscillators and receiver architectures. Offered in alternate years. —W. (W.)

### **212. Analog MOS IC Design for Signal Processing (3)**

Lecture—3 hours. Prerequisite: course 210. Analysis and design of analog MOS integrated circuits. Passive components, single-ended and fully differential op amps, sampled-data and continuous-time filters. —W. (W.)

### **213. Data-Conversion Techniques and Circuits (3)**

Lecture—3 hours. Prerequisite: course 210. Digital-to-analog and analog-to-digital conversion; component characteristics and matching; sample-and-hold, comparator, amplifier, and reference circuits. —S. (S.)

### **214. Computer-Aided Circuit Analysis and Design (3)**

Lecture—3 hours. Prerequisite: courses 110A, 110B and knowledge of FORTRAN or C. Network equation formulations. Nonlinear DC, linear AC, time-domain (both linear and nonlinear), steady-state (nonlinear) and harmonic analysis. DC, AC, and time-domain sensitivities of linear and nonlinear circuits. Gradient-based design optimization. Behavioral simulations. Extensive CAD project. —W. (W.)

### **215. Circuits for Digital Communications (3)**

Lecture—3 hours. Prerequisite: courses 150B and 210 (may be taken concurrently); course 165, 166 or 265 recommended. Analog, digital, and mixed-signal CMOS implementations of communication-circuit blocks; gain control, adaptive equalizers, sampling detectors, clock recovery. Offered in alternate years. —F.

### **216. Low Power Digital Integrated Circuit Design (3)**

Lecture—3 hours. Prerequisite: course 118. IC design for low power and energy consumption. Low power architectures, logic styles and circuit design.

Variable supply and threshold voltages. Leakage management. Power estimation. Energy sources, power electronics, and energy recovery. Applications in portable electronics and sensors. Thermodynamic limits. Offered in alternate years. —W. (W.)

### **217. Biomedical Electronics (4)**

Lecture—3 hours; project. Prerequisite: course 210 or consent of instructor; special consideration and accommodation will be made for biomedical or signal processing majors who have not taken 210. Circuit design for medical applications including weak inversion amplifiers; integrated ULF filters; chopper stabilization; electrochemical interfaces; neurostimulation pulse generation; wireless powering of and communication with implantable devices. Electrophysiological signaling and aspects of signal processing for biomedical systems. —S. (S.)

### **219. Advanced Digital Circuit Design (3)**

Lecture—3 hours. Prerequisite: course 118 or 218A. Analysis and design of digital circuits. Both bipolar and MOS circuits are covered. Dynamic and static RAM cells and sense amplifiers. Advanced MOS families. Multi-valued logic. —(S.)

### **221. Analog Filter Design (3)**

Lecture—3 hours. Prerequisite: courses 100 and 150A. Design of active and passive filters including filter specification and approximation theory. Passive LC filter design will cover doubly-terminated reactance two-port synthesis. Active filter design will include sensitivity, op-amp building blocks, cascade, multi-loop, ladder and active-R filter design. Offered in alternate years. —(F.)

### **222. RF IC Design (3)**

Lecture—3 hours. Prerequisite: course 132C and 210. Radio frequency (RF) solid-state devices, RF device modeling and design rules; non-linear RF circuit design techniques; use of non-linear computer-aided (CAD) tools; RF power amplifier design. Offered in alternate years. —(S.)

### **228. Advanced Microwave Circuit and Device Design Techniques (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 132B. Theory, design, fabrication, analysis of advanced microwave circuits and devices. Wideband transformers, stripline/microstripline broadband couplers. Lumped and distributed filter synthesis. Broadband matching theory applied to microwave devices. Wideband and low noise FET/HEMT amplifiers. Advanced microwave oscillator theory. Phase noise analysis. Offered in alternate years. —S. (S.)

### **229. RF-MEMS and Adaptive Wireless Frontends (4)**

Lecture—3 hours; discussion—3 hours. Prerequisite: course 130A. Focuses on the modeling, design, fabrication, and characterization of RF-MEMS while providing a thorough introduction to the technology with an emphasis on how it will benefit the design of adaptive RF/microwave wireless systems. Offered in alternate years. —S.

### **230. Electromagnetics (3)**

Lecture—3 hours. Prerequisite: course 130B. Maxwell's equations, plane waves, reflection and refraction, complex waves, waveguides, resonant cavities, and basic antennas. —F. (F.)

### **231A. Plasma Physics and Controlled Fusion (3)**

Lecture—3 hours. Prerequisite: consent of instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves and instabilities in a fluid plasma; plasma kinetic theory and transport coefficients; linear and nonlinear Vlasov theory; fluctuations, correlations and radiation; inertial and magnetic confinement systems in controlled fusion. Offered in alternate years.

### **231B. Plasma Physics and Controlled Fusion (3)**

Lecture—3 hours. Prerequisite: course 231A; consent of instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves and instabilities in a fluid plasma; plasma kinetic theory and transport coefficients; linear and nonlinear

Vlasov theory; fluctuations, correlations and radiation; inertial and magnetic confinement systems in controlled fusion. Offered in alternate years. —(W.)

### **231C. Plasma Physics and Controlled Fusion (3)**

Lecture—3 hours. Prerequisite: course 231B; consent of instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves and instabilities in a fluid plasma; plasma kinetic theory and transport coefficients; linear and nonlinear Vlasov theory; fluctuations, correlations and radiation; inertial and magnetic confinement systems in controlled fusion. Offered in alternate years. —(S.)

### **232A. Advanced Applied Electromagnetics I (3)**

Lecture—3 hours. Prerequisite: course 132B. The exact formulation of applied electromagnetic problems using Green's functions. Applications of these techniques to transmission circuits. Offered in alternate years. —W. (W.)

### **232B. Advanced Applied Electromagnetics II (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 132B. Advanced treatment of electromagnetics with applications to passive microwave devices and antennas. Offered in alternate years. —S. (S.)

### **233. High Speed Signal Integrity (3)**

Lecture—3 hours. Prerequisite: course 130B. Design and analysis of interconnects in high-speed circuits and sub-systems; understanding of high-speed signal propagation and signal integrity concepts; electromagnetic modeling tools and experimental techniques. Offered in alternate years. —S.

### **234A. Physics and Technology of Microwave Vacuum Electron Beam Devices I (4)**

Lecture—4 hours. Prerequisite: B.S. degree in physics or electrical engineering or the equivalent background. Physics and technology of electron beam emissions, flow and transport, electron gun design, space charge waves and klystrons. Offered in alternate years. —F.

### **234B. Physics and Technology of Microwave Vacuum Electron Beam Devices II (4)**

Lecture—4 hours. Prerequisite: course 234B. Theory and experimental design of traveling wave tubes, backward wave oscillators, and extended interaction oscillators. Offered in alternate years. —W.

### **234C. Physics and Technology of Microwave Vacuum Electron Beam Devices III (4)**

Lecture—4 hours. Prerequisite: course 234A. Physics and technology of gyrotrons, gyro-amplifiers, free electron lasers, magnetrons, crossfield amplifiers and relativistic devices. Offered in alternate years. —S.

### **235. Photonics (4)**

Lecture—3 hours; project—1 hour. Prerequisite: course 230 (may be taken concurrently). Optical propagation of electromagnetic waves and beams in photonic components and the design of such devices using numerical techniques. Offered in alternate years. —W. (W.)

### **236. Nonlinear Optical Applications (3)**

Lecture—3 hours. Prerequisite: course 130B, course 230 (may be taken concurrently). Nonlinear optical interactions in optical communication, optical information processing and integrated optics. Basic concepts underlying optical nonlinear interactions in materials and guided media. Not open for credit to students who have completed course 233. Offered in alternate years. —F. (F.)

### **237A. Lasers (3)**

Lecture—3 hours. Prerequisite: course 130B or the equivalent and course 235. Theoretical and practical description of lasers. Theory of population inversion, amplification and oscillation using semiclassical oscillator model and rate equations. Description and design of real laser system. (Not open for credit to students who have completed course 226A.) Offered in alternate years. —(F.)

**237B. Laser Physics II (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 237A or Applied Science Engineering 265A. Oscillation threshold. Coupled cavity/atomic rate equations, Linear pulse propagation; dispersion, broadening, compression. Nonlinear pulse propagation. Energy extraction. Optical beams, resonators, eigenmodes, axial/transverse modes. Paraxial ray optics, resonator stability, ABCD matrices. Laser dynamics; transients, spiking, Q-switching, active and passive modelocking. Not open for credit to students who have completed course 226B. Offered in alternate years.—W.

**238. Semiconductor Diode Lasers (3)**

Lecture—3 hours. Prerequisite: course 245A. Understanding of fundamental optical transitions in semiconductor and quantum-confined systems are applied to diode lasers and selected photonic devices. The importance of radiative and non-radiative recombination, simulated emission, excitons in quantum wells, and strained quantum layers are considered. Offered in alternate years.—S.

**239A. Optical Fiber Communications Technologies (4)**

Lecture—4 hours. Prerequisite: course 130B. Physical layer issues for component and system technologies in optical fiber networks. Sources of physical layer impairments and limitations in network scalability. Enabling technologies for wavelength-division-multiplexing and time-division-multiplexing networks. Optical amplifiers and their impact in optical networks (signal-to-noise ratio, gain-equalization, and cascadability).—F. (F.)

**239B. Optical Fiber Communications Systems and Networking (4)**

Lecture—4 hours. Prerequisite: course 239A. Physical layer optical communications systems in network architectures and protocols. Optical systems design and integration using optical component technologies. Comparison of wavelength routed WDM, TDM, and NGI systems and networks. Case studies of next generation technologies. Offered in alternate years.—W. (W.)

**240. Semiconductor Device Physics (3)**

Lecture—3 hours. Prerequisite: course 140B. Physical principles, characteristics and models of fundamental semiconductor device types, including P-N and Schottky diodes, MOSFETs and MESFETs Bipolar Junction Transistors, and light emitters/detectors.—F. (F.)

**241. Introduction to Molecular Electronics (4)**

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Examines molecules for electronic devices and sensors. Course covers: electronic states of molecules, charge transport in nanoscale systems, and fabrication and measurement of molecular-scale devices. Specific Topics: Hartree-Fock and Density Functional Theory, Landauer formalism, coulomb blockade, tunneling and hopping transport. Offered in alternate years.—W. (W.)

**242. Advanced Nanostructured Devices (3)**

Lecture—3 hours. Prerequisite: courses 130A and 140A. Physics of nano-structured materials and device operation. Overview of new devices enabled by nanotechnology; fabrication and characterization methods; applications of nano-structures and devices. Offered in alternate years.—F. (F.)

**244A. Design of Microelectromechanical Systems (MEMS) (3)**

Lecture—3 hours. Prerequisite: course 140A, 140B or consent of instructor. Theory and practice of MEMS design. Micromechanical fundamentals, CAD tools, and case studies. A MEMS design project is required. The designs will be fabricated in a commercial foundry and tested in course 244B. Offered in alternate years.—F. (F.)

**244B. Microsciences (4)**

Lecture/discussion—4 hours. Introduction to the theory of physical and chemical principles at the microscale. Scale effects, surface tension, microfluidic

mechanics, micromechanical properties, intermolecular interactions and micro tribology. (Same course as Biomedical Engineering 218.)—F. (F.)

**245. Micro- and Nano-Technology in Life Sciences (4)**

Lecture/discussion—4 hours. Prerequisite: graduate standing or consent of instructor. Survey of biomedical device design from the engineering and biological perspectives; micro-/nano-fabrication and characterization techniques; surface chemistry and mass transfer; essential biological processes and models; proposal development skills to merge aforementioned themes in a multidisciplinary project. (Same course as Chemical Engineering 245 and Materials Science and Engineering 245.)—S. (S.)

**246. Advanced Projects in IC Fabrication (3)**

Discussion—1 hour; laboratory—6 hours. Prerequisite: course 146B. Individualized projects in the fabrication of analog or digital integrated circuits. Offered in alternate years.—W.

**247. Advanced Semiconductor Devices (4)**

Lecture—3 hours; project. Prerequisite: graduate standing in Engineering. Semiconductor devices, including MOSFETs, heterojunction transistors, light-emitting diodes, lasers, sensors, detectors, power and high-voltage transistors, MEMS resonators, organic semiconductors and photovoltaics. All material is from recent literature, encouraging students to utilize search methods and critically assess the latest research. Offered in alternate years.—F. (F.)

**248. Photovoltaics and Solar Cells (3)**

Lecture—3 hours. Prerequisite: course 140B or equivalent, or consent of instructor. Physics and application of photovoltaics and solar cells, including design, fabrication technology, and grid incorporation. Mono and microcrystalline silicon devices; thin-film technologies, heterojunction and organic-semiconductor technologies. Collectors, electrical inverters and infrastructure issues. Challenges and concerns. (Same course as Engineering-Material Science 246.) Offered in alternate years.—W.

**249. Nanofabrication (3)**

Lecture—3 hours. Prerequisite: graduate standing in Engineering. Theory and practices of nanofabrication used for producing ICs, electronic devices, optoelectronics, sensors, and microstructures. Major topics include electron-, photon-, and ion-beams and their interactions with solids, chemical vapor depositions, plasma processing and micromachining. Offered in alternate years.—S.

**250. Linear Systems and Signals (4)**

Lecture—4 hours. Prerequisite: course 150A. Mathematical description of systems. Selected topics in linear algebra. Solution of the state equations and an analysis of stability, controllability, observability, realizations, state feedback and state estimation. Discrete-time signals and systems, and the Z-transform.—F. (F.)

**251. Nonlinear Systems (3)**

Lecture—3 hours. Prerequisite: course 250. Nonlinear differential equations, second-order systems, approximation methods, lyapunov stability, absolute stability, Popov criterion, circle criterion, feedback linearization techniques. Offered in alternate years.—S. (S.)

**252. Multivariable Control System Design (3)**

Lecture—3 hours. Prerequisite: course 250. Modern control system design, theory, and techniques. Topics will include single-loop feedback design; stability, performance and robustness of multivariable control systems; LQG design; H-infinity design; frequency response methods; and optimization-based design. Offered in alternate years.—W. (W.)

**254. Optimization (3)**

Lecture—3 hours. Prerequisite: Mathematics 22A, knowledge of FORTRAN or C. Modeling optimization problems in engineering design and other applications; optimality conditions; unconstrained optimization (gradient, Newton, conjugate gradient and quasi-Newton methods); duality and Lagrangian

relaxation constrained optimization. (Primal method and an introduction to penalty and augmented Lagrangian methods.) Offered in alternate years.—W.

**255. Robotic Systems (3)**

Lecture—3 hours. Introduction to robotic systems. Mechanical manipulators, kinematics, manipulator positioning and path planning. Dynamics of manipulators. Robot motion programming and control algorithm design. Offered in alternate years.—W. (W.)

**256. Stochastic Optimization in Dynamic Systems (4)**

Lecture—4 hours. Prerequisite: course 260 or the equivalent. Markov Decision Processes (MDP), dynamic programming, multiarmed bandit, Partially observable MDP, optimal stopping, stochastic scheduling, sequential detection and quickest change detection, competitive MDP and game theory, applications in dynamic systems such as queueing networks, communication systems, and multi-agent systems. Offered in alternate years.—S. (S.)

**260. Random Signals and Noise (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Statistics 120, course 150A; course 250 recommended. Random processes as probabilistic models for signals and noise. Review of probability, random variables, and expectation. Study of correlation function and spectral density, ergodicity and duality between time averages and expected values, filters and dynamical systems. Applications.—F. (F.)

**261. Signal Processing for Communications (4)**

Lecture—4 hours. Prerequisite: course 165, 260 or consent of instructor. Signal processing in wireless and wireline communication systems. Characterization and distortion of wireless and wireline channels. Channel equalization and maximum likelihood sequence estimation. Channel precoding and pre-equalization. OFDM and transmit diversity. Array processing. Offered in alternate years.—S. (S.)

**262. Multi-Access Communications Theory (4)**

Lecture—3 hours; project. Prerequisite: Statistics 120 or equivalent; course 173A or Engineering Computer Science 152A. Maximum stable throughput of Poisson collision channels. Classic collision resolution algorithms. Carrier sensing multiple access and its performance analysis. System stability analysis. Joint design of the physical/medium access control layers. Capacity region of multi-access channels. Multi-access with correlated sources. Offered in alternate years.—S. (S.)

**263. Optimal and Adaptive Filtering (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 260. Geometric formulation of least-squares estimation problems. Theory and applications of optimum Wiener and Kalman filtering. MAP and maximum likelihood estimation of hidden Markov models, Viterbi algorithm. Adaptive filtering algorithms, properties and applications. Offered in alternate years.—S. (S.)

**264. Estimation and Detection of Signals in Noise (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 260. Introduction to parameter estimation and detections of signals in noise. Bayes and Neyman-Pearson likelihood-ratio tests for signal detection. Maximum-likelihood parameter estimation. Detection of known and Gaussian signals in white or colored noise. Applications to communications, radar, signal processing.—W. (W.)

**265. Principles of Digital Communications (4)**

Lecture—4 hours. Prerequisite: courses 165 and 260, or consent of instructor. Introduction to digital communications. Coding for analog sources. Characterization of signals and systems. Modulation and demodulation for the additive Gaussian channel. Digital signaling over bandwidth-constrained linear filter channels and over fading multipath channels. Spread spectrum signals.—W. (W.)

**266. Information Theory and Coding (3)**

Lecture—3 hours. Prerequisite: Statistics 120. Information theory and coding. Measure of information. Redundancy reduction; encoding of an information source. Capacity of a communication channel, error-free communications. Offered in alternate years.—S.

**267. Mobile Communications (4)**

Lecture/laboratory—3 hours. Prerequisite: courses 260 and 265 (can be taken concurrently). Time-varying multi-path fading channel models and receiver performance in fading channels; multiple access techniques and multiple access receivers design and performance; optimum design and the capacity of wireless channels. Offered in alternate years.—W.

**269A. Error Correcting Codes I (3)**

Lecture—3 hours. Prerequisite: Mathematics 22A and course 160. Introduction to the theory and practice of block codes, linear block codes, cyclic codes, decoding algorithms, coding techniques.—F. (F.)

**269B. Error Correcting Codes II (3)**

Lecture—3 hours. Prerequisite: course 165 and 269A. Introduction to convolutional codes, turbo codes, trellis and block coded modulation codes, soft-decision decoding algorithms, the Viterbi algorithm, reliability-based decoding, trellis-based decoding, multistage decoding. Offered in alternate years.—S. (S.)

**270. Computer Architecture (3)**

Lecture—3 hours. Prerequisite: course 170 or Computer Science Engineering 154B. Introduction to modern techniques for high-performance single and multiple processor systems. Topics include advanced pipeline design, advanced memory hierarchy design, optimizing pipeline and memory use, and memory sharing among multiprocessors. Case studies of recent single and multiple processor systems.—F. (F.)

**272. High-Performance Computer Architecture (4)**

Lecture—4 hours. Prerequisite: course 270 or Computer Science Engineering 201A. Designing and analysis of high performance computer architecture with emphasis on vector processing, on-chip interconnect networks, chip-level multiprocessors, memory and storage subsystem design and impact of technological advances on computer architecture. Offered in alternate years.—S. (S.)

**273. Networking Architecture and Resource Management (4)**

Lecture—3 hours; project. Prerequisite: course 173A or Computer Science and Engineering 152A. Pass One and Pass Two open to Graduate Students in Computer Science and Electrical and Computer Engineering only. Concepts and design principles of computer networks. Network architectures, protocol mechanisms and implementation principles (transport/network/data-link layers), network algorithms, router mechanisms, design requirements of applications, network simulation, modeling and performance analysis. (Same course as Computer Science Engineering 258.)—W. (W.) Chuah, Mohapatra

**274. Internet Measurements, Modeling and Analysis (4)**

Lecture—3 hours; project. Prerequisite: Computer Science Engineering 252 or course 273. Advanced topics in the theoretical foundations of network measurements, modeling, and statistical inferencing. Applications to Internet engineering, routing optimization, load balancing, traffic engineering, fault tolerance, anomaly detection, and network security. Individual project requirement. Offered in alternate years.—S. (S.)

**276. Fault-Tolerant Computer Systems: Design and Analysis (3)**

Lecture—3 hours. Prerequisite: courses 170, 180A. Introduces fault-tolerant digital system theory and practice. Covers recent and classic fault-tolerant techniques based on hardware redundancy, time redundancy, information redundancy, and software

redundancy. Examines hardware and software reliability analysis, and example fault-tolerant designs. Not open for credit to students who have completed course 276A. Offered in alternate years.—W.

**277. Graphics Architecture (3)**

Lecture—3 hours. Prerequisite: Computer Science Engineering 154B or course 170, Computer Science Engineering 175. Design and analysis of the architecture of computer graphics systems. Topics include the graphics pipeline with a concentration on hardware techniques and algorithms, exploiting parallelism in graphics, and case studies of noteworthy and modern graphics architectures. Offered in alternate years.—W. (W.)

**278. Computer Arithmetic for Digital Implementation (3)**

Lecture—3 hours. Prerequisite: courses 170, 180A. The design and implementation of computer arithmetic logic units are studied with particular emphasis on high-speed performance requirements. Addition [subtraction], multiplication and division operations are covered, and fixed and floating-point representations are examined. Offered in alternate years.—S.

**281. VLSI Digital Signal Processing (4)**

Lecture—3 hours; project. Prerequisite: courses 150B, 170, 180B or consent of instructor. Digital signal processors, building blocks, and algorithms. Design and implementation of processor algorithms, architectures, control, functional units, and circuit topologies for increased performance and reduced circuit size and power dissipation. Offered in alternate years.—W. (W.)

**282. Hardware Software Codesign (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 170, 180B. Specification and design of embedded systems; modeling and performance estimation; hardware/software partitioning; co-simulation; design re-use; platform-based design; reconfigurable computing.—S. (S.)

**283. Advanced Design Verification of Digital Systems (4)**

Lecture—3 hours; project. Prerequisite: courses 170 and 180A. Design verification techniques for digital systems; simulation-based design verification techniques; formal verification techniques, including equivalence checking, model checking, and theorem proving; timing analysis and verification; application of design certification techniques to microprocessors. Offered in alternate years.—W. (W.)

**284. Design and Optimization of Embedded Computing Systems (4)**

Lecture—4 hours. Prerequisite: courses 170 and 180B, or consent of instructor. Computer Science Engineering 122A recommended. Introduction to design and optimization of digital computing systems for embedded applications. Topics include combinatorial optimization techniques, performance and energy optimization in embedded systems, compilation and architecture-specific mapping, programmable and reconfigurable platforms; design automation and algorithmic improvements to design process. Offered in alternate years.—W. (W.)

**286. Introduction to Digital System Testing (3)**

Lecture—3 hours. Prerequisite: course 180A; Statistics 120 or 131A. A review of several current techniques used to diagnose faults in both combinational and sequential circuits. Topics include path sensitization procedures, Boolean difference, D-algorithm random test generation, TC testing and an analysis of the effects of intermittent faults. Not open for credit to students who have completed course 276A. Offered in alternate years.—W.

**289A. Special Topics in Electrical and Computer Engineering; Computer Science (1-5)**

Lecture/laboratory—1-5 units. Prerequisite: consent of instructor. Special topic in Computer Science. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289B. Special Topics in Electrical and Computer Engineering; Programming Systems (1-5)**

Lecture/laboratory—1-5 units. Prerequisite: consent of instructor. Special topic in Programming Systems. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289C. Special Topics in Electrical and Computer Engineering; Digital Systems (1-5)**

Lecture/laboratory—1-5 units. Prerequisite: consent of instructor. Special topic in Digital Systems. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289D. Special Topics in Electrical and Computer Engineering; Digital Systems (1-5)**

Lecture/laboratory—1-5 units. Prerequisite: consent of instructor. Special topic in Digital Systems. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289E. Special Topics in Electrical and Computer Engineering; Signal Transmission (1-5)**

Lecture/laboratory—1-5 units. Prerequisite: consent of instructor. Special topic in Signal Transmission. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289F. Special Topics in Electrical and Computer Engineering; Digital Communication (1-5)**

Lecture/laboratory—1-5 units. Prerequisite: consent of instructor. Special topic in Digital Communication. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289G. Special Topics in Electrical and Computer Engineering; Control Systems (1-5)**

Lecture/laboratory—1-5 units. Prerequisite: consent of instructor. Special topic in Control Systems. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289H. Special Topics in Electrical and Computer Engineering; Robotics (1-5)**

Lecture/laboratory—1-5 units. Prerequisite: consent of instructor. Special topic in Robotics. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289I. Special Topics in Electrical and Computer Engineering; Signal Processing (1-5)**

Lecture/laboratory—1-5 units. Prerequisite: consent of instructor. Special topic in Signal Processing. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289J. Special Topics in Electrical and Computer Engineering; Image Processing (1-5)**

Lecture/laboratory—1-5 units. Prerequisite: consent of instructor. Special topic in Image Processing. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289K. Special Topics in Electrical and Computer Engineering; High Frequency Phenomena and Devices (1-5)**

Lecture/laboratory—1-5 units. Prerequisite: consent of instructor. Special topic in High Frequency Phenomena and Devices. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289L. Special Topics in Electrical and Computer Engineering; Solid-State Devices and Physical Electronics (1-5)**

Lecture/laboratory—1-5 units. Prerequisite: consent of instructor. Special topic in Solid-State Devices and Physical Electronics. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289M. Special Topics in Electrical and Computer Engineering; Systems Theory (1-5)**

Lecture/laboratory—1.5 units. Prerequisite: consent of instructor. Special topic in Systems Theory. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289N. Special Topics in Electrical and Computer Engineering; Active and Passive Circuits (1-5)**

Lecture/laboratory—1.5 units. Prerequisite: consent of instructor. Special topic in Active and Passive Circuits. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289O. Special Topics in Electrical and Computer Engineering; Integrated Circuits (1-5)**

Lecture/laboratory—1.5 units. Prerequisite: consent of instructor. Special topic in Integrated Circuits. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289P. Special Topics in Electrical and Computer Engineering; Computer Software (1-5)**

Lecture/laboratory—1.5 units. Prerequisite: consent of instructor. Special topic in Computer Software. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289Q. Special Topics in Electrical and Computer Engineering; Computer Engineering (1-5)**

Lecture/laboratory—1.5 units. Prerequisite: consent of instructor. Special topic in Computer Engineering. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289R. Special Topics in Electrical and Computer Engineering; Microprocessing (1-5)**

Lecture/laboratory—1.5 units. Prerequisite: consent of instructor. Special topic in Microprocessing. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289S. Special Topics in Electrical and Computer Engineering; Electronics (1-5)**

Lecture/laboratory—1.5 units. Prerequisite: consent of instructor. Special topic in Electronics. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289T. Special Topics in Electrical and Computer Engineering; Electromagnetics (1-5)**

Lecture/laboratory—1.5 units. Prerequisite: consent of instructor. Special topic in Electromagnetics. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289U. Special Topics in Electrical and Computer Engineering; Optoelectronics (1-5)**

Lecture/laboratory—1.5 units. Prerequisite: consent of instructor. Special topic in Optoelectronics. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**289V. Special Topics in Electrical and Computer Engineering; Computer Networks (1-5)**

Lecture/laboratory—1.5 units. Prerequisite: consent of instructor. Special topic in Computer Networks. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

**290. Seminar in Electrical and Computer Engineering (1)**

Seminar—1 hour. Discussion and presentation of current research and development in Electrical and Computer Engineering. May be repeated for credit. (S/U grading only.)—F, W. (F, W.)

**290C. Graduate Research Group Conference in Electrical and Computer Engineering (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Research problems, progress, and techniques in electrical and computer engineering. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**291. Solid-State Circuit Research Laboratory Seminar (1)**

Seminar—1 hour. Prerequisite: graduate standing. Lectures on solid-state circuit and system design by various visiting experts in the field. May be repeated for credit. (S/U grading only.)—S. (S.)

**292. Seminar in Solid-State Technology (1)**

Seminar—1 hour. Prerequisite: graduate standing. Lectures on solid-state technology by various visiting experts in the field. May be repeated for credit. (S/U grading only.)—S. (S.)

**293. Computer Engineering Research Seminar (1)**

Seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Lectures, tutorials, and seminars on topics in computer engineering. May be repeated for credit up to four times. (S/U grading only.)—F, S. (F, S.)

**294. Communications, Signal and Image Processing Seminar (1)**

Seminar—1 hour. Prerequisite: graduate standing. Communications, signal and image processing, video engineering and computer vision. May be repeated for credit. (S/U grading only.)—F, W, S.

**295. Systems, Control and Robotics Seminar (1)**

Seminar—1 hour. Prerequisite: graduate standing. Seminars on current research in systems and control by faculty and visiting experts. Technical presentations and lectures on current topics in robotics research and robotics technology. May be repeated for credit. (S/U grading only.)—W. (W.)

**296. Photonics Research Seminar (1)**

Seminar—1 hour. Prerequisite: graduate standing. Lectures on photonics and related areas by faculty and visiting experts. May be repeated for credit. (S/U grading only.)—F, S. (F, S.)

**298. Group Study (1-5)**

Prerequisite: consent of instructor. (S/U grading only.)

**299. Research (1-12)**  
(S/U grading only.)

**Professional**

**390. The Teaching of Electrical Engineering (1)**

Discussion—1 hour. Prerequisite: meet qualifications for teaching assistant and/or associate-in in Electrical Engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.)—F. (F.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## Faculty

Klaus van Benthem, Ph.D., Associate Professor  
Ricardo Castro, Ph.D., Associate Professor  
Susan Gentry, Ph.D., Lecturer  
Jeffery C. Gibeling, Ph.D., Professor  
Sangtae Kim, Ph.D., Professor  
Denise Krol, Ph.D., Professor  
Subhash Mahajan, Ph.D., Distinguished Professor  
Alexandra Navrotsky, Ph.D., Distinguished Professor and Endowed Chair (Chemical Engineering; Chemistry; Land, Air and Water Resources; Materials Science and Engineering)

Atul Parikh, Ph.D., Professor (Biomedical Engineering; Materials Science and Engineering)  
Subhash H. Risbud, Ph.D., Distinguished Professor and Endowed Chair Distinguished Teaching Award-Graduate/Professional

Sabyasachi Sen, Ph.D., Professor  
Yayoi Takamura, Ph.D., Associate Professor

## Emeriti Faculty

Joanna R. Groza, Ph.D., Professor Emeritus  
David G. Howitt, Ph.D., Professor Emeritus  
Amiya K. Mukherjee, Ph.D., Professor Emeritus Academic Senate Distinguished Teaching Award, UC Davis Prize for Teaching and Scholarly Achievement, Distinguished Graduate Mentoring Award

Zuhair A. Munir, Ph.D., Professor Emeritus  
James F. Shackelford, Ph.D., Professor Academic Senate Distinguished Teaching Award

The Department of Materials Science and Engineering offers one undergraduate program: Materials Science and Engineering.

**Mission Statement.** The mission of the Department of Materials Science and Engineering is to promote excellence in innovative cross-disciplinary materials education and research within an inclusive culture of students, staff, and faculty committed to creating a climate that respects and embraces racial, gender, and ethnic diversity at every level.

**Honors Program.** An Honors Program is available to qualified students in Materials Science and Engineering. It is a four-year program designed to challenge the most talented students in the major. Students invited to participate will take a one-unit honors seminar in their freshman year and will enroll in various one-unit honors courses. In the upper division, students will complete either an honors thesis or a project that might involve local industry. Students must maintain a grade point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

## Materials Science and Engineering Undergraduate Program

The Materials Science and Engineering program is accredited by the Engineering Accreditation Commission of ABET; see <http://www.abet.org>.

Materials science and engineering is directed toward an understanding of the structure, properties, and processing of materials. Society demands new and improved materials with capabilities far superior to common metals, polymers, and ceramics. New materials are needed for high-speed transportation systems, surgical and dental implants, new generations of power plants, renewable energy sources, and solid-state electronic and photonic devices in

computer and communication technology. Both the development of new materials and the understanding of present-day materials demand a thorough knowledge of basic engineering and scientific principles, including crystal structure, elastic and plastic behavior, thermodynamics, phase equilibria and reaction rates, and structural and physical and chemical behavior of engineering materials.

Materials engineers study phenomena found in many different engineering operations, from fracture behavior in automobiles to fatigue behavior in aircraft frames, from corrosion behavior in petro-chemical refineries to radiation-induced damage in nuclear power plants, and from the fabrication of steel to the design of semiconductors. Materials engineers are also increasingly involved in developing the new materials needed to attain higher efficiencies in existing and proposed energy conversion schemes and will play a central role in the development of new technologies based on composites and high-temperature superconductivity.

The undergraduate materials science and engineering program provides the background for activities in research, processing, and the design of materials. The curriculum is based on a common core of courses basic to engineering; courses taken during your first two years provide a strong foundation in fundamental engineering concepts.

A minor in Materials Science is also available. Please see the description, below.

**Objectives.** We educate students in the fundamentals of materials science and engineering, balanced with the application of these principles to practical problems; educate students as independent, critical thinkers who can also function effectively in a team; educate students with a sense of community, ethical responsibility, and professionalism; educate students for careers in industry, government, and academia; teach students the necessity for continuing education and self-learning; and foster proficiency in written and oral communications.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Materials Science and Engineering major is 156.

#### Lower Division Required Courses

Mathematics 21A-21B-21C-21D .....	16
Mathematics 22A-22B .....	6
Physics 9A-9B-9C-9D .....	19
Chemistry 2A, 2B, 2C or Chemistry 2AH, 2BH, 2CH .....	15
Engineering 17, 45 or 45Y .....	8
Materials Science and Engineering 2.....	2
Chemical Engineering and Materials Science 6 .....	4
English 3 or University Writing Program 1 or Comparative Literature 1, 2, 3, or 4, or Native American Studies 5 (grade of C- or better required) .....	4
Communication 1 or 3 .....	4

#### Upper Division Required Courses

Engineering 190 .....	3
Materials Science and Engineering 160, 162, 162L, 164, 172, 172L, 174, 174L, 180, 181, 188A, 188B.....	42
Select one course from Engineering 180, Mathematics 135A, Statistics 120, 131A, Civil and Environmental Engineering 114, Chemical Engineering 140, Mechanical Engineering 115, or Physics 104A.....	4
Select one course from Chemistry 110A, 124A, 128A, or Physics 108 and 108L, 110A, 122A, 151, 160 .....	3
A minimum of 14 units from one of the following focus areas:	

- Biomedical Engineering: Biology 2A,
- Biomedical Engineering 20, 106\*, 109

Biological Systems Engineering: Biology 2A, Engineering 100, Biological Systems Engineering 75, 165	
Chemical Engineering: Chemical Engineering 51, 140, 141, 142	
Civil Engineering: Engineering 35, 104, Civil Engineering 130, 132	
Electrical Engineering: Engineering 100, Electrical Engineering 140A, 140B, 146A	
Mechanical Engineering: Engineering 35, 102, 103, 104 .....	14
Select one course from Chemical Engineering 158A, Materials Science Engineering 170, Engineering 106, 160, 188, or Civil Engineering 123, 125, 143 .....	3-4
Depending on area of focus, 6-9 units of upper division electives .....	6-9
Students may receive up to a maximum of 4 units of credit for engineering 199 courses, when these courses are approved by the departmental undergraduate studies committee. To receive credit, students must submit a summary of their research to the committee. A letter of support from the faculty mentor is also required to verify that you have conducted substantial research activity. *Students would need to take Neurobiology, Physiology, and Behavior 101 as an elective to enroll in Biomedical Engineering 106	
Upper Division Composition Requirement .....	0 or 4
One course from the following (grade of C- or better is required): University Writing Program 102E, 102F, 104A, 104E, 104T or passing the Upper Division Composition Exam.	

#### Materials Science Minor

There is a constant need for professionals with more knowledge and experience in understanding the behavior of materials from which products such as electronics, sensors, biological implants, transportation vehicles, medical devices and infrastructure are made. The goal of this minor is to prepare students for careers that require training in materials science, including the fundamentals of thermodynamics and kinetics and their effects on phase composition and structure, as well as the complex relationships between composition, structure, processing and behavior/performance. Topics covered include material thermodynamics and kinetics, materials structural analysis, and structure-property relationships for electronic, optical, magnetic and mechanical behavior. The minor is expected to accommodate persons of diverse backgrounds, such as those majoring in engineering, physical sciences, biological sciences, and mathematics.

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements, with an overall GPA in minor requirement courses of 2.000 or better.

#### Minor Requirements

Materials Science.....	UNITS
Materials Science and Engineering 160, 162, 164.....	12

Choose one of the following: Materials

Science 172 or 174.....

Choose an additional four units from the

following, if not used above, Materials

Science 147, 162L, 172, 172L, 174, 174L,

180, 181 or 182.....

**Minor Adviser.** S. Gentry (Department of Materials Science and Engineering)

#### Graduate Programs in the Department of Materials Science and Engineering

The Department of Materials Science and Engineering is home to a top-20 ranked graduate programs in Materials Science & Engineering. We offer a unique interdisciplinary environment for graduate

studies, with renowned faculty and state-of-the-art research facilities.

#### The Graduate Program in Materials Science and Engineering

M.Eng., M.S., and Ph.D.

Ph.D. designated emphases are available as specializations in biotechnology, biophysics, and nuclear science.

<http://chms.engineering.ucdavis.edu>

530-752-7952

The Materials Science and Engineering Graduate Program provides students with a strong background in advanced materials synthesis, processing, and characterization, both from an experimental and theoretical standpoint.

Doctoral students are typically offered competitive 4-year financial offers of fellowships and research/teaching assistantships which include tuition, fees, and a stipend.

Financial offers are subject to satisfactory progress towards completion of degree requirements.

Research areas include biomaterials, catalysts, ceramics, electronic and electrochemical properties and devices, glasses, green engineering and design, interfaces, magnetic materials and devices, materials microstructure and/or processing, mathematical modeling, mechanical properties and synthesis, metals, microscopy, molecular modeling, nanomaterials, optical properties and devices, polymers, renewable energy, sintering, structural materials, thermochemistry, and thin films.

#### Research Facilities and Partnerships:

- Interdisciplinary Center for Electron Microscopy
- Center for Northern California Nanotechnology
- Center for Nanomaterials in the Environment, Agriculture and Technology

Complete Information is available on our website.

#### Courses in Engineering: Materials Science and Engineering (EMS)

For courses in Chemical and Materials Science Engineering (ECM) and Chemical Engineering (ECH), see [Engineering: Chemical Engineering](#), on page 276.

#### Lower Division

##### 2. Materials Marvels (2)

Lecture/discussion—2 hours. Restricted to lower division students only. Role of materials in technological societies and their impact on our way of living.

Exploration of how materials are extracted from the earth, processed, and shaped into products, including discussion of disposal and re-use of materials.

GE credit: SciEng | SE.—F, (F.)

##### 6H. Honors Materials Science Computer Applications (1)

Discussion—1 hour. Prerequisite: enrollment in the Materials Science and Engineering Honors Program; concurrent enrollment in Engineering 6 required.

Restricted to students in the Materials Science and Engineering Honors Program. Examination of materials science computer applications through additional readings, discussions, collaborative work, or special activities which may include projects or computer simulations. Offered irregularly.—W. (W.)

##### 9H. Honors Solid-State Materials Science (1)

Discussion—1 hour. Prerequisite: enrollment in the Materials Science and Engineering Honors Program; concurrent enrollment in Physics 9D required.

Restricted to students in the Materials Science and Engineering Honors program. Examination of solid-state materials science and modern physics topics through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Offered irregularly.—S. (S.)

**Upper Division****147. Principles of Polymer Materials Science (3)**

Lecture—3 hours. Prerequisite: Chemistry 2A-2B; Chemistry 8A-8B or Engineering 45; introductory physics. Basic principles of polymer science presented including polymer structure and synthesis; polymerization mechanisms, polymer classes, properties, and reactions; polymer morphology, rheology, and characterization; polymer processing. (Same course as Fiber and Polymer Science 100.) GE credit: SciEng | QL, SE, SL, VL, WE.—S. (S.) Pan

**160. Thermodynamics of Materials Processes and Phase Stability (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in each of the following: Engineering 45, Physics 9B, Mathematics 22B; Chemistry 2C (recommended). Review of thermodynamic principles of interest to materials scientists and engineers. Application of thermodynamics to material processing, phase stability, corrosion. GE credit: SciEng | QL, SE, SL, VL, WE.—F. (F.)

**162. Structure and Characterization of Engineering Materials (4)**

Lecture—4 hours. Prerequisite: C- or better in each of the following: Engineering 45, Mathematics 22, Physics 9B. Description of the structure of engineering materials on the atomic scale by exploring the fundamentals of crystallography. The importance of this structure to materials' properties. Description of experimental determination using x-ray diffraction techniques. GE credit: SciEng | QL, SE, —W. (W.)

**162L. Structure and Characterization of Materials Laboratory (2)**

Laboratory—3 hours; discussion—1 hour. Prerequisite: course 162 (concurrent enrollment recommended). Experimental investigations of structure of solid materials are combined with techniques for characterization of materials. Laboratory exercises emphasize methods used to study structure of solids at the atomic and microstructural levels. Methods focus on optical, x-ray and electron techniques. Only 2 units of credit allowed to students who have completed course 134L. Not open for credit to students who have completed course 132L. GE credit: SciEng, Wrt | QL, SE, SL, VL, WE.—W. (W.)

**164. Rate Processes in Materials Science (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in Engineering 45, and course 160. Basic kinetic laws and the principles governing phase transformations. Applications in diffusion, oxidation, nucleation, growth and spinodal transformations. GE credit: SciEng | QL, SE, SL, VL, WE.—W. (W.)

**170. Sustainable Energy Technologies: Batteries, Fuel Cells, and Photovoltaic Cells (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 45. Open to students in Engineering or related fields. Basic principles of future energy devices such as lithium batteries, fuel cells, and photovoltaic cells. Examines the current status of these energy technologies and analyze challenges that still must be overcome. Offered irregularly. GE credit: SciEng | SE.—Su. (Su.)

**172. Electronic, Optical and Magnetic Properties of Materials (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 110A or Physics 9D; Engineering 6 or Chemical and Materials Science 6 or equivalent (recommended). Electronic, optical, and magnetic properties of materials as related to structure and processing of solid state materials. Physical principles for understanding the properties of metals, semiconductors, ceramics, and amorphous solids and the applications of these materials in engineering. GE credit: SciEng | QL, SE, SL, VL, WE.—F. (F.)

**172L. Electronic, Optical and Magnetic Properties Laboratory (2)**

Laboratory—3 hours; lecture/laboratory—1 hour. Prerequisite: course 172 (concurrent enrollment recommended). Experimental investigation of electronic, optical and magnetic properties of

engineering materials, emphasizing the fundamental relationship between microstructure and properties as well as the influence of rate processes on the evolution of the microstructure and properties. GE credit: SciEng, Wrt | QL, SE, SL, VL, WE.—F. (F.)

**174. Mechanical Behavior of Materials (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in Engineering 45; course 162 (recommended). Microscopic and macroscopic aspects of the mechanical behavior of engineering materials, with emphasis on recent development in materials characterization by nondestructive testing. Fundamental aspects of plasticity in engineering materials, strengthening mechanisms and mechanical failure modes of materials systems. GE credit: SciEng, Wrt | QL, SE, SL, VL, WE.—S. (S.)

**174L. Mechanical Behavior Laboratory (2)**

Laboratory—3 hours; lecture/laboratory—1 hour. Prerequisite: course 174 (concurrent enrollment recommended). Experimental investigation of mechanical behavior of engineering materials. Laboratory exercises emphasize the fundamental relationship between microstructure and mechanical properties, and the evolution of the microstructure as a consequence of rate process. Not open for credit to students who have completed course 138L. GE credit: SciEng, Wrt | QL, SE, SL, VL, WE.—S. (S.)

**180. Materials in Engineering Design (4)**

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: C- or better in Engineering 45. Restricted to students with upper division standing. Quantitative treatment of materials selection for engineering applications. Discussion of design and material selection strategy; process and process selection strategy; process economics; life-cycle thinking and eco-design. Use of materials selection software. GE credit: SciEng, Wrt | OL, SE, SL, VL, WE.—S. (S.)

**181. Materials Processing (4)**

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: C- or better in Engineering 45; and Engineering 105 or Chemical Engineering 152B or Electrical & Computer Engineering 140A or course 164. Principles of phase equilibria, thermodynamics and reaction kinetics applied to materials processing. Effects of processing variables on the structure-property relationship. Fundamentals of the manufacturing processes for electronic, optical, functional and structural materials. GE credit: SciEng, Wrt | OL, SE, VL, WE.—W. (W.)

**182. Failure Analysis (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: C- or better in Engineering 45; course 174 (recommended). Analysis of the way materials fail. Effects of temperature, mechanical deformation and corrosion on the properties of materials. Forensics and methodologies for investigating failures of materials including optical microscopy, x-ray analysis and scanning electron microscopy. Investigation of practical problems. GE credit: SciEng, Wrt | QL, SE, VL, WE.

**188A. Materials Design Project (4)**

Laboratory—4 hours; discussion—1 hour. Prerequisite: courses 160, 162, 164, 172, and 174. Major materials design experience involving analysis of real materials synthesis/processing/fabrication and technological applications including critical assessments of economic, manufacturing, and ethical constraints. Various principles of materials science are integrated into a culminating team design project. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | OL, SE, SL, VL, WE.—W. (W.)

**188AH. Honors Materials Design (1)**

Discussion—1 hour. Prerequisite: enrollment in the Materials Science and Engineering Honors Program. Examination of special topics covered in the materials design course through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Open only to students in the Materials Science and Engineering Honors program. Offered irregularly.—W. (W.)

**188B. Materials Design Project (4)**

Laboratory—4 hours; discussion—1 hour. Prerequisite: course 188A. Major materials design experience involving analysis of real materials synthesis/processing/fabrication and technological applications including critical assessments of economic, manufacturing, and ethical constraints. Various principles of materials science are integrated into a culminating team design project. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | OL, SE, SL, VL, WE.—S. (S.)

**188BH. Honors Materials Design (1)**

Discussion—1 hour. Prerequisite: enrollment in the Materials Science and Engineering Honors Program. Examination of special topics covered in the materials design course through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Open only to students in the Materials Science and Engineering Honors Program. Offered irregularly.—S. (S.)

**190C. Research Group Conferences (1)**

Discussion—1 hour. Prerequisite: consent of instructor; upper division standing. Individual and/or group conference on problems, progress and techniques in materials research. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

Lecture—1-5 hours. Prerequisite: consent of instructor. Group study of selected topics. (P/NP grading only.) Offered irregularly.—F, W, S. (F, W, S.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. Special study for advanced undergraduates. (P/NP grading only.)—F, W, S. (F, W, S.)

**Graduate****230. Fundamentals of Electron Microscopy (3)**

Lecture—2 hours; lecture/discussion—1 hour. Prerequisite: course 162. Principles and techniques of scanning and transmission of electron microscopy used in the study of materials will be described. Emphasis upon practical applications.—W. (W.)

**230L. Laboratory for Electron Microscopy (2)**

Laboratory—6 hours. Prerequisite: course 230 concurrently. Practical application of techniques of electron scanning and transmission microscopy including x-ray microanalysis. Offered irregularly.—W. (W.)

**232. Advanced Topics in Transmission Electron Microscopy (3)**

Lecture—1 hour; discussion—2 hours. Prerequisite: course 230. Advanced course in the techniques of electron microscopy including analytical techniques, probe diffraction methods, and high resolution imaging. Offered irregularly.—W. (W.)

**232L. Laboratory for Advanced Transmission Electron Microscopy (2)**

Discussion—1 hour; laboratory—3 hours. Prerequisite: course 230L. Laboratory in advanced transmission electron microscopy techniques relevant to specific graduate research projects in materials science. Offered irregularly.—W. (W.)

**241. Principles and Applications of Dislocation Mechanics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing in Engineering; consent of instructor. Concepts in dislocation theory are applied to explain plasticity of crystalline solids. Glide and climb of dislocations, strain hardening, recrystallization, theories of creep processes and interaction of dislocation with solute atoms, precipitates and impurity clouds are discussed. Offered irregularly.—W. (W.)

**243. Kinetics of Phase Transformation in Engineering Materials (3)**

Lecture—3 hours. Prerequisite: graduate standing in Engineering and consent of instructor; course 160 recommended. Theory of alloying, kinetics of phase

changes, homogenous and heterogeneous transformation, transformation by shear, order-disorder reactions. Offered irregularly.—S. (S.)

#### **244. Interaction of Materials and their Environment (3)**

Lecture—3 hours. Prerequisite: Engineering 45 and 105A, or consent of instructor. Thermodynamic and kinetic foundations of the corrosion and oxidation processes. Practical aspects of corrosion control and prevention. Stress-corrosion and gas-embrittlement phenomena. Special topics in corrosion; microbiological and atmospheric corrosion. Offered irregularly.—F. (F.)

#### **245. Micro- and Nano-Technology in Life Sciences (4)**

Lecture/discussion—4 hours. Prerequisite: graduate standing or consent of instructor. Survey of biomedical device design from the engineering and biological perspectives; micro-/nano-fabrication and characterization techniques; surface chemistry and mass transfer; essential biological processes and models; proposal development skills to merge aforementioned themes in a multidisciplinary project. (Same course as Electrical and Computer Engineering 245 and Chemical Engineering 245.)—S. (S.) Seker

#### **246. Photovoltaics and Solar Cells (3)**

Lecture—3 hours. Prerequisite: Electrical & Computer Engineering 140B or equivalent, or permission of instructor. Physics and application of photovoltaics and solar cells, including design, fabrication technology, and grid incorporation. Mono and microcrystalline silicon devices; thin-film technologies, heterojunction and organic-semiconductor technologies. Collectors, electrical inverters and infrastructure issues. Challenges and concerns. (Same course as Electrical & Computer Engineering 248.) Offered irregularly.—W. (W.)

#### **248. Fracture of Engineering Materials (3)**

Lecture—3 hours. Prerequisite: course 174. Description of the failure of materials by crack propagation. Topics include the stress fields about elastic cracks, the Griffith-Irwin analysis, descriptions of plastic zones, fracture toughness testing, microstructural aspects of fracture and failure at elevated temperatures. Offered irregularly.—F. (F.)

#### **249. Mechanisms of Fatigue (3)**

Lecture—3 hours. Prerequisite: course 174 or consent of instructor; course 248 recommended. Microstructural description of the mechanisms of fatigue in metals. Topics include a phenomenological treatment of cyclic deformation, dislocation processes in cyclic deformation, fatigue crack nucleation, Stage I crack growth, threshold effects and high temperature cyclic deformation. Offered irregularly.—F. (F.)

#### **250A. Special Topics in Polymer and Fiber Science (3)**

Lecture—3 hours. Prerequisite: course 147 or consent of instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as Fiber and Polymer Science 250A.)—S. (S.)

#### **250B. Special Topics in Polymer and Fiber Science (3)**

Lecture—3 hours. Prerequisite: course 147 or consent of instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as Fiber and Polymer Science 250B.)—S. (S.)

#### **250C. Special Topics in Polymer and Fiber Science (3)**

Lecture—3 hours. Prerequisite: course 147 or consent of instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as Fiber and Polymer Science 250C.) Offered irregularly.—W. (W.)

#### **250D. Special Topics in Polymer and Fiber Science (3)**

Lecture—3 hours. Prerequisite: course 147 or consent of instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each

time the course is offered. (Same course as Fiber and Polymer Science 250D.) Offered irregularly.—W. (W.)

#### **250E. Special Topics in Polymer and Fiber Science (3)**

Lecture—3 hours. Prerequisite: course 147 or consent of instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as Fiber and Polymer Science 250E.) Offered irregularly.—F. (F.)

#### **250F. Special Topics in Polymer and Fiber Science (3)**

Lecture—3 hours. Prerequisite: course 147 or consent of instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as Fiber and Polymer Science 250F.) Offered irregularly.—W. (W.)

#### **251. Applications of Solid State Nuclear Magnetic Resonance Spectroscopy (3)**

Lecture—3 hours. Prerequisite: graduate standing in chemistry, physics or engineering, or consent of instructor. Fundamentals of solid state NMR spectroscopy and principles of advanced NMR techniques for analyzing structure of solid materials. Offered in alternate years.—S.

#### **260. Advanced Thermodynamics of Solids (4)**

Lecture/discussion—4 hours. Prerequisite: course 160. Thermodynamic principles, formalism and their application to solid materials. Specific examples from ceramic and solid state systems. Use of thermodynamic approach in developing understanding of constraints for processes in real systems. Offered in alternate years.—F. (F.)

#### **262. Advanced Topics in Structure of Materials (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 162; course 174 recommended; graduate standing in Engineering or consent of instructor. Nature of microstructure in engineering materials. Crystalline and non-crystalline structures, with special emphasis on grain boundary segregation in the development of polycrystalline microstructure and the radial distribution function of amorphous materials. Not open for credit to students who previously completed (cancelled) course 245.—F. (F.)

#### **264. Transport Phenomena in Materials Processes (4)**

Lecture/discussion—4 hours. Prerequisite: graduate standing in Engineering. Thermodynamic driving forces and atomic-scale mechanisms underlying diffusive mass transport and interface motion in materials. Nucleation, growth and coarsening dynamics of phase transformations. Not open for credit to students who previously completed course 240.—W. S. (W. S.)

#### **272. Advanced Functional Properties of Materials (4)**

Lecture/discussion—4 hours. Prerequisite: graduate standing in Physics, Chemistry, and Engineering. Fundamental physical properties of solid materials important to solid state devices, specifically electronic, magnetic, and optical properties. Topics include band structures, metals, superconductors, semiconductors, dielectrics, optical properties, and magnetic properties and implementation of these properties into devices. Offered irregularly.—F. (F.)

#### **274. Advanced Mechanical Properties of Materials (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 174. Comprehensive study of mechanical properties of materials, with special attention to dislocations and deformation and fracture control mechanisms. Mechanical properties of conventional engineering materials as well as advanced materials such as nanocrystalline solids and thin films are considered. Offered in alternate years.—W. (W.)

#### **282. Glass: Science and Technology (3)**

Lecture—2 hours; extensive writing—1 hour. Prerequisite: graduate standing in Chemistry, Physics or Engineering, or consent of instructor. Modern para-

digm in glass science and their applications to technologies. Relation of macroscopic properties of glasses and glass-forming liquids to atomic-level structures, including principles of formation, relaxation, transport phenomena, nucleation, crystallization and phase separation in glasses. Offered irregularly.—S. (S.)

#### **289A. Special Topics in Materials Science; Electronic Materials (1-5)**

Lecture/laboratory. Prerequisite: consent of instructor. Special topics in Electronic Materials. May be repeated for credit when topic differs. Offered irregularly.—F. W. S. (F. W. S.)

#### **289B. Special Topics in Materials Science; Electronic Materials (1-5)**

Lecture/laboratory. Prerequisite: consent of instructor. Special topics in Electronic Materials. May be repeated for credit when topic differs. Offered irregularly.—F. W. S. (F. W. S.)

#### **289C. Special Topics in Materials Science; Physics and Chemistry of Materials (1-5)**

Lecture/laboratory. Prerequisite: consent of instructor. Special topics in Physics and Chemistry of Materials. May be repeated for credit when topic differs. Offered irregularly.—F. W. S. (F. W. S.)

#### **289D. Special Topics in Materials Science; Materials Processing (1-5)**

Lecture/laboratory. Prerequisite: consent of instructor. Special topics in Materials Processing. May be repeated for credit when topic differs. Offered irregularly.—F. W. S. (F. W. S.)

#### **289E. Special Topics in Materials Science; Materials Science and Forensics (1-5)**

Lecture/laboratory. Prerequisite: consent of instructor. Special topics in Materials Science and Forensics. May be repeated for credit when topic differs. Offered irregularly.—F. W. S. (F. W. S.)

#### **289F. Special Topics in Materials Science; Biomaterials (1-5)**

Lecture/laboratory. Prerequisite: consent of instructor. Special topics in Biomaterials. May be repeated for credit when topic differs. Offered irregularly.—F. W. S. (F. W. S.)

#### **289G. Special Topics in Materials Science; Surface Chemistry of Metal Oxides (1-5)**

Lecture/laboratory. Prerequisite: consent of instructor. Special topics in Surface Chemistry of Metal Oxides. May be repeated for credit when topic differs. Offered irregularly.—F. W. S. (F. W. S.)

#### **290C. Graduate Research Conference (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Individual and/or group conference on problems, progress, and techniques in materials science and engineering research. May be repeated for credit. (S/U grading only.)—F. W. S. (F. W. S.)

#### **294. Materials Science Seminar (1)**

Seminar—1 hour. Current literature and developments in materials science with presentations by individual students. May be repeated for credit. (S/U grading only.)—F. W. S. (F. W. S.)

#### **298. Group Study (1-5)**

Prerequisite: consent of instructor. Group study.—F. W. S. (F. W. S.)

#### **299. Research (1-12)**

Prerequisite: consent of instructor. Research. (S/U grading only.)—F. W. S. (F. W. S.)

#### **Professional**

#### **390. The Teaching of Materials Science (1)**

Discussion—1 hour. Prerequisite: meet qualifications for teaching assistant and/or associate-in in materials science and engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.)—F. W. S. (F. W. S.)

Dean C. Karnopp, Ph.D., Professor Emeritus

John D. Kemper, Ph.D., Professor Emeritus

Wolfgang Kollmann, Dr.Ing., Professor Emeritus

Donald L. Margolis, Ph.D., Professor Emeritus

Allan A. McKillop, Ph.D., Professor Emeritus  
Bruce R. White, Ph.D., Professor Emeritus

## Affiliated Faculty

James Schaaf, Ph.D., Lecturer

## The Mechanical and Aerospace Engineering Undergraduate Programs

The Department of Mechanical and Aerospace Engineering administers two undergraduate programs in the College of Engineering: (1) Mechanical Engineering, (2) Aerospace Science and Engineering.

For more information about our programs, please see <http://mae.ucdavis.edu/ug.php>.**Mission.** The Department of Mechanical and Aerospace Engineering is committed to educating future engineers so that they may contribute to the economic growth and well-being of the state, the nation, and the world, and to the advancement of knowledge in the mechanical and aerospace sciences.**Objectives.** The objectives of the programs offered in Mechanical and Aerospace Engineering include the following: to prepare its graduates to practice mechanical and/or aerospace engineering in a broad range of industries, to enable interested graduates to pursue graduate education, to prepare its graduates to participate in research and development, and in other creative and innovative efforts in science, engineering, and technology and to allow interested graduates to pursue entrepreneurial endeavors.**Preparatory Requirements.** In order to change to any major offered by the Department of Mechanical and Aerospace Engineering, students must:

- Be a registered student and have completed at least one quarter (minimum of 12 units) at UC Davis;
- Have completed not more than 135 cumulative units (excluding AP units);
- Be in good academic standing and meet minimum progress requirements;
- Have received a letter grade for all courses that satisfy Engineering degree requirements;
- Have: a) completed at least the following five courses: Mathematics 21A, B, C; Physics 9A and Chemistry 2A and b) have a GPA of 2.800 or better in all completed Mathematics, Physics, Biology and Chemistry courses required for your intended major, and have received a C- or better in each of these courses;
- Have no grade lower than a C in any completed engineering course required for your intended major(s) taken at UC Davis;
- Have a 2.800 UC GPA in completed engineering courses.

## Mechanical Engineering Undergraduate Program

The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The mechanical engineer uses basic science in the design and manufacture of complex engineering systems, requiring the application of physical and mechanical principles to the development of machines, energy conversion systems, materials, and equipment for guidance and control.

Work in this broad field of engineering requires a thorough knowledge of mathematics, physics, chemistry, material science, applied mechanics, thermodynamics, heat transfer, mass transfer, electricity, manufacturing processes, and economics.

The Mechanical Engineering program is designed to provide knowledge in mechanical engineering and associated applied sciences so that graduates may practice in a broad range of industries, pursue graduate studies, participate in research and development, and/or pursue entrepreneurial endeavors.

Engineering: Mechanical and Aerospace Engineering

## Areas of Interest

Students spend their third year in further study of fundamental courses, and in the fourth year they may tailor their studies to their interests by selecting courses in controls and systems analysis, fluid mechanics, heat transfer, mechanical design or thermodynamics. Students can either prepare for graduate study in mechanical engineering or obtain a broad background for entering engineering practice.

Students may select elective courses from among the areas of interest listed below.

**Mechanical Design.** The creation and improvement of products, processes, or systems that are mechanical in nature are the primary activities of a professional mechanical engineer. The development of a product from concept generation to detailed design, manufacturing process selection and planning, quality control and assurance, and life cycle considerations are areas of study and specialization in the area of mechanical design.

Solutions to such major social problems as environmental pollution, the lack of mass transportation, the lack of raw materials, and energy shortages, will depend heavily on the engineer's ability to create new types of machinery and mechanical systems.

The engineer-designer must have a solid and relatively broad background in the basic physical and engineering sciences and have the ability to synthesize the information from such a background in creative problem solving. In addition to having technical competence, the designer must be able to consider the socioeconomic consequences of a design and its possible impact on the environment. Product safety, reliability, and economics are other considerations.

Suggested technical electives:

Aerospace Science and Engineering 133,  
139Biological Systems Engineering 114, 120,  
165Biomedical Engineering 118/Electrical and  
Computer Engineering 147Engineering 122, 160 (only one unit of credit  
towards Technical Electives requirement)Materials Science and Engineering 180,  
181, 182Mechanical Engineering 121, 134, 150B,  
151, 152, 154, 161, 163**Suggested Advisers.** H.H. Cheng, R.T. Farouki, M.R. Hill, B.S. Linke, B. Ravani, M. Soshi, S. Velinsky, K. Yamazaki**Biomedical and Engineering Fluid Mechanics.** This field of study is based on the fundamentals of fluid mechanics and their broad range of applications in the biomedical and engineering areas.

Areas of current research include blood circulation and its potential role in the regulation of normal physiological function and in the development of disease; groundwater and atmospheric flows and their implications for pollutant transport and environmental concerns; aerodynamic flow around transportation vehicles and its impact on vehicle performance; and flow in combustion engines and other energy systems with considerations of efficiency and environmental impact. These areas are investigated both experimentally and computationally.

Suggested technical electives:

Aerospace Science and Engineering 138  
Engineering 160 (only one unit of credit  
towards technical requirements)

Chemical Engineering 161A, 161B

Civil and Environmental Engineering 144,  
149

Mechanical Engineering 161, 163

**Suggested Advisers.** R.C. Aldredge, M. Hafez, I.M. Kennedy, S.K. Robinson, B.D. Shaw, C.P. van Dam, A.S. Wexler**Combustion and the Environment.** Combustion is widely used for energy generation, propulsion, heating, and waste disposal, as well as for

many other applications. Mechanical engineers are often heavily involved with the design of combustion systems (internal combustion engines, gas turbines, furnaces, etc.) and deal with aspects of combustion ranging from increasing efficiencies to reducing pollutant emissions. This specialization is for those who would like to work in fields that use combustion, or that deal with pollution related to combustion. With the current increased emphasis on reducing pollutants while maintaining or increasing efficiency, the efforts of mechanical engineers in designing and improving combustion systems are becoming more important.

#### Suggested technical electives:

- Mechanical Engineering 161, 163
- Civil and Environmental Engineering 149, 150

**Suggested Advisers.** R.C. Aldredge, R. Davis, P.A. Erickson, I.M. Kennedy, B.D. Shaw

#### Heat Transfer, Thermodynamics, and Energy Systems.

This specialization emphasizes the fundamentals of heat transfer and thermodynamics, and their application to the design of advanced engineering systems. The objective of the program is to introduce students to the fundamental processes of heat transfer and thermodynamics in complex engineering systems so that they are able to design more efficient, cost effective, and reliable systems with less environmental pollution and impact. An understanding of heat transfer and thermodynamics is required for the design of efficient, cost-effective systems for power generation, propulsion, heat exchangers, industrial processes, refining, and chemical processing. This area of specialization is important to many industries— aerospace, defense, automotive—as well as to the thermal design of electronic and computer packages.

#### Suggested technical electives:

- Aerospace Science and Engineering 138
- Mechanical Engineering 161, 163

**Suggested Advisers.** R.C. Aldredge, R. Davis, P.A. Erickson, I.M. Kennedy, J.W. Park, B.D. Shaw

**Manufacturing.** Manufacturing is concerned with the conversion of raw materials into finished products by a variety of processes, such as machining, forming, casting, and molding. Modern manufacturing technology is increasingly dependent upon integration with computer-aided design systems and precision computer controls. State-of-the-art laboratories offer the opportunity for hands-on experience with a wide spectrum of manufacturing equipment. Manufacturing engineers must have expertise in design, materials, controls, statistical methods, computer software, and microprocessor applications.

#### Suggested technical electives:

- Biomedical Engineering 118/Electrical and Computer Engineering 147
- Electrical and Computer Engineering 160
- Materials Science and Engineering 180, 181
- Mechanical Engineering 150B, 151, 154

**Suggested Advisers.** H.H. Cheng, R.T. Farouki, B.S. Linke, D.A. Horsley, V. La Saponara, M. Soshi, B. Ravani, K. Yamazaki

**System Dynamics and Control.** Engineers are increasingly concerned with the performance of integrated dynamics systems in which it is not possible to optimize component parts without considering the overall system.

System dynamics and control specialists are concerned with the modeling, analysis, and simulation of all types of dynamic systems and with the use of automatic control techniques to change the dynamic characteristics of systems in useful ways. The emphasis in this program is on the physical systems that are closely related to mechanical engineering, but the techniques for studying these systems apply to social, economic, and other dynamic systems.

Ongoing research includes projects on continuously variable transmissions, active and semi-active suspension systems, modeling and control of vehicle dynamics, electromechanical actuator design, elec-

tronically controlled steering, the analysis of fuel management systems, and the design of flight-control systems with humans in the loop.

#### Suggested technical electives:

- Aerospace Science and Engineering 129, 139, 141
- Electrical and Computer Engineering 160
- Engineering 122
- Mechanical Engineering 121, 134, 154

**Suggested Advisers.** F.O. Eke, R.A. Hess, S. Joshi

**Ground Vehicle Systems.** An important aspect of mechanical engineering is the design of more environmentally benign surface vehicles that provide efficient individual and public transportation. Innovations in the field require competence in vehicle dynamics, control of vehicle dynamics, power sources and power transmission, lightweight structures and systems, alternatively fueled power systems, including electrical drives and fuel cells, and mechanical systems.

#### Suggested technical electives:

- Aerospace Science and Engineering 127, 129, 139
- Civil and Environmental Engineering 130, 149, 160
- Engineering 122, 160 (only one unit of credit towards Technical Electives requirement)
- Mechanical Engineering 121, 134, 152

**Suggested Advisers.** P. A. Erickson, M. Hill, J. Park, N. Sarigul-Klijn, S. Velinsky

**Transportation Systems.** As society recognizes the increasing importance of optimizing transportation systems to minimize environmental degradation and energy expenditure, engineers will need to consider major innovations in the way people and goods are moved. Such innovations will require competence in vehicle dynamics, propulsion and control, and an understanding of the problems caused by present-day modes of transportation. Vehicle control requires an understanding of sensors and actuators, and the integration of yet-to-be-proposed concepts into overall vehicular dynamics. Competence in these areas allows for the development of alternative propulsion concepts, such as electric, hybrid, and fuel cell.

#### Suggested technical electives:

- Aerospace Science and Engineering 127, 129
- Biological Systems Engineering 114, 120
- Civil and Environmental Engineering 131, 149
- Engineering 122, 160 (only one unit of credit towards Technical Electives requirement)
- Mechanical Engineering 134, 150B, 161, 163

**Suggested Advisers.** P.A. Erickson, J.W. Park, S. Velinsky

## Mechanical Engineering Program Requirements

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Mechanical Engineering major is 159.

#### Lower Division Required Courses

	UNITS
Mathematics 21A-21B-21C-21D	16
Mathematics 22A-22B	6
Physics 9A-9B-9C-9D	19
Chemistry 2A-2B or 2AH-2BH	10
Engineering 4	3
Engineering 6 or Mechanical	
Engineering 5	4
Engineering 17, 35, 45 (or 45Y)	12
Mechanical Engineering 50	4

English 3 or University Writing Program 1, 1Y or 1V, or Comparative Literature 1, 2, 3, or 4, or Native American Studies 5 (grade of C- or better is required) ..... 4  
Communication 1 or 3 ..... 4

#### Upper Division Required Courses

Engineering 100, 102, 103, 104, 105, 190	22
Mechanical Engineering 106, 108, 109, 150A, 165, 172	24
Mechanical Engineering 185A & 185B (taken in consecutive quarters), or Aerospace Science and Engineering 130A & 130B	8
Select one course from the following Applied Mathematics Electives: Chemical Engineering 140, Civil & Environmental Engineering 114, Computer Science Engineering 130, Engineering 180, Mathematics 118A, 128A, 128B, Mechanical Engineering 115, 151, Statistics 130A, 131A	4
Select one course from the following System Dynamics/Mechanical Design Electives: Engineering 122, Mechanical Engineering 121, 139, 150B, 154 or 171	4
Select two courses from the following Restricted Electives: Aerospace Science and Engineering 129, 138, 140, 141, 142; Engineering 122, 188, Materials Science and Engineering 180, 182; Mechanical Engineering 134, 152, 161, 163, 164. Students may also choose from Aerospace Science and Engineering 130A, 130B, Mechanical Engineering 121, 139, 150B, 151, 154, 171 if these courses are not used in satisfaction of other degree requirements	
Technical Elective Requirement	7

At least four units must be taken from any Upper Division Engineering course, which may include courses from the above System Dynamics/Mechanical Design or Restricted Elective lists if these courses are not used in satisfaction of other degree requirements. Up to 4 units may be selected from Mechanical Engineering 185A/B or any engineering 192, 199 not used in satisfaction of other degree requirements. Courses that cannot be used are Biomedical Engineering 110L, Engineering 160, 191, 198 (Gearing up for Graduate School/undergraduate research), Computer Science Engineering 188 or any 197T course.

Up to three units may be used from the following technical electives list:  
Agricultural and Resource Economics 100A, 100B, 112  
Applied Biological Systems Technology 101, 142, 165  
Atmospheric Science 149, 160  
Biological Sciences 2A, 2B, 2C  
Chemistry 2C, 2CH, 8A, 8B and any upper division course except Chemistry 195 and 197

Economics 100, 101, 102, 103, 122  
Engineering: Any upper division course offered in the college of engineering except Biomedical Engineering 110L, Engineering 160, 191, 198 (Gearing Up for Grad School/Undergraduate Research), Computer Science Engineering 188 or any 197T course

Environmental and Resource Sciences 100, 100L, 121, 131, 136, 185, 186, 186L

Exercise Biology 102  
Fiber and Polymer Science 100 (same as Materials Science Engineering 147)

Food Science and Technology 159, 160  
Geology 17, 32, 35, 36, 50, 50L, 60, 100, 100L, 101, 101L, 130, 131, 160, 162, 163

Hydrologic Science 110, 124, 134, 141, 142, 143, 144, 146, 151, 182

Management 11A, 11B, 100, 120, 140, 150, 160, 170, 180

Mathematics: any upper division course except Mathematics 197TC  
 Physics 9HE and any upper division course except Physics 160 (restricted to one unit of technical elective), 195, 197T  
 Statistics: any upper division course except Statistics 100, 102, 103, 104, 106, 108  
 Upper Division Composition  
 Requirement ..... 0 or 4  
 One course from the following (a grade of C- or better is required): University Writing Program 101, 102E, 104A, 104E, 104T or passing the Upper-Division Composition Exam.

## Division of Aerospace Science and Engineering

The Division of Aerospace Science and Engineering administers the Aerospace Science and Engineering Program within the Department of Mechanical and Aerospace Engineering.

### Faculty

Roger Davis, Ph.D., Professor  
 Jean-Pierre Delplanque, Ph.D., Professor  
 Fidelis O. Eke, Ph.D., Professor  
 Mohamed M. Hafez, Ph.D., Professor  
*Academic Senate Distinguished Teaching Award*  
 Ronald A. Hess, Ph.D., Professor  
 Sanjay S. Joshi, Ph.D., Associate Professor  
 Valeria La Saponara, Ph.D., Assistant Professor  
 Stephen K. Robinson, Ph.D., Professor  
 Nesrin Sarigul-Klijn, Ph.D., Professor  
 C. P. (Case) van Dam, D. Engr., Professor

## The Aerospace Science & Engineering Undergraduate Program

The Aerospace Science and Engineering program is accredited by the Engineering Accreditation Commission of ABET; <http://www.abet.org>.

Aerospace Science and Engineering majors learn to apply the principles of the physical sciences and engineering to the design of aerospace vehicles. Specific objectives include the design, development and manufacture of aerospace vehicles and other transportation systems through the integration of disciplines associated with aerodynamics, propulsion, structures and guidance/control.

Our Bachelor of Science degree in Aerospace Science and Engineering provides a broad background and fundamental education in mathematics, the physical sciences, and the engineering sciences. These fundamentals, when complemented by the required technical courses, prepare students for employment in government or industry, while simultaneously establishing an excellent foundation for graduate studies.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Aerospace Science and Engineering major is 163.

### Lower Division Required Courses

	UNITS
Mathematics 21A-21B-21C-21D .....	16
Mathematics 22A-22B .....	6
Physics 9A-9B-9C-9D .....	19
Chemistry 2A-2B or 2AH-2BH.....	10
Engineering 4 .....	3
Engineering 6 or Mechanical Engineering 5.....	4
Engineering 17, 35, 45 (or 45Y) .....	12
English 3 or University Writing Program 1, 1Y or 1V, or Comparative Literature 1, 2, 3, or 4, or Native American Studies 5 (grade of C- or better is required) .....	4
Communication 1 or 3 .....	4

### Upper Division Required Courses

Engineering 100, 102, 103, 104, 105, 190.....	22
Mechanical Engineering 106, 108, 109, 165, 172.....	20
Aerospace Science and Engineering 127, 129, 130A, 130B, 133, 135, 138 .....	28
Select one course from: Engineering 180, Mechanical Engineering 115 or Mathematics 128C .....	4
Technical electives .....	12

One course must be chosen from the following aeronautics electives: Aerospace Science and Engineering 140, 141 or 142  
 The remaining units must be taken from:  
 EME 139 or EAE 126 or from the above Aeronautics Electives list if not used in satisfaction of other degree requirements.  
 Up to 4 units may be selected from any upper-division engineering course including any engineering 192 or 199 not used in satisfaction of other degree requirements.  
 Courses that cannot be used are Biomedical Engineering 110L, Engineering 160, Computer Science Engineering 188 or any 197T course.

### Upper Division Composition

Requirement ..... 0 or 4  
 One course from the following (grade of C- or better is required): University Writing Program 101, 102E, 104A, 104E, 104T or passing the Upper-Division Composition Exam.

## The Graduate Program in Mechanical and Aeronautical Engineering

M.S. and Ph.D.  
 530-752-0581

The defining element of graduate study in the Mechanical and Aeronautical Engineering Program is interdisciplinary design. Research within this graduate program advances design in diverse fields such as vehicles, plasma MHD propulsion, biomechanics, aerostructures, sensors, combustion, and energy systems. Graduate students acquire skills both to address fundamental issues in these areas and to design complex, multi-component systems. The highly collaborative environment fosters multidisciplinary research while drawing on the study of mathematics, experimental and space plasma science, electrical engineering, materials science, materials modeling, molecular dynamics and numerical analysis, bioengineering, space physics, and nanotechnology in addition to the core areas. Recruiters from industry are active here, knowing that, in addition to having hands-on design experience, our students are well grounded in engineering fundamentals. They study with professors who "wrote the book" on their discipline, and work on design projects with researchers who are international authorities in their field. Our graduate students are able to work closely with faculty in a friendly but demanding environment where teamwork and faculty mentoring are important, as is the cross-disciplinary, collaborative culture that is unique to UC Davis.

### Research Highlights:

- Aeronautics and aerostructures
- Spacecraft design and operation
- Space environmental studies
- Remote sensing
- Electrical propulsion
- Flight dynamics and control
- Computational fluid dynamics
- Experimental MHD turbulence studies
- Dynamic systems and controls
- Robotics
- Materials modeling
- Manufacturing and Mechanical design
- Reacting flows

- Heat transfer
- Automotive system dynamics
- Biosensors/Microelectromechanical Systems (MEMS)
- Molecular self-assembly
- Radiation effects in solids
- Nonlinear dynamics and phase-locking
- Biofluid mechanics
- Biosolid mechanics
- Sports biomechanics
- Energy Systems/Fuel Cell/Hybrid Vehicle Technology
- High energy density science and applications
- Nuclear fusion energy
- Wind energy

### Research Facilities and Partnerships:

- Center for Computational Fluid Dynamics
  - Institute of Transportation Studies
  - Center for Advanced Highway Maintenance and Construction Technology
  - GATE Center for Hybrid Electric Vehicles
  - Aeronautical Wind Tunnel Facility
- Complete Information on our website at [http://mae.ucdavis.edu/grad\\_studies/](http://mae.ucdavis.edu/grad_studies/).

## Courses in Engineering: Mechanical (EME)

Courses in Mechanical Engineering (EME) are listed below; courses in Aerospace Science and Engineering (EAE) are listed immediately following; graduate courses in Mechanical and Aeronautical Engineering (MAE) follow.

### Lower Division

#### 1. Mechanical Engineering (1)

Lecture—1 hour. Description of the field of mechanical engineering with examples taken from industrial applications, discussions of the practice with respect to engineering principles, ethics, and responsibilities. (P/NP grading only.) —F. (F.)

#### 5. Computer Programming for Engineering Applications (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Mathematics 16A or 21A (may be taken concurrently). Structured programming in C for solving problems in engineering. Introduction to MATLAB and comparison study of C/C++ with MATLAB. Not open for credit to students who have completed course 124. GE credit: QL, SE, SL, VL.—F. (F.) Cheng

#### 50. Manufacturing Processes (4)

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: C- or better in: Engineering 4 and Physics 9A. Restricted to Mechanical Engineering and Mechanical Engineering/Materials Science Engineering majors. Modern manufacturing methods, safety, manufacturing instructions, computer-aided manufacturing and their role in the engineering design and development process. GE credit: SciEng | QL, SE, VL.—F, W, Su. (F, W, Su.) Farouki, Linke, Soshi

#### 92. Internship in Mechanical Engineering (1-5)

Internship. Prerequisite: lower division standing; approval of project prior to period of internship. Supervised work-study experience in engineering. May be repeated for credit. (P/NP grading only.)

#### 97C. Mentoring and Tutoring Engineering in the Community (1-4)

Prerequisite: consent of instructor. Mentoring, coaching, tutoring and/or supervision of students in K-12 schools in Engineering-related topics. May be repeated for credit. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor; lower division standing. (P/NP grading only.)

**Upper Division****106. Thermo-Fluid Dynamics (4)**

Lecture—4 hours. Prerequisite: C- or better in Engineering 103 and 105. Restricted to Mechanical Engineering, Aerospace Science and Engineering, and Mechanical Engineering/Materials Science Engineering majors. Inviscid incompressible flow, compressible flow, ideal gas mixtures, psychrometrics, reacting mixtures and combustion. GE credit: SciEng | SE.—F, W, S. (F, W, S.) Aldredge, Kennedy, Park

**108. Measurement Systems (4)**

Lecture—2 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: C- or better in Engineering 100 and Engineering 102; Engineering 104 recommended. Restricted to Mechanical Engineering, Aerospace Science & Engineering and Mechanical/Materials Science & Engineering. Stability of flexible systems. Introduction to fluid-structure interaction. Mechanical vibrations. Experiments to illustrate principles of mechanical systems. Theory of measurements; Signal analysis; Demonstration of basic sensors for mechanical systems; Experimental project design; Experiments involving voltage measurement; strain gauges, dynamic systems of 0th, 1st and 2nd order. Three units of credit for students who have previously taken Biomedical Engineering 111; two units of credit for students who have previously taken Biological Systems Engineering 165; one unit of credit allowed for students who have completed course 107B (former version of course 108). GE credit: SciEng | QL, SE, VL, WE.—F, W, S. (F, W, S.) Erickson, Hill, Horsley, La Saponara

**109. Experimental Methods for Thermal Fluids (4)**

Lecture—2 hours; laboratory—1.5 hours; discussion—1 hour; extensive writing. Prerequisite: grade of C- or better in course 106. Restricted to Mechanical Engineering, Aerospace Science & Engineering and Mechanical/Materials Science Engineering Majors. Experiments to illustrate principles of thermal-fluid systems. Statistical and uncertainty analysis of data; statistical design of experiments; measurement devices; experiments involving thermodynamic cycles, combustion, compressible and incompressible flows. Not open for credit to students who have completed Chemical Engineering 150A. GE credit: SciEng | QL, SE, VL.—F, W, S. (F, W, S.) Aldredge, Davis, Delplanque, Hwang, Kennedy, Robinson

**115. Introduction to Numerical Analysis and Methods (4)**

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: C- or better in: Engineering 6 or course 5 or Computer Science Engineering 30 or Chemical and Materials Science Engineering 6; C- or better in: Mathematics 21A, 21B, 21C, 21D, 22A, 22B; C- or better in: Physics 9A, 9B, 9C. Number representation, Taylor expansions, error and stability analysis, roots of nonlinear equations, sets of linear equations, numerical integration, ordinary differential equations. Not open for credit to students who have taken Applied Science Engineering 115. GE credit: SciEng | SE.—F, W. (F, W.) Jensen

**121. Engineering Applications of Dynamics (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: C- or better in Engineering 102; C- or better in Engineering 6 or course 5 or Computer Science Engineering 30. Restricted to Mechanical Engineering, Aerospace Science and Engineering, and Mechanical Engineering/Materials Science Engineering majors. Technical elective that revisits dynamic principles with emphasis on engineering applications; stressing importance of deriving equations of motion and setting these into format for computer solution with computer simulation lab, students gain experience with solving complex, real engineering applications. GE credit: SciEng | QL, SE, SL, VL.—S. (S.) Margolis

**134. Vehicle Stability (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: C- or better in Engineering 102. Restricted to Mechanical Engineering, Aerospace Science and

Engineering, and Mechanical Engineering/Materials Science Engineering majors. Introduction to the static and dynamic stability characteristics of transportation vehicles with examples drawn from aircraft, high-performance automobiles, rail cars and boats. Laboratory experiments illustrate the dynamic behavior of automobiles, race cars, bicycles, etc. GE credit: SciEng | QL, SE.—S. (S.) Karnopp

**139. Stability of Flexible Dynamic Systems (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: grade of C- or better in Engineering 102 and 103. Stability of flexible systems. Introduction to fluid-structure interaction. Mechanical vibrations. Design of mechanical subsystems or systems under constraints. Dynamic instabilities. Flutter. Control effectiveness. Energy extraction from fluid-structure interactions. Design applications to aerospace, mechanical and biomedical systems. No credit for students who have completed Aerospace Science and Engineering 139. GE credit: SciEng | SE.—S. (S.) Sarigul-Klijn

**150A. Mechanical Design (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in: Engineering 45 or Engineering 45Y; C- or better in both Engineering 104 and course 50 (may be taken concurrently). Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering majors. Principles of engineering mechanics applied to mechanical design. Theories of static and fatigue failure of metals. Design projects emphasizing the progression from conceptualization to hardware. Experimental stress analysis and mechanical measurements using strain gages. GE credit: SciEng | QL, SE, VL, WE.—F, S, Su. (F, S, Su.) Hill, Moore, Ravani, Schaaf

**150B. Mechanical Design (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in course 150A. Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Principles of engineering mechanics applied to the design and selection of mechanical components. Design projects, which concentrate on conceptual design, engineering analysis, methods of manufacture, material selection, and cost. Introduction to Computer-Aided Design. GE credit: SciEng | QL, SE, VL.—W, S. (W, S.) Farouki, Linke

**151. Statistical Methods in Design and Manufacturing (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in course 150A. Restricted to Restrictions on Enrollment Text: Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Methods of statistical analysis with emphasis on applications in mechanical design and manufacturing. Applications include product evaluation and decision making, stress-strength interference, probabilistic design, systems reliability, and fatigue under random loading. GE credit: SciEng | QL, SE, VL.—W. (W.) C. Davis

**152. Computer-Aided Mechanism Design (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in Engineering 102; C- or better in course 5 or Engineering 6 or Computer Science Engineering 30. Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Principles of computer-aided mechanism design. Computer-aided kinematic, static, and dynamic analysis and design of planar mechanisms such as multiple-loop linkages and geared linkages. Introduction to kinematic synthesis of mechanisms. Offered in alternate years. GE credit: SciEng | QL, SE, VL.—(F) Cheng

**154. Mechatronics (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: C- or better in each of the following: Engineering 100 and Engineering 102 and course 50. Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Mechatronics system concept

and overview, control system design ware architecture, microcontroller and interface technology for mechatronics control, sensor for mechatronics systems, actuator drives. GE credit: SciEng | QL, SE, VL.—S. (S.) Yamazaki

**161. Combustion and the Environment (4)**

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: grade of C- or better in course 106. Introduction to combustion kinetics; the theory of premixed flames and diffusion flames; turbulent combustion; formation of air pollutants in combustion systems; examples of combustion devices which include internal combustion engines, gas turbines, furnaces and waste incinerators; alternative fuel sources. GE credit: SciEng | QL, SE, VL.—W. (W.) Shaw

**163. Internal Combustion Engines and Future Alternatives (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: C- or better in course 50 and course 106. Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Fundamentals of internal combustion engine design and performance. Future needs to adapt to environmental concerns, and the feasibility of better alternatives in the future. GE credit: SciEng | QL, SE, VL.—F. (F.) Erickson, Park

**164. Introduction to Heating, Ventilation and Air Conditioning Systems (4)**

Lecture—4 hours. Prerequisite: C- or better in both course 106 and 165. Introduction to basic mechanisms and processes associated with heating, ventilation and air conditioning (HVAC), including equipment and systems used for HVAC in residential and commercial buildings. Only 2 units for students who have completed Civil and Environmental Engineering 125. Offered in alternate years. GE credit: SciEng | SE.—W. Modera

**165. Heat Transfer (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in course 5 or Engineering 6 or Computer Science Engineering 30; C- or better in Engineering 103 and 105. Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Conduction, convection, and radiation heat transfer. Computational modeling of heat transfer in engineering. Applications to engineering equipment with the use of digital computers. GE credit: SciEng | QL, SE, VL.—F, S, Su. (F, S, Su.) R. Davis, Narayanan, Shaw

**171. Analysis, Simulation and Design of Mechatronic Systems (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: C- or better in Engineering 100 and 102. Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Modeling of dynamic engineering systems in various energy domains. Analysis and design of dynamic systems. Response of linear systems. Digital computer simulation and physical experiments. GE credit: SciEng | QL, SE, VL.—F, W. (F, W.) Assadian, Horsley, Karnopp

**172. Automatic Control of Engineering Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in Engineering 100 and 102. Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Classical feedback control; block diagrams; control systems performance specifications; steady state errors; rise and settling times; root locus; PID controllers; control design with Bode and Nyquist plots; stability; phase and gain margin; lead and lag compensators; state variable feedback controllers. GE credit: SciEng | QL, SE, VL.—F, W, S, Su. (F, W, S, Su.) Eke, Horsley, Joshi

**185A. Mechanical Engineering Systems Design Project (4)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: C- or better in: course 150A and course 165 (may be taken concurrently); Communications 1 or 3 recommended; upper division composition recommended. Restricted to Senior standing in Mechanical

Engineering (EMEC). Major mechanical engineering design experience; the mechanical engineering design process and its use in the design of engineering systems incorporating appropriate engineering standards and multiple realistic constraints. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | OL, QL, SE, VL, WE. —W. (W.) C. Davis, Velinsky, Moore

### **185B. Mechanical Engineering Systems Design Project (4)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 185A and senior standing in the Department of Mechanical and Aerospace Engineering. Major mechanical engineering design experience; the mechanical engineering design process and its use in the design of engineering systems incorporating appropriate engineering standards and multiple realistic constraints. (Deferred grading only, pending completion of sequence.) GE credit: Sci | OL, QL, SE, VL, WE. —S. (S.) Velinsky, C. Davis, Moore, Robinson

### **189A. Selected Topics in Mechanical Engineering; Energy Systems and the Environment (1-5)**

Prerequisite: consent of instructor. Directed group study in Energy Systems and the Environment. May be repeated for credit when the topic is different. Offered irregularly.

### **189B. Selected Topics in Mechanical Engineering; Engineering Controls (1-5)**

Prerequisite: consent of instructor. Directed group study in Engineering Controls. May be repeated for credit when the topic is different. Offered irregularly.

### **189C. Selected Topics in Mechanical Engineering; Engineering Dynamics (1-5)**

Prerequisite: consent of instructor. Directed group study in Engineering Dynamics. May be repeated for credit when the topic is different. Offered irregularly.

### **189D. Selected Topics in Mechanical Engineering; Biomechanics (1-5)**

Prerequisite: consent of instructor. Directed group study in Biomechanics. May be repeated for credit when the topic is different. Offered irregularly.

### **189E. Selected Topics in Mechanical Engineering; Fluid Mechanics (1-5)**

Prerequisite: consent of instructor. Directed group study in Fluid Mechanics. May be repeated for credit when the topic is different. Offered irregularly.

### **189F. Selected Topics in Mechanical Engineering; Manufacturing Engineering (1-5)**

Prerequisite: consent of instructor. Directed group study in Manufacturing Engineering. May be repeated for credit when the topic is different. Offered irregularly.

### **189G. Selected Topics in Mechanical Engineering; Mechanical Engineering and Product Design (1-5)**

Prerequisite: consent of instructor. Directed group study in Mechanical Engineering and Product Design. May be repeated for credit when the topic is different. Offered irregularly.

### **189H. Selected Topics in Mechanical Engineering; Mechatronics Systems (1-5)**

Prerequisite: consent of instructor. Directed group study in Mechatronics Systems. May be repeated for credit when the topic is different. Offered irregularly.

### **189I. Selected Topics in Mechanical Engineering; MEMS/Nanotechnology (1-5)**

Prerequisite: consent of instructor. Directed group study in MEMS/Nanotechnology. May be repeated for credit when the topic is different. Offered irregularly.

### **189J. Selected Topics in Mechanical Engineering; Solid and Structural Mechanics (1-5)**

Prerequisite: consent of instructor. Directed group study in Solid and Structural Mechanics. May be repeated for credit when the topic is different. Offered irregularly.

### **189K. Selected Topics in Mechanical Engineering; Thermodynamics (1-5)**

Prerequisite: consent of instructor. Directed group study in Thermodynamics. May be repeated for credit when the topic is different. Offered irregularly.

### **189L. Selected Topics in Mechanical Engineering; Vehicle and Transportation Systems (1-5)**

Prerequisite: consent of instructor. Directed group study in Vehicle and Transportation Systems. May be repeated for credit when the topic is different. Offered irregularly.

### **192. Internship in Engineering (1-5)**

Internship. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in mechanical engineering. May be repeated for credit. (P/NP grading only.)

### **197TC. Mentoring and Tutoring Engineering in the Community (1-4)**

Prerequisite: upper division standing; consent of instructor. Mentoring, coaching, tutoring and/or supervision of students in K-12 schools in Engineering-related topics. May be repeated for credit. (P/NP grading only.)

### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

## **Courses in Aerospace Science and Engineering (EAE)**

### **Lower Division**

#### **1. Introduction to Aerospace Science Engineering (1)**

Lecture—1 hour. Description of the field of aerospace engineering with examples from industry, government, and research. Aerospace engineering principles, ethics, and responsibilities. (P/NP grading only.) —F. (F.)

#### **10. From the Wright Brothers to Drones and Quadcopters (2)**

Lecture—2 hours. History of aircraft and its influence on society. Topics covered will include Unmanned Aerial Vehicles, safety considerations, economics and privacy issues. Aerodynamics, stability and control will also be introduced. (P/NP grading only.) GE credit: SciEng or SocSci | SE or SS.—Su. (Su.)

#### **99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor and lower division standing. (P/NP grading only.)

### **Upper Division**

#### **126. Theoretical and Computational Aerodynamics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in course 127; C- or better in Engineering 180 or Applied Science Engineering 115 or Mechanical Engineering 115 or Mathematics 128C. Development of general equations of fluid motion. Study of flow field kinematics and dynamics. Flow about a body. Thin airfoil theory. Viscous effects. Applications of numerical methods to wing analysis and design. GE credit: SciEng | SE.—S. Hafez

#### **127. Applied Aircraft Aerodynamics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: grade of C- or better in Mechanical Engineering 106. Experimental characteristics of wing sections. High-lift devices. Lift and drag at high Mach numbers. Drag aerodynamics. Total aircraft drag estimation. Aerodynamic design procedures. GE credit: QL, SE, SL, WE. —F. (F.) Robinson

#### **129. Stability and Control of Aerospace Vehicles (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: grade of C- or better in Engineering 102. Restricted to upper division standing. Aircraft and spacecraft stability and control. Derivation of fundamental

equations of motion for aircraft/spacecraft. Specialization of equations for aircraft. Fundamentals of feedback. Aircraft flight control systems. Specialization of equations of motion for orbiting spacecraft. Spacecraft attitude control systems. GE credit: QL, SE. —W. (W.) Hess, Kong

### **130A. Aircraft Performance and Design (4)**

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: C- or better in course 127; C- or better in course 129 (may be taken concurrently). Major aircraft design experience with multiple realistic constraints including aerodynamics, performance analysis, weight estimation, stability and control, and appropriate engineering standards. GE credit: SciEng | SE, QL, VL.—W. (W.) van Dam

### **130B. Aircraft Performance and Design (4)**

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: grade of C- or better in course 130A. Restricted to upper division standing. Major aircraft design experience incorporating multiple realistic constraints including: refinement and iteration of initial design; cost analysis, detailed design, and analysis of aircraft structure; propulsion system; aerodynamics, stability, and control/handling qualities; manufacturing; or appropriate engineering standards. GE credit: OL, SE, SL, VL, WE.—S. (S.) van Dam

### **133. Finite Element Methods in Structures (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisites: grade of C- or better in Engineering 104. Open to College of Engineering Students. Introduction to the aerospace structural design process. History of aircraft and spacecraft materials. Effects of loading beyond elastic limit. Deflections and stresses due to combined loading. Virtual work principles, and finite element methods. Applications to aerospace structures. GE credit: SE. —F. (F.) Sarigul-Klijn

### **135. Aerospace Structures (4)**

Lecture—4 hours. Prerequisite: C- or better in Engineering 104; course 126 or 127 recommended. Analysis and design methods used in aerospace structures. Shear flow in open, closed and multicell beam cross-sections, buckling of flat and curved sheets, tension field beams, local buckling. GE credit: SciEng | QL, SE.—W. (W.) La Saponara

### **137. Structural Composites (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: grade of C- or better in Engineering 104. Overview of materials and technology for creating structures from fiber reinforced resin matrix composite material systems. Elementary design analysis and case studies emphasizing aeronautical applications. GE credit: SE.—La Saponara

### **138. Aircraft Propulsion (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: C- or better in Mechanical Engineering 106. Analysis and design of modern aircraft gas turbine engines. Development and application of cycle performance prediction techniques for important engine configurations. Introduction to the operation and design of inlets, compressors, burners, turbines, and nozzles. Cycle design studies for specific applications. GE credit: SciEng | QL, SE.—W. (W.) R. Davis

### **140. Rocket Propulsion (4)**

Lecture—4 hours. Prerequisite: C- or better in Mechanical Engineering 106. Restricted to upper division standing. Fluid and thermodynamics of rocket engines, liquid and solid rocket propulsion. Space propulsion concepts and space mission requirements. Not open for credit to students who have taken identical course 189A prior to Fall Quarter 2013. GE credit: SciEng | SE.—S. (W.) R. Davis, Delplanque

### **141. Space Systems Design (4)**

Lecture—2 hours; discussion—2 hours. Prerequisite: grade of C- or better in Engineering 102 and Mechanical Engineering 106. Introduction to space systems design including space project organization, requirements definition and specification, concepts formulation, system tradeoffs, subsystem design. Prototype space mission concepts are presented and a multidisciplinary mission design is

developed that considers all relevant architecture elements. Offered in alternate years. GE credit: SciEng | SE. —F. (F.) Joshi

#### **142. Orbital Mechanics (4)**

Lecture—4 hours. Prerequisite: grade of C- or better in Engineering 102. Restricted to upper division standing. Satellite orbits, multistage rockets, current global boosters, and new technologies. Design application problems include satellites, trajectory optimizations, and interplanetary trajectories. Not open for credit to student who have completed course 189B prior to Fall Quarter 2013. GE credit: SciEng | SE. —W, Su. (Su.)

#### **189C. Flight Simulation and Testing in Design of Aircraft and Spacecraft (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Engineering 102; consent of the instructor. Teaches flight test techniques together with data analysis methods to prepare students for any type of flight testing including fixed wing, rotary wing and launch vehicles. Offered irregularly. GE credit: SciEng | SE.—Sarigul-Klijn

#### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Courses in Mechanical and Aeronautical Engineering (MAE)**  
(Formerly courses in Aeronautical Science and Engineering and Mechanical Engineering.)

#### **Graduate**

#### **207. Engineering Experimentation and Uncertainty Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mechanical Engineering 107A and 107B. Design and analysis of engineering experiments with emphasis on measurement standards, data analysis, regressions and general and detailed uncertainty analysis, including statistical treatment of experimental data intervals, propagation of bias and precision errors, correlated bias approximations, and using jitter programs. —F. (S.) C. Davis

#### **208. Measurement Methods in Fluid Mechanics and Combustion (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 165 and Engineering 103. Application of shadow, schlieren and other flow visualization methods. Introduction to optics and lasers. Measurement of velocity and concentrations in reacting and non-reacting flows with laser diagnostic techniques including LDV, Rayleigh, Raman and fluorescence scattering and CARS. Offered irregularly.

#### **210A. Advanced Fluid Mechanics and Heat Transfer (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 103, 105 and Mechanical Engineering 165. Development of differential equations governing continuity, momentum and energy transfer. Solutions in laminar flow for exact cases, low and high Reynolds numbers and lubrication theory. Dynamics of inviscid flow. —F. (F.) Aldredge, Shaw

#### **210B. Advanced Fluid Mechanics and Heat Transfer (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 210A. Study of stability and transition to turbulence. Introduction to the physics of turbulence. Modeling of turbulence for numerical determination of momentum and heat transfer. —W. (W.) Hwang

#### **211. Fluid Flow and Heat Transfer (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 103, 105 and Mechanical Engineering 165 or the equivalent. Design aspects of selected topics; heat conduction, fins; heat transport in ducts, boundary layers and separated flows; heat exchangers. —W. Erickson, Park, Narayanan

#### **212. Biomedical Heat and Mass Transport Processes (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mechanical Engineering 165, Biological Systems Engineering 125, Chemical Engineering 153 or the equivalent. Application of principles of heat and mass transfer to biomedical systems related to heat exchange between the biomedical system and its environment, mass transfer across cell membranes and the design and analysis of artificial human organs. (Same course as Biomedical Engineering 212.) Offered irregularly.—Aldredge

#### **213. Advanced Turbulence Modeling (4)**

Lecture—4 hours. Prerequisite: course 210B. Methods of analyzing turbulence; kinematics and dynamics of homogeneous turbulence; Reynolds stress and heat-flux equations; second order closures and their simplification; numerical methods; application to boundary layer-type flows; two-dimensional and three-dimensional hydraulic and environmental flows. Offered irregularly.—Aldredge

#### **215. Biomedical Fluid Mechanics and Transport Phenomena (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 103 or Chemical Engineering 150B or Civil and Environmental Engineering 141. Application of fluid mechanics and transport to biomedical systems. Flow in normal physiological function and pathological conditions. Topics include circulatory and respiratory flows, effect of flow on cellular processes, transport in the arterial wall and in tumors, and tissue engineering. (Same course as Biomedical Engineering 215.) Offered irregularly.

#### **216. Advanced Thermodynamics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 105. Study of topics important to energy conversion systems, propulsion and other systems using high temperature gases. Classical thermodynamics and quantum statistical mechanics of nonreacting and chemically reacting gases, gas mixtures, and other substances. Offered in alternate years. —W. Shaw

#### **217. Combustion (4)**

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: Engineering 103 and 105, Mechanical Engineering 106. Restricted to graduate students. Review of chemical thermodynamics and chemical kinetics. Discussion of reacting flows, their governing equations and transport phenomena; detonations; laminar flame structure and turbulent combustion. Offered in alternate years. —(W.) Shaw

#### **218. Advanced Energy Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 103 and 105, or the equivalent. Review of options available for advanced power generation. Detailed study of basic power balances, component efficiencies, and overall powerplant performance for one advanced concept such as a fusion, magnetohydrodynamic, or solar electric powerplant. —(F.) Erickson

#### **219. Introduction to Scientific Computing in Solid and Fluid Dynamics (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Engineering 103 and 104. Scientific calculations with finite element and finite difference methods for multi-dimensional problems in solid and fluid dynamics are performed with examples in C, C++, FORTRAN, and MATLAB script files. Derivation of the basic equations of motion in finite volume form with applications to elasticity, waves. —F. (F.) Delplanque

#### **220. Mechanical Vibrations (4)**

Lecture—4 hours. Prerequisite: Engineering 122. Multiple degrees of freedom; damping measures; Rayleigh's method; vibration absorbers; eigenvalues and modeshapes; modal coordinates; forced vibrations; random processes and vibrations; auto-correlation; spectral density; first passage and fatigue failure; nonlinear systems; phase plane. Offered in alternate years.—Eke

#### **222. Advanced Dynamics (4)**

Lecture—4 hours. Prerequisite: Engineering 102. Dynamics of particles, rigid bodies and distributed systems with engineering applications; generalized

coordinates; Hamilton's principle; Lagrange's equations; Hamilton-Jacobi theory; modal dynamics orthogonality; wave dynamics; dispersion. —F. (F.) Karnopp

#### **223. Multibody Dynamics (4)**

Lecture—4 hours. Prerequisite: Engineering 102. Coupled rigid-body kinematics/dynamics; reference frames; vector differentiation; configuration and motion constraints; holonomicity; generalized speeds; partial velocities; mass; inertia tensor/theorems; angular momentum; generalized forces; comparing Newton/Euler, Lagrange's, Kane's methods; computer-aided equation derivation; orientation; Euler; Rodrigues parameters. (Same course as Biomedical Engineering 223.) —W. S. (W.) Eke, Ravani

#### **225. Spatial Kinematics and Robotics (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: C Language and course 222. Spatial kinematics, screw theory, spatial mechanisms analysis and synthesis, robot kinematics and dynamics, robot workspace, path planning, robot programming, real-time architecture and software implementation. (Same course as Biomedical Engineering 225.) Offered irregularly.—Ravani

#### **226. Acoustics and Noise Control (4)**

Lecture—4 hours. Prerequisite: Engineering 122. Description of sound using normal modes and waves; interaction between vibrating solids and sound fields; sound absorption in enclosed spaces; sound transmission through barriers; applications in design, acoustic enclosures and sound walls, room acoustics, design of quiet machinery. —Sarigul-Klijn

#### **227. Research Techniques in Biomechanics (4)**

Lecture—2 hours; laboratory—4 hours; term paper or discussion—1 hour. Prerequisite: Mathematics 22B and consent of instructor; Exercise Science 115 recommended. Experimental techniques for biomechanical analysis of human movement. Techniques evaluated include data acquisition and analysis by computer, force platform analysis, strength assessment, planar and three-dimensional videography, data reduction and smoothing, body segment parameter determination, electromyography, and biomechanical modeling. (Same course as Biomedical Engineering 227/Exercise Science 227.) Offered irregularly.

#### **228. Introduction to BioMEMS (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: BS engineering discipline or consent of instructor. Ideal for beginning graduate or advanced undergraduate students interested in microelectromechanical systems (MEMS) topics related to biological applications. Covers topics from various disciplines related to BioMEMS: mechanical, electrical, biomedical, chemical engineering, and materials science. Offered in alternate years. —F. C. Davis

#### **229. Design & Analysis of Micro-Electromechanical Systems (4)**

Lecture—4 hours. Prerequisite: consent of instructor; Engineering 45, 100, 104; Engineering 122 recommended. Mechanical design of micro-electromechanical systems (MEMS). Device modeling: lumped parameter models; energy methods; nonlinearities; electrical and mechanical noise sources. Actuation and measurement methods: capacitive, piezoresistive, thermal, piezoelectric, and optical techniques. Review of basic electronics: bridge circuits, amplitude modulation; lock-in detection. Offered in alternate years. —S. (S.) Horsley

#### **231. Musculo-Skeletal System Biomechanics (4)**

Lecture—4 hours. Prerequisite: Engineering 102. Mechanics of skeletal muscle and mechanical models of muscle, solution of the inverse dynamics problem, theoretical and experimental methods of kinematic and kinetic analysis, computation of intersegmental load and muscle forces, applications to gait analysis and sports biomechanics. (Same course as Biomedical Engineering 231.) Offered irregularly.

**232. Skeletal Tissue Mechanics (3)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: Engineering 104B. Overview of the mechanical properties of the various tissues in the musculoskeletal system, the relationship of these properties to anatomic and histologic structure, and the changes in these properties caused by aging and disease. The tissues covered include bone, cartilage and synovial fluid, ligament and tendon. (Same course as Biomedical Engineering 232.)—S. (S.) R. Fyhrie

**234. Design and Dynamics of Road Vehicles (4)**

Lecture—4 hours. Prerequisite: Mechanical Engineering 134. Analysis and numerical simulation of road vehicles with on design applications.—W. (W.) Velinsky

**236. Aerodynamics in Nature and Technology (4)**

Lecture—4 hours. Prerequisite: Engineering 103. Introduction to aerodynamics in nature, fundamentals of turbulence in atmospheric flows, planetary boundary layers, pedestrian-level winds in urban areas. Criteria for laboratory modeling of atmospheric flows, wind-tunnel testing. Offered irregularly.

**237. Analysis and Design of Composite Structures (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 104 or equivalent. Modeling and analysis methodology for composite structures including response and failure. Laminated plate bending theory. Introduction to failure processes. Includes discussion of aerospace structural analysis.—S. (F.) La Saponara

**238. Advanced Aerodynamic Design and Optimization (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Application of aerodynamic theory to obtain optimum aerodynamic shapes. Both analytic solutions and solutions obtained with numerical optimization techniques will be examined. Includes introduction to the calculus of variations and numerical optimization techniques. Offered irregularly.—van Dam

**239. Advanced Finite Elements and Optimization (4)**

Lecture—4 hours. Prerequisite: Engineering 180 or Applied Science 115 or Mathematics 128C. Introduction to advanced finite elements and design optimization methods, with application to modeling of complex mechanical, aerospace and biomedical systems. Application of states of the art in finite elements in optimum design of components under realistic loading conditions and constraints. (Same course as Biomedical Engineering 239.) Offered in alternate years.—W. Sarigul-Klijn

**240. Computational Methods in Nonlinear Mechanics (4)**

Lecture—4 hours. Prerequisite: Applied Science Engineering 115 or Mathematics 128B or Engineering 180. Deformation of solids and the motion of fluids treated with state-of-the-art computational methods. Numerical treatment of nonlinear dynamics; classification of coupled problems; applications of finite element methods to mechanical, aeronautical, and biological systems. (Same course as Biomedical Engineering 240.) Offered irregularly.—Sarigul-Klijn

**242. Stability of Thin-Walled Structures (4)**

Lecture—4 hours. Prerequisite: Engineering 104 or equivalent. Static stability of thin-walled aerospace structures treated from both theoretical and practical design perspectives. Both monolithic and composite construction considered. Buckling of stiffened panels, shells, and thin-walled beams, experimental methods and failure/crippling processes. Offered irregularly.—La Saponara

**248. Advanced Turbomachinery (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 103 and 105. Preliminary aerodynamic design of axial and radial flow compressors and turbines. Design of diffusers. Selection of turbomachine and configurations and approximations

to optimum dimensions and flow angles. Introduction to through flow analysis. Rotating stall and surge, and aeromechanical considerations. Offered in alternate years.—S. (S.) R. Davis

**250A. Advanced Methods in Mechanical Design (4)**

Lecture—4 hours. Prerequisite: Mechanical Engineering 150A and 150B or the equivalents, or consent of instructor. Applications of advanced techniques of solid mechanics to mechanical design problems. Coverage of advanced topics in stress analysis and static failure theories with emphasis in design of machine elements. Design projects emphasizing advanced analysis tools for life cycle evaluation.—F. (F.) Ravani, Velinsky

**250B. Advanced Methods in Mechanical Design (4)**

Lecture—4 hours. Prerequisite: course 250A. Applications of advanced techniques of solid mechanics to mechanical design problems. Advanced topics in variational methods of mechanics with emphasis in design of machine elements. Design projects emphasizing advanced analysis tools.—W. Hill

**250C. Mechanical Performance of Materials (4)**

Lecture—4 hours. Prerequisite: undergraduate course in stress analysis and mechanical behavior of materials. Occurrence, mechanisms, and prediction of fatigue and fracture phenomenon. Use of stress and strain to predict crack initiation. Use of fracture mechanics to predict failure and crack propagation. Effects of stress concentration, manufacturing, load sequence, irregular loading, and multi-axial loading.—Hill

**251. Mechatronics System Design (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mechanical Engineering 154 and 172 or Electrical and Computer Engineering 157A, 157B. Motion mechanism design, electric actuator, power electronics motion control, sensor technologies, personal computer-based control systems design, motion control general operating system and real time operating systems, motion control software design, discrete event control software design. Offered in alternate years.—W. (W.) Yamazaki

**252. Information Processing for Autonomous Robotics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 6, Mechanical Engineering 5, or equivalent programming experience, Mechanical Engineering 154, 171, or consent of instructor. Computational principles for sensing, reasoning, and navigation for autonomous robots. Offered in alternate years.—W. (W.) Joshi

**253. Network Theory and Applications (4)**

Lecture/discussion—4 hours. Prerequisite: Mathematics 22A; Mathematics 22B; Statistics 13 or 120; experience with computer software; or consent of instructor. Develops the mathematical theory underlying growth, structure and function of networks with applications to physical, social, biological and engineered systems. Topics include network growth, resilience, epidemiology, phase transitions, software and algorithms, routing and search control, cascading failures. (Same course as Computer Science Engineering 253.) Offered in alternate years.—F. D'Souza

**254. Engineering Software Design (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Mechanical Engineering 5, Engineering 180. Principle and design of engineering software. Advanced topics in engineering software design, applications of object-oriented programming, very high-level languages, real-time multi-thread computing and sensor fusion, Web-based network computing, graphics, and GUI in engineering. Offered in alternate years.—F. Cheng

**255. Computer-Aided Design and Manufacturing (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: proficiency in a high level programming language such as Fortran, Pascal, or C. Representation and processing of geometrical information in design and

manufacturing. Numeric and symbolic computations. Coordinate systems and transformations. Bezier and B-spline curves and surfaces. Interpolation and approximation methods. Intersections, offsets, and blends. Path planning for machining, inspection, and robotics applications. Offered in alternate years.—S. Farouki

**258. Hybrid Electric Vehicle System Theory and Design (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Mechanical Engineering 150B, graduate standing in Mechanical and Aeronautical Engineering. Advanced vehicle design for fuel economy, performance, and low emissions, considering regulations, societal demands and manufacturability. Analysis and verification of computer design and control of vehicle systems in real vehicle tests. Advanced engine concepts. Offered irregularly.

**261. Gas Dynamics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 103 or the equivalent. Flow of compressible fluids. Isentropic flow. Flow with friction, heat transfer, chemically reacting gas and particle mixtures. Normal and oblique shock waves, combustion, blast and expansion waves. Method of characteristics. Offered irregularly.

**262. Advanced Aerodynamics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Aeronautical Engineering 126. Study of inviscid and viscous flows about aerodynamic shapes at subsonic, transonic and supersonic conditions. Application of aerodynamic theory to design for reduced drag and increased lift. Offered irregularly.—Hafez

**263. Introduction to Computational Aerodynamics and Fluid Dynamics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 103 or consent of instructor. Introduction to numerical methods for solution of fluid flow problems. Discretization techniques and solution algorithms. Finite difference solutions to classical model equations pertinent to wave phenomena, diffusion phenomena, or equilibrium. Application to the incompressible Navier-Stokes equation. Offered irregularly.

**264. Computational Aerodynamics (4)**

Lecture—4 hours. Prerequisite: Aeronautical Science and Engineering 126, Engineering 180, or consent of instructor. Numerical methods for aerodynamics flow simulation in the transonic regime. Solutions of steady and unsteady potential and compressible boundary layer equations. Numerical schemes for mixed type equations and shock waves/numerical grid generation. Viscous/inviscid interaction and coupling procedures. Offered irregularly.—Hafez

**266. Advanced Wind-Tunnel Testing (4)**

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: undergraduate course in fluid dynamics. Aspects of low-speed wind-tunnel testing for solving aeronautical and non-aeronautical problems including tunnel corrections, scale effects, force and moment measurements, and flow visualization. Offered irregularly.—van Dam

**267. Parallel Computations in Fluid/Thermal Sciences (4)**

Lecture—2 hours; discussion—2 hours. Prerequisite: Mechanical Engineering 106, 165, Engineering 180 or equivalent; or consent of instructor. Programming languages and constructs for engineering analysis on parallel computers including MPI (distributed), OpenMP (shared), and Fortran95. Graduate or junior/senior undergraduate as a technical elective. Offered in alternate years.—F. (F.) van Davis

**268. Wind Power Engineering (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Engineering 102 and 103, or equivalent, or consent of instructor. Fundamentals for understanding the conversion of wind power to mechanical power and electricity. Related engineering, economic and societal issues. Offered in alternate years.—F. (F.) van Dam

**269. Fuel Cell Systems (4)**

Lecture—2 hours; discussion—2 hours. Prerequisite: Mechanical Engineering 106, 107, 165, or equivalent, or consent of instructor; graduate or junior/senior undergraduate as a technical elective. Limited enrollment. Basics of electrochemistry and fuel cell engines in mobile and stationary applications. Aspects of fuel cell energy converters and their subsystems including practice with existing fuel cell and hydrogen systems on campus. Offered in alternate years.—S. Erickson

**271. Advanced Modeling and Simulation of Mechatronic Systems (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Mechanical Engineering 172 or the equivalent. Multiport models of mechanical, electrical, hydraulic, and thermal devices; bond graphs, block diagrams and state space equations; modeling of multiple energy domain systems; three-dimensional mechanics; digital simulation laboratory.—F. (F.)

**272. Theory and Design of Control Systems (4)**

Lecture—4 hours. Prerequisite: Mechanical Engineering 172 or the equivalent. Mathematical representations of linear dynamical systems. Feedback principles; benefits and cost of feedback. Analysis and design of control systems based on classical and modern approaches, with emphasis on applications to mechanical and aeronautical systems.—Assadian

**274. Analysis and Design of Digital Control Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mechanical Engineering 172. Discrete systems analysis; digital filtering; sample data systems; state space and transform design techniques; quantization effects; multi-input, multi-output systems. Offered in alternate years.—(S.) Hess

**275. Advance Aircraft Stability and Control (4)**

Lecture—3 hours; discussion—1 hour. Development and analysis of aircraft equations of motion. Flexible modes. Response to control actuation. Random inputs and disturbances. Stability and control augmentation system design. Handling qualities. Offered in alternate years.—S. Hess, Kong

**276. Data Acquisition and Analysis (4)**

Lecture—3 hours; discussion—1 hour. Application of computers for data acquisition and control. Topics include computer architecture, characteristics of transducers, hardware for laboratory applications of computers, fundamentals of interfaces between computers and experimental equipment, programming techniques for data acquisition and control, basic data analysis. Offered in alternate years.

**290C. Graduate Research Conference (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Individual and/or group conference on problems, progress, and techniques in mechanical and aeronautical engineering research. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**297. Seminar (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Current topics in engineering including developments in mechanical and aeronautical engineering with presentations by students, faculty, and visitors. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**298. Group Study (1-5)****299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**Professional****390. The Teaching of Aeronautical Science and Engineering (1)**

Discussion—1 hour. Prerequisite: meet qualifications for teaching assistant and/or associate-in in Aeronautical Science and Engineering. Methods of leading discussion groups or laboratory sections, writing

and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

# English

Linda A. Morris, Ph.D., Professor Emerita  
James J. Murphy, Ph.D., Professor Emeritus  
Marijane Osborn, Ph.D., Professor Emerita  
David A. Robertson, Ph.D., Professor Emeritus  
Academic Senate Distinguished Teaching Award  
Winfried Schleiner, Ph.D., Professor Emeritus  
Gwendolyn Schwabe, M.S., Senior Lecturer Emerita  
Gary Snyder, B.A., Professor Emeritus  
Raymond B. Waddington, Ph.D., Professor Emeritus  
Alan B. Williamson, Ph.D., Professor Emeritus  
Karl F. Bender, Ph.D., Professor Emeritus

**The Major Program**

The study of English develops skills in reading analytically and perceptively and in writing clearly and effectively.

**The Program.** The English department offers three kinds of courses: composition courses, undergraduate courses, and graduate courses. Composition courses develop skills in reading analytically and in writing persuasively. Undergraduate and graduate courses cover the entire range of English and American literature, as well as creative writing. Students majoring in English may elect a creative writing emphasis or a literature, criticism, and theory emphasis. All majors take courses introducing them to the literatures of various periods and places, to critical theory, and to frontiers of literary expression, such as the relationship of literature to environmentalism or the emergence of new media. The creative writing emphasis focuses on fiction, poetry, and article writing. The literature, criticism, and theory emphasis focuses on advanced critical analysis and research. All majors have the opportunity to work with distinguished writers, critics, scholars, and teachers.

**Career Alternatives.** Graduates have found the major excellent pre-professional training for careers in teaching, writing, law, medicine, library work, journalism, and more. Many graduates are employed in publishing, marketing, advertising, or the tech sector. Others have worked in local, state, and federal government agencies, as well as in industry. Many have gone on to graduate study in a wide range of fields including English, education, counseling, and more.

**A.B. Major Requirements:**

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>20</b>
English 3 or University Writing	
Program 1 .....	4
One course from: English 40, 43, 44,	
45 .....	4
English 10A, 10B, 10C .....	12
<b>Depth Subject Matter.....</b>	<b>44</b>
English 110A or 110B .....	4
Historical Distribution Requirements .....	20
Three courses focusing on literature written in English before 1800, at least one of which must be on literature written primarily before 1500:	
Before 1500	
English 111, 113A, 113B	
1500-1800	
English 115, 117, 122, 123, 142,	
150A, 155A, 185A	
One course focusing on literature written in English between 1800 and 1900:	
English 130, 133, 143, 144, 155B,	
158A, 181A, 185B	
One course focusing on literature written in English between 1900 and present:	
English 137N, 138, 146N, 147, 150B,	
155C, 156, 158B, 166, 167, 168,	
181B, 185C	
Non-Historical Distribution Requirements ...	8
One course on literature and ethnicity, literature and gender, or literature and sexuality:	
English 125, 139, 140, 141, 166, 167,	
178, 179, 181A, 181B, 185A, 185B,	
185C, 186	
One course in film and media studies, language studies, cultural studies and contexts, literature and science/technology, or literature and the environment:	
English 105, 106, 107, 120, 160,	
161A, 161B, 162, 164/Science and	
Technology Studies 164, 171A, 171B,	
172, 173, 175, 180, 182, 183, 184;	
Linguistics 106; Science and Technology	
Studies 173	
Please note that while some courses are identified as fulfilling more than one	

**Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;**

**ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience**

**Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience**

**Quarter Offered:** F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses

distribution requirement, a given course can only fulfill one such requirement.

#### **Area of Emphasis (choose one)..... 12**

*Literature, Criticism, and Theory*

One upper division English elective.

Two advanced courses, one of which can be a seminar:

Please note that English 110A or 110B is a prerequisite for advanced study in the major.

English 149, 153, 159, 163, 165, 177, 187A, 188A, 189, 194H, 195H

*Creative Writing*

Three sections of English 100F, 100P, 100NF, 100FA, 100PA

#### **Total Units for the Major ..... 64**

**English Majors.** Up to four upper division units in a national literature other than English or American, or in Comparative Literature, may count toward the requirements of the major.

**Major Advisers.** G. Bloom, S. Boluk, S. Chaganti, J. Clover, L. Corin, G. Dobbins, F. Dolan, M. Ferguson, K. Fredericksen, E. Freeman, D. Heard, W.J. Hicks, P. Houston, H. Hsu, M. Jerng, A. Johns, R.A. Levin, Y. Li, D. Martín, J. Marx, T. Menely, C. Milburn, E. Miller, K. Peterson, M. Ronda, P. Roy, S. Shershaw, S. Simon, D. Simpson, M. Stratton, M. Vernon, C. Waters, E. Watkins, J. Wenderoth, M. Ziser

**Major Advising.** All new and prospective English majors are encouraged to see the undergraduate staff adviser, individually, once per year, at minimum.

**Foreign Languages.** Students who contemplate advanced study in English should prepare for foreign language requirements for higher degrees and should consult with the graduate adviser.

**Undergraduate Adviser.** See Department website at <http://english.ucdavis.edu> or the Departmental Advising Office in 177 Voorhies Hall.

#### **Minor Program Requirements:**

UNITS

#### **English ..... 20**

Five upper division courses, at least four of which will be literature courses ..... 20

**Honors and Honors Program.** A Senior Honors Program is available to an invited group of English majors, who prepare and write a Senior Thesis (either a research paper or creative writing) in their final year. The critical honors program consists of four units of 194H and four units of 195H, normally taken during Winter and Spring quarters of the senior year. The creative writing honors program consists of four units of 100FA or 100PA, normally taken during Spring quarter of the junior year, and four units of 195H, normally taken Winter quarter of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. Eligibility criteria and application materials may be obtained at the Undergraduate Advising office in 177 Voorhies Hall or by accessing the Department website at <http://english.ucdavis.edu>. For more details, see *Graduation Honors*, on page 95.

**Education Abroad Options.** The department strongly encourages interested students to pursue their studies abroad. It is possible for students to complete significant portions of the English major provided that the course is evaluated as at least four UC Davis units; the course is considered upper division by the standards set forth by UC Davis Study Abroad; the student presents copies of the coursework, syllabus, and writing assignments to the department's advising staff.

**Teaching Credential Subject Representative.** See the Teacher Education program.

**Graduate Study.** The Department of English offers programs of study and research leading to the M.A. in literature and creative writing and the Ph.D. in literature. Detailed information may be obtained from the graduate adviser or the Chairperson of the Department.

The department's affiliation with the Critical Theory Program also provides the opportunity for students in English to prepare for the designated emphasis in Critical Theory (an interdisciplinary program in theories and methodologies in the humanities and social sciences).

**Graduate Director.** Mark Jerng, Ph.D.

**Entry Level Writing.** Students must have met the Entry Level Writing requirement before taking any course in English. C. Bates, Director.

**Prerequisites.** English 3 or University Writing Program 1 is required for admission into all preparatory courses (40, 43, 44, 45, 10A, 10B, 10C), and all upper division courses, unless otherwise stated in the course listings. Comparative Literature 1, 2, 3, or 4 or Native American Studies 5 may normally be substituted for English 3 or University Writing Program 1.

#### **Courses in English (ENL)**

#### **Lower Division**

##### **3. Introduction to Literature (4)**

Lecture/discussion—4 hours. Prerequisite: completion of Entry Level Writing requirement. Introductory study of several genres of English literature, emphasizing both analysis of particular works and the range of forms and styles in English prose and poetry. Frequent writing assignments will be made. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

##### **4. Critical Inquiry and Literature: Freshman Seminar (4)**

Seminar—4 hours. Prerequisite: completion of Subject A requirement and consent of instructor; enrollment limited to freshmen. Critical inquiry into significant literary texts. Emphasis on close reading, classroom dialogue, and the writing of several papers or a longer seminar paper. GE credit: ArtHum, Wrt | AH, WE.—S. (S.)

##### **5. Introduction to Creative Writing: Fiction (4)**

Lecture/discussion—4 hours. Prerequisite: completion of Entry Level Writing requirement. Elementary principles of writing fiction. Write both in prescribed forms and in experimental forms of their own choosing. No final examination. May be repeated one time for credit. GE credit: ArtHum, Wrt | AH, WE.—F, W, S. (F, W, S.)

##### **5P. Introduction to Creative Writing: Poetry (4)**

Lecture/discussion—4 hours. Prerequisite: completion of Entry Level Writing requirement. Elementary principles of writing poetry. Write both in prescribed forms and in experimental forms of their own choosing. No final examination. May be repeated one time for credit. GE credit: ArtHum | AH.—F, W, S. (F, W, S.)

##### **5NF. Introduction to Creative Writing: Non-Fiction (4)**

Lecture/discussion—4 hours. Prerequisite: completion of Entry Level Writing requirement. Elementary principles of writing creative non-fiction. Work in prescribed literary forms (such as essay, meditation, biography, memoir, book review, documentary, or experimental non-fiction forms) and forms of students' choosing. No final examination. May be repeated one time for credit when instructor differs. GE credit: ArtHum, Wrt | AH, WE.

##### **10A. Literatures in English I: To 1700 (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1 or equivalent. Historical introduction to English language and literature from 800-1700. Linguistic borrowing, innovation, and change. Emergence of key literary genres. Colonial America as a new site of English literary production and consumption. GE credit: ArtHum | AH, WE.—F, W, S. (F, W, S.)

##### **10B. Literatures in English II: 1700-1900 (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1 or equivalent. Historical introduction to

English language and literature from 1700-1900. Linguistic borrowing, innovation, colonization, and change. Emergence and development of key literary genres. America, Britain, Ireland, Scotland, and India as important sites of English literary production and consumption. GE credit: ArtHum | AH, WE.—F, W, S. (F, W, S.)

##### **10C. Literatures in English III: 1900 to Present (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1 or equivalent. Historical introduction to English language and literature from 1900-present. Linguistic borrowing, innovation, and change. Emergence and development of key literary genres. Formal experimentation. Modernism as transnational phenomenon. GE credit: ArtHum | AH, WE.—F, W, S. (F, W, S.)

##### **40. Introductory Topics in Literature (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 3 or University Writing Program 1 or equivalent. Study of a special topic. Literature written in English in any period or place or genre. Thematic, formal, or temporal focus. May be repeated two times for credit if content differs. GE credit: ArtHum, Wrt | AH, WE.

##### **41. Introductory Topics in Literature and Media (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 3 or University Writing Program 1 or equivalent. Study of a topic centered on the relationships between literature and moving-image media. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, VL, WE.—S. (S.)

##### **42. Approaches to Reading (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 or University Writing Program 1 or the equivalent. Close reading and interpretation of literature from a variety of traditional and contemporary approaches. Topics include textual and historical approaches; new criticism; formalism; psychological criticism; feminism and gender; reader-response; materialist approaches. Frequent written assignments. GE credit: ArtHum, Wrt | AH, WE.

##### **43. Introductory Topics in Drama (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 3 or University Writing Program 1 or its equivalent. Close reading of, and topics relating to selected works of British and American drama from a range of historical periods. May be repeated two times for credit when content differs. GE credit: ArtHum, Wrt | AH, WE.

##### **44. Introductory Topics in Fiction (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 3 or University Writing Program 1 or its equivalent. Close reading of, and topics relating to British and American Fiction: short stories, novellas, novels. Frequent written exercises. May be repeated two times for credit when content differs. GE credit: ArtHum, Wrt | AH, WE.

##### **45. Introductory Topics in Poetry (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 3 or University Writing Program 1 or its equivalent. Topical study and close reading of selections from English and American poetry. May be repeated two times for credit when content differs. GE credit: ArtHum, Wrt | AH, WE.

##### **46. Internship in English (1-12)**

Internship—3-36 hours. Prerequisite: course 3 or University Writing Program 1. Internships in fields where students can practice their skills. May be repeated for credit for a total of 12 units. (P/NP grading only.)—F, W, S. (F, W, S.)

##### **48. Directed Group Study (1-5)**

Prerequisite: course 3 or University Writing Program 1. (P/NP grading only.)—F, W, S. (F, W, S.)

##### **98F. Student Facilitated Course (1-4)**

Prerequisite: course 3 or University Writing Program 1; consent of instructor. Student facilitated course intended primarily for lower division students. (P/NP grading only.) Offered irregularly.

**99. Special Study for Undergraduates (1-5)**  
(P/NP grading only.)—F, W, S. (F, W, S.)

### Upper Division

**100F. Creative Writing: Fiction (4)**

Discussion—4 hours; development and evaluation of written materials, and conferences with individual students. Prerequisite: course 5F or 5P, or consent of instructor; priority given to English (Creative Writing) majors. Writing of fiction. May be repeated for credit with consent of instructor. No final examination.—F, W, S. (F, W, S.)

**100FA. Creative Writing Advanced Fiction (4)**

Discussion—4 hours. Prerequisite: course 100F. Priority given to English majors; admission by application only. Development and evaluation of students' work in prose, primarily in the workshop format. Some reading and discussion of published novels and short stories. Conferences with individual students once per quarter. May be repeated one time for credit with consent of instructor. —S. (S.)

**100NF. Creative Writing: Non-Fiction (4)**

Discussion—4 hours; development and evaluation of written materials, and conferences with individual students. Prerequisite: course 3 or University Writing Program 1, or consent of instructor; priority given to English (Creative Writing) majors. Writing of non-fiction. May be repeated for credit with consent of instructor. No final examination.

**100P. Creative Writing: Poetry (4)**

Discussion—4 hours. Prerequisite: course 5F or 5P, or consent of instructor; priority given to English (Creative Writing) majors. Writing of poetry. May be repeated for credit with consent of instructor. No final examination.

**100PA. Creative Writing Advanced Poetry (4)**

Discussion—4 hours. Prerequisite: course 100P. Priority to English majors; admission by application only. Development and evaluation of students' work in poetry, primarily in the workshop format. Some reading and discussion of published works of poetry. Conferences with individual students once per quarter. May be repeated one time for credit with consent of instructor. —S. (S.)

**105. History of the English Language (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 3 or University Writing Program 1 or the equivalent. History of the English language. Examination of the language as recorded from Old English to present-day English. Relationship of English to other languages; development of vocabulary, phonology, and grammatical patterns. GE credit: ArtHum, Wrt | AH, WE.

**106. English Grammar (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 or Linguistics 1 or University Writing Program 1 or consent of instructor. Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English. (Same course as Linguistics 106 and University Writing Program 106.) GE credit: ArtHum | AH.

**106P. English Grammar Practicum (2)**

Discussion—2 hours. Prerequisite: course 106/Linguistics 106 (may be taken concurrently). Practice in teaching the principles of grammar to the kinds of audiences teachers encounter in California. Discussions with teachers who teach in these areas. Examination of pedagogical research on teaching grammar. (P/NP grading only.)

**107. Freedom of Expression (4)**

Lecture—3 hours; term paper. Prerequisite: course 3 or University Writing Program 1 or the equivalent. Historical development of fundamental issues and contemporary controversies about freedom of expression, with emphasis on literary and artistic censorship. GE credit: ArtHum, Wrt | AH, WE.

**110A. Introduction to Literary Theory (4)**

Lecture/discussion—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1. Key theoretical terms, concepts, and thinkers from the Greeks to the modern era. GE credit: ArtHum, Wrt | AH, WE.

**110B. Introduction to Modern Literary and Critical Theory (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1. History of literary criticism in the modern era, with emphasis on the ties with the past and the special problems presented by modern literary theory. GE credit: ArtHum, Wrt | AH, WE.

**111. Topics in Medieval Literature (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1 or the equivalent. Historically or thematically focused intensive examination of selected topics in Medieval British literature. GE credit: ArtHum, Wrt | AH, WE.

**113A. Chaucer: Troilus and the "Minor" Poems (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1 or the equivalent. Development of the poet's artistry and ideas from his first work to his masterpiece, "Troilus and Criseyde." GE credit: ArtHum, Wrt | AH, WE.

**113B. Chaucer: The Canterbury Tales (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1 or the equivalent. Literary analysis of the complete "Canterbury Tales." Courtly love, literary forms, medieval science and astrology, theology and dogma as they inform the reading of Chaucer's work. GE credit: ArtHum, Wrt | AH, WE.

**115. Topics in Sixteenth and Seventeenth Century Literature (4)**

Lecture/discussion—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1. Historically or thematically focused study of works of the Renaissance. GE credit: ArtHum, Wrt | AH, WE.

**117. Shakespeare (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1 or equivalent. Historically, generically, or thematically focused study of Shakespeare's works. May be repeated two times for credit. GE credit: ArtHum, Wrt | AH, WE.—F, W, S.

**120. Law and Literature (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 3 or University Writing Program 1, or equivalent. Historically, thematically, or generically focused study of the relationship between law and literature. GE credit: ArtHum, Wrt | ACGH, AH, DD, OL, WE.

**122. Milton (4)**

Lecture/discussion—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1. Selected major works, including Paradise Lost. GE credit: ArtHum, Wrt | AH, WE.

**123. 18th-Century British Literature (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1. Historically or thematically focused study of 18th century English literature. GE credit: ArtHum, Wrt | AH, WE.

**125. Topics in Irish Literature (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1 or equivalent. Intensive study or treatment of special topics relating to the emergence, invention, and re-invention of Irish literature. May be repeated two times for credit when content differs. GE credit: ArtHum, Div, Wrt | AH, WE.

**130. British Romantic Literature (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 3 or University Writing Program 1 or the equivalent. Historically or thematically focused study of works of Romantic English literature. GE credit: ArtHum, Wrt | AH, WC, WE.

**133. 19th-Century British Literature (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 3 or University Writing Program 1 or the equivalent. Historically or thematically focused study of works of 19th-century English literature. GE credit: ArtHum, Wrt | AH, WC, WE.

**137. British Literature, 1900-1945 (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 3 or University Writing Program 1 or the equivalent. Historically or thematically focused study of works of British literature (drama, poetry, prose fiction) from the period between 1900 and the end of World War II. GE credit: ArtHum, Wrt | AH, WE.

**138. British Literature: 1945 to Present (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 3 or University Writing Program 1 or the equivalent. Historically or thematically focused study of works of British literature (drama, poetry, prose fiction) from the period between 1945 and the present. GE credit: ArtHum, Wrt | AH, WE.

**139. Topics in Global Literatures and Cultures (4)**

Lecture—3 hours; extensive writing or discussion. Prerequisite: course 3 or University Writing Program 1 or equivalent. Historically or thematically organized study of Anglophone literature at the global scale. Possible emphases: globalization of English and its literatures; the history of "world literature"; literatures of British imperialism; questions of translation. May be repeated two times for credit when content differs. GE credit: ArtHum, Div, Wrt | AH, WE.

**140. Topics in Postcolonial Literatures and Cultures (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1 or the equivalent. Study of postcolonial literature of Anglophone colonies. Specific emphases may include literature from and about Anglophone India, the Caribbean, the Middle East, South Asia, Africa, and/or South America. GE credit: ArtHum, Div, Wrt | AH, WE.

**141. Topics in Diasporic Literatures and Migration (4)**

**184. Literature and the Environment (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 3 or University Writing Program 1. Historical and/or thematic survey of topics in writing about the environment. GE credit: ArtHum, Wrt | AH, WE.

**185A. Women's Writing I (4)**

Lecture/discussion—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1. Women's Writing in English before 1800; organized by period, place, genre, or theme. GE credit: ArtHum, Div, Wrt | AH, WE.

**185B. Women's Writing II (4)**

Lecture/discussion—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1. Women's Writing in English

from 1800 to 1900; organized by period, place, genre, or theme. GE credit: ArtHum, Div, Wrt | AH, WE.

**185C. Women's Writing III (4)**

Lecture/discussion—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 3 or University Writing Program 1. Women's Writing in English after 1900; organized by period, place, genre, or theme. Offered irregularly. GE credit: Div, Wrt | AH, WE.

**186. Literature, Sexuality, and Gender (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 3 or University Writing Program 1 or the equivalent. Historically or thematically focused intensive examinations of gender and sexuality in British and American literature. GE credit: ArtHum, Div, Wrt | AH, WE.—W.

**187A. Topics in Literature and Media (4)**

Seminar—3 hours; film viewing—3 hours. Prerequisite: course 110A or 110B; consent of instructor. Group study of a topic centered on the relationships between literature and film or other moving-image media. GE credit: Wrt | AH, WE.

**188A. Topics in Literary and Critical Theory (4)**

Seminar—3 hours; term paper. Prerequisite: course 110A or 110B; consent of instructor. Intensive examination of theories addressing a particular problem, topic, or question. GE credit: Wrt.

**189. Seminar in Literary Studies (4)**

Seminar—3 hours; term paper. Prerequisite: course 110A or 110B. Intensive, focused study of literature at an advanced level. May be organized by topic, author, period, movement, or genre. High participation. GE credit: ArtHum, Wrt | AH, WE.

**192. Internship in English (1-12)**

Internship—3-36 hours. Prerequisite: course 3 or University Writing Program 1. Internships in fields where students can practice their skills. A maximum of four units is allowed toward the major in English. May be repeated for credit for a total of 12 units. (P/NP grading only.)—F, W, S. (F, W, S.)

**194H. Seminar for Honors Students (4)**

Seminar—3 hours; term paper. Prerequisite: course 110A or 110B; one advanced study course; admission to English Department Senior Honors Program in Literature, Criticism, and Theory. Preparation for writing an honors thesis in course 195H. Limited enrollment; high level of participation expected. GE credit: ArtHum | AH, WE.—W. (W.)

**195H. Honors Thesis (4)**

Independent study—12 hours. Prerequisite: course 194H. Preparation of a thesis, under the supervision of an instructor. Students satisfying requirements for the general major or the teaching emphasis write on a scholarly or critical subject; creative writing students submit a volume of poems or fiction. GE credit: ArtHum | AH, WE.

**197T. Tutoring in English (1-5)**

Tutoring—1-5 hours. Prerequisite: upper division standing and consent of Chairperson. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. Does not fulfill requirement for major. May be repeated up to 8 units for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

**197TC. Community Tutoring in English (1-4)**

Tutoring—1-4 hours. Prerequisite: upper division standing and a major in English; consent of chairperson. Field experience, with individuals or in classroom in instruction of English language, literature, and composition. Does not fulfill requirement for major. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

Prerequisite: one course from English 3, 5F, 5P or University Writing Program 1. (P/NP grading only.)

**198F. Student Facilitated Course (1-4)**

Prerequisite: course 3 or University Writing Program 1; consent of instructor. Student facilitated course intended primarily for upper division students. (P/NP grading only.) Offered irregularly.

**198S. Directed Group Study (4)**

Lecture/discussion—4 hours. Prerequisite: course 163S concurrently. Group study will be closely tied to the texts and periods studied in course 163S. Investigations of historical sites, museums, galleries, and performances. To be taught in London. (P/NP grading only.)—S. (S.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)—F, W, S. (F, W, S.)

**199FA. Student Facilitated Teaching (1-4)**

Prerequisite: course 3 or University Writing Program 1; consent of instructor. STU FAC. Under the supervision of a faculty member, an undergraduate student teaches a course under 98F/198F. (P/N grading only.) Offered irregularly.

**199FB. Student Facilitated Teaching (1-4)**

Prerequisite: course 3 or University Writing Program 1; consent of instructor. STU FAC. Under the supervision of a faculty member, an undergraduate student teaches a course under 98F/198F. (P/N grading only.) Offered irregularly.

**Graduate****200. Introduction to Graduate Studies in English (4)**

Seminar—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing. Introduction to literary scholarship with special attention to the elements of professionalism and to different modes of literary investigation. (S/U grading only.)—F. (F.)

**205. Anglo-Saxon Language and Culture (4)**

Lecture—3 hours; conference and term paper. The language and culture of Anglo-Saxon England; readings in Old English prose and poetry. Offered in alternate years.

**206. Beowulf (4)**

Discussion—3 hours; oral and written reports; conferences with students. Prerequisite: course 205 or the equivalent. A study of the poem and the Heroic Age of Germanic literature. Offered in alternate years.

**207. Middle English (4)**

Discussion—3 hours; term paper. Study of the phonology, morphology, syntax, and lexicon between 1100 and 1500 with investigation of the regional dialects; pertinent facts on both the internal and external linguistic history; intensive reading of texts. Offered irregularly.

**210. Readings in English and American Literature (4)**

Seminar—3 hours; conference—1 hour. Prerequisite: upper division course in area studied. Content varies according to specialty of instructor. May be repeated if topic differs.

**225. Topics in Irish Literature (4)**

Seminar—3 hours; conference—1 hour. Prerequisite: graduate standing. Varied topics, including the nineteenth-century novel, contemporary Irish poetry, rise of the drama, or a study of a major author. May be repeated for credit if topic differs. Offered irregularly.

**230. Study of a Major Writer (4)**

Seminar—3 hours; conferences with individual students—1 hour; research papers. Artistic development of one major writer and his intellectual and literary milieu. May be repeated for credit when a different writer is studied.

**232. Problems in English Literature (4)**

Seminar—3 hours; conferences with individual students—1 hour. Selected issues in the current study and critical assessment of a limited period or topic in English literature. May be repeated for credit when different period or topic is studied. Offered irregularly.

**233. Problems in American Literature (4)**

Seminar—3 hours; conferences with individual students—1 hour; research papers. Selected topics for intensive investigation. May be repeated for credit when different topic or period is studied.

**234. Dramatic Literature (4)**

Lecture—3 hours; conference—1 hour. Historical introduction to dramatic theory; the genres of tragedy, comedy, and tragicomedy. May be repeated for credit if topic differs.

**235. Theory of Fiction (4)**

Seminar—3 hours; conference—1 hour. Prerequisite: graduate standing. Theories of fiction as they relate to the professional writer's practice of the craft. For students in the Creative Writing Program. May be repeated for credit when focus differs.

**236. Poetics (4)**

Seminar—3 hours; conference—1 hour. Prerequisite: graduate standing. Theories of poetry as revealed in structure, prosody, and idiom of British and American poems, variably approached—through intensive study of a single poet, historically, or theoretically—at the instructor's discretion. For students in the Creative Writing Program. May be repeated for credit when focus differs.

**237. Seminar for Writers (4)**

Seminar—3 hours; extensive writing. Prerequisite: graduate standing. Varied topics in the study of literature and literary culture craft and poetics from the perspective of the writer/practitioner. May be repeated two times for credit if focus differs. Offered irregularly.—W. (W.)

**238. Special Topics in Literary Theory (4)**

Seminar—3 hours; term paper. Prerequisite: course 237 or the equivalent. Advanced topics in literary theory and criticism. Preparation and evaluation of research paper. May be repeated for credit when topic and/or reading list differs. Offered in alternate years.

**240. Medieval Literature (4)**

Seminar—3 hours; conference—1 hour. Studies of Medieval literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.

**242. Sixteenth-Century Literature (4)**

Seminar—3 hours; conference—1 hour. Studies in sixteenth-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.

**244. Shakespeare (4)**

Seminar—3 hours; conference—1 hour. Studies in Shakespeare. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.

**246. Seventeenth-Century Literature (4)**

Seminar—3 hours; conference—1 hour. Studies in seventeenth-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.

**248. Eighteenth-Century Literature (4)**

Seminar—3 hours; conference—1 hour. Studies in eighteenth-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.

**250. Romantic Literature (4)**

Seminar—3 hours; conference—1 hour. Studies in Romantic literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied. Offered irregularly.

**252. Victorian Literature (4)**

Seminar—3 hours; conference—1 hour. Studies in Victorian literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.

**254. Twentieth-Century British Literature (4)**

Seminar—3 hours; conference—1 hour. Studies in twentieth-century British literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.

**256. Early American Literature (4)**

Seminar—3 hours; conference—1 hour. Studies in Early American literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.

**258. American Literature: 1800 to the Civil War (4)**

Seminar—3 hours; conference—1 hour. Studies in American literature from 1800 to Civil War. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.

**260. American Literature: Civil War to 1914 (4)**

Seminar—3 hours; conference—1 hour. Studies in American literature from the Civil War to 1914. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.

**262. American Literature after 1914 (4)**

Seminar—3 hours; conference—1 hour. Studies in American literature after 1914. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.

**264. Studies in Modern British and American Literature (4)**

Seminar—3 hours; conference—1 hour. Studies in modern British and American literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied. Offered irregularly.

**270. Studies in Contemporary World Literature (4)**

Seminar—3 hours; conference—1 hour. Prerequisite: graduate standing, consent of instructor, with preference given to those enrolled in the masters program in Creative Writing. Emerging global, international or transnational techniques, theories, and individual works of contemporary world prose or poetry. Discussion, seminar reports, research papers. May be repeated for credit when topic differs.

**280. Seminar in Research Practices (4)**

Lecture/discussion—3 hours; project. Must have passed Departmental Preliminary Exam. Study of various practical and technical skills needed to perform research in literary studies. Course materials to be selected by the instructor. Evaluation based on student projects that involve hands-on application of skills taught in the seminar. May be repeated for credit when topic differs.—S. (S.)

**285. Literature by Women (4)**

Seminar—3 hours; conference—1 hour. Studies in literature by women and the theoretical approaches to literature by women. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic and/or reading list differs. Offered irregularly.

**287. Topics in Literature and Media (4)**

Seminar—3 hours; film viewing—3 hours. Prerequisite: graduate standing. Study of a topic centered on film or other moving-image media. Course materials

to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs.

**288. Prospectus Workshop (2)**

Conference—2 hours. Must have passed Departmental Preliminary Exam. Training in writing the dissertation prospectus. Participation in group discussions of preparatory assignments and final proposal. (S/U grading only.)

**289. Article Writing Workshop (2)**

Conference—2 hours. Prerequisite: consent of instructor. Class size limited to 12 students; nomination for admission by Dissertation Director. Training in preparing an article for publication. Participation in group discussions of article drafts. May be repeated one time for credit. (S/U grading only.)

**290. Creative Writing: Special Topic (4)**

Seminar—3 hours; conference—1 hour. Prerequisite: consent of instructor. Writing that falls outside the generic confines of traditional genres (fiction, poetry, and nonfiction) or traditional workshop formats. Evaluation of written materials and individual student conferences. May be repeated for credit. Offered irregularly.—F. (F.)

**290F. Creative Writing: Fiction (4)**

Seminar—3 hours; conference—1 hour. Prerequisite: consent of instructor; graduate standing, with preference given to those enrolled in master's program in Creative Writing. Writing of prose fiction. Evaluation of written materials and individual student conferences. May be repeated for credit.—F, W, S. (F, W, S.)

**290NF. Creative Writing: Non-Fiction (4)**

Seminar—3 hours; conference—1 hour. Prerequisite: consent of instructor; graduate standing; with preference given to those enrolled in the master's program in Creative Writing. Writing of literary non-fiction, with emphasis on autobiography, biography, memoir, the occasional or nature essay, or other non-fiction prose narratives. May be repeated for credit. Offered in alternate years.

**290P. Creative Writing: Poetry (4)**

Seminar—3 hours; conference—1 hour. Prerequisite: consent of instructor; graduate standing, with preference given to those enrolled in master's program in Creative Writing. Writing of poetry. Evaluation of written materials and individual student conferences. May be repeated for credit.—F, W, S. (F, W, S.)

**298. Directed Group Study (1-5)**

(S/U grading only.)—F, W, S. (F, W, S.)

**299. Individual Study (1-12)**

(S/U grading only.)—F, W, S. (F, W, S.)

**299D. Special Study for the Doctoral Dissertation (1-12)**

(S/U grading only.)—F, W, S. (F, W, S.)

**Professional****391. Teaching Creative Writing (2)**

Discussion—2 hours. Prerequisite: graduate standing; appointment as Teaching Assistant in the English. Designed for new instructors of English 5F or 5P; discussion of ways to facilitate creative writing workshops and to respond to student manuscripts. (S/U grading only.)—S. (S.)

**393. Teaching Literature and Composition (2)**

Discussion—2 hours. Prerequisite: graduate standing; appointment as Teaching Assistant in the English Department. Designed for new instructors of English 3 or the equivalent courses; discussion of problems related to teaching literature and composition to lower division students. (S/U grading only.)—S. (S.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

# Entomology and Nematology

Formerly the departments of Entomology and Nematology  
 (College of Agricultural and Environmental Sciences)  
 Steve Nadler, Ph.D., Chairperson of the Department  
 Joanna Chiu, Ph.D., Vice Chairperson of the Department  
**Department Office.** 367 Briggs Hall  
 530-752-0492; <http://entomology.ucdavis.edu>

## Faculty

James R. Carey, Ph.D., Distinguished Professor  
 Edward P. Caswell-Chen, Ph.D., Professor  
 Joanna Chiu, Ph.D., Associate Professor  
 Bruce D. Hammock, Ph.D., Distinguished Professor  
 Academic Senate Distinguished Teaching Award  
 Brian R. Johnson, Ph.D., Assistant Professor  
 Richard Karban, Ph.D., Professor  
 Lynn S. Kimsey, Ph.D., Professor  
 Karl Kjer, Ph.D., Professor, Schlinger Endowed Chair in Systematics  
 Sharon P. Lawler, Ph.D., Professor  
 Edwin Lewis, Ph.D., Professor  
 Steven A. Nadler, Ph.D., Professor  
 Christian Nansen, Ph.D., Assistant Professor  
 Jay Rosenheim, Professor  
 Academic Senate Distinguished Teaching Award  
 Diane E. Ullman, Ph.D., Professor  
 Rachel Vannette, Ph.D., Assistant Professor  
 Philip S. Ward, Ph.D., Professor  
 Becky B. Westerdahl, Ph.D., Professor  
 Neal M. Williams, Ph.D., Associate Professor  
 Louie H. Yang, Ph.D., Associate Professor  
 Frank G. Zalom, Ph.D., Distinguished Professor

## Emeriti Faculty

Oscar G. Bacon, Ph.D., Professor Emeritus  
 Peter S. Cranston, Ph.D., Professor Emeritus  
 Hugh Dingle, Ph.D., Professor Emeritus  
 John D. Edman, Ph.D., Professor Emeritus  
 Lester E. Ehler, Ph.D., Professor  
 Bruce F. Eldridge, Ph.D., Professor Emeritus  
 Howard Ferris, Ph.D., Professor Emeritus  
 Mary L. Flint, Ph.D., Specialist in Cooperative Extension, Emerita  
 Norman E. Gary, Ph.D., Professor Emeritus  
 Jeffrey Granett, Ph.D., Professor Emeritus  
 Albert A. Grigarick, Jr., Ph.D., Professor Emeritus  
 Penelope J. Gullan, Ph.D., Professor Emeritus  
 Bruce A. Jaffee, Ph.D., Professor Emeritus (Nematology)  
 Harry K. Kaya, Ph.D., Professor Emeritus (Entomology, Nematology)  
 Robert E. Page Jr., Ph.D., Professor Emeritus  
 Michael P. Parrella, Ph.D., Professor Emeritus (Plant Sciences)  
 Christine Y. S. Peng, Ph.D., Professor Emeritus  
 Robbin W. Thorp, Ph.D., Professor Emeritus  
 Thomas W. Scott, Ph.D., Professor Emeritus  
 Robert K. Washino, Ph.D., Professor Emeritus  
 Valerie M. Williamson, Professor Emeritus

## Affiliated Faculty

Anthony Cornel, Ph.D., AES Entomologist  
 Elina Nino, Ph.D., Specialist in Cooperative Extension  
 Larry Godfrey, Ph.D., Specialist in Cooperative Extension, AES Entomologist  
 Robert Kimsey, Ph.D., Lecturer  
 Shirley Luckhart, Ph.D., Adjunct Professor (Medical Microbiology and Immunology; School of Medicine)  
 Eric C. Mussen, Ph.D., Specialist in Cooperative Extension, Emeritus  
 William K. Reisen, Ph.D., Research Entomologist (Pathology, Microbiology and Immunology; School of Veterinary Medicine)

## The Major Program

The Entomology major is a general biological science program. The curriculum is designed to develop an understanding of fundamental biological concepts by studying insects. Insects offer unique opportunities to study biological systems and are model experimental animals. Many insects are either pests, or beneficial species that have great importance to the economy, environment or public health. Students may focus on specific areas of interest including agricultural entomology, insect systematics and evolution; behavior and ecology; medical entomology; and insect molecular biology, physiology and toxicology.

**The Program.** Students begin their study in entomology with selected insect biology courses. After completing these courses, students may enroll in courses in their particular area of interest. The Entomology Faculty encourages students to do research internships in their laboratories.

**Career Alternatives.** Entomology graduates find careers in many different areas of applied or basic biology. Graduates have the opportunity to continue in professional graduate programs such as veterinary or human medicine, or get advanced degrees leading to careers in biotechnology, conservation biology, or academic teaching and research. Many graduates have participated in internship programs with the California Department of Food and Agriculture and found careers in insect diagnostic laboratories, conducting insect surveys, and/or developing entomological collections. Other graduates have worked in agriculture in the area of insect pest management. Graduates are prepared for managerial and technical positions with state and federal agencies and in agricultural production and supporting industries. Some entomology graduates pursue careers in primary, secondary, and college level science education.

## B.S. Major Requirements:

	UNITS
<b>Preparatory Subject Matter</b> .....	<b>49-53</b>
Biological Sciences 2A, 2B, 2C .....	15
Chemistry 2A, 2B, 8A, 8B.....	16
Mathematics 16A-16B-16C or 17A-17B-17C or 21A-21B-21C .....	9-12
Physics 1A, 1B.....	6
Statistics 13, 32, or Plant Sciences 120, 21 or Engineering 5 .....	3-4

## Depth Subject Matter .....34-40

Microbiology 104, Plant Biology 148, Plant Pathology 120 or Microbiology 162 .....	3-5
Biological Sciences 101 .....	4
Entomology 105, Environmental Science and Policy 100 or Evolution and Ecology 101 .....	4
Evolution and Ecology 100.....	4
Biological Sciences 102 and 103 or Animal Biology 102 and 103.....	6-10
Entomology 100, 100L .....	6
At least 7 units from Entomology 102, 103, 104, 107, 109, or 116 or Nematology 110.....	7

## Restricted Electives.....34

Upper division Entomology and Nematology courses .....	14
Upper division electives related to student's interest with approval of adviser.....	20
Note: No more than a total of six units from Entomology 192, 197T and 199 may count toward fulfilling depth subject matter or restricted elective units.	

## Total Units for the Major .....117-127

**Major Adviser.** S. Lawler, S. Nadler

## Minor Program Requirements:

The Department of Entomology has five minor programs open to students in other disciplines who are interested in rounding out their academic study with a concentration in the area of entomology.

	UNITS
<b>Insect Biology</b> .....	<b>19-23</b>

Entomology 100, 100L .....	6
At least seven units from Entomology 102, 103, 104, 105 107, 109 .....	7
At least two additional upper division Entomology courses (except courses 192, 198, 199).....	6-10

## Agricultural Pest Management .....21-23

Entomology 100, 100L, 110, 135 .....	15
At least two courses from: Nematology 100, Plant Sciences 105, 176, Plant Pathology 120.....	6-8

## Insect Ecology and Evolution .....20-21

Entomology 100, 100L, and Entomology 105 or 104 .....	9-10
At least seven units from Entomology 103, 107, 109, 116, 158 .....	7
Evolution and Ecology 149 or Environmental Science and Policy 121 .....	4

## Medical-Veterinary Entomology .....19

Entomology 100, 100L, 104, 153, 156.....	15
At least four units from Entomology 156L, 158; Microbiology 162 .....	4

## Forensic Entomology .....22

Entomology 100, 100L, 102, 158 .....	13
Biological Science 2A.....	5
Entomology 105, Evolution and Ecology 101, or Environmental Science and Policy 100.....	4

**Minor Adviser.** S. Lawler, S. Nadler

**Graduate Study.** The Department of Entomology offers a program of study and research leading to the M.S. and Ph.D. degrees. See *Graduate Studies*, on page 120 and the Graduate Announcement, for further details.

**Graduate Advisers.** See <http://entomology.ucdavis.edu/Graduate/>.

**Related Courses.** See courses in Nematology.

## Courses in Entomology (ENT)

### Lower Division

#### 1. Art, Science and the World of Insects (3)

Lecture—3 hours; laboratory—3 hours. Fusion of entomology and art to create an appreciation of insect biology, ecology, interactions with humans and importance in human culture. Multidisciplinary approaches in education and career paths in entomology and art. GE credit: ArtHum or SciEng or SocSci | AH or SE or SS, OL, VL, WE.—S. (S.) Ullman

#### 2. Biodiversity (3)

Lecture—2 hours; lecture/discussion—1 hour. Introduction to nature, scope and geographical distribution of biodiversity (the diversity of life, with emphasis on plants and animals, especially insects). Humans and biodiversity—domestication, aesthetics, ethics and valuation. Species richness and "success." Biodiversity through time; monitoring, evaluation and conservation. Biomes—global, continental and Californian. (Same course as Evolution and Ecology 2.) GE credit: SciEng, Wrt | SE, SL, WE.—F. (F.)

#### 10. Natural History of Insects (3)

Lecture—3 hours. Introduction to the insects detailing their great variety, structures and functions, habits, and their significance in relation to plants and animals including man. Designed for students not specializing in entomology. Not open for credit to students who have had course 100, but students who have taken this course may take course 100 for credit. GE credit: SciEng | SE, SL.—W. (W.) Johnson, Kjer

#### 90X. Special Topics in Entomology (2)

Seminar—2 hours. Prerequisite: consent of instructor. Freshman seminar course for in-depth examination of a special topic within the subject area. May be repeated two times for credit. (P/NP grading only.)—F, W, S.

**92. Internship (1-12)**

Internship—3–36 hours. Prerequisite: consent of instructor. Work-learn experience on and off campus in all subject areas offered by the department, supervised by a member of the faculty. May be repeated up to 12 units of credit. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**  
(P/NP grading only.)**Upper Division****100. General Entomology (4)**

Lecture—3 hours; term paper. Prerequisite: Biological Sciences 1B. Biology, anatomy, physiology, development, classification, ecology and relation of insects to human welfare. GE credit: SciEng, Wrt | WE. —F, S. (F, S.) L. Kimsey

**100L. General Entomology Laboratory (2)**

Laboratory—6 hours. Prerequisite: course 100 (may be taken concurrently). Anatomy, development, population ecology, methods of collecting, classification and identification of insects of all orders and of major families. GE credit: Wrt | VL. —F. (F.) L. Kimsey

**101. Functional Insect Morphology (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 100. Study of the basic external and internal structures, organs and tissues of insects, with emphasis on functional systems. Functional anatomy, histology and fine structures of important organs and tissues will be discussed. GE credit: SciEng. —W. (W.)

**102. Insect Physiology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or course in physiology or invertebrate zoology. Processes by which insects maintain themselves, reproduce, and adapt to environment. Insects as models for basic/applied research through detailed analysis of metabolic, physiological, and behavioral processes. Emphasis on analysis of methodology, fact, and theory. GE credit: SciEng | SE, WE. —W. (W.) Chiu

**103. Insect Systematics (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: introductory course in zoology or entomology. Principles and methods of systematics, with particular reference to insects. Emphasis on different theories of classification, and analysis of phylogenetic relationships. Offered in alternate years. GE credit: SciEng, Wrt. —S.

**104. Behavioral Ecology of Insects (3)**

Lecture—3 hours. Prerequisite: introductory biology or zoology. Basic principles and mechanisms of insect behavior and ecology. An evolutionary approach to understanding behavioral ecology of insects. GE credit: SciEng. —W. (W.) Lewis

**105. Insect Ecology (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Biological Sciences 2B. Introduction to insect ecology combining fundamental concepts and questions in ecology with ideas, hypotheses and insights from insects. Integrates aspects of individual, population, community and ecosystem ecology. Emphasis on the scientific process: observing nature, asking testable questions, and communication. Offered in alternate years. GE credit: SciEng | OL, SE, SL, WE. —F. (F) Yang

**107. California Insect Diversity (5)**

Lecture—1 hour; laboratory—6 hours; fieldwork—6 hours. Prerequisite: an introductory course in entomology. Survey of the diversity of insects from selected ecological zones in California with emphasis on collection, identification, and natural history. Offered in alternate years. GE credit: SciEng, Wrt | SE. —S. Ward

**109. Field Taxonomy and Ecology (7)**

Lecture—2 hours; laboratory—36 hours; five-week course. Prerequisite: an introductory course in entomology or consent of instructor. The study of insects in their natural habitats; their identification and ecology. Offered in alternate years. GE credit: SciEng, Wrt | SE. —(Su.) Ward

**110. Arthropod Pest Management (5)**

Lecture—3 hours; laboratory—6 hours. Prerequisite: Biological Science 1B. Development of the ecological basis for the integrated pest management paradigm with emphasis on agriculture. Ecological and practical aspects of control tactics. Laboratory emphasizes identification of pests and beneficials of agriculture and urban situations. GE credit: SciEng, Wrt | SE, WE. —W. (W.) Godfrey

**116. Freshwater Macroinvertebrates (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: Biological Sciences 2B or equivalent. Limited enrollment. Biology, ecology and taxonomy of freshwater macroinvertebrates, including insects, crustaceans, molluscs, worms, leeches, flatworms and others. Adaptations to life in freshwater. Aquatic food webs. Uses of macroinvertebrates in water quality monitoring. Field trips during regular lab hours. GE credit: SciEng | SE, SL. —S. (S.) Lawler

**116L. Aquatic Insect Collection (2)**

Laboratory—4 hours; field work—2 hours. Prerequisite: course 100L or 116 (may be taken concurrently), or prior experience with insect/arthropod identification to Family level. Restricted to 25 students. Collection of aquatic insects and identification to the Family level. Collections will require two, one-day weekend field trips (by arrangement). Collection requirement is 40 Families. —S. (S.) Lawler

**117. Longevity (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of life span; description of basic demographic techniques including life table methods. (Same course as Human Development 117.) GE credit: SciEng, Wrt | SE, SL, WE. —F. Carey

**119. Apiculture (3)**

Lecture—3 hours; papers. Biology and behavior of honeybees; communication, orientation, social organization, foraging activities, honey production, pollination activities. GE credit: SciEng, Wrt | OL, VL, WE. —S. (S.) Johnson

**123. Plant-Virus-Vector Interaction (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 2A, Biological Sciences 101; Plant Biology 105, Plant Pathology 120, and course 100 recommended. Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement. (Same course as Plant Biology 123 and Plant Pathology 123.) Offered in alternate years. GE credit: SE, SL, WE. —F. Lucas, Gilbertson, Ullman

**135. Introduction to Biological Control (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 100 or 110. Principles of biological control of arthropod pests and weeds. Biology of pathogens, entomopathogenic nematodes, parasitoids, and predators. Implementation in classical and augmentative biological control. Role of biological control in pest management. Offered in alternate years —F. Lewis

**153. Medical Entomology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, upper division standing in one of the biological sciences, or consent of instructor. Basic biology and classification of medically important arthropods with special emphasis on the ecology of arthropod-borne diseases and principles of their control. Relationships of arthropods to human health. GE credit: SciEng, Wrt | SE, SL, WE. —W. (W.)

**156. Biology of Parasitism (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A or consent of instructors. Lectures on the biological and ecological aspects affecting host-parasite relationships using selected examples from protozoan and metazoan fauna. GE credit: SciEng | SE. —S. (S.) Nadler

**Entomology and Nematology****323****156L. Biology of Parasitism Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 156 (concurrently) or consent of instructor. Laboratory demonstrations using selected examples of protozoan and metazoan organisms along with various techniques used in parasitology to exemplify concepts presented in the lecture course. GE credit: SciEng, Wrt | SE. —S. (S.) Nadler

**158. Forensic Entomology (3)**

Lecture—2 hours; laboratory—4 hours. Prerequisite: Biological Sciences 1B or Entomology 100, upper division standing. Arthropods, their general biology, succession, developmental cycles and population biology in matters of criminal prosecution and civil litigation. Emphasis on basic arthropod biology, ecological and developmental concepts and methods, development of reasoning abilities, implication, development of opinions and evidence. GE credit: SciEng or SocSci, Wrt | WE. —S. (S.) R. Kimsey

**180A. Experimental Ecology and Evolution in the Field (4)**

Lecture/laboratory—3 hours; fieldwork—3 hours. Prerequisite: course 105, or Environmental Science and Policy 100; Evolution and Ecology 100; Evolution and Ecology 101. Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as Evolution and Ecology 180A.) Offered in alternate years. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | QL, SE, VL, WE. —(W.) Yang

**180B. Experimental Ecology and Evolution in the Field (4)**

Lecture/laboratory—3 hours; fieldwork—3 hours. Prerequisite: Evolution and Ecology or Entomology 180A; Evolution and Ecology 100, Evolution and Ecology 101, or Environmental Science and Policy 100; course 105. Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as Evolution and Ecology 180B.) Offered in alternate years. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | QL, SE, VL WE. —(S.) Yang

**192. Internship (1-12)**

Internship—3–36 hours. Prerequisite: completion of 84 units and consent of instructor. Laboratory experience or fieldwork off and on campus in all subject areas offered in the Department of Entomology. Internships supervised by a member of the faculty. (P/NP grading only.)

**197T. Tutoring in Entomology (1-3)**

Discussion—1-3 hours. Leading small discussion groups. Preview assignments and prepare guidelines for discussion. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**  
(P/NP grading only.)**Graduate****212. Molecular Biology of Insects and Insect Viruses (3)**

Lecture—3 hours. Prerequisite: consent of instructor. A molecular biological analysis of insect systematics, physiology, and defense mechanisms. Molecular biology of insect viruses. Baculovirus expression vectors and post-translation modification of expressed polypeptides. Biological control of using neuropeptides and toxin genes in insect viruses. Offered in alternate years. —W. (W.)

**214. Vector-borne Infectious Diseases: Changing Patterns (2)**

Lecture/discussion—2 hours. Prerequisite: consent of instructor required. Restrictions: open to graduate students, MPVM and MPH students, DVM and medical students with second- or third-year standing.

Open to upper division undergraduate students with consent of instructor(s). Vector-borne infectious diseases especially as they relate to changing patterns associated with climatic changes, trade and population movement. Same course as PMI 214. —F. (F.) Lanzaro, Reisen

### 225. Terrestrial Field Ecology (4)

Seminar—1 hour; field work—12 hours. Prerequisite: introductory ecology and introductory statistics or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay, emphasizing student projects. Ecological hypothesis testing, data gathering, analysis and written and oral presentation of results. (Same course as Ecology 225/Population Biology 225.) —S. (S.) Karban

### 230. Advanced Biological Control (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: graduate or upper division standing in biological science or consent of instructor. Principles and current issues in biological control of arthropod pests and weeds; laboratory devoted to identification and life history of the major groups of parasitic and predaceous arthropods. Offered irregularly. —(F.)

### 253. Advanced Medical Entomology (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: one upper division course in entomology (other than course 153) and one course in microbiology; course 153 strongly recommended. An analysis of several arthropod-borne human diseases with emphasis on the relationships of the biology of the vector to the ecology of the disease. Discussion includes demonstration of vectors and techniques. Offered irregularly. —(S.)

### 290. Exploratory Topics in Entomology (2)

Seminar—2 hours. Interdisciplinary topics in entomology, including innovative applications of entomological concepts to other fields of research and human endeavor (e.g. medicine, technology, art, criminology). May be repeated for up to 8 units of credit when topic differs. —F, W, S.

### 291. Current Topics in Medical and Veterinary Entomology (2)

Seminar—2 hours. Prerequisite: course 153. Discussion of parasitology, ecology and epidemiology related to vectors of pathogens causing disease in humans and animals. May be repeated one time for credit. Offered irregularly. —F, W, S. R. Kimsey

### 292. Current Topics in Insect Physiology and Behavior (2)

Seminar—2 hours. Prerequisite: course 102 if topic is physiology, a course in behavior if topic is behavior, or either if topic bridges both. Analysis of contemporary advances in insect physiology, biochemistry and/or behavior. Interpretation and description of physiological and behavioral mechanisms and functions. Application of general principles to solution of problems in the laboratory and field. May be repeated for up to 8 units of credit if topic differs. Offered irregularly. —F, W, S.

### 293N. Current Topics in Insect Biotechnology and Genomics (2)

Seminar—2 hours. Prerequisite: course 212. Discussion of advances in insect biotechnology, including genetic engineering and genomics. May be repeated for up to 6 units of credit if topic differs. Offered irregularly. —F, W, S. Hammock

### 294. Current Topics in Insect Ecology, Evolution, and Systematics (2)

Seminar—2 hours. Prerequisite: course 103, general course in ecology or evolution. Discussions of advanced topics in ecology, evolution and systematics with emphasis on analysis of factors influencing the distribution, abundance, adaptations and evolutionary relationships of insects. Includes consideration of applications of basic theory (e.g. biological control). May be repeated for credit up to eight units if topics differs. Offered irregularly. —F, W, S.

### 295. Current Topics in Agricultural Entomology and Bee Biology (2)

Seminar—2 hours. Prerequisite: course 110 if topic covers pests and beneficial predators, course 119 if topic is bee biology, or either if topic bridges both. Discussion of advanced topics about the biology, ecology, behavior, and management of pest and beneficial insects. May be repeated for up to 8 units of credit if topic differs. Offered irregularly. —F, W, S.

### 297N. Seminar in Entomology (1)

Seminar—1 hour. Weekly entomology seminar. May be repeated up to 9 units of credit if topic differs. (S/U grading only.) —F, W, S. (F, W, S.)

### 298. Group Study (1-5)

(S/U grading only.)

### 299. Research (1-12)

(S/U grading only.)

## Environmental and Resource Sciences

(College of Agricultural and Environmental Sciences)

This major was discontinued as of Fall 2008; see [Environmental Science and Management](#), on page 325.

## Environmental Geology

(College of Letters and Science)

The minor in Environmental Geology examines the multidisciplinary factors of geology and related earth science fields, and planning and resources oriented programs. Students in the minor are encouraged to participate in internship programs that assist them in solidifying the Environmental Geology minor with their Geology major or other major field areas that include geologic components.

The minor is sponsored by the Department of Earth and Planetary Sciences in 2119 Earth and Physical Sciences Building.

### Minor Program Requirements:

UNITS

#### Environmental Geology ..... 25-26

Geology 130, 134, and Environmental Science and Management 186 .....	9
Soil Science 118 .....	4
Hydrologic Science 141 or Civil and Environmental Engineering 142 .....	4
Two courses chosen from Environmental Science and Policy 160, 171, 179,	
Hydrologic Sciences 144, 146 .....	8-9

**Minor Adviser.** See Geology major advisers

## Environmental Horticulture

(College of Agricultural and Environmental Sciences)

**Faculty.** See [Plant Sciences](#), on page 514.

**Major Program.** See [Environmental Horticulture and Urban Forestry](#), on page 324.

### Minor Program Requirements:

UNITS

#### Environmental Horticulture ..... 23-25

Environmental Horticulture 6 and 105 .....	8
Plant Sciences 171 .....	4
Select three courses from: Environmental Horticulture 100, 120, 125, 130,	
133 .....	11-13

**Minor Adviser.** A. Volder ([Plant Sciences](#))

**Related Undergraduate Programs.** See the undergraduate majors in [Ecological Management and Restoration](#), on page 250, [Plant Biology](#), on page 509, and [Plant Sciences](#), on page 514.

**Graduate Study.** For graduate study related to this field, see the M.S. and Ph.D. degree programs in the graduate groups of Horticulture and Agronomy, Plant Biology, and Ecology. Also see [Graduate Studies](#), on page 120.

**Related Courses.** See [Plant Biology](#) and [Plant Sciences](#).

## Courses in Environmental Horticulture (ENH)

Questions pertaining to the following courses should be directed to the instructor or to the Plant Sciences Advising Office in 1224 Plant and Environmental Sciences Building 530-752-7738.

### Lower Division

#### 1. Introduction to Environmental Horticulture/Urban Forestry (3)

Lecture—3 hours. Introduction to the use of plants to enhance the physical, visual and social environment, the use of ecological principles in developing sustainable, low maintenance landscape systems, and the career opportunities in these areas. GE credit: SciEng | SE, SL. —F. (F.) Volder

#### 6. Introduction to Environmental Plants (4)

Lecture—1 hour; discussion—2 hours; laboratory—3 hours. Classification, nomenclature and variation of environmental plants. The use of floral and vegetative characteristics and terminology to key unknown plants. Characteristics of plant groups and basics of climate, soils and plant selection. Identification of 150 common landscape plants. GE credit: SciEng | SE, VL. —F. (F.) Young

### Upper Division

#### 100. Urban Forestry (4)

Lecture—2 hours; laboratory—3 hours; term paper. Prerequisite: Biological Sciences 1C or Plant Sciences 2. Principles and practices of planning and managing urban vegetation. Basics of tree appraisal, natural resource inventory, and development of long term urban forest management plans. GE credit: SciEng | SE. —F. (F.) Cadenasso, Volder

#### 101. Trees of the Urban Forest (2)

Lecture—1 hour; laboratory—2 hours. Prerequisite: course 6 or consent of instructor. Identification and evaluation of 200 tree species of the urban forest on campus, in the Arboretum, and in the city of Davis; appraised and aesthetic values, condition, and branch structure; contribution of trees to this ecosystem. Bicycle required. GE credit: SciEng | VL, SE. —F. (F.) Harding

#### 102. Physiological Principles in Environmental Horticulture (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1C. Physiological principles and processes essential to floriculture, nursery crop production, turficulture and landscape horticulture. Emphasis on the control of vegetative and reproductive development for a broad species range in greenhouse and extensive landscape environments. GE credit: SciEng | SE.

#### 105. Taxonomy and Ecology of Environmental Plant Families (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 6 or consent of instructor. Classification and identification of introduced and native species used in urban forests, with emphasis on floral and vegetative characteristics of the prominent families of angiosperms and gymnosperms, adaptations to environmental variations in western landscapes, and horticultural classification. GE credit: SciEng | VL, SE. —S. (S.) Harding

#### 120. Management of Container Media (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Soil Science 10. Principles of soil science and practices related to management of container media are taught, emphasizing appropriate use of soils and amendments, irrigation, and fertilizers. Physical and

chemical properties are tested and effects of management on crops are evaluated in the laboratory. GE credit: SciEng | QL, SE, WE.—F. (F.) Evans

### **125. Greenhouse and Nursery Crop Production (5)**

Lecture—3 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: Plant Sciences 2 or Biological Sciences 1C. Principles and techniques for the production of ornamental greenhouse and nursery crops. Hands-on experience producing greenhouse crops. Optional weekend field trip. GE credit: SciEng | SE, WE.—W. (W.) Lieth

### **133. Woody Plants in the Landscape: Growth, Ecology and Management (4)**

Lecture—3 hours; laboratory—2 hours; discussion—1 hour. Prerequisite: Biological Sciences 1C or the equivalent preparation in plant biology. Principles and practices of managing trees and shrubs in the urban landscape and other managed environments. Topics include woody plant form; growth response and adaptation; tree management in relation to soil, moisture, climate; plant problems. GE credit: SciEng | SE, WE.—W. (W.) Berry, Volder

### **150. Genetics and Plant Conservation: The Biodiversity Crisis (3)**

Lecture/discussion—3 hours. Prerequisite: Biological Sciences 1C or the equivalent. Conservation of genetic diversity, measurement of diversity, threats to diversity and reasons for protection, the process of extinction, distribution of diversity, determination of what to conserve and means of conservation. Examples drawn largely from forest tree species. GE credit: SciEng | SE, SL.—F. (F.) Neale

### **160. Restoration Ecology (3)**

Lecture—3 hours. Prerequisite: Plant Biology/Evolution & Ecology 117 or Evolution & Ecology 121 or Plant Biology 147 or equivalent course in ecology/plant ecology. Conceptual bases of restoration ecology; tools used by restoration ecologists to solve practical problems; scope and success of actual restoration projects. GE credit: SciEng | SE, SL, WE.—S. (S.) Eviner

### **160L. Restoration Ecology Laboratory (1)**

Laboratory/discussion—3 hours. Prerequisite: course 160 (may be taken concurrently). Companion field course to course 160. A series of part-day and all day visits to various field sites, involving site evaluations, guest field presentations by local restorationists, and actual restoration activities. Not open for credit to students who completed course 160 prior to spring 2004. GE credit: SciEng | SE, SL.—S. (S.) Eviner

## **Environmental Horticulture and Urban Forestry**

(College of Agricultural and Environmental Sciences)

**Faculty.** See Department of [Plant Sciences](#), on page 514.

**The Major Program.** Students majoring in Environmental Horticulture and Urban Forestry learn how plants improve the environment and the quality of our lives. The major focuses on the biological and physical concepts and horticultural principles of plant production, management of plants and plant ecosystems in landscape settings and sociological aspects of plant/people interactions in the urban environment. Plants are used to revegetate and restore disturbed landscapes, control erosion and reduce energy and water consumption. The ornamental use of plants to improve the aesthetic quality of urban and rural landscapes, recreational areas, interiorscapes and commercial sites is an important aspect of this major. Students may select one or more of the following three areas of specialization: Floriculture/Nursery, Plant Biodiversity/Restoration, or Urban Landscape Management.

**Internships and Career Opportunities.** Students are encouraged to develop internships on or

off campus to augment their activities in the classroom and laboratory. Internships are available with the department's greenhouse facility, the UC Davis Arboretum, landscape designers, local nurseries, government agencies, regional non-profits, and restoration firms. Career opportunities in this field include growing and/or managing plants in a variety of settings, including nurseries and arboreta, consulting as an arborist, or as an urban, landscape, or restoration horticulturist; business ownership; park management and landscape contracting; working in the public or private sector, or for non-profit organizations.

### **B.S. Major Requirements:**

UNITS

Communications 1 recommended as part of the College English Composition Requirement or the Words and Images Core Literacy Component.

### **Preparatory Subject Matter .....56-62**

Environmental Horticulture 1 and 6 .....	7
Landscape Architecture 30 .....	4
Biological Sciences 2A, 2B, and Plant Sciences 2 .....	14
Chemistry 2A-2B .....	10
Environmental Science and Policy 1 or 10 or 30 .....	3-4
Physics 1A-1B .....	6
Plant Sciences 21 .....	3
Mathematics 16A or Statistics 13 .....	3-4
University Writing Program 102B, 102G, 104E, or other upper division composition course (may overlap with college composition requirement; may be satisfied by passing the English Composition Exam) .....	0-4
Lower division restricted electives .....	6
Select one lower division resource science course and one lower division social science/humanities course in consultation with adviser; minimum 6 units.	

### **Depth Subject Matter .....42-46**

Environmental Horticulture 102 or Plant Sciences 100A .....	3-4
Environmental Horticulture 105 or Plant Sciences 102 or Plant Biology 108 .....	4-5
Plant Biology 117 or Plant Sciences 150 ..	4
Plant Sciences 171 .....	4
Soil Science 100 .....	5
Select two courses from Entomology 110, Nematology 100, Plant Pathology 120, Plant Sciences 105 or 176 .....	7-9
Internship or research; must be approved by major adviser .....	3
Upper division restricted electives .....	12
Select two upper division resource science courses and two upper division social science/humanities courses in consultation with adviser; minimum 12 units.	

### **Areas of Specialization (choose one)**

No course may be used to satisfy more than one requirement.

### **Floriculture/Nursery Option .....18**

Environmental Horticulture 120, 125 .....	8
Applied Biological Systems Technology 165 .....	2
Entomology 135 .....	4
Plant Sciences 100C or 158 or Soil Science 109 .....	4

### **Plant Biodiversity/Restoration Option .....16-22**

Environmental Horticulture 160, 160L .....	4
Environmental Horticulture 150, or Evolution and Ecology 100, or Plant Biology 116 .....	3-5
(a) Select one course from: Environmental Science and Management 141, Environmental Science and Policy 127, 155L, Plant Sciences 130, 150, Wildlife, Fish, and Conservation Biology 155 .....	3-4
(b) Select one course from: Environmental Science and Policy 155, Plant Biology 108, 117, 119, Plant Sciences 102, 144, 147/	

### **147L, 163, 176, Wildlife, Fish, and Conservation Biology 156, 157 .....**

3-5  
Select one additional class from section a or b .....

### **Urban Landscape Management Option .....16-17**

Environmental Horticulture 100, 133 .....	8
Applied Biological Systems Technology 165 .....	2
Plant Sciences 162 .....	3
Science and Society 18 or Landscape Architecture 150 .....	3-4

### **Total Units for the Major.....114-130**

**Major Adviser.** T.P. Young

**Advising Center** for the major is located in 1224 Plant and Environmental Sciences 530-752-7738.

## **Environmental Policy Analysis and Planning**

(College of Agricultural and Environmental Sciences)

### **The Major Program**

The major in environmental policy analysis and planning develops skills for designing and assessing sustainable policies for environmental quality and natural resource management.

Any student in good standing is eligible to transfer to the major; to do so, please see the staff adviser, Melissa Whaley, in 2134 Wickson Hall, or the master adviser, Prof. J. Sanchirico, in 2102 Wickson Hall.

**The Program.** This major provides students with a strong background in policy analysis, including the evaluation of policy alternatives and the study of factors affecting policy formulation and implementation. Key components of this interdisciplinary training include general background in the natural sciences relevant to environmental policy, economics, political science, statistics, and research methodology to quantitatively analyze environmental problems and policy options. In addition, students are encouraged to develop substantive knowledge in a specific field of environmental policy, such as urban and regional planning, water policy, transportation and energy, climate policy, or conservation management.

**Careers.** Environmental policy analysis and planning graduates are prepared for employment in environmental, natural resource, energy, and transportation focused public agencies, consulting firms, non-governmental organizations, and businesses, or as legislative aides for elected representatives. The major is also excellent preparation for students who want to go on to graduate work in law, planning, public policy, political science, economics, or business.

### **B.S. Major Requirements:**

UNITS

### **English Composition and Public Speaking Requirement .....3-8**

University Writing Program 101, 102A-G, 104A-E, or passing the Upper Division English Composition exam .....	0-4
Communication 1 or 3 or Dramatic Art 10 .....	3-4

### **Preparatory Subject Matter .....46-52**

Biological Sciences 2A, 10, or 10V, Chemistry 2A or 10, and Physics 1A .....	11-13
Biological Sciences 2B or Chemistry 2B or Physics 1B .....	3-5
Plant Sciences 21, or Science & Society 18 .....	3
Economics 1A, 1B .....	8
Animal Science 1, Atmospheric Science 60, Environmental Science & Management 100, Geology 1 or 134, Plant Sciences 12, or Wildlife, Fish, & Conservation Biology 11 .....	3-5

**Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience**

**ACGH=American Cultures; DD=Domestic Diversity; ArHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience**

**Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience**

**Quarter Offered: F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses**

Environmental Science & Policy 1 .....	4
Mathematics 16A-16B, 17A-17B, or 21A-21B .....	6-8
Political Science 1 .....	4
Statistics 13 or 32 .....	3-4

Satisfaction of General Education requirement.

#### Depth Subject Matter ..... 49-51

(Students must take these units on a letter grade basis, and must attain an overall grade point average of 2.000 or higher in the Depth Subject Matter courses.)

Environmental Science & Policy 110, 160, 168A, 168B .....	17
Environmental Science & Policy 161 .....	4
Environmental Science & Policy 178 .....	4
Environmental Science & Policy 179 .....	4
Select one course from: Agricultural & Resource Economics 106, Sociology 106, Statistics 100, 103, or 108 .....	4-5
Agricultural & Resource Economics 100A or Economics 100 .....	4
Agricultural & Resource Economics 176, Economics 125, or Environmental Science & Policy 175 .....	4
Applied Biological Systems Technology 150 .....	4
Select one course from: Applied Biological Systems Technology 181N, 182, or Environmental Science & Management 185 or 186 .....	4-5

#### Areas of Specialization (choose one) ..... 12-17

Students must select courses in the Areas of Specialization that have not been taken in the Depth Subject Matter.

#### City & Regional Planning

Environmental Science & Policy 171 and 172 .....	8
Select one course from: Civil & Environmental Engineering 162, 165 or Environmental Science & Policy 163 .....	3-4
Select one course from: Art History 168, Community & Regional Development 149, 152, 156, or 171, Environmental Toxicology 110, Environmental Science & Policy 173 or Political Science 100 .....	2-5

#### Climate Change Policy

Environmental Science & Policy 165N .....	3
Select one course from: Agriculture & Resource Economics 176, Economics 125, Environmental Science & Policy 163, 167, or 171 .....	4
Select two courses from: Atmospheric Science 116, 133, or 160, Environmental Science & Management 131, Environmental Science & Policy 116N, Science & Society 25 or 25V .....	6-8

#### Conservation Management

Select two courses from: Environmental Science & Policy 166N, 169, 170, or 172 .....	6-8
Select one course from: Environmental Horticulture 160, Environmental Science & Management 141, Environmental Science & Policy 100, 121, or 127, Evolution & Ecology 115, 138, or Wildlife, Fish, & Conservation Biology 154 or 155 .....	3-5
Select one course from: African American & African Studies 176, 177, Agriculture & Resource Economics 115A, Anthropology 103, Asian American Studies 114, Chicana/Chicano Studies 112, Community & Regional Development 153A, 153B, or 153C, International Relations 104, or Sociology 145A .....	4

#### Energy & Transportation Planning

Economics 125, Engineering 106, or Environmental Science & Policy 175.....	3-4
Select two courses from: Civil & Environmental Engineering 162, 165, Environmental Science & Policy 163, 167, or 172 .....	7-8

Select one course from: Atmospheric Science 116, Civil & Environmental Engineering 123, 143, Engineering 160, Environmental Science & Management 131, or Geology 130.....	3-4
---	-----

#### Environmental Policy & Politics

Select one course from: Political Science 100, 104, 105, 107, or 109 .....	4
Select one course from: Political Science 162, 164, 165, or 170 .....	4
Select one course from: Civil & Environmental Engineering 165, Environmental Science & Policy 165N, 166N, 167, 169, 170, 171, 172 .....	3-4
Select one course from: Agricultural & Resource Economics 106, 176, Civil & Environmental Engineering 153, Economics 130, or Environmental Science & Policy 175.....	4

#### Integrative Policy

Students choosing this individualized track must consult with a faculty adviser to identify an area of emphasis within this track and to select four upper division courses with a common theme. Possible areas of emphasis are marine policy, pollutants in the environment, planning in the presence of environmental hazards, sustainable development, or environmental and natural resource economics. If you are considering this track, please contact the major adviser as soon as possible.

#### Water Management

Select two courses from: Environmental Science & Policy 166N, 169, or Hydrologic Science 150 .....	6
Select two courses from: Environmental Science & Management 100, 121, Environmental Science & Policy 151, 155, Geology 134, Hydrologic Science 141, 143, Soil Science 118, Wildlife, Fish, & Conservation Biology 120, Biological Sciences 124, Environmental Science & Policy 116N, 124, 150C, or 152 .....	6-8

#### Total Units for the Degree ..... 110-128

**Major Adviser.** J. Sanchirico (*Environmental Science and Policy*)

#### Minor Program Requirements:

The faculty for environmental policy analysis and planning offers the following minor. The Environmental Policy Analysis minor is for natural and social science students desiring basic training in policy analysis theory and methods.

#### UNITS

#### Environmental Policy Analysis ..... 23-25

<i>Preparation:</i> Economics 1A; basic course in political science.	
Environmental Science & Policy 1 .....	4
Environmental Science & Policy 160, 161, 168A .....	13
Select two courses from: Environmental Science & Policy 163, 165N, 166N, 167, 168B, 169, 171, 172, or 179 .....	6-8

**Minor Adviser.** J. Sanchirico (*Environmental Science and Policy*)

## Environmental Science and Management

(College of Agricultural and Environmental Sciences)

#### The Major Program

The Environmental Science and Management (ESM) major is designed for students who are interested in solving environmental problems from an interdisciplinary perspective linking the natural and social sciences.

Students who choose this major will study the interaction of physical, biological, and social components of environmental problems. Students completing the program will understand the scientific basis for environmental decision making and the legal, economic, and political issues involved in management of the environment.

**The Program.** Courses in biology, chemistry, physics, economics, geology, and calculus form the lower-division preparatory foundation of the curriculum. These are then tied together with Environmental Science and Policy 1, "Environmental Analysis" which provides an inter-disciplinary analysis of several environmental problems. The upper-division core consists of foundation courses in physical, biological, and social sciences, as well as applied courses in environmental monitoring, GIS, impact reporting, and statistical analysis. In their junior year, students must choose a specialized track from the following six options:

- (a) Ecology, Biodiversity, and Conservation
- (b) Natural Resource Management
- (c) Climate Change and Air Quality
- (d) Geospatial Information Science
- (e) Watershed Science
- (f) Soils and Biogeochemistry

A capstone course is required for all seniors and serves to integrate the science, policy/management and biology aspects of the ESM major. All students gain practical experience through field courses and a required internship. Selected students may also pursue an honors thesis in their senior year.

The ESM major is jointly administered by the Departments of Environmental Science and Policy (ESP) and Land, Air and Water Resources (LAWR). Any student in good standing is eligible to transfer to the major; to do so, please see the student affairs officers in 2134 Wickson Hall or in 1150 Plant and Environmental Sciences Building.

**Careers.** Graduates from this program are prepared to pursue careers as practicing environmental scientists, resource analysts and planners working for public agencies and private firms specializing in environmental quality, natural resources or ecological research. The major is also an excellent preparation for graduate or professional training in physical and/or biological environmental science graduate programs, as well as in environmental law, administration and environmental policy.

#### B.S. Major Requirements:

#### UNITS

#### English Composition and Public Speaking requirement ..... 3-8

University Writing Program 101, 102A-G, 104A-E, or passing the Upper Division English Composition exam .....	0-4
Communication 1, 3, or Dramatic Art 10 .....	3-4

#### Preparatory Subject Matter ..... 48-57

Biological Sciences 2A, 2B, 2C .....	15
Geology 1 or 50; (Geology 50 recommended) .....	3-4
Chemistry 2A, 2B or 2AH, 2BH; (Chemistry 2C or 2CH recommended) .....	10
Physics 1A, 1B, or 7A, 7B, 7C .....	6-12
Economics 1A .....	4
Mathematics 16A, 16B, 17A, 17B, or 21A, 21B (Mathematics 17A, 17B recommended) .....	6-8
Environmental Science and Policy 1 .....	4
Satisfaction of the General Education requirement.	

#### Depth Subject Matter ..... 28-32

Environmental Science and Management 120 .....	4
Environmental Science and Policy 100 or Evolution and Ecology 101 .....	4
Environmental Science and Policy 162 .....	4
Statistics 13 or 100; (Statistics 100 recommended) .....	4

Select one course from: Environmental Science and Management 108 or Environmental Science and Policy 179 .. 3-4	
Applied Biological Systems Technology 150.....4	
Internship-Environmental Science and Management or Environmental Science and Policy 192 ..... 3	
Capstone Class-Environmental Science and Management 195 ..... 2	
Honors Thesis (optional)-Environmental Science and Management 194H ..... 0-3	
<b>Ecology, Biodiversity and Conservation Track .....</b>	<b>36-46</b>
Select one course from: Atmospheric Science 60, 116, 133, Environmental Science and Management 121, 131, Environmental Science and Policy 152, Geology 134, or Soil Science 100..... 3-5	
Select one course from: Environmental Science and Policy 170, 171, 172, 179, or Sociology 160..... 4	
Evolution and Ecology 100 ..... 4	
Select one course from: Environmental Science and Policy 127 or Wildlife, Fish, and Conservation Biology 154 ..... 4	
Select one course from: Environmental Horticulture 160 and 160L, Environmental Science and Policy 123, 124, Evolution and Ecology 180A, Plant Sciences 147 and 147L, or Wildlife, Fish, and Conservation Biology 100..... 3-4	
Select one course from: Environmental Science and Policy 121 or Wildlife, Fish, and Conservation Biology 122 ..... 4	
Evolution and Ecology 104, 115, 181, Environmental Science and Policy 151, 155, Plant Biology 117 or Wildlife, Fish, and Conservation Biology 155 ..... 3-4	
Select one course from: Evolution and Ecology 147 or Plant Sciences 162 or Environmental Horticulture 160..... 3-4	
Select one biome level course on wetlands, forests, or water from: Environmental Science and Management 144, Environmental Science and Policy 124, 150C, 151, 155, Evolution and Ecology 115, 138, Plant Sciences 130..... 3-5	
Select one organismal biology course on birds, mammals, or plants from: Entomology 103, 116, Evolution and Ecology 112, 114, 134, Plant Biology 102*, 116*, 119*, Wildlife, Fish, and Conservation Biology 110, 111, 120, 134; *these are combined lecture/lab courses and will fulfill both the organismal lecture and lab requirements simultaneously..... 3-5	
Complete one lab associated with either the biome level or organismal biology course (Entomology 116L, Environmental Science and Policy 151L, 155L, Evolution and Ecology 112L, 180B, Wildlife, Fish, and Conservation Biology 110L, 111L, 120L, 134L)..... 2-3	

<b>Natural Resource Management Track .....</b>	<b>32-41</b>
Select three courses from: Environmental Science and Policy 160, 165N, 166N, 167, 168A, 169, 171, 172, 179, or Sociology 160..... 9-13	
Select one course from: Environmental Science and Policy 161 or Hydrologic Science 150 ..... 3-4	
Statistics 103 (or equivalent upper-division statistics) ..... 4	
Select two courses from: Entomology 104, Environmental Science and Management 141, 144, Environmental Science and Policy 151, 155, Evolution and Ecology 115, Plant Biology 117, Plant Sciences 130 or Wildlife, Fish, and Conservation Biology 110, 111, 120, or 134..... 6-8	
Select two courses from: Atmospheric Science 116, Environmental Science and	

Management 121, 131 or Soil Science 100..... 6-9	
Environmental Science and Management 185 or 186 ..... 4	
<b>Climate Change and Air Quality Track .....</b>	<b>32-41</b>
Atmospheric Science 60 ..... 4	
Select three courses from: Atmospheric Science 115, 116, 133, 160, Environmental Science and Management 131 or Geology 108..... 9-12	
Select two courses from: Environmental Science and Management 100, 121, Environmental Science and Policy 116N, Hydrologic Science 143 or Soil Science 100..... 6-9	
Select one course from: Environmental Science and Management 144, Environmental Science and Policy 124, 150C, 151, 155, Evolution and Ecology 115 or Plant Sciences 130..... 3-4	
Select one course from: Evolution and Ecology 147 or 149 ..... 4	
Select two courses from: Environmental Science and Policy 163, 165N, 166N, 167, 171, 172, 179, or Sociology 160 ..... 6-8	
<b>Geospatial Information Science Track .....</b>	<b>33-42</b>
Select two courses from: Applied Biological Systems Technology 181N, 182, Environmental Science and Management 185, or 186..... 8-9	
Select two courses from: Environmental Science and Policy 163, 165N, 166N, 169, 171, 172, 179, or Sociology 160 ..... 6-8	
Select two courses from: Environmental Science and Policy 121, Statistics 104, 106, 108, 130A, 130B or 137..... 8	
Other applicable information technology courses from the Engineering department including database management, digital library science and network and Web technologies may be substituted for spatial information with approval.	
Select three courses from the following options. Must cover both physical and biological courses from Atmospheric Science 110, 116, 133, Soil Science 100, Environmental Science and Policy 124, 150C, 151, 152, 155, Geology 136, Plant Sciences 101 or Plant Biology 117 ..... 9-14	
<b>Soils and Biogeochemistry .....</b>	<b>38-46</b>
Soil Science 100..... 5	
Select four courses from: Environmental Science and Management 100, Hydrologic Science 134, Soil Science 102, 105, 107, 109, 111, or 120..... 16-21	
Select two courses from: Environmental Science and Management 121, Environmental Science and Policy 165N, 166N, 171, 172, 179, or Sociology 160 ..... 6-8	
Select one course from: Environmental Science and Management 185, Geology 134, Hydrologic Science 147, or Soil Science 118..... 3-4	
Select two courses from: Atmospheric Science 160, Environmental Science and Management 144, Environmental Science and Policy 116N, 150A, 150C, 151, 155, Geology 132, Plant Biology 117 or Plant Sciences 130 ..... 6-8	
<b>Watershed Science Track.....</b>	<b>38-47</b>
Environmental Science and Management 121 or Hydrologic Science 10 ..... 3	
Soil Science 100..... 5	
Select two courses from: Environmental Science and Management 100 or Hydrologic Science 141 (but not both), Hydrologic Science 142, 143, Environmental Science and Management 108 or Hydrologic Science 151 (but not both)..... 6-8	
Select one course from: Geology 35, 136, 139, or 140..... 3-5	

Select one course from: Applied Biological Systems Technology 181N or 182 ..... 4	
Select one course from: Soil Science 105, 118, or 120 ..... 4-5	
Select two courses from: Environmental Science and Policy 166N, 168A, 169, 172, 179, Hydrologic Science 150, or Landscape Architecture 60 ..... 6-9	
Atmospheric Science 133 ..... 4	
Select one course from: Entomology 116, Evolution and Ecology 115, or Wildlife, Fish, and Conservation Biology 120 or 134 .. 3-4	

### Total Units for the Major..... 111-114

**Major Advisers.** Marcel Holyoak (*Environmental Science and Policy*) and Terrance Nathan (*Land, Air and Water Resources*)

**Advising centers** for the major, including peer advising, are located in both the Environmental Science and Policy and Land, Air and Water Resources departments.

Students whose last names begin with the letters A-L, please see Melissa Whaley in 2134 Wickson Hall.

Students whose last names begin with the letters M-Z, please see Lacole Brooks in 1150 Plant and Environmental Sciences.

## Courses in Environmental Science and Management (ESM)

### Lower Division

#### 8. Water Quality at Risk (3)

Lecture—2 hours; discussion—1 hour. Natural and human threats to water quality. Balance of science and policy in all aspects of attaining, maintaining, and managing water quality, water contamination. Decoding popular media coverage of water quality and water contamination. (Same course as Science and Society 8.) Not open to students who have successfully completed Environmental and Resource Sciences 8. (Formerly Environmental and Resource Sciences 8.) GE credit: SciEng or SocSci, Wrt | SE, SL, SS, WE. —W. (W.) Hernes

#### 30. World Ecosystems & Geography (3)

Lecture—3 hours. Introduction to the earth's major geographic regions and associated ecosystems, such as deserts, temperate forests, and oceans with an examination of how climate, vegetation regimes, ecological processes, agriculture and other human activities interact in different regions of the world. (Same course as Environmental Science and Policy 30.) Not open to students who have successfully completed Environmental and Resource Sciences 30. (Formerly Environmental and Resource Sciences 30.) Offered alternate years. GE credit: SciEng | SE, SL, WC. —W. (W.) Jackson

#### 47. Watershed Processes and Water Quality in the Tahoe Basin (2)

Lecture/laboratory—21 hours; fieldwork—9 hours; discussion—3 hours; term paper. Prerequisite: basic knowledge of environmental, soil, or hydrologic sciences. Watershed processes, runoff water-quality management, restoration in Lake Tahoe Basin. Soils, precipitation-runoff, revegetation and adaptive management related to erosion control, effective solutions, development of restoration strategies. Students develop field restoration. Course involves 3 days of instruction in Tahoe City. (Same course as Hydrologic Science 47.) Not open to students who have successfully completed Environmental and Resource Sciences 47. (Formerly Environmental and Resource Sciences 47.) GE credit: SciEng | QL, SE, SL, WC. —W. (W.) Jackson

#### 92. Internship (1-12)

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in resource sciences. Internship supervised by a member of the faculty. (P/NP grading only.) May be repeated for credit.—F, W, S. (F, W, S.)

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

**98F. Student Facilitated Course Development (1-3)**

Prerequisite: consent of instructor. Restricted to upper division standing or consent of instructor. Student-facilitated (taught) course intended for lower division students. Offered irregularly. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. Primarily for lower division students. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

**Upper Division****100. Principles of Hydrologic Science (4)**

Lecture—4 hours. Prerequisite: Chemistry 2B, Mathematics 16B, and Physics 7A or 9A. Topics include hydrology (surface and ground water), hydraulic flow through porous media, water in the soil-plant-atmosphere continuum, water quality, flow through open channels, and representative water-resource problems. Not open to students who have successfully completed Environmental and Resource Sciences 100. (Formerly Environmental and Resource Sciences 100.) GE credit: SciEng | QL, SE, SL.—F. (F.) Grismer

**108. Environmental Monitoring (3)**

Lecture/discussion—2 hours; laboratory—2 hours; fieldwork. Prerequisite: entry level course work in student's major; specifically, Evolution and Ecology 101 (Evolution and Ecology), Environmental Science and Policy 100 (Environmental Biology and Management), Environmental Toxicology 101 (Environmental Toxicology), Wildlife, Fish, and Conservation Biology 100 (Wildlife, Fish, and Conservation Biology), Environmental and Resource Sciences 100 (Hydrologic Science), Soil Science 100 (Soil Science), Environmental Horticulture 100 (Environmental Horticulture and Urban Forestry), Landscape Architecture 50 (Landscape Architecture) or the equivalent for any of these courses. Instrumentation and methods for environmental and ecological monitoring; GPS, sensors, datalogging, and GIS. Wide range of measurement techniques for environmental parameters. Not open to students who have successfully completed Environmental and Resource Sciences 108. (Formerly Environmental and Resource Sciences 108.) GE credit: SciEng | SE, SL.—S. (S.)

**120. Global Environmental Interactions (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one college level chemistry course; one college level biology course. Limited to 25 students per discussion section. Relationships among climate, hydrology, biogeochemical cycles, soils and vegetation distribution in diverse landscapes and biomes. Emphasis on physical, chemical, and biological processes affecting ecosystems from the poles to the equator, and human impacts on the environment. Not open to students who have successfully completed Environmental Resources Sciences 60 or 120. (Formerly Environmental Resources Sciences 60 and 120.)—W. (W.) Houlton

**121. Water Science and Management (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: Physics 10 or Geology 1. Role of water as an essential natural resource in contemporary society. Aspects of the scientific method, including descriptions of natural phenomena and underlying physical causes. Water for cities, agriculture, industry, wildlife and recreation; case studies of water management. Not open to students who have successfully completed Environmental and Resource Sciences 121. (Formerly Environmental and Resource Sciences 121.) GE credit: SciEng | QL, SE, SL.—F. (F.) Sandoval Solis

**131. Air as a Resource (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: Chemistry 10. Degradation of the atmospheric resource, historical aspects and effects of air pollution examined. Evaluation of primary gaseous and particulate pollutants and discussion of their impact. Not open to students who have successfully completed Environmental and Resource Sciences 131. (Formerly Environmental and Resource Sciences 131.) GE credit: QL, SE, SL.—W. (W.) Zhang

**141. Role of Fire in Natural Ecosystems (4)**

Lecture—3 hours; term paper. Prerequisite: basic biological concepts: Biological Sciences 2A or Plant Sciences 2; ecology/evolution: Biological Sciences 2B or 2C. Fire regimes and roles in major North American vegetation types, especially in the west. Physics of fire, fire effects on organisms and ecosystem functioning, reconstructing fire histories, fire in resource management, and fire use by indigenous people. Not open to students who have successfully completed Environmental and Resource Sciences 141. (Formerly Environmental and Resource Sciences 141.) GE credit: SciEng | SE, SL, WE.—W. (W.) Latimer

**144. Trees and Forests (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Plant Sciences 2 or Biological Sciences 1C or 2C. Biological structure and function of trees as organisms; understanding of forests as communities and as ecosystems; use of forests by humans; tree phenology, photosynthesis, respiration, soil processes, life histories, dormancy, forest biodiversity, and agroforestry. (Same course as Plant Sciences 144.) Not open for credit to students who have completed Plant Biology 144 or Environmental Horticulture 144 or Environmental and Resource Science 144. (Former course Plant Biology/Environmental Horticulture/Environmental and Resource Science 144.) GE credit: SciEng | SE, VL.—F. (F.) Berry, Dahlgren, Rice

**185. Aerial Photo Interpretation and Remote Sensing (4)**

Lecture—2 hours; laboratory—4 hours. Prerequisite: upper division standing. Basics of remote sensing and photogrammetry, grids and map projections, aerial photo interpretation, sensors and platforms for aerial and space photography and non-photographic imaging systems, aerial thermography, microwave sensing, and introduction to remote sensing applications. Not open to students who have successfully completed Environmental Resource Science 185. (Formerly Environmental Resource Science 185.)—F. (F.) Jin

**186. Environmental Remote Sensing (5)**

Lecture—3 hours; laboratory—6 hours. Prerequisite: Mathematics 16B and Physics 7C or 9B; upper division standing; Landscape Architecture 150 recommended. Overview of satellite, airborne, and ground-based remote sensing, building on properties of electromagnetic radiation. Applications include hydrologic processes, weather and climate, ecology and land use, soils, geology, forestry, and agriculture. Computer based analysis and visualization of images and processing techniques. Not open to students who have successfully completed Hydrologic Science 186 or Environmental and Resource Sciences 186. (Formerly Hydrologic Science 186 and formerly Environmental and Resource Sciences 186.) GE credit: SciEng | QL, SE, VL.—W. (W.) Ustин

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units; consent of instructor. Work experience off and on campus in resource sciences. Internship supervised by a member of the faculty. (P/NP grading only.)—F, W, S. (F, W, S.)

**194H. Senior Honor Thesis (2-6)**

Independent study—2-6 hours. Prerequisite: senior standing, overall GPA of 3.50 or higher and consent of master adviser. Independent study, guided research on an environmentally related subject of special interest to the student. GE credit: SciEng | SE, WE.

**195. Integrating Environmental Science and Management (2)**

Lecture/discussion—2 hours. Prerequisite: senior status in Environmental Science and Management major or other environmental science major (e.g. Environmental Resource Science; Environmental Biology and Management; Environmental Toxicology; Environmental Policy Analysis and Planning, Wildlife, Fish, and Conservation Biology; Hydrologic Science); consent of instructor. Practical aspects of environmental improvement through integrated analyses of contemporary issues or problems associated

with advocacy, regulation, science and resource management from the perspectives of the physical and ecological sciences and current policy/management. May be repeated two times for credit. GE credit: SciEng or SocSci | SS or SE.—W. (W.) Grismer

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

**198F. Student Facilitated Course (1-3)**

Prerequisite: consent of instructor. Student-facilitated (taught) course intended for upper division students. Offered irregularly. (P/NP grading only.)—F, W, S. (F, W, S.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

**199FA. Student Teaching Course Development (1-3)**

Prerequisite: consent of instructor. Restricted to upper division standing. Under the supervision of a faculty member, an undergraduate student plans and develops the course they will teach under 98F/198F. Offered irregularly. (P/NP grading only.)

**199FB. Student Teaching Course Development (1-3)**

Prerequisite: course 199FA; consent of instructor. Restricted to upper division standing. Student facilitated. Under the supervision of a faculty member, an undergraduate student teaches a course under 98F/198F. Offered irregularly. (P/NP grading only.)

## Environmental Science and Policy

(College of Agricultural and Environmental Sciences)

Marcel Holyoak, Ph.D., Chairperson of the Department

Mark N. Lubell, Ph.D., Vice Chairperson

**Department Office.** 2132 Wickson Hall  
530-752-3026

**Faculty**

Gwendolyn B. Arnold, Ph.D., Assistant Professor

Marissa L. Baskett, Ph.D., Associate Professor

Edwin D. Grosholz, Ph.D., Professor, Specialist in Cooperative Extension

Susan L. Handy, Ph.D., Professor

Susan P. Harrison, Ph.D., Professor

Alan M. Hastings, Ph.D., Distinguished Professor

Robert Hijmans, Ph.D., Associate Professor

Marcel Holyoak, Ph.D., Professor

John L. Largier, Ph.D., Professor

C.Y. Cynthia Lin, Ph.D., Associate Professor  
*(Environmental Science and Policy, Agricultural and Resource Economics)*

Mark N. Lubell, Ph.D., Professor

Frances Moore, Ph.D., Assistant Professor

Steven G. Morgan, Ph.D., Professor

Joan M. Ogden, Ph.D., Professor

Eliska Rejmankova, Ph.D., Professor

Steven Sadro, Ph.D., Assistant Professor

James N. Sanchez, Ph.D., Professor

Mark W. Schwartz, Ph.D., Professor

*Academic Senate Distinguished Teaching Award*

Andrew Sih, Ph.D., Distinguished Professor

Daniel Sperling, Ph.D., Distinguished Professor  
*(Environmental Science and Policy, Civil and Environmental Engineering)*

Michael Springborn, Ph.D., Associate Professor

Thomas P. Tomich, Ph.D., Professor *(Environmental Science and Policy, Human and Community Development)*

**Emeriti Faculty**

Howard V. Cornell, Ph.D., Professor Emeritus

Charles R. Goldman, Ph.D., Professor Emeritus

*Distinguished Graduate Mentoring Award*

Robert A. Johnston, M.S., Professor Emeritus

**Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;**

**ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience**

**Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience**  
**Quarter Offered:** F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses

Benjamin S. Orlove, Ph.D., Professor Emeritus  
 James F. Quinn, Ph.D., Professor Emeritus  
 Seymour I. Schwartz, Ph.D., Professor Emeritus  
 Academic Senate Distinguished Teaching Award  
 Peter J. Richerson, Ph.D., Professor Emeritus

## The Program of Study

Environmental Science and Policy is a teaching and research department offering courses, workshops, and directed group study classes that focus on the complex trade-offs that arise from interdependences between natural and human systems. The department offers Bachelor of Science degrees in Environmental Science and Management and in Environmental Policy Analysis and Planning. Courses in Environmental Science and Policy also supplement major programs in a wide variety of established disciplines.

**Current Information.** Through its continuing contacts with many other departments and teaching divisions on the campus, the department develops a variety of special courses and workshops each year. Check with the Department office for up-to-date information about our courses and workshops.

**Graduate Study.** The Graduate Group in Ecology which is housed in Environmental Science & Policy offers an M.S. and Ph.D. degree program. Further information about graduate programs in ecology should be obtained from the chairperson of the Graduate Group in Ecology.

**Group Office.** 1005 Wickson Hall 530) 752-6752; <http://ecology.ucdavis.edu/>

## Courses in Environmental Science and Policy (ESP)

### Lower Division

#### 1. Environmental Analysis (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: University Writing Program 1 or English 3 or equivalent; sophomore standing; Economics 1A and Biological Sciences 2B recommended. Analysis of the physical, biological, and social interactions which constitute environmental problems. Emphasis on analysis of environmental problems, the consequences of proposed solutions, and the interaction of environmental science and public policy in creating solutions. GE credit: SciEng or SocSci | SE or SS, SL.—F. (F.) Arnold, Holyoak

#### 10. Current Issues in the Environment (3)

Lecture—3 hours. Prerequisite: elementary biology recommended. The science behind environmental issues, and policies affecting our ability to solve domestic and international environmental problems. Resources, environmental quality, regulation, environmental perception and conservation. Integrative case studies. Not open for credit to students who have completed course 1. GE credit: SciEng | SE or SS, SL, WE.—W. (W.) Morgan

#### 30. World Ecosystems & Geography (3)

Lecture—3 hours. Introduction to the earth's major geographic regions and associated ecosystems, such as deserts, temperate forests, and oceans with an examination of how climate, vegetation regimes, ecological processes, agriculture and other human activities interact in different regions of the world. (Same course as Environmental Science and Management 30.) Not open to students who have successfully completed Environmental and Resource Sciences 30. (Formerly Environmental and Resource Sciences 30.) Offered in alternate years. GE credit: SciEng | SE, SL, WC.

#### 92. Internship (1-12)

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internship supervised by member of the faculty. (P/ NP grading only.)

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

### Upper Division

#### 100. General Ecology (4)

Lecture—3 hours; discussion—1 hour. Prerequisites: Biological Sciences 2A, 2B, 2C, Mathematics 16A and 16B or 17A and 17B or 21A and 21B; Statistics 13 recommended. Theoretical and experimental analysis of the distribution, growth and regulation of species populations; predator-prey and competitive interactions; and the organization of natural communities. Application of evolutionary and ecological principles to selected environmental problems. GE credit: SciEng | SE, SL.—F. (F.) Harrison, Sih

#### 101. Ecology, Nature, and Society (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Anthropology 1 or 2 or course 30 or Evolution and Ecology 100 or Biological Sciences 101 recommended. Interdisciplinary study of diversity and change in human societies, using frameworks from anthropology, evolutionary ecology, history, archaeology, psychology, and other fields. Topics include population dynamics, subsistence transitions, family organization, disease, economics, warfare, politics, and resource conservation. (Same course as Anthropology 101.) Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.—Bergerhoff-Mulder

#### 105. Evolution of Societies and Cultures (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Anthropology 1 or 2 or course 30 or Evolution and Ecology 100 or Biological Sciences 101 recommended. Interdisciplinary study of social and cultural evolution in humans. Culture as a system of inheritance, psychology of cultural learning, culture as an adaptive system, evolution of maladaptations, evolution of technology and institutions, evolutionary transitions in human history, coevolution of genetic and cultural variation. Only 2 units of credit to students who have completed course 101 or Anthropology 101 prior to fall 2004. (Same course as Anthropology 105.) Offered irregularly. GE credit: SocSci, Wrt | QL, SS, WC, WE.

#### (a) Environmental Science

#### 110. Principles of Environmental Science (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Physics 1A or 7A, Mathematics 16B or 21B, and Biological Sciences 1A. Application of physical and chemical principles, ecological concepts, and systems approach to policy analysis of atmospheric environments, freshwater and marine environments, land use, energy supplies and technology, and other resources. GE credit: SciEng | QL, SE, SL.—W. (W.) Langer

#### 111. Marine Environmental Issues (1)

Discussion—1 hour. Prerequisite: consent of instructor. Examination of critical environmental issues occurring in coastal waters including the effects of climate change, overfishing, and other human impacts. Through readings and group discussions, students will develop an integrative understanding of the oceanographic and ecological processes. May be repeated two times for credit when topics differ. (Same Course as Evolution and Ecology 111.) GE credit: SciEng | SE, SL.—S, Su. (S, Su.)

#### 116N. Oceanography (3)

Lecture—2 hours; laboratory—3 hours; field work. Prerequisite: Geology 1 or 2 or 16 or 50. Advanced oceanographic topics: Chemical, physical, geological, and biological processes; research methods and data analysis; marine resources, anthropogenic impacts, and climate change; integrated earth/ocean/atmosphere systems; weekly lab and one weekend field trip. Offered in alternate years. (Same course as Geology 116N.) GE credit: SciEng | SE, SL.—W. (W.) Hill

#### (b) Ecological Analysis

#### 121. Population Ecology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 2A, 2B, 2C, Mathematics 16B or 17B or 21B or 21BH. Development of exponential and logistic growth models for plant and animal populations, analysis of age structure and genetic structure, analysis of competition and predator-prey

systems. Emphasis is on developing models and using them to make predictions and solve problems. GE credit: SciEng, Wrt | QL, SE, SL.—W. (W.) Baskeff, Hastings

#### 123. Introduction to Field and Laboratory Methods in Ecology (4)

Lecture—2 hours; laboratory—2 hours; fieldwork—4 hours. Prerequisite: course 100 or Evolution and Ecology 101 or the equivalent. Statistics 100 or the equivalent. Introduces students to methods used for collecting ecological data in field and laboratory situations. Methods used by population ecologists and community ecologists; emphasis on experimental design, scientific writing and data analysis. Offered in alternate years. GE credit: SciEng | SE, SL.—(S.) Grosholz

#### 124. Marine and Coastal Field Ecology (3)

Lecture—2 hours; discussion—1 hour; laboratory—3 hours; fieldwork—3 hours. Prerequisite: upper division standing or consent of instructor. Introductory animal biology (Biological Sciences 1B) recommended; residence at or near Bodega Marine Lab required. Enrollment restricted to application at <http://www.bml.ucdavis.edu>. Ecology of marine populations and communities living in diverse habitats along the California coast. Hands-on learning using scientific process and tools of the biological trade to address ecological questions arising during field trips. Critical thinking through discussing scientific literature. Offered irregularly. GE credit: SciEng | SE, SL.

#### 127. Plant Conservation Biology (4)

Lecture/discussion—3 hours; discussion—1 hour; term paper. Prerequisite: course 100 or Evolution and Ecology 101 or equivalent upper division general ecology. Principles governing the conservation of plant species and plant communities, including the roles of fire, exotic species, grazing, pollination, soils, and population genetics; analytic and practical techniques for plant conservation; and introduction to relevant legal, ethical, and policy issues. Offered irregularly. GE credit: SciEng | SE, SL.

#### (d) Aquatic Ecosystems Analysis

#### 150A. Physical and Chemical Oceanography (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Environmental Science and Policy 116N or Geology 116N; Physics 9B, Mathematics 21D, Chemistry 2C; consent of instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geo-chemical cycles. (Same course as Geology 150A.) GE credit: SciEng | QL, SE.—F. (F.) McClain, Spero

#### 150B. Geological Oceanography (3)

Lecture—3 hours. Prerequisite: Geology 50 or 116N or Geology 116N. Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as Geology 150B.) GE credit: SciEng | SE.—W. (W.) McClain

#### 150C. Biological Oceanography (4)

Lecture—3 hours; discussion—1 hour; fieldwork. Prerequisite: Biological Sciences 2A; a course in general ecology. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. (Same course as Geology 150C.) GE credit: SciEng | SE, SL.—Su. (Su.) Hill

#### 151. Limnology (4)

Lecture—3 hours; discussion—1 hour; special project. Prerequisite: Biological Sciences 1A and junior standing. The biology and productivity of inland waters with emphasis on the physical and chemical environment. GE credit: SciEng | SE.

**151L. Limnology Laboratory (3)**

Laboratory—6 hours; two weekend field trips. Prerequisite: course 151 (may be taken concurrently); junior, senior, or graduate standing. Limnological studies of lakes, streams, and reservoirs with interpretation of aquatic ecology. GE credit: SciEng | SE.

**152. Coastal Oceanography (3)**

Lecture—2 hours; discussion—1 hour; laboratory—3 hours; fieldwork—3 hours. Prerequisite: upper division standing or consent of the instructor; physics (Physics 9B), calculus (Mathematics 21B) and exposure to physical and chemical oceanography (Geology/Environmental Science and Policy 150A) are recommended; residence at or near Bodega Marine Laboratory required. Enrollment restricted to application at <http://www.bml.ucdavis.edu>. Oceanography of coastal waters, including bays, river plumes, nearshore and estuaries; focus on transport patterns, how they are forced and implications for ecological and environmental problems. Pertinent for students in oceanography, ecology, environmental engineering, geology and hydrology. GE credit: SciEng | SE, SL.—Su. (Su.) Largier

**155. Wetland Ecology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 2A or equivalent; course 100 or Evolution and Ecology 101 recommended. Introduction to wetland ecology. The structure and function of major wetland types and principles that are common to wetlands and that distinguish them from terrestrial and aquatic ecosystems. GE credit: SciEng | SE.—F. (F.) Rejmankova

**155L. Wetland Ecology Laboratory (3)**

Lecture—1 hour; laboratory—6 hours; field-work—two 1-day weekend field trips. Prerequisite: course 155 required (may be taken concurrently). Modern and classic techniques in wetland field ecology. Emphasis on sampling procedures, vegetation analysis, laboratory analytical procedures, and examples of successful wetland restoration techniques. GE credit: SciEng | SE, SL.—Su. (Su.) Rejmankova

**(e) Environmental Policy Analysis****160. The Policy Process (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Political Science 1; Economics 1A and Statistics 13 recommended. Alternative models of public policy-making and application to case studies in the U.S. and California. GE credit: SocSci | SS.—S. (S.) Arnold

**161. Environmental Law (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing and one course in environmental science or political science recommended. Introduction for non-Law School students to some of the principal issues in environmental law and the judicial interpretation of some important environmental statutes, e.g., NEPA. GE credit: SocSci, Wrt | SS.—S. (S.)

**162. Environmental Policy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A. Compares economic with socio-cultural approaches to understanding the causes of environmental problems and strategies for addressing them. Includes different approaches to the policy process, policy instruments, and environmental behavior. Applies these principles to several problems. GE credit: SocSci | SS.—W. (W.) Springborn

**163. Energy and Environmental Aspects of Transportation (4)**

Lecture—3 hours; extensive writing. Prerequisite: Economics 1A or Engineering 106. Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as Civil and Environmental Engineering 163.) Offered in alternate years. GE credit: SciEng or SocSci, Wrt | SE or SS, SL, WE.—F. Sperling

**164. Ethical Issues in Environmental Policy (3)**

Lecture—3 hours. Prerequisite: courses 160, 168A; seniors only in Environmental Policy Analysis and Planning or by consent of instructor. Basic modes of ethical reasoning and criteria of distributive justice applied to selected topics in environmental policy-making. Offered irregularly. GE credit: SocSci | SS.

**165N. Climate Policy (3)**

Lecture/discussion—3 hours. Prerequisite: course 1 or Economics 1A or consent of instructor. Models, data and assumptions behind competing arguments regarding societal response to the prospect of climate change at the state, national and international level from economic, ethical and policy science perspectives.—S. (S.) Springborn

**166N. Ocean and Coastal Policy (3)**

Lecture—3 hours. Prerequisite: course 1 or consent of instructor. Limited enrollment. Overview of U.S. and International ocean and coastal policy, including energy, coastal land-use and water quality, protected areas and species. Offered in alternate years. GE credit: SocSci | SS.—(W.) Sanchirico

**167. Energy Policy (4)**

Lecture—4 hours; term paper. Prerequisite: Economics 1A and Mathematics 16B or 17B or 21B, or consent of instructor. Survey of primary energy resources (fossil, renewable, nuclear), energy conversion methods, future energy demand scenarios, and environmental impacts of energy. Overview of energy policy in the U.S. Analysis of policy alternatives for addressing energy-related environmental and national security issues. Offered in alternate years. GE credit: SocSci | SS.—S. (S.) Ogden

**168A. Methods of Environmental Policy Evaluation (5)**

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: Statistics 13; Economics 100 or Agricultural and Resource Economics 100A; Mathematics 16B or 17B or 21B; course 1; upper division standing. Evaluation of alternatives for solution of complex environmental problems; impact analysis, benefit-cost analysis, distributional analysis, decision making under uncertainty, and multi-objective evaluation. GE credit: SocSci | SS.—F. (F.) Ogden

**168B. Methods of Environmental Policy Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 168A. Continuation of course 168A, with emphasis on examination of the literature for applications of research and evaluation techniques to problems of transportation, air and water pollution, land use, and energy policy. Students will apply the methods and concepts by means of a major project. GE credit: SocSci | SS.—S. (S.) Sanchirico

**169. Water Policy and Politics (3)**

Lecture—3 hours. Prerequisite: Economics 1A or Political Science 1 recommended. The governance of water, including issues of water pollution/quality and water supply. The politics of water decision-making and effectiveness of water policy. Broad focus on federal water policy, with case examples from nationally significant U.S. watersheds. Offered in alternate years. GE credit: SocSci | SS.—S. (S.) Lubell

**(f) Environmental Planning****170. Conservation Biology Policy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in environmental science (e.g., course 1), conservation (e.g., Wildlife, Fish, and Conservation Biology 11 or 154), or government (e.g., Political Science 1) recommended. Analysis of policies designed to conserve species and their habitats. Emphasis on how individual incentives affect the success of conservation policies. Valuation of endangered species and biodiversity. Criteria for deciding conservation priorities. Offered in alternate years. GE credit: SciEng or SocSci | SE or SS.—S. (S.) Schwartz

**171. Urban and Regional Planning (4)**

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: course 1 recommended. How cities plan for growth in ways that minimize environmental harm. Standard city planning tools (general plan, zoning ordinance) and innovative new approaches. Focus on planning requirements and practices in California. Relationships between local, regional, state, and federal policy. GE credit: SocSci | SS, WE.—S. (S.) Handy

**172. Public Lands Management (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A recommended. Investigation of alternative approaches to public lands management by Federal and state agencies. The role each agency's legislation plays in determining the range of resource allocations. GE credit: SocSci | ACGH, SS.—F. (F.) Lubell

**173. Land Use and Growth Controls (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing; one course in environmental policy. Exposes students to the economic, political, and legal factors affecting land use and growth controls, and helps students critically evaluate written materials in terms of their arguments and supporting data. GE credit: SocSci | SS.—Su. (Su.) Loux

**175. Natural Resource Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural and Resource Economics 100B or Economics 100 or the equivalent. Economic concepts and policy issues associated with natural resources, renewable resources (ground water, forests, fisheries, and wildlife populations) and non-renewable resources (minerals and energy resources, soil). (Same course as Agricultural and Resource Economics 175.) GE credit: SocSci | SS.—S. (S.) Lin

**178. Applied Research Methods (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural & Resource Economics 106 or Sociology 106 or Statistics 100 or 103 or 108 or the equivalent. Research methods for analysis of urban and regional land use, transportation, and environmental problems. Survey research and other data collection techniques; demographic analysis; basic forecasting, air quality, and transportation models. Collection, interpretation, and critical evaluation of data. GE credit: SocSci | QL, SS.—W. (W.)

**179. Environmental Impact Assessment (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or the equivalent. Introduction to the information resources and methods typically used in environmental impact analysis. Emphasis on how environmental information is applied to planning, environmental regulation, and public policymaking, with case studies from California land use and natural resource policy. GE credit: SocSci | SS.—W. (W.)

**179L. Environmental Impact Reporting Using Geographic Information (2)**

Laboratory/discussion—2 hours; laboratory—4 hours. Prerequisite: course 179 concurrently. Introduction to Geographic Information Systems (GIS) by using ArcView for assessment and environmental planning. Not open for credit to students who have completed Applied Biological Systems Technology 180, 181 or Agricultural Systems and Environment 132. GE credit: SciEng | SE.

**(g) Other Courses****190. Workshops on Environmental Problems (1-8)**

Laboratory—2-16 hours. Prerequisite: consent of instructor. Workshops featuring empirical analyses of contemporary environmental problems by multidisciplinary student teams. Guided by faculty and lay professionals, the teams seek to develop an integrated view of a problem and outline a series of alternative solutions. Open to all upper division and graduate students on application. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

### **191A. Workshop on Food System Sustainability (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: upper-division standing; Plant Sciences 15, Community and Regional Development 20, Agricultural and Resource Economics 121, Plant Sciences 150 or consent of the instructor. Priority enrollment for seniors in the sustainable agriculture and food systems major; limited to 25 students per section. First in a two-quarter senior capstone course sequence. Identify projects addressing specific problems and opportunities of sustainable agriculture and food systems, form multidisciplinary teams, and identify and consult with key stakeholders to understand their needs and concerns. GE credit: SciEng | SE.—F. (F.) Tomich

### **191B. Workshop on Food System Sustainability (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 191A. Priority enrollment for seniors in the sustainable agriculture and food systems major; limited to 25 students per section. Continuation of course 191A. Student teams conduct analyses of a specific issue in sustainable agriculture or food systems, prepare a critical assessment of technological, economic, environmental, and social dimensions of options for action and present their results to stakeholders. GE credit: SciEng | SE.—W. (W.) Tomich

### **192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.)—F, W, S. (F, W, S.)

### **197T. Tutoring in Environmental Science and Policy (1-5)**

Tutorial—2-6 hours. Prerequisite: upper division standing and consent of instructor. Experience in teaching under guidance of faculty member. (P/NP grading only.)—F, W, S. (F, W, S.)

### **198. Directed Group Study (1-5)**

(P/NP grading only.)—F, W, S. (F, W, S.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

### **Graduate**

#### **212A. Environmental Policy Process (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course in public policy (e.g., Environmental Science and Policy 160); environmental law (e.g., Environmental Science and Policy 161); course in bureaucratic theory (e.g., Political Science 187 or Environmental Science and Policy 166); course in statistics (e.g., Sociology 106 or Agricultural and Resource Economics 106). Introduction to selected topics in the policy process, applications to the field of environmental policy. Develops critical reading skills, understanding of frameworks of the policy process and political behavior, and an ability to apply multiple frameworks to the same phenomena. Offered in alternate years. (Same course as Ecology 212A.)—S. Arnold

#### **212B. Environmental Policy Evaluation (4)**

Lecture—1 hour; discussion—1 hour; seminar—2 hours. Prerequisite: intermediate microeconomics (e.g., Economics 100); Statistics 108 or Agricultural and Resource Economics 106; policy analysis (e.g., Environmental Science and Policy 168A or the equivalent); Agricultural and Resource Economics 176. Methods and practices of policy analysis; philosophical and intellectual bases of policy analysis and the political role of policy analysis. (Same course as Ecology 212B.) Offered in alternate years.—(S) Springborn

#### **220. Tropical Ecology (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: advanced introductory ecology course—course 100, Evolution and Ecology 101, 117; Evolution and Ecology 138 recommended. Open to graduate and undergraduate students who meet requirement

subject to consent of instructor. An overview of present status of knowledge on structure and processes of major tropical ecosystems. Differences and similarities among tropical and temperate systems stressed. Offered in alternate years.—(S.) Rejmanova

#### **228. Advanced Simulation Modeling (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: courses 128-128L; Statistics 108 or Agricultural and Resource Economics 106. Advanced techniques in simulation modeling; optimization and simulation, dynamic parameter estimation, linear models, error propagation, and sensitivity testing. Latter half of course will introduce model evaluation in ecological and social system models.

#### **252. Sustainable Transportation Technology and Policy (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 160 or the equivalent. Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as Civil and Environmental Engineering 252.)—S. Sperling

#### **275. Economic Analysis of Resource and Environmental Policies (4)**

Lecture/discussion—4 hours. Prerequisite: Agricultural and Resource Economics 204/Economics 204. Development of externality theory, market failure concepts, welfare economics, theory of renewable and non-renewable resource use, and political economic models. Applications to policy issues regarding the agricultural/environment interface and managing resources in the public domain. (Same course as Agricultural and Resource Economics 275.)—S. (S.)

#### **278. Research Methods in Environmental Policy (3)**

Lecture/discussion—3 hours. Prerequisite: Agricultural and Resource Economics 106 or the equivalent. Introduction to scientific research in environmental policy. Major issues in the philosophy of the social sciences. How to design research that acknowledges theoretical assumptions and that is likely to produce evidence in an intersubjectively reliable fashion with explicit recognition of its uncertainties.

#### **298. Directed Group Study (1-5)**

#### **299. Research (1-12)**

Prerequisite: graduate standing. (S/U grading only.)

## **Environmental Sciences**

See **Atmospheric Science, on page 184; Environmental and Resource Sciences, on page 323; Environmental Horticulture and Urban Forestry, on page 324; Environmental Policy Analysis and Planning, on page 324; Environmental Toxicology, on page 330; Hydrology, on page 376; Landscape Architecture, on page 392; and Wildlife, Fish, and Conservation Biology, on page 587.**

Arthur Craigmill, Ph.D., Specialist in Cooperative Extension, Emeritus

Donald G. Crosby, Ph.D., Professor Emeritus

Dennis P. H. Hsieh, Sc.D., Professor Emeritus

James N. Seiber, Ph.D., Professor Emeritus

Michael W. Stimmann, Ph.D., Specialist in Cooperative Extension, Emeritus

Dorothy E. Woolley, Ph.D., Professor Emeritus

### **Affiliated Faculty**

Beck, John, Ph.D., Associate Adjunct Professor

Deborah Bennett, Ph.D., Associate Professor  
*(Public Health Sciences, School of Medicine)*

Cassandra Calloway, Ph.D., Assistant Adjunct Professor

Matt Hengel, Ph.D., Associate Adjunct Professor

Dirk Holstege, Ph.D., Associate Adjunct Professor

Norman Kado, Ph.D., Adjunct Professor

John Knezovich, Ph.D., Adjunct Professor

Charlie Li, Ph.D., Assistant Adjunct Professor

Melanie Marty, Ph.D., Associate Adjunct Professor

Alyon E. Mitchell, Ph.D., Professor  
*(Food Science and Technology)*

Karen Riveles, Ph.D., MPH, Assistant Adjunct Professor

Jeff Rodzen, Ph.D., Lecturer

*(UC Davis Extension Forensic Science Program)*

Cecilia Von Beroldingen, Ph.D., Lecturer

*(UC Davis Extension Forensic Science Program and Department of Justice)*

Zachary A. Wong, Ph.D., Adjunct Professor

### **The Major Program**

Toxic agents in the environment include pesticides, food additives, industrial waste, and metals as well as chemicals produced by animals, plants, fungi and bacteria. Students in the Environmental Toxicology major learn how toxicants produce adverse effects by understanding their environmental fates and biological activities. They learn about monitoring concentrations and the distribution and persistence of agents found in water, soil, air and foods. Toxicity testing procedures and exposure assessments are used to help evaluate potential for harm to humans and other species. By understanding the cellular targets and biochemical mechanisms of perturbation by toxicants, toxicologists can better estimate adverse effects. Overall, students learn mechanisms by which toxic agents act, their origin and fate and how toxicologists evaluate the risk of adverse effects and balance them against the benefits of us.

**The Program.** Preparatory courses in biology, chemistry, mathematics, and physics are required to provide fundamental principles that underlie toxicology. Students in the major are expected to understand the environmental fates and biological activities of different classes of toxic substances, and

the legislative issues that arise from chemical use. Opportunities are available to develop in-depth understanding in areas of emphasis through selection of electives.

**Emphases.** Elective course work in many disciplines can complement the required core courses. Providing a framework for selecting restricted electives, the major offers specializations in (1) Ecotoxicology and Environmental Chemistry, (2) Forensic Science and Regulatory Toxicology, and (3) Molecular and Biomedical Toxicology. The first category includes topics in chemical fate, transport and degradation, as well as ecology, wildlife, and aquatic toxicology. The second category includes forensic science, environmental policy and management, and public health. The third category includes pharmacology, biotechnology, medicine, veterinary medicine, and food toxicology. Students are encouraged to select course work from these Emphases and beyond to match their interests.

**Internships and Career Alternatives.** Occupations that use environmental toxicology include risk assessment, pharmaceutical development, food additive toxicity testing, managing regulatory compliance, residue or forensic analysis, pest control, monitoring and field sampling, industrial hygiene, and environmental health and safety. A substantial proportion of graduates elect to pursue advanced training in graduate or professional schools. Others with the B.S. degree have gone on to law, medical, pharmacy, or veterinary medical school, as well as to graduate programs in pharmacology, toxicology, agricultural and environmental chemistry, or public health. During undergraduate study, optional internships or research projects are recommended to provide training and work experience to help students pursue future goals.

### B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter ..... 72-73

Biological Sciences 2A, 2B, 2C .....	14-15
Chemistry 2A-2B-2C or 2AH-2BH-2CH, and 118A-118B-118C or 128A-128B-128C, 129A.....	26-27
Mathematics 17A-17B-17C or 21A-21B-21C .....	12
Physics 7A-7B-7C .....	12
Statistics 100, 102, 103, 104, 106, or 108 .....	4
Upper Division Writing; University Writing Program 101 or 104 (AI) .....	4

Preferably, the course should be taken prior to enrollment in Environmental Toxicology 102B and 103B.

Satisfaction of the General Education requirement to include courses selected with adviser's approval to complement the major; courses in agricultural economics, environmental studies, political science, psychology, and sociology are particularly recommended.

#### Depth Subject Matter ..... 37-47

Biological Sciences 101 and 102 or 102 and 103 .....	6-7
Environmental Toxicology 101, 102A-102B, 103A-103B and three upper division Environmental Toxicology classes chosen from the following list: 104, 120, 127, 128, 130, 131, 135, 138, and 146 .....	31-40

#### Restricted Electives ..... 24-26

Electives selected for area of Emphasis with faculty adviser's approval with 6 unit combined maximum of 190, 192, 198, and 199 with adviser approval; see department website for details.

#### Total Units for the Major ..... 133-146

**Major Adviser.** Matthew Wood

**Advising Center** for the major is in 4111 Meyer Hall. Contact the Academic Program Adviser at 530-752-1042.

### Minor Program Requirements:

UNITS

#### Environmental Toxicology ..... 18-26

Environmental Toxicology 101, 102A, 103A .....	12
Completion of two upper division Environmental Toxicology elective courses six units minimum, selected from the following list: Environmental Toxicology 104, 120, 127, 128, 130, 131, 135, 138, and 146 .....	6-14

**Minor Adviser.** Qi Zhang

**Graduate Study.** Programs of study leading to M.S. and Ph.D. degrees are available through related Graduate Groups such as Pharmacology and Toxicology; Biochemistry, Molecular, Cellular, and Developmental Biology; Agricultural and Environmental Chemistry; and the Forensic Science Master's Degree Program. For information on graduate study, contact the Advising Office or the appropriate graduate adviser.

### Courses in Environmental Toxicology (ETX)

#### Lower Division

##### 10. Introduction to Environmental Toxicology (3)

Lecture—3 hours. Hazardous substances, their effects on humans and their actions and movement in the environment. Emphasis on substances of current concern. GE credit: SciEng | SE, SL.—F. (F.) La Merrill, Tjeerdema

##### 20. Introduction to Forensic Science (3)

Lecture—3 hours. Basic principles of forensic science, types of information on which investigations focus, how information is obtained and used in criminal investigations, types of scientific skills required to practice forensic science, guidance on training. Real cases discussed; demonstrations of methods provided. GE credit: SciEng, Wrt | SE, SL, VL.—W. (W.) Wood

##### 30. Chemical and Drug Use and Abuse (3)

Lecture—3 hours. An overview of chemical use and abuse in our society. The effects of chemicals (therapeutic drugs, pesticides, food additives, herbal remedies, environmental contaminants, and recreational drugs) on humans and other living systems. GE credit: SciEng | SE.—S. (S.) Wood

##### 92. Internship (1-12)

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.) GE credit: SE.

##### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.

#### Upper Division

##### 101. Principles of Environmental Toxicology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 8B, 118B, or 128B and Biological Sciences 1A. Principles of toxicology with a focus on environmental, industrial, and natural chemicals. Topics include fate and effects of chemicals in organisms and the environment, air pollutants, insecticides, aquatic toxicology, endocrine disruptors, biomarkers and bioassays, and risk assessment. GE credit: SciEng | SE, SL.—F. (F.) Denison

##### 102A. Environmental Fate of Toxicants (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 8B, 118B, 128B or consent of instructor. Properties of toxic chemicals influencing their distribution and transformations; action of environmental forces affecting toxicant breakdown, movement, and accumulation; sources and occurrence of major classes of environmental toxicants. Not open for

credit to students who have completed course 112A. GE credit: SciEng | QL, SE, SL, VL, WE.—W. (W.) Tjeerdema

##### 102B. Quantitative Analysis of Environmental Toxicants (5)

Lecture—3 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 102A. Sample preparation methods for trace analysis of environmental toxicants. Concept and techniques of advanced analytical instrumentation. Interpretation and use of analytical data. Not open for credit to students who have completed course 112B. GE credit: SciEng | SE, VL.—S. (S.) Hengel, Shibamoto

##### 103A. Biological Effects of Toxicants (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 102; course 101 and Neurobiology, Physiology, and Behavior 101 recommended. Biological effects of toxic substances in living organisms. Metabolism, cellular and tissue targets, mechanisms of action, and pathological effects. Not open for credit to students who have completed course 114A. GE credit: SciEng | SE.—W. (W.) La Merrill

##### 103B. Biological Effects of Toxicants: Experimental Approaches (5)

Lecture—3 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 103A. Experimental approaches for assessing the biological effects of toxicants. Not open for credit to students who have completed course 114B. GE credit: SciEng | SE, VL, WE.—S. (S.) Wood

##### 104. Environmental and Nutritional Factors in Cellular Regulation and Nutritional Toxicants (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 101; Biological Sciences 103 or Animal Biology 103. Cellular regulation from nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction pathways, role of specific organelles in organization/regulation of metabolic transformations, major cofactor functions, principles of pharmacology/toxicology important to understanding nutrient/toxicant metabolism. (Same course as Nutrition 104.) GE credit: SciEng | OL, SE, SL.—F. (F.) Haj, Oteiza

##### 110. Toxic Tragedies and Their Impact on Society (2)

Lecture—2 hours. Prerequisite: Biological Sciences 10 or the equivalent or consent of instructor; Chemistry 118A recommended. Examination of toxic tragedies, their origins, consequences, and effects on toxic regulation. GE credit: SciEng, Wrt | OL, SE, SL, WE.—W. (W.) Rice

##### 111. Introduction to Mass Spectrometry (3)

Lecture—3 hours. Prerequisite: Chemistry 118C. Introduction to mass spectrometry, including ionization techniques, mass analyzers, interpretation of mass spectra, and applications of mass spectrometry. Emphasis on fundamental concepts of mass spectrometry necessary to identify and quantify organic molecules. GE credit: SciEng | SE.

##### 120. Perspectives in Aquatic Toxicology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 8B, 118B or 128B, Biological Sciences 1A, or consent of instructor. Toxic substances, their fate in marine and freshwater systems, and their effects on aquatic organisms, populations, and ecosystems. Emphasis on substances and issues of current concern. Offered in alternate years. GE credit: SciEng | OL, SE, SL, VL, WE.—W. Cherr, Tjeerdema, Whitehead

##### 127. Environmental Stress and Development in Marine Organisms (10)

Lecture—4 hours; laboratory—12 hours; discussion—2 hours. Prerequisite: course 101 or Biological Sciences 102 or 104 or the equivalent; course 114A or Nutrition 114 recommended. Course taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods. (Same course as Nutrition 127.) GE credit: SciEng | OL, QL, SE, SL, VL, WE.—S. Cherr

**128. Food Toxicology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 102 and 103. Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards. (Same course as Food Science and Technology 128.) GE credit: SciEng | SE.—S. (S.) Gaikwad, Mitchell

**130. The Role and Applications of Toxicology in Modern Industry (3)**

Lecture—3 hours. Prerequisite: course 101 required; course 103A recommended. Role of toxicology in industry research and development, human health and environmental protection, hazard and risk evaluations, risk management and communications, product stewardship, and regulatory compliance. Scientific principles and methods of toxicology in chemical, energy, pharmaceutical, pesticide, biotechnology industries. GE credit: SciEng | OL, SE, SL, VL, WE.—F. (F.) Wong

**131. Environmental Toxicology of Air Pollutants (3)**

Lecture—3 hours. Prerequisite: Chemistry 8B (may be taken concurrently) or the equivalent; Biological Sciences 102 recommended. Field trip required. Toxicology of air pollutants in the ambient, indoor, and occupational environments. Health effects, sources, environmental fates, pulmonary responses, sampling and analyses, and air-quality criteria and standards. GE credit: SciEng | SE, VL.—F. (F.) Kado

**135. Health Risk Assessment of Toxicants (3)**

Lecture—3 hours. Prerequisite: course 101; course 114A recommended. Current practices of health risk assessment of environmental chemicals using toxicological principles and their application to regulatory control of these chemicals. GE credit: SciEng | QL, SE, SL, VL.—F. (F.) Marty

**138. Legal Aspects of Environmental Toxicology (3)**

Lecture—3 hours. Prerequisite: course 10 or 101 recommended. Federal and California legislation concerning air and water pollution, pesticide use, food and feed additives, consumer protection, and occupational exposure to toxic substances; roles of federal regulatory agencies; alternatives to government control. GE credit: SciEng | SE, VL, WE.—W. (W.) Riveles

**140. Genes and the Environment (3)**

Lecture/discussion—3 hours. Prerequisite: Biological Science 101 required or permission of instructor; coursework in genetics and molecular biology and/or environmental toxicology recommended. Evaluation of evidence that human health and disease susceptibility result from complex interactions between genes and the environment. Emphasis on cancer, metabolic, cardiovascular, and neurological health outcomes assessed by genotoxicity and toxicogenomic methods. Offered in alternate years.—F. (F.) La Merrill

**146. Exposure and Dose Assessment (3)**

Lecture—3 hours. Prerequisite: course 112A; course 135 recommended. The exposure component of risk assessment; specifically, the presence and/or formation of toxic substances in environmental media, their movement within and between contaminated media, and the contacts of human populations with those media. Offered in alternate years. GE credit: SciEng | QL, SE, SL, VL.—S. (S.) Bennett

**190. Seminar (1)**

Seminar—1 hour. Prerequisite: consent of instructor. Selected topics presented by students, faculty, or outside speakers covering current research and instructional activities within environmental toxicology. Reports and discussion concerning oral and written presentations, literature sources, and career opportunities. (P/NP grading only.) GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**190C. Research Group Conference (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Weekly conference of advanced research methods and the interpretation of research results. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**190S. Environmental Toxicology Career Seminar (1)**

Seminar—1 hour. Careers in environmental toxicology; discussions with graduates from the Department of Environmental Toxicology and other experts in the field. (P/NP grading only.) GE credit: SE.—F. (F.)

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.) GE credit: SE.

**194HA. Honors Research (3)**

Discussion—1 hour; laboratory—6 hours. Prerequisite: senior standing; minimum GPA of 3.250; consent of instructor. Specific research project conducted under the supervision of a faculty sponsor. Experience to include experimental design, learning new techniques, data analysis and interpretation of findings. (P/NP grading only; deferred grading pending completion of sequence.) GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**194HB. Honors Research (3)**

Discussion—1 hour; laboratory—6 hours. Prerequisite: senior standing; minimum GPA of 3.250; consent of instructor. Specific research project conducted under the supervision of a faculty sponsor. Experience to include experimental design, learning new techniques, data analysis and interpretation of findings. (P/NP grading only; deferred grading pending completion of sequence.) GE credit: SE.—F, W, S. (F, W, S.)

**194HC. Honors Research (3)**

Laboratory—6-9 hours; discussion—1 hour. Prerequisite: senior standing; minimum GPA of 3.250; and consent of instructor. Continuation of course 194HA-194HB. (P/NP grading only.) GE credit: SE.

**197T. Tutoring in Environmental Toxicology (1-5)**

Hours and duties will vary depending upon course being tutored. Prerequisite: advanced standing in Environmental Toxicology, a related major, or the equivalent experience and consent of instructor. Teaching toxicology including conducting discussion groups for regular departmental courses under direct guidance of staff. May be repeated for credit up to a total of 5 units. (P/NP grading only.) GE credit: SE.

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.) GE credit: SE.

**Graduate****203. Environmental Toxicants (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 128C (or the equivalent), or Chemistry 8B and consent of instructor. Toxic chemicals: selected topics illustrating their occurrence, structure, and the reactions underlying detection, toxicity, fate, and ecological importance. Offered in alternate years.—S. Beck, Seiber

**214. Mechanisms of Toxic Action (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 102, 103, and consent of instructor. Chemical, biochemical, and molecular mechanisms underlying the adverse effects of toxic chemicals. Students are required to write a grant proposal and participate in a grant review panel. Offered in alternate years.—S. Denison, Hammock

**220. Analysis of Toxicants (3)**

Lecture—3 hours. Prerequisite: coursework in organic chemistry. Principles of microanalysis of toxicants. Theoretical considerations regarding separation, detection and quantitative determination of toxicants using chemical and instrumental techniques. (Same course as Forensic Science 220.)—F. (F.) Zhang

**220L. Analysis of Toxicants Laboratory (2)**

Laboratory—6 hours. Prerequisite: course 220 (may be taken concurrently) and consent of instructor. Laboratory techniques for microanalysis of toxicants. Separation, detection, and quantitative determination of toxicants using chemical and instrumental methods.—F. (F.) Zhang

**228. Gas Chromatography/Mass Spectrometry of Toxic Chemicals (3)**

Lecture—1 hour; discussion—1 hour; laboratory—3 hours. Prerequisite: course 220 and Chemistry 129C; or consent of instructor. Application of GC/MS techniques to investigate toxic chemicals. Mass spectral fragmentations and their application to the structural elucidation. Practical application of GC/MS in current research. Preference given to environmental toxicology graduate students. Offered in alternate years.—(W.) Holstege

**234. Current Topics in Neurotoxicology (3)**

Lecture—3 hours. Prerequisite: core courses in one of the following graduate programs: Pharmacology and Toxicology, Agricultural and Environmental Chemistry, Biochemistry and Molecular Biology, Cell and Developmental Biology, Immunology, Molecular Cellular and Integrative Physiology or Neuroscience. Restricted to upper level undergraduate students must obtain permission from the course coordinator. General principles of neurotoxicology, the cell and molecular mechanisms and health impacts of specific neurotoxicants and the contribution of neurotoxic compounds to complex neurodevelopmental disorders and neurodegenerative diseases. (Same course as Molecular Biosciences 234 and Molecular, Cellular, and Integrative Physiology 234.)—S. (S.) Lein

**240. Ecotoxicology (3)**

Lecture—3 hours. Prerequisite: elementary course in toxicology and ecology or the equivalent, or consent of instructor. Principles of toxicology as applied to chemical action on natural populations, communities, and ecosystems. Physical, chemical, and biological characteristics which influence ecotoxic effects, modeling, and field research. Selected case histories are analyzed and presented in class.—S. (S.) Whitehead

**250. Reproductive Toxicology (3)**

Lecture—1.5 hours; lecture/discussion—1.5 hours. Prerequisite: Physiology 220 or Pharmacology—Toxicology 203. Application of toxicological principles in reproductive studies. Effects of toxicants on the male, female, and developing embryo/fetus. Critical evaluation of reproductive toxicity studies and development of mechanistic approaches to understanding how chemical exposure can adversely affect reproduction. Offered in alternate years.

**260. Immunotoxicology (3)**

Lecture—3 hours. Prerequisite: undergraduate or graduate introduction to immunology coursework recommended, but not required; graduate standing or consent of instructor. Provides students with skills and knowledge for evaluating and applying research on the impact of environmental toxicants on immunological function in human and wildlife populations. Offered in alternate years.

**270. Toxicology of Pesticides (3)**

Lecture—3 hours. Prerequisite: one course each in (a) Organic Chemistry, (b) Biochemistry, (c) Toxicology (course 101 or equivalent), or consent of instructor; graduate standing. Classification and chemical properties of pesticides, their mode of action, metabolism and disposition, pesticide resistance, effects on human health and ecological health and methods of risk benefit analyses. Offered in alternate years.

**278. Molecular Techniques (3)**

Lecture—3 hours. Prerequisite: graduate standing or consent of instructor. Recombinant DNA technology and its applications. (Same course as Forensic Science 278.) Offered in alternate years.—(F.) Denison, Rice

**280. Forensic DNA Analysis (3)**

Lecture—3 hours. Prerequisite: coursework in genetics and molecular biology. Graduate standing; consent of instructor required for all students not enrolled

in the MS Forensics program. Foundation in theory and practice of forensic DNA analysis; past, present, and emerging technologies; legal and quality assurance issues. DNA extraction, DNA quantitation, multiplex amplification of STR loci, capillary electrophoresis of amplified products, and analysis of STR typing data. (Same course as Forensic Science 280.) —W. (W.) Von Beroldingen

### **281. Principles and Practice of Forensic Serology and DNA Analysis (3)**

Lecture—2 hours; lecture/discussion—3 hours. Prerequisite: Forensics/course 278 or Forensics/course 280, or equivalent; consent of instructor. Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of Forensic Science Program Director. Comprehensive overview of forensic serology and DNA typing techniques and technologies. Strong emphasis on real-world applications, including preservation and tracking of biological evidence, detection and identification of bodily fluids, and methods to extract, quantify, and type human DNA. (Same course as Forensic Science 281.) —S. (S.) Rodzen

### **284. Non-Human Forensic DNA—Theory and Casework Application (2)**

Lecture—2 hours. Prerequisite: consent of instructor required for all students not enrolled in the MS Forensics program; upper division Molecular Biology and Genetics or its equivalent. Restricted to graduate standing. Provides a comprehensive understanding of plant and animal forensic biology in terms of sample collection, preservation, analytical methods, and of the invaluable lines of inquiry these forensic evidence may permit. (Same course as Forensic Science 284.) Offered in alternate years.

### **290. Seminar (1)**

Seminar—1 hour. Current topics in environmental toxicology. (S/U grading only.) —F, W, S. (F, W, S.)

### **290C. Advanced Research Conference (1)**

Lecture/discussion—1 hour. Prerequisite: consent of instructor. Presentation and critical discussion of advanced research methods and interpretation of research results. Designed primarily for graduate students. (S/U grading only.) —F, W, S. (F, W, S.)

### **297T. Tutoring in Environmental Toxicology (1-5)**

Hours and duties will vary depending upon course being tutored. Prerequisite: graduate standing in Environmental Toxicology, a related major, or the equivalent experience, and consent of instructor. Teaching toxicology including conducting discussion groups for regular departmental courses under direct guidance of staff. May be repeated for credit up to a total of 5 units. (S/U grading only.)

### **298. Group Study (1-5)**

### **299. Research (1-12)**

(S/U grading only.)

### **Professional**

### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) —F, W, S. (F, W, S.)

## **Epidemiology**

**See Medicine and Epidemiology (VME), on page 582.**

Magdalena Cerda, Dr.P.H., M.P.H. (*Department of Emergency Medicine*)  
Munashe Chigerwe, M.P.H., Ph.D, Assistant Professor (*Medicine and Epidemiology*)  
Bruno Chomel, D.V.M., Ph.D., Professor (*Population Health and Reproduction*)  
Patricia Conrad, D.V.M., Ph.D., Professor (*Pathology, Microbiology, and Immunology*)  
Rosemary Cress, Ph.D., Associate Professor (*Public Health Sciences*)  
Beate Crossley, Ph.D., Associate Professor (*California Animal Health and Food Safety Laboratory*)  
Lorian Dalrymple, M.D., M.P.H., Assistant Professor (*Internal Medicine*)  
Adela de la Torre, Ph.D., Professor, Vice Chancellor Student Affairs (*Chicana and Chicano Studies*)  
Kathryn DeRiemer, Ph.D., Associate Professor (*Public Health Sciences*)  
Roberto De Vogli, M.P.H., Ph.D., Associate Professor (*Department of Public Health Sciences*)  
Kathryn Dewey, Ph.D., Professor (*Nutrition*)  
Christiana Drake, Ph.D., Professor (*Statistics*)  
Jonathan Ducore, M.D., Professor (*Pediatrics*)  
Janet Foley, M.S., D.V.M., Ph.D., Professor (*Medicine and Epidemiology*)  
Lorena Garcia, M.P.H., Dr.P.H., Associate Professor (*Department of Public Health Sciences*)  
Lynette Hart, Ph.D., Professor (*Population Health and Reproduction*)  
Danielle Harvey, Ph.D., Associate Professor (*Public Health Sciences*)  
Irva Hertz-Pannier, Ph.D., Professor (*Public Health Sciences*)  
Ashley Hill, D.V.M., M.P.V.M., Ph.D., Assistant Professor (*California Animal Health and Food Safety Laboratory*)  
Martin Hoffman, M.D., Professor (*Physical Medicine and Rehabilitation*)  
Ana-Maria Iosif, Ph.D., Associate Professor (*Public Health Sciences*)  
Jining Jiang, Ph.D., Professor (*Statistics*)  
Philip Kass, M.P.V.M., D.V.M., Ph.D., Professor (*Population Health and Reproduction*)  
Theresa Keegan, Ph.D., M.S., Associate Professor (*Hematology and Oncology*)  
Kyoungmi Kim, Ph.D., Associate Professor (*Department of Public Health Sciences*)  
Richard L. Kravitz, M.D., Professor (*Internal Medicine*)  
Christine Kreuder-Johnson, Ph.D., Associate Professor (*Wildlife Health Center*)  
Michele A. La Merrill, MPH, Ph.D., Assistant Professor (*Environmental Toxicology*)
- Paul Leigh, Ph.D., Professor (*Department of Public Health Sciences*)  
Chin-Shang Li, Ph.D., Professor (*Department of Public Health Sciences*)  
James Marcin, M.D., M.P.H, Professor (*Pediatrics*)  
Beatriz Martinez Lopez, D.V.M., M.P.V.M., Ph.D., Assistant Professor (*Medicine and Epidemiology*)  
Jonna Mazet, Ph.D., Professor (*Wildlife Health Center*)  
Stephen McCurdy, M.D., Professor (*Department of Public Health Sciences*)  
Joy Melnikow, M.D., M.P.H., Professor (*Family and Community Medicine*)  
Diana L. Miglioretti, Ph.D., Professor (*Public Health Sciences*)  
Alda Pires, D.V.M., M.P.V.M, Ph.D., Assistant Specialist and Lecturer (*Population Health & Reproduction*)  
Nicola Pusterla, D.V.M., Ph.D., Professor (*Medicine and Epidemiology*)  
Lihong Qi, Ph.D., Associate Professor (*Department of Public Health Sciences*)  
David M. Rocke, Ph.D., Professor (*Department of Public Health Sciences*)  
Patrick Romano, M.D., M.P.H., Professor (*Internal Medicine*)  
Joan Dean Rowe, M.P.V.M., D.V.M., Ph.D., Associate Professor (*Population Health and Reproduction*)  
Christian Sandrock, M.D., M.P.H., Associate Professor (*Internal Medicine*)  
Marc Schenker, M.D., Professor (*Public Health Sciences*)  
Woutrina Smith, D.V.M., M.P.V.M., Ph.D., Associate Professor (*Pathology, Microbiology and Immunology*)  
Christine Stewart, M.P.H, Ph.D., Assistant Professor (*Department of Nutrition*)  
Robert Szabo, M.D., Professor (*Orthopedic Surgery*)  
Daniel Tancredi, Ph.D., Assistant Professor (*Pediatrics*)  
Michael Zicardi, Ph.D. (*Wildlife Health Center*)

### **Emeriti Faculty**

- Robert Bondurant, D.V.M., Professor Emeritus  
Kenneth Brown, M.D., Professor Emeritus (*Nutrition*)  
James Case, D.V.M., Ph.D., Professor Emeritus  
Nancy East, M.P.V.M., D.V.M., Professor Emeritus  
Bruce Eldridge, Ph.D., Professor Emeritus  
Thomas B. Farver, Ph.D., Professor Emeritus (*Population Health and Reproduction*)  
Neil Flynn, M.D., M.P.H., Professor Emeritus  
David R. Gibson, Ph.D., Professor (*Public Health Sciences*)  
Ellen Gold, Ph.D., Professor (*Public Health Sciences*)  
Sharon Hietala, Ph.D., Professor Emeritus  
David Hird, D.V.M., M.P.V.M., Ph.D., Professor Emeritus  
Sunny Kim, Ph.D., Associate Professor (*Public Health Sciences*)  
William Reisen, Ph.D., Professor Emeritus (*Center for Vectorborne Disease*)  
John Robbins, M.D., M.H.S., Professor Emeritus  
Thomas Scott, Ph.D., Professor (*Entomology*)  
Robert Shumway, Ph.D., Professor Emeritus  
Mark Thurmond, D.V.M., M.P.V.M., Ph.D., Professor Emeritus  
Alvin Wiggins, Ph.D., Professor Emeritus

**Graduate Study.** The Graduate Group in Epidemiology offers programs of study and research leading to the M.S. and Ph.D. degrees. Areas of emphasis include environmental/occupational epidemiology; infectious disease epidemiology; zoonotic and vector-borne diseases; epidemiologic methods and biostatistics; health services and health economics; nutritional epidemiology; reproductive, perinatal, developmental and pediatric epidemiology; wildlife epidemiology; and social and behavioral epidemiology. For detailed information regarding the program, address the chairperson of the group or see the website.

**Graduate Advisers.** Diana Cassady (*Department of Public Health Sciences*), Janet Foley (*Medicine and Epidemiology*), Lynette Hart (*Population Health*)

and Reproduction), Lihong Qi (Public Health Sciences), and William Reisen (Center for Vectorborne Diseases)

## Required Courses for the Program

**Prerequisite Courses.** Prerequisites may be taken concurrently with required courses below.

Mathematics 16A-16B or 21A-21B  
Statistics 102, 106, and 108, or Preventive Veterinary Medicine 402, 403

**Required Courses.** These courses are required of all students in the program; M.S. and Ph.D. degrees. These requirements cannot be waived and must be met before a student's Qualifying Examination.

Epidemiology 202, 203, 204, 205, 206, 207, 208 and 290

One course from: Population Health and Reproduction 202 or Statistics 144

**Related Courses.** For additional course work in Epidemiology, please see Medicine and Epidemiology, Preventive Veterinary Medicine, Population Health and Reproduction, Public Health Sciences, and Statistics.

## Courses in Epidemiology (EPI)

### Graduate

#### 202. Quantitative Epidemiology I: Probability (5)

Lecture—4 hours; laboratory—2 hours. Prerequisite: Mathematics 16A/B or 17A/B or 21A/B or equivalent; Statistics 102 and 108 or Population Health and Reproduction 402 and 403 or equivalent; concurrent or previous enrollment in a basic epidemiology course (e.g., course 205). Foundations in probability for epidemiologists. Emphasis on properties of and relationships between distributions and application of probability concepts to epidemiology. Includes a mathematical skills laboratory to assist in solution of epidemiologic problems.

#### 203. Quantitative Epidemiology II: Statistical Inference (4)

Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: course 202, or Statistics 130A, or 131A, or 133; basic course in Epidemiology (205 or equivalent). Provides the mathematical statistics foundation for statistical models, methods, and data analysis.

#### 204. Quantitative Epidemiology III: Statistical Models (4)

Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: course 203, or Statistics 130B, or 131B, or 133; Statistics 108 recommended; basic course in Epidemiology (205 or equivalent); consent of instructor. Introduces statistical models, methods, and data analysis in the areas of generalized linear model and survival analysis methodology.

#### 204A. Foundation of Statistical Models, Methods, and Data Analysis for Scientists (4)

Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: Statistics 130A, or Statistics 131A, or Statistics 133, course 228 recommended. Provides the mathematical statistics foundation for statistical models, methods, and data analysis. —W. (W.) Bang

#### 204B. Statistical Models, Methods, and Data Analysis for Scientists (4)

Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: course 204A; Statistics 108 recommended. Introduces statistical models, methods, and data analysis in the areas of generalized linear, survival, and correlated data methodology. —S. (S.) Li

#### 205. Principles of Epidemiology (4)

Lecture—4 hours. Prerequisite: Preventive Veterinary Medicine 202, an introductory statistics course, or consent of the instructor. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduc-

tion to epidemiologic study design and surveillance. (Same course as Preventive Veterinary Medicine 205.) —F. (F.)

#### 205A. Principles of Epidemiology (4)

Lecture—4 hours. Prerequisite: Preventive Veterinary Medicine 402 or consent of instructor. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance. (Same course as Preventive Veterinary Medicine 405.)

#### 205B. Integration of Epidemiologic Concepts (2)

Discussion—2 hours. Prerequisite: Preventive Veterinary Medicine 405/course 205A can be taken concurrently. In-depth analysis and integration of basic epidemiologic concepts and approaches to epidemiologic research presented in Preventive Veterinary Medicine 405/course 205A, with more mathematical and theoretical basis and examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of diagnostic tests, study design, and surveillance. —F. (F.)

#### 206. Epidemiologic Study Design (4)

Lecture—30 sessions; discussion—9 sessions; laboratory—2 sessions. Prerequisite: course 205 or consent of instructor. Builds on concepts presented in course 205. Concepts of epidemiologic study design—clinical trials, observational cohort studies, case control studies—introduced in course 205A are covered in more depth, using a problem-based format. Discussion of published epidemiologic studies. (Same course as Preventive Veterinary Medicine 206.)

#### 207. Advanced Epidemiologic Methodology (4)

Lecture/discussion—4 hours. Prerequisite: course 206. In-depth integration of advanced epidemiological concepts. Theory, methods, and applications for observational studies including random and systematic error, confounding, counterfactuals, causal inference, effect modification, internal and external validity, estimability, and interpretation of effect measures, and advanced study designs. (Same course as Public Health Sciences 207.) —S. (S.) Hertz-Pannier

#### 208. Analysis and Interpretation of Epidemiologic Data (3)

Lecture—16 sessions; laboratory—21 sessions; project. Prerequisite: course 204 (may be taken concurrently) and 207, and either Statistics 144 or Population Health and Reproduction 202 and entry level skill in standard statistical software (e.g., SPSS, BMDP, SAS, Stata, MinTab, S-Plus). Application of theory and concepts of statistics and epidemiology to analysis and interpretation of data typically found in veterinary and human epidemiologic research. —F. (F.) Beckett

#### 209. History of Epidemiology in Public Health (2)

Lecture—0.5 hours; discussion—1.5 hours. Introduction to the history of epidemiology in solving major public health problems. Original historical articles will be read/discussed. Topics may include: infectious disease, accidents/adverse events, nutritional deficiencies, community vaccination trials, occupational exposures, cancer, birth defects, cardiovascular disease, and smoking. (Same course as Public Health Sciences 209.) —W. (W.) Hertz-Pannier

#### 220. Problems in Epidemiologic Study Design (4)

Lecture—3 hours; term paper. Prerequisite: Preventive Veterinary Medicine 405 and 406 or the equivalent; Population Health and Reproduction 207 concurrently; Statistics 102 and 106 or the equivalent. Design and development of research protocols and funding applications for peer review. Application of research methods data collection and management and statistical analysis in research

proposals. Methods of evaluating research proposals, mechanisms of funding, specifying human subjects considerations. —S. (S.)

#### 222. Epidemiological Modeling (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Preventive Veterinary Medicine 405. Techniques of model building and simulation of infectious diseases will be explored. Epidemiologic modeling philosophy, construction and validation will be emphasized. Offered in alternate years. —W.

#### 223. Spatial Epidemiology (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 205A or Preventive Veterinary Medicine 205. Geographic Information Systems (GIS) and spatial statistics. Students are expected to complete a term project based on their graduate research. Offered in alternate years. —W. (W.)

#### 224. Health and Ecological Risk Analysis (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Preventive Veterinary Medicine 406 or consent of instructor; background in statistics, including multivariable techniques; a course in differential equations. A methodological approach to risk analysis for human and animal-related health and ecological issues. Basic principles of risk analysis, including perception, communication, assessment and management. Emphasis on the assessment of risk. —S. (S.)

#### 225. Advanced Topics in Epidemiology Methods (2)

Discussion—2 hours. Prerequisite: courses 205B, 206, and 207 (or equivalents, with consent of instructor). An in-depth study of topics in epidemiology theory and methods, selected from: causal inference, confounding, study design, or other related areas, with year to year variation. Readings are assigned and students are expected to lead discussions on them. May be repeated for credit when topic differs. Offered irregularly. —S. Hertz-Pannier

#### 226. Methods for Longitudinal and Repeated Measurement Data (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: course 204 or consent of instructor. Mixed models for longitudinal data (LD)/repeated measurements; Mean and covariance models; General linear LD models; Random coefficients models; Linear mixed effects models for continuous outcome; Generalized linear mixed effects model for discrete outcome including binary, ordinal and count data. —F. (F.) Nguyen

#### 229. Geographic Information Systems for Health Professionals (4)

Lecture—2 hours; laboratory—6 hours. Emphasis on basic geographic and data management principles. Focus on software proficiency in application to analyzing/solving health-related problems. For graduate and professional students in epidemiology, public health, preventive veterinary medicine, health informatics with interest in spatial techniques in research. —S. (S.)

#### 230. Introduction to Molecular Epidemiology (3)

Lecture/discussion—3 hours. Prerequisite: course 205. Overview of the modern field of molecular epidemiology. Integrates molecular biology into traditional epidemiologic research by identifying pathways, molecules and genes that influence the risk of developing disease. —S. Schmidt

#### 231. Infectious Disease Epidemiology (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: introductory epidemiology course (e.g., course 205). Infectious disease epidemiology and prevention, with emphasis on human and veterinary diseases of global health importance. Major global health epidemics and challenges of infectious diseases, by mode of transmission. (Same course as Public Health Sciences 211.) —W. (W.) DeRiemer

#### 240. Principles of Injury Epidemiology (3)

Lecture/discussion—3 hours. Overview of the epidemiology of human injury, including general principles, surveillance methods, behavioral factors,

environmental factors, treatment issues and engineering and legal interventions related to vehicular injuries, drownings, falls, fires and burns, poisonings, firearm injuries, and other intentional injuries.—W. (W.) Romano

### 251. Environmental Epidemiology (3)

Lecture—3 hours. Prerequisite: Preventive Veterinary Medicine 405 (may be taken concurrently); upper division undergraduates who have completed Environmental Studies 126; or the equivalent. Examination of the human health effects and the risk of disease from community, occupational, and personal exposure to toxic substances. Offered in alternate years.—F. Schenker

### 252. Social Epidemiology (2)

Lecture/discussion—2 hours. Prerequisite: course 205A; consent of instructor. Social determinants of health; psychosocial and physiological pathways; health and social inequality; gender and racial/ethnic disparities in health; social support, social cohesion and health; social gradient in behavioral risk factors; social ecological approaches to health intervention; interventions addressing social determinants. (Same Course as Public Health Sciences 252.)—S. (S.)

### 260. Epidemiology of Chronic Diseases and Aging (3)

Lecture/discussion—3 hours. Overview of the epidemiology of chronic disease in old age. Topics include biology of aging, epidemiology of cardiovascular disease, neoplasms, osteoporosis and fractures, psychosocial factors and health in old age, dementias, functional status and prevention of disease.—W. (W.)

### 270. Research Methods in Occupational Epidemiology (3)

Laboratory/discussion—3 hours. Prerequisite: course 205A or Preventive Veterinary Medicine 205; Statistics 102 or Preventive Veterinary Medicine 202. Methods used in epidemiologic research on occupational hazards. Topics include design and analysis of cohort and case-control studies, sample size, measuring dose, choosing a control group, validation of employment and health data, interpreting negative studies, and analysis software. Offered in alternate years.—S. (S.) Beaumont

### 272. Cancer Epidemiology (2)

Recitation—1 hour; discussion—1 hour. Prerequisite: must have basic understanding of epidemiologic and statistical concepts that are covered in courses 205A, 205B, 206 (may be taken concurrently), and Statistics 102. We will cover the underlying concepts essential to understanding cancer epidemiology, such as trends in incidence and survival, epidemiologic methods used to assess cancer etiology, prevention and control, and an introduction to the carcinogenesis and progression multi-stage model.—W. (W.) Cress

### 290. Seminars in Epidemiology (0.5)

Seminar—0.5 hours. Faculty and students will present and lead discussion of ongoing or published epidemiologic research. (S/U grading only.)—F, W, S. (F, W, S.)

### 291. Seminars in Human Health Services Research and Clinical Epidemiology (1)

Seminar—1 hour. Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others. May be repeated for credit. (Same course as General Medicine 291.) (S/U grading only.)—F, W, S. (F, W, S.)

### 298. Group Study (1-5)

Seminar—1-5 hours. Group study in selected areas of epidemiology.

### 299. Research (1-12)

Research in selected areas of epidemiology. (S/U grading only.)

## Evolution and Ecology

(College of Biological Sciences)

Sharon Strauss, Ph.D., Chairperson of the Department

David J. Begun, Ph.D., Professor  
Graham Coop, Ph.D., Associate Professor  
Jonathan A. Eisen, Ph.D., Professor  
*(Medical Microbiology and Immunology)*  
Brian P. Gaylord, Ph.D., Professor  
Jennifer R. Gremer, Ph.D., Assistant Professor  
Richard K. Grosberg, Ph.D., Professor  
*Academic Senate Distinguished Teaching Award,  
UC Davis Prize for Teaching and Scholarly  
Achievement*

Susan L. Keen, Ph.D., Senior Lecturer, SOE  
*Academic Federation Excellence in Teaching  
Award*

Aryom V. Kopp, Ph.D., Professor  
Charles H. Langley, Ph.D., Professor  
Harris A. Lewin, Ph.D., Professor  
*(Vet Med: Population Health and Reproduction)*

Susan E. Lott, Ph.D., Assistant Professor  
Brian R. Moore, Ph.D., Assistant Professor

Gail L. Patricelli, Ph.D., Professor

Santiago Ramirez, Ph.D., Assistant Professor

Bruce H. Rannala, Ph.D., Professor

Marcel Rejmánek, Ph.D., Professor

Eric D. Sanford, Ph.D., Professor

Johanna M. Schmitt, Ph.D., Professor

Thomas W. Schoener, Ph.D., Professor

Sebastian Schreiber, Ph.D., Professor

Arthur M. Shapiro, Ph.D., Professor

*Academic Senate Distinguished Teaching Award*

John J. Stachowicz, Ph.D., Professor

*Academic Senate Distinguished Teaching Award  
UC Davis Prize for Teaching and Scholarly  
Achievement*

Sharon Y. Strauss, Ph.D., Professor

*Academic Senate Distinguished Teaching Award*

Donald R. Strong, Ph.D., Professor

Michael Turelli, Ph.D., Professor

Peter C. Wainwright, Ph.D., Professor

*Academic Senate Distinguished Teaching Award*

Susan Williams, Ph.D., Professor

### Emeriti Faculty

James A. Doyle, Ph.D., Professor Emeritus

John H. Gillespie, Ph.D., Professor Emeritus

Milton Hildebrand, Ph.D., Professor Emeritus

*Academic Senate Distinguished Teaching Award*

Robert W. Pearcy, Ph.D., Professor Emeritus

Judy A. Stamps, Ph.D., Professor Emeritus

Kenneth E. F. Watt, Ph.D., LL.D., Professor Emeritus

### Affiliated Faculty

Carole Hom, Ph.D., Academic Coordinator

R. Pat Randolph, Ph.D., Academic Coordinator/Lecturer

David A. Spiller, Ph.D., Project Scientist Emeritus

### The Evolution, Ecology and Biodiversity Major Program

The major in Evolution, Ecology and Biodiversity offers the student a broad background in the theoretical and empirical basis of our understanding of the diversity and distribution of living organisms.

**The Program.** The program of study for the major begins with a core of introductory courses in mathematics, physical sciences, and biology. These are followed by survey courses in biodiversity, evolution and ecology and various more specialized courses that focus the student on particular disciplines or organisms, with an emphasis on problem-solving and critical thinking. Evolution, Ecology and Biodiversity majors may earn either a Bachelor of Science

or a Bachelor of Arts degree. The requirements for the B.S. degree program include more science courses, such as biochemistry, whereas those for the A.B. degree program allow room for more electives within the humanities and social sciences. The A.B. degree is especially appropriate for those students who wish to combine arts or languages with evolution and ecology for career preparation in such areas as scientific writing, translating or illustration.

**Career Alternatives.** A degree in Evolution, Ecology and Biodiversity prepares the student for career opportunities in research, teaching, health professions, veterinary medicine, agriculture, environmental management, and industry. Many students gain some research experience while at UC Davis and choose to continue their training at the graduate level. This track offers careers in academics, government, environmental organizations, or business.

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter ..... 41-45

Biological Sciences 2A-2B-2C .....	15
Chemistry 2A-2B .....	10
Chemistry 8A-8B .....	6
Mathematics 17A-17B (17C recommended) or 21A-21B (21C recommended) or Statistics 100 or 102 .....	4-8
Physics 1A-1B .....	6

#### Depth Subject Matter ..... 36

Biological Sciences 101 .....	4
One course from: Evolution and Ecology 100; Geology 107; Anthropology 151 .....	3-4
One course from: Evolution and Ecology 101; Environmental Science and Policy 100; Wildlife, Fish, and Conservation Biology 151 .....	4
Additional upper division course work in biological science to achieve a total of 36 or more units .....	24-25

Include at least one course from each of the areas of study below.

#### Areas of Study:

(1) *Biodiversity:* Entomology 103;  
Evolution and Ecology 105, 108, 112,  
140; Microbiology 105; Nematology  
110; Plant Biology 116, 148; Plant  
Sciences 147; Wildlife, Fish, and  
Conservation Biology 110, 111, 120,  
134.

(2) *Advanced Evolution and Ecology:*  
Evolution and Ecology 102, 103, 104,  
107, 115, 117, 119, 120, 131, 138,  
141, 147, 149, 150, 161, 180A and  
180B, 181.

Note: A maximum of four units of variable-unit courses (numbered 192, 198, 199) may be applied to upper division elective unit requirements. Courses numbered 197T are not applicable to the upper division elective unit requirement.

#### Total Units for the Major ..... 77-81

### B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter ..... 56-66

Biological Sciences 2A-2B-2C .....	15
Chemistry 2A-2B-2C .....	15
Chemistry 8A-8B or 118A-118B-118C .....	6-12
Mathematics 17A-17B-17C or 21A-21B (21C recommended) .....	8-12
Physics 7A-7B-7C .....	12

#### Depth Subject Matter ..... 49

Biological Sciences 101, 105 (or 102+103), 104 .....	10-13
Evolution and Ecology 100, 101 .....	8
Statistics 100, 102 or 130A-130B .....	4-8
Additional upper division course work in biological science to achieve a total of 49 or more units, including at least a total of two	

units (6 hours per week) of laboratory or fieldwork..... 20-27

Include at least one course from the Biodiversity area of study and two courses from the Advanced Evolution and Ecology areas of study below.

#### **Areas of Study:**

(1) *Biodiversity*: Entomology 103; Evolution and Ecology 105, 108, 112, 140; Microbiology 105; Nematology 110; Plant Biology 116, 148; Plant Sciences 147; Wildlife, Fish, and Conservation Biology 110, 111, 120, 134.

(2) *Advanced Evolution and Ecology*: Evolution and Ecology 102, 103, 104, 107, 115, 117, 119, 120, 131, 138, 141, 147, 149, 150, 161, 180A and 180B, 181.

Note: A maximum of 4 units of variable-unit courses (numbered 192, 198, 199) may be applied to upper division elective unit requirements, but not to the upper division laboratory requirement. Courses numbered 197T are not applicable to the upper division elective unit requirement.

#### **Total Units for the Major ..... 105-115**

#### **Biological Sciences Electives**

The following courses are acceptable toward the fulfillment of the upper division biological sciences requirement in the A.B. and B.S. major programs and may be selected without adviser approval. Other elective courses are approved on an individual basis by petition through an adviser.

Anatomy, Physiology and Cell Biology 100  
Anthropology 151, 152, 153, 154A, 154BN, 154C, 154CL, 155, 156  
Biological Sciences, all upper division courses  
Chemistry 107A, 107B  
Entomology, all upper division courses except 110  
Environmental Science and Policy 110, 116, 121, 123, 150C, 151, 151L  
Evolution and Ecology 190  
Geology 107, 107L, 150C  
Microbiology, all upper division courses  
Molecular and Cellular Biology, all upper division courses  
Nematology 110  
Neurobiology, Physiology, and Behavior, all upper division courses  
Nutrition 101, 111  
Pathology, Microbiology, and Immunology 101, 126, 126L, 128  
Philosophy 108  
Plant Biology, all upper division courses  
Psychology 121, 122, 127, 129  
Wildlife, Fish, and Conservation Biology 120, 120L, 121

#### **Minor Program Requirements:**

UNITS

#### **Evolution, Ecology and Biodiversity ..... 18**

Evolution and Ecology 100, 101 ..... 8

One course in Biodiversity ..... 3.5

Entomology 103; Evolution and Ecology 105\*, 108\*, 112, 112L\*, 114\*, 140\*; Plant Biology 116\*, 148\*; Plant Sciences 147\*; Wildlife, Fish and Conservation Biology 110, 110L\*, 111, 111L\*, 120, 120L\*, 134, 134L\*; Microbiology 105, 105L\*; Nematology 110

Two courses in Advanced Ecology or

Evolution ..... 6-9

Evolution and Ecology 102, 103, 107, 115, 117\*, 119\*, 120, 131, 138, 141, 147, 149, 150, 161, 180A\* and 180B\*, 181

Laboratory or field course: At least one of the courses taken to fulfill these requirements must include a laboratory or field component.

\*Appropriate courses from the above lists are indicated with an asterisk.

\*‡These courses cannot be taken without the corresponding lecture course. Additional courses, if necessary, from above course lists to reach 18 units.

**Major Advisers.** Students transferring to UC Davis from another institution and majoring in Evolution, Ecology and Biodiversity must consult an adviser immediately upon matriculation so that their transfer credits can be applied to the major requirements. All new students in the major should contact the Biology Academic Success Center for adviser assignment. Substitutions of courses not on the above list for major requirements are arranged through the adviser.

**Advising Center** for the major is located at the Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; <http://basc.ucdavis.edu/>. Pre-professional students should visit the Health Professions Advising office at <http://hpa.ucdavis.edu/> for information on pre-health requirements and to subscribe to their email list.

**Teaching Credential Subject Representative.** Students planning for a teaching career should consult the School of Education in regard to preparation for certification; see the Teaching Credential/M.A. Program on page 124.

#### **Courses in Evolution and Ecology (EVE)**

##### **Lower Division**

###### **2. Biodiversity (3)**

Lecture—2 hours; lecture/discussion—1 hour. Introduction to nature, scope and geographical distribution of biodiversity (the diversity of life, with emphasis on plants and animals, especially insects). Humans and biodiversity—domestication, aesthetics, ethics and valuation. Species richness and “success.” Biodiversity through time; monitoring, evaluation and conservation. Biomes—global, continental and Californian. (Same course as Entomology 2.) Offered irregularly. GE credit: SciEng, Wrt | SE, SL, WE.

###### **10. Evolution for Non-Biologists (4)**

Lecture—3 hours. Introduction to evolutionary biology for the general population. Offered in alternate years. GE credit: SciEng | QL, SE, SL. —(F.) Begun

###### **11. Principles of Ecology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: elementary biology recommended. Ecological principles with emphasis on humans and their interactions with the environment; how humans affect and depend on natural ecosystems; the future of the Earth's biosphere. Offered irregularly. GE credit: SciEng | OL, SE, SL, WE.

###### **12. Life in the Sea (3)**

Lecture—3 hours. Limited enrollment. Diversity of life in the sea; adaptations to physical/chemical ocean environment; marine science research methods; utilization of living marine resources by humans; factors and processes that influence diversity of sea life, including humans. GE credit: SciEng | SE, SL. —S. (S.) Williams

###### **13. Sex in the Natural World (3)**

Lecture/discussion—3 hours. Explores the diversity, mechanisms and evolution of sexual behaviors across the kingdoms of life. Offered in alternate years. GE credit: SciEng | SE, SL, VL. —F. Patricelli

###### **20. Darwinian Medicine (3)**

Lecture—3 hours. Introduction for non-biologists to the evolved traits of humans and pathogens that influence human biological variation, health, and disease. Offered in alternate years. GE credit: QL, SE, SL. —(F.) Begun

###### **92. Internship (1-12)**

Internship—3-36 hours. Prerequisite: lower division standing; consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Evolution and Ecology. Internships

supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) —F, W, S. (F, W, S.)

###### **98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE. —F, W, S. (F, W, S.)

###### **99. Special Study for Lower Division Students (1-5)**

(P/NP grading only.) GE credit: SE. —F, W, S. (F, W, S.)

#### **Upper Division**

##### **100. Introduction to Evolution (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C; Biological Sciences 101; Mathematics 16A, 16B, 16C or the equivalent; Statistics 13 or 100 (Statistics 100 recommended). A general survey of the origins of biological diversity and evolutionary mechanisms. GE credit: SciEng | QL, SE, SL. —F, W, Su. (F, W, S, Su.) Begun, Coop, Ramirez

###### **101. Introduction to Ecology (4)**

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C; Mathematics 16A, 16B, 16C or the equivalent. A general survey of the principles of ecology. GE credit: SciEng | QL, SE, SL, VL. —F, W, Su. (F, W, S, Su.) Gaylord, Rejmanek, Schoener, Strong

###### **101Q. Introduction to Computer Models in Ecology (1)**

Autotutorial—1.5 hours; extensive problem solving—1.5 hours. Prerequisite: concurrent enrollment in course 101. Computational methods and mathematical models used to study ecological phenomena. Offered irregularly.

###### **102. Population and Quantitative Genetics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 101, and Statistics 100 or 102, and course 100. Evolution as caused by random mating, genetic drift, natural selection, inbreeding, migration, and mutation in theory and actuality. The resemblance between relatives and consequences of selection for quantitative traits. Application of these ideas to topics such as the evolution of sex. Offered in alternate years. GE credit: SciEng | SE. —F. Langley

###### **103. Phylogeny, Speciation and Macroevolution (4)**

Lecture—3 hours; laboratory/discussion—3 hours. Prerequisite: course 100. Statistical inference of evolutionary patterns and processes above the species level. Topics include estimation of phylogenies and divergence times, character evolution, biogeographic history, and rates and patterns of lineage diversification, with an emphasis on the origin of species. Offered in alternate years. GE credit: SciEng | QL, SE, SL. —(W.) Moore, Turelli

###### **104. Community Ecology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 101 or Environmental Science and Policy 100. Population growth and density dependence; predation; exploitative, interference and apparent competition; coexistence mechanisms; niches, spatial and temporal variation; stability, diversity, and productivity of food webs; applications to conservation and biological control. Emphasis on quantitative understanding through models, concepts, and empirical evidence. Offered irregularly. GE credit: SciEng | SE, SL, VL.

###### **105. Phylogenetic Analysis of Vertebrate Structure (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A and 1B, or 2B and 2C. The structure of the classes and subclasses of vertebrates is described and interpreted in terms of phylogeny. Offered in alternate years. GE credit: SciEng | SE. —S. Wainwright

###### **106. Mechanical Design in Organisms (3)**

Lecture—2 hours; discussion—1 hour; laboratory—3 hours; fieldwork—3 hours. Prerequisite: upper division standing or consent of instructor; introductory

animal biology (Biological Sciences 1B or 2B), invertebrate zoology (course 112), and/or ecology (course 101) are recommended; residence at or near Bodega Marine Lab required. Enrollment restricted to application at <http://www.bml.ucdavis.edu>. Explores fundamental principles in the form and function of organisms, examining how basic properties of size, shape, structure, and habitat constrain ways in which plants and animals interact and cope with their physical surroundings. Offered in alternate years. GE credit: SciEng | QL, SE, VL, WE.

#### **107. Animal Communication (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 2B. How animals use songs, dances, colors, chemicals, electricity and vibrations to communicate. Mechanisms of signal production and detection (sensory systems), theory of information transfer and signal design, and the role of natural selection in shaping communication. Offered in alternate years. GE credit: SciEng | QL, SE, VL.—(F.) Patricelli

#### **108. Systematics and Evolution of Angiosperms (5)**

Lecture—3 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C. Diversity and classification of angiosperms (flowering plants) on a world scale, and current understanding of the origin of angiosperms and evolutionary relationships and trends within them based on morphological and molecular evidence. (Same course as Plant Biology 108.) GE credit: SciEng.—S. (S.) Potter

#### **110. Running, Swimming and Flying (3)**

Lecture—2 hours; discussion—1 hour; laboratory—3 hours; fieldwork—3 hours. Prerequisite: upper division standing or consent of instructor; introductory animal biology (Biological Sciences 1B or 2B), invertebrate zoology (course 112), and/or ecology (course 101) are recommended; residence at or near Bodega Marine Lab required. Enrollment restricted to application at <http://www.bml.ucdavis.edu>. Examines the bases of organism movement in terrestrial, aquatic, and aerial environments, emphasizing both the unifying principles underlying locomotion, as well as a range of strategies employed across diverse groups of organisms. Offered irregularly. GE credit: SciEng | QL, SE, VL, WE.

#### **111. Marine Environmental Issues (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Examination of critical environmental issues occurring in coastal waters including the effects of climate change, overfishing, and other human impacts. Through readings and group discussions, students will develop an integrative understanding of the oceanographic and ecological processes. May be repeated two times for credit when topics differ. (Same course as Environmental Science and Policy 111.) GE credit: SciEng | SE, SL.—S. Su, (S. Su.) Gaylord, Hill, Largier, Morgan, Sanford, Williams

#### **112. Biology of Invertebrates (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1B, or 2B and 2C; courses in systematics, ecology, and evolution recommended. Limited enrollment. Survey of the invertebrate phyla, emphasizing aquatic forms, and focusing on morphology, development, natural history, ecology, and phylogenetic relationships. Offered in alternate years.—(W.) Grosberg, Sanford

#### **112L. Biology of Invertebrates Laboratory (2)**

Laboratory—6 hours. Prerequisite: Biological Sciences 1B, or 2B and 2C; course 112 concurrently. Enrollment limited to 50 students. Field and laboratory experience with representative members of the major invertebrate phyla discussed in course 112. Emphasis on comparative morphology, natural history, ecology, and behavior of living invertebrates. Two field trips required. Offered in alternate years.—(W.) Grosberg, Sanford

#### **114. Experimental Invertebrate Biology (3)**

Lecture—2 hours; discussion—1 hour; laboratory—3 hours; fieldwork—3 hours. Prerequisite: upper division standing or consent of instructor; introductory cell, animal and plant biology (Biological Sciences 1A, 1B and 1C), invertebrate zoology (Evolution and Ecology 112), ecology (Evolution and Ecology 101), and/or evolution (Evolution and Ecology 100) are recommended; residence at or near Bodega Marine Lab required. Enrollment restricted to application at <http://www.bml.ucdavis.edu>. Biology, ecology, and evolution of local marine invertebrates with a focus on adaptations to environmental and biological factors encountered on the California coast. Hands-on field and laboratory learning with an emphasis on generating and testing hypotheses. GE credit: SciEng | QL, SE, VL, WE.—Su. (Su.) Sanford

#### **115. Marine Ecology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 101 or Environmental Science and Policy 100 or Biological Sciences 2B, or consent of instructor. Processes affecting the distribution, abundance, and diversity of plant and animal life in the sea. Introduction to marine habitat diversity and human impacts on marine ecosystems. Offered in alternate years. GE credit: SciEng | SE, SL, VL, WE.—W. Stachowicz

#### **117. Plant Ecology (4)**

Lecture—3 hours; fieldwork—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C; Plant Biology 111 recommended. The study of the interactions between plants, plant populations or vegetation types and their physical and biological environment. Special emphasis on California. Four full-day field trips and brief write-up of class project required. (Same course as Plant Biology 117.)—F. (F.) Latimer, Rejmanek

#### **119. Population Biology of Invasive Plants and Weeds (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C; introductory statistics recommended. Origin and evolution of invasive plant species and weeds, reproduction and dispersal, seed ecology, modeling of population dynamics, interactions between invasive species, native species, and crops, biological control. Laboratories emphasize design of competition experiments and identification of weedy species. (Same course as Plant Biology 119.) Offered in alternate years. GE credit: SciEng | SE.—S. Rejmanek

#### **120. Global Change Ecology (3)**

Lecture/discussion—3 hours. Prerequisite: course 100 and 101 or equivalents. Treatment of historical evolution of the biosphere resulting from physical, chemical, and biological influences. Special focus upon changes caused by humans. Topics pertain to biodiversity, resources, conservation, and ecosystem services. Offered irregularly.—F. Su (F. Su.) Gaylord, Strong

#### **131. Human Genetic Variation and Evolution (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1B or 2B. Introduction to genome-wide nucleotide sequence variation in human populations and computational methods for its analysis. Topics to include forensics, disease gene mapping, and studies of human evolutionary history. Misuses, such as eugenics, and ethical/legal issues will be discussed. Offered in alternate years.—W. Rannala

#### **138. Ecology of Tropical Latitudes (5)**

Lecture—3 hours; discussion—1 hour; extensive writing. Prerequisite: one course in Biological Sciences, Entomology, Wildlife, Fish, and Conservation Biology, Geography, or tropical experience, or consent of instructor. Biological, physical, and human-related aspects of the ecology of low latitudes. Distribution, numbers, and relationships of tropical organisms. Problems of development and conservation in the context of ecological and evolutionary theory. Offered in alternate years. GE credit: SciEng, Wrt | SE, SL, WE.—(S.) Shapiro

#### **140. Paleobotany (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C. Introduction to plant fossil record, beginning with invasion of land in the Silurian, emphasizing origin and evolution of major groups and adaptations and changing composition and distribution of floras in relation to plate tectonics and climatic change. Offered irregularly.

#### **141. Principles of Systematics (3)**

Lecture—2 hours; independent study. Prerequisite: Biological Sciences 1B or 1C or 2B; course 100 recommended. Historical background, philosophical rationale, contemporary approaches, and working rules of biosystematics, including International Code of Zoological Nomenclature. Offered in alternate years. GE credit: SciEng, Wrt | OL, QL, SE, SL, VL, WE.—S. Shapiro

#### **147. Biogeography (4)**

Lecture—3 hours; term paper. Prerequisite: Biological Sciences 1A and 1B, or 2B. Movements of terrestrial organisms. The role of geologic, climatic, and biologic changes in the geographic distribution of organisms. Offered in alternate years. GE credit: SciEng | QL, SE, SL, VL, WE.—F. Shapiro

#### **149. Evolution of Ecological Systems (4)**

Lecture—3 hours; term paper. Prerequisite: course 101 or Environmental Science 100 (or the equivalent), and course 100 (or the equivalent). Evolution as an organizing force in natural communities. Co-adaptation in trophic and competitive relationships. Ecology of polymorphisms, clines, and speciation. Offered in alternate years. GE credit: SciEng | SE, SL, WE.—(F.) Shapiro

#### **150. Evolution of Animal Development (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101; and course 100 (may be waived for graduate students with consent of instructor). Comparative analysis of animal development and the genetic basis of morphological diversification. Offered in alternate years. GE credit: SE, WE.—Kopp

#### **161. Microbial Phylogenomics—Genomic Perspectives on the Diversity and Diversification of Microbes (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 2A, 2B, and 2C or equivalent. Use of DNA and genomic sequencing in studies of the diversity of microorganisms. Diversity of microbes, phylogenetics, genome sequencing, comparative genomics, phylogenomics, lateral gene transfer, molecular ecology, metagenomics, and studies of the human microbiome. Offered in alternate years. GE credit: SciEng | SE.—(W.) Eisen

#### **175. Computational Genetics (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: Biological Sciences 101 and Statistics 100 or 102. The use of computers to solve problems in genetics and evolution. Introduction to a general purpose computer language (Python), computational statistical methods, and applications such as QTL mapping, linkage detection, estimation of rates of evolution, and gene finding. Offered irregularly.

#### **180A. Experimental Ecology and Evolution in the Field (4)**

Lecture/laboratory—3 hours; fieldwork—3 hours. Prerequisite: course 100; course 101, or Environmental Science and Policy 100; Entomology 105. Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as Entomology 180A.) (Deferred grading only, pending completion of sequence.) Offered in alternate years. GE credit: SciEng | QL, SE, VL.—W. Yang

#### **180B. Experimental Ecology and Evolution in the Field (4)**

Lecture/laboratory—3 hours; fieldwork—3 hours. Prerequisite: Evolution and Ecology or Entomology 180A; course 100; course 101 or Environmental Science and Policy 100; Entomology 105. Experimental design in field ecology. Examination of primary literature, experimental design, independent

and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as Entomology 180B.) (Deferred grading only, pending completion of sequence.) Offered in alternate years. GE credit: SciEng | QL, SE, VL WE.—S. Yang

### **181. Ecology and Evolution of Animal-Plant Interactions (4)**

Lecture—1.5 hours; lecture/discussion—1.5 hours; term paper; extensive writing or discussion. Prerequisite: Biological Sciences 2B and 2C required; Biological Sciences 2C may be taken concurrently. Animal adaptations for eating plants, pollinating flowers, dispersing seeds. Plant adaptations to herbivore defense, attraction of mutualists; role of coevolutionary arms race, mutualists and cheaters in plant/animal speciation. Exploration through lectures, original scientific literature, discussions and term paper. Offered in alternate years. GE credit: SciEng | OL, QL, SE, SL, WE.—F. Strauss

### **189. Introduction to Biological Research (1)**

Discussion—1 hour. Prerequisite: upper division standing in Evolution and Ecology or related biological science; consent of instructor. Introduction to research methods in biology. Presentation and discussion of research by faculty, graduate, and undergraduate students. May be repeated for credit up to a total of 6 units. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

### **190. Undergraduate Seminar (2)**

Seminar—2 hours. Prerequisite: upper division standing in the biological sciences or a related discipline. Student reports on current topics with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.) GE credit: SE.—F. (F.) Shapiro

### **192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Evolution and Ecology. Internships supervised by a member of the faculty. (P/NP grading only.)—F, W, S. (F, W, S.)

### **194HA. Research Honors (2)**

Laboratory—6 hours. Prerequisite: students who have completed 135 units and qualify for the honors program (as defined by the current catalog). Students pursue intensive research under the guidance of a faculty adviser. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE, WE.—F, W, S. (F, W, S.)

### **194HB. Research Honors (2)**

Laboratory—6 hours. Prerequisite: students who have completed 135 units and qualify for the honors program (as defined by the current catalog). Students pursue intensive research under the guidance of a faculty adviser. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE, WE.—F, W, S. (F, W, S.)

### **194HC. Research Honors (2)**

Laboratory—6 hours. Prerequisite: students who have completed 135 units and qualify for the honors program (as defined by the current catalog). Students pursue intensive research under the guidance of a faculty adviser. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE, WE.—F, W, S. (F, W, S.)

### **197T. Tutoring in Biological Sciences 2B (1-2)**

Tutorial—3-6 hours. Prerequisite: Biological Sciences 1B or Biological Sciences 2B with a grade of B or better. Assisting the instructor by tutoring students in

a Biological Sciences 2B laboratory. Tutoring is voluntary and is supervised by a Laboratory Teaching Assistant and the Biological Sciences 2B Laboratory Coordinator. May be repeated three times for credit. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

### **198. Directed Group Study (1-5)**

(P/NP grading only.)—F, W, S. (F, W, S.)

### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

### **Graduate**

#### **210. Molecular Phylogenetic Analysis (3)**

Lecture—2 hours; laboratory—3 hours. Theory and practice of inferring phylogenetic trees using molecular sequence data. Practical techniques for obtaining sequence data, advantages and disadvantages of common approaches for inferring trees, statistical methods for comparing alternative hypotheses. (Same course as Nematology 210.) Offered irregularly.—Nadler

#### **211. Applied Phylogenetics (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 103 or 210 or Population Biology 200C or the equivalent, graduate standing. Applications of phylogenetic methods to fields outside of systematics. Core lectures/labs in remedial phylogenetics, phylogeography, conservation and comparative morphology. Special topics vary yearly. May be repeated one time for credit.—(W.) Moore, Wainwright

#### **220. Species and Speciation (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 100, Philosophy 108 or the equivalent; History and Philosophy of Science 130B recommended. Current status of species concepts, models of speciation, current research on speciation, and relevance of species to conservation biology. Offered in alternate years.—W. Shapiro

#### **231. Principles of Biological Data Analysis (3)**

Lecture—2 hours; laboratory—3 hours. Introduction to the principles of data analysis, experimental design, statistical modeling, inference, and hypothesis tests. Statistical methods of particular importance in biological applications will be emphasized. Examples will be presented from the fields of ecology and evolutionary genetics. Offered irregularly. (S/U grading only.)—Rannala

#### **240. Paleobotany and Angiosperm Evolution (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Plant Biology 108, 116, or course 140. Critical analysis of the plant fossil record as a source of evidence on origin, evolution, and phylogeny of the angio-sperms, Cretaceous and Tertiary climates, geographic history of modern taxa, and origin of modern vegetation types. Offered irregularly.

#### **290C. Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Presentation and discussion of faculty and graduate student research in biology. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### **298. Group Study (1-5)**

(S/U grading only.)—F, W, S. (F, W, S.)

#### **299. Research (1-12)**

(S/U grading only.)—F, W, S. (F, W, S.)

### **Professional**

#### **390. Methods of Teaching (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Practical experience in the methods and problems of teaching. Includes analyses of texts and supporting material, discussion of teaching techniques and pre-

paring and conducting of laboratory and discussion sections. May be repeated for credit for a maximum of 8 units. (S/U grading only.)—F, W, S. (F, W, S.)

## **Family and Community Medicine**

**See Medicine, School of, on page 427.**

## **Feminist Theory and Research**

Wendy Ho, Ph.D., Adviser

**Program Office.** 1219 Hart Hall  
530-752-6429;  
<http://gsws.ucdavis.edu/welcome>

**Graduate Study.** The Gender, Sexuality and Women's Studies Program at UC Davis offers a Designated Emphasis in Feminist Theory & Research. Currently graduate students in the following fourteen affiliated Ph.D. programs are eligible to participate: Anthropology, Comparative Literature, Cultural Studies, Education, English, French, German, Geography, History, Native American Studies, Performance Studies, Psychology, Sociology, Spanish, and the Study of Religion.

The Designated Emphasis in Feminist Theory and Research affords graduate students in affiliated programs the opportunity to augment their Ph.D. in a given discipline with a specialization Feminist Theory and Research. Typically a doctoral student in good standing may seek admission to the Designated Emphasis in Feminist Theory and Research and enroll in Designated Emphasis in Feminist Theory and Research courses. Those students in affiliated Ph.D. programs who complete the requirements of the Designated Emphasis will have this noted on their transcripts and their Ph.D. diploma will note the "Special Emphasis in Feminist Theory & Research."

Students must complete all the requirements for the Ph.D. in their home department. The requirements for the Designated Emphasis in Feminist Theory and Research are the successful completion of the two core courses, Women's Studies 200A and Women's Studies 200B, and two additional courses focusing on gender, sexuality and women's studies; one in the student's home department and one outside their home department. A member of the DE affiliated faculty must be a member of the student's qualifying examination. Analysis of gender or sexuality is expected to be a central component of both the student's qualifying examination and doctoral research.

Students should consult with the Chair of the Designated Emphasis in Feminist Theory and Research before enrolling in a graduate course for which they wish to receive credit to ensure that it will count toward fulfilling the requirements of the Designated Emphasis. If possible, please bring a copy of the syllabus or an expanded course description to your meeting.

# Fiber and Polymer Science

(College of Agricultural and Environmental Sciences)

**Faculty.** See under *Textiles and Clothing*, on page 567.

## The Major Program

The Fiber and Polymer Science major is concerned with the physical, chemical, and structural properties of fibers and polymers and how these relate to fiber and polymer performance and end-use.

**The Program.** All students in this major take a common core of course work in chemistry, physics, and mathematics, and depth subject matter in fiber and polymer science, organic and physical chemistry, and technical writing. In the restricted electives, students select courses from areas such as computer science and mathematics, chemistry, marketing and management, material and advanced fiber and polymer science, and textiles.

**Career Alternatives.** The major prepares the student for a career in a wide range of industries in the areas of research and development, technical marketing and management, production, quality control, and science teaching (on completion of an additional year in the teaching credential program). The companies employing Fiber and Polymer Science graduates are in the fiber, polymer, industrial product, textile and/or chemical business. Graduates are prepared to enter the graduate program in textiles or agricultural and environmental chemistry with a specialization in fiber and polymer chemistry, fiber and materials science and polymer engineering programs at other universities.

## B.S. Major Requirements:

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>52-55</b>
Chemistry 2A-2B-2C .....	15
Computer Science Engineering 15 or 30...4	
Mathematics 16A-16B-16C or 21A-21B-21C.....	9-12
Physics 7A-7B-7C or 9A-9B-9C .....	12
Statistics 13 or Plant Sciences 120 .....	4
Textiles and Clothing 6 and 8 or	
Engineering 45 .....	8
<b>Depth Subject Matter .....</b>	<b>37-39</b>
Textiles and Clothing 163, 163L .....	4
Fiber and Polymer Science 100, 150, 161, 161L, 180A, 180B.....	14
Chemistry 128A, 128B, 128C, 129A, 129B, 110A and 110C or 107A and 107B .....	19-21
<b>Restricted Electives .....</b>	<b>30</b>

Select courses from the following:

*Computer Science and Mathematics:* Plant Sciences 21; Applied Science Engineering 115, 116; Mathematics 22A, 22B

*Chemistry:* Chemistry 108, 115, 120, 121, 124A, 124B, 124C, 131, 140

*Marketing/Management:* Agricultural and Resource Economics 100A, 100B, 113, 136, 157; Economics 1A, 1B; Statistics 103

*Material and Advanced Fiber/Polymer Science:* Aeronautical Science Engineering 137, Engineering 104, 104L, Textiles and Clothing 250A-F, 290, 293

*Textiles:* Textiles and Clothing 162, 162L, 164, 165, 173, 174

## Total Units for the Degree ..... 119-124

**Major Adviser.** Y. L. Hsieh (*Textiles and Clothing*)

**Advising Center** for the major is located in 1204 RMI south 530-752-3250 or 129B Everson Hall 530-754-8368.

## Minor Program Requirements:

### UNITS

<b>Fiber and Polymer Science .....</b>	<b>18</b>
Textiles and Clothing 6 or Engineering 45 .....	4
Courses selected from the following: Fiber and Polymer Science 100, 150, 161, 161L, 180A and 180B; and Textiles and Clothing 163 and 163L .....	14

**Minor Adviser.** Y. L. Hsieh

## Courses in Fiber and Polymer Science (FPS)

### Upper Division

#### 100. Principles of Polymer Materials Science (3)

Lecture—3 hours. Prerequisite: Chemistry 2A-2B; Chemistry 8A-8B or Engineering 45; introductory physics. The basic principles of polymer science are presented including polymer structure and synthesis; polymerization mechanisms, polymer classes, properties, and reactions; polymer morphology, rheology, and characterization; polymer processing. (Same course as Materials Science Engineering 147.) GE credit: SciEng | QL, SE.—W. (W.) Pan

#### 110. Plastics in Society and the Environment (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 10 or introductory course in physical sciences. Basic concepts and methodologies in the study of plastics. Formation, classification, structure, properties, processing, and formulation. Their application to societal needs, and their impact on society and the environment. GE credit: SciEng or SocSci, Wrt | SE, SL, SS, WE.

#### 150. Polymer Syntheses and Reactions (3)

Lecture—3 hours. Prerequisite: Chemistry 128B or 8B, and Chemistry 107A. Organic and physical chemistry aspects of polymer syntheses and reactions including polymerization mechanisms, kinetics and thermodynamics for major types of organic high polymers. GE credit: SciEng | OL, QL, SE, SL, VL, WE.—S. (S.) Hsieh

#### 161. Structure and Properties of Fibers (3)

Lecture—3 hours. Prerequisite: Textiles and Clothing 6 and Chemistry 8B. The structure, properties and reactions of natural- and man-made fibers; the relations between molecular structure of fibers and their physical properties; interactions of fibers and detergents. GE credit: SciEng | OL, QL, SE, SL, VL, WE.—F. (F.) Hsieh

#### 161L. Textile Chemical Analysis Laboratory (1)

Laboratory—3 hours. Prerequisite: course 161 (may be taken concurrently). Laboratory methods and procedures employed in qualitative and quantitative analysis of textile fibers and auxiliaries. SciEng | GE credit: OL, QL, SE, SL, VL, WE.—F. (F.) Hsieh

#### 180A. Introduction to Research in Fiber and Polymer Science (2)

Laboratory/discussion—6 hours. Prerequisite: senior standing in major related to Fiber and Polymer Science, and consent of instructor. Senior thesis on independent problems. Research begun in course 180A will be continued and completed in course 180B. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | QL, SE, VL, WE.—F, W, S. (F, W, S.)

#### 180B. Introduction to Research in Fiber and Polymer Science (2)

Laboratory/discussion—6 hours. Prerequisite: senior standing in major related to Fiber and Polymer Science, and consent of instructor. Senior thesis on independent problems. Research begun in course 180A will be continued and completed in course 180B. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | QL, SE, VL, WE.—F, W, S. (F, W, S.)

## 192. Internship in Fiber and Polymer Science (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience off campus in a fiber and polymer science related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.)

## 197T. Tutoring in Fiber and Polymer Science (1-5)

Tutorial—3-15 hours. Prerequisite: upper division fiber and polymer science related major and consent of instructor. Tutoring of students in Fiber and Polymer Science courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring in another Fiber and Polymer Science course. (P/NP grading only.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## 199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

### Graduate

#### 250A. Special Topics in Polymer and Fiber Science (3)

Lecture—3 hours. Prerequisite: Fiber and Polymer Science 100 or consent of instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as Materials Science and Engineering 250A.)—F, S. (F, S.) Hsieh, Pan, Sun

#### 250B. Special Topics in Polymer and Fiber Science (3)

Lecture—3 hours. Prerequisite: Fiber and Polymer Science 100 or consent of instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as Materials Science and Engineering 250B.)—F, S. (F, S.) Hsieh, Pan, Sun

#### 250C. Special Topics in Polymer and Fiber Science (3)

Lecture—3 hours. Prerequisite: Fiber and Polymer Science 100 or consent of instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as Materials Science and Engineering 250C.)—F, S. (F, S.) Hsieh, Pan, Sun

#### 250D. Special Topics in Polymer and Fiber Science (3)

Lecture—3 hours. Prerequisite: Fiber and Polymer Science 100 or consent of instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as Materials Science and Engineering 250D.)—F, S. (F, S.) Hsieh, Pan, Sun

#### 250E. Special Topics in Polymer and Fiber Science (3)

Lecture—3 hours. Prerequisite: Fiber and Polymer Science 100 or consent of instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as Materials Science and Engineering 250E.)—F, S. (F, S.) Hsieh, Pan, Sun

#### 250F. Special Topics in Polymer and Fiber Science (3)

Lecture—3 hours. Prerequisite: Fiber and Polymer Science 100 or consent of instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as Materials Science and Engineering 250F.)—F, S. (F, S.) Hsieh, Pan, Sun

## 299. Research (1-12)

Independent study—3-36 hours. (S/U grading only.)

### Professional

#### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## Film Studies

See Cinema and Digital Media, on page 207.

## First-Year Seminar Program

J. David Furlow, Ph.D., Program Director

**Program Office.** The Grove, Room 1350 (Surge III); <http://fys.ucdavis.edu/>; <http://fys.ucdavis.edu/student/>

### Committee in Charge

Christiana Drake, Ph.D. (*Statistics*)  
James Harding, Ph.D. (*Plant Sciences*)  
Kenneth Hilt, Ph.D. (*Molecular & Cellular Biology*)  
Karma Waltonen, Ph.D. (*University Writing Program*)

### Courses in First-Year Seminar (FRS)

Questions pertaining to the following course should be directed to the instructor or to the First-Year Seminar Office in Undergraduate Education.

#### Lower Division

##### 1. First-Year Seminar (1)

Seminar—1 hour. Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit if topic differs.—F, W, S. (F, W, S.)

##### 2. First-Year Seminar (2)

Seminar—2 hours. Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit if topic differs.—F, W, S. (F, W, S.)

##### 3. First-Year Seminar (1)

Seminar—1 hour. Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit if topic differs. (P/NP grading only.)—F, W, S. (F, W, S.)

##### 4. First-Year Seminar (2)

Seminar—2 hours. Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit if topic differs. (P/NP grading only.)—F, W, S. (F, W, S.)

## Fisheries

See Animal Science, on page 162; Biological and Agricultural Engineering, on page 191; and Wildlife, Fish, and Conservation Biology, on page 587.

## Food Science

(College of Agricultural and Environmental Sciences)

### The Major Program

Food science is a discipline in which biological, physical, and sensory sciences are integrated for the study of foods to ensure their safety, quality, and healthful properties. The food science curriculum encompasses food chemistry and biochemistry, food safety and microbiology, food processing and preservation, and sensory and consumer sciences.

**Career Alternatives.** Opportunities for employment include positions in the food and allied industries, government agencies, and educational and research institutions. Graduate study for the food science student may lead to the M.S. or Ph.D. degree in food science, or in related fields such as agricultural chemistry, biochemistry, microbiology, and nutrition.

### B.S. Major Requirements:

Preparatory Subject Matter .....	UNITS
<b>61</b>	

University Writing Program 102F, 104A, or 104E .....	4
Communication 1 .....	4
Mathematics 16A-16B-16C .....	9
Biological Sciences 2A .....	5
Chemistry 2A-2B-2C; 8A, 8B (or more advanced series) .....	21
Physics 7A-7B-7C .....	12
Food Science and Technology 50 .....	3
Nutrition 10 (or approved substitute) .....	3

Depth Subject Matter .....	49
----------------------------	----

Biological Sciences 102, 103 .....	6
Statistics 100 .....	4
Microbiology 101 .....	5
Food Science and Technology 100A, 100B, 101A, 101B, 103, 104, 104L, 110, 110L 190 .....	30
Food Science and Technology 117 or Statistics 106 .....	4
Food Science and Technology 127 or 107 .....	4

### Select one of the following two options: Food Science Option

The Food Science option provides a broad exposure to food chemistry, food microbiology and food processing. Students find positions in quality assurance, product development, and food processing in the food industry.

### Restricted Electives for the Food Science option.....18

The restricted electives can:

- (1) Provide a broad exposure to students who would seek positions in quality assurance, product development, and processing in the food industry
- (2) Prepare students for graduate study in food science or related programs,
- (3) Prepare students for professional school in the health sciences. Select courses from a master list, which is available from the advising center for the major.

### Brewing Science Option

The Brewing Science option prepares students for careers in production or quality assurance within the brewing industry or other food fermentation industries (e.g., other alcoholic beverages, vinegar and

cheese). The option also prepares students for graduate study in food science or related programs, and exposes the students to diverse topics, including chemistry, biochemistry, microbiology and processing.

### Specific course requirements ..... 18

Food Science and Technology 102A, 102B, 109, 123 .....

### Selected additional courses ..... 9

Select courses from a master list available from the department Advising Center

### Total Units for the Degree..... 132

**Major Adviser.** A.E. Mitchell (Food Science and Technology)

**Advising Center** for the major is located in 1204 RMI South Building 530-752-3250.

**Graduate Study.** A program of study and research leading to the M.S. and Ph.D. degrees in Food Science is available (see below). For further information on graduate study, contact the graduate adviser.

## Food Science (A Graduate Group)

Gary M. Smith, Ph.D., Chairperson of the Group

**Group Office.** 1204 RMI South Building 530-752-3250; [bftadvising@ucdavis.edu](mailto:bftadvising@ucdavis.edu) <http://www.foodscience.ucdavis.edu>

**Faculty.** Includes members from twelve departments in the Colleges of Agricultural and Environmental Sciences and Engineering, and the Schools of Medicine and Veterinary Medicine.

**Graduate Study.** The interdepartmental Graduate Group in Food Science offers programs of study leading to the M.S. degree and to the Ph.D. degree. Graduate studies stress the application of the biological, chemical, physical, and behavioral sciences to processing, preservation, quality evaluation, public health aspects, and utilization of foods. For the M.S. degree, there are five areas of specialization: chemistry-biochemistry, microbiology, engineering-technology, brewing and sensory science. Individually designed programs are also acceptable. For the Ph.D., there are four areas of emphasis: biochemistry, chemistry, microbiology/fermentation, and sensory science. Detailed information regarding graduate study is available through the Group Chairperson or the Group office.

**Graduate Advisers.** Contact the Food Science Graduate Group office at [bftadvising@ucdavis.edu](mailto:bftadvising@ucdavis.edu).

## Food Science and Technology

(College of Agricultural and Environmental Sciences)

Linda J. Harris, Ph.D., Chairperson of the Department

**Department Office.** 1136 RMI North Building 530-752-1482; <http://foodscience.ucdavis.edu>

### Faculty

Charles W. Bamforth, Ph.D., D.Sc., Distinguished Professor

Daniela Barile, Ph.D., Associate Professor

Diane M. Barrett, Ph.D., Specialist in Cooperative Extension

Charlotte Bilekoff, Ph.D., Associate Professor (*Food Science and Technology, American Studies*)

Gail Bornhorst, Ph.D., Assistant Professor

Stephanie R. Dungan, Ph.D., Professor (*Food Science and Technology, Chemical Engineering and Materials Science*)

J. Bruce German, Ph.D., Professor

Jean-Xavier Guinard, Ph.D., Professor

Maria L. Marco, Ph.D., Associate Professor  
Linda J. Harris, Ph.D., Specialist in Cooperative

Extension

Juliana Leite Nobrega De Moura Bell, Ph.D.,  
Assistant Professor

Bwalya Lungu, Ph.D., Lecturer (*PSOE*)

Michael J. McCarthy, Ph.D., Professor  
(*Food Science and Technology, Biological and Agricultural Engineering*)

David A. Mills, Ph.D., Professor  
(*Food Science and Technology, Viticulture and Enology*)

Alyson Mitchell, Ph.D., Professor

Nitin N. Nitin, Ph.D., Associate Professor  
(*Food Science and Technology, Biological and Agricultural Engineering*)

Michael A. O'Mahony, Ph.D., Professor  
Robert Powell, Ph.D., Distinguished Professor

(*Food Science and Technology, Chemical Engineering and Materials Science*)

Moshe Rosenberg, Ph.D., Professor and Specialist in Cooperative Extension

Christopher Simmons, Ph.D., Assistant Professor

Carolyn L. Slupsky, Ph.D., Professor

(*Food Science and Technology, Nutrition*)

Edward Spang, Ph.D., Assistant Professor

Gary M. Smith, Ph.D., Professor

Ameer Taha, Ph.D., Assistant Professor

Carl Winter, Ph.D., Specialist in Cooperative Extension

Glenn M. Young, Ph.D., Professor

## Emeriti Faculty

Everett Bandman, Ph.D., Professor Emeritus

Ericka L. Barrett, Ph.D., Professor Emerita

John C. Bruhn, Ph.D., Specialist in Cooperative Extension Emeritus

John M. Krochta, Ph.D., Professor Emeritus  
(*Food Science and Technology, Biological and Agricultural Engineering*)

Michael J. Lewis, Ph.D., Professor Emeritus  
*Academic Senate Distinguished Teaching Award*

Kathryn L. McCarthy, Ph.D., Professor Emerita  
(*Food Science and Technology, Biological and Agricultural Engineering*)

R. Larry Merson, Ph.D., Professor Emeritus

David M. Ogrydziak, Ph.D., Professor Emeritus

Chester W. Price, Ph.D., Professor Emeritus

David S. Reid, Ph.D., Professor Emeritus

Gerald F. Russell, Ph.D., Senior Lecturer Emeritus

Barbara O. Schneeman, Ph.D., Professor Emerita  
(*Food Science and Technology, Internal Medicine, Nutrition*)

Howard G. Schutz, Ph.D., Professor Emeritus

Charles F. Shoemaker, Ph.D., Professor Emeritus

R. Paul Singh, Ph.D., Distinguished Professor Emeritus  
(*Food Science and Technology, Biological and Agricultural Engineering*)

**Major Program and Graduate Study.** See the major in *Food Science*, on page 340; and for graduate study, see *Graduate Studies*, on page 120.

**Related Courses.** See courses in Consumer Science, Engineering, Molecular and Cellular Biology, Nutrition, Viticulture and Enology, Environmental Toxicology, Population Health and Reproduction, and Plant Biology.

## Courses in Food Science and Technology (FST)

### Lower Division

#### 1. Principles of Food Science (3)

Lecture—2 hours; discussion—1 hour. Food science fundamentals. Fresh and processed food technologies; world food problems; food composition; food microbiological and toxicological safety; food laws; evaluation of acceptability and nutritional value. Not open for credit to students who have completed any Food Science and Technology course except course 10. GE credit: SciEng | SE, VL.—W. (W.)

#### 3. Introduction to Brewing and Beer (3)

Lecture—3 hours. Basic description of brewing and associated processes, from raw materials to final product; history of brewing and brewing science;

types of beer worldwide; world beer markets; basics of beer quality, including wholesomeness; role of scientist in brewing. GE credit: SciEng | SE, SL.—F, W, S. (F, W, S.) Bamforth

#### 10. Food Science, Folklore and Health (3)

Lecture—3 hours. Ancient and modern food folklore in relation to health and well-being. Food safety, organic food, herbalism, food preservation, and nutritional enhancement. Not open for credit to students who have completed course 2. GE credit: SciEng or SocSci | SE, SL, SS, VL, WC.—F, W, S. (F, W, S.) Smith, Young

#### 50. Introduction to Food Preservation (3)

Lecture—2 hours; laboratory—2 hours. Prerequisite: Chemistry 2A, Biological Sciences 2A, Statistics 100. Restricted to Food Science Majors. Introduction to modes of fresh food preservation including use of chemicals and microbes, heat and energy, control of water and atmosphere, and by indirect approaches such as packaging, hygienic design and sanitation. GE credit: SciEng | QL, SE.—F. (F.) DeMoura Bell

#### 55. Food in American Culture (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: complete Subject A requirement. Relationship between food and culture; relationship between food and the social order; influences on eating habits and the tensions between them including identity, convenience, and responsibility; multiple disciplines and genres. (Same course as American Studies 55.) GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.—S. (S.) Biltkoff

#### 99. Special Study for Undergraduates (1-5) (P/NP grading only.)—F, W, S. (F, W, S.)

### Upper Division

#### 100A. Food Chemistry (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 8B, Biological Sciences 2A recommended. Chemical aspects of food composition. Emphasis on the functional properties and chemical reactions of the major components of foods: carbohydrates, lipids, proteins, and water. GE credit: SciEng | SE, VL.—F. (F.) Dungan

#### 100B. Food Properties (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100A, Chemistry 8B; consent of instructor. Sensory quality, chemical and microbial safety, and nutritional properties of foods. Effects of food processing and preparation on these properties.

Selected properties of food commodities. GE credit: SciEng | QL, SE, VL.—W. (W.) German

#### 101A. Food Chemistry Laboratory (2)

Lecture/laboratory—4 hours. Prerequisite: course 100A (must be taken concurrently). Chemical aspects of food composition described in course 100A. GE credit: QL, SE, VL, WE.—F. (F.) Slupsky

#### 101B. Food Properties Laboratory (2)

Lecture/laboratory—1 hour/3 hours. Prerequisite: course 100B (must be taken concurrently). Study of properties of food described in course 100B. GE credit: SciEng | QL, SE, VL, WE.—W. (W.) Barile

#### 102B. Practical Malting and Brewing (4)

Lecture/discussion—2 hours; laboratory—6 hours. Prerequisite: course 102A, Chemistry 2C. Open to seniors only in Fermentation Science or Food Science and Technology. Provides practical working knowledge of analytical methods used in malting and brewing and experience with brewing materials and processes, by analysis of samples that illustrate the range of values experienced in practice and pilot scale brewing. GE credit: SciEng | QL, SE, VL.—W. (W.) Bamforth

#### 103. Physical and Chemical Methods for Food Analysis (4)

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: Chemistry 2C and 8B, Biological Sciences 103, course 100B. Theory and application of physical and chemical methods for determining the constituents of foods. Modern separation and instrumental analysis techniques are stressed. GE credit: SciEng | QL, SE, WE.—W. (W.) Mitchell

#### 104. Food Microbiology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 2A, Biological Sciences 103, Microbiology 102, Microbiology 103L. Microorganisms in food safety, spoilage, and production. Food-borne disease agents and their control. Growth parameters of food spoilage agents. Destruction of microbes in food. Food fermentations. The development of microbes as a resource for the food industry. GE credit: SciEng | QL, SE, VL.—W. (W.) Marco

#### 104L. Food Microbiology Laboratory (4)

Lecture—1 hour; discussion—1 hour; laboratory—6 hours. Prerequisite: Biological Sciences 2A and 103. Cultural and morphological characteristics of microorganisms involved in food spoilage, in food-borne disease, and food fermentation. Analysis of microbiological quality of foods. GE credit: SciEng | QL, SE, VL, WE.—S. (S.) Young

#### 107. Food Sensory Science (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Statistics 100 or course 117. Critical examination of techniques and theories of sensory measurement of food; measures of consumer perception and acceptance. An introduction to the sensory and cognitive systems associated with the perception of food. Not open for credit to students who have completed course 107A. GE credit: SciEng | QL, SE, WE.—F. (F.) O'Mahony

#### 109. Principles of Quality Assurance in Food Processing (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Statistics 100. Quality assurance measurement techniques applied to selected food processed products emphasized. Rationale for establishing valid quality assurance programs including selection of samples at critical points. Statistical problems in quality assurance programs used by the food industry. GE credit: SciEng | QL, SE, SL, VL.—S. (S.) O'Mahony

#### 110. Food Processing (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Physics 7A, 7B, 7C or the equivalent; Mathematics 16A, 16B, 16C or the equivalent. Application of the conservation of mass and energy to food processing. Elements of engineering thermodynamics, fluid mechanics, heat and mass transfer. Quantitative analysis through problem solving and simulation. Not open for credit to students enrolled in College of Engineering. GE credit: SciEng | QL, SE, VL.—F. (F.) Simmons

#### 110L. Food Processing Laboratory (2)

Laboratory—3 hours; discussion—1 hour. Prerequisite: course 50, course 110 (must be taken concurrently). Open to Food Science majors only. Laboratory exercises to gain experience with common food processing operations at the bench and pilot plant scales. GE credit: SciEng | QL, SE, SL, VL.—F. (F.) Bornhorst

#### 117. Design and Analysis for Sensory Food Science (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Statistics 100. Methods of design and analysis for sensory food science. Experimental design strategies. Use of taste panels and consumer testing. Data analysis and computation including the relative merits and limitations of parametric and nonparametric approaches. Modifications for quality assurance. GE credit: SciEng | QL, SE.—F. (F.) O'Mahony

#### 119. Chemistry and Technology of Milk and Dairy Products (4)

Lecture—4 hours; demonstrations and a field trip. Prerequisite: Biological Sciences 2A; consent of instructor. Composition, structure and properties of milk and products derived from milk. Relates chemical, microbiological, and technological principles to commercial practices in processing of milk and its products. GE credit: SciEng | QL, SE, VL.—S. (S.) Rosenberg

#### 123. Introduction to Enzymology (3)

Lecture—3 hours. Prerequisite: course 123L concurrently. Principles of physical, chemical and catalytic properties of enzymes and their importance. Purification, characterization, and quantitative evaluation of reaction conditions on activity are stressed. Specific

ity and mechanism of action illustrated by use of selected enzymes. [Former course Biochemistry and Biophysics 123.] GE credit: SciEng | QL, SE, VL.—S. (S.) G. Smith

### 123L. Enzymology Laboratory (2)

Lecture—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 103, course 123 (concurrently). Laboratory procedures involved in detection, purification and characterization of enzymes. [Former course Biochemistry and Biophysics 123L.] GE credit: SciEng | QL, SE, VL, WE.—S. (S.) G. Smith

### 127. Sensory Evaluation of Foods (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 117. A critical examination of methods of sensory measurement applied to food and beverage systems; descriptive analysis and consumer tests and their application to quality assurance, product development and optimization. GE credit: SciEng | QL, SE, WE.—W. (W.) Guinard

### 128. Food Toxicology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102, 103. Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards. (Same course as Environmental Toxicology 128.) GE credit: SciEng | SE.—S. (S.) Gaikwad

### 131. Food Packaging (4)

Lecture—3 hours; discussion—1 hour. Prerequisites: Chemistry 8B, Biological Sciences 1B, Physics 7C. Class size limited to 50 students. Principles of food packaging. Functions of packaging. Properties of metal, glass, paper and plastic materials and packages. Design, fabrication, and applications of food packaging. Packaging of fresh and processed foods, including fruits and vegetables, dairy foods, beer and wine. Offered irregularly. GE credit: SciEng | SE.—Su. (Su.)

### 151Y. Food Freezing (1)

Discussion—1 hour; web virtual lecture. Prerequisite: course 110A or the equivalent. Mechanisms of ice crystallization, interpretation of freezing diagrams, and modes of heat transfer. Food properties at sub-freezing temperatures, refrigeration requirements, and estimation of freezing times. Industrial systems used in freezing foods. GE credit: SciEng | QL, SE.

### 159. New Food Product Ideas (3)

Lecture—3 hours. Prerequisite: course 50; Biological Sciences 2A, 2B, 2C; Physics 7A, 7B, 7C and Chemistry 2A, 2B, 2C. Create, refine, test and present viable ideas for new food products. Activities include trend monitoring, consumer research, idea generation, concept screening, and new product concept presentations. GE credit: ArtHum or SocSci | AH or SS, OL, WE.—F. (F.) Biltkekoff

### 160. Food Product Development (4)

Lecture—1 hour; discussion—1 hour; laboratory—6 hours. Prerequisite: courses 50, 103, 104, 110. Product implementation stage of food product development including preliminary product description, prototype development, product testing, and formal presentation of a new product development. GE credit: SciEng | OL, SE, VL.—S. (S.) Lange

### 190. Senior Seminar (1)

Seminar—1 hour. Prerequisite: senior standing or consent of instructor. Selected topics presented by students on recent advances in food science and technology. Reports and discussions concerning oral and written presentations, literature sources and career opportunities. GE credit: SciEng | OL, SE.—S. (S.) Young

### 192. Internship for Advanced Undergraduates (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience on or off campus in the practical application of food science. (P/NP grading only.) GE credit: SE.

### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.

### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.) GE credit: SE.

### Graduate

#### 201. Food Chemistry and Biochemistry (4)

Lecture—4 hours. Prerequisite: undergraduate courses in organic chemistry and biochemistry; undergraduate course in food chemistry is recommended. Restricted to graduate standing or consent of instructor. Advanced topics in food chemistry and biochemistry, emphasizing the application of the basic principles of chemistry and biochemistry to food composition, properties, preservation and processing. Chemical structures, interactions, reaction mechanisms and experimental methods are stressed.—F. (F.) Barile

#### 202. Chemical and Physical Changes in Food (4)

Lecture—3 hours; term paper. Prerequisite: Biological Sciences 103; Chemistry 107B. Fundamental principles of chemistry and physics are applied to a study of changes in water binding properties and activity, changes in proteins, nutrients, toxic constituents, and other compounds during storage, heating, freezing, dehydrating, and concentrating of food materials.—S. (S.) Dungan

#### 203. Food Processing (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 110A, Physics 5C or 7C, Chemistry 107B, or consent of instructor. Principles of food engineering applied to food processing. Relationship of Newtonian and non-Newtonian fluid properties to heat and momentum transfer. Application of mass transfer in controlling kinetics and quality changes of foods.—W. (W.) Nitin

#### 204. Advanced Food Microbiology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1C, 103, course 104 or a course in microbiology. Principles of and recent developments in food microbiology, including food pathogen virulence and detection, parameters of microbial growth in food, and the microbiology of food and beverage fermentations.—S. (S.) Marco

#### 205. Industrial Microbiology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 102, 103; Microbiology 130A-130B or Biological Sciences 101 recommended. Use of microorganisms for producing substances such as amino acids, peptides, enzymes, antibiotics and organic acids. Emphasis on metabolic regulation of pathways leading to fermentation products, on yeast fermentations, and on genetic manipulations (including recombinant DNA techniques) of industrial microorganisms.

#### 207. Advanced Sensory-Instrumental Analyses (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 107 and consent of instructor. Basic principles of measurement of color, texture, and flavor of foods by sensory and instrumental methods. Advanced statistical analysis of relation of colorimetry, texturometry, and chemistry of volatile compounds to perception of appearance, texture, flavor.

#### 210. Proteins: Functional Activities and Interactions (3)

Lecture—3 hours. Prerequisite: Biological Sciences 103. The relationships of structure of proteins to their biological functions. Structural proteins, complexing proteins, and catalytic proteins in plant and animal materials and products.

#### 211. Lipids: Chemistry and Nutrition (3)

Lecture—3 hours. Prerequisite: Biological Sciences 103, Chemistry 107B, 128B. Chemistry of lipids as it pertains to research in food and nutrition. Relations between lipid structure and their physical properties in tissues and foods. Regulation of absorption, transport, and metabolism of lipids. Implications of dietary fats and health.—W. (W.) German

#### 213. Flavor Chemistry of Foods and Beverages (3)

Lecture/discussion—3 hours. Prerequisite: Chemistry 8B, Viticulture and Enology 123, Viticulture and Enology 123L or course 103 or consent of instruc-

tors. Students will become familiar with basic principles of flavor chemistry, analysis, and formation in fresh and processed foods. Students will be required to read and critically evaluate flavor chemistry literature. (Same course as Viticulture and Enology 213).—S. (S.) Ebeler, Heymann

#### 217. Advanced Food Sensory Science (3)

Lecture—3 hours. Prerequisite: course 107 (may be taken concurrently) or consent of instructor. Advanced study of the techniques and theory of the sensory measurement of food as an analytical tool and as a measure of consumer perception and acceptance. Advanced examination of the sensory and cognitive systems associated with the perception of food.—F. (F.) O'Mahony

#### 219. Biochemistry, Microbiology and Technology of Cheeses of the World (4)

Lecture—4 hours. Prerequisite: course 119 and Biological Sciences 103 or course 100A, 123, Biological Sciences 103, Chemistry 107B, 128B or consent of instructor. Restricted to graduate level students or senior undergraduate students with appropriate background in biochemistry and microbiology. Compositional and physico-chemical aspects of milk and their implications on cheesemaking; enzymatic, microbiological and physical aspects of cheesemaking; cheese as a biological composite; designing cheese quality attributes; cheese aging. Cheese from all over the world will be tasted and discussed. Offered in alternate years.—(S.) Rosenberg

#### 227. Food Perception and the Chemical Senses (2)

Lecture—2 hours. Prerequisite: course 107B (may be taken concurrently), or consent of instructor. Examination of the anatomy and physiology of the chemical senses (taste, smell, and the trigeminal sense) and how they are involved in the perception of food and food intake.—W. Guinard

#### 290. Seminar (1)

Seminar—1 hour. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

#### 290C. Advanced Research Conference (1)

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Critical presentation and evaluation of original research by graduate students. Planning of research programs and proposals. Discussion led by individual major instructors for their research group. (S/U grading only.)—F, W, S. (F, W, S.)

#### 291. Advanced Food Science Seminar (1)

Seminar—1 hour. Prerequisite: completion of at least one quarter of course 290. Oral presentation of student's original research, discussion, and critical evaluation. (S/U grading only.)—S. (S.)

#### 298. Group Study (1-5)

(S/U grading only.)

#### 299. Research (1-12)

Prerequisite: graduate standing. (S/U grading only.)

### Professional

#### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## Food Service Management

(College of Agricultural and Environmental Sciences)

**Faculty.** See under the Department of [Nutrition](#), on page 490.

### The Major Program and Graduate Study.

Food Service Management is incorporated within the major of Clinical Nutrition. If you are interested in preparing for a career in commercial organizations such as hotels, restaurants, industrial cafeterias, or contract food services, as well as in public or private institutions such as hospitals, correctional institutions, schools, or colleges, consult the Department of Nutrition.

**Related Courses.** See Nutrition.

## Courses in Food Service Management (FSM)

Questions pertaining to the following courses should be directed to the instructor or to the Nutrition Department Advising office in 3202 Meyer Hall 530-752-2512.

### Upper Division

#### 120. Principles of Quantity Food Production (4)

Lecture—3 hours; independent study—1 hour. Prerequisite: Food Science and Technology 100B and 101B. Restricted to upper division Clinical Nutrition students only. Fundamental principles of food service management, including quantity food preparation, institutional equipment, receiving and storage, service, menu planning, merchandising, and safety. Students will earn food safety certification.—S. (S.) Frank

#### 120L. Quantity Food Production Laboratory (2)

Laboratory—6 hours. Prerequisite: course 120. Laboratory experience in quantity food production and service.—F, S. (F, S.) Frank

#### 122. Food Service Systems Management (3)

Lecture—3 hours. Prerequisite: Agricultural and Resource Economics 112, course 120. Principles of quantity food production management: production schedules, portion control, financial management, layout and equipment planning, evaluation of alternative systems, and computer applications.—W. (W.) Frank

#### 192. Internship (1-12)

Internship—3-36 hours. Prerequisite: one upper division course in Food Service Management and consent of instructor. Work experience on or off campus in practical aspects of food service management, supervised by a faculty member. (P/NP grading only.)—Steinberg

#### 197T. Tutoring in Food Service Management (1-2)

Discussion/laboratory—3 or 6 hours. Prerequisite: Dietetics or related major; completion of the Food Service Management course in which tutoring is done. Tutoring of students in food service management, assistance with discussion groups or laboratory sections; weekly conference with instructor in charge of course; written evaluations. May be repeated if tutoring a different course. (P/NP grading only.)—Steinberg

#### 198. Directed Group Study (1-5)

(P/NP grading only.)—Steinberg

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)—Steinberg

## Forensic Science (A Graduate Group)

Robert H. Rice, Ph.D., Chairperson of the Group

**Group Office.** 1909 Galileo Ct., Suite B  
Davis, CA 95618; 530-747-3922;  
<http://forensicscience.ucdavis.edu>

### Faculty

Faculty members are listed on the website.

**Graduate Study.** The Forensic Science Graduate Group offers the degree of MS in Forensic Science. This program, offering a Plan I-Thesis option, has two tracks, DNA or Criminalistics, enabling the student to take core courses emphasizing the physical or biological sciences. Each track requires the student to take eight to nine core courses, totaling 24-27 units, three units of seminar, and the appropriate number of elective/research units for a total of 54 units. Students can take courses outside their specializations, but they must complete the courses required

for their own track. The FOR seminar course in the fall quarter is required for new students. The FOR spring seminar can be taken in any spring quarter before graduation. Students must also take one additional seminar course in another department or program.

**Preparation.** Appropriate preparation is an undergraduate degree in physical or natural sciences, engineering or a closely related field with a GPA of 3.000 or higher. Examples include Biochemistry, Chemistry, Molecular Biology, Biology, Genetics, and Engineering. Applicants must have completed at least one year each of general chemistry, organic chemistry, general physics, math through calculus and a class in statistics. Other recommended courses include general biology, biochemistry and genetics.

**Graduate Advisers.** Cassandra Calloway (*Forensic Science Graduate Program; Environmental Toxicology*), You-Lo Hsieh (*Division of Textiles and Clothing*), Christopher J. Hopkins (*Forensic Science Graduate Program*), Robert B. Kimsey (*Entomology*), Donald Land (*Chemistry*), Terence Murphy (*Plant Biology*), Ben Sacks (*Population Health & Reproduction/Canid Diversity and Conservation Laboratory-Center for Veterinary Genetics*), Bahram Ravani (*Mechanical & Aeronautical Engineering*), Moshe Rosenberg (*Food Science and Technology*), Matt Wood (*Environmental Toxicology*)

## Courses in Forensic Science (FOR) Graduate

#### 200. Fundamental Concepts in Forensic Science (3)

Lecture—2 hours; fieldwork—0.25 hours; lecture/laboratory—0.25 hours; seminar—0.5 hours. Overview of forensic science. Problem definition, strategies for problem solving, analytical tools, and professional and ethical considerations.—F. (F.) Sensabaugh

#### 205. Microscopy and Microanalytical Methods in Forensic Science (3)

Lecture—2 hours; laboratory—1 hours. Prerequisite: consent of instructor. Restricted to students enrolled in the M.S. in Forensic Science Program; a minimum, year each of the following chemistry, organic chemistry, calculus, & physics. Introduction to optical and electron microscopy. Transmission, diffraction, reflection and absorption; polarized light and polarizing crystals; phase contrast. Radiography; image recording, SEM analysis of gunshot residues, paints, glass. EDS, XRF analysis, signal-to-noise ratios, minimum detectable levels and homogeneity. Offered in alternate years.—(S.) van Benthem

#### 207. Advanced Spectroscopy Methods in Forensic Science (3)

Lecture—3 hours. Restricted to Forensic Science Graduate program or consent of instructor. Discuss, evaluate and interpret advanced molecular spectra/structure, Infrared Spectroscopy, such as chemical applications of spectroscopic methods; vibrational, rotational spectra; electronic spectra, photoelectron spectroscopy generated by various analytical instruments used in forensic science community. Offered in alternate years.—F. (F.) Wood

#### 210. Personal Identification Methods in Forensic Science (3)

Lecture—3 hours. Prerequisite: restricted to students enrolled in the M.S. Forensic Science Program or consent of instructor. Methods for identifying individuals from evidence collected at crime scenes, suspects or victims, crime scene examination and analytical methods used to support such investigations. Topics include forensic anthropology and odontology; latent prints; shoe prints; facial reconstruction/recognition; eyewitness identifications; biometric systems.—S. (S.) Hopkins

#### 212. Scientific Evidence and Courtroom Testimony (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: graduate students enrolled in the MS Forensic Science program or by consent of instructor. Explores the relationship between science and the criminal justice system. Admissibility of scientific testimony

and documentary proof during the trial, concepts of relevancy, hearsay and opinion rule, examination of expert witnesses, impact of Kelley-Fry and Daubert decisions & court testimony.—W. (W.) Chamberlain, Maucieri

#### 215. Forensic Fire and Arson Investigation (3)

Lecture—3 hours. Prerequisite: open only to students enrolled in the M.S. Forensic Science program or by consent of the Forensic Science Program Director. Principles and techniques of scientific investigation of fires and related crimes; offer peer-reviewed protocols for processing fire and explosion scenes; discuss recognition, collection, analysis of physical evidence, and describe the scientific method for decision-making in fire/arson investigation. Offered in alternate years.—(S.) DeHaan

#### 218. Technical Writing in Forensic Science (3)

Lecture—2 hours; extensive writing or discussion—1 hour. Prerequisite: consent of the instructor required for all students not enrolled in the Forensic Science program. Restricted to graduate standing in the Forensic Science program. How to write clear, credible forensic science reports and scientific articles, that (a) serve the ends of the justice system, (b) meet their readers' varying needs and (c) reflect well on the author.—F, S. (F, S.) Neumann

#### 220. Analysis of Toxicants (3)

Lecture—3 hours. Prerequisite: coursework in organic chemistry. Principles of microanalysis of toxicants. Theoretical considerations regarding separation, detection and quantitative determination of toxicants using chemical and instrumental techniques. (Same course as Environmental Toxicology 220).—F. (F.) Zhang

#### 221L. Forensic Science Analytical Instrumentation (2)

Lecture/discussion—1 hour; laboratory—3 hours. Methodology and instruments used for the analysis of substances of interest in the discipline of Forensic Science. Practical experience with modern instrumental techniques & methodologies used in the advanced forensic science laboratory. Limited to students accepted in the Forensic Science Graduate program or subject to the approval of the instructor if the student has the appropriate chemistry, calculus and physics courses required of students in the graduate forensic science program.—F. (F.) Land

#### 240. Homicide Crime Scene Investigation (3)

Lecture—2 hours; laboratory—3 hours. Restricted to Forensic Science Masters Program Students; enrollment is limited to 15 students per class. Processing and evaluating complex homicide scenes. Functions and activities of police agencies. Recognition, documentation, identification, and collection of evidence. Event sequence reconstruction. Evidence collection, preservation, report writing. Courtroom presentation.—F, S. (F, S.) Hopkins

#### 263. Forensic Computer Science Investigations (3)

Lecture—3 hours. Prerequisite: graduate student; consent of instructor. Restricted to students in the Forensic Science Graduate program unless approved by instructor. Discuss the threats to the security of any kind of evidence that is captured, transmitted, or stored digitally and develop critical thinking and basic knowledge of computer forensic science issues in the evaluation of digital evidence.—S. (S.)

#### 268. Statistics in Forensic Science (3)

Lecture—3 hours. Prerequisite: consent of instructor. Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of Forensic Science Program Director. Statistics that are used by the forensic scientist, their limitations/applications in presenting evidential results in such areas as DNA-STR results, trace evidence correlation, fingerprint statistics, population sampling and the Bayes method. Offered in alternate years.—W. (W.)

### **277. Forensic Genetics; Next Generation Techniques and Applications (3)**

Lecture—3 hours. Prerequisite: undergraduate courses in fundamental and applied principles of genetics, biochemistry, and molecular biology, or consent of instructor. Restricted to Forensic Science Graduate students (GFOR) or consent of instructor. Review organization/function of the human genome, recent developments, next generation sequencing techniques including the preparation of DNA samples, principles of the new generation sequencing assay formats and biochemical reactions. Will include quality control parameter, and bioinformatic approaches. Offered in alternate years.—F.

### **278. Molecular Techniques (3)**

Lecture—3 hours. Prerequisite: graduate standing or consent of instructor. Recombinant DNA technology and its applications. (Same course as Environmental Toxicology 278.) Offered in alternate years.—F. Denison, Rice

### **280. Forensic DNA Analysis (3)**

Lecture—3 hours. Prerequisite: coursework in genetics and molecular biology. Graduate standing; consent of instructor required for all students not enrolled in the MS Forensics program. Foundation in theory and practice of forensic DNA analysis; past, present, and emerging technologies; legal and quality assurance issues. DNA extraction, DNA quantitation, multiplex amplification of STR loci, capillary electrophoresis of amplified products, and analysis of STR typing data. (Same course as Environmental Toxicology 280.)—W. (W.) Von Beroldingen

### **281. Principles and Practice of Forensic Serology and DNA Analysis (3)**

Lecture—2 hours; lecture/discussion—3 hours. Prerequisite: course/Environmental Toxicology 278 or course/Environmental Toxicology 280, or equivalent; consent of instructor. Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of Forensic Science Program Director. Comprehensive overview of forensic serology and DNA typing techniques and technologies. Strong emphasis on real-world applications, including preservation and tracking of biological evidence, detection and identification of bodily fluids, and methods to extract, quantify, and type human DNA. (Same course as Environmental Toxicology 281.)—S. (S.) Rodzen

### **283. Forensic Biology (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: consent of instructor. Restricted to students enrolled in the M.S. in Forensic Science program or by consent of the Forensic Science Program Director. Overview of the foundational concepts in forensic biology: chemistry and molecular biology of biological evidence, genetic basis of biological uniqueness, evolutionary basis of species differences, patterns and dynamics of evidence deterioration, and the legal/professional considerations associated with biological evidence.—W. (W.) Sensabaugh

### **284. Non-Human Forensic DNA—Theory and Casework Application (2)**

Lecture—2 hours. Prerequisite: consent of instructor required for all students not enrolled in the MS Forensics program; upper division Molecular Biology and Genetics or its equivalent. Restricted to graduate standing. Provides a comprehensive understanding of plant and animal forensic biology in terms of sample collection, preservation, analytical methods, and of the invaluable lines of inquiry these forensic evidence may permit. (Same course as Environmental Toxicology 284.) Offered in alternate years.—F.

### **289. Survey in Forensic Science (3)**

Lecture—3 hours. Restricted to students enrolled in the M.S. in Forensic Science Program. Analytical methods in contemporary forensic science. Clandestine laboratories in California, crime scene management, examination and analysis of human hair, forensic ballistics/trajectory reconstruction, shoe/tire print impressions, serial number restoration, forensic aspects of alcohol impairment, bloodstain pattern

interpretation, microscopy of building materials, biological aspect of forensic science. May be repeated for credit when topic differs.—W. (W.) Hopkins

### **290. Seminar in Forensic Science (1)**

Seminar—3 hours. Students will be exposed to topical areas in Forensic Science by presentations conducted by expert guest speakers. The seminar will also serve as a medium whereby the exiting students will present the research conducted as part of their thesis requirement. May be repeated for credit when topic differs. Restricted to students enrolled in the M.S. in Forensic Science Program. (S/U grading only.)—F, S. (F, S.) Hopkins

### **290C. Graduate Research Conference in Forensic Science (1)**

Independent study—1 hour. Restricted to students enrolled in the M.S. in Forensic Science Program. Individual and/or group conference on problems, progress and techniques in forensic science and research. May be repeated for credit when topic differs. Offered irregularly. (S/U grading only.)—F, W, S. (F, W, S.) Hopkins

### **293. Forensic Science Research Methodology (2)**

Lecture—1.5 hour; extensive writing or discussion—0.5 hours. Restricted to students enrolled in the Graduate Forensic Science program or by consent of the instructor. Introduction to identification, formulation, and solution of meaningful scientific problems encountered in the Forensic Science area including experimental design and/or theoretical analysis of new and prevailing techniques, theories and hypotheses. Students will present and defend their thesis research/journal article proposals. (S/U grading only.)—W. (W.) Kimsey

### **298. Group Study in Forensic Science (1-5)**

Restricted to students enrolled in the M.S. in Forensic Science Program. May be repeated for credit when topic differs. Offered irregularly. (S/U grading only.)—F, W, S. (F, W, S.)

### **299. Research in Forensic Science (1-12)**

Prerequisite: consent of instructor. Restricted to students enrolled in the M.S. in Forensic Science Program. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## **French**

(College of Letters and Science)

Noah Guynn, Ph.D., Chairperson of the Department

**Department Office.** 213 Sproul Hall  
530-752-1219; <http://french.ucdavis.edu>

### **Faculty**

Jeff Fort, Ph.D., Associate Professor  
Claire Goldstein, Ph.D., Associate Professor  
Noah Guynn, Ph.D., Associate Professor  
Eric Russell, Ph.D., Associate Professor  
Julia Simon, Ph.D., Professor  
Toby Warner, Ph.D., Assistant Professor

### **Emeriti Faculty**

Claude Abraham, Ph.D., Professor Emeritus  
Edward M. Bloomberg, Ph.D., Professor Emeritus  
Simone Clay, Ph.D., Lecturer Emerita  
Gerald Herman, Ph.D., Senior Lecturer Emeritus  
Margo R. Kaufman, M.A., Senior Lecturer Emerita  
Manfred Kusch, Ph.D., Senior Lecturer Emeritus  
*(Comparative Literature, French and Italian)*  
Marshall Lindsay, Ph.D., Professor Emeritus  
Maria I. Manoliu, Ph.D., Professor Emerita  
Michèle Praeger, Ph.D., Professor Emerita  
Leslie Rabine, Ph.D., Professor Emerita  
*(French, Italian, Women and Gender Studies)*  
Ruth B. York, Ph.D., Senior Lecturer Emerita

### **The Major Program**

The major program assures proficiency in all four of the language skills—speaking, understanding, reading, and writing—and acquaints students with the intellectual and cultural contributions of the French-

speaking world through the study of its literature, traditions, and institutions.

**The Program.** The department encourages its students to work closely with the academic adviser in designing a major tailored to their needs and interests within the broad requirements prescribed by the program and to avail themselves of the guidance of an excellent teaching faculty. Each year, a substantial number of students with good preparation in French participate in the university's very popular Education Abroad Program, which maintains centers in Bordeaux, Lyon, and Paris.

**Career Alternatives.** Foreign language teachers, a cardiologist, a veterinarian, a naval commander at the Pentagon, a professor of Political Science, lawyers, sales representatives, journalists, a speech pathologist, a law professor, translators, a senior applications programmer, travel agents, independent business owners, a senior museum curator, nurses, financial managers, stock brokers, and an industrial attaché for a French Trade Commission—all graduated with an A.B. in French from UC Davis. These represent only a small fraction of the career choices documented in a survey of department graduates.

### **A.B. Major Requirements:**

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>4-34</b>
French 1, 2, 3 (or the equivalent) .....	0-15
French 21, 22, 23 (or the equivalent) .....	0-15
Linguistics 1 or 4 .....	4
<b>Depth Subject Matter .....</b>	<b>44</b>
French 100 .....	4
Three French literature courses from among the following (at least one course must cover pre-revolutionary literature; such courses are marked with an asterisk): 101, 102, 103, *115, *116, *117A, *117B, *118A, *118B, 119A, 119B, 119C, 120, 121, 124, 125, 130, 140, 141 .....	12
Two French culture courses from among the following: 107, 108, 127, 128 .....	8
Two French linguistics and language science courses from among the following: 105, 109, 160, 161, 162 .....	8
Elective courses in French literature, language, or culture, to be chosen in consultation with an undergraduate adviser from among the following: 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 115, 116, 117A, 117B, 118A, 118B, 119A, 119B, 119C, 120, 121, 124, 125, 130, 140, 141 .....	12
<b>Total Units for the Major.....</b>	<b>48-78</b>

**Major Adviser.** T. Warner

### **Minor Program Requirements:**

	UNITS
<b>French.....</b>	<b>24</b>
French 100 .....	4
One French literature course from among the following: 101, 102, 103, 115, 116, 117A, 117B, 118A, 118B, 119A, 119B, 119C, 120, 121, 124, 125, 130, 140, 141 .....	4
One French culture course from among the following: 107, 108, 127, 128 .....	4
One French linguistics and language science course from among the following: 105, 109, 160, 161, 162 .....	4
Two elective courses in French literature, language, or culture from among the following: 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 115, 116, 117A, 117B, 118A, 118B, 119A, 119B, 119C, 120, 121, 124, 125, 127, 128, 130, 133, 140, 141, 160, 161, 162 .....	8

**Honors Program.** Candidates for high or highest honors in French must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in French 194H (4 units) and French 195H (4 units). Normally, a student will

undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of the junior year (135 units), have attained a cumulative grade-point average of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in French are in addition to the regular requirements for the major in French.

**Education Abroad Program.** The department of French and Italian encourages students to study abroad in the Education Abroad program. With the approval of a major adviser, applicable courses taken abroad may be accepted in the major or minor programs.

**Graduate Study.** The department offers programs of study and research leading to the M.A. and Ph.D. degrees in French. Candidates for the Ph.D. have the option of enriching their degree program by preparing a designated emphasis in African American and African Studies, Classics and Classical Receptions, Critical Theory, Feminist Theory and Research, Second Language Acquisition, and/or Studies in Performance and Practice. Detailed information may be obtained from the graduate adviser or the department chairperson.

**Graduate Adviser.** C. Goldstein

**Prerequisite Credit.** Credit will not normally be given for a course if it is the prerequisite of a course already successfully completed. Exceptions can be made by the department chairperson only.

### Courses in French (FRE)

Students offering high school language preparation as a prerequisite must take a placement test.

**Course Placement.** Students with two years of high school French normally take French 2, those with three years take French 3, and those with four years take French 21.

### Lower Division

#### 1. Elementary French (5)

Discussion—5 hours; laboratory—1 hour. Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication. Not open for credit to students who have taken course 1A; students who have successfully completed French 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only, although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed. GE credit: ArtHum | AH, WC.—F, W, S, Su. (F, W, S, Su.)

#### 1A. Accelerated Intensive Elementary French (15)

Lecture/discussion—15 hours. Prerequisite: placement exam required. Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication. Special 12-week, accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Not open for credit to students who have completed course 1, 1S, 2, 2S, 3, or 3S. GE credit: ArtHum | AH, WC.—Su. (Su.)

#### 1S. Elementary French (5)

Discussion—5 hours; laboratory—1 hour. Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication. Course is taught abroad. Students who have successfully completed French 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed. Not open for credit to students who have completed course 1 or 1A. GE credit: ArtHum | AH, WC.

#### 2. Elementary French (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1. Continuation of course 1. Not open for credit to students who have taken course 1A. GE credit: ArtHum | AH, WC.—F, W, S, Su. (F, W, S, Su.)

#### 2S. Elementary French (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1 or 1S. Continuation of course 1. Course is taught abroad. Not open for credit to students who have completed course 1A or 2. GE credit: ArtHum | AH, WC.

#### 3. Elementary French (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 2. Continuation of course 2. Not open for credit to students who have taken course 1A. GE credit: ArtHum | AH, WC.—F, W, S. (F, W, S.)

#### 3S. Elementary French (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 2 or 2S. Not open for credit to students who have taken course 1A. Continuation of course 2. Course is taught abroad. Not open for credit to students who have completed course 1A or 3. GE credit: ArtHum | AH, WC.

#### 21. Intermediate French (5)

Lecture/discussion—4 hours; laboratory—1 hour. Prerequisite: course 1A, 3, or 3S. Review of grammar and vocabulary acquired in the elementary sequence, as well as the study of new grammatical structures and a continuing enrichment of vocabulary through oral work in class, written exercises, readings and compositions. Not open for credit to students who have completed course 21S. GE credit: ArtHum | AH, OL, WC, WE.—F, W, S. (F, W, S.)

#### 21S. Intermediate French (5)

Lecture/discussion—4 hours; laboratory—1 hour. Prerequisite: course 1A, 3, or 3S. Review of grammar and vocabulary acquired in the elementary sequence, as well as the study of new grammatical structures and a continuing enrichment of vocabulary through oral work in class, written exercises, readings and compositions. Not open for credit to students who have completed course 21. GE credit: ArtHum | AH, OL, WC, WE.

#### 22. Intermediate French (5)

Lecture/discussion—4 hours; laboratory—1 hour. Prerequisite: course 21 or 21S. Continuation of course 21 or 21S. Review of grammar and vocabulary, as well as the study of new grammatical structures and a continuing enrichment of vocabulary. Not open for credit to students who have completed course 22S. GE credit: ArtHum | AH, OL, WC, WE.—F, W, S. (F, W, S.)

#### 22S. Intermediate French (5)

Lecture/discussion—4 hours; laboratory—1 hour. Prerequisite: course 21 or 21S. Continuation of course 21 or 21S. Review of grammar and vocabulary, as well as, the study of new grammatical structures and a continuing enrichment of vocabulary. Not open for credit to students who have completed course 22. GE credit: ArtHum | AH, OL, WC, WE.

#### 23. Intermediate French (5)

Lecture/discussion—4 hours; laboratory—1 hour. Prerequisite: course 22 or 22S. Continuation of course 22 or 22S. Review of grammar and vocabulary, as well as the study of new grammatical structures and a continuing enrichment of vocabulary. Not open for credit to students who have completed course 23S. GE credit: ArtHum | AH, OL, WC, WE.—F, W, S. (F, W, S.)

#### 23S. Intermediate French (5)

Lecture/discussion—4 hours; laboratory—1 hour. Prerequisite: course 22 or 22S. Continuation of course 22 or 22S. Review of grammar and vocabulary, as well as, the study of new grammatical structures and a continuing enrichment of vocabulary. Not open for credit to students who have completed course 23. GE credit: ArtHum | AH, OL, WC, WE.

#### 50. French Film (4)

Lecture—1 hour; discussion—2 hours; term paper. Introduction to the tradition of French cinema from its invention by Méliès and the Lumière brothers through New Wave (especially the works of Truffaut and Godard) and more recent developments in French and Francophone film. Taught in English. Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WC, WE.—Fort, Warner

#### 51. Major Works of French Literature in Translation (4)

Lecture—2 hours; discussion—1 hour; term paper. Readings in English translation of key works of French and Francophone literature from the Middle Ages to the present. Particular attention is given to the long-standing interest of French writers in issues of social, regional, gender, sexual, and ethnic identity. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Fort, Guynn

#### 52. France and the French-Speaking World (4)

Lecture—2 hours; discussion—1 hour; term paper. Taught in English. A survey of the history and culture of France and the French-speaking world, especially Canada, the Caribbean and Africa. Study of social, historical and cultural issues that occupy the French-speaking world, with particular attention to mass media. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Simon

#### 53. French as a World Language (4)

Lecture/discussion—3 hours; term paper. The linguistic status of French and its function in multilingual societies and international arenas. Linguistico-political landscape of communities in Euroasia, Africa, and the Americas. Sociolinguistic concepts and emergence of French as a world language. GE credit: ArtHum or SocSci, Div, Wrt | AH, OL, WC, WE.—Russell

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division

Course 100 is the prerequisite for the majority of the upper division literature courses.

#### 100. Composition in French (4)

Lecture—3 hours; term paper. Prerequisite: course 23. Instruction and practice in expository writing in French, with emphasis on organization, correct syntax, and vocabulary building. GE credit: ArtHum | AH, WC, WE.—F, W, S. (F, W, S.) Goldstein, Simon, Warner

#### 101. Introduction to French Poetry (4)

Lecture—3 hours. Prerequisite: course 100 or consent of instructor. Analysis and evaluation of works representing the main types of French poetry. Study of French poetic conventions and versification. GE credit: ArtHum | AH, WC, WE.—Goldstein

#### 102. Introduction to French Drama (4)

Lecture—3 hours. Prerequisite: course 100 or consent of instructor. Analysis and evaluation of plays representing the main types of French drama, with emphasis on dramatic structure and techniques. GE credit: ArtHum | AH, WC, WE.—Guynn

#### 103. Introduction to French Prose (4)

Lecture—3 hours; short papers. Prerequisite: course 100 or consent of instructor. Analysis and evaluation of works representing main types of French prose, with emphasis on narrative structure and techniques. GE credit: ArtHum | WC.—Fort, Simon

#### 104. Translation (4)

Lecture—3 hours; extensive writing. Prerequisite: course 100 or the equivalent. Practice in English-to-French and French-to-English translation using a variety of non-literary materials, illustrating different problems and styles.

**105. Advanced French Grammar (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 23 or the equivalent. Understanding of, and extensive practice with, various grammatical structures in French. Lexical-semantic, morphological, and syntactic analysis. GE credit: WE.

**105S. Advanced French Grammar (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 23 or 23S. Understanding of, and extensive practice with, various grammatical structures in French. Lexical-semantic, morphological, and syntactic analysis. Taught abroad. Not open for credit to students who have taken course 105. GE credit: WE.

**106. French in Business and the Professions (4)**

Lecture—1 hour; discussion—2 hours. Prerequisite: course 100 or consent of instructor. The French language as used in the commercial sphere. Emphasis on proper style and form in letter-writing, and in non-literary composition. Technical terminology in such diverse fields as government and world business. GE credit: WE.

**107. The Making of Modern France (4)**

Lecture—3 hours; term paper. Prerequisite: course 23. Introduction to French culture through a historical approach to topics such as the citizen and the state (politics, justice, social security), the nation and centralization, the rise of public education, colonization, class and social relationships. GE credit: ArtHum | AH, WE.—Goldstein, Simon

**107A. Pre and Early Modern France (4)**

Lecture—3 hours; term paper. Prerequisite: course 23. Introduction to pre- and early modern French culture through a historical approach to topics such as the feudal system, the rise of the monarchy, the Reformation and religious wars. GE credit: ArtHum, Wrt | AH, WC, WE.—Goldstein, Simon

**107B. The Making of Modern France (4)**

Lecture—3 hours; term paper. Prerequisite: course 23. Introduction to French culture through a historical approach to topics such as the absolute monarchy, the role of the parlements, the French revolution, and the political regimes of the nineteenth century. GE credit: ArtHum, Wrt.—Goldstein, Simon

**107S. The Making of Modern France (4)**

Lecture—3 hours; term paper. Prerequisite: course 23 or 23S. Introduction to French culture through a historical approach to topics such as the nation-state, centralization of the monarchy, and the rise of public education, colonization, class and social relationships. Taught abroad. Not open for credit to students who have completed course 107. GE credit: ArtHum, Wrt | AH, WC, WE.

**108. Modern French Culture (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 23. Survey of modern French culture from the Dreyfus affair to the present day. Topics may include women and French culture, decolonialization and modernization, education, social welfare and immigration. GE credit: WC, WE.—Fort, Simon

**109. French Phonetics (4)**

Lecture/discussion—3 hours; laboratory—1 hour. Prerequisite: course 23 or the equivalent. Introduction to the sound-inventory of French and practice in phonetic transcription, with a focus on ways in which phonetic contrasts signal grammatical contrasts; spoken forms and spelling; formal differences between the "Standard" and other varieties across the French-speaking world. GE credit: ArtHum or SocSci | AH or SS.—Russell

**110. Stylistics and Creative Composition (4)**

Lecture—3 hours; frequent papers. Prerequisite: course 100 or consent of instructor. Intensive course in creative composition using a variety of techniques and literary styles, patterned on Queneau's *Exercices de style*. Practice in such stylistic modifications as inversion, antithesis, changes in tense, mood, tonality, etc. The writing of poetry. GE credit: WC.

**115. Medieval French Literature and Society (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Social and cultural life of medieval France as studied through its representation in such literary works as *La Chanson de Roland*, courtly love lyric, the Arthurian romances of Chrétien de Troyes, *Aucassin et Nicolette*, selected fabliaux and farces. GE credit: ArtHum | AH, WC, WE.—Guynn

**116. The French Renaissance (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Overview of major works and writers with particular attention to the historical context of the turbulent 16th century. Writers to be read may include Rabelais, Marot, Ronsard, Du Bellay, Labé, Marguerite de Navarre, Montaigne, and D'Aubigné. GE credit: ArtHum | AH, WC, WE.—Goldstein, Guynn

**117A. Baroque and Preclassicism (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. The literature and intellectual culture of the period between the Renaissance and French classicism. GE credit: ArtHum | AH, WC, WE.—Goldstein, Guynn

**117B. The Classical Moment (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Literature, culture, and politics in the Age of Louis XIV. May be repeated one time for credit when topic differs. GE credit: ArtHum | AH, WC, WE.—Goldstein, Guynn

**118A. The Age of Reason and Revolution (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100. Literature and philosophy of the French Enlightenment. Readings from such authors as Bayle, Fontenelle, Montesquieu, Voltaire, Rousseau and Diderot. GE credit: ArtHum | AH, OL, WC, WE.—Simon

**118B. Private Lives and Public Secrets: The Early French Novel (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. History of the French roman from the Middle Ages to the Revolution with particular emphasis on the novels of the 18th century. GE credit: ArtHum | AH, WC, WE.—Simon

**119A. The Romantic Imaginary (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Major concepts and themes of French Romanticism, such as dream and the supernatural, impossible love, exoticism, revolution, individualism, nature, the mal du siècle, Romantic irony, the creative imagination, the cult of ruin. GE credit: ArtHum, Wrt | AH, WC, WE.—Fort, Simon

**119B. Realism, History and the Novel (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Narrative and historical codes of French realist fiction, with emphasis on the representation of history in the realist novel, its depiction of social "realities" such as class and gender, and its relation to the historical situation of post-revolutionary society. GE credit: ArtHum, Wrt | AH, WC, WE.—Fort, Simon

**119C. From Baudelaire to Surrealism (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Study of the main poets and poetic movements from the mid-19th to the early 20th century, including Baudelaire, the Symbolists, and the Surrealists. GE credit: ArtHum | AH, WC, WE.—Fort, Simon

**120. Modern French Thought (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Overview of post-Second World War French intellectual currents from existentialism to structuralism and deconstructionism. Readings will include Sartre and de Beauvoir, Camus, Lévi-Strauss, Lacan, Barthes, Foucault, Derrida, Kristeva, Sollers, Cixous, and Irigaray. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE.—F. (F.) Fort

**121. Twentieth Century French Novel (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Novels and theories of the novel, from Proust to the Nouveau Roman and beyond. Readings from among Gide, Sartre, de Beauvoir, Camus, Breton, Beckett, Robbe-Grillet, Sarraute, Simon, Barthes, Duras, Tournier, Perec, Modiano, Guibert, Toussaint. GE credit: ArtHum, Wrt | AH, WC, WE.—Fort, Warner

**122. French and Francophone Film (4)**

Lecture/discussion—4 hours; extensive writing; field-work—3 hours. Prerequisite: course 100 or consent of instructor. French and Francophone film from the Lumière Brothers to the present. Topics may include analysis of film form and narrative, major filmmakers and filmic traditions, and film theory. May be repeated one time for credit when topic differs. GE credit: ArtHum | AH, VL, WC, WE.—Fort, Warner

**124. Post-Colonial and Francophone Literature (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Post-Independence Black African and/or Caribbean and/or North African literatures written in French. Selected topics include: identity and subjectivity, the role of the intellectual, women's voices, languages and oral literatures, cultural syncretism, theories of post-colonialism. May be repeated one time for credit with approval of major adviser and instructor; when content differs; for example, students may take the course for repeat credit when the geographical focus (West Africa, North, African or Caribbean) or theme is substantially different from previous iterations. GE credit: ArtHum, Div | AH, WC, WE.—Warner

**125. French Literature and Other Arts (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Relationship between French literature and other arts—painting, music, cinema, architecture, opera—from different periods. May be repeated one time for credit when topic differs. GE credit: ArtHum, Wrt | WC.—Fort, Goldstein, Guynn, Simon

**125S. French Literature and Other Arts (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Relationship between French literature and other arts, such as painting, music, cinema, architecture, or opera, from different periods. Taught abroad. May be repeated one time for credit when topic differs. GE credit: ArtHum, Wrt | AH, VL, WC, WE.

**127. Paris: Modernity and Metropolitan Culture (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Representation of Paris in 19th and 20th century texts and its importance in defining the experience and art of modernity. GE credit: ArtHum, Wrt | AH, WC, WE.—Simon

**128. Topics in French Culture (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 100 or consent of instructor. In-depth study of a particular topic in French culture. Topics may include the Court of Louis XIV, the French Revolution and Immigration. May be repeated one time for credit when topic differs. GE credit: WE.

**128S. Topics in French Culture (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 100 or consent of instructor. In-depth study of a particular topic in French culture. Topics may include the Court of Louis XIV, the French Revolution, and Immigration. Taught abroad. May be repeated one time for credit when topic differs. GE credit: ArtHum | AH, WC, WE.

**130. From Page to Stage: Theatre and Theatricality (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. French theater as literature and performance. May be repeated one time for credit when topic differs. GE credit: ArtHum, Wrt | AH, WC, WE.—Guynn

**133. Gender and Politics in French Literature and Culture (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Thematic, theoretical and political tendencies in contemporary French fiction. Barthes, Foucault, Duras, Guibert, considered in terms of their writing on identity and gender. GE credit: ArtHum, Div | AH, WC, WE.—Guynn

**140. Study of a Major Writer (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Concentrated study of works of a single author. May be repeated one time for credit if author-subject changes. GE credit: ArtHum | AH, WC, WE.

**141. Selected Topics in French Literature (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Subjects and themes such as satiric and didactic poetry of the Middle Ages, poetry of the Pléiade, theater in the eighteenth century, pre-romantic poetry, autobiography, literature and film, etc. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, WC, WE.

**141S. Selected Topics in French Literature (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Subjects and themes such as satiric and didactic poetry of the Middle Ages, poetry of the Pléiade, theater in the eighteenth century, pre-romantic poetry, autobiography, literature and film, etc. Taught abroad. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, WC, WE.

**160. Linguistic Study of French-Sound and Form (4)**

Seminar—3 hours; term paper. Prerequisite: course 100 or Linguistics 1. Introduction to the linguistic study of modern French, with focus on sound structure and form, inflection and derivation. GE credit: ArtHum or SocSci | AH or SS, WE.—W. (W.) Anderson, Russell

**161. Linguistic Study of French—Form and Meaning (4)**

Seminar—3 hours; term paper. Prerequisite: course 100 or Linguistics 1. Introduction to the linguistic study of modern French, with focus on sentence construction and constituency, meaning and discourse functions. GE credit: ArtHum or SocSci | AH or SS.—Russell

**162. History of the French Language (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or Linguistics 1. Main periods in development of the French language, from Latin to contemporary popular aspects, with emphasis on relationship between socio-cultural patterns and evolution of the language. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.—Russell

**192. Internship (1-12)**

Internship—3-36 hours; term paper. Prerequisite: upper division standing and consent of instructor. Practical application of the French language through work experience in government and/or business, culminating in an analytical term paper on a topic approved by the sponsoring instructor. (P/NP grading only.)

**194H. Special Study for Honors Students (4)**

Independent study—4 hours. Prerequisite: open only to French majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in French literature, civilization, or language studies. (P/NP grading only.) GE credit: AH, WC, WE.

**195H. Honors Thesis (4)**

Independent study—4 hours. Prerequisite: course 194H. Writing of an honors thesis on a topic in French literature, civilization, or language studies under the direction of a faculty member. (P/NP grading only.) GE credit: AH, WC, WE.

**197T. Tutoring in French (1-4)**

Seminar—1-2 hours; laboratory—1-2 hours. Prerequisite: upper division standing and consent of Chairperson. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)

**197TC. Tutoring in the Community (2-4)**

Seminar—1-2 hours; laboratory—1-2 hours. Prerequisite: upper division standing and consent of Chairperson. Tutoring in public schools under the guidance of a regular teacher and supervision by a departmental faculty member. May be repeated for credit for a total of 6 units. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**198S. Directed Group Study (1-5)**

Group study on focused topics in French literature and culture. May be repeated for credit. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate****200. Introduction to Graduate Study in French (2)**

Seminar—2 hours. Prerequisite: graduate standing or consent of instructor. Introduction to a range of methodologies and critical practices in the field of French Studies, including literature, culture, and linguistics. Covers basic principles of bibliographic research in the humanities. (S/U grading only.)—F. (F.) Goldstein

**201. History of French (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Presentation of the main changes in the grammatical structures of French, from Latin to contemporary usage, involving textual analysis and sociolinguistic description.—Russell

**202. Topics in French Civilization (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Interdisciplinary approach to the study of French and Francophone civilization from the Middle Ages to the present. Course content will vary by instructor. May be repeated for credit when content differs.—Simon

**204. Topics in Medieval Literature (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of Medieval French literature, focusing on a particular period, milieu, literary movement, genre, or theoretical approach. May be repeated for credit when topic differs.—Guynn

**205A. Sixteenth-Century Literature: The Humanists (4)**

Seminar—3 hours. Prerequisite: graduate standing or consent of instructor. French humanism in its most varied forms. Although at different times Rabelais and Montaigne will be primarily studied, other leading intellectuals and religious writers will also receive attention. May be repeated for credit when different topic is studied.—Goldstein, Guynn

**206A. Seventeenth-Century Literature: Theater (4)**

Seminar—3 hours. Prerequisite: graduate standing or consent of instructor. Works of Corneille, Racine, Molière, and minor dramatists. One or more authors may be covered. May be repeated for credit with consent of instructor when different topics are studied.—Goldstein, Guynn

**206B. Seventeenth-Century Literature: Prose (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Works of authors such as Pascal, Descartes, Mme de Lafayette. One or more authors may be covered. May be repeated for credit with consent of instructor as different topics are studied from quarter to quarter.—Goldstein

**206C. Seventeenth-Century Literature:****Poetry (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Studies of the works of one or more poets of the period. May be repeated for credit with consent of instructor.—Goldstein

**207A. Eighteenth-Century Literature: Philosophies (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Not a course in philosophy, but an examination of the role of philosophy in the design and context of literary works. Study of one or more authors. May be repeated for credit.—Simon

**207B. Eighteenth-Century Literature: Novel (4)**

Seminar—3 hours. Prerequisite: graduate standing or consent of instructor. Rise of the novel. Study of narrative experiments in the context of the philosophical climate and new literary values. Course may treat one or more novelists of the period. May be repeated for credit when different topics are studied.—Simon

**208A. Nineteenth-Century Literature: Fiction (4)**

Seminar—3 hours. Prerequisite: graduate standing or consent of instructor. Study of the works of one or several novelists and/or short-story writers of the period. May be repeated for credit with consent of instructor when different topics are studied.—Simon

**208B. Nineteenth-Century Literature: Poetry (4)**

Seminar—3 hours. Prerequisite: graduate standing or consent of instructor. Study of the works of one or several poets of the period. May be repeated for credit with consent of instructor when different topics are studied.—Simon

**209A. Twentieth-Century: Prose (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of the works of one or several writers of the period.—Fort, Warner

**209B. Twentieth-Century: Theater (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of the works of one or several dramatists of the period. May be repeated for credit with consent of instructor.—Fort, Guynn

**209C. Twentieth-Century: Poetry (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of the works of one or several poets of the period. May be repeated for credit with consent of instructor.—Fort, Goldstein

**210. Studies in Narrative Fiction (4)**

Seminar—3 hours. Prerequisite: graduate standing or consent of instructor. May be repeated for credit with consent of instructor when different topic is studied.

**211. Studies in Criticism (4)**

Seminar—3 hours. Prerequisite: graduate standing or consent of instructor. May be repeated for credit with consent of instructor when different topic is studied.

**212. Studies in the Theater (4)**

Seminar—3 hours. Prerequisite: graduate standing or consent of instructor. May be repeated for credit with consent of instructor when different topic is studied.

**213. Studies in Poetry (4)**

Seminar—3 hours. Prerequisite: graduate standing or consent of instructor. May be repeated for credit with consent of instructor when different topic is studied.

**214. Study of a Literary Movement (4)**

Seminar—3 hours. Prerequisite: graduate standing or consent of instructor. May be repeated for credit with consent of instructor when different topic is studied.

**215. Topics in French and Francophone Film (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Aspects of French and Francophone film from the Lumière Brothers through the present. Topics may include a specific historical period of filmmaking, film theories and the analysis of film form and narrative, and major filmmakers and filmic traditions. May be repeated two times for credit.—Fort

**224. Francophone Literatures (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of cultural productions (literature, film, visual arts) by Francophone peoples such as found in North Africa, West Africa, the Caribbean, South-East Asia, the Americas, and Metropolitan France. May be repeated for credit when topic differs and with consent of instructor.—Warner

**250A. French Linguistics I (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Theoretical approach to the forms and functions of French, with emphasis on phonology and morphology. Overview of current linguistic theories and their application to French.—Russell

**250B. French Linguistics II (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Theoretical approach to the forms and functions of French, with emphasis on syntax and semantics. Overview of current linguistic theories and their application to French.—Russell

**251. Topics in the Linguistic Study of French (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Questions relevant to the linguistic study of French, such as language acquisition, sociolinguistics, or theoretical examination of structure. Intended for students in French Linguistics and those applying linguistic models to literature or teaching. May be repeated for credit when topic differs.—Russell

**291. Foreign Language Learning in the Classroom (4)**

Seminar—3 hours; project. Prerequisite: graduate standing or consent of instructor. Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in classroom practices across commonly taught foreign languages. (Same course as German 291 and Spanish 291.)

**297. Individual Study (1-5)**

Prerequisite: graduate standing or consent of instructor. (S/U grading only.)

**298. Group Study (1-5)**

Seminar—1-5 hours. Prerequisite: graduate standing or consent of instructor. May be repeated for credit with consent of instructor.

**299. Research (1-12)**

Prerequisite: graduate standing or consent of instructor. (S/U grading only.)

**299D. Dissertation Research (1-12)**

Prerequisite: graduate standing or consent of instructor. (S/U grading only.)

**Professional****300. Teaching of a Modern Foreign Language (3)**

Lecture/discussion—3 hours. Prerequisite: senior or graduate standing; a major or minor in a modern foreign language.

**390A. The Teaching of French in College (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Course designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. May be repeated for credit with consent of instructor. (S/U grading only.)

**390B. The Teaching of French in College (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Course designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. (S/U grading only.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Fungal Biology and Ecology

(College of Agricultural and Environmental Sciences)

The minor in Fungal Biology and Ecology is open to all students interested in a concentrated exposure to and knowledge of the fungi and allied organisms.

The minor is sponsored by the Plant Pathology Department.

**Minor Program Requirements:****Fungal Biology and Ecology ..... 18-20 UNITS**

Plant Pathology 130, 148, 150 .....	10
Select 7-9 units from Food Science and Technology 104, Plant Pathology 40, 135, 185, Science and Society 30, Soil Science 111; Plant Pathology 224 (available to advanced students with consent of instructor) .....	7-9

**Minor Adviser.** T. Gordon

## Gender, Sexuality and Women's Studies

(College of Letters and Science)

Maxine Craig, Ph.D., Program Director

**Program Office.** 1200 Hart Hall  
530-752-6429; <http://gsws.ucdavis.edu/>

**Committee in Charge**

Elizabeth Constable, Ph.D.  
(*Gender, Sexuality and Women's Studies*)  
Maxine Craig, Ph.D.  
(*Gender, Sexuality and Women's Studies*)  
Wendy Ho, Ph.D. (*Asian American Studies; Gender, Sexuality and Women's Studies*)  
Rana Jaleel, Ph.D./J.D., Assistant Professor  
(*Gender, Sexuality and Women's Studies*)  
Suad Joseph, Ph.D. (*Anthropology; Women and Gender Studies*)  
Susan Kaiser, Ph.D. (*Gender, Sexuality and Women's Studies; Textiles and Clothing*)  
Amina Mama, Ph.D. (*Gender, Sexuality and Women's Studies*)  
Kimberly D. Nettles-Barcelón, Ph.D.  
(*Gender, Sexuality and Women's Studies*)

**Faculty**

Elizabeth Constable, Ph.D., Associate Professor  
(*Gender, Sexuality and Women's Studies*)  
Maxine Craig, Ph.D., Associate Professor  
(*Gender, Sexuality and Women's Studies*)  
Wendy Ho, Ph.D., Senior Lecturer (*Asian American Studies; Gender, Sexuality and Women's Studies*)  
Rana Jaleel, Ph.D./J.D., Assistant Professor  
(*Gender, Sexuality and Women's Studies*)  
Suad Joseph, Ph.D., Professor (*Anthropology; Gender, Sexuality and Women's Studies*)  
Susan B. Kaiser, Ph.D., Professor (*Gender, Sexuality and Women's Studies; Textiles and Clothing*)  
Amina Mama, Ph.D., Professor (*Gender, Sexuality and Women's Studies*)  
Kimberly D. Nettles-Barcelón, Ph.D., Associate Professor (*Gender, Sexuality and Women's Studies*)

**Emeriti Faculty**

Anna Kuhn, Ph.D., Professor Emerita  
Judith Newton, Ph.D., Professor Emerita  
Leslie Rabine, Ph.D., Professor Emerita

**The Major Program**

Gender, Sexuality and Women's Studies is an interdisciplinary major founded on the understanding that the social production of gender is inseparable from that of race, sexuality, class, nationality, ability and other categories of difference. Our curriculum places feminist concerns within a transnational context, while respecting the need for geographic and historical specificity. These frameworks inform our teaching, our research, our institutional and community practices, and the principles we bring to our classrooms. Gender, Sexuality and Women's Studies offers a wide range of classes that use the lens of gender to examine colonialism and post colonialism, globalization, history, sexuality, queer theory, literature, popular culture, feminist video production, area studies, film fashion and food. The Program offers both an undergraduate major and minor. We also work collaboratively with other units on campus to sponsor two undergraduate minors, Sexuality Studies and Social and Ethnic Relations, and an undergraduate concentration in transnational production and consumption.

**The Program.** One of the most exciting and challenging aspects of the Gender, Sexuality and Women's Studies Program is that students, in consultation with the peer and faculty advisers, can pursue their particular academic interests and design their course of study accordingly. In devising their major plan, students will draw on courses offered in African American and African Studies, American Studies, Anthropology, Asian American Studies, Chicana/o Studies, Comparative Literature, English, French, German and Italian Studies, History, Linguistics, Native American Studies, Political Science, Psychology, Sociology, Spanish, Textiles and Clothing, and other related disciplines.

In addition to offering a broad array of courses that deal with gender, class, race, ethnicity, and sexuality, the Gender, Sexuality and Women's Studies Program affords interested students the opportunity to earn internship credit and conduct independent research as well as take advantage of the Honors Thesis option.

Students design a program of study in consultation with an adviser that is in accordance with their individual career goals. Many Gender, Sexuality and Women's Studies majors find it advantageous to pursue a double major, or to minor in another field of study. Upon successful completion of the degree requirements, students majoring in the program will graduate with a Bachelor of Arts in Gender, Sexuality and Women's Studies.

**Career Alternatives.** A degree in Gender, Sexuality and Women's Studies opens many possibilities for future employment. The major introduces students to relevant social issues, fosters critical thinking, develops strong verbal, writing and research skills and encourages social advocacy.

Pre-professional students will discover that a major in Gender, Sexuality and Women's Studies offers useful preparatory training for medical or law school. It is particularly suitable for those interested in specializing in social policy, international development, social justice or gender-related work in a wide range of institutions and contexts. Students who plan to do practical work in counseling, clinical psychology, social services, education, media or politics will also find a major in Gender, Sexuality and Women's Studies provides a strong foundation. Those who wish to pursue graduate level research in such fields as anthropology, comparative literature, cultural studies, economics, education, ethnic studies, English, film studies, history, languages and literatures, performance studies, philosophy, political science, and sociology will also benefit from a strong Gender, Sexuality and Women's Studies undergraduate background in critical theory, social analysis,

history and a sound understanding of cultural representation and narratives of difference.

Increasingly, media and cultural institutions, corporations, and personnel firms are hiring specialists in women and gender studies trained in understanding the complex cultural challenges and demands arising from diverse communities. State and federal agencies need people who have special understanding of the problems that diverse groups of women face in society, industry, and the professions. Educational institutions across the spectrum need specialists to develop and administer women and gender studies programs, multi-cultural community centers, LGBTQ organizations and other organizations designed specifically to deal with gender, social diversity and inequality, and a growing range of old and new social challenges arising in the context of globalization.

Some of our alumni have developed careers other than those described above. Gender, Sexuality and Women's Studies faculty and peer advisers can provide even more ideas about possible future careers. Doing internships related to coursework enables students to integrate theory with hands-on practice and service in the community.

## Gender, Sexuality and Women's Studies

### A.B. Major Requirements:

**UNITS**

**Preparatory Subject Matter ..... 20**

Three courses from: Women's Studies, 50, 60, 70 ..... 12  
Two courses selected from: African American and African Studies 10, 17, American Studies 21, 30, Anthropology 2, 20, 30, Asian American Studies 1, 2, Chicana/o Studies 10, 21S, 50, Comparative Literature 12, Dramatic Art 1, English 3, History 72A, 72B, 85, Native American Studies 10, 32, Political Science 7, Psychology 1, Science and Technology 1, 2, 20, 32, Sociology 2, 3, 11, 30A, 30B, Textiles and Clothing 7, Undergraduate Writing Program 19, Women's Studies 20, 80 ..... 8

**Depth Subject Matter ..... 44**

Women's Studies 103, 104, 137, 190 ..... 16  
Histories and Cultures ..... 12  
Choose three courses to meet this requirement. May not duplicate those used to meet other Gender, Sexuality and Women's Studies major requirements. The list that follows represents a partial list of options; other courses may be included with the consent of the Gender, Sexuality and Women's Studies Adviser.  
African American and African Studies 107A, 107C, 123, 133, 181, Anthropology 126B, 130A, 139AN, 139BN, Asian American Studies 112, 150, Chicana/o Studies 111, 122, 131, Comparative Literature 135, 138, 159, Design 143, English 185A, 185B, French 124, German 114, 168, 176A, History 102M, 148A, 148B, 159, 184, 193A, 193B, 193C, Native American Studies 134, 135, 180, Political Science 166, Religious Studies 157, 161, Sociology 131, 134, 145B, 158, 172, Women's Studies 102, 130, 138, 145, 146, 148, 158, 160, 174, 175, 176, 178AF, 180, 182, 184, 185, 187.

Thematic Cluster Tracks ..... 16  
Choose one of three cluster tracks. Choose four courses that form a thematic cluster, at least two of which are Women's Studies courses specified for the track. Courses used to meet this requirement may not duplicate those used to meet other Gender, Sexuality and Women's Studies major requirements. Students may also develop their own thematic or interdisciplinary cluster in consultation with the faculty adviser.

### Track 1: Social Justice, Gender Politics and Activism

Requires two of the following Women's Studies courses: 102, 140, 145, 146, 148, 170, 175, 182, 187, 192, 193.

Requires two depth electives from: African American and African Studies 17, 123, 133, Anthropology 126B, 139BN, Asian American Studies 112, Chicana/o Studies 100, 110, 111, 112, 130, 131, 131S, 182, History 150, 159, 160, Native American Studies 180, Political Science 166, Sociology 133, 158, 172, Science and Technology 129, 150.

### Track 2: Culture, Power, and Resources

Requires two of the follow Women's Studies courses: 136, 138, 139, 148, 160, 162, 164, 165, 176, 178AF, 180, 182, 185.

Requires two depth electives from: African American and African Studies 181, Asian American Studies 141, 150S, Anthropology 126B, 128B, Chicana/o Studies 145, 147, 160, 170, 171, Comparative Literature 159, English 155B, 185A, Film Studies 120, 125, 129, 165, German 114, Linguistics 163, Science and Technology 129, 150, Textiles and Clothing 107.

### Track 3: Sexualities, Subjectivities and Body Politics

Requires Women's Studies 170 and one course from: 130, 136, 138, 158, 160, 174, 175, 176, 187.

Requires two depth electives from: African American and African Studies 123, Asian American Studies 112, Anthropology 139BN, Chicana/o Studies 112, 120, 122, 154, 160, English 166, 186, History 102M, 184, Native American Studies 134, 135, 180, Psychology 158, 159.

### Total units for the major ..... 64

**Major Adviser.** All Gender, Sexuality and Women's Studies majors and minors must consult with a faculty adviser, individually, at least once each academic year.

### Minor Program Requirements:

**UNITS**

**Gender, Sexuality and Women's Studies ..... 24**

Women's Studies 20, 50, 60, 70 or 80 .... 4

Choose one from: African American and African Studies 123, 133, Anthropology 126B, 130A, 139BN, Asian American Studies 112, Chicana/o Studies, 111, 122, 131, Native American Studies 134, 180, Sociology 131, 132, 134, 145B, 158, 172, Women's Studies 160, 180 ..... 4

Choose one from: Anthropology 148B, Comparative Literature 135, 138, 159, English 129, 185A, 185B, History 102G, 102H, 102M, 148A, 148B, Women's Studies 102, 180, 182, 184 ..... 4

Additional Electives from approved list of upper division cross-listed and Women's Studies courses ..... 12

Note: With prior consultation with an adviser, other upper division courses may be accepted toward the minor program. Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor.

**Minor Adviser.** All Gender, Sexuality and Women's Studies majors and minors must consult with a faculty adviser, individually, at least once each academic year.

**Graduate Study.** The Gender, Sexuality and Women's Studies Program offers a designated emphasis in Feminist Theory and Research for students enrolled in the Ph.D. programs of fifteen other affiliated departments.

## Courses in Women's Studies (WMS)

### Lower Division

#### 20. Cultural Representations of Gender (4)

Lecture/discussion—4 hours. Interdisciplinary investigation of how specific cultures represent gender difference. Examine a variety of cultural forms and phenomena including film, television, literature, music, popular movements, and institutions. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, VL, WC, WE.

#### 25. Gender and Global Cinema (4)

Lecture—3 hours; film viewing—3 hours. The role gender plays in film history/culture in various geographical contexts and in aspects of contemporary globalization. Films from nations such as China, Colombia, Cuba, Ethiopia, India, Iran, Korea, New Zealand, and the U.S. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.

#### 50. Introduction to Critical Gender Studies (4)

Lecture—3 hours; discussion—1 hour. Introduction to interdisciplinary, critical gender studies. Addresses the emergence of women's, gender and feminist studies internationally, its links to women's movements, and its influence within the various arts, humanities and social science disciplines. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, VL, WE—F, W, S, Su. {F, W, S, Su}

#### 60. Feminist Critiques of Western Thought (4)

Lecture/discussion—4 hours. Critical introduction to major traditions of social thinking in the West from a feminist perspective. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

#### 70. Theory and History of Sexualities (4)

Lecture/discussion—4 hours. Key issues in the social construction, organization, and reproduction of sexualities such as the intersection of sexual identity with gender, race, ethnicity, and class, and the relation between movements for sexual liberation and the regulation of the body. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WE.

#### 80. Special Topics in Women's Studies (4)

Lecture/discussion—4 hours. Limited enrollment. In-depth examination of a women's studies topic related to the research interest of the instructor. May be repeated for credit when topic differs. Offered irregularly.

#### 90X. Lower Division Seminar (2)

Seminar—2 hours. Examination of a special topic in Women's Studies through shared readings, discussions, and written assignments.

#### 91. Research Seminar in the Transnational Production and Consumption of Fashion (1-2)

Seminar—1-2 hours. Preparation for a research conference. May be repeated for credit when topic varies.

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. {P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. {P/NP grading only.)

### Upper Division

#### 102. Gender and Post Colonialism (4)

Lecture/discussion—4 hours; term paper. Prerequisite: course 50, 60. Explores changing configurations of race, gender, sexuality, class and implications for governmentality in one or more colonial or postcolonial regimes in one or more societies. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, DD, WC, WE.

#### 103. Introduction to Feminist Theory (4)

Lecture/discussion—4 hours. Prerequisite: course 50 recommended or consent of instructor. Introduction to the emergence of feminist theory and to key concepts in feminist theorizing. Examination of past and current debates over sexuality, race, identity politics,

and the social construction of women's experience. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, WE. —F. (F.)

#### **104. Feminist Approaches to Inquiry (4)**

Lecture/discussion—4 hours. Prerequisite: course 50 recommended or consent of instructor. Feminist applications and transformations of traditional disciplinary practices; current issues and methodologies in feminist interdisciplinary work. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, WE. —W. (W.)

#### **130. Feminism and the Politics of Family Change (4)**

Lecture/discussion—4 hours. Examination of contemporary conflicts over family values and the changing family from a feminist perspective. Offered in alternate years. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WE. —W. (W.)

#### **136. Topics in Gender, Production, Consumption and Meaning (4)**

Lecture/discussion—3 hours; term paper Construction of gender through production and consumption of goods and services. Transnational movement of peoples and products. Topics may include fashion, film, food, and technology. May be repeated for credit. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WC, WE.

#### **137. Feminist Interpretations of Contemporary Western Thought (4)**

Lecture/discussion—4 hours. Introduction to deciphering, demystifying, and interpreting poststructuralist, postmodern, and postcolonial thought from a feminist perspective: applications to gender, race, sexuality, and class. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

#### **138. Critical Fashion Studies (4)**

Lecture/discussion—4 hours. Feminist cultural studies of style-fashion-dress through transnational circuits, personal subjectivities. Fashion as means of gender oppression and liberation. Histories and discourses of masculinities and femininities. Clothing works on global assembly line. Use of dress in construction / regulation of identities. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, DD, VL, WC, WE.

#### **139. Feminist Cultural Studies (4)**

Lecture/discussion—4 hours. The histories, theories, and practices of feminist traditions within Cultural Studies. (Same as course American Studies 139.) Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, VL, WE.

#### **140. Gender and Law (4)**

Lecture/discussion—4 hours. Exploration of women's legal rights in historical and contemporary context, discussing a variety of legal issues and applicable feminist theories. Topics include constitutional equal protection, discrimination in employment and education, sexual orientation discrimination, and the regulation of abortion. Offered irregularly. GE credit: SocSci, Div | ACGH, DD, SS.

#### **145. Women's Movements in Transnational Perspective (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 50 recommended. Class size limited to 90 students. Transnational perspectives on twentieth and twenty-first century women's movements in Western, colonial and post-colonial contexts, examining movement's forms and political orientations and relationships between women's movements and other forces for change. Offered in alternate years. GE credit: ArtHum or SocSci, Div | AH or SS, OL, WC, WE.

#### **148. Science, Gender, and Social Justice (4)**

Lecture/discussion—4 hours; term paper. Class size limited to 60 students. Critical reading and reflection on the history of Western science, scientific institutions and the changing role of science in relation to inequalities of class, race, gender and sexuality, and global struggles for equality and justice. Offered irregularly. GE credit: ArtHum or SocSci, Div | AH or SS, DD, WC, WE.

#### **158. Contemporary Masculinities (4)**

Lecture/discussion—4 hours. A multicultural study of contemporary trends in masculinity and the economic, social and political forces that have shaped them. Topics may include men's movements, ethnic nationalist masculinities, and images of masculinity in popular culture. Offered in alternate years. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WE.

#### **160. Women, 'Race' and Sexuality in Postcolonial Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Class size limited to 90 students. Feminist analysis of race, sexuality and class in the representation of women in commercial and/or independent films. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.

#### **162. Feminist Film Theory and Criticism (4)**

Lecture/discussion—3 hours; film-viewing—3 hours. Historical overview of and contemporary issues in feminist film theory, including representation, spectatorship, and cultural production. Film stars, women filmmakers, and the intersections of gender, race, sexuality, and class in films and their audiences. Offered in alternate years. GE credit: ArtHum, Div | ACGH, AH, DD, VL, WC, WE.

#### **164. Topics in Gender and Cinematic Representation (4)**

Lecture/discussion—3 hours; film-viewing—3 hours. Examination of a specific topic within the broad rubric of gender and cinema. Possible topics include Latinas in Hollywood; gender, nation, cinema; and gender and film genre. Topics vary. May be repeated two times for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Div | AH, VL, WC, WE.

#### **165. Feminist Media Production (6)**

Lecture/discussion—3 hours; laboratory—3 hours; fieldwork—6 hours. Prerequisite: one course in Women and Gender Studies or consent of instructor. Basic media production and community service. Video, audio and photography instruction; feminist community documentary; video ethnography; video journals; alternative representations of fashion and women's bodies. Fundamentals of camera and microphone operation, interviewing techniques, and editing. May be repeated two times for credit when topic differs. Offered irregularly. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, VL.

#### **170. Queer Studies (4)**

Lecture/discussion—4 hours. Prerequisite: course 70 recommended or consent of instructor. Study of queer sexualities, identities, theories, practices. Alternative sexualities as historical, social, and cultural constructions in intersections with race, gender, class, nationality. Interdisciplinary exploration of sexual liberation and the regulation of sexuality through history, theory and expressive cultural forms. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

#### **175. Gender and Experience of Race (4)**

Lecture/discussion—4 hours. Exploration of the co-construction of "race" and gender in comparative national historical contexts and contemporary lived experience. Study of intersections of race and gender in identities and how institutions, labor migration, social movements and consumption shape racialized gendered identities. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

#### **178A. Women Writers and the Transnational Imaginary (4)**

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Writings by women from diverse regions and cultures, understood in their cultural, socio-economic, and historical contexts, with each course offering a focus on women's writing in specific geographic/national locations and their diasporas: The Arab World. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Constable

#### **178B. Women Writers and the Transnational Imaginary (4)**

Lecture/discussion—4 hours. Writings by women from diverse regions and cultures, understood in their cultural, socio-economic, and historical contexts, with each course offering a focus on women's writing in specific geographic/national locations and their diasporas: Asia. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Constable

#### **178C. Women Writers and the Transnational Imaginary (4)**

Lecture/discussion—4 hours. Writings by women from diverse regions and cultures, understood in their cultural, socio-economic, and historical contexts, with each course offering a focus on women's writing in specific geographic/national locations and their diasporas: The Caribbean. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Constable

#### **178D. Women Writers and the Transnational Imaginary (4)**

Lecture/discussion—4 hours. Writings by women from diverse regions and cultures, understood in their cultural, socio-economic, and historical contexts, with each course offering a focus on women's writing in specific geographic/national locations and their diasporas: Africa. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Constable

#### **178E. Women Writers and the Transnational Imaginary (4)**

Lecture/discussion—4 hours. Writings by women from diverse regions and cultures, understood in their cultural, socio-economic, and historical contexts, with each course offering a focus on women's writing in specific geographic/national locations and their diasporas: Diasporic Women Writers in Europe. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Constable

#### **178F. Transnationalism and Writing by Women of Color (4)**

Lecture/discussion—4 hours. Writings by women of color in a transnational framework, understood in their cultural, socio-economic, and historical contexts. The interrelation among gender, writing, nationalism, and transnationalism, with focus on women's writing in specific geographic/national locations and their diasporas: Topics on Women Writers of Color. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

#### **179. Gender and Literature (4)**

Lecture/discussion—4 hours. Prerequisite: one course in Women's Studies, or consent of instructor. Role of literature, especially novels, in constructing, challenging, and transforming normative genders in society. Transhistorical and transnational focus on gender in its intersections with race, class, sexuality, and politics. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

#### **180. Women of Color Writing in the United States (4)**

Lecture/discussion—4 hours. Prerequisite: course 20 or 50. Literature, especially novels, written by contemporary women of color in the United States, understood in their socio-economic, cultural and historical contexts. Offered irregularly. GE credit: ArtHum, Div | ACGH, AH, DD, WE.

#### **182. Globalization, Gender and Culture (4)**

Lecture/discussion—4 hours. Critical gender analysis of globalization as a process of interconnected cultural, social and economic transformations inflected by gender, nation, class and race/ethnicity. Critical self-reflection and social observation skills. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, OL, WC, WE.—S. (S.)

#### **184. Gender in the Arab World (4)**

Lecture/discussion—4 hours. Examination of the history, culture, and social/political/economic dynamics of gender relations and gendering in the Arab world. Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

**185. Women and Islamic Discourses (4)**

Lecture/discussion—4 hours. Prerequisite: course 50 or comparable course. Introduction to the debates/discourses about women and Islam. Transformations in debates/discourses in colonial and postcolonial periods in the Middle East & South Asia. Comparative study of debates/discourses on family, work, law, sexuality, religion, comportment, human rights, feminist and religious movements. (Same course as Middle East/South Asia Studies 150.) Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WE.

**187. Gender and Social Policy (4)**

Lecture/discussion—3 hours; term paper. Role of gender in the creation of social policies, especially with respect to issues brought into the policy arena by contemporary feminism. Offered in alternate years. GE credit: SocSci, Div | ACGH, DD, SS, WE.

**189. Special Topics in Critical Gender Studies (4)**

Lecture/discussion—4 hours. In-depth examination of a women's studies topic related to the research interests of the instructor. May be repeated one time for credit when topic differs. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WE.

**190. Senior Seminar (4)**

Seminar—4 hours. Capstone course for senior Women's Studies majors, which focuses on current issues on feminism as they impact theory, public policy, and practice. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD. —S. (S.)

**191. Capstone Seminar (4)**

Seminar—4 hours. Revision, completion, and presentation of senior research or creative project. Creating a multimedia Web site for publishing research and creative projects. GE credit: ArtHum or SocSci, Wrt | ACGH, AH or SS, DD, WE.

**192. Internship in Women's Studies (1-12)**

Internship—3-36 hours; written report. Prerequisite: completion of a minimum of 84 units and consent of instructor; enrollment dependent on availability of intern positions with priority to Women's Studies majors. Supervised internship and study in positions/institutional settings dealing with gender-related problems or issues, as for example, a women's center, affirmative action office, advertising agency, or social welfare agency. Final written report on internship experience. (P/NP grading only.)

**193. Feminist Leadership Seminar (2)**

Seminar—2 hours. Use feminist methods to critically reflect on the ethical, methodological and strategic aspects of an organization, project, campaign, movement or other social change initiative. May be repeated for credit. (P/NP grading only.) Offered irregularly. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, WE.

**194HA. Senior Honors Project in Women's Studies (4-6)**

Independent study—12 hours. Prerequisite: senior standing, Women's Studies major, and adviser's approval. In consultation with an adviser, students complete a substantial research paper or significant creative project on a Women's Studies topic. (Deferred grading only, pending completion of sequence.) GE credit: ArtHum or SocSci | AH or SS, WE.

**194HB. Senior Honors Project in Women's Studies (4-6)**

Independent study—12 hours. Prerequisite: senior standing, Women's Studies major, and adviser's approval. In consultation with an adviser, students complete a substantial research paper or significant creative project on a Women's Studies topic. (Deferred grading only, pending completion of sequence.) GE credit: ArtHum or SocSci | AH or SS, WE.

**195. Thematic Seminar in Critical Gender and Women's Studies (4)**

Seminar—4 hours. Group study of a topic, issue or area in feminist theory and research involving intensive reading and writing. May be repeated for credit. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, ACGH, DD, WE.

**197T. Tutoring in Women's Studies (1-4)**

Tutoring—3-12 hours. Prerequisite: upper division standing and consent of director. Leading small, voluntary discussion groups affiliated with a Women's Studies course. May be repeated for credit for a total of 8 units. (P/NP grading only.) Offered irregularly.

**198. Directed Group Study (1-5)**

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.) Offered irregularly.

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.) Offered irregularly.

**Graduate****200A. Current Issues in Feminist Theory (4)**

Seminar—4 hours. Current issues in feminist theory; techniques employed to build feminist theory in various fields.

**200B. Problems in Feminist Research (4)**

Seminar—4 hours. Prerequisite: course 200A with a grade of B+ or better. Application of feminist theoretical perspectives to the interdisciplinary investigation of a problem or question chosen by the instructor(s). May be repeated for credit when subject area differs.

**201. Special Topics in Feminist Theory and Research (4)**

Lecture/discussion—4 hours. Limited enrollment. Explores in depth a topic in feminist theory and research related to the research interests of the instructor. May be repeated for credit when topic differs. Offered irregularly.

**250. Cultural Study of Masculinities (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Interdisciplinary approaches to understanding the social and cultural construction of masculinities; attention to the effects of biology, gender, race, class, sexual and national identities; criticism of oral, printed, visual, and mass mediated texts, and of social relations and structures. (Same course as American Studies 250.) Offered irregularly.

**299. Special Study for Graduate Students (1-12)**

(S/U grading only.) Offered irregularly.

**299D. Dissertation Research and Writing (4)**

Prerequisite: courses 200A and 200B; fulfillment of course requirements for the DE in Feminist Theory and Research, advancement to candidacy. (S/U grading only.) Offered irregularly.

**Professional****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) Offered irregularly.

**Genetics**

**See Molecular and Cellular Biology, on page 463; and Integrative Genetics and Genomics (A Graduate Group), on page 380.**

**Geographic Information Systems**

(College of Agricultural and Environmental Sciences)

The Department of Biological and Agricultural Engineering offers a minor in Geographic Information Systems with an emphasis on spatial analysis. This minor is ideal for students interested in information processing of spatial data related to remote sensing, land information systems, marine cartography, thematic mapping, surface modeling, environmental modeling resources management, public utility planning, emergency response, geomarketing, geotechnics, precision agriculture, archaeology, military exercises, and computer-aided design. Prerequisites include Mathematics 16A-16B, Statistics 13 or Plant Sciences 120 or Civil and Environmental Engineering 114, and Plant Sciences 21 or Computer Science Engineering 15.

**Minor Program Requirements:**

UNITS

**Geographic Information Systems ..... 18**

Applied Biological Systems Technology / Landscape Architecture 150, Applied Biological Systems Technology 181N or 182, Environmental Science & Management 186, 186L .....	13
Select five or more units from: Applied Biological Systems Technology/Hydrologic Science 181N or 182 Environmental Science & Management 108, 185 Environmental Science and Policy 168A, 168B, 171, 179 .....	5

**Minor Adviser.** S. K. Upadhyaya and S.G. Vougioukas (*Biological and Agricultural Engineering Department*)

**Geographic Studies**

(College of Agricultural and Environmental Sciences)

The interdepartmental minor in Geographic Studies is defined by its concern with place. Geographers strive to answer spatial questions regarding the earth's surface; to describe and explain the character of regions; to ascertain the ways in which historical and contemporary humans have used and shaped the earth's surface; and to understand the interactions of physical, biotic, and human systems within our global environment. The minor is compatible with a variety of environmental majors in the college and also with graduate programs in geography.

The minor is sponsored by the Department of Environmental Design.

**Geography**

**See Geography (A Graduate Group), below.**

**Geography (A Graduate Group)**

Robert Hijmans, Ph.D., Chairperson of the Group

**Group Office.** Carrie Armstrong-Rupert, Student Affairs Officer; 133 Hunt Hall 530-752-4119; [carupert@ucdavis.edu](mailto:carupert@ucdavis.edu) <http://geography.ucdavis.edu>

**Faculty**

Gwen Arnold, Ph.D., Assistant Professor (*Environmental Science and Policy*)

Tom Beamish, Ph.D., Associate Professor (*Sociology*)  
Chris Benner, Ph.D., Professor (*Human Ecology*)

Stephen Boucher, Ph.D., Associate Professor (*Agricultural and Resource Economics*)  
 Mary Cadenasso, Ph.D., Associate Professor (*Plant Sciences*)  
 Diana Davis, Ph.D., Associate Professor (*History*)  
 Adela de la Torre, Ph.D., Professor (*Chicana/o Studies*)  
 Natalia Deeb-Sossa, Ph.D., Associate Professor (*Chicana/o Studies*)  
 Patsy Eubanks Owens, M.L.A., Professor and Chair (*Human Ecology*)  
 Ryan Galt, Ph.D., Associate Professor (*Human Ecology*)  
 Steven Greco, Ph.D., Associate Professor (*Human Ecology*)  
 Luis Guarinzo, Ph.D., Professor (*Human Ecology*)  
 Erin Hamilton, Ph.D., Assistant Professor (*Sociology*)  
 Susan Handy, Ph.D., Professor (*Environmental Science and Policy*)  
 Andrew Hargadon, Ph.D., Professor and Chair (*Graduate School of Management*)  
 Lynette Hart, Ph.D., Professor (*Population Health and Reproduction*)  
 Robert Hijmans, Ph.D., Associate Professor (*Environmental Science and Policy*)  
 Hsuan Hsu, Ph.D., Associate Professor (*English*)  
 Yufang Jin, Ph.D., Assistant Professor (*Land Air & Water Resources*)  
 Carl Keen, Ph.D., Professor (*Nutrition*)  
 Martin Kenney, Ph.D., Professor (*Human Ecology*)  
 A. Peter Klimley, Ph.D., Adjunct Professor (*Wildlife, Fish and Conservation Biology*)  
 Frank Loge, Ph.D., Professor (*Civil and Environmental Engineering*)  
 Jonathan London, Ph.D., Associate Professor (*Human Ecology*)  
 Jeff D. Loux, Ph.D., Assistant Adjunct Professor (*Human Ecology*)  
 Mark Lubell, Ph.D., Professor (*Environmental Science and Policy*)  
 Jay R. Lund, Ph.D., Professor (*Civil and Environmental Engineering*)  
 Amina Mama, Ph.D., Professor (*Women and Gender Studies*)  
 Beth Rose Middleton, Ph.D., Assistant Professor (*Native American Studies*)  
 Brett Milligan, Ph.D., Assistant Professor (*Human Ecology*)  
 N. Claire Napawan, M.L.A., Assistant Professor (*Human Ecology*)  
 Bettina Ng'l'Weno, Ph.D., Associate Professor (*African American and African Studies Program*)  
 Deb Niemeier, Ph.D., Professor (*Civil and Environmental Engineering*)  
 Michael Rios, Ph.D., Associate Professor (*Human Ecology*)  
 Lynn Roller, Ph.D., Professor (*Classics, Art History*)  
 Ann Savageau, Ph.D., Professor (*Design*)  
 Mark Schwartz, Ph.D., Professor (*Environmental Science and Policy*)  
 Art Shapiro, Ph.D., Professor (*Evolution and Ecology*)  
 Sheryl-Ann Simpson, Ph.D., Assistant Professor (*Human Ecology*)  
 Aaron Smith, Ph.D., Associate Professor (*Agricultural and Resource Economics*)  
 Smriti Srinivas, Ph.D., Professor (*Anthropology*)  
 Julie Sze, Ph.D., Associate Professor (*American Studies*)  
 Thomas P. Tomich, Ph.D., Professor (*Human Ecology*)  
 Susan Ustin, Ph.D., Professor (*Land, Air and Water Resources*)  
 M. Anne Visser, Ph.D., Assistant Professor (*Human Ecology*)  
 Charles Walker, Ph.D., Associate Professor (*History*)  
 Wesley W. Wallender, Ph.D., Professor (*Land, Air and Water Resources*) Academic Senate Distinguished Teaching Award  
 Karen Watson-Gegeo, Ph.D., Professor (*School of Education*)  
 Stephen Wheeler, Ph.D., Associate Professor (*Human Ecology*)  
 Diane Wolf, Ph.D., Professor (*Sociology*)

Truman Young, Ph.D., Professor (*Plant Sciences*)  
 Minghua Zhang, Ph.D., Professor (*Land Air and Water Resources*)  
**Emeriti Faculty**  
 Michael Barbour, Ph.D., Professor Emeritus (*Plant Sciences*)  
 David Boyd, Ph.D., Associate Professor Emeritus (*Anthropology*)  
 Cynthia Brantley, Ph.D., Professor Emeritus (*History*)  
 Stephen Brush, Ph.D., Professor Emeritus (*Human and Ecology*)  
 Thomas A. Cahill, Ph.D., Professor Emeritus  
 Dennis Dingemans, Ph.D., Associate Professor Emeritus (*Geography*)  
 Deborah Elliott-Fisk, Ph.D., Sr. Lecturer, SOE Emeritus (*Wildlife, Fish and Conservation Biology*)  
 Joan Florsheim, Ph.D., Associate Research Scientist, Emeritus (*Geology*)  
 Mark Francis, M.L.A., Professor Emeritus (*Human Ecology*)  
 Isao Fujimoto, Ph.D., Sr. Lecturer SOE Emeritus (*Human Ecology*)  
 Charles Goldman, Ph.D., Professor Emeritus (*Environmental Science and Policy*) *Distinguished Graduate Mentoring Award*  
 James Grieshop, Ph.D., Specialist in Cooperative Extension Emeritus (*Human Ecology*)  
 Louis Grivetti, Ph.D., Professor Emeritus (*Nutrition*)  
 Joyce Gutstein, Ph.D., Director, Emeritus (*Public Service Research Program*)  
 Frank Hirtz, L.L.D., Ph.D., Sr. Lecturer SOE, Emeritus (*Human Ecology*)  
 Richard Howitt, Ph.D., Professor Emeritus (*Agricultural and Resource Economics*)  
 Suad Joseph, Ph.D., Professor Emeritus (*Anthropology*)  
 Nguyen Kien, Ph.D., Professor Emeritus (*Anesthesiology*)  
 F. Thomas Leding, Ph.D., Adjunct Professor Emeritus (*Plant Sciences*)  
 Dean MacCannell, Ph.D., Professor Emeritus (*Human Ecology*)  
 Heath Massey, M.L.A., Professor Emeritus (*Human Ecology*)  
 E. Steve McNeil, M.L.A., Sr. Lecturer, SOE Emeritus (*Landscape Architecture*)  
 Jay Mechling, Ph.D., Professor Emeritus (*American Studies*)  
 Patricia Mohktarian, Ph.D., Professor Emeritus (*Civil and Environmental Engineering*)  
 Janet Momson, Ph.D., Professor Emeritus (*Human Ecology*)  
 Jeffrey Mount, Ph.D., Professor Emeritus (*Geology*)  
 Peter B. Moyle, Ph.D., Professor Emeritus (*Wildlife, Fish and Conservation Biology*)  
 Ben Orlove, Ph.D., Professor Emeritus (*Environmental Science and Policy*)  
 Richard Plant, Ph.D., Professor Emeritus (*Plant Sciences*)  
 James Quinn, Ph.D., Professor Emeritus (*Environmental Science and Policy*)  
 David Robertson, Ph.D., Professor Emeritus (*English*)  
 Margaret Rucker, Ph.D., Professor Emeritus (*Textiles and Clothing*)  
 Michael P. Smith, Ph.D., Professor Emeritus (*Human Ecology*)  
 Margaret Swain, Ph.D., Associate Adjunct Professor, Emeritus (*Women and Gender Studies*)  
 Robert L. Thayer, Jr., M.A., Professor Emeritus (*Human Ecology*)  
 Stefano Varese, Ph.D., Professor Emeritus (*Native American Studies*)  
 Geoffrey Wandesforde-Smith, Ph.D., Associate Professor Emeritus  
 Miriam J. Wells, Ph.D., Professor Emeritus (*Human Ecology*)  
**Affiliated Faculty**  
 Dave C. Campbell, Ph.D., Specialist in Cooperative Extension (*Human Ecology*)  
 Elise Gornish, Ph.D., Assistant Specialist in Cooperative Extension (*Plant Sciences*)  
 Eric Larsen, Ph.D., Associate Research Scientist (*Human Ecology*)

E. Greg McPherson, Ph.D., Lecturer and Associate in the Agricultural Experiment Station  
 Lorene Oki, Ph.D., Associate Specialist in Cooperative Extension (*Plant Sciences and Human Ecology*)  
 Hugh Safford, Ph.D., Regional Ecologist/Lecturer WOS (*Environmental Science and Policy*)  
 Kenneth Tate, Ph.D., Specialist in Cooperative Extension (*Plant Sciences*)  
 James Thorne, Ph.D., Research Scientist (*Environmental Science and Policy*)  
 Joshua Viers, Ph.D., Associate Research Scientist (*John Muir Institute of the Environment*)

**Graduate Study.** The Graduate Group in Geography (GGG) offers programs of study and research leading to the M.A. and Ph.D. degrees. Faculty and students share a common interest in spatial interaction between humans and the biophysical environment. The wide faculty interests attract a diverse set of students in such areas as biogeography, urban forestry and related natural science and engineering fields, as well as human geography and related social science fields. A number of faculty members use and teach geographic information systems, remote sensing, and related geographic techniques, and most have a strong field orientation. The strengths of the Davis campus and its faculty enable the program to focus on important issues including people, place and power, community and regional identity and change, people-environment interaction, agricultural sustainability, landscape architecture, environmental change, biogeography, natural resource management, and technological innovations in computing and the use of geographic information systems. Students are mentored by faculty across the many colleges of the university.

**Preparation.** Most students considered for admission will have an undergraduate major in geography or in a closely related field. Generally, a student without an undergraduate degree in geography will be required to complete the equivalent of a minor in geography, consisting of one course each in human geography, physical geography and geographic methods, plus any additional undergraduate coursework required as background for the student's research emphasis, as determined by the student's guidance committee.

**Graduate Advisers.** Ryan Galt (*Human Ecology*), Robert Hijmans (*Environmental Science and Policy*), Jay Lund (*Civil and Environmental Engineering*), James Quinn (*Environmental Science and Policy*), M. Anne Visser (*Human Ecology*)

## Courses in Geography (GEO) Graduate

### 200AN. Geographical Concepts (4)

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing in Geography or consent of instructor. Concepts and thematic content of the discipline, including contemporary research questions. A brief review of the history of geographic thought and practice is done at the beginning of the course.—F. (F.)

### 200BN. Theory & Practice of Geography (4)

Lecture/discussion—4 hours. Prerequisite: graduate standing. Class size limited to 20. Development, application, and philosophical background of theory in discipline of geography and geographical knowledge production. Similarities and differences in theories employed in physical and human geography and cartography. Geographic contributions to interdisciplinary theory bridging biophysical sciences, social sciences, and humanities.—W. (W.) Galt, Rios

### 200CN. Quantitative Geography (4)

Lecture—2 hours; laboratory—6 hours. Class size limited to 25 students. Provides an overview of quantitative approaches in spatial data analysis. Overview of different approaches used for inference, modeling, and prediction. Also learn how to write computer programs to implement these methods.—S. (S.) Hijmans

**200DN. Socio-Spatial Analysis in Geography (4)**

Lecture/discussion—4 hours. Class size limited to 25. Introduction to methodologies of socio-spatial analysis in interviews, and ethnographic fieldwork. Students develop a critical understanding of different methodological and theoretical approaches, and their appropriate applications in overall research design.—W. (W.) Eubanks-Owens

**200E. Advanced Research Design in Geography (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing; courses 200AN, 200BN, 200CN and 200DN. Class size limited to 15. Helps Ph.D. students develop their research question, design their research plan and complete a full dissertation research proposal.—F. (F.)

**201. Sources and General Literature of Geography (4)**

Discussion—4 hours. Prerequisite: graduate standing in geography; consent of instructor. Designed for students preparing for higher degrees in geography. May be repeated for credit in one or more of the following subfields: physical, cultural, economic, urban, historical, political, conservation, and regional geography.

**210. Topics in Biogeography (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: Evolution and Ecology 147 or Wildlife, Fish, and Conservation Biology 156 (may be taken concurrently) or equivalent. Consent of instructor required for undergraduates. Current topics in historical and ecological biogeography, including macroecology and areography, GIS and remote sensing, phylogeny, vegetation, plant and animal community and species geography. Systematics, climate change, and conservation will be addressed. Offered in alternate years.—(W.) Shapiro

**211. Physical Geography Traditions and Methods (3)**

Lecture/discussion—2 hours; term paper. Prerequisite: introductory course in physical geography. Graduate-level standing in geography or related discipline. Discussion of the physical science tradition in geography, including key concepts and current research in climatology, geomorphology, soils geography, biogeography, climate change, watershed science, and coastal studies. Research paradigms, programs, and methods as used by physical geographers will be discussed. May be repeated three times for credit. Offered in alternate years.—(F.)

**212. Water Resource Management (3)**

Lecture—3 hours. Prerequisite: Civil and Environmental Engineering 114, 141, and 142; Civil and Environmental Engineering 153 recommended. Engineering, institutional, economic, and social basis for managing local and regional water resources. Examples in the context of California's water development and management. Uses of computer modeling to improve water management. (Same course as Civil and Environmental Engineering 267.)—F. (F.) Lund

**214. Seminar in Geographical Ecology (2)**

Seminar—2 hours. Prerequisite: Evolution and Ecology 100 or 101 or consent of instructor. Recent developments in theoretical and experimental biogeography, historical biogeography and related themes in systematics, the biology of colonizing species, and related topics. (Same course as Population Biology 296.) (S/U grading only.)—S. (S.) Shapiro

**215. Ecologies of Infrastructure (4)**

Seminar—4 hours. Open to graduate standing or consent of instructor. Focus on design practices and theory associated with ecological conceptions of infrastructure, including networked infrastructure, region, bioregion, regionalization, ecological engineering, reconciliation ecology, novel ecosystems, and theory/articulation of landscape change. Offered in alternate years. (Same course as Landscape Architecture 215.)—Milligan

**220. Topics in Human Geography (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Class size limited to 20 students. Examination of philosophy and theory in human geography with an emphasis on contemporary debates and concepts in social, cultural, humanistic, political, and economic geographies. Specific discussion of space, place, scale and landscape; material and imagined geographies. Offered in alternate years.—W. (W.) Rios

**230. Citizenship, Democracy, & Public Space (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Introduction to seminal works in political theory, philosophy, and the social sciences that focus on citizenship and the public sphere; development of critical perspective regarding restructuring of public space in a pluralistic and global culture; discussion of contemporary case studies. (Same course as Landscape Architecture 200.)—S. (S.) Rios

**233. Urban Planning and Design (4)**

Lecture—2 hours; discussion—2 hours. Limited to graduate students. Regulation, design, and development of the built landscape, planning and land development processes, zoning and subdivision regulation, site planning, urban design goals and methods, public participation strategies, creatively designing landscapes to meet community and ecological goals. (Same course as Landscape Architecture 205.)—F. (F.) Wheeler

**236. Transportation Planning and Policy (4)**

Lecture/discussion—4 hours. Limited enrollment. Transportation planning process at the regional level, including the role of federal policy in shaping regional transportation planning, tools and techniques used in regional transportation planning, issues facing regional transportation planning agencies, pros and cons of potential solutions and strategies. Students taking this course previously as Transportation Planning and Policy 289 cannot repeat it for credit. Taking other Transportation Planning and Policy 289 offerings does not preclude taking Transportation Planning and Policy 220 for credit. (Same course as Transportation Planning and Policy 220.) Offered in alternate years.—S. Handy

**241. The Economics of Community Development (4)**

Seminar—4 hours. Prerequisite: graduate standing. Economic theories and methods of planning for communities. Human resources, community services and infrastructure, industrialization and technological change, and regional growth. The community's role in the greater economy. (Same course as Community and Regional Development 241.)—F. (F.) Kenney

**245. The Political Economy of Urban and Regional Development (4)**

Lecture—4 hours. Prerequisite: Community and Regional Development 157, 244, or the equivalent. How global, political and economic restructuring and national and state policies are mediated by community politics; social production of urban form; role of the state in uneven development; dynamics of urban growth and decline; regional development in California. (Same course as Community & Regional Development 245.) Offered irregularly.—W. (W.)

**246. The Political Economy of Transnational Migration (4)**

Lecture—4 hours. Prerequisite: graduate standing. Theoretical perspectives and empirical research on social, cultural, political, and economic processes of transnational migration to the U.S. Discussion of conventional theories will precede contemporary comparative perspectives on class, race, ethnicity, citizenship, and the ethnic economy. (Same course as Community & Regional Development 246.)—S. (S.) Guarnizo

**248. Social Policy, Welfare Theories and Communities (4)**

Seminar—4 hours. Prerequisite: graduate standing. Theories and comparative histories of modern welfare states and social policy in relation to legal/normative, organizational, and administrative aspects.

Analysis of specific social issues within the U.S./California context. Not open for credit to students having completed Community & Regional Development 248A and 248B. (Same course as Community & Regional Development 248.) Offered in alternate years.—(S.)

**252. Landscape and Power (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. How various representations of landscape have historically worked as agents of cultural power. Course framework is interdisciplinary, including studies of landscape representation in literature, art, photography, cartography, cinema, and landscape architecture. (Same course as Landscape Architecture 260.)—F. (F.)

**254. Political Ecology of Community Development (4)**

Lecture—4 hours. Prerequisite: graduate standing. Community development from the perspective of geographical political ecology. Social and environmental outcomes of the dynamic relationship between communities and land-based resources, and between social groups. Cases of community conservation and development in developing and industrialized countries. (Same course as Community and Regional Development 244.) Offered in alternate years.—W. Galt

**260. Global Political Ecology (4)**

Seminar—3 hours; term paper or discussion—1 hour. Open to graduate students only or consent of instructor. Background, genesis, current debates in political ecology. Examination of political-economic and social-cultural causes of environmental change. Introduction to development theory, globalization, history of science and power/knowledge. Cases of social movements, justice, resistance, gender, race and class. Focus outside North America. Offered in alternate years.—F. S. Davis

**270. Experimental Design and Analysis (5)**

Lecture—3 hours; discussion/laboratory—2 hours. Prerequisite: Plant Sciences 120 or equivalent. Introduction to the research process and statistical methods to plan, conduct and interpret experiments.—W. (W.) Dubcovsky

**271. Applied Multivariate Modeling in Agricultural and Environmental Sciences (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one of Plant Sciences 120, 205, Statistics 106, 108, or equivalent. Multivariate linear and nonlinear models. Model selection and parameter estimation. Analysis of manipulative and observational agroecological experiments. Discriminant, principal component, and path analyses. Logistic and biased regression. Bootstrapping. Exercises based on actual research by UC Davis students.—F. (F.) Laca

**279. Discrete Choice Analysis of Travel Demand (4)**

Lecture—4 hours. Prerequisite: Civil and Environmental Engineering 114. Behavioral and statistical principles underlying the formulation and estimation of discrete choice models. Practical application of discrete choice models to characterization of choice behavior, hypothesis testing, and forecasting. Emphasis on computer exercises using real-world data sets. (Same course as Civil and Environmental Engineering 254.)—S. (S.)

**280. Field Studies in Geography (3)**

Lecture—1 hour; fieldwork—6 hours. Prerequisite: undergraduate or graduate coursework in geography; consent of instructor required. Limited to 20 students. A topic or subdiscipline of geography will form the theme for the course in any given offering, with a focus on current research on this topic, field methodologies, and data analysis in human and physical geography. May be repeated two times for credit.

**281. Transportation Survey Methods (4)**

Lecture—4 hours. Prerequisite: Statistics 13; Civil and Environmental Engineering 251 recommended. Description of types of surveys commonly used in transportation demand modeling, including travel and activity diaries, attitudinal, panel, computer, and stated-response surveys. Discussion of sampling,

experimental design, and survey design issues. Analysis methods, including factor, discriminant and cluster analysis. Not open for credit to students who have taken Civil and Environmental Engineering 255. (Same course as Transportation Technology and Policy 200.) –W. (W.)

### **286. Selected Topics in Environmental Remote Sensing (3)**

Discussion—2 hours; lecture—1 hour; project. Prerequisite: consent of instructor; Environmental and Resource Sciences 186 or equivalent required; Environmental and Resource Sciences 186L recommended. In depth investigation of advanced topics in remote sensing applications, measurements, and theory. Not open for credit to students who have taken Civil and Environmental Engineering 255. (Same course as Hydrologic Science 286.) May be repeated for credit. Offered irregularly.—Ustin

### **290. Seminar in Geography (1-3)**

Seminar—1-3 hours. Prerequisite: graduate standing or consent of instructor. Seminar focuses on specified topical areas within geography, which will vary quarter to quarter. Students expected to present an oral seminar on an aspect of the general topic under discussion. May be repeated six times for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **291. Seminar in Cultural Geography (4)**

Seminar—3 hours.

### **293. Graduate Internship (1-12)**

Prerequisite: consent of instructor. Individually designed, supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **295. Seminar in Urban Geography (4)**

Seminar—3 hours.—W. (W.)

### **297. Graduate Group in Geography Seminar (2)**

Lecture/discussion—1 hour; term paper. Prerequisite: graduate standing. Seminars by UC Davis faculty and prominent national and international scholars; research presentations by Graduate Group in Geography Ph.D. candidates. May be repeated for credit. (S/U grading only.)

### **298. Group Study (1-5)**

Prerequisite: consent of instructor. (S/U grading only.)

### **299. Research (1-12)**

(S/U grading only.)

### **299D. Individual Study (1-12)**

Prerequisite: graduate student status in Geography and consent of instructor. (S/U grading only.)

### **Professional**

### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## **Geology**

**See Earth and Planetary Sciences, on page 237.**

## **Geophysics**

(College of Letters and Science)

Geophysics is the study of the physical properties and processes within and surrounding the Earth. Many problems in the Earth Sciences require geophysical techniques for study. The interdisciplinary minor in geophysics is for students with backgrounds in the physical sciences, engineering and other fields who are interested in pursuing a graduate or professional career in geophysics, or those who desire a career in the energy, minerals, or environmental industries. The minor is sponsored by the Department

of Earth and Planetary Sciences in 2119 Earth and Physical Sciences Building.

### **Minor Program Requirements:**

	UNITS
<b>Geophysics .....</b>	<b>19-26</b>

Engineering 6 or Computer Science  
Engineering 30 or Mechanical  
Engineering 5 ..... 4  
Choose two courses from the following:  
Geology 160, 161, 162, 163 ..... 6  
Applied Science Engineering 115 ..... 4  
One course sequence chosen from the  
following: ..... 5-12  
(a) Atmospheric Science 120, 121A, 121B  
or,  
(b) Geology 101, 101L or,  
(c) Mathematics 118A, 118B, 118C or,  
(d) Physics 104A or Engineering 180; and  
Physics 105A; and Engineering 104 or  
Hydrology 103N or Physics 105C

**Minor Adviser.** Magali Billen, Department of Earth and Planetary Sciences.

## **German**

(College of Letters and Science)

Jaimey Fisher, Ph.D., Chairperson of the Department

**Department Office.** German and Russian  
213 Sproul Hall 530-752-1219;  
<http://german.ucdavis.edu>

### **Faculty**

Carlee Arnett, Ph.D., Associate Professor  
Jaimey Fisher, Ph.D., Associate Professor  
Gail Finney, Ph.D., Professor  
Distinguished Teaching Award-Graduate/  
Professional  
Elisabeth Krimmer, Ph.D., Professor  
Sven-Erik Rose, Ph.D., Associate Professor  
Chunjie Zhang, Ph.D., Assistant Professor

### **Emeriti Faculty**

John F. Fetzer, Ph.D., Professor Emeritus  
Ingeborg Henderson, Ph.D., Senior Lecturer Emerita  
Academic Senate Distinguished Teaching Award  
Winder McConnell, Ph.D., Professor Emeritus  
Karl R. Menges, Dr.Phil., Professor Emeritus  
H. Guenther Nerjes, Ph.D., Associate Professor  
Emeritus  
Fritz Sammern-Frankenegg, Dr.Phil., Lecturer  
Emeritus

### **Affiliated Faculty**

Kirsten Harges, Ph.D., Lecturer

### **The Major Program**

The German major explores in depth the literature and language, the culture and commerce of the German-speaking world (primarily Germany, Austria and Switzerland). The key to the major lies in the careful balance between solid core requirements and the possibility to explore German subject areas through the lens of other disciplines, such as music, art, philosophy, history, and economics.

**The Program.** The department offers courses that highlight literary figures, movements and themes. These courses form the core of upper-division literature electives, but we also offer courses that discuss contemporary culture and commerce in German-speaking countries. Regardless of emphasis, students will find maximum practice in spoken and written German as well as in listening comprehension in all upper-division courses offered in German.

**Career Alternatives.** Completion of the major prepares students for graduate study in German or for career opportunities in international fields ranging from employment in business and government to careers in the fine arts and sciences. Also, it permits admission to professional schools such as law and medicine.

### **A.B. Major Requirements:**

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>0-27</b>

German 1-2-3 (or the equivalent) ..... 0-15  
German 20, 21, 22 ..... 0-12

	44
--	----

### **Depth Subject Matter .....**

German 101A, 101B, 103 ..... 12

German 120 or 118E ..... 4

Four courses chosen from upper-division

offerings taught in German ..... 16

Three additional upper division courses

selected from either 104-109 or

121-198 ..... 12

Or courses in other disciplines that focus on German history, thought, and culture, upon approval of the major adviser. Electives include, but are not limited to:

Art History 176C, 177A, 177B

Comparative Literature 138, 140-142, 147

Economics 110B, 116, 160A and 160B, 162

Film Studies 142, 176A, 176B

History 142A, and 142B, 144A and 144B

Music 110A, 110C, 110D, 110E

Philosophy 170, 175

Political Science 117, 118C, 137

Note: Many of the above electives from other disciplines have prerequisites.

The total of 44 upper-division units may include units earned in the Education Abroad Program.

	44
--	----

### **Minor Program Requirements:**

The Department offers a German minor consisting of at least 20 upper-division units of courses taught in German. Students wishing to minor in German should consult the undergraduate adviser.

	UNITS
--	-------

<b>German .....</b>	<b>20</b>
---------------------	-----------

**Major Adviser.** C. Zhang

**Honors and Honors Program.** The honors program consists of two quarters of research (194H) terminating in an honors thesis. For details consult the undergraduate major adviser. Graduation with high or highest honors requires participation in the honors program.

**Graduate Study.** The Department offers programs of study and research leading to the M.A. degree and to the Ph.D. degree in German literature. Additional degree options for a designated emphasis are available through departmental affiliations with the programs in Social Theory and Comparative History, Critical Theory, Feminist Theory and Research, and Second Language Acquisition. Detailed information may be obtained by writing to the Department Chairperson or the Graduate Adviser.

**Graduate Adviser.** S.-E. Rose

**Prerequisite Credit.** Credit normally will not be given on the lower-division level for a course that is the prerequisite of a course already successfully completed.

### **Courses in German (GER)**

#### **Lower Division**

**Course Placement.** Students with two years of high school German normally continue in German 2; those with three years, German 3; those with four years, German 20.

#### **1. Elementary German (5)**

Discussion—5 hours; laboratory—1 hour. Not open to students who have taken course 1A. Introduction to German grammar and development of all language skills in a cultural context with special emphasis on communication. Students who have successfully completed German 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the stu-

dent's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed. GE credit: ArtHum | AH, WC. —F, S. (F, S.) Arnett

#### **1A. Accelerated Intensive Elementary German (15)**

Lecture/discussion—1.5 hours. Special 12 week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to German grammar and development of all language skills in a cultural context with emphasis on communication. Not open to students who have completed courses 1, 2, or 3. —Su. (Su.) Arnett

#### **2. Elementary German (5)**

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1. Not open for credit to students who have taken course 1A. Continuation of course 1 in areas of grammar and basic language skills. GE credit: ArtHum | AH, WC. —W. (W.) Arnett

#### **3. Elementary German (5)**

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 2. Not open to students who have taken course 1A. Completion of grammar sequence and continuing practice of all language skills through cultural texts. GE credit: ArtHum | AH, OL, WC. —S. (S.) Arnett

#### **10. German Fairy Tales from the Grimms to Disney (4)**

Lecture/discussion—3 hours; term paper. Introduction to the genre of fairy tale with a focus on the Brothers Grimm and Hans Christian Andersen in their respective political/cultural contexts. Discusses filmic adaptations by Disney, the East German DEFA and Hollywood. GE credit: ArtHum, Div, Wrt | AH, VL, WE. —Krimmer

#### **11. Travel and the Modern World (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: completion of entry level writing requirement. Examination of travel as an essential human activity and experience of global modernity and cross-cultural encounters from the 18th to the 21st century with an emphasis on German-speaking culture. Travelogues, literature, art, memoirs, and films in English translation. (Same course as Comparative Literature 11.) GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE. —F, W, S. (F, W, S.) Zhang

#### **20. Intermediate German (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 3; may be taken concurrently with course 6. Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts. GE credit: ArtHum | AH, OL, WC, WE.

#### **21. Intermediate German (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 20. Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts; addresses social relations and cultural practices in Germany; discusses history of Germany. GE credit: ArtHum | AH, OL, WC, WE.

#### **22. Intermediate German (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 21. Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts. GE credit: ArtHum | AH, OL, WC, WE.

#### **40. Great German Short Stories (in English) (4)**

Lecture/discussion—3 hours; extensive writing. Major German short stories from Goethe at the end of the eighteenth century to Thomas Mann at the beginning of the twentieth century. Offered irregularly. GE credit: AH, OL, WC, WE.

#### **45. Vampires and Other Horrors in Film and Media (4)**

Lecture—2 hours; discussion—1 hour; film viewing—3 hours. History of representations of vampires and horror generally from the 19th through 21st centuries. Emphasis on transnational history of the horror genre; psychologies of horror effects; issues of race, gender, and class; intersections with prejudice,

medicine, modernity. (Same course as Film Studies 45.) GE credit: ArtHum | ACGH, AH, DD, OL, VL, WC, WE. —Fisher

#### **48. Myth and Saga in the Germanic Cultures (4)**

Lecture—3 hours; term paper. Knowledge of German not required. English translation from the Norse Eddas, the Volsung and Sigurd-Siegfried cycles, and the Gudrun lays; literary mythology in German Romanticism culminating in Wagner's "total artwork" concept and The Ring of the Nibelung cycle. May not be counted toward major in German. Offered irregularly. GE credit: ArtHum, Wrt | AH, VL, WC, WE.

#### **49. Freshman Colloquium (2)**

Seminar—2 hours. Prerequisite: open only to students who have completed 40 or fewer quarter units of transferable college-level work. Readings, discussion and written projects treating topics such as communist-capitalist tension in German literary culture; masculine "versus" feminine authorial consciousness; disintegration and reconstitution of language reflecting cultural transformation; exorcising post-Holocaust national guilt and individual frustration—Germany's new European "mission." Offered irregularly.

#### **92. Field Work in German (1-12)**

Internship—3-36 hours. Prerequisite: lower division standing. Restricted to lower-division standing. Total immersion program in Germany or a German speaking setting in the U.S. to further develop students' proficiency in the German language. (P/NP grading only.) Offered irregularly.

#### **98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.) Offered irregularly.

#### **99. Special Study for Undergraduates (1-5)**

(P/NP grading only.) Offered irregularly.

#### **Upper Division**

##### **101A. Survey of German Literature, 800-1800 (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 22 or consent of instructor. German literature from the Middle Ages to Classicism (800-1800) with an overview of major movements and authors. GE credit: ArtHum | AH, OL, VL, WC, WE. —F. (F.) Arnett

##### **101B. Survey of German Literature, 1800-Present (4)**

Lecture/discussion—3 hours. Prerequisite: course 22. German literature from the Age of Romanticism (1800) to the present with an overview of major movements and authors. GE credit: ArtHum | AH. —W. (W.)

##### **103. Writing Skills in German (4)**

Lecture—3 hours; extensive writing—1 hour. Prerequisite: course 22 or consent of instructor. Practice in different kinds of writing, such as abstracts, correspondence, lecture summaries, analysis of or response to short literary texts. GE credit: ArtHum | AH, OL, WC, WE. —F, W, S. (F, W, S.) Zhang

##### **104. Translation (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 22 or consent of instructor. Exercises in German-to-English, English-to-German translation using texts from the areas of culture and commerce. Not open for credit to students who have completed course 104A. Offered irregularly. GE credit: ArtHum | AH, OL, VL, WC, WE. —Fisher

##### **105. The Modern German Language (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 22 or consent of instructor. Introduction to the linguistic analysis of contemporary German, including its phonology, morphology, syntax and semantics, as well as sociolinguistic considerations. Offered irregularly. GE credit: ArtHum, Wrt | AH, OL, WC, WE. —Arnett

#### **109A. Business German (4)**

Lecture/discussion—3 hours; laboratory—1 hour. Prerequisite: course 22 or consent of instructor. Specialized language course using business-oriented information and publications as the basis for discussions, roleplay, reports, compositions and translations. Offered in alternate years. —Krimmer

#### **109B. Advanced Business German (4)**

Lecture/discussion—3 hours; laboratory/discussion—1 hour. Prerequisite: course 22 or consent of instructor. Specialized advanced language course providing in-depth study of major business topics with the help of authentic texts and videos. Offered irregularly.

#### **112. Topics in German Literature (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: upper-division standing or consent of instructor. Investigation of significant themes and issues within their European context. Knowledge of German is not required. May be repeated one time for credit. Offered irregularly. GE credit: ArtHum, Wrt | AH, WC.

#### **113. Goethe's Faust (4)**

Discussion—3 hours; term paper. Knowledge of German not required. Intensive study of Goethe's Faust in its entirety. Discussions and readings in English; reading the text in the original is encouraged. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

#### **114. From Marlene Dietrich to Run, Lola Run: German Women and Film (4)**

Lecture/discussion—3 hours; extensive writing; film viewing—3 hours. Knowledge of German not required. Women in German film from the Weimar Republic to present, with special emphasis on conceptualizations of gender, historical and political context, aesthetic and filmic innovations. Offered in alternate years. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE. —Krimmer

#### **115. German Literature Since 1945 (4)**

Lecture—3 hours; extensive writing. Knowledge of German not required. Major writers of the post-war generation of Austria, Switzerland and Germany: novelists, such as Böll, Grass, Johnson, Walser, Handke; playwrights such as Frisch, Dürrenmatt and Hochhut; and poets, such as Celan, Enzensberger, and Aichinger. May be repeated for credit in different topic area. Offered irregularly. GE credit: ArtHum, Wrt | AH, WC, WE.

#### **116. Readings in Jewish Writing and Thought in German Culture (4)**

Lecture—3 hours; term paper. Prerequisite: Religious Studies 23 or consent of instructor. Historical tradition of Jewish thought in the German cultural context; unique contributions of Jewish writers to culture of the German-speaking world; what it means to be "other" in the mainstream culture. No credit will be given to those students who have completed Humanities 121. May be repeated two times for credit if topic differs. (Same course as Jewish Studies 116.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, OL, WC, WE. —Rose

#### **117. After the Catastrophe: Jews and Jewish Life in Post-1945 Germany (4)**

Lecture/discussion—3 hours; term paper. Jews and Jewish culture in post-1945 Germany, with special attention given to literature, historical debates, photography, film, as well as websites and other new media. Offered in alternate years. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, OL, VL, WC, WE. —Fisher

#### **118A. Vienna at the Turn of the Twentieth Century (The End of the Habsburg Empire) (4)**

Lecture—1 hour; discussion—2 hours; extensive writing. Knowledge of German not required. Cultural ferment in Vienna, capital of the multinational Habsburg empire, at the turn of the century, with consideration of innovations in literature, music, graphic arts, architecture, philosophy and psychology, heralding European modernism. Offered irregularly. GE credit: ArtHum, Wrt | AH, WC. —Finney

**118B. Weimar Culture: Defeat, the Roaring Twenties, the Rise of Nazism (4)**

Lecture—1 hour; discussion—2 hours; extensive writing. Knowledge of German not required. Expressionism in graphic arts, literature, film, New Objectivity, Brecht and Bauhaus considered in the context of the failure of the German experiment in democracy, the Weimar Republic of 1919-33. Offered irregularly. GE credit: ArtHum, Wrt | AH, WC, WE.

**118C. Germany Under the Third Reich (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: background in modern European history; course 118B recommended. No knowledge of German required. Interdisciplinary study of German society and culture during the Third Reich (1933-45); readings in aesthetics, history, and philosophy; study of Fascist culture in literature, film, architecture, and the graphic arts; focus on everyday life in Hitler's Germany. Offered irregularly. GE credit: ArtHum, Wrt | WC, WE.

**118E. Contemporary German Culture (4)**

Lecture/discussion—3 hours. Prerequisite: course 22 or consent of instructor. The political, economic, social and cultural scene of Germany today. Offered irregularly. GE credit: ArtHum, Wrt | AH, WC, WE.

**119. From German Fiction to German Film (4)**

Lecture—3 hours; discussion—1 hour; term paper. Examines a number of film adaptations of major German prose works and plays to ascertain the types of changes involved in the shift in medium and the positive and negative effects achieved by such transferences. Offered irregularly. GE credit: ArtHum, Wrt | AH, OL, VL, WC.

**120. Survey of German Culture (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 22 or consent of instructor. Major developments in German arts, philosophical thought, social institutions, and political history. GE credit: ArtHum | AH, OL, VL, WC, WE.—Zhang

**121. The Medieval Period in German Literature (4)**

Discussion—3 hours; extensive writing. Prerequisite: course 22 or consent of instructor. Literary-philosophical profile of the Mittelhochdeutsche Blütezeit in terms of the significant epics, romances, and lyric poetry. Readings in German. Offered irregularly. GE credit: ArtHum | AH.—Arnett

**122. Reformation and Baroque (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 22 or consent of instructor. Exemplary literary works of the 16th and 17th centuries tracing the principal lines of development and showing the reflection in literature of the social, as well as religious, scenes. Offered irregularly. GE credit: ArtHum | AH, OL, VL, WC, WE.

**123. Literature of the Classical Age (4)**

Discussion—3 hours; term paper. Prerequisite: course 22 or consent of instructor. A critical assessment of principal works of Goethe and Schiller within the historical and philosophical context of their times. Offered irregularly. GE credit: ArtHum | AH, WC, WE.

**124. Major Movements in German Literature (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 22 or consent of instructor. Significant movements and schools in German literary history (e.g., the medieval troubadours, Storm and Stress, the romanticists, the George Circle, the expressionists), with emphasis on the broader cultural dynamics and ideologies as these apply to individual literary works. May be repeated one time for credit when topic differs. Offered irregularly. GE credit: ArtHum | AH, WC.

**125. Short Fiction: 1880-1914 (4)**

Lecture—3 hours; term paper. Prerequisite: course 22 or consent of instructor. Reading of short German fiction from the fin-de-siècle period and representative of various prose styles and cultural currents. Offered irregularly. GE credit: ArtHum | AH, WC, WE.—Finney

**126. Modern German Literature (4)**

Discussion—3 hours; extensive writing. Prerequisite: course 22. Selections from significant works of major contemporary writers, such as Hesse, Mann, Kafka, Rilke, Brecht, Grass. May be repeated one time for credit with consent of adviser. Offered irregularly. GE credit: ArtHum | AH, WC, WE.—Finney

**127. Major Writers in German (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 22 or consent of instructor. Examination of representative works by a major writer, set in the broader cultural context of the relevant period or movement. May be repeated one time for credit when topic differs. Offered irregularly. GE credit: ArtHum | AH, WC, WE.

**129. Postwar Women Writers (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 22 or consent of instructor. Major writers in both Germany, Austria, and Switzerland since 1945. Topics include the concept of a feminist aesthetics, East vs. West German writers, and the status of minority women writers in Germany (Jewish, Turkish-German, Afro-German). Offered irregularly. GE credit: ArtHum, Div | AH, WC, WE.—Finney

**131. German Lyric Poetry (4)**

Lecture—3 hours; term paper. Prerequisite: course 22 or consent of instructor. Study of the genre of lyric poetry from the late Middle Ages through Renaissance, Baroque, Classical, Romantic, and Modern periods in correlation with other literary forms and the social climate of each period. Offered irregularly. GE credit: ArtHum | AH, WC, WE.—Finney

**132. The German Novelle (4)**

Lecture—3 hours; term paper. Prerequisite: course 22 or consent of instructor. Inquiry into the art of the "Novelle" through analysis of the materials and formal devices of representative authors from Goethe to Kafka. Offered irregularly. GE credit: ArtHum | AH, WC, WE.

**133. The German Drama (4)**

Lecture—3 hours; term paper. Prerequisite: course 22 or consent of instructor. Readings in the works of Germany's leading dramatists from the eighteenth century to the present day, such as Lessing, Goethe, Schiller, Kleist, Büchner, Hauptmann, Brecht. Offered irregularly. GE credit: ArtHum | AH, OL, VL, WC, WE.—Krimmer

**134. Topics in German Intellectual History (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 22 or consent of instructor. Topics in German intellectual history with materials from a number of periods, genres, and disciplines. May be repeated two times for credit when topic differs. Offered irregularly. GE credit: ArtHum | AH, WC, WE.

**141. The Holocaust and its Literary Representation (4)**

Lecture—2 hours; discussion—1 hour; term paper. Knowledge of German not required. Aesthetic representation and metaphorical transformation of the Holocaust in its human and historical perspectives. Offered irregularly. GE credit: ArtHum, Wrt | AH, WC, WE.—Rose

**142. New German Cinema (4)**

Lecture/discussion—3 hours; extensive writing. German filmmakers of the 1960s-1980s such as Fassbinder, Herzog, Syberberg, Brückner, Schlöndorf, Kluge, Wenders. Knowledge of German not required. May be repeated for credit with consent of instructor. (Same course as Film Studies 142) Offered irregularly. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE.—Fisher

**143. Language Through Media (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 22 or consent of instructor. Study of contemporary German-language news media (press, video, film, CD-ROM, internet) for insight into political and cultural developments in the German-speaking countries. Offered irregularly. GE credit: ArtHum | AH, OL, VL, WC, WE.—Arnett

**144. Marx, Nietzsche, Freud (4)**

Lecture/discussion—3 hours; term paper. Study of major texts of Marx, Nietzsche, and Freud, selected with an eye to their impact on 20th-century economics, ethics, and attitudes toward eros. Particular focus on conceptions of the self and the individual's relation to society. Offered in alternate years. (Same course as Humanities 144.) GE credit: ArtHum, Wrt | AH, WC.—Rose

**160. Love in the Middle Ages (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 22 or consent of instructor. Analysis of the phenomenon of love in selected medieval lyrical poems and romances of the twelfth and thirteenth century Blütezeit. Origins of courtly love, love and individualism, love and the Church, love and adultery. Offered irregularly. GE credit: ArtHum | AH, WC, WE.—Arnett

**168. Multiculturalism in German Literature (4)**

Lecture/discussion—3 hours; term paper or discussion—1 hour. Prerequisite: course 22 or consent of instructor. Examples of German Literature from the High Middle Ages to the present that explore the "encounter with the other" (people of color, different beliefs and cultures, and inner-German minorities). Offered irregularly. GE credit: ArtHum, Div | AH, OL, VL, WC, WE.—Arnett

**176A. Classic Weimar Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: Humanities 1. German Weimar (1919-1933) cinema. Fritz Lang, F.W. Murnau, and G.W. Pabst among others. Influence on world-wide (esp. Hollywood) film genres such as film noir, horror, science fiction, and melodrama. Not open for credit to students who have completed Humanities 176. Offered irregularly. (Same Course as Film Studies 176A.) GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE.—Fisher

**185. The Age of Bismarck (4)**

Discussion—3 hours; term paper. Prerequisite: course 22 or consent of instructor. Notable literary repercussions of the zenith of Germany's international status at the time of Bismarck's Chancellorship. The poetry of Storm, the prose of Fontane, the drama of Hauptmann. Offered irregularly. GE credit: ArtHum | AH, WC, WE.

**192. Field Work in German (1-12)**

Internship—3-36 hours. Prerequisite: course 109A or consent of instructor. Total immersion program in Germany or a German speaking setting in the U.S. to further develop student proficiency in the German language. May be repeated two times or up to 12 units of credit with consent of instructor. (P/NP grading only.) Offered irregularly.

**194HA. Honors Program (3)**

Independent study—2 hours; term paper. Prerequisite: open only to majors with a 3.500 minimum GPA in at least 135 graduation units. Research of an integrative nature (in either "General" or "Area Studies Emphasis" fields of major), guided by thesis adviser chosen by student. (P/NP grading only. Deferred grading only, pending completion of course sequence.)

**194HB. Honors Program (3)**

Independent study—2 hours; term paper. Prerequisite: open only to majors with a 3.500 minimum GPA in at least 135 graduation units. Writing of Honors Thesis on topic selected by student in consultation with thesis adviser. (P/NP grading only. Deferred grading only, pending completion of course sequence.)

**197. Tutoring in German (1-4)**

Tutorial—3-12 hours. Prerequisite: consent of German Program Director. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with department courses. May be repeated up to eight units of credit. (P/NP grading only.)

**198. Directed Group Study (1-5)**

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate****202. Middle High German (4)**

Discussion—3 hours; lecture—1 hour. Prerequisite: graduate standing. Outline of grammar; selections from Middle High German epic, romance, and lyric poetry.

**206. Cognitive Grammar for Applied Linguists (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Analysis of grammar and application of cognitive grammar to language instruction. Syntactical problems and analyses relevant to the language the student will teach. Offered irregularly.—Arnett

**210. Techniques of Literary Scholarship (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. The bibliographical, organizational, and methodological tools and resources for advanced, independent research. Offered irregularly.

**211. Concepts in Literary Theory (4)**

Seminar—3 hours. Prerequisite: graduate standing. Advanced course in concepts of literary theory and criticism. Discussion of the emergence of theoretical concepts and their impact on the understanding and appreciation of literary works. Discussion in German and English, readings in German. Offered irregularly.

**212. Contemporary Approaches to Literary Theory (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Study of contemporary theoretical approaches such as structuralism, deconstruction, feminism, Marxism/Frankfurt School, and reception theory in conjunction with the works of major authors. Offered irregularly.

**239. Narrative and Narrative Theory (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Studies, in a theoretical and literary historical context, major elements of 19th- and 20th-century narrative, such as techniques of framing, refraction, and montage; narrative perspective; mimesis; and self-consciousness. Focuses on paradigmatic prose texts alongside a spectrum of critical approaches.

**240. Forms of German Verse (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. The development of German verse from the Middle Ages to the present, with special emphasis on different techniques of text analysis and interpretation. May be repeated for credit with consent of instructor. Offered irregularly.

**241. The German Drama (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. The major forms of German drama from its origins to the middle of the twentieth century. May be repeated for credit with consent of instructor. Offered irregularly.—Finney

**242. The German Novelle (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. The major German Novellisten, with particular emphasis on the flowering of this genre in the nineteenth century. May be repeated for credit with consent of instructor. Offered irregularly.

**243. Fontane and the Rise of the Modern German Novel (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Fontane, the father of the modern German novel and the chief German representative of the European novel at its greatest, in the context of the nineteenth-century European political and social scene. Offered irregularly.

**244. Gender and Comedy (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Studies of genre and gender in German-language comedy by male and female writers from the 18th century to the present. Authors treated

include Lessing, Kleist, Büchner, Ebner-Eschenbach, Hauptmann, Hofmannsthal, Frisch, Langner, and Jelinek. Offered irregularly.—Finney

**252. The Writings of Lessing (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Study of Lessing's theory of literature with particular emphasis upon his critical attacks on French drama. Offered irregularly.

**253. Goethe (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. The Study of the origins of Goethe's thought in German Pietism, and his principal artistic, autobiographical, scientific, and philosophical works. Offered irregularly.—Krimmer

**254. Schiller (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. A critical analysis of Schiller's major works and his impact on the intellectual climate in Germany during the late eighteenth and early nineteenth centuries. Offered irregularly.—Krimmer

**255. Aesthetics in the Age of Goethe (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Emergence of aesthetic autonomy from eighteenth century normative poetics during the Age of Goethe. The shift from a model based on the imitation of nature (and the Ancients) to a new concept grounded in the individuality of aesthetic experience. Offered irregularly.

**253. Goethe (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. The Study of the origins of Goethe's thought in German Pietism, and his principal artistic, autobiographical, scientific, and philosophical works. Offered irregularly.—Krimmer

**254. Schiller (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. A critical analysis of Schiller's major works and his impact on the intellectual climate in Germany during the late eighteenth and early nineteenth centuries. Offered irregularly.—Krimmer

**260. The Poetry of Rilke (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Study of the principal motifs, myths, images, and problems in the poetry of Rainer Maria Rilke. Offered irregularly.

**261. Brecht and the Epic Theater (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. A reading of Brecht's works with emphasis on the ideas which impelled the development of new literary forms and concepts.—S. (S.) Fisher

**262. Studies in Turn-of-the-Century Culture (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Investigates literary currents in turn-of-the-century Germany and Austria against the background of contemporaneous developments in psychology, the visual arts, philosophy, and music. Authors treated include Hauptmann, Holz and Schlaf, Schnitzler, T. Mann, Wedekind, Musil, Hofmannsthal. Offered irregularly.—Finney

**285. Middle High German Literature (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Extensive reading of Middle High German texts in the original language. Examines linguistic and literary problems. May be repeated for credit when topic differs. Offered irregularly.

**288. The Renaissance and Reformation in German Literature (4)**

Seminar—3 hours; term paper. Restricted to graduate standing. The parabolic and didactic style in Germany's literature during the sixteenth century. May be repeated for credit with consent of instructor. Offered irregularly.

**289. German Literature of the Baroque (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. The "Elegantiadeal" and the varying methods used to portray it in seventeenth-century German literature. May be repeated for credit with consent of instructor. Offered irregularly.

**290. The Enlightenment in German Literature (4)**

Seminar—3 hours; term paper. Revolt against the concept of the "Elegantiadeal," and evolution of a new literature based on reason and wit. May be repeated for credit with consent of instructor. Offered irregularly.

**291. Foreign Language Learning in the Classroom (4)**

Seminar—3 hours; project. Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in classroom practices across commonly taught foreign languages. (Same course as French 291 and Spanish 291.)—Arnett

**292. Sentimentality and Sturm und Drang in German Literature (4)**

Seminar—3 hours. Reaction to overemphasis on Reason: theories of Hamann and Herder and works of poets such as Lenz, Leisewitz, the early Goethe and Schiller. May be repeated for credit with consent of instructor. Offered irregularly.

**293. The Classical Age of German Literature (4)**

Seminar—3 hours; term paper. Inquiry into the aesthetic and humanistic qualities of Germany's greatest literary epoch. May be repeated for credit with consent of instructor. Offered irregularly.

**294. The Romantic Period in German Literature (4)**

Seminar—3 hours; term paper. Survey of the works of early nineteenth-century authors in reaction against the age of classicism. May be repeated for credit with consent of instructor. Offered irregularly.

**295. Poetic Realism in German Literature (4)**

Seminar—3 hours; term paper. Outstanding figures in German literature between 1840 and 1890. Important phases in their developments will be treated. May be repeated for credit with consent of instructor. Offered irregularly.

**296. Twentieth-Century German Literature (4)**

Seminar—3 hours; term paper. Considers the revolt of the Hauptmann generation, Symbolism, Expressionism, and the chief currents of the contemporary scene. May be repeated for credit with consent of instructor. Offered irregularly.—Finney

**297. Special Topics in German Literature (4)**

Seminar—3 hours; term paper. Various special topics in German literature, which may cut across the more usual period and genre rubrics. May be repeated for credit when topic differs.

**298. Group Study (1-5)****299. Individual Study (1-12)**

(S/U grading only.)

**299D. Special Study for the Doctoral Dissertation (1-12)**

(S/U grading only.)

**Professional****390A. The Teaching of German (2)**

Lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.)—Arnett

**390B. The Teaching of German (2)**

Lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.)—Arnett

**390C. The Teaching of German (2)**

Lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.)—Arnett

### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

### Professional

### 400. Tutorial and Instructional Internship (1-3)

Discussion—1-3 hours. Prerequisite: graduate standing. Apprentice training in ongoing undergraduate literature courses taught by regular staff, with supplementary weekly critique sessions; intern leadership of discussion sections under staff supervision. May be repeated for credit.

## Global and International Studies

(College of Letters and Science)

The interdisciplinary minor in Global and International Studies will enable students to learn about global and international issues at UC Davis, as well as gain first-hand academic experience abroad. The minor is also designed to give recognition for upper division course work while studying abroad. However, the minor can also be completed with approved course work taken at UC Davis.

Students will be expected to work closely with an academic adviser in developing an intellectually coherent program of study. Each proposal must be approved by the Faculty Director of UC Davis Study Abroad.

The minor is overseen by a Program Committee. For more information, see <http://studyabroad.ucdavis.edu/>.

### Minor Program Requirements:

UNITS

### Global and International Studies .... 23-25

#### Arts and Humanities Emphasis:

One course from: Anthropology 4, 20, International Relations 1, Political Science 3 or Sociology 5 ..... 4  
One upper division UC Davis general course on global international studies ..... 3-4  
See program adviser for a list of approved courses.

Course cluster requirement ..... 16-17

The minor requires the selection of interrelated courses totaling a minimum of 16-17 upper division units in area and regional studies or thematic course clusters in global and international studies.

Suggested course clusters include:

(1) Country or region-specific courses: Western Europe; Russian and East/Central Europe; Asia and the Pacific; Latin and South America; Africa and the Middle East; Jewish Studies; specific countries.

or

(2) Courses clustered around a thematic field in global and international studies: people and nationalities; the individual and society, arts, language, literature and culture.

**Study Abroad and International Internships.** The course cluster requirement may be met in one of two ways: (1) completion of a minimum of 16-17 units in the course cluster emphasis by taking approved UC Davis upper division courses in the area of global/international studies and/or approved upper division courses taken while participating in UC Study Abroad or another approved study abroad program, or (2) completion of 12 units of course work in a UC Davis accredited international internship, plus UC Davis courses sufficient to total 16-17 units. Students must meet with the GIS adviser and complete a Course Cluster Worksheet to demonstrate subject interrelatedness.

**Restrictions.** No more than two courses from a single UC Davis Department may be offered in satisfaction of the minor requirements.

**Foreign Language Study.** Students are strongly encouraged to study a foreign language, particularly the language of the country in which and about which they intend to study. However, only upper division coursework may be used to fulfill requirements for the minor.

## Global Disease Biology

(College of Agricultural and Environmental Sciences)

Department of Plant Pathology

**Program Office.** 152 Hutchison Hall  
530-754-7277.

**Master Adviser.** Johan H.J. Leveau, Ph.D., Professor (*Plant Pathology*)

#### Committee in Charge

Patricia A. Conrad, D.V.M, Ph.D., Professor (*Pathology, Microbiology and Immunology*)  
Satya Dandekar, Ph.D., Professor (*Medical Microbiology and Immunology*)  
Thomas Gordon, Ph.D., Professor (*Plant Pathology*)  
David M. Rizzo, Ph.D., Professor (*Plant Pathology*)  
Dori Borjesson, D.V.M, Ph.D., Professor (*Pathology, Microbiology and Immunology*)  
Joie Watson, D.V.M, Ph.D., Professor (*Medicine and Epidemiology*)  
Michael S. Wilkes, M.D., M.P.H., Ph.D., Professor (*Internal Medicine*)

#### Faculty

Faculty includes members of the Departments of Plant Pathology, on page 513; Veterinary Medicine, School of, on page 581; Medicine, School of, on page 427.

#### The Major Program

The Global Disease Biology (GDB) major offers students the opportunity to study disease and its relationship to the health of people, animals, plants, and the environment. The program uses an integrated approach to advance student understanding of the concept(s) of disease, the societal and personal impacts of past, present and future diseases, and the science behind disease discoveries, causes, evolution, diagnosis, treatment, and prevention. The program recognizes the interconnectedness of people, animals, plants, and the environment and aims to identify and address the fundamental causes of poor health around the world. Managing global disease problems requires a multifaceted, holistic approach to address the full spectrum of human, animal, plant, and environmental health risks (also known as a One Health approach). Throughout a series of core courses, issues related to human, animal, and plant health, along with tools available to solve these problems, will be introduced to provide students with real-world scenarios in which they can apply and advance their creative and critical thinking skills. The major prepares graduates with the knowledge, leadership skills and experiences required to excel in professions associated with global health, the environment, food safety and security, biological safety and security, and health policy. For more information, see <http://gdb.ucdavis.edu/>.

**The Program.** The Global Disease Biology major provides students with broad preparatory scientific course work, global disease biology core classes, flexibility in upper division electives, and a strong research experience. Global Disease Biology core classes are intended to be transdisciplinary and focus on concepts that cut across human, animal, and plant diseases offering a unifying ecological and quantitative perspective on disease.

Students plan their chosen emphasis of study as part of a required discussion course and in consultation with their adviser. Students will draw from many

undergraduate courses currently offered on disease and health in a way that complements the core courses required for the Global Disease Biology major. The major includes a senior research project, which each student designs to bridge the disciplines of the major.

**Internships and Career Alternatives.** The program and interests of each student in solving societal problems guides students to a range of internship and career choices. On and off-campus internship opportunities are available in research laboratories, in field situations, with governmental agencies, with private industry, and in international programs. A degree in Global Disease Biology prepares students for careers in research, teaching, governmental regulation, health care industry, or agriculture (food safety/ food security) as each relates to disease and health of people, animals, and plants. Students in the major gain research experience and may choose to continue their training at the graduate or professional level in a variety of biological disciplines. Careers in medicine, veterinary medicine, and plant pathology are open to Global Disease Biology majors.

#### B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter ..... 60-62

Global Disease Biology 90 .....	1
Science and Society 13 .....	3
Biological Sciences 2A-2B-2C .....	15
Chemistry 2A-2B-2C, and 8A-8B or 118A-118B .....	21-23
General Physics 7A-7B .....	8
Mathematics 17A-17B-17C .....	12

#### Depth Subject Matter ..... 46-49

Biological Sciences 101, 105 .....	7
Evolution and Ecology 100 .....	4
Microbiology 101 .....	5
One course from Statistics 13, 100; Plant Sciences 120 .....	4
Pathology, Microbiology & Immunology 129Y .....	3
VM Medicine and Epidemiology 158 .....	3
Global Disease Biology 101, 102 .....	8
Two courses from Plant Pathology 120; Pathology, Microbiology & Immunology 127, 128; Microbiology 162; Entomology 153, 156/156L; Global Disease Biology 103 .....	6-9
Global Disease Biology 187 .....	3
Global Disease Biology 189 .....	3

#### Restricted Electives ..... 25

Focused specialty upper division courses as outlined in the student's major proposal (from course 187) with approval of an adviser.

#### Total Units for the Degree ..... 125-134

#### Recommended

Biological Sciences 101D .....	1
Global Disease Biology 189D .....	1

#### Minor Program Requirements:

A minor in Global Disease Biology may complement student's major program. Some courses have required prerequisites not included as part of the minor, and students should plan accordingly.

UNITS

#### Global Disease Biology ..... 20-22

Science and Society 13 .....	3
Pathology, Microbiology & Immunology 129Y .....	3
VM Medicine and Epidemiology 158 .....	3
Global Disease Biology 101, 102 .....	8
One course from: Plant Pathology 120; Pathology, Microbiology & Immunology 127, 128; Microbiology 162; Entomology 153, 156/156L; Global Disease Biology 103 .....	3-5

#### Minor Program Adviser: TBA

Advising Center for the minor is located in 152 Hutchison Hall 530-754-7277.

## Courses in Global Disease Biology (GDB)

### Lower Division

#### 90. Introduction to Global Disease Biology (1)

Seminar—1 hour; fieldwork—1 hours. Introduction to the Global Disease Biology major, research and internship opportunities, and potential career paths in human, animal, and plant health. Communication, ethics and the nature of science. (P/NP grading only.)—F. (F.) Rizzo

### Upper Division

#### 101. Epidemiology (4)

Lecture—2 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: Science and Society 13; Biological Science 2A, 2B, 2C; Statistics 13, 100 or Plant Sciences 120. Principles and practice of epidemiology as applied to human, animal, and plant populations and the environment in which these populations co-exist. Quantitative analysis of both infectious and non-infectious disease. Inter-dependence between epidemiological analysis, decision-making and policy formulation will be highlighted. GE credit: SciEng | SE, QL.—W. (W.) McRoberts, Papageorgiou

#### 102. Disease Intervention and Policy (4)

Lecture—3 hours; discussion—1 hour; project. Prerequisite: course 101; Science and Society 13; Biological Sciences 2A, 2B, 2C; Pathology, Microbiology and Immunology 129Y; VM-Medicine and Epidemiology 158. Examination of the prevention and treatment of diseases affecting humans, animals, and plants. Case studies will illustrate the merits of a unified approach to promoting health at local, regional, and global scales. GE credit: SciEng | OL, SE, SL.—S. (S.) Rizzo

#### 103. The Microbiome of People, Animals, and Plants (3)

Lecture—3 hours. Prerequisite: Biological Science 2A, 2B, 2C. Examination of the structure and function of microbial communities that live inside and on host organisms. Introduction to general concepts of the microbiome and microbiota, and their relationship to host health and disease. GE credit: SciEng | SE, SL.—F. (F.) Cook, Leveau

#### 187. Global Disease Biology Seminar (3)

Seminar—1 hour; discussion—1 hour; term paper. Prerequisite: junior standing, course 90, Science and Society 13. Open to Global Disease Biology majors. Seminar leading to development of the research proposal and academic plan for the Global Disease Biology major.—F. (F.)

#### 189. Global Disease Biology Senior Research (3)

Independent study—3 hours. Prerequisite: senior standing, courses 90, 187; (course 189D concurrently the first time course 189 is taken), Science and Society 13. Restricted to Global Disease Biology majors only. Capstone research experience for the Global Disease Biology major. Project may be experimental, library research, or some other creative activity. May be repeated one time for credit while research is conducted over two quarters; second quarter used to finish research paper.—F, W, S, Su. (F, W, S, Su.)

#### 189D. Global Disease Biology Research Discussion (1)

Discussion—1 hour. Prerequisite: courses 90, 187, Science and Society 13; course 189 required concurrently. Restricted to junior standing; Global Disease Biology majors only. Course helps prevent or solve problems during the students' research activity. Independent advising and assistance on research proposal. (P/NP grading only.)—F, W, S. (F, W, S.)

See Classics, on page 211.

## Health Informatics (A Graduate Group)

### Formerly Medical Informatics (A Graduate Group)

Michael Hogarth, M.D., Professor  
(Department of Internal Medicine and Department of Pathology and Laboratory Medicine)

**Group Office:** UC Davis Health System

Health Informatics Program  
2450 48th St., Suite 2800, Sacramento, CA 95817  
916-734-8710; [healthinformatics@ucdavis.edu](mailto:healthinformatics@ucdavis.edu)

### Faculty

Nicholas Anderson, Ph.D., Assistant Professor  
(Pathology and Laboratory Medicine)

Aaron Bair, M.D., M.S.C., Associate Professor  
(Emergency Medicine)

Matt Bishop, Ph.D., Professor (Computer Science)

Dariusz Borys, M.D., Assistant Professor  
(Emergency Medicine)

Robert Cardiff, M.D., Ph.D., Professor  
(Pathology and Laboratory Medicine)

Mark Carroll, M.P.H., Health Sciences Assistant Clinical Professor (Pathology and Laboratory Medicine)

Mary Christopher, D.V.M., Ph.D., Professor  
(Pathology, Microbiology, and Immunology)

Cristina Davis, Ph.D., Assistant Professor  
(Mechanical and Aerospace Engineering)

Fred Gorin, M.D., Ph.D., Professor (Neurology)  
Bernd Hamann, Ph.D., Professor  
(Computer Science)

Calvin Hirsch, M.D., F.A.C.P., Professor  
(Internal Medicine and Public Health Sciences)

Anthony Jerant, M.D., Associate Professor  
(Family and Community Medicine)

Hershon Johl, M.D., Associate Physician Diplomate (Internal Medicine)

Karnijit Johl, M.D., Ph.D., F.A.C.P., Associate Clinical Professor of Medicine (Internal Medicine)

Tae Yoon Kim, Ph.D., R.N., Associate Professor  
(Nursing)

Patrice Koehl, Ph.D., Associate Professor  
(Computer Science)

Krish Krishnan, Ph.D., Associate Professor  
(Pathology and Laboratory Medicine)

Richard Levenson, M.D., Professor  
(Pathology and Laboratory Medicine)

Scott MacDonald, M.D., Associate Physician  
(Internal Medicine)

James Marcin, M.D., M.P.H., Associate Professor  
(Pediatrics)

Thomas Nesbitt, M.D., M.P.H., Professor  
(Family and Community Medicine)

Hien Nguyen, M.D., M.A.S, Assistant Professor  
(Infectious Diseases)

Alberto Odor, M.D., Adjunct Professor  
(Nursing)

Sean Peisert, Ph.D., Assistant Adjunct Professor  
(Computer Science)

Brad Pollock, M.P.H., Ph.D., F.A.C.E., Professor  
(Public Health Science)

Jason Roof, M.D., Assistant Clinical Professor  
(Psychiatry)

J. Anthony Seibert, Ph.D., Professor (Radiology)  
Hendry Ton, M.D., M.S., Associate Professor  
(Psychiatry)

Xiaowei Yang, Ph.D., Assistant Professor  
(Biostatistics)

Peter Yellowlees, M.B.B.S., M.D, Professor  
(Psychiatry)

Heather Young, Ph.D., R.N., G.N.P., F.A.A.N., Associate Vice Chancellor (Nursing)

### Emeriti Faculty

Richard Walters, Ph.D., Professor Emeritus  
(Computer Science)

**Graduate Study:** The Group currently offers an M.S. degree in Health Informatics. The program is primarily designed for clinicians (M.D., D.O., D.V.M., V.M.D., M.P.H., Pharm.D., R.N., others) and healthcare IT professionals with Bachelor's degree.

The course of study provides research-oriented training that spans the use of computer systems in medicine today, including methods for clinical data acquisition, storage, and retrieval, the development, use and implementation of the electronic medical record, management of clinical data, and the use of medical decision support systems. A research project and thesis are mandatory degree requirements.

**Preparation.** The Group encourages applications from clinicians and healthcare IT professionals who have had experience in the manipulation of clinical information. Basic qualifications include an advanced degree in a health-related field or the equivalent in work experience. Proof of proficiency in a programming language is required. Applicants with extensive computer science or information technology background but little knowledge of clinical information would need to gain considerable practical experience in dealing with clinical information to be competitive in applying to the program.

**Graduate Advisors.** M. Carroll (Pathology and Laboratory Medicine)

## Courses in Health Informatics (MHI)

### Graduate

#### 202. Computer-Based Patient Records (4)

Lecture/discussion—3 hours; discussion—1 hour. Prerequisite: current enrollment within the Health Informatics graduate program or consent of instructor. Introduction and overview of computer-based clinical record systems. Topics include data modeling, health system standards and terminologies; security, privacy and confidentiality; workflow modeling; data visualization; legal; decision support; public health; and evidence-based practice.—S. (S.) Odor

#### 207. Decision Support Systems (4)

Lecture/discussion—2 hours. Prerequisite: consent of instructor. Explores decision support systems for medical application. Topics include medical decision making, uncertainty, review of existing decision support systems, knowledge engineering, data mining, and knowledge based systems.—W. (W.) Greene

#### 208. Medical Informatics in Web-Based Enterprise Computing (4)

Lecture—2 hours; discussion—2 hours. Introduction to the decision making processes and technologies that are involved in developing Web-based distributed enterprise applications in medicine. Focus on the Informatician's role as a team member.—S. (S.) Carroll

#### 209. Data Acquisition and Analysis (4)

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Examines the nature, acquisition, and analysis of medical data. Data ranges from signals of electrical potentials, sounds, text, images (still and motion), and data from nucleic acid and protein expression and sequencing instruments.—F. (F.) Hogarth

#### 210. Introduction to Health Informatics (4)

Lecture—3 hours; discussion—1 hour. Overview course to give the student a broad exposure to the field of Health Informatics. Topics covered include, but are not limited to, networking, information systems, coding, HL7, Security, and HIPPA.—F. (F.) Hogarth

#### 211V. Telemedicine (4)

Web virtual lecture—3 hours; web electronic discussion—1 hour. Issues for the development and maintenance of a successful telemedicine program with focus on strategic planning, clinical applications, project management, risk management and legal issues; reimbursement and contracting; human resources and program sustainability.—S. (S.) Yellowlees

#### 212. Computer Security in Health Informatics (4)

Lecture—3 hours; project. Prerequisite: course 210; 202; 209. Critical thinking about basic concepts in computer security and privacy. How the computer

security and privacy impact health informatics, ranging from electronic health records to telemedicine to remote, virtual surgery.—F. (F.) Peisert

### **215. Beginning and Intermediate Programming in M (MUMPS) (3)**

Lecture—3 hours. Project-oriented approach to fundamentals of programming in ANSI Standard M (MUMPS) language. Basic syntax, Hierarchical file structure; arrays and string subscripts, indirection and extrinsic functions. (S/U grading only.)

### **289A. Special Topics in Medical Informatics; Data Acquisition (1-5)**

Lecture; laboratory. Prerequisite: consent of instructor. Special topics in Data Acquisition. May be repeated for credit when topic differs.

### **289B. Special Topics in Health Informatics; Seminars in Clinical Translational Informatics (1-5)**

Seminar—1 hour. Seminars in current clinical translational informatics research topics. Guest presenters and faculty led discussion.—F, W, S. (F, W, S.) Anderson, Nicholas

### **289F. Database and Knowledge Management (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Class size limited to 20 students. Course objectives include understanding the informatics techniques for data capture, information management, and knowledge generation that a student will use throughout their career. May be repeated for credit.—W (W.) Hogarth

### **289G. Special Topics in Health Informatics; Biostatistics (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: consent of instructor. Special topics in Biostatistics. Evaluation Methods and Statistics in Biomedical Informatics. Research design and analysis with special emphasis on Biomedical Informatics.—F, S. (F, S.) Odor

### **289H. Modeling Biological Systems (4)**

Lecture—3 hours; laboratory—1 hour. Class size limited to 20 students. Create awareness of how modern computer graphics have led to VR-Sim-Rob applications, and how they are modifying the teaching of medicine and in some cases the diagnosis and treatment of patients.—W. (W.) Odor

### **290. Seminar in Medical Informatics (1)**

Seminar—1 hour. Restricted to 20 students. Discussion of current graduate research and topics in Health Informatics. Oral presentations of individual study. (S/U grading only.)—F, W, S. (F, W, S.) Levenson

### **299. Research in Health Informatics (1-12)**

Independent research in Health Informatics. (S/U grading only.)—F, W, S. (F, W, S.)

William W. Hagen, Ph.D., Professor Emeritus  
Thomas H. Holloway, Ph.D., Professor Emeritus  
Norma B. Landau, Ph.D., Professor Emeritus  
Susan L. Mann, Ph.D., Professor Emerita  
Ted W. Margadant, Ph.D., Professor Emeritus  
Barbara Metcalf, Ph.D., Professor Emerita  
Don C. Price, Ph.D., Professor Emeritus  
Ruth E. Rosen, Ph.D., Professor Emerita

*Academic Senate Distinguished Teaching Award*  
Alan S. Taylor, Ph.D., Professor Emeritus  
*UC Davis Prize for Teaching and Scholarly Achievement*

Richard N. Schwab, Ph.D., Professor Emeritus  
Wilson Smith, Ph.D., Professor Emeritus  
Clarence Walker, Ph.D., Professor Emeritus

*UC Davis Prize for Teaching and Scholarly Achievement*

F. Roy Willis, Ph.D., Professor Emeritus  
*UC Davis Prize for Teaching and Scholarly Achievement*

### **The Major Program**

The History major develops critical intelligence and fosters an understanding of ourselves and our world through the study of the past—both the “deep past” and the more recent past.

**The Program.** A student electing a major in History may complete Plan I or Plan II. Plan I enables students to receive a broad education in histories of several geographic areas. Plan II encourages interested students, including those preparing for graduate work in history, to enroll in a seminar, to undertake independent work, and to study the history of historical thought as part of the major. Students preferring more active engagement in research and writing are encouraged to follow Plan II.

**Career Alternatives.** A degree in history is excellent preparation for a professional career such as teaching, law, journalism, public administration, or business management. Professional schools in these and related fields (including the health professions) are looking for students who can weigh conflicting evidence, evaluate alternative courses of action or divergent points of view, and express conclusions logically in everyday language. These analytical skills are stressed in history classes, and their mastery gives the history student a solid preparation for subsequent training in a specialized career.

### **A.B. Major Requirements:**

UNITS

#### **Preparatory Subject Matter (Plan I or II)..... 20**

Five lower division courses chosen from the following six fields, including at least two from one field, one from a second field, and one from a third field. The fifth course can be taken from any field ..... 20

- (a) African and Middle East History: History 6, 15
- (b) Asian History: History 6, 8, 9A, 9B
- (c) European History: History 3, 4A, 4B, 4C
- (d) Latin American History: History 7A, 7B, 7C
- (e) U.S. History: History 17A, 17B, 72A, 72B
- (f) World History: History 10A, 10B, 10C

#### **Depth Subject Matter—Plan I: General History ..... 40-41**

Four upper division courses from one of the fields of concentration listed below ..... 16

Two upper division courses from one of the other fields of concentration listed below ..... 8

Two upper division courses from a field or fields other than those chosen to satisfy the two preceding requirements ..... 8

One additional upper division course chosen from any of the fields ..... 4

One course from the following: History 101 or 102 or 103 (in field of concentration) ..... 4-5

One of the courses taken to fulfill the above requirements must deal with pre-modern history.

#### **Total Units for the Major—Plan I: General History ..... 60-61**

#### **Depth Subject Matter—Plan II: Research Focus ..... 42**

Four upper division courses from one of the fields of concentration listed below. Include a two-quarter sequence of courses ..... 16

Three upper division courses from one of the other fields listed ..... 12

History 101 ..... 5

History 102 in field of concentration (in exceptional circumstances, a student may, with the permission of an adviser, take the seminar in another field) ..... 5

History 103 in field of concentration ..... 4

One of the courses taken to fulfill the above requirements must deal with pre-modern history.

#### **Total Units for the Major—Plan II: Research Focus ..... 62**

#### **Fields of Concentration**

- (a) Europe: History 102A, 102B, 102C, 102D, 102E, 102F, 102I, 102P, 102X, 109A, 109B, 110A, 111B, 111C, 112A, 112B, 120, 121A, 121B, 121C, 122, 125, 130A, 130B, 130C, 131A, 131B, 131C, 132, 133, 134A, 135A, 135B, 136, 138A, 138B, 138C, 139A, 139B, 140, 141, 142A, 142B, 143, 144A, 144B, 145, 146A, 146B, 147A, 147B, 147C, 148A, 148B, 148C, 149, 151A, 151B, 151C, 151D, 160.
- (b) United States History: History 102K, 102L, 102M, 102X, 120, 169A, 169B,

170A, 170B, 170C, 171A, 171B, 171D, 172, 173, 174A, 174B, 174C, 174D, 175, 176A, 176B, 177A, 177B, 178A, 178B, 179, 180A, 180B, 180C, 181, 182, 183A, 183B, 184, 185A, 185B, 188, 189.

(c) *Asian History*: History 102G, 102H, 102N, 102Q, 102R, 102X, 109A, 109B, 110, 110A, 111A, 112A, 112B, 112C, 113, 120, 190A, 190B, 190C, 190D, 191A, 191B, 191C, 191D, 191E, 191F, 193A, 193B, 193C, 194A, 194B, 194C, 194D, 194E, 195B, 196A, 196B.

(d) *African History*: 102O, 102X, 109A, 109B, 110, 110A, 112C, 115A, 115B, 115C, 115D, 115E, 115F, 116.

(e) *Latin American History*: History 102J, 102X, 109A, 109B, 110, 110A, 160, 162, 163A, 163B, 164, 165, 166A, 166B, 167, 168, 169A, 169B.

(f) Within broad fields, a student may wish to concentrate some of the courses on a particular area or period, such as China or Great Britain or Medieval Europe. Special approval is not required.

**Major Advisers.** See the department's website for updated information.

**History and Philosophy of Science.** Courses from the History and Philosophy of Science program may count toward the History major. History and Philosophy of Science 130A fulfills upper division requirements in the field of pre-industrial Europe. History and Philosophy of Science 130B, 150, and 180 fulfill upper division requirements in either the U.S. or Modern Europe field.

Students can create a field in the History of Science upon consultation with a faculty adviser. They may draw upon the relevant History courses (History 85, 135A, 135B, 139A, 139B, 185A, and 185B) as well as History and Philosophy of Science offerings to do so.

Consult the History and Philosophy of Science program for a more detailed description of course offerings this area and the minor in History and Philosophy of Science.

### Minor Program Requirements:

The minor in History consists of five upper division courses chosen so that at least three courses are in one field and at least one course is in another field. The two fields shall be chosen from among those defined in the catalog for the major. However, students may also, in consultation with and with the authorization of a faculty adviser, define other thematic fields.

#### UNITS

#### History ..... 20

At least 20 units of upper division history courses ..... 20

Examples of minor with thematic emphasis: Pre-Law (British and American Political and Constitutional Development); The Twentieth Century; The History of Ideas in Society.

**Minor Advisers.** Same as major advisers.

**Honors and Honors Program.** A student becomes eligible for graduation with honors by meeting the minimum GPA (usually 3.500) and course requirements established by the College of Letters and Science. To qualify for high or highest honors, students must also complete the History Department honors program with a GPA of 3.500 or above and write a thesis that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student's project, interviews, and faculty recommendations. Students admitted into the program must complete the History 104A, 104B, 104C sequence of honors courses, which requires the completion of a senior honors thesis. Students who anticipate seeking admission to the honors program are urged to

complete at least one History 102 (undergraduate seminar) before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year. Students may follow either Plan I or Plan II described above, and may substitute History 104B and 104C for any courses in their program other than History 102.

Students who anticipate pursuing graduate work in history or a teaching credential, and who do not wish to opt for the research emphasis embodied in the honors program, are encouraged to select Plan II of the major.

**Study Abroad and the History Major.** The department strongly encourages interested students to pursue their studies abroad. While there are no specific required courses or prerequisites, students are urged to take at least one history course that touches upon the geographic area where they plan to study abroad before departing. To receive a history degree from UC Davis, students must complete at least 18 upper division units in the history major at UC Davis (which can also include History 101, 102, 103). The remaining major requirements can be fulfilled abroad provided that (a) the course should be evaluated as at least four UC Davis units, (b) the course should be considered upper division by the standards set forth by the UC Davis Study Abroad Program, and (c) the course should be in the field of History. Students may present copies of the course work, syllabus, and writing assignments to the department's liaison person with the Study Abroad office for approval.

Note: students who wish to receive credit for courses taken abroad under programs other than UC Davis Study Abroad may petition the Undergraduate Program Committee to do so.

**Teaching Credential Subject Representative.** See the Teaching Credential/M.A. Program on page 124.

**Preparing for Careers in Teaching.** History majors can pursue rewarding careers in teaching. To ensure your undergraduate coursework prepares you for a subject matter competency test, please contact the History Project at 530-752-4383 or <http://historyproject.ucdavis.edu/>.

**Graduate Study.** The Department of History offers programs of study and research leading to the M.A. and Ph.D. degrees in history. Detailed information may be obtained by contacting the Graduate Adviser.

**Graduate Advisers.** See the department's website for updated information.

**American History and Institutions.** This University requirement can be satisfied by passing any one of the following courses in History: 17A, 17B, 72A, 72B, 170A, 170B, 170C, 171A, 171B, 172, 173, 174A, 174B, 174C, 174D, 175, 176A, 176B, 177A, 177B, 178A, 178B, 180A, 180B, 181, 183A, 183B, 184, 189. The upper division courses may be used only with the consent of the instructor; see also under University requirements.

### Courses in History (HIS)

#### Lower Division

##### 1. Introduction to History (2)

Lecture—1 hour; discussion—1 hour. Introduction to history, its key methodologies, writing tasks, and research practices. Examination of the development of history as an academic discipline; ethics in historical research. Topical focus changes regularly. GE credit: SS, WC, WE.

##### 3. Cities: A Survey of World Cultures (4)

Lecture—3 hours; lecture/discussion—1 hour. Survey of urban world cultures, focusing on up to ten cities selected by the instructor. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

##### 4A. History of Western Civilization (4)

Lecture—3 hours; discussion—1 hour. Growth of western civilization from late antiquity to the Renaissance. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

#### 4B. History of Western Civilization (4)

Lecture—3 hours; discussion—1 hour. History of western civilization from the Renaissance to the Eighteenth Century. GE credit: ArtHum or SocSci, Wrt | AH or SS, VL, WC, WE.

#### 4C. History of Western Civilization (4)

Lecture—3 hours; discussion—1 hour. Development of Western Civilization from the Eighteenth Century to the present. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

#### 6. Introduction to the Middle East (4)

Lecture—3 hours; discussion—1 hour. Survey of the major social, economic, political and cultural transformations in the Middle East from the rise of Islam (c. 600 A.D.) to the present, emphasizing themes in religion and culture, politics and society. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### 7A. History of Latin America to 1700 (4)

Lecture—3 hours; discussion—1 hour. Introduction to the history of Spanish and Portuguese America from the late pre-Columbian period through the initial phase and consolidation of a colonial regime (circa 1700). Topics include conquest, colonialism, racial mixture, gender, and labor systems. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—F. (F.)

#### 7B. History of Latin America, 1700-1900 (4)

Lecture—3 hours; discussion—1 hour. Latin America from colony to republic. The nature of Iberian colonialism, the causes for independence, the creation of nation states, the difficulties in consolidating these nations, and the rise of Liberalism and export economics in the nineteenth century. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—W. (W.)

#### 7C. History of Latin America, 1900-present (4)

Lecture—3 hours; discussion—1 hour. Latin America since the beginning of the 20th century. Themes include export economies, oligarchic rule, crises of depression and war, corporatism, populism revolution and reform movements, cultural and ethnic issues, U.S.-Latin American relations, neo-liberal restructuring. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—S. (S.)

#### 8. History of Indian Civilization (4)

Lecture—3 hours; discussion—1 hour; written reports. Survey of Indian civilization from the rise of cities (ca. 2000 B.C.) to the present, emphasizing themes in religion, social and political organization, and art and literature that reflect cultural interaction and change. GE credit: ArtHum or SocSci, Div | AH or SS, WC, WE.

#### 9A. History of East Asian Civilization (4)

Lecture—3 hours; discussion—1 hour. Surveys traditional Chinese civilization and its modern transformation. Emphasis is on thought and religion, political and social life, art and literature. Perspectives on contemporary China are provided. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### 9B. History of East Asian Civilization (4)

Lecture—3 hours; discussion—1 hour. Surveys traditional Japanese civilization and its modern transformation. Emphasis is on thought and religion, political and social life, art and literature. Perspectives on contemporary Japan are provided. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### 10A. World History to 1350 (4)

Lecture—3 hours; discussion—1 hour. Historical examination of the changing relationship of human societies to one another and to their natural settings through the year 1350, with particular attention to long-term trends and to periodic crises that reshaped the links of culture and nature on a global scale. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**10B. World History, c. 1350-1850 (4)**

Lecture—3 hours; discussion—1 hour. Major topics in world history from the 14th century to the beginning of the 19th century. Topics will vary but may include oceans as systems of human communication and conflict; the global consequences of “industrial revolutions” in Europe and Asia, etc. GE credit: ArtHum or SocSci | ACGH, AH or SS, WC, WE.

**10C. World History III (4)**

Lecture—3 hours; discussion—1 hour. Major topics from world history of the 19th and 20th centuries, emphasizing the rise and fall of Western colonial empires; Cold War and the superpowers; the spread of the nation-states; and process of globalization. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

**11. History of the Jewish People in the Modern World (4)**

Lecture—3 hours; discussion—1 hour. Histories and cultures of the Jews since 1492. Topics include: the making of Jewish diasporas, roots of antisemitism, the Holocaust in images and texts, changing ideas of the self, Jews in America, contemporary visions of the Jewish past. Offered in alternate years. GE credit: ArtHum | AH, DD, VL, WC, WE.

**12. Food and History (4)**

Lecture—3 hours; discussion—1 hour. Survey of the ways humans have fed themselves from the dawn of humanity to the present. Transformation of plants and animals into food, cooking into cuisine, and ceremony into etiquette. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, OL, VL, WC, WE.—McKee, Resendez

**15. Introduction to African History (4)**

Lecture—3 hours; discussion—1 hour. Examination of the long-range historical context as background to current conditions in Africa. Includes the early development of African civilizations, the slave trade and its abolition, 20th century colonization, and African independent states. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**17A. History of the United States (4)**

Lecture—3 hours; discussion—1 hour. The experience of the American people from the Colonial Era to the Civil War. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.—F, W, S. (F, W, S.)

**17B. History of the United States (4)**

Lecture—3 hours; discussion—1 hour. The experience of the American people from the Civil War to the end of the Cold War. Not open for credit to students who have completed course 17C. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.—F, W, S. (F, W, S.)

**72A. Women and Gender in America, to 1865 (4)**

Lecture—3 hours; discussion—1 hour. History of women and gender in America through 1865, emphasizing intersections of gender, race, class, and sexuality. Topics include interracial marriage, slavery, witchcraft, meanings of motherhood, war, domestic labor, moral reform, women's rights, migrations, the effects of commercialization and industrialization. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

**72B. Women and Gender in America, 1865-Present (4)**

Lecture—3 hours; discussion—1 hour. History of women and gender in America since 1865, emphasizing intersections of gender, race, class, and sexuality. Covers emancipation, migration, immigration, war, media, same-sex and opposite-sex relationships, and the birth control, suffrage, labor, civil rights, feminist, and anti-feminist movements. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

**80. The History of the United States in the Middle East (2)**

Lecture/discussion—2 hours. History of the United States in the Middle East from 1900 to the present. Examination of U.S. foreign relations toward the

Middle East, their regional ramifications and domestic repercussions. GE credit: ArtHum or SocSci | ACGH, AH or SS, WC, WE.

**85. Nature, Man, and the Machine in America (4)**

Seminar—4 hours; term paper. Limited enrollment. History of the attitudes and behavior of Americans toward their natural environment and their technology, from colonial times to the present. No final examination. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WE.

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.) Offered irregularly.

**99. Special Study for Undergraduates (1-5) (P/NP grading only.)**

Offered irregularly.

**Upper Division****101. Introduction to Historical Thought and Writing (5)**

Lecture/discussion—4 hours; term paper. Study of the history of historical thought and writing, analysis of critical and speculative philosophies of history and evaluation of modes of organization, interpretation, and style in historical writing. Offered in alternate years. GE credit: WE.

**102A. Undergraduate Proseminar in History; Ancient (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Ancient. May be repeated for credit.

**102B. Undergraduate Proseminar in History; Medieval (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Medieval. May be repeated for credit. Offered in alternate years.

**102D. Undergraduate Proseminar in History; Modern Europe to 1815 (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Modern Europe to 1815. May be repeated for credit.

**102E. Undergraduate Proseminar in History; Europe Since 1815 (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Europe since 1815. May be repeated for credit.

**102F. Undergraduate Proseminar in History; Russia (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Russia. May be repeated for credit. Offered in alternate years.

**102G. Undergraduate Proseminar in History (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. China to 1800. May be repeated for credit. Offered in alternate years.

**102H. Undergraduate Proseminar in History; China Since 1800 (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. China since 1800. May be repeated for credit. Offered in alternate years.

**102I. Undergraduate Proseminar in History; Britain (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Britain. May be repeated for credit. Offered in alternate years.

**102J. Undergraduate Proseminar in History; Latin America Since 1810 (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Latin America since 1810. May be repeated for credit. Offered in alternate years.

**102K. Undergraduate Proseminar in History; American History to 1787 (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. American History to 1787. May be repeated for credit. Offered in alternate years.

**102L. Undergraduate Proseminar in History; United States, 1787-1896 (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. United States, 1787-1896. May be repeated for credit. Offered in alternate years.

**102M. Undergraduate Proseminar in History; United States Since 1896 (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. United States since 1896. May be repeated for credit. Offered in alternate years.

**102N. Undergraduate Proseminar in History; Japan (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Japan. May be repeated for credit. Offered in alternate years.

**102O. Undergraduate Proseminar in History; Africa (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Africa. May be repeated for credit. Offered in alternate years.

**102P. Undergraduate Proseminar in History; Christianity and Culture in Europe, 50-1850 (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Christianity and Culture in Europe, 50-1850. May be repeated for credit. Offered in alternate years.

**102Q. Undergraduate Proseminar in History; India (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. India. May be repeated for credit. Offered in alternate years.

**102R. Undergraduate Proseminar in History; Muslim Societies (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Muslim Societies. May be repeated for credit. Offered in alternate years.

**102S. Undergraduate Proseminar in History; Education Abroad Program (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history.

topics in the various fields of history. Education Abroad Program. May be repeated for credit. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.

#### **102X. Undergraduate Proseminar in History (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Comparative History, selected topics in cultural, political, economic, and social history that deal comparatively with more than one geographic field. May be repeated for credit.

#### **103. Topics in Historical Research (4)**

Discussion—3 hours; individual consultation with instructor; term paper. Prerequisite: consent of instructor. Individual research resulting in a research paper on a specific topic in one of various fields of history. May be repeated for credit. Offered irregularly. GE credit: WE.

#### **104A. Introduction to Historical Research and Interpretation (4)**

Seminar—3 hours; term paper. Prerequisite: acceptance into History Department Honors Program. Directed reading and research aimed at preparing students to select appropriate topics and methodologies for a senior honors essay and to situate their topics within a meaningful, broad context of historical interpretations. Culminates in the submission of a full prospectus for an honors essay. GE credit: WE. —F. (F.) Anooshahr

#### **104B. Honors Thesis (4)**

Tutorial—4 hours. Prerequisite: course 104A. Research in preparation of a senior honors thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: WE. —W.

#### **104C. Honors Thesis (4)**

Tutorial—4 hours. Prerequisite: course 104A and 104B. Completion of a senior honors thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: WE. —S.

#### **105. Teaching History (4)**

Lecture—3 hours; term paper. Teaching of American and world history at the K-12 level. Emphasis on introducing college students to the multiple ways in which history is taught, and on understanding how history education is determined. GE credit: ArtHum or SocSci | ACGH, AH or SS, WE.

#### **108. Global Environmental History (4)**

Lecture/discussion—3 hours; project. Global, comparative study of how environmental change, human perceptions of nature, and manipulations of nature have changed over time. Primary focus post-1500, emphasis on critically analyzing many common ideas of environmental change. Not open for credit to students who have taken History 109A. GE credit: ArtHum or SocSci | AH or SS.

#### **109A. Global Environmental History (4)**

Lecture/discussion—3 hours; project. Global, comparative study of how environmental change, human perceptions of nature, and manipulations of nature have changed over time. Primary focus post-1500, emphasis on critically analyzing many common ideas of environmental change. GE credit: ArtHum, or SocSci | AH or SS.

#### **109B. Environmental Change, Disease and Public Health (4)**

Lecture/discussion—3 hours; term paper. Analysis of environmental changes from pre-history to the present and their influence on disease distribution, virulence and public health; many of these changes have been driven by human action and transformations of pathogens have accelerated under globalization. GE credit: SciEng or SocSci, Div | SE or SS, SL.

#### **110. Themes in World History (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing. Issues and topics in world history. Topics will emphasize the interaction of diverse

regions of the world as well as common patterns of historical change. May be repeated for credit if topic and/or instructor differs. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### **110A. Colonialism and the Making of the Modern World (4)**

Lecture—3 hours; term paper. History of the modern world, focusing on struggles between Europeans and colonized peoples; the global formation of capitalism; the creation of nation-states; and the constitution of bourgeois bodies and racial selves in modern societies. Offered in alternate years. GE credit: ArtHum | AH or SS, VL, WC, WE.

#### **111A. Ancient History (4)**

Lecture—3 hours; discussion or paper (student option). History of ancient empires of the Near East and of their historical legacy to the Western world. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

#### **111B. Ancient History (4)**

Lecture—3 hours; discussion or paper (student option). Political, cultural and intellectual study of the Greek world from Minoan-Mycenaean period to end of Hellenistic Age. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

#### **111C. Ancient History (4)**

Lecture—3 hours; discussion or paper (student option). Development of Rome from earliest times. Rise and fall of the Roman Republic; the Empire to 476 A.D. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

#### **112A. Topics in Pre-Modern Jewish History (4)**

Lecture—3 hours; term paper. Topics in the history of Jews from the Biblical era to the eras of Jewish emancipation. Topics can be framed chronologically (e.g., medieval Jewry) or thematically (e.g., trade and Jewish communities). May be repeated one time for credit. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### **112B. Topics in Modern Jewish History (4)**

Lecture—3 hours; term paper. Topics in the history of Jews from the era of Jewish emancipation to the present. Topics can be framed chronologically or thematically (e.g. Zionism, assimilation, the post Holocaust Diaspora). May be repeated one time for credit. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### **112C. History of Jews in the Muslim World (4)**

Lecture—3 hours; term paper. History of Jewish communities in the lands of Islam from the time of the Prophet Muhammad to the present day. GE credit: SocSci | SS, WC, WE.

#### **113. History of Modern Israel (4)**

Lecture—3 hours; term paper. Topics include the rise and fall of utopian Zionism, the century-long struggle between Jews and Arabs, the development of modern Hebrew culture, the conflict between religious and secular Jews, and the nature of Israel's multicultural society. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### **115A. History of West Africa (4)**

Lecture—3 hours; term paper. Prerequisite: course 15 recommended. Introductory survey of the history of West Africa and/or the Congo region from the earliest times to the present. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### **115B. History of East and Central Africa (4)**

Lecture—3 hours; term paper. Prerequisite: course 15 recommended. Introductory survey of the history of east and central Africa from earliest times to the present. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### **115C. History of Southern Africa (4)**

Lecture—3 hours; term paper. Prerequisite: course 15 recommended. Introductory survey of the history of Southern Africa (including South Africa) from earliest times to the present. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### **115D. History and Legacy of Colonialism in Africa (4)**

Lecture—3 hours; term paper. Prerequisite: course 115A, 115B or 115C recommended. History of the implementation, development, and legacy of European Colonialism in Africa. A comparison of British, Belgian, French, and Portuguese colonial efforts and impacts. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### **115E. The African Slave Trade (4)**

Lecture—3 hours; writing—1 hour. History of the African Slave trades, from the early Egyptian and Saharan trades in the pre-modern period to the trans-Atlantic trade (15th-19th century) and the contemporary trafficking of humans. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### **115F. History of Modern North Africa, 1800 to the Present (4)**

Lecture—3 hours; term paper. History of Morocco, Algeria, Tunisia and Libya (the Maghrib), 1800 to the present. Topics include conquest and pacification, reform movements, the rise of nationalism, decolonization, state capitalism, economic liberalization, Islamism, democratization and human rights, the interplay of history and memory. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### **116. African History: Special Themes (4)**

Lecture—3 hours; term paper. Prerequisite: course 15 recommended. Themes of African history, such as African states and empires, slave trade, relationship of Egypt to rest of Africa, Bantu origins and migrations, and French policy of Assimilation and Association. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

#### **119. World War I (4)**

Lecture—3 hours; extensive writing. The First World War and the settlement that followed from 1914-1919. Causes, conduct, and consequences of the war including military, political, economic, social, and cultural factors, with special emphasis on connections between the home front and the battlefield. Offered in alternate years. GE credit: SS, WC, WE.

#### **120. World War II (4)**

Lecture—3 hours; extensive writing. The Second World War from 1931 to 1945 in all of its theaters. Causes, conduct, and consequences of the war including military, political, economic, social, and cultural factors, with special emphasis on battlefield strategy and mobilization of the home front. Offered irregularly. GE credit: SocSci | SS, WC, WE.

#### **121A. Medieval History (4)**

Lecture/discussion and panel presentations—3 hours. European history from "the fall of the Roman Empire" to the eighth century. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

#### **121B. Medieval History (4)**

Lecture/discussion and panel presentations—3 hours. European history from Charlemagne to the twelfth century. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

#### **121C. Medieval History (4)**

Lecture/discussion and panel presentations—3 hours. European history from the Crusades to the Renaissance. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

#### **122. Selected Themes in Medieval History (4)**

Lecture—3 hours; term paper. Each offering will focus on single major theme, such as medieval agrarian history, feudalism, the family, medieval Italy, or the Crusades. Readings include original sources in English translation and modern works. May be repeated for credit. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

#### **125. Topics in Early Modern European History (4)**

Laboratory/discussion—3 hours; term paper. Social and cultural history, 1300-1800. Topics such as medieval and Renaissance Italy, early modern Italy, Ancient Regime France, family and sexuality, and

material culture and daily life. May be repeated for credit. Offered irregularly. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

### **130A. Christianity and Culture in Europe: 50-1450 (4)**

Lecture—3 hours; written report or research paper. A history of the ideas and institutions of Christianity and their impact on the late Roman Empire and medieval Europe in terms of outlook on life, art, politics and economics. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

### **130B. Christianity and Culture in Europe: 1450-1600 (4)**

Lecture—3 hours; written report or research paper. A history of the Lutheran, Zwinglian-Calvinist, Radical, Anglican, and Catholic Reformation as foundation stones of a new culture in Europe, with special attention to the interconnections between the revival of antiquity and the different reform movements. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

### **130C. Christianity and Culture in Europe: 1600-1850 (4)**

Lecture—3 hours; written report or research paper. A survey of the intellectual, cultural and political reorientation of European society in the aftermath of the Wars of Religion. "Secularization" will be discussed in the context of the Enlightenment and Romanticism. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

### **131A. Early Modern European History (4)**

Lecture—3 hours; written reports. Western European history from about 1350 to about 1500. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WC, WE.—Stuart

### **131B. European History During the Renaissance and Reformation (4)**

Lecture—3 hours; term paper. Survey of European society, politics, and culture from the late 15th through the early 17th centuries, with particular focus on the Italian and Northern Renaissance, on the Protestant Reformation, and the Catholic Counter Reformation. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.—Harris

### **131C. The Old Regime: Absolutism, Enlightenment and Revolution in Europe (4)**

Lecture—3 hours; term paper. Survey of European society, politics, and culture in the 17th and 18th centuries, focusing on religious warfare, absolutism, Scientific Revolution, Enlightenment and the growth of religious tolerance, the French Revolution and the collapse of the old regime. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

### **132. Crime and Punishment in Early Modern Europe (4)**

Lecture—3 hours; term paper. Deviance and crime in early modern Europe, contrasting imaginary crimes, e.g. witchcraft, with "real" crimes such as highway robbery and infanticide. Examines impact of gender, sexual orientation, ethnicity, and class in processes of criminalization. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

### **133. The Age of Ideas (4)**

Lecture—3 hours; written reports. The Enlightenment and its background in the seventeenth century. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

### **134A. The Age of Revolution (4)**

Lecture—3 hours; written reports. Ideas and institutions during the French Revolution and the Napoleonic era. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WE.

### **135A. History of Science to the 18th Century (4)**

Lecture/discussion—3 hours; term paper. Survey of the historical development of science, technology, and medicine from the ancient world to the eighteenth century, with special emphasis on Isaac Newton as the culmination of the seventeenth century

scientific revolution. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WC, WE.—Stolzenberg

### **135B. History of Science, 18th to 20th Centuries (4)**

Lecture/discussion—3 hours; term paper. Survey of the historical development of scientific thought in geology, biology, chemistry, physics, and cosmology from the eighteenth to the twentieth century, with special emphasis on emergence of broad explanatory principles that serve more than one science. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

### **136. Scientific Revolution (4)**

Lecture/discussion—3 hours; term paper. History of science in Western Europe (1400-1750). Investigates the changing definitions of science in the age of Copernicus, Versalius, Harvey, Galileo and Newton. Considers the evolution of new ideas about nature, experiment, observation, and scientific theory. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

### **138A. The Rise of the Russian Empire, 1304-1825 (4)**

Lecture—3 hours; term paper. Expansion of the Russian state in Muscovite and imperial era. Emphasis on autocratic rule, the incorporation of non-Russian peoples, and emergence of Russia as a Great Power. Only two units of credit will be allowed to students who have completed former course 137B. Offered irregularly. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.—Campbell

### **138B. Reform and Revolution in Tsarist Russia, 1825-1917 (4)**

Lecture—3 hours; term paper. Processes of state reform and social change in the 19th century; failure of reform and collapse of the Russian Empire; the revolutions of 1917. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

### **138C. Russian History: The Rise and Fall of the Soviet Union, 1917 to the Present (4)**

Lecture—3 hours; term paper. The emergence of the Soviet Union as a socialist system and a Great Power; the decline and collapse of the Soviet Union and the formation of independent nation states in its place. Not open for credit to students who have completed former course 137C. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

### **139A. Medieval and Renaissance Medicine (4)**

Laboratory/discussion—3 hours; term paper. The history of medicine, circa 1000-1700. Revival of ancient medicine; role of the universities; development of anatomy, chemistry and natural history; ideas about the body; cultural understanding of disease; hospital and the public health system. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

### **139B. Medicine, Society, and Culture in Modern Europe (4)**

Lecture—2 hours; discussion—1 hour; term paper. History of European medicine, 18th to 20th centuries, by examining the development of medical knowledge in epidemiology and anatomy; function of this knowledge, how it changed with technological breakthroughs and professionalization; and role of medicine in attitudes toward poverty, women, race, disease. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

### **140. The Rise of Capitalism in Europe (4)**

Lecture—3 hours; term paper. Comparative analysis of major interpretations of the rise of merchant capitalism during the Middle Ages and Renaissance; European expansion overseas, 1450-1815; the transition to modern capitalism via industrial revolution. Interplay of social, political, cultural, and economic history. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

### **141. France Since 1815 (4)**

Lecture—3 hours; term paper. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

### **142A. History of the Holocaust (4)**

Lecture—3 hours; extensive writing. Survey of early modern Germany, 1450 to 1789, covering the theology and social history of the Reformation, the Peasants War of 1525, religious warfare, state building and absolutism, the rise of Prussia, Austro-Prussian dualism, and the German Enlightenment. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

### **144B. History of Germany since 1789 (4)**

Lecture/discussion—3 hours; extensive writing. History of the German lands in the age of the French Revolution; 19th-century liberalism, nationalism, and industrialization; the World Wars, National Socialism, and the Holocaust; east and west Germany in the Cold War; the post-reunification scene. (Not open for credit to students who have completed former course 144.) Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

### **145. War and Revolution in Europe, 1789-1918 (4)**

Lecture—3 hours; term paper. Survey of revolutionary movements, international crises, and wars in Europe from the French Revolution to World War I. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

### **146A. Europe in the Twentieth Century (4)**

Lecture—3 hours; term paper. Survey of the history of Europe from 1919 to 1939. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

### **146B. Europe in the Twentieth Century (4)**

Lecture—3 hours; term paper. Survey of the history of Europe since 1939. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

### **147A. European Intellectual History, 1800-1870 (4)**

Lecture—3 hours; term paper. European thought in the early industrial era. Shifting cultural frameworks, from romanticism to scientism; liberal and socialist reactions to social change. Focus on the work of Goethe, Hegel, J.S. Mill, Marx, Darwin and Flaubert. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

### **147B. European Intellectual History, 1870-1920 (4)**

Lecture—3 hours; term paper. Cultural and intellectual watershed of the late nineteenth and early twentieth centuries. Emergence of modern art and literature; psychoanalysis and the new social sciences. Focus on the work of Baudelaire, Wagner, Nietzsche, Freud, Weber and Kafka. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

**147C. European Intellectual History, 1920-1970 (4)**

Lecture—3 hours; term paper. European thought and culture since World War I. Coverage includes: literature and politics; Communism and Western Marxism; Fascism; Existentialism; Structuralism; Feminism. Particular attention to Lenin, Brecht, Hitler, Sartre, Camus, Beckett, Marcuse, Foucault, Woolf and de Beauvoir. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**148A. Women and Society in Europe: 1500-1789 (4)**

Lecture—3 hours; term paper. Roles and perceptions of women from the Renaissance to the French Revolution. Emphasis on social and economic factors as well as on discussions of women in the writings of political theorists and social commentators. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**148B. Women and Society in Europe: 1789-1920 (4)**

Lecture—3 hours; term paper. Roles and perceptions of women from the French Revolution to World War I, primarily in France and England. Emphasis on social and economic developments within a loosely chronological and comparative framework. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**148C. Women and Society in Europe: 1914-Present (4)**

Lecture—3 hours; term paper. The history of 20th-century Europe from the perspective of women and the family, and of sexual and gender relations. Emphasis on the impact on women of major events and movements, such as World War I, fascism, Soviet communism, World War II, the welfare state, feminism, and mass culture. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**149. Comparative Cultural History of Modern Britain and France, 1880-1914 (4)**

Lecture—3 hours; term paper. Cultural comparison of the histories of Britain and France during the fin de siècle. Addresses cultural debates of the period (including gender, race, class) and the practices of cultural history. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**151A. England: The Middle Ages (4)**

Lecture—3 hours; term paper. Origins of England to the accession of the Lancastrians. Survey includes: impact of Norman Conquest on Anglo-Saxon institutions; rise of the Church, common law, parliament, and the economy; thought, arts, and literature to the age of Chaucer and Wyclif. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

**151B. England: The Early Modern Centuries (4)**

Lecture—3 hours; term paper. From Lancaster and York to the Glorious Revolution. Includes growth of the Church of England; beginnings of modern worldwide economy; rise of the gentry and parliament; thought, arts, and literature in the times of More, Shakespeare, Hobbes, Wren, and Newton. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

**151C. Eighteenth-Century England (4)**

Lecture—3 hours; term paper. English history from the Glorious Revolution to the French Revolution. Examination of the transformation of one of Europe's most politically unstable kingdoms into the firmly established constitutional monarchy which provided an environment fit to engender the industrial revolution. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

**151D. Industrial England (4)**

Lecture—3 hours; term paper. English history from Waterloo to the Battle of Britain; the rise and continuance of the first industrial nation, examining the transformation of landed to class society, oligarchy to democracy and bureaucracy, Bentham to Blooms-

bury, empire to commonwealth. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**159. Women and Gender in Latin American History (4)**

Lecture—3 hours; extensive writing. Roles of women and men in the history of Latin America, with an emphasis on the intersection of gender with racial and class categories. Introduction to the theoretical premises of women's and gender history. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**160. Spain and America in the 16th Century (4)**

Lecture—3 hours; term paper. The Atlantic world in the 16th century, particularly the transcultural and reciprocal social and economic relations between Spain and America in the course of colonization. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**161. Human Rights in Latin America (4)**

Lecture—3 hours; term paper. History of the origins, denial and protection of Human Rights in Latin America. Emphasis on dictatorships, political violence, social resistance, democracy, justice, accountability, truth commissions, memory. Offered in alternate years. (Same course as Human Rights 161.) GE credit: ArtHum or SocSci | AH or SS, VL, WC, WE.

**162. History of the Andean Region (4)**

Lecture/discussion—3 hours; written and/or oral reports. History of the Andean region, the area that now comprises modern Peru, Bolivia, and Chile, from the beginning of human settlement to the present. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**163A. History of Brazil (4)**

Lecture—3 hours; written reports. The history of colonial and imperial Brazil from 1500 to 1889. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

**163B. History of Brazil (4)**

Lecture—3 hours; written reports. The history of the Brazilian republic from 1889 to the present. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

**164. History of Chile (4)**

Lecture—3 hours; term paper. Emphasis on the history of Chilean political economy from 1930 to the present. Various strategies of development (modernization, Marxism, Neo-Liberalism); the rise of mass politics; the course of foreign relations; and the richness of Chilean literature. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

**165. Latin American Social Revolutions (4)**

Lecture—3 hours; written reports. Major social upheavals since 1900 in selected Latin American nations; similarities and differences in cause, course, and consequence. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

**166A. History of Mexico to 1848 (4)**

Lecture/discussion—3 hours; written and/or oral reports. Political, economic, and social development of pre-Columbian, colonial and national Mexico to 1848. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

**166B. History of Mexico Since 1848 (4)**

Lecture/discussion—3 hours; written and/or oral reports. History of Mexico from 1848 to the present. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

**167. Modern Latin American Cultural and Intellectual History (4)**

Lecture—3 hours; term paper. Introduction to the cultural and intellectual history of modern Latin America including architecture, cinema, painting, music, and literature. Offered irregularly. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

**168. History of Inter-American Relations (4)**

Lecture—3 hours; written reports. Diplomatic history of Latin America since independence, intra-Latin American relations, relations with the United States,

participation in international organizations, and communism in Latin America. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

**169A. Mexican-American History (4)**

Lecture/discussion—3 hours; written and/or oral reports. Economic, social, religious, cultural and political development of the Spanish-speaking population of the Southwestern United States from about 1800 to 1910. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**169B. Mexican-American History (4)**

Lecture/discussion—3 hours; written and/or oral reports. Role of the Mexican and Mexican-American or Chicano in the economy, politics, religion, culture and society of the Southwestern United States since 1910. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

Analysis of China's cultural and political transformation from Confucian empire into Communist state. Emphasis on emergence and triumph of peasant revolutionary strategy (to 1949), with some attention to its implications for post-revolutionary culture and politics. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### **191F. History of the People's Republic of China (4)**

Lecture—2 hours; discussion—1 hour; extensive writing. Prerequisite: upper division standing recommended. Comprehensive analysis of recent Chinese history, including land reform, the Cultural Revolution, the post-Mao era, and the consequences of the new economic policies of the 1980s. Not open for credit to students who have completed course 190C. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### **191G. Special Topics in Chinese History to 1800 (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 9A recommended. Topics in the history of China from the beginning of the imperial period through the high Qing dynasty. Topics may be framed chronologically (e.g., the Ming Dynasty) or thematically (e.g., Trade in early Chinese history). May be repeated one time for credit when topic differs. Offered irregularly. GE credit: AH, WC, WE.

#### **191H. Special Topics in Chinese History after 1800 (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 9A recommended. Topics in the history of China since 1800. Topics may be framed chronologically (e.g., The Republican Period (1911-1948)) or thematically (e.g., The Modern Evolution of Chinese Law). May be repeated one time for credit when topic differs. Offered irregularly. GE credit: AH, WC, WE.

#### **191J. Sex and Society in Modern Chinese History (4)**

Lecture—3 hours; term paper. Role of sex, gender, and family relations in the development of Chinese politics, society, and personal life in the modern period, 1900-present. Not open for credit to students who have completed course 190C. Offered irregularly. GE credit: ArtHum | AH, WC, WE.

#### **192. Internship in History (1-12)**

Prerequisite: enrollment dependent on availability of intern positions, with priority to History majors. Supervised internship and study as historian, archivist, curator, or in another history-related capacity, in an approved organization or institution. (P/NP grading only.) Offered irregularly.

#### **193A. History of the Modern Middle East, 1750-1914 (4)**

Lecture—3 hours; term paper. Prerequisite: course 6 recommended. Transformation of state and society within the Middle East from 1750 to 1914 under pressure of the changing world economy and European imperialism. Themes include colonialism, Orientalism, Arab intellectual renaissance, Islamic reform, state-formation, role of subaltern groups. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VL, WC, WE.

#### **193B. History of the Modern Middle East from 1914 (4)**

Lecture—3 hours; term paper. The Middle East from the turn of the 20th century to the present. Themes include the legacy of imperialism, cultural renaissance, the World Wars, nationalism, Palestine-Israel, Islamic revival, gender, revolutionary movements, politics of oil and war, cultural modernism, exile and diaspora. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VL, WC, WE.

#### **193C. The Middle East Environment: Historical Change and Current Challenges (4)**

Lecture/discussion—3 hours; project. Examines Middle East environment and human use of nature over last 10,000 years. Introduction to desert ecology, environmental history and current environmental problems. Case Studies of Egypt, Maghreb countries, Arabian peninsula/Gulf countries, desertification, water, indigenous knowledge, and national parks. GE credit: ArtHum or SocSci | AH or SS, WE.

#### **193D. History of Modern Iran, From 1850 to Present (4)**

Lecture—3 hours; term paper. Prerequisite: course 6 recommended. Modern Iran from the mid 19th century to the present. Themes include the legacy of imperialism, cultural renaissance, the World Wars, nationalism, modernization, Islamic revival, gender, revolutionary movements, politics of oil and war. Offered in alternate years. GE credit: SocSci, Div, Wrt | AH or SS, VL, WC, WE.

#### **194A. Aristocratic and Feudal Japan (4)**

Lecture—3 hours; term paper and/or discussion. Broad survey of the cultural, social, religious, and political aspects of Japanese history from mythological times through the sixteenth century emphasizing comparison of the organizations, values, and beliefs associated with the aristocratic and feudal periods. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### **194B. Early Modern Japan (4)**

Lecture—3 hours; term paper and/or discussion. Survey of the cultural, social, economic, and political aspects of Japanese history from the seventeenth through the nineteenth centuries emphasizing the development of those patterns of thought and political organization with which Japan met the challenge of the nineteenth-century Western expansionism. Offered in alternate years. GE credit: ArtHum or SocSci, Div | AH or SS, WC, WE.

#### **194C. Modern Japan (4)**

Lecture—3 hours; term paper and/or discussion. Survey of the cultural, social, economic, and political aspects of Japanese history in the twentieth century emphasizing labor and social movements, militarism and the Pacific war, and the emergence of Japan as a major economic power. Offered in alternate years. GE credit: ArtHum or SocSci, Div | AH or SS, WC, WE.

#### **194D. Business and Labor in Modern Japan (4)**

Lecture—3 hours; term paper. Survey of labor and management relations in Japan from the mid-eighteenth century to the present. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

#### **194E. Education and Technology in Modern Japan (4)**

Lecture—3 hours; term papers. Survey of education and technology in Japan from the mid-eighteenth century to the present. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

#### **195B. History of Modern Korea (4)**

Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: upper division standing recommended. History of Modern Korea, from Yi dynasty period to 1990s. Covers the political and socioeconomic changes in 19th century, modernization under Japanese colonialism, postwar economic growth and effects of the Cold War. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

#### **196A. Medieval India (4)**

Lecture—3 hours; discussion—1 hour; written reports. Survey of history of India in the millennium preceding arrival of British in the eighteenth century, focusing on interaction of the civilizations of Hinduism and Islam and on the changing nature of the state. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**196B. Modern India (4)**

Lecture—3 hours; discussion—1 hour; written reports. Survey of cultural, social, economic, and political aspects of South Asian history from arrival of the British in the eighteenth century to formation of new independent states—India, Bangladesh, and Pakistan—in the twentieth century. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

**197T. Tutoring in History (2)**

Discussion—1 hour; laboratory—3 hours. Prerequisite: enrolled as a History major with senior standing and consent of department chairperson. Tutoring of students in lower division courses. Weekly meeting with instructors in charge of courses. Written reports on methods and materials required. May be repeated one time for credit. No final examination. (P/NP grading only.) Offered irregularly.

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor; upper division standing. (P/NP grading only.) Offered irregularly.

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) Offered irregularly.

**Graduate****201A. Sources and General Literature of History; Ancient (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. Ancient. May be repeated for credit when different subject area is studied.

**201B. Sources and General Literature of History; Medieval (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. Medieval. May be repeated for credit when different subject area is studied.

**201C. Sources and General Literature of History; Renaissance and Reformation (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. Renaissance and Reformation. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201D. Sources and General Literature of History; Early Modern Europe (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. Early Modern Europe. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201E. Sources and General Literature of History; Europe Since 1815 (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. Europe since 1815. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201F. Sources and General Literature of History; China to 1880 (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. China to 1880. May be repeated for credit when different subject area is studied. Offered irregularly.

**201G. Sources and General Literature of History; China Since 1880 (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. China since 1880. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201H. Sources and General Literature of History; Britain (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. Britain. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201I. Sources and General Literature of History; Latin America Since 1810 (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. Latin America since 1810. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201J. Sources and General Literature of History; American History to 1787 (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. American History to 1787. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201K. Sources and General Literature of History; United States, 1787-1896 (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. United States, 1787-1896. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201L. Sources and General Literature of History; United States Since 1896 (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. United States since 1896. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201M. Sources and General Literature of History; Middle East (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Addresses various theoretical and methodological approaches to the study of the Modern Middle East. Survey Modern Middle East historiography in light of theoretical innovations such as post-Orientalism, World Systems theory, and postcolonial theory. May be repeated for credit when subject differs. Offered in alternate years.

**201N. Sources and General Literature of History; Modern Japan (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. Modern Japan. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201P. Sources and General Literature of History; African Historiography (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. African Historiography. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201Q. Sources and General Literature of History; Cross-Cultural Women's History (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. Cross-Cultural Women's History. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201S. Sources and General Literature of History; History of Science and Medicine (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. History of Science and Medicine. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201T. Sources and General Literature of History; Jewish History (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. Jewish History. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201W. Sources and General Literature of History; Advanced Topics in World History (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. Advanced Topics in World History. May be repeated for credit when different subject area is studied. Offered in alternate years.

**201X. Undergraduate Proseminar in History; Comparative History (5)**

Seminar—3 hours; term paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Comparative History, selected topics in cultural, political, economic, and social history that deal comparatively with more than one geographic field. May be repeated for credit when different subject area is studied. Offered in alternate years. GE credit: WE.

**202A. Major Issues in Historical Interpretation; Ancient (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Fundamental issues and debates in the study of history. Ancient. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. Offered in alternate years.

**202B. Major Issues in Historical Interpretation; Medieval Europe (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Fundamental issues and debates in the study of history. Medieval Europe. Readings, papers, and class reports. Offered in alternate years.

**202C. Major Issues in Historical Interpretation; Modern Europe (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Fundamental issues and debates in the study of history. Modern Europe. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. Offered in alternate years.

**202D. Major Issues in Historical Interpretation (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Fundamental issues and debates in the study of history. India. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. Offered in alternate years.

**202E. Major Issues in Historical Interpretation; India (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Fundamental issues and debates in the study of history. Africa. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. Offered in alternate years.

**202F. Major Issues in Historical Interpretation; China (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Fundamental issues and debates in the study of history. China. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. Offered in alternate years.

**202G. Major Issues in Historical Interpretation; Japan (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Fundamental issues and debates in the study of history. Japan. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. Offered in alternate years.

**202H. Major Issues in Historical Interpretation; United States (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Fundamental issues and debates in the study of history. United States. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. Offered in alternate years.

**202I. Major Issues in Historical Interpretation; Latin America (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Fundamental issues and debates in the study of history. Latin America. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. Offered in alternate years.

**203A. Research Seminar (4)**

Seminar—3 hours; tutorial—1 hour. Designed for students preparing for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year.—F. (F.)

**203B. Research Seminar (4)**

Seminar—3 hours; tutorial—1 hour. Prerequisite: course 203A. Designed for students preparing for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year. (Deferred grading only, pending completion of sequence.)—W. (W.)

**203C. Research Seminar (4)**

Seminar—3 hours; tutorial—1 hour. Prerequisite: course 203A. Designed for students preparing for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year. (Deferred grading only, pending completion of sequence.)—S. (S.)

**204. Historiography (4)**

Seminar—3 hours; term paper. Major issues in the philosophy and methodology of history.—F. (F.)

**221. Medieval History (4)**

Seminar—3 hours. Prerequisite: courses 121A, 121B, 121C recommended. Topics in the history of medieval and early Renaissance Europe. Offered irregularly.

**245. Modern European History (4)**

Seminar—3 hours. Prerequisite: course 201E. Primary sources and research methodologies in the history of modern France and Germany. May be repeated one time for credit. Offered irregularly.

**261. Latin American History (4)**

Seminar—3 hours. Prerequisite: two courses in Latin American history; reading knowledge of Spanish or Portuguese. Offered irregularly.

**271A. United States History (4)**

Seminar—3 hours; term paper. Prerequisite: course 201J-L or 202H. Research in literature, methods, and sources on aspects of United States history, culminating in each student completing a research paper in the field by the end of the second quarter. May be repeated for credit. (Deferred grading only, pending completion of sequence.) Offered irregularly.

**271B. United States History (4)**

Seminar—3 hours; term paper. Prerequisite: course 201J-L or 202H. Research in literature, methods, and sources on aspects of United States history, culminating in each student completing a research paper in the field by the end of the second quarter. May be repeated for credit. (Deferred grading only, pending completion of sequence.) Offered irregularly.

**291A. Chinese History (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Research on topics to be chosen by the students for the purpose of writing article-length papers. May be repeated for credit. (Deferred grading only, pending completion of sequence.) Offered irregularly.

**291B. Chinese History (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Completion of article-length papers on topics chosen by students. May be repeated for credit. (Deferred grading only, pending completion of sequence.) Offered irregularly.

**291C. Methods and Issues in Chinese History (4)**

Seminar—2 hours; tutorial—1 hour. Prerequisite: reading knowledge of Chinese; consent of instructor. Readings in Chinese historical materials. Training in the use of Chinese reference works (including on-line resources). May be repeated for credit. Offered irregularly.

**292. College Teaching Internship (4)**

Internship—4 hours. Prerequisite: course 300 (may be taken concurrently). Student prepares and teaches one lower division history course in a nearby community college under the supervision of a UC Davis instructor and a community college instructor. (S/U grading only.) Offered irregularly.

**298. Group Study (1-5)**

(S/U grading only.)

**299D. Individual Study (1-12)**

(S/U grading only.)

**Professional****389. Introductory Seminar for Teaching Assistants (1)**

Seminar—1 hour. Prerequisite: must be enrolled in course 390. An introduction to the broad comparative and theoretical issues of teaching methods and techniques in history. (S/U grading only.)

**390. Teaching History in College (2)**

Discussion—2 hours. Designed for teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. (S/U grading only.)

## History and Philosophy of Science

(College of Letters and Science)

Joseph Dumit, Ph.D., Program Director

**Program Office.** 101 Young Hall

**Committee in Charge**

Thomas Beamish, Ph.D. (*Sociology*)

Mario Biagioli, Ph.D. (*Science and Technology Studies, School of Law*)

Patrick Carroll, Ph.D. (*Sociology*)

Timothy Choy, Ph.D. (*Anthropology, Science and Technology Studies*)

Marisol de la Cadena, Ph.D. (*Anthropology*)

Joseph Dumit, Ph.D. (*Anthropology, Science and Technology Studies*)

James Griesemer, Ph.D. (*Philosophy*)

Caren Kaplan, Ph.D. (*American Studies*)

Colin Milburn, Ph.D. (*English*)

Roberta Millstein, Ph.D. (*Philosophy*)

Daniel Stolzenberg, Ph.D. (*History*)

Madhavi Sunder, J.D. (*School of Law*)

**Minor Program Requirements:**

The interdisciplinary minor in the history and philosophy of science invites students to examine historical and contemporary problems in a variety of scientific disciplines, and to explore concepts and procedures basic to science and how they have evolved. The minor is sponsored by the Program in Science and Technology Studies.

UNITS

**History and Philosophy of Science.....24**

Philosophy 30.....4

Five courses from those listed below. One course must be from each of three areas: (a) history, (b) philosophy, and (c) science and technology studies.....20

(a) History 102, 135A, 135B, 136, 139A, 139B, 185A, 185B, 188A, 188B;

(b) Philosophy 107, 108, 109, 110, 111, 112;

(c) Science and Technology Studies 20,

130A, 130B, 131, 150, 180.

**Minor Adviser.** 101 Young Hall,

[stsadvising@ucdavis.edu](mailto:stsadvising@ucdavis.edu).

## Horticulture and Agronomy (A Graduate Group)

\_\_\_\_\_, Chairperson of the Group

**Group Office.** 1224 Plant and Environmental Sciences Building

530-752-7738; <http://ggha.ucdavis.edu>

**Faculty**

Douglas O. Adams, Ph.D., Professor  
(*Viticulture and Enology*)

Kassim Al-Khatib, Ph.D., Professor (*Plant Sciences*)

Diane M. Beckles, Ph.D., Associate Professor  
(*Plant Sciences*)

Alan B. Bennett, Ph.D., Professor (*Plant Sciences*)

Alison M. Berry, Ph.D., Professor (*Plant Sciences*)

Arnold J. Bloom, Ph.D., Professor (*Plant Sciences*)

Eduardo Blumwald, Ph.D., Professor (*Plant Sciences*)

Kent J. Bradford, Ph.D., Professor (*Plant Sciences*)

Patrick H. Brown, Ph.D., Professor (*Plant Sciences*)

E. Charles Brummer, Ph.D., Professor  
(*Plant Sciences*)

Dario Cantu, Ph.D., Assistant Professor  
(*Viticulture and Enology*)

Abhaya M. Dandekar, Ph.D., Professor  
(*Plant Sciences*)

Jorge Dubcovsky, Ph.D., Professor (*Plant Sciences*)

Jan Dvorak, Ph.D., Professor (*Plant Sciences*)

Valerie T. Eviner, Ph.D., Associate Professor  
(*Plant Sciences*)

Albert J. Fischer, Ph.D., Professor (*Plant Sciences*)

Amélie Gaudin, Ph.D., Assistant Professor  
(*Plant Sciences*)

Paul L. Gepts, Ph.D., Distinguished Professor  
(*Plant Sciences*)

Matthew E. Gilbert, Ph.D., Assistant Professor  
(*Plant Sciences*)

Thomas M. Gradiel, Ph.D., Professor  
(*Plant Sciences*)

Robert Hijmans, Ph.D., Associate Professor  
(*Environmental Science and Policy*)

William Horwath, Ph.D., Professor  
(*Land, Air and Water Resources*)

Kentaro Inoue, Ph.D., Professor (*Plant Sciences*)

Louise E. Jackson, Ph.D., Professor  
(*Land, Air and Water Resources*)

Marie A. Jasieniuk, Ph.D., Associate Professor  
(*Plant Sciences*)

Judy Jernstedt, Ph.D., Professor (*Plant Sciences*)

Steven J. Knapp, Ph.D., Professor (*Plant Sciences*)

Emilio A. Laca, Ph.D., Professor (*Plant Sciences*)

J. Heinrich Lieth, Ph.D., Professor (*Plant Sciences*)

Mark A. Mathews, Ph.D., Professor  
(*Viticulture and Enology*)

Maeli Melotto, Ph.D., Assistant Professor  
(*Plant Sciences*)

Richard W. Michelmore, Ph.D., Distinguished Professor  
(*Plant Sciences*)

David B. Neale, Ph.D., Professor (*Plant Sciences*)

Sharman O'Neill, Ph.D., Professor (*Plant Biology*)

Daniel Potter, Ph.D., Professor (*Plant Sciences*)

Jeffrey S. Ross-Ibarra, Ph.D., Associate Professor  
(*Plant Sciences*)

Daniel E. Runcie, Ph.D., Assistant Professor  
(*Plant Sciences*)

Kate M. Scow, Ph.D., Professor  
*(Land, Air and Water Resources)*  
 Kenneth A. Shackel, Ph.D., Professor (*Plant Sciences*)  
 David R. Smart, Ph.D., Professor  
*(Viticulture and Enology)*  
 Dina St. Clair, Ph.D., Professor (*Plant Sciences*)  
 Kenneth W. Tate, Ph.D., Professor (*Plant Sciences*)  
 Li Tian, Ph.D., Associate Professor (*Plant Sciences*)  
 Chris van Kessel, Ph.D., Professor (*Plant Sciences*)  
 Astrid Volder, Ph.D., Assistant Professor  
*(Plant Sciences)*  
 M. Andrew Walker, Ph.D., Professor  
*(Viticulture and Enology)*  
 Larry E. Williams, Ph.D., Professor  
*(Viticulture and Enology)*  
 John I. Yoder, Ph.D., Professor (*Plant Sciences*)  
 Florence Zakharov, Ph.D., Associate Professor  
*(Plant Sciences)*  
 Maciej Zwieniecki, Ph.D., Associate Professor  
*(Plant Sciences)*

### Affiliated Faculty

Kendra Baumgartner, Ph.D., Lecturer and Research Plant Pathologist (*Plant Pathology*)  
 Marita Cantwell, Ph.D., Lecturer and Specialist in Cooperative Extension (*Plant Sciences*)  
 Roger T. Chetelat, Ph.D., Lecturer and Agronomist (*Plant Sciences*)  
 Carlos H. Crisosto, Ph.D., Lecturer and Specialist in Cooperative Extension (*Plant Sciences*)  
 Joseph M. DiTomaso, Ph.D., Lecturer and Specialist in Cooperative Extension (*Plant Sciences*)  
 Richard Y. Evans, Ph.D., Lecturer and Specialist in Cooperative Extension (*Plant Sciences*)  
 Steven A. Fennimore, Ph.D., Lecturer and Specialist in Cooperative Extension (*Plant Sciences*)  
 Louise Ferguson, Ph.D., Lecturer and Specialist in Cooperative Extension (*Plant Sciences*)  
 Matthew W. Fidelibus, Ph.D., Associate Specialist in Cooperative Extension (*Viticulture & Enology*)  
 Elise Gornish, Ph.D., Lecturer and Assistant Specialist in Cooperative Extension (*Plant Sciences*)  
 W. Douglas Gubler, Ph.D., Lecturer and Extension Plant Pathologist (*Plant Pathology*)  
 Bradley D. Hanson, Ph.D., Lecturer and Specialist in Cooperative Extension (*Plant Sciences*)  
 Timothy K. Hartz, Ph.D., Lecturer and Specialist in Cooperative Extension (*Plant Sciences*)  
 Stephen R. Kaffka, Ph.D., Lecturer and Specialist in Cooperative Extension (*Plant Sciences*)  
 S. Kaan Kurtural, Ph.D., Lecturer and Associate Specialist in Cooperative Extension (*Viticulture and Enology*)  
 Bruce D. Lampinen, Ph.D., Lecturer and Specialist in Cooperative Extension (*Plant Sciences*)  
 Bruce Linquist, Ph.D., Lecturer and Associate Specialist in Cooperative Extension (*Plant Sciences*)  
 Mark E. Lundy, Ph.D., Lecturer and Assistant Specialist in Cooperative Extension (*Plant Sciences*)  
 David J. Mackill, Ph.D., Adjunct Professor (*Plant Sciences*)  
 Andrew J. McElrone, Ph.D., Assistant Adjunct Professor (*Viticulture and Enology*)  
 Elizabeth J. Mitcham, Ph.D., Lecturer and Specialist in Cooperative Extension (*Plant Sciences*)  
 Jeffrey P. Mitchell, Ph.D., Lecturer and Specialist in Cooperative Extension (*Plant Sciences*)  
 Anita Oberholster, Ph.D., Lecturer and Assistant Specialist in Cooperative Extension (*Viticulture and Enology*)  
 Lorence R. Oki, Ph.D., Lecturer and Associate Specialist in Cooperative Extension (*Plant Sciences*)  
 Dan E. Parfitt, Ph.D., Lecturer and Pomologist (*Plant Sciences*)  
 Ann Powell, Ph.D., Lecturer and Researcher (*Plant Sciences*)  
 Daniel H. Putnam, Ph.D., Lecturer and Specialist in Cooperative Extension (*Plant Sciences*)  
 Leslie M. Roche, Lecturer and Assistant Specialist in Cooperative Extension (*Plant Sciences*)  
 Johan W. Six, Ph.D., Adjunct Professor (*Plant Sciences*)

Kerri L. Steenwerth, Ph.D., Assistant Adjunct Professor (*Viticulture and Enology*)  
 Trevor V. Suslow, Ph.D., Lecturer and Specialist in Cooperative Extension (*Plant Sciences*)  
 Allen E. Van Deynze, Ph.D., Lecturer and Biotechnology Specialist (*Plant Sciences*)  
 Mark Van Horn, M.S., Lecturer (*Plant Sciences*)

### Emeriti

David W. Burger, Ph.D., Professor Emeritus (*Plant Sciences*)  
 James A. Harding, Ph.D., Professor Emeritus (*Plant Sciences*)  
 Theodore M. DeJong, Ph.D., Professor Emeritus (*Plant Sciences*)  
 James E. Hill, Ph.D., Specialist in Cooperative Extension, Emeritus (*Plant Sciences*)  
 John M. Labavitch, Ph.D., Professor Emeritus (*Plant Sciences*)  
 G. Stuart Pettygrove, Ph.D., Emeritus Soils Specialist (*Land, Air and Water Resources*)  
 Richard E. Plant, Ph.D., Professor Emeritus (*Plant Sciences*)  
 Vito S. Polito, Ph.D., Professor Emeritus (*Plant Sciences*)  
 Michael S. Reid, Ph.D., Professor Emeritus (*Plant Sciences*)  
 Mikal E. Salvit, Ph.D., Professor Emeritus (*Plant Sciences*)

**Graduate Study.** The Graduate Group in Horticulture and Agronomy offers programs of study leading to the M.S. and Ph.D. degrees for students interested in the science and management of agricultural crops, including their ecology, physiology, genetics, and post-harvest management, as well as the interaction of agricultural crops with the environment. These programs are designed to focus on a cropping system, such as agronomy, environmental horticulture, pomology, vegetable crops, viticulture and weed science. Within that cropping system, the student can specialize in one of a number of areas, including agroecology, biotechnology, breeding and crop improvement, crop physiology, crop production, floriculture, landscape horticulture, mineral nutrition, modeling, nursery production, pest management, plant growth and development, postharvest physiology, revegetation/restoration, and water relations. Research may be conducted within these areas with an applied or basic focus, but in association with a cropping system.

**Preparation.** For both the M.S. and Ph.D. programs, a level of competence equivalent to that of a sound undergraduate program in Plant Science is required. This includes coursework in general biology, chemistry, organic chemistry, physics, statistics, genetics, plant physiology, and soil science. A few limited deficiencies in any of these areas can be made up after admission to the graduate program. Specific requirements are outlined in detail on the group's website. The graduate adviser, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

**Graduate Advisers.** Consult the Group office.

### Courses in Horticulture (HRT)

#### Graduate

##### 200A. Horticulture & Agronomy: Principles (4)

Lecture/discussion—4 hours. Prerequisite: graduate standing. Core course to introduce students to the principles that are of general importance in horticultural and agronomic research, including agroecology, plant developmental physiology, crop improvement, and biotechnology. Generally taken in the first year of the graduate program.—F. (F.) Jernstedt

##### 200B. Horticulture & Agronomy: Practices (4)

Lecture/discussion—2 hours; fieldwork—3 hours; seminar—3 hours. Prerequisite: course 200A recommended; graduate standing. Introduction to horticultural and agronomic cropping systems. Covers

current applied research within agroecology, crop improvement, crop production, postharvest biology.—S. (S.) Walker

#### 203. Research Perspectives in Horticulture (3)

Lecture—1 hour; lecture/discussion—2 hours. Prerequisite: Plant Biology 111 and 112, or Environmental Horticulture 102 or the equivalent. Following lectures/discussions of scientific methodology, students develop research proposals aided by classroom discussions and individual interactions with instructors. Lectures and critiques of "classical papers" provide a sense of the evolution of the current concepts in perennial plant biology.—W. (W.) Melotto, Zwieniecki

#### 251. Modeling Horticultural Systems (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Plant Sciences 142, calculus, or consent of instructor. Development and application of models. Emphasis on physiological and ecological models, with examples from areas of interest to class participants. Applications to horticultural systems. Offered in alternate years.—(W.) Liebh

#### 290. Seminar (1)

Seminar—1 hour. Prerequisite: graduate standing at UCD. Seminars presented by invited speakers, students, or faculty on selected topics in horticulture. (S/U grading only.)—S. (S.)

#### 298. Group Study (1-5)

F, W, S. (F, W, S.)

#### 299. Research (1-12)

Prerequisite: consent of instructor. Research. May be repeated for credit. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

## Human and Community Development

**See Human Ecology, on page 373.**

## Human Development

(College of Agricultural and Environmental Sciences)

#### Faculty

See Human Ecology, on page 373.

#### The Major Program

Human development explores the developmental process in humans throughout the life cycle. Biological, cognitive, and personality/sociocultural aspects of development are studied.

**The Program.** Human development majors complete a group of preparatory courses in anthropology, general biology, genetics, history, philosophy, physiology, psychology, and statistics. Upper division students can design their programs in consultation with a faculty member to emphasize a particular interest. For instance, students can study the cognitive, social, and biological aspects of human development while emphasizing child or adult development.

**Internships and Career Alternatives.** At least one practicum course is required. A second practicum or supervised internship can be used to fulfill the restricted elective requirement for the major. In addition, students can intern in schools, early childhood education or senior centers, hospitals, rehabilitation

centers, probation offices, group foster homes, mental health clinics, or as tutors for handicapped or bilingual students. Human development graduates fill a wide variety of positions in preschools, elementary and special educational settings, programs designed for parents, families, and the elderly, as well as governmental jobs related to social services for people of all ages. Students who emphasize biological aspects of human development can apply to medical school or pursue training for positions in the health sciences. Human development prepares students to pursue advanced degrees in behavioral and social sciences, education, social work, family law, or health sciences.

**Preparatory Requirements.** UC Davis students who wish to change their major to Human Development must be in good academic standing. Students must complete the following courses with a combined grade point average of at least 2.500. All of the following courses must be taken for a letter grade:

- Psychology 1
- Statistics 10 or 13 or 13V or Psychology 41
- or Sociology 46A and 46B
- One course from: Anthropology 1, 2 or 15
- One course from: Biological Sciences 2A, 10, 10V; Microbiology 10; Molecular and Cellular Biology 10; or Neurobiology, Physiology, and Behavior 10, 12 or 101

Students must have achieved a 2.000 GPA in any required upper-division courses taken prior to declaring the major.

All courses satisfying the Preparatory Subject Matter, Depth Subject Matter, Restricted Electives and English requirement must be taken for a letter grade.

### B.S. Major Requirements:

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>38-48</b>
Two courses from: Anthropology 1, 1Y, 2, or 15.....	8-9
One course from: Biological Sciences 2A, 10, 10V, Microbiology 10, or Neurobiology, Physiology, and Behavior 12 .....	3-5
One course from: Molecular and Cellular Biology 10 or Biological Sciences 101† ...	4
One course from: History 17A, 17B, 72A, 72B, or Political Science 1 .....	4
Two courses from: Philosophy 5, 15, 30, 31, 32, or 38 .....	8
One course from: Neurobiology, Physiology, and Behavior 10, 101, or Psychology 101 .....	3-5
Psychology 1 .....	4
One course from: Psychology 41 or Sociology 46A and 46B, or Statistics 10 or 13 or 13V .....	4-9

### Depth Subject Matter .....

- Life Span: Human Development 100A, 100B, 100C..... 12
- Research Methods: Human Development 120..... 4
- Biological Processes: one course from: Biological Sciences 101†, Human Development 117, Nutrition 111AV, or Psychology 121 .....
- 3-4
- Social-Cultural Processes: one course from: Human Development 102, 110, 130, or 160..... 4
- Cognitive Processes: one course from: Human Development 101, 103, 132, 161 or 163 .....
- 4
- Practicum: one course from: Human Development 140-140L, or 141 or 142 or 143 .....
- 4-6
- Restricted Electives..... 19-20
- Five additional upper division courses (19-20 units) chosen from among Human Development courses or from a list of restricted electives in consultation with

faculty adviser. May include only one practicum course.

At least one of the courses from the Depth Subject groups or Restricted Electives listed above must focus on childhood/adolescence (101, 102, 103, 110, 130, 132) and one on adulthood/aging (117, 143, 160, 161, 163).

### English Composition Requirement .....

12  
Three courses in English Composition from the following list:

- English 3, University Writing Program 1, 18, 19, 101, 102A, 102B, 102C, 102D, 102E, 102F, 102G, 102H, 102J, 102K, 102L, 104A, 104B, 104C, 104D, 104E, 104F, 104I, Communication 1,
- Comparative Literature 1, 2, 3, 4, or Native American Studies 5.

At least one course must be selected from: University Writing Program 101, 102A-H, 104A-F.

The Upper Division Composition Exam does not satisfy the requirement.

Advanced Placement English score of 4 or 5 which satisfies English 3 and/or University Writing Program 1 will satisfy one of the three required courses.

### Total Units for the Major .....

92-105  
† Biological Sciences 101 cannot be used to satisfy both the Preparatory Subject Matter and the Depth Subject Matter Requirements.

**Major Adviser.** Lisa Miller

### Minor Program Requirements:

The Department of Human and Community Development offers two minors.

### UNITS

### Aging and Adult Development .....

- Three of following courses:  
Human Development 100C, 117, 143, 160, 161, or 163..... 12
- Two courses from the following: Human Development 110; Exercise Biology 117, Psychology 121, 123, 126, 130, or 155..... 6-8

**Minor Adviser.** L. Miller, B. Ober

### UNITS

### Human Development .....

- Human Development 100A and 100B ..... 8
- Human Development 100C or 110 ..... 4
- Two courses from: Human Development 101, 102, 103, 130, 132, 161 or 163 ... 8

**Minor Adviser.** K. Conger

**Graduate Study.** Graduate study is available through a Master of Science degree in child development, and a Ph.D. degree in human development. See also [Graduate Studies](#), on page 120.

### Courses in Human Development (HDE)

Questions pertaining to the following courses should be directed to the instructor or to the Human and Community Development Advising Center in 1303 Hart Hall 530-752-2244.

### Lower Division

#### 12. Human Sexuality (3)

Lecture—3 hours. Vocabulary, structure/function of reproductive system; sexual response; pre-natal development; pregnancy and childbirth; development of sexuality; rape and sexual assault; birth control; sexually transmitted diseases; homosexuality; establishing/maintaining intimacy; sexual dysfunctions; communication; enhancing sexual interaction, cultural differences in attitudes towards sexuality. GE credit: SocSci, Div | ACGH, DD, SS.—F, S. (F, S.)

#### 92. Internship (1-12)

Internship—3-36 hours. Prerequisite: field work experience or at least one course (e.g., course 100A, 100B, 140 or 140L) related to fieldwork assignment; consent of instructor. Supervised intern-

ship, off campus and on campus, in community and institutional setting. May be repeated for credit for a total of 12 units or if involves progressively greater (supervised) participation in program delivery or assessment. (P/NP grading only.)—F, W, S. (F, W, S.)

#### 98. Directed Group Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

### Upper Division

#### 100A. Infancy and Early Childhood (4)

Lecture—4 hours. Prerequisite: Psychology 1, Biological Sciences 1A, or 2A, or 10 or 10V; or Molecular and Cellular Biology 10; or Neurology, Physiology, and Behavior 10 or 12; or Microbiology 10. Biological, social, and cultural influences in the psychological growth and development of children, prenatal through age six. Two observations of preschool children required.—F, W, Su. (F, W, Su.) Hibel

#### 100B. Middle Childhood and Adolescence (4)

Lecture—4 hours. Prerequisite: Psychology 1; and either course 100A or Psychology 140. Interplay of biological and social-cultural factors in the emotional, cognitive and social development from middle childhood through adolescence.—W, S, Su. (W, S, Su.) Guyer, Nishina

#### 100C. Adulthood and Aging (4)

Lecture—4 hours. Prerequisite: Psychology 1. Development during early, middle, and late adulthood; biological, cognitive, and psycho-social aspects of adult development. Emphasis on normative patterns of development which characterize "successful aging."—F, S. Miller, Ober

#### 101. Cognitive Development (4)

Lecture—3 hours; term paper. Prerequisite: course 100A or 100B or Psychology 140. Pass One restricted to Human Development or Psychology majors. Theories, methods, evidence, and debates in the field of cognitive development, such as nature/nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language. (Same course as Psychology 141.) GE credit: Wrt | WE.—F, W, S. (F, W, S.) Chen, Gibbs, Goodman, Graf Estes, Lagattuta, Rivera

#### 102. Social and Personality Development (4)

Lecture—3 hours; term paper. Prerequisite: course 100A or 100B or Psychology 140. Pass One open to Human Development or Psychology majors. Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors. (Same course as Psychology 142.) GE credit: SocSci, Wrt | SS, WE.—F, W, S. (F, W, S.) Belsky, Gibbs, Hastings, Thompson

#### 103. Cross-Cultural Study of Children (4)

Lecture—4 hours. Prerequisite: course 100A or Psychology 140; consent of instructor. Cross-cultural studies of children in developing countries and among minority groups in the U.S. GE credit: SocSci, Div | ACGH, DD, SS, WC.—F. (F.)

#### 110. Contemporary American Family (4)

Lecture—4 hours. Prerequisite: Psychology 1 or Sociology 1 or Sociology 2. Factors currently influencing American families including changing economic conditions, changing sex roles, divorce, and parenthood; theories and research on family interaction.—W. (W.) Conger

#### 117. Longevity (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems

including natural history, ecology and evolution of life span; description of basic demographic techniques including life table methods. (Same course as Entomology 117.) GE credit: SciEng, Wrt | SE, SL, WE. —F. (W.) Carey

### **120. Research Methods in Human Development (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Statistics 13 or 13V or Education 114 or Psychology 41 or Sociology 46A and 46B. Scientific process, research designs, and experimental controls; APA manuscript style and scientific writing; statistical analysis and interpretation of results. Laboratory exercises to collect data, analyze and interpret results, and write scientific papers. GE credit: SocSci, Wrt | SS, WE. —F, S. (F, S.) Liu, Nishina

### **121. Psychological Assessment (4)**

Lecture—4 hours. Prerequisite: courses 100A or 100B; Statistics 13 or 13V or Psychology 41 or Sociology 46A and 46B. Current issues and methodology related to the process of psychological assessment with children. Offered irregularly.

### **130. Emotionally Disturbed Children (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 100A and 100B; or Psychology 140; consent of instructor. Discussion of psychosis, neurosis, behavior disorders, and learning difficulties in children. —W. (W.) Choe

### **132. Individual Differences in Cognition (4)**

Lecture—4 hours. Prerequisite: Psychology 1; course 100A or 100B. Individual differences in cognition, including learning disabilities and giftedness. Education implications and neurodevelopmental substrates of individual differences in cognition. Offered irregularly.

### **140. Communication and Interaction with Young Children (2)**

Lecture—2 hours. Prerequisite: course 100A; concurrent enrollment in course 140L required; consent of instructor. Enrollment requires sign up for laboratory time at the Child and Family Studies Center located at 244 First Street, Davis, CA. Integration of research, theory and practice in child development, emphasizing the role of relationships in creating a growth-promoting environment for young children. Includes: peer relationships, emotional understanding and self regulation, attachment, communication and school readiness. —F, W, S. (F, W, S.) Chen

### **140L. Laboratory in Early Childhood (3-5)**

Laboratory—6-15 hours; laboratory/discussion—3 hours. Prerequisite: course 140, must be taken concurrently for first 3 units of credit; students must contact the Center for Child and Family Studies to enroll; consent of instructor. Limited enrollment. Application of theories of learning and development to interaction with infants, toddlers, and preschoolers at Early Childhood Laboratory. Applied skills in communication, guidance and curriculum. May be repeated two times for credit. (P/NP grading only.) —F, W, S. (F, W, S.) Chen

### **141. Field Study With Children and Adolescents (4-6)**

Lecture—2 hours, fieldwork—6-12 hours. Prerequisite: course 100A or 100B; consent of instructor. Study of children's affective, cognitive and social development within the context of family/school environments, hospitals and foster group homes. May be repeated for credit for a total of 12 units. —F, S. (F, W, S.)

### **142. Field Study with Emotionally Distressed Children and Adolescents (4-6)**

Discussion—1.5 hours; fieldwork—6-12 hours. Prerequisite: course 130 (may be taken concurrently); consent of instructor. Field study with children who are identified as emotionally distressed, including those with internalizing and externalizing behavioral problems. May be repeated for credit for a total of 12 units following consultation with and consent of instructor.

### **143. Field Studies of the Elderly (4-6)**

Discussion—2 hours; field work—6-12 hours. Prerequisite: course 100C or 160 may be taken concurrently; consent of instructor. Apply theory and research on adult development and aging, work with older adults in a variety of settings, and develop skills relevant to that application. Develop a small research project. —W. (W.) Miller, Ober

### **160. Social Aspects of Aging (4)**

Lecture—4 hours. Prerequisite: course 100C. How the social context affects adult development and aging. Emphasis on demography, social policy, culture, and adaptation. Oral histories as class projects. Offered in alternate years. GE credit: Div. —F. (F.)

### **161. Applied Cognition and Aging (4)**

Lecture/discussion—4 hours. Prerequisite: Psychology 1; course 100C. Principles from cognition and aging and applies these to real-world concerns in areas including education, technology, job performance, and health. Considers physical and social changes in later life that impact functioning. Offered in alternate years. GE credit: SocSci, Wrt | SS, WE. —S. (S.) Miller

### **163. Cognitive Neuropsychology in Adulthood and Aging (4)**

Lecture/discussion—4 hours. Prerequisite: Psychology 1; course 100C recommended. Theories, methods, and findings concerning the relationship between cognitive processes and brain functioning. Readings, lectures, and in-class discussions cover research on normal younger and older adults, neuropsychological case studies, and selected patient groups (e.g., amnesia, schizophrenia, Alzheimer's disease). Offered in alternate years. —F. (F.) Ober

### **190C. Introductory Research Conference (1)**

Discussion—1 hour. Prerequisite: involvement in ongoing research; consent of instructor. Instructors lead discussions with undergraduate students who involve themselves in a research project. Research papers are reviewed and aspects of project proposals developed out of class are presented and evaluated. May be repeated for credit. (P/NP grading only.) —F, W, S. (F, W, S.)

### **192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: upper division standing and consent of instructor. Supervised internship off and on campus, in community, and institutional settings. (P/NP grading only.)

### **198. Directed Group Study (1-5)**

(P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

### **Graduate**

#### **200A. Early Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing; basic biology or physiology; one upper division course in psychology or a related field; one upper division or graduate course in developmental psychology (may be taken concurrently). Theory and research on the biological, social, cognitive, and cultural aspects of development from conception to the age of five years. —F. (F.) Belsky, Chen, Hibel

#### **200B. Middle Childhood and Adolescence (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing; basic biology or physiology, and at least two upper division or graduate-level courses in psychology or related fields. Theory and research on biological, cognitive, social, and cultural influences on behavioral development from age five years until late adolescence. —W. (W.) Choe, Guyer, Nishina

#### **200C. Development in Adulthood (4)**

Lecture/discussion—4 hours. Theory and research focusing on social, personality, cognitive, and biological development from early to late adulthood. Emphasis is on theory development and continuity and change. —S. (S.) Miller, Ober

### **203. Adolescent Behavioral and Emotional Development (4)**

Lecture/discussion—4 hours. Prerequisite: course 200B. Analysis of recent theories, research methods, and major findings on adolescent behavioral and emotional development, including contextual and genetic influences on adolescence, pubertal transitions, and social/family contexts and processes. Emphasis on multi-level mechanisms underlying adolescent behavioral and emotional development. Offered in alternate years.

### **204. Developmental Neuroscience and Adolescent Psychopathology (4)**

Lecture—4 hours. Prerequisite: graduate standing in Human Development, Psychology, Education, Neuroscience or consent of instructor. Introduction to human developmental neuroscience. Understanding of adolescence and its characterization as a time of risky and unhealthy behavior and vulnerability to onset of mental disorder as well as issues around plasticity of the adolescent brain and prevention/intervention. Offered in alternate years. —(W.) Guyer

### **205. Path Analysis, Factor Analysis, and Structural Equation Modeling (4)**

Lecture—4 hours. Prerequisite: Psychology 204B or equivalent graduate courses in statistics or permission of the instructor; familiarity with multiple regression and the basics of matrix algebra. Graduate standing in HDGG, Psychology, Sociology, Education, or a related social science, or permission of the instructor. Introduction of basic concepts, principles, and applications of structural equation modeling including path analysis, confirmatory factor analysis, multiple-group modeling, and latent growth curve modeling. Offered in alternate years.

### **207. Topics in Applied Cognitive Aging (4)**

Lecture/discussion—2 hours. Prerequisite: graduate standing in Human Development Graduate Group, Psychology, Education, or a related social science, or consent of the instructor. Apply principles from cognitive aging to real-world concerns in areas such as education, technology, job performance, and health. Examine how physical and social changes occurring in later life impact functioning. Offered in alternate years. —F. Miller

### **210. Theories of Behavioral Development (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: graduate standing in behavioral sciences. Consideration of enduring issues in theories of behavioral development; analysis of adequacy of major theoretical schools (e.g., social learning, Piagetian) as scientific theories. Offered in alternate years.

### **211. Physiological Correlates of Behavioral Development (4)**

Seminar—4 hours. Prerequisite: consent of instructor. An overview of mechanisms of organismic development and the implications of developmental biology for the analysis of behavioral ontogeny; consideration of parallels between processes of organismic development and behavioral development in children and infra-human mammals. Offered in alternate years. —(S.)

### **220. Research Methods in Human Growth and Development (4)**

Lecture—4 hours. Prerequisite: Statistics 13 or the equivalent and at least two upper division courses in Human Biology or Developmental Psychology. Overview of qualitative and quantitative approaches to empirical inquiry in the social sciences, with a focus on theory and research methods in biological growth and cognitive and social/emotional development from prenatal period to death. —W. (W.) Liu

### **232. Cognition and Aging (3)**

Lecture/discussion—3 hours. Prerequisite: course 200C. The manner in which cognitive processes are affected by aging as well as an understanding of the changes in the central nervous system occurring with aging. Offered in alternate years. —Ober

**234. Children's Learning and Thinking (3)**

Seminar—3 hours. Prerequisite: course 200A or Psychology 212 recommended. Analysis of theories, research methods, and major findings of children's higher-order cognition, including origins of knowledge, development of problemsolving skills, reasoning strategies, and scientific concepts, with an emphasis on the underlying mechanism involved in children's thinking and learning processes. Offered in alternate years.—(S.) Chen

**238. The Context of Individual Development (3)**

Lecture/discussion—3 hours. Prerequisite: graduate standing in Human Development, Child Development, Education, Psychology, Anthropology, Sociology, or consent of instructor. Analysis of human development within the context of daily life. Contextualizing theories and methods of developmental psychology will be distinguished from contextual theories and methods. Developmental psychology models will be distinguished from child psychology models. Offered in alternate years.

**239. Developmental Trajectories in Typical and Atypical Children; Birth to Five (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing in Human Development, Psychology, Sociology, a related social science, or permission of the instructor. Discuss theories of development in typical and atypical children from birth to five from a socio-cultural perspective including parent-child interaction, peer interactions, cultural contexts of learning, as well as theoretical and empirical issues for understanding continuities and discontinuities in development. Offered in alternate years.—S.

**240. Peer Relationships During Adolescence (4)**

Lecture/discussion—4 hours. Graduate standing in Human Development, Psychology, Education, or consent of instructor. Course examines the role of peer relationships in adolescent development including forms and functions at the individual, dyadic and group levels. Ethnicity and cross cultural research will be discussed. Emphasis on methodology, including surveys, peer nominations/sociometrics, experimental, and observational designs. Offered irregularly.—K. Conger

**250. Current Research on Family Relationships (4)**

Lecture/discussion—6 hours; term paper. Graduate standing in Human Development Graduate Group, Psychology, Sociology, a related social science, or consent of instructor. Discussion of theories, methods, and current research on the nature and development of sibling, romantic, and parent-child relationships across the lifespan. Emphasis on interpersonal and family processes examined in ethnic/cultural contexts. Implications for individual development will be addressed.—S. K. Conger

**252. Family Research, Programs and Policy (4)**

Seminar—3 hours; term paper. Graduate standing in Human Development, Psychology, Sociology, related social sciences, or consent of instructor. Course examines the competing interests of research, policy, and service on current issues of family functioning and individual well being. The course considers communication barriers between researchers, practitioners, and policy makers. Offered in alternate years.—(S.) K. Conger

**290. Seminar (3)**

Seminar—3 hours. Discussion and evaluation of theories, research, and issues in human development. Different topics each quarter.—F, W, S. (F, W, S.)

**290C. Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Supervising instructors lead research discussions with their graduate students. Research papers are reviewed and project proposals are presented and evaluated. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**291. Research Issues in Human Development (4)**

Seminar—4 hours. Prerequisite: graduate standing in the Behavioral Sciences. In-depth presentations of research issues in particular areas of behavioral development.—F, W. (F, W.) R. Conger

**292. Graduate Internship (1-12)**

Internship—3-36 hours. Prerequisite: consent of faculty (internship sponsor) and satisfactory completion of placement-relevant course work, for example: Education 213, 216; course 222, 242; Law 272, 273. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit up to 12 units if justified skill acquisition and promise of informing evaluation research. (S/U grading only.)—F, W, S. (F, W, S.)

**298. Group Study (1-5)****299. Research (1-12)**

(S/U grading only.)

**Professional****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## Human Development (A Graduate Group)

Katherine J. Conger, Ph.D., Group Chairperson

**Group Office.** 1315 Hart Hall

(*Psychology*)

Kali Trzesniewski, Ph.D., Associate Specialist in Cooperative Extension (*Associate Director of Research for statewide 4-H Youth Development Program; Human Ecology*)

Anthony Urquiza, Ph.D., Psychologist (*Pediatrics*)

Karen Watson-Gegeo, Ph.D., Professor (*Education*)

*Distinguished Graduate Mentoring Award*

**Affiliated Faculty**

Kristin Alexander, Ph.D., Associate Professor (*California State University, Sacramento*)

Keith Widaman, Ph.D., Professor (*UC Riverside, Psychology*)

**Graduate Study.** The interdisciplinary and inter-departmental Graduate Group in Human Development offers a program of study leading to the Ph.D. degree. The program provides lifespan study of human behavioral development, with a balance of emphasis on biological, cognitive, and socio-emotional development in context. Recipients of the degree will be prepared to teach, to conduct research, and to be actively involved in public service in human behavioral development.

Applicants seeking admissions and fellowships consideration must submit all materials by our priority December 15 deadline. The final admissions deadline is March 1. See our website for more details.

**Graduate Adviser.** Contact the Group office.

## Human Ecology

Formerly Human and Community Development

(College of Agricultural and Environmental Sciences)

Luis E. Guarnizo, Ph.D., Community and Regional Development Program, Chairperson of the Department

Lisa Miller, Ph.D., Human Development and Family Studies Program, Vice-Chairperson of the Department

**Department Advising Office.** 1303 Hart Hall 530-752-2244, 530-752-1805; <http://hcd.ucdavis.edu>

## Faculty—Community and Regional Development

Catherine Brinkley, V.M.D, Ph.D., Assistant Professor

Ryan Galt, Ph.D., Associate Professor

Luis E. Guarnizo, Ph.D., Professor

Martin F. Kenney, Ph.D., Professor

William Lacy, Ph.D., Professor

Jonathan London, Ph.D., Associate Professor

Thomas Tomich, Ph.D., Professor

M. Anne Visser, Ph.D., Assistant Professor

## Affiliated Faculty

David Campbell, Ph.D., Specialist in Extension  
 Clare Gupta, Ph.D., Assistant Specialist in Cooperative Extension  
 Laurie Lippin, Ph.D., Continuing Lecturer  
 Bernadette Tarallo, Ph.D., Continuing Lecturer  
 Robert Wiener, Ph.D., Continuing Lecturer

## Emeriti Faculty

Stephen Brush, Ph.D., Professor Emeritus  
 Isao Fujimoto, Ph.D., Lecturer SOE Emeritus  
 James I. Grieshop, Ph.D., Specialist in Cooperative Extension Emeritus  
 Frank Hirtz, Ph.D., Sr. Lecturer SOE Emeritus  
 Michael P. Smith, Ph.D., Distinguished Professor Emeritus  
 Miriam Wells, Ph.D., Professor Emerita  
 Alvin D. Sokolow, Ph.D., Specialist in Cooperative Extension Emeritus  
 Janet Momsen, Ph.D., Professor Emerita

## Faculty—Human Development and Family Studies

Jay Belsky, Ph.D., Distinguished Professor  
 Zhe Chen, Ph.D., Professor  
 Daniel Ewon Choe, Ph.D., Assistant Professor  
 Katherine Conger, Ph.D., Professor  
 Amanda Guyer, Ph.D., Professor  
 Leah Hibell, Ph.D., Associate Professor  
 Siwei Liu, Ph.D., Assistant Professor  
 Lisa Miller, Ph.D., Professor  
 Adrienne Nishina, Ph.D., Associate Professor  
 Beth A. Ober, Ph.D., Professor

## Affiliated Faculty

Nancy Erbstein, Ph.D., Assistant Researcher  
 Jennifer Gonzales, Child Development Demonstration Lecturer, Continuing  
 Julia Luckenbill, Child Development Demonstration Lecturer, Continuing  
 Lenna Ontai Ph.D., Associate Specialist in Cooperative Extension  
 Barbara Shebloski, Continuing Lecturer  
 Martin Smith, Ph.D., Specialist in Cooperative Extension  
 Kali Trzesniewski, Ph.D., Associate Specialist in Cooperative Extension  
 Kelly Twibell, Child Development Demonstration Lecturer, Continuing Lecturer

## Emeriti Faculty

Keith Barton, Ph.D., Professor Emeritus  
 Brenda Bryant, Ph.D., Professor Emerita  
 Rand Conger, Ph.D., Professor Emeritus  
 Rosemarie Kraft, Ph.D., Lecturer SOE, Emerita  
 Lawrence V. Harper, Ph.D., Professor Emeritus  
 Richard Ponciano, Ph.D., Extension Specialist Emeritus  
 Emmy E. Werner, Ph.D., Extension Specialist Emerita

# Human Rights

(College of Letters and Science)

<http://humanrightsminor.ucdavis.edu>

The interdisciplinary minor in Human Rights gives students a chance to explore human rights as both a specific issue and within larger contexts through a wide variety of disciplines and courses.

Courses in the minor provide students with an opportunity to approach human rights as a practical, as well as an intellectual problem. The minor will be of special interest to students majoring in area studies and those planning to pursue careers in public service, law and international relations. Students will take courses in which human rights problems are the central focus of the course and other courses, which while not having human rights as their central theme, include elements that address the history, theory, practice, violation, promotion and protection of human rights, or in which students have the opportu-

nity to conduct research projects relevant to the study of human rights.

The minor is sponsored by the Religious Studies Program.

## Program Objectives

In addition to completing Religious Studies 90 or 134, students must take two additional Core Courses and two from the Elective Course list. Students must select courses from at least three different departments or programs to satisfy minor requirements.

## Minor Program Requirements:

HUMAN RIGHTS .....	UNITS
--------------------	-------

Religious Studies 90 or 134 ..... 4

Choose two core courses from the following\*: History 142A, Religious Studies 131, Sociology 104, Spanish 159† ..... 8

Choose two elective courses from the following: American Studies 156, Anthropology 123B, 126B, 130A, 131, Chicana/o Studies 131/131S, 150, English 107, History 142A, 142B, 172, 177A, 177B, 183A, 183B, 189, Native American Studies 115, 130B, 130C, 157, Religious Studies 131, 167, Sociology 104, 130, 137, 157, 160, 171, Spanish 159‡, 175§, Women's Studies 102, 140, 170, 182 .... 8

\* With prior permission of the Interdisciplinary Minor in Human Rights adviser, students may substitute one course from the list of electives as a core course.  
 † When taught as "Witnessing in Latin America: Trauma, Violence and Memory."  
 ^ Only if topic is related to human rights.  
 Prior approval from minor adviser is required."

**Advising.** Religious Studies Program office, 213 Sproul Hall 530-752-1219

## Courses in Human Rights (HMR)

### Lower Division

#### 1. Human Wrongs/Human Rights (4)

Lecture—3 hours; discussion—1 hour. Introduction to Human Rights and the problems they seek to address. Using key episodes of inhumanity like slavery, genocide, and racism. Examines how international movements for social justice led to the emergence of the international Human Rights system. GE credit: ArtHum or SocSci | AH or SS, WC, WE.—F. (F.) Watenpaugh

### Upper Division

#### 120A. Art, Architecture, and Human Rights (4)

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Study of human rights as they relate to art, architecture, and cultural heritage. Examines museums, art collections, and cultural-heritage management, their relation to the cultural prerogatives of communities and indigenous groups, and protection of cultural heritage during war and conflict. (Same course as Art History 120A.) Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, DD, WL, WC.—(W.) Watenpaugh

#### 130. Special Topics in Human Rights (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 134 or Religious Studies 134 recommended. Thematic study of human rights. Topics may include contemporary or historical issues in the promotion, protection, and violation of human rights; human rights and the arts, religion, literature are possible topical areas. No credit for students who have completed Religious Studies 90. (Same course as Religious Studies 134) May be repeated for credit when topic differs. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WC, WE.—S. Watenpaugh

## 131. Genocide (4)

Lecture/discussion—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing. Comparative and critical study of the modern phenomenon of genocide from religious, ethical and historical perspectives. (Same course as Religious Studies 131.) GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VL, WC, WE.—W. (W.) Watenpaugh

## 134. Human Rights (4)

Lecture/discussion—3 hours; term paper or discussion—1 hour. Introduction to the interdisciplinary study of the origins, evolution, denial and protection of Human Rights. No credit for students who have completed Religious Studies 90. (Same course as Religious Studies 134.) GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—F. (F.) Watenpaugh

## 136. Human Rights in the Middle East (4)

Lecture/discussion—3 hours; term paper. Study of the experience of Human Rights in the modern Middle East, with special attention to the Human Rights issues raised by events of Arab Spring; Palestine-Israel conflict; history of genocide, mass killing and totalitarianism in the region. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.—S. (S.) Watenpaugh

## 138. Human Rights, Gender, and Sexuality (4)

Lecture/discussion—3 hours; term paper. Gender and sexuality in the context of human rights. Topics include women's participation in the public sphere, the right to change gender, the right for family privacy, and the right to marriage. (Same course as Religious Studies 138.) Offered in alternate years. GE credit: ArtHum | AH, WC, WE.—F, W, S, Su. (F, W, S, Su.) O'Keefe

## 161. Human Rights in Latin America (4)

Lecture—3 hours; term paper. History of the origins, denial and protection of Human Rights in Latin America. Emphasis on dictatorships, political violence, social resistance, democracy, justice, accountability, truth commissions, memory. (Same course as History 161.) Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, VL, WC, WE.—S. Schlotterbeck

## 198. Directed Group Study (1-4)

Prerequisite: consent of instructor. Group study on focused topics in human rights. May be repeated for credit. (P/NP grading only.)

## 199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. Opportunity for advanced undergraduate students to work with a faculty member in a focused manner on a topic or topics of human rights. May be repeated for credit. (P/NP grading only.)

### Graduate

#### 200A. History, Theory and Criticism of Human Rights (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Restricted to graduate students. Introduces the advanced study of Human Rights and the theoretical and practical elaboration of the international Human Rights system. Seminar will engage with criticism of Human Rights and develop research and teaching within disciplinary and interdisciplinary frameworks. (Same course as Study of Religion 231E.) Offered in alternate years.—W. Watenpaugh

#### 200B. Memory, Culture, and Human Rights (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Restricted to graduate students. Explores the multiple convergences among memory, culture, and human rights. Discusses diverse approaches to how societal actors in different historical, cultural, and national settings, construct meanings of past political violence, inter-group conflicts, and human rights struggles. (Same course as Cultural Studies 210.) Offered in alternate years.—F. Lazzara

**298. Group Study (1-4)**

Prerequisite: consent of instructor. Restricted to graduate students. Group study on focused topics in human rights. Four-unit courses may serve as electives for the Designated Emphasis in Human Rights. May be repeated up to 16 units for credit when topic differs. Offered irregularly. (S/U grading only.) –F, W, S. (F, W, S.)

**299. Individual Study (1-12)**

Prerequisite: consent of instructor. Restricted to graduate students. Individual study for the designated emphasis in human rights. (S/U grading only.) May be repeated for credit.

## Humanities

(College of Letters and Science)

Eric L. Russell, Ph.D. (*French and Italian*)

**Program Office.** 213 Sproul  
530-752-1219; <http://humanities.ucdavis.edu>

**Committee in Charge**

Seeta Chaganti, Ph.D. (*English*)  
Liza Grandia, Ph.D. (*Native American Studies*)  
Noah Gwynn, Ph.D. (*French and Italian*)  
John Slater, Ph.D. (*Spanish and Portuguese*)

**The Program of Study**

The Humanities program is an undergraduate and graduate curriculum emphasizing innovative approaches to ideas that matter. Courses offered through the program are interdisciplinary in scope and aim to develop critical thinking and writing skills in three principal areas: major figures, works, and genres in world cultures; major themes in world literatures; and relationships between history, society, and culture.

**Courses in Humanities (HUM)****Lower Division****1. Humanities Forum (2)**

Lecture—2 hours. Reading and discussion of a single work representative of a particular culture, historical period, or genre and significant for its ongoing cultural impact in the humanities, sciences, social sciences, technology, and popular arenas. Attention to provocative implications for contemporary society. May be repeated one time for credit if topic differs. GE credit: ArtHum | AH.

**1D. Issues and Concepts in the Humanities (2)**

Discussion—2 hours. Prerequisite: course 1 concurrently. Small group discussions and preparation of short papers for course 1. May be repeated one time for credit if topic differs. GE credit: ArtHum, Wrt | AH, WE.

**2A. Global Humanities Forum (4)**

Lecture—3 hours; extensive writing. Introduction to humanities topics and methodologies; analysis of major figures, works, and genres in world arts and literatures, with emphasis on relationships between history, society, and culture. May be repeated one time for credit if topic differs. GE credit: ArtHum | AH, WC, WE.

**2B. American Humanities Forum (4)**

Lecture—3 hours; extensive writing. Introduction to humanities topics and methodologies; analysis of major figures, works, and genres in American arts and literatures, with emphasis on relationships between history, society, and culture. May be repeated one time for credit if topic differs. GE credit: ArtHum | ACGH, AH, WE.

**3. Medicine and Humanities (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: completion of Subject A requirement. Evolution of the “medical arts” into the “science of medicine.” The culture of medicine in the context of society, medical ethics. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.

**4. Animals and Human Culture (2)**

Lecture—2 hours. The meaning of human relations with animals studied across a variety of historical periods and culture and from a variety of humanistic perspectives. GE credit: ArtHum, Wrt | AH.

**4D. Animals and Human Culture Discussion (2)**

Discussion—2 hours. Prerequisite: concurrent enrollment in course 4. Small group discussions and preparation of short papers for course 4. GE credit: ArtHum, Wrt | AH, WE. –F.

**7. Travel and Travel Literature (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: Subject A requirement. History of travel from the age of exploration to the modern era. Contemporary trends in travel, including mass tourism, adventure travel, and ecotourism. Social, economic, and cultural issues related to modern trends in travel. Analysis of literary representations of travel. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

**8. Introduction to Perspectives on Narrative (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: satisfaction of Subject A requirement. Interdisciplinary approach to the use of story across time, culture, and discipline. How the telling and retelling of particular stories reflect the values, concerns, and assumptions of their original audiences and genres. GE credit: ArtHum or SocSci, Div, Wrt | AH, WE.

**9. Don Quixote and the Modern World (2)**

Lecture—2 hours. Reading Don Quixote as emblem of modernity in the West. Issues of reality versus illusion, heroism, freedom and self-fulfillment, racial tolerance and love. Don Quixote in other cultural and popular media: film, dance, art, musical drama, and television. GE credit: ArtHum, Wrt | AH, WC.

**9D. Don Quixote and the Modern World Discussion (2)**

Discussion—2 hours. Prerequisite: course 9 concurrently. Small group discussions and preparation of short papers for course 9. GE credit: ArtHum | AH, WC, WE.

**13. Witches: Myth and Historical Reality (4)**

Lecture—3 hours; extensive writing. This course examines the historical construction of the witch. The four areas covered are: European pagan religions and the spread of Christianity; the “Burning’ Times” in early modern Europe; 17th-century New England and the Salem witch trials; and fairytales. GE credit: ArtHum, Div, Wrt | AH, WC, WE. –Krimmer

**15. Language and Identity (4)**

Lecture/discussion—3 hours; extensive writing. Introduction to topics related to the construction of identity through language use, including geographical and social factors affecting language groups. Language ideology affecting linguistic groups, including bilinguals and non-native speakers of English. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WE.

**60. Narrative and Argumentative Approaches to Major Current Issues in the Media, Culture, and Society (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: English A or the equivalent. Interdisciplinary approach to contemporary issues (abortion, AIDS, civil rights, war and peace, welfare state) around which individuals, communities and institutions define themselves in American society, by applying principles of narrative theory to the narratives where those issues are embedded. GE credit: ArtHum or SocSci, Div, Wrt | AH, WE.

**92. Internship (1-12)**

Internship—3-36 hours. Internships in fields where students can practice their skills. May be repeated for credit. (P/NP grading only.)

**Upper Division****144. Marx, Nietzsche, Freud (4)**

Lecture/discussion—3 hours; term paper. Study of major texts of Marx, Nietzsche, and Freud, selected with an eye to their impact on 20th-century economics, ethics, and attitudes toward eros. Particular

focus on conceptions of the self and the individual's relation to society. (Same course as German 144.) GE credit: ArtHum, Wrt | AH, WC.

**180. Topics in the Humanities (4)**

Lecture/discussion—3 hours; term paper. Analysis of interdisciplinary issues in the Humanities. Topics will vary. May be repeated one time for credit. GE credit: ArtHum, Wrt | AH, WE.

**192. Internship (1-12)**

Internship—3-36 hours. Internships in fields where students can practice their skills. May be repeated for credit. (P/NP grading only.)

**198. Directed Group Study (1-4)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-4)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate****250. Topics in the Humanities (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics in the humanities, selected by the instructor. May be repeated one time for credit.

**292. Graduate Internship (1-15)**

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: consent of instructor required. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit up to 15 units. (S/U grading only.)

**298. Directed Group Study (1-5)**

(S/U grading only.)

**299. Individual Research (1-4)**

Individual research in the humanities resulting in a formal written research report. (S/U grading only.)

**Professional****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing; consent of instructor. May be repeated for credit. (S/U grading only.)

## Hydrologic Sciences (A Graduate Group)

Gregory Pasternack, Ph.D., Chairperson of the Group

**Group Office.** 1152 Plant and Environmental Sciences Building 530-752-1669;  
<http://hsgg.ucdavis.edu>

**Faculty**

Fabian Bombardelli, Ph.D., Assistant Professor (*Civil and Environmental Engineering*)

William Casey, Ph.D., Professor (*Chemistry*)

Randy Dahlgren, Ph.D., Professor

Academic Senate Distinguished Teaching Award

Helen Dahlke, Ph.D., Assistant Professor

Graham Fogg, Ph.D., Professor

Timothy Ginn, Ph.D., Professor

(*Civil and Environmental Engineering*)

Mark Grismer, Ph.D., Professor

Peter Hernes, Ph.D., Associate Professor

Jan Hopmans, Ph.D., Professor

William Horwath, Ph.D., Professor

John Largier, Ph.D., Professor (*Bodega Marine Laboratory*)

Mark Lubell, Ph.D., Professor (*Environmental Science and Policy*)

Jay Lund, Ph.D., Professor (*Civil and Environmental Engineering*)

Douglas Mackay, Ph.D., Adjunct Professor

Gregory Pasternack, Ph.D., Professor

Kyaw Tha Paw U, Ph.D., Professor

Carlos Puente, Ph.D., Professor

Samuel Sandoval Solis, Assistant Professor, Cooperative Extension Specialist

S. Geoffrey Schladow, Ph.D., Professor (*Civil and Environmental Engineering*)  
 Kate Scow, Ph.D., Professor  
 Wendy K. Silk, Ph.D., Professor  
 Susan Ustin, Ph.D., Professor  
 Wesley Wallender, Ph.D., Professor  
 Tom Young, Professor (*Civil and Environmental Engineering*)  
 Minghua Zhang, Ph.D., Adjunct Professor  
 Robert Zierenberg, Ph.D., Professor (*Geology*)

### Emeriti Faculty

Charles Goldman, Professor Emeritus  
 Theodore Hsiao, Ph.D., Professor Emeritus  
 Jeffrey Mount, Ph.D., Professor Emeritus (*Geology*)  
 Miguel Marino, Ph.D., Distinguished Professor Emeritus  
 Paul Sabatier, Ph.D., Professor Emeritus (*Environmental Science and Policy*)  
 Bryan Wearn, Ph.D., Professor Emeritus

### Affiliated Faculty

Roger Bales, Ph.D., Professor (*UC Merced School of Engineering*)  
 Philip Duffy, Ph.D., Adjunct Associate Professor (*School of Natural Resources, U.C. Merced*)  
 Stephen Graffan, Ph.D., Water Relations Specialist  
 Thomas Harter, Ph.D., Cooperative Extension Specialist  
 Pramod Pandey, Ph.D., Cooperative Extension Specialist (*Population Health and Reproduction*)  
 Richard Snyder, Ph.D., Biometeorologist Specialist  
 Kenneth Tate, Specialist in Cooperative Extension (*Plant Sciences*)  
 Josh Viers, Associate Professor (*UC Merced*)  
 Daniela Zaccaria, Ph.D., Cooperative Extension Specialist

**Graduate Study.** The Graduate Group in Hydrologic Sciences is an interdisciplinary program offering M.S. and Ph.D. degrees. Course work is available from many programs, including Hydrologic Sciences, Civil and Environmental Engineering, Geology, and Soil Science. Education in the group broadens the skills and knowledge of the physical science or engineering student interested in the occurrence, distribution, circulation and properties of water on earth. Because of water's ubiquity and importance to physical, chemical and biological processes, hydrologic sciences involve the geologic, atmospheric and oceanic sciences, as well as engineering and other applied physical sciences. Basic to the program are core courses in fluid dynamics, hydrologic phenomena, hydrobiology, hydrogeochemistry, hydrologic techniques, and hydrologic policy. Students can pursue specializations in hydrogeochemistry, surface hydrology, subsurface hydrology, irrigation and drainage, watershed hydrology and water resources management. The subsurface hydrology specialization includes hydrogeology and vadose-zone hydrology.

**Preparation.** Applicants to the program are expected to have completed or to be completing an undergraduate degree in environmental or physical sciences, mathematics, or engineering. Undergraduate study must include one year each of calculus, of physics with calculus, and of chemistry. A second year of vector calculus, linear algebra and differential equations is recommended and will be required, before completion of graduate work. Additional courses in applied statistics, computer programming, and geology are recommended.

**Specialization.** Each student will pursue an individual program of advanced study under the direction of a group of faculty members with similar interests but diverse backgrounds. Course work in addition to the above is typically taken in the most appropriate departments.

**Graduate Adviser.** Peter Hernes, Ph.D., and Carlos Puente, Ph.D.

**Graduate Admissions Adviser.** Mark E. Grismer, Ph.D.

## Courses in Hydrologic Sciences (HYD)

### Graduate

#### 200. Survey of Hydrologic Sciences (1)

Seminar—1 hour; term paper. Prerequisite: open to students in the Hydrologic Sciences program. Seminar course exposes students to the diversity of sciences involved in the program. Students prepare a paper and presentation in their area of research interest. May be repeated two times for credit. (S/U grading only.)—F. (F.) Grismer

#### 205. Continuum Mechanics of Natural Systems (4)

Lecture/discussion—4 hours. Prerequisite: Mathematics 21D and 22B, Physics 9B. Continuum mechanics of static and dynamic air, water, earth and biological systems using hydraulic, heat and electrical conductivity; diffusivity; dispersion; strain; stress; deformation gradient; velocity gradient; stretch and spin tensors. (Same course as Biological Systems Engineering 205.)

#### 210. Vadose Modeling and Characterization (3)

Lecture—1.5 hours; laboratory—3 hours; discussion—0.5 hours. Prerequisite: Soil Science 107, or consent of instructor. Principles and modeling of water flow and chemical transport in the vadose zone, with specific applications to soils. Topics include hydraulic properties, finite difference application to unsaturated water flow, parameter optimization, diffusive and convective transport in gaseous and liquid phases. Offered in alternate years.—S. Hopmans

#### 243. Water Resource Planning and Management (3)

Lecture—3 hours. Prerequisite: course 141 or Civil and Environmental Engineering 142. Applications of deterministic and stochastic mathematical programming techniques to water resource planning, analysis, design and management. Water allocation, capacity expansion, and reservoir operation. Conjunctive use of surface water and groundwater. Water quality management. Irrigation planning and operation models. (Same course as Biological Systems Engineering 243.)

#### 245. Climate Change, Water and Society (4)

Lecture—4 hours. Class size limited to 25 students. Integration of climate science and hydrology with policy to understand hydroclimatology and its impact upon natural and human systems. Assignments: readings, take-home examination on climate and hydrologic science, paper that integrates course concepts into a research prospectus or review article. (Same course as Atmospheric Science 245 and Ecology 245.)—F. (F.) Fogg, Lubell, Ullrich

#### 252. Hillslope Geomorphology and Sediment Budgets (4)

Lecture—3 hours; fieldwork—3 hours. Prerequisite: course 141 or Geology 35 or Civil and Environmental Engineering 142 or consent of instructor. Exploration of theoretical and empirical foundations of sediment production on hillslopes using computer models and field experiments to promote an understanding of how watersheds evolve naturally and with human impacts. Offered irregularly.—S. (S.) Pasternack

#### 254Y. Ecohydraulics (3)

Web virtual lecture—1 hour; discussion—1 hour; extensive problem solving. Use of 2D hydrodynamic modeling to perform instream flow assessment by exploring flow-dependent hydraulic patterns at multiple spatial scales and extrapolating results with empirical and analytical functions to evaluate geomorphic resilience and ecological functions. Offered in alternate years.—F. Pasternack

#### 256. Geomorphology of Estuaries and Deltas (4)

Lecture—3 hours; fieldwork—3 hours. Prerequisite: course 141 or Geology 35 or Civil and Environmental Engineering 42 or consent of instructor. Survey of the processes and landforms associated with sedi-

ment deposition in the coastal zone. Application of geomorphic principles to coastal management issues. Offered irregularly.—S. (S.) Pasternack

#### 264. Modeling of Hydrologic Processes (3)

Lecture—3 hours. Prerequisite: course 141 or the equivalent and Statistics 102 or the equivalent. Techniques used to model the spatio-temporal structure of rainfall and runoff are introduced. Procedures studied include those based on stochastic point processes, chaos theory, fractal geometry, and fractional noises. Offered in alternate years.—(S.) Puente

#### 269. Numerical Modeling of Groundwater Systems (3)

Lecture—3 hours. Prerequisite: course 145A or Civil Engineering 144 and course 145B, Mathematics 22B. Finite difference and finite element techniques in modeling groundwater flow and transport. Fundamentals of constructing and calibrating models with hands-on applications. Methods and limitations of numerical solution of transport equations. Model interpretation and ethics. Offered in alternate years.—(S.) Fogg

#### 273. Introduction to Geostatistics (3)

Lecture—3 hours. Prerequisite: Statistics 130A and 130B, or the equivalent. Statistical treatment of spatial data with emphasis on hydrologic problems. Topics include theory of random functions, variogram analysis, Kriging, co-Kriging, indicator geostatistics, and stochastic simulation of spatial variability. Demonstration and use of interactive geostatistical software included. Offered in alternate years.—F. Fogg

#### 274. Practice of Groundwater Flow and Transport Modeling (3)

Lecture—2 hours; lecture/laboratory—0.5 hours; lecture/discussion—0.5 hours. Prerequisite: course 269, Civil and Environmental Engineering 272B, or Civil and Environmental Engineering 272C. Selecting and building groundwater flow and transport models. Planning, preparation, execution, presentation, and review of modeling projects. Review of methods, assumptions, and limitations of groundwater models; practicing with MODFLOW, MT3D, associated GUI, and with other groundwater modeling software of choice. Offered in alternate years.—(S.) Harter

#### 275. Analysis of Spatial Processes (3)

Lecture—3 hours. Prerequisite: Statistics 102 or the equivalent; course 273 or Statistics 273A recommended. Characterization of homogeneous random fields; extremes and spectral parameters; geometry of excursions, local averaging; scale of fluctuation; non-Gaussian and irregular random fields; geostatistical applications.

#### 286. Selected Topics in Environmental Remote Sensing (3)

Discussion—2 hours; lecture—1 hour; project. Prerequisite: consent of instructor; Environmental and Resource Sciences 186 or equivalent required; Environmental and Resource Sciences 186L recommended. In depth investigation of advanced topics in remote sensing applications, measurements, and theory. (Same course as Geography 286) May be repeated for credit. Offered irregularly.—S. (S.) Ustin

#### 290. Seminar in Hydrologic Science (1)

Seminar—1 hour. Prerequisite: graduate standing and background in Hydrologic Science, consent of instructor. Seminars and critical review of problems, issues, and research in hydrologic sciences. Oral presentations of research. Topics will vary. May be repeated for credit. (S/U grading only.)—S. (S.)

#### 298. Group Study (1-5)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

#### 299. Research (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

**Professional****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**Professional****410. OSHA HAZWOPER Refresher Course (1)**

Lecture—1 hour. Updates hazardous materials handling information for purposes of keeping certification current. Certification lapses until the refresher course is complete. (P/NP grading only.)

**440. Hazardous Waste Operations Training (3)**

Lecture—2 hours; laboratory—2 hours. Prerequisite: upper division standing in College of Agricultural and Environmental Sciences. Forty-hour course designed to meet the requirements of Federal OSHA regulation CFR 1910.120. Covers the health, regulatory, processing and safe handling issues/problems associated with working with hazardous materials. (P/NP grading only.)

## Hydrology

(College of Agricultural and Environmental Sciences)

**Faculty.** See under Department of [Land, Air and Water Resources](#), on page 391, Hydrology Section.

**The Major Program**

Hydrology is the study of the occurrence, distribution, circulation, and behavior of water and water-borne materials in the environment of Earth. It includes practical measurement and technical analysis of water phenomena underground, on the Earth's surface, and in the atmosphere. Contemporary hydrologic problems costing society \$10-100 billion per year include environmental restoration, sustainability of groundwater and surface water resources, water pollution, and natural disasters such as floods, droughts, landslides, avalanches, and land subsidence. The management of these problems demands hydrologic scientists with the comprehensive, interdisciplinary education embodied in this program. Beyond its societal utility, hydrology can be an exciting science for the curious-minded. Hydrologists explore natural phenomena such as climate change, waterfalls, health of coral reefs, biogeochemical cycles, and aquifers.

**The Program.** A hydrologist needs a strong background across the basic sciences of physics, mathematics, chemistry, and biology. Breadth of understanding comes from exposure to ecology, geology, engineering, policy, and law. Depth of experience is provided by core hydrology courses, internship opportunities, and practical outdoor training. Students choose electives to match their interests and career goals. Transfer students should have completed as much as possible of the preparatory subject matter listed below.

**Internships and Career Alternatives.** Job opportunities in hydrology exceed the available supply of trained hydrologists. Students commonly obtain internships and jobs with state and federal agencies, private consulting firms, environmental interest groups, irrigation districts, and utility companies. Federal agencies hiring hydrologists include the U.S. Geological Survey, U.S. Department of Agriculture (Fish and Wildlife, Agricultural Research, Forest Service, and National Resource Conservation Service), Environmental Protection Agency, and national research laboratories (Lawrence Livermore National Laboratory, Oak Ridge National Laboratory). State and local agency employers include California's Departments of Water Resources, Conservation, Fish and Game, and Toxic Substances as well as the Water Resources Control Board and Regional Water Quality Control Boards. To obtain higher levels of responsibility and salary, hydrologists often seek advanced degrees, and the hydro-

logy major is designed to provide students with a highly competitive education to get into graduate school.

**B.S. Major Requirements:**

UNITS

**Preparatory Subject Matter.....71**

Biological Sciences 2A, 2B.....	10
Chemistry 2A, 2B, 2C .....	15
Physics 9A, 9B, 9C .....	15
Mathematics 21A, 21B, 21C, 21D, 22A, 22B.....	22
Geology 50, 50L .....	5
Engineering 6 or the equivalent.....	4

**Depth Subject Matter .....46-55**

Hydrologic Science 103N or Engineering 103 or equivalent .....	4
Civil and Environmental Engineering 114 or Statistics 130A and 130B .....	4-6
Hydrologic Science 134, 141, 142, 144, 151 .....	21
Soil Science 107 .....	5
Select one of Hydrologic Science 150, Agricultural and Resource Economics 147, Environmental Science and Policy 161, 166N .....	3-4
Select three of Hydrologic Science 110, 124, 143, 146; Civil and Environmental Engineering 141; Applied Biological Systems Technology 165 .....	9-13

**Restricted Electives.....16-26**

To supplement or expand areas of student interest selected with approval of adviser

**Total Units for the Major .....129-148**

**Major Adviser.** Helen Dahlke ([Land, Air and Water Resources](#))

**Advising Center.** 1150 PES Building Staff Adviser  
Lacole Brooks [lbrouks@ucdavis.edu](mailto:lbrouks@ucdavis.edu)

**Minor Program Requirements:****Hydrology**

The Hydrology Section of the Department of Land, Air and Water Resources offers the minor in Hydrology for environmental or natural science students who have an interest in water/environmental issues. The interested student should have completed preparatory course work in calculus (Mathematics 16B), chemistry (Chemistry 2A; Chemistry 2B recommended), physics (Physics 7A), and biology (Biological Sciences 2A). Course work in the minor provides fundamental skills and knowledge of the hydrologic sciences. The program is sufficiently flexible for students to pursue particular water issues or problems of interest to them.

UNITS

**Hydrology.....20-23**

Hydrologic Science 103N or Engineering 103 .....	4
Hydrologic Science 141 or Environmental Science and Management 100.....	4
Hydrologic Science 144 .....	4
Soil Science 107 .....	5
Hydrologic Science 134, Chemistry 100, Soil Science 111, or Environmental Science and Policy 151 .....	3-6

**Watershed Science**

The Hydrology Program of the Department of Land, Air and Water Resources offers the minor in Watershed Science. This minor is intended for environmental, natural, or social science students who have an interest in the interfaces between hydrology, ecology, policy and management. The interested student should have completed preparatory course work in calculus (Mathematics 16B), chemistry (Chemistry 2A; Chemistry 2B recommended), physics (Physics 7A), and biology (Biological Sciences 2A). Course work in the minor provides fundamental skills and knowledge on science and management of watersheds in the context of current water resources and ecological problems.

**Minor Program Requirements:**

UNITS

**Watershed Science .....21-26**

Hydrologic Science 141 or Environmental Science and Management 100 .....	4
Soil Science 100 or 118 .....	4-5
Hydrologic Science 144 or Soil Science 107 .....	4-5
Hydrologic Science 124, or Hydrologic Science 151 .....	4
Hydrologic Science 143, Environmental Science and Management 144, or Environmental Science and Policy 151 .....	3-4
Hydrologic Science 150, Environmental Science and Management 121, or Environmental Science and Policy 161 .....	3-4

**Minor Adviser.** Graham Fogg 530-752-6810;  
[gffogg@ucdavis.edu](mailto:gffogg@ucdavis.edu).

**Courses in Hydrologic Science (HYD)**

Questions pertaining to the following courses should be directed to the instructor or to the Resource Sciences Teaching Center in 113 Veihmeyer Hall or in 1150 Plant and Environmental Sciences Building 530-752-1603.

**Lower Division****10. Water, Power, Society (3)**

Lecture—2 hours; discussion—1 hour. Water resources issues. How water has been used to gain and wield socio-political power. Water resources development in California as related to current and future sustainability of water quantity and quality. Roles of science and policy in solving water problems. (Same course as Science and Society 10.) GE credit: SciEng or SocSci, Wrt | SE or SS, SL.—S. (S.) Fogg

**47. Watershed Processes and Water Quality in the Tahoe Basin (2)**

Lecture/laboratory—21 hours; fieldwork—9 hours; discussion—3 hours; term paper. Prerequisite: basic knowledge of environmental, soil, or hydrologic sciences. Watershed processes, runoff water-quality management, restoration in Lake Tahoe Basin. Soils, precipitation-runoff, revegetation and adaptive management related to erosion control, effective solutions, development of restoration strategies. Students develop field restoration. Course involves 3 days of instruction in Tahoe City. (Same course as Environmental Science and Management 47.) Not open to students who have successfully completed Environmental and Resource Sciences 47. (Formerly Environmental and Resource Sciences 47.) GE credit: SciEng | QL, SE, SL.—Su. (Su.) Grismer

**92. Hydrologic Science Internship (1-12)**

Internship—3-36 hours. Prerequisite: lower division student, consent of instructor. Work experience off and on campus in Hydrologic Science. Internship supervised by a member of the faculty. (P/NP grading only.)—F, W, S. (F, W, S.)

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Offered irregularly. (P/NP grading only.)

**Upper Division****103N. Fluid Mechanics Fundamentals (4)**

Lecture—4 hours. Prerequisite: Physics 9B. Fluid mechanics axioms, fluid statics, kinematics, velocity fields for one-dimensional incompressible flow and boundary layers, turbulent flow time averaging, potential flow, dimensional analysis, and macroscopic balances to solve a range of practical problems. (Same course as Biological Systems Engineering 103.) Offered irregularly. GE credit: SciEng | QL, SE, SL.—F. (F.)

**110. Irrigation Principles and Practices (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: Physics 7A; Soil Science 100 recommended. General course for agricultural and engineering students

dealing with soil and plant aspects of irrigation and drainage. Soil-water principles including water movement, plant responses to irrigation regimes, water use by crops; also irrigation systems and water quality. Not open for credit to students who have completed Water Science 110. Offered in alternate years. GE credit: SciEng | SE, SL.—(S.) Goldhamer, Grattan

#### **124. Plant-Water-Soil Relationships (4)**

Lecture—3 hours; discussion—1 hours. Prerequisite: one upper division course in soil science, such as Soil Science 100; and one upper division course in plant science or plant biology, such as Plant Biology 111; or consent of instructor. Principles of plant interactions with soil and atmospheric water environments and practical applications to crop management (e.g., irrigation) and plant eco-physiology (e.g., drought). Not open for credit to students who have completed Water Science 104. GE credit: SciEng | QL, SE, SL.—S. (S.) Shackle

#### **134. Aqueous Geochemistry (6)**

Lecture—4 hours; laboratory—3 hours. Prerequisite: Chemistry 2B. Chemistry of natural waters; dielectric properties of water; thermodynamic and mass-action relations; metal hydrolysis; acid-base equilibria; metalcoordination chemistry; solubility calculations; electron-exchange reactions; sorptive partitioning; ion exchange; and dissolved organic matter. GE credit: SciEng | QL, SE.—S. (S.) Hernes, Parikh

#### **141. Physical Hydrology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Physics 9B, Mathematics 21B; course 100 recommended. Introduction to the processes that constitute the hydrologic cycle. Special emphasis on a quantitative description of the following processes: precipitation, infiltration, evaporation, transpiration, surface runoff, and groundwater runoff. GE credit: SciEng | QL, SE, SL, VL.—F. (F.) Puente

#### **142. Systems Hydrology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 141 or Civil and Environmental Engineering 142. General course considering hydrologic processes from a systems or statistical model perspective. General probability concepts are applied to frequency, time series and spatial data analysis. Linear systems are also considered in conjunction with Kalman filter techniques. GE credit: SciEng | OL, QL, SE.—W. (W.) Puente

#### **143. Hydrological Processes in Ecosystems (3)**

Lecture—3 hours. Prerequisite: course 141 or Environmental and Resource Science 100. Movement and storage of water are integral parts of landscape and ecosystem functioning. Hydrological processes in individual ecosystems and the role of water linking the myriad components of the landscape. Offered in alternate years. GE credit: SciEng | QL, SE, SL.—(W.) Pasternack

#### **144. Groundwater Hydrology (4)**

Lecture—4 hours. Prerequisite: Mathematics 16B or 21A; course 103 or Engineering 103 recommended. Fundamentals of groundwater flow and contaminant hydrology. Occurrence, distribution, and movement of groundwater. Well-flow systems. Aquifer tests. Well construction operation and maintenance. Groundwater exploration and quality assessment. Agricultural threats to groundwater quality: fertilizers, pesticides, and salts. (Same course as Hydrologic Science 144.) Offered alternate years. GE credit: SciEng | QL, SE, SL, VL.—F. (F.) Harter

#### **146. Hydrogeology and Contaminant Transport (5)**

Lecture—3 hours; laboratory—2 hours; term paper. Prerequisite: course 144 or Civil and Environmental Engineering 144 or the equivalent. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic examples. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as Geology 156.) GE credit: SciEng | SE.—W. (W.) Fogg

#### **147. Runoff, Erosion and Water Quality Management in the Tahoe Basin (3)**

Lecture/laboratory—30 hours; fieldwork—15 hours; discussion—10 hours; term paper. Prerequisite: Physics 7B or 9B, Mathematics 16C or 21C, Civil and Environmental Engineering 142 or course 141 or Environmental and Resource Sciences 100. Practical hydrology and runoff water quality management from Tahoe Basin slopes. Development of hillslope and riparian restoration concepts, modeling and applications from physical science perspectives including precipitation-runoff relationships, sediment transport, and detention ponds. Five days of instruction in Tahoe City. (Same course as Biological Systems Engineering 147.) GE credit: SciEng | QL, SE, SL.—Su. (Su.) Grismer

#### **150. Water Law (3)**

Lecture—3 hours. Prerequisite: consent of instructor or upper division standing. Principles and issues of California Water Law. Types of water rights, groundwater rights and management, and protection of instream uses. Water projects, role of federal government and federal/state relations. Basic water quality acts, endangered species act, water transfers and current water issues. GE credit: SocSci | ACGH, SS.—W. (W.) Cahill

#### **151. Field Methods in Hydrology (4)**

Lecture—2 hours; laboratory—3 hours; fieldwork—3 hours. Prerequisite: Environmental and Resource Sciences 100 or course 141. Measurement methods and data analysis for evaluation of water storage, movement and contamination in the field. Equipment such as data loggers, water and sediment samplers, pressure transducers, weather stations, surveying equipment, and flow meters will be used. Offered in alternate years. GE credit: SciEng | QL, SE, SL.—W. Pasternack

#### **182. Environmental Analysis using GIS (4)**

Lecture—2 hours; laboratory—4 hours. Prerequisite: Applied Biological Systems Technology 180 or the equivalent GIS experience and skills; general biology and/or ecology courses recommended. Ecosystem and landscape modeling with emphasis on hydrology and solute transport. Spatial analysis of environmental risk analysis including ecological risk assessment, natural resource management. Spatial database structures, scripting, data models, and error analysis in GIS. Offered in alternate years. (Same course as Applied Biological Systems Technology 182.) GE credit: SciEng | QL, SE, SL, VL.—W. (W.) Hijmans

#### **192. Hydrologic Science Internship (1-12)**

Internship—3-40 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in water science. Internship supervised by a member of the faculty. (P/NP grading only.)—F, W, S. (F, W, S.)

#### **198. Directed Group Study (1-5)**

(P/NP grading only.)—F, W, S. (F, W, S.)

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: senior standing. (P/NP grading only.)—F, W, S. (F, W, S.)

## **Immunology (A Graduate Group)**

Charles Bevins, M.D., Ph.D., Chairperson of the Group

**Group Office.** 5217 Vet Med 3A;  
530-754-0103;  
<http://immunology.compmed.ucdavis.edu/>

#### **Faculty**

Iannis Adamopoulos, Ph.D., Assistant Professor (Rheumatology, Allergy and Clinical Immunology)

Paul Ashwood, Ph.D., Associate Professor (Microbiology, and Immunology)

Stephen Barthold, D.V.M, Ph.D., Professor (Center for Comparative Medicine and Pathology, Microbiology and Immunology)

Nicole Baumgarth, D.V.M., Ph.D., Professor (Center for Comparative Medicine and Pathology, Microbiology and Immunology)

Andreas Baumler, Ph.D., Professor (Microbiology, and Immunology)

Charles Bevins, M.D., Ph.D., Professor (Microbiology, and Immunology)

Christopher L. Bowlus, M.D., Associate Professor (Gastroenterology)

Kiho Cho, Ph.D., Associate Adjunct Professor (Surgery)

Sean Collins, Ph.D., Associate Professor (Microbiology and Molecular Genetics)

Lillian Cruz-Orengo, Ph.D., Assistant Professor (Anatomy, physiology & Cell Biology)

Satya Dandekar, Ph.D., Professor and Chair (Microbiology, and Immunology)

Melanie Gareau, Ph.D., Assistant Professor (Anatomy, Physiology & Cell Biology)

Laurel J. Gershwin, D.V.M., Ph.D., Professor (Pathology, Microbiology, and Immunology)

Tzipora Goldkorn, Ph.D., Professor (Pulmonary and Critical Care Medicine)

Leigh G. Griffiths, Vet.MB, MRCVS, Ph.D., Associate Professor (Veterinary Medicine and Epidemiology)

Angela Haczku, M.D., Ph.D., Professor (Pulmonary and Critical Care Medicine)

Richard W. Harper, M.D., Ph.D., Associate Professor (Pulmonary and Critical Care Medicine)

Volkmar Heinrich, Ph.D., Associate Professor (Biomedical Engineering)

Daniel Hwang, Ph.D., Adjunct Professor (Nutrition)

Kirk C. Klasing, Ph.D., Professor (Animal Science)

Kit S. Lam, M.D., Ph.D., Professor and Chief (Hematology and Oncology)

Pam Lein, Ph.D., Professor (Molecular Biosciences)

Patrick S.C. Leung, Associate Adjunct Professor (Rheumatology, Allergy and Clinical Immunology)

Jamal S. Lewis, Ph.D., Assistant Professor (Biomedical Engineering)

Shirley Luckhart, Ph.D., Professor (Microbiology, and Immunology)

Emanual Maverakis, M.D., Assistant Professor (Dermatology)

Kim McAllister, Ph.D., Professor (Neurology & Neurobiology, Physiology, and Behavior)

Stephen J. McCorley, Ph.D., Associate Professor (Center for Comparative Medicine and Anatomy Physiology and Cell Biology)

Lisa A. Miller, Ph.D., Associate Professor (Anatomy, Physiology and Cell Biology)

William J. Murphy, Ph.D., Professor (Dermatology)

Lorena Navarro, Ph.D., Assistant Professor (Microbiology and Molecular Genetics)

Robert T. O'Donnell, M.D., Ph.D., Professor (Hematology and Oncology)

John Peters, Ph.D., Associate Professor-in-Residence (Internal Medicine)

Kent E. Pinkerton, Ph.D., Professor and Director (Anatomy, Physiology and Cell Biology) Distinguished Teaching Award-Graduate/Professional

David Pleasure, M.D., Ph.D., Professor (Neurology and Pediatrics)

Katherine S. Ralston, Ph.D., Assistant Professor (Microbiology and Molecular Genetics)

Siba Raychaudhuri, M.D., Clinical Assistant Professor and Chief Rheumatologist (Sacramento VA Medical Center)

Colin Reardon, Ph.D., Assistant Professor (Anatomy, Physiology and Cell Biology)

Grace L. Rosenquist, Ph.D., Assistant Adjunct Professor (Neurobiology, Physiology, and Behavior)

Jeroen Saeij, Ph.D., Associate Professor (Pathology, Microbiology and Immunology)

Barbara Shacklett, Ph.D., Associate Professor (Microbiology, and Immunology)

Scott I. Simon, Ph.D., Professor (Biomedical Engineering)

Jay Solnick, M.D., Ph.D., Professor (Center for Comparative Medicine and Medical Microbiology and Immunology)

Ellen E. Sparger, D.V.M., Ph.D., Associate Adjunct Professor (Medicine and Epidemiology)

Athena Soulika, Ph.D., Assistant Professor  
(*Dermatology*)  
Charles B. Stephensen, Ph.D., Adjunct Professor  
(*Western Human Nutrition Research Center*)  
Jeffrey L. Stott, Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)  
Yoshikazu S. Takada, M.D., Ph.D., Professor  
(*Dermatology*)  
Suzanne S. Teuber, M.D., Professor  
(*Rheumatology, Allergy and Clinical Immunology*)  
Jose V. Torres, Ph.D., Professor  
(*Microbiology, and Immunology*)  
Renee M. Tsolis, Ph.D., Associate Professor  
(*Microbiology, and Immunology*)  
Joseph M. Tuscano, M.D., Professor  
(*Hematology and Oncology*)  
Judy Van de Water, Ph.D., Professor-in-Residence  
(*Rheumatology, Allergy and Clinical Immunology*)  
Andrew Vaughan, Ph.D., Professor  
(*Radiation Oncology*)  
Robert H. Weiss, M.D., Associate Professor  
(*Nephrology*)  
Reen Wu, Ph.D., Professor  
(*Anatomy, Physiology and Cell Biology*)  
Heike Wulff, Ph.D., Associate Professor  
(*Pharmacology*)  
Susan Zunino, Ph.D., Associate Adjunct Professor  
(*Nutrition*)  
Huaijun Zhou, Ph.D., Assistant Professor  
(*Animal Science*)

**Graduate Study.** The Graduate Group in Immunology offers an interdisciplinary program of study in an exciting field of biology and medicine leading to the M.S. and Ph.D. degrees. Participating faculty from various Schools and Departments at UC Davis provide research opportunities in diverse areas of applied immunology. Areas of focus include infection and immunity (including host response regulation to parasites, viruses and bacteria), nutrition and immunity, autoimmunity, immune regulation, neuroimmunology, cancer therapy and immune mediators and their uses for diagnosis and treatment.

**Preparation.** Applicants for candidacy to these programs should have completed undergraduate preparation in mathematics, physics, chemistry, biochemistry, molecular and cellular biology or related biological and medical sciences.

For work leading to the Ph.D. degree, the requirements include cell biology, chemical immunology, cellular immunology, immunohematology, and advanced immunology. In addition to these general requirements, more specialized preparation in at least one of the following is required: (*a*) microbiological specialties (bacteriology, virology, parasitology, medical microbiology); (*b*) zoological specialties (cell biology, endocrinology, embryology, proto-zoology, histology, cytology, physiology); (*c*) medical specialties (pathology, anatomy, pharmacology, clinical pathology, reproduction, hematology, epidemiology); (*d*) biochemistry/biophysics specialties (biologically active molecules, control mechanisms); (*e*) genetic specialties (developmental genetics, population genetics, cytogenetics, molecular genetics).

**Graduate Adviser.** See the graduate program website at <http://immunology.compmed.ucdavis.edu/people/>.

### Courses in Immunology (IMM)

Additional courses are available and listed under the individual sponsoring departments. Contact the Group office for information.

### Graduate

#### 201. Introductory Immunology (4)

Lecture—4 hours. Prerequisite: graduate standing. Enrollment limited to 30 students. Comprehensive introduction to the principles of immunology.—F. (F.) Miller

#### 201L Advanced Immunology Laboratory Rotations (4)

Laboratory/discussion—12 hours. Laboratory assignment in two research laboratories. Individual research problems with emphasis on methodologi-

cal/procedural experience and experimental design. Student writes a project outline and gives oral presentation. May be repeated two times for credit. (S/U grading only).—F. (F.) McSorley

#### 202L Advanced Immunology Laboratory Rotations (5)

Laboratory/discussion—15 hours. Laboratory assignment in two research laboratories. One four-week and one six week assignment in immunology research laboratories. Individual research problems with an emphasis on methodological/procedural experience and experimental design. May be repeated two times for credit. (S/U grading only).—W. (W.) McSorley

#### 203. Cancer Immunology (2)

Lecture—1 hour; term paper. Covers concepts in cancer biology, progression and immune evasion. It will also cover topics such as: immune surveillance, immune effector mechanisms and current concepts in immune therapy. Offered in alternate years.—S. Murphy

#### 204. Topics in Innate Immunity (2)

Extensive writing or discussion—1 hour; performance instruction—1 hour. Prerequisite: course 201 or equivalent; course 293 preferred. Restricted to first- or second-year GGI and MGG students; others with permission of instructor; enrollment limited to 18 students. Covers current topics in the field of innate immunity through student seminar presentations and critical evaluation of the literature. Concepts include: pathogen recognition, intercellular communication, specialized cellular function and effector/signaling molecules. Offered in alternate years.—Su. Bevins

#### 210. Topics on Neuroimmunology and Neuroinflammation (1)

Seminar—1 hours. Prerequisite: consent of instructor. Topics will include a broad range of frontiers in neuroimmunology and neuroinflammation. Research articles in current literature will serve to guide in-depth discussions of experimental approaches, technical aspects of experimental techniques, data interpretation, and other relevant aspects of each topic. (S/U grading only).—F. (F.) Soulaki

#### 292. Immunotoxicology Seminar (2)

Seminar—2 hours. Prerequisite: graduate standing in Pharmacology/Toxicology, Immunology, Physiology, or Biochemistry. Seminar presentations dealing with principles of xenobiotic effects on immune system functions and specific examples of drugs and environmental chemicals exerting toxic effects on the immune system. (S/U grading only.)

#### 293. Current Concepts in Immunology (4)

Lecture/discussion—4 hours. Prerequisite: Pathology, Microbiology, and Immunology 126 or consent of instructor. Innate and acquired immunity as defense mechanisms against disease. Mechanisms regulating the distinct cell types driving these responses and current concepts in the literature.—W. (W.) Baumgarth

#### 294. Comparative Clinical Immunology (4)

Lecture/discussion—4 hours. Prerequisite: Pathology, Microbiology, and Immunology 126 or consent of instructor. Clinical immunology in animals and man. Pathogenesis of representative infectious diseases, hypersensitivity reactions, and autoimmunity. Emphasis on specific and nonspecific immune effector mechanisms to combat infections or mediate pathology. Not open for credit to students who have completed course 294A. Offered in alternate years.—Gershwin

#### 295. Cytokines (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: course 293 or consent of instructor. Cytokines and their involvement in human and animal physiology/disease, molecular mechanisms and receptor signaling. Immune and non-immune actions. Overlapping/redundant functions (referred to as the "cytokine network").

#### 296. Advanced Topics in Immunology (2)

Seminar—2 hours. Prerequisite: graduate standing or consent of instructor. Presentation, discussion, and analysis of faculty research topics in immunology.

Required for Immunology Graduate Students every year until they have passed their qualifying exam. May be repeated for credit. (S/U grading only).—F. (F.) Maverakis

#### 297. Mucosal Immunology (2)

Lecture—1 hour; discussion—1 hour; term paper. Prerequisite: course 201 or equivalent. Basic concepts and current research topics in the field of mucosal immunology, with an emphasis on human immunology. Major emphases include innate and adaptive mucosal immunity, the gastrointestinal tract, the lung, lymphocyte trafficking, and mucosal vaccination. Offered in alternate years.—(W.) Shacklett

## Independent Study Program

**Information.** Chairperson, Committee on Courses of Instruction, c/o Academic Senate Office 530-752-2231

The Independent Study Program provides an opportunity for upper division students to design and pursue a full quarter (12-15 units) of individual study in an area of special interest.

A program qualifying as Independent Study will consist of one or more courses in the 190–199 series. While the theme of such a program may be reasonably broad, a recognizable common thread should unite all the academic work you undertake during an independent study quarter. Regularly offered formal courses will only be acceptable as a part of such a program if they clearly fit its theme and contribute something essential toward the realization of its objectives. The program is not to be considered a way to take more variable-unit courses than normally permitted.

The procedure for enrolling in an Independent Study Program is as follows:

- (1) Develop, in general terms, a plan of study;
- (2) Locate a faculty sponsor or panel of sponsors and with their help and approval develop a detailed plan;
- (3) Complete a project proposal form (obtained from the Academic Senate office) and submit it to the Academic Senate Committee on Courses of Instruction.

The deadline for applications is the tenth day of instruction of the term before; see the [Academic Calendar, on page 1](#), for specific dates.

You must report the completion or termination of the project to the Committee on Courses of Instruction.

## Individual Major

(College of Agricultural and Environmental Sciences, College of Biological Sciences, and College of Letters and Science)

### The Major Program

The Individual Major, an integrated program composed of courses from two or more disciplines, is designed by the student and is subject to approval by faculty advisers and appropriate college committees. This major enables a student to pursue a specific interest that cannot be accommodated within the framework of an existing major. It must clearly and specifically meet the student's educational goals as well as meet university and college academic standards.

### College of Agricultural and Environmental Sciences

The Individual Major in this College has been suspended indefinitely.

#### Program Office.

150 Mrak Hall

530-752-0108

<http://www.caes.ucdavis.edu/students/current/advising>

**Student Proposal.** An Individual Major may be organized by a student having a specific academic interest not represented by an established major. Each student wishing an Individual Major should submit a proposal to the Dean's Office, prior to reaching 120 units, for review by the Student Actions and Individual Major Subcommittee. This proposal must include (1) an essay describing the special educational aims of the student, including a statement indicating why the educational objectives cannot be met by existing majors; (2) a list of planned courses; and (3) faculty adviser recommendations. It is critical that students contact a college counselor in the Dean's Office for consultation and development of the proposal.

UNITS

**Preparatory Subject Matter.....(variable)**

Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements.

**Depth Subject Matter .....45-54**

Upper division course work must include:

- (a) Interrelated courses of 45 upper division units from two or more areas of study;
- (b) At least one of the two or more areas of study must be within the College of Agricultural and Environmental Sciences;
- (c) At least 30 of the 45 upper division units that are required in the program must be taken from courses provided by the College of Agricultural and Environmental Sciences.

**Unrestricted Electives .....(variable)****Total Units for the Major .....45-54**

**Master Adviser.** Thomas Gordon, Ph.D. (*Plant Pathology*)

**College of Biological Sciences**

**Program Office.** Biology Academic Success Center; 1023 Sciences Laboratory Building; 530-752-0410

**Student Proposal.** A student who wishes to propose an individual major must submit the proposal to the Committee on Undergraduate Student Petitions prior to reaching 120 units. It is important for the student to make arrangements to speak with an adviser in the Biology Academic Success Center early in the development of his/her major as no individual major will be approved after a student has completed 120 units.

**A.B. and B.S. Major Requirements:**

UNITS

**Preparatory Subject Matter.....(variable)**

Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements as determined by the Committee on Undergraduate Student Petitions.

**Depth Subject Matter .... 45 units minimum**

Upper division course work must include:

- (a) at least 30 units from courses offered by departments in the College of Biological Sciences;
- (b) additional requirements as determined by the Committee on Undergraduate Student Petitions. See the Biology Academic Success Center for details.
- (c) for the B.A. degree, a maximum of 80 units toward the major; for the B.S. degree, a maximum of 110 units toward the major.

**All University, General Education, and College of Biological Sciences Bachelor's degree requirements .....(variable)****Total Units for the Degree .....180****Principal Adviser (selected by student).**

A faculty member in a department or program in the College of Biological Sciences.

**College of Letters and Science**

**Program Office.** 200 Social Sciences and Humanities Building (Undergraduate Education and Advising office); <http://www.ls.ucdavis.edu/students>

**Committee in Charge**

John Teming, Ph.D., Chairperson (*Physics*)

Adewale Adebanwi, Ph.D.

(*African American and African Studies*)

Prabir Burman, Ph.D. (*Statistics*)

Diana Davis, Ph.D. (*History*)

Sara Perrault, Ph.D. (*University Writing Program*)

**Student Proposal.** A student who wishes to propose an individual major must submit the proposal to the Faculty Committee on Individual Majors in the College of Letters and Science prior to reaching 120 units. The proposal must be submitted by the end of the fourth week of the quarter. This proposal will consist of (1) an essay, identifying the specific educational and professional objectives, including an indication of why the objectives cannot be met within existing majors, (2) a list of courses planned to complete the major, and (3) faculty adviser recommendations. The proposal will be reviewed and a decision provided the quarter of submittal. It is important that you carefully review the information in the Individual Majors Handbook; available at <http://ls.ucdavis.edu/advising/academic-pdfs/individual-major-handbook.pdf>.

**A.B. and B.S. Major Requirements:**

UNITS

**Preparatory Subject Matter.....(variable)**

Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements.

**Depth Subject Matter .....45-54**

Upper division units must include:

- (a) interrelated and complementary courses from two or more departments which provide a unified pattern and focus;
- (b) at least 30 units from Letters and Science teaching departments or programs;
- (c) no more than 10 units in courses numbered 194H, 198 and 199;
- (d) for the A.B. degree, a maximum of 80 units toward the major; for the B.S. degree, a maximum of 110 units toward the major.

**Total Units for Degree .....180**

**Major Advisers (selected by student).** Principal Adviser: a faculty member in a teaching department or program in the College of Letters and Science in the major field of emphasis. Secondary Adviser: a faculty member from a secondary area of interest.

**Honors Program.** By the fourth week of the last quarter of the junior year, students potentially eligible for high or highest honors at graduation (see College section), may petition the Individual Majors Committee for tentative acceptance into an honors program.

Final admission will depend upon the Committee's approval of a senior thesis prospectus that has been agreed upon by the student and faculty adviser. The prospectus must be presented to the Committee by the end of the fourth full week of instruction of the first quarter of the senior year. Graduation with high or highest honors will be conditional upon both the maintenance of the required grade point average and the satisfactory completion of the senior thesis project. Students who anticipate doing a senior honors thesis should allow up to three units of independent study in the program during each of two quarters in the senior year as course options.

**Integrative Genetics and Genomics (A Graduate Group)**

Formerly Genetics

**Faculty**

Sharon Aviran, Ph.D., Assistant Professor (*Biomedical Engineering*)

Danika Bannasch, Ph.D., Professor

(*VM: Population Health and Reproduction*)

Jacqueline Barlow, Ph.D., Professor

(*Microbiology and Molecular Genetics*)

Diane Beckles, Ph.D., Associate Professor (*Plant Sciences*)

David Begun, Ph.D., Professor

(*Evolution and Ecology*)

Rebecca Bellone, Ph.D., Associate Adjunct Professor

(*VM: Population Health and Reproduction*)

Craig Benham, Ph.D., Professor

(*Biomedical Engineering*)

Alan B. Bennett, Ph.D., Professor (*Plant Sciences*)

Linda F. Bisson, Ph.D., Professor

(*Viticulture and Enology*)

Simeon Boyd, Ph.D., Associate Professor (*Pediatrics Medicine*)

Siobhan M. Brady, Ph.D., Associate Professor (*Plant Biology*)

Anne B. Britt, Ph.D., Professor (*Plant Biology*)

Nadene Brown, Ph.D., Associate Professor (*Cell Biology and Human Anatomy*)

Sean Burgess, Ph.D., Professor

(*Molecular and Cellular Biology*)

Judy Callis, Ph.D., Professor

(*Molecular and Cellular Biology*) Academic Senate Distinguished Teaching Award

Dario Cantu, Ph.D., Assistant Professor

(*Viticulture and Enology*)

Luis G Carvajal-Carmona, Ph.D., Assistant Professor (*Biochemistry and Molecular Medicine*)

Frederic Chedin, Ph.D., Professor

(*Molecular and Cellular Biology*)

Hongwu Chen, Ph.D., Professor

(*Biochemistry and Molecular Medicine*)

Roger Chetelat, Ph.D., Agronomist

(*Plant Sciences*)

Joanna Chiu, Ph.D., Assistant Professor (*Entomology*)

Luca Comai, Ph.D., Professor (*Plant Biology*)

Douglas Cook, Ph.D., Professor (*Plant Pathology*)

Gino A. Cortopassi, Ph.D., Professor

(*Molecular Biosciences*)

Michael E. Dahmus, Ph.D., Professor Emeritus (*Molecular and Cellular Biology*)

Abhay Dandekar, Ph.D., Professor (*Plant Sciences*)

Saty Dandekar, Ph.D., Professor

(*Microbiology—Medicine*)

Mary Delany, Ph.D., Professor (*Animal Science*)

Megan Dennis, Ph.D., Assistant Professor

(*Biochemistry and Molecular Medicine*)

Bruce Draper, Ph.D., Associate Professor

(*Molecular and Cellular Biology*)

Jorge Dubcovsky, Ph.D., Professor (*Plant Sciences*)

Jan Dvorak, Ph.D., Professor (*Plant Sciences*)

Jonathan Eisen, Ph.D., Professor (*Evolution and Ecology, Medical Microbiology and Immunology*)

JoAnne Engenbrecht, Ph.D., Professor

(*Molecular and Cellular Biology*)

Thomas R. Famula, Ph.D., Professor

(*Animal Science*)

Nann A. Fangue Ph.D., Assistant Professor

(*Wildlife, Fish and Conservation Biology*)

Carrie Finno, Ph.D., Assistant Professor

Charles S. Gasser, Ph.D., Professor

(*Molecular and Cellular Biology*)

Paul Gepts, Ph.D., Professor (*Plant Sciences*)

Paramita Ghosh, Ph.D., Associate Professor  
(*Urology-Medicine, Biochemistry and Molecular Medicine*)  
Robert L. Gilbertson, Ph.D., Professor  
(*Plant Pathology*)  
David G. Gilchrist, Ph.D., Professor Emeritus  
(*Plant Pathology*)  
Cecilia Giulivi, Ph.D., Professor  
(*VM: Molecular Biosciences*)  
Thomas Glaser, Ph.D., Professor  
(*Cell Biology and Human Anatomy*)  
Thomas Gradiel, Ph.D., Professor (*Plant Sciences*)  
Paul J. Hagerman, Ph.D., Professor  
(*Biochemistry and Molecular Medicine*)  
Nobuko Hagiwara, Ph.D., Associate Professor  
(*Cardiology—Internal Medicine*)  
John H. Harada, Ph.D., Professor (*Plant Biology*)  
Academic Senate Distinguished Teaching Award  
Stacey Harmer, Ph.D., Professor  
(*Plant Biology*)  
Dennis Hartigan-O'Connor, Ph.D., Assistant Professor  
Wolf-Dietrich Heyer, Ph.D., Professor  
(*Microbiology and Molecular Genetics*)  
James Hildreth, Ph.D., Dean  
(*Molecular and Cellular Biology*)  
Fereydoun Hormozdiari, Ph.D., Professor  
(*Biochemistry and Molecular Medicine*)  
Russell Hovey, Ph.D., Professor  
(*Animal Science*)  
Liping Huang, Ph.D., Adjunct Associate Professor  
(*Nutrition*)  
Neil Hunter, Ph.D., Professor (*Microbiology*)  
Li-En Jao, Ph.D., Assistant Professor  
(*Cell Biology and Human Anatomy*)  
Brian Johnson, Ph.D., Assistant Professor  
(*Entomology*)  
Celina Juliano, Ph.D., Assistant Professor  
(*Molecular and Cellular Biology*)  
Sree Kanthaswamy, Ph.D., Professor  
(*Environmental Toxicology*)  
Daniel Kliebenstein, Ph.D., Professor  
(*Population Biology, Plant Sciences*)  
Paul Knoepfle, Ph.D., Associate Professor  
(*Cell Biology and Human Anatomy*)  
Artyom Kopp, Ph.D., Professor  
(*Population Biology, Evolution and Ecology*)  
Ian Korf, Ph.D., Professor  
(*Molecular and Cellular Biology*)  
Stephen C. Kowalczykowski, Ph.D., Distinguished Professor (*Microbiology and Molecular Genetics*)  
Dietmar Kuehlz, Ph.D., Professor (*Animal Science*)  
Michelle La Merrill, Ph.D., Assistant Professor  
(*Environmental Toxicology*)  
Kit Lam, Ph.D., Professor  
(*Hematology and Oncology*)  
Charles Langley, Ph.D., Professor  
(*Population Biology, Evolution and Ecology*)  
Janine LaSalle, Ph.D., Professor  
(*Microbiology—Medicine*)  
F. Thomas Leditz, Ph.D., Affiliate (*Plant Sciences*)  
Su-Ju Lin, Ph.D., Professor  
(*Microbiology and Molecular Genetics*)  
Susan Loft, Ph.D., Assistant Professor  
(*Population Biology, Evolution and Ecology*)  
William Lucas, Ph.D., Distinguished Professor  
(*Plant Biology*)  
Shirley Luckhart, Ph.D., Professor  
(*Microbiology—Medicine*)  
Philip Mack, Ph.D., Associate Adjunct Professor  
(*Hematology and Oncology*)  
Julin Maloof, Ph.D., Professor  
(*Plant Biology*)  
Juan F. Medrano, Ph.D., Professor (*Animal Science*)  
Frederick J. Meyers, Ph.D., Professor  
(*Hematology and Oncology*)  
Richard Michalemore, Ph.D., Professor (*Molecular and Cellular Biology, Plant Sciences*)  
Michael Mienaltowski, Ph.D., Assistant Professor  
(*Animal Science*)  
Michael Miller, Ph.D., Assistant Professor  
(*Animal Science*)  
Maria Mudryj, Ph.D., Professor  
(*Microbiology and Immunology*)  
James D. Murray, Ph.D., Professor (*Animal Science*)

Jeanette E. Natzke, Ph.D., Professor  
(*Molecular and Cellular Biology*)  
David Neale, Ph.D., Professor  
(*Population Biology, Plant Sciences*)  
Jan Nolta, Ph.D., Professor  
(*Hematology and Oncology*)  
Alex Nord, Ph.D., Assistant Professor  
(*Neurobiology, Physiology, and Behavior*)  
Anita M. Oberbauer, Ph.D., Professor  
(*Animal Science*)  
Dan E. Parfitt, Ph.D., Pomologist (*Plant Sciences*)  
Niels Pedersen, Ph.D., D.V.M., Professor  
(*VM: Medicine and Epidemiology*)  
Martin L. Privalsky, Ph.D., Professor  
(*Microbiology and Molecular Genetics*)  
Gerald Quon, Ph.D., Assistant Professor  
(*Molecular and Cellular Biology*)  
Katherine Ralston, Ph.D., Assistant Professor  
(*Microbiology and Molecular Genetics*)  
Bruce Rannala, Ph.D., Professor  
(*Evolution and Ecology, Population Biology*)  
Pamela C. Ronald, Ph.D., Professor (*Plant Pathology*)  
Alan Rose, Ph.D., Project Scientist  
(*Molecular and Cellular Biology*)  
Lesilee Rose, Ph.D., Professor  
(*Molecular and Cellular Biology*)  
Pablo J. Ross, Ph.D., Assistant Professor  
(*Animal Science*)  
Jeffrey Ross-Ibarra, Ph.D., Associate Professor  
(*Population Biology, Plant Sciences*)  
John Roth, Ph.D., Distinguished Professor  
(*Microbiology and Molecular Genetics*)  
Benjamin Sacks, Ph.D., Assistant Adjunct Professor  
(*Population Health and Reproduction*)  
Carl W. Schmid, Ph.D., Professor Emeritus  
(*Molecular and Cellular Biology*)  
Andrea Schreier, Ph.D., Assistant Adjunct Professor  
(*Animal Science*)  
David Segal, Ph.D., Associate Professor  
(*Biochemistry and Molecular Medicine*)  
Michael F. Seldin, Ph.D., Professor  
(*Biochemistry and Molecular Medicine*)  
Barbara L. Shacklett, Ph.D., Professor  
(*Microbiology and Immunology*)  
Frank Sharp, Ph.D., Professor (*Neurology*)  
Justin B. Siegel, Ph.D., Assistant Professor  
(*Biochemistry and Molecular Medicine*)  
Neelima Sinha, Ph.D., Professor  
(*Plant Biology*)  
Dina St. Clair, Ph.D., Professor (*Plant Sciences*)  
Daniel Starr, Ph.D., Professor  
(*Molecular and Cellular Biology*)  
Joshua Stern, Ph.D., Assistant Professor  
(*VM: Medicine and Epidemiology*)  
Venkatesan Sundaresan, Ph.D., Professor  
(*Plant Sciences, Plant Biology*)  
Thomas Tai, Ph.D., Associate in AES (*Plant Sciences*)  
Cheemeng Tai, Ph.D., Assistant Professor  
(*Biomedical Engineering*)  
Flora Tassone, Ph.D., Professor  
(*Biochemistry and Molecular Medicine*)  
Larry R. Teuber, Ph.D., Professor (*Plant Sciences*)  
Maria Torres Penedo, Ph.D., Associate Research Geneticist (*Veterinary Genetics Laboratory*)  
Judith Van De Water, Ph.D., Professor  
(*Rheumatology and Allergy*)  
Alison Van Eenennaam, Ph.D., Cooperative Extension Specialist (*Animal Science*)  
Mariel Vazquez, Ph.D., Professor  
(*Microbiology and Molecular Genetics*)  
M. Andrew Walker, Ph.D., Professor  
(*Viticulture and Enology*)  
Craig H. Warden, Ph.D., Professor  
(*Neurobiology, Physiology and Behavior*)  
Robert H. Weiss, Ph.D., Professor (*Nephrology*)  
Andrew Whitehead, Ph.D., Associate Professor  
(*Population Biology, Environmental Toxicology*)  
Reen Wu, Ph.D., Professor  
(*Pulmonary/Critical Care Med*)  
Lifeng Xu, Ph.D., Assistant Professor  
(*Microbiology and Molecular Genetics*)  
John I. Yoder, Ph.D., Professor (*Plant Sciences*)  
Aiming Yu, Ph.D., Associate Professor  
(*Biochemistry and Molecular Medicine*)

Konstantinos Zarbalis, Ph.D., Assistant Professor  
(*Pathology and Laboratory Medicine*)  
Mark A. Zern, Ph.D., Professor  
(*Internal Med: Transplant*)  
Chengji Zhou, Ph.D., Associate Professor  
(*Biochemistry and Molecular Medicine*)  
Huaijun Zhou, Ph.D., Associate Professor  
(*Animal Science*)

**Graduate Study.** The Graduate Group in Integrative Genetics and Genomics (IGG) offers programs of study and research leading to M.S. and Ph.D. degrees. Students in the IGG graduate program have the opportunity to apply genomic, molecular, computational, and classical genetic approaches to study model organisms, a broad range of native and agricultural species, humans, and companion animals. The group integrates genetic research across campus and unites over 100 faculty members from more than 25 departments spanning the College of Biological Sciences, the College of Letters and Science, the College of Agricultural and Environmental Sciences, the School of Medicine, and the School of Veterinary Medicine. Students experience an unsurpassed breadth of research and instructional opportunities from the most fundamental to applied aspects of genetics. For additional information regarding the program, contact the group coordinator at 530-752-4863.

## Courses in Genetics (GGG)

### Graduate

#### 201A. Advanced Genetic Analysis (5)

Lecture/discussion—5 hours. Prerequisite: Biological Sciences 101, Statistics 100 or the equivalent, graduate standing. Fundamentals of genetic analysis and chromosome structure using model organisms including mutation, transmission, complementation, suppression, and enhancement as well as epigenetic phenomena at the whole organism and molecular levels.—F. (F.)

#### 201B. Genomics (5)

Lecture—3 hours; discussion—2 hours. Prerequisite: course 201A, course 201C or equivalents that provide a basic understanding of genetics and molecular biology. Class limited to 40 students; priority to Genetics Graduate Group students. Prokaryotic and eukaryotic genomes. Experimental strategies and analytical challenges of modern genomics research and the theory and mechanics of data analysis. Structural, functional, and comparative genomics. Related issues in bioinformatics.—W. (W.)

#### 201C. Molecular Genetic Mechanisms in Disease (4)

Lecture/discussion—4 hours. Prerequisite: Biological Sciences 101 or the equivalent. Pass One restricted to graduate students in genetics, microbiology or biochemistry and molecular biology graduate groups. Exploration of how basic mechanisms of molecular biology contribute to health and disease. Diseases related to animals, plants, and microbes will highlight fundamental concepts in the assembly, function and regulation of DNA, RNA, and protein.

#### 201D. Quantitative and Population Genetics (5)

Lecture—5 hours. Prerequisite: course 201A or consent of instructor. Basic concepts of quantitative and population genetics including gene and genotypic frequencies, multiple factor hypothesis, phenotypic and genotypic values, heritability, selection, genetic variation, the detection of quantitative trait loci and evolution in populations. Experimental and analytical methods.—S. (S.) Famula, Ross-Ibarra

#### 205. Molecular Genetics Laboratory (5)

Laboratory—15 hours. Prerequisite: Biological Sciences 101 (may be taken concurrently) or the equivalent, enrolled in Genetics Graduate Group. Students will conduct experiments in molecular genetics laboratories. Individual research problems will emphasize experimental design, experience with methodologies, and data interpretation. May be repeated up to three times for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**210. Horizontal Gene Transfer (3)**

Lecture/discussion—3 hours. Prerequisite: background in basic microbiology and genetics required; introductory course in molecular biology, biotechnology and microbial and animal/plant genetics recommended. Transfer of genes between unrelated organisms in nature. Dissemination of foreign DNA from genetically engineered organisms, including plants and animals. Mechanisms by which genes are transferred horizontally, and between kingdoms.—F. (F.)

**211. Concepts in Human Genetics and Genomics (3)**

Lecture/discussion—3 hours. Prerequisite: course 201A or the equivalent; course 201B, 201C or the equivalent recommended. Pass One restricted to graduate students enrolled in the Human Genetics Focus Group; Pass Two restricted to graduate students enrolled in Genetics Graduate Group; after that, open enrollment for graduate students up to 12 students, then undergraduates. Human genomic organization; genetic structure of populations; positional cloning, application of linkage, association, and haplotypes; quantitative trait loci analyses; integrative genetic studies of gene expression; DNA repair mechanisms in genetic disease; mutation analyses; epigenetics; mitochondrial disease; gene manipulation and therapy. Offered in alternate years.—(W.)

**220. Genomics and Biotechnology of Plant Improvement (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101 or the equivalent. Integration of modern biotechnology and classical plant breeding including the impact of structural, comparative and functional genomics on gene discovery, characterization and exploitation. Also covers molecular markers, plant transformation, hybrid production, disease resistance, and novel output traits. (Same course as Plant Sciences 220.)—W. (W.) Neale

**225. Gene Therapy (3)**

Lecture/discussion—3 hours. Prerequisite: Genetics 201C, Molecular and Cellular Biology 214, or equivalent. Gene therapy from basic concepts to clinical applications. Topics include the human genome and genetic variation, genetic diseases, methods to manipulate gene expression, viral and non-viral delivery vectors, history and progress of gene therapy, case studies, and ethical issues. (Same course as Pharmacology & Toxicology 225.)—S. (S.) Anderson

**250. Functional Genomics: From Bench to Bedside (3)**

Lecture/discussion—3 hours. Prerequisite: course 201C, Molecular and Cellular Biology 214, or equivalent. Functional genomics (how genetic variation and epigenomics affect gene expression), with an emphasis on clinical relevance and applications. Topics include genetic variation and human disease, cancer therapeutics, and biomarker discovery. (Same course as Pharmacology & Toxicology 250.)—S. (S.) Diaz, LaSalle, Segal

**290. Seminar in Evolutionary, Developmental and Population Genetics (1)**

Seminar—1 hour. Topics of current interest in evolutionary, population, and developmental genetics. May be repeated for credit. (S/U grading only.) Offered in alternate years.—S. (S.)

**290A. Graduate Student Conference in Genetics (1)**

Conference—1 hour. Restricted to Genetics Graduate Group students. Student-given seminars on topics in genetics, with critiques by instructor and peers. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**291. Seminar in History of Genetics (2)**

Seminar—2 hours. Prerequisite: Biological Sciences 101. The development of modern genetic theories beginning with Mendel.—F. (F.) Quiros

**292. Seminar in Genomics and Epigenomics (1)**

Seminar—1 hour. Topics of current interest in genomics and epigenomics. May be repeated for credit. Offered in alternate years. (S/U grading only.)—(F.)

**293. Seminar in Animal Genetics (1-3)**

Seminar—1-3 hours. Prerequisite: course 201A or consent of instructor. Emphasis on recent advances in the field of animal genetics, ranging from quantitative genetics to molecular biology as it relates to animals. Offered in alternate years.—S.

**294. Seminar in Human Genetics (2)**

Seminar—2 hours. Prerequisite: course 201A and consent of instructor. May be repeated for credit up to five times if topic differs. Topics of current interest in human genetics and genomics. Offered in alternate years.—W. Seldin

**295. Seminar in Molecular Genetics (1-3)**

Seminar—1-3 hours. Prerequisite: course 201A or consent of instructor. Topics of current interest related to the structure, modification and expression of genes. Offered in alternate years.—F.

**296. Scientific Professionalism and Integrity (2)**

Lecture—1 hour; seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Review of basic skills required of contemporary scientists. Topics include scientific conduct, manuscript preparation, grant writing, seminar presentations, and time management. Emphasis on responsibilities of scientists to factually and thoughtfully communicate results.—F. (F.) Yoder

**297. Seminar in Plant Genetics (1-3)**

Seminar—1-3 hours. Prerequisite: course 201A or consent of instructor. Current topics in plant genetics will be examined in student-conducted seminars and discussion format. The integration of molecular, organismal and population genetics to address questions in plant biology will be emphasized.—(W.)

**298. Group Study (1-5)**

Prerequisite: consent of instructor. Group study of selected topics in genetics. (S/U grading only.)—F, W, S. (F, W, S.)

**299. Research (1-12)**

(S/U grading only.)—F, W, S. (F, W, S.)

**Professional****300. Methods in Teaching Genetics (1-3)**

Lecture/discussion. Prerequisite: graduate standing and consent of instructor. Practical experience in the methods and problems of teaching genetics. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion or laboratory sections, formulating examinations under supervision of instructor. May be repeated for credit up to 3 times or 9 units if teaching in different genetics related course. (S/U grading only.)—F, W, S. (F, W, S.)

## Integrative Pathobiology (A Graduate Group)

Patricia Pesavento, D.V.M., Ph.D., Chairperson of the Group

Brian Murphy, D.V.M., Ph.D., Co-chairperson of the Group

**Group Office.** 5218, Vet Med 3A  
530-752-3737; <http://www.vetmed.ucdavis.edu/integrativepath/>

**Faculty**

Verena Affolter, D.V.M., Ph.D., Professor  
(Pathology, Microbiology and Immunology)

Kyriacos Athanasiou, Ph.D., Professor and Chair  
(Biomedical Engineering)

Robert Atwill, D.V.M., M.P.V.M., Ph.D., Professor  
(Population Health and Reproduction)

Danika Bannasch, D.V.M., Ph.D., Professor  
(Population Health and Reproduction)

Chris Barker, Ph.D., Assistant Adjunct Professor  
(Pathology, Microbiology, and Immunology)

Andreas Baumler, Ph.D., Professor  
(Microbiology and Immunology)

Peter A. Barry, Ph.D., Associate Professor  
(Pathology and Oncology)

Nicole Baumgarth, D.V.M., Ph.D., Professor  
(Pathology, Microbiology, and Immunology)

Charles L. Bevins, M.D., Ph.D., Professor  
(Microbiology and Immunology)

Dori L. Borjesson, D.V.M., M.P.V.M., Ph.D., Professor  
(Pathology, Microbiology and Immunology)

Walter M. Boyce, D.V.M., Ph.D., Professor  
(Pathology, Microbiology, and Immunology)

Robert J. Brosnan, D.V.M., Ph.D., Professor  
(Surgical and Radiological Sciences)

Barbara A. Byrne, D.V.M., Ph.D., Professor  
(Pathology, Microbiology, and Immunology)

Kermit Carraway, Ph.D., Professor  
(Biochemistry and Molecular Medicine)

Hongwu Chen, Ph.D., Associate Professor  
(Cancer Center, Basic Sciences)

Xinbin Chen, B.V.M., Ph.D., Professor  
(Surgical and Radiological Sciences)

Simon Cherry, Ph.D., Professor  
(Biomedical Engineering)

Bruno B. Chomel, D.V.M., Ph.D., Professor  
(Population Health and Reproduction)

Brett Chromy, Ph.D., Assistant Adjunct Professor  
(Pathology and Laboratory Medicine)

Lark L A Coffey, D.V.M., Ph.D., Assistant Professor  
(Pathology, Microbiology, and Immunology)

Patricia A. Conrad, D.V.M., Ph.D., Professor  
(Pathology, Microbiology, and Immunology)

Beate Crossley, D.V.M., Ph.D., M.P.V.M., Professor  
(Department of Medicine and Epidemiology)

James S. Cullor, D.V.M., Ph.D., Professor  
(Population Health and Reproduction)

Satya Dandekar, Ph.D., Professor  
(Microbiology and Immunology)

Wenbin Deng, Ph.D., Associate Professor  
(Biochemistry and Molecular Medicine)

Peter Dickinson, D.V.M., Ph.D., Assoc. Professor  
(Neurology/Neurosurgery)

Carol Erickson, Ph.D., Distinguished Professor  
Emeritus (Molecular and Cellular Biology)

Thomas B. Farver, Ph.D., Professor  
(Population Health and Reproduction)

Carrie Finno, D.V.M., Ph.D., Assistant Professor  
(Population Health and Reproduction)

Janet Foley, MS, D.V.M., Ph.D., Assistant Professor  
(Medicine and Epidemiology)

Rodrigo Gallardo, D.V.M., Ph.D., Assistant Professor  
(Population Health and Reproduction)

Damian Genotus, B.A., M.S., Ph.D., Assistant  
Professor (Anatomy, Physiology and Cell Biology)

Laurel J. Gershwin, D.V.M., Ph.D., Professor  
(Pathology, Microbiology, and Immunology)

Paramita Ghosh, Ph.D., Associate Professor  
(Biochemistry and Molecular Medicine)

Ralph Green, M.D., Ph.D., Professor  
(Medical Pathology and Laboratory Medicine)

Fuzheng Guo, Ph.D., Assistant Professional  
Researcher (Neurology)

James H. Jones, D.V.M., Ph.D., Professor  
(Surgical and Radiological Sciences)

Amy Kapatkin, B.S., D.V.M., M.S. Associate  
Professor (Surgical and Radiological Sciences)

Kevin Keel, D.V.M., Ph.D., Associate Professor  
(Pathology, Microbiology, and Immunology)

Imran Khan, Ph.D., M.B.A, Associate Adjunct  
Professor (Pathology and Laboratory Medicine)

Kit S. Lam, M.D., Ph.D., Professor  
(Hematology/Oncology)

Michael Lairmore, D.V.M., Ph.D., Professor and  
Dean (Pathology, Microbiology and Immunology)

Kent Leach, Ph.D., Professor  
(Biomedical Engineering)

Jian-Jian Li, M.D., Ph.D., Professor  
(Radiation Oncology)

Kent K.C. Lloyd, D.V.M., Ph.D., Professor  
(Anatomy, Physiology and Cell Biology)

Su Hao Lo, Ph.D., Professor  
(Biochemistry and Molecular Medicine)

Paul A. Luciw, Ph.D., Professor  
(*Pathology and Oncology*)  
Bruce G. Lyeth, Ph.D., Professor  
(*Neurological Surgery*)  
N. James MacLachlan, B.V.Sc., Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)  
John E. Madigan, M.S., D.V.M., Professor  
(*Medicine and Epidemiology*)  
Verónica Martínez-Cerdeño, Ph.D., Assistant Professor (*Pathology and Laboratory Medicine*)  
Jonna A.K. Mazet, D.V.M., M.P.V.M., Ph.D., Professor  
(*Medicine and Epidemiology*)  
Stephen McSorley, Ph.D., Professor  
(*Anatomy, Physiology and Cell Biology*)  
Matthew Mellema, Associate Professor  
(*Surgical and Radiological Sciences*)  
Stuart Meyers, D.V.M., Ph.D., Professor  
(*Anatomy, Physiology and Cell Biology*)  
Michael Mienaltowski, Ph.D., Assistant Professor  
(*Animal Science*)  
Chris J. Miller, D.V.M., Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)  
Lisa Miller, Ph.D., Professor  
(*Anatomy, Physiology and Cell Biology*)  
Suzanne Miyamoto, Ph.D., Assistant Research Biochemist (*Internal Medicine*)  
F. Charles Mohr, D.V.M., Ph.D., Professor of Clinical Anatomic Pathology (*Pathology, Microbiology, and Immunology*)  
Arta Monjazeb, M.D., Ph.D., Assistant Professor (*Radiation Oncology*)  
Peter F. Moore, B.V.Sc., Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)  
Brian Murphy, D.V.M., Associate Professor  
(*Pathology, Microbiology & Immunology*)  
William Murphy, M.D., Professor (*Dermatology*)  
Jorge Nieto, M.V.Z., Ph.D., Professor  
(*Surgical and Radiological Sciences*)  
Jan Nolta, Ph.D., Professor  
(*School of Medicine, Internal Medicine*)  
Joanne Paul-Murphy, D.V.M., Professor  
(*Medicine and Epidemiology*)  
Niels C. Pedersen, D.V.M., Ph.D., Professor  
(*Medicine and Epidemiology*)  
Patricia Pesavento, D.V.M., Ph.D., Professor  
(*Pathology, Microbiology & Immunology*)  
Kent E. Pinkerton, Ph.D., Professor (*Anatomy, Physiology and Cell Biology*) Distinguished Teaching Award-Graduate/Professional  
David E. Pleasure, M.D. Professor  
(*Neurology and Pediatrics*)  
Jerry S. Powell, M.D., Professor  
(*Anatomy, Physiology and Cell Biology*)  
Katherine Rauen, M.D., Ph.D., Professor  
(*Pediatrics*)  
William Reisen, Ph.D., Professor  
(*Pathology, Microbiology and Immunology*)  
Robert Rebhun, D.V.M., Ph.D., Associate Professor  
(*Surgical and Radiological Sciences*)  
Alexander Revzin, Ph.D., Associate Professor  
(*Biomedical Engineering*)  
Jeroen Saeij, Ph.D., Associate Professor  
(*Pathology, Microbiology, and Immunology*)  
Edward Schelegle, Ph.D., Professor  
(*Anatomy, Physiology, and Cell Biology*)  
Jared Shaw, Associate Professor (*Chemistry*)  
Christina Sigurdson, Associate Professor  
(*Pathology, Microbiology and Immunology*)  
Scott Simon, Ph.D., Professor  
(*Biomedical Engineering*)  
David Smith, Ph.D., Professor (*Anthropology*)  
Woutrina Smith, D.V.M., M.P.V.M., Ph.D., Associate Professor (*Medicine and Epidemiology*)  
Esteban Soto Martinez, D.V.M., Ph.D., Associate Professor (*Medicine and Epidemiology*)  
Ellen Sparger, D.V.M., Ph.D., Associate Professor  
(*Medicine and Epidemiology*)  
Joshua Stern, B.S., D.V.M., Assistant Professor  
(*Medicine and Epidemiology*)  
Jeffrey L. Stott, Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)  
Susan M. Stover, D.V.M., Ph.D., Professor  
(*Anatomy, Physiology and Cell Biology*)  
Julie Sutcliffe, Ph.D., Associate Professor  
(*Biomedical Engineering*)

Colleen Sweeney, Ph.D., Professor  
(*Biochemistry and Molecular Medicine*)  
Jane E. Sykes, B.V.Sc., Ph.D., Professor  
(*Medicine and Epidemiology*)  
Fern Tablin, V.M.D., Ph.D., Professor  
(*Anatomy, Physiology and Cell Biology*)  
Alice F. Tarantal, Ph.D., Professor (*Pediatrics*)  
Sara Thomasy, D.V.M., Ph.D., Associate Researcher  
(*Surgical and Radiological Sciences*)  
Jose V. Torres, Ph.D., Professor (*Microbiology*)  
Nam Tran, Ph.D., Assistant Professor  
(*Department of Pathology and Laboratory Medicine*)  
Renee M. Tsolis, Ph.D., Professor  
(*Microbiology and Immunology*)  
Francisco Uzal, D.V.M., Ph.D., Professor of Clinical Diagnostic Pathology (*Pathology, Microbiology, and Immunology*)  
Laura Van Winkle, Ph.D., Adjunct Professor  
(*Anatomy, Physiology and Cell Biology*)  
William Vernau, D.V.Sc., Ph.D., Associate Professor  
(*Pathology, Microbiology and Immunology*)  
Sebastian Wachsmann-Hogiu, M.D., Associate Professor (*Pathology*)  
Aijun Wang, Ph.D., Assistant Professor  
(*Surgery*)  
Johanna L. Watson, D.V.M., Ph.D., Associate Clinical Professor and Chair (*Medicine and Epidemiology*)  
Bart Weimer, Ph.D., Professor  
(*Population Health and Reproduction*)  
Robert H. Weiss, M.D., Professor  
(*Internal Medicine, Division of Nephrology*)  
Dennis W. Wilson, D.V.M., Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)  
Erik R. Wisner, D.V.M., Professor  
(*Surgical and Radiological Science*)  
Kevin Woolard, D.V.M., Ph.D., Assistant Professor  
(*Pathology, Microbiology and Immunology*)  
Jian Wu, M.D., Ph.D., Assistant Adjunct Professor  
(*Internal Medicine*)  
Reen W. Wu, Ph.D., Professor (*Internal Medicine*)  
Clare Yellowley, Ph.D., Professor  
(*Anatomy, Physiology and Cell Biology*)  
Chengji Zhou, Ph.D., Associate Professor  
(*Biochemistry and Molecular Medicine*)

**Graduate Study.** The Graduate Group in Integrative Pathobiology offers the M.S. and Ph.D. degrees for graduate study in disciplines concerned with disease processes. The group's focus is the study of the causes and nature of disease processes in animals and humans, with major emphasis on the mechanisms responsible for the development of diseases at the level of organ systems, the cell, or subcellular mechanisms. The group brings a wide array of scientific knowledge to this study, so that students with divergent interests can be accommodated in programs designed for individual needs. Beyond core courses selected from disciplines such as anatomy, bacteriology, genetics, immunology, parasitology, pathology, physiology, and virology, course programs are intentionally flexible.

**Preparation.** This program is primarily for students who have a professional medical degree; e.g., D.V.M., M.D., D.D.S. Students without a professional degree will be considered if they have an especially strong background in basic biomedical sciences.

**Graduate Adviser.** Jeffrey Stott (*Pathology, Microbiology, and Immunology*)

## International Agricultural Development

(College of Agricultural and Environmental Sciences)  
International Agricultural Development is an interdisciplinary major in the Plant Sciences department.

**Faculty.** Includes members from various departments across colleges.

### B.S. Major Requirements:

#### Preparatory Subject Matter ..... 36-38 UNITS

International Agricultural Development	10.....
Plant Sciences 2 .....	4
Soil Sciences 10 or 100 .....	3-5
Economics 1A and 1B .....	8
Statistics 13 or Sociology 46B or Plant Sciences 120.....	4
Math 16A .....	3
Community and Regional Development 1 ..	4
Six units from: Agricultural and Resource Economics 15, Animal Science 41, 41L, Community and Regional Development 20, Nutrition 10, Plant Sciences 1, 15, 49.....	6

#### Depth Subject Matter ..... 32

Agricultural and Resource Economics 147 or Plant Sciences 101 .....	3
Economics 115A.....	4
Five units from: International Agricultural Development 142, 160, Plant Sciences 110A, 110C, 110L, 112, 130 .....	5
International Agricultural Development 103 and International Agricultural Development 170.....	8
Sociology 170 or Community and Regional Development 141 or 162.....	4
Community and Regional Development 142 or 149 or 152.....	4
Political Science 123 or 124 or Sociology 145A or Anthropology 126A or 126B or 131.....	4

#### Foreign Language Requirement ..... 0-15

Students must complete three sequenced quarters (15 units) of courses in one foreign language or its equivalent. Passing a foreign language proficiency examination, a score of 5, 4, or 3 on a foreign language Advanced Placement examination (except Latin), or a score of 550 on the SATII: Subject Test will also satisfy this requirement.

#### Internship Requirement ..... 4

Students must complete at least four units of internship. Internships can be chosen in consultation with an adviser. Internship requirement waived for students enrolled in the UC Education Abroad Program.

#### Areas of Specialization ..... 44-45

Agricultural Production Option .....	45
Biological Sciences 2A and 2B .....	10
Chemistry 2A and 2B .....	10
15 units from: Animal Science 118, 124, 136A, 136B, 143, 144, 145, 146, Avian Sciences 121, Entomology 110, 135, Environmental Horticulture 100, 133, Environmental Science and Management 100, Hydrology 124, International Agricultural Development 142, 160, Plant Pathology 120, Plant Sciences 110A, 110C, 110L, 112, 113, 114, 130, 150, 170A, 170B, 172, 176, Soil Sciences 109, 118 .....	15
Restricted Electives: Courses selected in consultation with an adviser.....	10
Trade and Economic Development Option .....	44-45
Mathematics 16B .....	3
Sociology 1 or Anthropology 2 .....	4-5

20 units from: Agricultural and Resource Economics 15, 100A, 100B, 115B, 120, 121, 130, 136, 138, 139, 175, 176, Community and Regional Development 141, Economics 160A, 160B, Textiles and Clothing 174.....	20
Restricted Electives: Courses selected in consultation with an adviser.....	17
<i>Environmental Issues Option</i> .....	45
Biological Sciences 2A and 2B .....	10
Environmental Science and Policy 1 .....	4
16 units from: Agricultural and Resource Economics 147, 175, 176, Environmental Science and Policy 100, 101, 105, 110, 160, 161, 170, 171, 172, 175, Plant Sciences 101, 147, 147L, 150, Environmental Horticulture 150, 160, 160L.....	16
Restricted Electives: Courses selected in consultation with an adviser.....	15
<i>Rural Communities Option</i> .....	45
Sociology 1 .....	4
Anthropology 2.....	4
16 units from: Community and Regional Development 140, 147, 149, 151, 152, 153A, 153B, 154, 164, 172, 176, 180.....	16
Restricted Electives: Courses selected in consultation with an adviser.....	20

**Total Units for Major ..... 116-134****International Agricultural Development Abroad..... 0-40**

**Major Adviser.** P. Brown in 3041 Wickson Hall (*Plant Sciences*)

**Advising Center** for the major is located in 1220 Plant and Environmental Sciences 530-752-1715.

**Minor Program Requirements:** UNITS

<b>International Agricultural Development</b> .....	<b>21-23</b>
International Agricultural Development 10 and Agricultural and Resource Economics 115A .....	8
Plant Sciences 101, 110A, 110C, 112 .....	6-7
International Agricultural Development 103, 170, 195A or Community and Regional Development 142 .....	7-8

**Minor Adviser.** P. Brown  
**Advising Center** for the minor is located in 1220 Plant and Environmental Sciences 530-752-1715.

**Courses in International Agricultural Development (IAD)**

Questions pertaining to the following courses should be directed to the instructor or to the Department of Plant Sciences Advising Center in 1220 Plant and Environmental Sciences at 530-752-1715.

**Lower Division****10. Introduction to International Agricultural Development (4)**

Lecture—3 hours; discussion—1 hour. Theories, practices and institutions relating to agricultural development; the interaction of changing social, cultural and economic organization through successive stages of economic development; impact of new agricultural technology on underdeveloped regions. GE credit: SocSci, Div, Wrt | SS, WC, WE.—W. (W.) Brown

**92. Internship (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.)—F, W, S. (F, W, S.)

**Upper Division****103. Social Change and Agricultural Development (4)**

Lecture/discussion—4 hours. Prerequisite: introductory social science course (Anthropology, Sociology, Economics, International Agricultural Development).

How social and cultural factors influence technological change in agriculture; theories of diffusion of innovations; social impact analysis and technology assessment. GE credit: SocSci, Div | SS, WE.

**142. Equipment and Technology for Small Farms (2)**

Lecture—1 hour; laboratory—3 hours. Types and characteristics of agricultural equipment and technologies appropriate for small commercial farming. Adjustment and calibration of equipment. Selection of and budgeting for equipment. (Same course as Applied Biological Systems Technology 142.) GE credit: SciEng | QL, SE, VL.—S. (S.) Shafii

**160. Agroforestry: Global and Local Perspectives (3)**

Lecture/discussion—3 hours. Prerequisite: Plant Sciences 2 or Biological Sciences 1C or 2C; Plant Sciences 142 or 150 or Biological Sciences 2B or a general ecology course. Traditional and evolving use of trees in agricultural ecosystems; their multiple roles in environmental stabilization and production of food, fuel, and fiber; and socioeconomic barriers to the adoption and implementation of agroforestry practices. Not open for credit to students who have taken previously taken Agricultural Management and Rangeland Resources 160. (Former course Agricultural Management and Rangeland Resources 160.) Offered in alternate years. GE credit: SciEng | SE.—F. Gradiel

**170. Program Development for International Agriculture (4)**

Lecture/discussion—4 hours. Prerequisite: course 10. Principles of leadership and management for international agricultural development. Organizations and organizational behavior, and the implications for planning and administering organizations involved in the global development effort.—F. (F.)

**190. Proseminar in International Agricultural Development (1)**

Seminar—1 hour. Presentation and discussion of current topics in international agricultural development by visiting lecturers, staff and students. May be repeated for credit. (P/NP grading only.)

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.)—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Directed group study. (P/NP grading only.)—F, W, S. (F, W, S.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. Special study for advanced undergraduates. (P/NP grading only.)—F, W, S. (F, W, S.)

**Graduate****200N. Philosophy and Practice of Agricultural Development (5)**

Lecture/discussion—5 hours; term paper. Introduces key elements of philosophy and practice of agricultural development in less developed countries; major paradigms of development; historical context within which these paradigms operate; various development techniques and initiatives emerging from agricultural production to institutional capacity building and management. Not open for credit to students who have completed former course 202.—F. (F.) Bell, Bunn

**201. The Economics of Small Farms and Farming Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural and Resource Economics 100A. Economic perspective on small farm development. Establishes a basis for predicting farmers' responses to changes in the economic environment, and for proposing government policies to increase small farm production and improve farmer and national welfare.—W. (W.) Vosti

**202N. Analysis and Determinants of Farming Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Plant Sciences 150 or the equivalent. Unifying concepts of cropping systems in temperate and tropical climatic zones; agroecosystems stability, diversity and sustainability; management strategies, resource use efficiency and their interactions; role of animals, their impact on energy use efficiency, nutrient cycling, and providing food and power. Not open for credit to students who have completed former course 200.—S. (S.) Bunn, Van Kessel

**203N. Project Planning and Evaluation (4)**

Discussion—1 hour; workshop—3 hours. Prerequisite: courses 200N (or former course 202), 201, 202N (or former course 200). Interdisciplinary setting for application of student skills and specialization to a "real world" development project. Focus on team-building and effective interdisciplinary problem-solving methods, with the objective of producing a project document and presentation within a specified deadline. Not open for credit to students who have completed former course 203.—S. (S.)

**290. Seminar in International Agricultural Development (1-2)**

Seminar—1-2 hours. Prerequisite: consent of instructor. Discussion and critical evaluation of advanced topics and issues in international agricultural development. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.) Scow, Van Horn

**291. Topics in International Agricultural Development (1-3)**

Lecture/discussion—1-3 hours. Prerequisite: consent of instructor. Selected topics dealing with current issues in agricultural development in lesser developed nations. Variable content. May be repeated one time for credit.—F, W, S. (F, W, S.)

**292. Graduate Internship (1-12)**

Internship—3-36 hours. Prerequisite: participation in H. Humphrey Fellow Program or consent of instructor. Individually designed supervised internship, off or on campus, in community, business or institutional setting. Developed with advice of faculty mentor and Humphrey Coordinator. (S/U grading only.)—F, W, S. (F, W, S.)

**298. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Directed group study. (S/U grading only.)—F, W, S. (F, W, S.)

**299. Research (1-12)**

Prerequisite: consent of instructor. Research. (S/U grading only.)—F, W, S. (F, W, S.)

**Professional****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. Teaching assistant training practicum. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**International Agricultural Development (A Graduate Group)**

Kate Scow, Ph.D., Professor (*Land, Air, and Water Resources*) Chairperson of the Group

**Group Office.** 1220 Plant and Environmental Sciences Building, 530-752-1715;  
<http://iad.ucdavis.edu>

**Faculty**

Kassim Al-Khatib, Ph.D., Professor (*Plant Sciences*) Sharif Aly, Ph.D., Associate Professor

(*Population Health and Reproduction*)

Roger Baldwin, Ph.D., Associate Cooperative Extension Specialist (*Wildlife, Fish, and Conservation Biology*)

Diane M. Barrett, Ph.D., Specialist in Cooperative Extension (*Food Science and Technology*)

Mark Bell, Ph.D., Academic Administrator  
*(International Programs, College of Agricultural and Environmental Sciences)*  
 Stephen Boucher, Ph.D., Associate Professor  
*(Agricultural and Resource Economics)*  
 Patrick H. Brown, Ph.D., Professor (*Plant Sciences*)  
 David Bunn, Ph.D., Assistant Adjunct Professor  
*(Animal Science)*  
 Colin A. Carter, Ph.D., Professor  
*(Agricultural and Resource Economics)*  
 Michael R. Carter, Ph.D., Professor  
*(Agricultural and Resource Economics)*  
 Patricia A. Conrad, D.V.M., Ph.D., Professor  
*(Pathology, Microbiology, and Immunology)*  
 Diana Davis, Ph.D., Associate Professor (*History*)  
 Kathryn G. Dewey, Ph.D., Professor (*Nutrition*)  
 Richard Evans, Ph.D., Specialist in Cooperative Extension (*Plant Sciences*)  
 James Fadel, Ph.D., Professor (*Animal Science*)  
 Fadi Fathallah, Ph.D., Professor  
*(Biological and Agricultural Engineering)*  
 Steven Fennimore, Ph.D., Cooperative Extension Specialist (*Plant Sciences*)  
 Louise Ferguson, Ph.D., Specialist in Cooperative Specialist (*Plant Sciences*)  
 Howard Ferris, Ph.D., Professor (*Nematology*)  
 Albert Fischer, Ph.D., Professor (*Plant Sciences*)  
 Ryan E. Galt, Ph.D., Assistant Professor  
*(Human Ecology)*  
 Amélie Gaudin, Ph.D., Assistant Professor  
*(Plant Sciences)*  
 Paul L. Gepts, Ph.D., Professor (*Plant Sciences*)  
 Robert Gilbertson, Ph.D., Professor (*Plant Pathology*)  
 Rachael Goodhue, Ph.D., Professor  
*(Agricultural and Resource Economics)*  
 Thomas Gradiel, Ph.D., Professor (*Plant Sciences*)  
 Liza Grandia, Ph.D., Associate Professor  
*(Native American Studies)*  
 Richard D. Green, Ph.D., Professor  
*(Agricultural and Resource Economics)*  
 Luis Guarinzo, Ph.D., Professor  
*(Human Ecology)*  
 Timothy K. Hartz, Ph.D., Specialist in Cooperative Extension and Lecturer (*Plant Science*)  
 Robert Hijmans, Ph.D., Associate Professor  
*(Environmental Science and Policy)*  
 William Horwath, Ph.D., Professor  
*(Land, Air and Water Resources)*  
 Russell C. Hovey, Ph.D., Professor (*Animal Science*)  
 Silas S. O. Hung, Ph.D., Professor (*Animal Science*)  
 Lovell S. Jarvis, Ph.D., Professor  
*(Agricultural and Resource Economics)*  
 Bryan M. Jenkins, Ph.D., Professor  
*(Biological and Agricultural Engineering)*  
 Marion Jenkins, Ph.D., Research Engineer  
*(Civil and Environmental Engineering)*  
 Katrina Jessoee, Ph.D., Assistant Professor  
*(Agricultural and Resource Economics)*  
 Lucia Kaiser, Ph.D., Community Nutrition Specialist in Cooperative Extension (*Nutrition*)  
 Ermias Kebreab, Ph.D., Professor (*Animal Science*)  
 Kurt Kornbluth, Ph.D., Adjunct Professor  
*(Biological and Agricultural Engineering)*  
 Dietmar Kuelz, Ph.D., Professor (*Animal Science*)  
 Bruce Linquist, Ph.D., Specialist in Cooperative Extension (*Plant Sciences*)  
 Jay Lund, Ph.D., Professor  
*(Civil and Environmental Engineering)*  
 Mark Lundy, Ph.D., Assistant Specialist in Cooperative Extension (*Plant Sciences*)  
 Travis Lybbert, Ph.D., Associate Professor  
*(Agricultural and Resource Economics)*  
 Philip E. Martin, Ph.D., Professor  
*(Agricultural and Resource Economics)*  
 Mark A. Matthews, Ph.D., Professor  
*(Viticulture and Enology)*  
 G. David Miller, M.Sci., Lecturer (*Plant Sciences*)  
 Elizabeth J. Mitcham, Ph.D., Specialist in Cooperative Extension (*Plant Sciences*)  
 Jeffrey P. Mitchell, Ph.D., Specialist in Cooperative Extension and Lecturer (*Plant Sciences*)  
 Christian Nansen, Ph.D., Assistant Professor  
*(Entomology and Nematology)*  
 Dan Potter, Ph.D., Professor (*Plant Sciences*)

Daniel Putnam, Ph.D., Cooperative Extension Specialist, Agronomist and Lecturer  
*(Plant Sciences)*  
 Pamela C. Ronald, Ph.D., Professor  
*(Plant Pathology)*

 Chris van Kessel, Ph.D., Professor (*Plant Sciences*)  
 Stephen Vosti, Ph.D., Adjunct Professor  
*(Agricultural and Resource Economics)*  
 Karen Watson-Gegeo, Ph.D., Professor  
*(School of Education) Distinguished Graduate Mentoring Award*  
 Joshua Viers, Ph.D., Associate Research Scientist  
*(Environmental Science and Policy)*  
 Aram A. Yengoyan, Ph.D., Professor (*Anthropology*)  
 Tilahun D. Yilma, Ph.D., Professor  
*(Pathology, Microbiology, and Immunology)*  
 Glenn Young, Ph.D., Professor  
*(Food Science and Technology)*  
 Minghua Zhang, Ph.D., Professor  
*(Land, Air and Water Resources)*  
 Ruihong Zhang, Ph.D., Professor  
*(Biological and Agricultural Engineering)*  
 Richard A. Zinn, Ph.D., Professor (*Animal Science*)

### Emeriti Faculty

Stephen Brush, Ph.D., Professor Emeritus  
*(Human Ecology)*  
 James Grieshop, Ph.D., Specialist in Cooperative Extension Emeritus  
*(Human Ecology)*  
 James Hill, Ph.D., Specialist in Cooperative Extension Emeritus  
*(Plant Sciences)*  
 Alexander F. McCalla, Ph.D., Professor Emeritus  
*(Agricultural and Resource Economics)*  
 E. Dean MacCannell, Ph.D., Professor Emeritus  
*(Environmental Design)*  
 Richard E. Plant, Ph.D., Professor Emeritus  
*(Plant Sciences)*

**Graduate Study.** The International Agricultural Development M.S. degree program prepares students for careers in global agricultural and rural development, especially, but not exclusively, of developing and less-industrialized regions. This is an interdisciplinary program designed to provide students with knowledge and skills that will enable them to implement, facilitate, and manage programs that enhance agricultural development, resource management, and rural life.

Students are prepared to realize biological and technological improvement in agricultural and natural systems to facilitate social innovation. Training in International Agricultural Development includes both breadth and depth components. Breadth components, required of all M.S. students, aim to establish an understanding of the issues in international development as they relate to agriculture and the environment. These include the history and philosophy of development, leadership and management techniques, fundamentals of farming systems, and agricultural economics. Students acquire depth in their own areas of specialization within the agricultural and social sciences. The areas include agricultural and resource economics, agricultural engineering, agronomy, animal science, anthropology, aquacul-

ture, avian science, community development, ecology, economics, entomology, environmental design, environmental toxicology, food science, gender, geography, horticulture, nutrition, plant pathology, plant biology, plant protection and pest management, political science, preventive veterinary medicine, range science, sociology, soil science, sustainable agriculture, vegetable crops, viticulture, and water science.

Practical and on-site experience with development issues is encouraged and facilitated by guidance from the group's faculty members, who possess a wide range of experience in international development.

**Graduate Adviser.** Contact the Group office.

## International and Community Nutrition

Kathryn G. Dewey, Ph.D., Program Director

**Program Office.** 3253 Meyer Hall  
 530-752-1992;

Marta Van Loan, Ph.D., Associate Adjunct Professor (*Nutrition*)  
 Stephen A. Vosti, Ph.D., Associate Adjunct Professor (*Agricultural and Resource Economics*)  
 K. Ryan Wessells, Ph.D., Assistant Project Scientist (*Nutrition*)

**Graduate Study.** The Program in International and Community Nutrition, an Organized Research Unit located in the Department of Nutrition, coordinates specialized course work and research leading to the Designated Emphasis in International and Community Nutrition for students in various graduate programs. The program focuses on both theoretical and practical issues concerning the identification, treatment, and prevention of human nutritional problems in low-income countries and in disadvantaged groups in the United States. Students enrolled in the Designated Emphasis are expected to (1) complete the course requirements already established by their respective graduate programs, (2) participate in a weekly advanced seminar in international and community nutrition, (3) complete additional core courses in international nutrition (Nutrition 219A, 219B, 258) and selected courses in the related disciplines of epidemiology, statistics, and social and behavioral sciences, and (4) conduct their dissertation research on a relevant topic under the supervision of a professor who is a member of the Program in International and Community Nutrition.

Students accepted into the following doctoral programs are automatically eligible to participate in the Designated Emphasis: Nutrition, Agricultural and Resource Economics, Epidemiology, Anthropology, and Human Development. Students from other programs may also be accepted by special request to the Program Director. Upon graduation, students receive a Ph.D. in their major field, with specific recognition for the Designated Emphasis in International and Community Nutrition.

**Graduate Adviser.** Contact the Program office.

## International Commercial Law (A Graduate Group)

Daniel L. Simmons, J.D., Chairperson of the Group  
 Beth Greenwood, J.D., Associate Dean, International Programs, UC Davis School of Law

**Group Office.** International Law Programs, School of Law & UC Davis Extension, 400 Mrak Hall Drive, Davis, CA 95616; [ilm@ucdavis.edu](mailto:ilm@ucdavis.edu) <http://www.law.ucdavis.edu/international>

### Faculty

Courses are taught by School of Law faculty from UC Davis and other University of California law schools, the Graduate School of Management, Departments of Economics and Agricultural and Resource Economics. Additionally, outstanding practitioners from private practice and government—lawyers, economists, bankers, businessmen—have acted as adjunct faculty to provide an applied perspective through lectures, simulations and case studies.

### Graduate Study

The Graduate Group in International Commercial Law offers a program of study and research leading to the LL.M. degree through a summer only program. Students are required to take 40 quarter units of study over two, three, four, or five summers. The classes are taught in an intensive format of 20 hours per week or four hours per day, two hours of lecture in the morning, two hours in the afternoon. Candidates begin the program by examining the fundamentals of the U.S. legal system with special emphasis on business and trade law. They complete the Orientation in U.S.A. Law program, two of the specialized programs in international commercial law and the American Legal System Research Seminar. In addition, participants take intensive elective

courses with an international perspective designed specifically for the master's degree program. Students also complete a capstone writing project. Elective courses then provide in-depth study in focused topics such as private international law, conflict of laws, intellectual property, business associations, antitrust, tax, securities and finance and the like. Students also complete a research paper.

### Preparation

International applicants must submit satisfactory evidence of completion of a degree program or equivalent involving academic legal training at an accredited educational institution. Applicants from the United States must have completed a bachelor's degree plus a J.D. I.I.B., or equivalent degree from an accredited United States law school. A period of law practice or legal experience and/or advanced legal studies is preferred but not required.

**Graduate Advisers.** Beth Greenwood (*International Programs, School of Law*), Dan Simmons (*School of Law*)

### Courses in International Commercial Law (ICL)

ICL courses are taught in an intensive format during the summer special session. For more information, contact the International Law Programs at 530-752-6081 or [ilm@ucdavis.edu](mailto:ilm@ucdavis.edu).

### Graduate

#### 201. Orientation in United States Law (7)

Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Investigation of the Common Law System of the United States. Includes structure of the U.S. government, Constitutional law, contracts, torts, real property, consumer law, securities law, intellectual property, antitrust, taxation, labor law, environmental law, ethics, remedies, legal research and trial practice.

#### 201A. Fundamentals in United States Law (4)

Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Investigation of the Common Law System of the U.S. Includes the American constitutional system, the American judiciary, the American civil trial, and foundational substantive and procedural law such as real property, torts, criminal law and procedure, civil procedure, and contracts.

#### 201B. Advanced Topics in United States Law (3)

Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Orientation to advanced topics in U.S. law: Intellectual Property (including copyright and trademarks), Commercial and Consumer Law, Advanced Contracts, Antitrust, Taxation, Remedies, Labor Law, Environmental Law, Dispute Resolution, Remedies and introduction to trial techniques and legal research/writing.

#### 202. Introduction to Contracts (4)

Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Examines sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands.

#### 202A. Introduction to Contracts Formation (2)

Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Examines formation of the sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands.

#### 202AS. Introduction to Contracts Formation (2)

Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Examines formation of the sorts of promises that are enforced and the nature of protection given promissory obligations in

both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands. Offered irregularly.

#### 202B. Contracts Performance (2)

Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Examines issues of performing promises that are enforceable and possible breach of promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands.

#### 202BS. Contracts Performance (2)

Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent; course 202A or equivalent. Examines issues of performing promises that are enforceable and possible breach of promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands. Offered irregularly.

#### 203. Civil Procedure (2)

Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Study of the fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes.

#### 204. International Joint Ventures (3)

Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent; course 201. International and U.S. business and legal transactions. Legal planning, problem solving, decision making and negotiations related to the break-up and dissolution of a major international joint venture. U.S. laws including finance, tax, bankruptcy, labor, antitrust, environmental, corporate structures and intellectual property.

#### 205. Introduction to Constitutional Law (4)

Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government.

#### 205A. Overview of US Constitutional Law (2)

Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government.

#### 205AS. Overview of US Constitutional Law (2)

Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government.

#### 205B. Constitutional Law—Protection of Individual Rights (2)

Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Principles, doctrines and controversies regarding the U.S. Constitution Bill of Rights, including due process of law, equal protection, freedom of expression, freedom of religion, state action, and congressional legislation in aid of civil rights and liberties.

#### 211. Negotiations and Alternative Dispute Resolution (1)

Lecture/discussion—10 hours. Prerequisite: course 201; law school education or the equivalent. Mechanisms for resolving disputes including the alterna-

tives to litigation such as negotiation, mediation, and arbitration. Advantages and disadvantages of each approach.

### **212. Introduction to Negotiation (2)**

Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Introduction to theoretical and empirical approaches to negotiation for the purposes of making deals and resolving legal disputes.

### **212S. Introduction to Negotiation (2)**

Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Introduction to theoretical and empirical approaches to negotiation for the purposes of making deals and resolving legal disputes.

### **214. Advanced Negotiation (2)**

Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Principles and empirical approaches to advanced negotiations including negotiation framework, models, styles, multiple party/issue negotiations and settlements.

### **214S. Advanced Negotiation (2)**

Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Principles and empirical approaches to advanced negotiations including negotiation framework, models, styles, multiple party/issue negotiations and settlements.

### **215. Business Associations (4)**

Lecture/discussion—20 hours. Prerequisite: course 201; law school education or the equivalent. Legal rules and concepts applicable to business associations including general partnerships, joint ventures, limited partnerships, limited liability entities, and sole proprietorships.

### **215S. Business Associations (4)**

Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent; course 201. Legal rules and concepts applicable to business associations including general partnerships, joint ventures, limited partnerships, limited liability entities, and sole proprietorships. Offered irregularly.

### **216. International Business Transactions (2)**

Lecture/discussion—20 hours. Prerequisite: course 201; law school education or the equivalent. Legal problems arising from international business transactions. Focus on international sales contracts, choice of law, forum selection clauses, letters of credit, transfers of technology, regulation of bribery, development of joint ventures, repatriation of profits, foreign exchange problems, and national efforts to control imports.

### **217. Alternative Dispute Resolution (2)**

Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Introduces students to a wide variety of alternative dispute resolution procedures, with an in-depth emphasis on negotiation, mediation and arbitration.

### **219. Advanced Writing Project (4)**

Project. Prerequisite: course 201, law school education or the equivalent. The completion of a written research project under the active supervision of a faculty member in satisfaction of the research-writing requirement. (S/U grading only.)

### **220. United States Taxation of Multinational Investments (2)**

Lecture/discussion—20 hours. Prerequisite: course 201; law school education or the equivalent. An analysis of the United States taxation of multinational investments including jurisdiction of tax, the U.S. tax system, foreign tax credits, treaties, and transfer pricing.

### **227. Criminal Procedure (2)**

Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Federal constitutional limits on government authority to gather evidence and investigate crime. Includes Fourth Amendment limits on search, seizure, and arrest; Fifth Amendment privilege against self-incrimination; Sixth Amendment right to counsel.

### **228A. Mergers and Acquisitions Law (2)**

Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Practical approach to mergers and acquisitions with an in-depth look at the planning, negotiation and completion of mergers and acquisitions.

### **228AS. Mergers and Acquisitions Law (2)**

Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent. Practical approach to mergers and acquisitions with an in-depth look at the planning, negotiation and completion of mergers and acquisitions.

### **236. United States Securities Law and Regulation (2)**

Lecture/discussion—20 hours. Prerequisite: course 201; law school education or the equivalent. Structural and jurisdictional issues associated with securities practice. Topics include the regulation of public offerings, transactions by corporate insiders, regulation of corporate disclosure and conduct, and the liabilities of corporations and individuals under anti-fraud provisions.

### **239. Mediation (2)**

Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Introduction to the mediation process. Development of communication skills, the ability to analyze disputes, to understand why mediations succeed or fail, and understand the advantages and limitations of mediation as a method of resolving disputes.

### **242. Private International Law (2)**

Lecture/discussion—20 hours. Prerequisite: course 201; Law School education or equivalent. Operating law across national borders; emphasis on methods of resolving international disputes. International aspects of jurisdiction, choice of law, judgment enforcement, forum choice, process service, taking of evidence, foreign sovereign immunity, extraterritorial regulation of antitrust, securities; other national laws.

### **242S. Private International Law (2)**

Lecture/discussion—20 hours. Prerequisite: course 201; Law School education or equivalent. Operating law across national borders; emphasis on methods of resolving international disputes. International aspects of jurisdiction, choice of law, judgment enforcement, forum choice, process service, taking of evidence, foreign sovereign immunity, extraterritorial regulation of antitrust, securities; other national laws.

### **247. Banking Law (1)**

Lecture/discussion—10 hours. Prerequisite: course 201; law school education or the equivalent. Institutional features of international banking transactions, the structure of large financial deal, and the mechanics of overseeing large loans. Emphasis on negotiable instruments such as bills of lading, letters of credit, standby letters of credit, and interbank transactions.

### **249. Comparative Law (1)**

Lecture/discussion—10 hours. Prerequisite: course 201; law school education or the equivalent. A comparative study of the development of schools of legal thought, chiefly Common law systems and Civil law traditions. Attention to the historical reasons for their divergence, contemporary approaches to universal problems such as succession, torts, and contracts, the cross-fertilization of laws and difficulties commonly associated with importing foreign law into new territory.

### **250. International Trade Law (3)**

Lecture/discussion—20 hours. Prerequisite: course 201; law school education or the equivalent. An investigation of global trading systems including international trade in goods and services, e-commerce, international intellectual property, international tax planning and investment. Includes substantive and procedural provisions of the World Trade Organization (WTO) and the North American Free Trade Agreement (NAFTA). Offered in alternate years.

### **251. United States Litigation Issues (1)**

Lecture/discussion—10 hours. Prerequisite: course 201; law school education or the equivalent. Prevention and resolution of disputes in international commerce. Emphasis on preparing for a trial in the United States. Includes the study of pre-trial motions, jury selection, opening statements, rules of evidence, closing arguments, and the selection of appropriate strategies.

### **262. Antitrust (1)**

Lecture/discussion—10 hours. Prerequisite: course 201; law school education or the equivalent. Historical and institutional background of antitrust law in the United States. The statutory framework including price fixing, limits on distribution, monopolization and mergers, and reporting requirements.

### **270. Financing International Transactions (3)**

Lecture/discussion—20 hours. Prerequisite: course 201; law school education or the equivalent. How capital is raised in international markets. Investment strategies for U.S. markets. Taxation of financial investments, international currency regulation, and assessing rates of return on international investments.

### **274. Intellectual Property (2)**

Lecture/discussion—20 hours. Prerequisite: course 201; law school education or the equivalent. Intensive study of intellectual property law. Including copyright, trademark and patent law and unfair competition.

### **274S. Intellectual Property (2)**

Lecture/discussion—20 hours. Prerequisite: Law School or equivalent; course 201. Intensive study of intellectual property law. Including copyright, trademark and patent law and unfair competition.

### **283. Contract Remedies (2)**

Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Covers a range of remedies for contract breach: remedies under common law and equity, liquidated damages clauses, remedies for mistake and unconscionability as well as breach of contract for the Sale of Goods under UCC Article II.

### **283S. Contract Remedies (2)**

Lecture/discussion—20 hours. Prerequisite: Law School education or equivalent; course 202A, 202B or equivalent. Covers a range of remedies for contract breach: remedies under common law and equity, liquidated damages clauses, remedies for mistake and unconscionability as well as breach of contract for the Sale of Goods under UCC Article II.

### **285. Environmental Law (2)**

Lecture/discussion—20 hours. Prerequisite: Law school education or the equivalent. Introduction to federal and state environmental law. Historical development of environmental law; the role of courts, the legislature and the executive branch in the development and implementation of environmental policy. Review of major statutes.

### **289. Licensing Academy in Intellectual Property & Technology (4)**

Lecture/discussion—20 hours. Prerequisite: course 201. Law School education or equivalent. Intellectual property as it relates to current forms of legal protection and how new innovations fit into these models, including public-private technology transfer, patents, institutional objectives, technology transfer offices, startups, and licenses.

### **290. American Legal System Research Seminar (1)**

Seminar—5 hours. Prerequisite: course 201, law school education or equivalent. American legal system and its structure. Legal research methodologies and presentation with attention to analysis, synthesis, organization, and editing techniques common to legal writing. (S/U grading only.)

### **291C. International Commercial Law Seminar (4)**

Lecture/discussion—20 hours. Prerequisite: course 201; Law School education or equivalent. Advanced seminar on a current topic in International Commer-

cial Law. Offered at the University of Cologne in Cologne, Germany for two weeks each summer. May be repeated three times for credit when topic differs.

### **292. International Commercial Law Seminar (1-4)**

Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Advanced seminar in a current topic in International Commercial Law. Topic will change each year the course is offered. May be repeated two times for credit when topic differs.

### **292S. International Commercial Law Seminar (1-4)**

Lecture/discussion—20 hours. Prerequisite: Law school education or equivalent. Advanced seminar in a current topic in International Commercial Law. Topic will change each year the course is offered. May be repeated two times for credit when topic differs.

### **299. Advanced Research in Legal Problems (1-4)**

Prerequisite: course 201; law school education or the equivalent. Permission of supervising instructor. Student individualized research projects under faculty supervision. (S/U grading only.)

## **International Relations**

See Political Science, on page 519.

## **International Science Studies**

This interdisciplinary minor in International Science Studies will introduce College of Agricultural and Environmental Sciences students to global issues, which affect their major disciplines in the current world, and also provide an opportunity to gain first hand experience abroad when appropriate. The goal of this minor is to enable our college students to develop greater international competence and to enhance their employability.

The minor assumes that the student will have a major in the sciences, and that classes taken under one of the three tracks in the minor will contribute depth to the existing major or establish depth in a selected additional field of study. Students will be expected to work closely with an academic adviser in developing an intellectually coherent program of the study. A minimum of 18 units of upper division work is required. Only a single course can be counted toward both major and minor and no course can be used to satisfy the requirements of more than one minor.

### **Minor Program Requirements:**

	UNITS
<b>International Science Studies.....</b>	<b>24</b>
Global issue course requirement .....	7-8
Focusing on broad range of global issues and their impacts on ecological and environmental resources and biodiversity, in addition to international policy and economics. Beyond the courses taken under each track, choose two out of the three courses listed below:	
(1) Atmospheric Science 116	
(2) Plant Sciences 150	
(3) Agricultural and Resource Economics 115B	
Select one of the following tracks .....	16-17

Education Abroad Program courses taught overseas and relevant international internship activities will count towards the minor requirement with adviser's approval. For each track, students can take a maxi-

mum of three units from EAP courses, with a valid transcript, and three units from relevant international internship activities. The international internship activities would require a pre-approved study plan with the academic adviser before the maximum of three units can be awarded. Language and culture related courses are encouraged, but not required for the minor.

(1) *Ecological, environmental, and energy studies track:* Select 16-17 units from Anthropology 103, Agricultural and Resource Economics 147, Atmospheric Science 116, 133, Environmental Science and Management 100, 121, 131, 144, 120, 30, Environmental Science and Policy 100, 116, 151, Evolution and Ecology 147, Soil Science 109, Hydrology 143

(2) *Policy and management focus track:* Select 16-17 units from Agricultural and Resource Economics 115A/B, Agricultural and Resource Economics 138, International Relations 190, Community and Regional Development 156, 180, International Agricultural Development 160, 162, 170, Environmental Science and Policy 102, 175

(3) *Agriculture, food, and fiber systems track:* Select 16-17 units from Anthropology 103, 130, Atmospheric Science 133, Community and Regional Development 153A/B, Environmental Science and Management 121, 131, Evolution and Ecology 138, Hydrology 124, Plant Sciences 150, 160, Food Science and Technology 108, 109, Nutrition 119A/B, Textiles and Clothing 174

**Minor Adviser.** Shu-Hua Chen (*Land, Air and Water Resources*) 530-752-1822,  
[shachen@ucdavis.edu](mailto:shachen@ucdavis.edu)

## **Internship**

See Internship Program, below; and UC Washington Center (UCDC), on page 576.

## **Internship Program**

Marcie Kirk Holland, Director

The Internship and Career Center;  
2nd Floor, South Hall 530-752-2855  
<http://icc.ucdavis.edu>

### **Program Areas**

Agricultural and Environmental Sciences, Career Recruiting Programs, Engineering and Physical Sciences, Masters, Ph.D.s and Postdocs, Health and Biological Sciences, International Programs and Liberal Arts and Business.

### **Internship Experience**

The Internship and Career Center facilitates a campus-wide internship program. All internships, both credit and non-credit, can be taken for Transcript Notation with completion of required evaluation reports. The notation briefly describes the nature and location of the internship experience. Questions pertaining to Transcript Notation may be directed to The Internship and Career Center.

**Course Credit.** Internship courses (numbered 92 and 192) are available for credit on a variable-unit and Passed/Not Passed grading basis. A maximum of 12 units of 92 and/or 192 courses may be counted toward the 180-unit minimum needed for graduation. To qualify for the 192 course, students must have acquired 64 units of credit. All credited internships require approval and sponsorship by a faculty member from an appropriate discipline. Arrangements may be made through the department of the sponsoring faculty member and facilitated by The Internship and Career Center Staff.

## **Italian**

(College of Letters and Science)

Noah Guynn, Ph.D., Chairperson of the Department  
**Department Office.** 213 Sproul Hall  
530-752-1219; <http://italian.ucdavis.edu>

### **Faculty**

Margherita Heyer-Caput, Ph.D., Professor  
Juliana Schiesari, Ph.D., Professor  
(Comparative Literature, French and Italian)

### **Emeriti Faculty**

Antonella Bassi, M.A., Lecturer Emerita  
JoAnn Cannon, Ph.D., Professor Emerita  
Dennis Dutschke, Ph.D., Professor Emeritus  
Gustavo Foscarini, M.A., Senior Lecturer Emeritus

### **Affiliated Faculty**

Carmen Gomez, Ph.D., Lecturer  
Jay Grossi, M.A., Lecturer

### **The Major Program**

The major in Italian provides a solid language background that will enable the student to develop an appreciation for the numerous contributions Italians and Italophones have made to literature, the arts, political theory, science, and other expressions of human creativity. The major also emphasizes the influence Italian culture continues to have on our global world.

**The Program.** The Italian program is geared to the specific needs and interests of the students, who enjoy the advantages of a small classroom setting and the individualized mentoring of dedicated professors. While the use of Italian is stressed in language and literature courses, the program is interdisciplinary in nature. Starting at the lower-division level, students collaborate closely with academic advisers in order to design a major or minor curriculum that includes culture, film, art history, history, food science, and other courses in related fields offered on campus or in Italy. The Italian program actively participates in the UC-wide Education Abroad Program, the Quarter Abroad Program (Florence), the International Internships Program, and the Summer Sessions International (Rome), all of which offer opportunities for travel and study in Italy.

**Career Alternatives.** The Italian Program provides a solid foundation for a variety of career paths by offering training in Italian language and culture and developing skills that are vital in any professional setting: critical analysis, interpersonal skills, effective written and oral communication, and cultural sensitivity. In addition to specific career paths in foreign service and education, knowledge of the Italian language and culture enhances professional opportunities in a variety of fields, such as viticulture and enology, food science, political science, medicine, architecture, and engineering.

### **A.B. Major Requirements:**

UNITS

<b>Preparatory Subject Matter .....</b>	<b>0-27</b>
Italian 1, 2, 3, 4, 5, and 9 (or the equivalent) .....	0-27

<b>Depth Subject Matter .....</b>	<b>36</b>
-----------------------------------	-----------

Italian 101 and 105 .....	8
Seven additional courses in Italian, literature, cinema, and culture .....	28

Must include at least one course from two of the following literary periods (taught in Italian):	
--	--

(a) Early Italian Literature: Italian 112, 113, 114, 145, if applicable	
---	--

(b) Renaissance and Baroque Italian Literature: Italian 115A, 115B, 115C, 115D, 141, 145, if applicable	
---	--

(c) Modern and Contemporary Italian Literature: Italian 118, 119, 120A, 120B, 131, 142, 145, if applicable	
--	--

Upper division General Education courses in Italian may fulfill this requirement with approval of the major adviser.

The remaining five upper-division elective courses may include, but are not limited to, additional Italian literature or culture taught in Italian, Italian culture courses taught in English, and/or upper-division elective courses in related fields, such as Italian and Italian American Cinema (Italian 150, Italian/Film Studies 121, Film Studies 120), and other courses in Italian Studies taught in other departments and programs, subject to approval by the major adviser.

All upper division courses are to be chosen in consultation with the major adviser.

#### Total Units for the Major ..... 36-63

#### Recommended

Study abroad in Italy for a period of one year, one semester, or one quarter, and/or the study of Latin or another Romance language.

**Major Adviser.** M. Heyer-Caput

#### Minor Program Requirements:

##### UNITS

##### Italian ..... 20

Italian 101 and 105 ..... 8

Three additional upper division courses in Italian literature, cinema, and culture ..... 12

One course chosen from two of the following three areas:

- (a) Early Italian Literature: Italian 112, 113, 114, 145, if applicable
- (b) Renaissance and Baroque Italian Literature: Italian 115A, 150B, 150C, 150D, 141, 145, if applicable
- (c) Modern and Contemporary Italian Literature: Italian 118, 119, 120A, 120B, 131, 142, 145, if applicable).

The remaining two upper-division elective courses may include, but are not limited to, additional Italian literature or culture taught in Italian, such as Italian 104 and Italian 128, and Italian culture and film courses taught in English, such as Italian 150, Italian/Film Studies 121, Film Studies 120, subject to approval by the minor adviser.

**Minor Adviser.** M. Heyer-Caput

**Honors and Honors Program.** Candidates for high or highest honors in Italian must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in Italian 194H (3 units) and Italian 195H (3 units). Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of the junior year (135 units), have attained a cumulative grade-point average of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in Italian are in addition to the regular requirements for the major in Italian.

**Education Abroad Program.** The department of French and Italian strongly encourages students to study abroad in the Summer Abroad program (Rome), the Quarter Abroad Program (Florence), or the Education Abroad Program. Applicable courses are accepted for credit in the major or the minor programs.

**Teaching Credential Subject Representative.** See the Major Adviser above; see the Teaching Credential/M.A. Program on page 124.

**Prerequisite Credit.** Credit will not normally be given for a course if it is a prerequisite of a course already successfully completed. Exceptions can be made only by the major adviser.

**Quarter Abroad Program.** The UC Davis Quarter Abroad Program and the Italian Program offer an exciting Italian Language and Culture Program in Florence, Italy. While studying abroad in Florence, students will earn 23-28 UC Davis quarter units and

will experience the richness and vitality of Italian and European culture.

Participants fulfill three-quarters-worth of Italian language study, enroll in culture and film courses, integrate into the Florentine community through meaningful internships (with transcript notation), and explore electives in areas such as art history, photography, and food science.

There is no language requirement, and all registered UC Davis students with 2.000 GPA and above, good academic standing, and good disciplinary standing are eligible to apply.

For more information, please contact Professor Margherita Heyer-Caput at [mheyercaput@ucdavis.edu](mailto:mheyercaput@ucdavis.edu) or see <https://studyabroad.ucdavis.edu/programs/quarterabroad/italy.html>.

#### Courses in Italian (ITA)

#### Lower Division

Students offering high school language preparation as a prerequisite must take a placement test.

##### 1. Elementary Italian (5)

Discussion—5 hours; laboratory—1 hour. Introduction to Italian grammar and development of all language skills in a cultural context with special emphasis on communication. Students who have successfully completed Italian 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed. Not open for credit to students who have taken course 1A or 1S. GE credit: ArtHum | AH, WC.

##### 1A. Accelerated Intensive Elementary Italian (15)

Lecture/discussion—15 hours. Special 12-week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to Italian grammar and development of all language skills in a cultural context with emphasis on communicative ability. Not open for credit to students who have completed courses 1, 2, or 3. Offered irregularly.

##### 1S. Elementary Italian (5)

Discussion—5 hours; laboratory—1 hour. Introduction to Italian grammar and development of all language skills in a cultural context with special emphasis on communication. Course is taught abroad. Students who have successfully completed Italian 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed. Not open for credit to students who have taken course 1 or 1A. GE credit: ArtHum | AH, WC. —F. (F.) Heyer-Caput

##### 2. Elementary Italian (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1 or 1S. Continuation of course 1 or 1S. Review of grammar and vocabulary, and practice of all language skills through cultural texts. Not open for credit to students who have taken course 1A or 2S. GE credit: ArtHum | AH, WC.

##### 2S. Elementary Italian (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1 or 1S. Continuation of course 1 or 1S. Review of grammar and vocabulary, and practice of all language skills through cultural texts. Course is taught abroad. Not open for credit to students who have completed course 1A or 2. GE credit: ArtHum | AH, WC. —F. (F.) Heyer-Caput

##### 3. Elementary Italian (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 2 or 2S. Continuation of course 2 or 2S. Review of grammar and vocabulary, and practice of all language skills through cultural texts. Not open for credit to students who have taken course 1A or 3S. GE credit: ArtHum | AH, WC.

#### 3S. Elementary Italian (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 2 or 2S. Continuation of course 2 or 2S. Review of grammar and vocabulary, and practice of all language skills through cultural texts. Course is taught abroad. Not open for credit to students who have taken course 1A or 3. GE credit: ArtHum | AH, WC. —F. (F.) Heyer-Caput

#### 4. Intermediate Italian (4)

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: course 3 or 3S. Review of grammar and syntax through written exercises and short prose works. Intended to develop the linguistic foundations of students who have completed the first year language classes. GE credit: WC.

#### 4S. Intermediate Italian (4)

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: course 3, 3S, or the equivalent. Review of grammar and syntax through written exercises and readings of short prose works. Intended to develop the linguistic foundations of students who have completed the first year language classes. This course is taught abroad. Not open for credit to students who have completed course 4. GE credit: WC. —F. S. (F. S.) Heyer-Caput

#### 5. Intermediate Italian (4)

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: course 4 or 4S. Review and study of grammar and syntax, readings of short prose works, and written exercises. Intended to prepare students to read, understand, and discuss modern Italian. GE credit: WC.

#### 5S. Intermediate Italian (4)

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: course 4 or 4S. Review and study of grammar and syntax, readings of short prose works, and written exercises. Intended to prepare students to read, understand, and discuss modern Italian. Course is taught abroad. Not open for credit to students who have completed course 5. GE credit: WC. —F. S. (F. S.) Heyer-Caput

#### 8A. Italian Conversation (3)

Discussion—3 hours. Prerequisite: course 3 or the equivalent. Course designed to offer practice in speaking Italian. May be repeated one time for credit. (P/NP grading only.) GE credit: WC. —F. S. (F. S.)

#### 8AS. Italian Conversation (3)

Discussion—3 hours. Prerequisite: course 3 or the equivalent. Practice in the speaking of Italian. Course is taught abroad. May be repeated for up to 6 units of credit. Not open for credit to students who have completed course 8. (P/NP grading only.) GE credit: WC.

#### 8B. Italian Conversation (3)

Discussion—3 hours. Prerequisite: course 8A. Course designed to offer practice in speaking Italian. (P/NP grading only.) GE credit: WC.

#### 8BS. Italian Conversation (3)

Discussion—3 hours. Prerequisite: course 8B. Practice in the speaking of Italian. Course is taught abroad. May be repeated for up to 6 units of credit. Not open for credit to students who have completed course 8B. (P/NP grading only.) —F. Heyer-Caput

#### 9. Reading Italian (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 5. Reading and discussion of modern Italian prose, including selections from creative, scientific and journalistic writings. Introduction to contemporary Italian literature and culture. Strengthening the student's command of the Italian language. GE credit: ArtHum | AH, WC.

#### 9S. Reading Italian (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 5 or 5S. Reading and discussion of modern Italian prose, including selections from creative, scientific and journalistic writings. Introduction to contemporary Italian literature and culture as well as strengthening the student's command of the Italian language. This course is taught abroad. Not open

for credit to students who have completed course 9. GE credit: ArtHum | AH, WC.—F, S. (F, S.) Heyer-Caput

### **50. Studies in Italian Cinema (4)**

Lecture—2 hours; discussion—1 hour; term paper. Lower division standing. Introduction to Italian cinema through its genres. Focus is on cinema as a reflection of and a comment on modern Italian history. Film will be studied as an artistic medium and as a form of mass communication. Offered irregularly. ArtHum, Wrt | AH, WC, WE.—Heyer-Caput

### **90X. Lower Division Seminar (1-2)**

Seminar—1-2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Italian language or culture (such as Italian culture seen through film, Italian feminism, literature, or politics) through shared readings, discussions, written assignments, or special activities such as film screening or laboratory work.

### **98. Directed Group Study (1-5)**

Prerequisite: lower division standing and consent of instructor. Primarily intended for lower division students. Offered irregularly. (P/NP grading only.)

## **Upper Division**

### **101. Advanced Conversation, Composition, and Grammar (4)**

Lecture—3 hours. Prerequisite: course 9 or 9S or consent of instructor or the equivalent. GE credit: ArtHum | AH, OL, WC, WE.—Heyer-Caput

### **101S. Advanced Composition, Conversation and Grammar (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 9 or 9S or the equivalent. Instruction and practice in expository writing in Italian, with emphasis on advanced grammar, organization, and vocabulary building. Course will be taught in Italy. Not open for credit to students who have completed course 101. GE credit: ArtHum | AH, OL, WC, WE.—F. (F.) Heyer-Caput

### **104. Italian Translation and Style (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or 9S; consent of instructor. Practice in translation from Italian to English and English to Italian, using literary and non-literary texts of different styles. Analysis of linguistic problems and elements of style contained in the translation material. GE credit: AH, WC.—Gomez

### **104S. Translation and Style (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or 9S. Practice in translation from Italian to English and English to Italian, using literary and non-literary texts of different styles. Analysis of linguistic problems and elements of style contained in the translation material. Course will be taught abroad. Not open for credit to students who have completed course 104. GE credit: ArtHum | AH, WC.—F. (F.) Heyer-Caput

### **105. Introduction to Italian Literature (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or 9S; consent of instructor. Introduction to the study of the principal authors, works, and movements of the Medieval, Renaissance, and Early Modern periods in Italy. GE credit: ArtHum | AH, OL, WC.—Heyer-Caput

### **107. Survey of Italian Culture and Institutions (4)**

Lecture—3 hours; term paper. Assessment of the impact of regional autonomy on Italian cultural life from the Middle Ages to the present. Special emphasis will be placed upon achievements in literature, the arts, philosophy, and socio-political institutions. To be taught in English. GE credit: ArtHum or SocSci | AH, OL, SS, VL, WC, WE.—Grossi

### **107S. Survey of Italian Culture and Institutions (4)**

Lecture/discussion—3 hours; term paper. An assessment of the impact of regional autonomy on Italian cultural life from the Middle Ages to the present. Special emphasis will be placed upon achievements in literature, the arts, philosophy, and socio-political institutions. To be taught in English. Not open for

credit to students who have completed course 107. GE credit: ArtHum or SocSci | AH, OL, SS, VL, WC, WE.—S. (S.) Heyer-Caput

### **108. Contemporary Issues in Italian Culture and Society (4)**

Lecture/discussion—3 hours; term paper. Analysis of cultural issues in contemporary Italy: Myth and reality of imagined Italies; Italian identities; immigration and race relations; the media and popular culture. Taught in English. GE credit: ArtHum or SocSci, Div, Wrt | AH, OL, SS, VL, WC, WE.

### **108S. Contemporary Issues in Italian Culture and Society (4)**

Lecture/discussion—3 hours; term paper. Analysis of cultural issues in contemporary Italy; myth and reality of imagined Italies; Italian identities; immigration and race relations; the media and popular culture. Taught in English. This course will be taught abroad. Not open for credit to students who have completed course 108. GE credit: ArtHum or SocSci, Div, Wrt | AH, OL, SS, VL, WC, WE.—S. (S.) Heyer-Caput

### **112. Medieval and Renaissance Poetry: St. Francis to Petrarch (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or 9S or the equivalent; consent of instructor. Study of the origins of Italian religious and secular poetry of the 13th and 14th centuries. A diversified poetry is illustrated in works of St. Francis, Dante, Cavalcanti, Petrarch, the Sicilian School, the Sweet New Style Poets, and other authors. GE credit: ArtHum | AH, OL, WC, WE.

### **113. Dante Alighieri, *Divina Commedia (Inferno, Purgatorio, Paradiso)* (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or 9S or equivalent; consent of instructor. Study of Dante Alighieri's *Divina Commedia*, and its role in the development of Italian language and literature. Emphasis will be placed on reading the whole poem within the historical context of the Middle Ages. GE credit: ArtHum | AH, OL, WC, WE.

### **114. Boccaccio, *Decameron*, and the Renaissance Novella (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or 9S or the equivalent.; consent of instructor. Study of the development of the short story in Italy, as exemplified in Giovanni Boccaccio's *Decameron*, in his predecessors and Renaissance followers. GE credit: ArtHum | AH, OL, WC, WE.—Heyer-Caput

### **115A. Studies in the Cinquecento (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or 9S or consent of instructor or the equivalent. Analysis of key texts from the high moment of the Italian Renaissance. The political and aesthetic legacy of humanism will be foregrounded in relation to authors such as Ficino, Ariosto, Machiavelli, Ariosto, Castiglione, and Tasso. GE credit: ArtHum | AH, OL, WC.—Schiesari

### **115B. Italian Literature of the Renaissance and the Baroque: From Cellini to Marino (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 115A. Continued examination into the loss of an ideal. Emphasis on the conflicts in Michelangelo and Tasso leading to Marino, with an excursus on Galileo's role in the formation of a modern literary standard. GE credit: ArtHum | OL.—Schiesari

### **115C. Italian Drama from Machiavelli to the Enlightenment (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Development of comic and tragic forms as critical representations of their societal and historical contexts, i.e. Machiavelli and the logic of power, Baroque dramatists in the service of counter-reformation Italy, Goldoni's comedies and bourgeois social consciousness. GE credit: ArtHum | AH, OL, WC.

### **115D. Early Modern Italian Lyric (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or 9S or consent of instructor. Examination of the poetic tradition influenced by Petrarch.

Consideration of the relation between gender and genre in such poets as Petrarch, Bembo, della Casa, Tasso, Marino, Gaspara Stampa, Veronica Franco, Isabella di Morra. GE credit: ArtHum | AH, WC, WE.—Schiesari

### **118. Italian Literature of the Eighteenth Century (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or 9S or consent of instructor. Development of modern Italian literature. Emphasis on the work of Goldoni, Bettinelli, Baretti, Parini, Alfieri and Vico. GE credit: ArtHum | AH, OL.

### **119. Italian Literature of the Nineteenth Century (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or 9S or consent of instructor. Romanticism in Italy, including Manzoni, Verga, and Verismo. GE credit: ArtHum | AH, OL, WC, WE.—Heyer-Caput

### **120A. Italian Literature of the Twentieth Century: The Novel (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Development of the novel from Svevo to the present. Emphasis on the work of Svevo, Levi, Moravia, Pavese, and Vittorini. GE credit: ArtHum, Wrt | AH, WC, WE.—Heyer-Caput

### **120B. Italian Literature of the Twentieth Century: Poetry and Drama (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Italian poetry with emphasis on Hermeticism; the theater of Luigi Pirandello and its role in the development of contemporary Italian drama. GE credit: ArtHum | AH, WC, WE.—Heyer-Caput

### **121. New Italian Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1 and upper-division standing, or consent of instructor. Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. (Same course as Film Studies 121.) GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—Heyer-Caput

### **121S. New Italian Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1 and upper-division standing, or consent of instructor. Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. (Same course as Film Studies 121S.) GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—F. (F.) Heyer-Caput

### **122. Topics in Italian Culture (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 9 or 9S or consent of instructor. In-depth study of a particular topic in Italian Culture. Topics include: Italian Cities; Church and State; the "Southern Question"; Fascism and Resistance; 1968: Counter Culture, Feminism and Terrorism; Multicultural Italy. May be repeated one time for credit when topic differs. GE credit: ArtHum | AH, OL, WC, WE.—Bassi

### **131. Autobiography in Italy (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or 9S or consent of instructor. The development of representations of selfhood with particular attention to generic conditions, the confessional tradition and the problem of women's self-representation. Authors studied may include Petrarch, Tasso, Casanova, Alfieri, Zvezok, Sibilla Aleramo and Primo Levi. GE credit: ArtHum | AH, OL, WC, WE.—Heyer-Caput, Schiesari

### **139B. Italian Literature in English: Boccaccio, Petrarch and the Renaissance (4)**

Lecture/discussion—3 hours; term paper. Petrarch and Boccaccio and their relations to the Middle Ages and the Renaissance; the Renaissance, with

particular attention to the works of Lorenzo de' Medici, Leonardo da Vinci, Machiavelli, Ariosto, Michelangelo, and Tasso. GE credit: ArtHum | AH, OL, WC, WE.

#### **140. Italian Literature in English**

##### **Translation: Dante, Divine Comedy (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: any course from the GE Literature Preparation List. Reading of Dante Alighieri's Divine Comedy, through the otherworld realms of Inferno, Purgatory, and Paradise. GE credit: ArtHum, Wrt | AH, OL, WC, WE.

#### **141. Gender and Interpretation in the Renaissance (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: completion of entry level writing requirement. Critical analysis of Renaissance texts with primary focus on issues such as human dignity, education and gender politics; "high" and "low" culture and its relation to literary practices. (Same course as Comparative Literature 138.) GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Schiesari

#### **142. Masterpieces of Modern Italian Narrative (4)**

Lecture—1.5 hours; discussion—1.5 hours; term paper. Prerequisite: either English 3, Comparative Literature 2, or History 4C. Analysis of major works of Italian narrative fiction from unification of Italy to present. Students will learn to use representative methods and concepts which guide literary scholarship. Consideration of works within European social and cultural context. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE.—Heyer-Caput

#### **145. Special Topics in Italian Literature (4)**

Lecture/discussion—4 hours. Prerequisite: course 9 or 9S or consent of instructor. Study of special topics and themes in Italian literature, such as comic literature, epic poetry, pre-twentieth century theater, fascism, futurism, women and literature, and the image of America, etc. May be repeated for credit when topic differs. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE.

#### **145S. Special Topics in Italian Literature (4)**

Lecture/discussion—4 hours. Prerequisite: course 9 or 9S or consent of instructor. Study of special topics and themes in Italian literature, such as comic literature, epic poetry, pre-twentieth-century theater, fascism, futurism, women and literature, the image of America, etc. Course is taught abroad. May be repeated for credit. Not open for credit to students who have completed course 145. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE.—F. (F.)

#### **150. Studies in Italian Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: consent of instructor. Introduction to Italian cinema through its genres. Focus on cinema as a reflection or a comment on modern Italian history. Film as an artistic medium and as a form of mass communication. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Heyer-Caput

#### **190X. Upper Division Seminar (1-2)**

Seminar—1-2 hours. Prerequisite: upper division standing and consent of instructor. Limited enrollment. Examination of a special topic in Italian language or culture through shared readings, discussions, written assignments or special activities such as film screening or laboratory work. May not be repeated for credit. GE credit: ArtHum | AH, WC, WE.

#### **192. Italian Internship (1-12)**

Internship—3-36 hours. Prerequisite: upper division standing and consent of chairperson of Italian Department. Participation in government and business activities to gain work experience and to develop a better knowledge of Italian language and culture. (P/NP grading only.)

#### **192S. Italian Internship (1-12)**

Internship—3-36 hours. Prerequisite: upper division standing, consent of instructor and UC Davis program director or chairperson of Italian Department. Participation in community service, teaching, government, and business activities to gain work experi-

ence and to develop a better knowledge of Italian language and culture. This course is offered abroad. (P/NP grading only.)—Heyer-Caput

#### **194H. Special Study for Honors Students (3)**

Independent study—3 hours. Prerequisite: open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Italian literature, civilization, or language studies. (P/NP grading only.) GE credit: AH, WC.

#### **195H. Honors Thesis (3)**

Independent study—3 hours. Prerequisite: course 194H. Writing of an honors thesis on a topic in Italian literature, civilization, or language studies under the direction of a faculty member. (P/NP grading only.) GE credit: AH, WC, WE.

#### **197T. Tutoring in Italian (1-4)**

Seminar—1-2 hours; laboratory—1-2 hours. Prerequisite: upper division standing and consent of instructor. Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)

#### **197TC. Community Tutoring in Italian (1-5)**

Discussion—1-2 hours; laboratory—2-4 hours. Prerequisite: consent of instructor. Field experience as Italian tutors or teacher's aides. May be repeated for credit for a total of 10 units. (P/NP grading only.)

#### **198. Directed Group Study (1-4)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **198S. Directed Group Study (1-4)**

Prerequisite: consent of instructor. Group study on focused topics in Italian literature and culture. Varies according to instructor. This course is offered abroad. May be repeated for credit when topic differs. (P/NP grading only.)—Heyer-Caput

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **199S. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. Opportunity for a faculty member to work with an advanced undergraduate student in a focused manner on a topic or topics of mutual research/creative interest. This course is offered abroad. May be repeated for credit when topic differs. (P/NP grading only.)—Heyer-Caput

#### **Graduate**

#### **297. Individual Study (1-5)**

Prerequisite: graduate standing or consent of instructor.

#### **298. Group Study (1-5)**

Prerequisite: graduate standing or consent of instructor.

#### **299. Research (1-12)**

Prerequisite: graduate standing or consent of instructor. (S/U grading only.)

#### **299D. Dissertation Research (1-12)**

Prerequisite: graduate standing or consent of instructor. (S/U grading only.)

#### **Professional**

#### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

#### **Committee in Charge**

David Biale, Ph.D. (*History*)

Jenny Kaminer, Ph.D. (*German and Russian*)

Zeev Maoz, Ph.D. (*Political Science*)

Sven-Erik Rose, Ph.D. (*German*)

Diane Wolf, Ph.D. (*Sociology*)

#### **The Program of Study**

The Program in Jewish Studies offers students the opportunity to explore Jewish history, communities, literature, religion, and culture in a comparative perspective and multicultural framework. Courses include Hebrew language instruction as well as the study of classical and modern Jewish texts in translation.

The interdisciplinary minor in Jewish Studies provides an introduction to the study of Jewish culture, thought, history, and literature. Students learn a broad range of methodologies and critical concepts in these areas and gain insight into the relation between Jewish identities, histories, and representations and those of the cultures in which Jews throughout the world have lived.

The Program in Jewish Studies will be of special interest to students in History, Religious Studies, Comparative Literature and Sociology as well as other fields in the Humanities and Social Sciences.

#### **Minor Program Requirements:**

UNITS

**Jewish Studies ..... 20**

One course from: Jewish Studies 10 or Religious Studies 21 or 23 .....	4
Four upper division courses selected from:	
Comparative Literature 147, English 171A, German 116, 117, 141, Hebrew 100A, 100B, 100C, History 112A, 112B, 112C, 113, 142A, 142B, Jewish Studies 101, 110, 111, 112, 120, 121, Political Science 135, 136, Sociology 174.....	16

**Advising.** Jewish Studies Program office; 530-754-7007; [jst@ucdavis.edu](mailto:jst@ucdavis.edu).

#### **Courses in Jewish Studies (JST)**

##### **Lower Division**

###### **10. Introduction to Jewish Cultures (4)**

Lecture—3 hours; term paper. Diverse Jewish cultures created over the past 2,000 years using examples from less-familiar communities such as India, China, and Ethiopia. Topics include the tensions between homeland/diaspora and questions of identity (race, nationality, culture, or religion). Offered irregularly. GE credit: SocSci, Div, Wrt | SS, WC, WE.

##### **Upper Division**

###### **101. Topics in Jewish Thought (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 10 or Religious Studies 23 or consent of instructor. Selected themes in Jewish thought in historical and social perspective. This course traces the historical development of topics in Jewish thought such as Messianism, or focuses on one specific historical period, such as modern Jewish thought. May be repeated for credit when topic differs. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—W. (W.)

###### **110. Selected Topics in Jewish Literature (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one lower division literature or Jewish Studies course or consent of instructor. Literature written about the Jewish experience, treated in its historical and social context. Examines literature written in one

language, such as English, Hebrew, or Yiddish, or a theme, such as gender or modern identities, as expressed in different literary traditions. May be repeated for credit when topic differs. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE. –W. (W.)

### 111. Israeli Writing Since 1960 (4)

Lecture/laboratory—3 hours; extensive writing. Prerequisite: one course in American or European literature. Contemporary Hebrew literature, in translation, in relation to post-independence debates about religious, social, and political identity of the Jewish state; literary reflections of Israeli ethnic diversity and changing gender relations; modern Hebrew poetry and postmodern experiments in fiction. Not open for credit to students who have completed Humanities 119. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

### 112. Readings in Jewish Writing and Thought in German Culture (4)

Lecture/discussion—3 hours; term paper. Prerequisite: Religious Studies 23 or consent of instructor. Historical tradition of Jewish thought in the German cultural context; unique contributions of Jewish writers to culture of the German speaking world; what it means to be "other" in the mainstream culture. May be repeated for credit twice when topic differs. Not open for credit to students who have completed Humanities 119. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

### 116. Readings in Jewish Writing and Thought in German Culture (4)

Lecture—3 hours; term paper. Prerequisite: Religious Studies 23 or consent of instructor. Historical tradition of Jewish thought in the German cultural context; unique contributions of Jewish writers to culture of the German-speaking world; what it means to be "other" in the mainstream culture. No credit will be given to those students who have completed Humanities 121. May be repeated two times for credit if topic differs. Offered irregularly. (Same course as German 116.) GE credit: GE credit: ArtHum, Div, Wrt | AH, OL, WC, WE.

### 120. Cinema and the American Jewish Experience (4)

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 10 recommended. Examination of American cinema to reveal how Jewish identity is expressed and submerged, tracing the relations between religion, identity, race, politics, and art. Not open for credit to students who have completed Humanities 122. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WE.

### 121. Oral History and Jewish Life (4)

Lecture/discussion—3 hours; term paper. Oral history methodologies and application to an in-depth oral history interview about Jewish life. Topics include oral history practices and ethics, immigration, migration, religious practice, ethnic relations, and community organization structures. Not open for credit to students who have completed Humanities 123. Offered irregularly. GE credit: SocSci, Wrt | SS.

Thomas Harter, Ph.D., Specialist in Cooperative Extension

Doug Mackay, Ph.D., Adjunct Professor (*Hydrologic Science*)

Daniele Zaccaria, Ph.D., Assistant Specialist in Cooperative Extension (*Hydrologic Sciences*)

Minghua Zhang, Ph.D., Adjunct Professor (*Hydrologic Science*)

Land, Air and Water Resources is a multidisciplinary department with faculty who specialize in atmospheric, plant, environmental resource, soil, hydrology, and water engineering. Teaching and research focus on both agricultural forestry, natural ecosystems, climate change and environmental science. The faculty contribute to numerous other undergraduate and graduate programs in the Colleges of Letters and Science, Engineering, and Agricultural and Environmental Sciences.

**Major Programs.** Undergraduates in the department major in Atmospheric Science, Environmental and Resources Sciences, Environmental Science and Management, and Hydrology, and Soil and Water Science; see [http://lawr.ucdavis.edu/academic\\_programs.htm](http://lawr.ucdavis.edu/academic_programs.htm).

**Undergraduate Advising Center** is located in 1150 Plant and Environmental Sciences Building 530-752-1603.

**Staff Adviser.** Lacole Brooks [lbrooks@ucdavis.edu](mailto:lbrooks@ucdavis.edu) 530-752-1603.

**Graduate Study.** Graduate work is offered in the area of Atmospheric Science, Hydrologic Sciences, and Soils and Biogeochemistry. For detailed information, call 530-752-1669 or see [http://lawr.ucdavis.edu/academic\\_programs.htm](http://lawr.ucdavis.edu/academic_programs.htm).

**Courses.** See courses listed under Atmospheric Science, Hydrologic Sciences, Hydrology, Environmental and Resource Sciences, Environmental Science and Management, and Soil Science. See also the websites listed above.

Mark Francis, M.L.A., Professor Emeritus  
Dean MacCannell, Ph.D., Professor Emeritus  
Heath Massey, M.F.A., Professor Emerita  
E. Byron McCulley, B.S.L.A., Continuing Lecturer Emeritus  
Edward S. McNeil, M.L.A., Senior Lecturer, SOE Emeritus  
Robert L. Thayer, Jr., M.A., Professor Emeritus

## The Major Program

Landscape architecture is the planning and design of land areas where human use requires adaptation or conservation of the environment. Students who study landscape architecture are concerned about the welfare of the environment and the people who use and shape it. They are capable of solving physical problems and are able to visualize and think in terms of spaces and three-dimensional concepts. The program is fully accredited by the Landscape Architecture Accreditation Board (LAAB) which is the only organization professionally sanctioned to grant landscape architectural accreditations in the United States. The program was last reviewed in 2012.

**The Program.** The curriculum balances creativity and visual and spatial skills with technological expertise and a thorough background in physical, natural, and social sciences. Students develop proficiency at problem solving relating to design of parks, public spaces, energy-efficient neighborhoods, land reclamation projects, city and regional planning, and landscape planning for wilderness and scenic regions, coastal and riparian environments, and other sensitive land areas. The program stresses a process-oriented approach to design and emphasizes environmental and community values.

**Preparatory Requirements.** Students are admitted to the landscape architecture major only after submitting a portfolio for review and selection by the faculty. Contact the Landscape Architecture Advising Office for further information in 135 Hunt Hall 530-754-8628.

**Career Alternatives.** Graduates may find jobs in private landscape architectural firms or public agencies, non-profit organizations, and corporations employing landscape architects. The landscape architecture major provides the student with excellent preparation for graduate school or career development in a wide range of environmental and design-related fields.

## B.S. Major Requirements:

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>76-79</b>
English Writing .....	4

Communication 1 .....	4
Biological Sciences 2A, 2B .....	10
Environmental Horticulture 6 .....	4
One course from: Mathematics 16A; Statistics 13; Computer Science 10 .....	3-4
One course from: Chemistry 2A, 10; Physics 1A, 10; Geology 1; Geography 1; or Soil Science 10 .....	3-5
Two courses satisfying Social Sciences general education requirement.....	8
Two courses satisfying Arts and Humanities general education requirement.....	8
Landscape Architecture 1, 2, 3, 21, 30, 50, 60, 70.....	32

### Depth Subject Matter ..... 56

Landscape Architecture 160, 161, 170, 171 .....	22
Three studios from Landscape Architecture 191 (3 courses-5 units each).....	15
Landscape Architecture 120 or 150 .....	4
Landscape Architecture 190 (three quarters) .....	3
Landscape Architecture 102 .....	4
Environmental Horticulture 133, 105 .....	8

### Restricted Electives..... 20

Select 20 units of upper division courses in consultation with adviser .....

### Total Units for the Major ..... 158

**Major Adviser.** Nina Claire Napawan

**Advising Center.** See Sharla Cheney, 135 Hunt Hall, 530-754-8628, [scheney@ucdavis.edu](mailto:scheney@ucdavis.edu)

**Graduate Study.** Graduate-level landscape architecture courses are available to students pursuing graduate programs compatible with or directed toward landscape management, planning, and design issues. A Graduate Academic Certificate in Landscape Architecture and Environmental Design is an option for any graduate student; see <https://gradstudies.ucdavis.edu/programs/graduate-academic-certificates>. Program faculty are active members of various graduate groups: Community Development, Geography, Transportation Technology and Policy, and Ecology. Faculty members have expertise in many areas, including landscape history, social theory, practice of public space design, historic landscape preservation, city and regional planning, community participation in urban landscape design, landscape ecology, conservation planning, resource management, bioregionalism, and regenerative landscape systems. Graduate students pursue more focused interests, expanding their professional expertise and/or conducting advanced research in landscape architecture or related disciplines.

## Courses in Landscape Architecture (LDA)

### Lower Division

#### 1. Introduction to Environmental Design (4)

Lecture—3 hours; discussion—1 hour; term paper. Introduction to the role of design professionals in contributing to the built environment at a range of scales. Introduction to basic methods used by design professionals to evaluate, design, plan, and manage landscapes and the built environment. Not open for credit to students who have taken course 40. GE credit: ArtHum or SciEng or SocSci, Wrt | AH or SE or SS, VL, WC, WE.—F. (F.) Napawan

#### 2. Place, Culture and Community (4)

Lecture—4 hours. Introduction to recognizing and reading cultural landscapes, and the application of cultural landscape meaning to the creation of contemporary built environments. Topics include patterns and influences relating to agriculture, military, transportation, housing, wilderness, recreation and tourism. GE credit: SocSci, Wrt | ACGH, SS, VL, WC, WE.—W. (W.) Owens

#### 3. Sustainable Development: Theory and Practice (4)

Lecture—2 hours; extensive problem solving—2 hours, discussion—1 hour. Origins, theoretical perspectives, and practical applications of the concept

of sustainable development at a number of scales (site, building, neighborhood, city, region, and nation) through lectures, sketch exercises, student projects, walking tours. GE credit: SocSci, Wrt | ACGH, SS, VL, WE.—S. (S.) Wheeler

### 10. World Regional Geography (3)

Lecture—3 hours. Major geographic regions of the world; physical and human geography of each region; interactions between the people and the environment; culture and landscape; major resources; physical environments; population distribution and major cities. GE credit: AH or SS, WC.—S. (S.)

### 21. Environmental Design Visualization (5)

Lecture—3 hours; laboratory/discussion—3 hours. Prerequisite: course 1; can be taken concurrently with course 1. Pass One is restricted to Pre-Landscape Architecture and Sustainable Environmental Design majors. Idea expression through graphic media and drawing techniques for visual representation of the built environment, including conventional drafting and expressive techniques. Introduction to computerized graphics techniques. GE credit: ArtHum | AH, OL, VL.—F. (F.) Boult

### 23. Computer Graphics for Landscape Architecture (4)

Studio—8 hours; two all-day field trips. Prerequisite: course 21. Restricted to Pre-Landscape Architecture and Landscape Architecture majors only. Landscape architectural communications explored through the computer. Includes computerized drafting, drawing, rendering, desktop publishing, and photorealistic simulation.—F. (F.)

### 30. History of Environmental Design (4)

Lecture—3 hours; discussion—1 hour. History of Environmental Design across disciplines, including landscape architecture, planning, community and urban design. GE credit: ArtHum, Wrt | AH, VL, WE.—W. (W.) Boult

### 50. Site Ecology (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Sciences 2B. Pass One restricted to Pre-Landscape Architecture and Sustainable Environmental Design majors. Introduction to ecological concepts, including nutrient dynamics, population regulation, community structure, ecosystem function. Principles will be applied to human activities such as biological conservation, ecological restoration, landscape planning, and management. Weekly laboratory devoted to field exercises in local ecosystems. GE credit: SciEng | SE, VL, WE.—S. (S.) Greco

### 60. Landform and Grading Studio (6)

Studio—8 hours; extensive problem solving. Prerequisite: course 70. Pass One restricted to Pre-Landscape Architecture majors. Introduction of landform and topography as landscape medium and utilization of grading and drainage to design meaningful and functional spaces. Introduction to site analysis, site planning, and the conventions of grading & drainage, including contour manipulation and physical model building. GE credit: ArtHum or SciEng | AH or SE, OL, VL.—S. (S.) Napawan

### 61. AutoCAD for Landscape Architects (4)

Lecture—2 hours; laboratory—4 hours. Pass One restricted to Pre-Landscape Architecture, Sustainable Environmental Design, and Landscape Architecture majors. Introduction of computer-aided drafting (CAD) techniques and their application to landscape design. Drawing set-up, layer control, basic drawing and editing commands, dimensioning and text styles, symbol libraries, and display commands used in the creation of landscape architectural drawings. Offered irregularly.

### 70. Introduction to Spacemaking (5)

Lecture—3 hours; laboratory/discussion—3 hours. Prerequisite: course 21. Pass One restricted to Pre-Landscape Architecture and Sustainable Environmental Design majors. Introduction to basic principles of design towards the creation of space. Introduction to design methodologies and skills necessary to define, manipulate, and represent the built environment. Workshops in 2D computer graphic techniques and

**Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;**

**ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience**

**Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience**

**Quarter Offered: F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses**

3D physical modeling making will reinforce design principles. GE credit: ArtHum | AH, OL, VL.—W. (W.) Napawan

### **98. Directed Group Study in Landscape Architecture (1-5)**

Prerequisite: consent of instructor. Directed group study. (P/NP grading only.)

### **99. Special Study for Undergraduates in Landscape Architecture (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

## **Upper Division**

### **102. Methods in Design and Landscape Research (4)**

Seminar—4 hours; term paper. Prerequisite: course 171. Restricted to Landscape Architecture majors. Research, design, and planning methods employed in landscape architecture. Exercises allow students to design independent landscape research. Lectures provide a historical overview of research methodology. GE credit: ArtHum | AH, OL, VL, WE.—W. (W.)

### **120. Advanced Computer Applications (4)**

Studio—8 hours; two all-day field trips. Restricted to Landscape Architecture majors. Studio work using computer-aided design, geographic information systems, and other advanced computer programs.—W. (W.) Milligan

### **140. Green Building, Design, and Materials (4)**

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 50, 70. Pass One restricted to Sustainable Environmental Design majors. Sustainable design and construction techniques at site and building scales. Emphasizes real-world case studies, analysis of opportunities for actual sites, and application of LEED and Sustainable Sites green rating systems. GE credit: ArtHum or SciEng | AH or SE, VL.—F. (F.) Milligan

### **141. Community Participation and Design (4)**

Lecture—1 hours; laboratory—3 hours; fieldwork—3 hours; project—3 hours. Prerequisite: course 21, 30, 50, 70. Restricted to Sustainable Environmental Design and Landscape Architecture majors. Introduction to community participation and design. Incorporates social and cultural factors, public and community processes, theories and practices related to human-environment behavior; community involvement in design, social analysis, community engagement, accessibility, diversity and politics of place. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, VL.—W. (W.) Simpson

### **142. Applying Sustainable Strategies (4)**

Lecture—3 hours; laboratory—3 hours; extensive problem solving. Prerequisite: course 140, 141. Restricted to Sustainable Environmental Design Majors. Capstone class examines case studies and techniques of sustainable development. Student teams will develop detailed proposals for real-world sites. GE credit: ArtHum or SciEng or SocSci | AH or SE or SS, OL, VL, WE.—S. (S.)

### **150. Introduction to Geographic Information Systems (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Plant Sciences 21 or equivalent with consent of instructor. Priority given to College of Agricultural and Environmental Science majors. Basic concepts, principles, and methods of GIS are presented. Data structures, database design, GIS data creation, GPS, and spatial analysis techniques are emphasized. Lab topics include: online data sources, aerial photography, GPS data input, suitability analysis, cartographic design, and graphic communication. Not open for credit to students who have completed Applied Biological Systems Technology 180/Plant Sciences 180 or Applied Biological Systems Technology 181N. (Same course as Applied Biological Systems Technology 150.) GE credit: SciEng | SE, VL.—F. (F.) Greco, Upadhyaya

### **160. Design and Build Studio (6)**

Studio—8 hours; extensive problem solving; fieldwork. Prerequisite: course 1, 2, 3, 21, 30, 50, 70. Restricted to Landscape Architecture majors. Introduction to the spatial design and construction of small-scale projects. Hands-on approach to learning and understanding materials (including wood, concrete, and stone) and methods in landscape construction, and the application of technical skills (including detailing, cost estimation, and specifications). GE credit: ArtHum or SciEng | AH, OL, VL.—F. (F.)

### **161. Technology 3: Professional Practice and Construction Documents (4)**

Studio—8 hours. Prerequisite: course 171. Open to Landscape Architecture majors only. Legal and professional aspects of landscape architecture, including the development of construction documents (drawings and specifications), proposal writing, fee calculations, project management, cost estimation, and insurance.—F. (F.)

### **170. Site Planning and Design Studio (6)**

Studio—8 hours. Prerequisite: course 160. Open to Landscape Architecture majors. Application of placemaking and problem-solving skills to local landscape sites. Analysis of social and environmental conditions in the field. Lectures link design projects to contemporary theories and practices. Includes workshops in computer-aided drafting. GE credit: ArtHum | AH, OL, VL.—W. (W.) de la Pena

### **171. Urban Design and Planning Studio (6)**

Studio—8 hours. Prerequisite: course 170. Restricted to Landscape Architecture majors. Studio designing large-scale landscapes at regional, sub-regional, and neighborhood scales. Focuses on understanding complex social, economic, and environmental factors, developing sustainability priorities and strategies, and applying them through design and policy. GE credit: ArtHum | ACGH, AH, OL, VL.—S. (S.)

### **180. Advanced Design and Planning Studio (6)**

Studio—8 hours; fieldwork; extensive problem solving. Prerequisite: course 60, 160, 170, 171, 172. Restricted to Landscape Architecture majors or consent of instructor. Application of advanced theories and methods of design and planning to real-world projects. May be repeated for up to 18 units of credit. GE credit: ArtHum or SciEng | AH, OL, VL.

### **180A. Special Topics in Landscape Architecture: Postmodern Landscapes (2)**

Lecture—2 hours. Prerequisite: upper division standing. Basic principles of critical theory and postmodern modes of analysis. Application to interpretation and change of designed environment. Not open for credit to students who have taken course 185. Offered in alternate years.

### **180C. Special Topics in Landscape Architecture: Art of the Environment (2)**

Lecture—2 hours. Prerequisite: courses 1 and 30. Priority given to Landscape Architecture and Design majors. Introduction to environmental art. Encouragement of critical thinking about the intersection of art, landscape and environmental issues.

### **180F. Special Topics in Landscape Architecture: Landscape Ecology (2)**

Lecture—2 hours. Prerequisite: course 50 or an introductory course in Ecology. Theories, major concepts and research methods of landscape ecology. Spatial structure, function and dynamics of various landscape types. Biological conservation, ecological restoration, and landscape planning, design, and management. Not open for credit to students who have taken Landscape Architecture 183. GE credit: SciEng | SE, WE.

### **180G. Special Topics in Landscape Architecture: Landscape and Regional Land Planning (2)**

Lecture—2 hours. Prerequisite: upper division standing. Theories, laws, and practices of community planning. Creation of livable and sustainable communities and natural landscapes, Smart growth, new urbanism, neo-traditional town planning, transit-ori-

ented, and sustainable communities. Traditional master planning vs. participatory planning and design approaches. GE credit: SocSci | ACGH, SS.

### **180I. Special Topics in Landscape Architecture: Regenerative Landscape Systems (2)**

Lecture—2 hours. Prerequisite: courses 1 and 30. Priority given to Landscape Architecture majors. Theories, basic techniques and applications for various systems by which landscapes regenerate and sustain life (both human and non-human) and culture over time. GE credit: SL.

### **180J. Special Topics in Landscape Architecture: Community Participation in Design (2)**

Lecture—2 hours. Prerequisite: upper division standing. History and role of community participation in landscape design; methods of community involvement, including workshop techniques. Introduction to design processes, including public participation. GE credit: SocSci | ACGH, DD, SS.

### **180K. Special Topics in Landscape Architecture: Social Factors in Landscape Architecture (2)**

Lecture—2 hours. Prerequisite: Psychology 155 and upper division standing. Concepts in environmental psychology as they relate to landscape architecture. Discussion of needs of various user groups of a land area. Introduction to post occupancy evaluations. GE credit: SocSci | DD, SS, WE.

### **180L. Special Topics in Landscape Architecture: Public Open Space (2)**

Lecture—2 hours. Prerequisite: upper division standing. Intensive study of public open spaces, including parks, plazas, playgrounds, greenways and community gardens. Current issues associated with design and management of the public environment of cities.

### **180M. Special Topics in Landscape Architecture: Urban and Community Design (2)**

Lecture—2 hours. Prerequisite: upper division standing. Theories and methods of community and neighborhood design. Past and contemporary approaches including new urbanism, planned unit development, mixed use, pedestrian and transit-oriented development. Issues of open space and community form.

### **180N. Special Topics in Landscape Architecture: Planting Design (2)**

Lecture—2 hours. Prerequisite: upper division standing; Environmental Horticulture 6. Develop an understanding of the sensory, visual and functional importance of plants in the landscape. Visualization and design of planted landscapes. Development of planting plans. Not open for credit to students who have taken course 156.

### **180O. Special Topics in Landscape Architecture: Current Issues in Landscape Architecture (2)**

Lecture—2 hours. Prerequisite: course 1 and 30. Priority will be given to Landscape Architecture and Design majors. Study of current issues in landscape architecture with emphasis on design and/or design history.

### **180P. Special Topics in Landscape Architecture: Water in Community Planning and Design (2)**

Lecture—2 hours. Prerequisite: course 50 or equivalent with consent of instructor. Upper division standing or above; priority given to Landscape Architecture majors. Theories, policies, methods, and resources related to the integration of water resources management with urban/community planning and landscape design including water use/demand, quality, treatment, conservation, and storm water/drainage.

### **180Q. Historic Preservation (2)**

Lecture—2 hours. Prerequisite: upper division standing. Priority given to Landscape Architecture majors. Roots and present focus of historic preservation

movement; current philosophies and laws governing preservation, restoration, and revitalization as they affect landscape architects.

#### **181A. Postmodern Landscapes Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180A concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180A. Offered in alternate years.

#### **181C. Art of the Environment Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180C concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180C.

#### **181F. Landscape Ecology Design and Planning Studio (3)**

Studio—6 hours. Prerequisite: course 170; 180F must be taken concurrently. Priority to Landscape Architecture majors. Design theory and methods to real-world projects in ecology. Ecological principles and their application in biological conservation, ecological restoration, and landscape planning, design, and management. Field trip required. GE credit: SciEng | OL, VL, SE.

#### **181G. Special Topics in Landscape Architecture: Landscape and Regional Land Planning Studio (3)**

Studio—6 hours. Prerequisite: course 170, course 181G concurrently. Applications of recent models and practices of urban planning and design to create livable and sustainable cities, towns, villages, rural, and natural landscapes. Testing of models by creating plans and designs for new communities, and for urban infill, restoration or redevelopment projects. Field trip required. GE credit: VL.

#### **181H. The Bioregional Landscape Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180H concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180H.

#### **181I. Regenerative Landscape Systems Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180I concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180I.

#### **181J. Community Participation in Design: Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180J concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180J. GE credit: DD, OL, VL.

#### **181K. Social Factors in Landscape Architecture Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: Psychology 155, course 170, 180K concurrently. Priority to Landscape Architecture majors. Application of design theory and methods to real-world projects. Familiarize students with the major concepts in environmental psychology as they relate to landscape architecture; to discuss the needs of various user groups; and post occupancy evaluations. GE credit: DD, OL, VL.

#### **181L. Public Open Space Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180L concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180L.

#### **181M. Urban and Community Design: Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180M concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180M.

#### **181N. Planting Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170 and Environmental Horticulture 6; course 180N concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180N.

#### **181O. Current Issues Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180O concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180O.

#### **181P. Special Topics in Landscape Architecture: Water in Community Planning and Design Studio (3)**

Studio—6 hours. Prerequisite: courses 50 and 61 (or equivalent courses with consent of instructor); course 170; course 180 concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to community and site scale projects associated with course 180P.

#### **181Q. Special Topics in Landscape Architecture: Historic Preservation Studio (3)**

Studio—6 hours. Prerequisite: junior standing in the Landscape Architecture program; course 180Q to be taken concurrently. Methods and tools currently used by professional preservation architects and planners, including inventory and evaluation methods and traditional planning and design approaches. Field trip required.

#### **190. Proseminar in Landscape Architecture (1)**

Seminar—1 hour. Lectures and discussion of critical issues in landscape architecture. May be repeated three times for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

#### **191. Landscape Architecture Planning & Design Studio (2-12)**

Seminar—1 hour; workshop—3 hours. Prerequisite: course 1, 70, and 170 or consent of instructor. Priority to Landscape Architecture majors. Faculty initiated workshops featuring advanced studies and applications of original work in landscape architecture. May be repeated for up to 20 units of credit.—F, W, S. (F, W, S.)

#### **192. Internship in Landscape Architecture (1-12)**

Internship. Prerequisite: senior standing in Landscape Architecture. Professional field experience in landscape architecture. May be repeated for a total of 12 units. (P/NP grading only.)—F, W, S. (F, W, S.)

#### **193A. Senior Project in Landscape Architecture (3)**

Studio—6 hours. Prerequisite: senior standing in Landscape Architecture. Limited enrollment. Projects will focus on a critical area of landscape architectural design, planning, analysis, communication, or research. Required of all Landscape Architecture majors. (P/NP grading only.)

#### **193B. Senior Project in Landscape Architecture (4)**

Studio—8 hours. Prerequisite: course 193A and senior standing in Landscape Architecture. Limited enrollment. Projects will focus on a critical area of landscape architectural design, planning, analysis, communication, or research. Required of all Landscape Architecture majors. (P/NP grading only.)

#### **197T. Tutoring in Landscape Architecture (1-5)**

Tutoring—3-15 hours. Prerequisite: consent of instructor. Tutoring in Landscape Architecture courses. (P/NP grading only.)

#### **198. Directed Group Study in Landscape Architecture (1-5)**

Prerequisite: consent of instructor. Directed group study. (P/NP grading only.)

#### **199. Special Study for Advanced Undergraduates in Landscape Architecture (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **Graduate**

#### **200. Citizenship, Democracy, & Public Space (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Introduction to seminal works in political theory, philosophy, and the social sciences that focus on citizenship and the public sphere; development of critical perspective regarding restructuring of public space in a pluralistic and global culture; discussion of contemporary case studies. (Same course as Geography 230.)

#### **201. Theory and Philosophy of the Designed Environment (4)**

Seminar—4 hours. Prerequisite: course 140 or the equivalent; graduate standing or consent of instructor. Examines the major theories of environmental design. Epistemology of design serves as framework to examine modern landscape architecture, architecture, urban design and planning. Normative theories of design are reviewed along with the social and environmental sciences.

#### **202. Methods in Design and Landscape Research (4)**

Seminar—4 hours. Explores many of the research and advanced design and planning methods employed in landscape architecture. Exercises provide the student with a vehicle for designing independent landscape research and creative activities. Lectures provide an historical overview of research methodology. —W. (W.J) Ng'Weno, Simpson

#### **204. Case Studies in Landscape Design and Research (4)**

Seminar—4 hours; field trip required. Prerequisite: graduate standing in Landscape Architecture, Ecology, Geography or Community Development or consent of instructor. Real-world designed environment situations where creative activity and/or basic research is the primary product. May be repeated for credit for a total of 12 units.

#### **205. Urban Planning and Design (4)**

Lecture—2 hours; discussion—2 hours. Limited to graduate students. Regulation, design, and development of the built landscape, planning and land development processes, zoning and subdivision regulation, site planning, urban design goals and methods, public participation strategies, creatively designing landscapes to meet community and ecological goals. (Same course as Geography 233.)—F. (F.) Wheeler

#### **210. Advanced Landscape Architecture Studio (4)**

Laboratory—8 hours. Prerequisite: course 113 or the equivalent; graduate standing or consent of instructor. Exposes students to real-world, designed-environment situations where creative activity and/or basic research is the primary product. Advanced landscape problems will be utilized at the site, urban or rural scale.

#### **215. Ecologies of Infrastructure (4)**

Seminar—4 hours. Open to graduate standing or consent of instructor. Focus on design practices and theory associated with ecological conceptions of infrastructure, including networked infrastructure, region, bioregion, regionalization, ecological engineering, reconciliation ecology, novel ecosystems, and theory/articulation of landscape change. (Same course as Geography 215.) Offered in alternate years.—Milligan

**240. Historic, Cultural Landscapes: Concept, Perception, Preservation (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Historic cultural landscapes, as defined by the National Register of Historic Places. Identification and analysis of aerial extent, structured makeup, integrity, and historical significance using common and emerging methods and tools. Offered irregularly.

**250. Life-Place: Bioregional Theory and Principles (4)**

Seminar—3 hours; tutorial—1 hour. Prerequisite: graduate standing or consent of instructor. The emerging concept of bioregionalism as a hypothesis for environmental quality; theoretical structures and practical methods by which individuals and groups identify with naturally-bounded “life-places” or “bioregions” and strive to live respectfully and reciprocally within them.

**260. Landscape and Power (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. How various representations of landscape have historically worked as agents of cultural power. Course framework is interdisciplinary, including studies of landscape representation in literature, art, photography, cartography, cinema, and landscape architecture. (Same course as Geology 252.)

**270. Environment and Behavior (4)**

Seminar—3 hours; tutorial—1 hour. Prerequisite: graduate standing or consent of instructor; Psychology 144 recommended. Factors that influence human's interaction with their surroundings and the mechanisms used for recognizing and addressing general and specific human needs in community design and development decisions. Offered irregularly.—W. (W.) Owens

**280. Landscape Conservation (3)**

Seminar—3 hours. Prerequisite: contact department for prerequisite courses; graduate standing or consent of instructor. Focus is on land planning, design, and management techniques to further the goal of resource preservation. Examines current critical theory in the establishment and management of conservation areas. Offered in alternate years.—W. (W.) Greco

**290. Graduate Seminar in Landscape Architecture (2)**

Seminar—2 hours. Prerequisite: graduate standing and consent of instructor. Seminar on selected topics in landscape architecture research, analysis, planning, design, communication, or education. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**297. Practicum in Landscape Architecture (1-10)**

Independent study—1-10 hours. Prerequisite: graduate standing and consent of instructor. Opportunity for students to work directly in the field with academics at other institutions or with professionals in an office setting. Gives experience beyond the confines of campus and allows direct interaction with the community. (S/U grading only.)—F, W, S. (F, W, S.)

**298. Group Study (1-5)**

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

**299. Directed Individual Research for Graduate Students (1-12)**

Requires consent of instructor. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**Professional****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## Landscape Restoration

(College of Agricultural and Environmental Sciences)

This minor is of particular interest to students majoring in Wildlife, Fish, and Conservation Biology, Environmental Science and Management, Landscape Architecture, Biological Sciences, Evolution and Ecology, Plant Biology and Sustainable Environmental Design. Biological Sciences 2C or Plant Sciences 2 is a prerequisite to some courses in the minor. The minor is sponsored by the Department of Plant Sciences.

**Minor Program Requirements:**

**Landscape Restoration .....** **19-25** UNITS

Select one of Environmental Science and Policy 155, Plant Biology 102, 117, 147, Plant Sciences 144.....	4-5
Select one of Environmental Horticulture 100, 130, 133, Plant Biology 119, Plant Sciences 176.....	3-4
Soil Science 10 or 100.....	3-5
Environmental Horticulture 160 and 160L	4
Select one of Environmental Horticulture 150, Environmental Science and Policy 155L, Landscape Architecture 180F, 180H, 180I, Plant Sciences 130, Wildlife, Fish, and Conservation Biology 155 .....	2-4
Plant Sciences 192.....	3

**Minor Adviser.** T.P. Young (*Plant Sciences*)

**Advising Center** is located in 1224 Plant and Environmental Sciences 530-752-7738.

## Latin

See **Classics**, on page 211.

## Latin American and Hemispheric Studies

(College of Letters and Science)

Charles F. Walker, Ph.D., Program Director

**Program Office.** Hemispheric Institute on the Americas, 1277 Social Sciences and Humanities Building 530-752-3046

**Committee in Charge**

Jelmer Eerkens, Ph.D., Professor ( <i>Anthropology</i> )
Liza Grandia, Ph.D., Associate Professor ( <i>Native American Studies</i> )
Luis Guarnizo, Ph.D., Professor ( <i>Human and Community Development</i> )
Erin Hamilton, Ph.D., Assistant Professor ( <i>Sociology</i> )
Robert Irwin, Ph.D., Professor ( <i>Spanish &amp; Portuguese</i> )
Robert Newcomb, Ph.D., Professor ( <i>Spanish and Portuguese</i> )
Bettina Ng'wenyo, Ph.D., Associate Professor ( <i>African American &amp; African Studies</i> )
Pablo Ortiz, Ph.D., Professor ( <i>Music</i> )
Marc Schenker, Ph.D., Professor ( <i>Medicine &amp; Public Health</i> )
Charles Walker, Ph.D., Professor ( <i>History</i> )

The minor in Latin American and Hemispheric Studies offers students the opportunity to explore connections throughout the Western Hemisphere from an array of perspectives across multiple academic fields.

The minor is made up of six courses, arranged in three tiers: Basic (one lower division course on the history of Latin America); Core (two introductory upper division courses chosen from a designated list of fields other than History); and Elective (three additional upper division courses from a designated list of courses that focus primarily on Latin American

and/or Hemispheric issues). Students are strongly encouraged to develop proficiency in Spanish or Portuguese, either through course work (such as completion of Spanish 24 or 33), or through life experience such as study abroad.

**Minor Program Requirements:**

UNITS

**Latin American and Hemispheric Studies.....** **24**

Basic Courses .....	4
One course from: History 7A, 7B, 7C Core courses .....	8
One course each from two of the following categories:	
(a) Anthropology 144;	
(b) Native American Studies 115;	
(c) Spanish 150 or 151;	
(d) Political Science 143	

**Elective Courses .....** **12**

Three courses selected from the following list to achieve a total of 24 units: African and African American Studies 107A, 155, 163, 172, 180; Anthropology 130C, 146; Art History 151; Chicana/o Studies 130, 160; Comparative Literature 151, 152, 165; Film Studies 189; Music 127; Native American Studies 110A, 110B, 110C, 110D, 120, 125, 133, 181A, 181B, 181C, 184; History 160, 162, 163A, 163B, 164, 165, 166A, 166B, 167, 168, 169A, 169B; Spanish 107A, 117, 149, 151, 153, 154, 155, 156, 157, 158, 159, 163, 170, 171, 172, 174, 175, 176, 177; Portuguese 100, 159, 161, 162, 163; Women's Studies 80, 102

**Minor Adviser.** HIA program coordinator in 1277 Social Sciences and Humanities Building (530-752-3046) or Charles Walker in 1279 Social Science and Humanities Building (530-752-3046)

## Law, School of

Kevin Johnson, J.D., Dean

Madhavi Sunder, J.D., Associate Dean; Academic Affairs

Hollis L. Kulwin, J.D., Senior Assistant Dean; Student Affairs

Kristen Mercado, J.D., Assistant Dean; Admission and Financial Aid

Brett C. Burns, Senior Assistant Dean; Administration

**Dean's Office.** 1011 Martin Luther King, Jr. Hall 530-752-0243; <http://www.law.ucdavis.edu>

**Faculty**

Afra Afsharipour, J.D., Professor
Karima Bennoune, J.D., M.A., Professor
Kelly Behre, J.D., Lecturer
Ashutosh Bhagwat, J.D., Professor
Mario Biagioli, M.F.A., M.A., Ph.D., Professor
Alan E. Brownstein, J.D., Professor
Anupam Chander, J.D., Professor
Andrea C. Chandrasekher, J.D., M.A., Ph.D., Acting Professor
Gabriel Chin, J.D., Professor
Holly S. Cooper, J.D., Lecturer
William Dodge, J.D., Professor
Christopher S. Elmendorf, J.D., Professor
Floyd F. Feeney, LL.B., Professor
Katherine Florey, M.F.A., J.D., Professor
Richard Frank, J.D., Professor
Lawrence Green, J.D., Lecturer
Angela Harris, M.A., J.D., Professor
Jasmine Harris, J.D., Professor
Robert W. Hillman, J.D., Professor
David Horton, J.D., Acting Professor
John Patrick Hunt., J.D., Acting Professor
Lisa Ikemoto, J.D., Professor
Edward J. Imwinkelried, J.D., Professor
Elizabeth E. Joh, J.D., Professor
Margaret Z. Johns, J.D., Senior Lecturer

Kevin R. Johnson, J.D., Professor  
 Thomas W. Joo, J.D., Professor  
 Courtney G. Joslin, J.D., Acting Professor  
 Hollis L. Kulwin, J.D.  
 Leslie A. Kurtz, J.D., Professor  
 Carlton F.W. Larson, J.D., Professor  
 Peter Lee, J.D., Professor  
 Evelyn A. Lewis, J.D., Professor  
 Albert C. Lin, J.D., Professor  
 Lesley K. McAllister, J.D., Ph.D., Professor  
 Miguel Mendez, J.D., Professor  
 Barbara Milner, J.D., Ph.D., Lecturer  
 Millard Murphy, J.D., Lecturer  
 Amagda Perez, J.D., Lecturer  
 Rex R. Perschbacher, J.D., Professor  
 Lisa R. Pruitt, J.D., Professor  
 Leticia Saucedo, J.D., Professor  
 Darien Shanske, M.S., J.D., Ph.D., Professor  
 Donna Shestowsky, M.S., J.D., Ph.D., Professor  
 Brian Soucek, J.D., Ph.D., Acting Professor  
 Madhavi Sunder, J.D., Professor  
 Clayton Tanaka, J.D., Lecturer  
 Dennis Ventry, J.D., Professor  
 Rose Cuson Villazor, J.D., LL.M., Professor  
 Carter C. White, J.D., Lecturer

### Emeriti Faculty

John D. Ayer, J.D., LL.M., Professor Emeritus  
 Antonio Bernhard, J.D., Professor Emerita  
 Carol S. Bruch, J.D., Professor Emerita  
 Joel C. Dobris, LL.B., Professor Emeritus  
 Harrison C. Dunning, LL.B., Professor Emeritus  
 Daniel Wm. Fessler, J.D., S.J.D., Professor Emeritus  
 Arturo Gándara, J.D., Professor Emeritus  
 George S. Grossman, LL.B., M.S., L.S., Professor Emeritus  
 Bill Ong Hing, J.D., Professor  
 John B. Oakley, J.D., Professor Emeritus  
 John W. Poulos, J.D., Professor Emeritus  
 Edward H. Rabin, LL.B., Professor Emeritus  
 Cruz Reynoso, LL.B., Professor Emeritus  
 Mortimer D. Schwartz, J.D., LL.M., Professor Emeritus  
 Daniel L. Simmons, J.D., Professor  
 James F. Smith, J.D., Senior Lecturer Emeritus  
 Martha S. West, J.D., Professor Emerita  
 Bruce A. Wolk, J.D., Professor Emeritus  
 Richard C. Wydick, LL.B., Professor Emeritus

### Courses in Law (LAW)

**Courses of Instruction.** The courses listed below have all been taught at least once in the last three years. There is no guarantee that any given course will be taught within the next three years. The numbers in parentheses indicate the number of semester credits. Please see Law School Course Description Page for current information <http://www.law.ucdavis.edu/current/registrar/course-descriptions.html#>.

### Professional Curriculum

#### First Year Courses

##### 200. Introduction to Law (1)

Discussion—1 hour. Introduction to basic concepts of the law, the historical roots of common law and equity, the precedent system in its practical operation, the modes of reasoning used by courts and attorneys, and the fundamentals of statutory interpretation. (S/U grading only.)

##### 200CT. Introduction to US Legal Methods B (3)

Lecture/discussion—3 hours. Course is designed to provide background skills necessary to succeed in both law school and legal practice. Students gain an introductory working knowledge of the US legal method which includes learning various forms of legal writing and speaking.

##### 201. Property (4)

Discussion—4 hours. A study of doctrines and concepts of property law with primary emphasis on real property. Course coverage includes: the estates in land system; the landlord-tenant relationship, conveyancing, and private and public land use control.

##### 202. Contracts (5)

Discussion—5 hours. Examines sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and non-commercial transactions. Inquiry is made into the means by which traditional doctrine adjusts or fails to adjust to changing social demands.

##### 203. Civil Procedure (5)

Discussion—5 hours. A study of the fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes.

##### 204. Torts (5)

Discussion—5 hours. Familiarizes students with legal rules, concepts and approaches pertinent to the recovery for personal injuries, property damages and harm done to intangible interests.

##### 205. Constitutional Law I (4)

Discussion—4 hours. The principles, doctrines and controversies regarding the basic structure of and division of powers in American government. Specific topics include judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among the branches of the federal government.

##### 206. Criminal Law (3)

Discussion—3 hours. Study of the bases and limits of criminal liability. Coverage of the constitutional, statutory, and case law rules which define, limit, and provide defenses to individual liability for the major criminal offenses.

##### 207. Legal Research and Writing I (2)

Discussion/laboratory—2 hours. This fall semester course taught by Wydick Fellowship Program faculty is an integrated legal research and writing skills course. Basic legal research resources and strategies are introduced and practiced.

##### 208. Legal Research and Writing II (2)

Discussion—2 hours. Focuses on persuasive writing and oral advocacy. Students will complete integrated research and writing assignments, including a complaint, a strategic defense office memorandum, a motion to dismiss in federal court, and an appellate brief, with oral arguments by all students.

#### Second and Third Year Courses

- (a) General/Topical Survey Courses: 224, 254A, 257, 277T, 281, 285C, 285D, 294A, 298
- (b) Business Law: 215, 215A, 220, 228, 232, 236A, 236B, 242, 243, 247, 253, 255, 266A, 269A, 269C, 271A, 271B, 284, 286D, 291A, 291B
- (c) Constitutional Law: 216A, 218, 240, 288, 288A
- (d) Criminal Law: 210, 210A, 213, 213A, 227A, 245, 245T, 276, 286D
- (e) Estate Planning: 214, 223, 221
- (f) Environmental Law: 235, 235A, 256, 264, 264A, 265, 282, 285, 285A, 285B, 285C, 285T, 289A, 409, 450
- (g) Family Law: 225, 242, 272, 435
- (h) Health Law and Bioethics: 212A, 226, 286, 286A, 286B, 286C, 286D, 286E
- (i) Human Rights and Social Justice: 213A, 218, 220T, 222, 222A, 226, 231, 231A, 248B, 251T, 251B, 254, 254A, 259, 259P, 259T, 260, 267, 276, 277, 286B, 286D, 287A, 288, 292, 408, 420, 440, 450T, 460
- (j) Individual and Group Study: 411A, 41B, 416, 417, 418, 419, 498, 499
- (k) Intellectual Property and Technology: 209A 217, 248A, 266A, 274, 274A, 274D, 285C, 286, 295A, 296, 296T, 460
- (l) International, Comparative and Foreign Law: 210, 213A, 224, 230, 247A, 248, 248T1, 248B, 242, 252, 270, 274A, 291A, 291B, 292, 293, 440, 450T

- (m) Labor and Employment Law: 231A, 248F, 251, 251T, 255, 260, 279, 285C, 285D, 455
- (n) Legal Theories and Ethics: 220T, 237, 250, 258, 259, 284, 286C, 286D
- (o) Medicine and Mental Health Law: 212, 241, 286, 286A, 286B, 286C
- (p) Procedure and Jurisdiction: 242, 246, 257, 275, 281, 283, 297
- (q) Public Law and Policy 210T, 235, 235T, 240, 240A, 248, 254, 257, 257A, 279, 281, 285T, 287A, 287T, 293, 408A, 445, 460
- (r) Skills and Litigation: 211, 219, 219T, 228, 229, 239, 261, 263A, 271, 275, 278, 280, 297, 401A, 401B, 409, 410A, 410B, 410C, 412, 413, 414, 415, 430, 451, 465
- (s) Taxation: 214, 220, 220T, 247, 247B, 255, 271, 271A, 271B
- (t) Clinical Programs-Externships: 425, 430, 445, 450, 455, 460, 470
- (u) Clinical Programs-In-House Clinicals: 420, 435, 440, 480, 485
- (v) Individual and Group Study: 411, 411B, 416, 417, 418, 419, 495, 499

#### 200A. Introduction to the Law of the United States (2)

Discussion—2 hours. History and fundamental principles of the United States's legal system. Important current legal issues, developments and trends. Required for LL.M. students who have not attended a U.S. law school. Fall semester only.

#### 200BT. Introduction to US Legal Methods A (3)

Lecture/discussion—3 hours. Course is designed to provide background skills necessary to succeed in both law school and legal practice. Students gain an introductory working knowledge of the US legal method which includes learning various forms of legal writing and speaking.

#### 207A. Legal Research (LLM) (1)

Discussion—1 hour. Restricted to LL.M. students only. A description of the evolution and use of sources of law and secondary authority.

#### 207B. Advanced Legal Research (2)

Seminar—2 hours. Restricted to 35 students. Will introduce students to advanced legal research tools and techniques used in practice, including efficient computer research techniques.

#### 208A. Legal Research and Writing II (LLM) (2)

Discussion—2 hours. Persuasive writing and oral advocacy. LLM section students complete integrated research and writing assignments, including a complaint, a strategic defense office memorandum, a motion to dismiss in federal court, and an appellate brief, with oral arguments by all students.

#### 209A. Patent Law (3)

Discussion—3 hours. Prerequisite: course 274 or consent of instructor. Covers all essential aspects of patent law: patentable subject matter, novelty, utility, nonobviousness, enablement, prosecution, infringement, and remedies.

#### 209AT. Patent Prosecution and Practice (2)

Discussion—2 hours. Prerequisite: course 274 or consent of instructor. Essential aspects of patent prosecution: the role of the patent practitioner, claims and specification drafting, requirements, and strategy, appeals and post-grant proceedings, American Invents Act considerations, portfolio development and strategy, and litigation considerations.

#### 209CT. Patentable Subject Matter: Genes, Methods, and Software (2)

Seminar—2 hours. Prerequisite: course 274, 209A, 209AT. An in-depth look at recent cases and debates behind genetic patenting, software; business models; diagnostic methods, and others. Reviews the crucial and rapidly evolving field of patent law which affects some of the most important hi-tech industries.

**209T. Innovation and Technology Transfer Seminar (2)**

Seminar—2 hours. Prerequisite: course 209A or 274, recommended but not required. Restricted to 15 students. From biomedicine to cleantech, public institutions are playing leading roles in developing cutting-edge technologies. Explores the law and policy of publicly-supported innovation and technology transfer.

**210. Reforming the Police and Criminal Justice (2)**

Seminar—2 hours. Focus on major current issues: policing ethnic neighborhoods; use of deadly force; modernizing the work of prosecutors and defense counsel. Class limit: 25 students.

**210A. Policing Seminar (2)**

Seminar—2 hours. Restricted to 10 students. What are the expectations and roles of the police in a democratic society? We need order maintenance and crime control, but to assume these tasks the police sometimes intrude upon interests considered fundamental to free societies.

**210B. Sociology of Criminal Procedure (2)**

Seminar—2 hours. Limited enrollment. What are the expectations and roles of the police in a democratic society? We need order maintenance and crime control, but to assume these tasks the police sometimes intrude upon interests considered fundamental to free societies.

**210C. Sexual Assault and the Law (2)**

Seminar—2 hours. Criminal law of sexual assault, traditional and modern offenses, and proposals for reform. Discussion of procedural developments, victim's counsel, evidentiary reform, and ADR. And the implications for civil law, tort liability, Title VI, Title IX, and civil liability of perpetrators.

**210D. Wrongful Convictions (2)**

Seminar—2 hours. Course will explore the magnitude and complexity of the wrongful convictions, their causes and remedies under existing law, and possible fixes (reforms). It will emphasize relevant legal rules (Criminal Procedure, Evidence, Post-Conviction Review).

**211. Negotiations (2)**

Discussion—2 hours. Limited enrollment. Skills course teaches theoretical and empirical approaches to negotiation strategy for the purposes of making deals and resolving disputes. Students participate in simulations to hone their negotiation skills, and write analytical papers.

**211A. Advanced Negotiations Strategy and Client Counseling (3)**

Discussion—3 hours. Prerequisite: consent of instructor. Application course; must apply and secure professor approval to enroll; will involve participating in discussions and a series of simulations; your classmates will be counting on you to actively participate and be well prepared for every simulation; do not apply to take this course unless you are willing and able to participate fully and can accept constructive feedback; if you anticipate missing more than two class sessions, do not apply to take this course. Understand the dynamics of interviewing and counseling process. Designed to be relevant to a broad spectrum of negotiation problems that are faced by legal professionals.

**211BT. International Business Negotiations (3)**

Laboratory/discussion—3 hours. Course is structured around a simulated negotiation exercise with students from a similar class at Stanford Law School. Students will experience the development of a business transaction over an extended negotiation in a context that replicates actual legal practice.

**212A. Medical Liability Law and Policy (2)**

Discussion—2 hours. This course will consider the many ways in which society seeks to establish and maintain quality in patient care.

**213A. Transnational Criminal Law (3)**

Discussion—3 hours. Prerequisite: course 205; course 206. Will examine the laws responses to a particular aspect of globalization, transnational

crime. The course will explore the phenomenon of transnationality and how it affects the power of nationstates, acting alone or together, to prosecute certain crimes.

**213T. Terrorism and International Law (2)**

Seminar—2 hours. International terrorism remains a pressing concern. Devising effective remedies for responding to it within the bounds of the law is critical. Therefore, the new generation of international lawyers needs to be familiar with the relevant law and standards.

**214. Estate and Gift Tax (3)**

Discussion—3 hours. Prerequisite: course 220; course 221 recommended. Fundamentals of federal transfer taxation, including the estate tax, the gift tax, and the generation-skipping transfer tax.

**215. Business Associations (4)**

Discussion—4 hours. Legal rules and concepts applicable to business associations, both public and closely held. Corporate form of organization, partnerships and other associational forms.

**215A. The Law of Corporate Governance Seminar (2)**

Seminar—2 hours. Prerequisite: course 215. Advanced issues in the governance of publicly held corporations. Separation of ownership and control and how the law has addressed this issue at the theoretical level and in the context of topics such as the duties of corporate directors, shareholder voting rights, and competition among states to attract corporate charters.

**215S. Special Session Business Associations (4)**

Discussion—4 hours. Provides a broad survey of the legal rules and concepts applicable to business associations, both public and closely.

**216A. Law and Religion (2)**

Discussion—2 hours. Restricted to 20 students. Federal constitutional law relating to religion; the interpretation and application of the Free Exercise Clause and the Establishment Clause of the First Amendment.

**217. Telecommunications Law (3)**

Discussion—3 hours. Economic and administrative regulation of telephony, radio and television broadcasting, and video technologies such as cable and direct broadcast satellites. Emphasis on the recently enacted Telecommunications Reform Act and the role of the Federal Communications Commission, as well as other sources of regulation such as related antitrust law and state public utility regulation.

**218. Constitutional Law II (4)**

Discussion—4 hours. Not open to students who have completed course 218A or 218B. Principally covers the First Amendment and the Equal Protection Clause.

**218A. Constitutional Law II—Equal Protection (2)**

Discussion—2 hours. Students who have previously taken course 218, or who plan to take course 218 for 4 units in Spring 2011, may not take this course. Students enrolled in this course will be given priority registration spring semester 2011 to enroll in course 218B. Focuses on the Equal Protection Clause of the Fourteenth Amendment.

**218B. Constitutional Law II—First Amendment (2)**

Discussion—2 hours. Students who have previously taken course 218 or who plan to take course 218 for 4 units in Spring 2011 may not take this course. Students not required to take course 218A in order to take this course. Principally covers the free speech clause of the First Amendment.

**218D. Constitutional Theory Seminar (2)**

Seminar—2 hours. Provides students with a broad understanding of the shape of modern constitutional theory, and the ability to understand the implications of that theory for concrete historical and modern constitutional disputes.

**218ET. California Constitutional Law (2)**

Discussion—2 hours. Reviews, interpretive meta-rules for constitutional construction, structure and institutions of state government, civil liberties under the Declaration of Rights, the impact of race in California society, and criminal law.

**218T. Selected Topics in Constitutional Law (2)**

Seminar—2 hours. Examines two core themes of Constitutional Law I and Federal Jurisdiction: federalism and separation of powers. Concentrates on habeas corpus and the Eleventh Amendment as vehicles for examining the constitutional themes in greater depth.

**218TA. Separation of Powers (2)**

Discussion—2 hours. Study of the separation of powers in our federal government by focusing on certain historical events and their impact on constitutional law.

**218TB. Law of War (3)**

Discussion—3 hours. Surveys the law of armed conflict as it applies to today's battlefields.

**218TC. Antidiscrimination Law (4)**

Discussion—4 hours. Course offers an overview of federal constitutional and statutory antidiscrimination law in the United States.

**219. Evidence (4)**

Discussion—4 hours. Covers rules regarding the admissibility of testimonial and documentary proof during the trial of civil and criminal cases, including rules governing relevancy, hearsay, the examination and impeachment of witnesses, expert opinion, and constitutional and statutory privileges.

**219A. Advanced Evidence (3)**

Discussion—3 hours. Prerequisite: course 219. Limited to six students; selected by professor. Interested students complete an application form; available in the Law Registrar's Office. Credit is contingent on attending all classes and participating in all exercises. Participation is crucial to the success of the course, as students will be working in teams of three. Do not take this course unless you are willing and able to participate fully and can accept criticism. Public interest lawyers often spend much time in the courtroom. Prosecution, defender, and legal aid offices usually don't have resources to train lawyers in trial work. Seeks to help remedy this deficiency by helping develop witness interrogation skills. (S/U grading only.)

**220. Federal Income Taxation (4)**

Discussion—3 hours. Surveys the federal income tax system, with consideration of the nature of income, when and to whom income is taxable, exclusions from the tax base, deductions and credits, and tax consequences of property ownership and disposition.

**220A. Federal Income Taxation (3)**

Discussion—3 hours. Surveys the federal income tax system, with consideration of the nature of income, when and to whom income is taxable, exclusions from the tax base, deductions and credits, and tax consequences of property ownership and disposition.

**220B. Tax and Distributive Justice (3)**

Discussion—3 hours. Advanced tax course designed to introduce students to issues of tax policy, with particular emphasis on tax distribution (i.e., who or what should pay taxes in society) and tax incidence (i.e., who or what ends up paying taxes in society).

**220BT. Law of Banking and Financial Institutions (2)**

Discussion—2 hours. Guide to dual regulatory system, and an understanding of banks and other financial institutions, such as thrifts, credit unions, industrial banks, finance companies, and money transmitters, as well as large versus community banks.

**220S. Special Session Federal Income Taxation (2)**

Discussion—2 hours. Introduction to the basic principles of federal income taxation using the American federal tax model. Topics include identification of

income subject to taxation, gains and losses from property transactions, the timing of income and deductions and the identity of people subject to tax on particular items of income.

### **220T. State and Local Taxation (3)**

Discussion—3 hours. Introduction to fundamentals of state and local taxation. Beginning with historical and constitutional aspects, students will analyze recent developments in state and local taxation and their impact on client representation.

### **221. Trusts, Wills and Decedents' Estates (3)**

Discussion—3 hours. Study of the law of decedent's estates, wills, and trusts.

### **221AT. Practical Skills in Will and Trust Drafting and Administration (2)**

Laboratory/discussion—2 hours. Course provides students with the skills to practice law in the area of estate planning and probate/trust administration. Students will follow an estate planning client and draft actual estate plan documents. A series of related topics will be explored.

### **222. Critical Race Theory Seminar (3)**

Discussion—3 hours. Examines race relations and racial discrimination in America through the perspectives of proponents of the Critical Race Theory (CRT) movement, a collection of legal scholars who challenge both conservative and liberal political orthodoxies.

### **222A. Latinos and Latinas and the Law (2)**

Seminar—2 hours. Seminar analyzes some of the legal issues of particular relevance to the Latino community in the United States, including racial identity, immigration, language regulation, national and transnational identity issues, affirmative action, and civil rights.

### **222T. Asian Pacific Americans and Law (2)**

Discussion—2 hours. Profound impact on how American Law has shaped Asian Pacific Americans demographics, experiences, and possibilities of Asian Americans will be examined.

### **223. Estate Planning Seminar (2)**

Seminar—2 hours. Prerequisite: course 221. Limited enrollment. Selected topics in the estates and trusts area. Content varies with instructor. Satisfies the advanced legal writing requirement.

### **224. Animal Law Seminar (2)**

Seminar—2 hours. An introduction to legal principles affecting animals and their use. GE credit: WE.

### **225. Marital Property (2)**

Discussion—2 hours. The California community property system, including the rights of marital and domestic partners during the ongoing relationship, and upon the end of the relationship by death or divorce.

### **226. Disability Rights (3)**

Discussion—3 hours. Examines disability law and theory with emphasis on U.S. statutory law (particularly, Americans with Disabilities Act, ADA Amendments Act, and Individuals with Disabilities Education Act) as it applies to employment, education, public accommodations, and government services and programs.

### **226ET. Mental Disability Law (3)**

Lecture/discussion—3 hours. Students will examine the civil and constitutional bases of mental disability law, as well as its history, and explore the role of mental disability in the policing and criminal trial process.

### **227A. Criminal Procedure (3)**

Discussion—3 hours. Federal constitutional limits on government authority to gather evidence and investigate crime. Topics include Fourth Amendment limits on search, seizure, and arrest; the Fifth Amendment privilege against self-incrimination; and the Sixth Amendment right to counsel.

### **227B. Advanced Criminal Procedure (3)**

Discussion—3 hours. Examines a range of issues, including bail, charging decisions, preliminary hearings, discovery, statute of limitations, venue, joinder

and severance, pleas, plea bargaining, assistance of counsel, trial, double jeopardy, sentencing, appeal and collateral remedies.

### **227CT. Topics in California Criminal Practice (2)**

Seminar—2 hours. Advanced criminal law and procedure class aimed at students planning to practice criminal law in California, either as an extern or summer clerk, or after graduation.

### **228. Business Planning and Drafting (4)**

Discussion—4 hours; extensive writing. Prerequisite: course 215; prerequisite will not be waived, do not register for the course unless you have completed course 215. Limited enrollment. Introduces students to a number of legal and business considerations relevant to forming and operating an emerging growth business (such as technology startup).

### **228A. Mergers and Acquisitions Law (2)**

Discussion—2 hours. Prerequisite: course 215. Takes a practical approach to mergers and acquisitions, with an in-depth look at the planning, negotiation, documentation and completion of mergers and acquisitions.

### **228B. Accounting for Lawyers (2)**

Discussion—2 hours. Exposes student to basic principles of accounting, from the perspective of the practicing attorney.

### **228C. Law and Statistics (3)**

Discussion—3 hours. Introduction to fundamentals of statistical analysis and how statistical analysis is used in the law and public policy. Course goal is to help students become excellent consumers of statistical information and evidence.

### **229. Scientific Evidence (3)**

Discussion—3 hours. Prerequisite: course 219. Limited enrollment. In addition to examining the evidence law governing the admission of scientific testimony, this course considers trial advocacy in presenting and attacking such testimony.

### **230. International Environmental Law (3)**

Discussion—3 hours. Prerequisite: prior course work in environmental law and/or international law is helpful. Elective Course for Environmental Law Certificate Program. May satisfy Advanced Writing Requirement with professor's permission. Provides an overview of the structure and basic principles of international environmental law and policy.

### **230T. Free Trade and the Environment (2)**

Seminar—2 hours. Free Trade and Environ. Course Description: Examines the relationship between legal rules relating to trade and rules for the protection of the environment.

### **231. Sex Based Discrimination (3)**

Discussion—3 hours. Issues raised by legal and social distinctions between men and women. Explores potential remedies for discrimination drawn from constitutional law, statutory enactments, and common law developments. Subject matter areas include sex-based discrimination in constitutional law, family law, reproductive rights, educational opportunity, criminal law, and employment.

### **231A. Sexual Orientation, Gender Identity, and the Law (3)**

Discussion—3 hours. Examines the legal and social regulation of sexual orientation and gender identity.

### **232. Real Estate Finance (2)**

Discussion—2 hours. An examination of the problems involved in the acquisition, financing, and development of real estate, and of lender remedies and debtor protections in the event of debtor default. The practical application of California legal doctrines.

### **232AT. Real Estate Transactions (2)**

Discussion—2 hours. Review of legal issues in the purchase, sale, financing of residential real estate in US, with non-exclusive focus on California. Roles of parties involved, mechanisms of financing and security, survey of remedies, and role of mortgage lending beginning in 2008.

### **232T. Property Law & Race (2)**

Seminar—2 hours. Seminar explores the extent to which property law (common law, federal, state, and local statutes, and administration regulations) historically impacted and currently shapes conceptions of race, racial groups, and racial relations.

### **233. Asylum and Refugee Law (2)**

Seminar—2 hours. Course surveys U.S. and international law concerning refugees and asylum-seekers. This class will question the meaning of persecution, the definition of "particular social groups" in U.S. law, protections for gender-related violence, statutory bars to asylum, and U.S. refugee policy.

### **235. Administrative Law (3)**

Discussion—3 hours. Examines how the U.S. Constitution and the federal Administrative Procedure Act constrain and regulate decision making by government agencies and officials.

### **236. Securities Regulations (3)**

Discussion—3 hours. Prerequisite: course 215. Regulation of the distribution of securities under the Securities Act of 1933 and SEC Rules adopted there under, registration and reporting provisions of the 1934 Securities Exchange Act.

### **236A. Securities Regulation I (2)**

Discussion—2 hours. Prerequisite: course 215 or consent of instructor. Legal rules and concepts applicable to business associations, both public and closely held. Corporate form of organization, partnerships and other associational forms.

### **236B. Securities Regulation II (2)**

Discussion—2 hours. Prerequisite: course 215 or consent of instructor; course 236A recommended. Securities Exchange Act of 1934 and the regulation of securities markets. Topics covered include regulation of securities markets and securities professionals, responsibilities of securities lawyers, continuous reporting, transnational securities fraud, and enforcement of the securities acts.

### **237. Legal History (2)**

Discussion—2 hours. Course traces the development of the common law from its origins in medieval England through the twentieth-century.

### **237B. Special Topics in Legal Theory: Ancient Athenian Law (2)**

Seminar—2 hours. Athenian legal system was different from our own and was far less formal. How did it work? Why did it work? Why have political and legal theorists misunderstood Athens for so long and what can we learn from that failure?

### **239. Representing Clients in Mediation (3)**

Discussion/laboratory—3 hours. Restricted to 24 students. Interactive course focuses on attorney representation of clients in mediation.

### **240. Elections and Political Campaigns (2)**

Discussion—2 hours. Limited enrollment. Covers selected constitutional and statutory aspects of federal and state elections, including campaign finance, initiatives, and other topical issues.

### **240A. Law of the Political Process (3)**

Discussion—3 hours. Covers many of the foundational issues in the "law of democracy," as that body of statutory and constitutional law has developed in the United States.

### **241T. Voting Rights Seminar (2)**

Seminar—2 hours. Seminar addresses current issues in the protection of voting rights, particularly the voting rights of racial and ethnic minorities.

### **242. Conflict of Laws (2)**

Discussion—3 hours. Study of how law operates across state and national borders. Topics include choice of applicable law in transactions involving multiple jurisdictions, recognition of judgments, and the exercise of jurisdiction.

### **242S. Special Session Conflict of Laws (2)**

Discussion—2 hours. Study of transactions with multi-state and international contracts. Topics include jurisdiction, recognition of foreign judgments, and choice of applicable law. Addresses problems that

international lawyers encounter in a wide variety of deals with the emphasis on international commercial deals.

### **243. Commercial and Bankruptcy Law (4)**

Discussion—4 hours. The business debtor who doesn't have enough money (or is unwilling) to pay his debts. Remedies available to creditors to force payment, along with devices that creditors may use to give themselves priority against limited assets. Examination of the role of bankruptcy. Bankruptcy both as a means for providing funds for creditors, and as a device for maximizing asset value.

### **243A. Secured Transactions (3)**

Discussion—3 hours. Secured transactions are transactions where a lender takes an interest in debtor's property as "collateral," or security, for repayment of a loan. Covers secured transactions in personal property such as auto and bank loans against business inventory.

### **243CT. Advanced Bankruptcy Practice (2)**

Discussion—2 hours. Course will cover corporate chapter 11 and its alternatives and analyze different professionals' roles. Selection of venue and formation of strategic objectives will also be discussed.

### **245. Corporate and White Collar Crime (3)**

Discussion—3 hours. The law of conspiracy, corporate criminal liability, mail and wire fraud, RICO, money laundering, and other business and environmental crimes and associated defenses.

### **245B. Death Penalty Seminar (2)**

Seminar—2 hours. Limited enrollment. Offers overview of the constitutional law governing the death penalty in the United States.

### **246. Federal Jurisdiction (3)**

Discussion—3 hours. Prerequisite: course 205. A study of subject-matter jurisdiction of federal courts.

### **247. Taxation of Partnerships and LLCs (2)**

Discussion—2 hours. Prerequisite: course 220. Study of the federal income tax treatment of partnerships and partners; including entities classified as partnerships.

### **247A. International Aspects of U.S. Taxation (3)**

Discussion—3 hours. Prerequisite: course 220. Completion or current enrollment in a course covering the domestic taxation of corporations is suggested but not required. Corporate Tax may be taken concurrently. Examine the U.S. income tax laws and policies related to the taxation of foreign income of U.S. persons and U.S. income of foreign person.

### **247B. Corporate Tax (2)**

Discussion/laboratory—2 hours. Examination of the federal income tax relationship between corporations and their owners. Covers the transfer of funds into a corporation on formation and the re-transfer of money and property from the corporation to its shareholders.

### **248. Public International Law (3)**

Discussion—3 hours. Introductory course covers basic international law concepts and the law-making process.

### **248A. Jurisdiction in Cyberspace Seminar (2)**

Seminar—2 hours. Limited enrollment. Review concepts in international law, conflicts of law, cyberlaw, and federal jurisdiction to address the growing multi-jurisdictional conflicts created by the Internet. Examine European efforts at crafting intra-Europe jurisdictional rules, as well as other international jurisdiction treaty projects such as those at the Hague.

### **248B. International Human Rights (2)**

Discussion—2 hours. Introduces international human rights legal system through an examination of its historical origins and precursors and a review of its international legal backdrop, including the character and sources of international law, the UN Charter and the UN system.

### **248BT. Human Rights in the Former Soviet Union: Legal Tools for Repression and Redress: Part II (2)**

Seminar—2 hours. This course first provides a historical context for the current political and human rights situation in the Former Soviet Union. It then analyzes the legal mechanisms and other strategies that some of the Former Soviet Union's countries governments employ to repress their own citizens. Finally, the class examines the ways in which citizens use the law to seek relief from remedies for the repression of their rights.

### **248CT. United Nations Human Rights Practicum (3)**

Discussion—3 hours. Students will engage in intensive research and writing in the field of cultural rights, the workings of the United Nations human rights system, and gain experience working with UN documents, individual cases in the field and with thematic reports.

### **248ET. Transitional Justice and Memory Politics in the Asia-Pacific (2)**

Seminar—2 hours. Transitional justice (legal responses to wrongdoings of repressive predecessor regimes) can help resolve "memory politics" that plague the relations and societies of many Asia-Pacific states. Together we will examine relevant roles of governments, novel institutions, the judiciary, and civil society.

### **248D. Globalization and the Law (3)**

Discussion—3 hours. Globalization of people, finance, goods, services, and information puts pressure on the nation-state form. In a world of diasporas and multinational corporations, what does citizenship mean? In the absence of a world government, can we grapple with problems that now take on a global form? We will canvass a number of different approaches, including: the technical coordination of the Basel Accord on capital adequacy; the World Trade Organization regime universalizing substantive legal standards related to intellectual property; the Internet governance regime offered by ICANN, a California not-for-profit corporation; private and state-based efforts to support global health financing; and the Kyoto Protocol's cap-and-trade system for responding to a global problem where the sources, costs and benefits are not uniformly distributed. We will also consider issues of extraterritoriality, regulatory competition, and so-called Asian Values.

### **248G. Legal Spanish for Lawyers (2)**

Seminar—2 hours. Prerequisite: must satisfy one of the following: undergraduate degree in Spanish; a minor in Spanish with experience living in a Spanish-speaking country; grew up in a Spanish-speaking household and achieved proficiency; able to pass an informal assessment by the instructor. Designed for law students who are native Spanish-speakers or who have achieved proficiency in Spanish through study or experiences in a Spanish-speaking country.

### **248T. Advanced International Law (2)**

Discussion—2 hour. Review books of international law; Hugo Grotius and Judge Rosalyn Higgins. Themes include peaceful resolutions of dispute, law of war and peace, and international legal process. GE credit: WE

### **248TA. Human Rights in Post Soviet Central Asia: Legal Tools For Repression and Redress (2)**

Discussion—2 hours. Limited enrollment. Provides a historical context for the current political and human rights situation in Central Asia.

### **248TC. International Economics Law (3)**

Discussion—3 hours. This course will examine the architecture of the international economic system, with a focus on both trade and investment.

### **248TT. Theories of International Law (2)**

Discussion—2 hours. International law, once critiqued as powerless and ineffective, is now challenged as a threat to American democracy. Introduction to competing theories of international

law, including natural law, positivism, realism, liberalism, constructivism, fairness, legal process, and world public order.

### **249. Comparative Law (3)**

Discussion—3 hours. The uses of comparative method, principal differences between common law and civil law and the styles of legal reasoning that prevail in these two great legal cultures. Topics include the evolution of the civil law, the phenomenon of codification, the structure of European civil codes and the interpretation of their provisions, the respective roles of counsel, judges and law teachers, civil law procedure, and the analysis of selected areas of substantive law. Knowledge of a foreign language is not required.

### **249S. Special Session Comparative Law (1)**

Discussion—1 hour. This course will provide a comparative perspective for students of American law. After an initial look at the uses of the comparative method, discussions will be centered around the main differences between common law and civil law and the different styles of legal thinking. Topics to be covered will be the evolution of the civil law and the idea of codification, the structure of European civil codes and the interpretation of their provisions, the personnel of the law and procedure in civil law countries, and the analysis of selected problems of substantive law. Knowledge of a foreign language will not be required.

### **250. Jurisprudence Seminar (3)**

Seminar—3 hours. Limited enrollment. Deals principally with the question of how judges should decide "hard cases," where the content of the law is in doubt and competent arguments have or could be offered for mutually inconsistent decisions in favor of either party.

### **250AT. Aoki Legal Scholarship Seminar (3)**

Seminar—3 hours. Course is for students participating in the Aoki Center for Race and Nation Studies' Immigration Law Journal. Students will research, and write a note on a topic related to immigration. The expectation is production of papers of publishable quality.

### **250BT. Writing Requirement Workshop (2)**

Seminar—2 hours. Students who have written a course paper or an independent study paper and would like to take papers to the next level, producing a work of publishable quality. (S/U grading only.) GE credit: WE.

### **250T. Asian American Jurisprudence (3)**

Discussion—3 hours. Legal, social, and political discourse on race relations has traditionally been framed in Black-White terms. This course disrupts the traditional view by taking Asian Americans seriously.

### **251. Labor Law (2)**

Discussion—2 hours. Survey of the legislative, administrative, and judicial regulation of labor relations under federal law. Historical development of labor law, the scope of national legislation, union organization and recognition, the legality of strikes, picketing, and the negotiation of collective bargaining agreements.

### **251T. Labor Law I (2)**

Discussion—2 hours. Restricted to students who previously took Labor Law in Fall 2008 may not enroll in Labor Law I. Survey of the legislative, administrative, and judicial regulation of labor relations under federal law.

### **251TB. Labor Law II (2)**

Discussion—2 hours. Prerequisite: course 251T preferred; not required. Survey of the legislative, administrative, and judicial regulation of labor relations under federal law.

### **252. International Litigation and Arbitration (3)**

Discussion—3 hours. Current developments in international law, conflict of laws, civil procedure, arbitration, and comparative law in the context of transactions and disputes that cut across national boundaries.

**254. Housing Law (2)**

Discussion—2 hours. Survey course covers legal and policy issues related to developing, protecting and preserving affordable, safe and accessible housing and sustaining viable, diverse communities.

**254A. Law and Rural Livelihoods Seminar (3)**

Seminar—3 hours. Provides broad overview of law as it relates and applies to rural people and places.

**254T. Practicum in Rural Community Advocacy (3)**

Seminar—3 hours. Limited enrollment. Provides an opportunity to learn about Participatory Action Research (PAR) methods and community-based lawyering in the context of rural community development and advocacy. Using these skills and knowledge to serve rural California communities.

**255. Pension and Employee Benefit Law (3)**

Discussion—3 hours. Prerequisite: course 220. The federal regulation and taxation of private pensions and employee benefits. The Employee Retirement Income Security Act (ERISA), including such topics as coverage, forfeitures, spousal rights, creditor access, fiduciary duties, preemption of state law, remedies, and other litigation issues. Internal Revenue Code issues such as discrimination in favor of the highly compensated, limitations on contributions and benefits, rollovers, IRAs, early distribution penalties, and minimum distribution rules.

**256. Land Use (2)**

Discussion—2 hours. Local agencies, developers, environmental interest groups, and others who regularly deal with the administrative and legislative applications of land use planning and development laws. Topics include zoning, general plans, local government land use regulation, and related areas of litigation. The expanding role of the California Environmental Quality Act.

**257. Legislative Process (2)**

Discussion—2 hours. Fundamental elements of the legislative process, including legislative procedure; the legislature as an institution; lobbying; statutory interpretation; legislative-executive relations; and the legislature's constitutional powers and limitations.

**257A. Legislative Intent Seminar (2)**

Seminar—2 hours. Theories and principles of statutory and constitutional interpretation. Original intent vs. living constitution; permissible kinds of evidence for determining legislative intent; canons of construction; extent to which initiatives should be interpreted similarly to legislative enactments.

**257B. Statutory Interpretation (3)**

Discussion—3 hours. Elective course for Environmental Law Certificate Program. Provides an introduction to the theory and practice of statutory interpretation.

**258. Professional Responsibility (2)**

Discussion—2 hours. The American Bar Association's Model Rules of Professional Conduct and the Code of Judicial Conduct, which are tested on the Multistate Professional Responsibility Examination, and the California Rules of Professional Conduct, which are tested on the California Bar Examination. Issues affecting the legal profession, including lawyers' ethical duties and responsibilities to clients, the courts, third parties, and the legal system.

**258A. Legal Ethics and Corporate Practice (3)**

Discussion—3 hours. Focus on corporate practice to explore the ethical responsibilities of lawyers.

**258BT. Mindfulness and Professional Identity (2)**

Seminar—2 hours. Introduction to the practice of meditation and connect it with readings about the legal profession in three key areas.

**258DT. Setting Up and Maintaining Solo Law Practice (1)**

Lecture/discussion—1 hour. Introduction/overview of how to start a successful solo practice.

**258ET. Utility of Law School and Careers in the Law (1)**

Discussion—1 hour. Despite improvements in the economy, some observers continue to question whether law school is a viable option for college graduates. The class will consider the controversy and expose students to the variety of careers in the legal profession. (S/U grading only.)

**259. Feminist Legal Theory (3)**

Discussion—3 hours. Provides an overview of feminist legal theory and considers how its various strands inform legislative and judicial law making. Satisfies Advanced Writing Requirement.

**259A. Women, Islam and the Law (2)**

Seminar—2 hours. This course will study legal and religious reform movements for women's rights within Muslim communities in the context of current scholarly and political debates about fundamentalism, democracy, equality, secularism, universalism, and multiculturalism. This is a limited enrollment seminar.

**259B. Women's Human Rights (2)**

Seminar—2 hours. Overview of international legal and institutional system for the protection of women's human rights from an academic perspective and the view of the practitioner. Includes the (CEDAW), violence against women, sexual and reproductive rights, economic rights, and more.

**259P. Women and the Law Practicum (1)**

Discussion/lecture. Prerequisite: prior or concurrent enrollment in course 259. Complements the content of the feminist legal theory course by providing students the opportunity to consider how feminist theory may be used to inform law-making.

**260. Employment Discrimination (3)**

Discussion—3 hours. Examine federal laws prohibiting employment discrimination, including Title VII of the Civil Rights Act of 1964, the Equal Pay Act, the Age Discrimination in Employment Act, the Americans with Disabilities Act, the Rehabilitation Act of 1973, and § 1981.

**260A. Employment Law (3)**

Discussion—3 hours. Provides an overview of employment law, labor law and employment discrimination law and aims to serve as a foundation for understanding the law and policy (statutory and common law) that surround the employer-employee relationship.

**261. Judicial Process (2)**

Discussion—2 hours. Examines a variety of issues concerning the judicial process. Focus is on judge's role in the legal process, the administration of justice, ethical issues, decision making, bias, and critical examination of the strengths and weaknesses in our current judicial system.

**262. Antitrust (3)**

Discussion—3 hours. Focus of the course is the federal antitrust laws, concentrating on basic substantive areas of the Sherman and Clayton Acts.

**262AT. US Antitrust Law and Indian Competition Law: A Comparative Perspective (2)**

Lecture/discussion—2 hours. Fundamental principles of Indian Competition Law and US Antitrust Law in a comparative perspective. The course will help American students, interested in future corporate law careers, to develop effective strategies for better managing cross border deals in India.

**262S. Special Session Antitrust (1)**

Discussion—1 hour. A study of the federal antitrust laws including price fixing, limits on distribution, tying arrangements, monopolization and mergers.

**262T. Regulated Industries (2)**

Discussion—2 hours. Examines regulation of business in sectors, traditionally described as "common carrier" and "utility" industries, where because of market failures normal competitive mechanism will not protect consumers from exercises of market power.

**263A. Trial Practice I (3)**

Discussion—2 hours; laboratory—1 hour. Prerequisite: course 219, may be taken concurrently. Limited enrollment. Introduction to the preparation and trial of cases, featuring lectures, videotapes, demonstrations, assigned readings and forensic drills. Laboratory held on Tuesday, Wednesday, and Thursday evening.

**264. Water Law (3)**

Discussion—3 hours. Property rights in surface waters, including riparian rights, prior appropriation, and public rights use of water bodies; environmental constraints on exercise of water rights; groundwater rights and management; federal allocation and control of water resources; legal aspects of interstate allocation.

**264A. Ocean and Coastal Law (3)**

Discussion—3 hours. Introduction to the goals and challenges of coastal and ocean policy; the complicated web of public and private interests in coastal lands and ocean waters; regulation of coastal development; domestic and international fisheries management; and preservation of ocean resources.

**265. Natural Resources Law Seminar (2)**

Seminar—2 hours. Prerequisite: course 285 or 256 recommended, but not required. Limited enrollment. In-depth coverage of two foundational principles of natural resources law: public trust doctrine and private property rights protected under the Takings Clause of the U.S. and many state constitutions.

**266A. Cyberlaw (2)**

Discussion—2 hours. Emerging legal issues crucial to the conduct of business in cyberspace. Discussion of the evolution and current administration of the Internet and the World Wide Web.

**267. Civil Rights Law (3)**

Discussion—4 hours. Civil remedies for civil rights violations under the primary United States civil rights statute. Specifically, covers actions for constitutional and statutory violations under 42 USC § 1983, affirmative defenses, and abstention doctrines.

**267B. Civil Rights Seminar (2)**

Seminar—2 hours. Limited enrollment. The social, political, legal and historical factors which led to the creation of the United States Commission on Civil Rights (USCCR) in 1957. The United States Commission on Civil Rights is a bipartisan, independent agency established by the Civil Rights Act. It is directed to investigate complaints alleging deprivations of the right to vote, and voter fraud; to study and collect information relating to discrimination and the denial of equal protection of the laws under the Constitution on the basis of race, color, religion, sex, age, disability, or national origin; and submit reports, findings and recommendations to the President and to Congress. The role that the USCCR has played and continues to play in American politics, legislative enactments and the national dialogue on equality, fairness and justice in the context of civil and human rights. Satisfies Advanced Legal Writing Requirement.

**268T. Suing the Government: Civil Rights, Torts, Takings, and More (2)**

Discussion—2 hours. Explores the basic requirements of suing government, including sovereign immunity, particular schemes for litigating against government (Federal Tort Claims Act, APA, False Claims Act, etc.), direct constitutional claims and the procedural pitfalls and remedies available against government.

**269. Basic Finance for Lawyers (2)**

Discussion—2 hours. Prerequisite: students with a non-law basic finance course will not be admitted, except with consent of instructor. Basic techniques of analysis that are part of the core curriculum in a good business school. Gives background necessary for understanding and advising your clients and for understanding other business-related law school courses.

**269A. Basic Finance (3)**

Discussion—3 hours. Students with a non-law basic finance course must have instructor's permission. Basic techniques of analysis that are part of the core curriculum in a good business school are studied. Purpose is to give you background necessary for understanding and advising clients and for understanding other business-related law courses.

**269AT. The Financial Crisis: Law & Policy and Inequality (2)**

Seminar—2 hours. Examines the regulation of financial intermediaries. The stated goal of regulation is to ensure systemic stability and to pursue consumer protection. We will ask whether there is an imbalance between systematic stability and consumer protection before the crisis of 2008.

**269C. Corporate Finance (3)**

Discussion—3 hours. Prerequisite: course 215 or concurrent enrollment recommended. Focus on how corporations raise money, stocks and bonds, etc.; how deals are structured and why corporations use one strategy instead of another.

**269D. Seminar on Financial Regulation (2)**

Seminar—2 hours. Introduction to the legal and regulatory issues presented by contemporary capital markets.

**269E. Public Finance: Theory and Practice (2)**

Seminar—2 hours. Students will be introduced to the basic concepts of public finance, the underlying law governing public finance: in particular state law, federal tax law and federal securities law.

**270. International Business Transactions (2)**

Discussion—2 hours. Select legal problems arising from international business transactions. Topics include the international sales contract, letters of credit, transfers of technology, regulation of bribery, development of joint ventures, repatriation of profits, and foreign exchange problems.

**270A. Life-Cycle Transactions and Drafting (3)**

Discussion—3 hours. Class focuses on analysis of contract drafting design for various types of transactions and actual transactional documents typically encountered.

**270S. Special Session International Business Transactions (2)**

Discussion—2 hours. A consideration of select legal problems arising from international business transactions. Topics include the international sales contract, letters of credit, transfers of technology, regulation of bribery, repatriation of profits, and national efforts to control imports.

**271. Nonprofit Organizations and Drafting (3)**

Discussion—4 hours. Prerequisite: course 215 or consent of instructor. Restricted to 13 students. Legal rules and concepts applicable to nonprofit organizations.

**271A. Nonprofit Organizations: State and Local Governance Issues (2)**

Discussion—2 hours. Prerequisite: course 215 (may be taken concurrently) or consent of instructor. State and local laws applicable to nonprofit organizations, i.e., public interest, cultural, religious, educational, and other not-for-profit entities. Federal tax exemptions of nonprofits, state and local laws impacting nonprofits with respect to incorporation or charitable trust formation, operation and governance, dissolution, fiduciary obligations of trustees and officers and directors, management and investment obligations vis-à-vis trust assets, cy pres, rights of members of social clubs, trade associations and labor unions, enforcement of obligations and rights by the attorney general and others, and regulation of charitable solicitation. Topics may include local property tax and other tax exemptions, nonprofit accounting issues public/private partnerships and Federal antitrust and constitutional constraints.

**271B. Nonprofit Organizations: Tax Exemptions and Taxation Focus (2)**

Discussion—2 hours. Prerequisite: course 215 or consent of instructor; course 220 recommended. Conceptual basis and substantive law criteria for the federal and state income tax exemption of nonprofit organizations and those particular circumstances and activities which will result in income taxation or financial sanction, including qualifications for exempt status, the nondistribution constraint, the inurement and private benefit concepts, limitations on campaign activities, permissible lobbying expenditures, the unrelated business income tax, the deduction for charitable contributions, intermediate sanctions, the differences between private foundations and public charities, special excise taxes, the exemption application process and reporting and disclosure requirements. Topics may include nonprofit accounting issues, local property tax and other local tax exemptions, and public/private partnerships.

**271T. Nonprofit Organizations-Key Legal Topics (2)**

Discussion—2 hours. Legal issues raised in operating and governing a nonprofit organization, primarily a public charity.

**272. Family Law (3)**

Discussion—3 hours. An introduction to the legal regulation of the family.

**273A. Education Policy and the Law (3)**

Discussion—3 hours. Topics include civil rights, inequality and the "right" to an education, bilingual education, school finance litigation, educational access, No Child Left Behind Act, Common Core Standards and charter schools. For students interested in educational policy and social regulatory policy.

**274. Intellectual Property (3)**

Discussion—3 hours. Provides a broad survey of intellectual property law.

**274A. International Intellectual Property and Development (2)**

Discussion—2 hours. In September 2007, the World Intellectual Property Organization adopted a development agenda that would rewrite that body's mandate, placing the concerns of the poor at the center of international intellectual property law and policy.

**274AS. Summer Session Intellectual Property (2)**

Discussion—2 hours. This course provides a broad survey of the field of intellectual property. Areas covered will include trademarks, patents, trade secrets, idea protection, unfair competition, and copyright.

**274BT. Law of Trade Secrets and Restrictive Covenants (2)**

Discussion—2 hours. Focus is on the law of trade secrets, including the Uniform Trade Secret Act (UTSA), restrictive covenants not to compete, and current case law developments in the areas of employee mobility and raids, and corporate espionage.

**274CT. Knowledge Commons, Collaborative Authorship, Open Access (2)**

Seminar—2 hours. Focuses on the increasingly global diffusion and success of collaborative forms of cultural and technoscientific production rooted in copyright-based licenses.

**274D. Intellectual Property in Historical Context Seminar (2)**

Seminar—2 hours. How the legal system has adapted to earlier periods of rapid change by creating, delimiting, and expanding intellectual property rights (IPRs). Required paper satisfies advanced writing requirement.

**274ET. Intellectual Property, Human Rights & Social Justice (2)**

Seminar—2 hours. Course will examine the implications of copyright and patents for a broad set of social justice values, with particular emphasis on the interaction between intellectual property law and human rights law on the global stage.

**274FT. Censorship in the Global Age (2)**

Seminar—2 hours. Course examines from a globalized perspective a broad range of censorship issues, drawing from established cases and practices. This seminar attempts to identify a globally consistent set of theories that have gained traction in relevant regional or international debates.

**274GT. Race, National Identity and Intellectual Properties (2)**

Seminar—2 hours. Drawing upon methods taken from critical race theory, critical/cultural studies, and rhetoric this course addresses the relationships between intellectual properties and processes racial/national identity formation in the US, particularly as exemplified in legal, popular cultural, and political texts.

**274T. Theory and History of Intellectual Property (2)**

Seminar—2 hours. Seminar traces development of intellectual property law in the U.S. and Europe because it is not possible to understand the logic and shape of current Intellectual Property concepts outside of their messy history.

**275. Complex Litigation (2)**

Discussion—2 hours. Issues that frequently arise in large complex litigation involving multiple parties and multiple claims.

**275TA. Intellectual Property Agreement Drafting for Biotech & Pharma**

Seminar—2 hours. Prerequisite: upper-division Business Law course or Intellectual Property course; priority given to students that have completed course 274. Covers the negotiation and drafting of intellectual property agreements common in the biotechnology and pharmaceutical arena.

**276. Juvenile Justice Seminar (2)**

Seminar—2 hours. Legal and philosophical bases of a separate juvenile justice process for crimes committed by minors; police investigation, apprehension, and diversion; probation intake and detention; juvenile court hearing and disposition; juvenile corrections. The role of counsel at each phase of the process is examined.

**277. Native American Law (3)**

Discussion—3 hours. Seminar focuses on legal relations between Native American tribes and the federal and state governments.

**277T. Indian Gaming Law Seminar (2)**

Seminar—2 hours. Examines unique historical, political and legal context in which Indian tribes operate casinos, including impacts on tribal sovereignty, relations between tribes, states and local governments and changing relationships among the tribes themselves members, with particular reference to experience of California.

**278. Pretrial Skills (2)**

Discussion—2 hours. Limited enrollment. This course uses role-playing exercises, videotaped simulations, and related projects to introduce students to lawyering skills basic to the practice of law, including client interviewing, witness interviewing and discovery, including depositions.

**279. Public Sector Labor Law (2)**

Seminar—2 hours. Limited enrollment. Prerequisite: course 251 or consent of instructor. Application of private sector labor law doctrines to the public sector. Emphasis on the four California public sector statutes and the impact of constitutional law on public employees. Class presentation and seminar paper required. Satisfies advanced writing requirement.

**280. Advanced Legal Writing: Analytical & Persuasive Writing (2)**

Seminar—2 hours. Prerequisite: consent of instructor. Develop essay writing skills and performance test drafting typically employed on the bar examination. (S/U grading only.)

**280AT. Legal Analysis (2)**

Discussion—2 hours. Selected enrollment by permission of professor; 2L's only. Focuses on skills critical to law school success, and ultimately, bar exam success. (S/U grading only.)

**280BT. Problem Solving and Analysis (2)**

Discussion—2 hours. Prerequisite: consent of instructor. Restricted to third-year Law students only. Skills focused on the development of legal analytical and organizational methods essential to successful completion of the Performance Test component of the California Bar Exam (and other states), and, by extension, to success in the practice of law. (S/U grading only.)

**281. Local Government Law (2)**

Discussion—2 hours. Broad approach to state and local government law, both practically and theoretically. Topics include: federalism, relations between states and localities, governmental liability, zoning, educational equity and public finance.

**282. Energy Law Seminar (2)**

Seminar—2 hours. The history, law, and public policy of energy regulation in the United States with an emphasis on economic and environmental regulation. Competitive restructuring of the natural gas and electric utility industries emphasized. The basic regulatory schemes for other energy sources such as hydroelectric power, coal, oil, and nuclear power explored. Recommended to anyone who has an interest in the energy sector, various models of economic regulation, or regulated industries.

**282AT. Renewable Energy Seminar (2)**

Seminar—2 hours. Seminar will provide a broad overview of renewable energy law and policy with a particular focus on the California policy and institutional context.

**283. Remedies (3)**

Discussion—2 hours. Survey of modern American civil remedies law in both private and public law contexts. Topics addressed include equitable remedies, equitable defenses, contempt power, injunctive relief, restitution, and money damages in torts and contracts.

**284. Law and Economics (4)**

Discussion—4 hours. Prior study of economics is not required. Introduces students to the economic analysis of law.

**285. Environmental Law (4)**

Discussion—4 hours. Introduction to environmental law, focusing primarily on federal law.

**285A. California Environmental Issues (2)**

Discussion—2 hours. The “nation-state” of California has for many years been a national and global leader in environmental law and policy. Survey of key California environmental law and policy issues.

**285B. Environmental Practice (2)**

Discussion—2 hours. Prerequisite: course 285 recommended. Examines underlying theory and practice in securing compliance with our major environmental laws.

**285BT. Food Justice (2)**

Seminar—2 hours. Focus on the law and policy of the emerging “food justice movement,” which combines the goals and principles of the environmental justice movement with some of the policy initiatives involved in “ethical consumption” and “sustainable agriculture” movements.

**285C. Food and Agricultural Law (3)**

Discussion—3 hours. Introduction to agricultural law, focusing on legal principles and issues at the forefront of contemporary debates about agriculture in society.

**285CT. The Business of Lawyering (2)**

Discussion—2 hours. Desired outcome is a thorough understanding of the business side of law practice and to promote an understanding of the relationship and balance between legal skills, business requirements of a practice, client needs and a work-life balance.

**285D. Farmworkers and the Law (2)**

Discussion—2 hours. Provides an overview of California and federal laws impacting farmworkers and how such laws have been applied to regulate working conditions in agriculture.

**285E. Climate Change Law and Policy (3)**

Discussion—3 hours. Addresses the legal and public policy dimensions of climate change, perhaps the most important environmental issue of our time.

**285F. Environmental Justice (2)**

Discussion—3 hours. Introduction to the field of environmental justice.

**285H. Comparative Environmental Law (2)**

Discussion—2 hours. Focus on Pacific Rim, examining factors, similarities/differences in countries environmental regulation and success of environmental law. Including information and market-based regulatory approaches; compliance and enforcement gaps; citizen and community mobilization; the role of legal institutions; variations in regulatory style.

**285T. Wine and the Law (2)**

Seminar—2 hours. Surveys the legal landscape of this multi-billion dollar industry, focusing on contemporary debates and developments in judicial, legislative, and administrative arenas.

**285TA. Environmental Law Seminar: Emerging Technologies and the Environment (2)**

Seminar—2 hours. Examines legal regimes that might apply to various emerging technologies and consider governance mechanisms and reforms that might enable more foresighted and participatory development and management of technology.

**286. Health Care Law (3)**

Discussion—3 hours. Addresses legal issues raised in general areas: access to health care and health care financing. Course materials and discussion focus on both public and private aspects of these issue areas. GE credit: WE.

**286A. Topical Issues in Health Law (2)**

Seminar—2 hours. Limited enrollment. The course focuses on four-six issues at the interface of law, medicine, bioethics, and health policy that are currently the subject of major litigation, legislation, and/or contentious debate in the domains of bioethics and public policy.

**286B. Public Health Law (2)**

Discussion—2 hours. Restricted to 15 students. Public health law, seen broadly, is the government's power and responsibility to ensure the conditions for the population's health.

**286C. Bioethics (3)**

Discussion—3 hours. Limited enrollment. Course examines the ethical and legal issues that arise from biomedical research and use of medical technologies. GE credit: Wrt.

**286D. Legal Psychology Seminar (2)**

Seminar—2 hours. Examines how psychological theory and research can be used to shape laws and policies to make them better reflect what we know empirically about how individuals process information, make decisions and behave.

**286E. Reproductive Rights, Law, and Policy (2)**

Seminar—2 hours. Limited enrollment. Addresses a variety of laws and practices that affect reproductive health and procreative decision making.

**287. Public Land Law (2)**

Discussion—2 hours. Legal aspects of federal land management, including the history of public land law, the scope of federal and state authority over the federal lands, and the allocation of public land resources among competing uses, including extractive consumption, recreation, and preservation.

**287A. Poverty Law (2)**

Seminar—2 hours. Limited enrollment. Explore the theory and practice of law pertaining to the enactment and enforcement of laws regulating or aiding the poor and other disadvantaged persons.

**287T. Law and Society Seminar (2)**

Seminar—2 hours. Limited enrollment. Study of law and society challenges traditional legal scholarship by exploring multiple ways in which law both

shapes and is shaped by societies and social interactions. Seminar will introduce students to important literature and debates in the field.

**288. Advanced Constitutional Law Seminar (2)**

Seminar—2 hours. Prerequisite: Prior or concurrent enrollment in course 218 or 218A. Limited enrollment. Explores in-depth selected topics or problems in constitutional law and theory. Current focus is on the interpretation and application of the religion clauses of the First Amendment.

**288B. Supreme Court Simulation Seminar (2)**

Seminar—2 hours. Limited enrollment. Consideration in depth of approximately nine cases involving constitutional law that will be decided during the present term of the U.S. Supreme Court.

**289A. Biotechnology Law and Policy (2)**

Seminar—2 hours. Limited enrollment. Coverage includes the regulation of biotechnology research, including restrictions on cloning and fetal stem cell research; regulation of the products of biotechnology to protect human health or the environment, including restrictions on use or distribution of genetically modified organisms; the availability and scope of intellectual property protection for biotechnology products, including genes and engineered organisms; and the international law governing access to the natural resources that provide the starting materials for biotechnology and trade in bioengineered organisms or their products.

**290AT. Privacy, Surveillance, and "Sousveillance" (3)**

Discussion—3 hours. Issues of privacy and surveillance are important to businesses, governments and citizens. Surveillance raises issues of autonomy and the abuse of power. “Sousveillance,” (citizen holds the camera), is a mechanism for rooting out corruption and exposing individuals to societal scrutiny.

**290BT. Surveillance and States (3)**

Seminar—3 hours. Examines the tensions between democracy and the rise of government power entailed by the growth of state surveillance, United States surveillance law and practice, and surveillance law and practice across the world. Also considers international legal constraints on government surveillance.

**290T. International Trade Law (4)**

Discussion—4 hours. Review existing landscape of trade regulation from the World Trade Organizations, to regional organizations such as NAFTA, ASEAN, and the European Union.

**291A. International Finance (3)**

Discussion—3 hours. How a framework of national and international laws and institutions regulates and fails to regulate the flow of money around the world.

**291B. International Investment Dispute Seminar (2)**

Seminar—2 hours. This seminar will examine the law of investor-State dispute resolution.

**292. Immigration Law and Procedure (3)**

Discussion—3 hours. Surveys the history of U.S. immigration law and policy.

**292T. Advanced Topics in Immigration and Citizenship Law Seminar (2)**

Seminar—2 hours. Conducts a closer examination of various topics and subject matters that relate to immigration and citizenship law.

**293. Public Interest Law Seminar (2)**

Seminar—2 hours. This class will examine the issues and problems associated with providing civil legal services to persons and interests in American society that typically have been unable to afford or otherwise obtain representation from the private bar.

**293AT. Contemporary Issues in Economic Justice (2)**

Discussion—2 hours. Provides an introduction to the social justice critique of free markets.

**293T. Public Interest Lawyering, Civil Rights and Employment Law (2)**

Seminar—2 hours. Prerequisite: course 260; 260AT. Advanced course covers employment law issues through the lens of public interest lawyers and their constituencies.

**294A. Law and Popular Culture (2)**

Seminar—2 hours. This course examines works of popular culture, films, and legal texts. Each session will focus on a particular film and its cultural implications, particular problem or problems of law, law practice, legal ethics, traditional ethics, or public policy.

**295A. Trademark and Unfair Competition Law (2)**

Discussion—2 hours. Prerequisite: course 274 recommended, not required. Intensive look at selected issues in Trademark Law, including the concepts of trademarks and unfair competition, acquisition and loss of trademark rights, infringement, trademarks as speech, and international aspects of trademark protection.

**295T. Brands and Trademarks (2)**

Seminar—2 hours. Explores the challenges brands pose to traditional trademark law. Taking a close, interdisciplinary look at branding: from the business schools' theories of brand management to semiotic analyses of brand meaning to art criticism of brand advertisements.

**296. Copyright (3)**

Discussion—3 hours. Thorough examination of the law of copyright, including its application to literature, music, films, television, art, computer programs, and the Internet.

**296T. Entertainment Law (2)**

Discussion—2 hours. Explores the many facets of Entertainment Law.

**297. Alternative Dispute Resolution (3)**

Discussion—3 hours. Limited enrollment. Introduces students to a wide variety of alternative dispute resolution procedures, with an emphasis on negotiation, mediation and arbitration.

**297A. Federal Arbitration Act Seminar (2)**

Seminar—2 hours. Trace the development of commercial arbitration law, with a special emphasis on hot-button contemporary issues like consumer and employment arbitration, the separability doctrine, preemption of state law, and the arbitrability of statutory claims.

**297BT. International Commercial Arbitration (3)**

Discussion—3 hours. International commercial arbitration, Convention on International Sale of Goods, general understanding of international arbitration provided by World Bank's International Centre for Settlement of Investor-State Disputes under Convention on Settlement of Investment Disputes between States and Nationals of Other States.

**298. Sociology of the Legal Profession Seminar (2)**

Seminar—2 hours. Limited enrollment. Comprehensive look at the organization, operation, and ideology of the legal profession.

**400A. Study Abroad—University College Dublin, Ireland (12)**

Independent study. Students must apply and be accepted into the International Study Abroad Program. Semester away study abroad at the University College Dublin, Ireland. Enhance knowledge of international legal regimes and obtain a global legal educational experience. (S/U grading only.)

**400B. Study Abroad—University of Copenhagen, Denmark (12)**

Independent study. Students must apply and be accepted into the International Study Abroad Program. Semester study abroad at the University of Copenhagen, Denmark. Enhance knowledge of international legal regimes and obtain a global legal educational experience. (S/U grading only.)

**400C. Study Abroad—China University of Political Science and Law (12)**

Independent study. Students must apply and be accepted into the International Study Abroad Program. Semester-away study abroad at the China University of Political Science and Law. Enhance knowledge of international legal regimes and obtain a global legal educational experience.

**400D. Study Abroad—University of Lausanne, Switzerland (12)**

Independent study. Student must apply and be accepted in the International Study Abroad Program. Semester-away study abroad at the University of Lausanne, Switzerland. Enhance knowledge of international legal regimes and obtain a global legal educational experience. (S/U grading only.)

**400S. Critical Topics in Environmental Law in a Comparative Perspective (2)**

Seminar—2 hours. Enrollment by application only. Intensive, two-week program provides an opportunity for U.S. and international law students to study environmental law by examining and comparing European Union and U.S. environmental law policies and regulatory regimes. (S/U grading only)

**408. Community Education Seminar (3)**

Seminar/clinic—3 hours. Limited enrollment. Trains students to educate the community about basic legal rights and responsibilities. Students attend an initial four-hour orientation, followed by weekly seminars that will prepare students to teach in a local high school at least two times per week. Paper or journal required, to be determined by instructor. (S/U grading only.)

**409. Environmental Law Moot Court Competition (1)**

During the first eight weeks of fall semester, students research and submit briefs as appellants, respondents, or third parties on a problem of environmental law that is prepared by the National Environmental Law Moot Court Board. Students attend four to six classes (including guest lectures) on aspects of appellate advocacy, legal writing, and environmental law. Members of the spring environmental law moot court team will be selected on the basis of performance in class. (S/U grading only.)

**410A. Appellate Advocacy I (2)**

Discussion/laboratory. Limited enrollment. Basic appellate practice and procedure. Beginning instruction in oral advocacy skills and an opportunity to practice these skills in front of a moot court. (S/U grading only.)

**410B. Appellate Advocacy II (Moot Court) (2)**

Practice—2 hours. Limited enrollment. Continuation of course 410A. Focuses on the development of effective appellate brief writing skills and the refinement of oral advocacy skills. (S/U grading only.)

**411. Journal of International Law and Policy (1-2)**

The Journal is a biannual journal produced by King Hall students with an interest in international law. The editor-in-chief of the journal receives two units of credit each semester. The managing editor receives one unit of credit each semester. (S/U grading only.)

**411A. International Law Journal (1-2)**

The Editor in Chief of the Journal of International Law and Immigration receives two credits for each semester of service. Only one person may receive this credit in any one semester as editor in chief. Managing and executive editors receive one unit. (S/U grading only.)

**411B. Journal of Juvenile Law and Policy (1-2)**

A biannual publication of the UC Davis School of Law that addresses the unique concerns of children in the American legal system. The editor-in-chief of the journal receives two credits each semester. Managing editors receive two credit each semester. (S/U grading only.)

**411C. UC Davis Business Law Journal (1-2)**

Run by dedicated law students who are committed to providing current and valuable legal and business analysis. The Journal addresses a broad spectrum of issues that fall within the intersection of business and the law. May be repeated two times for credit. (S/U grading only.)

**412. Carr Intrachool Trial Advocacy Competition (1)**

Lecture. Limited enrollment. Named after the late Justice Frances Carr, this competition is open to second- and third-year students. A preliminary round is followed by quarter-finals, semi-finals, and a final round. Students participate in mock trials presided over by judges and critiqued by experienced litigators. (S/U grading only.)

**413. Interschool Competition (1-3)**

Prerequisite: consent of appropriate faculty adviser. Participation in interschool moot court and lawyering skills competitions. Enrollment is limited to students actually representing the School in the interschool competitions. Competition must be authorized by the appropriate faculty adviser. The faculty adviser may condition the award of academic credit for any particular competition on the performance of such additional work as may be reasonable to justify the credit. May satisfy advanced legal writing requirement. (S/U grading only.)

**414. Moot Court Board (1)**

Prerequisite: courses 410A-410B. Limited enrollment. Members of Moot Court Board may receive one credit for each semester of service on the board, up to maximum of two. Credit awarded only after certification by Moot Court Board and approval of the faculty advisers to Moot Court Board. (S/U grading only.)

**414A. Negotiations Board (1)**

Variable—1 hour. Prerequisite: consent of instructor. Members of the King Hall Negotiations Board assist in the administration of the King Hall Negotiation Team by performing a variety of tasks under the supervision of the course instructor. One unit of credit for each semester of service on the board, up to a maximum of two units per academic year. Credit is awarded only after approval by the instructor. (P/NP grading only.)

**415. Trial Practice Honors Board (1)**

Members of the Trial Practice Honors Board administer the Frances Carr competition. Members are nominated by their individual Trial Practice I adjuncts. Students receive one credit for serving on the Board, awarded upon approval of the faculty adviser. (S/U grading only.)

**416. Law Review Writer (1-3)**

The writing of a law review article under the editorial supervision of editors of the UC Davis Law Review. Office hours (including but not limited to Bluebooking and cite-checking) are required. 1 or 2 units, maximum 3 total units. In the spring semester, credit is obtained only upon achieving status as a member of the UC Davis Law Review, which requires that the student has made substantial progress towards completing an editorship article. Credit is awarded only after certification by the editor in chief and approval of the faculty advisers. One unit of credit is earned the first semester. Two units are earned the second semester upon nomination and acceptance of nomination to the Editorial Board. One unit is earned second semester if only a membership draft and office hours are completed. May be repeated for credit. (S/U grading only.)

**417A. Law Review Editor (1-2)**

Prerequisite: consent of instructor. Editors must have completed an editorship article and must perform editorial duties (a substantial time commitment). Credit is awarded only after completion of both semesters. (S/U grading only; deferred grading only, pending completion of sequence.)

**417B. Law Review Editor (1-2)**

Prerequisite: consent of instructor. Editors must have completed an editorship article and must perform editorial duties (a substantial time commitment).

Credit is awarded only after completion of both semesters. (S/U grading only; deferred grading only, pending completion of sequence.)

#### **418. Environmental Law and Policy Journal (1-2)**

Independent study. Each year nearly 100 King Hall students work together to publish Enviros. Getting involved with the journal will provide you with the chance to develop essential skills that will benefit you throughout school and career. (S/U grading only.)

#### **419. Advanced Writing Project (1-4)**

The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. (S/U grading only.)

#### **419A. Advanced Writing Project (1-4)**

The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. (S/U grading only.)

#### **419S. Special Session Advanced Writing Project (1-4)**

The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. (S/U grading only.)

#### **420. Civil Rights Clinic (2-6)**

Clinical activity—2 hours. Prerequisite: prior or concurrent enrollment in course 219; priority given to students enrolled in or have taken course 267; consent of instructor. Limited enrollment. Clinic provides practical experience in providing legal services to indigent clients who have filed civil rights actions in state and federal trial and appellate courts. Students work on clinic cases under the supervision of the clinic director. May be repeated for credit.

#### **425. Judicial Clinical (2 to 6 or 12)**

Clinical program. Prerequisite: course 261 required for full-time clinical students and recommended for part-time clinical students. Students may arrange judicial clerkship clinical programs with an approved list of state and federal judges through the

Clinical office and under the sponsorship of the faculty member in charge. All students must complete weekly time records and bi-weekly journals. Full-time clinical students must complete an evaluative final paper of approximately 10 pages. (S/U grading only.)

#### **430. Federal and State Taxation Externship (2-6)**

Clinical activity—2-12 hours. Prerequisite: course 220. Students will have the opportunity to work with the Internal Revenue Service or other governmental tax agency. Journals and attendance at group meetings are required. (S/U grading only.)

#### **435. Family Protection Clinic (4)**

Clinical activity—2 hours. Prerequisite: Full-Year Clinic: prior or concurrent enrollment in course 219 to qualify for state court certification; prior or concurrent enrollment in course 272 and 263A recommended, not required; One-Semester Clinic: prior or concurrent enrollment in course 272 and 263A recommended, not required. Full-Year Clinic: each student required to enroll for two semesters, receiving four units each semester for total of eight units; class limited to seven students; One-Semester Clinic: each student required to meet weekly for a 2-hour seminar; class limited to four students. Represent low-income persons in family law and related matters arising out of situations involving family violence.

#### **435A. Family Protection Clinic (4)**

Clinical activity—2 hours. Prerequisite: Full-Year Clinic: prior or concurrent enrollment in course 219 to qualify for state court certification; prior or concurrent enrollment in course 272 and 263A recommended not required; One-Semester Clinic: prior or concurrent enrollment in course 272 and 263A recommended not required; consent of instructor. Full-Year Clinic: each student required to enroll for two semesters receiving four units each semester for total of eight units; class limited to seven students. Represent low-income persons in family law and related matters arising out of situations involving family violence. (Deferred grading only, pending completion of sequence.)

#### **435B. Family Protection Clinic (4)**

Clinical activity—2 hours. Prerequisite: Full-Year Clinic: prior or concurrent enrollment in course 219 to qualify for state court certification; prior or concurrent enrollment in course 272 and 263A recommended not required; consent of instructor. Full-Year Clinic: each student required to enroll for two semesters receiving four units each semester for total of eight units; class limited to seven students. Represent low-income persons in family law and related matters arising out of situations involving family violence. (Deferred grading only, pending completion of sequence.)

#### **440. Immigration Law Clinic (4)**

Clinical Activity—8 hours. Starting in Fall 2011, the Immigration Clinic is a full-year clinic; each student required to enroll for two semesters, receiving four units each semester for total of eight units; prior or concurrent enrollment in courses 292 and 219, recommended, not required. Each student is required to enroll for two semesters, receiving four units each semester for total of eight units. Provides legal representation to indigent non-citizens in removal proceedings before U.S. Immigration Courts, the Board of Immigration Appeals, and federal courts, including the Ninth Circuit Court of Appeals. (S/U grading only; deferred grading only, pending completion of sequence.)

#### **440A. Immigration Law Clinic (4)**

Clinical Activity—4 hours. Prerequisite: prior or concurrent enrollment in course 292. Each student is required to enroll for two semesters, receiving four units each semester for total of eight units. Provides legal representation to indigent non-citizens in removal proceedings before U.S. Immigration Courts, the Board of Immigration Appeals, and federal courts, including the Ninth Circuit Court of Appeals. (Deferred grading only, pending completion of sequence.)

#### **440B. Immigration Law Clinic (4)**

Clinical Activity—4 hours. Prerequisite: prior or concurrent enrollment in course 292; consent of instructor. Each student is required to enroll for two semesters, receiving four units each semester for total of eight units. Provides legal representation to indigent non-citizens in removal proceedings before U.S. Immigration Courts, the Board of Immigration Appeals, and federal courts, including the Ninth Circuit Court of Appeals. (Deferred grading only, pending completion of sequence.)

#### **445. Legislative Process Externship (2-5)**

Clinical activity. Prerequisite: course 240 (may be taken concurrently) or consent of instructor. Practical experience in the operation of the office of a legislator or a legislative committee. The major thrust of the program is to enable students to become familiar with the give and take realities of making laws, as contracted with their interpretation and enforcement. Journals are required. (S/U grading only.)

#### **450. Environmental Law Externship (2-6)**

Clinical activity—2-6 hours. Prerequisite: course 285 or consent of instructor. Practical experience in environmental law. Students will work in an approved government, non-profit or private law office engaged in some form of environmental law work for a minimum of 8 hours per week. Students must prepare a journal describing and reflecting upon their clinical experience, and meet periodically with the instructor.

#### **455. Employment Relations Externship (2-6)**

Clinical activity. Prerequisite: course 251 or 260 (may be taken concurrently). Practical experience in employment relations, including employment discrimination and public sector labor law. Work under the direct supervision of a government lawyer. Opportunity to participate in a range of with emphasis on observation and participation in actual investigation, interviewing, drafting pleadings, and attendance at hearings. (S/U grading only.)

#### **460. Public Interest Law Clinical (2-6)**

Clinical activity. Prerequisite: prior or concurrent enrollment in course 293 recommended. Students work with a public interest practitioner in a nonprofit organization. Journals and attendance at two group meetings are required. Clinical students must complete an evaluative final paper of approximately 8 pages. Hours completed in public interest setting may be applied toward the practicum requirement for the Public Interest Law Program. (S/U grading only.)

#### **465. Intellectual Property Externship (2-6)**

Clinical activity. Prerequisite: course 293 and Comparative Public Services recommended. Opportunity to work for government, academic, and nonprofit entities. (S/U grading only.)

#### **470. Administration of Criminal Justice Externship (2-12)**

Clinical activity—2-12 hours. Prerequisite: completion of, or concurrent enrollment, in courses 219 and 227; course 263A recommended. Limited enrollment. Gain practical experience working full or part time in a District Attorney's or Public Defender's office in one of several surrounding counties or in a federal Public Defender or U.S. Attorney's office. Students participate in the many activities associated with the office for which they extern: observation, interviewing, research, counseling, motion practice, and trials under State Bar rules. May be repeated up to 12 units for credit. (S/U grading only.)

#### **475. Washington UC-DC Law Program (10)**

Clinical activity—10 hours. Open to 2L and 3L students. Uniquely collaborative externship program in Washington, D.C., combining weekly seminars with full-time field placement offering students an unparalleled opportunity to learn how federal statutes, regulations, and policies are made, changed, and understood in the nation's capital. (S/U grading only.)

#### **475A. Law Making and Law Changing in the Nation's Capital (3)**

Seminar—3 hours. Companion seminar to the Washington UC-DC Externship. Designed to enhance the externship experience in three principal ways.

#### **480. Clinical Program in Prison Law (2-6)**

Clinical Activity—2 hours. Prerequisite: consent of instructor. Provides practical experience in providing legal services to real clients who have various problems related to their incarceration in state prison. The services require analysis and application of Constitutional Law, state statutory law, agency regulations, and the rules of professional responsibility.

#### **485. California Supreme Court Clinic (6)**

Clinical activity—6 hours. Class size limited to 6 students. California Supreme Court Clinic provides students with an immersive experience in litigating cases before the state's highest court.

#### **490T. Aoki Federal Public Defender Clinic (4)**

Clinical activity—4 hours. Students submit applications for the course. Outgrowth of the work of the Aoki Center on Race and Nation. As part of its work, the Aoki Center provides educational opportunities to students interested in critical race perspectives in practice.

#### **495. Legal Research and Writing I (2)**

Discussion—2 hours. Integrated legal research and writing skills course. Basic legal research resources and strategies are introduced and practiced. (S/U grading only.)

#### **498. Group Study (1-4)**

Prerequisite: consent of instructor. Groups of students with common interest in studying a stated legal problem may plan and conduct their own research and seminar program under the direction of faculty. Class size limited to no fewer than 4 or more than 10 students. (S/U grading only.)

#### **498A. Group Study (1-4)**

Prerequisite: consent of instructor. Groups of students with common interest in studying a stated legal problem may plan and conduct their own research and seminar program under the direction of faculty.

#### **499. Independent Research Project (1-4)**

Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member. (S/U grading only.)

#### **499A. Independent Research Project (1-4)**

Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member. Grading is on a Satisfactory/Unsatisfactory basis unless a request for letter grading has been made in advance.

#### **499B. Law Students Study Away (10)**

Independent study. Students studying away from UC Davis, School of Law. (S/U grading only.)

#### **499C. Joint Degree Student-GSM (10)**

Joint degree course for graduate School of Management students. (S/U grading only.)

#### **499S. Special Independent Research Project (1-4)**

Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member.

#### **499SA. Special Session Independent Research Project (1-4)**

Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member. (Deferred grading only, pending completion of sequence.)

#### **499SB. Special Session Independent Research Project (1-4)**

Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member.

## Linguistics

(College of Letters and Science)

Vaidehi Ramanathan, Ph.D., Chairperson of the Department

**Department Office.** 469 Kerr Hall  
530-752-0966; <http://linguistics.ucdavis.edu>

#### **Faculty**

Raúl Aranovich, Ph.D., Associate Professor  
Santiago Barreda, Ph.D., Assistant Professor  
Robert J. Bayley, Ph.D., Professor  
David Corina, Ph.D., Professor  
Patrick Farrell, Ph.D., Professor  
John A. Hawkins, Ph.D., Professor  
Julia Menard-Warwick, Ph.D., Associate Professor  
Almerindo E. Ojeda, Ph.D., Professor  
Vaidehi Ramanathan, Ph.D., Professor  
Georgia Zellou, Ph.D., Assistant Professor

#### **Emeriti Faculty**

Wilbur A. Benware, Ph.D., Professor Emeritus  
Maria I. Manoliu, Ph.D., Professor Emerita  
David L. Olmsted, Ph.D., Professor Emeritus  
Mary Schleppegrell, Ph.D., Professor Emerita  
Gwendolyn Schwabe, M.A., Senior Lecturer Emerita  
Maximo Torreblanca, Ph.D., Professor Emeritus  
Lenora A. Timm, Ph.D., Professor Emerita

#### **Affiliated Faculty**

James L. Davis, M.A., Lecturer  
Janet Lane, M.A., Lecturer

#### **The Major Program**

Linguistics is the systematic study of human language. It focuses on theories of language structure, variation, and use, description of contemporary languages, and the examination of language change through time. Because of the pervasive influence of language in our everyday lives, work in linguistics

interacts in important ways with studies carried out in many other fields, including psychology, anthropology, neuroscience, philosophy, computer science, sociology, literature, language teaching, communication and education.

**The Program.** An introductory lower division course provides students with basic concepts and some of the methods needed to analyze language in a systematic way. Upper division courses probe more deeply into specific aspects of language structure, language use, and the relationship of language to other realms of human activity.

**Career Alternatives.** Majors in linguistics find practical outlets for their linguistic training in a variety of fields: the computer science industry (software development); teaching English as a second language; foreign language teaching; elementary and secondary level bilingual-bicultural programs; language-oriented missionary work; bilingual-bicultural curriculum development (e.g., for publishing houses); legal work; speech therapy; lexicography (preparation of dictionaries). All of these types of employment share an interest in persons skilled in the analysis of language, spoken and/or written. Linguistics equips students with just such skills.

#### **A.B. Major Requirements:**

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>4-24</b>
Linguistics 1.....	4
Foreign language, one course beyond the 15-unit requirement of the College of Letters and Science in the same language used to fulfill the college requirement .....	0-20
<b>Depth Subject Matter .....</b>	<b>44</b>
Linguistics 103A, 103B, 111, 131 .....	16
Any three Linguistics courses from among those numbered from 110 to 159 .....	12
One Linguistics course from among those numbered from 160 to 169 .....	4
One Linguistics course from among those numbered from 170 to 189 .....	4
At least eight upper division units from the following courses .....	8
Requirements listed above, African American and African Studies 156, Anthropology 110, 117, 119, 120, Communication 105, Education 151, English 105, 106 French 109, 160, 161, 162, German 105, Human Development 101, Native American Studies 107, Philosophy 137A, 137B, 137C, Psychology 132, Spanish 111N, 112N, 113, 114N, 115, 115S, 116, 117, 118.	
<b>Total Units for the Major.....</b>	<b>48-68</b>
<b>Major Adviser.</b> G. Zellou	
<b>Minor Program Requirements:</b>	
Linguistics offers two minor programs:	
(1) <b>General Linguistics</b> , which provides the student with basic knowledge of language structure and linguistic analysis;	
(2) <b>Linguistics for Language Teachers</b> , which especially complements the major in English with the Teaching Area of emphasis; it is also of relevance to students interested in teaching foreign languages.	
	UNITS
<b>General Linguistics .....</b>	<b>24</b>
Linguistics 1, 103A, 103B .....	12
One course from: Linguistics 111, 112, 121, 131, 141, 151, 152 .....	4
Additional units selected from upper division Linguistics courses and other upper division courses listed in the major requirements in consultation with an adviser .....	8
<b>Linguistics for Language Teachers .....</b>	<b>24</b>
Linguistics 1, 106, 165.....	12
English 105.....	4
Linguistics 160 or 163.....	4
Linguistics 173 or Education 151 .....	4
<b>Minor Adviser.</b> Same as Major adviser	

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;

ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience

Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience

Quarter Offered: F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses

**Grading Recommendation.** Though not required, it is recommended that all courses offered in satisfaction of the Linguistics major be taken for a letter grade.

**Honors and Honors Program.** The honors program consists of six units of 194H credit normally taken in the fall and winter quarters of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. Specific eligibility criteria may be obtained from the major adviser. For general information regarding graduation with honors and Dean's Honors Lists, please see [Academic Information, on page 83](#).

**Graduate Study.** The Linguistics Graduate Group offers study and research leading to the M.A. and Ph.D. degrees. Please see [Linguistics \(A Graduate Group, on page 409\)](#); more detailed information may be obtained from the Graduate Adviser or from the Chairperson of the Linguistics Group.

**Graduate Adviser.** R. Bayley

## Courses in Linguistics (LIN)

### Lower Division

#### 1. Introduction to Linguistics (4)

Lecture—3 hours; discussion—1 hour. Introduction to the study of language; its nature, diversity, and structure. GE credit: ArtHum or SocSci, Wrt | AH, SS.—F, W, S. (F, W, S.)

#### 1Y. Introduction to Linguistics (4)

Web Virtual Lecture—3 hours; discussion—1 hour. Introduction to the study of language; its nature, diversity, and structure. GE credit: ArtHum or SocSci, Wrt | AH or SS.—F, W, S. (F, W, S.)

#### 5. Global English and Communication (4)

Lecture—2 hours; discussion—2 hours. English as a global language and its uses in intercultural communication. Cultural, historical, and political dimensions of varieties of English spoken around the world. Experiential grounding in strategies for increasing interpretive and verbal communicative competence for a globalized world. (Same course as Communication 5.) GE credit: ArtHum or SocSci | AH or SS, OL, WC.—W. (W.) Farrell, Ramanathan, Menard-Warwick

#### 6. Language and Society (4)

Lecture—3 hours; discussion—1 hour. Language as a social phenomenon. Topics include linguistic diversity, language policy, language and identity, language and social structure, speech communities and social networks, the effect of social factors on language variation, linguistic consequences of language contact. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.—W. Bayley, Ramanathan

#### 15. Academic Oral Communication (3)

Lecture—1 hour; discussion—2 hours. Structure of oral communication, critical thinking, and persuasion in classroom discourse in American English and in cross-cultural perspective. GE credit: ArtHum or SocSci | AH or SS, OL.—F, W, Su. (F, W, Su.) Takao-glu

#### 20. Oral English for Undergraduate ESL Students (3)

Lecture/discussion—3 hours. Open to non-native speakers of English with priority enrollment to international teaching assistants with qualifying placement exam scores. Intensive practice in oral English for undergraduate ESL students. Students will learn to identify and modify features of their pronunciation which limit their ability to communicate clearly. Students will also learn and practice strategies for effective participation in academic tasks. May be repeated for credit. (P/NP grading only.)—W, S. (W, S.)

#### 24. English Structures and Strategies in Academic Writing (4)

Lecture/discussion—4 hours. Prerequisite: course 23. Open to students from language backgrounds other than English. Practice in academic writing designed to prepare undergraduate students from language backgrounds other than English for successful academic work. Development of academic

writing, critical thinking, and reading skills. Development of clear, accurate language for presenting an effective argument.

#### 25. English for International/ESL Graduate Students (4)

Lecture/discussion—4 hours. Prerequisite: admission by placement examination or consent of coordinator; open to international and ESL graduate students and limited status international undergraduates (Education Abroad Program participants). Multi-skills ESL course designed to help international/ESL students improve their English language skills for successful academic study. Emphasis on writing, speaking, listening, reading, and academic culture. (P/NP grading only.)—F. (F.) Lane

#### 26. Writing for International Graduate Students (3)

Lecture—3 hours. Prerequisite: satisfactory completion of course 25 if held for it, or consent of instructor. Admission limited to international graduate students. Focuses on writing needed for academic work, including summaries, critiques, research and grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. (P/NP grading only.)—W. (W.)

#### 27. Academic Writing for ESL Students (4)

Lecture/discussion—4 hours. Writing skills necessary for upper division courses, including skills crucial to writing lab and project reports, summaries, critiques, abstracts, and responses to exam questions. Includes practice with the syntax, grammar, and vocabulary characteristic of academic writing. Offered irregularly.—F. (F.)

#### 28. Reading in Scientific and Technical Subjects for ESL Students (4)

Lecture/discussion—4 hours. Instruction and practice in reading scientific and technical texts. Techniques for comprehending and analyzing grammatical and organizational patterns. Notetaking skills, summarizing, vocabulary enrichment. (P/NP grading only.)

#### 96. Directed Group Study in English as a Second Language (1-5)

Variable—1.5 hours. Prerequisite: consent of instructor. Directed group study of topic in English as a Second Language (ESL). May be repeated for credit by consent of the ESL coordinator. (P/NP grading only.)—F, W, S. (F, W, S.)

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Intended for lower division students. (P/NP grading only.)—F, W, S. (F, W, S.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. Intended for lower division students. (P/NP grading only.)—F, W, S. (F, W, S.)

### Upper Division

#### 103A. Linguistic Analysis I: Phonetics, Phonology, Morphology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on phonetic, phonological, and morphological phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed course 139. GE credit: ArtHum | AH.—F. (F.) Barreda, Zellou

#### 103B. Linguistic Analysis II: Morphology, Syntax, Semantics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on morphological, syntactic, and semantic phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed course 140. 103B GE credit: ArtHum | AH.—W. (W.) Aranovich, Farrell

#### 105. Topics in Language and Linguistics (4)

Lecture—3 hours; term paper. Prerequisite: course 1 recommended; consent of instructor. Detailed examination of a major contemporary linguistic theory, a major contemporary issue or related set of issues in linguistics, or the structure of a particular language or language family. May be repeated for credit when topic differs. Offered in alternate years.—S. (S.)

#### 106. English Grammar (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or English 3 or University Writing Program 1 or consent of instructor. Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English. (Same course as English 106 and University Writing Program 106.) GE credit: ArtHum | AH.

#### 111. Introduction to Phonological Theory (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 103A recommended. Contemporary phonological theory with emphasis on syllable structure, metrical structure, phonology-morphology interaction, and typological variation in these areas, from the perspective of optimality-theoretic approaches. GE credit: ArtHum | AH.—W. (W.) Barreda, Zellou

#### 112. Phonetics (4)

Lecture—3 hours; term paper. Prerequisite: course 1. Detailed examination of articulatory and acoustic phonetics. GE credit: SciEng | SE.—F. (F.) Barreda, Zellou

#### 121. Morphology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 103A, 103B. Introduction to the analysis of word structure and the relation of word structure to the lexicon and other grammatical components. GE credit: ArtHum | AH.—S. (S.) Aranovich

#### 127. Text Processing and Corpus Linguistics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 1, course 5, course 6, or Anthropology 4. Investigation of the lexical organization of human languages through corpus linguistics. Application of principles of linguistic analysis, automatic text processing, and statistical research to solving problems of textual evaluation and classification, as well as information retrieval and extraction. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, QL.—S. (S.) Aranovich

#### 131. Introduction to Syntactic Theory (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 103B. Introduction to syntactic theory, primarily through the examination of a major theory of syntax, emphasizing theoretical reasoning, argumentation, and problems of theory building in syntax. GE credit: ArtHum | AH.—F. (F.) Aranovich, Farrell

#### 141. Semantics (4)

Lecture—3 hours; term paper. Prerequisite: course 103B. The linguistic study of meanings of words and phrases. Meanings expressed by lexical items and derivational and inflectional morphology. Contribution of argument structure, quantification, and coordination to meaning. GE credit: ArtHum, Wrt | AH.—F. (F.) Ojeda

#### 150. Languages of the World (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or Anthropology 4. Survey of the world's languages, their geographical distribution and classification, both genetic and typological. Illustrative descriptions of several major languages from different geographical areas; pidgins and creoles, lingua francas and other languages of widespread use. Not open for credit to students who have completed course 50. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC.—S. (S.) Hawkins

**151. Historical Linguistics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 103A. Description and methods of the historical study of language, including the comparative method and internal reconstruction; sound change, morphological change, syntactic change, semantic change. Offered irregularly. GE credit: ArtHum | AH.—Hawkins, Farrell

**152. Language Universals and Typology (4)**

Lecture—3 hours; term paper. Prerequisite: course 103B. Investigation into common features of all human languages and the classification of languages in terms of their structural features. Theories of universal grammar. Detailed discussion of non-Indo-European languages and comparison with English. Offered in alternate years. GE credit: ArtHum, Wrt | AH.—S. (S.) Farrell, Hawkins

**160. American Voices (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or Anthropology 4 or upper division standing recommended. Explores the forms of American English; traditional notions of regional dialects and increasingly important social dialects, reflecting age, class, gender, race, ethnicity, and sexual orientation. The influence of language attitudes on perception of dialect speakers; dialect in media, education, and literature. GE credit: SocSci, Div, Wrt | SS, WE.—F, W. (F, W.)

**163. Language, Gender, and Society (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or Anthropology 4. Investigation of real and putative (stereotyped) gender-linked differences in language structure and usage, with a consideration of some social and psychological consequences of such differences. Focus is on English, but other languages are also discussed. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.—W. (W.) Timm, Menard-Warwick

**165. Introduction to Applied Linguistics (4)**

Lecture—3 hours; discussion—1 hour. Applications of linguistic principles and the analysis of language-related issues in the world. Exploration of a range of language-related problems including issues related to language learning and teaching to issues concerning language and gender, race, class and the media. GE credit: SocSci | SS, WE.—W. (W.) Ramanathan

**166. The Spanish Language in the United States (4)**

Lecture—3 hours; term paper. Prerequisite: course 1 or Spanish 111N; and Spanish 23 or the equivalent. Linguistic features of the varieties of the Spanish language spoken throughout the United States; phonology, morphology, syntax, vocabulary. Focus on the relationship between United States Spanish and other world varieties of Spanish, within a historical framework. GE credit: SocSci, Div, Wrt | SS.—S. (S.) Ramanathan

**171. Introduction to Psycholinguistics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1; courses 103A, 103B recommended. Introduction to psychological issues relating to the implementation of language and linguistic structure during speech production and comprehension and to the implications of research in psychology and related fields for linguistic theory. Offered in alternate years. GE credit: SS.—W. (W.) Corina

**173. Language Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor; courses 103A, 103B. Theory and research on children's acquisition of their native language, including the sound system, grammatical systems, and basic semantic categories. (Same course as Education 173.) Offered in alternate years. GE credit: SocSci | SS.—S. (S.) Uchikoshi

**175. Biological Basis of Language (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. Overview of issues in the field of neurolinguistics and techniques used to explore representation of language in the human brain. GE credit: SciEng | SE.—F. (F.) Corina

**177. Computational Linguistics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. Understanding the nature of language through computer modeling of linguistic abilities. Relationships between human cognition and computer representations of cognitive processing. Not open for credit to students who have completed course 7. GE credit: SciEng or SocSci | SE or SS.—W. (W.) Ojeda

**180. Second Language Learning and Teaching (4)**

Lecture/discussion—4 hours. Prerequisite: course 1 or equivalent. Psycholinguistic and sociolinguistic theories of second language learning. Connections between theoretical perspectives and pedagogical practices in formal and informal second language settings, with focus on tutoring. Impact of sociocontextual factors (e.g., gender, ethnicity). Fieldwork requirement. GE credit: SocSci, Div, Wrt | SS, WE.—F. (F.) Menard-Warwick

**182. Multilingualism (4)**

Lecture/discussion—4 hours. Limited enrollment. Issues in multilingualism from a global perspective: e.g., multilingual communities; multilingualism and identity (gender, ethnicity, nationality); language ideologies and educational and sociopolitical policies surrounding multilingualism; acquisition of multilingualism; discursive practices of multilinguals. GE credit: ArtHum or SocSci, Div, Wrt | SS, WC, WE.—S. (S.) Ramanathan, Timm

**192. Internship in Linguistics (1-12)**

Internship—3-36 hours; two written reports. Prerequisite: course 1 or the equivalent. Internship applying linguistic-related skills to a fieldwork project in areas such as media, law, or industry, in approved organizations or institutions. Maximum of 4 units applicable toward major. (P/NP grading only.)

**194H. Special Study for Honors Students (1-5)**

Independent study—1-5 hours. Prerequisite: open only to linguistics majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis. May be repeated for credit for up to 6 units. (P/NP grading only.)—F, W, S. (F, W, S.)

**197T. Tutoring in Linguistics (1-4)**

Discussion—1-4 hours. Prerequisite: upper division standing, consent of instructor, and consent of department chairperson. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate****200A. Foundations of Linguistics I (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Survey of fundamental issues raised by pregenerative linguistics in the twentieth century, with emphasis on issues crucial to applications of linguistics. Not open for credit to students who have completed course 203A.—F. (F.)

**200B. Foundations of Linguistics II (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Survey of fundamental issues raised by orthodox generative linguistics, with emphasis on issues crucial to applications of linguistics. Not open for credit to students who have completed course 203B.—W. (W.)

**200C. Foundations of Linguistics III (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Survey of fundamental issues raised by contemporary linguistic theories lying outside the generative grammar orthodoxy, with emphasis on issues crucial to applications of linguistics.—S. (S.)

**205A. Topics in Linguistic Theory and Methods (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs.—F, W. (F, W.)

**205B. Topics in Linguistic Theory and Methods (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs.—F, W. (F, W.)

**205C. Topics in Linguistic Theory and Methods (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs.—F, W. (F, W.)

**205D. Topics in Linguistic Theory and Methods (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs.—F, W. (F, W.)

**211. Advanced Phonological Theory and Analysis (4)**

Lecture—3 hours; term paper. Prerequisite: course 111. Critical examination of current phonological theories. Offered in alternate years.—S. (S.) Barreda, Zellou

**212. Advanced Phonetics (4)**

Lecture—3 hours; term paper. Prerequisite: course 112. Advanced investigation of the physiological basis of speech articulation and acoustic phonetics. Offered in alternate years.—W. (W.) Barreda, Zellou

**231. Advanced Syntactic Theory and Analysis (4)**

Lecture—3 hours; term paper. Prerequisite: course 131. Critical survey of contemporary theories of syntax. Offered in alternate years.—S. (S.) Aranovich

**241. Advanced Semantic Theory and Analysis (4)**

Lecture—3 hours; term paper. Prerequisite: course 141 or consent of instructor. Advanced critical exploration of contemporary theories of linguistic semantics. Offered in alternate years.—W. (W.) Ojeda

**251. Principles of Historical Linguistics (4)**

Lecture—3 hours; term paper. Prerequisite: course 151. Advanced analysis of the theory and methods of historical linguistics. Offered in alternate years.—S. (S.)

**252. Romance Linguistics (4)**

Lecture—3 hours; term paper. Prerequisite: course 151. Examination of the development of the Romance languages from Proto-Romance to the modern era. Application and critical examination of methods of historical and comparative linguistics in particular areas of structural change in Romance. Offered in alternate years.—S. (S.)

**260. Variation in Speech Communities (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 281 or consent of instructor. Linguistic variability in time, space, and society. Theoretical issues related to social and linguistic constraints in variation; issues and methods in the quantitative analysis of variation. Speech community, quantitative analytic methods, and the scope of sociolinguistic competence.—W. (W.) Bayley

**263. Discourse Analysis: Text in Context (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Introduction to and application of leading theoretical approaches to the analysis of discourse. Approaches to the analysis of (spoken and written) text in context, tools for analyzing different types of texts (narration, conversation, etc.). Theme/rheme, given/new, anaphora, discourse markers, and other lexical/grammatical features.—F. (F.) Menard-Warwick

**264. Current Issues in Language and Gender (4)**

Seminar—3 hours; term paper; project. Prerequisite: graduate standing; prior coursework in Linguistics, Gender Studies, or Cultural Studies is desirable; no expectation of bilingual proficiency. Exploration of the construction and performance of gender through language in cross-cultural perspective and in a variety of contexts: informal conversations, narratives, workplaces, schools, households, the mass media. Special topics may include: language acquisition; multilingualism; ecofeminism; queer theory. May be repeated for credit one time when topic differs. Offered in alternate years—F. (F.) Menard-Warwick, Timm

**265. Language, Performance, and Power (4)**

Seminar—3 hours; term paper. Restricted to graduate standing or consent of instructor. Exploration of the intersection between linguistic and social theories in the language-state relation and the performance of identity. Ideological sources of language differentiation; nation-building and linguistic difference. Political economic, sociolinguistic, and ethnographic approaches to understanding linguistic inequality. (Same course as Anthropology 265.) Offered in alternate years.—F. (F.) Shibamoto-Smith

**275. Neurobiology of Language (4)**

Lecture/discussion—3 hours; term paper. Survey of historical and modern conceptions of the neurobiology of language. Aphasia, functional neuroimaging, functional neuroanatomy of human language.

Offered in alternate years.—F. (F.) Corina

**280. Theories of Second Language Acquisition (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Covers theoretical perspectives that direct or have directed research in second language acquisition; explores the relationship between linguistics and language teaching and deals with the individual variables that influence second language learning.—F. (F.) Ramanathan

**281. Research Methods in TESOL/SLD (4)**

Lecture—3 hours; term paper. Prerequisite: course 280. Research methods in second language research; evaluation of research designs and methods of analyses, formulation of research questions and hypotheses and design of study with thought to various kinds of data.—W. (W.) Bayley

**282. Individual and Social Aspects of Bilingualism (4)**

Lecture—3 hours; term paper. Broad overview of bi- and multilingualism, with focus on theoretical and descriptive research; topics covered range from language processing in bilinguals to code-switching to language as political issue in multilingual states.—S. (S.) Bayley, Menard-Warwick, Ramanathan

**283. Politics of Bi and Multilingual Literacies (4)**

Lecture/discussion—3 hours; term paper. Anthropological, psycho-social, political, and educational perspectives on bi and multilingualism. Power, colonialism, "native/non-native" speakers, and varieties and the unequal distribution of social goods. Analysis of how competing factors keep peoples disenfranchised.—W. (W.) Ramanathan

**289. Pedagogical Applications of Second Language Acquisition Theory (4)**

Seminar—3 hours; term paper. Prerequisite: course 280. Pedagogical implications of various theories of second language acquisition, facilitation of language acquisition in classroom settings, and techniques for conducting classroom-based research in language learning.—S. (S.)

**297T. English as a Second Language Teaching/Tutoring (1-4)**

Tutoring—1-4 hours. Prerequisite: course 300, 301, or 302 (may be taken concurrently). Teaching classes for ESL graduate students. Aiding the ESL undergraduate composition classes; tutoring foreign graduate student Teaching Assistants in pronunciation. Does not fulfill requirement toward the M.A. degree. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**298. Directed Group Study (1-5)**

Prerequisite: graduate standing. (S/U grading only.)—S. (S.)

**299. Research (1-12)**

(S/U grading only.)—F, W, S. (F, W, S.)

**Professional****300. Language Pedagogy (4)**

Lecture/discussion—4 hours. Prerequisite: graduate standing in Linguistics or consent of instructor; concurrent enrollment in course 297T recommended. Methods of teaching second languages to nonnative speakers, stressing particularly recent linguistic methodology and techniques, as related to teaching and tutoring in the UC Davis ESL program.—F. (F.) Menard-Warwick

**301. Teaching Academic Literacy (4)**

Seminar—3 hours; tutorial—14 hours; project; practice. Prerequisite: graduate standing; course 300 or consent of instructor. Methods of teaching advanced academic literacy in a second language, with a focus on ESL composition. Lesson development, teaching and tutoring in the UC Davis ESL program.—W. (W.) Ramanathan

**302. Recent Research and Special Projects in TESOL (4)**

Lecture—4 hours. Prerequisite: courses 300 and 301. Review of recent research in second language acquisition and the teaching of English to speakers of other languages. Continued teaching and tutoring in the UC Davis ESL clinic. Each student also designs and reports on a classroom research project.

**305. Second Language Literacy and Technology (4)**

Lecture/discussion—1.5 hours; web electronic discussion—1.5 hours. Prerequisite: course 2, or equivalent coursework/experience in second language pedagogy; consent of instructor; graduate students only. Limited enrollment. Exploration of literacy theory and critical pedagogy in relation to new instructional and communication technologies. Practicum experience in teaching second language literacy; reflection on connections between theory and practice.—S. (S.) Menard-Warwick

**310. Language Pedagogy for Teacher Educators (4)**

Seminar—3 hours; tutorial; project; fieldwork. Prerequisite: admission to Ph.D. program in Linguistics or Foreign Languages, or permission of instructor; significant language teaching experience. Current issues in second language pedagogy, with a focus on communicative methodology, participatory curriculum design, academic literacy, and the social contexts of teaching. Emphasis on reflective teaching and action research. May be repeated up to 12 units for credit.—F, W, S. (F, W, S.) Menard-Warwick, Ramanathan

**391. Oral English for ESL Students (3)**

Lecture—2 hours; laboratory—2 hours. Prerequisite: open only to non-native speakers of English with priority enrollment to international student teaching assistants; completion of any required ESL courses or consent of instructor. Course gives non-native English-speaking students, particularly international student teaching assistants, intensive work in oral English to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Course may be repeated for credit with consent of coordinator. (S/U grading only.)—W, S. (W, S.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## Linguistics (A Graduate Group)

Robert J. Bayley, Chairperson of the Group

**Group Office.** 462 Kerr Hall  
530-752 3464

**Faculty**

Raúl Aranovich, Ph.D., Associate Professor  
(Linguistics)

Carlee Arnett, Ph.D., Associate Professor (German)  
Santiago Barreda, Ph.D., Assistant Professor  
(Linguistics)

Robert J. Bayley, Ph.D., Professor (Linguistics)  
Robert Blake, Ph.D., Professor (Spanish)  
Travis G. Bradley, Ph.D., Associate Professor  
(Spanish)

Chengzhi Chu, Ph.D., Associate Professor  
(East Asian Languages and Cultures)  
M. Cecilia Colombi, Ph.D., Professor (Spanish)  
David Corina, Ph.D., Professor (Linguistics)

Patrick Farrell, Ph.D., Professor (Linguistics)  
Fernanda Ferreira, Ph.D., Professor (Psychology)  
Dana Ferris, Ph.D., Professor  
(University Writing Program)

John A. Hawkins, Ph.D., Distinguished Professor  
(Linguistics)

Debra Long, Ph.D., Professor (Psychology)  
Robert May, Ph.D., Distinguished Professor  
(Philosophy)

Julia Menard-Warwick, Ph.D. Professor (Linguistics)  
Almerindo E. Ojeda, Ph.D., Professor (Linguistics)  
Vaidehi Ramanathan, Ph.D., Professor (Linguistics)  
Eric Russell Webb, Ph.D., Assistant Professor  
(French)

Claudia Sánchez-Gutiérrez, Ph.D., Assistant  
Professor (Spanish)

Adam Sennet, Ph.D., Associate Professor  
(Philosophy)

Tamara Swaab, Ph.D., Associate Professor  
(Psychology)

Matthew Traxler, Ph.D., Professor (Psychology)  
Yuuko Uchikoshi, Ed.D. Assistant Professor  
(Education)

Karen A. Watson-Gegeo, Ph.D., Professor  
(Education)

Georgia Zellou, Ph.D., Assistant Professor  
(Linguistics)

**Emeriti Faculty**

Wilbur A. Benware, Ph.D., Professor Emeritus

Ellen Lange, M.A., Senior Lecturer Emerita

David L. Omsted, Ph.D., Professor Emeritus

Mary Schleppegrell, Ph.D., Professor Emerita

Gwendolyn Schwabe, M.A., Senior Lecturer Emerita

Lenora A. Timm, Ph.D., Professor Emerita

Maximo Torreblanca, Ph.D., Professor Emeritus

**Graduate Study.** The Graduate Group in Linguistics offers a program of study leading to the M.A. and the Ph.D. degree. The M.A. program follows PLAN II. 36-38 units of coursework are required, at least 18 of which must be graduate level courses in the major field. A comprehensive final examination in the major subject is required of each candidate. No thesis is required.

The Ph.D. degree offers advanced training and research in linguistic theories and methods. Second language acquisition and development is a particular emphasis of the program. Detailed information on both the M.A. and the Ph.D. degrees can be obtained from the graduate advisers, from the chair of the Graduate Group or the departmental chairs.

**Graduate Advisers.** Raúl Aranovich (Linguistics),  
Julia Menard-Warwick (Linguistics)

# Literature in Translation

The following courses are open to students throughout the campus. The readings can be in English. See departmental listing for the course description.

## Chinese

- 10. Chinese American Literature (in English)
- 11. Great Books of China (in English)
- 50. Introduction to the Literature of China and Japan (in English)
- 100A. Daoist Traditions
- 101. Chinese Film
- 102. Chinese American Film
- 103. Modern Chinese Drama
- 104. Twentieth-Century Chinese Fiction (in English)
- 105. Western Influences on Twentieth-Century Chinese Literature (in English)
- 106. Chinese Poetry (in English)
- 107. Traditional Chinese Fiction (in English)
- 108. Poetry of China and Japan (in English)
- 109A-I. Topics in Chinese Literature (in English)
- 110. Great Writers of China: Texts and Context (in English)

## Classics

- 10. Greek, Roman, and Near Eastern Mythology
- 10Y. Greek, Roman, and Near Eastern Mythology
- 140. Homer and Ancient Epic
- 141. Greek and Roman Comedy
- 142. Greek and Roman Novel
- 143. Greek Tragedy

## Comparative Literature

- 1. Great Books of Western Culture: The Ancient World
- 2. Great Books of Western Culture: From the Middle Ages to the Enlightenment
- 3. Great Books of Western Culture: The Modern Crisis
- 4. Major Books of the Contemporary World
- 5. Fairy Tales, Fables and Parables
- 6. Myths and Legends
- 7. Literature of Fantasy and the Supernatural
- 8. Utopias and their Transformations
- 9. The Short Story and Novella
- 10A-N. Master Authors of World Literature
- 12. Introduction to Women Writers
- 13. Dramatic Literature
- 14. Introduction to Poetry
- 20. Humans and the Natural World
- 25. Ethnic Minority Writers in World Literature
- 53A. Literature of China and Japan
- 53B. Literature of India and Southeast Asia
- 53C. Literatures of the Islamic World
- 100. World Cinema
- 120. Writing Nature: 1750 to the Present
- 135. Women Writers
- 138. Gender and Interpretation
- 139. Shakespeare and the Classical World
- 140. Thematic and Structural Study of Literature
- 141. Introduction to Critical Theoretical Approaches to Literature and Culture
- 142. Critical Reading and Analysis
- 144. The Grotesque
- 145. Representations of the City
- 146. Myth in Literature
- 147. Modern Jewish Writers
- 151. Colonial and Postcolonial Experience in Literature
- 152. Literature of the Americas
- 153. The Forms of Asian Literature
- 154. African Literature
- 155. Classical Literature of the Islamic World

- 157. War and Peace in Literature
- 158. The Detective Story as Literature
- 159. Women in Literature
- 160A. The Modern Novel
- 160B. The Modern Drama
- 161A. Tragedy
- 161B. Comedy
- 163. Biography and Autobiography
- 164A. The Middle Ages
- 164B. The Renaissance
- 164C. Baroque and Neoclassicism
- 164D. The Enlightenment
- 165. Caribbean Literature
- 166. Literature of the Modern Middle East
- 166A. The Epic
- 166B. The Novel
- 167. Comparative Study of Major Authors
- 168A. Romanticism
- 168B. Realism and Naturalism
- 169. The Avant-Garde
- 170. The Contemporary Novel
- 180. Selected Topics in Comparative Literature
- 194H. Special Study for Honors Students
- 195. Seminar in Comparative Literature

## Dramatic Art

- 20. Introduction to Dramatic Art
- 154. Asian Theatre and Drama: Contexts and Forms
- 156AN. Performance Analysis
- 156BN. Theatre in History and Place: Local, National and Global Conditions for Production
- 156CN. Modern Aesthetic Movements in Performance
- 159. Contemporary Experimental Theatre and Drama

## French

- 50. French Film
- 51. Major Works of French
- 52. France and the French-Speaking World

## German

- 48. Myth and Saga in the Germanic Cultures
- 49. Freshman Colloquium
- 112. Topics in German Literature
- 113. Goethe's Faust
- 115. German Literature since 1945
- 118A. Fin-de-siècle Vienna (The Swan Song of the Habsburg Empire)
- 118B. Weimar Culture: Defeat, the Roaring Twenties, the Rise of Nazism
- 118C. Germany under the Third Reich
- 119. From German Fiction to German Film
- 141. The Holocaust and its Literary Representation
- 142. New German Cinema: From Oberhausen to the Present

## Italian

- 50. Studies in Italian Cinema
- 107. Survey of Italian Culture and Institutions
- 108. Contemporary Issues in Italian Culture and Society
- 139B. Boccaccio, Petrarch and the Renaissance
- 140. Italian Literature in English Translation: Dante, Divine Comedy
- 141. Culture, Gender and the Italian Renaissance
- 142. Masterpieces of Modern Italian Narrative
- 150. Studies in Italian Cinema

## Japanese

- 10. Masterworks of Japanese Literature (in English)
- 15. Introduction to Traditional Japanese Culture
- 50. Introduction to the Literature of China and Japan

- 101. Japanese Literature in Translation: The Early Period
- 102. Japanese Literature in Translation: The Middle Period
- 103. Japanese Literature in Translation: The Modern Period
- 104. Modern Japanese Literature: War and Revolution
- 105. Modern Japanese Literature: Hero and Anti-Hero
- 106. Japanese Culture through Films
- 107. Modern Japanese Autobiographies (in English)
- 108. Poetry of China and Japan
- 109. Japanese Popular Culture
- 152. Traditional Japanese Drama
- 156. Japanese Literature on Film

## Native American Studies

- 181A. Native American Literature (the novel and fiction)
- 181B. Native American Literature (non-fiction works by Native authors)
- 181C. Native American Literature (traditional and contemporary poetry)
- 184. Contemporary Indigenous Literature of Mexico
- 188. Special Topics in Native American Literary Studies

## Russian

- 45. Russian Fantasy
- 121. Nineteenth-Century Russian Prose
- 123. Twentieth-Century Russian Prose
- 126. The Russian Theater
- 130. Contemporary Soviet Culture
- 140. Dostoevsky
- 141. Tolstoy

## Spanish

- 149. Latin-American Literature in Translation

## Luso-Brazilian Studies

(College of Letters and Science)

The Department of Spanish and Portuguese sponsors the minor in Luso-Brazilian Studies, which offers students the opportunity to engage with the Portuguese-speaking world as a global space, as well as gain in-depth knowledge of Brazilian literature, culture and society. The minor is structured to facilitate engagement with Latin American, peninsular, and transatlantic topics, while ensuring that students master the essential skills of linguistic competence, and literary and cultural knowledge.

## Minor Program Requirements:

UNITS

### Luso-Brazilian Studies ..... 23-24

Portuguese 100, 161 ..... 8

Select one course in each of the following categories:

Spanish 111N, 115, or 116 ..... 3-4

Portuguese 162 or 163 ..... 4

Select one elective course in each of the following categories:

Portuguese 159, 162, or 163 ..... 4

History 159, 163A, or 163B ..... 4

Note: Consult a departmental adviser if any of these courses are to be taken abroad.

Note: Additional courses may count toward the minor with prior approval by a departmental adviser.

**Minor Advisers.** L. Bernucci, R. Newcomb

## Education Abroad Program Options

We highly recommend that students participate in study abroad in Salvador, Brazil; see <http://studyabroad.ucdavis.edu>. Courses taken abroad may count toward the Luso-Brazilian Studies minor.

 Jerome J. Suran, B.S., Ph.D. (hon.), Senior Lecturer Emeritus

The Graduate School of Management offers a minor in Technology Management to undergraduate students. This minor complements students' undergraduate studies with courses in the ways in which engineering and science-based industrial enterprises manage and use knowledge from science, engineering and technology. The minor also provides students with business and management skills that should enable them to use their engineering and science education more effectively in a technology environment.

## Minor Prerequisites:

Students must take these courses for a letter grade of C- or better.

### UNITS

Management 11A .....	4
Mathematics 16A-16B, 17A-17B or 21A-21B .....	6-8
Statistics any 100 level course or 13 above .....	4

## Minor Program Requirements:

### UNITS

<b>Technology Management.....</b>	<b>20</b>
Choose five courses from: Management 120, 140, 150, 160, 170, 180 .....	20

## Courses in Management (MGT/MGB/MGP)

### Lower Division

#### 11A. Elementary Accounting (4)

Lecture—3 hours; discussion—1 hour. Basic concepts of accounting; interpreting and using financial statements; understanding accounting principles. GE credit: SocSci | SS.—F, W. (F, W.)

#### 11B. Elementary Accounting (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A. Theory of product costing; Analyzing the role and impact of accounting information on decision making; planning and performance evaluation. GE credit: SocSci | SS.—S. (S.)

#### 12Y. Navigating Life's Financial Decisions (3)

Lecture—2 hours; web virtual lecture—1 hour. Restricted to students enrolled in the MBA program. Survey of major life financial decisions (e.g., career choice, consumption v. saving, investments, mortgages, insurance) and how decision-making biases (e.g., overconfidence, present bias, limited attention) can lead to suboptimal choice. The course draws on research from economics, psychology, and sociology. Offered irregularly. GE credit: SS, QL.—W. (W.)

#### 98. Directed Group Study (1-5)

Seminar—3-15 hours. Prerequisite: consent of instructor. Open to all undergraduates, but is primarily intended for lower division students. (P/NP grading only.)—F, W, S. (F, W, S.)

### Upper Division

#### 100. Introduction to Financial Accounting (3)

Lecture—3 hours. Prerequisite: course 11A. Course is open to all upper division undergraduate and graduate students, except those in the Graduate School of Management. Introduction to the concepts, methods, and uses of accounting and financial reporting.—F. (F.)

#### 120. Managing and Using Information Technology (4)

Lecture—3 hours; discussion—1 hour. Develop an analytical framework to manage and monitor business systems concerned with operational, human, and organizational interactions. Introduction to computer hardware, systems software, and information systems. Management of information technology and the impact of information systems on modern management. GE credit: SocSci | SS.—Aram

#### 140. Marketing for the Technology-Based Enterprise (4)

Lecture—3 hours; discussion—1 hour. Quantitative analysis of needs in a product (technology-based) economy, with emphasis on how scientists, engineers, and business people interact to develop and market products and services.—W. (W.) Findlay

#### 150. Technology Management (4)

Lecture—3 hours; discussion—1 hour. Management of firms in high technology industries such as software development and biotechnology research. Motivating and managing workers, organizing for innovation, and making decisions. GE credit: SocSci | SS.—W, S, Su. (W, S, Su.) Olson

#### 160. Financing New Business Ventures (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A; Mathematics 16B, 17B, or 21B; Statistics 13. Concepts/methods used to structure and finance new business ventures. Topics include evaluating the net social (financial) benefit of new investment projects; raising venture capital; the role of the venture capitalist; and the choice of organizational structure in new ventures. GE credit: SocSci | SS.—F. (F.) Briscoe

#### 170. Managing Costs and Quality (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A. Designing cost systems in high technology organizations and managing operations to maximize quality and minimize costs. Topics include activity based costing and management, managing

quality and time to create value, ethical issues in cost assignment, and differential costing for decision. GE credit: SocSci | SS.—S. (S.)

#### 180. Supply Chain Planning and Management (4)

Lecture—3 hours; discussion—1 hour. Course develops key concepts and relationships between supply chain design and business models and strategies. Much of the focus is on quantitative techniques for analysis and management of the production and delivery of goods and services by an organization. GE credit: SocSci | SS.—F. (F.) Hopman

### Graduate—Core Courses

#### 200A. Financial Accounting (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations.—F. (F.) M. Yetman

#### 200B. Managerial Accounting (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Information managers should know to be effective, including: product costing, motivating people, and differential analysis for decision making. Includes team projects and written and oral presentations.—W, Su. (W, Su.)

#### 201A. The Individual and Group Dynamics (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.—F. (F.) Elsbach

#### 201B. Organizational Strategy and Structure (3)

Lecture/discussion—3 hours. Prerequisite: completion of first year courses in Graduate School of Management or the equivalent. Open to MBA students only. Strategic management of organizations, including analysis of industries, firm resources and capabilities and corporate strategy. Strategy formulation, implementation and strategic decision-making. Firm and industry life cycles and change. Analysis of organizational design and structure including differentiation and integration.—F. (F.) Dokko

#### 202A. Markets and the Firm (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.—W. (W.) Stango

#### 202B. Business, Government, and the International Economy (3)

Lecture—3 hours. Prerequisite: course 202A. Examines the influence of government and international factors on business. Topics include distribution of income, business cycles, inflation and interest rates, the federal debt, monetary policy and international trade and finance.—W. (W.) Taylor

#### 203A. Data Analysis for Managers (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management MBA program or consent of instructor. Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.—W. (W.)

**203B. Forecasting and Managerial Research Methods (3)**

Lecture—3 hours. Prerequisite: course 203A. Practical statistical methods for managerial decision making covers regression analysis, time series analysis and forecasting, design and analysis of experiments in managerial research and contingency table analysis. Application of these methods to marketing, finance, accounting, production, operations, and public policy.—W. (W.) Tsai

**204. Marketing Management (3)**

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales.—S. (S.) Naik

**205. Financial Theory and Policy (3)**

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging.—S. (S.) Barber

**206. Decision Making and Management Science (3)**

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management MBA program or consent of instructor. Develops decision-making and problem-solving skills in conjunction with a quantitative model-building approach. Emphasizes how structured modeling techniques, probability forecasts, simulations, and computer optimization models are used in the overall process of making decisions in an uncertain environment.—Su. (Su.) R. Chen

**207. Management Information Systems (3)**

Lecture—3 hours. Prerequisite: graduate student or consent of instructor. Introduction to computer programming and data handling skills. Use of computer in organizations, emphasis on managerial aspects of computing. Standard and nonstandard uses of data files, centralization versus decentralization of computing, office automation, computer security.—F. (F.) Aram

**Electives**

Students must complete the Management core course requirement before enrolling in any of the following courses, or petition with consent of the instructor.

**215. Business Law (3)**

Lecture—3 hours. Prerequisite: completion of Administration core requirements or petition with consent of instructor. Introduction to law and legal process in the United States. Sources of law. Structure and operation of courts, federal-state relationships, fundamentals of administrative law, fundamentals of business law.—W. Su. (W. Su.)

**216. Managing Professionals, Budgets, Controls and Ethics (3)**

Lecture—3 hours. Prerequisite: graduate standing. Performance measures, budgetary controls and ethical pressures which occur at middle management levels in service-type operations. Addresses such organizations as engineering, medical groups, law offices, management consultants.—F. (F.) Suran

**217. The Business of Politics (3)**

Lecture—3 hours. Class size limited to 30 students. Covers the role of business and business leaders as policy and political actors at the federal, state, and local level, including government relations programs, regulation of business by government, political campaigns, and policy as a business advantage.—W. Su. (W. Su.) M. Smith

**220. Management of Social Networks (3)**

Lecture/discussion—3 hours. Prerequisite: course 201A. Open to MBA students only. Principles and applications of social network theory; coordinating divergent interests to create value for individuals and organizations. Emphasis on conceptual models, web-based diagnostic tools, and practical applications.—F. (F.)

**223. Power and Influence in Management (3)**

Seminar—3 hours. Prerequisite: consent of instructor. Investigation of the bases of power in organizations and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including commitment), the construction of meaning, and ethics.—F. (F.) Palmer

**224. Managing Human Resources (3)**

Lecture/discussion—3 hours. Open to MBA students only. Restricted to MBA students only. Explore choices firms make in managing workers-decisions as to wages, benefits, working conditions, and other management policies and practices. Analyze employment systems' fit with firms' environments and strategies, and the consequences of choices managers make regarding policies and practices. Not open to students who have taken MGT 224 or MGP 224.—W. Su. (W. Su.) Hsu

**234. Pricing (3)**

Lecture/discussion—3 hours. Prerequisite: completion of first year core courses at the Graduate School of Management or equivalent, including courses 202A & 203B. Restricted to students in the MBA Program. Combines lectures, cases and homework to teach students tools and skills necessary to analyze pricing situations, make pricing decisions, and implement them, in a systematic manner.—S. (S.)

**239. Digital Marketing (3)**

Lecture/discussion—3 hours. Prerequisite: course 204. Course equips students for a career in digital marketing and social media. Topics include online advertising, search engine optimization, interactive mktg, online privacy issues, e-commerce, social influence, social network theory, measurement of social influence, integrating social and traditional media.—S. (S.) Peters

**240. Management Policy and Strategy (3)**

Lecture—3 hours. Prerequisite: first-year core courses of M.B.A. program. Examines the scope of missions, objectives strategies, policies, structures, measurements and incentives which bear on the management of an organization. Real client organizations, in the private and public sectors, are assigned to student teams as the subjects of study.—F. (F.)

**241. New Product Development (3)**

Lecture/discussion—3 hours. Prerequisite: course 249 or consent of instructor. Open to graduate students in the Graduate School of Management. State-of-the-art concepts and methods to enhance the effectiveness of new product development activities. Focuses on the understanding of managerial issues and acquiring the ability to solve problems.—W. Su. (W. Su.) Aravindakshan

**242. Marketing Communications (3)**

Lecture—3 hours. Issues in designing a marketing communications strategy. Topics include mass and direct communications, institutional aspects of advertising, consumer behavior, evaluating ad effectiveness, determining ad budget, creative strategy, and use and abuse of promotions.—S. (S.)

**243. Customer Relationship Management (3)**

Lecture/discussion—3 hours. Prerequisite: completion of first-year core courses at the Graduate School of Management or the equivalent. Restricted to MBA students only. Customer Relationship Management (CRM) is a management approach under which marketing activities are organized and measured around customers (rather than around brands.) This approach is appealing because customers, not brands, are those who make buying decisions.—F. (F.) Aravindakshan

**244. New and Small Business Ventures (3)**

Lecture—3 hours. Student teams develop complete business plans for their own start-up ventures. Process includes: elevator pitch, business strategy, comprehensive bottoms-up financial projections, capital requirements, product differentiation, competitive, alliance, and go-to-market strategy development, investor presentation, and comprehensive written business plan.—F. W. (F. W.) Lowe

**245. Business Writing (3)**

Lecture/discussion—3 hours. Prerequisite: completion of first-year core courses at the Graduate School of Management or the equivalent. Restricted to MBA students only. Techniques for sharpening writing skills are introduced, along with grammatical structure, word choice, and punctuation. Learn to develop styles that are pitch-perfect for given situations and to think strategically about each communication challenge in a management setting.—W. (W.)

**246. Negotiation and Team Building (3)**

Lecture/discussion—3 hours. Prerequisite: courses 202, 205. Basic theory of negotiation; applies theory to process of building teams to achieve business purposes. Covers integrative and distributive strategies of claiming value, how to recognize bargaining tricks, uncovering hidden agendas, brainstorming to extend Pareto frontier.—W. (W.) Olson

**247. Customer Service as a Marketing Tool (3)**

Lecture—3 hours. Understanding the distinct features of services, how to create value through service, methods of building strong relationships with customers, methods of measuring and building customer satisfaction, and measuring the financial impact of service improvement.—F. (F.)

**248. Marketing Strategies (3)**

Lecture—3 hours. Examines process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of new activities and products, and organizing marketing planning function. Applications to problems in private and public sector marketing.—F. (F.) Rubel

**249. Marketing Research (3)**

Lecture—3 hours. Course addresses the managerial issues and problems of systematically gathering and analyzing information for making private and public marketing decisions. Covers the cost and value of information, research design, information collection, measuring instruments, data analysis, and marketing research applications.—W. (W.) Bunch

**250. Technology, Competition and Strategy (3)**

Lecture—3 hours. Prerequisite: completion of first-year core courses at the Graduate School of Management or the equivalent. Restricted to students in the MBA program. Why is software typically so defective? Why do many firms in the IT industry give away their best products free? This course helps you analyze questions like these by modeling competition and strategy in the network, technology and information industries.—W. (W.) Bhargava

**251. Management of Innovation (3)**

Lecture—3 hours. Managing innovative enterprise in changing and uncertain environments. Covers technology forecasting and assessment, program selection and control, financial management, regulation, and ethics.—F. (F.) Hargadon

**252. Managing for Operational Excellence (3)**

Lecture—3 hours. Open to students in the Graduate School of Management. Explores the management of operations as applied to manufacturing as well as services provided both inside and outside the organization. Develop an understanding of how uncertainty affects planning and delivery by looking at fundamental models of operations.—S. (S.) Woodruff

**253. Corporate Social Responsibility (3)**

Lecture—3 hours. Goal in this course will be to develop a thought process and approach to corporate social responsibility that students will be able to

build on during their post-school leadership roles, whether as corporate executives, entrepreneurs, or NGO leaders. —S. (S.) Ansbach

### **255. Entrepreneurship and Venture Investment Clinic (3)**

Lecture—3 hours. Class size limited to 30 students. Provides the necessary analytical and design tools to create business ideas and refine business models based on emerging technologies. Students learn to work closely in small teams to synthesize technical, strategic, and marketing needs into designs for new ventures. —S. (S.) Vaidya

### **258. Mergers and Acquisitions (3)**

Lecture—3 hours. Course focuses on the market for corporate acquisitions and restructuring activity. Topics include: sources of value creation; takeovers; anti-takeover provisions; bidding strategies; use of leverage in buyouts; regulatory risk and hurdles; and, valuation approaches for highly leveraged transactions. —F. (F.) Marquez

### **259. Banking and the Financial System (3)**

Lecture—3 hours. Prerequisite: course 205 or Management 205 or Management Working Professional 205; consent of instructor. Analyzes the role of financial markets and institutions in allocating capital. Focuses on: bank lending; debt securities; financial market innovations; regulation; functions of commercial banks and other financial intermediaries. Utilizes case studies. —S. (S.) Marquez

### **260. Corporate Finance (3)**

Lecture—3 hours. Focuses on planning, acquiring, and managing a company's financial resources. Includes discussion of financial aspects of mergers and other forms of reorganization; analysis of investment, financial, and dividend policy; and theories of optimal capital structure. —S. (S.) Scherina

### **261. Investment Analysis (3)**

Lecture—3 hours. Examines asset pricing theories and relevant evidence, including the investment performance of stocks and bonds. Topics include the efficiency of markets, domestic and international portfolio diversification, factors influencing the value of stocks and other investments, and portfolio management and performance. —F. (F.) J. Chen

### **262. Money and Security Markets (3)**

Lecture—3 hours. Examines how money and securities markets are organized; how public agencies, businesses, others obtain and invest funds in those markets. Relationship between interest rates, monetary policy, government's role in improving capital markets, approaches to assessing changes in regulation of specific markets. —F. (F.)

### **263. Derivative Securities (3)**

Lecture/discussion—3 hours. Open to students enrolled in the MBA program. Behavior of options, futures, and other derivative securities markets and how public agencies, business and others use those markets. Trading strategies involving options, swaps, and financial futures contracts. Pricing of derivative securities, primarily by arbitrage methods. —F. (F.) Edelen

### **264. Business Taxation (3)**

Lecture—3 hours. Analysis of the impact of business taxation on investment, production, and finance decisions. Discussion of the relationship between business organization and tax liability. Course is not intended for tax specialists. —F. (F.)

### **265. Venture Capital and the Finance of Innovation (3)**

Lecture/discussion—3 hours. Prerequisite: completion of first-year core courses at the Graduate School of Management or the equivalent. Restricted to students in the MBA program. Examines venture capital finance and the related practice of R&D finance. Goal is to apply finance tools and framework to the world of venture capital and financing of projects in high-growth industries. —W. (W.) Yasuda

### **266. International Finance (3)**

Lecture—3 hours. Prerequisite: course 207 or the equivalent. Studies fixed and floating exchange-rate systems. Topics include determinants of a nation's balance of international payments; macroeconomic

interdependence of nations under various exchange-rate regimes and its implications for domestic stabilization policies; and the international coordination of monetary and stabilization policies. —S. (Su.)

### **267. Teams and Technology (3)**

Lecture/discussion—3 hours. Prerequisite: consent of instructor. Restricted to working professional MBA students. Theory and practice of managing teams with primary goals of: providing conceptual guidelines for analyzing and diagnosing group dynamics and determining strategic options as a manager; imparting interpersonal skills for implementing effective strategies; understanding how technological change affects team processes. —S. (S.) Olson

### **268. Articulation and Critical Thinking (3)**

Laboratory/discussion—3 hours. With commitment to this course, students will become competent public speakers, write well at a level expected in business, think efficiently and critically about business challenges and have a useful personal code of ethics to shape their actions and decisions. No student may repeat course for credit. —F. (F.) D. Kennedy

### **269. Business Intelligence Technologies-Data Mining (3)**

Lecture/discussion—3 hours. Prerequisite: consent of instructor. Restricted to students in the MBA program. Descriptive and Predictive Data mining methods covering association rules, clustering, classification, text mining, etc. Big data Technologies. Business applications. Hands-on data mining skills. Business intelligence for managerial decision making. —S. (S.) Yang

### **270. Corporate Financial Reporting (3)**

Lecture—3 hours. Analyzes and evaluates contemporary issues in financial reporting and develops implications of those issues for business decision makers, investment managers, and accounting policymakers. —F. Su. (F. Su.) Wong

### **271. Strategic Cost Management (3)**

Laboratory/discussion—3 hours. Restricted to students in the MBA program. Theoretical frameworks and associated techniques for using organizational design and cost management to achieve a sustainable, profitable cost structure. Topics include: target costing, process design for low cost, total cost of ownership, cost of customers, implementing structural change, and incentives. —W. (W.) Anderson

### **272. Evaluation of Financial Information (3)**

Lecture—3 hours. Studies how investors, creditors, others use accounting and other information in making rational investment, lending decisions. Emphasis is placed on the analysis of financial information in a variety of contexts. Where applicable, recent research in finance and economics is discussed. —W. (W.) Skaife

### **273. Accounting and Reporting for Government Nonprofit Entities (3)**

Lecture—3 hours. Concepts, methods, and uses of accounting and financial reporting by governmental and nonprofit entities. Introduction to budgeting and performance evaluation, and accounting for entities such as hospitals, universities, and welfare agencies. —S. (S.)

### **274. Corporate Governance (3)**

Lecture—3 hours. Prerequisite: restricted to full-time MBA students or consent of instructor. Discusses how corporations can better operate in the interests of shareholders and public. Directly relevant to managers, consultants in compensation and incentives, staff working on mergers and acquisitions, corporate regulators, shareholder rights activists, and board members. —S. (S.)

### **276. Real Estate, Finance and Development (3)**

Lecture—3 hours. Focus on single family, attached, detached, multi-family, and light commercial development. Students will study factors which make up successful real estate developments. Course will consider financial aspects involved in land acquisition, land development, construction, and project lending. —Su. (Su.)

### **281. Systems Analysis and Design (3)**

Lecture—3 hours. Design and specification of computer-based information systems. Applications systems development life cycle, use requirements and feasibility assessment, logical and physical design, program development and testing, conversion and implementation. —W. (W.)

### **282. Supply Chain Management (3)**

Lecture/discussion—3 hours. Prerequisite: completion of first year core courses at the Graduate School of Management or the equivalent; knowledge of Microsoft Excel. Restricted to students in the MBA program. Matching supply with demand is a primary challenge for a firm: excess supply is too costly, inadequate supply irritates customers. Matching supply to demand is easiest when a firm has a flexible supply process, but flexibility is generally expensive. —S. (S.) R. Chen

### **284. Applied Linear Models for Management (3)**

Lecture—3 hours. Covers regression, analysis of variance, and multivariate analysis. Topics will focus on applications to management and policy problems. —W. (W.)

### **285. Time Series Analysis and Forecasting (3)**

Lecture—3 hours. Prerequisite: course 203B. Considers application of time series methods to evaluation and forecasting problems. Covers univariate and multivariate ARIMA models and transfer function models. Applications will be in such areas as economics, finance, budgeting, program evaluation, and industrial process control. —S. (S.) Tsai

### **286. Telecommunications and Computer Networks (3)**

Lecture—3 hours. Prerequisite: course 280. Communication system components; common carrier services; design and control of communications networks; network management and distributed environment; local area networks; data security in computer networks. —S. (S.)

### **287. Business Database and Database Marketing (3)**

Lecture—3 hours. Practical introduction to fundamental principles of database management systems and database marketing. Database design. SQL queries. Concepts of database marketing, data warehouse, data visualization and big data analytics. —W. (W.) Yang

### **288. Special Topics in Management of Information Systems (3)**

Lecture—3 hours. Managerial aspects of information systems. Topics stressing applications in organizations chosen from: economics of computers and information systems, decision support systems, management of computer-based information systems, office automation. —Topics

### **290. Topics in General Management (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in general management. Varied topics to cover more extensively issues discussed in courses 201A and 201B, or current business interest topics in fields of business writing, business communications, development, or workplace processes. May be repeated for credit. —F, W, S, Su. (F, W, S, Su.)

### **291. Topics in Organizational Behavior (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in social psychology and sociology of organizations. Varied topics to cover more extensively issues discussed in courses 201A and 201B, or current business interest topics in fields of organization design, strategy, development, or workplace processes. May be repeated for credit. —F, W, S, Su. (F, W, S, Su.)

### **292. Topics in Finance (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in finance. Application of modern

techniques of finance to business problems. Use of appropriate electronic database and research techniques. May be repeated for credit. —F, W, S, Su. (F, W, S, Su.)

### **293. Topics in Marketing (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent Advanced topics in marketing, which may include marketing research, new product development, brand management, pricing, distribution management, service marketing, hitech marketing, advertising, sales promotions, marketing through the Web. May be repeated for credit. —F, W, S, Su. (F, W, S, Su.)

### **294. Topics in Accounting (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in financial management accounting. Application of modern techniques of evaluation and analysis of financial information. Use of appropriate electronic database and research techniques. May be repeated for credit. —F, W, S, Su. (F, W, S, Su.)

### **295. Topics in Information Technology (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Applications of information technology to management and management of information technology. Adaptation to the dynamic nature of the field. May be repeated for credit. —F, W, S, Su. (F, W, S, Su.)

### **296. Topics in Technology Management (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Cyclical nature of innovation and technological change, features of innovative firms and industries, national innovation systems, and impact of information technologies on innovation processes. May be repeated for credit. —F, W, S, Su. (F, W, S, Su.)

### **297. Topics in International Management (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Broader environment in which U.S. firms and their foreign competitors operate. Integration of material from other topics courses [marketing, strategy, finance, accounting, information technology, technology management] into the international setting. May be repeated for credit. —W. (W.)

### **298. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.) Bunch

### **299. Individual Study (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.) Bunch

## **Professional**

### **401. Crisis Management (1)**

Laboratory/discussion—1 hour. Establishes and explores the defining characteristics of crises. Will learn to anchor crisis management firmly within overall strategic management and also acquire a set of useful tools and techniques for planning for and handling actual crises. (S/U grading only.)—W. (W.)

### **402. Crisis Communications and Reputation Management (1)**

Laboratory/discussion—1 hour. Intended to provide you with an understanding of the framework and tools necessary to successfully address communications and reputation management tasks in a variety of crisis situations. —S. (S.)

### **403. Business Statistics Practicum (1)**

Project—1 hour. Prerequisite: MGT, MGP, or MGB 203A; MGT, MGP, or MGB 203B concurrently or completed. Restricted to students in the MBA program. Applies techniques and concepts in business statistics to real case studies. —F. (F.)

### **404. Organizational Change Management (1)**

Laboratory/discussion—1 hour. Challenges in getting significant changes made in organizations. Learn Organization Change Management (OCM) techniques and discuss case situations where OCM techniques play a role. (S/U grading only.)—F. (F.) Mathur

### **405. Business Literature (1)**

Laboratory/discussion—1 hour. Will examine Business history—historical trends that might influence contemporary business. Some argue that the recent collapse of our financial system might have been averted if business leaders had a better sense of history. (S/U grading only.)—W. (W.)

### **406. Ethical Issues in Management (1)**

Lecture/discussion—1 hour. Explores the philosophical foundation of ethical theory and its recent applications to business situations. Professional codes of ethics, such as those promulgated by educational, managerial, engineering, scientific, medical and legal professional societies, are presented. (S/U grading only.)—W. (W.)

### **407. Storytelling for Leadership (1)**

Lecture/discussion—1 hour. Internalize the fundamental principles behind stories that educate, influence, motivate, inspire, persuade and connect. (S/U grading only.)—Su. (Su.) Charnsupharindr

### **408. The Business of the Media (1)**

Lecture/discussion—1 hour. Focuses on the media industries and how emerging digital technologies are disrupting the way media consumption, distribution and business models work. Will highlight the economics of several media, both news and entertainment. —Su. (Su.) Louie

### **409. Managing Multi-Asset Class Investment Portfolios (1)**

Lecture/discussion—1 hour. Prerequisite: courses 202A, 203A, 205. Examines top down management of multi-asset class portfolios. Topics include bonds, hedge funds, private equity, real estate, commodities, endowments, return generation, performance analysis, credit cycles, financial crises, manager selection, investment policy, and investment careers. Student teams present endowment portfolio recommendations. —S. (S.) Dolan

### **410. Corporate Governance (1)**

Lecture/discussion—1 hour. Covers recent and not-so-recent business and accounting scandals, discuss how corporations can better operate in the interests of shareholders and the public, and learn from people who rely on corporate governance in making investment decisions. (S/U grading only.)—W. (W.)

### **411. Turnaround Management (1)**

Lecture/discussion—1 hour. Evaluate the financial performance of a company, identify opportunities for improvement, propose real solutions to enhance performance, and most important inspire action in staff. (S/U grading only.)—S. (S.)

### **412. International Marketing (1)**

Lecture/discussion—1 hour. Understanding basic concepts of international marketing. Understanding and managing heterogeneous, dynamic, and inter-dependent environments across countries. How to develop and implement an international marketing strategy: where and how to compete, how to adapt your marketing mix. (S/U grading only.)—W. (W.) Peters

### **413. Sustainable Business Ventures: Business and Energy (1)**

Lecture/discussion—1 hour. Introduction to sustainability goals, indicators, values, measurement techniques, and practice how it applies to large and small enterprise. —W. (W.) Jaffe

### **414. Multi-Channel Marketing (1)**

Lecture/discussion—1 hour. Multi-channel marketing strategies empower managers to create value for different customer segments. Covers the necessary concepts to evaluate and select go-to market strategies in order to capitalize on the ubiquity of modern customers. (S/U grading only.)—W. (W.) Rubel

### **415. Climate Risks and Opportunities (1)**

Lecture/discussion—1 hour. Provide a working knowledge of the risks and opportunities arising from climate change and climate policy for businesses. —Su. (Su.) Mazzacurati

### **416. Topics in Private Equity (1)**

Lecture—1 hour. Prerequisite: course 205. Restricted to students in the MBA program. Focuses on the finance principles related to the risk and return of the private equity (PE) industry, valuation of PE target companies, the structuring of leveraged buyouts (LBOs), and the management of portfolio companies. (S/U grading only.)—F. (F.) Yasuda

### **417. Incentives and Controls (1)**

Lecture/discussion—1 hour. Understand how organizations use financial and nonfinancial performance management and incentive systems to motivate people and manage resources. (S/U grading only)—S. (S.)

### **418. Scientific Discovery and Business**

#### **Innovation at Scale in the Food and Agriculture Sector (1)**

Lecture—3 hours. Restricted to students in the MBA program. Scientific discovery and business innovation within the food and agriculture sector profoundly influences the sustainability of society and enterprise competitiveness. Students will learn how business innovation models co-exist antagonistically or synergistically with scientific discovery and its influence on enterprise competitiveness. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.) Schmitz

### **419. Business Strategy Consulting Skills (1)**

Lecture—5 hours. Restricted to students enrolled in the MBA program. Students will learn practical business consulting skills which will help apply strategy theories in the workplace. Students will learn and practice tools to frame and analyze problems, conduct research, communicate findings and navigate client relationships. (S/U grading only.)—F. (F.) Beth-halmy

### **420. Advanced Optimization in a Python-based Modeling Language (1)**

Web virtual lecture—1 hour. Prerequisite: course 252 or MGT 252 or MGP 252, and course 206 or MGT 206 or MGP 206. Restricted to students enrolled in the MBA program. Covers advanced optimization modeling techniques and practical application of modern, scalable modeling language. Techniques will be developed using examples from production planning in a supply chain, but students may explore other areas of application of optimization for their final project. (S/U grading only.)—W. (W.) Woodruff

### **422. Behavioral Finance and Valuation (1)**

lecture—1 hour. Prerequisite: MGT 260 or MGP 260 or course 260, and MGT 261 or MGP 261 or MGP 261 or course 261. Restricted to students enrolled in the MBA program. Investor psychology and market frictions can cause asset prices to deviate from fundamental values, creating profit opportunities for sophisticated investors. The course will cover techniques of financial analysis with the goal of learning how to value assets and identify mispricing. (S/U grading only.)—S. (S.) Scherbina

### **423. Leader as Coach: An Introduction to Coaching Skills for Leaders (1)**

Lecture—1 hour. Restricted to students enrolled in the MBA program. Course introduces the fundamental coaching skills and coaching models that leaders can apply in everyday interactions with their team and colleagues in order to build trust, overcome challenges and help others discover their own full potential. (S/U grading only.) Offered irregularly.—F, W, S. (F, W, S.) Charnsupharindr

### **424. Practicum for Managing People in Modern Organizations (1)**

Project—1 hour. Prerequisite: course 224. Restricted to students in the MBA program. Provides solid grounding in the management of work and the employment relationship. Examines firms' interrelated policies and practices for managing people.—W. (W.) Hsu

**425. Digital Marketing Techniques (1)**

Lecture—1 hour. Restricted to students enrolled in the MBA program. Course provides students with an introduction to digital marketing. The course introduces MBA students to the fundamental aspects and tools of online marketing communication, i.e., how organizations use digital channels to effectively communicate their value propositions to the target customers. (S/U grading only.) Offered irregularly.—S. (S.) Blanchard

**426. The Business of Healthcare (1)**

Lecture—1 hour. Restricted to students enrolled in the MBA program (Business Administration—Working Professional, Business Administration—Bay Area, Business Administration—Full-Time). Course is intended to provide students with an overall understanding of the unique business aspects of the healthcare industry. (S/U grading only.) Offered irregularly.—F, W, S, Su. (F, W, S, Su.) Bird, Murin

**427. The Business of Healthcare (1)**

Lecture—1 hour. Restricted to students enrolled in the MBA program (Business Administration—Working Professional, Business Administration—Bay Area, Business Administration—Full-Time). Course looks at the pitfalls of implementing international strategies, and suggest several accessible, yet powerful frameworks to help international managers implement strategies successfully and completely. (S/U grading only.) Offered irregularly.—F, W, S, Su. (F, W, S, Su.) Katzenstein

**428. Renewable Energy Ventures: Planning, Funding and Regulatory Risk Assessment for Entrepreneurs and Investors (1)**

Lecture—1 hour. Restricted to students enrolled in the MBA program. Advanced innovation lab will introduce students to issues addressed by entrepreneurs and investors in renewable ventures. Lectures, simulations, case studies and practical experience of the presenters will be delivered. Offered irregularly.—Su. (Su.) Schefsky

**429. Detection and Prevention of Asset Misappropriation Fraud in the Workplace (1)**

Lecture—1 hour. Restricted to students enrolled in the MBA program. Course will discuss the fundamentals of fraud detection and prevention in the workplace. Students will learn the major schemes involving workplace fraud, how management can detect fraud and what policies and procedures can be implemented to prevent fraud. Offered irregularly.—F, Su. (F, Su.) Briscoe

**430. Learning From Catastrophes: Lessons for Managers (1)**

Lecture—1 hour. Restricted to students enrolled in the MBA program. Catastrophes unfold in surprisingly similar ways. In this course, students will analyze catastrophes to understand these common patterns and investigate how they can be prevented and mitigated. Students will then apply these lessons to management to gain unconventional insights. Offered irregularly.—Su. (Su.) Pugnetti

**434. Practicum for Pricing (1)**

Project—1 hour. Prerequisite: course 234. Restricted to students in the MBA program. Enhance understanding of the principles and concepts learned in Pricing by (1) teaching the necessary statistical and mathematical skills, and (2) requiring a report for a real Pricing case.—W. (W.)

**440. Integrated Management Project (3)**

Project—3 hours. Prerequisite: first-year core courses of MBA program. Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product.—W. (W.) Dinunzio, Lowe

**440A. Integrated Management Project (3)**

Lecture/discussion—3 hours. Prerequisite: first-year core courses of MBA program. Restricted to full-time MBA students. Applies classroom learning to solve complex business challenges for real world clients.

Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product. (Deferred grading only, pending completion of sequence.)—F. (F.)

**440B. Integrated Management Project (3)**

Project—3 hours. Prerequisite: first-year core courses of MBA program. Restricted to full-time MBA students. Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product. (Deferred grading only, pending completion of sequence.)—W. (W.)

**442. Practicum for Marketing Communication (1)**

Project—1 hour. Prerequisite: course 242. Restricted to students in the MBA program. Provides experience applying concepts learned in Marketing Communications to a realistic advertising or communication problem faced by firms.—S. (S.)

**443. Practicum for Customer Relationship Management (1)**

Project—1 hour. Prerequisite: course 243. Restricted to students in the MBA program. Hands-on training in applying Customer Relationship Management concepts and metrics to secondary data. Enhances ability to interpret results and decide the right type of marketing actions by requiring an executive report at the end of the quarter.—F. (F.) Aravindakshan

**448. Practicum for Marketing Strategies (1)**

Project—1 hour. Prerequisite: course 248. Restricted to students in the MBA program. Provides opportunities to apply the concepts covered in the Marketing Strategies class through a group project involving the analysis of strategic marketing decisions based on business-related issues, simulation and modeling.—F. (F.) Rubel

**449. Marketing Research Practicum (1)**

Project—1 hour. Prerequisite: course 249. Restricted to students in the MBA program, or in some cases with permission of instructor. Provides opportunities to apply the concepts and methods covered in the Marketing Research class. Hands-on and project-based, work could be either individual or in groups depending on enrollments and/or interests of students.—S. (S.) Bunch

**450. Practicum for Technology Strategy and Competition (1)**

Project—1 hour. Prerequisite: course 250. Restricted to students in the MBA program. In-depth practicum project course. Apply theories, concepts, and models, learned in course 250 to a real-world business problem, through data collection, data analysis, simulation, modeling and post-model interpretation.—W. (W.) Bhargava

**460. Practicum for Corporate Finance and Real Estate (1)**

Project—1 hour. Prerequisite: course 260. Restricted to students in the MBA program. Work in groups to select and value a financial entity. It could be a firm, a sports player, a building, a project, or a patent. Grade based on an in-class presentation and a write-up.—S. (S.) Scherbinia

**461. Practicum for Investment Analysis (1)**

Project—1 hour. Prerequisite: course 261. Restricted to students in the MBA program. Provides practical experience applying concepts learned in Investment Analysis to a realistic portfolio management setting via a hypothetical exercise. Produce a realistic executive summary and presentation of an investment proposal for a hypothetical client.—F. (F.) R. Chen

**464. Practicum for Taxes and Business Strategy (1)**

Project—1 hour. Prerequisite: course 264. Restricted to students in the MBA program. Practical application project drawing from the tax planning theory contained in course 264. Project consists of a business formation and operation, change in organization (incorporation), and movement into multinational and multi-jurisdictional tax.—F. (F.) R. Yetman

**465. Practicum for Venture Capital (1)**

Project—1 hour. Prerequisite: course 265. Restricted to students in the MBA program. Provides an opportunity to apply concepts learned in Venture Capital in a realistic setting. Complete project analyzing a potential investment in a hypothetical venture and prepare an deal term sheet/investment agreement.—S. (S.) Yasuda

**467. Practicum for Teams and Technology (1)**

Project—1 hour. Prerequisite: course 267. Restricted to students in the MBA program. Groups investigate the performance, creativity, conflict, information sharing, and leadership behaviors of a real world team. Provide consulting advice to the team, which not only gives analytic skills, but also builds presentation skills.—S. (S.) Olson

**469. Practicum for Business Intelligence Technologies (1)**

Project—1 hour. Prerequisite: course 269. Restricted to students in the MBA program. Projects applying concepts learned in Business Intelligence Technologies to real business problems.—W. (W.) Yang

**482. Practicum for Supply Chain Management (1)**

Project—1 hour. Prerequisite: MGT, MGP, or MGB 282 is a pre-requisite or co-requisite. Restricted to students in the MBA program. Provides experience applying concepts learned in Supply Chain Management to a realistic management setting via a project.—S. (S.) R. Chen

**490. Directed Group Study Management Practicum (3)**

Lecture/discussion—3 hours. Prerequisite: consent of instructor; sponsorship of a GSM Academic Senate faculty member; approval of graduate adviser. Provides opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses. May be repeated for credit. Offered irregularly.—Su. (Su.)

**498. Directed Group Study Management Practicum (1-12)**

Project. Prerequisite: consent of instructor; sponsorship of a GSM Academic Senate faculty member, and approval of graduate adviser. Provides the opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses. May be repeated up to 6 units for credit. (S/U grading only.)—F, W, S. (F, W, S.) Bunch

**499. Directed Individual Study Management Practicum (1-12)**

Project. Prerequisite: consent of instructor; sponsorship of a Graduate School of Management Academic Senate faculty member and approval of graduate adviser. Provides the opportunity for students to gain experience in applying business methodologies previously acquired in other Graduate School of Management courses. (S/U grading only.)—F, W, S. (F, W, S.) Bunch

## Managerial Economics

(College of Agricultural and Environmental Sciences)  
<http://manecon.ucdavis.edu>

**Faculty.** See Agricultural and Resource Economics, on page 153.

**Major Advisers.** Contact Department office.

**Undergraduate Advising Center** for the major, minor, and course offerings (including peer advising) is located in 1176 Social Sciences and Humanities Building, 530-754-9536, <http://manecon.ucdavis.edu>.

### The Major Program

The Managerial Economics major at UC Davis is a disciplinary program combining strong preparation in microeconomic theory and quantitative methods.

It prepares students for the analysis of management and policy issues in business, finance, marketing, production, agriculture, food distribution, natural resources, the environment, resource allocation, and international trade and development. Students specialize in one or more emphases selected from the following: (1) Business Economics focuses on the economic aspects of managerial decision-making essential for solving problems in business, management, marketing, and finance. (2) International Business Economics explores the economic drivers and policy challenges in the major emerging markets and focuses on how these markets are impacting the world economy. (3) Environmental and Resource Economics concentrates on issues related to the use of resources and environmental quality. (4) Agricultural Economics focuses on the economic and policy aspects of production and marketing of foods and fibers.

Students in the Managerial Economics program develop valuable skills and strengths that lead to careers in business and government.

**Internships and Career Alternatives.** Students in Managerial Economics have opportunities to gain additional career information and preparation through internships in a variety of business enterprises and governmental agencies. Graduates qualify for supervisory and management training positions in banking, finance, accounting, commodity and stock brokerages in the private sector, farm and ranch production, food and agricultural processing, sales and service, and a variety of agency career positions in local, state, and federal government. Graduates are well qualified to seek advanced degrees in agricultural and resource economics, economics, business administration, accounting, public policy, or law. For more information, see <http://iccweb.ucdavis.edu>.

**Study Abroad.** The Agricultural and Resource Economics department encourages students to complement their Managerial Economics degree or minor with a study abroad experience. Two upper-division courses, a maximum of 4 units per course, (excluding core courses) may be taken at international campuses. Students must select courses from the pre-approved list at UC Davis Study Abroad and seek pre-approval from a Managerial Economics staff adviser.

**Graduate Study.** Students who meet the admission requirements of Graduate Studies and the Department of Agricultural and Resource Economics may pursue studies leading to the M.S. and Ph.D. degrees. For information on admission to graduate study, degree requirements, consult the Graduate Program Coordinator in the Department of Agricultural and Resource Economics; also see <http://agecon.ucdavis.edu>.

### B.S. Major Requirements:

	UNITS
<b>Major English Requirement .....</b>	<b>8</b>
Choose one course from: Communications 1 or 3 .....	4
University Writing Program 104A .....	4
(The upper-division composition exam will not satisfy this requirement.)	
<b>Preparatory Subject Matter.....</b>	<b>39-41</b>
Agricultural and Resource Economics 18...4	
Economics 1A-1B .....8	
One course from: Plant Sciences 21, Engineering Computer Science 10, 15 or 30.....3-4	
Management 11A-11B .....8	
Mathematics 16A-16B-16C, 17A-17B, or 21A-21B.....8-9	
Statistics 13, 103.....8	
<b>Total Depth Subject Matter .....</b>	<b>52-55</b>
<b>Core .....</b>	<b>20</b>
Agricultural and Resource Economics 100A, 100B, 106, 155 and Economics 101	
<b>Restricted Electives.....</b>	<b>32-35</b>
Choose at least one of the emphases below:	

#### *Business Economics emphases*

Choose at least 16 units from: Agricultural and Resource Economics 112, 118, 119, 136, 157, 171A, 171B.  
Select the remaining 16 units from the above list or from Agricultural and Resource Economics 115A, 115B, 120, 121, 130, 132, 138, 139, 140, 143, 144, 145, 146, 150, 156, 175, 176, 194HA-194HB, Economics 115A, 115B, 121A, 121B, 151A, 151B, 160A, 160B.

#### *International Business Economics emphases*

Choose at least 20 units from Agricultural and Resource Economics 115A, 115B, 138, 139, 146, Economics 115A, 115B, 160A, 160B, 171.

Select the remaining 12 units from the above list or from Agricultural and Resource Economics 130, 171A, 171B, 175, 176, Economics 121A, 121B, Political Science 130.

#### *Environmental and Resource Economics emphases*

Agricultural and Resource Economics 175 and 176 .....8  
Choose at least 20 units from: Agricultural and Resource Economics 120, 132, 138, 140, 145, 146, 150, 156, Economics 125, 130 Environmental Science and Policy 168A, 168B, 178.

Select the remaining 4 units from the above list or upper-division courses in Agricultural and Resource Economics, Economics, or Environmental Science and Policy 160, 161, 163, 165N, 166N, 167, 171, 172, 173 or Environmental Toxicology 138.

#### *Agricultural Economics emphases*

Choose at least 16 units from Agricultural and Resource Economics 120, 121, 130, 132, 138, 139, 140, 145, 150.

Select the remaining 16 units from the above list or upper division courses in Agricultural and Resource Economics and/or Economics.

\* Students must attain a major GPA of at least a C average (2.00) in courses taken for depth subject matter (core and restricted electives). These courses must be taken for a letter grade. All restricted elective courses taken will be calculated as part of the major GPA, including courses with F grades that have not been repeated.

### Total Units for the Major .....99-104

### Minor Program Requirements:

	UNITS
<b>Managerial Economics .....</b>	<b>24</b>

#### Agricultural and Resource Economics 100A, 100B, and 106 .....

12  
Select the remaining 12 units from

Agricultural and Resource Economics 107,

112, 130, 136, 138, 139, 143, 145, 146,

150, 155, 156, 157, 171A, 171B, 175,

176.

NOTE: Preparation for the minor includes Economics 1A, 1B; Mathematics 16A-16B-16C or 17A-17B or 21A-21B; Statistics 13 and 103.

Prerequisites for courses taken for the minor are mandatory and students should plan accordingly. One upper-division class to satisfy the minor may be taken for passed/not passed grading. All minor courses must be taken in residence. Two upper-division courses, a maximum of 4 units per course, may be taken through UC Study Abroad. Students must seek pre-approval from a Managerial Economics staff adviser for any international courses.

### Marine and Coastal Science

## Marine and Coastal Science

The major in Marine and Coastal Science focuses on the interdisciplinary nature of marine sciences by exposing students to core, breadth, and focus area courses in the discipline, in addition to a strong foundation of science preparatory material. The major builds upon existing strengths at UC Davis in marine and coastal sciences as well as field-based courses offered at Bodega Marine Laboratory to provide students a unique, interdisciplinary, "hands on" education. Advising is provided by the Department of Earth and Planetary Sciences for interested students.

**The Program.** The major begins with introductory courses in mathematics, chemistry, physics, biology, and earth sciences. These are followed by core courses in Marine Science. The major requirements provide focus and breadth, so that each student gains mastery in one area and broad exposure to many facets of Marine and Coastal Science. Focus and Breadth areas include: Coastal Environmental Processes, Marine Ecology and Organismal Biology, Marine Environmental Chemistry, and Oceans and the Earth System.

In this major, students will be exposed to the foundation disciplines within marine science (biology, chemistry, geology, physics) as well as modern issues facing marine and coastal environments; e.g., climate change, pollution, carbon cycling, conservation. The major requires field experience, independent research or internship, and concludes with a capstone course featuring current research in marine science. These integrative experiences will require students to synthesize the interdisciplinary topics that they have encountered through this degree program. The mastery achieved provides a strong foundation for future careers in academic science, government, policy, and the private sector.

**Internships and Career Alternatives.** A B.S. in Marine and Coastal Science will provide students with knowledge and practical experience needed to pursue careers in marine science (government, private sector, research) and/or advanced degree programs. The major program includes both research and internship experiences to help prepare students for these career paths.

**Advising.** Students majoring in Marine and Coastal Science are strongly encouraged to meet with their faculty adviser (assigned, based upon Focus Area choice) once per year to review their coursework plans. Staff advising is available through the Department of Earth and Planetary Sciences, and student peer advisers are available. Faculty advisers include: Tessa Hill (College of Letters and Science), Anne Todgham and John Largier (College of Agricultural and Environmental Sciences), and Brian Gaylord (College of Biological Sciences).

The student's chosen Focus Area will determine the college into which the student is admitted, the college where the degree is awarded, and the associated department:

- Coastal Environmental Processes.** College of Agricultural and Environmental Sciences; Environmental Science & Policy

- Marine Ecology & Organismal Biology.** College of Biological Sciences; Evolution & Ecology

- Marine Environmental Chemistry.** College of Agricultural and Environmental Sciences; Environmental Toxicology

- Oceans and the Earth System.** College of Letters and Science; Earth and Planetary Sciences

### B.S. Major Requirements:

† denotes courses only offered at Bodega Marine Laboratory.

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>51-63</b>

Biological Sciences 2A-2B-2C.....15

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;

ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience

Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience

Quarter Offered: F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses

Chemistry 2A-2B-2C .....	15
Mathematics 16A-16B-16C, 17A-17B-17C, or 21A-21B-21C .....	9-12
Note: Students in Marine Ecology & Organismal Biology focus area must take 17A-17B-17C or 21A-21B.	
Physics 7A-7B-7C or 9A-9B-9C .....	12-15
Chemistry 8A-8B for students in Marine Ecology & Organismal Biology focus area .....	6
Evolution & Ecology 12 and Geology 16 are strongly recommended.	

**Depth Subject Matter ..... 46-75**

Geology 116N (Environmental Science & Policy 116N) .....	3
Statistics 100 or 102 .....	4
Two courses from: Geology 150A (Environmental Science & Policy 150A), Geology 150B (Environmental Science & Policy 150B), †Geology 150C (Environmental Science & Policy 150C) ..	7-8
Two courses from: Atmospheric Sciences 120, Environmental Science and Policy 100, 110, Environmental Toxicology 101, Evolution and Ecology 100, 101, 112+112L, Hydrology 103N .....	8-9
Evolution & Ecology 111 (Environmental Science and Policy 111) .....	1
Marine Ecology & Organismal Biology focus area: Biological Sciences 101, 102+103 or 105, and 104 .....	10-13
Courses cannot be utilized to fulfill multiple requirements, with the exception that any Bodega Marine Laboratory course simultaneously fulfills the field requirement below.	

**Focus Area Requirement ..... 12**

Complete at least four courses from one category  
below, totaling at least 12 units.

**Coastal Environmental Processes.** Emphasis  
on processes and environments of the coastal  
zone, and the strong physical-biological connec-  
tion that exists here. Courses highlight the critical  
terrestrial-marine interface and fundamental phys-  
ical processes in the coastal zone.

This focus area requirement can be fulfilled using:  
Atmospheric Sciences \*121A, \*121B, 158, Envi-  
ronmental Toxicology \*102A, Environmental Sci-  
ence & Policy \*152, 155, 155L, 166N, Geology  
\*156, 182, Hydrology 103N, 134, \*143,  
\*144, Wildlife, Fish & Conservation Biology  
\*157.

\* Some courses may require additional prerequisites,  
such as: Atmospheric Sciences 120, Math  
21D, Chemistry 8B, Environmental Science and  
Policy 100, Hydrology 103N, Hydrology 141,  
Hydrology 145, Engineering: Civil and Environ-  
mental 144.

**Marine Ecology and Organismal Biology.**

Focus on physiological adaptations to the marine  
environment, and the biology of marine species from  
the molecular to population levels. Courses include  
emphasis on the ecological processes that determine  
the distribution and abundance of marine organ-  
isms, and the patterns and mechanisms of evolution  
in the ocean.

The focus area requirement can be fulfilled using:  
Animal Science \*131, Biological Sciences †122,  
†122P, Environmental Science & Policy 100,  
121, †124, \*155, 155L, Evolution & Ecology  
100, 101, \*106, 112, 112L, \*114, 115,  
Environmental Toxicology \*127, Neurobiology,  
Physiology, and Behavior †141 and †141P,  
Wildlife, Fish and Conservation Biology 120,  
120L, 121, 122, 130 \*Some of these courses  
may require additional prerequisites, such as:  
Environmental Science and Policy 100, Evolution  
and Ecology 112, Wildlife Fish Conservation  
120, Environmental Toxicology 101.

**Marine Environmental Chemistry.** Emphasis  
on major themes in marine chemistry, geochemistry,

the carbon cycle, and contaminant fate and trans-  
port.

The focus area requirement can be fulfilled using:  
Chemistry 100, Environmental Toxicology \*101,  
\*102A, \*120, \*127, Civil & Environmental  
Engineering 140, 140L, Geology \*148, 182,  
Hydrology 134, 141, Wildlife, Fish and Conser-  
vation Biology 153

\* Some courses may require additional prerequi-  
sites, such as: Chemistry 8B, Geology 50, 60,  
Hydrology 145, Civil and Environmental Engi-  
neering 144.

**Oceans and the Earth System.** A study of our  
changing oceans in the context of earth system his-  
tory, including climate change, paleoceanography,  
ecological shifts, conservation, and marine policy.

The focus area requirement can be fulfilled using:  
Atmospheric Sciences 116, Environmental Sci-  
ence and Management 120, 121, Environmental  
Science & Policy \*110, 161, 162, 166N, \*169,  
198, Evolution & Ecology \*120, Geology 107,  
107L, 108, 109, 109L, 144, International Rela-  
tions \*131, Science & Society 120, Wildlife, Fish  
and Conservation Biology 154

\* Some courses may require additional prerequi-  
sites, such as: Atmospheric Sciences 60, Chemis-  
try 8A,B, Geology 1, Economics 1A, Hydrology  
145, Environmental Resource Sciences 100, Inter-  
national Relations 1

**Breadth Requirement ..... 8**

Complete one course from each category below that  
is not the student's chosen Focus Area, totaling at  
least 8 units.

**Coastal Environmental Processes.** The breadth  
requirement can be fulfilled using the following  
courses: Atmospheric Sciences 158, Environmental  
Science & Policy \*152, \*155, Geology 182, Wild-  
life, Fish & Conservation Biology \*157

**Marine Ecology and Organismal Biology.**

The breadth requirement can be fulfilled using the  
following courses: Environmental Science & Policy  
124, \*155, Evolution & Ecology \*106, \*114,  
115, Environmental Toxicology \*127, Neurobiol-  
ogy, Physiology, and Behavior †141+ †141P

**Marine Environmental Chemistry.** The breadth  
requirement can be fulfilled using the following  
courses: Environmental Toxicology \*120, Chemistry  
100, Geology 182, Hydrology 134, 141

**Oceans and the Earth System.** The breadth  
requirement can be fulfilled using the following  
courses: Atmospheric Sciences \*116, Environmental  
Science & Policy 166N, Evolution & Ecology \*120,  
Geology 107, 108, Wildlife, Fish and Conservation  
Biology 154

\* Some courses may require additional prerequi-  
sites; see above.

**Field Requirement ..... 0-14**

The Field Requirement provides exposure to  
field techniques, experimental design, and the  
marine environment itself. It is highly  
recommended that students fulfill this  
requirement by residence at Bodega Marine  
Laboratory for one or more courses; see  
courses denoted with †. Bodega Marine  
Laboratory courses may simultaneously fulfill  
an additional requirement in categories  
above ..... 0 OR

Alternatively, students may fulfill the Field  
Requirement by taking two of the following  
courses; these courses cannot fulfill multiple  
requirements: Geology 109L, Evolution and  
Ecology 112L, 115, Environmental Science &  
Policy 123, 151L, Geology 182, Wildlife,  
Fish & Conservation Biology 100, 102L,  
157 ..... 4-14

**Internship/Research ..... 3**

Biological Sciences 124, Geology 192, Environmental  
Science & Policy 192, Evolution and Ecology  
192, 199 or equivalent.

**Total Units for the Major (by chosen Focus  
Area):**

<b>Coastal Environmental Processes....</b>	<b>97-119</b>
<b>Marine Ecology &amp; Organismal Biology.....</b>	<b>113-138</b>
<b>Marine Environmental Chemistry ...</b>	<b>97-119</b>
<b>Oceans and the Earth System.....</b>	<b>97-119</b>

**Courses in Master of Professional  
Accountancy (ACC)****Graduate****201. Financial Reporting (4)**

Lecture—4 hours. Restricted to Master of Profes-  
sional Accountancy graduate students. Coverage  
includes the fundamentals of accounting and report-  
ing economic events and transactions. Emphasizes  
the preparation of balance sheets, income state-  
ments, statements of cash flow, and statements of  
stockholders' equity. Not open for credit to students  
who have taken any Management 200A.—F. (F.) Yet-  
man

**203. Intermediate Financial Reporting (4)**

Lecture—4 hours. Prerequisite: course 201 or Man-  
agement 200A. Restricted to students enrolled in the  
Master of Professional Accountancy degree pro-  
gram. Focuses on the preparation of complex financial  
statements. Topics include accounting

recognition, measurement, and disclosure, as well as the theoretical foundations of and motivations for financial reporting choices. Not open for credit to students who have taken any Management 200A. —W. (W.) Ekanayake

### **205. Advanced Financial Reporting (4)**

Lecture—4 hours. Prerequisite: course 203. Restricted to graduate students in Graduate School of Management. Advanced treatment of recognition, measurement, and disclosure including pensions, accounting for income taxes, mergers and acquisitions, consolidations, special-purpose entities, and foreign subsidiaries. Includes accounting for governmental and nonprofit entities, as well as advanced treatment of international accounting standards. —S. (S.) Skaife

### **211. Tax Reporting and Analysis (4)**

Lecture—4 hours. Restricted to Master of Professional Accountancy graduate students. Introduction to the taxation of business entities and their related transactions, with an emphasis on the details of tax law and tax reporting requirements. Topics include individual, partnership, and corporate taxation, as well as tax theory. Not open for credit to students who have completed any Management 264. —F. (F.) Yetman

### **213. Intermediate Tax Reporting and Analysis (4)**

Lecture—4 hours. Prerequisite: course 211; any Management 264. Restricted to graduate students in the Graduate School of Management. Detailed analysis of federal taxation of individuals. Topics include the timing of income recognition, deductions and credits for tax purposes, as well as the basics of property transactions. —W. (W.) Snyder

### **215. Advanced Tax Reporting and Analysis (4)**

Lecture—4 hours. Prerequisite: course 213. Restricted to graduate students in Graduate School of Management. Advanced treatment of complex tax transactions and entities. Topics include aspects of federal taxation of entities and the applicable impact upon individual taxpayers. Coverage includes basis analysis as applicable to pass through entities and an introduction to professional responsibilities. —S. (S.) Snyder

### **217. Taxation of Individuals, Property, and Estates (4)**

Lecture—4 hours. Prerequisite: course 213. Restricted to graduate students in Graduate School of Management. In-depth analysis of individual income tax issues and property transactions including non-taxable exchanges, compensation, gifts, and transfer taxes. Expanded analysis of multistate tax issues. Emphasis is on the interrelationships of complex individual transactions as well as planning techniques. —S. (S.)

### **219. Taxation of Business Entities (4)**

Lecture—4 hours. Prerequisite: course 213. Restricted to graduate students in Graduate School of Management. Analysis of detailed business entity tax issues including basis calculations, alternative minimum taxation, multistate and multinational taxation, stock transactions, and mergers and acquisitions. Tax planning for entities and relationships between business entities and their owners. Offered irregularly. —F. (F.)

### **231. Analysis and Use of Accounting Reports (4)**

Lecture—4 hours. Prerequisite: course 203. Restricted to students enrolled in the Master of Professional Accountancy degree program. Evaluation of complex financial accounting reports by managers and persons outside the firm, such as investors, creditors, and financial analysts. Topics include cash flow vs. income measurement, ratio and valuation analysis, and the effects of international accounting standards. Not open for credit to students who have completed any Management 272. —S. (S.) Skaife

### **241. Auditing and the Accounting Profession (4)**

Lecture—4 hours. Prerequisite: course 201; any Management 200A. Restricted to Graduate School of Management students. Introduction to the audit environment, professional standards, the accounting profession, and the professional responsibilities of accountants. Integrate audit topics across the areas of financial, cost, tax and systems accounting. (S/U grading only.) —F. (F.) Snyder

### **243. Auditing and Attestation Services (4)**

Lecture—4 hours. Prerequisite: course 241. Restricted to graduate students in Graduate School of Management. Advanced treatment of the audit process and environment. Topics include audit planning and performance, evidence, internal controls, professional standards, and audit reports. Reviews, compilations and attestation services are examined, as are governmental agency audits. —S. (S.) Ekanayake

### **251. Managerial Accounting and Controls (4)**

Lecture—4 hours. Prerequisite: course 201; any Management 200A. Restricted to graduate students in the Graduate School of Management. Analysis of management accounting systems including cost accounting, performance measurement, and compensation and reward systems. Focuses on the production of information useful for managerial decision-making, as well as the design of these systems. Not open for credit to students who have completed any Management 271. —W. (W.) Anderson

### **253. Accounting Information and Control Systems (4)**

Lecture—4 hours. Prerequisite: course 201 or any Management 200A. Restricted to graduate students in Graduate School of Management. Analysis of information systems used for accounting, record-keeping, and control. Topics include the regulatory requirements of accounting control systems as well as their implementation and auditing considerations. Not open for credit to students who have taken any Management 271. —W. (W.)

### **261. Communications for Professional Accountants (4)**

Lecture—4 hours. Prerequisite: course 201 or any Management 200A. Restricted to graduate students in the Graduate School of Management. Overview of written and oral professional communications with an emphasis on structuring and documenting audits and reports, understanding audiences (investors, creditors, regulators, and other stakeholders), and consideration of ethical and regulatory responsibilities. Not open for credit to students who have taken any Management 268. —W. (W.) Kennedy

### **271. Accounting Ethics (4)**

Lecture—4 hours. Prerequisite: course 201; any Management 200A. Restricted to Graduate School of Management students. Analysis of accountants' professional responsibilities and ethics. Topics include the behavioral foundations of ethics in a business environment, how those elements affect accountants' integrity, objectivity, and independence. Professional standards related to accountants' conduct are also covered. —F. (F.) Yetman

## Courses in Preventive Veterinary Medicine (MPM)

### Graduate

#### 200. Introduction to Information Management for Epidemiologists (1)

Laboratory—1 hour. Restricted to students in the Master of Preventive Veterinary Medicine program. Introduction to practical application of epidemiological methods to solve problems involving population health data. Emphasis on using worksheet/database software tools for organizing, analyzing, reporting, and interpreting data. Ten, three-hour sessions. —Su. (Su.) Lehenbauer

#### 201. Emerging Issues at the Interface of Animal, Human, and Ecosystem Health (2.5)

Lecture—1 hour; discussion—1.5 hours. Class size limited to 35 students. Introduce one health topics emphasizing relationships between environmental, animal and human health. Topics include ecosystem change and impacts on animals and humans, cross-species disease transmission and approaches for addressing critical data gaps to inform ecosystem health and disease prevention. —F. (F.) Johnson

#### 202. Medical Statistics I (4)

Lecture—15 sessions; laboratory—10 sessions. Prerequisite: MPVM or MPH standing, or consent of the instructor. Restricted to 80 students. Basic statistics in clinical, laboratory and population medicine: descriptive statistics; probability; binomial, Poisson, normal, t, F, and Chi-square distributions; sampling distributions; parameter estimation; hypothesis testing; elementary nonparametric methods, simple linear regression and correlation; life table construction and analysis. —Su. (Su.)

#### 203. Medical Statistics II (4)

Lecture—3 hours; laboratory—2 hours. Prerequisite: course 202 (or equivalent) or consent of instructor. Continuation of course 202. Analysis of variance in biomedical sciences; nonparametric methods; multiple regression; unconditional logistic regression; biomedical applications of statistical methods. Microcomputer applications in population medicine to reinforce principles that are taught in lecture. Required for students in the Preventive Veterinary Program Graduate Group (PVM) and the Masters of Public Health Program (MPH).

#### 204. Medical Statistics III (4)

Lecture—3 hours; laboratory—2 hours. Continuation of course 203. Selecting the best regression equation, conditional logistic regression, Poisson regression, survival analysis, analysis of time dependent variation and trends. Microcomputer applications in population medicine to reinforce principles that are taught in lecture. —W. (W.)

#### 205. Principles of Epidemiology (4)

Lecture—4 hours. Prerequisite: course 202, an introductory statistics course, or consent of the instructor. Continuation of course 202. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance. (Same course as Epidemiology 205). —F. (F.)

#### 206. Epidemiologic Study Design (4)

Lecture—30 sessions; discussion—9 sessions; laboratory—2 sessions. Prerequisite: course 205 or consent of instructor. Builds on concepts presented in course 205. Concepts of epidemiologic study design—clinical trials, observational cohort studies, case control studies—introduced in course 205A are covered in more depth, using a problem-based format. Discussion of published epidemiologic studies. (Same course as Epidemiology 206). —F. W. S. (F. W. S.) Atwill

## 207. Applied Epidemiologic Problem Solving (1)

Laboratory/discussion—2 hours. Integration of epidemiologic and statistical methodology in a problem-solving approach to contemporary animal population health issues. Data validation and manipulation. —W. (W.) Martinez-Lopez

### Professional

#### 402. Medical Statistics I (5)

Lecture—37 sessions; laboratory—13 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Statistics in clinical, laboratory and population medicine: graphical and tabular presentation of data; probability; binomial; Poisson, normal, t, F, and Chi-square distributions; elementary nonparametric methods; simple linear regression and correlation; life tables. Microcomputer applications of statistical procedures in population medicine. —F. Su. (F. Su.) Farver

#### 403. Medical Statistics II (3)

Lecture—20 sessions; laboratory—10 sessions. Prerequisite: Prerequisite: MPVM standing in the School of Veterinary Medicine and/or successful completion of course 402 (or equivalent) or consent of instructor. Analysis of variance in biomedical sciences; nonparametric methods; multiple regression; biomedical applications of statistical methods. Microcomputer applications to reinforce principles that are taught in lecture. Continuation of course 402. —F. W. (F. W.) Farver

#### 404. Medical Statistics III (4)

Lecture—3 hours; laboratory—2 hours. Prerequisite: MPVM standing in the School of Veterinary Medicine and/or successful completion of course 403 (or equivalent) or consent of instructor. Continuation of course 403. Analysis of time dependent variation and trends, analysis of multiway frequency tables; logistic regression; survival analysis selecting the best regression equation; biomedical applications. —S. (S.)

#### 405L. Epidemiology Laboratory (1)

Lecture—1 session; lecture/discussion—1 session; laboratory—1 session. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Practical application of epidemiological methods using the microcomputer as a tool to solve problems. Utilizes spreadsheets and databases as tools to organize and analyze data. Emphasize epidemiological methods introduced in course 405. Data sets provided. —F. Su. (F. Su.) Lehenbauer

#### 408A. Veterinary Research: Planning and Reporting (2)

Lecture—20 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Planning, critical analysis, ethics, and written and oral communication of veterinary research. —Foley

#### 408B. Veterinary Research: Planning and Reporting (1)

Lecture—10 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Planning, critical analysis, ethics, and written and oral communication of veterinary research. —F. W. S. (F. W. S.) Christopher

#### 408C. Veterinary Research: Planning and Reporting (1)

Discussion—10 sessions. Prerequisite: Master of Preventive Veterinary Medicine standing in the School of Veterinary Medicine or consent of instructor; completion of course 408A and course 408B. Planning, critical analysis, ethics, and written and oral communication of veterinary research. —S. (S.) Chomel

#### 410. Animal Health Policy and Risk Communication (1)

Discussion—10 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. International, national and state policy issues affecting veterinary medicine, how policy is made, organizational cultures, the role of science in policy-making, ten best practices in risk/crisis com-

munication, message-mapping for the public and policy-makers, and effective meeting management. —F. (F.) Mazet

## 426. Applied Epidemiologic Problem Solving (1)

Laboratory—10 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Integration of epidemiologic and statistical methodology in a problem-solving approach to contemporary animal population health issues. Data validation and manipulation; descriptive statistical analysis using spreadsheets, database management, and Epi Info software. Builds on skills learned in courses 405L and 406. —W. (W.)

## Maternal and Child Nutrition (Department of Nutrition)

Francene M. Steinberg, Ph.D., Chairperson of the Department

**Department Office.** 3135 Meyer Hall  
530-752-4630;  
<http://www.extension.ucdavis.edu/nutrition>

### Faculty

Faculty members are listed on the website.

**Graduate Study.** The Nutrition Department offers the degree of M.A.S. in Maternal and Child Nutrition. This program consists of three required six-unit core courses (Nutrition During Pregnancy, Lactation and Infant Nutrition, and Child and Adolescent Nutrition), six to eight units of special topics seminars, two units of electives, and a six-unit student project (produced in consultation with a three-member guidance committee) for a total of 36 units. Each of the core courses will comprise 10 weeks of in-class instruction twice per week for two-and-a-half hours per meeting. Classes will also include online discussion of related material and readings.

Each student will be assigned a three-member guidance committee consisting of two members of the teaching faculty and an additional qualified faculty member to advise the student in identifying a student project.

**Preparation.** Admission to the program requires a bachelor's degree with prior course work that includes (or is comparable to): one year of general chemistry, two quarters of organic chemistry, a course in statistics, one course in general physiology, and two quarters of the biochemistry of nutrition.

**Graduate Advisers.** Kathryn G. Dewey, Ph.D., Professor (*Nutrition*), Jane Heinig, Ph.D., Academic Administrator (*Nutrition*)

**Courses in Maternal and Child Nutrition.**  
See courses under *Nutrition*, on page 490.

## Mathematical and Physical Sciences

(College of Letters and Science)

Jesus De Loera, Ph.D., Program Director

**Program Office.** 118 Everson Hall

### Committee in Charge

Andreas J. Albrecht, Ph.D. (*Physics*)

Joel Hass, Ph.D. (*Mathematics*)

Jacquelyn Gervay-Hague, Ph.D. (*Chemistry*)

Hans-Georg Müller, Ph.D. (*Statistics*)

Howard J. Spero, Ph.D.  
(*Earth and Planetary Sciences*)

### The Program of Study

The Division of Mathematical and Physical Sciences teaches students to use experimental studies and the-

oretical analyses to find solutions to real world problems. Students learn to address issues such as cleaning up the environment, preserving natural resources and creating innovative materials for the future. From the study of atoms to the examination of distant galaxies, from abstract number theory to the development of new chemical compounds, the division provides students with the skills to build the world of tomorrow.

The program in Mathematical and Physical Sciences provides an organizational structure within the College of Letters and Science for facilitating the development of innovative curricular initiatives across the mathematical and physical sciences, including offering broadly conceived, integrative undergraduate and graduate-level courses. The program also may house resident faculty pursuing interdepartmental research and teaching in this area of inquiry.

## Courses in Mathematical and Physical Sciences (MPS)

### Lower Division

#### 1. General Science: Science in the News (4)

Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: lower division standing. Basic principles in science including numeracy, scale, energy, and time; the scientific method; good and bad science. Emphasis on science topics recently in the news. Offered irregularly. GE credit: SciEng.—F, W, S. (F, W, S.)

#### 11A. Mathematical and Physical Sciences Seminar (2)

Lecture—2 hours. Prerequisite: mentorship for undergraduate research participants in the physical and mathematical sciences. Research and writing in the mathematical and physical sciences. Presentations by various science faculty members. Offered irregularly.—F, W, S. (F, W, S.)

#### 11B. Mathematical and Physical Sciences Seminar (2)

Lecture—2 hours. Prerequisite: mentorship for undergraduate research participants in the physical and mathematical sciences. Research and writing in the mathematical and physical sciences. Presentations by various science faculty members. Offered irregularly.—F, W, S. (F, W, S.)

## Mathematics

Duane Kouba, Ph.D., Lecturer  
Lawrence Marx, Ph.D., Lecturer

### The Major Programs

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

**The Program.** Students majoring in mathematics may follow a program leading to either the Bachelor of Arts or the Bachelor of Science degree. After completing basic introductory courses such as calculus and linear algebra, students plan an upper division

program in consultation with a faculty adviser. The upper division course offering is grouped into entry level, core, and enrichment courses. Entry level courses are designed to serve as a bridge between the concrete mathematics of the lower division and the more abstract concepts taught in upper division courses. The core classes are intended to provide basic mathematical techniques, whereas the enrichment choices allow students to further mathematical knowledge and skills that feature their research or career interests. This individualized program can lead to graduate study in pure or applied mathematics, elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.

**Career Alternatives.** A degree in mathematics provides entry to many careers in addition to teaching. For instance, operations research, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

### A.B. Major Requirements:

Preparatory Subject Matter .....	UNITS
Mathematics 12 (or high school equivalent) .....	0-3
Mathematics 21A, 21B, 21C, 21D, 22B, 25 .....	23
One of the following two options: (a) Mathematics 22A and 108 OR (b) Mathematics 67 .....	4-7
Computer Science 30 or Engineering 6 .... 4 Mathematics 22AL or equivalent MATLAB knowledge .....	0-1
Additional non-Mathematics courses chosen from natural sciences .....	12
NOTE: Basic knowledge of MATLAB is required for both Mathematics 67 and 22A. Students can learn it on their own, enroll in Engineering 6, Mechanical Engineering 5 or in the one unit course Mathematics 22AL (can be taken concurrently).	
<b>Depth Subject Matter .....</b>	<b>37-42</b>
A. Entry Level (Optional) .....	0-4
Suggested choice; one course from: Mathematics 108, 114, 115A, 141, 145	
B. Core .....	16
Mathematics 125A..... 4 Mathematics 125B..... 4 Mathematics 135A..... 4 Mathematics 150A..... 4	
C. Choose one Plan from the following two; up to 4 of these 18 units may be approved upper division courses outside of the Department of Mathematics with extensive use of mathematics .....	18
Plan 1: General Mathematics Additional upper division mathematics units selected in consultation with and subject to approval of an adviser .....	18
Plan 2: Secondary Teaching Mathematics 111 .....	4
Mathematics 115A..... 4 Mathematics 141 .....	4
Additional upper division mathematics units selected in consultation with and subject to approval of an adviser .....	6
NOTE: Students who wish to satisfy the single subject matter waiver for the teaching credential should see an adviser as early as possible.	
D. Capstone Course: Mathematics 189 or 192 (Internship in Applied Mathematics or 194 (Undergraduate Thesis) or 180 (Special Topics) or an approved substitute in consultation with the Undergraduate Vice Chair.....	3-4

Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;

ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience

Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience

Quarter Offered: F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses

**Total Units for the Major ..... 80-92****Applied Mathematics****B.S. Major Requirements:**

UNITS

**Preparatory Subject Matter ..... 42-52**

Mathematics 12 (or high school equivalent).....	0-3
Mathematics 21A, 21B, 21C, 21D, 22B, 25 .....	23
One of the following two options: (a) Mathematics 22A and 108 OR (b) Mathematics 67 .....	4-7
Mathematics 22AL or equivalent basic knowledge of MATLAB .....	0-1
Computer Science 30, 40 .....	8
One two-quarter sequence from Physics 9A-9B; Biological Sciences 2A-2B; Chemistry 2A-2B; Economics 1A-1B; Statistics 32, 100; or other applied preparatory courses approved by your adviser .....	7-10

NOTE: Basic knowledge of MATLAB is required for both Mathematics 67 and 22A. Students can learn it on their own, enroll in Engineering 6, Mechanical Engineering 5 or in the one unit course Mathematics 22AL (can be taken concurrently).

**Depth Subject Matter ..... 51-56**

A. Entry Level (Optional) .....	0-4
Suggested choice; one course from: Mathematics 108, 114, 115A, 141, 145 .....	0-4
B. Core .....	32
Mathematics 150A.....	4
Mathematics 135A.....	4
Mathematics 125A.....	4
Mathematics 125B .....	4
Mathematics 119A.....	4
Mathematics 185A.....	4
Choose any two from the following: Mathematics 128A; 128B; 128C.....	8
C. Enrichment Courses .....	16
1. Choice of three courses from: Mathematics, between Mathematics 111 and Mathematics 185B (excluding Mathematics 180) worth at least four units each .....	12
2. One approved upper division course outside the Department of Mathematics with extensive use of mathematics .....	4
D. Capstone Course: Mathematics 189 or 192 (Internship in Applied Mathematics) or 194 (Undergraduate Thesis) or 180 (Special Topics) or an approved substitute in consultation with the Undergraduate Vice Chair .....	3-4

**Total Units for the Major ..... 86-98**

**Recommended Language Preparation.** Bachelor of Science degree candidates are advised, but not required, to satisfy the same language requirement as that for a Bachelor of Arts degree candidate, and to fulfill it in French, German, or Russian.

**Major Advisers.** For a current list of faculty and staff advisers, contact the Student Services office at [studentservices@math.ucdavis.edu](mailto:studentservices@math.ucdavis.edu), or see <https://www.math.ucdavis.edu/undergrad/advising/advisers/>.

**Depth Subject Matter Requirements.** Certain mathematically oriented courses given by other departments are admissible in partial satisfaction of the depth subject matter requirements with prior departmental approval. Up to three units of Mathematics 194 may be counted toward the depth subject matter requirements. Additionally, up to three units of Mathematics 198 or Mathematics 199, can be counted.

**Statement of Objectives.** As early as possible, but no later than the last quarter of the sophomore year or no later than the beginning of the first quarter of the junior year for transfer students, each prospective mathematics major, in consultation with a faculty adviser, should file a formal program of study in one of the majors offered in mathematics. Forms to be used for this are available on our website or from the Department office. Failure to file a formal program could lead to a delay in graduation.

**Information for Undergraduates.** Assistance in planning an undergraduate major program in mathematics is available on our website, as well as by consulting a faculty adviser. Information about the Department's faculty advisers can be found on our website.

**Mathematics Placement Requirement.** Students who wish to enroll in Mathematics 12, 16A, 17A, 21A, 21AH, and 36 must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see the Department of Mathematics' website, at [http://www.math.ucdavis.edu/undergrad/math\\_placement](http://www.math.ucdavis.edu/undergrad/math_placement), well in advance of enrolling.

**Department Honors.** Students who have completed at least 135 units with a minimum GPA of 3.500 in courses counted towards their major will be considered for Department Honors.

Students who meet the minimum GPA requirement for honors at graduation for the College of Letters and Science and who complete a senior project as part of Math 194 or 199 units in consultation with their faculty adviser may also be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students' academic achievements in their major and the quality of their senior project. For complete details, see our website at <http://www.math.ucdavis.edu>.

## Minor Program Requirements:

UNITS

<b>Mathematics.....</b>	<b>20</b>
Upper division units in mathematics; exclusive of Mathematics 192, 197TC, 198, 199.....	20

## Teaching Credential Subject Representative.

Ali Dad-del

**Graduate Study.** The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website, and by sending an email to [studentservices@math.ucdavis.edu](mailto:studentservices@math.ucdavis.edu).

## Courses in Mathematics (MAT)

### Lower Division

#### B. Elementary Algebra (no credit)

Lecture—3 hours. Not open to Concurrent student enrollment. Basic concepts of algebra, including polynomials, factoring, equations, graphs, and inequalities. Offered only if sufficient number of students enroll. (P/NP grading only.)—F. (F.)

#### C. Trigonometry (no credit)

Lecture—2 hours. Not open to Concurrent student enrollment. Basic concepts of trigonometry, including trigonometric functions, identities, inverse functions, and applications. Offered only if sufficient number of students enroll. (P/NP grading only.)—F. (F.)

#### D. Intermediate Algebra (no credit)

Lecture—3 hours. Not open to Concurrent student enrollment. Basic concepts of algebra, prepares students for college work in mathematics, such as course 16A or 21A. Functions, equations, graphs, logarithms, and systems of equations. Offered only if sufficient number of students enroll. (P/NP grading only.)—F. (F. W.)

#### 12. Precalculus (3)

Lecture—3 hours. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry; and obtaining required score on the Precalculus Diagnostic Examination. Topics selected for their use in calculus, including functions and their graphs, slope, zeroes of polynomials, exponential, logarithmic and trigonometric functions, sketching surfaces and solids. Not open for credit to students who have completed any of courses 16A, 16B, 16C, 17A, 17B, 17C, 21A, 21B, or 21C with a C- or better. GE credit: SciEng | QL, SE, SL.—F, W, S. (F, W, S.)

**Note:** Mathematics 16A, 16B, and 16C are intended for students who will take no more Mathematics courses. Mathematics 17A, 17B, and 17C have the same level of rigor as 16A, 16B, and 16C, yet are much more broad mathematically (containing algebra, differential equations and probability, besides traditional calculus), and are intended for biology.

#### 16A. Short Calculus (3)

Lecture—3 hours. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and satisfying the Mathematics Placement Requirement. Limits; differentiation of algebraic functions; analytic geometry; applications, in particular to maxima and minima problems. Not open for credit to students who have completed course 17B, 17C, 21A, 21B, or 21C. Only 2 units of credit to students who have completed course 17A. GE credit: SciEng | QL, SE, SL.—F, W, S. (F, W, S.)

#### 16B. Short Calculus (3)

Lecture—3 hours. Prerequisite: course 16A, 17A, or 21A. Integration; calculus for trigonometric, exponential, and logarithmic functions; applications. Not open for credit to students who have completed courses 17C, 21B, or 21C. Only 2 units of credit to students who have completed course 17B. GE credit: SciEng | QL, SE, SL.—F, W, S. (F, W, S.)

#### 16C. Short Calculus (3)

Lecture—3 hours. Prerequisite: course 16B, 17B, or 21B. Differential equations; partial derivatives; double integrals; applications; series. Not open for credit to students who have completed course 21C. Only 2 units of credit to students who have completed course 17C. GE credit: SciEng | QL, SE, SL.—F, W, S. (F, W, S.)

**Note:** Mathematics 16A, 16B, and 16C are intended for students who will take no more Mathematics courses. Mathematics 17A, 17B, and 17C have the same level of rigor as 16A, 16B, and 16C, yet are much more broad mathematically (containing algebra, differential equations and probability, besides traditional calculus), and are intended for biology students.

#### 17A. Calculus for Biology and Medicine (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfying the Mathematics Placement Requirement. Introduction to differential calculus via applications in biology and medicine. Limits, derivatives of polynomials, trigonometric, and exponential functions, graphing, applications of the derivative to biology and medicine. Not open for credit to students who have completed course 16B, 16C, 21A, 21B, or

21C; only 2 units of credit to students who have completed course 16A. GE credit: SciEng | QL, SE, SL.—F, W, S. (F, W, S.)

#### 17B. Calculus for Biology and Medicine (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 16A, 17A, or 21A. Introduction to integral calculus and elementary differential equations via applications to biology and medicine. Fundamental theorem of calculus, techniques of integration including integral tables and numerical methods, improper integrals, elementary first order differential equations, applications in biology and medicine. Not open for credit to students who have completed course 16C, 21B, or 21C. Only 2 units of credit for students who have completed course 16B. GE credit: SciEng | QL, SE, SL.—F, W, S. (F, W, S.)

#### 17C. Calculus for Biology and Medicine (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 17B with C- or above. Matrix algebra, functions of several variables, partial derivatives, systems of differential equations, and applications to biology and medicine. Not open for credit to students who have completed course 21C; only 2 units of credit to students who have completed course 16C. GE credit: SciEng | QL, SE, SL.—F, W, S. (F, W, S.)

#### 21A. Calculus (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and analytic geometry, and satisfying the Mathematics Placement Requirement. Functions, limits, continuity. Slope and derivative. Differentiation of algebraic and transcendental functions. Applications to motion, natural growth, graphing, extrema of a function. Differentials. L'Hopital's rule. Not open for credit to students who have completed course 16B, 16C, 17B, or 17C. Only 2 units of credit to students who have completed course 16A or 17A. GE credit: SciEng | QL, SE, SL.—F, W, S. (F, W, S.)

#### 21AH. Honors Calculus (4)

Lecture/discussion—4 hours. Prerequisite: a Precalculus Diagnostic Examination score significantly higher than the minimum for course 21A is required. More intensive treatment of material covered in course 21A. Offered irregularly. GE credit: SciEng | QL, SE.

#### 21AL. Emerging Scholars Program Calculus Workshop (2)

Workshop—6 hours. Prerequisite: concurrent enrollment in course 21A. Functions, limits, continuity. Slope and derivative. Same course content as course 21A. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) Offered irregularly. GE credit: SE.

#### 21B. Calculus (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 21A or 21AH. Continuation of course 21A. Definition of definite integral, fundamental theorem of calculus, techniques of integration. Application to area, volume, arc length, average of a function, improper integral, surface of revolution. Only 2 units of credit to students who have completed course 16B, 16C, 17B, or 17C. GE credit: SciEng | QL, SE, SL.—F, W, S. (F, W, S.)

#### 21BH. Honors Calculus (4)

Lecture/discussion—4 hours. Prerequisite: a grade of B or better in course 21A or 21AH. More intensive treatment of material covered in course 21B. Students completing 21BH can continue with course 21CH or the regular 21C. Offered irregularly. GE credit: SciEng | SE.

#### 21BL. Emerging Scholars Program Calculus Workshop (2)

Workshop—6 hours. Prerequisite: course 21A or 21AH; concurrent enrollment in 21B. Continuation of course 21A. Same course content as 21B. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. Offered irregularly. (P/NP grading only.) GE credit: SE.

**21C. Calculus (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 16C, 17C, 21B, or 21BH. Continuation of course 21B. Sequences, series, tests for convergence, Taylor expansions. Vector algebra, vector calculus, scalar and vector fields. Partial derivatives, total differentials. Applications to maximum and minimum problems in two or more variables. Applications to physical systems. GE credit: SciEng | QL, SE.—F, W, S. (F, W, S.)

**21CH. Honors Calculus (4)**

Lecture/discussion—4 hours. Prerequisite: a grade of B or better in course 21B or 21BH. More intensive treatment of material covered in course 21C. Offered infrequently. GE credit: SciEng | SE.

**21CL. Emerging Scholars Program Calculus Workshop (2)**

Workshop—6 hours. Prerequisite: concurrent enrollment in 21C. Continuation of course 21B. Same course content as course 21C. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) Offered irregularly. GE credit: SE.

**21D. Vector Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 21C or 21CH. Continuation of course 21C. Definite integrals over plane and solid regions in various coordinate systems. Line and surface integrals. Green's theorem, Stoke's theorem, divergence theorem. GE credit: SciEng | QL, SE.—F, W, S. (F, W, S.)

**21M. Accelerated Calculus (5)**

Lecture/discussion—4 hours; discussion/laboratory—1 hour. Prerequisite: grade of B or higher in both semesters of high school calculus or a score of 4 or higher on the Advanced Placement Calculus AB exam, and obtaining the required score on the Precalculus Diagnostic Examination and its trigonometric component. Accelerated treatment of material from courses 21A and 21B, with detailed presentation of theory, definitions, and proofs, and treatment of computational aspects of calculus at a condensed but sophisticated level. Not open for credit to students who have completed course 21A or 21B; only 3 units of credit will be allowed to students who have completed course 16A and only 2 units of credit will be allowed to students who have completed course 16B. Offered irregularly. GE credit: SciEng | SE.

**22A. Linear Algebra (3)**

Lecture—3 hours. Prerequisite: nine units of college mathematics and Engineering 6 or knowledge of Matlab or course 22AL (to be taken concurrently). Matrices and linear transformations, determinants, eigenvalues, eigenvectors, diagonalization, factorization. Not open for credit to students who have completed course 67. GE credit: SciEng | QL, SE.—F, W, S. (F, W, S.)

**22AL. Linear Algebra Computer Laboratory (1)**

Laboratory—2-3 hours. Prerequisite: nine units of college mathematics. Introduction to Matlab and its use in linear algebra. (P/NP grading only.) GE credit: QL, SE.—F, W, S. (F, W, S.)

**22B. Differential Equations (3)**

Lecture—3 hours. Prerequisite: course 22A or 67 with C- or above. Solutions of elementary differential equations. GE credit: SciEng | QL, SE.—F, W, S. (F, W, S.)

**25. Advanced Calculus (4)**

Lecture/discussion—4 hours. Prerequisite: course 21C or 21CH. Introduction to the rigorous treatment of abstract mathematical analysis. Proofs in mathematics, induction, sets, cardinality; real number system, theory of convergence of sequences. Not open for credit to students who have completed former course 127A. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**36. Fundamentals of Mathematics (3)**

Lecture—3 hours. Prerequisite: satisfaction of the Mathematics Placement Requirement. Introduction to fundamental mathematical ideas selected from the principal areas of modern mathematics. Properties of the primes, the fundamental theorems of arithmetic,

tic, properties of the rationals and irrationals, binary and other number systems. Not open for credit to students who have completed course 108. Offered irregularly. GE credit: SciEng.

**67. Modern Linear Algebra (4)**

Lecture/discussion—4 hours. Prerequisite: course 21A or consent of instructor. Rigorous treatment of linear algebra; topics include vector spaces, bases and dimensions, orthogonal projections, eigenvalues and eigenvectors, similarity transformations, singular value decomposition and positive definiteness. Only one unit of credit to students who have completed course 22A. GE credit: SciEng | SE.—F, W. (F, W.)

**71A. Explorations in Elementary Mathematics (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: two years of high school mathematics. Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration. (Deferred grading only, pending completion of sequence.) Offered irregularly.

**71B. Explorations in Elementary Mathematics (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: two years of high school mathematics. Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration. (Deferred grading only, pending completion of sequence.) Offered irregularly.

**89. Elementary Problem Solving (1)**

Lecture—1 hour. Prerequisite: high school mathematics through precalculus. Solve and present solutions to challenging and interesting problems in elementary mathematics. May be repeated one time for credit. (P/NP grading only.) Offered irregularly.

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

**Upper Division****108. Introduction to Abstract Mathematics (4)**

Lecture/discussion—4 hours. Prerequisite: course 21B. A rigorous treatment of mathematical concepts with emphasis on developing the ability to understand abstract mathematical ideas, to read and write mathematical concepts, and to prove theorems. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SciEng, Wrt | SE.—F, W, S. (F, W, S.)

**111. History of Mathematics (4)**

Lecture—3 hours; term paper or discussion. Prerequisite: eight units of upper division Mathematics; one of the following: course 25, 67, 108, 114, 115A, 141, or 145. History of mathematics from ancient times through the development of calculus. Mathematics from Arab, Hindu, Chinese and other cultures. Selected topics from the history of modern mathematics. GE credit: SciEng | SE.—W. (W.)

**114. Convex Geometry (4)**

Lecture/discussion—4 hours. Prerequisite: courses 21C, 22A or 67. Topics selected from the theory of convex bodies, convex functions, geometric inequalities, combinatorial geometry, and integral geometry. Designed to serve as preparation for the more rigorous upper-division courses. Offered in alternate years. GE credit: SciEng | SE.—(W.)

**115A. Number Theory (4)**

Lecture/discussion—4 hours. Prerequisite: course 21B. Divisibility and related topics, diophantine equations, selected topics from the theory of prime numbers. Designed to serve as preparation for the more rigorous upper division courses. GE credit: QL, SE.—F. (F.)

**115B. Number Theory (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 22A or 67; and 115A. Euler function, Moebius function, congruences, primitive roots, quadratic reciprocity law. Offered in alternate years. GE credit: SciEng | QL, SE, SL.—W.

**116. Differential Geometry (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 125A. Vector analysis, curves, and surfaces in three dimensions. Offered in alternate years. GE credit: SciEng | SE.—(S.)

**118A. Partial Differential Equations: Elementary Methods (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: courses 21D; 22B; 22A or 67. Derivation of partial differential equations; separation of variables; equilibrium solutions and Laplace's equation; Fourier series; method of characteristics for the one dimensional wave equation. Solution of nonhomogeneous equations. GE credit: SciEng | QL, SE.—F. (F.)

**118B. Partial Differential Equations: Eigenfunction Expansions (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 118A. Sturm-Liouville Theory; self-adjoint operators; mixed boundary conditions; partial differential equations in two and three dimensions; Eigenvalue problems in circular domains; nonhomogeneous problems and the method of eigenfunction expansions; Poisson's Equations. GE credit: SciEng | QL, SE.—W. (W.)

**118C. Partial Differential Equations: Green's Functions and Transforms (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 118B. Green's functions for one-dimensional problems and Poisson's equation; Fourier transforms; Green's Functions for time dependent problems; Laplace transform and solution of partial differential equations. Offered irregularly. GE credit: SciEng | QL, SE.

**119A. Ordinary Differential Equations (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: courses 21D; 22B; 22A or 67. Scalar and planar autonomous systems; nonlinear systems and linearization; existence and uniqueness of solutions; matrix solution of linear systems; phase plane analysis; stability analysis; bifurcation theory; Liapunov's method; limit cycles; Poincaré-Bendixson theory. GE credit: SciEng | QL, SE.—W. (W.)

**119B. Ordinary Differential Equations (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 119A. Lorentz equations; Poincaré maps; center manifolds and normal forms; scalar and planar maps; phase space analysis for iterated maps; period-doubling bifurcation; Lyapunov exponent; chaos and symbolic dynamics; strange attractors; fractals. GE credit: SciEng | QL, SE.—S. (S.)

**124. Mathematical Biology (4)**

Lecture—3 hours; project. Prerequisite: courses 22A or 67; 22B. Methods of mathematical modeling of biological systems including difference equations, ordinary differential equations, stochastic and dynamic programming models. Computer simulation methods applied to biological systems. Applications to population growth, cell biology, physiology, evolutionary ecology and protein clustering. MATLAB programming required. Offered in alternate years. GE credit: SciEng | QL, SE.—(S.)

**125A. Real Analysis (4)**

Lecture/discussion—4 hours. Prerequisite: course 25. Functions, limits of functions, continuity and uniform continuity, sequences of functions, series of real numbers, series of functions, power series. Not open for credit to students who have completed former course 127B. GE credit: SciEng | SE.—F, W, S. (F, S, W.)

**125B. Real Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 22A or 67; 125A. Theory of the derivative, Taylor series, integration, partial derivatives, Implicit Function Theorem. Not open for credit to students who have completed former course 127C. GE credit: SciEng | SE.—W, S. (W, S.)

**128A. Numerical Analysis (4)**

Lecture—3 hours; project. Prerequisite: course 21C; Computer Science Engineering 30. Error analysis, approximation, interpolation, numerical differentiation and integration. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: SciEng | QL, SE.—F. (F.)

**128B. Numerical Analysis in Solution of Equations (4)**

Lecture—3 hours; project. Prerequisite: course 21C; 22A or 67; and Computer Science Engineering 30. Solution of nonlinear equations and nonlinear systems. Minimization of functions of several variables. Simultaneous linear equations. Eigenvalue problems. Linear programming. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: SciEng | QL, SE.—W. (W.)

**128C. Numerical Analysis in Differential Equations (4)**

Lecture—3 hours; project. Prerequisite: course 22A or 67; 22B; and Computer Science Engineering 30. Difference equations, operators, numerical solutions of ordinary and partial differential equations. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: SciEng | QL, SE.—S. (S.)

**129. Fourier Analysis (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 21D; 22A or 67; 22B; and 25. Fourier series and integrals, orthogonal sets of functions. Topics selected from trigonometric approximation, orthogonal polynomials, applications to signal and image processing, numerical analysis, and differential equations. GE credit: SciEng | QL, SE.—F. (F.)

**133. Mathematical Finance (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 67 or both 22A and 108; and 135A. Analysis and evaluation of deterministic and random cash flow streams, yield and pricing of basic financial instruments, interest rate theory, meanvariance portfolio theory, capital asset pricing models, utility functions and general principles. MATLAB programming required. Offered in alternate years. GE credit: SciEng | QL, SE, SL.—S.

**135A. Probability (4)**

Lecture/discussion—4 hours. Prerequisite: course 125A. Probability space; discrete probability, combinatorial analysis; independence, conditional probability; random variables, discrete and continuous distributions, probability mass function, joint and marginal density functions; expectation, moments, variance, Chebyshev inequality; sums of random variables, random walk, large number law, central limit theorem. Not open for credit to students who have completed former course 131. GE credit: SciEng | QL, SE.—F, W. (F, W.)

**135B. Stochastic Processes (4)**

Laboratory/discussion—4 hours. Prerequisite: courses 135A; 22A or 67. Generating functions, branching processes, characteristic function; Markov chains; convergence of random variables, law of iterated logarithm; random processes, Brownian motion, stationary processes, renewal processes, queueing theory, martingales. Not open for credit to students who have completed former course 132A. GE credit: SciEng | QL, SE.—S. (S.)

**141. Euclidean Geometry (4)**

Lecture/discussion—4 hours. Prerequisite: courses 21B; 22A or 67. An axiomatic and analytic examination of Euclidean geometry from an advanced point of view. In particular, a discussion of its relation to other geometries. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SciEng | SE, VL.—W, S. (W, S.)

**145. Combinatorics (4)**

Lecture/discussion—4 hours. Prerequisite: course 21C. Combinatorial methods using basic graph theory, counting methods, generating functions, and recurrence relations. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SciEng | QL, SE.—W, S. (W, S.)

**146. Algebraic Combinatorics (4)**

Lecture/discussion—4 hours. Prerequisite: courses 25; 22A or 67; 145. Enumeration, Polya theory, generating functions, current topics in algebraic combinatorics. Not open for credit to students who have completed former course 149A. GE credit: SciEng | SE.—S. (S.)

**147. Topology (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 25. Basic notions of point-set and combinatorial topology. GE credit: SciEng | SE.—F. (F.)

**148. Discrete Mathematics (4)**

Lecture/discussion—4 hours. Prerequisite: course 67; or 22A and 108. Coding theory, error correcting codes, finite fields and the algebraic concepts needed in their development. Not open for credit to students who have completed former course 149B. GE credit: SciEng | QL, SE.—W (W.)

**150A. Modern Algebra (4)**

Lecture/discussion—4 hours. Prerequisite: course 67; or 22A and 108. Basic concepts of groups, symmetries of the plane. Emphasis on the techniques used in the proof of the ideas (Lemmas, Theorems, etc.) developing these concepts. Precise thinking, proof writing, and the ability to deal with abstraction. GE credit: SciEng | SE.—F. (F.)

**150B. Modern Algebra (4)**

Lecture/discussion—4 hours. Prerequisite: course 150A. Bilinear forms, rings, factorization, modules. GE credit: SciEng | SE.—W. (W.)

**150C. Modern Algebra (4)**

Lecture/discussion—4 hours. Prerequisite: course 150B. Group representations, fields, Galois theory. GE credit: SciEng | SE.—S. (S.)

**160. Mathematical Foundations of Database Theory, Design and Performance (4)**

Lecture—3 hours; project. Prerequisite: course 22A or 67; one of the following courses: 25, 108, 114, 115A, 141, or 145. Relational model; relational algebra, relational calculus, normal forms, functional and multivalued dependencies. Separability. Cost benefit analysis of physical database design and reorganization. Performance via analytical modeling, simulation, and queueing theory. Block accesses; buffering; operating system contention; CPU intensive operations. Offered irregularly. GE credit: SciEng | QL, SE.—S. (S.)

**165. Mathematics and Computers (4)**

Lecture—3 hours; project. Prerequisite: course 22A or 67; and one of the following: 25, 108, 114, 115A, or 145. Introduction to computational mathematics, symbolic computation, and computer generated/verified proofs in algebra, analysis and geometry. Investigation of rigorous new mathematics developed in conjunction with modern computational questions and the role that computers play in mathematical conjecture and experimentation. GE credit: SciEng | QL, SE.—F. (F.)

**167. Applied Linear Algebra (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 22A or 67. Applications of linear algebra; LU and QR matrix factorizations, eigenvalue and singular value matrix decompositions. GE credit: SciEng | QL, SE.—F, S. (F, S.)

**168. Optimization (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 67 or both 22A and 108; and 21C. Linear programming, simplex method. Basic properties of unconstrained nonlinear problems, descent methods, conjugate direction method. Constrained minimization. Programming language required. GE credit: SciEng | QL, SE.—S. (S.)

**180. Special Topics (3)**

Lecture—3 hours. Prerequisite: course 67 or both 22A and 108; and 25. Special topics from various fields of modern, pure, and applied mathematics. Some recent topics include Knot Theory, General Relativity, and Fuzzy Sets. May be repeated for credit when topic differs. Offered irregularly. GE credit: SciEng | SE.—F, W, S. (F, W, S.)

**185A. Complex Analysis (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 67 or both 22A and 108; and 125A. Complex number system, analyticity and the Cauchy-Riemann equations, elementary functions, complex integration, power and Laurent series expansions, residue theory. GE credit: SciEng | SE.—W. (W.)

**185B. Complex Analysis (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 185A. Analytical functions, elementary functions and their mapping properties, applications of Cauchy's integral theorem, conformal mapping and applications to heat flow and fluid mechanics. Offered in alternate years. GE credit: SciEng | SE.—S.

**189. Advanced Problem Solving (3)**

Lecture—3 hours. Prerequisite: course 67 or both 22A and 108; and 25. Solution and presentation of advanced problem solving techniques. Solve and present interesting and challenging problems of all areas of mathematics. GE credit: SciEng, Wrt | OL, QL, SE, WE.—S. (S.)

**192. Internship in Applied Mathematics (1-3)**

Internship. Prerequisite: consent of instructor. Supervised work experience in applied mathematics. Final report. May be repeated for credit for a total of 10 units. (P/NP grading only.)—F, W, S. (F, W, S.)

**194. Undergraduate Thesis (3)**

Independent study. Prerequisite: consent of instructor. Independent research under supervision of a faculty member. Student will submit written report in thesis form. May be repeated with consent of Vice Chairperson. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**197TC. Tutoring Mathematics in the Community (1-5)**

Seminar—1-2 hours; laboratory—2-6 hours. Prerequisite: consent of instructor. Special projects in mathematical education developing techniques for mathematics instruction and tutoring on an individual or small group basis. May be repeated one time for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**Graduate****200A. Problem-Solving in Analysis (1)**

Lecture—1 hour; extensive problem solving. Prerequisite: courses 201ABC. Problem-solving in graduate analysis: continuous functions, metric spaces, Banach and Hilbert spaces, bounded linear operators, the spectral theorem, distributions, Fourier series and transforms, Lp spaces, Sobolev spaces. May be repeated two times for credit. (Deferred grading only, pending completion of sequence.)—S. (S.)

**200B. Problem-Solving in Analysis (1)**

Lecture—1 hour; extensive problem solving. Prerequisite: courses 201ABC. Problem-solving in graduate analysis: continuous functions, metric spaces, Banach and Hilbert spaces, bounded linear operators, the spectral theorem, distributions, Fourier series and transforms, Lp spaces, Sobolev spaces. May be repeated two times for credit. (Deferred grading only, pending completion of sequence.)—F. (F.)

**201A. Analysis (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing in Mathematics or Applied Mathematics, or consent of instructor. Metric and normed spaces. Continuous functions. Topological, Hilbert, and Banach spaces. Fourier series. Spectrum of bounded and compact linear operators. Linear differential operators and Green's functions. Distributions. Fourier transform. Measure theory. Lp and Sobolev spaces. Differential calculus and variational methods.—F. (F.)

**201B. Analysis (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing in Mathematics or Applied Mathematics, or consent of instructor. Metric and normed spaces. Continuous functions. Topological, Hilbert, and Banach spaces. Fourier series. Spectrum of bounded and compact linear operators. Linear differential operators and Green's functions. Distributions. Fourier transform. Measure theory. Lp and Sobolev spaces. Differential calculus and variational methods. —W. (W.)

**201C. Analysis (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing in Mathematics or Applied Mathematics, or consent of instructor. Metric and normed spaces. Continuous functions. Topological, Hilbert, and Banach spaces. Fourier series. Spectrum of bounded and compact linear operators. Linear differential operators and Green's functions. Distributions. Fourier transform. Measure theory. Lp and Sobolev spaces. Differential calculus and variational methods. —S. (S.)

**202. Functional Analysis (4)**

Lecture—3 hours; term paper. Prerequisite: courses 201A and 201B. Hahn-Banach, Open mapping, Closed graph, Banach-Steinhaus, and Krein-Milman. Subspaces and quotient spaces. Projections. Weak and weak-star topologies. Compact and adjoint operators in Banach spaces. Fredholm theory. Functions of operators. Spectral theory of self-adjoint operators. Offered in alternate years. —W.

**205. Complex Analysis (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 185 or the equivalent, or consent of instructor. Analytic continuation, Riemann surfaces, conformal mappings, Riemann mapping theorem, entire functions, special functions, elliptic functions.

**205A. Complex Analysis (4)**

Lecture—3 hours; term paper or discussion—1 hour. Cauchy's theorem, Cauchy's integral formulas, meromorphic functions, complex logarithm, entire functions, Weierstrass infinite product formula, the gamma and zeta functions, and prime number theorem. —W. (W.)

**205B. Complex Analysis (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 205A or consent of instructor. Conformal mappings, the Schwarz lemma, analytic automorphisms, the Riemann mapping theorem, elliptic functions, Eisenstein series, the Jacobi theta functions, asymptotics, Bessel functions, the Airy function, topics on special functions and Riemann surfaces. May be repeated two times for credit if topic varies.—S. (S.)

**206. Measure Theory (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 125B. Introduction to measure theory. The study of lengths, surface areas, and volumes in general spaces, as related to integration theory. Offered in alternate years.—S.

**207A. Methods of Applied Mathematics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Ordinary differential equations and dynamical systems. Variational principles. Eigenfunctions, integral equations and Green's functions. Complex analysis and contour integration. Laplace's equation. Diffusion equations. Wave phenomena. Dimensional analysis and scaling. Asymptotic expansions and perturbation theory. Stochastic processes and Brownian motion. —F. (F.)

**207B. Methods of Applied Mathematics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Ordinary differential equations and dynamical systems. Variational principles. Eigenfunctions, integral equations and Green's functions. Complex analysis and contour integration. Laplace's equation. Diffusion equations. Wave phenomena. Dimensional analysis and scaling. Asymptotic expansions and perturbation theory. Stochastic processes and Brownian motion. —W. (W.)

**207C. Methods of Applied Mathematics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Ordinary differential equations and dynamical systems. Variational principles. Eigenfunctions, integral equations and Green's functions. Complex analysis and contour integration. Laplace's equation. Diffusion equations. Wave phenomena. Dimensional analysis and scaling. Asymptotic expansions and perturbation theory. Stochastic processes and Brownian motion. —S. (S.)

**215A. Topology (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Offered in alternate years.—F.

**215B. Topology (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Offered in alternate years.—W.

**215C. Topology (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Offered in alternate years.—S.

**216. Geometric Topology (4)**

Lecture—3 hours; extensive problem solving—1 hour. Prerequisite: course 215A. Introduction to measure theory. Topology of two- and three-dimensional manifolds. Surfaces and their diffeomorphisms. Dehn twists. Heegaard surfaces. Theory of 3-dimensional manifolds. Knots and knot theory. Hyperbolic manifolds and geometric structures. May be repeated one time for credit. Offered in alternate years.—(S.)

**218A. Partial Differential Equations (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 201ABC or consent of instructor. A year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Offered in alternate years.—(F.)

**218B. Partial Differential Equations (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 218A or consent of instructor. A year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Offered in alternate years.—(W.)

**218C. Partial Differential Equations (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 218B or consent of instructor. A year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Offered in alternate years.—(S.)

**221A. Mathematical Fluid Dynamics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 118B or consent of instructor. Kinematics and dynamics of fluids. The Euler and Navier-Stokes equations. Vorticity dynamics. Irrotational flow. Low Reynolds number flows and the Stokes equations. High Reynolds number flows and boundary layers. Compressible fluids. Shock waves. Offered in alternate years.—(F.)

**221B. Mathematical Fluid Dynamics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 118B or consent of instructor. Kinematics and dynamics of fluids. The Euler and Navier-Stokes equations. Vorticity dynamics. Irrotational flow. Low Reynolds number flows and the Stokes equations. High Reynolds number flows and boundary layers. Compressible fluids. Shock waves. Offered irregularly.—(W.)

**226A. Numerical Methods: Fundamentals (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 128AB or equivalent, or consent of instructor; familiarity with some programming language. Fundamental principles and methods in numerical analysis, including the concepts of stability of algorithms and conditioning of numerical problems, numerical methods for interpolation and integration, eigenvalue problems, singular value decomposition and its applications. Offered in alternate years.—(F.)

**226B. Numerical Methods: Large-Scale Matrix Computations (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 167 or equivalent, or consent of instructor; familiarity with some programming language. Numerical methods for large-scale matrix computations, including direct and iterative methods for the solution of linear systems, the computation of eigenvalues and singular values, the solution of least-squares problems, matrix compression, methods for the solution of linear programs. Offered in alternate years.—(W.)

**226C. Numerical Methods: Ordinary Differential Equations (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 22B or equivalent, or consent of instructor; familiarity with some programming language. Numerical methods for the solution of ordinary differential equations, including methods for initial-value problems and two-point boundary-value problems, theory of and methods for differential algebraic equations, dimension reduction of large-scale dynamical systems. Offered in alternate years.—(S.)

**227. Mathematical Biology (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Nonlinear ordinary and partial differential equations and stochastic processes of cell and molecular biology. Scaling, qualitative, and numerical analysis of mathematical models. Applications to nerve impulse, chemotaxis, muscle contraction, and morphogenesis. Offered in alternate years.—F.

**228A. Numerical Solution of Differential Equations (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 128C. Numerical solutions of initial-value, eigenvalue and boundary-value problems for ordinary differential equations. Numerical solution of parabolic and hyperbolic partial differential equations. Offered in alternate years.—F.

**228B. Numerical Solution of Differential Equations (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 128C. Numerical solutions of initial-value, eigenvalue and boundary-value problems for ordinary differential equations. Numerical solution of parabolic and hyperbolic partial differential equations. Offered in alternate years.—W.

**228C. Numerical Solution of Differential Equations (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 128C. Numerical solutions of initial-value, eigenvalue and boundary-value problems for ordinary differential equations. Numerical solution of parabolic and hyperbolic partial differential equations. Offered in alternate years.—S.

**235A. Probability Theory (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: courses 125B and 135A or Statistics 131A or consent of instructor. Measure-theoretic foundations, abstract integration, independence,

laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from martingales, Markov chains, ergodic theory. (Same course as Statistics 235A.)—F. (F.)

### **235B. Probability Theory (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 235A/Statistics 235A or consent of instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from martingales, Markov chains, ergodic theory. (Same course as Statistics 235B.)—W. (W.)

### **235C. Probability Theory (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 235B/Statistics 235B or consent of instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from martingales, Markov chains, ergodic theory. (Same course as Statistics 235C.)—S. (S.)

### **236A. Stochastic Dynamics and Applications (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 201C or course/Statistics 235B; course/Statistics 235A-235B-235C recommended. Stochastic processes, Brownian motion, Stochastic integration, martingales, stochastic differential equations. Diffusions, connections with partial differential equations, mathematical finance. Offered in alternate years.—F.

### **236B. Stochastic Dynamics and Applications (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 201C or course/Statistics 235B; course/Statistics 235A-235B-235C recommended. Stochastic processes, Brownian motion, Stochastic integration, martingales, stochastic differential equations. Diffusions, connections with partial differential equations, mathematical finance. Offered irregularly.—S. (S.)

### **239. Differential Topology (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: vector calculus, point-set topology, course 201A, or consent of instructor; course 250AB highly recommended. Topics include: differentiable manifolds, vector fields, transversality, Sard's theorem, examples of differentiable manifolds; orientation, intersection theory, index of vector fields; differential forms, integration, Stokes' theorem, deRham cohomology; Morse functions, Morse lemma, index of critical points.—F. (F.)

### **240A. Differential Geometry (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 201A and 239; 250AB highly recommended; intended primarily for 2nd-year graduate students. Riemannian metrics, connections, geodesics, Gauss lemma, convex neighborhoods, curvature tensor, Ricci and scalar curvature, connections and curvature on vector bundles.—W. (W.)

### **240B. Differential Geometry (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 240A; intended primarily for 2nd-year graduate students. Jacobi fields, conjugate points, completeness, Hopf-Rinow theorem, Cartan-Hadamard theorem, energy, variation theorems and their applications, Rauch comparison theorem and its applications.—S. (S.)

### **245. Enumerative Combinatorics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 145, 150 or the equivalent, or consent of instructor. Introduction to modern combinatorics and its applications. Emphasis on enumerative aspects of combinatorial theory. Offered in alternate years.—F.

### **246. Algebraic Combinatorics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 245 or consent of instructor. Algebraic and geometric aspects of combinatorics. The use of structures such as groups, polytopes, rings, and simplicial complexes to solve combinatorial problems. Offered in alternate years—W.

### **248A. Algebraic Geometry (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: courses 250ABC. Affine varieties and radical ideals. Projective varieties. Abstract varieties. Morphisms and rational maps. Smoothness. Algebraic curves and the Riemann-Roch theorem. Special topics. Offered in alternate years.—(F.)

### **248B. Algebraic Geometry (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 248A. Complex varieties and the analytic topology. Sheaves and schemes. Fiber products. Separatedness and properness. Applications of scheme theory. Offered in alternate years.—(W.)

### **249A. Problem-Solving in Algebra (1)**

Lecture—1 hour; extensive problem solving. Prerequisite: courses 250A & B. Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated two times for credit. (Deferred grading only, pending completion of sequence.)—S. (S.)

### **249B. Problem-Solving in Algebra (2)**

Lecture—1 hour; extensive problem solving. Prerequisite: courses 250A & B. Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated two times for credit. (Deferred grading only, pending completion of sequence.)—F. (F.)

### **250A. Algebra (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing in mathematics or consent of instructor. Group and rings. Sylow theorems, abelian groups, Jordan-Hölder theorem. Rings, unique factorization. Algebras, and modules. Fields and vector spaces over fields. Field extensions. Commutative rings. Representation theory and its applications.—F. (F.)

### **250B. Algebra (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing in mathematics or consent of instructor. Group and rings. Sylow theorems, abelian groups, Jordan-Hölder theorem. Rings, unique factorization. Algebras, and modules. Fields and vector spaces over fields. Field extensions. Commutative rings. Representation theory and its applications.—W. (W.)

### **250C. Algebra (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing in mathematics or consent of instructor. Group and rings. Sylow theorems, abelian groups, Jordan-Hölder theorem. Rings, unique factorization. Algebras, and modules. Fields and vector spaces over fields. Field extensions. Commutative rings. Representation theory and its applications.—S. (S.)

### **258A. Numerical Optimization (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: courses 25, 167. Numerical methods for infinite dimensional optimization problems. Newton and Quasi-Newton methods, linear and sequential quadratic programming, barrier methods; large-scale optimization; theory of approximations; infinite and semi-infinite programming; applications to optimal control, stochastic optimization and distributed systems. Offered in alternate years.—(F.)

### **258B. Discrete and Mixed-Integer Optimization (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 25 and 167, or consent of the instructor. Combinatorial, integer, and mixed-inte-

ger linear optimization problems. Ideal and strong formulations, cutting planes, branch and cut, decomposition methods. Offered in alternate years.—W.

### **261A. Lie Groups and Their Representations (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: courses 215A, 240A, 250A-250B or the equivalent or consent of instructor. Lie groups and Lie algebras. Classification of semi-simple Lie groups. Classical and compact Lie groups. Representations of Lie groups and Lie algebras. Root systems, weights, Weil character formula. Kac-Moody and Virasoro algebras. Applications. Offered in alternate years.—(W.)

### **261B. Lie Groups and Their Representations (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: courses 215A, 240A, 250A-250B or the equivalent or consent of instructor. Lie groups and Lie algebras. Classification of semi-simple Lie groups. Classical and compact Lie groups. Representations of Lie groups and Lie algebras. Root systems, weights, Weil character formula. Kac-Moody and Virasoro algebras. Applications. Offered irregularly.

### **265. Mathematical Quantum Mechanics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 201 or consent of instructor. Mathematical foundations of quantum mechanics: the Hilbert space and Operator Algebra formulations; the Schrödinger and Heisenberg equations, symmetry in quantum mechanics, basics of spectral theory and perturbation theory. Applications to atoms and molecules. The Dirac equation. Offered in alternate years.—(F.)

### **266. Mathematical Statistical Mechanics and Quantum Field Theory (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 265 or consent of instructor. Mathematical principles of statistical mechanics and quantum field theory. Topics include classical and quantum lattice systems, variational principles, spontaneous symmetry breaking and phase transitions, second quantization and Fock space, and fundamentals of quantum field theory. May be repeated one time for credit. Offered in alternate years.—(W.)

### **271. Applied and Computational Harmonic Analysis (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: courses 125B or 201C; and 128B or 167; and 129 or equivalent, or consent of instructor. Introduction to mathematical basic building blocks (wavelets, local Fourier basis, and their relatives) useful for diverse fields (signal and image processing, numerical analysis, and statistics). Emphasis on the connection between the continuum and the discrete worlds. Offered in alternate years.—(W.)

### **280. Topics in Pure and Applied Mathematics (3)**

Lecture—3 hours. Prerequisite: graduate standing. Special topics in various fields of pure and applied mathematics. Topics selected based on the mutual interests of students and faculty. May be repeated for credit when topic differs.—F, W, S. (F, W, S.)

### **290. Seminar (1-6)**

Seminar—1-6 hours. Advanced study in various fields of mathematics, including analysis, applied mathematics, discrete mathematics, geometry, mathematical biology, mathematical physics, optimization, partial differential equations, probability, and topology. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **298. Group Study (1-5)**

F, W, S. (F, W, S.)

### **299. Individual Study (1-12)**

(S/U grading only.)—F, W, S. (F, W, S.)

### **299D. Dissertation Research (1-12)**

(S/U grading only.)—F, W, S. (F, W, S.)

**Professional****301A. Mathematics Teaching Practicum (3)**

Fieldwork—5 hours; discussion—1 hour. Prerequisite: course 302A and 303A required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated one time for credit. Offered irregularly.

**301B. Mathematics Teaching Practicum (3)**

Fieldwork—5 hours; discussion—1 hour. Prerequisite: course 302B and 303B required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated one time for credit. Offered irregularly.

**301C. Mathematics Teaching Practicum (3)**

Fieldwork—5 hours; discussion—1 hour. Prerequisite: course 302C and 303C required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated one time for credit. Offered irregularly.

**302A. Curriculum Development in Mathematics (1)**

Lecture/discussion—1 hour. Prerequisite: course 303A required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated one time for credit. Offered irregularly.

**302B. Curriculum Development in Mathematics (1)**

Lecture/discussion—1 hour. Prerequisite: course 303B required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated one time for credit. Offered irregularly.

**302C. Curriculum Development in Mathematics (1)**

Lecture/discussion—1 hour. Prerequisite: course 303C required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated one time for credit. Offered irregularly.

**303A. Mathematics Pedagogy (1)**

Lecture/discussion—1 hour. Prerequisite: course 302A or 210AL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated one time for credit. Offered irregularly.

**303B. Mathematics Pedagogy (1)**

Lecture/discussion—1 hour. Prerequisite: course 302B or 210BL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated one time for credit. Offered irregularly.

**303C. Mathematics Pedagogy (1)**

Lecture/discussion—1 hour. Prerequisite: course 302C or 210CL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods

in view of some of the influences that shaped their development. May be repeated one time for credit. Offered irregularly.

**390. Teaching Assistantship Training (3)**

Lecture—3 hours. Prerequisite: graduate standing in the Department of Mathematics. Experience in methods of assisting and teaching of mathematics at the university level. Includes discussion of lecturing techniques, running discussion sessions, holding office hours, preparing and grading of examinations, student-teacher interaction, and related topics. Required of departmental teaching assistants. (S/U grading only.)—F. (F.)

**399. Individual Study (2-4)**

Independent study—2-3 hours; discussion—1 hour. Individual study of some aspect of mathematics education or a focused work on a curriculum design project under supervision of a faculty member in mathematics. May be repeated one time for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**Courses in the School of Medicine****Curriculum for the School of Medicine**

The curriculum for the M.D. degree at the UC Davis School of Medicine is a four-year program providing comprehensive preparation for graduate medical training (internships and residencies) and the practice of medicine. It offers a blend of basic science training and clinical experience with opportunities for research.

The first-year curriculum begins in August and extends into May and is organized into two blocks, Foundations and Mechanisms & Diseases. The basic science portion of the Foundations block includes courses in Molecular Biology, Cell and Tissue Biology, Gross Anatomy/Embryology/Radiology, and Human Physiology. The major organizing theme is structure-function along the continuum of hierarchical biologic structure from molecule to cell, tissue and major organ systems. The three year Doctoring curriculum begins with Doctoring 1, which is presented concurrently with the other courses. The focus of Doctoring 1 is physical examination training using standardized patients and models, correlated with concurrent gross anatomy and physiology by organ system. Behavioral medicine, epidemiology, biostatistics, cross-cultural medicine, and ethics are woven into the cases and didactic presentations and team-based learning modules. Students are required to attend preceptorships in the community and participate in home visits. Periodic quizzes and review sessions are used in the basic science courses throughout the block for formative assessment, and all courses administer comprehensive summative final examinations in December.

The Mechanisms & Disease block of the first-year curriculum begins in January and extends through April, with final exams in early May. There are two major threads, each of which is composed of several integrated courses. The Doctoring 1 course is offered concurrently. The Immunology/Microbiology/Pharmacology/Pathology thread presents an introduction to host defense, infection, basic pharmacologic principles, and general pathologic processes. The Endocrinology/Nutrition/Reproduction/Genetics (ENRG) thread covers essential concepts in genetics, basic and clinical nutrition, reproductive medicine, and clinical endocrinology. The general pathology course also includes male-female GU and endocrine pathology, and the pharmacology course covers antibiotics and endocrine pharmacology, with the goal of integration with concurrent courses. Periodic quizzes and review sessions provide formative feedback, and final examinations are used for summative assessment. The Doctoring 1 course continues with an emphasis on interviewing skills and clinical assessment. Cases are used in the problem-based learning approach for basic-science-clinical correlation, and for the exploration of psychosocial issues.

Preceptorships and home visits continue. The Doctoring 1 course concludes with a comprehensive final examination, and also includes an observed complete history and physical examination.

The first-year curriculum ends with a five week unscheduled block that may be used for vacation, remediation, electives, research, and international experiences.

The second-year curriculum is composed of two blocks- Brain & Behavior and Pathophysiology. Brain & Behavior begins in late June and extends through August with a neurosciences block composed of integrated neuroanatomy-clinical neurosciences. The latter emphasizes the pathophysiology of common neurological disorders. The systemic pathology curriculum continues with a focus on neuropathology, and the pharmacology course covers neuropharmacology. A clinical psychiatry course is also presented during this period. The Doctoring 2 course begins, focusing on advanced clinical skills and clinical reasoning using a combination of standardized patient assessments, problem-based learning, subspecialty physical examination sessions, preceptorships, and didactics in clinical epidemiology, medical economics, and socio-behavioral medicine. The Pathophysiology Block is devoted to compressed pathophysiology courses with tight integration of the systemic pathology and pharmacology courses. The courses are organized according to organ system (cardiovascular, pulmonary, renal, musculoskeletal system, hematology, gastroenterology, oncology, and dermatology). The Doctoring 2 curriculum continues concurrently with its focus on advanced clinical skills, epidemiology, ethics, and problem based assessment. History taking and physical diagnosis skills are correlated with the ongoing pathophysiology courses. Like the first year, all of the second year courses utilize periodic quizzes and review sessions and a comprehensive final examination. The Doctoring 2 course includes an objective structured clinical examination (OSCE) using standardized patients at the end of the course series.

The second-year curriculum ends in February and is followed by a six week, unscheduled block for preparation for USMLE Step 1, remediation, electives, and vacation.

The third-year program begins in April and includes six required clerkship rotations in the clinical specialties. Clerkships in surgery, internal medicine, obstetrics & gynecology, pediatrics, and psychiatry run for 8 weeks each. A four week family medicine clerkship and a four week selective are also required. In addition to the core clerkships, students will participate in a longitudinal primary care clinic throughout the third year. The third-year Doctoring program consists of longitudinal small groups led by faculty members who remain with their group throughout the year as the students rotate through their clerkships. Doctoring 3 themes include advanced interviewing techniques, clinical reasoning, clinical epidemiology, evidence-based medicine, and ethics/jurisprudence. Students must take a comprehensive clinical skills examination at the end of the third year which features self-assessment and faculty feedback.

The fourth-year curriculum features built-in flexibility to allow students to individualize their medical careers. The early start to the fourth year in May allows students to pursue electives for early exposure to clinical specialties or to complete clerkships which may have been deferred. All students are required to select a minimum of 32 weeks of clinical electives in addition to a single four-week special study module or scholarly project. The Special Study modules are designed to integrate basic sciences with clinical sciences, provide opportunities for students to practice and refine fundamental skills in critical appraisal and analysis of emerging scientific developments, and to allow students to focus in-depth on a multidisciplinary topic of special interest to the student. The Scholarly Project requires independent inquiry with faculty mentorship and leads to a publishable manuscript and student presentation of the project at a research forum held in the winter.

Individual student programs are designed under the guidance of college directors, mentors and faculty advisers, with the support of the Career Advising Office. Each student's fourth-year program must be approved by the Fourth Year Oversight Committee to ensure appropriate breadth, depth, and vigor. There are strict guidelines for the choices and time allowed away from the home institution. To satisfy the M.D. degree program, the student must successfully complete the required course work, clerkships, and fourth year requirements. Students must pass USMLE Step 1, USMLE Step 2 CS and CK, and complete the fourth year clinical performance examination. In addition to the fourth-year elective program available, there is the opportunity for students to select from a variety of electives during the first two years. Examples include electives in history of ethics and medicine, medical Spanish and insights in clinical research. Most students also participate in one of several student-run, community clinics for elective credit during their first and second years.

## Coordination with other Advanced Degree Programs

The curriculum for the M.D. degree provides flexibility and encourages coordination with other advanced degree programs (Ph.D., M.S., M.A., M.B.A., and M.P.H.). These programs offer a wide breadth of study areas and draw upon the considerable expertise of the entire campus faculty. The Department of Public Health Sciences offers an M.P.H. program in conjunction with the M.D. program. This program is designed for students interested in disease prevention and community health, health professionals and State Health Department employees.

School of Medicine administrators enthusiastically support students interested in pursuing advanced degree programs. The dual-degree program for the M.D./Ph.D. is targeted to train physicians to meet, respond to and solve the broad diversity of problems and dilemmas facing current and future health care. Students are encouraged to seek degrees in any of the campus wide Ph.D. programs, including those in social sciences and humanities. The UC Davis School of Medicine awards competitive fellowships each year to students enrolled in the M.D./Ph.D. program.

## Required Curriculum for the M.D. Degree

The following listing is the typical sequencing of all courses required for earning the M.D. degree. Course descriptions are given under the individual departmental course offerings.

### First-Year Required Courses

#### Year 1, Foundations Block

Molecular Medicine, BCM 410A  
Gross-Radiologic-Developmental Anatomy, CHA 400  
Human Physiology, HPH 400  
Human Microscopic Anatomy, CHA 402  
Doctoring 1, MDS 411A

#### Year 1, Mechanisms & Disease Block

Medical Immunology, MMI 480A  
Medical Microbiology, MMI 480B  
General and Endocrine Pathology, PMD 410A  
Pharmacology, PHA 400A  
Endocrine-Nutrition-Reproduction-Genetics, "ENRG", MDS 406  
Doctoring 1, MDS 411B

### Second-Year Required Courses

#### Year 2, Brain & Behavior Block

Neuroanatomy, CHA 403  
Systemic Pathology, PMD 410B  
Pharmacology, PHA 400B  
Clinical Neurosciences, NEU 420  
Foundations of Bioethics, MDS 428  
Fundamentals of Clinical Psychiatry, PSY 403  
Doctoring 2, MDS 421A

### Year 2, Pathophysiology Block

Integumentary System, DER 420  
Cardiovascular System, IMD 420D  
Pulmonary and Critical Care, IMD 420C  
Nephrology, IMD 420E  
Hematology, IMD 420A  
Systemic Pathology, PMD 410C/D  
Pharmacology, PHA 400C  
Oncology, HON 420  
GI System, IMD 420B  
Doctoring 2, MDS 421B/C

### Third- and Fourth-Year Required Courses

#### Transition to Clerkships - MDS 429

#### Required Third-Year

Internal Medicine  
Clerkship—IMD 430 ..... 8 weeks  
Surgery  
Clerkship—SUR 430 ..... 8 weeks  
Pediatrics  
Clerkship—PED 430 ..... 8 weeks  
Family Medicine Clerkship—  
FAP 430 ..... 4 weeks  
Obstetrics and Gynecology  
Clerkship—OBG 430 ..... 8 weeks  
Psychiatry  
Clerkship—PSY 430 ..... 8 weeks  
Doctoring 3, MDS 430A-D

#### Fourth-Year Requirements

36 Weeks of Required Course work comprised of the following specifics:

- 4 weeks of an Inpatient Acting Internship from one of the following departments at UC Davis: Internal Medicine, OB-GYN, Pediatrics, Surgery, Family & Community Medicine and Psychiatry
- 4 weeks of Inpatient or Ambulatory Acting Internship in any department/discipline
- 4 weeks of Special Studies Module or Scholarly Project
- 4 weeks of Emergency Medicine
- 20 weeks of additional Acting Internships, Advanced Clinical Clerkships or Clinical Didactics
- 16 weeks must be taken at UC Davis
- 28 weeks must be in direct patient care

### Medical Sciences (MDS)

#### Lower Division

##### 99. Special Study in Medicine for Undergraduates (1-5)

Independent study—3-15 hours. Prerequisite: consent of instructor. Participate in research projects relating to medicine with faculty in the School of Medicine. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

#### Upper Division

##### 192. Medical Education Internship for Advanced Undergraduates (1-12)

Internship—3-36 hours. Prerequisite: competency with computers. Enrollment dependent on availability of intern positions. Participate in projects related to curriculum development in support of curriculum for M.D. degree. Gain work experience and appreciation for innovative approaches to learning in basic and clinical sciences of medical education. May be repeated for credit for up to 12 units. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

#### Professional

##### 401. Applications of Computers to Medical Practice (2)

Autotutorial—2 hours. Prerequisite: enrollment in medical school. Proficiency in computer applications relative to practice of medicine, with emphasis on email, literature searching, file transfer, and hospital information services. Course given online, at home or in lab; time and place determined by student. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Huntley

**402. Clinical & Cultural Spanish (2)**

Lecture—1 hour; practice—1 hour; independent study—4 hours. Prerequisite: consent of instructor. Medical students, nursing students and physician assistants students who are fluent Spanish speakers will learn a comprehensive set of medical vocabulary and cultural aspects related to the treatment of Spanish speaking patients. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Odor

**403. Science & Practice of Mindfulness and Compassion (1)**

Lecture/discussion—10 hours; independent study—20 hours. Prerequisite: consent of instructor. Restricted to Medical school students. Course will examine current scientific evidence for the effects of different mindfulness and compassion meditation practices in both healthy and clinical samples. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Goldin, Sitteri

**406. Endocrinology, Nutrition, Reproduction and Genetics (9.5)**

Lecture—3.8 hours; discussion/laboratory—2.8 hours. Prerequisite: Biological Chemistry 410A; Human Physiology 400. Restricted to Medical students only. Basic and pathophysiologic processes involved in human reproductive and endocrine control systems, nutritional regulation, and foundational genetics across the lifespan. Integrate information across these systems and use clinical reasoning process to identify and understand relevant perturbations and diseases. May be repeated three times for credit. (P/F grading only; deferred grading only, pending completion of sequence.)—W. (W.) Hagiwara, Hou, Prescott, Sheely

**411A. Doctoring 1 (4)**

Discussion—1 hour; clinical activity—1 hour; lecture/discussion—1 hour. Prerequisite: approval of committee on student progress. Medical students only. Small, case-based learning groups with training in patient communication and interviewing techniques, clinical identification and problem solving, applications of social, psychological, cultural, bioethical, and basic science concepts to patient case scenarios, outpatient clinical experiences and didactic presentations. (P/F grading only; deferred grading only, pending completion of sequence.)—F, S. (F, S.) Eidson-Ton, Henderson, Onate

**411B. Doctoring 1 (5)**

Discussion—1.5 hours; clinical activity—1.5 hours; lecture/discussion—1.8 hours. Medical students only. Small, case-based learning groups with training in patient communication and interviewing techniques, clinical identification and problem solving, applications of social, psychological, cultural, bioethical, and basic science concepts to patient case scenarios, outpatient clinical experiences and didactic presentation. (P/F grading only; deferred grading only, pending completion of sequence.)—F, S. (F, S.) Eidson-Ton, Henderson, Onate

**411KA. ACE-PC Program Doctoring 1 (8)**

Clinical Activity—5 hours; lecture/discussion—6 hours. Prerequisite: consent of instructor. Small case-based learning groups with training in patient communication and interviewing techniques clinical identification and problem solving applications of social psychological cultural bioethical and basic science concepts to patient case scenarios outpatient clinical experiences and didactic presentations. (P/F grading only; deferred grading only, pending completion of sequence.)—F, Su. (F, Su.) Eidson-Ton, Han, Henderson

**411KB. ACE-PC Program Doctoring 1 (5)**

Clinical Activity—4 hours; discussion—1 hour. Prerequisite: consent of instructor. Application of multidisciplinary basic, social and clinical science to clinical cases in small groups. History, physical examination with preceptors. Didactics in epidemiology, ethics, sexuality and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of medicine. (P/F grading only; deferred grading only, pending completion of sequence.)—F, S. (F, S.) Henderson, Lee, Sciola

**420. Multisystem Clinical Presentations (5)**

Extensive problem solving—15 hours; independent study—6 hours. Prerequisite: completion of Pathophysiology Block; consent of instructor. Capstone course integrates coursework, knowledge, skills and experiential learning to enable the student to demonstrate a broad mastery of learning across the curriculum. (P/F grading only.)—S. (S.) Venugopal

**421A. Doctoring 2 (6)**

Discussion—1 hour; lecture/discussion—1 hour; internship—0.5 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical students only. Application of multidisciplinary basic, social and clinical science to clinical cases in small groups. History, physical examination with preceptors. Didactics in epidemiology, ethics, sexuality and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of medicine. (Deferred grading only, pending completion of sequence. P/F grading only.)—Su. (Su.) Lee, Molla, Sciola

**421B. Doctoring 2 (6)**

Discussion—1 hour; lecture/discussion—1 hour; internship—0.5 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical students only. Application of multidisciplinary basic, social & clinical science concepts to cases in small groups. History, physical examination with preceptors. Didactics in epidemiology, ethics, sexuality, and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of medicine. (Deferred grading only, pending completion of sequence. P/F grading only.)—F. (F.) Lee, Molla, Sciola

**421C. Doctoring 2 (6)**

Discussion—1 hour; lecture/discussion—1 hour; internship—0.5 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical students only. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (P/F grading only.)—W. (W.) Lee, Molla, Sciola

**421KA. ACE-PC Program Doctoring 2 (6)**

Discussion—1 hour; lecture/discussion—1 hour; internship—0.5 hours. Prerequisite: admission into ACE-PC and successful completion of MDS 411KA & MDS 411KB. MDS 421KA-C are a year-long series of courses. Objectives and assessments have been accelerated to accommodate the students enrolled in the ACE-PC Program. Students will participate in all aspects of Doctoring 2, other than what was done in 411KA/KB. (P/F grading only; deferred grading only, pending completion of sequence.)—Su. (Su.) Henderson, Sciola, Williams

**421KB. ACE-PC Program Doctoring 2 (6)**

Discussion—1 hour; lecture/discussion—1 hour; internship—0.5 hours. Prerequisite: approval by the School of Medicine on Student Progress; medical students only. MDS 421KA-C are a year-long series of courses. Objectives and assessments have been accelerated to accommodate the students enrolled in the ACE-PC Program. Students will participate in all aspects of Doctoring 2, other than what was done in 411KA/KB. (P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Henderson, Sciola, Williams

**421KC. ACE-PC Program Doctoring 2 (6)**

Discussion—1 hour; lecture/discussion—1 hour; internship—0.5 hours. Prerequisite: approval by the School of Medicine on Student Progress; medical students only. MDS 421KA-C are a year-long series of courses. Objectives and assessments have been accelerated to accommodate the students enrolled in the ACE-PC Program. Students will participate in all aspects of Doctoring 2, other than what was done in 411KA/KB. (P/F grading only; deferred grading only, pending completion of sequence.)—W. (W.) Henderson, Sciola, Williams

**428. Foundations of Bioethics (1)**

Discussion—3 sessions; lecture/discussion—3 sessions; independent study—16.5 sessions; web virtual lecture—1 session. Prerequisite: consent of instructor. Course will expose students to core content in bioethics and the law and introduce a framework for ethical decision-making, while emphasizing relationships between bioethics and clinical care. (P/F grading only.)—Su. (Su.) Fairman, Rich

**429. Transition to Clerkships (1)**

Laboratory/discussion—12 hours; workshop—13 hours; discussion—7 hours; independent study—2 hours. Incoming third-year medical students will participate in a variety of educational experiences designed to prepare them to begin their clerkship curriculum. Course content will be disseminated in large and small group settings. (P/F grading only.)—S. (S.) Bing, Venugopal

**430. Introduction to Doctoring 3 (1)**

Discussion—2 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Introductory course for the Doctoring 3 Program. All students enrolling in Medical Sciences 430 A-D should complete this course prior to beginning their work in Doctoring 3. (H/P/F grading only.)—S. (S.) Wilkes

**430A. Doctoring 3 (1)**

Discussion—3 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only; deferred grading only, pending completion of sequence.)—Su. (Su.) Wilkes

**430B. Doctoring 3 (1)**

Discussion—2 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social & clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Wilkes

**430C. Doctoring 3 (1)**

Discussion—2 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social & clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only; deferred grading only, pending completion of sequence.)—W. (W.) Wilkes

**430D. Doctoring 3 (1)**

Discussion—2 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social & clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only; deferred grading only, pending completion of sequence.)—S. (S.) Wilkes

**435KA. ACE-PC Longitudinal Integrated Clerkship A (18)**

Clinical activity—45 hours; independent study—6 hours; discussion—4 hours. Prerequisite: consent of instructor. Longitudinal Clerkship will combine the Internal Medicine, OB/GYN, Pediatrics, Psychiatry and Surgery Clerkships for the ACE-PC Program. (H/P/F grading only; deferred grading only, pending completion of sequence.)—S. (S.) Holt, Zachary

**435KB. ACE-PC Longitudinal Integrated Clerkship B (21)**

Clinical activity—45 hours; independent study—6 hours; discussion—4 hours. Prerequisite: consent of instructor. Longitudinal Clerkship will combine the Internal Medicine, OBGYN, Pediatrics, Psychiatry and Surgery Clerkships for the ACE-PC Program. (H/P/F grading only; deferred grading only, pending completion of sequence.)—Su. (Su.) Holt, Zachary

**435KC. ACE-PC Longitudinal Integrated Clerkship C (18)**

Clinical activity—45 hours; independent study—6 hours; discussion—4 hours. Prerequisite: consent of instructor. Longitudinal Clerkship will combine the Internal Medicine, OBGYN, Pediatrics, Psychiatry and Surgery Clerkships for the ACE-PC Program. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Holt, Zachary

**440. Doctoring 4 Teaching Fellowship (3)**

Discussion—5 hours; seminar—0.25 hours. Prerequisite: course 430A, 430B, 430C, 430D; consent of instructor. Restricted to Medical student only. Instruction on teaching methodology and pedagogy. Mentored teaching of junior medical students in seminar, lecture, and bedside. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Wilkes

**441. Combined Ophthalmology and Otolaryngology Clerkship (6)**

Clinical activity—4 weeks. Prerequisite: approval by Committee on Student Promotion and Evaluation. Fundamental knowledge of ophthalmology and otolaryngology for the treatment of eye, ear, nose and throat problems at a level of training of general physicians, including when to refer patients to a specialist. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Brandt, Strong

**450. Introduction to UC Davis Medical Center (1)**

Seminar—20 hours total. Prerequisite: second-year medical student. Designed to assist medical student in transition from classroom to hospital setting. (H/P/F grading only.)—S. (S.)

**455. Student Run Clinics (1-3)**

Clinical Activity—3.9 hours. Open to medical students in good standing. Will learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Meet all requirements and prerequisites of the particular clinic within which they work. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Latimore, Servis

**460CR. Introduction to Clinical Research (2)**

Lecture—2 hours; independent study—3 hours. Restricted to completion of M.D., D.D.S., D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. Introduction to the CRGG program and overview of major clinical research topics. Overview of basic clinical skills needed to accomplish CRGG mentored research project. (P/F grading only.)—Su. (Su.) Frederick

**461CR. Strategies for Grant Writing (2)**

Lecture/discussion—2 hours. Restricted to completion of M.D., D.D.S., D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. Practical skills and strategies to create successful grant proposals in the NIH style and format. Generating ideas, identifying and accessing research resources, grant components, specific aims, background and significance, preliminary studies, budgets, and bios. Matriculation through UC system, and resubmissions. (S/U grading only.)—Su. (Su.) Rutledge

**462CR. Introduction to Clinical Epidemiology and Study Design (3)**

Lecture—25 hours; discussion—10 hours. Restricted to completion of M.D., D.D.S., D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. Anatomy

and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs (cross-sectional, case-control, and cohort). Discussion of principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research. (S/U grading only.)—Su. (Su.) McCurdy, Romano

**463CR. Methods in Clinical Research (5)**

Lecture—3 hours; discussion—2 hours. Restricted to completion of M.D., D.D.S., D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. Overview of major approaches to clinical research, including health services research techniques, informatics, the GCRC, and preclinical methodologies to enhance clinical projects. Overview of UC Davis clinical research support infrastructure. Methodologies applicable to clinical research and its multi-disciplinary perspective. (S/U grading only.)—Su. (Su.) Berglund, Lloyd, Kravitz

**464CR. Responsible Conduct of Research (3)**

Lecture—3 hours. Restricted to completion of M.D., D.D.S., D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. The nine NIH-mandated modules: Data Acquisition and Reporting, Mentor Training, Publication Practices and Authorship, Peer Review/Grant Process, Collaborative Science, Human Subjects, Research with Animals, Conflict of Interest, Research Misconduct, and Entrepreneurship/Industry Collaborations/Intellectual Property/Technology Transfer. (S/U grading only.)—Su. (Su.) Wun

**465CR. Introduction to Medical Statistics (4)**

Lecture—3 hours; laboratory—2 hours. Restricted to completion of M.D., D.D.S., D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. Biomedical applications of statistical methods in clinical, laboratory and population medicine. Graphical/tabular data presentation, probability, binomial, Poisson, normal, t-, F-, and Chi-square distributions, elementary nonparametric methods, simple linear regression/correlation, life tables. Microcomputer applications of statistical procedures in population medicine. (S/U grading only.)—Su. (Su.) Becket, Wegelin

**468C. International Clinical Preceptorship (1-12)**

Clinical activity—30 hours. Prerequisite: medical students with consent of instructor. Multidisciplinary preceptorship in a foreign country. Clinical credit will be awarded using this course, once approval has been received from the appropriate governing committee. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**468D. International Elective (1-12)**

Independent study—20 hours; clinical activity—10 hours. Prerequisite: medical students with consent of instructor. Multidisciplinary preceptorship in a foreign country. Course used to award non-clinical credit for international experiences which have been approved by the appropriate governing committee. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**470. Introduction to Dentistry (3-18)**

Clinical activity—34 hours; lecture—6 hours. Prerequisite: fourth-year medical student in good standing; consent of instructor. Introduction to Dentistry and basic Oral and Maxillofacial Surgery. Course is offered by the Oral and Maxillofacial Surgery department at UC San Francisco. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Pogrel, Wallach

**480. Insights in Clinical Research (1)**

Lecture—1 hour. Prerequisite: medical student in good standing. Seminars on research presented by Medical School faculty; overview of pertinent issues, including medical ethics, human subjects protocols, case control methods, etc. (P/F grading only.)—S. (S.)

**481. Insights into Clinical Specialties (1)**

Lecture/discussion—1 hour. Prerequisite: medical student in good standing. Exposure to various medical specialties, their residency programs and ways in which medical students can prepare for and improve their candidacy for such programs. (H/P/F grading only.)—Su. (Su.)

**482. Lecture Series in Reproductive Health (1)**

Lecture—1 hour. Psychosocial and public health aspects of providing quality reproductive health care and application in student-run free clinics and in 3rd year clerkships. Only medical students may enroll for credit; undergraduates may audit the course. May be repeated two times for credit. (P/F grading only.)—W. (W.) Paik

**483. Insights in Political, Legal and Business Aspects of Medicine (1)**

Lecture—1 hour. Prerequisite: Medical student in good standing. Restricted to Medical student only. The practical aspects of a medical career. May be repeated two times for credit. (P/F grading only.)—S. (S.)

**485. Health Policy Lecture Series (1)**

Lecture—1 hour. Lecture series provides an overview of local, state, national and international health policy. The current challenges health care reform implementation is facing provides how medical students can successfully advocate for changes in health policy. May be repeated for credit. (P/F grading only.)—F. (F.) Romano

**486. Topics in Health Care Improvement (0.5)**

Lecture/discussion—15 sessions. Lecture series will cover major topics in health care improvement, presented by guest speakers who are leaders in the field. May be repeated for credit. (P/F grading only.)—S. (S.) Shaikh

**487. History and Ethics of Medicine (1)**

Lecture—1.25 hours. Introduction to ethical problems and events in health care in both modern and historical contexts. Historical topics in medicine and medical ethics. (P/F grading only.)—W. (W.) Fitzgerald

**489. Directed Studies (1-9)**

Prerequisite: consent of instructor; individual directed studies in extended preparation for modified curriculum, USMLE exams, and/or as required by Committee on Student Progress. Independent studies to accommodate modified curriculums, prepare for taking USMLE exams and for remediation course work directed by the Committee on Student Progress. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**489C. Clinical Reintroduction Experience (1-9)**

Clinical activity—20 hours. Prerequisite: consent of instructor. Learn and practice basic clinical skills in a supervised clinical setting. Skills include patient interviewing, history, physical examination, diagnostic and clinical reasoning, case presentation, and medical records documentation. Direct observation and individual feedback on clinical skills development is provided. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**489QA. Improving Quality in Health Care (3)**

Lecture—8 hours; discussion/laboratory—10 hours, project—10 hours. Prerequisite: consent of instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Bakerjian, Shaikh

**489QB. Improving Quality in Health Care (3)**

Lecture—8 hours; discussion/laboratory—10 hours, project—10 hours. Prerequisite: consent of instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to

make improvement in health care systems while providing an opportunity for interprofessional educational experience. (H/P/F grading only; deferred grading only, pending completion of sequence.)—W. (W.) Bakerjian, Shaikh

#### **489R. USMLE Directed Remedial Studies (1-9)**

Independent study—20 hours. Prerequisite: recommendation by Committee on Student Progress. Independent studies to accommodate remediation for taking USMLE exams directed by the Committee on Student Progress. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Servis

#### **490A. PRIME Seminar Series: Fall Quarter (1)**

Lecture—1 hour. Weekly seminar series covering the following areas: community engagement, Health-care to rural and under served populations, health policy and advocacy, leadership, technology and health equity and disparity. May be repeated for credit. (P/F grading only.)—F. (F.) Eidson-Ton, Fancher

#### **490B. PRIME Seminar Series: Winter Quarter (1)**

Lecture—1 hour. Weekly seminar series covering the following areas: community engagement, Health-care to rural and under served populations, health policy and advocacy, leadership, technology and health equity and disparity. May be repeated for credit. (P/F grading only.)—W. (W.) Eidson-Ton, Fancher

#### **490C. PRIME Seminar Series: Spring Quarter (1)**

Lecture—1 hour. Weekly seminar series covering the following areas: community engagement, Health-care to rural and under served populations, health policy and advocacy, leadership, technology and health equity and disparity. May be repeated for credit. (P/F grading only.)—S. (S.) Eidson-Ton, Fancher

#### **490D. PRIME Seminar Series: Summer Quarter (1)**

Lecture—1 hour. Weekly seminar series covering the following areas: community engagement, Health-care to rural and under served populations, health policy and advocacy, leadership, technology and health equity and disparity. May be repeated for credit. (P/F grading only.)—Su. (Su.) Eidson-Ton, Fancher

#### **493. Independent Special Study Module (3-12)**

Prerequisite: consent of instructor. FYOC approval required. Student developed alternative to the SSM/SPO Requirement. Approval by FYOC is required. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **493A. International and Comparative Health Care—SSM (6)**

Discussion—20 hours; lecture—10 hours. Prerequisite: consent on instructor. Restricted to UC Davis School of Medicine students only. Through a series of lectures, seminars and clinical experiences, all occurring in other nations, students will research how health care systems address critical health issues. In 2007, Chronic Disease is the focal issue. SSM Component. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Wilkes

#### **493B. International and Comparative Health Care—Clinical (3-9)**

Clinical activity—30 hours. Prerequisite: consent of instructor. Restricted to UC Davis School of Medicine students only. Through a series of lectures, seminars and clinical experiences, all occurring in other nations, students will research how health care systems address critical health issues. In 2007, Chronic Disease is the focal issue. Clinical Component. (H/P/F grading only)—F, W, S, Su. (F, W, S, Su.) Wilkes

#### **493D. Teaching the Basic Sciences SSM (6)**

Lecture—6 hours; lecture/laboratory—8 hours; laboratory—30 hours; tutorial—10 hours. Prerequisite: course 440 concurrently; consent of instructor. Restricted to UC Davis School of Medicine students

only. Special Studies Module, a yearlong in progress court to teach lecture and discussion education technique and theory. (H/P/F grading only)—F, W, S, Su. (F, W, S, Su.)

#### **493Q. Improving Quality in Health Care (6)**

Lecture—8 hours; discussion/laboratory—10 hours; project—10 hours. Prerequisite: consent of instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (H/P/F grading only.)—F, W. (F, W.) Bakerjian, Shaikh

#### **493QA. Improving Quality in Health Care (3)**

Lecture—8 hours; discussion/laboratory—10 hours; project—10 hours. Prerequisite: consent on instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (Same course as Nursing 493A.) (H/P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Bakerjian, Shaikh

#### **493QB. Improving Quality in Health Care (3)**

Lecture—8 hours; discussion/laboratory—10 hours; project—10 hours. Prerequisite: consent on instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (Same course as Nursing 493B.) (H/P/F grading only; deferred grading only, pending completion of sequence.)—W. (W.) Bakerjian, Shaikh

#### **493QC. Enhancing Patient Safety in Health Care (6)**

Seminar—6 hours; clinical activity—8 hours; discussion—6 hours. Prerequisite: fourth-year Medical student; consent of instructor. Inter-professional module is designed to explore the theory and practical methods being employed to improve patient safety in health care while providing an opportunity for inter-professional educational experience. (Same course as Nursing 493C.) (H/P/F grading only.)—W, S, Su. (W, S, Su.) Bakerjian, Natale

#### **494. Non-Clinical Medical Student Externship (3-9)**

Independent study—20 hours; clinical activity—10 hours. Prerequisite: consent of instructor. Restricted to students with approval of credit by the Fourth Year Oversight Committee. Generic course for awarding externship credit for medical student rotations that are not primarily focused on patient care. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Wallach

#### **495. Medicine Literature Review (1-9)**

Discussion—3-27 hours. Prerequisite: medical student in good academic standing and permission of the Associate Dean of Curricular Affairs. Independent study: topics for selection include, but are not restricted to, medical ethics, economics and jurisprudence, culture and medicine, ethnicity and medicine, gender and medicine, history of medicine, health manpower, and medical education. A prepared paper on the selected topic will be required. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **497. Scholarly Project (6)**

Seminar—0.25 hours; independent study—0.5 hours. Prerequisite: project proposal must be accepted by the Scholarly Project Executive Committee. (SPEC); consent of instructor. Restricted to 4th year medical school students only. Develop a research project on a focused topic area, implements the research, writes a publishable paper, and presents an oral summary of the project. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F, W, S, Su. (F, W, S, Su.) Schaefer

#### **499. Research in Medical Education and Curriculum Development (4-9)**

Independent study—10-36 hours. Prerequisite: medical student in good standing and competency with computers. Research and development of an independent project related to expanding computer-assisted resources in support of the MD curriculum at UC Davis. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **Departmental Courses:**

#### **Anesthesiology and Pain Medicine (ANE)**

#### **Upper Division**

#### **192. Internship in Anesthesiology (1-6)**

Internship—3-18 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in anesthesia and related fields. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **Professional**

#### **460. Anesthesiology Clinical Clerkship (3-18)**

Prerequisite: medical student. In-depth exposure to anesthesia through informal lectures and mentoring by anesthesiologists. Emphasis on understanding and applying anesthetic principles in managing administration of general, regional, and specialized areas. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Yao

#### **461. Perioperative Medicine (3-12)**

Clinical Activity—30 hours. Prerequisite: successful completion of third-year clerkships; consent of IOR. Two week rotation provides a broad exposure to various patient care services within the Department of Anesthesiology and Pain Medicine to apply medical knowledge to safely care for patients. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Pitts

#### **463. Multidisciplinary Pain Management (6)**

Clinical activity—30 hours; lecture/discussion—10 hours. Prerequisite: senior medical student in good standing. Senior clerkship to expose students to all facets of treating pain in all aspects of clinical care: outpatient and inpatient settings, acute and chronic pain, end of life issues, pediatrics, rehabilitation, etc. Daily clinics, rounds, and lectures. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Sheth

#### **465. Away Acting Internship in Anesthesiology (3-18)**

Clinical Activity—40 hours. Prerequisite: satisfactory completion of Anesthesiology Clerkship; consent of instructor. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Yao

#### **480. Brief Introduction to Clinical Anesthesiology and Chronic Pain Management (3)**

Clinical activity—25-30 hours (two weeks). Prerequisite: second-year medical student. Daily experience in clinical anesthesiology at the preoperative screening unit, operating room, post anesthesia care unit, chronic pain management clinic with daily clinical correlation case discussions, and one-on-one interaction with faculty anesthesiologists. (H/P/F grading only.)—W. (W.) Fishman

#### **493A. Applied Physiology and Pharmacology (6)**

Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor. UC Davis School of Medicine students only. Review and demonstrate the application of basic physiology and pharmacology to patient care. There will be an in-depth analysis of

the physiology and pharmacology of the cardiovascular, pulmonary, nervous, renal and endocrine systems. (H/P/F grading only.)—W. (W.) Fleming

### **493B. Interdisciplinary Medicine in Pain Care (6)**

Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor. UC Davis School of Medicine students only. Integrate applied and practical neuroanatomy, physiology, pharmacology, psychology/psychiatry and social medicine in the care of patients who are receiving care for pain caused by acute or chronic medical disease or trauma. (H/P/F grading only.)—S. (S.) Fishman

### **498. Individual or Group Study (1-5)**

Discussion—1-5 hours; laboratory—2-10 hours. Prerequisite: interns and residents with consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

### **499. Anesthesiology Research (4-18)**

Laboratory—12-54 hours. Prerequisite: third- or fourth-year medical students, advanced standing undergraduate and veterinary medicine students; or consent of instructor. Problems in clinical and/or laboratory research. May be repeated for credit. (H/P/F grading only for medical students.)—F, W, S, Su. (F, W, S, Su.)

## **Biological Chemistry (BCM)**

### **Lower Division**

#### **92. Internship in Biological Chemistry (1-12)**

Internship—3-36 hours; final report. Prerequisite: consent of instructor. Supervised work experience in biological chemistry and related fields. (P/NP grading only.)

### **Upper Division**

#### **192. Internship in Biological Chemistry (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to internship by preceptor. Supervised work experience in Biological Chemistry and related fields. (P/NP grading only.)

### **198. Group Study (1-5)**

Prerequisite: consent of instructor. For undergraduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. (P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

## **Graduate**

#### **209. Prostaglandins/Leukotrienes and Related Lipids (2)**

Lecture—2 hours. Prerequisite: Biochemistry 101A-101B or Physiological Sciences 101A-101B or Physiology 100A-100B. Oxidative desaturation/elongation of polyunsaturated fatty acids. Biosynthesis of prostaglandins/leukotrienes from polyunsaturated fatty acids. Chemistry, biochemistry, and metabolism. Nutritional regulation. Physiological/pathophysiological implications; pharmacological and clinical relevance. Offered in alternate years.—(W.) Ziboh

### **217. Molecular Genetics of Fungi (3)**

Lecture—3 hours. Prerequisite: graduate standing in a biological science; Biochemistry 101B; Genetics 100, 102A; Botany 119; Plant Pathology 130, 215X; Microbiology 215 recommended. Advanced treatment of molecular biology and genetics of filamentous fungi and yeasts, including gene structure, organization and regulation; secretion; control of reproduction; molecular evolution; transformation; and gene manipulation. Offered in alternate years. (Same course as Plant Pathology 217.)—W. Holland, Tyler

### **222. Mechanisms of Translational Control (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: Biochemistry 201C or consent of instructor. Molecular mechanisms of protein synthesis and translational control in eukaryotic cells, with emphasis on mammalian cells and their viruses. An advanced graduate-level treatment of topics of current interest, with readings and discussion of primary papers from the literature. Offered in alternate years.—W. Hershey

### **230. Practical NMR Spectroscopy and Imaging (1)**

Lecture—1 hour. Prerequisite: Chemistry 107A-107B, Physics 5A-5B-5C or 9A-9B-9C, or consent of instructor. Basic theory, experimental methods, and instrumentation of NMR. Enables students to understand NMR spectroscopy and imaging experiments. (S/U grading only.)—F. (F.)

### **231. Biological Nuclear Magnetic Resonance (3)**

Lecture—3 hours. Prerequisite: Molecular and Cellular Biology 221A or the equivalent or consent of instructor. Principles and applications of magnetic resonance in biomedicine. Fundamental concepts and the biophysical basis for magnetic resonance applications in areas of tissue characterization/imaging, metabolic regulation, and cellular bioenergetics. (Same course as Biophysics 231.)—S. (S.) Jue

### **291. Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)**

Seminar—1 hour. Prerequisite: student in Genetics Graduate Group or consent of instructor. Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same course as course 491.) (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

### **298. Group Study (1-5)**

Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved.

### **299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

## **Professional**

### **410A. Molecular Medicine (4)**

Lecture—3 hours; discussion—3 hours; web virtual lecture—1 hour. Prerequisite: consent of instructor. Restricted to Medical Students only. Biochemistry of proteins and nucleic acids. Includes an introduction to cancer biology and a full discussion of carbohydrate metabolism. Molecular aspects of human disease are highlighted throughout the course. (P/F grading only; deferred grading only, pending completion of sequence.)—F, Su. (F, Su.) Sweeney

### **491. Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)**

Seminar—1 hour. Prerequisite: student in Genetics Graduate Group or consent of instructor. Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same course as course 291.) (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

### **493. Medical Genomics (6)**

Clinical activity—4 hours; lecture—4 hours; laboratory—12 hours. Prerequisite: consent of instructor. Four-week module will focus on the clinical methods and applications of medical genomics. Topics will include an introduction to the human genome and human genomics, genetic and epigenetic variation and the ethics of medical genomics. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Herman, Segal

### **497T. Tutoring in Biological Chemistry (1-5)**

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)

### **498. Group Study (1-5)**

Prerequisite: medical students with consent of instructor. (H/P/F grading only.)

### **499. Research (1-12)**

Prerequisite: medical students with consent of instructor. (H/P/F grading only.)

## **Courses in Cell Biology and Human Anatomy (CHA)**

### **Upper Division**

#### **101. Human Gross Anatomy (4)**

Lecture—4 hours. Prerequisite: Biological Sciences 2A; concurrent enrollment in Exercise Biology 106L or course 101L strongly recommended. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major. Detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions. (Same course as Exercise Biology 106.) GE credit: SciEng | SE. —W. (W.) Gross

#### **101L. Human Gross Anatomy Laboratory (3)**

Laboratory—9 hours. Prerequisite: Biological Sciences 2A; must take Exercise Biology 106 or course 101 concurrently (or have already completed). Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major; mandatory attendance on first day of lab. Detailed study of dissected human cadavers in small group format with extensive hands-on experience. (Same course as Exercise Biology 106L.) GE credit: SciEng | SE. —W. (W.) Gross

#### **192. Internship in Morphology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; laboratory science experience including some chemistry; approval of project by preceptor prior to period of internship. Experience of supervised internship in research laboratories of members of the department. (P/NP grading only.)

#### **197T. Tutoring in Cell Biology and Human Anatomy (1-5)**

Discussion—1 hour; laboratory—6-9 hours. Prerequisite: completion of course 101 with a grade of B or better and consent of instructor. Provides laboratory instruction in gross and microscopic human anatomy, with small groups of undergraduates under the supervision of the instructor. (S/U grading only.)

#### **198. Directed Group Study (1-5)**

Discussion—1-10 hours. Prerequisite: consent of instructor. Directed reading, discussion, and/or laboratory experience on selected topics. (P/NP grading only.)

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

## **Graduate**

#### **200. Graduate Human Gross Anatomy (6)**

Lecture—4 hours; laboratory—6 hours. Prerequisite: consent of instructor. Lectures on human gross anatomy and cadaver dissection laboratory. Topics arranged by region; emphasis on osteology, neuromuscular anatomy, cardiovascular anatomy, gastrointestinal anatomy and anatomy of reproductive systems. Only two units of credit for students who

have completed course 101. Open only to full-time graduate students.—W. (W.) Blankenship, Gross, Tucker

### **202. Human Microscopic Anatomy (5)**

Lecture—3 hours; laboratory—6 hours. Examines the normal microscopic structure of the basic cells, tissues, and organs of the body. Lectures emphasize morphology and structure-function relationships. Accompanying laboratories involve analysis and identification of sectioned material at the light microscopic and ultrastructural levels.—W. (W.) Beck

### **203. Neurobiology (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: two upper division or one graduate course in Neurobiology, consent of instructor. Physiology and anatomy of the normal human nervous system in an integrated format.—S. (S.) Blankenship, Gross

### **290. Seminar (1)**

Seminar—1 hour. Prerequisite: consent of instructor. (S/U grading only.)—F, S. (F, S.)

### **290C. Research Group Conference (1)**

Discussion—1 hour. Prerequisite: graduate student with research experience (may be taken concurrently); consent of instructor. Discussion of problems, progress and literature relevant to current research undertaken by laboratory groups in Human Anatomy. (S/U grading only.)—F, W, S. (F, W, S.)

### **298. Advanced Group Study (1-5)**

Prerequisite: consent of instructor.

### **299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

## **Professional**

### **400. Developmental, Gross, and Radiologic Anatomy (7.5)**

Lecture—3 hours; laboratory—5 hours. Prerequisite: consent of instructor. Medical Students only. An integrated presentation of developmental, gross and radiologic anatomy. Embryology and radiology correlated with the dissection of the entire body. Embryology from implantation to birth. (Deferred grading only, pending completion of sequence.) (P/F grading only.)—F, Su. (F, Su.) Tucker

### **402. Cell and Tissue Biology (4.5)**

Lecture—2 hours; laboratory—4 hours. Prerequisite: approval of the Committee on Student Progress. Medical Students only. Microscopic structure of the basic cells, tissues and organs of the body with an emphasis on how structure explains function. Analysis and identification of sectioned material at the light microscopic and ultrastructural levels. (Deferred grading only, pending completion of sequence.) (P/F grading only.)—F, Su. (F, Su.) Beck

### **403. Medical Neuroanatomy (5)**

Lecture—3 hours; laboratory—1 hour; discussion/laboratory—1 hour. Prerequisite: successful completion of course 400, block 1; restricted to medical students only. Anatomy of the normal human nervous system, to include gross external and internal morphology of brain and spinal cord, and function neuroanatomy of motor, sensory and cognitive systems. Incorporates application of neuroanatomy to clinical problem solving. (Same course as Human Physiology 403.) (P/F grading only.)—Su. (Su.) Blankenship, Gross

### **493. Clinically-Oriented Anatomy Special Study Module (6)**

Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor. Restricted to School of Medicine students only. Reviews aspects of the anatomy of the head and neck, thoracic cavity, abdomen, pelvis, extremities, vascular system, peripheral nervous system and central nervous system. Focus on the understanding of anatomy related to common surgical procedures. (Same course as Surgery 493.) (H/P/F grading only.)—S. (S.) Blankenship, Khatri

### **493B. Anatomy Medical Education Special Study Module (6)**

Seminar—10 hours; clinical activity—14 hours; autotutorial—6 hours; independent study—10 hours. Prerequisite: consent of instructor; UC Davis School of Medicine students only. Attend all of the lectures and laboratory sessions for courses 400 and 402 during the four-week section (approximately seven anatomy labs and three to four histology labs); tutor first-year students during the laboratory sessions; prepare and present a clinical correlate session. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Beck, Gross, Fitzgerald, Tucker

### **497T. Tutoring in Human Anatomy (1-5)**

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum for the School of Medicine. (H/P/F grading only.)

### **498. Advanced Group Study (1-12)**

Prerequisite: medical students, interns, and residents with consent of instructor. Directed reading and group discussion and/or laboratory experience on selected topics. (H/P/F grading only.)

### **499. Research (1-12)**

Prerequisite: consent of instructor. (H/P/F grading only.)

## **Clinical Research (CLH)**

### **Graduate**

### **200. Introduction to Clinical Research (3)**

Lecture—2 hours; independent study—3 hours. Prerequisite: one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing. Application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training programs; consent of instructor. Introduction to the CRGG program and overview of major clinical research topics. Overview of basic clinical skills needed to accomplish CRGG mentored research project. (Formerly Medical Science 460CR.) (S/U grading only.)—Su. (Su.) Meyers

### **201. Strategies for Grant Writing (2)**

Lecture—2 hours. Prerequisite: consent of instructor; completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing. Application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training programs. Practical skills and strategies to create successful grant proposals in NIH style/format. Generating ideas, identifying and accessing research resources, grant components, specific aims, background and significance, preliminary studies, budgets, and bios. Matriculation through UC system, and resubmissions. (Former course Medical Sciences 461CR.) (S/U grading only.)—Su. (Su.) Ruledge

### **202. Introduction to Clinical Epidemiology and Study Design (3)**

Lecture—25 hours; discussion—10 hours. Prerequisite: completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, (K30) program, or other SOM/CTSC training programs. Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs (cross-sectional, case-control, and cohort). Discussion of principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research. (Formerly Medical Sciences 462CR.) (S/U grading only.)—Su. (Su.) McCurdy, Romano

### **203. Methods in Clinical Research (3)**

Lecture—4 hours; discussion—1 hour; independent study—10 hours. Prerequisite: completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM training programs; consent of instructor. Overview of major

approaches to clinical research, including health services research techniques, informatics, GCRC, and preclinical methodologies to enhance clinical projects. Overview of UCD clinical research support infrastructure. Methodologies applicable to clinical research and its multi-disciplinary perspective. (S/U grading only.)—Su. (Su.) Schweitzer

### **204. The Ethics of Research (1)**

Lecture—3 hours. Prerequisite: consent of instructor. Priority given to those with acceptance into the Clinical Research Graduate Group, K12, T32 or other SOM/CTSC training program. Acquire information about ethical responsibilities; Explore major questions in ethics; Apply ethical principles, concepts and values; Gain an appreciation of the role of trust in scientific research. Recommend three quarters of CLH204. Must enroll in Fall to continue through Spring. (S/U grading only.)—F, W, S. (F, W, S.) Yarborough

### **205. Introduction to Medical Statistics (4)**

Lecture—3 hours; laboratory—2 hours. Prerequisite: completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM training program; consent of instructor. Biomedical applications of statistical methods in clinical, laboratory, population medicine. Graphical/tabular data presentation, probability, binomial, Poisson, normal, t-, F-, and Chi-square distributions, elementary nonparametric methods, simple linear regression/correlation, life tables. Microcomputer applications of statistical procedures in population medicine. (Formerly Medical Sciences 465CR.) (S/U grading only.)—Su. (Su.) Yang

### **207. Team Science (1)**

Lecture/discussion—1 hour. Prerequisite: participation in CTSC Research Education and Training Programs, or consent of instructor. Restricted to 25 students. Today's scientific challenges necessitate cross-disciplinary engagement and high collaboration levels. This course offers guidance on how best to engage in team science to pursue complex questions, work effectively with team members, and produce high impact research that meets society's needs. (S/U grading only.)—S. (S.) Crumley, Meyers

### **208. Introduction to Grant Writing, I (2)**

Lecture/discussion—2 hours; extensive writing. First in a two-quarter series. Scholars are encouraged to enroll in both classes. The two-course sequence provides training in practical aspects of competitive grant writing. The focus is NIH, but information will apply to other funding agencies. (S/U grading only.)—F. (F.) Chedin, Guo, Ozonoff

### **209. Introduction to Grant Writing, II (1)**

Lecture/discussion—1 hour. Prerequisite: course 208; consent of instructor. Restricted to students who have completed course 208. Second in a two-quarter series. Two-course sequence provides training in practical aspects of competitive grant writing. (S/U grading only.)—W. (W.) Chedin, Guo, Ozonoff

### **210Y. Principles and Methods of Comparative Effectiveness Research (4)**

Web virtual lecture—4 hours; discussion—2 hours; project—6 hours; web electronic discussion. Prerequisite: familiarity with research methodology, and a course in introductory statistics; consent of instructor. Provides an introduction to Comparative Effectiveness Research (CER) and methods for conducting CER. (S/U grading only.)—S. (S.) Fancher, Kravitz, Leigh, Melnikow, Romano, Tancredi

### **211. Critical Assessment of the Biomedical Literature (1)**

Lecture/discussion—1 hour. Prerequisite: consent of instructor. Exposes students to topical issues and controversies in the design of interdisciplinary translational research, with an emphasis on critical assessment of the biomedical and health sciences literature. The course extends students' knowledge of study design through practical application. May be repeated three times for credit. (S/U grading only.)—F, W, S. (F, W, S.) Bold, Franks, Lane, Romano

**212. Introduction to Stem Cell Biology (3)**

Lecture/discussion—1 hour. Prerequisite: consent of instructor. Introduction to Stem Cell Biology. Each week will focus on different aspects of stem cells, including general concepts, stem cells in lower organisms, embryonic stem cells and cellular reprogramming. Open to graduate students with a fundamental knowledge of cell biology.—F. (F.) Fierro

**220. Basics of Stem and Progenitor Cells (1)**

Lecture—1 hour. Prerequisite: Molecular, Cellular, and Integrative Physiology 200, 200L; consent of instructor; graduate standing. This is a lecture course designed for graduate students who have experience in cell culture techniques. It is designed to give a broad overview of the field and current cells of interest to the greater research community. (S/U grading only.)—S. (S.) Tarantal

**222. Ethical Issues in Stem Cell Biology (1)**

Lecture/discussion—1 hour. Prerequisite: consent of instructor; graduate standing. Critical presentation and analysis of recent articles in stem cell biology and small group discussions of the ethical issues surrounding this area of research. (S/U grading only.)—W. (W.) Ikemoto, Rich

**230. Congestive Heart Failure, Mechanism of Disease (3)**

Lecture/discussion—2 hours; project. Prerequisite: consent of instructor; graduate standing. Underlying mechanisms of cardiomyopathy and heart failure. Presentation of fundamental knowledge of and recent basic research on heart failure. Student team projects: investigation and presentation of a research topic and bench research project to advance research in the same area.—W. (W.) Knowlton

**231. Current Techniques in Clinical Research (2)**

Lecture—1 hour; clinical activity—3 hours. Prerequisite: consent of instructor and graduate standing; completion of course 250. Current techniques used in clinical research such as electrophysiology, cardiovascular surgery, cardiac catheterization and echocardiography, team science, and patient management. Lectures are presented by experts on each technique, with an emphasis on use in translational research. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

**233. Molecular Mechanisms of Disease: Cancer (3)**

Lecture/discussion—2 hours; project—3 hours. Prerequisite: consent of instructor. Restricted to students pursuing the designated emphasis in Translational Research; graduate standing. Cutting edge of research on underlying mechanisms of cancer development, progression and prevention-clinical trials/drug development, signaling pathways and molecular mechanisms of cancer development, recent basic research on cancer stem cells, genetics and epigenetic events and animal models used.—W. (W.) Goldkorn

**240. Predoctoral Clinical Research Training Program Research Integration (1)**

Seminar—0.5 hours; discussion—0.5 hours. Prerequisite: consent of instructor and enrollment in the Predoctoral Clinical Research Training Program in the CTSC, School of Medicine. Alternating sessions: journal club, seminar/discussion, and research integration sessions. May be repeated three times for credit (S/U grading only.)—F, W, S. (F, W, S.) Kenyon

**245. Biostatistics for Biomedical Science (4)**

Lecture—4 hours. Prerequisite: course 244 or Public Health Sciences 244 or the equivalent; consent of instructor. Analysis of data and design of experiments for laboratory data. (Same course as Public Health Sciences 245.)—W. (W.) Kim

**246. Biostatistics for Clinical Research (4)**

Lecture—4 hours. Prerequisite: course 245 or Public Health Sciences 245. Emphasizes critical biostatistics for clinical research and targets biomedical audience. Students will develop understanding for basic planning and analysis of clinical studies and learn to develop collaborations with biostatisticians. (Same

course as Public Health Sciences 246.) May be repeated for credit. Offered in alternate years.—W. Qi

**247. Statistical Analysis for Laboratory Data (4)**

Lecture—4 hours. Prerequisite: course 245 or Public Health Sciences 245. Statistical methods for experimental design and analysis of laboratory data including gene expression arrays, RNA-Seq, and mass spec. (Same course as Public Health Sciences 247.)—S. (S.) Rocke

**250. Integrating Medicine Into Basic Science (6)**

Lecture—3.75 hours; discussion—6 hours; seminar—2.5 hours; clinical—8 hours. Prerequisite: consent of instructor. Graduate standing; acceptance into HHMI Integrating Medicine into Basic Science program. Four-week summer institute consisting of didactic lectures, reading assignments, group discussions, and clinical rotations to acculturate students to the human medical environment; integrate medical principles, physiology and pathophysiology into basic research; introduce high-impact clinical studies related to medicine and health. (S/U grading only.)—Su. (Su.) Knowlton, Robbins, Stevenson

**290A. Hot Topics in Clinical Research (1)**

Seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Seminars presented by guest lecturers on subjects of their own research activities. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**290B. Hot Topics in Stem Cell Biology (1)**

Seminar—1 hour. Prerequisite: graduate standing. Seminars presented by guest lecturers on subjects of their own research. (S/U grading only.)—F, W, S. (F, W, S.)

**290C. Literature in Translational Research (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Critical presentation and analysis of recent journal articles in translational research by students. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.) Knowlton

**290D. Literature in Translational Research (1)**

Discussion—1 hour. Prerequisite: consent of instructor; graduate standing. Critical presentation and analysis of recent journal articles in translational research by students. May be repeated for credit. (S/U grading only.)—F. (F.) Knowlton

**298. Group Study in Clinical Research (1-5)**

Prerequisite: consent of instructor. Special topics in Clinical Research appropriate for group study at the graduate level. Restricted to students enrolled in the Mentored Clinical Research Training Program. (S/U grading only.)

**299. Clinical Research (1-5)**

Prerequisite: consent of instructor. Independent research and special topics in clinical research appropriate for graduate level. Restricted to students enrolled in the Mentored Clinical Research Training Program. (S/U grading only.)

**Dermatology (DER)****Upper Division****192. Internship in Cutaneous Biology (1-4)**

Internship—8-20 hours; final report. Prerequisite: upper division standing or consent of instructor. Approval of project prior to internship by preceptor. Supervised work experience involving research on the skin. (P/NP grading only.)—Isseroff, Izumiya, Liu, Murphy, Takada

**199. Special Study in Cutaneous Biology (1-4)**

Prerequisite: advanced undergraduate standing and/or consent of instructor. Special study by individual arrangement of specialized topics in biology of skin. Work may be assigned readings, laboratory research or a combination. (P/NP grading only.) Isseroff, Izumiya, Liu, Murphy, Takada

**Graduate****299. Research in Cutaneous Biology (1-12)**

Laboratory—3-36 hours. Prerequisite: consent of instructor. Independent research in cellular and biochemical mechanisms of cutaneous biology and pathology. (S/U grading only.) Isseroff, Liu

**Professional****420. Integumentary System (2)**

Lecture/discussion—3 hours; clinical activity—0.25 hours. Prerequisite: approval of School of Medicine Committee on Student Promotions. Restricted to Medical students only; student must have passed all SOM Year 1 courses. Cell biology, pathology, and physical diagnosis of the skin. Recognition of normal variations, and common or important dermatoses. Patient demonstrations of select conditions. (P/F grading only.)—F. (F.) Eisen, Isseroff

**460. Dermatology Clinical Clerkship (6)**

Clinical activity (inpatient/outpatient service)—40 hours for four weeks. Prerequisite: completion of three years of medical school; or consent of instructor. Limited enrollment. Observation and participation in dermatology clinics/practice and participation in Ward Rounds and Dermatology Clinics at UC Davis Medical Center, Kaiser, and private practitioner offices.—F, W, S, Su. (F, W, S, Su.) Fazel

**465. Specialty Externship in Dermatology (3-16)**

Clinical Activity—30 hours. Prerequisite: consent of instructor. Externship provides in-depth exposure to one of a variety of subspecialties in Dermatology. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Fazel

**466. Away Acting Internship in Dermatology (3-18)**

Clinical Activity—40 hours; lecture—6 hours. Prerequisite: consent of instructor. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Fazel

**470. Introduction to Dermatopathology (6)**

Clinical—20 hours; independent study—20 hours; lecture/discussion—6 hours. Prerequisite: previous rotation in a Dermatology Clerkship; consent of instructor. Restricted to fourth year medical student. Integrated, multi-specialty approach to the microscopic diagnosis of inflammatory and neoplastic skin disorders. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Barr, Fung, Konia

**475. Telehealth in Dermatology (6)**

Clinical activity—4 hours; project—36 hours. Restricted to Medical students. Introduction to the application of telehealth in dermatology to provide diagnoses, consultation, treatment, and education. Participate in teledermatology clinics with remote sites throughout California, conduct telehealth project(s), and review the latest literature in telehealth application in improving healthcare access. May be repeated up to six units for credit for additional time needed to complete telehealth project or to work on new telehealth projects. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Armstrong

**480. Insights in Dermatology (1-3)**

Clinical activity—3-9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Clinical experience limited to observation of delivery of dermatologic care and attendance at some conferences. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**495. Wound Healing: From Bench to Bedside (6)**

Clinical activity—12 hours; laboratory—8 hours; autotutorial—15 hours; term paper. Prerequisite: consent of instructor. Restricted to medical students only. An integrated, multi-specialty approach to clinical soft tissue wound healing.—F, W, S, Su. (F, W, S, Su.) Isseroff

**498. Special Topics in Clinical Dermatology (1-6)**

Independent study—3-18 hours. Prerequisite: medical students with consent of instructor. Individually arranged study of special topics in clinical dermatology determined by student and instructor. Assigned readings and/or clinical examination of selected patients. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Armstrong

**499. Research in Cutaneous Biology (1-12)**

Laboratory—3-36 hours. Prerequisite: consent of instructor. Research, either laboratory or clinical, on ongoing projects within the department under supervision of faculty. (H/P/F grading only.)—Armstrong

**Emergency Medicine (EMR)****Lower Division****92. Emergency Medicine Clinical Research Internship (1-4)**

Prerequisite: undergraduate student in good academic standing at UC Davis; consent of instructor. Intended to give the undergraduate student an opportunity to conduct "hands-on" clinical research in the Emergency Department. Through the lecture/discussion, students will learn the basics of conducting and developing clinical research studies, using examples from ongoing studies. May be repeated for credit up to four units. Units awarded will depend on hours worked.—F, W, S, Su. (F, W, S, Su.) Nishijima

**Upper Division****192. Emergency Medicine Clinical Research Internship (1-4)**

Internship—6-12 hours. Prerequisite: undergraduate student in good academic standing at UC Davis; consent of instructor. Intended to give the upper division undergraduate student an opportunity to conduct "hands-on" clinical research in the Emergency Department. Through the lecture/discussion, students learn the basics of conducting and developing clinical research studies. May be repeated two times for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.) Nishijima

**199A. Special Study for Advanced Undergraduates (4-12)**

Prerequisite: experienced RA's who have successfully performed in the EMRAP program for a minimum of 3 quarters; consent of instructor; must have database skills. For students interested in working on specific EM projects in a more extensive way. Must commit at least four hours per week for two quarters. Will be awarded credit upon completion of course 199B. (Deferred grading only, pending completion of sequence.)—F, W, S, Su. (F, W, S, Su.) Nishijima

**Professional****401. Preceptorship in Emergency Medicine (1-6)**

Clinical activity—10 hours. Prerequisite: consent of instructor. Exposure to the specialty of Emergency Medicine and observation of a wide array of patients in the Emergency Department. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Bing

**430. Introduction to Medical Toxicology (3-6)**

Prerequisite: fourth-year medical student in good standing; consent of instructor. In-depth review of clinical and medical toxicologic emergencies. Rotation includes contact with toxicology trained emergency faculty, didactic lectures, journal club, simulation training and exposure to a very busy poison control center. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Ford

**435. Wilderness Medicine (3-6)**

Lecture/discussion—20 hours; clinical activity—12 hours; independent study—8 hours. Prerequisite: consent of instructor. Elective is designed as an introductory course for students who want to explore how physicians can interact with the environment in aus-

tere conditions through lectures, hands-on/field experience, and case-based learning. (H/P/F grading only.)—Bing

**440. Emergency Medicine Clerkship (6)**

Clinical activity—46 hours; lecture/discussion—4 hours. Prerequisite: satisfactory completion of Medicine, Surgery, and Pediatric Clerkship. Students complete clinical shifts in the Emergency Department, functioning as Acting Intern. Treat a wide variety of patients and problems under the supervision of the EM Attending. Students are expected to take focused histories and present in clear, concise fashion. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Jones

**445. Emergency Medicine Ultrasound for Fourth-Year Medical Student (3-6)**

Prerequisite: fourth-year Medical Student in good standing; interest in Emergency Medicine or Critical Care is recommended; course 440 or equivalent is recommended prior to the rotation. Limited enrollment. Intended for students interested in learning both the technical and cognitive skills of bedside ultrasound. Emphasis will be on the use of ultrasound in emergency medicine as a diagnostic tool and in procedural guidance. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Kelley

**450. Ambulatory Externship in Emergency Medicine (3-18)**

Restricted to MS4 students in good standing; externships/away rotations only. Credit will be given for approved non-AI Emergency Medicine courses at other institutions to which there is not an equal learning experience at UC Davis. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Jones

**465. Externship in Emergency Medicine (3-9)**

Clinical activity—36 hours; lecture/discussion—4 hours. Prerequisite: satisfactory completion of Medicine, Surgery and Pediatrics. Students complete clinical shifts in the Emergency Department, functioning as Acting Intern. Treat a wide variety of patients and problems under the supervision of the EM Attending. Students are expected to take focused histories and present in clear, concise fashion. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Jones

**470. Pediatric Emergency Medicine Clerkship (6)**

Clinical activity—36 hours; lecture/discussion—4 hours. Prerequisite: satisfactory completion of Medicine, Surgery, Pediatrics. Restricted to fourth-year medical student in good standing only. See patients in the Pediatric area of the Emergency Department under the supervision of an Emergency Medicine Attending. Emphasis on recognition and management of the acutely ill pediatric patient and treatment of common pediatric complaints. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Vance

**480. Understanding Health Policy: A Focus on Analysis and Translation (1-6)**

Lecture—4 hours; discussion—16 hours; independent study—10 hours. Prerequisite: consent of instructor. The paradigm of healthcare delivery in the US is changing rapidly. To prepare the next generation of physician leaders, this course will provide students with the skills, tools, and knowledge needed to impact decisions made at the policy level. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Moulin

**490. Emergency Procedures Elective (3)**

Lecture/discussion—24 hours; web virtual lecture—8 hours; tutorial—4 hours; independent study—4 hours. Prerequisite: current basic life support (BLS) certification. Restricted to fourth-year medical student in good standing only. Simulator-based skills training for emergency procedures. Topics include airway management, central venous access, chest tube placement, and general critical care resuscitation skills. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Barton

**493A. Cardiac Arrest, Resuscitation and Reparfusion SSM (3)**

Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent on instructor. Restricted to UC Davis School of Medicine students only. Special Studies

Module, a four week course specific to the topics of Cardiac Arrest, Resuscitation and Reparfusion. (Deferred grading only, pending completion of sequence. H/P/F grading only.)—F, (F,) Barnes, Laurin

**493B. Cardiac Arrest, Resuscitation and Reparfusion SSM (3)**

Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent on instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, a four week course specific to the topics of Cardiac Arrest, Resuscitation and Reparfusion. (Deferred grading only, pending completion of sequence. H/P/F grading only.)—F, S, (F, S,) Barnes, Laurin

**499. Research (2-18)**

Laboratory—full time (1 to 12 weeks). Prerequisite: consent of instructor. Elective where topics may be selected in either basic or clinical research areas of Emergency and/or Critical Care Medicine. The goals will be tailored to each individual student. Enrollment requires prior discussion and consent of instructor. (H/P/F grading only.)

**Family and Community Medicine (FAP)****Lower Division****92C. Primary Care Clinics (2)**

Clinical activity—6-8 hours; seminar—2 hours; lecture—1-2 hours. Prerequisite: consent of instructor, enrollment at the UC Davis campus, for freshman and sophomore students. Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience exposes lower division students to health care delivery, patient histories, physical examinations, health promotion, disease prevention, diagnosis; treatment of episodic, acute, chronic illness; appropriate referral and follow-up. May be repeated for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.) Edison-Ton, Hitzeman, Smith

**Upper Division****192C. Primary Care Clinics (1-2)**

Clinical activity—6-8 hours; seminar—2 hours; lecture—1-2 hours. Prerequisite: consent of instructor, enrollment at the UC Davis campus, upper-division standing. Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience introduces students to health care delivery, patient histories and physical examinations, health promotions and disease prevention, diagnosis and treatment of episodic, acute and chronic illness, basic laboratory testing and appropriate referral and follow-up. May be repeated for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.) Edison-Ton, Hitzeman, Smith

**195. Health Care to Underserved Populations (1)**

Lecture—1 hour. Prerequisite: sociology, political science, or applied behavioral science background recommended, or registration in medical school. Discusses sociocultural perspectives of underserved populations in California impacting their health; roles of family/interpersonal relationships in making health care decisions; and clinician's perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine. May be repeated for credit. (P/NP grading only.)—F, S, (F, S,) Edison-Ton, Nesbitt, Srinivasan

**Professional****401. Introductory Preceptorship in Family Practice (3-9)**

Clinical activity—20-40 hours. Prerequisite: completion of first year of medical training. Preceptorship in family practice offered as an introduction to clinical medicine. 20 hours or 40 hours per week in a family physician's office, doing patient interviews, history-taking, and performing physical exams. (H/P/F grading only.)—S, Su. (S, Su.) Edison-Ton

**405. The Healer's Art (1)**

Lecture—0.6 hours; workshop—3 hours. Prerequisite: consent of instructor. Limited to first-year medical students. Learning to strengthen your humanity and remain open-hearted can make the difference between professional burnout and a fulfilling life. Opportunity to learn tools for self care, healing loss, finding meaning, strengthening commitment and becoming a true physician. (P/F grading only.)—W. (W.) Eidson-Ton

**411. Selected Studies of Systems for Chronic Illness Care (3)**

Clinical activity—4 hours; discussion—4 hours. Prerequisite: course 400A, 400B, 400C, medical students with consent of instructor. Understanding of chronic illness, particularly diabetes, participation in patient care, alternative techniques. May be repeated one time for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Balsbaugh

**430. Family Medicine Clerkship (6-12)**

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Family medicine clerkship for third year medical students. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Eidson-Ton, Srinivasan

**430FA. SJVP Longitudinal Primary Care Clerkship at UCSF Track 1 (4)**

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—S. (S.) Eidson-Ton, Srinivasan

**430FB. SJVP Longitudinal Primary Care Clerkship at UCSF Track 1 (4)**

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—Su. (Su.) Eidson-Ton, Srinivasan

**430FC. SJVP Longitudinal Primary Care Clerkship at UCSF Track 1 (4)**

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Eidson-Ton, Srinivasan

**430FD. SJVP Longitudinal Primary Care Clerkship at UCSF Track 2 (4)**

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Eidson-Ton, Srinivasan

**430FE. SJVP Longitudinal Primary Care Clerkship at UCSF Track 2 (4)**

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of

instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—W. (W.) Eidson-Ton, Srinivasan

**430FF. SJVP Longitudinal Primary Care Clerkship at UCSF Track 2 (4)**

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—S. (S.) Eidson-Ton, Srinivasan

**430K. ACE-PC Family Medicine Clerkship (6)**

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Family medicine clerkship for ACE-PC Program. (H/P/F grading only.)—S. (S.) Eidson-Ton, Srinivasan

**430KA. ACE-PC Family Medicine Clerkship A (1.5)**

Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Longitudinal family medicine clerkship for ACE-PC Program. (H/P/F grading only; deferred grading only, pending completion of sequence.)—Su. (Su.) Eidson-Ton, Srinivasan

**430KB. ACE-PC Family Medicine Clerkship B (1.5)**

Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Longitudinal Family medicine clerkship for ACE-PC Program. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Eidson-Ton, Srinivasan

**430KC. ACE-PC Family Medicine Clerkship C (1.5)**

Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Longitudinal Family medicine clerkship for ACE-PC Program. (H/P/F grading only; deferred grading only, pending completion of sequence.)—W. (W.) Eidson-Ton, Srinivasan

**430KD. ACE-PC Family Medicine Clerkship D (1.5)**

Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Longitudinal Family medicine clerkship for ACE-PC Program. (H/P/F grading only; deferred grading only, pending completion of sequence.)—S. (S.) Eidson-Ton, Srinivasan

**430R. Rural PRIME Family Medicine Clerkship (12)**

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Eight week primary care clerkship for rural prime third year medical students. Eight weeks of family medicine training at a rural site. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Eidson-Ton

**430TA. TeachMS Longitudinal Primary Care Clerkship (A) (4)**

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups,

rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Eidson-Ton

**430TB. TeachMS Longitudinal Primary Care Clerkship (B) (6)**

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—W. (W.) Eidson-Ton, Srinivasan

**430TC. TeachMS Longitudinal Primary Care Clerkship (C) (2)**

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—S. (S.) Eidson-Ton, Srinivasan

**431. Primary Care Continuity Clinic (1)**

Clinical activity—4 sessions; project—1 session. Prerequisite: completion of the Pre-Clinical Curriculum; consent of instructor. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.)—S. (S.) Eidson-Ton, Schwartz, Srinivasan

**431A. Primary Care Continuity Clinic (1)**

Clinical activity—4 sessions; project—1 session. Prerequisite: completion of the Pre-Clinical Curriculum; consent of instructor. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only; deferred grading only, pending completion of sequence.)—Su. (Su.) Eidson-Ton, Schwartz, Srinivasan

**431B. Primary Care Continuity Clinic (1)**

Clinical activity—4 sessions; project—1 session. Prerequisite: completion of the Pre-Clinical Curriculum; consent of instructor. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Eidson-Ton, Schwartz, Srinivasan

**431C. Primary Care Continuity Clinic (1)**

Clinical activity—4 sessions; project—1 session. Prerequisite: completion of the Pre-Clinical Curriculum; consent of instructor. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only; deferred grading only, pending completion of sequence.)—W. (W.) Eidson-Ton, Schwartz, Srinivasan

**431D. Primary Care Continuity Clinic (1)**

Clinical activity—4 sessions; project—1 session. Prerequisite: completion of the Pre-Clinical Curriculum; consent of instructor. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only; deferred grading only, pending completion of sequence.)—S. (S.) Eidson-Ton, Schwartz, Srinivasan

**434. Primary Care Clinics-Clinica Tepati (3-12)**

Clinical activity—32-36 hours; seminar—0-2 hours; lecture—1-2 hours. Open to medical students in all four years of medical school. Medical students will learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of

physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Hitzeman, Tu

#### **435. Primary Care Clinics-Imani Clinic (3-12)**

Clinical activity—32-36 hours; seminar—0-2 hours; lecture—1-2 hours. Open to medical students in all four years of medical school. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Smith

#### **436. Continuity Clinic in Primary Care-Shifa Clinic (3-12)**

Clinical activity—32-36 hours; seminar—0-2 hours; lecture—1-2 hours. Open to medical students in all four years of medical school. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Yasmeen

#### **437. Primary Care Clinics-Knights Landing (3)**

Clinical activity—2-3 hours; lecture—1 hour. Must complete an application and interview prior to registering. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations in the community of Knights Landing. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Eidson-Ton

#### **439D. Directed Clinical Studies in Family Medicine (1-12)**

Clinical activity—40 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Eidson-Ton

#### **439R. Directed Studies in Family Medicine (1-12)**

Clinical activity—30 hours; independent study—10 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Eidson-Ton

#### **444. Advanced Preceptorship in Family Medicine (3-18)**

Clinical activity—40 hours. Prerequisite: completion of third-year primary care plus clerkship or consent of instructor. Open to medical students only. Preceptorships with primary care physicians in a variety of settings. Acquisition skills to evaluate and develop a treatment plan for patients with common medical problems seen by primary care physicians in an outpatient setting. May be repeated up to 18 units of credit. (H/P/F grading only.)—F, W, S, Su. Eidson-Ton

#### **450. CAM in Family & Community Health (3-18)**

Variable—20-40 hours. Intended to grant units for away rotations; not offered at the UC Davis Medical Center. Complementary and alternative medicine courses at away institutions that cover various aspects of integrative medicine, including but not limited to: botanicals, homeopathy, mind/body, naturopathy, nutrition, traditional Chinese medicine, osteopathy, and energy medicine. (H/P/F grading only.) Offered irregularly.—F, W, S, Su. (F, W, S, Su.) Eidson-Ton

#### **460. Geriatrics in Community Health (3-6)**

Fieldwork—24 hours; clinical activity—12 hours; lecture—4 hours. Prerequisite: course 430. Visits to community agencies including mental health teams, adult day health centers, a diagnostic and research center, and case management specialists. Observation and participation in MMSE's, patient-family conferences, interdisciplinary team meetings, neuropsychiatric testing and home visit evaluations. (H/P/F grading only.)—F, W, S, Su. Lin

#### **468. International Preceptorship (3-12)**

Clinical activity—40 hours. Prerequisite: medical student with consent of instructor. Preceptorship with a family practitioner in a foreign country (arranged by student contact or with assistance of the Family and Community Medicine Department.) Participate in clinical activities, analyze and report characteristics of the practice. May be repeated up to 12 units of credit. (H/P/F grading only.)—F, W, S, Su. Edison-Ton

#### **469. Inpatient Acting Internship in Family Medicine (3-12)**

Clinical activity—40 hours. Prerequisite: completion of third-year of medical school or consent of instructor. Open to medical students only. Comprehensive primary medical care of inpatients on a family medicine hospital service. Available sites are university-based family medicine residency programs and programs within the UC Davis Network of Affiliated Family Medicine Residency Programs. May be repeated up to 12 units of credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Eidson-Ton

#### **470. Inpatient Clinical Elective in Family Medicine (3-12)**

Clinical activity—40 hours. Prerequisite: completion of third-year of medical school or consent of instructor. Open to medical students only. Comprehensive primary medical care of patients on a family medicine hospital service. Usually includes inpatient and outpatient experience. May be repeated up to 12 units of credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Eidson-Ton

#### **475. Combined Inpatient/Outpatient Clinical Elective in Family Medicine (3-12)**

Clinical activity—40 hours. Prerequisite: completion of third-year of medical school or consent of instructor. Open to Medical students only. Combined inpatient and outpatient elective. Consists of comprehensive primary medical care of patients on a family medicine hospital service and in a family medicine outpatient clinic. May be repeated up to 12 units for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Eidson-Ton

#### **488. Selected Studies in Family Practice (1-9)**

Prerequisite: medical students with consent of instructor. Assigned readings in family practice to increase understanding on selected topics relating to family medicine and primary health care delivery; visits to and written analysis of selected health care programs; and/or exposure to family practice with a community physician preceptor who is a member of the clinical faculty. May be repeated up to 9 units of credit.—F, W, S, Su. Eidson-Ton

#### **490. Health Care to Underserved Populations (1)**

Lecture—1 hours. Prerequisite: Sociology, Political Science, or Applied Behavioral Science background recommended, or registration in medical school. Discusses sociocultural perspectives of underserved populations impacting health; roles of family/interpersonal relationships in making health care decisions; the nature of ethnic/racial/socioeconomic health care disparities; and clinicians' perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine. May be repeated for credit. (P/F grading only.)—F, W, (F, W.) Eidson-Ton, Nesbitt, Srinivasan

#### **493. Aging and Health (6)**

Seminar—12 hours. Prerequisite: consent of instructor. Is disease and infirmity the inevitable consequence of aging? We will spend four weeks exploring this question by reviewing the biology of

aging, physiologic changes seen in aged individuals and disease processes commonly found in elderly persons. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Lin

#### **495. LGBTIQQA Healthcare Lecture Series (1)**

Lecture—6 sessions. Increase the awareness of medical issues surrounding the LGBTIQQA community and arm students with knowledge of the health disparities the community faces. Provide better quality care to the LGBTIQQA patients cared for as physicians. May be repeated for credit. (P/F grading only.)—W. (W.) Callahan

#### **498. Directed Group Study (1-5)**

Variable—3-15 hours. Explore in-depth various topics in primary care. Extensive contact with and oversight by instructor. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Edison-Ton

#### **499. Research (1-12)**

Prerequisite: medical students with consent of instructor. Research in various aspects of the health care delivery system. (H/P/F grading only.)

#### **Human Physiology (HPH)**

##### **Lower Division**

###### **99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

##### **Upper Division**

###### **192. Internship in Human Physiology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in physiology and related fields. (P/NP grading only.)

###### **198. Directed Group Study (1-5)**

To be arranged. Prerequisite: consent of instructor. Directed reading, discussion and/or laboratory experience on selected topics. (P/NP grading only.)

###### **199. Special Study for Advanced Undergraduates (1-5)**

Laboratory—3-15 hours; undergraduate research project. Prerequisite: senior standing in biology, chemistry, physics, psychology, or engineering. (P/NP grading only.)

##### **Graduate**

###### **210A. Advanced Physiology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Physiology Ph.D. program, or consent of instructor. Advanced course in general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. (Same course as Physiology 210A.)—F. (F.) Payne

###### **298. Group Study (1-5)**

Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved.

###### **299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

##### **Professional**

###### **400. Human Physiology (6)**

Lecture—3 hours; laboratory—2 hours. Medical student only. General and cellular physiology of neurons, muscle, and epithelial cells and systemic physiology of cardiovascular, respiratory, gastrointestinal, and renal systems. (Deferred grading only, pending completion of sequence.) (P/F grading only.)—F, Su. (F, Su.) Ferns, Payne

###### **403. Medical Neuroanatomy (5)**

Lecture—3 hours; laboratory—1 hours; discussion/laboratory—1 hour. Prerequisite: Successful completion of course 400, block 1. Restricted to medical students only. Anatomy of the normal human nervous system, to include gross external and internal morphology of brain and spinal cord, and function neuroanatomy of motor, sensory and cognitive systems.

Incorporates application of neuroanatomy to clinical problem solving. (Same course as Cell Biology and Human Anatomy 403.) (P/F grading only.)—Su. (Su.) Blankenship, Gross

### **493. Physiological Principles in SICU SSM (6)**

Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor. Restricted to UC Davis School of Medicine students only. Special Study Module, a four week course on the topic: Care of the Critically Ill Surgical Patient: Use of Physiological Principles to Guide Treatment of Patients with Common Surgical Problems. (Same course as Surgery 493C.) (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Cala, Holcroft

### **497T. Tutoring in Human Physiology (1-5)**

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)—Ferns, Payne

### **498. Directed Reading and Group Study (1-4)**

Discussion—2-8 hours. Prerequisite: medical student. Directed reading and discussion on selected topics in human physiology. (H/P/F grading only.)

### **499. Research (1-6)**

Prerequisite: medical students with consent of instructor. Laboratory investigation on selected topics. (H/P/F grading only.)

## **Internal Medicine (IMD)**

### **Lower Division**

#### **92. Internship (1-4)**

Internship—3-12 hours. Prerequisite: lower division standing and consent of instructor. Supervised internship in internal medicine and related fields. (P/NP grading only.)—Last

#### **98. Directed Group Study (1-2)**

Seminar—1-2 hours. Prerequisite: lower division standing and consent of instructor. Directed group study in medicine and related fields. (P/NP grading only.)—Last

#### **99. Undergraduate Research in Medicine: Molecular and Cell Biology (1-3)**

Prerequisite: consent of instructor. (P/NP grading only.)—Last

### **Upper Division**

#### **164. Practicum in Community Health Clinic: Bayanihan Clinic (1-2)**

Clinical activity—5 hours. Through active participation in the medical aspects of community health clinics, the undergraduate student gains knowledge of the organization, administration, and problem-solving capabilities. May be repeated for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.) Guerrero

#### **192. Internship in Internal Medicine (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing. Supervised work experience in internal medicine and related fields. (P/NP grading only.)

#### **194. Practicum in Community Health Clinics (1-3)**

Clinical activity—5-15 hours on Saturday mornings and during the week as necessary, excluding holidays. Prerequisite: consent of instructor. The undergraduate student, through active participation in the medical aspects of community health clinics, gains knowledge of the organization, administration, and problem-solving capabilities of these primary care facilities. May be repeated for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.) Kumagai

#### **198. Directed Group Study (1-2)**

Seminar—1-2 hours. Prerequisite: consent of instructor. Directed group study in medicine and related fields. (P/NP grading only.)—Last

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

### **Graduate**

#### **214. Topics in Medical Ethics (1)**

Seminar—1 hour. The complex moral, legal, and ethical dilemmas that patients, families, and health care providers face in today's clinics. May be repeated one time for credit. (S/U grading only.)—F.

#### **220D. Cardiovascular System (2.5)**

Lecture/discussion—5.5 hours. Prerequisite: Human Physiology 200, graduate student status and consent of instructor. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders. (P/F grading only.)—W. (W.) Laslett

#### **250. Medicine and the Law (3)**

Lecture/discussion—2 hours; project—2 hours. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (S/U grading only.)—W. Rich

#### **290C. Controversies in Clinical Research (1)**

Seminar—3 hours. Clinical Research Study design and data analysis related to controversial research areas. Presentations assigned to and given by faculty/student teams. May be repeated for credit. (S/U grading only.)—S. (S.) Lane, Meyers

### **Professional**

#### **414. One Health: A Course on Global Health (1)**

Conference—8 hours. Global health problems are complex and require culturally-sensitive, socially-acceptable, and action-oriented approaches to create practical and cost-effective solutions. Will examine major health problems created by the convergence of human, animal, and environmental influences. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Wilkes

#### **416. Summer Institute on Race and Health (6)**

Independent study—30 hours. Prerequisite: consent of instructor. Limited enrollment. Using field trips, media, readings, and clinical experiences, 8-10 first year medical students will explore issues of race, health disparities and related issues in a 4 week institute during the summer break. (P/F grading only.)—W. (W.) Fancher, Fernandez, Garcia, Murray-Garcia

#### **420A. Hematology (2)**

Lecture/discussion—1 hour; discussion—1 hour. Prerequisite: consent of instructor. Restricted to Medical students only. Malignant disorders of blood cells and transfusion therapy. Covers acute leukemia, myelodysplasia, myeloproliferative disorders, lymphoma, and myeloma. (P/F grading only.)—F. (F.) O'Donnell

#### **420B. Gastrointestinal System (2.5)**

Lecture—2 hours; discussion—2 hours. Prerequisite: approval of Committee on Student Progress. Restricted to Medical students only. Basic pathophysiological principles of digestive diseases on which clinical concepts and judgments can be developed. Emphasis on pathophysiologic basis of gastroenterological and hepatic disorders with discussion of major disorders and their diagnosis and management. (P/F grading only.)—W. (W.) Terrado

#### **420C. Pulmonary & Critical Care Medicine (2.5)**

Laboratory/discussion—5.5 hours. Prerequisite: approval of SOM's Committee on Student Promotions. Restricted to Medical students only; student must pass all SOM Year 1 courses. Clinical aspects of respiratory anatomy, physiology, and pathology. Diagnostic procedures and a description of the major pulmonary diseases & disorders, and critical care medicine. (P/F grading only.)—F. (F.) Stollenwerk

### **420D. Cardiovascular System (2.5)**

Lecture/discussion—5.5 hours. Prerequisite: Approval of the School of Medicine Committee on Student Promotions. Restricted to Medical students only; student must pass all SOM Year 1 courses. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders. (P/F grading only.)—F. (F.) Venugopal

#### **420E. Nephrology (2)**

Lecture—2 hours; discussion—2 hours; laboratory—2 hours. Prerequisite: approval of Student Progress Committee. Fundamental aspects of disorders of body water, electrolytes and acid/base balance; major categories and mechanisms of parenchymal renal diseases; urinary tract infections. (P/F grading only.)—W. Yean

#### **430. Medicine Clerkship (12)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Clerkship is divided into two, four-week blocks, one each at UCDMC and at Kaiser Hospitals. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.)—F, W, S, Su. Prescott

#### **430FA. SJVP Longitudinal Medicine Clerkship at UCSF Track 1 (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)—S. (S.) Aronowitz, Johl

#### **430FB. SJVP Longitudinal Medicine Clerkship at UCSF Track 1 (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)—Su. (Su.) Aronowitz, Johl

#### **430FC. SJVP Longitudinal Medicine Clerkship at UCSF Track 1 (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Aronowitz, Johl

#### **430FD. SJVP Longitudinal Medicine Clerkship at UCSF Track 2 (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Aronowitz, Johl

#### **430FE. SJVP Longitudinal Medicine Clerkship at UCSF Track 2 (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty.

On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.) —W. (W.) Aronowitz, Johl

#### **430F. SJVP Longitudinal Medicine Clerkship at UCSF Track 2 (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.) —S. (S.) Aronowitz, Johl

#### **430TA. TeachMS Longitudinal Medicine Clerkship (A) (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.) —F. (F.) Aronowitz, Johl

#### **430TB. TeachMS Longitudinal Medicine Clerkship (B) (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.) —W. (W.) Aronowitz, Johl

#### **430TC. TeachMS Longitudinal Medicine Clerkship (C) (2)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.) —S. (S.) Aronowitz, Johl

#### **439D. Directed Clinical Studies in Internal Medicine (1-12)**

Clinical activity—40 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) —F, W, S, Su. (F, W, S, Su.)

#### **439R. Directed Studies in Internal Medicine (1-12)**

Clinical activity—30 hours; independent study—10 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) —F, W, S, Su. (F, W, S, Su.)

#### **450A. Medicine and the Law (1.5)**

Seminar—2 hours; discussion—2 hours. Prerequisite: consent of instructor. Restricted to Medical students only. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (Deferred grading only, pending completion of sequence. H/P/F grading only.) Offered irregularly.—W. (W.) Rich

#### **450B. Medicine and the Law (1.5)**

Seminar—2 hours; discussion—2 hours. Prerequisite: consent of instructor. Restricted to Medical students only. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (Deferred grading only, pending completion of sequence. H/P/F grading only.) Offered irregularly.—S. (S.) Rich

#### **459. Oncology: Research and Treatment of Cancer (2)**

Lecture/discussion—2 hours. Prerequisite: second-, third-, or fourth-year medical student and/or consent of instructor. Comprehensive review of current treatment practices of cancer and state-of-the-art research impacting treatment and prevention of cancer. Emphasis on epidemiology, molecular biology, and pharmacology. (H/P/F grading only.) —F. (F.) DeGreggio

#### **460. Correctional Health Care Clerkship (1-4)**

Clinical activity—full time. Prerequisite: fourth-year medical student in good academic standing; consent of instructor. Covers Correctional Health delivery and the effects of detention and incarceration on health status. Special emphasis on problems unique to health care delivery in a prison setting. Student will spend time in clinical settings at three prison facilities. (H/P/F grading only.) —F, W, S, Su. (F, W, S, Su.) Silva

#### **461. Mather VA Internal Medicine AI (6)**

Clinical Activity—50 hours; lecture/discussion—5 hours; independent study—5 hours. Prerequisite: consent of instructor. Limited enrollment. Acting Internship in Internal Medicine for qualified 4th year Medical Students from the UC Davis School of Medicine at the Sacramento VA Hospital. Experiences will somewhat mirror those of AIs at UCDMC. May be repeated for credit. (H/P/F grading only.) —F, W, S, Su. (F, W, S, Su.) Jagadeesan, Tran

#### **462. Medicine Wards AI (6)**

Clinical activity—40 hours. Prerequisite: Medical Sciences 431; consent of instructor; demonstrated ability to accept responsibility. Limited enrollment. Assume role of acting intern and be primary physician on medical ward under direction of medical resident and staff. Teams I-V take call every fifth night. Emphasis on evidence-based inpatient care. May be repeated for credit. (H/P/F grading only.) —F, W, S, Su. (F, W, S, Su.) Johl

#### **463. Acting Internship in Medicine Intensive Care Unit (MICU) (3-6)**

Clinical activity—40 hours. Prerequisite: completion of third year in medical school; consent of Director of MICU. Limited enrollment. At UCDMC, student functions as acting intern on MICU service under direction of medical resident and staff. Responsibility for patients admitted to MICU. On call in hospital every fourth night. May be repeated for credit. (H/P/F grading only.) —F, W, S, Su. (F, W, S, Su.) Sandrock

#### **464. Bayanihan Primary Care Clinic (3)**

Clinical activity—6 hours. Prerequisite: consent of instructor. Restricted to medical students in all four years of medical school. Under the guidance and supervision of a physician, medical students will learn patient history taking, medical documentation, counseling, diagnosis and treatment of patients with chronic and acute disease. Provides exposure to the special needs of various ethnic and socioeconomic groups. May be repeated for credit. (P/F grading only.) —F, W, S, Su. (F, W, S, Su.) Guerrero

#### **465. Medicos-Global Health Sciences (9)**

Lecture—5 hours; clinical activity—25 hours; field-work—5 hours; project—5 hours. Prerequisite: consent of instructor; medical students only. Travel to foreign country for four weeks to collaborate with faculty from local universities and work in urban and rural environments, including hands-on experience with clinic patients. Cultural exchange and awareness of global health care. (P/F grading only.) —S. (Su.) Wilkes

#### **468. Ambulatory Internal Medicine Externship (3-18)**

Clinical activity—40 hours. Prerequisite: course 430; consent of instructor; demonstrated ability to accept responsibility. Limited enrollment. Hands-on primary care clinical experience in the ambulatory setting supervised by a general internist. Emphasis on evidence-based outpatient care. (H/P/F grading only.) —F, W, S, Su. (F, W, S, Su.) Henderson

#### **470. Landmark Clinical Trials and Evidence-Based Medicine (3)**

Lecture/discussion—10 hours; clinical activity—8 hours. Prerequisite: fourth-year medical student. Ten landmark clinical trials from a historical, clinical, and epidemiological/research perspective. Principles of evidence-based medicine. (H/P/F grading only.) —S. Kravitz, Amsterdam

#### **480. Person Centered Assessment (1)**

Lecture—1 hour. Prerequisite: open to all medical students. Person-centered assessment modalities and diagnostic approaches with regards to Internal Medicine and its different subspecialties. (P/F grading only.) —F. Fitzgerald

#### **494. Practicum in Community Health Clinics (1-3)**

Clinical activity—15-40 hours. Prerequisite: medical student with consent of instructor. Students are assigned to clinical settings that demonstrate ethnic, urban/rural, or other related aspects of clinical community health. Through active participation in health care delivery, students are able to relate conceptual with practical aspects of primary health care. May be repeated for credit. (H/P/F grading only.) —F, W, S. (F, W, S.) Kumagai

#### **497. Medicine, Bioethics and the Holocaust (3)**

Lecture/discussion—10 hours. Prerequisite: medical students only, consent of instructor. The concept of "evil" and the role of collaborators, bystanders and participants exemplified by the holocaust and compared to problems physicians face in practice today. Demonstration that evil emerges incrementally until taken for granted. (P/F grading only.) Offered irregularly.—F, W, S.

#### **498. Group Study in Internal Medicine (1-18)**

Prerequisite: consent of instructor. Special study for medical students which may involve laboratory or library research, ambulatory or inpatient care responsibility on campus, at UCDMC or off campus by specific arrangement. (H/P/F grading only.) —F, W, S, Su. (F, W, S, Su.)

#### **499. General Medicine Research (1-18)**

Independent study—20 hours. (H/P/F grading only.) —F, W, S, Su. (F, W, S, Su.) Meyers

### **Internal Medicine—Cardiology (CAR)**

#### **Upper Division**

#### **192. Internship in Cardiology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in cardiology. May be repeated for credit up to 12 units. (P/NP grading only.)

#### **199. Cardiology Research (1-5)**

Prerequisite: consent of instructor. Special study by individual arrangement in cardiovascular medicine. Work will include directed readings, laboratory and discussions. (P/NP grading only.)

#### **Graduate**

#### **220. Basic Science in Cardiology (1)**

Lecture—1 hour. Prerequisite: graduate or medical student status. Fundamentals underlying cardiovascular medicine. Including hemodynamics, neural control of the circulation, biochemistry and some experimental design and statistics. Experts in each of these fields will give current information in their areas. Offered in alternate years. (S/U grading only.) —S. Kaufman

**Professional****401. Clinical Cardiology Clerkship: Kaiser (3-18)**

Clinical activity—1.5 hours. Prerequisite: third- and fourth-year medical students with advance approval by Division of Cardiology. Limited enrollment. Emphasis placed on history taking and physical examination of pediatric and adult patients with congenital and acquired cardiovascular disease. Hospital rounds in CCU and elsewhere. Roles of ECG, PCG, and cardiac fluoroscopy, etc., in office cardiology will be evaluated. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**460. Cardiology Clinical Clerkship (3-18)**

Clinical activity—2-12 hours. Prerequisite: Internal Medicine 430, third- and fourth-year medical students in good academic standing with consent of instructor. Limited enrollment. Participation with members of subspecialty consultation service in initial clinical evaluation, work-up, management, and follow-up of patients with cardiologic disorders. Two outpatient clinics per week. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**461. Management of Coronary Artery Disease: Coronary Care Unit (3-18)**

Clinical activity. Prerequisite: completion of second year of medical school and advance approval by Division of Cardiology. Limited enrollment. Research in laboratory and exercise testing to be determined by instructor. Current methods of clinical research involving certain aspects of diagnosis and treatment. Includes acute coronary care, hemodynamic monitoring, stress testing, cardiac catheterization, pathologic correlations and the modern approach to therapy, both medical and surgical, based on pathophysiological mechanisms. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**464. Preventive Cardiology (3-6)**

Seminar—2 hours (for 2-4 weeks); clinical activity—full time (2-4 weeks). Prerequisite: completion of third year of medical school. Clinical experience, weekly seminar and reading on primary and secondary prevention of cardiovascular disease. Will be carried out in Lipid and Hypertension Clinics, Exercise Laboratory, Cardiac Care Unit, Cardiac Catheterization, and Cardiac Surgery services. (H/P/F grading only.)—W, S, Su. (W, S, Su.) Amsterdam

**480. Insights in Cardiology (1-3)**

Clinical activity—3-9 hours. Prerequisite: medical student in good academic standing and approval by Division of Cardiology. Students attend one or more cardiovascular medicine clinics: general, hypertension, arrhythmia. Introduction to the diagnosis/treatment of common cardiovascular problems. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**493. Gender Specific Medicine SSM (6)**

Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor. UC Davis School of Medicine students only. Special Studies Module, a four week course on the topic: Basic Science Principles Relating to Gender Specific Medicine. (Same course as Obstetrics & Gynecology 493.) (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Sweet, Villalobos

**498. Special Group Study: EKG Unit (1-12)**

Prerequisite: medical student with advance approval by monthly attending faculty. Limited enrollment. Special group study in cardiology for medical students in EKG unit. May include lectures, directed reading, and/or discussion groups. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**499. Research (1-12)**

Prerequisite: approval by Division of Cardiology. (H/P/F grading only.)

**Internal Medicine—Endocrinology, Diabetes and Metabolism (ENM)****Upper Division****192. Internship in Endocrinology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in endocrinology. May be repeated for credit up to 12 units. (P/NP grading only.)

**Graduate****299. Research (1-12)**

Prerequisite: consent of instructor. Endocrinology research. (S/U grading only.)

**Professional****460. Endocrinology Clinical Clerkship (3-18)**

Clinical activity (inpatient-outpatient service)—full time (3 days per unit). Prerequisite: Internal Medicine 430 and/or consent of instructor. Limited enrollment. Participation with members of subspecialty service in the initial evaluation, work-up, management and follow-up of patients with endocrinologic disorders. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**465. Clinical Nutrition Clerkship (3-18)**

Clinical activity—30 hours. Prerequisite: completion of Internal Medicine 430; consent of IOR. In-depth experience in assessment and monitoring of nutritional support of patients whose illnesses are complicated by malnutrition and of patients with problems in under-nutrition due to various illnesses. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Prescott

**480. Insights in Endocrinology (1-3)**

Clinical activity—3-9 hours; oral presentation. Prerequisite: student in good academic standing and consent of instructor. First- or second-year students observe in morning Endocrine and Diabetes clinics and attend bi-weekly noon and afternoon endocrine conferences. They also give brief endocrine physiology oral presentation to the endocrine group. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**499. Research (1-12)**

Prerequisite: consent of instructor. (H/P/F grading only.)

**Internal Medicine—Gastroenterology (GAS)****Upper Division****192. Internship in Gastroenterology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in gastroenterology. May be repeated for credit up to 12 units. (P/NP grading only.)

**Graduate****299. Research (1-12)**

Research in gastroenterology. (S/U grading only.)

**Professional****460. Gastroenterology Clinical Clerkship (3-18)**

Clinical activity—30 hours. Prerequisite: completion of third year of medical school. Work-up, manage, and follow-up new patients on active inpatient consulting service. Gastroenterology/Hepatology patients. Daily rounds with attending physician. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Terrado

**480. Insights in Gastroenterology (1-3)**

Clinical activity—3-9 hours. Prerequisite: student in good academic standing and consent of instructor. To gain insight in clinical activities of Gastroenterology Division through attendance at any of the follow-

ing: endoscopic procedures, ward rounds, outpatient clinic, and G.I. grand rounds. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**499. Research (1-12)**

Clinical activity—varied. Prerequisite: medical student status; consent of instructor. Part-time participation in active clinical and basic research projects. Some will involve both patient care and relevant laboratory procedures. Basic research includes liver metabolism, cancer markers, porphyrias diet and cancer, folate metabolism. May be repeated for credit. (H/P/F grading only.)

**Internal Medicine—General Medicine (GMD)****Upper Division****192. Internship in General Medicine (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in general medicine. May be repeated for credit up to 12 units. (P/NP grading only.)

**Graduate****291. Seminars in Human Health Services Research and Clinical Epidemiology (1)**

Seminar—1 hour. Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others. May be repeated for credit. (Same course as Epidemiology 291.) (S/U grading only.)—F, W, S. (F, W, S.)

**Professional****460. General Medicine Consults (1-18)**

Clinical activity (inpatient-outpatient service)—40 hours. Prerequisite: fourth-year medical students with consent of instructor; a general medicine clerkship. Limited enrollment. Supervised opportunity to see entire spectrum of medical problems encountered by a general internist. Student spends time in General Medicine Clinic and on the General Medicine Consult Service. Consultation Service is particularly concerned with medical evaluation of surgical patients. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Keenan

**470. Health Care Ethics (3-9)**

Lecture/discussion—2 hours; laboratory/discussion—1 hour. Prerequisite: consent of instructor. Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Participation in ethics rounds. (Same course as Nursing 470.) (S/U grading only.)—W, Su. (S, Su.)

**485. Introduction to Health Care Ethics (1)**

Lecture—10 weeks. Prerequisite: medical student in good standing. Introduction to concepts and methods of healthcare ethics. Emphasis on problems and methods. (H/P/F grading only.)—F. (F.)

**499. General Medicine Research (1-18)**

Discussion—3 hours; clinical research—8-40 hours. Prerequisite: consent of instructor. Student will be involved in a clinical research problem within the areas, interest and expertise of members of Division of General Internal Medicine. Alternatively, the research effort will be directed toward investigation of a clinical problem of general medical interest. May be repeated for credit. (H/P/F grading only.)

**Internal Medicine—Hematology-Oncology (HON)****Upper Division****199. Research in Hematology-Oncology (1-5)**

Laboratory—hours variable. Prerequisite: upper division standing and consent of instructor. Experience in laboratory research. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**Graduate****298. Topics in Hematology (1-4)**

Prerequisite: one year of graduate work and/or consent of instructor. Basic concepts of the physiology of the hematopoietic organ, the pathophysiology of hematopoietic disease, and concepts of therapeutics will be offered for study. The specific topics to be dictated by the interest and background of the students.

**299. Research (1-12)**

Prerequisite: consent of instructor. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.)

**Professional****420. Oncology (4)**

Lecture/discussion—2 hours. Prerequisite: approval by the SOM Committee on Student Promotions. Restricted to Medical student only; students must pass all Year 1 SOM courses. Covers the principles of oncology and the pathophysiology of specific, common cancers correlated with organ systems pathophysiology and systemic pathology courses. (P/F grading only.)—F, (F) Welborn

**460. Hematology-Oncology Acting Internship (6-18)**

Clinical activity. Prerequisite: fourth-year medical student in good academic standing. Limited enrollment. Acting intern on inpatient hematology/oncology ward service. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**461. Hematology-Oncology Consult Clerkship (6-12)**

Clinical activity. Prerequisite: fourth-year medical student in good academic standing. Limited enrollment. Student is an integral member of the inpatient hematology and oncology consult service, the bone marrow service, and will attend all conferences sponsored by the Division. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**462. Hematology-Oncology Ambulatory Clerkship (3-18)**

Clinical activity—30 hours. Prerequisite: fourth-year medical student in good academic standing; consent of instructor. Limited enrollment. Outpatient rotations in related clinics. Participation with members of the subspecialty service in the initial clinical evaluation, work-up, management and follow-up of the patient with hematologic or oncologic disorders. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**493. Cancer as a Process (1-6)**

Seminar—10 hours; clinical activity—14 hours; autotutorial—6 hours; independent study—10 hours. Prerequisite: consent on instructor. Restricted to UC Davis School of Medicine students only. Covers cancer as a process, beginning with risks and prevention, preneoplasia, microinvasion, treatment options, metastases and systemic therapy, pain medicine and palliative care, and cancer communication. Format includes traditional lectures, student-led case discussions, and problem-based learning. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Meyer, von Friederichs Fitzwater

**499. Research (1-12)**

Prerequisite: consent of instructor. (H/P/F grading only.)

**Internal Medicine—Infectious Diseases (IDI)****Upper Division****141. Infectious Diseases of Humans (1)**

Lecture—1 hour. Prerequisite: introductory knowledge in biology and chemistry recommended. Course integrates information on biological and molecular nature of the causative organism, modern diagnostics, treatment and prevention strategies, and the role of infectious diseases in contemporary society and throughout human history. (P/NP grading only.)—F, (F) Danekar

**192. Research Internship in Internal Medicine (1-12)**

Internship—3-36 hours; final report. Supervised work experience in the division of Infectious Diseases. Undergraduates will have an opportunity to acquire research experience in clinical settings. May be repeated for credit up to 12 units. (P/NP grading only.)

**199. Infectious Diseases Research (1-5)**

Prerequisite: chemistry through organic chemistry (in addition, physical and biochemistry preferred), biology through basic bacteriology (in addition, microbiology and immunology preferred); and consent of instructor. Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results will be reviewed at intervals with instructor and via seminar presentation. (P/NP grading only.)

**Graduate****211. Epidemiology and Prevention of Infectious Diseases (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: Epidemiology 205B, 207 or Internal Medicine 421. Infectious disease epidemiology and prevention, with equal emphasis on human and veterinary diseases. Major categories of infectious diseases by mode of transmission.—S. DeRiemer, Sandrock

**299. Research in Infectious Diseases (1-12)**

Prerequisite: consent of instructor. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.)

**Professional****440. Introduction to AIDS and Related Disorders (1.5-6)**

Clinical Activity—30 hours; discussion—10 hours. Prerequisite: first and second year medical students must be in good academic standing and have consent from the instructor. Familiarizes students with the diagnosis and treatment of individuals infected with the human immunodeficiency virus. Students will interview patients, observe patient care and participate in ongoing clinic research as well as examine alternative lifestyles. May be repeated for credit. (H/P/F grading only.)—F, W, Su.

**450. Clinical and Social Care of the Injection Drug User (1-4)**

Lecture—1 hour; clinical activity—3 hours. Prerequisite: first and second year medical students in good academic standing. Lecture and guided clinical practice in a supervised clinical setting, focusing on the social and medical aspects of health care for injection drug users. May be repeated for credit up to 24 units. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**460. Infectious Diseases Clinical Clerkship (3-6)**

Clinical activity. Prerequisite: successful completion of two years of study in an accredited medical school. Limited enrollment with priority to fourth-year medical students. Patients ill with infectious diseases, including AIDS, will be evaluated and presented at rounds and case conferences. Patients are also seen in the Infectious Diseases Clinic. Instruction in clinical microbiology and the proper use of the laboratory will be provided. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Cohen

**499. Research Topics in Infectious Disease (2-12)**

Prerequisite: successful completion of the first year study in School of Medicine, graduate students (approved for graduate credit), and/or consent of instructor. Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results to be reviewed at intervals with instructor and via seminar presentation. (H/P/F grading only.)

**Internal Medicine—Nephrology (NEP)****Upper Division****192. Internship in Nephrology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in nephrology. May be repeated for credit up to 12 units. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**Graduate****299. Nephrology Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**Professional****444. Curriculum Design for Doctoring (1)**

Project—2 hours; seminar—1 hour. Prerequisite: consent of instructor; second year standing in School of Medicine. Design of Doctoring curriculum for medical students in focused topic areas to be announced annually. Students will design sessions, consider resource needs, and work with IORs to initiate the curriculum. (P/F grading only.)—Su. (Su.)

**460. Nephrology and Fluid Balance (3-6)**

Clinical activity—4 hours; Lecture/discussion—10 hours. Prerequisite: completion of 3rd year medical school; completion of Medicine Core Clerkship; consent of the instructor. Limited enrollment. Active participation in all inpatient/outpatient clinical activities, attendance at specific lectures and conferences at UCD Medical Center covering the field of nephrology and fluid-electrolyte disorders. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Yean

**499. Research in Nephrology (3-18)**

Prerequisite: individual arrangement and consent of instructor. Independent laboratory research on a specific problem related to biochemical or immunologic causes of renal disease and/or uremic disorders in humans or animals. (H/P/F grading only.)

**Internal Medicine—Pulmonary Medicine (PUL)****Upper Division****192. Internship in Pulmonary Medicine (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in pulmonary medicine. May be repeated for credit up to 12 units. (P/NP grading only.)

**Graduate****299. Pulmonary Disease Research (1-12)**

Laboratory. Prerequisite: by arrangement only. Pulmonary disease research activity with focus in inhalation toxicity, oxidants or lung biochemistry, and cell and molecular biology. (S/U grading only.)—Cross

**Professional****460. Comprehensive Pulmonary Medicine Clerkship (3-6)**

Clinical activity—40 hours. Prerequisite: completion of second year of medical school and/or consent of instructor; completion of Internal Medicine Clerkship. Rotation intended to provide a comprehensive student education in Pulmonary Medicine. Students will participate in hands on clinical education, as well as completing an assigned curricula. Intended for students pursuing Internal Medicine & Primary Care careers. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Stollenwerk

**461. Critical Care Clinical Clerkship (3-6)**

Clinical activity—40 hours. Prerequisite: completion of second year of medical school and/or consent of instructor; completion of Internal Medicine and Surgical Clerkships. Rotation intended to provide student education in the Critical Care Management of

sub-specialty patients. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Stollenwerk

#### **462. Pulmonary Clinical Clerkship (3-6)**

Clinical activity—35 hours. Prerequisite: completion of second year of medical school and/or consent of instructor; completion of Internal Medicine Clerkship. Similar to course 460. Rotation designed for students interested in learning pulmonary medicine, but who desire more variety in their clerkships, and do not desire the comprehensive experience offered by a four-week pulmonary rotation. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Stollenwerk

#### **470. Practicum in Care of the Terminally Ill (3-6)**

Clinical activity—35 hours; seminar—5 hours. Prerequisite: consent of instructor. Restricted to fourth-year Medical students in good standing. Work with hospice interdisciplinary team. Direct experience in the care of patients with illnesses where no cure is possible. Emphasis on symptom relief, end of life issues, physician assisted suicide. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) McMillian

#### **475. Encounters in Ethics in the ICU (3-6)**

Clinical Activity—12 hours; lecture/discussion—6 hours; independent study—6 hours. Prerequisite: 4th year Medical Student. Care for critically ill adults with complex medical disease carries with it unique ethical roles and duties for the physician. (H/P/F grading only.)—F, W, S. (F, W, S.) Black

#### **480. Pulmonary-Critical Care Medicine Insights (1-3)**

Clinical activity—3-9 hours. Prerequisite: student in good academic standing; consent of instructor. Attend respiratory outpatient clinics and in-patient pulmonary consultation rounds and medical intensive care rounds. Introduction to diagnosis and treatment of common pulmonary problems. (H/P/F grading only.) Offered irregularly.—F, W, S, Su. (F, W, S, Su.) Stollenwerk

#### **499. Research (1-12)**

Prerequisite: consent of instructor. (H/P/F grading only.)

### **Internal Medicine—Rheumatology-Allergy (RAL)**

#### **Lower Division**

##### **99. Directed Research in Immunology (1-5)**

Laboratory. Prerequisite: consent of instructor. Independent research will be encouraged in basic immunology, including the role of the cellular immune system in oncogenesis. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **Upper Division**

##### **192. Internship in Rheumatology-Allergy (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in rheumatology-allergy. May be repeated for credit up to 12 units. (P/NP grading only.)

##### **199. Directed Research in Immunology (1-5)**

Laboratory. Prerequisite: consent of instructor. Independent research will be encouraged in basic immunology, including the role of the cellular immune system in oncogenesis. (P/NP grading only.)

#### **Graduate**

##### **209. Current Topics in Immunology: From Presentations to Grants (3)**

Lecture—1 hour; term paper or discussion—1 hour; project—1 hour. Prerequisite: Immunology 201. Current developments in various aspects of immunology and their interrelationships. Focus on areas of immunology not currently covered in the basic and advanced immunology courses. Oral presentation, written review and grant preparation.—W. (W.) Van de Water

#### **298. Topics in Rheumatology and Clinical Immunology (1-5)**

Laboratory. Prerequisite: consent of instructor. Library and/or laboratory work as required. (S/U grading only.)—Gershwin

#### **299. Research in Autoimmune Disease (1-12)**

Laboratory. Prerequisite: consent of instructor. Independent research will be encouraged in both animal models of human disease (including congenitally athymic [nude], asplenic, and New Zealand mice) and the cellular immune system of patients with systemic lupus erythematosus, Sjögren's syndrome, polymyositis and drug hypersensitivity. (S/U grading only.)

#### **Professional**

##### **460. Rheumatology Clinical Clerkship (1-18)**

Clinical activity—2-40 hours. Prerequisite: Medical Sciences 431 and consent of instructor. Participation with members of the subspecialty service in the diagnosis and therapeutic management of patients with rheumatologic diseases. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

##### **461. Allergy Clinical Clerkship (3-18)**

Clinical activity (inpatient-outpatient service)—full time (2 to 12 weeks). Prerequisite: completion of second year of medical school and consent of instructor. Student will work with practicing allergist in daily work with patients and participate in weekly allergy clinic and teaching conferences. Study of the literature. Will see patients with problems in clinical immunology, immunodeficiency, asthma, allergic rhinitis. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

##### **480. Insights in Rheumatology (1-3)**

Clinical activity—3-9 hours. Prerequisite: student in good academic standing and consent of instructor. Participation in rheumatology consultation rounds, rheumatic disease clinics and conferences with supervised readings in rheumatology. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Leek

##### **499. Research (1-12)**

Prerequisite: medical student with consent of instructor. Part-time participation in active clinical and basic research projects which can involve both patient care and relevant laboratory procedures. Students can gain experience in clinical medicine and clinical investigation. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **Master of Public Health (MPH)**

The Department of Public Health Sciences offers the Master of Public Health (MPH) degree. The MPH degree is accredited by the Council on Education for Public Health. Students apply for admission through the Office of Graduate Studies. The following listing is all required core course work for the degree. Course descriptions are given under the individual course offerings. For Public Health Sciences courses, see the [Public Health Sciences \(SPH\)](#), on page 450.

#### **UNITS**

#### **Required Units for Master of Public Health**

Core courses .....	40
Added-competence selectives .....	6-11
Elective units.....	5-10

#### **Total units required for the degree .....56**

#### **Core coursework**

##### **Biostatistics**

Introduction to Health Science Statistics.....	4
Biostatistics for the Health Sciences .....	4
Public Health Informatics .....	2

##### **Epidemiology**

Principles of Epidemiology .....	4
----------------------------------	---

##### **Environmental Health Science**

Principles of Environmental Health Science.....	3
---	---

#### **Health Services Administration**

Health Services Administration .....	3
<b>Social and Behavioral Influences on Health</b>	
Social & Behavioral Aspects of Public Health .....	3
1 unit/quarter.....	4
Public Health Practicum.....	10
For more information about the Master of Public Health, see <a href="http://mph.ucdavis.edu/">http://mph.ucdavis.edu/</a> .	

#### **Medical Microbiology (MMI)**

#### **Upper Division**

##### **130. Medical Mycology (2)**

Lecture—2 hours. Prerequisite: a course in pathogenic microbiology and consent of instructor. Various aspects of pathogenic fungi, particularly affecting humans, will be discussed including epidemiology, pathogenesis and pathology, diagnosis and therapy. Offered in alternate years. (Same course as 430.)—W. Pappagianis

##### **188. Human Immunology (3)**

Lecture—3 hours. Prerequisite: undergraduate level introductory biology course. Human immune system and mechanisms of immunity. Basic components and function of immune system. Molecular basis of immune response; basic cellular and molecular mechanisms. Interactions between cells of immune system producing immune responses; regulating molecules.—S. (S.) Torres

##### **192. Internship in Medical Microbiology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in medical microbiology and related fields. (P/NP grading only.)—F, W, S. (F, W, S.)

##### **194H. Senior Honors Project in Medical Microbiology and Immunology (5)**

Independent study—15 hours. Prerequisite: course 199 and consent of instructor. Project in research related to immunology of medically important viruses. Development of a hypothesis-driven project, performance of experimental protocols and preparation of graphical representation of original data. Requires oral and written presentation of research results. May be repeated three times for credit with consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

##### **198. Group Study in Medical Microbiology (1-5)**

Prerequisite: upper division standing and consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (P/NP grading only.)

##### **199. Research in Medical Microbiology (1-5)**

Prerequisite: upper division standing and consent of instructor. Individual research. (P/NP grading only.)

#### **Graduate**

##### **200D. Mechanisms for Microbial Interactions with Hosts (3)**

Lecture/discussion—3 hours. Prerequisite: Microbiology 200A or consent of instructor. Study of mechanisms involved in microbial interactions within a host environment. The following principles are basic to understanding these interactions: host recognition, invasion, competition and growth, and host defense.—W. (W.)

##### **210A. Critical Analysis of Contemporary Research on Animal Models of Human (1)**

Lecture/discussion—1 hour. Prerequisite: students funded by the Animal Models of Infectious Diseases Training Grant; consent of instructor. Limited enrollment. Topics will include diverse vertebrate and invertebrate models of human infectious diseases. May be repeated for credit. Offered in alternate years. (S/U grading only.)—W. Bevins, Solnick

**210B. Comparative Analysis of Animal Models of Human Infectious Diseases (1)**

Lecture/discussion—1 hour. Prerequisite: students funded by the Animal Models of Infectious Diseases Training Grant; others by consent of instructor. Limited enrollment. Compares the major vertebrate and invertebrate animal models that are used most commonly to study human infectious disease, including mouse, nonhuman primate, *Caenorhabditis elegans*, and *drosophila*. May be repeated for credit. Offered in alternate years. (S/U grading only.)—W. Bevins, Solnick

**215. Medical Parasitology (3)**

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: graduate student with consent of instructor. Epidemiology, pathogenesis, diagnostic methods and current literature discussion of protozoa, helminths and arthropods of medical importance. Offered in alternate years.—S. Luckhart

**280. The Endogenous Microbiota in Health and Disease (3)**

Lecture—3 hours. Prerequisite: graduate standing. Recent insights into the microbial communities inhabiting mucosal surfaces, and will discuss how the composition of these communities contributes to normal development, metabolism, education of the immune system, and disease susceptibility.—S. (S.) Baumler, Dandekar, Tsolis

**291. Seminar in Microbiology and Immunology (1)**

Seminar—1 hour. Restricted to students with upper division or graduate standing. Research seminars on current topics in microbiology and immunology. May be repeated for credit if topic differs. (S/U grading only.)—F, W, S. (F, W, S.) Sankaran, Torres

**298. Group Study in Medical Microbiology and Immunology (1-5)**

Prerequisite: consent of instructor; open to graduate students. Directed reading and discussion and/or laboratory investigation on selected topics. (Sections 1, 2, 4, 5; S/U grading only.)

**299. Research (1-12)**

Prerequisite: consent of instructor; open to graduate students. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.)

**Professional****410. Physician Scientist Molecular Medicine Journal Club (1)**

Lecture—1 hour. Weekly seminars by students on research articles in current literature. Topics/articles to be selected by instructors to include a broad range of frontiers in biomedical literature. May be repeated for credit. (H/P/F grading only.)—F. (F.) Bevins

**430. Medical Mycology (2)**

Lecture—2 hours. Prerequisite: a course in pathogenic microbiology and consent of instructor. Various aspects of pathogenic fungi, particularly affecting humans, will be discussed including epidemiology, pathogenesis and pathology, diagnosis and therapy. Offered in alternate years. (Same course as 130.) (H/P/F grading only.)—W. Pappagianis

**480A. Medical Immunology (2.5)**

Lecture—2 hours; laboratory/discussion—0.5 hours. Restricted to Medical students only. Helping to understand the immune system, the nomenclature and functional significance of the tissues, cells, proteins and genes of the immune system, as well as the normal regulatory mechanisms and pathologic outcomes related to the immune response. (P/F grading only; deferred grading only, Hartigan-O'Conner, Shacklett, Torres, Teuber)

**480B. Medical Microbiology (5.5)**

Lecture—2.75 hours; laboratory/discussion—1 hour. Restricted to Medical students only. Discussion of the diseases caused by infectious agents includes their pathogenesis, clinical manifestations, diagnosis, treatment epidemiology and prevention. Covers the general properties of and diagnostic

techniques for bacteria, fungi and viruses. (P/F grading only; deferred grading only, pending completion of sequence.)—S. (S.) Luckhart, Mudryj, Tsolis

**497T. Tutoring in Medical Microbiology (1-5)**

Tutoring—3-15 hours. Prerequisite: appropriate preparation in subject matter and consent of instructor. Assist instructor by tutoring medical students in one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)

**498. Group Study in Medical Microbiology and Immunology (1-5)**

Prerequisite: medical students with consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.)

**499. Research (1-12)**

Prerequisite: medical students with consent of instructor. (H/P/F grading only.)

**Medical Pharmacology and Toxicology (PHA)****Lower Division****92. Internship in Pharmacology (1-12)**

Internship—3-36 hours; final report. Prerequisite: lower division student with good academic standing; approval of project prior to period of internship. Supervised work experience in pharmacology and related fields. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: lower division standing. (P/NP grading only.)

**Upper Division****192. Internship in Pharmacology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in pharmacology and related fields. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.) Despa

**Graduate****205. Problem Solving in Pharmacology (1)**

Lecture/discussion—1 hour. Restricted to Graduate Students in Pharmacology and Toxicology, Chemistry and Clinical Research Graduate Groups; other students may be accepted with consent of instructor. Students will be introduced to a current biomedical problem that would benefit from a developing drug and will develop an experimental strategy for addressing the issue. Students will develop model systems for testing various classic and recent pharmacological approaches. May be repeated 12 times for credit. Course changes subjects every quarter; each course is unique and can be taken as often as desirable; certain students (Trainees of the Training Program in Pharmacological Sciences) must take course for at least three years.—F, W, S. (F, W, S.) Hell

**207. Drug Discovery and Development (3)**

Lecture/discussion—2 hours; extensive writing—1 hour. Prerequisite: course 201, an equivalent course in general pharmacology, or knowledge of basic pharmacology. Intended for graduate students in Pharmacology and Toxicology, Chemistry and Clinical Research Graduate Groups; other students, including undergraduates, may be accepted with consent of instructors. Survey of the process by which a drug is discovered, developed and made available to the public. Topics include drug identification and optimization, safety testing, clinical evaluation, regulatory issues, intellectual property,

formulation, and the global pharmaceutical industry. May be repeated for credit.—W. (W.) Horuk, Rogawski, Wulff

**208. Advanced Cardiac Physiology and Pharmacology (3)**

Lecture—2 hours; lecture/discussion—1 hour. Prerequisite: Pharmacology and Toxicology 201, Pharmacology and Toxicology 202, an equivalent course in general pharmacology or physiology (example, Biomedical Engineering 204), or knowledge of basic pharmacology/physiology. Open to graduate students from the Pharmacology and Toxicology, Molecular, Cellular and Integrated Physiology, Biomedical Engineering and Clinical Research Graduate Groups; other students (including undergraduates) may be accepted upon consultation with the instructors. Detailed characterization of the mechanisms involved in cardiac excitation-contraction coupling, alterations that occur in heart disease and pharmacological interventions. Topics include cardiac contractile apparatus, action potential, Ca cycling, excitation-transcription coupling, cardiac inotropy, heart failure and arrhythmias.—S. (S.) Bossuyt, Despa, Ripplinger

**225. Gene Therapy (3)**

Lecture/discussion—3 hours. Prerequisite: Genetics 201C, Molecular and Cellular Biology 214, or equivalent. Gene therapy from basic concepts to clinical applications. Topics include the human genome and genetic variation, genetic diseases, methods to manipulate gene expression, viral and non-viral delivery vectors, history and progress of gene therapy, case studies, and ethical issues. (Same course as Genetics 225.)—S. (S.) Anderson

**250. Functional Genomics: From Bench to Bedside (3)**

Lecture/discussion—3 hours. Prerequisite: Genetics 201C, Molecular and Cellular Biology 214, or equivalent. Functional genomics (how genetic variation and epigenomics affect gene expression), with an emphasis on clinical relevance and applications. Topics include genetic variation and human disease, cancer therapeutics, and biomarker discovery. (Same course as Genetics 250.)—S. (S.) Diaz, LaSalle, Segal

**291. Pharmacology Research Seminar Series (1)**

Seminar—1 hour; discussion—1 hour. Prerequisite: consent of instructor; upper division or graduate standing. Research seminars on current topics in Pharmacology. May be repeated for credit when topic differs. (S/U grading only.)—F, W, S. (F, W, S.) Wulff

**298. Group Study (1-5)**

Prerequisite: consent of instructor.

**299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**Professional****400A. Pharmacology (2)**

Lecture—1 hour; discussion/laboratory—0.3 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Restricted to Medical student only. Principles in pharmacology, including pharmacokinetics, drug metabolism and the actions, uses and toxicities of the major classes of drugs. (Deferred grading only, pending completion of sequence. P/F grading only.)—F, S. (F, S.) Gelli, Wulff

**400B. Pharmacology (1.5)**

Lecture—1 hour; discussion—0.25 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical students only. Principles in pharmacology, including autonomic pharmacology, general anesthetics, neuropharmacology and sedative/hypnotics. (P/F grading only.)—Su. (Su.) Diaz

**400C. Pharmacology (3.5)**

Lecture—2 hours; discussion—0.5 hours. Prerequisite: Approval by School of Medicine Committee on Student Progress; medical student only; successful completion of courses 400A and 400B. Treatment

respiratory and cardiovascular disease, central nervous system drugs, GI, Toxicology and chemotherapy. Specific topics include: asthma, chronic obstructive pulmonary disease, hypertension, congestive heart failure, and the treatment of arrhythmias. Pain Management, depression, psychosis, acid reflux, IBS and toxicology. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F, W. (F, W.) Clancy, Gelli

#### **445. Introduction to Integrative Medicine (1)**

Lecture/discussion—1 hour. Prerequisite: medical student in good standing. Basic principles of alternative medical systems (e.g., traditional Chinese, Ayurvedic, Tibetan), alternative practices (e.g., chiropractic, osteopathy, naturopathy, homeopathy, herbalism, guided imagery/meditation, massage therapy), and mind/body connection are presented as introduction to integrating alternative treatments into traditional medicinal practice. (H/P/F grading only.)—W. (W.) Diaz

#### **490. Seminar in Pharmacology for Medical Students (1)**

Seminar—1 hour. Prerequisite: consent of instructor. Seminar in pharmacology for medical students. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **497T. Tutoring in Pharmacology (1-5)**

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)

#### **498. Special Study for Medical Students (1-5)**

Lecture, directed reading, and/or discussion groups—3-15 hours. Prerequisite: consent of instructor. Special study in pharmacology for medical students. (H/P/F grading only.)

#### **499. Directed Research for Medical Students (1-12)**

Laboratory—3-36 hours. Prerequisite: consent of instructor. Directed research in pharmacology for medical students. (H/P/F grading only.)

### **Neurology (NEU)**

#### **Upper Division**

##### **199. Individual Special Study and Research (1-4)**

Prerequisite: consent of instructor. Individual special study in neurophysiology and biomedical engineering is offered to qualified students. Studies on psychophysics, single-unit electrophysiology and instrumentation are offered in Davis. (P/NP grading only.)

#### **Graduate**

##### **298. Group Study (1-5)**

Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. (S/U grading only.)

##### **299. Individual Special Study and Research (1-12)**

Laboratory—3-36 hours. Prerequisite: consent of instructor. Individual special study and research in Neurophysiology and Biomedical engineering is offered at both Davis and Sacramento Medical Center. (S/U grading only.)

#### **Professional**

##### **420. Clinical Neurosciences (2)**

Lecture/discussion—1 hour; lecture—1.5 hours. Restricted to Medical Students only. Pathophysiology underlying neurological disorders, including disorders of development, muscle, nerve, cerebral circulation, metabolism, myelin, cortical function, movement, cerebrospinal fluid, autonomic function and special senses. Anatomical basis of clinical testing, nervous system infection, neoplasia and trauma. (P/F grading only.)—Su. (Su.) Brass, Wheelock, Shahlaie

#### **450. Clinical Neurology Clerkship (3-6)**

Clinical activity—24 hours; conference—12 hours; seminar—4 hours; independent study—10 hours. Prerequisite: open to all fourth year medical students and third year medical students with consent of instructor. Restricted to six students per rotation. Critical elements of neurological clinical skills (history & exam) and basic and clinical neurological concepts expected for general residency preparation. Active, didactic, experiential and independent learning to encourage maturation of general professional competencies. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Malhado-Chang

#### **452. Advanced Clinical Neurology (6)**

Clinical activity—full time (4 weeks). Prerequisite: completion of four-week Neurology selective and consent of instructor. Extension of basic Neurology clerkship. Designed for students with special interest in medical disorders of nervous system. By arrangement with department, student may serve as an acting intern. Principles of neurological differential diagnosis and therapeutics emphasized. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **455. Child Neurology (6)**

Clinical activity—full time (4 weeks). Prerequisite: satisfactory completion of Internal Medicine 430, Obstetrics and Gynecology 430, Pediatrics 430 and consent of instructor. Student exposed to children with disorders of the nervous system, both in outpatient and inpatient services. Cases presented to a member of full-time faculty who will discuss clinical findings, differential diagnosis, management and therapy. This course satisfies the fourth year neuroscience requirement. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Chang

#### **498NE. Group Study in Neurology (1-6)**

Prerequisite: medical students with consent of instructor. Directed readings and discussions with a comprehensive written examination at the end of course. (P/F grading only.)—F, W, S, Su.

#### **499. Research (1-12)**

Laboratory—2-24 hours. Prerequisite: consent of instructor. Approved for graduate degree credit. Laboratory investigation on selected topics. (H/P/F grading only for graduate and medical students.)

#### **Neurosurgery (NSU)**

#### **Upper Division**

##### **199. Special Study in Neurosurgery for Advanced Undergraduates (1-5)**

Prerequisite: advanced undergraduate standing with consent of instructor. Students may participate in ongoing neurosurgical projects or may pursue and design independent projects. (P/NP grading only.)

#### **Graduate**

##### **299. Neurosurgery Research (3-12)**

Prerequisite: graduate student with consent of instructor. Student may participate in ongoing neurosurgical projects or may pursue and design independent projects. (S/U grading only.)

#### **Professional**

##### **451. Neurosurgical Critical Care Clerkship (3)**

Clinical activity—full time (2 weeks). Prerequisite: third- or fourth-year medical student having completed a neurosurgical clerkship or consent of instructor. Students participate in the care of neurosurgical patients in the NSICU and in the admission and surgical management of patients admitted through the Emergency Room. (H/P/F grading only.)—F, W, S, (F, W, S.)

#### **455. Clinical Pediatric Neurosurgery (6)**

Clinical activity—full time (4 weeks). Prerequisite: third- or fourth-year medical students who have satisfactorily completed course 460; consent of instructor. Admission and follow-up of pediatric patients. Neurological history, examination, and diagnostic procedures are emphasized. Students will participate in surgical procedures and are required to attend all pediatric neurosurgery conferences. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Pang

#### **460. Clinical Neurosurgery (6-18)**

Clinical activity—full time (3 days per unit; 4 weeks minimum). Prerequisite: third- and fourth-year medical students; consent of instructor. Approved for graduate degree credit. Admission and follow-up of patients. Neurological history, examination and further diagnostic procedures emphasized. Students participate in meaningful aspects of surgical procedures and attend listed conferences, rounds, and seminars. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **464. Externship (6-18)**

Clinical activity—full time (4-12 weeks). Prerequisite: fourth-year medical student having completed a neurosurgical clerkship or consent of instructor. Clerkship in neurosurgery to be arranged at another institution with accredited residency program in neurosurgery under proper supervision. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **470. Advanced Clinical Neurosurgery (6-18)**

Clinical activity—full time (4-12 weeks). Prerequisite: fourth-year medical student in good academic standing. Student will function as acting intern on neurosurgery service. Admission and management of patients. Neurological history, examination, diagnostic procedures, and surgical management are emphasized. Students participate in meaningful aspects of surgical procedures and attend required conferences and rounds. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **480. Insights in Neurosurgery (1-3)**

Clinical activity—3 to 9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Observation of neurosurgical care in emergency room, operating room and hospital floors, including manner of treatment of a variety of chronic and acute neurological diseases. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **499. Neurosurgery Research (1-18)**

Prerequisite: medical student with consent of instructor. Student may participate in ongoing neurosurgical projects or may pursue and design independent projects. (H/P/F grading only.)

#### **Obstetrics and Gynecology (OBG)**

#### **Upper Division**

##### **192. Shifa Clinic/Student Volunteer (1)**

Conference—2 hours; clinical activity—6-8 hours; discussion—1-2 hours. Open to undergraduates only. Supervised work experience in obstetrics and gynecology. May be repeated up to three times for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.) Yasmeen

##### **194. Shifa Clinic Student Volunteer (1)**

Conference—1 hours; clinical activity—6 hours. Prerequisite: consent of instructor; the applications will be available for students. Selection of students will be made by selection committee of medical students coordinators and the IOR. Attend clinic every third Sunday performing duties of receptionist, intake, translation, monitor. Students attend a meeting immediately after end of clinic. There is a mandatory Monday meeting with Clinic co-directors. Students are expected to participate on various committees. May be repeated three times for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.) Yasmeen

##### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

##### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **Graduate**

##### **220. Genetics of Reproduction (3)**

Lecture/discussion—3 hours. Introduction to genetics of mammalian reproduction for domestic species, species used in research, and the human. Mendelian and non-Mendelian modes of inheritance. Research paper. Offered in alternate years.—W. (W.)

**290. Current Topics in Research (1)**

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Selected topics in reproductive biology. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

**298. Group Study (1-5)**

Prerequisite: graduate standing; consent of instructor.

**299. Research (1-12)**

Prerequisite: graduate standing; consent of instructor. (S/U grading only.)

**Professional****430. Obstetrics and Gynecology Clerkship (12)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Obstetrics, gynecologic and gynecological oncology experience in the delivery room, operating room, clinics and wards at UCDMC and affiliated sites. Rounds, conferences, interactive student presentations and seminars ongoing. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Hou

**430F. SJVP OBGYN Clerkship at UCSF (12)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Obstetrics, gynecologic and gynecological oncology experience in the delivery room, operating room, clinics and wards at UCSF Fresno. Rounds, conferences, interactive student presentations and seminars ongoing. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Hou

**439D. Directed Clinical Studies in OBGYN (1-12)**

Clinical activity—40 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**439R. Directed Studies in OBGYN (1-12)**

Clinical activity—30 hours; independent study—10 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**460. Away Clinical Elective in OBGYN (3-18)**

Clinical activity—30 hours. Prerequisite: third- or fourth-year medical student; course 430 or the equivalent; consent of instructor. Active participation in inpatient and/or outpatient care. Attendance at specified conferences; student-faculty member informal conferences. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**465. Away Acting Internship in OBGYN (3-18)**

Clinical activity—40 hours. Prerequisite: satisfactory completion of course 430 and other third-year core clerkships; consent of instructor. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Students are expected to provide direct patient management. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**470. Gynecologic Oncology Acting Internship (3-18)**

Clinical activity—40 hours. Prerequisite: satisfactory completion of course 430 and the third-year core clerkships; consent of instructor. Four week elective primarily involves direct inpatient management of women on the UCDMC Gyn/Onc service. Students will be acting at the level of a sub-intern and will work under the supervision of house staff, fellows, and attendings. May be repeated up to 99 units for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Leiserowitz

**471. Ambulatory Gynecology and Obstetrics Elective (3-18)**

Clinical activity—35 hours. Prerequisite: third- or fourth-year Medical Student having successfully completed course 430; consent of instructor of record. Conduct examinations, present patients and discuss treatment regimens at the following ambulatory clinics: General Obstetrics & Gynecology, New and Return Obstetrics (including Post-Partum), High-Risk Obstetrics, Pre-Operative Clinic, and other sub-specialty clinics as assigned. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**472. Family Planning and Reproductive Health (1-6)**

Clinical activity—30 hours; seminar—5 hours. Prerequisite: course 430; consent of instructor. Elective that will focus on the Gynecologic Subspecialty of Family Planning. Counseling and provision of contraceptive methods, experience with pelvic ultrasounds, management of spontaneous, inevitable and induced abortion and postabortion care by both surgical and medical techniques are included. May be repeated for credit. (H/P/F grading only)—F, W, S, Su. (F, W, S, Su.) Hou

**475. Labor & Delivery Acting Internship (3-18)**

Clinical activity—40 hours. Prerequisite: satisfactory completion of course 430 and the third-year core clerkships; consent of instructor. Four week elective primarily involves direct inpatient management of women on the UCDMC L&D unit. Students will be acting at the level of a sub-intern and will work under the supervision of house staff, fellows, and attendings. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Finta

**480. The Birthing Process (1)**

Lecture/discussion—1 hour. Open only to UC Davis medical students. Training to assist in the birthing process as a Doula. Topics not covered in the summer course. (S/U grading only.)—F.

**493. Gender Specific Medicine SSM (6)**

Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, a four week course on the topic: Basic Science Principles Relating to Gender Specific Medicine. (Same course as Cardiology 493.) (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Sweet, Villalobos

**494. Shifa Clinic (6)**

Clinical activity—8 hours. Prerequisite: medical student in good standing. Restricted to medical student only. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diverse mixed population. May be repeated up to three times for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Yasmeen

**494A. Shifa Clinic (1)**

Clinical activity—8 hours. Prerequisite: Medical student in good standing; consent of instructor. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diverse mixed population. (H/P/F grading only; deferred grading only, pending completion of sequence.)—Su. (Su.) Yasmeen

**494C. Shifa Clinic (1)**

Clinical activity—8 hours. Prerequisite: Medical student in good standing; consent of instructor. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diverse mixed population. (H/P/F grading only; deferred grading only, pending completion of sequence.)—W. (W.) Yasmeen

**498. Group Study (1-5)**

Prerequisite: consent of instructor. Explore particular topics in-depth in Obstetrics and Gynecology. Extensive contact with and oversight by instructor. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**499. Research in Obstetrics and Gynecology (2-12)**

Clinical activity. Prerequisite: consent of instructor; fourth-year medical student. Research in Obstetrics and Gynecology arranged with instructor. May be repeated eight times for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**Ophthalmology (OPT)****Upper Division****192. Research Internship (1-12)**

Internship—3-36 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in ophthalmology research. Research staff in Ophthalmology have programs in cell biology, electron microscopy, biochemistry, immunology and visual psychophysics. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate****299. Basic Research in Visual Science (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**Professional****442. Introduction to Ophthalmology (3)**

Clinical activity—40 hours. Prerequisite: third- or fourth-year Medical Student with consent of instructor; consent of adviser; completion of third-year clerkships in Medicine and Surgery; consult Course Coordinator. Ocular disease diagnosis and management relevant to the clinical practice of future primary care physicians and others. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Baik

**465. Advanced Subspecialty Ophthalmology (3-6)**

Clinical activity—40 hours. Prerequisite: Medical students who have completed Internal Medicine 430 in third or fourth year; consent of instructor. Participation in disciplines of neuro-ophthalmology/pediatric ophthalmology, diseases of the cornea and external eye, glaucoma and retina. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Baik

**498. Group Study (1-3)**

Prerequisite: medical students with consent of instructor. Directed reading and discussion. (H/P/F grading only.)

**499. Research in Ophthalmology (1-12)**

To be arranged—3-36 hours. Prerequisite: medical students with consent of instructor. Individual research on selected topics in optics and visual physiology, cornea and external disease. (H/P/F grading only.)

**Orthopaedic Surgery (OSU)****Lower Division****99. Special Studies for Undergraduates (1-4)**

Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)

**Upper Division****199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

**Professional****421. The Musculoskeletal System (2.5)**

Lecture/discussion—4 hours; discussion—2 hours. Prerequisite: consent of committee on student progress. Restricted to Medical students only. Basic and clinical science of orthopaedic surgery and rheumatology. (P/NP grading only.)—F. (F.) Marder, Van-DenBogaerde

**428. Ambulatory and Emergency Room Orthopaedics (3-6)**

Clinical activity. Prerequisite: fourth-year medical student in good academic standing; consent of instructor. Introduction to general orthopaedic problems and trauma and their management in an outpatient environment, including the emergency room. Student will conduct orthopaedic examinations, present patients to staff rotating through trauma, hand, pediatrics, adult and foot clinics. Orthopaedic physical examination and interpretation of x-rays. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Eastman

**462. Community Preceptorship (3-6)**

Clinical activity. Prerequisite: fourth-year medical student in good academic standing; consent of instructor. Acquaints student with private practice of orthopaedics in the community setting. Opportunity to observe and assist private practitioners in office, emergency room, operating room and inpatient environment. Student must provide own transportation. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Bovill, Eastman

**464. Acting Internship (6)**

Clinical activity. Prerequisite: fourth-year medical student in good academic standing; consent of instructor. Rotation designed to increase basic knowledge of musculoskeletal abnormalities at clinical level. Attention focused on selective case material. For those students who demonstrate proficiency, responsibility will be similar to that of intern. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Eastman

**465. Externship in Advanced Orthopaedics (3-6)**

Clinical activity—40 hours. Prerequisite: fourth-year medical student in good academic standing and consent of instructor. Advanced Orthopaedic rotation done at an approved institution. Topics may include Trauma, Sports, Spine, Pediatrics, Joint and/or Foot/Ankle. Students are expected to perform at the level of an Intern. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**480. Insights in Orthopaedic Surgery (1-3)**

Clinical activity—3-9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Exposure to aims, methods and procedures in orthopaedic surgery via attendance at grand rounds, patient care conferences, and group discussions. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Szabo

**481. History of Medicine for Medical Students (1.5)**

Lecture/discussion—2.5 hours (for six weeks). Prerequisite: third- or fourth-year students in the School of Medicine or second-year students with consent of instructor. Overview of the history of medicine throughout the world to introduce medical students to landmark accomplishments and key figures in the development of health care and to provide an expanded philosophical perspective on the ever-changing field of modern medicine. (H/P/F grading only.)—F.

**499. Orthopaedics Research (1-12)**

Clinical activity—3 hours to full time (to be arranged with individual faculty). Prerequisite: third- or fourth-year medical student in good academic standing; consent of instructor. Laboratory or clinical investigation on selected topics. May be repeated for credit. (H/P/F grading only.)

**Otolaryngology (OTO)****Upper Division****192. Internship in Otolaryngology (1-12)**

Internship—3 to 36 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in otolaryngology and related fields. Final project report. (P/NP grading only.)

**199. Special Study in Otolaryngology for Advanced Undergraduates (1-5)**

Prerequisite: advanced undergraduate with consent of instructor. (P/NP grading only.)—F, W, S, Su.

**Graduate****290C. Research Conference in Otolaryngology (1)**

Lecture/discussion—1 hour. Prerequisite: graduate students; medical students; advanced undergraduates with consent of instructor. Presentation and discussion of faculty and student research in otolaryngology. (S/U grading only.)—F, W, (F, W.)

**291. Principles of Speech, Hearing and Equilibrium (3)**

Lecture/discussion—3 hours. Prerequisite: graduate students; medical students; advanced undergraduates with consent of instructor. Presentations by faculty and guest lecturers on anatomy, physiology, and behaviors involved in speech production, hearing, and equilibrium. Each student will be expected to make one class presentation. —(F, W, S, Su.)

**299. Individual Study in Otolaryngology for Advanced Graduate Students (1-12)**

Prerequisite: advanced graduate student with consent of instructor. (S/U grading only.)

**Professional****403. Basic Principles of Reconstructive Surgery (1)**

Lecture—four 2-hour sessions; laboratory—one 2-hour session (4 weeks). Prerequisite: third- or fourth-year medical student with consent of instructor. Formal presentations covering basic principles of reconstructive surgery, including wound healing, treatment of lacerations, skin and bone grafts, flaps, Z-plastics and revision of scars. Laboratory session utilizing animal tissues. —W. (W.)

**440. Otolaryngology Required Clerkship (3-9)**

Clinical activity—30 hours. Prerequisite: consent by Committee on Student Evaluation and Promotion. Provide fundamental knowledge of otorhinolaryngologic diagnosis and principles, develop facility with basic ENT instruments, provide an understanding of treatment for ear, nose and throat problems and provide knowledge of what patients should be referred for otorhinolaryngologic care. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Diaz

**450. Fourth Year Otolaryngology Elective (6)**

Clinical activity—35 hours; lecture—2 hours; film viewing—0.25 hours; discussion—1 hour. Prerequisite: third- or fourth-year medical student; consent of instructor. Participation in Otolaryngology Clinic and operating room. Evaluation and management of common Otolaryngologic diseases. (H/P/F grading only.)—(F, W, S, Su.) Diaz

**460. Clinical Otolaryngology Elective (3-18)**

Clinical activity—full time. Prerequisite: third- and fourth-year medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Total involvement in clinical activities of the department. (H/P/F grading only.)—(F, W, S, Su.) Diaz

**490. Journal Seminar (1)**

Lecture/discussion—10 hours total (course given three times per quarter). Prerequisite: fourth-year medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Monthly review of current otolaryngologic and related literature and recent advances. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**498. Individual or Group Study (1-5)**

Lecture/discussion—1-2 hours; laboratory—1-4 hours. Prerequisite: consent of instructor. Introduction to basic research in Otolaryngology. Lectures, discussion and laboratory study of sensory and motor systems. (H/P/F grading only.) Diaz

**499. Research (1-12)**

Prerequisite: medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Participation in ongoing projects. (H/P/F grading only.)

**Pathology (PMD)****Upper Division****192. Internship in Human Pathology (1-12)**

Internship—3-36 hours; final project report. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in pathology and related fields. (P/NP grading only.)

**199. Special Study in Pathology for Advanced Undergraduates (1-5)**

Prerequisite: advanced undergraduates and consent of instructor. (P/NP grading only.)

**Graduate****290C. Research Group Conferences (1)**

Seminar—1 hour. Prerequisite: graduate level standing. Seminar. Topics on animal models of human disease and infectious diseases. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**298. Advanced Group Study (1-5)**

Prerequisite: consent of instructor.

**299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**Professional****405. Brain Cutting Conference (1-4)**

Seminar—1-4 hours. Prerequisite: third- and fourth-year medical students or consent of instructor. Current specimens are sectioned, discussed, and clinical correlations proposed. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Ellis

**407. Advanced Neuropathology (3-18)**

Lecture/discussion—40 hours. Prerequisite: third- or fourth-year medical student; consent of instructor. Restricted to Medical students only. Presents an integrated introduction to mechanisms of the central and peripheral nervous system injury. Gain an understanding of pathological mechanisms underlying disease, the anatomic and molecular manifestations of pathologic processes of the CNS and PNS. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Lechpammer

**410A. General and Endocrine Pathology (2.5)**

Lecture—4 hours; laboratory/discussion—4.5 hours. Restricted to Medical students only. Pathologic mechanisms of human disease. Concepts of general pathologic processes, i.e., cell death, inflammation and neoplasia. Endocrine pathology in the context of clinical human disease. Emphasis on integration of clinical practice with gross and histologic images emphasizing team-based learning. (P/F grading only.)—W. (W.) Olson

**410B. Systemic Pathology (1)**

Lecture—1 hours; laboratory/discussion—0.5 hours. Prerequisite: Approval by SOM Committee on Student Progress. Restricted to Medical students only. Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Topics include hematopathology and neuropathology. (Deferred grading only, pending completion of sequence. P/F grading only.)—Su. (Su.) Olson

**410C. Systemic Pathology (2)**

Lecture—1 hour; discussion—2 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Topics include pulmonary pathology, cardiovascular pathology, hematopathology, oncologic pathology, and nephropathology. (Deferred grading only, pending completion of sequence. P/F grading only.)—F. (F.) Olson

**410D. Systemic Pathology (2.5)**

Lecture—1 hour; discussion—2 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Anatomic and clinical pathology of organ system human disease with emphasis on integration with clinical medicine.

Course content parallels concurrent clinical courses with integration of lectures and discussions. Topics include gastrointestinal and gynecologic pathology, hepatopathology, oncologic pathology and musculoskeletal pathology. (Deferred grading only, pending completion of sequence. P/F grading only.)—W. (W.) Olson

#### **435. Clinical Patient Care in Pathology (3-9)**

Clinical activity—24 hours; independent study—7 hours; lecture/discussion—4 hours. Prerequisite: completed one of the following 3rd year clerkships: Family Medicine, Internal Medicine, Surgery, OBGYN or Pediatrics; consent of instructor. Four-week course is designed to give the third-year medical student an exposure to the diverse roles that pathologists have in clinical patient care. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Dwyre

#### **440. Surgery-Pathology-Radiology (SPR) Research Laboratory (2)**

Lecture/discussion—1 hour; laboratory/discussion—2 hours. Provide future clinicians and scientists with basic clinical and bioengineering laboratory skills to prepare for careers in translational research. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Tran, Wang

#### **464. Anatomic Pathology (3-6)**

Clinical activity—40 hours. Prerequisite: fourth-year Medical Students; consent of instructor. Restricted to Medical Students only. Anatomic pathology with an emphasis on autopsy and surgical pathology with application to clinical practice. Specimen grossing, frozen sections, microscopic sign-out and conferences. Exposure to cytopathology, hematopathology, and clinical pathology is available. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Bishop

#### **465. Applied Clinical Laboratory Medicine (3-6)**

Prerequisite: consent of instructor. Emphasis upon laboratory techniques, procedures, and interpretation of laboratory results. Students will be expected to participate fully and in all laboratory operations including bench techniques, laboratory management, and quality control. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Jensen

#### **470. Sub-Specialty in Didactic Pathology (3-16)**

Lecture/laboratory—25 hours. Prerequisite: consent of instructor. Externship provides in-depth exposure to one of a variety of subspecialties in Pathology. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Gandour-Edwards

#### **474. Anatomic Pathology Acting Internship (6)**

Clinical activity—40-80 hours. Prerequisite: fourth-year medical student or consent of instructor. Restricted to medical students only. Anatomic Pathology AI will permit students to gain skills needed for first year Pathology Residency. Students will perform autopsies and take full responsibility for a variety of surgical pathology cases. A mix of outpatient and inpatient cases is expected. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Bishop

#### **475. Anatomic Pathology Acting Internship (3-9)**

Clinical activity—40-80 hours. Prerequisite: completion of course 410 series or equivalent; successful completion of third-year clinical rotations; consent of instructor. Restricted to Medical Students only. Year four level course is designed to provide a concentrated experience in Surgical Pathology and Cytopathology. Rotate on the surgical and cytopathology sub-specialty teams and assume responsibility for patient cases. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Huang

#### **493. Interdisciplinary Study of Gastrointestinal Cancer (6)**

Lecture—5 hours; clinical activity—12 hours; laboratory—3 hours; discussion/laboratory—20 hours. Prerequisite: consent of instructor. In-depth study of gastrointestinal, hepatic and pancreatic cancer. Emphasis on an integration of basic science and

clinical medicine. Participating departments include pathology, surgical oncology, medical oncology, gastroenterology, radiology and radiotherapy. (Same course as Surgery 493D.) (H/P/F grading only.)—F, S. (F, S.) Khatri, Olson

#### **497T. Tutoring in Pathology (1-5)**

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)

#### **498. Advanced Group Study (1-5)**

Prerequisite: medical student and consent of instructor. Group study in variety of advanced topics in general, special, experimental, or comparative pathology. (H/P/F grading only.)

#### **499. Research (1-18)**

Prerequisite: medical student; consent of instructor. Limited enrollment. Research in experimental, molecular, comparative, and applied pathology. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **Pediatrics (PED)**

##### **Upper Division**

#### **199. Special Study in Pediatric Research (1-5)**

Prerequisite: undergraduate student with consent of instructor based upon adequate preparation as determined by instructor. (P/NP grading only.)

#### **Graduate**

#### **299. Pediatric Research (1-12)**

Prerequisite: graduate students who are candidates for a degree in some area of biology or behavioral sciences; consent of instructor. (S/U grading only.)

#### **Professional**

#### **401. Preceptorship in Pediatrics (2)**

Preceptorship—half time. Prerequisite: second-year medical student or first-year medical student with consent of instructor. Opportunity to observe and participate in primary medical care in a practicing pediatrician's office. Participation in history-taking and physical examination will be at discretion of preceptor and dependent on student's experience. Evaluation by student. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **402. Clinical Experience in Private Practice (1-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: third-or fourth-year medical student; course 430; consent of preceptor and Chairperson. Opportunity to participate in practice of preceptor, performing such tasks as history taking, physical examination, and patient management. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **405. Pediatrics Lecture Series (0.5)**

Lecture—15 sessions. Prerequisite: consent of instructor. Lecture series covers major topics in pediatrics with case presentations and panels from pediatric subspecialists. Topics include, but are not limited to: cardiology, pulmonology, nephrology, gastroenterology, critical care, and primary care pediatrics. May be repeated for credit.—F. (F.) Gross

#### **415. Fetal and Neonatal Physiology (1)**

Lecture/discussion—4 hours; independent study—4 hours. Prerequisite: consent of instructor. Elective is designed to combine for study a variety of aspects of the physiology, anatomy and biochemistry of the fetus and newborn with relevant clinical examples of disorders in each of the 10 topics that will be discussed. (P/F grading only.)—S. (S.) Philipps, Subramanian

#### **430. Pediatric Clerkship (12)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Restricted to Medical students only. Eight week clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient by participating in nursery, ambulatory and inpatient services at UCDMC and affiliated clinical

sites. Rounds, conferences, student presentations ongoing. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Butani, Plant

#### **430F. SJVP Pediatric Clerkship at UCSF (12)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Restricted to Medical students only. Eight-week clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient by participating in nursery, ambulatory and inpatient services at UCSF Fresno. Rounds, conferences, student presentations ongoing. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Butani, Plant

#### **439D. Directed Clinical Studies in Pediatrics (1-12)**

Clinical activity—40 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **439R. Directed Studies in Pediatrics (1-12)**

Clinical activity—30 hours; independent study—10 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **460A. Acting Internship: General Inpatient Pediatric Clerkship (6-18)**

Clinical activity—full time (4 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member. Limited enrollment. The Ward Acting Intern functions in a manner similar to that of a pediatric intern. The Acting Intern takes admissions in the regular sequence and is expected to take night call. The Acting Intern can expect to manage between six and ten patients at a time. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Kim

#### **460B. Acting Internship: Outpatient Pediatrics (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member. Limited enrollment. Supervised experience in pediatric care on outpatient service at UCDMC. Student functions as "Acting Intern" with appropriate supervision by residents and attending faculty. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Palmer

#### **461. Pediatric Inpatient AI in Hematology/Oncology (6)**

Clinical activity—37.5 hours; lecture—7.5 hours. Prerequisite: satisfactory completion of course 430; consent of instructor. Limited enrollment. Inpatient and outpatient experience in diagnosis and management of oncologic and hematologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Pawar

#### **462. Elective in Pediatric Endocrinology (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member; consent of instructor. Limited enrollment. Inpatient and outpatient experience in diagnosis and management of endocrine disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Styne

#### **463. Medical and Mental Health Evaluation of Children at Risk for Maltreatment (3-9)**

Clinical activity—30 hours; discussion—4 hours. Elective for fourth-year medical students covers basic areas of knowledge needed for child abuse prevention and consultation. Rotation includes legal cases, abuse exams, child and parent interactive therapy

and visits to community organizations. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Coulter, Urquiza

#### **464. Acting Internship in Neonatology (6-18)**

Clinical activity—full time (4 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member. Limited enrollment. Diagnostic and therapeutic aspect of the medical and surgical high-risk neonate. Student expected to take night call. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Chan

#### **465. Pediatric Specialty Clinic Elective (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Limited enrollment. Supervised experience in a variety of pediatric subspecialty clinics. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **466. Elective in Pediatric Cardiology (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430. Inpatient and outpatient experience in diagnosis and management of cardiologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Berger

#### **467. Elective in Pulmonary Medicine (3-18)**

Clinical activity—full time (2 to 12 weeks); daily rounds, two weekly half-day clinics. Prerequisite: pediatric clerkship. Inpatient and outpatient management of pediatric patients with pulmonary diseases. These will include but will not be limited to cystic fibrosis, asthma, and other forms of chronic pulmonary diseases as well as congenital abnormalities. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Jhawar

#### **468. Elective in Pediatric Nephrology (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Limited enrollment. Inpatient and outpatient experience in diagnosis and management of renal disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Butani

#### **469. Elective in Pediatric Infectious Disease (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Limited enrollment. Inpatient and outpatient experience in diagnosis and treatment of infectious disease of infants and children. Laboratory and clinical investigation may be arranged. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Blumberg

#### **470. Elective in Pediatric Neurology (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430, Internal Medicine 430, Obstetrics and Gynecology 430, and Pediatrics 430 and consent of instructor. Limited enrollment. Inpatient and outpatient experience in diagnosis and management of neurological disorders in children. Students will also participate in other pediatric subspecialty clinics which serve children with neurological disorders. This course does not satisfy the fourth year neurology requirement. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Chang

#### **471. Elective in Pediatric Gastroenterology (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Limited enrollment. Inpatient and outpatient experience in diagnosis and management of gastroenterology disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Kawatu

#### **472. Clinical Rotation in Adolescent Medicine (3-9)**

Clinical activity—39 hours; lecture—1 hour. Prerequisite: fourth year Medical Student; consent of instructor. Under supervision, students will see patients in the UCD clinic and at a number of community-based sites. Emphasis on the socially-mediated problems that face adolescents, including substance abuse, STD's, pregnancy, depression and suicide. One hour of lecture each week. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Wilkes

#### **473. Away Acting Internship in Pediatrics (6-18)**

Clinical activity—40 hours; lecture—6 hours. Prerequisite: satisfactory completion of Pediatrics Clerkship; consent of instructor. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Butani

#### **476. Acting Internship in Pediatric Intensive Care (6-18)**

Clinical activity—full time (4 to 12 weeks). Prerequisite: completion of course 430 with grade of A or consent of instructor of record; letter of recommendation from Pediatrics faculty member. Limited enrollment. Evaluation and support of critically ill infants and children. In general, student expected to take night call every third night during rotation. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Plant

#### **493. Ethical, Legal and Social Issues in Clinical Genetics (6)**

Seminar—12 hours; clinical activity—18 hours; autotutorial—8 hours; independent study—2 hours. Prerequisite: consent of instructor. Restricted to UC Davis School of Medicine students only. Develop advanced knowledge, communication skills and attitudes necessary to provide compassionate, knowledgeable, and expert care to patients who may be at increased genetic risk for disease. Seminars cover ethical and legal principles, epidemiology, and genetics. (H/P/F grading only.)—W. (W.) Rich, Wilkes

#### **493B. Living with Intellectual & Developmental Disability in the Community (1-6)**

Clinical activity—4 hours; lecture—10 hours; fieldwork—4 hours; seminar—4 hours. Prerequisite: consent of instructor. In-depth experience with Intellectual & Developmental Disability across the lifespan. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Hansen

#### **493C. Fetal and Neonatal Physiology SSM (6)**

Lecture/discussion—24 hours; clinical activity—8 hours. Prerequisite: consent of instructor. Elective is available for students interested in exploring the fascinating world of the fetus and neonate. The elective is designed to combine the basic sciences with relevant clinical examples of disorders. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Chan, Philipp, Tache

#### **498. Directed Group Study (1-5)**

Variable—3-15 hours. Explore in-depth various topics in Pediatrics. Extensive contact with and oversight by instructor. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **499. Research Topics in Pediatrics (1-18)**

Prerequisite: student in Medical School with consent of instructor. Individual research project in pediatric subspecialty areas (cardiology, endocrinology, hematology, metabolism, newborn physiology and others) may be arranged with faculty member. Independent research by student will be emphasized and long-term projects are possible. (H/P/F grading only.)

#### **Physical Medicine and Rehabilitation (PMR)**

##### **Upper Division**

#### **100. Research Approaches to Disability and Rehabilitation (2)**

Lecture/discussion—2 hours. Discussion and evaluation of research approaches to medical rehabilitation, community integration, and quality of life of disabled persons, with a focus on the progressive disabilities associated with neuromuscular diseases. Intent is to encourage interest in professions that serve the disabled community and increase awareness of rehabilitation goals.—W.

#### **198. Directed Group Study (1-5)**

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

#### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

##### **Graduate**

#### **299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

##### **Professional**

#### **405. Healthy Living: Leading by Example (1.5)**

Lecture—4 sessions; discussion—2 sessions; laboratory—4 sessions; clinical activity—1 session. Prerequisite: consent of instructor. Course is to improve the physical and mental health of participating students while supplementing their medical education with specific concepts. May be repeated for credit. (P/F grading only.)—F. (F.) Gerrit

#### **405A. Healthy Living: Leading by Example (1)**

Lecture—4 sessions; discussion—2 sessions; laboratory—4 sessions; clinical activity—1 session. Prerequisite: consent of instructor. Improve the physical and mental health of participating students while supplementing their medical education with specific concepts. May be repeated for credit. (P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Gerrit

#### **405B. Healthy Living: Leading by Example (0.5)**

Lecture—4 sessions; discussion—2 sessions; laboratory—4 sessions; clinical activity—1 session. Prerequisite: consent of instructor. Improve the physical and mental health of participating students while supplementing their medical education with specific concepts. May be repeated for credit. (P/F grading only; deferred grading only, pending completion of sequence.)—W. (W.) Gerrit

#### **440. Rehabilitation Medicine Clerkship (3)**

Clinical activity—36 hours; lecture/discussion—4 hours. Prerequisite: consent of instructor; completion of Internal Medicine 430, Surgery 430. Rehabilitation and comprehensive care of physically disabled and physical medicine management of neurologic, neuromuscular and musculoskeletal disorders. Emphasis on evaluation and conservative treatment of spinal disorders, sports injuries and neuromuscular disease. Emphasis on inpatient rehabilitation, pediatrics, spine or sports possible. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Spalding-Dias

#### **461. Rehabilitation Medicine (6)**

Clinical activity—36 hours; lecture/discussion—4 hours. Prerequisite: consent of instructor; completion of Internal Medicine 430, Surgery 430. Four-week rotation designed as broad overview of PM&R practice for students interested in residency training in the specialty. Emphasis on evaluation and conservative treatment of spinal disorders, sports injuries, neuromuscular disease, neurological and non-operative orthopedic problems requiring rehabilitative management. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Spalding-Dias

**462. Rehabilitation Medicine Clinical Elective (5-18)**

Clinical activity—full time. Prerequisite: Internal Medicine 430, Surgery 430; completion of third year in Medical School. Emphasis on evaluation of patients with neurological or orthopaedic problems requiring rehabilitative techniques for their management. Introduction to management of such patients. Physical Medicine and Rehabilitation at off-campus facility must be approved by Chairperson. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**493. Applied Musculoskeletal Anatomy: Sports & Spine SSM (6)**

Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor. Restricted to UC Davis School of Medicine students only. This four week module will review the anatomy and biomechanics of the musculoskeletal system as well as its associated pathology. The students will be instructed on appropriate musculoskeletal exam techniques and logical approach to the patient in the clinical setting. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Shin

**498. Advanced Group Study (1-5)**

Prerequisite: consent of instructor. Study and experience for medical students in any of a number of areas in physical medicine and rehabilitation. (H/P/F grading only.)

**499. Research for Medical Students (1-12)**

Prerequisite: consent of instructor. Research on any of a variety of topics in physical medicine and rehabilitation. (H/P/F grading only.)

**Psychiatry (PSY)****Lower Division****92. Willow Clinic (1-2)**

Clinical activity—2-6 hours; seminar—1-2 hours. Open to lower division undergraduate students. Student run clinic for undergraduate students interested in learning about and meeting the unique health care needs for the homeless population. May be repeated for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.) Han, McCarron

**Upper Division****192. Willow Clinic (1-2)**

Clinical activity—2-6 hours; seminar—1-2 hours; lecture—1-2 hours. Prerequisite: consent of instructor; UC Davis enrollment; upper-division standing. Student run clinic for upper division students interested in learning about and meeting the unique health care needs for the homeless population. May be repeated for credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.) Han, McCarron

**198. Directed Group Study (1-5)**

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

**Graduate****298. Directed Group Study For Graduate Students (1-5)**

Prerequisite: graduate standing and consent of instructor.

**299. Special Study for Graduate Students (1-12)**

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

**Professional****403. Fundamentals of Clinical Psychiatry (3)**

Clinical activity—1 hour; lecture—3 hours. Prerequisite: approval of SOM Committee on Student Progress; Restricted to medical students only. Psychiatric interviewing, Mental Status Exam and diagnosis. Major child and adult disorders, including substance

abuse and dependence. Weekly student interviews of psychiatric patients in small group format. (P/F grading only.)—W. (W) Hah, Newman

**410. Klingenstein Summer Elective (2.5)**

Clinical activity—20 hours. Prerequisite: consent of instructor. During this “mini-clerkship,” fellows will attend clinics, in-patient settings, and clinicians’ offices. They will meet weekly to present cases and review current literature, and will complete a summary narrative at the end of their experience. (P/F grading only.)—S. (S.) Horst

**410L. Klingenstein Longitudinal Elective (2)**

Clinical activity—5 sessions; laboratory/discussion—10 sessions; discussion—2 sessions. Prerequisite: consent of instructor. Year-long mentoring program provides clinical exposure to child and adolescent psychiatry healthcare during a medical student’s pre-clinical years. (P/F grading only; deferred grading only, pending completion of sequence.)—W, S, Su. (W, S, Su.) Horst

**412. Psychiatry Grand Rounds (1)**

Lecture—1 hour. Prerequisite: medical students or staff or other qualified mental health professionals with consent of instructor. Weekly conference at UCDMC for presentation of selected clinical cases, presentation of lecture and research reports. (H/P/F grading only.)—W, S, Su. (W, S, Su.) Scher

**413. Outpatient Psychiatry Clerkship (6)**

Clinical activity—36 hours; conference—2 hours; lecture—2 hours. Prerequisite: course 430 and/or consent of coordinator. Experience in clinical management/treatment of adult outpatients with psychiatric and substance abuse disorders; crisis management/intervention; evaluation/development of diagnosis and treatment plan; emphasis on outpatient psychopharmacology/brief psychotherapy; observation of group therapy. Individual supervision by faculty/residents. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Ton

**414. Psychosomatic Medicine Clerkship (3-12)**

Clinical activity—32 hours; discussion—8 hours. Prerequisite: Psychiatry Clerkship or consent of instructor; medical students only. A large university hospital service in which the student functions as a member of the team in evaluation, management and psychiatric liaison with other medical specialties. Intensive supervision from senior staff and psychiatric residents. May be repeated two times for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Liu

**415. Telemedicine Clinical Elective (3-9)**

Clinical activity—20 hours. Prerequisite: MS 4 with consent of Instructor. Fourth-year medical student elective in Telemedicine focusing on psychiatric issues. Align with University, School and Center for Health and Technology mission of rural outreach and public health, particularly in primary care. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Hiltz, Tomy

**416. Child Psychiatry Clerkship (6)**

Clinical activity—36 hours; lecture/discussion—2 hours; conference—2 hours. Prerequisite: course 430 and/or consent of instructor. Didactic and clinical inpatient, outpatient, and consultation-liaison experiences with children, adolescents and families. Clinical observations, diagnostic assessment, and treatment will be undertaken with close supervision. Literature review and case conferences presented on a regular basis. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Ton

**417. Jail Psychiatric Clerkship (6)**

Clinical activity—28 hours; conference—8 hours; lecture—4 hours. Prerequisite: course 430 and/or consent of course coordinator. Students gain experience, under close faculty supervision, assessing acute and chronic mentally ill inmates in both inpatient and clinic settings. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Ton

**418. Off-Campus Clinical Experience**

(3-9)

Clinical activity—20-40 hours. Prerequisite: fourth-year medical students; consent of instructor. Clinical or research elective in off-campus medical school or mental approval of instructor and individual in charge of off-campus setting. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**420. Acting Internship in Psychiatry (62)**

Clinical activity—40 hours. Prerequisite: course 430 and/or consent of course coordinator. Acting intern position with close faculty supervision with emphasis on biological psychiatry, psychopharmacology and psychodynamic aspects appropriate to diagnostic and long-term patient management. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Liu

**421. Combined Medicine-Psychiatry Clerkship (3-6)**

Clinical activity—32 hours; discussion—8 hours. Prerequisite: Psychiatry Clerkship or consent of instructor; medical students only. Students will rotate through the county Primary Care Clinic under the supervision of dual-boarded Psychiatry and Internal Medicine/Family Practice Faculty to provide medical care of indigent and uninsured patients as well as primary care for psychiatry patients. May be repeated for credit two times. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Han, Scher

**422. Readings in Psychiatry (1-3)**

Readings/discussion—3-9 hours. Independent reading of a selected topic in psychiatry. Supervision and discussion with a psychiatry faculty member. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Scher

**423. Willow Clinic (3-12)**

Prerequisite: open to medical students in all four years of medical school. Student run clinic for medical students interested in learning about and meeting the unique health care needs for the homeless population. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Han, McCarron

**424. Functional Genomics (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing or consent of the instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (H/P/F grading only.)—W. (W.) Choudary

**430. Psychiatry Clinical Clerkship (12)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Assigned to clinical settings, students build upon the skills gained in preclinical years; emphasis on diagnostic, therapeutic and interpersonal skills. Areas of focus include patient management, interviewing skills, mental status exam, differential diagnosis, basic psychopharmacology, crisis assessment, intervention and case referrals. (H/P/F grading only.)—F, W, S, Su. Cox

**430FA. SJVP Longitudinal Psychiatry Clerkship at UCSF Track 1 (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)—S. (S.) Ton

**430FB. SJVP Longitudinal Psychiatry Clerkship at UCSF Track 1 (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are

required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)—Su. (Su.) Ton

#### **430FC. SJVP Longitudinal Psychiatry Clerkship at UCSF Track 1 (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Ton

#### **430FD. SJVP Longitudinal Psychiatry Clerkship at UCSF Track 2 (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Ton

#### **430FE. SJVP Longitudinal Psychiatry Clerkship at UCSF Track 2 (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)—W. (W.) Ton

#### **430FF. SJVP Longitudinal Psychiatry Clerkship at UCSF Track 2 (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)—S. (S.) Ton

#### **430TA. TeachMS Longitudinal Psychiatry Clerkship (A) (4)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Promotions; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)—F. (F.) Ton

#### **430TB. TeachMS Longitudinal Psychiatry Clerkship (B) (6)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Promotions; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)—W. (W.) Ton

#### **430TC. TeachMS Longitudinal Psychiatry Clerkship (C) (2)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Promotions; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required.

May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)—S. (S.) Ton

#### **439D. Directed Clinical Studies in Psychiatry (1-12)**

Clinical activity—40 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **439R. Directed Studies in Psychiatry (1-12)**

Clinical activity—30 hours; independent study—10 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **480. Insights in Psychiatry (1-3)**

Clinical activity—3–9 hours. Prerequisite: first- or second-year medical student in good academic standing; consent of instructor. On individual basis, student provided with an opportunity for gaining insight into various clinical activities in the practice of psychiatry. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Cox

#### **488. Acting Internship in Inpatient Psychiatry, Away Rotation (6)**

Clinical activity—40 hours. Prerequisite: Psychiatry Clerkship and/or consent of course coordinator. Inpatient acting internship at approved non-UCDHS affiliated training program that provides experience and preparation for ambulatory medical care. Students perform as an intern, with a smaller number of patients, greater supervision, and responsibility for the ongoing care of assigned patients. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **489. Acting Internship in Ambulatory Psychiatry, Away Rotation (6)**

Clinical activity—40 hours. Prerequisite: Psychiatry Clerkship and/or consent of course coordinator. Outpatient acting internship at an approved non-UCDHS affiliated training program that provides experience and preparation for ambulatory medical care. Students perform as an intern, with smaller number of patients, greater supervision, and responsibility for the ongoing care of assigned patients. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **493. Culture, Medicine and Society (6)**

Seminar—12 hours; clinical activity—16 hours; independent study—8 hours; discussion—4 hours. Prerequisite: consent of instructor. Restricted to UC Davis School of Medicine students only. Students will learn about the epidemiological significance of health disparities and barriers to access to health care. Covers (1) Epidemiology/Health Disparities; (2) Society and Medicine; (3) Cinemedication; (4) Reflection/Integration. (H/P/F grading only.)—S. (S.)

#### **498. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Approved for graduate degree credit. Medical students desiring to explore particular topics in depth. (H/P/F grading only for graduate or medical students.)

#### **499. Research (1-12)**

Prerequisite: consent of instructor. Approved for graduate degree credit. Individual research on selected topics or research projects. (H/P/F grading only for graduate or medical students.)

### **Public Health Sciences (SPH)**

#### **Lower Division**

#### **92. Internship in Community Health (1-12)**

Internship—3–36 hours. Prerequisite: lower division standing; consent of instructor. Students apply theory and concepts learned in the classroom through field work in a community health agency. (P/NP grading only.)

#### **Upper Division**

#### **101. Introduction to Public Health (3)**

Lecture—3 hours. Prerequisite: undergraduate standing. Provide basic concepts and controversies in public health, basic science of public health, social and behavioral factors in health and disease, environmental and occupational health issues, the relationship of public health to the medical care system and health care reform. GE credit: SciEng or SocSci | SE or SS. —W, S. (W, S.) McCurdy

#### **102. Introduction to Human Epidemiology (3)**

Lecture—1.5 hours; discussion—1.5 hours. Learn and understand the practice of epidemiology as it relates to human populations. The content is fundamental to the Public Health minor and a required core course. GE credit: SE. —S. (S.) Garcia

#### **104. Globalization and Health: Evidence and Policies (3)**

Lecture—3 hours. Provides an overview of the evidence on the multiple effects of globalization policies on health. GE credit: SS, WC. —W. (W.) De Vogli

#### **105. Health Disparities in the U.S. (2)**

Lecture—2 hours. Introduction to the principles and practice of health disparities research. GE credit: DD, SS. —W. (W.) Garcia

#### **132. Health Issues Confronting Asian Americans and Pacific Islanders (4)**

Lecture/discussion—4 hours. Health issues confronting Asian Americans and Pacific Islanders. (Same course as Asian American Studies 132.) GE credit: SocSci | SS. —W. (W.)

#### **160. General Health Education and Prevention (5)**

Lecture—4 hours; discussion—1 hour. Open to students in the internship program for the Health Education Program only; class size limited to 50 students. Topics include addiction, substance abuse/prevention, nutrition, stress management, physical fitness, body image, reproductive anatomy and physiology, contraceptive options, safer sex, sexual health, healthy relationships, and other general wellness/health promotion topics. Practice in peer counseling and outreach presentations. (P/NP grading only.)—Su. (Su.)

#### **161. Campus Alcohol/Drug Abuse Prevention Program Peer Educator Training (4)**

Lecture/discussion—3 hours; practice—1 hour. Prerequisite: course 160 (may be taken concurrently); consent of instructor. Preparation for internship in campus and community substance abuse prevention and educational intervention. Addiction and other physiological responses to alcohol and other drugs. Harm-reduction strategies for individuals and target populations. High risk behaviors. Practice in peer counseling skills and outreach presentations to small and large groups. (P/NP grading only.)—S. (S.)

#### **162. Health Advocates Peer Educator Training (4)**

Lecture/discussion—3 hours; practice—1 hour. Prerequisite: course 160 (may be taken concurrently); consent of instructor. Preparation for internship in campus and community health promotion and risk reduction. Nutrition, stress management, physical fitness, body image and disordered eating, skin cancer prevention, and other general wellness/health promotion topics. (P/NP grading only.)—S. (S.)

#### **175W. Health Policy and Health Politics (4)**

Seminar—3 hours; extensive writing or discussion—1 hour. Restricted to students attending UC Washington Center program. Following the model of a Congressional subcommittee, identification of four salient health policy issues for study, research, and development of model policies to address them. (Same Course as UC Davis Washington Center 175.) GE credit: SocSci, Wrt | ACGH, OL, SS, WE. —S. (S.) Wintemute

**190C. Research Conference in Community and International Health (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Weekly conference on research problems, progress, and techniques in Community and International Health. Critical discussion of recent journal articles. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

**192. Internship in Community Health Practice (1-12)**

Internship—3-36 hours. Prerequisite: upper division and graduate students; consent of instructor. The student, through fieldwork in a community health agency, learns to apply theory and concepts learned in the classroom. (P/NP grading only.)

**198. Study in Community and International Health (1-5)**

Prerequisite: undergraduate standing and consent of instructor. Study and experience for undergraduate students in any number of areas in community and international health. (P/NP grading only.)

**199. Research in Community and International Health (1-5)**

Prerequisite: undergraduate standing; consent of instructor. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (P/NP grading only.)

**Graduate****201. Introduction to Public Health (3)**

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Provides an overview of public health. Covers the history of public health in the U.S.; defines its major functions and constituencies; and, introduces fundamental principles of epidemiology, biostatistics, behavioral sciences, environmental health, infectious diseases, and reducing health disparities. May be repeated one time for credit.—Su. (Su.) Garcia

**203. Learning and Teaching in Public Health Contexts (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Aimed at current and future public health professionals interested in learning more about the educational potential for interactions with community members and other health professionals—all stakeholders in improving the health of communities.—S. (S.) Cassady, Zieghahn

**204. Globalization and Health: Evidence and Policies (3)**

Lecture—3 hours. Open to graduate student standing. In-depth integration of advanced epidemiological concepts. Provides an overview of the evidence on the multiple effects of globalization policies on health.—F. (F.) De Vogli

**205. Health Disparities in the U.S. (2)**

Lecture—2 hours. Introduction to the principles and practice of health disparities research. GE credit: DD, SS.—W. (W.) Garcia

**207. Advanced Epidemiologic Methodology (4)**

Lecture/discussion—4 hours. Prerequisite: course 206. In-depth integration of advanced epidemiological concepts. Theory, methods, and applications for observational studies including random and systematic error, confounding, counterfactuals, causal inference, effect modification, internal and external validity, estimability, and interpretation of effect measures, and advanced study designs. (Same course as Epidemiology 206.)—S. (S.) Hertz-Pannier, Kass

**209. History of Epidemiology in Public Health (2)**

Lecture—0.5 hours; discussion—1.5 hours. Introduction to the history of epidemiology in solving major public health problems. Original historical articles will be read/discussed. Topics may include: infectious disease, accidents/adverse events, nutritional deficiencies, community vaccination trials, occupa-

tional exposures, cancer, birth defects, cardiovascular disease, and smoking. (Same course as Epidemiology 209.)—W. (W.) Hertz-Pannier

**210. Public Health Informatics (2)**

Lecture—2 hours; laboratory—2 hours. Restricted to upper division or graduate standing. Collection, verification, and utilization of data related to populations; infrastructure, functions, and tools used to generate public health knowledge supporting public health practices and policy development/dissemination. (S/U grading only.)—Su. (Su.) Hogarth

**211. Infectious Disease Epidemiology (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: introductory epidemiology course (e.g., Epidemiology 205). Infectious disease epidemiology and prevention, with emphasis on human and veterinary diseases of global health importance. Major global health epidemics and challenges of infectious diseases, by mode of transmission. (Same course as Epidemiology 231.)—W. (W.) DeRiemer

**212. Migration and Health (3)**

Lecture/discussion—3 hours. Prerequisite: graduate standing. Principles of migration and health. Topics will include demographics, public health invention programs, health care delivery, occupational health, and effects of international migration on the health in communities of origin, transit and destination. Guest presentations by outside experts. Offered in alternate years.—(S.) Schenker

**222. Social & Behavioral Aspects of Public Health (3)**

Lecture/discussion—3 hours. Prerequisite: consent of instructor required; graduate standing, Statistics 102 and 106. Theories and strategies of health behavior change at the individual, group, community, and environmental levels. Examples include: transtheoretical model, social networks, and social marketing. Theories are applied to solve common public health problems (cancer, obesity, smoking, and HIV/AIDS).—W. (W.) De Vogli

**223. Obesity Prevention in Community Settings (3)**

Lecture/discussion—3 hours. Prerequisite: consent of instructor. Look at causes of the obesity epidemic in the U.S.; identify and critically assess the research literature on various prevention strategies; understand, and apply evidence-based public health strategies to combat obesity; and translate the science to a general audience.—F. (F.) Cassady

**232. Health Communication (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Health communication theories and research traditions. Topics include consumer health information seeking; physician-patient interaction; information, social marketing, "edutainment," and media advocacy campaigns; social networks and coping; media influences on health; and new communication technologies in health promotion and healthcare delivery. (Same course as Communication 232.) Offered in alternate years.—(S.) Bell

**244. Introduction to Medical Statistics (4)**

Lecture/discussion—6 hours; laboratory/discussion—3 hours. Introduction to statistical methods and software in clinical, laboratory and population medicine. Graphical and tabular presentation of data, probability, binomial, Poisson, normal, t, F, and Chi-square distributions, elementary nonparametric methods, simple linear regression and correlation, life tables. Only one unit of credit for students who have completed Statistics 100 or Preventive Veterinary Medicine 402.—Su. (Su.) Yang

**245. Biostatistics for Biomedical Science (4)**

Lecture—4 hours. Prerequisite: Clinical Research 244 or course 244 or the equivalent; consent of instructor. Analysis of data and design of experiments for laboratory data. (Same course as Clinical Research 245.)—W. (W.) Kim

**246. Biostatistics for Clinical Research (4)**

Lecture—4 hours. Prerequisite: course 245 or Clinical Research 245. Emphasizes critical biostatistics for clinical research and targets biomedical audi-

ence. Students will develop understanding for basic planning and analysis of clinical studies and learn to develop collaborations with biostatisticians. (Same course as Clinical Research 246.) May be repeated for credit. Offered in alternate years.—W. Qi

**247. Statistical Analysis for Laboratory Data (4)**

Lecture—4 hours. Prerequisite: Clinical Research 245 or course 245. Statistical methods for experimental design and analysis of laboratory data including gene expression arrays, RNA-Seq, and mass spec. (Same course as Clinical Research 247.)—S. Rocke

**252. Social Epidemiology (2)**

Lecture/discussion—2 hours. Prerequisite: Epidemiology 205A; consent of instructor. Social determinants of health; psychosocial and physiological pathways; health and social inequality; gender and racial/ethnic disparities in health; social support, social cohesion and health; social gradient in behavioral risk factors; social ecological approaches to health intervention; interventions addressing social determinants. (Same Course as Epidemiology 252.)—S. (S.)

**255. Human Reproductive Epidemiology (3)**

Lecture—3 hours. Prerequisite: Preventative Veterinary Medicine 405, 406, Physics 220, Physiology 222 or equivalents or consent of instructor. Human reproductive effects and risk of reproductive disorders, examined from macro- and micro-environmental exposures in community and occupational settings, epidemiologic study designs and analyses. Offered in alternate years.—F. Hertz-Pannier

**262. Principles of Environmental Health Science (3)**

Lecture—3 hours. Prerequisite: consent of instructor required. Principles, approaches and issues related to environmental health. Recognizing, assessing, understanding and controlling the impact of people on their environment and the impact of the environment on the public.—F. (F.) Bennett

**264. Public Health Econometrics (2)**

Laboratory/discussion—3 hours. Prerequisite: consent of instructor. Principles of demand and supply; elasticity; benefits and costs; least squares regression; stepwise regression; economic and statistical significance; fixed and random effects; longitudinal data; non-linear relations; continuous and binary variables; instrumental variables; attrition bias; tobit regression; Two-part cost model. (S/U grading only.)—S. (S.) Leigh

**266. Applied Analytic Epidemiology (3)**

Lecture—2 hours; laboratory—2 hours. Prerequisite: Preventive Veterinary Medicine 404 or consent of instructor. Principles and applications in analysis of epidemiologic data. Methods of analyzing stratified and matched data, logistic regression for cohort and case-control studies, Poisson regression, survival-time methods. (Same course as Population Health and Reproduction 266.)—S. (S.) Kass, Kim

**273. Health Services Administration (3)**

Laboratory—3 hours. Prerequisite: consent of instructor. Limited enrollment. Structure and function of public and private medical care. Topics include categories and trends in national medical spending, predictors of patient use, causes of death, managed care, HMOs, Medicare, Medicaid, costs of technology, and medical care in other countries.—W. (W.) Leigh

**276. Critical Assessment in Health Policy and Economics (2)**

Lecture/discussion—2 hours. Course aims to develop critical reading skills of the health policy and health economics literature, mainly following the microeconomic paradigm and analytical techniques. Some basic concepts of micro economic theory will be explained in the class.—F. W. (F. W.) Yoo

**290. Topics in Public Health (1)**

Seminar. Prerequisite: consent of instructor. Open to students in Master of Public Health program, or permission of instructor. Seminar on key issues and current topics in public health. Course begins in August

**Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;**

**ACGH=American Cultures; DD=Domestic Diversity; OL=Oral Skills; QL=Quantitative; SL=Scientific; VL=Visual; WC=World Cultures; WE=Writing Experience**

**Prefall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience**

**Quarter Offered: F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses**

SSII. Students must enroll in August, then Fall and Winter. The course is a series but grades and units are given at end of each quarter. May be repeated four times for credit. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.) Kass, McCurdy

### **295. International Health (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Forum for learning health issues and health care systems in other countries. Topics include health care for refugees, the impact of political strife on health, the health care professional in international settings. (S/U grading only.)—S. (S.) Koga

### **297. Public Health Practicum (1-16)**

Prerequisite: consent of instructor. Open to Master of Public Health students. Practical fieldwork experience in public health. Placement site will vary based on the interest and experience of each student. May be repeated four times for credit. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.) McCurdy

### **298. Study in Community and International Health (1-5)**

Prerequisite: graduate student in good academic standing; consent of instructor. Study and experience for graduate students in any number of areas in community and international health. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

### **299. Research in Community and International Health (1-12)**

Prerequisite: graduate standing; consent of instructor. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

## **Professional**

### **402. Introductory Medical Spanish (2)**

Lecture—2 hours. Prerequisite: medical student or consent of instructor. The vocabulary needed to conduct a basic history and physical examination in Spanish. (H/P/F grading only.)—S. (S.)

### **461. Clerkship in Community Health Group Practice (3-9)**

Clinical activity—full time (2-6 weeks). Prerequisite: third- or fourth-year medical student. Overview of local community health in group practice situations. Students participate in treatment at several clinic sites in Yolo County. Topics include primary care, environmental health, maternal and child health, jail health, and preventive health care for the aged. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.)

### **465. Community Health Preceptorship (3-18)**

Clinical activity—5-40 hours. Prerequisite: fourth-year medical student; consent of instructor. Participate at state or county health department or other public health organization in on-going investigations into current public health problems, e.g., birth defects, cancer control, diabetes, hypertension, injury control, infectious diseases, aging, Alzheimer's disease, and smoking and tobacco use control. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) McCurdy

### **466. Occupational and Environmental Medicine Elective (6-12)**

Clinical activity; laboratory. Prerequisite: fourth-year medical student in good academic standing; consent of instructor. Participate in activities of Occupational and Environmental Health Unit. Major activity is involvement in an epidemiologic research project of the University. Participate in Occupational and Environmental Medicine Clinic at UC Davis Medical Center and other sites, as arranged. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) McCurdy

### **470. Clinical Selective in Occupational and Environmental Medicine (3-6)**

Clinical activity—9-18 hours. Prerequisite: fourth-year medical student in good academic standing; consent of instructor. Outpatient clinical experience in Occupational and Environmental Medicine at

UCDMC and other sites, as arranged. Gain experience in evaluating occ/env medical conditions, use of medical literature resources, the worker's compensation system, and toxicological principles. Students may take up to four weeks for six units. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) McCurdy

### **480. Insights in Occupational and Environmental Medicine (1-3)**

Clinical activity—3-9 hours. Prerequisite: first- or second-year medical student in good academic standing; consent of instructor. Observe and participate in research and clinical activities in occupational and environmental medicine which include conferences, occupational and environmental medicine clinical activities and field visits. Develop and present small individual research projects. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.) McCurdy

### **495. International Health (2)**

Lecture/discussion—2 hours. Prerequisite: medical student in good academic standing; consent of instructor. Forum for learning health issues and health care systems in other countries. Topics include health care for refugees, the impact of political strife on health, the health care professional in international settings. (H/P/F grading only.)—S. (S.) Koga, Schenker

### **496. Current Issues in Public Health (1)**

Lecture/discussion—1 hour. Topical issues in public health. Speakers from the local public health community address issues such as disease control programs, access to care. May be repeated up to three times for credit. (P/F grading only.)—S. (S.) McCurdy

### **498. Study in Public Health Sciences (1-6)**

Prerequisite: medical student in good academic standing and consent of instructor. Study and experience for medical students in areas in community and international health. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

### **499. Research in Public Health Sciences (1-9)**

Prerequisite: medical students with consent of instructor. Work with faculty member in areas of research interest, including but not limited to public health, injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

## **Radiation Oncology (RON)**

### **Upper Division**

#### **199. Special Study for Advanced Undergraduates; Research in Radiation Biology (1-5)**

Prerequisite: undergraduate standing; consent of instructor. Radiation Oncology is a unique discipline combining elements of clinical practice linked to complex physics based dosimetry and treatment planning. Included within this clinical environment is a strong basis in biology that underpins the clinical effectiveness of radiation treatment. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.) Vaughan

### **Graduate**

#### **211. Introduction to Radiation Oncology Physics (3-6)**

Prerequisite: consent of instructor; restricted to physics and engineering graduate students and senior undergraduate physics majors. Class size limited to three students. Introduction to radiation oncology physics. Overview of treatment methodologies. Medical physics equipment. Treatment machine dosimetry, including calibration. Machine quality assurance. Patient dosimetry. Treatment planning. Simulation and treatment. Treatment quality assurance, including calculation checks and chart checks. Brachytherapy. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.) Stern

### **299. Independent Study and Research (1-12)**

Laboratory—3-40 hours. Prerequisite: enrollment with a Graduate Group for Ph.D. candidacy and consent of Group Adviser and Sponsor. Research under supervision of Radiation Oncology faculty. Work must be appropriate to fulfill the requirements for the Ph.D. degree. (S/U grading only.)—F, W, S, Su. (F, W, S, Su.) Coleman, Li, Vaughan

## **Professional**

### **420. Radiobiology Lecture Course (1)**

Lecture—1 hour. Prerequisite: Biological Sciences 1A, Mathematics 12, Physics 1A. Radiobiology lectures are designed to engage the physician residents, physics residents and medical students in learning Radiobiology principles and concepts during the year the Radiation Physics course is taught. May be repeated two times for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Coleman, Li, Vaughan

### **463. Radiation Oncology Clerkship (3-9)**

Clinical activity—30 hours. Prerequisite: completion of Medical Sciences 430, 431; third-year clinical clerkship, consent of instructor required. Introduction to radiation oncology. Students will participate in workup and treatment planning for radiation oncology patients and will be introduced to the concepts involved in clinical radiation oncology, radiation biology, and radiation physics. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Fragoso

### **465. Externship in Radiation Oncology (3-16)**

Clinical activity—30 hours. Prerequisite: consent of instructor. Externship provides in-depth exposure to the field of Radiation Oncology for students who rotate through an affiliated institution. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Fragoso

### **499. Independent Study and Research in Therapeutic Radiology (1-12)**

Prerequisite: consent of instructor. Advanced-level research seminar in clinical and/or translational radiation oncology. Work with the course instructor to generate a testable hypothesis. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Coleman, Fragoso, Li, Mayadev, Monjazeb, Vaughan

## **Radiology—Diagnostic (RDI)**

### **Professional**

#### **413. Radiological Diagnosis II (Physics of Diagnostic Radiology) (5)**

Lecture—49 hours total; laboratory—6 hours total. Prerequisite: consent of instructor. Physics of diagnostic imaging; x-ray production and interaction; image formation; modulation transfer function; fluoroscopy; cine fluoroscopy; stereoscopy; xeroradiography; computerized and geometrical tomography; magnetic resonance and ultrasound. Principles of radiation protection in imaging will be covered. (H/P/F grading only.)—F. (F.) Seibert, Boone

### **414. Medical Radiation Biology (3)**

Lecture—27 hours total. Prerequisite: consent of instructor. Medical radiation biology; molecular cellular and organ system response to acute and chronic irradiation; radiation carcinogenesis and genetic effects; radiation risk assessment; diagnostic ultrasound and magnetic resonance imaging health effects. Medical/legal considerations of radiation exposure. Offered in alternate years. (H/P/F grading only.)—S. Bushberg

### **461. Advanced Clinical Clerkship in Diagnostic Radiology (3-6)**

Clinical activity—35 hours; conference—4 hours; discussion/laboratory—1 hour. Prerequisite: satisfactory completion of second year medical school curriculum and of third-year clerkships in Internal Medicine and General Surgery; consent of instructor. Restricted to eight students per rotation; open to visiting medical students from accredited programs. Work with clinical Radiologists in image interpretation fluoroscopy angiography image-guided intervention cardiac stress testing radionuclide therapy.

Daily conferences in Radiology Diagnosis and Therapy Health Physics Radiation Safety. Prepare two clinical cases for in-class presentation. Assigned readings. May be repeated for credit. (H/P/F grading only)—F, W, S, Su. (F, W, S, Su.) Bateni, Shakeri

#### **462. Diagnostic Imaging of Acquired and Congenital Heart Disease (2)**

Lecture/discussion—5 hours (for 3 weeks). Prerequisite: fourth-year medical student in good academic standing and course 461 (may be taken concurrently). Main emphasis on radiology of acquired and congenital heart disease, but also on magnetic resonance, nuclear medicine, and echocardiography of heart diseases. (H/P/F grading only.)—S. (S.)

#### **473. Advanced Clinical Clerkship in Neuroradiology (3-6)**

Clinical activity—35 hours; conference—4 hours; independent study—1 hour. Prerequisite: fourth-year medical student with interest in Diagnostic Radiology, Neuroradiology, Neurology, Neurosurgery, Psychiatry, Psychology, or related field; satisfactory completion of course 461, or the equivalent, is strongly encouraged. Restricted to one student per 2/4 week rotation. Work with Neuroradiologists in image interpretation of CT, MRI, and fluoroscopy. Opportunity to participate in assessment of Neurointerventional patients, and to observe Neurointerventional procedures. Daily conferences in Neuroimaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings. Credit limited to 3 units for 2 weeks; 6 units for 4 weeks. May be repeated for credit. (H/P/F grading only)—F, W, S, Su. (F, W, S, Su.) Bobinski

#### **474. Advanced Clinical Clerkship in Pediatric Radiology (3-6)**

Clinical activity—30 hours; conference—5 hours; film viewing—3 hours; independent study—2 hours. Prerequisite: fourth-year medical students with interest in Radiology and/or Pediatrics; interested third-year medical students who have successfully completed Pediatrics clinical clerkships may enroll, given availability and consent of the instructor of record; prior completion of course 461, or the equivalent, encouraged. Restricted to two students per two-week or four-week rotation. Participation in the radiological care of Pediatric patients; evaluate the patient receiving the radiographic study, including pertinent historical/physical findings. Student expected to write up case files on interesting cases encountered during their rotation. Credit limited to 3 units for 2 weeks, or 6 units for 4 weeks. May be repeated for credit. (H/P/F grading only)—F, W, S, Su. (F, W, S, Su.) Gorges

#### **475. Advanced Clinical Clerkship in Musculoskeletal Radiology (MSK) (3-6)**

Clinical activity—35 hours; conference—4 hours; discussion/laboratory—1 hour. Prerequisite: fourth-year medical student with interest in Musculoskeletal Radiology, Orthopedic Surgery, Sports Medicine, PMNR, or related field; satisfactory completion of course 461, or the equivalent, is strongly encouraged. Restricted to one student per 2/4 week rotation. Work with Musculoskeletal Radiologists in interpretation of CT, MRI, radiography, and fluoroscopy. Opportunity to assess patients for, and to observe imageguided procedures. Daily conferences in Musculoskeletal Imaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings. Credit limited to 3 units for 2 weeks, 6 units for 4 weeks. May be repeated for credit. (H/P/F grading only)—F, W, S, Su. (F, W, S, Su.) Bateni

#### **476. Advanced Clinical Clerkship Vascular/Interventional Radiology (IR) (3-6)**

Clinical activity—35 hours; conference—4 hours; discussion/laboratory—1 hour. Prerequisite: fourth-year medical student with interest in Diagnostic Radiology, Vascular/Interventional Radiology, Cardiovascular Imaging, Cardiology, Cardiovascular Surgery, Surgical Oncology, General Surgery, or related field; satisfactory completion of course 461, or the equivalent, is strongly encouraged. Restricted to one student per 2/4 week rotation. Medical student will work with Vascular/Interventional Radiolo-

gists in the evaluation of patients for interventional procedures. There will be opportunities to Daily conferences in Neuroimaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings. Credit limited to 3 units for 2 weeks, 6 units for 4 weeks. May be repeated for credit. (H/P/F grading only)—F, W, S, Su. (F, W, S, Su.) Link

#### **477. Advanced Clinical Clerkship in Ultrasound Radiology (3-6)**

Clinical activity—30 hours; conference—5 hours; film viewing—3 hours. Prerequisite: fourth-year medical student with interest in Radiology, OB/GYN, or in other medical or surgical subspecialties employing ultrasound in their clinical practice; prior completion of course 461, or the equivalent, is encouraged. Restricted to two students per 2/4 week rotation. Participation as an active team member on a busy clinical ultrasound service. Credit limited to 3 units for 2 weeks, 6 units for 4 weeks. May be repeated for credit. (H/P/F grading only)—F, W, S, Su. (F, W, S, Su.) McGahan

#### **478. Advanced Clinical Clerkship Abdominal Imaging (3-6)**

Clinical activity—35 hours; conference—4 hours; discussion/laboratory—1 hour. Restricted to two students per 2/4 week rotation. Work with clinical Radiologists on abdominal and pelvic CT, MR, ultrasound, digital radiography, gastrointestinal and genitourinary procedures, image-guided intervention. Offered as a 2-week rotation for third-year medical students and a 2/4-week rotation for fourth-year medical students. Credit limited to 3 units for 2 weeks, 6 units for 4 weeks. May be repeated for credit. (H/P/F grading only)—F, W, S, Su. (F, W, S, Su.) Lamba

#### **479. Specialty Externship in Radiology (3-16)**

Clinical activity—25 hours; discussion—10 hours. Prerequisite: consent of instructor. Externship provides in-depth exposure to one of a variety of subspecialties in Radiology. May be repeated for credit. (H/P/F grading only)—F, W, S, Su. (F, W, S, Su.) Haggé

#### **498. Group Study in Diagnostic Radiology (1-12)**

Prerequisite: consent of instructor. (H/P/F grading only.)

#### **499. Independent Study and Research in Therapeutic Radiology (1-18)**

Prerequisite: consent of instructor. Advanced-level research seminar in clinical and/or translational radiation oncology. Work with the course instructor to generate a testable hypothesis. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Coleman, Fragoso, Li, Mayadev, Monjazeb, Vaughan

### **Radiology—Nuclear Medicine (RNU)**

#### **Upper Division**

##### **198. Directed Group Study (1-5)**

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

##### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

#### **Graduate**

##### **299. Research: Special Study for Graduate Students (1-12)**

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

#### **Professional**

##### **401. Biomedical Radiochemistry (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: open to graduate and medical students; consent of instructor. Approved for graduate degree credit. Course is designed to combine basic nuclear physics, chemistry, and biology into a comprehensive and vigorous lecture-laboratory experience in bio-

medical nuclear chemistry. Subjects include choice and purification of appropriate gamma and beta radioisotopes, compounding biological pharmacodynamics and radioimmunoassay. (H/P/F grading only.)—S. (S.)

#### **411. Radiological Physics I (Physics of Nuclear Medicine) (5)**

Lecture—43 hours total; laboratory—12 hours total. Prerequisite: consent of instructor. Physics of diagnostic and therapeutic nuclear medicine, nuclear physics, radioactive decay; interaction of ionizing radiation; dosimeters; attenuation; internal and external dosimetry; health physics; radiation detection and imaging, scintillation cameras, computerized planar and tomographic imaging. Offered at UC Davis Medical Center. Offered in alternate years. (H/P/F grading only.)—(F.) Bushberg, Vera

#### **463. Clinical Clerkship in Nuclear Medicine (3-8)**

Clinical Activity—full time (2-6 weeks). Prerequisite: satisfactory completion of second-year medical school; Radiology—Diagnostic 461 recommended; consent of instructor. Limited enrollment. Clerkship correlates radioisotopic methods with clinical, pathophysiological, and other diagnostic aspects of the patient's care. Each patient reviewed with student by faculty member. Reading assignments, informal projects, and research techniques available. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Shelton

#### **498. Group Study in Nuclear Medicine (1-12)**

Prerequisite: consent of instructor. Approved for graduate degree credit. (H/P/F grading only for medical students.)

#### **499. Research in Nuclear Medicine (1-12)**

Prerequisite: consent of instructor. Approved for graduate degree credit. (H/P/F grading only for medical students.)

### **Surgery (SUR)**

#### **Lower Division**

##### **99. Cardiovascular Tissue Engineering Research (1-5)**

Laboratory—3-15 hours. Multidisciplinary research in cardiovascular tissue engineering and regeneration for acquired and congenital cardiovascular disease. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.) Si

#### **Upper Division**

##### **192. Internship in General Surgery (1-12)**

Internship—3-36 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in general surgery and related fields. (P/NP grading only.)

##### **199. Special Study in General Surgery for Advanced Undergraduates (1-5)**

Prerequisite: advanced undergraduate student with consent of instructor. (P/NP grading only.)

#### **Graduate**

##### **299. Research (1-12)**

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

#### **Professional**

##### **430. Surgery Clerkship (12)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Eight week general surgery clerkship includes GI, Burn, Oncology, Plastics, Vascular Cardiothoracic, consult, transplant and trauma. Clerkship assignments are at UCDMC. Daily core material presentations and reading assignments. Student involvement includes work-up and care of surgical patients. (H/P/F grading only.)—F, W, S, Su. Wisner

##### **430F. SJVP Surgery Clerkship at UCSF (12)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Eight-week general surgery clerkship includes GI, Burn, Oncology, Plastics, Vascular Cardiotho-

racic, consult, transplant and trauma. Clerkship assignments are at UCSF Fresno. Daily core material presentations and reading assignments. Student involvement includes work-up and care of surgical patients. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Wisner

#### **439D. Directed Clinical Studies in Surgery (1-12)**

Clinical activity—40 hours. Prerequisite: partial completion of a Clinical Rotation; consent of instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **439R. Directed Studies in Surgery (1-12)**

Clinical activity—30 hours; independent study—10 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **450. Surgical Skills Boot Camp (3-6)**

Workshop—10 hours; independent study—30 hours. Prerequisite: consent of instructor. Goal of the surgical skills boot camp didactic is to enable students to demonstrate competence in basic surgical skills and theory, using analytical thinking and hands-on simulation. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Pierce

#### **461. Surgery Burn Unit Clerkship (6 or 9)**

Clinical activity. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430; consent of instructor. Externship in the eight-bed Burn Unit, and the 80 bed Shriners Hospital for Children. Principles of critical care, fluid and electrolyte resuscitation and management of surgical wounds in both adults and children. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Greenhalgh

#### **462. Surgery Trauma Service Clerkship (6 or 9)**

Clinical activity. Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430; consent of instructor. Student works as an extern on one of the two general surgery Trauma teams, participating in resuscitation and management of critically injured patients. Team hours consist of 24 hours on, and 24 hours off. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Phan, Salcedo

#### **463. Surgery Intensive Care Unit (6 or 9)**

Clinical activity. Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430; consent of instructor. Student participates in direct supervision of critically ill surgical patients in a twelve-bed surgery ICU. Each student is closely supervised. Provides in-depth experience with management of critically ill patients. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Coccoanour

#### **466. Clinical Plastic Surgery Elective (3-9)**

Clinical activity—50 hours. Prerequisite: third- or fourth-year medical students; Surgery 430; consent of instructor. Total involvement in patient care involving surgical preparation, treatment, operative care, and follow-up. Developing and understanding reconstruction and aesthetic plastic surgery. Microvascular surgery included. Student rotation. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **467. Surgical Oncology (3-9)**

Clinical activity. Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430; consent of instructor. Students actively participate in management of patients requiring surgery for cancer, endocrine disease and selected general surgical problems. Cases include malignant melanoma, sarcomas, gastrointestinal

cancer, head and neck pathology, and metastatic malignancies. Attending rounds daily. Four teaching conferences weekly. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Bold

#### **468. Cardiothoracic Surgery Clerkship (6-9)**

Clinical activity. Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430; consent of instructor. Student works as an extern on the Cardiothoracic Surgical Service, participating in perioperative management and operations on the heart, lungs, mediastinum, and other thoracic structures. Regularly scheduled teaching conferences are conducted. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Young

#### **471. Gastrointestinal Surgery (3-9)**

Clinical activity. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430, Internal Medicine 430 and Pediatrics 430; consent of instructor. Student participates on the GI Surgery Service, working under the immediate supervision of the faculty and surgical housestaff, involving the full spectrum of gastrointestinal diseases performed by the medical student. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Ho

#### **472. Vascular Surgery (3-9)**

Clinical activity—full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430, Internal Medicine 430 and Pediatrics 430; consent of instructor. Student participates on the vascular surgery service and in the management and operations of arterial and venous system, exclusive of diseases that require cardiopulmonary bypass for treatment. Includes patient care responsibilities with appropriate supervision. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Dawson, Humphries

#### **475. Pediatric Surgery (6-9)**

Clinical activity. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430; consent of instructor. Care of patients with neonatal congenital surgical problems. Fluid and electrolyte management in infants. General experience with acquired surgical diseases in children. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Marr

#### **476. Surgical Consult Service (6-9)**

Clinical activity. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430; consent of instructor. Students function as acting interns working in parallel with the interns on the service. They consult on all non-trauma patients in the emergency room and on the wards and also participate in the operating room. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Wisner

#### **477. Clinically Oriented Anatomy (3)**

Clinical activity—40 hours. Prerequisite: completion of three years of medical school. Restricted to fourth-year medical student only. Anatomy of selected regions of the body using cadaver dissection, projections and interactive CD-ROMs. Anatomical relationships relevant to common surgical procedures. Surgical and interventional radiology procedures. (H/P/F grading only.)—W. (W.) Khatri

#### **478. Surgical Preceptorship: Off Campus (3-18)**

Clinical activity—60 hours. Prerequisite: fourth-year medical student; consent of instructor. Student participates in the preoperative, operative and postoperative care of surgical patients under the supervision of attending staff. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Holcroft

#### **480. Insights in Surgery (1-3)**

Clinical activity—3-9 hours. Prerequisite: medical student in good academic standing and consent of instructor. Individualized activities, including ward rounds, subspecialty clinics and conferences, grand rounds, and observation of a variety of surgical procedures. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

#### **481. Interactive Clinical Case Presentation (ICCP) (3)**

Clinical activity—1 hour. Prerequisite: fourth-year medical students; however, course is open for third and fourth year student observers. Course taught as one session (4 hours) per month for three quarters (July to March); students who enroll can earn up to three credits and the minimum requirements will be to attend at least six sessions; students can do all nine sessions and work toward an honor; for the written part students will have to pick two of the nine case presentations and write a detailed paper with a literature review on "The Current management" of that disease; this can in fact be a manuscript submitted for publication with a faculty member as an adviser; maximum of 10-15 students in good standing. Case presentation of common clinical scenarios (i.e. chest pain/MI; fever/pneumonia; abdominal pain/cholecystitis etc.) from various disciplines held in an auditorium with real patients exposure. Interactive session to review history, physical findings and case management. Students will be asked to perform H&P. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Khatri

#### **493. Clinically-Oriented Anatomy Special Study Module (6)**

Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor. Restricted to School of Medicine students only. Reviews aspects of the anatomy of the head and neck, thoracic cavity, abdomen, pelvis, extremities, vascular system, peripheral nervous system and central nervous system. Focus on the understanding of anatomy related to common surgical procedures. (Cell Biology and Human Anatomy 493.) (H/P/F grading only.)—S. (S.) Blankenship, Khatri

#### **493B. Critically Ill Surgical Patients SSM (6)**

Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor. Restricted to UC Davis School of Medicine students only. Special Study Module, a four week course on the topic: Application of Basic Cardiopulmonary Physiology to Problems Encountered in Critically Ill Surgical Patients. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Holcroft

#### **493C. Physiological Principles in SICU SSM (6)**

Lecture—5 hours; lecture/laboratory—10 hours; laboratory—16 hours; clinical activity—4 hours. Prerequisite: consent of instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, A four week course on the topic: Care of the Critically Ill Surgical Patient: Use of Physiological Principles to Guide Treatment of Patients with Common Surgical Problems. (Same course as Human Physiology 493C.) (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Cala, Holcroft

#### **493D. Interdisciplinary Study of Gastrointestinal Cancer (6)**

Lecture—5 hours; clinical activity—12 hours; laboratory—3 hours; discussion/laboratory—20 hours. Prerequisite: consent of instructor. In-depth study of gastrointestinal, hepatic and pancreatic cancer. Emphasis on an integration of basic science and clinical medicine. Participating departments include pathology, surgical oncology, medical oncology, gastroenterology, radiology and radiotherapy. (Same course as Pathology 493.) (H/P/F grading only.)—F, S. (F, S.) Khatri, Olson, Ruebner

#### **494H. Fourth-Year Surgical Honors Program (18)**

Prerequisite: completion of third year of medical school with superior performance on course 430; consent of instructor. To provide intensive and comprehensive training in surgery to students interested in a postgraduate surgical career, that would enable them to succeed during the internship and residency training. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Holcroft

**495. Intense Introduction to Cardiac Surgery (3)**

Clinical activity—16 hours; lecture/discussion—4 hours. Prerequisite: consent of instructor. Restricted to Medical student between first and second year. Close contact with vascular surgeon for two-week period. Includes Sunday mornings. 100% mandatory attendance. Physiology of going on and off cardiopulmonary bypass. Atherosclerotic cardiovascular disease, structural and valvular heart disease and electrical and rhythmic heart disease. May be repeated one time for credit. (P/F grading only.)—Su. (Su.) Jan

**498. Group Study (1-5)**

Prerequisite: medical student; consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**499. Laboratory Research (1-12)**

Laboratory—3-36 hours. Prerequisite: completion of second year of medical school; consent of instructor. Laboratory research on surgically related problems. Participation in projects to include the following: burn, nutrition, oncology, transplant and others. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**Surgery—Plastic Surgery (PSU)****Professional****460. Clinical Plastic Surgery Elective (1-18)**

Clinical activity—full time (approximately 40 hours per week). Prerequisite: third- or fourth-year medical students; Surgery 430; consent of instructor. Total involvement in patient care involving surgical preparation, treatment, operative care, and follow-up. Developing and understanding reconstruction and aesthetic plastic surgery. Microvascular surgery included. Student rotation. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Wong

**Urology (URO)****Upper Division****199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Professional****400. Office Urology (1)**

Clinical activity—4 hours in afternoons (6 weeks). Prerequisite: fourth-year medical students with consent of instructor. Introduction to ambulatory care of urologic patients including basic therapeutic and diagnostic procedures from case material referred to private clinic. Management of urinary tract infection will be emphasized. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.)

**460. Urology Clinical Clerkship (5-18)**

Clinical activity—full time. Prerequisite: second-year medical student; physical diagnosis or the equivalent; consent of instructor. Limited enrollment. Clinical experience in diagnosis and treatment of urologic disease. Student will work closely with house staff, participate in conferences and surgery, and perform initial patient evaluation on new patients. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Low

**461. Externship in Urology (3-18)**

Clinical activity—60 hours. Prerequisite: fourth-year medical student; consent of instructor. Under supervision, student acting as intern will assume full inpatient responsibility including admission history, physical examination, management of hospitalization, and participate in surgical procedures, outpatient clinic and learning diagnostic and therapeutic procedures. May be repeated for credit. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Low

**499. Research in Urology (1-12)**

Research—3-36 hours. Prerequisite: medical or veterinary medical students with consent of instructor. Research in oncology, male infertility, urodynamics, neurogenic bladder. Unique opportunity to apply

recent technologies (nuclear medicine resonance, flow cytometry, recombinant DNA) in investigation, diagnosis and treatment of GU cancer, infectious disease, male infertility and development of genitourinary bioprosthetics. (H/P/F grading only.)—F, W, S, Su. (F, W, S, Su.) Ghosh, Kurzrock

## Medieval and Early Modern Studies

(College of Letters and Science)

Claire Waters, Ph.D. (English), Program Director

**Program Office.** 176 Voorhies Hall  
530-752-2257; <http://mems.ucdavis.edu>

**Committee in Charge**

Carlson Arnett, Ph.D. (*German/Russian*)

Catherin Chin, Ph.D. (*Religious Studies*)

Sally McKee, Ph.D. (*History*)

Matthew Vernon, Ph.D. (*English*)

Heghnar Watenpaugh, Ph.D. (*Art History*)

**The Major Program**

The major in Medieval and Early Modern Studies examines the intellectual, political, and cultural forces that shaped modern European civilization during the period from the end of Ancient Rome (fifth century) to the beginning of the Enlightenment (mid-eighteenth century). An interdisciplinary and interdepartmental program, the major includes studies in history, art history, philosophy, literature, drama, music, national languages, religion, rhetoric, and political theory.

**The Program.** The major requires interdisciplinary work, while allowing the student to focus on the early Middle Ages, the High Middle Ages, the Renaissance, or the Baroque. The series of medieval and early modern courses in the program provides the foundation for the major and prepares students for advanced work within the individual disciplines. On the upper-division level, students may choose course work in specific areas of History, Comparative Literature, English, French, German, Italian, Spanish, and Latin, philosophy and religion, arts and language, and political thought. In addition, each student may elect to complete a senior thesis on a selected aspect of medieval and/or early modern culture.

**Career Alternatives.** The major in Medieval and Early Modern Studies is a liberal arts degree providing excellent preparation for the rigors of professional schools as well as careers in law, museology, journalism, and teaching.

**Medieval and Early Modern Studies****A.B. Major Requirements:**

UNITS

**Preparatory Subject Matter.....22**

Medieval Studies 20A, 20B.....10

Three additional courses chosen from: Art History 1B, 1C, 1E; Comparative Literature 2, 10A, 10B, 10C, 10D, 10E; English 10A; German 48; History 4A, 4B; Humanities 1\*, 9; Philosophy 21, 22.....12

Language proficiency is a desideratum. Courses in Latin and other European languages are strongly recommended, particularly for students planning to pursue graduate studies in the medieval or early modern field.

**Depth Subject Matter.....44**

In consultation with the undergraduate adviser, students select a total of eleven courses from the following disciplines with at least three courses each from the medieval and early modern periods:

Art History 155, 156, 178A, 178B, 178C, 179B, 190B, 190C

Classics 110

Comparative Literature 139, 164A, 164B, 164C, 166A, 180\*

English 111, 113A, 113B, 115, 117, 122, 150A, 153\*, 165\*, 185A\*, 188\*, 189\*

French 115, 116, 117A, 118B, 141\*

German 101A, 112\*, 120, 121, 122, 124\*, 131, 134\*, 160

History 102B, 102D, 121A, 121B, 121C, 122, 125, 130A, 130B, 131A, 131B, 131C, 132, 135A, 136, 139A, 144A, 148A, 151A, 151B, 190B, 190C

Italian 105, 112, 113, 114, 115A, 115B, 115C, 115D, 118, 139B, 140, 141

Latin 100, 101, 102, 103, 104, 105, 106, 108, 109, 110, 112, 114, 115, 116, 118, 119, 120, 121, 125, 130

Medieval Studies 130A, 130B, 131, 189, 190

Music 121\*, 124A, 124B

Philosophy 105, 145, 168, 170, 172

Political Science 115, 116, 118A

Religious Studies 102, 115, 130\*

Spanish 130, 133N, 134A, 134B, 142\*

**Total Units for the Major .....66**

\* Prior approval by Undergraduate Adviser necessary.

**Major Adviser.** See Program office.

**Minor Program Requirements:**

UNITS

**Medieval and Early Modern Studies .....24**

The minor in Medieval and Early Modern Studies is a coherent program of interdisciplinary study. Medieval Studies units may be taken in one or more of the traditional fields of concentration, including art, history, literature, music, national languages, philosophy, political theory, and religious studies. Courses must be upper-division with at least two courses each from the medieval and early modern periods. Students may also select a minor with a thematic emphasis.

Although there is no foreign language requirement for the minor, knowledge of Latin or a modern European language is recommended.

The minor must be designed in consultation with the Undergraduate Adviser.

**Minor Adviser.** See Program office.

**Courses in Medieval Studies (MST)****Lower Division****20A. Early Medieval Culture (5)**

Lecture—3 hours; discussion—1 hour; extensive writing. Readings (in translation) in medieval culture, such as Codes of Justinian, Confessions of Saint Augustine, Beowulf, the Nibelungenlied, The Song of Roland, the Summa Theologica of Thomas Aquinas, the Chronicles of Froissart, Chaucer's Canterbury Tales, and Dante's Divine Comedy. GE credit: ArtHum, Wrt | AH, WC, WE.—F. (F.)

**20B. The Culture of the High Middle Ages (5)**

Lecture—3 hours; discussion—1 hour; extensive writing. Great transformations that created the modern world: Constitutional Government, the Hundred Years War, the Black Death, and the Peasants Revolts, the Renaissance, Reformation and Counter-Reformation, and the Baroque. GE credit: ArtHum, Wrt | AH, WC, WE.—W. (W.)

**98. Directed Group Study (1-5)**

(P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

(P/NP grading only.)

## Upper Division

### 130A. Special Themes in Medieval Cultures (4)

Lecture—3 hours; discussion—1 hour. Each offering concentrates on an interdisciplinary aspect of medieval culture in the Middle East and Europe: the idea of the hero, mysticism, urban development. Extensive readings focused on medieval source material. May be repeated for credit. GE credit: ArtHum, Wrt|AH, WC, WE.

### 130B. Special Themes in Renaissance Culture (4)

Lecture—3 hours; discussion—1 hour. Each theme illuminates an interdisciplinary aspect of Renaissance culture in the eastern and western hemispheres: exploration, medical pathology, daily life, baroque culture. Immersion in source material from 1500-1650. May be repeated for credit. GE credit: ArtHum, Wrt|AH, WC, WE.

### 131. Cross-Cultural Relations in the Medieval and/or Early Modern World (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 20A or 20B or consent of instructor. Medieval and/or Renaissance aspects of cross culturalism. Relations between Christians, Jews, and Muslims: Europeans, Africans, and Asians; Old World and New World. Offered irregularly. GE credit: WC, WE.

### 189. Seminar in Medieval and Early Modern Culture (4)

Seminar—3 hours; term paper. Prerequisite: course 20A or 20B or consent of instructor. Focus on a particular problem or issue in the Medieval or Early Modern periods. Seminar topics might include (but not limited to) monasticism, origins of the university, chivalry, exploration, the role of women in the Medieval and Early Modern world. Offered in alternate years. GE credit: WE.

### 190. Senior Thesis (4)

Seminar—4 hours. Prerequisite: senior standing and major in Medieval Studies. Preparation of a research paper dealing with a selected aspect of medieval culture, under supervision of three members of the Committee in Charge.—F, W, S. (F, W, S.)

### 197T. Tutoring in Medieval Studies (1-4)

Seminar—2 hours. Prerequisite: courses 20A and 20B; upper division standing; consent of instructor and chairperson of curriculum committee. Tutoring in Medieval Studies 20A and 20B, including leadership in small discussion groups affiliated with the course. May be repeated for credit for a total of 6 units. (P/NP grading only.)

### 198. Directed Group Study (1-5)

(P/NP grading only.)

### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

## Meteorology

See **Atmospheric Science**, on page 184.

### Faculty

#### Primary Department Members

Jacqueline Barlow, Ph.D., Assistant Professor  
Sean Collins, Ph.D., Assistant Professor  
Scott C. Dawson, Ph.D., Associate Professor  
Wolf-Dietrich Heyer, Ph.D., Professor  
Neil Hunter, Ph.D., Professor  
Michele M. Igo, Ph.D., Professor  
Stephen C. Kowalczykowski, Ph.D., Distinguished Professor

Su-Ju Lin, Ph.D., Professor

Miriam Martin, Ph.D., Lecturer

John C. Meeks, Ph.D., Research Professor

Douglas C. Nelson, Ph.D., Research Professor

Rebecca Parales, Ph.D., Professor

Martin L. Privalsky, Ph.D., Distinguished Professor

Katherine Ralston, Ph.D., Assistant Professor

John R. Roth, Ph.D., Distinguished Professor

Michael A. Savageau, Ph.D., Distinguished Professor

Kazuhiro Shiozaki, Ph.D., Visiting Professor

Mitchell H. Singer, Ph.D., Professor

Valley J. Stewart, Ph.D., Professor

Lifeng Xu, Ph.D., Assistant Professor

#### Secondary Department Members

Sean Burgess, Ph.D., Professor

Jodi Nunnari, Ph.D., Professor

Ted Powers, Ph.D., Professor

### Emeriti Faculty

Stanley W. Aritz, Ph.D., Professor Emeritus

Paul Baumann, Ph.D., Professor Emeritus

John L. Ingraham, Ph.D., Professor Emeritus

JaRue S. Manning, Ph.D., Professor Emeritus

David Pratt, Ph.D., Professor Emeritus

Chester W. Price, Ph.D., Professor Emeritus

Merna R. Villarejo, Ph.D., Professor Emerita

Mark L. Wheelis, Ph.D., Senior Lecturer Emeritus

### Affiliated Faculty

Eric D. Mann, Ph.D., Lecturer

### The Major Program

Microbiology is the branch of biology that deals with bacteria, yeasts and other fungi, algae, protozoa, and viruses. These microorganisms are ubiquitous in nature and play a crucial role in areas such as agriculture, biotechnology, ecology, medicine, and veterinary science. The field of microbiology contributes to areas of fundamental inquiry such as biochemistry, cell biology, evolution, genetics, molecular biology, pathogenesis, and physiology. The ease and power of simultaneous genetic and biochemical analysis of microbes led to the emergence of the new disciplines of molecular biology and molecular genetics, and spawned the new industry of biotechnology.

**The Program.** The Microbiology Undergraduate Program offers Bachelor of Science and Bachelor of Arts degrees in the College of Biological Sciences. Both degrees are designed to provide students with quantitative skills and knowledge across the breadth of Biological Sciences, while maintaining a focus on the biology of microorganisms. The B.S. degree offers more training in mathematics, biochemistry

and laboratory methodology; the A.B. degree incorporates more exposure to the liberal arts. The choice of a major program and its suitability for particular career options should be discussed with a major adviser.

**Career Alternatives.** A bachelor's degree in microbiology serves as the foundation for advanced study in microbiology, entry into the professional schools of all health sciences, or immediate employment in biotechnology, health care and food science industries.

### A.B. Major Requirements:

	UNITS
<b>Preparatory Subject Matter</b> .....	<b>45-57</b>
Biological Sciences 2A-2B-2C.....	15
Chemistry 2A-2B.....	10
Chemistry 8A-8B or 118A-118B-118C .....	6-12
Mathematics 17A-17B or 21A-21B .....	8
Physics 1A-1B or 7A-7B-7C .....	6-12

### Depth Subject Matter..... 36

Biological Sciences 101, 105 (or 102+103).....	7-10
Microbiology 102, 104L, 105, 105L, 111 .....	15
Select at least one course from each of the areas of study below.	

#### Areas of Study:

1. Microbial Genetics: Microbiology 115, 150, 170 .....
2. Virology or Immunology: Microbiology 162; Medical Microbiology and Immunology 188; Pathology, Microbiology, and Immunology 126, 128 .....

Additional course work, chosen from the list below, to achieve a total of 36 or more units. Upper division Microbiology courses not used in satisfaction of any other requirement; or Biological Sciences 104, 181, 183; Food Science and Technology 104; Molecular and Cellular Biology 121, 182; Plant Pathology 130; Soil Science 111; or upper division courses in related fields, relevant to the student's interest and chosen in consultation with the adviser. No more than three units of variable-unit courses (numbered 192, 198 or 199) may be used for credit in this category. Note: Although a course might be listed in more than one category, that course may satisfy only one requirement in the entire major.

### Total Units for the Major..... 81-93

### B.S. Major Requirements:

	UNITS
<b>Preparatory Subject Matter</b> .....	<b>57-67</b>
Biological Sciences 2A-2B-2C.....	15
Chemistry 2A-2B-2C.....	15
Chemistry 8A-8B or 118A-118B-118C .....	6-12
Mathematics 17A-17B-17C or 21A-21B (21C recommended).....	8-12
Physics 7A-7B-7C .....	12
Microbiology 91 or 191 .....	1

### Depth Subject Matter..... 45

Biological Sciences 101, 105 (or 102+103), 104 .....	10-13
Statistics 100 or 102 .....	4
Microbiology 102, 104L, 105, 105L, 111 .....	15
Select at least one course from each of the areas of study below.	

**Areas of Study:**

1. Microbial Genetics: Microbiology 115, 150, 170 ..... 3
  2. Virology: Microbiology 162; Pathology, Microbiology, and Immunology 128 ..... 3-4
  3. Immunology: Medical Microbiology and Immunology 188; Pathology, Microbiology, and Immunology 126 ... 3
- Additional course work, chosen from the list below, to achieve a total of 45 or more units. Upper division Microbiology courses not used in satisfaction of any other requirement; or Biological Sciences, 181, 183; Food Science and Technology 104; Molecular and Cellular Biology 121, 182; Plant Pathology 130; Soil Science 111; or upper division courses in related fields, relevant to the student's interest and chosen in consultation with the adviser. No more than three units of variable-unit courses (numbered 192, 198, or 199) may be used for credit in this category.

Note: Although a course might be listed in more than one category, that course may satisfy only one requirement in the entire major.

**Total Units for the Major ..... 102-112**

**Master Adviser.** Su-Ju Lin, Ph.D.

**Advising.** Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; <http://basc.ucdavis.edu/>.

**Honors and Honors Program.** Su-Ju Lin, Ph.D.

**Teaching Credential Subject Representative.** Su-Ju Lin, Ph.D.; see the Teaching Credential/M.A. Program on page 124.

**Graduate Study.** The Graduate Group in Microbiology offers programs of study and research leading to the M.S. and Ph.D. degrees.

Strong preference is given to doctoral applicants. The group offers study in general microbiology, microbial physiology, microbial genetics, molecular mechanisms of microbial regulation, molecular mechanisms of microbial pathogenesis, immunology, virology, and recombinant DNA technology. For information on the graduate study and undergraduate preparation for the program contact a graduate adviser or the Chairperson of the Group.

**Related Courses.** The offerings of the Department of Microbiology and Molecular Genetics are augmented by courses in Food Science and Technology; Medical Microbiology; Molecular and Cellular Biology; Pathology, Microbiology, and Immunology; Plant Pathology; and Soil Science.

Faculty of the Department of Microbiology and Molecular Genetics also teach or participate in the following courses: Biological Sciences 2A, 101 104 and 181.

**Courses in Microbiology (MIC)****Lower Division****10. Natural History of Infectious Diseases (3)**

Lecture—3 hours. Topics in the natural history of infectious diseases principally affecting humans. Introduction to infectious microbial agents, ecology, epidemiology, and induction of disease. Focus on diseases of a contemporary nature. Not open for credit to students who have completed course 101, course 102, or course 104. GE credit: SciEng | SE. —F. (F.)

**91. Introduction to Research (1)**

Seminar—1 hour. Prerequisite: Biological Sciences 2A or equivalent. Restricted to lower division standing. Discussion of faculty research focusing on the biochemistry, genetics, and cell biology of microorganisms, along with ways undergraduates can participate in research projects of faculty members. May be repeated three times for credit. (P/NP grading only.) GE credit: SE. —S. (S.) Hunter

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**  
(P/NP grading only.)**Upper Division****101. Introductory Microbiology (5)**

Lecture—3 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 1A, or 2A; Chemistry 2B (may be taken concurrently). Survey of microorganisms emphasizing their interactions with humans and diseases. Topics include microscopy, survey of various microbes, the immune system, food microbiology, microbial pathogens, and mechanisms of disease transmission. Designed for students requiring microbiology for professional schools. Not open for credit to students who have completed courses 102, 102L, 104, or 104L. GE credit: SciEng | SE, SL.

**102. Introductory Microbiology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A or 2A; Chemistry 2B (may be taken concurrently). Essentials of microbial biology, emphasizing phylogeny, physiology, genetics, ecology, and pathogenesis. Interactions with other microbes, humans, and the biosphere. Uses of microbes in agriculture and biotechnology. Not open for credit to students who have completed courses 101 or 104. GE credit: SciEng | QL, SE, SL. —F, W, S. (F, W, S.)

**103L. Introductory Microbiology Laboratory (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 102 C- or better; Chemistry 2B. Introduction to principles and laboratory methods employed in working with microorganisms. Designed for students requiring microbiology for professional school admission. Not open to students who completed course 101 before Spring 2016, or who have completed courses 102L or 104L.—F, W, S. (F, W, S.) Mann

**104L. General Microbiology Laboratory (3)**

Lecture—1 hour; laboratory—6 hours. Prerequisite: course 102 C or better, (Chemistry 8B or 118B or 129A), consent of instructor. Students must complete a petition for consideration of enrollment; petition available on department of Microbiology and Molecular Genetics website. Principles and laboratory methods employed in working with microorganisms. Designed for students continuing in microbiology, genetics, or biochemistry. Only two units of credit for students who completed course 101 before Spring 2016, or who have completed course 103L. Not open to students who have completed course 102L. GE credit: SciEng | SE, WE. —F. (F.) Martin

**105. Microbial Diversity (3)**

Lecture—3 hours. Prerequisite: course 102 or 104, Biological Sciences 101; 103 or 105 strongly recommended. Survey of microbial diversity in the three domains of Life: Bacteria, Archaea, and microbial eukaryotes. Emphasizes microbial evolution and phylogeny, physiology and metabolism, global biogeochemical cycles, environmental adaptations, and genomic methods for analyzing culture-independent microbial diversity and microbial communities. GE credit: SciEng | SE. —W. (W.) Dawson, Parales

**105L. Microbial Diversity Laboratory (3)**

Lecture—1 hour; laboratory—6 hours. Prerequisite: course 102 or 104; 102L or 104L; 105 (may be taken concurrently). Students must complete a petition for consideration of enrollment; petition available on department of Microbiology website. Classical enrichments for the isolation of metabolically diverse microbes; modern molecular methods for the identification of isolates; cultivation independent analysis of microbial communities from local environmental samples. GE credit: SciEng | SE, WE. —W. (W.) Dawson, Parales, Ralston

**111. Human Microbiology (3)**

Lecture—3 hours. Prerequisite: course 102; Biological Sciences 101. Biology of microorganisms that form commensal, mutualistic, and pathogenic rela-

tionships with human beings, emphasizing their phylogeny, physiology, genetics, and ecology. Effects on human nutrition, development and physiology.

Mechanisms of pathogenesis, immune response evasion, antibiotic action, and antibiotic resistance. GE credit: SciEng | SE. —F. (F.) Stewart

**115. Recombinant DNA Cloning and Analysis (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101 or equivalent. Cloning and analysis of recombinant DNA, with emphasis on Escherichia coli host-vector systems. DNA-modifying enzymes; vectors and their use; manipulation and expression of insert DNA; polymerase chain reaction; and sequence annotation. Graduate students see course 215. GE credit: SciEng | SE. —F. (F.) Xu

**120. Microbial Ecology (3)**

Lecture—3 hours. Prerequisite: course 105, Biological Sciences 102 or 105. Interactions between non-pathogenic microorganisms and their environment, emphasizing physiological and metabolic characteristics of various groups and their adaptation to and modification of specific habitats. Offered irregularly. GE credit: SciEng | SE. —Nelson

**140. Bacterial Physiology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 103 (103 may be taken concurrently), or Biological Sciences 101, 105; Microbiology 102 recommended. Fundamentals of bacterial growth and bacterial responses to environmental stresses. Topics will include carbon and nitrogen regulation, growth rate control, post-exponential growth, and motility and chemotaxis. Not open for credit to students who have completed course 130A. Offered irregularly. GE credit: SciEng | SE.

**150. Genomes of Pathogenic Bacteria (3)**

Lecture—3 hours. Prerequisite: course 102; Biological Sciences 101. Molecular genetics and comparative genomics of representative pathogenic bacteria. Roles of mobile genetic elements, lateral gene transfer, and genome rearrangements in pathogen evolution. Mutation, recombination, and complementation as tools for genetic analysis. Content includes close examination of primary research articles. GE credit: SciEng | SE. —S. (S.) Stewart

**155L. Bacterial Physiology Lab (4)**

Lecture/discussion—1 hour; laboratory—8 hours. Prerequisite: course 140 or 150, 102L, consent of instructor. Physiology and genetics of bacteria. Isolation and characterization of mutant strains. Mapping of mutations by conjugation and transduction studies of control of enzyme synthesis by induction, repression, and catabolite repression. Offered irregularly.

**162. General Virology (4)**

Lecture—4 hours. Prerequisite: Biological Sciences 101; 102 or 105 recommended. Integrated presentation of the nature of animal, bacterial, and plant viruses, including their structure, replication and genetics. Only three units to students who have completed Pathology, Microbiology, and Immunology 128. GE credit: SciEng | SE. —W. (W.)

**170. Yeast Molecular Genetics (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101; 102 or 105 strongly recommended. Survey of the genetics, cell biology and technologies in yeasts and related lower eukaryotes. Topics include diversity of yeasts; cell structure; metabolism; cell cycle; genetic approaches and genomics; gene expression; yeasts as models to study higher eukaryotes; and contemporary techniques. GE credit: SciEng | SE. —S. (S.) Shiozaki

**175. Cancer Biology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101; 102 or 105. Exploration of the causes and treatments of cancer at multiple levels: molecular/cell biology, clinical manifestations, epidemiology and prevention. GE credit: SE, SL. —S. (S.) Privalsky

**190C. Undergraduate Research Conference (1)**

Discussion—1 hour. Prerequisite: upper division standing and consent of instructor, course 199 concurrently. Presentation and critical discussion of staff

research activities: designed for advanced undergraduate students. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

### **191. Introduction to Research for Advanced Undergraduates (1)**

Seminar—1 hour. Prerequisite: Biological Sciences 2A or equivalent. Restricted to upper division standing. Discussion of faculty research focusing on the biochemistry, genetics, and cell biology of microorganisms, along with ways undergraduates can participate in research projects of faculty members. May be repeated three times for credit. (P/NP grading only.) GE credit: SE.—S. (S.) Hunter

### **192. Internship (1-12)**

Internship—3-36 hours. Technical and/or professional experience on or off campus. Supervised by a member of the Microbiology Section faculty. (P/NP grading only.)

### **194H. Microbiology Honors Research (2)**

Independent study—6 hours. Prerequisite: senior standing; eligibility for college honors; completion of six units of 199 in microbiology; consent of section. Continuation of an individual microbiological research project culminating in writing of a senior thesis under a faculty director. (P/NP grading only.)—F, W, S. (F, W, S.)

### **197T. Tutoring in Microbiology (1-12)**

Prerequisite: upper division standing and consent of instructor. Assisting the instructor in one of the section's regular courses by tutoring individual or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary course activities. May be repeated for credit. (P/NP grading only.)—F, W, S. (F, W, S.)

### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—F, W, S. (F, W, S.)

## **Graduate**

### **200B. Advanced Bacteriology (3)**

Lecture—3 hours. Prerequisite: course 200A. Intended for first year graduate students in microbiology and closely related fields. Advanced topics in phylogeny, physiology, and diversity of bacteria. Offered irregularly.—Dawson, Parales

### **215. Recombinant DNA (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 103 or the equivalent. Application of recombinant DNA technology to modern problems in biology, biochemistry, and genetics, emphasizing molecular cloning strategies, choice of vectors, preparation of insert DNA, and selection procedures.—F. (F.) Privalsky

### **262. Advanced General and Molecular Virology (3)**

Lecture—3 hours. Prerequisite: graduate standing. Advanced integrated presentation of animal, bacterial, and plant viruses, including their structure, modes of regulation, expression and replication, and effects on host cells and organisms. Offered in alternate years.—W. Luciw

### **263. Principles of Protein-Nucleic Acid Interactions (3)**

Lecture—3 hours. Prerequisite: advanced graduate standing and completion of one year of basic graduate course work in biochemistry, biophysics, chemistry, genetics, microbiology, or molecular biology. Physical basis of protein-nucleic acid interaction. Topics include nucleic acid recognition by proteins, thermodynamics of protein-nucleic acid stability, and kinetics of binding process for both non-specific and sequence-specific nucleic acid binding proteins. Emphasis on systems that represent paradigms in protein-nucleic acid interactions. Offered irregularly.—Kowalczykowski

### **274. Seminar in Genetic Recombination (1)**

Seminar—1 hour. Prerequisite: graduate standing; consent of instructor. Biochemical and genetic aspects of genetic recombination in prokaryotes and eukaryotes. Mechanisms of recombination and biochemical and genetic characteristics of recombination proteins. Proteins include DNA strand exchange, DNA helicases, and Holliday junction resolving proteins. May be repeated for credit. (S/U grading only.) Offered irregularly.—Kowalczykowski

### **275. Seminar in DNA Repair and Recombination (1)**

Seminar—1 hour. Prerequisite: consent of instructor; graduate standing in Microbiology or closely related field. Review and discussion of current research and literature in DNA repair and recombination with presentations by individual students and invited speakers. May be repeated for credit. (S/U grading only.)—W, S. (F, S.) Heyer

### **276. Advanced Concepts in DNA Metabolism (3)**

Lecture—3 hours. Prerequisite: Molecular and Cellular Biology 221C or Genetics 201C or equivalent course recommended. DNA damage checkpoints, homologous recombination, and meiotic recombination. An advanced treatment of the clinical and current literature to discuss emerging principles and current models in these research areas. Offered in alternate years.—(W) Hunter

### **290C. Advanced Research Conference (1)**

Discussion/conference—1 hour. Prerequisite: graduate standing and/or consent of instructor. Presentation and critical discussion of staff research activities. Designed for advanced graduate students. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **291. Selected Topics in Microbiology (1)**

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Current progress in microbiology and cellular and molecular biology. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **292. Seminar in Bacterial Physiology and Genetics (1)**

Seminar—1 hour. Prerequisite: consent of instructor, graduate standing in microbiology or closely related field. Review and discussion of current research and literature in bacterial physiology and genetics, with presentations by individual students. (S/U grading only.)—F, W, S. (F, W, S.)

### **298. Group Study (5)**

Prerequisite: consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

### **299. Research (1-12)**

(S/U grading only.)—F, W, S. (F, W, S.)

## **Professional**

### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## **Microbiology (A Graduate Group)**

Renée M. Tsolis, Ph.D., Chairperson of the Group

**Group Office.** 3143 Tupper Hall (Medical: Microbiology and Immunology)  
530-752-0262

## **Faculty**

David Asmuth, M.D., Ph.D., Assistant Professor (*UCDHS: Infectious Diseases, Div. of*)  
Shota Atsumi, Ph.D., Associate Professor (*Chemistry*)  
Enoch P. Baldwin, Ph.D., Associate Professor (*Molecular and Cellular Biology*)  
Nicole Baumgarth, D.V.M., Ph.D., Professor (*Center for Comparative Medicine*)  
Andreas Bäumler, Ph.D., Professor (*Medical Microbiology and Immunology*)

Alison M. Berry, Ph.D., Professor

Linda F. Bisson, Ph.D., Professor

(*Viticulture and Enology*)

Barbara A. Byrne, D.V.M., Ph.D., Associate Professor (*Pathology, Microbiology, and Immunology*)

Kiho Cho, Ph.D., Associate Professor (*Surgery and Pediatric Regenerative Medicine*)

Gitta Coaker, Ph.D., Associate Professor (*Plant Pathology*)

Sean R. Collins, Ph.D., Assistant Professor (*Microbiology & Molecular Genetics*)

Patricia A. Conrad, Ph.D., Professor (*Pathology, Microbiology, and Immunology*)

Satya Dandekar, Ph.D., Professor (*Medical Microbiology and Immunology*)

Scott Dawson, Ph.D., Associate Professor (*Microbiology & Molecular Genetics*)

Jonathan Eisen, Ph.D., Professor (*Evolution & Ecology and Medical Microbiology & Immunology*)

Bryce Falk, Ph.D., Professor (*Plant Pathology*)

Julia Fan, Ph.D., Associate Professor (*Biological & Agricultural Engineering*)

Mélanie Gareau, Ph.D., Assistant Professor (*Anatomy, Physiology & Cell Biology*)

Angela Gelli, Ph.D., Associate Professor (*Pharmacology and Toxicology*)

Dennis Hartigan-O'Connor, M.D., Ph.D., Assistant Professor (*Medical Microbiology & Immunology*)

Volkmar Heinrich, Ph.D., Associate Professor (*Biomedical Engineering*)

Matthias Hess, Ph.D., Assistant Professor (*Animal Science*)

Wolf-Dietrich Heyer, Ph.D., Professor (*Microbiology & Molecular Genetics*)

Neil Hunter, Ph.D., Professor (*Microbiology & Molecular Genetics*)

Michele M. Igo, Ph.D., Professor (*Microbiology & Molecular Genetics*)

Stephen C. Kowalczykowski, Ph.D., Professor (*Microbiology & Molecular Genetics*)

Johan Leveau, Ph.D., Associate Professor (*Plant Pathology*)

Su-Ju Lin, Ph.D., Professor (*Microbiology & Molecular Genetics*)

Bo Liu, Ph.D., Professor (*Plant Biology*)

Frank Loge, Ph.D., Professor (*Civil and Environmental Engineering*)

Paul Luciw, Ph.D., Professor (*Medical Pathology*)

Shirley Luckhart, Ph.D., Professor (*Medical Microbiology and Immunology*)

Maria Marco, Ph.D., Associate Professor (*Food Science & Technology*)

Stephen J. McSorley, Ph.D., Professor (*Anatomy, Physiology & Cell Biology*)

John C. Meeks, Ph.D., Professor Emeritus (*Microbiology & Molecular Genetics*)

Christopher J. Miller, Ph.D., Professor (*Pathology, Microbiology, and Immunology*)

David A. Mills, Ph.D., Professor (*Viticulture and Enology*)

Lorena Navarro, Ph.D., Assistant Professor (*Microbiology & Molecular Genetics*)

Douglas C. Nelson, Ph.D., Professor Emeritus (*Microbiology & Molecular Genetics*)

Rebecca E. Parales, Ph.D., Professor (*Microbiology & Molecular Genetics*)

Niels C. Pedersen, Ph.D., Professor (*Medicine and Epidemiology*)

Martin L. Privalsky, Ph.D., Professor (*Microbiology & Molecular Genetics*)

Katherine S. Ralston, Ph.D., Assistant Professor (*Microbiology & Molecular Genetics*)

Jorge Rodrigues, Assistant Professor (*Land, Air and Water Resources*)

Pamela Ronald, Ph.D., Professor (*Plant Pathology*)

John R. Roth, Ph.D., Professor (*Microbiology & Molecular Genetics*)

Jeroen Saeij, Ph.D., Associate Professor (*Pathology, Microbiology and Immunology*)

Michael A. Savageau, Ph.D., Professor  
(*Biomedical Engineering*)  
Lark Schneider, Ph.D., Assistant Professor  
(*Pathology, Microbiology & Immunology*)  
Barbara L. Shacklett, Ph.D., Professor  
(*Medical Microbiology and Immunology*)  
Mitchell H. Singer, Ph.D., Professor  
(*Microbiology & Molecular Genetics*)  
Carolyn Slupsky, Ph.D., Professor (*Nutrition*)  
Woutrina A. Smith, Ph.D., Associate Professor  
(*Pathology, Microbiology, and Immunology*)  
Jay V. Solnick, M.D., Ph.D., Professor  
(*Internal Medicine*)  
Esteban Soto-Martinez, Ph.D., Assistant Professor  
(*Veterinary Medicine & Epidemiology*)  
Jeffrey L. Stott, Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)  
Dawn Sumner, Ph.D., Professor  
(*Earth and Planetary Sciences*)  
Ilias Tagkopoulos, Ph.D., Assistant Professor  
(*Computer Science*)  
George Thompson, M.D., Assistant Professor  
(*Medical Microbiology & Immunology*)  
Jose V. Torres, Ph.D., Professor  
(*Medical Microbiology and Immunology*)  
Renée M. Tsolis, Ph.D., Professor  
(*Medical Microbiology and Immunology*)  
Bart Weimer, Ph.D., Professor  
(*Population Health & Reproduction*)  
Stefan Wuertz, Ph.D., Professor  
(*Civil and Environmental Engineering*)  
Lifeng Xu, Ph.D., Assistant Professor  
(*Microbiology & Molecular Genetics*)  
Tilahun D. Yilma, Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)  
Glenn M. Young, Ph.D., Professor  
(*Food Science and Technology*)  
Huaijun Zhou, Ph.D., Associate Professor  
(*Animal Science*)

### Affiliated Faculty

Kathryn DeRiemer, Ph.D., MPH, Adjunct Associate Professor (*Medical Microbiology & Immunology*)  
Patrick S. C. Leung, Ph.D., Adjunct Professor  
(*Internal Medicine*)  
Ellen E. Sparger, D.V.M., Ph.D., Associate Adjunct Professor (*Veterinary Medicine and Epidemiology*)

**Graduate Study.** The Graduate Group in Microbiology offers study and research leading to the M.S. and Ph.D. degrees. Strong preference is given to doctoral applicants. The group offers study in modern molecular approaches to microbiological problems. Areas of research span fundamental, applied, and pathogenic microbiology, including bacterial and viral pathogenesis, eukaryotic microbiology, microbial genomics and genetics, microbial physiology and development, microbial ecology and environmental microbiology, cancer biology, and bioengineering and bioremediation. For information on the graduate study and undergraduate preparation for the program contact a graduate adviser or the Chairperson of the Group.

**Graduate Advisers.** S.C. Dawson (*Microbiology & Molecular Genetics*), L.F. Bisson (*Viticulture and Enology*), R.E. Parales (*Microbiology & Molecular Genetics*), E.E. Sparger (*Vet Med: Medicine*), R. Tsolis (*Med:Microbiology & Immunology*), B. Weimer (*VM:Pop Health & Repro*)

### Courses in Microbiology (MIB)

#### Graduate

##### 200A. Microbial Biology (3)

Lecture—3 hours. Prerequisite: course Microbiology 102 or equivalent; prior coursework in Microbiology. Designed to provide an overview of various aspects of microbiology and microbial processes. Topics will include microbial genetics and genomics, microbial metabolism, signaling, and adaptations.—F. (F.) Weimer

##### 201L. Advanced Microbiology Laboratory Rotations (5)

Laboratory—15 hours. Two five-week assignments in microbiology research laboratories. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated two times for credit.—F, W, S. (F, W, S.)

##### 210. Microbial Interactions (2)

Lecture—2 hours. Prerequisite: course 200A or consent of instructor. Analysis at the molecular level of the interactions of microbes with the environment, microbes with other microbes, and microbes in symbiotic and/or pathogenic associations with eukaryotic hosts. Topics discussed will vary. May be repeated two times for credit.—F, W, S. (F, W, S.)

##### 290C. Advanced Research Conference (1)

Discussion/conference—1 hour. Prerequisite: graduate standing and/or consent of instructor. Presentation and critical discussion of staff research activities. Designed for advanced graduate students. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

##### 299. Research (1-12)

Research under the guidance of dissertation committee. (S/U grading only.)

## Middle East/South Asia Studies

(College of Letters and Science)

Smriti Srinivas, Ph.D, Program Director

**Program Office.** 1272 Social Science & Humanities 530-754-4926; <http://mesa.ucdavis.edu>

#### Committee in Charge

Ali Anooshahr, Ph.D. (*History*)  
Flagg Miller, Ph.D. (*Religious Studies*)  
Jocelyn Sharlet, Ph.D. (*Comparative Literature*)  
Noha Radwan, Ph.D. (*Comparative Literature*)  
Smriti Srinivas, Ph.D. (*Anthropology*)  
Suad Joseph, Ph.D. (*Anthropology, Women and Gender studies*)  
Sudipta Sen, Ph.D. (*History*)  
Susan Miller, Ph.D. (*History*)

#### The Major Program

A study of the Middle East and South Asia as a whole allows students to explore a unique set of issues of both historical and contemporary importance. In order to guide students in comparative analysis, faculty help majors deepen their inquiries through coursework on antique, medieval, and early modern empires and political systems. Given the dynamism of modern cultural contexts, majors are invited to concentrate their studies on a wide range of variables including the evolution of states along with new understandings of citizenship, the rise and development of nationalist movements, political conflicts informed by religious majorities, the nuclearization of India and Pakistan, the growth of information societies and computer industries, the production of oil and its social and cultural legacies, labor migrations, urbanization, the emergence of sizeable middle classes, transnational literary movements using sophisticated media technologies, the expansion and intrusion of global security regimes into everyday life, and peace initiatives that shape struggles for justice across the world. Our program's focus on both the Middle East and South Asia is a pioneering achievement in the United States rivaled by only four other colleges or universities.

By the end of their studies, majors will have acquired an in-depth understanding of the common historical experience shared by many peoples in these regions, and of the legacies of culture, social exchange, power and empowerment across diverse settings. Students are also required to complete at

least two years of training in a language appropriate to their area of expertise.

The major in Middle East/South Asia Studies at UC Davis offers a unique opportunity to study exchanges, complementarities, and correspondences in such fields as history, political economy, culture, literature and film, religion, family structures, gender relations, media, anthropology, law, international relations, development, diasporas, and urbanism. Students who complete our major will be well suited to embark on careers in non-governmental organizations, journalism and media industries, education and research, governmental service and diplomacy, and business.

**Programs, Internships, and Career Alternatives.** Many internship opportunities are available for the Middle East/South Asia Studies major and minor, consult with your adviser.

#### Middle East/South Asia Studies Abroad

**Program.** University of California Education Abroad Program. More information can be found at <http://eap.ucop.edu/> and <http://summer-abroad.ucdavis.edu/>.

#### A.B. Major Program Requirements:

**Preparatory Subject Matter .....** **8-38**

History 6, 8 ..... 8

Two years (or the equivalent) of Arabic, Hebrew, or Hindi/Urdu (other Middle East/South Asia Studies regional languages accepted with petition). Arabic 1, 2, 3, 21, 22, 23; Hebrew 1, 2, 3, 21, 22, 23; Hindi/Urdu 1, 2, 3, 21, 22, 23 ..... 30

**Depth Subject Matter.....** **40-42**

Middle East/South Asia Studies 100 ..... 4

Middle East/South Asia Studies 180 ..... 4

Two courses from: Anthropology 142; Comparative Literature 166; History 113, 190A, 190B, 190C, 193A, 193B; Political Science 135, 136; Religious Studies 160, 162; Women's Studies 178A, 184 ..... 8

Two courses from: Anthropology 145; History 102Q, 196A, 196B; Religious Studies 170; Women's Studies 178B ..... 8

Additional Electives from Core Course list (below) ..... 16-18

**Total Units for Major .....** **48-80**

#### Core Course List:

Anthropology 142, 145; Arabic 1, 2, 3, 21, 22, 23; Art History 1E, 155; Asian American Studies 150F, 189E; Classics 1; Comparative Literature 53B, 53C, 166; Hebrew 1, 2, 3, 21, 22, 23; Hindi/Urdu 1, 2, 3, 21, 22, 23; History 102Q, 102R, 113, 190A, 190B, 190C, 193A, 193B, 196A, 196B; Middle East/South Asia Studies 92, 98, 99, 180, 192, 198, 199; Music 129B, 148; Political Science 135, 136; Religious Studies 21, 23, 60, 65C, 68, 160, 161, 162, 170; Women's Studies 178A, 178B, 184.

Note: With prior consultation with an adviser, students can petition in the Program Committee in advance to accept other elective courses toward the major program, including language courses.

Note: While some courses are identified as fulfilling more than one requirement, a given course can only fulfill one such requirement.

Restriction: No more than six units of MSA 92, 98, 99, 192, 198, 199 may be offered in satisfaction of the major requirements. However, students must have completed at least 40 units of upper division course work in satisfaction of the major requirements.

**Major adviser.** Consult the Middle East/South Asia Studies Program in 155 Kerr Hall 530-754-4926 or the Middle East/South Asia Studies website at <http://mesa.ucdavis.edu>.

## Arab Studies Minor Program Requirements:

The minor in Arab Studies covers an area of utmost historical, cultural, economic and geopolitical significance. Several key contemporary issues make the region as a whole a focus of interest for scholarly study. The Arab Studies minor is an interdisciplinary minor open to undergraduates in all four colleges.

UNITS

### Arab Studies.....20-24

Middle East/South Asia 100 .....	4
Middle East/South Asia 180 .....	4
Choose one from: History 193A or History 193B.....	4
Choose one from: Middle East/South Asia 181C or 182C .....	4
Additional Electives from Core Course list (below) .....	4-8
Core Course List:	
Middle East/South Asia 111A, 121A/ARB 140, 122A, 150/Women's Studies 185, 181C, 182C; Anthropology 142; Arabic 1/1A, 2, 3, 21, 22, 23, 121, 122, 123, 198; Art History 155; Comparative Literature 53C, 155, 166; History 6, 102 R, 112 C, 115 F, 190A, 190B, 190C, 193A, 193B; Political Science 135, 136; Religious Studies 60, 65C, 160, 161, 162, 163, 167; Women's Studies 178A, 184.	

With prior consultation with an adviser, students can petition in advance the Program Committee to accept other elective courses toward the minor program if the content is 50% or more on the Arab World. Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor.

With prior consultation with an adviser, students can petition the Program Committee to accept more than four units of Middle East/South Asia 181C and/or Middle East/South Asia 182C towards the minor program.

## India & South Asia Studies Minor Program Requirements:

The minor in India & South Asia Studies covers an area of immense historical, cultural, economic, demographic, and geopolitical significance. The minor is designed to emphasize the interconnected and comparative aspect of history, culture, society, economy, religion, gender relations, media, law, political economy, international relations, urbanism, migration and diaspora, language and literatures across regional and national boundaries. It is an interdisciplinary minor open to undergraduates in all four colleges.

UNITS

Additional Electives from Core Course list for major (above) .....	8-12

Note: With prior consultation with an adviser, students can petition the Program Committee in advance to accept other elective courses toward the minor program. Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor.

Note: With prior consultation with an adviser, students can petition the Program Committee to accept more than four units of Middle East/South Asia Studies 192, 198, and/or 199 towards the minor program.

Note: While some courses are identified as fulfilling more than one requirement, a given course can only fulfill one such requirement.

**Minor Adviser.** Consult the Middle East/South Asia Studies Program in 155 Kerr Hall 530-754-4926 or the Middle East/South Asia Studies website <http://mesa.ucdavis.edu>.

## Courses in Middle East/South Asia Studies (MSA)

### Lower Division

#### 92. Internship in Middle East/South Asia Studies (3-15)

Internship. Prerequisite: consent of instructor. Work experience on and off campus in all subject areas offered as part of the ME/SA Studies program. Internship supervised by a member of the ME/SA faculty. May be repeated for credit up to 15 units. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

### Upper Division

#### 100. Middle East and South Asia: Comparative Perspectives (4)

Lecture—3 hours; extensive writing. Ethnographic and historical points of intersection and divergence in various aspects of the Middle East and South Asia in precolonial, colonial, and postcolonial societies. Anthropological, historical, and theoretical debates surrounding the region. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—F, W, S. (F, W, S.)

#### 111A. Great Cities of Arab Middle East and South Asia (4)

Lecture—3 hours; extensive writing. Prerequisite: some knowledge of Islamic/Middle Eastern history is very useful; consent of instructor. In-depth examination of the great cities of North Africa, the Middle East and South Asia as cultural and historical artifacts. Topics include: the concept of the Islamic city, processes of modernity, and representations that reinforce imagination, memory and personal identity. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—F, W, S. (W) Miller, Susan

#### 112. History of South Asian Islam (4)

Lecture—3 hours; discussion—1 hour. Comparative study of Muslim communities of South Asia. Commonalities in cultural identity and historical experience. Rise and spread of Islam, comparative history of Islamic Empires, colonial rule, and post-colonial nationalism.—W. (W) Sen, Sudipta

#### 121A. Shahnameh: The Persian Book of Kings (4)

Lecture/discussion—3 hours; term paper. In-depth analysis of the Persian Book of Kings (Shahnameh) by Abu al-Qasim Ferdowsi (d. 1020 CE) in its historical context with a comparative perspective on the role of this work in Persian and world literature. (Same course as Comparative Literature 175.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Jocelyn, Sharlet

#### 121C. A Story for a Life: The Arabian Nights (4)

Lecture/discussion—3 hours; term paper. In-depth exploration of The Arabian Nights, the best-known work of pre-modern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature. (Same course as Comparative Literature 172 and Arabic 140.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Radwan, Sharlet

#### 122A. Themes in the Arabic Novel (4)

Lecture/discussion—3 hours; independent study; extensive writing. Class size limited to 30 students. Select modern Arabic fiction (novels and short stories) in translation. Thematically connected readings supplemented by non-fictional writings when appropriate. May be repeated two times for credit if the texts/theme of required course readings sufficiently change. Offered in alternate years. GE credit: ArtHum | AH, OL, WC, WE.—F, Su. (F, Su.) Noha, Radwan

**131A. Modern Iranian Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: upper-division standing, or consent of instructor. Iranian cinema of the 20th century in the context of profound cultural and social changes in Iran especially since the Iranian Revolution. Productions by representative directors such as Kiarostami, Makhmalbaf, Bahram Beizaie are included. Knowledge of Persian not required. (Same course as Cinema & Technocultural Studies 146A.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—S. (S.)

**131C. Religion and Media in Arab World (4)**

Lecture—4 hours. Exploration of the role and experience of media technologies in the Arab world. Study of digital and electronic media as well as alternative media practices. Investigation of new trends in political activism and identity formation. (Same course as Religious Studies 166.) Offered in alternate years. GE credit: SocSci | OL, SS, VL, WC, WE.—Miller, Flagg

**150. Women and Islamic Discourses (4)**

Lecture/discussion—4 hours. Prerequisite: Women's Studies 50 or comparable course. Introduction to the debates/discourses about women and Islam. Transformations in debates/discourses in colonial and postcolonial periods in the Middle East & South Asia. Comparative study of debates/discourses on family, work, law, sexuality, religion, comportment, human rights, feminist and religious movements. (Same course as Women's Studies 185.) Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WC.

**151A. Iranian Society & Culture (4)**

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: some knowledge of Islamic/Middle Eastern history is very useful; consent of instructor. In-depth investigation of modern Iranian society and culture. Exploration of structures of Iranian society: family, gender, religion, minorities, economy, politics, and state. Iran's role in the globalizing world, and the role of Iranian diasporas. Offered in alternate years. GE credit: ArtHum | AH, OL, VL, WC, WE.—S. (S.)

**180. Topics in Middle East and South Asian Studies (4)**

Lecture—3 hours; extensive writing. Comparative perspective on the Middle East and South Asia. Topics may include modernity, religious traditions, colonialism, subalternity and social movements, gender and sexuality, history and memory, science and development, ritual and performance, public culture, diasporas. May be repeated one time for credit. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.—F, W, S. (F, W, S.)

**181A. Topics in Regional ME/SA Studies (4)**

Lecture—3 hours; term paper. Iran & Persian topics for students specializing in region-specific Middle East and South Asia Studies. May be repeated three times for credit. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

**181B. Topics in Regional ME/SA Studies (4)**

Lecture—3 hours; term paper. Indian/South Asia topics for students specializing in region-specific Middle East and South Asia Studies. May be repeated three times for credit. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

**181C. Topics in Regional ME/SA Studies: Arab Studies (4)**

Lecture—3 hours; term paper. Arab Studies topics. May be repeated three times for credit when different topics and themes are studied. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS.—S. (S.)

**182A. Undergraduate Proseminar in Middle East/South Asia (4)**

Seminar—3 hours; term paper. Prerequisite: course 100 recommended. Class size limited to 15 students. Seminar in Iran & Persian topics specializing in region-specific Middle East and South Asia studies. May be repeated three times for credit.—W. (W.)

**182B. Undergraduate Proseminar in Middle East/South Asia (4)**

Seminar—3 hours; term paper. Prerequisite: course 100 recommended. Class size limited to 15 students. Seminar in India/South Asia topics specializing in region-specific Middle East and South Asia studies. May be repeated three times for credit when different topics and themes are studied.—W. (W.)

**182C. Undergraduate Proseminar in Middle East/South Asia: Arab Studies (4)**

Seminar—3 hours; term paper. Prerequisite: course 100 recommended. Class size limited to 15 students. Seminar in Arab Studies topics. May be repeated three times for credit. GE credit: WE.—S. (S.)

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: course 100. Supervised internship on and off campus in the area of Middle East and South Asia Studies. May be repeated for up to 12 units of credit. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**194H. Special Study for Honors Students (1-5)**

Prerequisite: open only to majors of senior standing who qualify for honors program; consent of instructor. Independent study of a problem in Middle East/South Asian studies involving the writing of an honors thesis.—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

Prerequisite: course 100. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: course 100. (P/NP grading only.)—F, W, S, Su. (F, W, S, Su.)

## Military Science

(College of Letters and Science)

**Reserve Officers' Training Corps (ROTC), Army**

Brian Knieriem, Lt. Col., Chairperson of the Department

**Department Office.** 125 Hickey Gymnasium  
530-752-5211

**Faculty**

Lt. Col. Brian Knieriem, Professor  
Captain Nicholas Olson, Assistant Professor  
Captain Tonya Sottilo, Assistant Professor  
Captain Gary Suen, Assistant Professor

**Program of Study**

The Military Science Department offers hands-on training in management and leadership. The program stresses the following Army Values: loyalty, duty, respect, selfless-service, honor, integrity, and personal courage. The program also stresses leadership dimensions as taught in the classes. Also stressed are current events, national and international politics, military affairs, ethics training, and human relations with emphasis on eliminating racial and gender discrimination. Management and leadership are taught using the U.S. Army as a model. Military skills (such as drill and ceremony, map reading, and squad tactics) are taught to the extent necessary to create an environment where students can enter leadership positions and apply theories taught in the classroom. Students learn by doing. The program assists students in all academic fields to prepare for positions of leadership in military or civilian careers.

The department offers two program tracks: (1) a purely academic track; (2) a pre-commissioning track for those desiring a commission in the U.S. Army. The academic track entails no obligation to the military and is open to all students. Students pursuing the academic track do not wear a uniform or otherwise participate in extra-curricular activities designed as part of the pre-commissioning process.

Activities for all students include the Ranger Club (a club designed for adventure activities such as rappelling, white-water rafting, orienteering, and patrolling) and intramural sports teams.

Students who desire a commission in the U.S. Army participate in both the academic portion of the program and in the leadership laboratories and extracurricular activities designed to enhance their leadership and technical skills. They wear uniforms to leadership laboratories and selected classes and become ROTC cadets. Students may be cadets in the lower division courses without incurring a military obligation. Students participating in the upper division pre-commissioning program incur a military obligation. See below for details. Extra-curricular activities for cadets include an intercollegiate sports team (Ranger Challenge), the university color guard, a military honor society, and opportunities to participate in field training exercises.

**Department Programs**

Students are enrolled in Military Science under one of two programs.

**Four-Year Program**

There is no military obligation associated with attendance in lower division courses. Students are enrolled in the basic course (lower division) for the first two years on a voluntary basis. Admission to the advanced course (upper division) is by application from second-year lower division students who meet the academic, physical, and military aptitude requirements. Qualified veterans can enter the advanced course immediately because of their military service experience, upon approval by the Department Chairperson.

Juniors receive \$450 subsistence per month, and Seniors \$500 per month, after executing a contract agreeing to complete the courses and accept a commission in the U.S. Army upon graduation. During the course, all Military Science text books, uniforms and equipment are provided without cost. Students are given leadership development experience at the Leader Development and Assessment Course (LDAC) between their third and fourth years of the course. Emphasis is on individual participation, leadership development and the capability to function effectively in positions of significant responsibility.

**Two-Year Program**

The two-year program is for students, including graduate students, who have not attended lower division Military Science classes. In lieu of lower division courses an applicant attends a six-week summer program, Leaders Training Course (LTC) which is voluntary and carries no military obligation. Applicants are paid and transportation costs covered. Applications are accepted at anytime prior to the student's junior year; graduate students are also accepted. All other provisions explained above for the upper division course apply to the two-year program.

**Scholarship Program**

The U.S. Army offers four-, three-, and two-year Active Duty scholarships, two-year Reserve Forces Duty, and two-year Dedicated National Guard scholarships to students planning to attend or attending UC Davis. The U.S. Army ROTC scholarship package pays tuition. Also included in all scholarships is a flat rate of \$1200 per year for textbooks.

The Army Reserve Officers' Training Corps four-year Active Duty merit scholarships are awarded to qualified high school seniors in a national competition each year. A deadline of 10 January is set for submission of the four-year scholarship application. As high school seniors, students compete for the scholarship by submitting their complete application at <http://www.goarmy.com/rotc/> or contact UC Davis, Department of Military Science at 530-754-6707.

The three-year Active Duty and two-year Reserve Forces Duty scholarships are awarded to college students who are already attending UC Davis or transferring from a junior college to UC Davis. Students

apply for and are awarded these Army scholarships through the Military Science Department.

### Leadership Laboratory

During the course of the school year, two hours per week are spent conducting practical exercises. Classes emphasize adventure activities including offense, defense and patrolling techniques, weapons familiarization, rappelling, rope bridging, obstacle courses, leadership reaction course, and land navigation. All cadets are required to attend leadership laboratories for practical leadership experience and to prepare for attendance at LDAC, held at Fort Lewis, Washington.

### Academic Credit

#### College of Agricultural and Environmental Sciences.

The Bachelor of Science degree in agriculture requires the completion of 180 units. Military Science courses are counted in the unit allowance for electives.

**College of Biological Sciences.** The Bachelor of Science degree requires the completion of 180 units. Military Science courses are counted in the allowance for electives.

**College of Engineering.** Military Science units are acceptable toward the requirements for the Bachelor of Science degree to the extent of the unrestricted elective units available in the curriculum being followed.

**College of Letters and Science.** The Bachelor of Arts degree requires the completion of 180 units. Military Science courses are counted in the allowance for electives.

**School of Veterinary Medicine.** The number of Military Science units acceptable toward the Bachelor of Science degree in Veterinary Medicine is on an individual program basis approved by the Dean of the School. Graduates with the D.V.M. degree may apply for direct commission in the United States Army Veterinary Corps.

### Aerospace Studies (Air Force)

The Air Force Reserve Officer's Training Corps (AFROTC) is an educational program providing training in leadership, management, communications and military proficiency on college and university campuses. It also provides an opportunity to obtain a commission as a second lieutenant in the Air Force and enter the active duty forces after you complete a bachelor's or a graduate degree. The skills you acquire will become valuable assets for any subsequent career you choose.

The program is normally four years long, but a flexible design allows students to complete the curriculum in as little as two years. Undergraduate scholarships are available, but are not necessary for participation. Until you accept a scholarship or enter your junior year of the program, you have no obligation to join the Air Force. There are no costs for AFROTC uniforms, books, or classes.

UC Davis students have the option of taking the Air Force program on the UC Berkeley or CSU Sacramento campus.

### Qualifications

Freshmen/Sophomore applicants must:

- Be full-time college students in good academic standing
- Have good moral character
- Be in strong physical condition
- Be at least 14 years old

Additionally, Juniors/Seniors/Scholarship recipients must:

- Be United States citizens or in the process of applying for citizenship
- Be 18 years old (or 17 years old with consent of parent or guardian)
- Pass the Air Force Officer Qualifying Test
- Pass a medical examination

- Be under the age of 31 at time of graduation (may be waived)

### Scholarships

Opportunities for four-year and three-year undergraduate scholarships are better than ever. Scholarships cover the full cost of tuition, books and required fees at the University of California and are available for eligible high school seniors. It also includes \$300-\$500 monthly stipend during the school year. If you are a junior or senior in high school and plan on attending a college or university in Northern California, you can write, call or visit the local AFROTC detachments for a scholarship application. Applications are also available from local Air Force recruiters or your high school guidance counselors.

All scholarships are merit-based and consider a variety of factors: cumulative GPA, class standing, SAT/ACT scores, academic awards/achievements, leadership ability, athletic involvement, extracurricular activities, community service and letters of recommendation. A personal interview with an Air Force officer is also part of the application process. Prior to activating a scholarship, students must meet AFROTC medical and physical fitness standards. All scholarships must be used at an accredited college or university that offers AFROTC on campus or through cross-registration. The program is available at more than 1,000 universities and colleges nationwide.

If you are already in college, contact our office directly and apply for enrollment into AFROTC as a cadet. Three- and two-year full tuition scholarships are available for all academic majors, especially scientific and technical majors such as engineering, atmospheric science, math, computer science, and physics. GPA Scholarship requirements for nontechnical majors are slightly higher. Applicants are primarily evaluated on their leadership ability and academic performance.

### Challenging Careers

All commissioned officers enter the Air Force as second lieutenants for a 4-year active duty service commitment. Pilots and navigators serve longer commitments, based on training requirements. Once on active duty, you'll be given instant responsibility in one of 32 primary career fields. Opportunities to fly are better than ever. Whether you are piloting the F-22 fighter, supervising 150 aircraft maintainers on the flightline, or caring for sick personnel in the emergency room, you will be rewarded knowing that you are making a difference.

Air Force ROTC is offered through the Aerospace Studies departments at California State University Sacramento and U.C. Berkeley. Scholarships (including tuition, book allowance, and stipend) are available for qualified students. Students may enroll and attend one course per semester at the U.C. Berkeley or CSU Sacramento campus at no cost. Topics covered in AFROTC courses include Basic Military knowledge (1-credit), Military History (1-credit), Leadership Training (3-credits), and U.S. National Security Affairs and Preparation for Active Duty (3-credits). Additional components of the AFROTC program include 2 hours per week of fitness activities, 2 hours per week of Leadership Lab, and a 4-week Summer Field Training between the Sophomore and Junior years. Upon completion of the program and granting of 4-year degree, students will commission as Second Lieutenants in the United States Air Force. To be eligible for AFROTC, applicants should be a full time student and meet additional fitness, GPA, testing, and other requirements. Interested students, please contact their department of choice:

For CSU Sacramento: <http://www.csus.edu/afrotc> 916-278-7315; [dei088@maxwell.af.mil](mailto:dei088@maxwell.af.mil)

For U.C. Berkeley: <http://airforcerotc.berkeley.edu> (510) 642-3572; [airforce@berkeley.edu](mailto:airforce@berkeley.edu)

### Naval ROTC

Department of Naval Science  
152 Hearst Gymnasium, UC Berkeley

Berkeley, CA 94270-3640

(510) 642-3551; <http://navyrotc.berkeley.edu>

UC Davis students may participate in the Navy and Marine Corps ROTC program at UC Berkeley. The program is 4 years long and includes courses and weekly professional development laboratories (drill) at UC Berkeley. Students normally compete for national scholarships as high school seniors, although interested students may enroll as freshmen or sophomores and compete for scholarships based on successful participation in the program. A student who satisfactorily completes an ROTC program and is awarded a degree from UC Davis receives an active duty commission as a Second Lieutenant in the U.S. Marine Corps or an Ensign in the U.S. Navy.

Navy option students take the following courses:

Freshman year:

- |      |                                |
|------|--------------------------------|
| NS 1 | Introduction to Naval Science  |
| NS 2 | Sea Power and Maritime Affairs |

Sophomore year:

- |       |                           |
|-------|---------------------------|
| NS 3  | Leadership and Management |
| NS 10 | Naval Ship Systems I      |

Junior year:

- |        |                                    |
|--------|------------------------------------|
| NS 12A | Navigation and Naval Operations I  |
| NS 12B | Navigation and Naval Operations II |

Senior year:

- |        |                       |
|--------|-----------------------|
| NS 401 | Naval Ship Systems II |
| NS 412 | Leadership and Ethics |

In lieu of NS401, NS10, NS12A and NS12B, Marine Corps students participate in Marine Seminars and complete MA154, History of Littoral Warfare and MA20, Evolution of Warfare (or a designated equivalent).

Scholarship students are required to complete a number of other courses at Davis, including one year each of calculus, physics, and English, and one quarter each of computer science, and military history or national security policy.

Interested students should contact the Department of Naval Science at UC Berkeley at the address above to obtain information and apply.

### Courses in Military Science (MSC)

#### Lower Division

##### 11. U.S. Army Leadership and Personal Development (1)

Lecture—1 hour. Prerequisite: lower division standing. United States Army, its organization, customs, courtesies, and rank structure. Course surveys personal development skills needed for effective leadership such as critical thinking, time management, and health and fitness. Familiarization with the Army ROTC program.—F. (F.)

##### 12. Introduction to Tactical Military Leadership (1)

Lecture—1 hour. Prerequisite: lower division standing. Military leadership fundamentals to include setting direction, problem-solving, presenting briefs, and using effective writing skills. Basic military tactics, orienteering and land navigation. Dimensions of leadership values, attributes, skills, and actions.—W. (W.)

##### 13. Introduction to Basic Military Operations (1)

Lecture—1 hour. Prerequisite: lower division standing. Basic military tactical theories and their application at the individual and squad level. Military tactical operations and basic military first aid.—S. (S.)

##### 14A. Introduction to Military Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: lower division standing and consent of instructor. Personal and organizational leadership skills introduced in leadership laboratory. Extensive supervised leadership experiences conducted in a military environment. Basic military skills necessary to function in a leadership role. (P/NP grading only.)—F. (F.)

**14B. Introduction to Military Leadership Skills (0.5)**

Laboratory—2 hours. Prerequisite: lower division standing; consent of instructor. Continuation of development of leadership and military skills introduced in course 14A. Emphasis on the role of the individual, the basic organizational element of the Army, the squad. Supervisory controls reduced as students gain capabilities. (P/NP grading only.)—W. (W.)

**14C. Introduction to Military Leadership Skills (0.5)**

Laboratory—2 hours. Prerequisite: lower division standing; consent of instructor. Development of skills required for promotion to junior non-commissioned officer level. Chain of command from company through individual levels. Interrelationship of squad and platoon organization. (P/NP grading only.)—S. (S.)

**21. Military History, Study of Battles (2)**

Lecture—2 hours. Prerequisite: course 22B or consent of instructor. Application of the nine Principles of War to key battles in American and World history. Tactics on a strategic and operational level. Evaluation of leadership and decision-making processes of key leaders. Offered irregularly.—S. (S.)

**22A. Innovative Team Leadership (2)**

Lecture—2 hours. Prerequisite: lower division standing or consent of instructor. Leadership values, attributes and theories. Use of basic military skills such as land navigation and squad operations to enhance understanding of the Army. Types of military briefings. Practice in interpersonal skills. Presentation of a briefing.—F. (F.)

**22B. Foundations of Tactical Leadership (2)**

Lecture—2 hours. Prerequisite: course 22A or consent of instructor. Leadership of tactical teams in complex operating environment. Self-assessment of leadership style. Basic military skills: terrain analysis, patrolling and operations orders. Dynamics of adaptive leadership in the context of military operations.—W. (W.)

**24A. Individual Military Leadership Skills (0.5)**

Laboratory—2 hours. Prerequisite: courses 14A, B and C, enrolled in course 22A or consent of instructor. Develop and practice personal military leadership skills in extensive supervised leadership labs. Cadets perform basic military skills, improve on troop leading procedures and lead subordinates in tactical situations. Begin with drill and ceremony, land navigation and individual movement techniques. (P/NP grading only.)—F. (F.)

**24B. Individual Military Leadership Skills (0.5)**

Laboratory—2 hours. Prerequisite: courses 14A, B and C, enrolled in course 22B or consent of instructor. Development and practice of personal military leadership skills in extensive supervised leadership labs. Performance of basic military skills, improvement on troop-leading procedures, leadership of subordinates in tactical situations. (P/NP grading only.)—W. (W.)

**24C. Individual Military Leadership Skills (0.5)**

Laboratory—2 hours. Prerequisite: courses 14A, B and C, enrolled in course 21 or consent of instructor. Develop and practice personal military leadership skills in extensive supervised leadership labs. Begin with drill and ceremony, land navigation and individual movement techniques. Cadets perform basic military skills, improve on troop leading procedures and lead subordinates in tactical situations. (P/NP grading only.)—S. (S.)

**Upper Division****131. Military Leadership and Management (2)**

Lecture—2 hours. Prerequisite: upper division standing and consent of instructor. Leadership and management in organizational context. Team dynamics, leadership styles, professional ethics, development of a leadership framework. Management skills for

planning, decision making, and organizing developed through definition of problems, development of courses of action, implementation of solutions.—F. (F.)

**132A. Advanced Military Operations (2)**

Lecture—2 hours. Prerequisite: upper division standing, course 131 or consent of instructor. Military small unit tactical theory as the basis for leadership development. Principles of war, contemporary operating environment, Geneva Law of Land Warfare, military offensive and defensive operations. Emphasis on development of critical thinking, problem solving, and communication skills.—W. (W.)

**132B. Applied Leadership (2)**

Lecture—2 hours. Prerequisite: upper division standing, course 132A or consent of instructor. Military small unit tactical theory and application as basis for leadership development. Application of leadership styles and skills to complete problem-solving exercises and the development of an adaptable framework applicable to a variety of shifting environments and situations.—S. (S.)

**134A. Adaptive Tactical Leadership (0.5)**

Laboratory—2 hours. Prerequisite: upper division standing, course 131 or consent of instructor. Small unit tactical operations serve as the basis for enhancement of leadership performance through tactical application. Assessment of leadership attributes, skills, and actions through participation in a variety of leadership roles in problem-solving exercises. (P/NP grading only.)—F. (F.)

**134B. Adaptive Tactical Leadership (0.5)**

Laboratory—2 hours. Prerequisite: upper division standing, course 132A or consent of instructor. Small unit tactical operations as the basis for enhancement of leadership performance through tactical application. Assessment of leadership attributes, skills, and actions through participation in a variety of leadership roles in problem-solving exercises. (P/NP grading only.)—W. (W.)

**134C. Adaptive Tactical Leadership (0.5)**

Laboratory—2 hours. Prerequisite: upper division standing, course 132B or consent of instructor. Small unit tactical operations are taught, serve as basis for students exploration, development. Serve in variety of leadership roles in which leadership attributes, skills, actions are closely assessed and developed while they are faced with series of problem solving exercises. (P/NP grading only.)—S. (S.)

**141. Ethical Leadership (2)**

Lecture—2 hours. Prerequisite: upper division standing; consent of instructor. Direct influence of leaders on individual motivation and group processes. The complexities of balancing moral, legal, and ethical obligations while applying fundamental business principles in determining the best possible outcome from competing solutions.—F. (F.)

**142. Military Law (2)**

Lecture—2 hours. Prerequisite: division standing and course 141, or consent of instructor. The United States Constitution and the Military Justice System. Basic law of war, with an emphasis on issues that might arise on the battlefield or during a national emergency.—W. (W.)

**143. U.S. Army Management Systems (2)**

Lecture—2 hours. Prerequisite: upper division standing and course 142 or consent of instructor. Leadership and management, focusing on four management systems: planning, organizing, leading and controlling. Practical methodologies for assessing management decisions while balancing competing ethical, economic, infrastructure and future growth trade-offs.—S. (S.)

**144A. Military Training Leadership Skills (0.5)**

Laboratory—2 hours. Prerequisite: upper division standing, course 141 or consent of instructor. Enhancement of student leadership performance through practical application. Small unit military tactical operations as the basis for the student exploration and development. (P/NP grading only.)—F. (F.)

**144B. Military Training Leadership Skills (0.5)**

Laboratory—2 hours. Prerequisite: upper division standing, course 142 or consent of instructor. Enhancement of student leadership performance through practical application. Small unit military tactical operations serve as the basis for student exploration and development. (P/NP grading only.)—W. (W.)

**144C. Military Training Leadership Skills (0.5)**

Laboratory—2 hours. Prerequisite: upper division standing, course 143 or consent of instructor. Enhancement of student leadership performance through practical application. Small unit military tactical operations as the basis for student exploration and development. (P/NP grading only.)—S. (S.)

**191. Special Studies in Military Science (2)**

Independent study—6 hours. Prerequisite: consent of department chair, and courses 131, 132A, 132B, 141, 142, 143. Intensive examination of one or more special problems in military science. Possible areas of study include leadership dimensions, principles of war, air-land battle imperatives, military strategy, the operational art and professional ethics. May be repeated two times for credit when topic differs. (P/NP grading only.) Offered irregularly.

Raymond L. Rodriguez, Ph.D., Professor

Lesilee S. Rose, Ph.D., Professor

Jonathan M. Scholey, Ph.D., Professor

Daniel A. Starr, Ph.D., Professor

David K. Wilson, Ph.D., Professor

### Secondary Section Members

John J. Harada, Ph.D., Professor  
*Academic Senate Distinguished Teaching Award*  
 Wolf-Dietrich Heyer, Ph.D., Professor  
 James Hildreth, Ph.D., Professor  
 Stephen C. Kowalczykowski, Ph.D., Distinguished Professor  
 William J. Lucas, Ph.D., Professor  
 Brian Mullooney, Ph.D., Professor  
 Sharman O'Neill, Ph.D., Professor  
 Martin L. Privalsky, Ph.D., Professor  
 Steven M. Theg, Ph.D., Professor  
 Larry N. Vanderhoef, Ph.D., Professor  
 Martin Wilson, Ph.D., Professor

### Emeriti Faculty

Peter B. Armstrong, Ph.D., Professor Emeritus  
 Sterling Chaykin, Ph.D., Professor Emeritus  
 James S. Clegg, Ph.D., Professor Emeritus  
 Eric E. Conn, Ph.D., Professor Emeritus *Academic Senate Distinguished Teaching Award, UC Davis Prize for Teaching and Scholarly Achievement*  
 Richard S. Criddle, Ph.D., Professor Emeritus  
 John H. Crowe, Ph.D., Professor Emeritus  
 Michael E. Dahmus, Ph.D., Distinguished Professor Emeritus  
 David W. Deamer, Ph.D., Professor Emeritus  
 Roy H. Doi, Ph.D., Distinguished Professor Emeritus  
*Academic Senate Distinguished Teaching Award*  
 Gordon J. Edlin, Ph.D., Professor Emeritus  
 Carol A. Erickson, Ph.D., Distinguished Professor Emeritus  
 Marilyn E. Etzler, Ph.D., Professor Emeritus  
 Richard H. Falk, Ph.D., Professor Emeritus  
 Leslie D. Gottlieb, Ph.D., Professor Emeritus  
 Melvin M. Green, Ph.D., Professor Emeritus  
 Robert D. Grey, Ph.D., Professor Emeritus  
*Academic Senate Distinguished Teaching Award*  
 Jerry L. Hedrick, Ph.D., Professor Emeritus  
*Distinguished Graduate Mentoring Award*  
 John A. Kiger, Ph.D., Professor Emeritus  
 Julie A. Leary, Ph.D., Professor Emeritus  
 Mark G. McNamee, Ph.D., Professor Emeritus  
 Diana G. Myles, Ph.D., Professor Emeritus  
 Carl W. Schmid, Ph.D., Professor Emeritus  
 Irwin H. Segel, Ph.D., Distinguished Professor Emeritus  
 Che-Kun J. Shen, Ph.D., Professor Emeritus  
 Larry R. Sprechman, Ph.D., Senior Lecturer Emeritus

### Lecturers

Silvia Carrasco Garcia, Ph.D., Lecturer, SOE  
 Marina Elefson Crowder, Ph.D., Lecturer, SOE  
 Kenneth L. Hilt, Ph.D., Lecturer  
 Mona M. Monfared, Ph.D., Lecturer, SOE  
 Larry Z. Morand, Ph.D., Academic Coordinator/Lecturer  
 Mark F. Sanders, Ph.D., Lecturer Emeritus  
 Molecular and Cellular Biology offers three major programs: Biochemistry and Molecular Biology, Cell Biology, and Genetics and Genomics.

### The Biochemistry and Molecular Biology Major Program

The Biochemistry and Molecular Biology major introduces students to the chemistry of living organisms and the experimental techniques that are used to probe the structures and functions of biologically important molecules. Students who enjoy both chemistry and biology and who are comfortable with quantitative approaches to problem solving will find this major a rewarding field of study.

**The Program.** The biochemistry and molecular biology program begins with the four-course, upper division common curriculum that provides an introduction to the principles of biochemistry, genetics, and cell biology. Majors then take a comprehensive and rigorous laboratory course to familiarize them with the most important aspects of biochemical research. Additional upper division courses in biochemistry and molecular biology examine detailed aspects of these subjects. Students are also required

to take courses in other biological sciences and a full year of physical chemistry.

**Career Alternatives.** The biochemistry and molecular biology program provides a solid scientific background for students seeking a research, teaching, or service career in the life sciences. Positions are open to biochemists in bio-medical, biotechnological, pharmaceutical, agricultural research and chemical industries. Also, university-affiliated research laboratories, hospital laboratories, and government-sponsored research facilities provide employment opportunities. The major provides excellent preparation for advanced study in graduate or professional schools.

### B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter ..... 50-57

Biological Sciences 2A-2B-2C ..... 15  
 Chemistry 2A-2B-2C or 2AH-2BH-2CH ..... 15  
 Mathematics 17A-17B-17C or 21A-21B (21C recommended) ..... 8-12  
 Physics 7A-7B-7C ..... 12  
 Chemistry 8A-8B or 118A-118B-118C ..... 6-12

#### Depth Subject Matter ..... 44-49

Biological Sciences 101, 102, 103, 104 ..... 13  
 Statistics 100 or 130A-130B ..... 4-8  
 Molecular and Cellular Biology 140L ..... 5  
 Two courses from: Molecular and Cellular Biology 143, 144, or 145 ..... 6  
 Molecular and Cellular Biology 121 ..... 3  
 Molecular and Cellular Biology 150; or 163 ..... 3-4  
 Select at least 10 additional units from the following:

Chemistry 107A, 107B  
 Evolution and Ecology 100, 150  
 Microbiology 101, 102, 103L, 150, 170  
 Molecular and Cellular Biology 120L, 123, 124, 126, 138, 139, 143, 144, 145, 148, 150, 158, 160L, 162, 163, 164, 178, 182, 191  
 Neurobiology, Physiology, and Behavior 100, 101, 103, 112, 160, 161  
 Pathology, Microbiology, and Immunology 126, 126L, 128  
 Plant Biology 111, 111D, 113, 113D, 152  
 Medical Microbiology 188  
 No more than four units of research (193, 194H, 199) may be used for credit in this category

#### Total Units for the Major ..... 100-115

**Master Adviser.** F.J. McNally

**Advising.** Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; <http://basc.ucdavis.edu/>.

### The Genetics and Genomics Major Program

The Genetics and Genomics major provides a broad background in the biological, mathematical, and physical sciences basic to the study of heredity, gene expression and evolution. The major is sufficiently flexible to accommodate students interested in the subject either as a basic discipline in the biological sciences or in terms of its applied aspects such as biotechnology, medicine, and agriculture.

**The Program.** The genetics and genomics program begins with the four-course, upper division core curriculum that provides an introduction to the principles of genetics, biochemistry, and cell biology. Students then take additional upper division courses in specialized areas of modern genetics including gene expression, evolution, development, human genetics and genomics, as well as a laboratory courses in the principles of genetics and genomics. Additional upper division courses in biological sciences, as well as internship/research coursework can be chosen to fulfill required elective units.

**Career Alternatives.** The genetics and genomics degree provides suitable preparation for a wide variety of careers, including teaching, research, work with biotechnology companies, medicine, and all the health sciences. It is also an excellent background for students wishing to continue their education in a graduate program, a teacher-training program, medical school, veterinary school, or other professional schools.

### B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter ..... 56-66

Biological Sciences 2A-2B-2C ..... 15  
 Chemistry 2A-2B-2C or 2AH-2BH-2CH ..... 15  
 Chemistry 8A-8B or 118A-118B-118C ..... 6-12  
 Mathematics 17A-17B-17C or 21A-21B (21C recommended) ..... 8-12  
 Physics 7A-7B-7C ..... 12

### B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter ..... 56-66

Biological Sciences 2A-2B-2C ..... 15

**Depth Subject Matter ..... 40-48**

- Biological Sciences 101, 102 + 103 (or 105), 104 ..... 10-13  
 Molecular and Cellular Biology 121, 182 ..... 6  
 Evolution and Ecology 100 or Biological Sciences 181 ..... 3-4  
 Molecular and Cellular Biology 164 or Biological Sciences 183 ..... 3  
 Molecular and Cellular Biology 160L or Biological Sciences 180L ..... 5  
 Statistics 100 or 130A-130B ..... 4-8  
 Restricted Electives ..... 9  
 Select at least nine additional units from the following:  
   Biological Sciences 134, 181, 183  
   Biotechnology 150  
   Engineering: Computer Science 124  
   Evolution and Ecology 100, 102, 103, 131, 150, 175  
   Microbiology 105, 150, 170  
   Molecular and Cellular Biology 150, 162, 163, 164  
   Plant Biology 112, 113  
   Plant Science 154  
 Or upper division courses in genetics or other fields relevant to the student's interest chosen in consultation with the adviser. No more than 4 units of 192, 193, 194H, 198, or 199 may be used for credit in this category.

**Total Units for the Major ..... 96-114****Master Adviser.** J.E. Natzle

**Advising.** Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; <http://basc.ucdavis.edu/>.

**Graduate Study.** See Integrative Genetics and Genomics [A Graduate Group], on page 380.

**Courses in Molecular and Cellular Biology (MCB)****Lower Division****10. Introduction to Human Heredity (4)**

Lecture—3 hours; discussion—1 hour. Topics in human heredity and human gene structure and function, including the genetic basis of human development, causes of birth defects, mental retardation, genetic diseases, sexual determination, development, and behavior. GE credit: SciEng | QL, SE, SL.—F, W, S. (F, W, S.) Engebrecht, Rannala

**99. Special Study (1-5)**

Independent study—3-15 hours. Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**Upper Division****110Y. iBioseminars in Cell and Molecular Biology (3)**

Web Virtual Lecture—1.5 hours; web electronic discussion—1.5 hours; lecture/discussion—2 hours. Prerequisite: Biological Sciences 101, 102 and 103 (or 105) and 104. Hybrid course in Cell and Molecular Biology for senior level (1) Biochemistry/Molecular Biology; (2) Genetics; or (3) Cell Biology majors. Face-to-face instruction combined with online lectures available at iBioseminars website delivered by leading researchers in Cell and Molecular Biology. Students who have previously taken MCB 110V cannot receive credit for MCB 110Y. GE credit: SciEng | SE, SL.—S. (S.) Scholey

**120L. Molecular Biology and Biochemistry Laboratory (6)**

Laboratory—10 hours; lecture—2 hours; laboratory/discussion—1 hour. Prerequisite: Biological Sciences 102 or consent of instructor. Restricted enrollment. Introduction to laboratory methods and procedures employed in studying molecular biology and biochemical processes. Designed for students who need experience in the use of molecular biology and biochemical techniques as research and

analytical tools. GE credit: SciEng | QL, SE, SL, VL, WE.—F, W, S. (F, W, S.) Dinesh-Kumar, Hilt, Lagarias, Liu, Morand, Theg, Wilson

**121. Advanced Molecular Biology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101 and one course from among Biological Sciences 102, 105, or Animal Biology 102 (Biological Sciences 102, 105 or Animal Biology 102 may be taken concurrently although prior completion is recommended). Structure, expression, and regulation of eukaryotic genes. Chromosome structure and replication; gene structure, transcription, and RNA processing; protein synthesis and translation control; development, immune system, and oncogenes. Not open for credit to students who have completed course 161. GE credit: SciEng | QL, SE, SL.—F, W, S. (F, W, S.) Burgess, Gasser, Harmer, Natzle, Powers

**123. Behavior and Analysis of Enzyme and Receptor Systems (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 103. Introduction to the principles of enzyme kinetics and receptor-ligand interactions with emphasis on metabolic regulation and data analysis. Topics include simultaneous equilibria, chemical and steady-state kinetics, allosteric enzymes, multireactant systems, enzyme assays, membrane transport and computer-assisted simulations and analyses. GE credit: SciEng | QL, SE.—F, S. (F, S.) Fraser, Wilson

**124. Macromolecular Structure and Function (4)**

Lecture—4 hours. Prerequisite: Biological Sciences 103, Chemistry 118C. An in-depth investigation into protein and nucleic acid structure and thermodynamics and how these properties influence their biological functions. Key examples of important functional classes of these molecules will be examined. Not open for credit to students who have completed course 122 or Chemistry 108. GE credit: SciEng | SE.—F, (F, W) Baldwin

**126. Plant Biochemistry (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 103 or 105. The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including use of transgenic plants. (Same course as Plant Biology 126.) GE credit: SciEng | SE, SL.—W. (W.) Callis, Tian

**138. Undergraduate Seminar in Biochemistry (1)**

Seminar—1 hour. Prerequisite: Biological Sciences 103. Discussion of the historical developments of modern biochemistry or current major research problems. May be repeated two times for credit when topic differs. (P/NP grading only.) GE credit: OL, SE.—F, W, S. (F, W, S.) Callis, Carrasco, Gasser, Nunnari

**139. Undergraduate Seminar in Biochemistry (2)**

Seminar—2 hours. Prerequisite: Biological Sciences 103. Discussion of the historical developments of modern biochemistry or current major research problems. May be repeated two times for credit when topic differs. (P/NP grading only.) GE credit: SciEng | OL, SE.—F, W, S. (F, W, S.) Callis, Gasser, Nunnari

**140L. Cell Biology Laboratory (5)**

Lecture—2 hours; laboratory—6 hours; discussion—1 hour. Prerequisite: Biological Sciences 104 (may be taken concurrently). Exercises illustrating the principles of cell biology with emphasis on light microscopy. GE credit: SciEng | OL, QL, SE, SL, VL.—W. (W.) Kaplan, Morand, Nunnari

**142. Advanced Cell Biology: Contractile and Motile Systems (4)**

Lecture—3 hours; term paper. Prerequisite: Biological Sciences 102, 104 (may be taken concurrently); Mathematics 16B. Advanced cell biology with emphasis on molecular, biophysical and cellular properties of contractile and motile systems. Offered irregularly. GE credit: SciEng | SE.—S. (S.)

**143. Cell and Molecular Biophysics (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 103, 104. Physical chemical principles by which molecules form living, moving, reproducing cells. Physical nature of cytoplasm; molecular structure/bonding in macromolecules, macromolecular assemblies and protein machines. Physical techniques and modeling of cytoskeletal polymer-motor dynamics and function during intracellular transport, mitosis and motility. GE credit: SciEng | QL, SE.—S. (F, S.) Al-Bassam

**144. Mechanisms of Cell Division (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 104. The molecules and mechanisms that allow eukaryotic cells to coordinate cell growth, DNA replication, segregation of chromosomes and cell division. GE credit: SciEng | SE, WE.—F. (F.) McNally

**145. Assembly and Function of Cell Signaling Machinery (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 104. Molecular basis of cell signaling, including positioning of cellular machinery, components of various signaling pathways, and downstream effects of signaling on cell adhesion, cell differentiation, and programmed cell death. GE credit: SciEng | SE.—S. (S.) Albeck, Erickson

**148. Undergraduate Seminar in Cell Biology (2)**

Seminar—2 hours. Prerequisite: upper division standing in the biological sciences or a related discipline. Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.) Offered irregularly. GE credit: OL, SE.—F, W, S. (F, W, S.)

**150. Developmental Biology (4)**

Lecture—4 hours. Prerequisite: Biological Sciences 101. Analysis of the mechanistic basis for animal development with a focus on experimental evidence and the relevant fundamental experimental strategies. Fertilization and early development, morphogenesis and patterning, cell differentiation, regulation of cell proliferation and tissue growth. GE credit: SciEng | SE, SL.—W. (W.) Draper, Natzle

**158. Undergraduate Seminar in Developmental Biology (2)**

Seminar—2 hours. Prerequisite: upper division standing in the biological sciences or a related discipline. Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.) GE credit: OL, SE.—F, W, S. (F, W, S.)

**160L. Principles of Genetics Laboratory (5)**

Laboratory—6 hours; lecture—2 hours, discussion/laboratory—1 hour. Prerequisite: Biological Sciences 101. Laboratory work in basic and molecular genetics including gene mapping, isolation and characterization of mutants in eukaryotic model systems, reverse genetics, gel electrophoresis, recombinant DNA techniques, and PCR. Not open for credit to students who have completed Genetics 100L. GE credit: SciEng | QL, SE, VL, WE.—F, W, S. (F, W, S.) Ellefson-Crowder, Engebrecht, Harmer, Natzle, Rose, Sundaresan

**162. Human Genetics and Genomics (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101. The human genome and genetic variation in human populations, molecular and genomic approaches in the practice of human genetics, epigenetic gene regulation, personal genetics and genomic medicine. GE credit: SciEng | QL, SE, SL.—F. (F.) Chedin

**163. Developmental Genetics (3)**

Lecture—3 hours. Prerequisite: course 121. Current aspects of developmental genetics. Historical background and current genetic approaches to the study of development of higher animals. GE credit: SciEng | SE.—W. (W.) Natzle, Rose

**164. Advanced Eukaryotic Genetics (3)**

Lecture—3 hours. Prerequisite: course 121. Five basic operations of genetic analysis: mutation, segregation, recombination, complementation, and regulation. Emphasis on the theory and practice of isolating and analyzing mutations, as well as understanding mechanisms underlying both Mendelian and epigenetic inheritance. GE credit: SciEng | SE, SL.—S. (S.) Burgess, Engebret

**178. Undergraduate Seminar in Molecular Genetics (1)**

Seminar—1 hour. Prerequisite: upper division standing, completion of Biological Sciences 101, and completion or concurrent enrollment in course 121. Discussion of current topics in molecular genetics to show advanced applications of basic principles and to highlight professional career opportunities. May be repeated one time for credit when topic differs. (P/NP grading only.) GE credit: SciEng | OL, SE.—F, W, S. (F, W, S.) Chedin, Natzle, Rodriguez

**182. Principles of Genomics (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101. Fundamentals of genomics, including structural genomics, functional genomics, proteomics, and bioinformatics, focusing on the impact of these disciplines on research in the biological sciences. Social impacts of genomic research. GE credit: SciEng | SE.—W. (W.) Burts, Korf

**190C. Undergraduate Research Conference (1)**

Discussion—1 hour. Prerequisite: upper division standing and consent of instructor; concurrent enrollment in course 193 or 199. Presentation and discussion of current research by faculty and students. May be repeated for credit. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**191. Introduction to Research (1)**

Seminar—1 hour. Prerequisite: Biological Sciences 102 (may be taken concurrently) or consent of instructor. Various topics in molecular and cellular biology including biochemistry, genetics, and cell biology will be discussed, along with ways undergraduates can participate in research projects of faculty members. May be repeated for credit. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Technical and/or practical experience on and off campus, supervised by a member of the Section of Molecular and Cellular Biology faculty. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**193. Advanced Research (3)**

Laboratory—6 hours; discussion—1 hour. Prerequisite: upper division standing, completion of an upper division Molecular and Cellular Biology laboratory course and consent of instructor. Research project carried out under the supervision of a faculty sponsor. Discussion and analysis of results and proposed experiments on a weekly basis with faculty sponsor. May include presentation of a seminar to a research group. May be repeated for credit. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**194. Thesis Research (3)**

Independent study—9 hours. Prerequisite: 6 units of course 193 and/or 199 with faculty director; senior standing. Continuation of an intensive, individual laboratory research project in biochemistry, genetics, or cell biology culminating with the presentation of the work in a written thesis and in a seminar. (P/NP grading only.) GE credit: SciEng | OL, SE, WE.—F, W, S. (F, W, S.) Wheeler

**194H. Research Honors (3)**

Independent study—9 hours. Prerequisite: 6 units of course 193 and/or 199 with faculty director; senior standing; GPA of at least 3.250; consent of Section.

Honors project. Continuation of an intensive, individual laboratory research project in biochemistry, genetics, or cell biology culminating with the presentation of the work in a written thesis and in a seminar. (P/NP grading only.) GE credit: OL, SE, WE.—F, W, S. (F, W, S.)

**197T. Tutoring in Molecular and Cellular Biology (1-5)**

Tutorial—2-6 hours. Prerequisite: upper division standing, completion of course to be tutored, and consent of instructor. Assisting the instructor in one of the section's regular courses by tutoring individual or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary course activities. May be repeated for credit. (P/NP grading only.) Offered irregularly. GE credit: SE.—F, W, S. (F, W, S.)

**198. Directed Group Study (1-5)**

Variable—1-5 hours. Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**199. Special Study for Advanced Undergraduates (1-5)**

Independent study—3-15 hours. Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.—F, W, S. (F, W, S.)

**Graduate****248. Seminar in Cell Biology (2)**

Seminar—2 hours. Prerequisite: consent of instructor. Discussion of recent literature on the physical and chemical aspects of organization and function of living systems, topics of current interest in ultrastructure and function of cells. Organizational and functional properties of the molecular and cellular levels of biological systems. May be repeated for credit.

**256. Cell and Molecular Biology of Cancer (2)**

Lecture—1 hour; term paper. Prerequisite: course in cell or developmental biology (e.g., course 150, 141, 163, or Biological Sciences 104). Analysis at the cellular and molecular levels of the regulation of normal and neoplastic tissue growth; tumor dissemination; identification and characterization of oncogenic agents; characterization of oncogenes and tumor-suppressor genes. —F. (F.)

**258. Seminar in Development (2)**

Seminar—2 hours. Prerequisite: consent of instructor. Reports and discussion on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit. —W. (W.)

**259. Literature in Developmental Biology (1)**

Seminar—1 hour. Prerequisite: consent of instructor. Critical presentation and analysis of recent journal articles in developmental biology. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.) Draper

**263. Biotechnology Fundamentals and Application (2)**

Lecture—2 hours. Prerequisite: Biological Sciences 101, 102 and Microbiology 102 or consent of instructor. Must be a graduate student in good standing. Fundamentals of molecular biology and chemical engineering involved in recombinant DNA technology. Topics: principles of rate processes of biological systems, optimization of bioreactors, and issues related to overexpression and production of recombinant molecules. Participation in student-directed team projects. —W. (W.) McDonald, Privalsky, Rodriguez, VanderGheynst

**282. Biotechnology Internship (7-12)**

Internship—21-36 hours. Prerequisite: graduate standing and consent of instructor. Open only to students participating in the Designated Emphasis in Biotechnology program. Research at a biotechnology company or interdisciplinary cross-college lab for a minimum of 3 months as part of the Designated Emphasis in Biotechnology Program. (S/U grading only.)—F, W, S. (F, W, S.) Dandekar

**290C. Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Presentations and critical discussions of faculty and graduate student research in molecular and cellular biology including biochemistry, genetics, and cell biology. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**291. Current Progress in Molecular and Cellular Biology (1)**

Seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Seminars presented by guest lecturers on subject of their own research activities. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**294. Current Progress in Biotechnology (1)**

Seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Seminars presented by guest lecturers on subjects of their own research activities. May be repeated for credit. (Same course as Chemical Engineering 294.) (S/U grading only.)—F, W, S. (F, W, S.) Kjelstrom, McDonald, Rodriguez

**295. Literature in Molecular and Cellular Biology (1)**

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Critical reading and evaluation of current literature in molecular and cellular biology disciplines. Papers will be presented and discussed in detail. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.) Baldwin, Fisher, Privalsky, Wilson

**298. Group Study (1-5)**

Variable—1-5 hours. Prerequisite: consent of instructor. (S/U grading only.)—F, W, S. (F, W, S.)

**299. Research (1-12)**

Independent study—3-36 hours. (S/U grading only.)—F, W, S. (F, W, S.)

**Professional****390. Methods of Teaching (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Practical experience in the methods and problems of teaching biochemistry/genetics/cell biology. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion and laboratory sections, formulating examinations under supervision of instructor. Participating in the teaching program required for Ph.D. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

**Molecular, Cellular, and Integrative Physiology (A Graduate Group)**

Catherine VandeVoort, Ph.D., Chairperson of the Group

## Emeriti Faculty

John M. Horowitz, Ph.D., Professor Emeritus

**Graduate Study.** The Graduate Group in Molecular, Cellular, and Integrative Physiology offers programs of study and research leading to the M.S. and Ph.D. degrees and participates in joint Ph.D./M.D. and Ph.D./D.V.M. programs. The programs emphasize broad training in the fundamental principles of cellular, molecular, and integrative physiology.

**Graduate Adviser.** Chao-Yin Chen

**Master Advisers.** Gretchen Casazza, Nipavan Chiamvimonvat, Eleonora Grandi

## Courses in Molecular, Cellular, and Integrative Physiology (MCP)

*(Formerly courses in Physiology)*

### Graduate

#### 200L. Animal Cell Culture Laboratory (4)

Discussion—2 hours; laboratory—6 hours. Prerequisite: courses in undergraduate biochemistry, cell biology, or general physiology, or consent of instructor. Techniques of cell culture, with emphases on cell physiology and the actions of drugs and toxicants on cultured somatic cells. Design, performance and interpretation of experiments with animal cells in vitro.—W. (W.) Ross, Pablo

#### 210A. Advanced Physiology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Physiology Ph.D. program, or consent of instructor. Advanced course in general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. *(Same course as Human Physiology 210A)*—F. (F.) Zheng

## 210B. Advanced Physiology (6)

Lecture—5 hours; discussion—1 hour. Prerequisite: Physiology 210A; Physiology Ph.D. program, or consent of instructor. Advanced course on general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology.—W. (W.) Chen, Bossuyt

## 210C. Advanced Physiology (5)

Lecture—5 hours. Prerequisite: doctoral student in the Molecular, Integrative and Comparative Physiology Graduate Group, or consent of instructor. Graduate level instruction in the general principles of physiology and the neural and humoral control of the cardiovascular, renal, respiratory, gastrointestinal, sensory, musculoskeletal, and reproductive systems.—S. (S.) Navedo, Xiang

## 210L. Physiology Laboratory Rotations (5)

Laboratory—15 hours. Restricted to Molecular, Cellular and Integrative Physiology (MCIP) graduate students. One mandatory rotation and up-to two voluntary rotations. Students learn techniques and perform experiments related to particular research problems. At the end of the rotations students give a short talk and hand in a research paper. May be repeated two times for credit. *(S/U grading only.)*—F. W. (F. W.) Sack, Yarov-Yarovoy

## 215. Electrophysiology Techniques and Applications (3)

Lecture—1.5 hours; discussion—1.5 hours. Broad scope of topics in electrophysiology techniques and applications. *(Same course as Pharmacology and Toxicology 215.)* *(S/U grading only.)*—S. (S.) Chen

## 216. Neurophysiology Literature (3)

Lecture—1 hour; discussion—2 hours. Lectures covering experimental and theoretical methods in studying cell membrane ion channels and the resulting characterization of the physiological functions and structure/function relationships of some of the most important channel types. Discussion of classical and current original papers.—F. (F.)

## 219. Muscle Growth and Development (3)

Lecture—2 hours; seminar—1 hour. Prerequisite: Biological Sciences 103, Biological Sciences 104 or Molecular and Cellular Biology 150, or consent of instructor. Integration of growth and development of skeletal muscle; morphology, biochemistry, neural control mechanisms, circulatory and nutritional factors. Prenatal and neonatal differentiation of fiber types. Experimental and hereditary myopathies. Offered in alternate years.—S. Bodine, Carlsen

## 220. General and Comparative Physiology of Reproduction (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 110, 110L; Biological Sciences 101, 103. Basic phenomena of sexual and asexual reproduction and comparisons of processes in a wide variety of animals; gamete formation, structure, and metabolism; fertilization; neuroendocrine mechanisms in maturation and reproductive cycles; behavioral aspects.—S. (S.) Adams, Berger, Conley

## 222. Mammalian Gametogenesis and Fertilization (3)

Lecture/discussion—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 121 or the equivalent. Course will emphasize our current understanding of events in mammalian gametogenesis and the fertilization process. Published results, conclusions drawn from these results, and their contribution to our understanding will be discussed.—S. (S.) Berger

## 230. Advanced Endocrinology (2)

Lecture—2 hours. Prerequisite: Neurobiology, Physiology, and Behavior 130 or the equivalent, and graduate standing. Focus on timely topic of endocrine research. Critical review of current literature and discussion of future research strategies in the area. May be repeated for credit when topic differs.

## 231. Neuroendocrinology (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 110 or the equivalent course in systemic physiology; Neurobiology, Physiology, and Behavior 130 or the equivalent course in endocrinol-

ogy. Neural-endocrine interactions; neural regulation of the endocrine system, especially in relation to reproduction; the role of hormones and growth factors in sexual differentiation of the brain.

### **234. Current Topics in Neurotoxicology (3)**

Lecture—3 hours. Prerequisite: core courses in one of the following graduate programs: Pharmacology and Toxicology, Agricultural and Environmental Chemistry, Biochemistry and Molecular Biology, Cell and Developmental Biology, Immunology, Molecular Cellular and Integrative Physiology or Neuroscience. Restricted to upper level undergraduate students must obtain permission from the course coordinator. General principles of neurotoxicology, the cell and molecular mechanisms and health impacts of specific neurotoxicants and the contribution of neurotoxic compounds to complex neurodevelopmental disorders and neurodegenerative diseases. (Same course as Environmental Toxicology 234 and Molecular Biosciences 234.) Offered in alternate years.—W. Lein

### **242. Biological Rhythms (3)**

Lecture—2 hours; lecture/discussion—1 hour. Prerequisite: Neurobiology, Physiology, and Behavior 110 or the equivalent. General aspects and basic mechanisms of biological rhythms; the importance of rhythm desynchronization in areas of pharmacology and space medicine; telemetry; mathematical methods; chronometry; daily, reproductive, and annual periods; shift-work, jet lag and sleep disorders. Offered in alternate years.—(F.) Fuller

### **255. Physiology of the Stress Response (2)**

Lecture/discussion—2 hours. Prerequisite: graduate student status. Definition of Stress; Physiological mechanisms of adaptation to stress; Hormonal control of the systemic stress response; Mechanisms of the cellular stress response; Discussion of current trends in stress physiology and current methods for studying the stress response. (Same course as Animal Biology 255.)—S. (S.) Kueltz

### **261A. Topics in Vision: Eyes and Retinal Mechanisms (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing, Neurobiology, Physiology, and Behavior 100 or 112 or the equivalent. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as Neuroscience 261A and Neurobiology, Physiology, and Behavior 261A.) (S/U grading only.)—F. (F.) Ishida

### **261B. Topics in Vision: Systems, Psychophysics, Computational Models (2)**

Lecture/discussion—2 hours. Prerequisite: consent of instructor; course 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as Neuroscience 261B and Neurobiology, Physiology, and Behavior 261B.) (S/U grading only.) Offered in alternate years.—W. Britten

### **261C. Topics in Vision: Clinical Vision Science (2)**

Lecture/discussion—2 hours. Prerequisite: courses 261A and 261B, or consent of instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as Neuroscience 261C and Neurobiology, Physiology, and Behavior 261C.) (S/U grading only.) Offered irregularly.—S. Werner

### **275. Neurohumoral Regulatory Mechanisms of Thermogenesis (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: Biological Sciences 104 or the equivalent; Biological Sciences 102 or the equivalent; consent of instructor. Designed for graduate and advanced undergraduate students, this course will examine thermogenic systems in homeotherms (primarily

mammals) with respect to regulation (hormonal and central nervous control) and effector mechanisms (basis of heat generation at the target cell).

### **290. Seminar (1)**

Seminar—1 hour. Discussion and critical evaluation of advanced topics and current trends in research. (S/U grading only.)—F, W, S. (F, W, S.)

### **290C. Research Conference in Physiology (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Presentation and discussion of faculty and graduate student research in physiology. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

### **291B. Seminar in Cellular Mechanisms of Adaptation (1)**

Discussion—0.5 hour; seminar—0.5 hour. Prerequisite: Neurobiology, Physiology, and Behavior 100B; Biological Sciences 103; consent of instructor. Review and evaluation of current literature and research in cellular adaptations to the environment. May be repeated for credit when topic differs. (S/U grading only.)

### **291D. Research Approaches in Physiology (2)**

Seminar—2 hours. Prerequisite: graduate standing in Graduate Group in Physiology or consent of instructor. Current research in physiology. Overall design of experiments and particular research areas. (S/U grading only.)—F. (F.) Chen, Grandi

### **293. Current Progress in Physiology (1)**

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Seminars presented by guest lecturers describing their current research activities. May be repeated for credit. (S/U grading only.)

### **298. Group Study (1-5)**

### **299. Research (1-12)**

(S/U grading only.)

### **Professional**

### **300A. Pedagogical Aspects of Physiology in Higher Education (3)**

Lecture; discussion; laboratory. Prerequisite: meet qualifications for teaching assistant in physiology. Participation as a teaching assistant for one quarter in a designated physiology course. Instruction in methods of leading discussion groups, leading laboratory sections, writing and grading quizzes, operation and use of laboratory equipment, and reading and grading laboratory reports. Course meets teaching requirements for Ph.D. program in Physiology. (S/U grading only.)—F, W, S. (F, W, S.)

### **300B. Pedagogical Aspects of Physiology in Higher Education (3)**

Lecture; discussion; laboratory. Prerequisite: meet qualifications for teaching assistant in physiology. Participation as a teaching assistant for one quarter in a designated physiology course. Instruction in methods of leading discussion groups, leading laboratory sections, writing and grading quizzes, operation and use of laboratory equipment, and reading and grading laboratory reports. Course meets teaching requirements for Ph.D. program in Physiology. (S/U grading only.)—F, W, S. (F, W, S.)

### **390. The Teaching of Physiology (1)**

Discussion—1 hour. Prerequisite: Teaching Assistant assignment to a physiology lecture course and consent of instructor. Practical experience in methods and problems of teaching physiology lecture courses. May include analyses of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion sessions, and formulation of topics and questions for examinations under supervision of instructor. May be repeated for credit. (S/U grading only.)—F, W, S. (F, W, S.)

## **MUSIC**

(College of Letters and Science)

Henry Spiller, Ph.D., Chairperson of the Department

**Department Office.** 112 Music Building  
530-752-5537; Fax 530-752-0983;  
<http://music.ucdavis.edu>

### **Faculty**

Christian Baldini, Ph.D., Associate Professor

Ross Bauer, Ph.D., Professor

Anna Maria Busse Berger, Ph.D., Professor

Carol Hess, Ph.D., Professor

Katherine In-Young Lee, Ph.D., Assistant Professor

Beth Levy, Ph.D., Associate Professor

Jessie Ann Owens, Ph.D., Professor

Pablo Ortiz, D.M.A., Professor

Miko Pelo, Ph.D., Associate Professor

Christopher A. Reynolds, Ph.D., Professor

*Academic Senate Distinguished Teaching Award,  
UC Davis Prize for Teaching and Scholarly  
Achievement*

Kurt Rohde, M.M., Professor

Laurie San Martin, Ph.D., Professor

Henry Spiller, Ph.D., Professor

Jeffrey Thomas, Professor

### **Emeriti Faculty**

Robert S. Bloch, M.A., Professor Emeritus

Andrew D. Frank, M.A., Professor Emeritus

D. Kern Holoman, Ph.D., Professor Emeritus

*Academic Senate Distinguished Teaching Award,  
UC Davis Prize for Teaching and Scholarly  
Achievement*

Albert J. McNeil, M.S., Professor Emeritus

David A. Nutter, Ph.D., Professor Emeritus

Wayne Slawson, Ph.D., Professor Emeritus

### **Affiliated Faculty**

Phoebe Craig, M.M., Lecturer

Sam Nichols, Ph.D., Lecturer

*Academic Federation Award for Excellence in  
Teaching*

Robert Sabino, Lecturer

Amelia Triest, B.A., Lecturer

### **Faculty Affiliates in Applied Music**

Lois Brandwynne, M.A., Lecturer (piano)

Tod Brody, B.A., Lecturer (flute)

Scott Choate, Lecturer (tuba)

Bruce Chrisp, M.M., Lecturer (trombone)

Susan Lamb Cook, M.A., Lecturer (cello)

Phoebe Craig, M.M., Lecturer (harpsichord)

Thomas Derthick, B.M., Lecturer (double bass)

Daniel Flanagan, M.M., Lecturer (violin)

Jolán Friedhoff, M.M., Lecturer (violin)

Christopher Froh, M.M., Lecturer (percussion)

Michael Goldberg, M.A., Lecturer (guitar)

Sam Griffith, D.M.A., Lecturer (Jazz)

Ann Lavin, D.M.A., Lecturer (clarinet)

Scott Macomber, M.M., Lecturer (trumpet)

Zoila Muñoz, M.M. Lecturer (voice)

Jonathan Nadel, M.M., Lecturer (voice)

Peter Nowlen, B.M., Lecturer (French horn)

Michael Seth Orland, A.B., Lecturer (piano)

Stacey Pelinka, M.M., Lecturer (flute)

Laura Reynolds, M.M., Lecturer (oboe)

Ellen Ruth Rose, M.M., Lecturer (viola)

Rita Sahai, M.A., Lecturer (Hindustani vocal music)

Michael Sand, M.M., Lecturer (violin)

Dagenais Smiley, M.M., Lecturer (violin)

Kevin Stewart, B.M., Lecturer (saxophone)

Marilyn Swan, B.M., Lecturer (piano)

### **The Major Program**

The Bachelor of Arts degree in music provides both a broad liberal arts education and the skills necessary to explore music through its history, composition, theory, and performance. Students majoring in music may choose from three tracks in the major: (1) composition, (2) music history, theory, and ethnomusicology, or (3) performance. After a common core of courses in the lower division, students pursue

their chosen track with specialized courses leading to an appropriate senior project.

All majors are expected to complete a substantial project (composition, research presentation, recital) in the senior year (Music 195). Music majors who intend to pursue graduate studies in music are encouraged to satisfy the requirements of one of the honors programs in music.

**Study Abroad and the Music Major.** The department encourages students to pursue a portion of their studies abroad. In close collaboration with their undergraduate advisers, students plan a course of study abroad that complements their coursework at Davis. UC Davis Music majors have completed upper division coursework at EAP partner institutions in Australia, England, France, Germany, and Italy; Music faculty members lead summer programs in Argentina and Austria.

**The Program.** A fundamental grounding in music theory, music history, and performance during the first two years of study leads to more specialized study of composition, history, or performance during the last two years of undergraduate work.

**Career Alternatives.** Students who graduate with a B.A. in music from UC Davis have gone on to careers as composers and performers, in academia, and in the concert, media, and computing industries. Others have continued in medicine, law and business.

### A.B. Major Requirements:

#### UNITS Preparatory Subject Matter ..... 27-45

Music 6A, 6B, 6C .....	9
Plus Music 2A, 2B, 2C .....	(0-6)*
And Music 16A, 16B, 16C .....	(0-6)*
Music 7A, 7B, 7C .....	9
Plus Music 17A, 17B, 17C .....	(0-6)*
Music 24A, 24B, 24C .....	9

\* May be excused by diagnostic examination at the beginning of each quarter.

#### Depth Subject Matter ..... 40-43

Choose upper division courses from one of the following tracks:

Track 1: Music Composition.....	42
Music 123, 124A, 124B.....	9
Music 121 or 122.....	4
Music 131 (three quarters) .....	6
Music 195.....	2
At least 6 units selected from: Music 140-151.....	6
Music 101A, 101B.....	8
Music 103.....	3
At least 4 further units selected from:	
Music 102, 105, 106, 107A, 107B, 108A, 108B, 110A-G, 113, 114, 115, 116, 121, 122, 126, 129A-D, 192, 198, 199.....	4

Track 2: Music History, Theory, and Ethnomusicology .....	43
Music 123, 124A, 124B.....	9
Music 121 and/or 122.....	8
Music 131 (three quarters) .....	6
Music 195.....	2
At least 6 units selected from: Music 140-151 .....	6

At least 12 further units selected from:	
Music 101A, 101B, 102, 105, 106, 108A, 108B, 110A-G, 113, 114, 115, 116, 121, 122, 126, 129A-D, 192, 198, 199 .....	12

Track 3: Music Performance.....	40
Music 123, 124A, 124B.....	9
Music 121 or 122.....	4
Music 131 (three quarters) .....	6
Music 195.....	2
At least 13 units selected from: Music 131, 140-151 .....	13

At least 6 further units selected from:	
Music 101A, 101B, 102, 105, 106, 108A, 108B, 110A-G, 113, 114, 115, 116, 121, 122, 126, 129A-D, 174-178-17C at the beginning of each year. Transfer students should	
Quarter Offered: F=Fall, W=Winter, S=Spring, Su=Summer; 2017-2018 offering in parentheses	

116, 121, 122, 126, 129A-D, 192, 198, 199 .....	6
---	---

#### Total Units for the Major ..... 64-85

**Note:** A maximum of 19 units in performance courses (Music 131, 140-151) apply toward the degree; see Unit Credit Guidelines, College of Letters and Science degree requirements section. Faculty of the College of Letters and Science bylaws makes it possible for students to take more than 19 units of performance classes without those additional units counting toward the 225-unit cap on units:

Composition Honors Track.....	46-50
Music 101A, 101B .....	8
Music 123, 124A, 124B .....	9
Music 103.....	3
Music 121 or 122.....	4
Music 131 (one year) .....	6
At least six units selected from: Music 140-151 .....	6

Two quarters of Music 194H for a total of at least six units resulting in a Senior thesis .....	6
At least four-eight further units from: Music 102, 105, 106, 107A, 107B, 107C, 108A, 108B, 110A-G, 113, 114, 115, 116, 121, 122, 126, 129A-D, 192, 198, 199 .....	4-8
Music History, Theory and Ethnomusicology Honors Track .....	47
Music 123, 124A, 124B .....	9
Music 121 and/or 122 .....	8
Music 131 (three quarters) .....	6
At least 6 units selected from: Music 140-151 .....	6

Two quarters of Music 194H for a total of at least 6 units resulting in a Senior thesis .....	6
At least 12 further units selected from:	
Music 101A, 101B, 102, 105, 106, 108A, 108B, 110A-G, 113, 114, 115, 116, 121, 122, 126, 129A-D, 192, 198, 199 .....	12

A student becomes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters and Science. To qualify for high or highest honors, students must also complete the Music Department honors program with a GPA of 3.500 or above and write a thesis or submit a portfolio that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student's project. Students who anticipate seeking admission to the honors program are urged to complete at least one offering of Music 121 or 122 before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year.

**Major Advisers.** C. Reynolds (A-F), A. Triest (G-M), L. San Martin (N-Z)

#### Minor Program Requirements:

#### UNITS Music ..... 22

A minimum of 16 units of upper division Music courses .....	16
Courses chosen from: Music 105, 106, 107A, 107B, 110A-G, 115, 116, 126, 129A-D .....	6
A minimum of six units in upper division music performance courses .....	6
Courses chosen from: Music 140-151 .....	6

**Foreign Language.** Students contemplating graduate study in music are advised to consider pursuing foreign language study beyond the elementary level.

**Diagnostic Exams** are given before admission into Music 6A-6B-6C. As an alternative Music 3A-3B may be recommended. Diagnostic exams are also given for Music 16A-16B-16C and 17A-17B-17C at the beginning of each year. Transfer students should

take the Music 6 diagnostic exam given during the first class meetings.

**Beginning and transfer students** are required to take Music 2A-2B-2C (Keyboard Competence) unless they can pass out of one or more of the classes by demonstrating proficiency through a diagnostic exam given at the beginning of each quarter. Students learn (1) four-part keyboard harmony in all major and minor keys; (2) moderate fluency with figured bass at the keyboard; (3) major and minor scales with proper fingering; ability to sight read simple piano music and Bach chorales.

**Student Performing Activities.** The Department of Music presents more than 100 concerts each year, offering performance opportunities for both majors and non-majors in the UC Davis Symphony Orchestra, University Chorus, Concert Band and Wind Ensemble, Early Music Ensemble, Baroque Chamber Orchestra, Jazz Band, world music ensembles (Gamelan, Samba School, Hindustani Vocal Ensemble, Korean Drumming Ensemble) and numerous chamber ensembles. There is a close relationship with the Robert and Margrit Mondavi Center for the Performing Arts, where several of the ensembles are resident.

Chamber ensembles perform frequently in the popular weekly Thursday Noon Concerts. Performance groups have collaborated with the Department of Theatre and Dance in productions of musical theater and opera. Study of instruments and voice with professional performers and teachers is required of all majors. Similar opportunities exist for qualified non-majors.

**Faculty and Facilities.** The faculty is noted for its achievements in a variety of areas. The music scholars are active in research, writing, and performance; the music of the composers is performed and recorded nationally and internationally. The journal, *19th-Century Music*, is housed in the department.

The regular faculty is joined throughout the year by visiting Artists-in-Residence, distinguished performers who give public concerts and lectures and who work with students informally.

The Empyrean Ensemble, a professional new music ensemble, is in residence at UC Davis, where it annually premieres the work of student composers. The American Bach Soloists, an ensemble of professional singers and instrumentalists specializing in music of the late 18th and early 19th centuries, is affiliated with the Department of Music.

The department's facilities include a large collection of Renaissance, Baroque, and modern instruments, along with non-western instruments including a Sundanese gamelan. The arts quadrangle houses the Computer and Electronic Music Studio, practice and rehearsal rooms, and an music library with well over 12,000 CDs, several hundred videos and a collection of music reference materials. The newly-opened Ann E. Pitzer Center, next door to the Music Building, features a 399-seat state-of-the-art concert hall, six practice rooms, and four large teaching/rehearsal studios. Scores and music monographs are housed in the Peter J. Shields Library, adjacent to the Music Building. A partnership of campus libraries affords online access to more than 100,000 tracks of classical and world music by streaming audio.

**Graduate Study.** The Department of Music offers programs of study and research leading to the M.A. degree in composition/theory, musicology, ethnomusicology, and conducting, and the Ph.D. degree in composition/theory, musicology, and ethnomusicology. Detailed information regarding graduate study may be obtained from the Graduate Adviser.

**Graduate Advisers.** K. Rohde, C. Hess

#### Courses in Music (MUS)

#### Lower Division

#### 2A. Keyboard Competence, Part 1 (2)

Performance—2 hours. Prerequisite: course 6A and 16A required concurrently. Training to meet the minimum piano requirements for the major in music.

Scales and simple harmonic progressions in twelve keys, both major and minor. (P/NP grading only.) GE credit: AH.—F. (F.) Triest

### **2B. Keyboard Competence, Part 2 (2)**

Performance—2 hours. Prerequisite: course 6B and course 16B required concurrently; completion of course 2A or demonstration of required keyboard proficiency level on diagnostic exam; consent of instructor. Training to meet the minimum piano requirements for the major in music. Harmonic progressions, modulations and score reading at the piano. (P/NP grading only.) GE credit: AH.—W. (W.) Triest

### **2C. Keyboard Competence, Part 3 (2)**

Performance—2 hours. Prerequisite: course 6C and course 16C required concurrently; completion of course 2B or demonstration of required keyboard proficiency level on diagnostic exam; consent of instructor. Training to meet the minimum piano requirements for the major in music. Harmonic progressions, figured bass realization, sight reading and keyboard repertory. (P/NP grading only.) GE credit: AH.—S. (S.) Triest

### **3A. Introduction to Music Theory, Part 1 (4)**

Lecture—1 hour; recitation—3 hours. Fundamentals of music theory, ear-training, harmony, counterpoint, and analysis directed toward the development of listening and writing techniques. Intended for the general student. GE credit: ArtHum | AH.—F. W. (F. W.) Triest

### **3B. Introduction to Music Theory, Part II (4)**

Lecture—1 hour; recitation—3 hours. Prerequisite: completion of course 3A or consent of instructor. Continuation of course 3A. Development of melodic and harmonic writing skills. Basic analysis training. Intended for the general student. GE credit: ArtHum | AH.—W. S. (W. S.) Craig, Triest

### **6A. Elementary Theory, Part 1 (3)**

Lecture—3 hours. Prerequisite: course 2A and course 16A required concurrently. Development of music writing and listening skills through the study of music fundamentals, species counterpoint, harmony, analysis of repertory. Intended primarily for music majors. GE credit: ArtHum | AH.—F. (F.) Nichols

### **6B. Elementary Theory, Part 2 (3)**

Lecture—3 hours. Prerequisite: course 2B and course 16B required concurrently; completion of course 6A or demonstration of required proficiency level on diagnostic exam. Continuation of course 6A. GE credit: ArtHum | AH.—W. (W.) Nichols

### **6C. Elementary Theory, Part 3 (3)**

Lecture—3 hours. Prerequisite: course 2C and course 16C required concurrently; completion of course 6B or demonstration of required proficiency level on diagnostic exam. Continuation of courses 6A-B. GE credit: ArtHum | AH.—S. (S.) Nichols

### **7A. Intermediate Theory, Part 1 (3)**

Lecture—3 hours. Prerequisite: course 6C; course 17A concurrently. Homophony music of the Classical era with a focus on analysis of music by Haydn, Mozart, and Beethoven. Composition of pieces in the homophony forms such as minuet and trio, theme and variations, rondo and sonata. Intended for music majors. GE credit: ArtHum | AH.—F. (F.) Bauer, Pelo, Rohde, San Martin

### **7B. Intermediate Theory, Part 2 (3)**

Lecture—3 hours. Prerequisite: course 7A; course 17B concurrently. Nineteenth-century harmony and voice leading through the music of the Romantic era. Focus on analysis of music by Chopin, Schumann, Brahms, Wagner, and Wolf. Composition of character pieces and songs. Intended for Music majors. GE credit: ArtHum | AH.—W. (W.) Bauer, Pelo, Rohde, San Martin

### **7C. Intermediate Theory, Part 3 (3)**

Lecture—3 hours. Prerequisite: course 7B; course 17C concurrently. The music of the first thirty years of the twentieth century and various analytical tools pertaining to it. Works of Debussy, Stravinsky, Schoenberg, Berg, and others. Composition of small

pieces for solo instruments, voice and piano. Intended for Music majors. GE credit: ArtHum | AH.—S. (S.) Bauer, Pelo, Rohde, San Martin

### **10. Introduction to Musical Literature (4)**

Lecture—3 hours; listening—1 hour. Introduction to composers and major styles of Western music. Lectures, listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt | AH, VL, WC, WE.—F, W, S. (F, W, S.) Hess, Holoman, Levy, Pelo

### **11. Musics of the World (4)**

Lecture—3 hours; listening section—1 hour. Survey of selected art, folk, and popular music cultures from different parts of the world. Emphasis on understanding relationships of musical style, aesthetic principles, and performance practice to wider cultural contexts. GE credit: ArtHum, Div | AH, VL, WC.—W, S. (W, S.) Lee, Spiller

### **16A. Elementary Musicianship, Part 1 (2)**

Lecture/laboratory—2 hours. Prerequisite: course 2A and course 6A required concurrently. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH.—F. (F.) Triest

### **16B. Elementary Musicianship, Part 2 (2)**

Lecture/laboratory—2 hours. Prerequisite: course 2B and course 6B required concurrently; completion of course 16A or demonstration of required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH.—W. (W.) Triest

### **16C. Elementary Musicianship, Part 3 (2)**

Lecture/laboratory—2 hours. Prerequisite: course 2C and course 6C required concurrently; completion of course 16B or demonstration of required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH.—S. (S.) Triest

### **17A. Intermediate Musicianship, Part 1 (2)**

Lecture/laboratory—2 hours. Prerequisite: course 7A concurrently; completion of course 16C or demonstrate required proficiency level on diagnostic exam. Melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH—F. (F.) Craig

### **17B. Intermediate Musicianship, Part 2 (2)**

Lecture/laboratory—2 hours. Prerequisite: course 7B or 100B required concurrently; completion of course 17A or demonstration of required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH—W. (W.) Craig

### **17C. Intermediate Musicianship, Part 3 (2)**

Lecture/laboratory—2 hours. Prerequisite: course 7C concurrently; successful completion of course 17B or demonstrate required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH—S. (S.) Craig

### **24A. Introduction to the History of Music I (3)**

Lecture—3 hours. Prerequisite: can be concurrent with course 6A or consent of instructor. History of music from the late Baroque to Beethoven. Intended primarily for majors in music. GE credit: ArtHum, Wrt | AH, VL, WE.—F. (F.) Berger

### **24B. Introduction to the History of Music II (3)**

Lecture—3 hours. Prerequisite: completion of course 24A or consent of instructor. The history of music from the Romantic Period to the nineteenth century. Intended primarily for majors in music. GE credit: ArtHum, Wrt | AH, VL, WE.—W. (W.) Berger

### **24C. Introduction to the History of Music III (3)**

Lecture—3 hours. Prerequisite: completion of course 24B or consent of instructor. The history of music of the 20th century. Intended primarily for majors in music. GE credit: ArtHum, Wrt | AH, VL, WE.—S. (S.) Levy

### **28. Introduction to African American Music (4)**

Lecture/discussion—3 hours; discussion—1 hour; listening; project. Survey of African American music, such as spirituals, blues, ragtime, jazz, theater, gospel, R&B, rap, and art music. Emphasis on historical and sociocultural contexts, as well as African roots. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, VL, WE.—S. (S.)

### **98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: AH.—F, W, S. (F, W, S.)

### **99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: AH.—F, W, S. (F, W, S.)

### **Upper Division**

#### **101A. Advanced Theory, Part 1 (4)**

Lecture—3 hours; lecture/laboratory—1 hour. Prerequisite: completion of course 101A. Twentieth-century music from 1930 through 1950 and the various analytical tools pertaining to it. Works of Copland, Sessions, Schoenberg, Bartók, and Stravinsky. Composition of small pieces for piano and voice. GE credit: ArtHum | AH.—F. (F.) Bauer, Pelo, Rohde, San Martin

#### **101B. Advanced Theory, Part 2 (4)**

Lecture—3 hours; lecture/laboratory—1 hour. Prerequisite: course 101A. Music from 1950 to the present and the analytical tools pertaining to it. Works of Babbitt, Carter, Dallapiccola, Ligeti, Messiaen, Reich and others. Composition of small pieces for ensemble. GE credit: ArtHum | AH.—W. (W.) Bauer, Pelo, Rohde, San Martin

#### **102. Tonal Counterpoint (4)**

Lecture—3 hours; practice—1 hour. Prerequisite: course 7C. Imitative tonal counterpoint with an analytical focus on the Two-Part Inventions and fugues from The Well-Tempered Klavier by J. S. Bach. Composition of exercises and short pieces using contrapuntal techniques. Intended for music majors. GE credit: ArtHum | AH.—F. (F.) Bauer

#### **103. Workshop in Composition (3)**

Workshop—3 hours. Prerequisite: completion of course 6C or consent of instructor. Workshop in musical composition for undergraduates who are interested in pursuing serious compositional studies and intending to follow the composition track of the major. Course will explore the techniques and materials of musical composition. May be repeated for credit. GE credit: ArtHum | AH.—F, W, S. (F, W, S.) Bauer, Nichols, Ortiz, Pelo, Rohde, San Martin

#### **105. History and Analysis of Jazz (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: completion of course 10 or 3B or 28 or consent of instructor. Jazz and the evolution of jazz styles in historical and cultural context. For non-majors. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, WE.—F. (F.) Bauer

#### **106. History of Rock Music (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: completion of course 10 or 3B or consent of instructor. Rock and the evolution of rock styles in historical and cultural context. For non-majors. GE credit: ArtHum, Wrt | ACGH, AH, VL, WE.—W. (W.) Froh, Reynolds

**107A. Computer and Electronic Music (3)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: consent of instructor. Limited enrollment. Studies in electronic and computer music composition. The principles and procedures of composition in various electronic media are explored through compositional exercises. GE credit: ArtHum | AH, -W. (W.) Nichols

**107B. Computer and Electronic Music (3)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: completion of course 107A or consent of instructor. Limited enrollment. Continuation of course 107A. Offered in alternate years. GE credit: ArtHum | AH, -S. (S.) Nichols

**108A. Orchestration (2)**

Lecture—2 hours. Prerequisite: completion of course 6C or consent of instructor. Techniques of orchestration from study of basic instrumental techniques to analysis of orchestral scores and scoring for various instrumental combinations. GE credit: ArtHum | AH, VL, -W. (W.) Ortiz

**108B. Orchestration (2)**

Lecture—2 hours. Prerequisite: completion of course 108A or consent of instructor. Techniques of orchestration from study of basic instrumental techniques to analysis of orchestral scores and scoring for various instrumental combinations. GE credit: ArtHum | AH, VL, -W. (W.) Ortiz

**110A. The Music of a Major Composer: Beethoven (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: completion of course 10 or 3A or consent of instructor. The work of Beethoven will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WC, WE. —F. (F.)

**110B. The Music of a Major Composer: Stravinsky (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: completion of course 10 or course 3A or consent of instructor. The work of Stravinsky will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt | AH, VL, WC, WE.

**110C. The Music of a Major Composer: Bach (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: completion of course 10 or course 3A or consent of instructor. The work of Bach will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WC, WE.

**110D. The Music of a Major Composer: Mozart (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: completion of course 10 or 3A or consent of instructor. The work of Mozart will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WC, WE.

**110E. The Music of a Major Composer: Haydn (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: completion of course 10 or 3A or consent of instructor. The work of Haydn in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WC, WE.

**110F. American Masters (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: completion of course 10 or course 3A or consent of instructor. An overview of American concert music by master composers from Charles Ives to the present. Lectures, discussion/guided listening sections, and selected readings. For non-majors. Offered in alternate years. GE credit: ArtHum, Wrt | ACGH, AH, DD, VL, WE. —S. (S.) Levy

**110G. Music of a Major Composer—Handel (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: completion of course 10 or course 3A or consent of instructor. Work of Handel in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WVC, WE. —Thomas

**113. Introduction to Conducting (2)**

Lecture—1 hour; performance—1 hour. Prerequisite: completion of course 6C or consent of instructor. Principles and techniques of conducting as they apply to both choral and instrumental ensembles. GE credit: ArtHum | AH, -F, W. (F, W.) Baldini, Thomas

**114. Intermediate Conducting (2)**

Lecture—1 hour; performance—1 hour. Prerequisite: completion of course 113 or consent of instructor. Intermediate conducting with a continued focus on principles and techniques as they apply to both choral and instrumental ensembles. GE credit: ArtHum | AH, -W, S. (W, S.) Baldini, Thomas

**115. History of Film Music (4)**

Lecture—3 hours; film viewing—3 hours. Prerequisite: completion of course 10 or course 3A or consent of instructor. Film music from silent films to movies of the past decade. How music supports and shapes film narrative and structure. Use of jazz, rock and classical music in film. Offered in alternate years. Offered irregularly. GE credit: ArtHum, Wrt | AH, VL, WE. —F. (F.) Ortiz

**116. Introduction to the Music of The Beatles (4)**

Lecture—3 hours; listening—1 hour. Prerequisite: completion of course 10 or course 3A or consent of instructor. Survey of music of The Beatles, focusing on the songs of Lennon and McCartney. Emphasis on understanding their evolution as musicians, composers and cultural figures. Discussion of their musical influences in wider cultural contexts. GE credit: AH, VL, WVC. —S. (S.) Reynolds

**121. Topics in Music Scholarship (4)**

Seminar—4 hours. Prerequisite: course 6C and course 24C; or consent of instructor. Sources and problems of a historical period or musical style selected by the instructor and announced in advance. May be repeated for credit. GE credit: ArtHum | AH, OL, -F, W, S. (F, W, S.)

**122. Topics in Analysis and Theory (4)**

Seminar—4 hours. Prerequisite: course 6C and course 24C; or consent of instructor. Analysis of works of a composer or musical style selected by the instructor and announced in advance. Consideration of theoretical issues. May be repeated for credit. GE credit: ArtHum | AH, OL, -F, W, S. (F, W, S.)

**123. Music as Culture (3)**

Lecture/discussion—3 hours. Prerequisite: course 124B or consent of instructor. Introduction to the study of music in cross-cultural perspective. Basic theories and frameworks of ethnomusicology; in-depth case studies of three musical traditions from around the world. Intended for music majors. Offered in alternate years. GE credit: ArtHum | AH, WC, WE. —F. (F.) Lee, Spiller

**124A. History of Western Music: Middle Ages to 1600 (3)**

Lecture—3 hours. Prerequisite: course 24C or consent of instructor. Historical survey of composers and musical styles from the Middle Ages to the beginning of the 17th century. GE credit: ArtHum, Wrt | AH, VL, WE. —W. (W.) Berger, Owens

**124B. History of Western Music: 1600-1750 (3)**

Lecture—3 hours. Prerequisite: course 124A or consent of instructor. Historical survey of composers and musical styles from the late 1500s to the mid-18th century. GE credit: ArtHum, Wrt | AH, VL, WE. —S. (S.) Berger, Owens

**126. American Music (4)**

Lecture—3 hours; listening—1 hour. Prerequisite: course 10 or course 3A or consent of instructor. Introductory survey of American musics, including

Native American music, Hispanic polyphony, New England psalmody, and selected 20th-century composers and styles. Offered in alternate years. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, WE. —S. (S.) Hess, Levy

**127. Music from Latin America (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Examination of music from Latin America. Characteristic music (i.e., tango, bossa nova, salsa, musica motena, musica andina) as well as its implications in other musical genres. Taught in Spanish. Not open to students who taken Spanish 171 and 171S. (Same course as Spanish 171) May be repeated one time for credit when topic differs. Offered in alternate years. GE credit: ArtHum | AH, WC, -F. (F.) Hess, Irwin, Ortiz

**129A. Musics of the Americas (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or course 11 or course 3A or consent of instructor. Survey of music cultures from North, Central, and South America, including the Caribbean, with emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, DD, VL, WC, WE.

**129B. Musics of Africa, Middle East, Indian Subcontinent (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or course 11 or course 3A or consent of instructor. Survey of music cultures with special emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.

**129C. Musics of East and Southeast Asia (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or course 11 or course 3A or consent of instructor. Survey of music cultures from Japan, China, Korea, Vietnam, and Indonesia, with special emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE. —W. (W.) Lee, Spiller

**129D. Folk Musics of Europe (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or course 11 or course 3A or consent of instructor. Survey of folk musics from all of Europe, with emphasis on the role of music in society and on the elements of music (instruments, genres, form, etc.). Introduction to ethnomusicological theory, methods, approaches. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.

**130A. Applied Study of Music: Advanced; Voice (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Voice. Offered as demand indicates. May be repeated for credit. —F, W, S. (F, W, S.)

**130B. Applied Study of Music: Advanced; Piano (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Piano. Offered as demand indicates. May be repeated for credit. —F, W, S. (F, W, S.)

**130C. Applied Study of Music: Advanced; Harpsichord (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Harpsichord. Offered as demand indicates. May be repeated for credit. —F, W, S. (F, W, S.)

**130D. Applied Study of Music: Advanced; Organ (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Organ. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130E. Applied Study of Music: Advanced; Violin (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Violin. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130F. Applied Study of Music: Advanced; Viola (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Viola. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130G. Applied Study of Music: Advanced; Cello (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Cello. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130H. Applied Study of Music: Advanced; Double Bass (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Double Bass. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130I. Applied Study of Music: Advanced; Flute (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Flute. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130J. Applied Study of Music: Advanced; Oboe (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Oboe. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130K. Applied Study of Music: Advanced; Clarinet (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Clarinet. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130L. Applied Study of Music: Advanced; Bassoon (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Bassoon. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130M. Applied Study of Music: Advanced; French Horn (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; French Horn. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130N. Applied Study of Music: Advanced; Trumpet (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Trumpet. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130O. Applied Study of Music: Advanced; Trombone (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Trombone. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130P. Applied Study of Music: Advanced; Tuba (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Tuba. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130Q. Applied Study of Music: Advanced; Percussion (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Percussion. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130R. Applied Study of Music: Advanced; Classical (1)**

Performance instruction—1 hour. Prerequisite: consent of instructor; admission by audition. Class instruction, arranged by section; Classical. Offered as demand indicates. May be repeated for credit.—F, W, S. (F, W, S.)

**130U. Applied Study of Music: Advanced; Recorder (1)**

Performance instruction—1 hour. Prerequisite: open to Music majors with ability to perform scales and short compositions from standard repertoire; admission by audition and consent of instructor. Class instruction, arranged by section; Recorder.

**131A. Applied Study of Music: Advanced (Individual); Voice (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: course 1 or the equivalent; open to Music majors only; admission by audition and consent of instructor. Individual instruction in Voice. May be repeated for credit.—F, W, S. (F, W, S.)

**131B. Applied Study of Music: Advanced (Individual); Piano (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Piano. May be repeated for credit.—F, W, S. (F, W, S.)

**131C. Applied Study of Music: Advanced (Individual); Harpsichord (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Harpsichord. May be repeated for credit.—F, W, S. (F, W, S.)

**131D. Applied Study of Music: Advanced (Individual); Organ (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Organ. May be repeated for credit.—F, W, S. (F, W, S.)

**131E. Applied Study of Music: Advanced (Individual); Violin (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Violin. May be repeated for credit.—F, W, S. (F, W, S.)

**131F. Applied Study of Music: Advanced (Individual); Viola (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: open to Music majors only; admission by audition and consent of instructor. Individual instruction in Viola. May be repeated for credit.—F, W, S. (F, W, S.)

**131G. Applied Study of Music: Advanced (Individual); Cello (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Cello. May be repeated for credit.—F, W, S. (F, W, S.)

**131H. Applied Study of Music: Advanced (Individual); Double Bass (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Double Bass. May be repeated for credit.—F, W, S. (F, W, S.)

**131I. Applied Study of Music: Advanced (Individual); Flute (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Flute. May be repeated for credit.—F, W, S. (F, W, S.)

**131J. Applied Study of Music: Advanced (Individual); Oboe (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: admission by audition. Individual instruction in Oboe. May be repeated for credit.—F, W, S. (F, W, S.)

**131K. Applied Study of Music: Advanced (Individual); Clarinet (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Clarinet. May be repeated for credit.—F, W, S. (F, W, S.)

**131L. Applied Study of Music: Advanced (Individual); Bassoon (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Bassoon. May be repeated for credit.—F, W, S. (F, W, S.)

**131M. Applied Study of Music: Advanced (Individual); French Horn (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in French Horn. May be repeated for credit.—F, W, S. (F, W, S.)

**131N. Applied Study of Music: Advanced (Individual); Trumpet (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Trumpet. May be repeated for credit.—F, W, S. (F, W, S.)

**131O. Applied Study of Music: Advanced (Individual); Trombone (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Trombone. May be repeated for credit.—F, W, S. (F, W, S.)

**131P. Applied Study of Music: Advanced (Individual); Tuba (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Tuba. May be repeated for credit.—F, W, S. (F, W, S.)

**131Q. Applied Study of Music: Advanced (Individual); Percussion (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Percussion. May be repeated for credit.—F, W, S. (F, W, S.)

**131R. Applied Study of Music: Advanced (Individual); Classical Guitar (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Classical Guitar. May be repeated for credit.—F, W, S. (F, W, S.)

**131U. Applied Study of Music: Advanced (Individual); Saxophone (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor. Open to Music majors only; admission by audition. Admission by audition and consent of instructor. Individual instruction in Saxophone. May be repeated for credit.—F, W, S. (F, W, S.)

**132. Singing for Actors (1)**

Performance—1 hour. Prerequisite: consent of instructor. The elements of basic singing techniques, through selected exercises, vocalises, and songs. May be repeated for credit. (P/NP grading only.) GE credit: AH.

**131B. Applied Study of Music: Advanced (Individual); Piano (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Piano. May be repeated for credit.—F, W, S. (F, W, S.)

**131C. Applied Study of Music: Advanced (Individual); Harpsichord (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: consent of instructor; admission by audition. Individual instruction in Harpsichord. May be repeated for credit.—F, W, S. (F, W, S.)

**131D. Applied Study of Music: Advanced (Individual); Organ (2)**
